Depreciation can be claimed either on a prorated basis in accordance with the prescribed annual rates for assets that are not acquired at the beginning of the financial year or on an annual basis.

The cost of repairs and maintenance exceeding 10% of the acquisition cost of the asset in a given year is deemed to be an expense of a capital nature and should be capitalised and depreciated over the remaining life of the asset.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is generally deductible to the extent it is incurred in the generation of assessable profits.

Interest expenses

There is no thin capitalisation rule in Macau. However, the MFB may assess the reasonableness of the interest rate charged for interest expense paid to related parties.

Bad debts

The amount provided against doubtful trade receivables is an allowable tax deduction, but the provision cannot exceed 2% of the total receivables, except in the case of banks, where the minimum provisions required under the local banking regulations are fully tax-deductible.

Debts considered uncollectible may be written off only when adequate proof can be shown, usually by way of bankruptcy court proceedings.

Charitable contributions

A deduction of up to 0.2% of the company's turnover is allowable for donations to charitable organisations recognised by the tax authority.

Pension expenses

The employer's contribution to the staff provident fund legally registered in Macau is fully tax-deductible, up to 15% of the employees' basic salary.

Fine and penalties

Tax fines are not deductible.

Taxes

Taxes, except for complementary tax and taxes paid on corporate profits, are generally deductible to the extent they are incurred in the generation of assessable profits.

Other significant items

- An amount provided against stock obsolescence of up to 3% of the total stock value at year-end is allowed as a tax deduction.
- Losses arising from insurable risks are not allowable as a tax deduction.
- Staff social welfare expenses paid for the benefit of employees (e.g. canteens, libraries) are fully tax-deductible.

Net operating losses

Agreed tax losses can be carried forward for three consecutive years for Group A taxpayers. Group B taxpayers are not allowed to carry their tax losses forward to future years. Tax losses cannot be carried back in Macau.

Payments to foreign affiliates

The regulations make no specific mention of royalties and service fees paid to foreign affiliates. The MFB generally monitors the deductibility of such payments. Payments to foreign service providers for consulting services or construction-related services are not deductible if such consulting contracts are not properly registered in Macau.

Group taxation

There is no provision for group taxation in Macau.

Transfer pricing

There is no transfer pricing provision in the Macau tax regime.

Thin capitalisation

There is no thin capitalisation provision in the Macau tax regime.

Controlled foreign companies (CFCs)

There are no CFC rules in the Macau tax regime.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit provision in the Macau Complementary Tax Law. Foreign tax credit is only available under the relevant provisions of the comprehensive tax arrangements/agreements that Macau has entered into with the People's Republic of China, Portugal, Mozambique, and Cabo Verde, respectively.

Capital investment incentives

A 50% reduction in complementary tax and stamp duty on certain transactions, as well as exemptions from annual industrial tax (currently exempt for all taxpayers) and property tax (up to periods prescribed by the MFB), are allowable for taxpayers in the manufacturing industry (as defined in the Decree-Law) whose capital investment is aimed at the introduction of new products or high technology, improvement of productivity, and increase in exports of goods to new markets.

Where profits are retained in reserves and reinvested in installation of new equipment within the following three financial years, the reinvested reserves can be deducted from taxable profits, provided that the reinvested reserves are attributable to profits earned from normal business operations and the investment is considered to be beneficial for the economic development of Macau.

Offshore services business incentives

Profits derived by approved offshore institutions from prescribed offshore service-related activities are exempt from all forms of taxes, such as complementary tax, annual industrial tax (currently exempt for all taxpayers), and stamp duties.

Incentives for owners of touristic facilities

Additional incentives, such as an extended property tax exemption period, exemption from annual industrial tax (currently exempt for all taxpayers), reduction in stamp duty, as well as acceleration of depreciation for complementary tax purposes, are available to owners of facilities that qualify as touristic facilities.

Withholding taxes

Currently, there is no provision in the Macau Complementary Tax Law for the withholding of taxes from payments made by domestic corporations to overseas companies.

Tax administration

Taxable period

The Macau tax year is on a calendar-year basis.

Tax returns

Assessments are made by the MFB upon review of the tax returns, which must be lodged before 31 March or 30 June of each year for Group B or Group A taxpayers, respectively.

Payment of tax

A provisional tax payment calculated based on the declared taxable profit for a Group A taxpayer or final assessed profit for a Group B taxpayer is payable in two equal instalments, in September and November. However, if the amount is not greater than MOP 3,000, payment will be requested in one lump sum amount in September. For Group A taxpayers, a final tax assessment will be issued upon completion of the tax assessment by the MFB and additional tax payment, if any, will be due around a month's time after issuance.

Tax audit process

There is no specific tax audit cycle in Macau. The MFB is empowered by the Macau Complementary Tax Law to carry out a tax audit whenever the information provided by a taxpayer in its tax return is considered unclear or insufficient, and subsequent replies to the MFB's queries, if any, are considered inadequate.

Statute of limitations

The statute of limitations period is five assessment years from the relevant year of assessment for both Group A and Group B taxpayers.

Topics of focus for tax authorities

The MFB generally focuses on the deductibility of expenses (e.g. staff costs, provisions, depreciation, management fees, payments made to overseas service providers, bad debts, donations).

Other issues

Choice of business entity

A foreign company conducting business (except for short-term projects) in Macau is obligated to set up a legal establishment, which can be in the form of a company or a branch.

There are two types of Macau companies: companies limited by shares and companies limited by quotas. The capital and corporate governance requirements for a company limited by shares are higher than a company limited by quotas, and, in general, a company limited by quotas is used by investors that are not in regulated industries.

Exchange of information

Law 20/2009 is the legislation that governs the exchange of information by Macau with other tax jurisdictions within the scope of bilateral tax treaties or arrangements. Its objective is to promote the transparency of the Macau tax administration and to demonstrate Macau's willingness to cooperate with treaty partners in combating tax avoidance or tax evasion activities.

The information to be exchanged under Law 20/2009 is strictly confined to information collected for tax purposes only, and includes the following:

- Information collected within the jurisdiction of the MFB.
- Information collected by the MFB from financial institutions that are governed by the Macau Financial System Act and offshore institutions that are governed by the Macau Offshore Law (the Institutions).

