**Contact your local PwC representative
for a free tailored demonstration of how GDTO
can benefit your Tax/VAT/GST function.**

In a time when information is key and compliance is vital, GlobalDigitalTaxOnline (GDTO) is an essential tool to help navigate the complex world of tax and the reporting of various digital/electronic services.

The Digital Tax Overview module provides a visualisation and high level assessment in a standardised format of the measures countries have taken. It combines a review of VAT/ GST electronically supplied services measures and digital service taxes (DSTs), equalisation levies, digital permanent establishment rules and more.

If you want a deeper dive into the legislation of countries with gross revenue taxes, the Global DST Legislation Hub provides analysis and a comparative visualisation.

The news and insights modules allow for items to be headlined on the face of the tool or just to form part of a collective Digital Tax News - Global Developments module.

The Digital Tax Calendar alerts you to some of the key dates for DST compliance purposes, leading events and milestones in digital discussions.

Papers on technical interpretations of hot topics are available in Digital Tax Research Guides. These currently include items on DSTs, for example, legal issues, compliance challenges, the incidence of tax and the interaction with other reporting rules for platforms (DAC7).

Additional modules are available, or will be added, to collate, in one place, useful materials like forms or webcasts.

**globaldigitaltaxonline.pwc.com
offers a subscription specific to your needs**

Single user: 3,500 GBP per annum
Multi user (up to 25 users): 7,000 GBP per annum
Multi user (25+ users): POA

This gives you unrivalled access to PwC's tools and services for helping to understand and manage gross revenue DSTs, equalisation levies and similar taxes as well as VAT/GST on electronically supplied services and low value goods, amongst others.
