2023 Transparency Report

For the financial year ended June 30, 2023

삼일회계법인

Message from leadership

Welcome to our 2023 Transparency report

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 151 countries with more than 364,000 people who are committed to delivering quality in assurance, advisory and tax services. We are committed to driving a strong culture of quality and excellence that is core to our purpose.

PwC's global strategy, The New Equation, responds to fundamental changes in the world, including technological disruption, climate change and fractured geopolitics. The New Equation focuses on two interconnected needs that clients face: to build trust, which has never been more important, nor more difficult, and to deliver sustained outcomes in an environment where competition and the risk of disruption are more intense than ever and societal expectations have never been greater.

As part of The New Equation strategy the PwC network is making an incremental US \$3bn investment in quality. This includes a \$1bn investment in a five-year programme to deliver a new audit ecosystem - human-led, tech-powered and data-driven. It will enable us to make continuous improvements to audit quality by further standardizing, simplifying, centralizing and automating our audit work, transforming the experience for our stakeholders and our people.

For more information on The New Equation, please see <https://www.pwc.com/gx/en/>.

PwC's approach to building trust is designed to meet rising expectations of transparency, accountability and stakeholder engagement. It combines expertise in audit, tax and compliance activities with a drive to expand specialist capabilities in areas such as cyber security, data privacy, ESG and AI. It also recognises the importance of quality - and that reporting and compliance represent just one link in a chain that includes organizational culture, executive mindset, aligned standards, certified professionals, stringent controls, tailored technologies and appropriate governance.

Similar to building trust, delivering sustained outcomes requires us to work in an integrated way. Instead of taking a traditional technology-driven approach to transformation, PwC focuses on the outcomes that our efforts are seeking to achieve. To deliver the agreed outcomes, we then mobilize our expertise in areas including – among many others – strategy, digital and cloud services, value creation, people and organization, tax, sustainability reporting, deals, business recovery services, legal and compliance.

Our new strategy builds on our ongoing commitment to quality.

Kee-won Oh
Assurance Leader

A message from our Assurance Leader

As part of the leading professional accounting firms in Korea, we know that trust is the key ingredient of a successful relationship. Trust is vital to the health of our firm and is fundamental to fulfilling our firm's purpose. One of the ways we build trust is by being transparent.

Maintaining audit quality

As auditors, we're also acutely aware of another trust driver: the quality of our audits. That's why we're pleased to present our Transparency Report for 2023, which shows how we maintain quality in our audit work. The report describes our policies, systems and processes for ensuring quality, the results of key quality monitoring programs and reviews, and the way we foster a culture of quality at every level of the firm.

- **We performed our work with integrity and a relentless focus on quality.** We invested significant time and resources to maintain and continually enhance quality. We also continuously assess the impacts of changes in the business environment.
- **We showed our people that we care.** We take appropriate measures to prepare our people for changes in the environment in which we operate. This includes significant investments in the skills of our people.
- **We reimagined the possibility of delivering Tomorrow's audit, today.** We continue to identify new ways for our people to work with one another and with clients to maintain quality and transform the audit experience. This includes significant investments in the capabilities of our firm in areas including artificial intelligence and sustainability, and also to develop a platform to power the next generation audit.

Ongoing investments

Our audit business is fundamental to our strategy and brand. We are committed to improvement in audit quality by our continuous investment in new systems and technology, risk processes and learning and development for our people. We will continue to drive audit quality to contribute to the success of our clients and stakeholders.

Our approach to quality

Specific focus on audit quality across the Network

The PwC Network's Assurance QMSE framework

Delivering high-quality work is at the heart of what we do at PwC; it is what our stakeholders rightly expect of us. To deliver services in an effective and efficient manner that meets the expectations of our clients and other stakeholders, the PwC network has established the Quality Management for Service Excellence (QMSE) framework which integrates quality management into how each firm runs its business and manages risk.

This framework introduces an overall quality objective that is supported by a series of underlying quality management objectives and each firm's system of quality management (SoQM) should be designed and operated so that the overall quality objective, which includes meeting the objectives of ISQM 1, is achieved with reasonable assurance.

The International Standard on Quality Management 1 (ISQM 1)

ISQM 1 became effective 15 December 2022 and required all firms performing audits or review of financial statements, or other assurance or related service engagements to have designed and implemented a SoQM to meet the requirements of the standard.

The PwC Network's Assurance QMSE framework was designed to enable our firms to meet the requirements of ISQM 1. This includes design and implementation of the SoQM to comply with ISQM 1 to meet the effective date and evaluation of the SoQM under the standard by 15 December 2023.

Overall quality objective

To have the necessary capabilities in our organization and to deploy our people to consistently use our methodologies, processes and technology to deliver services in an effective and efficient manner to fulfill the expectations of our clients and other stakeholders.

Integrated and aligned in the right way

The quality objectives focus on having the necessary capabilities and to deploy our people consistently using our intellectual and technological resources to deliver audits in an effective and efficient manner that fulfills the expectations of our clients and stakeholders. Put simply, designing our business and processes to deliver consistently high quality audits.

To help us achieve these objectives, the PwC network invests significant resources in the continuous enhancement of quality across our network. This includes having a strong quality infrastructure supported by the right people, underlying tools and technology at both the network level and within our firm, and a programme of continuous innovation and investment in our technology. The PwC network's Global Assurance Quality (GAQ) organization aims to support PwC firms in promoting, enabling, and continuously improving Assurance quality through effective policies, tools, guidance and systems used to further promote and monitor quality and to build an appropriate level of consistency in what we do. These elements have been integrated and aligned by our network to create a comprehensive, holistic and interconnected quality management framework that each firm tailors to reflect our individual circumstances. Each firm is responsible for utilizing the resources provided by the network as part of our efforts to deliver quality to meet the expectations of our stakeholders.