So far, Macau has concluded tax information exchange agreements (TIEAs) or DTAs that comply with the latest internationally agreed standards with 22 different tax jurisdictions. The following tables summarise the TIEAs and DTAs that Macau has signed, and the TIEAs and DTAs that are in negotiation:

TIEAs have been signed by Macau with the following countries:

- Argentina
- Australia
- Denmark
- Faroe Islands
- Finland
- Greenland
- Guernsey
- Iceland
- India
- Ireland
- Jamaica
- Japan
- Malta
- Norway
- Sweden
- United Kingdom of Great Britain and Northern Ireland

TIEAs are in negotiation with the following countries:

- Germany
- New Zealand

DTAs have been signed by Macau with the following countries:

Treaty partners	Effective date
Belgium	Not yet effective
Cabo Verde	11 January 2011
The Mainland of China	1 January 2004 (Note that the first protocol and the second protocol became effective on 15 September 2010 and 8 October 2011, respectively)
Mozambique	11 January 2011
Portugal	1 January 1999
Vietnam	Not yet effective

A DTA with Hong Kong is in negotiation.

It is believed that more comprehensive DTAs or TIEAs will be signed between Macau and other tax jurisdictions in the near future to demonstrate Macau's willingness to continue to cooperate with the Organisation for Economic Co-operation and Development (OECD) countries in combating tax avoidance or evasion activities.

As the information of a Macau taxpayer is becoming more transparent under comprehensive DTAs or TIEAs, it is important for Macau companies with cross-border transactions to perform periodic tax health checks to ensure that tax planning arrangements, if any, that have been put in place in the past, remain technically defensible. As Macau offshore companies continue to be a focus of investigations for many tax jurisdictions, it is important to ensure that such companies have adequate commercial substance in Macau and the companies' transfer pricing policies are supported by appropriate transfer pricing documentation and transfer pricing studies.

Foreign Account Tax Compliance Act (FATCA)

On 14 December 2016, Macau and the United States (US) signed an inter-governmental agreement (IGA) that will facilitate compliance with the US FATCA by financial institutions in Macau. FATCA is an anti-tax evasion regime enacted by the United States to detect US taxpayers who use accounts with non-US financial institutions to conceal income and assets from the US Internal Revenue Service (IRS). The IGA signed between Macau and the United States is Model 2, which requires financial institutions in Macau to report the relevant account information of US taxpayers to the US IRS directly, supplemented by group requests made by the US IRS, on a need basis, for exchange of information on relevant US taxpayers at a government level. Under the IGA, financial institutions in Macau need to register and conclude separate individual agreements with the US IRS. Under the agreements, these institutions shall seek the consent of their account holders who are US taxpayers for reporting their account information to the US IRS annually. The IGA covers exemptions for financial institutions or products that present low risks for tax evasion by US taxpayers.

Significant developments

There have been no significant corporate tax developments in Macedonia during the past year.

Taxes on corporate income

Generally, all resident and non-resident legal entities operating through a permanent establishment (PE) are liable to pay corporate income tax (CIT) in Macedonia.

Macedonian resident entities are taxed on their worldwide income. Non-resident entities are taxed on the profit realised through their PE in Macedonia. Non-business organisations (including governmental bodies) are taxed on income from their business activities (if any).

The CIT rate is 10%.

The tax base for CIT is the profit realised for the current year, as determined according to the applicable accounting standards, adjusted for the amount of non-deductible expenses incurred during the fiscal year (FY).

Under the previous CIT legislation, there were two separate tax bases for CIT, which were subject to filing of two separate tax returns. In the period between FY 2009 and FY 2013, CIT was payable separately on non-deductible expenses (on an annual basis) and on financial profit (only if distributed). By means of the applicable CIT Law, the accumulated profit realised for the period FY 2009 to FY 2013 is subject to taxation at the moment of distribution. Taxpayers are obligated to cover the losses from previous years prior profit distribution.

CIT is not payable on received dividend income from domestic taxpayers, under condition that such income was taxed at the level of the payer.

Simplified tax regime for companies

Companies (except companies that provide banking, financial, and insurance services, as well as services in the field of games of chance and entertainment games) can choose to benefit from the simplified tax regime based on their overall annual income. Provided other criteria prescribed in the CIT Law are met, companies will qualify for the simplified tax regime if their overall annual income from all sources is between 3 million Macedonian denars (MKD) and MKD 6 million. These companies will pay 1% CIT on their overall income from all sources as stated in their income statement and financial statements for the respective calendar year.

Provided their overall annual income in the following three years is within the above range, companies under the simplified tax regime cannot request to be excluded from the simplified tax regime.

Under the simplified tax regime, exemption from CIT is available for companies with an overall annual income from all sources of up to MKD 3 million.

Local income taxes

There are no municipal or local government taxes levied on corporate income.

Corporate residence

A company is resident in Macedonia for tax purposes if it is established or maintains its headquarters in the territory of Macedonia. Foreign legal entities with headquarters abroad are non-residents for tax purposes, but their Macedonian branches are liable for tax on any profit generated in the territory of Macedonia if they are considered as a PE for the foreign legal entity in Macedonia.

Permanent establishment (PE)

Generally, a PE is a fixed place of business through which the business of an enterprise is wholly or partly carried on, either directly or through a dependent agent.

More specifically, the domestic law provides that a PE may include a place of management, a branch office, an office, a factory, a workshop, mining activities, or any other place of extraction of natural resources.

A building site or construction or installation project, as well as related supervision activities, may constitute a PE if it lasts longer than six months.

Furthermore, the provision of services, including consulting services with regard to one or several related projects, is deemed to give rise to a PE if such activities last longer than 90 continuous days within any 12-month period. If one or several persons establish a PE as per above, any other non-related project on which they are working on becomes part of the PE, irrespective of its duration.

The PE should be registered as a corporate taxpayer at the beginning of its activity in the country for the purposes of obtaining a tax number.

Other taxes

Value-added tax (VAT)

In general, the VAT regulations are in line with the provisions of the sixth European Union (EU) VAT directive.

The standard VAT rate is 18%. This rate applies to overall turnover and imports of goods and services. A lower rate of 5% applies to supplies of certain goods and services, such as supply of food for human consumption; food for livestock; drinking water from public supply systems; computers and software; agricultural material and equipment; wood pellets, pellet stoves, and pellet boilers; baby products; school supplies (e.g. school backpacks, notebooks, pencils); pharmaceutics and medical equipment; publications, such as books, pamphlets, newspapers, and other printed material, except for publications mainly used for advertising purposes; transport of passengers; and accommodation services, bed and breakfast services, as well as half-board and full-board services provided by hotelkeepers in the country, etc.

