In brief

New edition of a Unified Commodity nomenclature of cross-border economic activity of EAEU and unified customs tariff of the EAEU comes into force from 1 January 2022.

In details

On 14 September 2021, the Council of Eurasian Economic Commission approved the 7th edition of Harmonized Commodity Description and Coding System (the HC), which is an international basis for the common HS Code EAEU. This will come into force from 1 January 2022.

The new edition of the HC contains more than 350 amendments due to changes in the nature and structure of world trade, global social and environmental issues.

At the same time, the rates of import customs duties of the new version of the ETT EAEU will remain at the current level and fully take into account the World Trade Organization tariff obligations framework.

How can we help you?

As of date of this Alert there are no further details on the new edition of the HC, but we follow up with this development and will give an update once we have more information. In the meantime, we will be happy to answer your questions on this or other topics.

If you are interested in additional information, please contact us.