The quality management process

The achievement of these objectives is supported by a quality management process (QMP) established by our firm and Assurance leadership, business process owners, and partners and staff. This quality management process includes:

- identifying risks to achieving the quality objectives
- designing and implementing responses to the assessed quality risks
- monitoring the design and operating effectiveness of the policies and procedures through the use of process-integrated monitoring activities such as real-time assurance as well as appropriate Assurance quality indicators
- continuously improving the system of quality management when areas for improvement are identified by performing root cause analyses and implementing remedial actions and
- establishing a quality-related recognition and accountability framework to be used in appraisals, remuneration, and career progression decisions

This involves the integrated use of Assurance Quality Indicators to aim to predict quality issues, Real Time Assurance to aim to prevent quality issues, Root Cause Analysis to learn from quality issues and a Recognition and Accountability Framework to reinforce quality behaviors, culture and actions.

The key factors that impacted our system of quality management

Our system of quality management (SoQM) must be designed, implemented and operating on an ongoing basis to achieve the quality objectives. This ongoing process includes monitoring, evaluating, assessing, reporting, and being responsive to changes in quality risks, driven by the firm's internal and external environment. This is our Quality Management Process (QMP). Our focus on quality management is therefore not to apply prescribed rules but rather to design and implement risk responses which are fit for purpose to manage the risks we identify in our own risk assessment and achieve the quality objective taking into consideration the conditions, events, circumstances, actions and/or inactions that may impact our SoQM.

The past several years have seen unprecedented challenges and our firm's SoQM under the QMSE framework has helped us navigate and react to the impact that identified factors had on our ability to achieve the overall assurance quality objective - to deliver quality audit engagements.

Our SoQM involves a dynamic risk assessment process that takes and analyzes the information about these conditions, events, circumstances, actions or inactions which may result in:

- New or changing quality risks to achieving one or more of the quality objectives
- Changes to the risk assessment of existing quality risks
- Changes to the design of the firm's SoQM, including the risk responses

2023 key factors impacting our SoQM

This year, we have seen various factors impact our SoQM but in particular, some of the more meaningful conditions, events, circumstances actions and/or inactions that have necessitated changes into our SoQM include regulatory reforms to Korea's financial reporting and external audit practices that has been effective since November 2018. Since the significant changes are introduced by the Act on External Audit of Stock Companies due to regulatory reform, all local accounting firms are to comply with the Mandatory External Auditor Designation System, Standard Audit Hours System, and Registration requirements for external auditors of stock-listed corporations. Our member firm maintains a high level of system of quality management in order to meet the local regulatory requirement and network standard.

Statement on the effectiveness of the firm's internal quality management system

Management of Samil PricewaterhouseCoopers (Samil PwC) believes that the quality management environment described in this Transparency Report complies with all applicable regulations and provides a reasonable basis for believing that audits carried out by Samil PwC consistently meet the required quality standards.

Cultures and values

Our culture and values

Definition and culture

At PwC, we define quality service as consistently meeting the expectations of our stakeholders and complying with all applicable standards and policies. An important part of our ability to deliver against this quality definition is building a culture across a network of 364,000 people. This culture of quality emphasizes that quality is the responsibility of everyone. Continuing to enhance this culture of quality is a significant area of focus for our global and local leadership teams and one which plays a key part in the measurement of their performance.

Measurement and transparency

For all our businesses, each PwC firm – as part of the agreement by which they are members of the PwC network – is required to have in place a rigorous system of quality management (SoQM); to annually complete a SoQM performance assessment; and to communicate the results of these assessments to global leadership. These results are then discussed in detail with the leadership of each local firm and if they are not at the level expected, a remediation plan is agreed with local leadership taking personal responsibility for its successful implementation.

As the services that our network provides change and develop, and the needs and expectations of our stakeholders also change, the PwC network is continually reviewing and updating the scale, scope and operations of our PwC firms' systems of quality management and investing in programs to enhance the quality of the services that the PwC network provides.

Our firm's commitment to quality

Leadership and tone at the top

Our purpose and values are the foundation of our success. Our purpose is to build trust in society and solve important problems, and our values help us deliver on that Purpose. Our purpose reflects 'why' we do what we do, and our strategy provides us with the 'what' we do. 'How' we deliver our purpose and strategy is driven by our culture, values and behaviors. This forms the foundation of our system of quality management and permeates how we operate, including guiding our leadership actions, and how we build 'trust in what matters'.

Trust in what matters

Today companies are judged on far more than financial outcomes. A company's performance in areas like ESG, cybersecurity, and more can affect its reputation, staff retention, access to capital, and ultimately enterprise value.

That's why we're evolving our assurance offering to provide confidence not just in companies' financial statements but in their impact on people and the planet as well.

We call this 'trust in what matters.' This includes issues that are important to a company and its wider stakeholders. We apply rigorous standards to analyze companies' performance on issues such as climate and diversity. This helps companies demonstrate their progress, enabling these firms to build trust, enhance their corporate reputations, and grow enterprise value.

We encourage our clients to understand what matters to their stakeholders, and we deliver assured information about the company's performance on these measures. We believe that if it needs to be trusted, it needs to be assured. High-quality assurance heightens accountability and trust while giving companies a robust basis for tracking and improving their performance.

When working with our clients and our colleagues to build trust in society and solve important problems, we:

Act with integrity

Make a difference

Care

Work together

Reimagine the possible

This culture is supported by appropriate tone at the top through regular communication from leadership to all partners and staff about the firm's commitment to quality. Key messages are communicated to our firm by our Senior Partner and our leadership team and are reinforced by engagement partners. These communications focus on what we do well and actions we can take to make enhancements. We track whether our people believe that our leaders' messaging conveys the importance of quality to the success of our firm. Based on this tracking, we are confident our people understand our Assurance quality objectives. Delivering service of the highest quality is core to our purpose and our Assurance strategy, the focus of which is to strengthen trust and transparency in our clients, in the capital markets and wider society.

Aim to Predict: Assurance Quality Indicators

We have identified a set of Assurance Quality Indicators (AQIs) that support our Assurance leadership team in the early identification of potential risks to quality, using metrics to aim to predict quality issues. This quality risk analysis is an essential part of our QMSE, and the AQIs, in addition to other performance measures, also provide a key tool in the ongoing monitoring and continuous improvement of our SoQM.

The Risk and Quality Group, led by the Risk and Quality Leader, monitors the firm's AQIs on a regular basis and the results of the AQIs are reported to the Assurance Leader.