All taxpayers whose total annual turnover exceeds MKD 1 million or whose total supplies, as projected at the beginning of the business activity, will exceed this amount are liable to register for VAT purposes.

Residents that do not meet the criteria above may voluntarily register for VAT purposes at the beginning of each calendar year.

The standard VAT period is one calendar month. However, if the total turnover in the previous calendar year did not exceed MKD 25 million, the tax period is the calendar quarter. The VAT period for voluntary VAT registered taxpayers is the calendar quarter.

The taxpayer is obligated to submit a VAT return for each tax period within 25 days following the end of the relevant tax period.

Customs duties

Customs duties generally apply to most products imported into Macedonia. The customs rates under the most favoured nation treatment for agricultural products are up to 31%, whereas the customs rates for industrial products are below 23%.

Macedonia has signed trade agreements with Turkey, Ukraine, and European Free Trade Association (EFTA) member states. The country is a member state to the Central European Free Trade Agreement (CEFTA) and has signed a Stabilisation and Association Agreement with the European Community.

The import of industrial products with preferential origin and certain raw precious metals is exempt from customs duties.

According to the Stabilisation and Association Agreement 2001 signed between Macedonia and the European Union, products with Macedonian origin can generally be exported into EU countries free of customs duties.

Excise duties

Excise duties are levied with respect to a limited number of goods produced or imported in Macedonia. Petroleum products, alcohol and alcoholic beverages, tobacco products, and passenger motor vehicles are subject to an excise duty at a flat or percentage rate. The excise period is one calendar month, and excise duty is payable within 15 days as of the end of the calendar month. The excise duty for alcohol beverages and tobacco goods is levied by way of purchasing excise stamps.

The amount of excise duty for petroleum products depends on the type of petroleum product and is payable per kilo/litre.

Alcohol and alcoholic beverages are taxable per litre/percentage of alcohol. Some categories of alcoholic beverages (e.g. wine) are not subject to excise duty. Maximum excise duty payable is up to MKD 340 per litre on pure alcohol.

The excise duty for tobacco products is combined and is calculated both per unit/kilo and as a percentage from the retail price. As of July 2014 up to July 2023, the rate of the specific and minimum excise duty on cigars/smoking tobacco will increase gradually every year.

The excise duty for passenger motor vehicles is calculated as a percentage of the market value or the custom value of the vehicle. It ranges from 0% for vehicles valued up to 3,000 euros (EUR) to 18% for vehicles valued above EUR 30,000.

Property tax

Property tax is paid annually on the ownership of real estate, including land (agricultural, construction, forest, and pastures) and buildings (residential buildings or flats, business buildings and business premises, administrative buildings and administrative premises, buildings and flats for rest and recreation, and other construction facilities, as well as installations constructed on the buildings or below and permanently attached to the buildings).

The person liable for property tax is the legal entity or the individual owner of the property. If the owner is not known or cannot be reached, the person liable for property tax is the user of the property. A property taxpayer may also be the taxpayer who usufructs the property; and, if the property is owned by several persons, each of them is a property taxpayer proportionately for the portion owned. A property taxpayer is also the person who uses real estate owned by the state and the municipality.

The property tax base is the market value of the real estate. The market value of the real estate is determined in accordance with the methodology prescribed by the government.

Property tax rates are proportional and range from 0.10% to 0.20%. The rates may be determined on the basis of the type of the property. As an exception, property tax rates on agricultural land not used for agricultural production may be increased outside the above range (i.e. from three to five times in relation to the basic rates).

The amount of the rates is decided by the Municipal Councils.

Transfer tax

The transfer of the right to ownership of real estate for or without compensation, as well as other means of acquiring real estate for or without compensation, between legal entities or natural persons is subject to transfer tax.

The person liable for transfer tax is the seller of the real estate. As an exception, a taxpayer may also be the buyer of the real estate if agreed in the sale and purchase agreement. When replacing real estate, the taxpayer is the party that replaces the real estate of greater value.

When selling real estate in bankruptcy and law-enforcement procedure, as well as when realising agreements on mortgage, the taxpayer may be the buyer of the real estate.

In the case of transfer of ownership of an ideal share in real estate, taxpayers are each of the owners separately.

The tax base is the market value of the real estate at the moment the tax liability arises.

When replacing real estate, the tax base is the difference between the market values of the real estate being replaced.

When selling real estate in bankruptcy and law-enforcement procedure, the tax base is the attained selling price.

The market value is determined by a special municipal commission in accordance with the methodology prescribed by the government.

Tax rates are proportional and range from 2% to 4%. The tax rates are determined by the municipal councils by way of decision.

There are certain exemptions from transfer taxes available for specifically determined cases (i.e. transfer of shares, sale of securities, the first sale of residential premises for the first five years from the end of their construction, etc.).

Stamp taxes

Stamp taxes are not payable in Macedonia.

Social security contributions and payroll taxes

Employers are obligated to calculate and withhold from employees' gross salary and pay into the accounts of respective funds the compulsory social security contributions and personal income tax (PIT). The current level of the compulsory social security contributions is as follows:

- Pension and disability insurance: 18%.
- Health insurance: 7.3%.
- Employment insurance: 1.2%.
- Additional health insurance: 0.5%.

The legislation prescribes the minimum and the maximum base for calculation of the social security contributions.

The Public Revenue Office (PRO) is the authorised body to control the calculation and the payment of the compulsory social security contributions and PIT on salaries. All employers send their calculations to the PRO that controls them and, if correct, issues a declaration of acceptance that is used by the banks to perform the payment of the social security contribution, PIT, and net salaries.

Garbage collection fee

A garbage collection fee is payable for immovable property, depending on the type of property and on the surface area used. It is calculated on the basis of a tariff and is collected together with the bills for water usage.

Communal taxes

Companies and individuals are liable for paying communal taxes for usage of certain rights and services (mainly for usage of the urban space in the municipalities, posting commercials, etc.).

Branch income

Branch offices are registered in the Trade Registry. Branches are subject to CIT in accordance with the general statutory provisions. The foreign parent company is fully liable for the obligations of its established branch office in Macedonia.

A foreign company that is entitled to carry out commercial activities pursuant to its national legislation may establish a commercial representative office in Macedonia. Representative offices are not legal entities and may not carry out any commercial activities. Representative offices are not subject to CIT.