Ethics, independence and objectivity

Ethics

At PwC, we adhere to the fundamental principles of ethics set out in the International Ethics Standards Board for Accountants (IESBA) Code of Ethics for Professional Accountants (the Code), which are:

- i. Integrity** – to be straightforward and honest in all professional and business relationships.
- ii. Objectivity** – to not allow bias, conflict of interest or undue influence of others to override professional or business judgements.
- iii. Professional Competence and Due Care** – to maintain professional knowledge and skill at the level required to ensure that a client or employer receives competent professional service based on current developments in practice, legislation and techniques and act diligently and in accordance with applicable technical and professional standards.
- iv. Confidentiality** – to respect the confidentiality of information acquired as a result of professional and business relationships and, therefore, not disclose any such information to third parties without proper and specific authority, unless there is a legal or professional right or duty to disclose, nor use the information for the personal advantage of the professional accountant or third parties.
- v. Professional Behavior** – to comply with relevant laws and regulations and avoid any action that discredits the profession.

Our network standards applicable to all network firms cover a variety of areas including ethics and business conduct, independence, anti-money laundering, anti-trust/fair-competition, anti-corruption, information protection, firm's and partner's taxes, sanctions laws, internal audit and insider trading. We take compliance with these ethical requirements seriously and strive to embrace the spirit and not just the letter of those requirements. All partners and staff undertake annual mandatory training, as well as submitting annual compliance confirmations, as part of the system to support appropriate understanding of the ethical requirements under which we operate. Partners and staff uphold and comply with the standards developed by the PwC network and leadership in Samil PwC monitors compliance with these obligations.

In addition to the PwC Values (Act with integrity, Make a difference, Care, Work together, Reimagine the possible) and PwC Purpose, Samil PwC has adopted the PwC network standards which include a Code of Conduct, and related policies that clearly describe the behaviors expected of our partners and other professionals-behaviors that will enable us to build public trust. Because of the wide variety of situations that our professionals may face, our standards provide guidance under a broad range of circumstances, but all with a common goal-to do the right thing.

Upon hiring or admittance, all staff and partners of Samil PwC are provided with the PwC Global Code of Conduct (PwC Code of Conduct), and are required to complete new hire training, which covers the ethics and compliance network standards, including ethics and the Code of Conduct. They are expected to live by the values expressed in the PwC Code of Conduct in the course of their professional careers at our firm and have a responsibility to report and express concerns, and to do so fairly, honestly, and professionally when dealing with a difficult situation or when observing conduct inconsistent with the Code.

PwC has implemented a network-wide confidential ethics helpline for the reporting of questions or concerns related to behaviors that are inconsistent with the Code of Conduct and related policies. Every PwC firm has a separate and secure tier of the ethics helpline for their confidential matters and investigations. The ethics helpline is also available for third parties, including clients. The ethics helpline allows

our partners, staff and third parties to feel safe raising a question or concern without fear of retaliation.

The PwC Code of Conduct and the ethics helpline are available on line for all internal and external stakeholders at:
<https://www.pwc.com/ethics>

Samil PwC has adopted an accountability framework to facilitate remediation of behaviors that are inconsistent with the PwC Code of Conduct.

Finally, the Organization for Economic Co-operation and Development (OECD) provides guidance, including the OECD Guidelines for Multinational Enterprises (the OECD Guidelines), by way of non-binding principles and standards for responsible business conduct when operating globally. The OECD Guidelines provide a valuable framework for setting applicable compliance requirements and standards. Although the PwC network consists of firms that are separate legal entities which do not form a multinational corporation or enterprise, PwC's network standards and policies are informed by and meet the goals and objectives of the OECD Guidelines.

Objectivity and independence

As auditors of financial statements and providers of other types of professional services, PwC firms and their partners and staff are expected to comply with the fundamental principles of objectivity, integrity and professional behavior. In relation to assurance clients, independence underpins these requirements. Compliance with these principles is fundamental to serving the capital markets and our clients.

The PwC Global Independence Policy, which is based on the Code, including International Independence Standards, contains minimum standards with which PwC firms have agreed to comply, including processes that are to be followed to maintain independence from clients, when necessary.

The independence requirements of the United States Securities and Exchange Commission (SEC) are, in certain instances, more restrictive than the Global Independence Policy. Given the reach of these requirements and their impact on PwC firms in the network, the Policy identifies key areas where an SEC requirement is more restrictive. Provisions that are specifically identified as applicable to SEC restricted entities must be followed in addition to, or instead of, the Policy in the associated paragraph.

Samil PwC has a designated partner (known as the 'Partner Responsible for Independence' or 'PRI') with appropriate seniority and standing, who is responsible for implementation of the PwC Global Independence Policy including managing the related independence processes and providing support to the business.

The partner is supported by a team of independence specialists. The PRI reports directly to the leadership.

Independence policies and practices

The PwC Global Independence Policy covers, among others, the following areas:

- personal and firm independence, including policies and guidance on the holding of financial interests and other financial arrangements, e.g. bank accounts and loans by partners, staff, the firm and its pension schemes;
- non-audit services and fee arrangements. The policy is supported by Statements of Permitted Services (SOPS), which provide practical guidance on the application of the policy in respect of non-audit services to audit clients and related entities;
- business relationships, including policies and guidance on joint business relationships (such as joint ventures and joint marketing) and on purchasing of goods and services acquired in the normal course of business; and
- acceptance of new audit and assurance clients, and the subsequent acceptance of any non-assurance services to be provided to those clients.

In addition, there is a Network Risk Management Policy governing the independence requirements related to the rotation of key audit partners.

These policies and processes are designed to help PwC firms comply with relevant professional and regulatory standards of independence that apply to the provision of assurance services. Policies and supporting guidance are reviewed and revised when changes arise such as updates to laws and regulations including any changes to the Code or in response to operational matters.

Samil PwC supplements the PwC Global Independence Policy as required by local regulations including the independence requirements of the United States Securities and Exchange Commission and those of the Public Company Accounting Oversight Board of the United States and of the EU Audit Regulation where they are more restrictive than the network's policy.

Independence-related systems and tools

As a PwC firm, Samil PwC has access to a number of systems and tools which support PwC firms and their personnel in executing and complying with their independence policies and procedures. These include:

- The Central Entity Service (CES), which contains information about corporate entities including all PwC audit clients and their related entities (including all public interest audit clients and SEC restricted entities) as well as their related securities. CES assists in determining the independence restriction status of clients of the PwC firms and those of other PwC firms before entering into a new non-audit service or business relationship. This system also feeds Independence Checkpoint and the Authorization for Services system;
- 'Independence Checkpoint' which facilitates the pre-clearance of publicly traded securities by all partners and practice managers before acquisition and is used to record their subsequent purchases and disposals. Where a PwC firm wins a new audit client or there is a change in the restriction status of a security, this system automatically informs those holding relevant securities of the requirement to sell the security where required;

- Authorization for Services (AFS) which is a global system that facilitates communication between a non-audit services engagement leader and the audit engagement leader, regarding a proposed non-audit service, documenting the analysis of any potential independence threats created by the service and proposed safeguards, where deemed necessary, and acts as a record of the audit partner's conclusion on the permissibility of the service;
- Joint Business Relationships (JBR) which is a global system used to clear joint (close) business relationships from an independence perspective. JBR is used to facilitate PwC firms' compliance with JBR requirements for new and existing joint business relationships. It assists independence specialists in gathering information to assess, from an independence perspective, the permissibility of proposed joint business relationships and in monitoring the continued permissibility of previously approved existing joint business relationships; and
- Global Breaches Reporting System which is designed to be used to report any breaches of external auditor independence regulations (e.g., those set by regulation or professional requirements) where the breach has cross-border implications (e.g., where a breach occurs in one territory which affects an audit relationship in another territory). All breaches reported are evaluated and addressed in line with the Code.

Samil PwC also has a number of Korea-specific systems which include:

- A rotation tracking system which monitors compliance with Samil PwC's audit rotation policies for Samil PwC's engagement leaders, other key audit partners involved in an audit.

Independence training and confirmations

Samil PwC provides all partners and practice staff with annual or on-going training in independence matters. Training typically focuses on milestone training relevant to a change in position or role, changes in policy or external regulation and, as relevant, provision of services. Partners and staff receive online training on Samil PwC's independence policy and related topics. Additionally, face-to-face training is delivered to members of the practice on an as-needed basis by Samil PwC's independence specialists.

All partners and practice staff are required to complete an annual compliance confirmation, whereby they confirm their compliance with relevant aspects of the PwC firm's independence policy, including their own personal independence. In addition, all partners confirm that all non-audit services and business relationships for which they are responsible comply with policy and that the required processes have been followed in accepting these engagements and relationships. These annual confirmations are supplemented by periodic and ad-hoc engagement level confirmations for audit clients.

Independence monitoring and disciplinary policy

Samil PwC is responsible for monitoring the effectiveness of its system of quality management in managing compliance with independence requirements. In addition to the confirmations described above, as part of this monitoring, we perform:

- Compliance testing of independence controls and processes;
- Personal independence compliance testing of a random selection of, at a minimum, partners and managers as a means of monitoring compliance with independence policies; and
- An annual assessment of our PwC firm's adherence with the PwC network's standard relating to independence.

The results of Samil PwC's monitoring and testing are reported to the firm's management on a regular basis with a summary reported to them on a six-month basis.

Samil PwC has an Accountability Framework and supporting disciplinary policies and mechanisms in place that promote compliance with independence policies and processes, and that require any breaches of independence requirements to be reported and addressed.

This would include discussion with the client's audit committee regarding the nature of a breach, an evaluation of the impact of the breach on the independence of the PwC firm and the engagement team and the need for actions or safeguards to maintain objectivity. Although most breaches are minor and attributable to an oversight, all breaches are taken seriously and investigated as appropriate. Samil PwC also follows supplemental local requirements relating to the reporting of breaches. The investigations of any identified breaches of independence policies also serve to identify the need for improvements in Samil PwC's systems and processes and for additional guidance and training.

Considerations in undertaking the audit

Our principles for determining whether to accept a new client or continue serving an existing client are fundamental to delivering quality, which we believe goes hand-in-hand with our purpose to build trust in society. We have established policies and procedures for the acceptance of client relationships and audit engagements that consider whether we are competent to perform the engagement and have the necessary capabilities including time and resources, can comply with relevant ethical requirements, including independence, and have appropriately considered the integrity of the client. We reassess these considerations in determining whether we should continue with the client engagement and have in place policies and procedures related to withdrawing from an engagement or a client relationship when necessary. The policies and processes we have in place emphasize risk and quality considerations such that financial and operational priorities do not lead to inappropriate judgments about whether to accept or continue a client relationship.

Client and engagement acceptance and continuance

Samil PwC has a process in place to identify acceptable clients based on the PwC network's proprietary decision support systems for audit client acceptance and retention called Acceptance. Acceptance facilitates a determination by the engagement team, business management and risk management specialists of whether the risks related to an existing client or a potential client are manageable, and whether or not PwC should be associated with the particular client and its management. More specifically, this system enables:

Engagement teams:

- To document their consideration of matters required by professional standards related to acceptance and continuance;
- To identify and document issues or risk factors and their resolution, for example through consultation by adjusting the resource plan or audit approach or putting in place other safeguards to mitigate identified risks or by declining to perform the engagement; and
- To facilitate the evaluation of the risks associated with accepting or continuing with a client and engagement.

PwC firms (including PwC firm leadership and risk management):

- To facilitate the evaluation of the risks associated with accepting or continuing with clients and engagements;
- To provide an overview of the risks associated with accepting or continuing with clients and engagements across the client portfolio; and
- To understand the methodology, basis and minimum considerations all other PwC firms in the network have applied in assessing audit acceptance and continuance.