Income determination

Capital gains, as well as income from dividends, interest, rent, and royalties are treated as ordinary income of the taxpayer and are included in its general taxable base in accordance with accounting rules and standards. Dividend income received from domestic taxpayers is excluded from the tax base under condition that such income was taxed at the level of the payer.

Inventory valuation

There are no provisions in the tax legislation regarding inventory valuation.

Deductions

The CIT Law exhaustively lists the expenses that are not recognised for CIT purposes and are part of the CIT base.

Hidden profit distribution

The following transactions with shareholders or their related parties are considered as hidden profit distribution subject to CIT:

- Sales of goods/services on terms below the market price.
- Purchase of goods/services on terms above the market price.
- Providing loans with an interest lower than the market one.
- Arrangements under which gains are realised by the shareholders or their related parties.

Unjustified shortages are also taxed as hidden profit distribution if not reimbursed from the salary of the responsible person.

Some of the transactions above may be regulated under the transfer pricing provisions in the CIT Law as well. It seems that the purpose of these provisions is to tax the non-fair transactions with shareholders and their related parties that do not fall under the 'related-party' definition as per the CIT Law.

Non-business-related expenses

Expenses that are not related to the business activity of the taxpayer are taxable.

Depreciation

Corporate taxpayers can apply depreciation methods and rates as well as perform impairment of their fixed assets under applicable accounting standards without any tax consequences.

Goodwill

There are no specific provisions in the tax legislation with regard to goodwill.

Start-up expenses

There are no specific provisions in the tax legislation with regard to start-up expenses.

Interest expenses

Interest paid on non-business related credits of the taxpayer, as well as interest on credits for purchase of passenger vehicles, furniture, carpets, works of art, and decorative objects, is a taxable expense. Interest on business-related credit is also taxable, provided it falls under the thin capitalisation or transfer pricing rules (*see Thin capitalisation or Transfer pricing in the Group taxation section for more information*).

Uncollected receivables from loans

Uncollected receivables arising from loans (or transactions that are considered loans in their economic substance) that are not repaid in the year of granting are considered as taxable expenses. On the other hand, taxpayers are allowed to reduce their tax base in the tax period when such receivable is partially or fully collected.

Impairment and write-off of receivables

Impairment of receivables is not taxable for banks, saving institutions, and insurance companies if impaired in accordance to the methods prescribed by law. As to other corporate taxpayers, impairment of receivables is a taxable expense if not based on an effective court decision or reported and confirmed as debts in liquidation or bankruptcy procedure.

Write-off of receivables is a taxable expense for all corporate taxpayers.

Taxpayers are entitled to a tax credit for the tax paid on collected impaired receivables in the year of collection.

Charitable contributions

Donations and sponsorships expenses are taxable if not pursuant to the manner, the conditions, and the procedure set forth in the Law on Donations and Sponsorships in Public Activities. If compliant with the law requirements as per above, donations are taxable if the annual amount borne by the taxpayer exceeds 5% of its overall revenue, whereas sponsorship expenses are taxable if above 3% of the overall revenue of the taxpayer.

Subject to fulfilment of certain conditions, donations towards sport federations, organisations, clubs, and individuals could decrease the CIT liability for the year, up to prescribed percentages in the CIT Law.

Compensation expenses

Employees' related expenditures (e.g. organised transportation to/from work, organised food [cantina], business trip allowance, field allowance, family separation allowance, one-off severance payment, retirement allowance, annual holiday allowance, anniversary awards) are taxable if paid over the amount prescribed by law and collective agreement.

Voluntary pension insurance contributions are taxable if their annual amount per employee exceeds four average monthly gross salaries paid out in the previous calendar year.

The monthly allowances and expenses to the managing board members are tax-deductible, up to 50% of the average gross monthly salary paid out in the country in the previous year.

Expenses made for accommodation and transport of non-payroll employees engaged at the taxpayer for the purposes of its business activities are CIT deductible, provided that they are properly documented.

Insurance expenses

Personal insurance premiums paid for members of the management board and the employees (if not paid out from their salary) are taxable expenses. Only the collective insurance of the employees for work-related injuries is a non-taxable expense for corporate taxpayers.

Entertainment expenses

Expenses for gifts, business dinners, recreation, and entertainment are taxable, up to 90% of the annual amount borne by the taxpayer.

Scrapping

Expenses for scrapping exceeding the standards for the particular industry set forth in the rulebook on the standardised amounts of debris, scrap, waste, wreckage, and scattering of goods and specific products are taxable. Scrapping expenses caused by *vis major* or an uncontrollable event are not taxable.

Fines, penalties, and taxes

Fines and tax penalties, penalty interest on unpaid public duties, and expenses for enforced payments, as well as withholding tax (WHT) borne by the taxpayer on behalf of third parties, are taxable.

Net operating losses

The CIT Law stipulates that the loss realised in the income statement for the year, adjusted for the amount of non-deductible expenses, can be carried forward against future profits for a maximum period of three years as of the year when the profit has been realised.

The financial loss can be carried forward for tax purposes only in cases where the accumulated losses have been offset by the taxpayer according to the provisions from the Macedonian Companies Law and if approval by the tax authorities has been obtained.

Loss carrybacks are not allowed under the Macedonian tax legislation.

Payments to foreign affiliates

There are no specific provisions in the tax legislation with regard to payments towards foreign affiliates.

Group taxation

There are no tax consolidation provisions in Macedonia.

Transfer pricing

The transfer pricing provisions cover not only the expenses but also the revenues resulting from related party transactions. If the taxpayer incurs expenses/realises revenues from transactions with related parties that are higher/lower than the market level, the difference between the market price and the transfer price shall be considered as a taxable expense or understated revenue. Consequently, this difference would be subject to CIT.

The cost plus method, in addition to the comparable uncontrolled price method, are applicable. No reference is made to other methods accepted by the Organisation for Economic Co-operation and Development (OECD).

The part of the interest paid on loans to related parties that exceeds or is below the interest payable between unrelated parties is considered taxable unless there is reasonable justification for such differences.

Penalty interest imposed between related parties shall be considered as a taxable expense.

Transfer pricing rules do not apply on expenses for interest under credits and penalty interest paid to related parties that are banks or financial institutions.

Upon request by the Macedonian tax authorities, companies should provide enough documentation as evidence that the transactions with related parties were in line with the 'arm's-length principle'.

Thin capitalisation

A proportional part of the interest related to a loan received from a non-resident shareholder, who directly holds at least 25% of the capital in the company, that exceeds three times its share in the equity in the company will be taxable during a tax period. Thin capitalisation rules do not apply to loans received from banks or other financial organisations. Also, thin capitalisation rules do not apply for newly established companies within the first three years of operation.