Accountability and incentives

Reinforce: Recognition and Accountability Framework

Our Recognition and Accountability Framework (RAF) reinforces quality in everything our people do in delivering on our strategy, with a focus on the provision of services to our clients, how we work with our people and driving a high-quality culture. It holds Partners accountable for quality behaviors and quality outcomes beyond compliance. Our RAF considers and addresses the following key elements:

- **Quality outcomes:** We provide transparent quality outcomes to measure the achievement of the quality objectives. Our quality outcomes take into account meeting professional standards and the PwC network and our firm's standards and policies
- **Behaviors:** We have set expectations of the right behaviors that support the right attitude to quality, the right tone from the top and a strong engagement with the quality objective
- **Interventions/recognition:** We have put in place interventions and recognition that promotes and reinforces positive behaviors and drives a culture of quality
- **Consequences/reward:** We have implemented financial and non-financial consequences and rewards that are commensurate to outcome and behavior and sufficient to incentivise the right behaviors to achieve the quality objectives

By evaluating the annual performance of the Assurance partners with a greater emphasis on the quality results, our RAF shows our dedication to quality.

Our people

Our people

People strategy

Our people strategy was developed in support of our broader business strategy, The New Equation. We are focused on being the world's leading developer of talent and enabling our people with greater agility and confidence in a rapidly changing world. Specific focus areas include creating a resilient foundation for times of change through supporting the well-being of our people and enabling effective delivery; developing inclusive leaders for a shifting world; and, enabling our workforce for today's realities and tomorrow's possibilities.

Inclusion and diversity

At PwC, we're committed to being a leading organization for inclusion belonging with our people, clients, and external stakeholders and a leading employee destination for diverse talent. We are focused on ensuring our ways of working embrace diversity and fostering an inclusive environment in which our people are comfortable bringing their whole selves to work and feel that they belong and can reach their full potential. As demonstrated through our core values of Care and Work Together, we strive to more deeply understand and empathize with different backgrounds, perspectives and experiences. We know that when people from different backgrounds and with different points of view work together, we create the most value for our clients, our people, and society.

Recruitment

Samil PwC aims to recruit, train, develop and retain the best and the brightest staff who share in the firm's strong sense of responsibility for delivering high-quality services. Our hiring standards include a structured interview process with behavior-based questions built from The PwC Professional framework, and assessment of academic records. In FY23, we recruited 599 new people including 418 assurance professionals.

Number of new hires

	FY23	FY22
KICPA	457	617
Specialists	142	256
Total	599	873

Team selection, experience and supervision

Our audit engagements are staffed based on expertise, capabilities and years of experience. Engagement leaders determine the extent of direction, supervision and review of junior staff.

Feedback and continuous development

Our team members obtain feedback on their overall performance, including factors related to audit quality, such as technical knowledge, auditing skills and professional skepticism. Audit quality is an important factor in performance evaluation and career progression decisions for both our partners and staff. Feedback on performance and progression is collected via H-Link, our local performance evaluation tool. We also use Workday to record career development discussions. Ongoing feedback conversations help our people grow and learn faster, adapt to new and complex environments, and bring the best to our clients and firm.

Career progression

Samil PwC uses The PwC Professional, our global career progression framework, which sets out clear expectations at all staff levels across five key dimensions. The framework underpins all elements of career development and helps our people develop into well-rounded professionals and leaders with the capabilities and confidence to produce high-quality work, deliver an efficient and effective experience for our clients, execute our strategy, and support our brand. Our annual performance cycle is supported by continuous feedback conversations and regular check-ins with the individual's Team Leader to discuss their development, progression and performance.

Retention

Turnover in the public accounting profession is often high because as accounting standards and regulations change, accountants are in demand and the development experience we provide makes our staff highly sought after in the external market. Our voluntary turnover rate fluctuates based on many factors, including the overall market demand for talent.

Average retention rate by staff level

Global People Survey

Each PwC firm participates in an annual Global People Survey, administered across the network to all of our partners and staff. Samil PwC is responsible for analyzing and communicating results locally, along with clearly defined actions to address feedback.

Partners accountability and compensation

Partners are evaluated based on their contributions to people, quality, and profitable growth. Our accountability program holds partners, including lead audit partners and quality review partners, accountable for audit areas requiring their review that are found by external or internal inspections to have deficiencies. Partner accomplishments are measured based on the partner's relative performance against established goals. Partners receive a share of the firm's profits based on their level of responsibility, the firm's performance, and the partner's performance.

The PwC Professional

The PwC Professional supports the development and career progression of our staff by providing a single set of expectations across all lines of service, geographies, and roles; outlining the capabilities needed to thrive as purpose-led and values-driven leaders at every level.

KICPA by level

Professional development

We are committed to putting the right people in the right place at the right time. Throughout our people’s careers, they are presented with career development opportunities, classroom, virtual classroom and on-demand learning, and on-the-job real time coaching/development. Our flexible training portfolio facilitates personalized learning with access to a variety of educational materials, including webcasts, articles, videos, and courses.

Achieving a professional credential supports our firm’s commitment to quality through consistent examination and certification standards. Our goal is to provide our staff with a more individualized path to promotion and support them in prioritizing and managing their time more effectively. Providing our people with the ability to meet their professional and personal commitments is a critical component of our people experience and retention strategy.

Average training hours completed per audit professional

Mandatory training attendance of audit professional who completed all mandatory training courses

Continuing education

We, and other PwC firms, are committed to delivering quality assurance services around the world. To maximize consistency in the network, the formal curriculum, developed at the network level, provides access to training materials covering the PwC audit approach and tools-this includes updates on auditing standards and their implications, as well as areas of audit risk and areas of focus for quality improvement.

This formal learning is delivered using a blend of delivery approaches, which include remote access, classroom learning, virtual classroom and on-the-job support. The curriculum supports our primary training objective of audit quality, while providing practitioners with the opportunity to strengthen their technical and professional skills, including professional judgment while applying a skeptical mindset.

The design of the curriculum allows us to select, based on local needs, when we will deliver the training. Our Learning & Education leader then considers what additional training is appropriate – formal and/or informal – to address any additional specific local needs.

Partners' average years of experience at PwC

Specialists

Data and technology can help reveal insights, but it takes an inquisitive person with well-rounded business knowledge to understand what those insights mean. We recruit professionals with these capabilities-people who can deliver the highest quality outcomes in terms of client service and compliance. To deliver highest quality outcomes in an effective and efficient manner, the auditors concentrate on sophisticated accounting and auditing standards, and use works of specialists in areas such as risk, valuation, taxation, actuarial, forensic, law and other.

Specialists in specific areas

FY23

FY22

* Fulcrum supports audit engagement teams in highly complex accounting areas such as valuation, taxation, lease and global coordination.

Technology

As technological change accelerates, our clients want to trust their information with organizations that don't merely keep up but lead the way. We've made a global commitment to offer leading audit technology, and we've invested heavily in tools to match our approach. The result is greater quality and insight to our clients.

Our tools

As a PwC firm, Samil PwC has access to and uses PwC Audit, a common audit methodology and process. This methodology is based on the International Standards on Auditing (ISAs), with additional PwC policy and guidance provided where appropriate. PwC Audit policies and procedures are designed to facilitate audits conducted in compliance with all ISA requirements that are relevant to each individual audit engagement. Our common audit methodology provides the framework to enable PwC firms to consistently comply in all respects with applicable professional standards, regulations and legal requirements. Samil PwC also applies additional policies and guidance, where appropriate, to ensure that each engagement is also compliant with Korean Standards on Auditing.

Tools and technologies to support our audit

Our technology

- **Aura**, our global audit documentation platform, is used across the PwC network. Aura helps drive how we build and execute our audit plans by supporting teams in applying our methodology effectively, by creating transparent linkage between risks, required procedures, controls and the work performed to address those risks, as well as providing comprehensive guidance and project management capabilities. Targeted audit plans specify risk levels, controls reliance and substantive testing. Real time dashboards show teams audit progress and the impact of scoping decisions more quickly.
- **Connect** is our collaborative platform that allows clients to quickly and securely share audit documents and deliverables. Connect also eases the burden of tracking the status of deliverables and resolving issues by automatically flagging and tracking outstanding items and issues identified through the audit for more immediate attention and resolution. Clients are also able to see audit adjustments, control deficiencies, and statutory audit progress for all locations- in real time.
- **Connect Audit Manager** streamlines, standardizes and automates group and component teams coordination for multi-location and statutory/regulatory audits. It provides a single digital platform to see all outbound and inbound work and digitizes the entire coordination process which facilitates greater transparency, compliance and quality for complex multi-location audits.
- **Halo**, our data auditing tools, address large volumes of data, analyzing whole populations to improve risk assessment, analysis and testing. For example, Halo for Journals enables the identification of relevant journals based on defined criteria making it easier for engagement teams to explore and visualize the data to identify client journal entries to analyze and start the testing process.
- **Halo Platform** enables our engagement teams to manage all data extractions, executions and storage for all applications through our existing platforms to increasingly simplify one central location, allowing our engagement teams to monitor the status of data uploads and use the acquired client data for multiple applications during the audit.

- **Count**, which facilitates the end-to-end process for observing inventory counts, allows our engagement teams to create and manage count procedures, counters to record results directly onto their mobile device or tablet and engagement teams to export final results into Aura.
- **PwC Confirmations**, our global, secure, web-based confirmation platform providing a guided experience to preparing, sending, monitoring and receiving electronic and paper responses for our auditors and third-party confirmers as well as a dashboard view to assist in status updates. The Confirmer portal allows confirmers to easily navigate and provide responses.

Our Next Generation Audit (NGA)

As part of our commitment to building trust and delivering sustained outcomes, the PwC network is investing in a multi-year effort to deliver a new global audit platform to power our next generation audit, ultimately replacing our legacy technologies such as Aura and Connect. By exploring and investing in new technologies and redefining underlying audit processes, PwC will further standardize, simplify, centralize, and automate our audit work. PwC's investment will accelerate ongoing innovation and enable us to respond to changing stakeholders' needs while taking advantage of emerging technologies, providing a transformed audit experience focusing on continuous quality enhancement. PwC's vision for NGA is to provide efficient, robust and independent assurance and audit insights across financial and non-financial information, helping to build trust in what matters to our stakeholders. As PwC gains momentum around the next generation audit programme, we will continue to release new capabilities on an ongoing basis to enhance quality and the overall audit experience.

Reliability and auditability of audit technologies

Our firm has designed and implemented processes and controls to underpin the reliability of these audit technologies. This includes clarification of the roles and responsibilities of audit technology owners and users. In addition, we have guidance focused on the sufficiency of audit documentation included in the workpapers related to the use of these audit technologies, including consideration of the reliability of the solution, and the documentation needed to assist the reviewer in meeting their supervision and review responsibilities as part of the normal course of the audit.

Confidentiality and information security

Confidentiality and information security are key elements of our professional responsibilities. Misuse or loss of confidential client information or personal data may expose the firm to legal proceedings, and it may also adversely impact our reputation. We take the protection of confidential and personal data very seriously.

Our focus on our clients requires a holistic and collaborative approach to reducing security, privacy and confidentiality risks with significant investment in appropriate controls and monitoring to embed an effective three lines of defense model. This model has enabled us to strengthen our information security organization, align to industry good practice and improve our internal control frameworks.

Data privacy

The firm maintains a robust and consistent approach to the management of all personal data, with everyone in our organization having a role to play in safeguarding personal data. We have continued to build on our extensive GDPR readiness program, and are committed to embedding good data management practices across our business.

Information security

Information Security is a high priority for the PwC network. PwC firms are accountable to their people, clients, suppliers, and other stakeholders to protect information that is entrusted to them.

Failure to protect information could potentially harm the individuals whose information PwC firms hold, lead PwC firms to suffer regulatory sanctions or other financial losses, and impact the PwC reputation and brand. The Information Security Policy (ISP) outlines the minimum security requirements with which every PwC firm must comply.

PwC firm compliance with the ISP is measured through quarterly data-driven assessments as well as a yearly evidence based assessment for each PwC firm.

Deviations that result from the assessment are prioritized for remediation per timelines agreed with firm leadership.

Supporting engagement performance

Evolving delivery model

We continue to evolve the way we deliver our services, so our people give our clients an even better experience, further enhance the quality of what we do and create economic capacity to invest in the future. We use Shared Delivery Center (SDC) to streamline, standardize, automate, and centralize portions of the audit.