Controlled foreign companies (CFCs)

There are no CFC rules in Macedonia.

Tax credits and incentives

Foreign tax credit

The taxpayer is allowed a tax credit for the tax paid on foreign income abroad, up to the amount of tax payable for that income in Macedonia. However, a tax credit for the

WHT paid abroad is allowed only if a double tax treaty (DTT) is in place and in case the Macedonian company obtains proof for the amount of tax paid in the foreign country.

Reinvested profit

The CIT Law introduces a possibility for decreasing the tax base for the year for the amount of profit reinvested for development purposes of the local taxpayer. The amounts from the reinvested profit that would be recognised for the purposes of the above tax relief cover investments both in tangible and intangible assets, except for some explicitly listed types of assets intended for administrative purposes.

In order to be able to utilise the above tax relief, the taxpayers must maintain ownership over the assets purchased with the reinvested profit for a period of five years as of the day of their purchase.

Technological industrial development zones

A taxpayer that is a registered user within a technological industrial development zone is exempt from CIT payment for a period of ten years from the commencement of the performance of the activity in the zone or until the state aid amount is fully exhausted under terms and conditions and according to a procedure determined with the Law on Technological Industrial Development Zones.

Withholding taxes

All domestic legal entities and domestic physical persons that are registered for carrying out an activity, as well as foreign legal entities or physical persons that are non-residents but have a PE in Macedonia, are obligated to withhold tax when paying certain types of income to a foreign legal person and to pay the tax withheld to a respective suspense account simultaneously with the payment of the income.

The WHT rate is 10% and is applied on the following forms of incomes payable abroad:

- Dividends.
- Interest.
- Royalties.
- Income from entertainment or sporting activities in Macedonia.
- Income from management, consulting, financial services, or services related to research and development.
- Income from insurance or reinsurance premiums.
- Income from telecommunications services between Macedonia and a foreign country.
- Income from the lease of immovable property in Macedonia.

As an exception, WHT is not applicable to the following forms of income:

- The after-tax profit of a PE transferred to its foreign headquarters.
- Interest from bonds issued or guaranteed by the government.
- Interest on deposits in banks located in Macedonia.
- Income from transactions in state securities on the international financial markets.

If a DTT is in place, WHT shall be payable in accordance with the provisions from the DTT. Taxpayers are obligated to obtain approval from the Macedonian tax authorities prior to applying the tax rates from the DTT.

Macedonia has signed DTTs with the 49 countries listed in the chart below:

	WHT (%)			
Recipient	**Dividend**	**Interest**	**Royalties**	**Other income**

Notes

1. The lower rate applies to dividends paid out to a foreign company that controls at least 10% of the share capital of the payer of the dividends.
2. The lower rate applies to dividends paid out to a foreign company that controls at least 25% of the share capital of the payer of the dividends.
3. The zero rate applies to dividends paid out to pension funds.
4. These DTTs are still not in force.
5. The DTT with Federal Republic of Yugoslavia now applies both to Serbia and Montenegro.
6. The zero rate applies to dividends paid out to recognised pension funds and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 10% rate applies to dividends paid out in all other cases.
7. The tax rate of 10% for royalties payments applies only for utilisation or right to utilise cinematographic films and films or tapes for radio and television transmission. The 5% rate applies on all other cases.
8. The DTT concluded by the Socialist Federal Republic of Yugoslavia (SFRY) is still applicable for Macedonia.
9. The zero rate applies to dividends paid out to pension schemes and to foreign companies that continuously control at least 25% of the share capital of the payer of the dividends for 12 months before the dividends payment. The 5% rate applies to dividends paid out to foreign company that controls at least 10% of the share capital of the payer of the dividends. The 15% rate applies to dividends paid out in all other cases.
10. The zero rate applies on interest paid on loans or prolonged credit paid from one enterprise to another enterprise and, on interest paid to the other contracting state, to one of its political divisions or municipalities or public entities of that state.
11. The zero rate applies in case the beneficial owner of the interest is the government, political or municipality subdivision; the Indian Reserve Bank, the Indian Export-Import Bank, and National Housing Bank; or any other institution based on additional agreement via exchange of letters by the authorised institutions.
12. The 10% rate applies on gross income from royalty or income from technical services (compensation for managerial, technical, and consulting services, income from services of technical and consulting personnel that is different from the income derived under article 14 and article 15 of the DTT).
13. The zero rate does not apply to income from lottery, races and horse races, card games, and other games of chance.
14. The 5% of the gross amount of dividends applies if the beneficial owner directly holds at least 70% of the share capital of the company paying the dividend. 10% applies if the beneficial owner directly holds at least 25% but less than 70% of the share capital of the company paying the dividend. 15% applies in all other cases.
15. Interest, royalties, and dividends paid to a resident of the other contracting state shall be taxable only in the other contracting state if the beneficial owner of the income is that other state itself, local government, local authority or the Central Bank thereof, Abu Dhabi Investment Authority, Abu Dhabi Office, International Petroleum Investment Company, Abu Dhabi Investment Council, Dubai Investment Company, Mubadala Development Company, United Arab Emirates (UAE) Investment Authority, Al Dafra Holding Company, or any other institution created by the government, a local authority, or a local government of that other state.
16. The interest tax rate under the DTT would be 0% in case the payer or the beneficial owner of the income is the government, an administrative subdivision, a local authority, the Central Bank, or any other financial institution wholly owned by the government.

Tax administration

Taxable period

The taxable period for which CIT is determined covers one calendar year.

Tax returns

Taxpayers are obligated to calculate and pay CIT on the basis of a CIT return, which must be submitted to the Public Revenue Office by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Taxpayers who distribute profit arising from FY 2009 to FY 2013 are obligated to calculate and pay CIT on the basis of a tax return on profit distribution, which should be submitted to the tax authorities up to the date of profit distribution.

Small taxpayers who fall under the simplified tax regime are obligated to calculate and pay the tax due on the basis of a tax return on overall income, which should be submitted to the tax authorities by the end of February of the following year or, if filed electronically, by 15 March of the following year.

Payment of tax

Corporate taxpayers are obligated to pay monthly CIT advance payments during the year within 15 days of the end of each month.

Monthly CIT advance payments are calculated as one-twelfth of the CIT obligation for the previous calendar year, increased by the index of cumulative retail price growth as determined by the State Statistical Bureau.

The difference between the advance payments and the final CIT liability as determined in the CIT return should be paid within 30 days as of the deadline for submission of the CIT return. Daily penalty interest of 0.03% is due on late tax payments.

In case the sum of monthly advance payments exceeds the final tax liability in the CIT return, the taxpayer may request for a refund of overpaid tax. The tax should be refunded within 60 days as of the date of submitting the request. If the taxpayer does not ask for a tax refund, the overpaid amounts will be considered as advance payment for the following period.

Tax audit process

The tax audit may include one or more taxes, one or more fiscal periods, or only certain tax issues. The extent of the tax audit is determined solely by the tax authorities and is based on their estimation of risk in respect of the specific taxpayer. VAT audits are commonly conducted when VAT refund is requested by the taxpayer, and, in this case, the tax audit is usually limited in the area of VAT. The advance notice for tax audit for large taxpayers and concerns is four weeks, whereas the advance notice for all other taxpayers is two weeks. In cases where the tax authorities find that it would represent an obstacle for the tax audit, an advanced notice will not be given to the taxpayer.

Statute of limitations

The statute of limitations is five years as of the end of the calendar year in which the tax event occurred. In case of tax evasion, the statute of limitations is ten years as of the end of the calendar year in which the tax event occurred.

Topics of focus for tax authorities

There are currently no topics of particular focus for the tax authorities.

Other issues

Choice of business entity

The Macedonian Trade Companies Law provides for the following types of entities:

- General partnerships.
- Limited partnerships.
- Limited liability companies.
- Joint stock companies.
- Limited partnerships by shares.
- Foreign business entities may register a branch office or a representative office in Macedonia.

Madagascar

Significant developments

Change of threshold for impôt synthetic

The threshold to determine whether an entity is subject to impôt synthetic of 5% on revenue or to income tax of 20% on profit is changed from 20 million Malagasy ariary (MGA) to MGA 100 million. Companies having annual revenue of more than MGA 100 million are subject to corporate income tax (CIT) of 20%.

Change of threshold for value-added tax (VAT) vendor status

The threshold to determine whether an entity is a VAT vendor or not is changed from MGA 200 million to MGA 100 million.

Tax deductibility of benefit in kind

50% of the difference between the total benefits in kind and the value of benefits in kind included in the tax base of salary income tax are not deductible expenses.

Taxes on corporate income

Taxation of residents

Resident corporate entities are subject to CIT based on realised worldwide income.

A corporate entity having an annual turnover of less than MGA 100 million is subject to CIT at a rate of 5% of 70% of turnover, with a minimum tax of MGA 16,000.

A tax reduction of 2% of the amount of purchases of goods and equipment subject to regular invoices is applicable. However, tax due cannot be less than 3% of the turnover.

A corporate entity registered in Madagascar and having an annual turnover exceeding MGA 100 million is subject to CIT at a rate of 20%.

The tax payable cannot be less than 5/1,000 of turnover plus a fixed amount of MGA 100,000 for taxable persons carrying on agricultural, artisan, transportation, industrial, hotel, or mining activities. The minimum tax cannot be less than 5/1,000 of turnover plus MGA 320,000 for other activities.

Taxation of non-residents

Only Madagascar-source income is taxable for non-residents.

Revenue of foreign businesses providing services to a Madagascar taxpayer that do not have a permanent establishment (PE) in Madagascar is subject to withholding tax (WHT) at a rate of 10% of any income realised in Madagascar. However, dividend income is exempt and financial loan interest is subject to WHT of 20%. *See the Withholding taxes section for more information*.

Local income taxes

No regional or local income taxes are applicable in Madagascar.

Corporate residence

Companies are considered resident in Madagascar if they are registered in Madagascar or have a legal existence in Madagascar.

Permanent establishment (PE)

PE refers to a fixed place of business through which a company carries out the whole or part of its activities, including:

- Management offices.
- Branches.
- Offices.
- Factories.
- Workshops.
- Mining sites, oil or gas wells, quarries, or any other places for the extraction of natural resources.
- Building sites, construction or installation projects, or supervising activities lasting for more than six months in relation to those projects.
- Provision of services by a company, including advisory services, via employees or other staff hired by the company to this end, only if such activities are carried out in Madagascar for a total period of 183 days for a 12-month period either starting or ending during the fiscal year involved, for the given or a related project.

PE does not include:

- The use of facilities for the storage or display of goods or merchandise belonging to the company.
- Exploiting a stock of goods or merchandise belonging to the company for the sole purpose of either storage or display or of being processed by another company.
- Exploiting a fixed place of business for the sole purpose of:
  - either purchasing merchandise or collecting information for the company
  - carrying out any other activity of preparatory or auxiliary character for the company, or
  - pursuing any combination of the activities mentioned above, conditional on the overall activity of the fixed place of business, as resulting from this combination, remaining of preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

The VAT rate is 20%, and the VAT rate on export is 0%. VAT input is recoverable under certain conditions.

VAT is applicable to all transactions realised in Madagascar by a VAT vendor. Services are considered to be performed in Madagascar if such services are used in Madagascar or invoiced to a taxpayer established in Madagascar.

Business engaged in e-commerce is subject to VAT.

Transport companies are allowed to claim VAT input on gasoline used for land transportation. The objective is to reduce the impact of cost of oil and gas on transportation fees.

Any corporate entity or individual person who realises an annual turnover exceeding MGA 100 million is a VAT vendor. For a business realising annual revenue less than MGA 100 million, VAT vendor registration is an option.

A foreign company that has no PE in Madagascar but renders services to a Madagascar taxpayer must appoint a tax representative to collect and pay VAT on its behalf. Otherwise, the beneficiary of the services must collect and pay VAT on behalf of the foreign supplier.

All transactions made by a VAT vendor with a non-VAT vendor must be done via the banking system when the value of the transaction exceeds a threshold fixed by Decree.

Any suppliers not registered as VAT vendors engaged in public market transactions are subject to VAT at a rate of 8%, which is representative of income tax. VAT is withheld by the public treasury and paid directly to the tax authorities.

Customs and import tax

The importation of goods is subject to payment of customs and import tax payable to the customs office.

In addition, Gasynet fee, corresponding to 0.5% of the cost, insurance, and freight (CIF) value of goods, is applicable on importation of goods.

Excise duty

Excise duty applies on a range of goods and services, such as tobacco, alcohol, lighters, and communication by mobile phones. Excise duty rates range from 5% to 325% or are a fixed amount per litre or per unit.