Direction, coaching and supervision

Engagement leaders and senior engagement team members are responsible and accountable for providing quality coaching throughout the audit and supervising the work completed by junior members of the team, coaching the team and maintaining audit quality. Engagement teams utilize Aura which has capabilities to effectively monitor the progress of the engagement to determine that all work has been completed and reviewed by appropriate individuals, including the engagement leader.

Use of specialists

We also operate a centralized team with specialists called Fulcrum. Fulcrum supports audit engagement teams in highly complex accounting areas such as valuation, taxation, actuarial, lease and global coordination.

Consultation culture

Consultation is key to maintaining high audit quality. We have formal protocols about mandatory consultation, in the pursuit of quality. For example, our engagement teams consult with appropriate groups in areas such as taxation, risk, valuation, actuarial and other specialties, as well as individuals within our Risk and Quality Group (the “Group”).

The Group comprises technical accounting, auditing, and financial reporting specialists as well as risk and quality. These specialists play a vital role in keeping our policies and guidance in these areas current by tracking new developments in accounting and auditing, and providing those updates to professional staff.

Professionals in the quality management functions

FY23

FY22

Quality Review Partners (QRP)

Specific audit engagements are assigned a QRP as part of the member firm's system of quality management as required by professional standards. These partners, who have the necessary experience and technical knowledge, are involved in the most critical aspects of the audit. For example, they may advise on matters of firm independence, significant risks and a team's responses to those risks, and specific accounting, auditing, and financial reporting and disclosure issues.

Differences of opinion

Protocols exist to resolve the situations where a difference of opinion arises between the engagement leader and either the QRP, another Assurance partner. These include the use of technical panels consisting of partners independent of the engagement. If the difference in views still cannot be reconciled, a final decision should be made by the engagement leader and the Assurance Leader in consultation with the Risk and Quality Group partner and others they deem appropriate.

Monitoring

Monitoring of assurance quality

We recognize that quality in the Assurance services we deliver to clients is key to maintaining the confidence of investors and other stakeholders in the integrity of our work. It is a key element to our Assurance strategy.

Responsibility for appropriate quality management lies with the leadership of Samil PwC. This includes the design and operation of an effective System of Quality Management (SoQM) that is responsive to our specific risks to delivering quality audit engagements, using the network's QMSE framework.

The overall quality objective under the QMSE framework is to have the necessary capabilities in our firm and to deploy our people to consistently use our methodologies, processes and technology in the delivery of Assurance services in an effective and efficient manner to fulfill the valid expectations of our clients and other stakeholders.

Our firm's monitoring includes an ongoing assessment aimed at evaluating whether the policies and procedures which constitute our SoQM are designed appropriately and operating effectively to provide reasonable assurance that our audit, non-audit assurance and related services engagements are performed in compliance with laws, regulations and professional standards (also referred to as our ongoing monitoring). This includes the use of Real Time Assurance.

Aim to Prevent: Real Time Assurance

We have developed a Real Time Quality Assurance (RTA) programme designed to provide preventative monitoring that helps coach and support engagement teams get the 'right work' completed in real-time, during the audit.

We complete most of the significant audit procedures that can be performed before the financial fiscal year-end such as the impact analysis of financial statements, the preparation of reports and discussion with clients for identified risks and issues before the financial fiscal year-end. We actively respond to changes in the environment such as changes in external audit-related laws and revisions to the Standard Audit Hours system through the RTA.

For the effective implementation of RTA, time budgets are created and managed by each engagement team to monitor the planning and execution of RTA. The time budget is prepared based on engagement activities so that the annual audit plan and resource management can be performed more efficiently and effectively. Partners and managers confirm and approve the actual engagement activities in connection with the time report system for each person to monitor audit progress.

In addition to the ongoing monitoring notes above, our monitoring also encompasses periodic assessment of our SoQM which includes the review of completed engagements (Engagement Quality Reviews - EQR) as well as periodic monitoring of our SoQM by an objective team within our firm. The results of these procedures, together with our ongoing monitoring, form the basis for the continuous improvement of our SoQM. EQRs are performed under a network-wide inspection programme based on professional standards and PwC audit methodology.

EQRs are risk-focused reviews of completed engagements covering, on a periodic basis, individuals in our firm who are authorized to sign audit, non-audit assurance or related services reports. The review assesses whether an engagement was performed in compliance with PwC Audit guidance, applicable professional standards and other applicable engagement-related policies and procedures. Each engagement lead partner is reviewed at least once every three years due to local regulatory requirements.

Reviews are led by experienced Assurance partners, supported by objective teams of partners, directors, senior managers and other specialists. EQR reviewers may be

sourced from other PwC firms if needed to provide appropriate expertise or objectivity. Review teams receive training to support them in fulfilling their responsibilities, and utilize a range of checklists and tools developed at the network level when conducting their inspection procedures. The network inspection team supports review teams by monitoring the consistent application of guidance on classification of engagement findings and engagement assessments across the network.

One way we monitor quality is to review audit work on certain audit engagements prior to the issuance of their respective audit report. Each year we reassess the scope and areas of focus of these reviews, taking into consideration recent inspection results and knowledge gained by the Risk and Quality Group in supporting engagement teams.

Our pre-issuance reviews provide engagement teams with timely feedback, which can be incorporated into their audit prior to the completion of fieldwork. These reviews primarily focus on the implementation of new standards and policies, audit methodology enhancements, and matters noted during inspections cycles.

Internal inspection

Additionally, the PwC Network undertakes periodic reviews to evaluate certain elements of PwC firms' systems of quality management. The Network also looks at the PwC firm leadership's own assessment of the effectiveness of their system of quality management and their determination of whether the overall quality objective has been achieved.

The inspection results are reported to our firm's leadership who are responsible for analyzing the results of the inspections along with the findings identified from all sources of information and implementing remedial actions as necessary. In situations where adverse quality matters on engagements are identified, based on the nature and circumstances of the issues, the responsible partner or our firm's Assurance leadership personnel may be subject to further sanctions in accordance with our firm's Recognition and Accountability Framework.

Assurance partners of our firm receive information on the results of the network inspection program, designed for their use in assessing the scope of audit work they determine needs to be performed and their reliance on work performed by PwC firms in connection with their audit of a client's consolidated financial statements.