Real estate ownership tax

Real estate ownership tax is imposed annually at the rate of 5% to 10% on the rental value of the property. Land ownership is also taxable at a rate depending on the nature of the land.

Registration fees

Registration fees are applicable to transfers of title ownership (e.g. sales, donations) of movable and immovable assets, to transfers of interests, to share capital increases, and to lease agreements.

Registration fee rates are 0.5% to 5%, depending on the nature of the transaction. The rate of 5% is applicable mainly on transfers of assets and transfers of business.

Payroll tax

Salary income taxes, called *Impôt sur les Revenus Salariaux et Assimilés* (IRSA), are levied at a rate of 20% on the total taxable remuneration of employees, including salaries, allowances, and benefits in kind. Employers are responsible for withholding and paying salary income taxes on behalf of employees.

Social security contributions

Employers must contribute to *Caisse Nationale de Prévoyance Sociale*, Madagascar's national social security fund, which includes pensions and accident insurance. The contribution is capped at 13% of eight times the legal minimum salary per employee.

Health contributions

Employers must contribute to the health system assessment at a rate of 5% of the total amount of taxable remuneration of its employees. The contribution may or may not be capped at 5% of eight times the legal minimum salary per employee, depending on the health system organisation where the company is affiliated.

Tax on insurance contracts

All insurance or life annuity conventions concluded with a company, insurance firm, or with any other Madagascan or other insurer are subject to an annual tax on insurance contracts at a rate of 3% to 20% levied on the insurance premiums.

Para-fiscal taxes

Concerning local tax, generally called 'para-fiscal taxes', the following are introduced in the tax code applicable from January 2017. These local taxes are not new since they already existed; however, their introduction to the tax code results from the principle that only a financial act can introduce tax. The following are the maximum rates/amounts:

- Civil protection tax: MGA 5,000 per domestic animal or bladed weapon (*arme blanche*).
- Residence tax for development: MGA 5,000.
- Tourist tax (or stay tax): MGA 500 to MGA 2,000 per night/room.
- Tax on mineral waters: MGA 5 per litre.
- Advertising tax: MGA 30 to MGA 30,000 per square metre.
- Tax on water and/or electricity: 10%.
- Tax on entering parties, shows, and various events: 3% to 5%.
- Tax on pylons, antennas, relays, or masts: MGA 600,000.
- Tax on radio and television games: MGA 10/sms; MGA 20/call.

Branch income

The tax on branch income is the same as for corporate income. The branch income tax base is the income realised by the branch in Madagascar.

Income determination

Inventory valuation

There are no provisions for valuing inventories or determining inventory flows in Madagascar. The tax treatment will follow the accounting treatment.

Capital gains

Capital gains realised from the sale of shares held in a company of which the entire or partial value is derived, either directly or indirectly, from goods located in Madagascar, or from rights thereof, are subject to income tax at a rate of 20%.

Capital gains made by a company on the sale of assets and interests are considered as normal business income that is subject to CIT.

Dividend income

Dividends received by a company are considered as business income subject to CIT.

Certain dividends from a subsidiary may be excluded from CIT (*see Dividends exclusion in the Group taxation section*).

Stock dividends

Stock dividends are unusual, but they are considered as business income that is subject to CIT.

Interest income

Interest income received by a resident taxpayer from another entity established in Madagascar is subject to WHT at a rate of 20%. Revenue already subject to WHT is no longer taxable to CIT.

Royalty income

Royalty income received by a resident taxpayer is considered as normal business income subject to CIT.

Foreign income

Foreign income earned by corporate bodies situated in Madagascar is considered as normal business income subject to CIT unless a tax treaty is established and indicates otherwise. There is no provision for tax deferral in Madagascar.

Deductions

Depreciation

The amount of deductible depreciation should not exceed the amount that is calculated according to the following rates of depreciation provided by the law:

Asset	Depreciation rate (%)
Industrial buildings	5
Plant and machinery	10
Mining exploration and development (licence)	33
Transportation (car)	20
Transportation (utility cars, vans, trucks)	25
Computers	25
Electricity generators	10

With the exception of buildings, it is also possible to practise a graduated depreciation. In this case, the annual depreciation corresponds to 30% of the net book value of the asset.

In case of loss, depreciation of assets can be deferred and carried forward to the next financial years until absorption.

Goodwill

There is no provision concerning deductibility of goodwill in the Madagascar tax code.

Start-up expenses

There is no specific tax provision on start-up expenses. Accounting rules are applicable for the profit and loss recognition.

Start-up and prospecting expenses for the installation of an overseas establishment, as well as the costs of running such a foreign establishment, for the first three years are tax deductible. However, the amounts deducted must be reported, in equal amounts, to the taxable income of the five consecutive years from the fifth year following the creation of the foreign establishment.

Interest expenses

Interest expenses are deductible. However, interests on inter-company loans are subject to thin capitalisation rules (*see Thin capitalisation in the Group taxation section for more information*). In addition, interest on inter-company loans is not deductible if the loan agreement is not documented by a written agreement submitted according to registration procedures.

Bad debt

To be tax-deductible, provisions for doubtful debt must be subject to justification of existence of amicable or judicial settlement. The claims must be individualised.

Charitable contributions

Payments made for the benefit of educational, social, or cultural recognised public associations; accredited bodies for scientific research; or for the promotion and creation of businesses for achievement of planned economic and social development are deductible within the limits of 0.5% of annual turnover.

Gifts in kind or in cash granted in case of natural calamities and donations in cash granted to a corporation established by decree for the interest of the nation are also deductible.

Any other charitable contributions are not deductible.

Deductible social expenses for mining companies

Donations and expenses related to the social responsibility of mining companies are deductible if they are mandatory or provided in the *Cahier des charges*.

Expenditures for site security and high intensity of manpower (haute intensité de main d'oeuvre or HIMO), provided that expenses were subject to WHT at a rate of 5%, are also deductible.

Deductible wages

Salaries and wages that are not included in salary income taxes or not declared to *Caisse Nationale de Prévoyance Sociale* are not deductible.

Only 50% of the difference between the total benefits in kind and the value of benefits in kind included in the tax base of salary income tax are deductible expenses.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

Except for CIT, taxes in relation to business in Madagascar are deductible.

Third-party taxes borne by the company are not tax-deductible.

Net operating losses

Accumulated loss can be carried forward for the next five financial years following the period in which the loss occurs. Carryback of losses is not permitted in Madagascar.