Learn: Root Cause Analysis

We perform analyses to identify potential factors contributing to our firm's audit quality so that we can take actions to continuously improve. Our primary objectives when conducting such analyses are to understand what our findings tell us about our SoQM and to identify how our firm can provide the best possible environment for our engagement teams to deliver a quality audit. We look at quality findings from all sources including our own ongoing monitoring of our SoQM as well as Network inspection of our SoQM, audits both with and without deficiencies—whether identified through our own internal inspections process or through external inspections and other inputs such as our Global People Survey and financial statement restatements and accounting errors—to help identify possible distinctions and learning opportunities.

For individual audits, an objective team of reviewers identifies potential factors contributing to the overall quality of the audit. We consider factors relevant to technical knowledge, supervision and review, professional skepticism, engagement resources, and training, amongst others. Potential causal factors are identified by evaluating engagement information, performing interviews, and reviewing selected audit working papers to understand the factors that may have contributed to audit quality.

In addition, the data compiled for audits both with and without deficiencies is compared and contrasted to identify whether certain factors appear to correlate to audit quality. Examples of this data include the hours incurred on the audit, the number of years that key engagement team members have been on the engagement, and whether the engagement was subject to a pre-issuance review.

Our goal is to understand how quality audits may differ from those with deficiencies, and to use these learnings to continuously improve all of our audits. We evaluate the results of these analyses to identify enhancements that may be useful to implement across the practice. We believe these analyses contribute significantly to the continuing effectiveness of our quality management.

Audit quality reviews - External

Samil PwC and our partners are subject to review by the Financial Supervisory Service (FSS). The inspection is undertaken every two years, which covers both the firm-level and engagement-level quality management reviews.

The Public Company Accounting Oversight Board (PCAOB) conducts its inspection jointly with FSS. Engagements covered by the scope of the PCAOB inspection include any US registrant including Domestic Filers and Foreign Private Issuers ('FPIs') as well as Korea components of groups listed in the United States.

The FSS and PCAOB jointly commenced its most recent inspection from October 18, 2021 to November 19, 2021. There were no significant adverse findings from the firm-level quality management review.

PwC network

PricewaterhouseCoopers International Limited

Firms in the PwC network are members in, or have other connections to PwCIL, an English private company limited by guarantee. PwCIL does not practise accountancy or provide services to clients. Rather its purpose is to act as a coordinating entity for PwC firms in the PwC network. Focusing on key areas such as strategy, brand, and risk and quality, PwCIL coordinates the development and implementation of policies and initiatives to achieve a common and coordinated approach amongst individual PwC firms where appropriate. PwC firms of PwCIL can use the PwC name and draw on the resources and methodologies of the PwC network. In addition, PwC firms may draw upon the resources of other PwC firms and/or secure the provision of professional services by other PwC firms and/or other entities. In return, PwC firms are bound to abide by certain common policies and to maintain the standards of the PwC network as put forward by PwCIL.

The PwC network is not one international partnership. A PwC firm cannot act as agent of PwCIL or any other member firm, cannot obligate PwCIL or any other PwC firm, and is liable only for its own acts or omissions and not those of PwCIL or any other PwC firm. Similarly, PwCIL cannot act as an agent of any PwC firm, cannot obligate any PwC firm, and is liable only for its own acts or omissions. PwCIL has no right or ability to control any PwC firm’s exercise of professional judgment.

The governance bodies of PwCIL are:

Global Board, which is responsible for the governance of PwCIL, the oversight of the Network Leadership Team and the approval of network standards. The Board does not have an external role. The Board is comprised of 20 members. Two are appointed as external, independent directors, and the other 18 Board members are elected by partners from PwC firms around the world every four years.

Network Leadership Team, which is responsible for setting the overall strategy for the PwC network and the standards to which the PwC firms agree to adhere.

Strategy Council, which is made up of the leaders of the largest PwC firms and regions of the network, agrees on the strategic direction of the network and facilitates alignment for the execution of strategy.

Global Leadership Team, which is appointed by and reports to the Network Leadership Team and the Chairman of the PwC network. Its members are responsible for leading teams drawn from PwC firms to coordinate activities across all areas of our business.

Legal and governance structure

Legal and governance structure

Legal structure and ownership of Samil PwC

Samil PricewaterhouseCoopers LLC (the “Firm”) is a limited liability company and is wholly owned by its members, who are commonly referred to as partners. Samil PwC is a network firm of PricewaterhouseCoopers. The Firm has 359 partners. The Firm also operates and controls a number of corporate entities that are required for legal and operational purposes.

Governance structure of Samil PwC

The firm’s Senior Partner serves as Chairman and Chief Executive Officer and manages the firm pursuant to the powers delegated to him by the firm’s partners.

- **Partner’s General Committee**

Partner’s General Committee (the “General Committee”) is composed of all partners of the firm. The General Committee determines the basic policies of the firm’s management and resolves important matters related to management, including decisions on the appointment and dismissal of the CEO. The firm’s Senior Partner serves as Chairman of the General Committee. Each partner has one voting right for each unit of investment.

- **Oversight Board**

Oversight Board (the “Board”) represents the partners with respect to the business and operations conducted. The Board is also responsible to the partners on internal partnership matters (including partnership admissions and withdrawals), acts as a sounding board for early discussions of strategic matters affecting partners, provides feedback and advice to the management on issues of concern to the partners, and advises the management on policies which may affect the rights, responsibilities, benefits and obligations of partners.

- **Executive committee**

Samil PwC has a leadership team referred to as the Executive Committee (the “Committee”). Members of the Committee are appointed by the Senior Partner and are responsible for the management of the firm’s operations. The Committee is led by the Senior Partner who is responsible for leading and managing the firm, including the setting and implementation of the overall firm’s strategy, establishing and determining the effectiveness of the firm’s system of internal control. Changes to the Committee are determined by the Senior Partner. The Committee members meet monthly, with additional meetings called when required.

Members of the Executive Committee as of June 30, 2023

Hoonsoo Yoon
CEO, Territory Senior Partner

Kee-Won Oh
Assurance Leader

Alex Joong-Hyun Lee
Tax Leader

Dae-Joon Park
Deals Leader