Payments to foreign affiliates

For branches, the deductible amount of overhead that the head office can charge to the branch is limited to 1% of the turnover of the branch.

For interest on inter-company loans, see Thin capitalisation in the Group taxation section.

Payments to foreign companies established in a country having a very favourable fiscal regime

Payments made to a foreign company established in a country having a very favourable fiscal regime are not tax deductible unless there is proof of effectiveness of the services and reasonability of the amount.

Group taxation

There is no provision regarding group taxation in Madagascar, except for the following:

For entities subject to the actual tax regime, a parent-subsidiary regime option is established by which the net dividends received by the parent company from its subsidiary are excluded from the tax base of the parent company. However, a share of fees and expenses, uniformly fixed at 5% of the amount of dividends paid, must be reintroduced into the tax base.

Transfer pricing

There is a provision in the tax law allowing the tax authority to claim a tax adjustment in cases where the transactions between a Madagascar entity and a foreign entity controlling or controlled by the Madagascar entity are not concluded at fair market value.

The following transfer pricing methodologies are acceptable:

- Methods of comparable prices on the free market.
- Resale price method.
- Cost plus method.
- Transactional method on net margin.
- Transactional method on profit split.

Effectiveness of services and fair market value must be justified by appropriate documentation.

Thin capitalisation

Under Malagasy tax law, deductible inter-company financial interest cannot exceed the interest calculated on twice the share capital at the rate of the Central Bank of Madagascar plus two points (the rate of the Central Bank of Madagascar is 9.5%).

Inter-company loan agreements must be submitted according to registration formalities within two months from the execution date. Failure of submission of an inter-company loan agreement according to registration formalities implies non-deductibility of interest on the inter-company loan.

Dividends exclusion

Dividends received by a shareholder holding more than 75% share capital from its subsidiary are excluded from business revenue subject to income tax.

Controlled foreign companies (CFCs)

There is no special provision in relation to CFCs in Madagascar.

Tax credits and incentives

The following activities benefit from a special tax and/or customs regime:

Microfinance activity

Microfinance benefits are available for entities specialising in lending money on the basis of small or medium scale value. Entities duly licensed to practise microfinance activities are exempt from CIT during the first five years. After this period, the microfinance company is subject to CIT at a rate of 20%.

Free zone (free trade zone)

Free zone law is available for industrial and other service providers that export all of their products. If eligible under the free zone law, a CIT exemption is provided during the first two to five years and a reduced CIT of 10% is levied thereafter. Exemption from customs duties on importation is also provided.

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation

Companies investing in renewable energy, tourism, industrial, civil work and construction, and transformation can benefit from a tax reduction equal to the tax calculated on 50% of the amount of investment that they realised during the related tax year. The right to reduction that can be used for the tax year cannot exceed 50% of tax actually due. The balance is carried forward with the same limitation to subsequent years, until clearance.

Big investment mining

A mining company committing to invest more than 50 million United States dollars (USD) is considered a big investment mining company. The big investment mining law provides a minimum income tax exemption, a reduced CIT rate for the transformation entity (i.e. the entity in charge of processing the extracted minerals), exemption from custom and importation duties, and VAT reimbursement on locally purchased equipment and investments.

Petroleum code

The petroleum code provides a custom and importation duties exemption for hydrocarbon research, exploration, and exploitation activities.

Leasing law

The leasing law provides that leasing activities can benefit from CIT exemption and reduction of tax rate during the first four years.

Foreign tax credit

Except under a tax treaty, there is no foreign tax credit rule under Malagasy tax law.

Withholding taxes

WHTs are levied as follows:

- Purchases of goods and services from non-registered suppliers by a registered supplier are subject to WHT at a rate of 5% payable to the tax authorities within 15 days following the month of payment of the supplier.
- *Impôt sur les revenus des capitaux mobiliers* (IRCM): WHT on interest of 20% is applicable on financial loan interest. However, interest paid to banks, financial institutions, and foreign financial organisations is exempt.
- WHT of 20% is applicable on remuneration of a member of a board of directors or a single director.
- Income tax for non-resident entity: Management fees, royalties, technical and assistance fees, licence fees, equipment rental fees, and any income realised by foreign suppliers is subject to WHT at a rate of 10%.

Madagascar has signed two tax treaties.

	WHT (%)		
Recipient	**Dividends**	**Loan interest**	**Royalties, management fees, services fees**
Non-treaty	0	20	10
Treaty:			

Madagascar

	WHT (%)		
Recipient	**Dividends**	**Loan interest**	**Royalties, management fees, services fees**
France	25 (max)	15	15 (max)
Mauritius	10 (max)	10	5 (max)

Tax administration

Taxable period

The financial year may be spread over any period of 12 months. There is no need to obtain prior authorisation in order to close the financial year on a date other than 31 December or 30 June.

Tax returns

CIT returns are due before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

Payment of tax

CIT is payable bimonthly in provisional instalments. The balance is payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and within four months from the date of closing of the financial year for all other year-ends.

Taxpayers can decide to suspend the payment of bimonthly income tax instalments, but they must pay a penalty of 80% if the final tax due is more than the previous year's income tax.

WHT on foreign services is payable to the tax authorities within one month of the date of payment.

WHT on interest and on payments to members of boards of directors are payable before 15 May each year for companies whose financial year ends at 31 December, before 15 November each year for companies whose financial year ends at 30 June, and no later than the 15th day of the fourth month from the date of closing of the financial year for all other year-ends.

Tax audit process

The tax authority carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations.

During tax audit, tax authorities can access all the taxpayer data available on servers, terminals, and any supporting systems.

After examination of available information, the tax authority issues a primary notice, and the taxpayer has 30 days after the date of reception of the primary notice to answer and submit its written objection to the tax authority.

The tax authority then issues the notice of assessment. 15 days from the notice of assessment, the taxpayer may request the opinion of the Tax Commission (CoFi). After obtaining the CoFi's opinion, the tax authority issues the final notification accompanied with the perception title.

30 days from the final notification, the taxpayer can file a claim to the Tax Director in Charge of Legislation and Dispute. The Tax Director in Charge of Legislation and Dispute has 60 days to issue its decision. The decision of that body may be further appealed to the Court (State Council) within 30 days.

Statute of limitations

The tax limitation period is three years.

Topics of focus for tax authorities

Areas where tax authorities usually claim adjustment are:

- VAT reverse on foreign services.
- Completeness of VAT output on revenue.
- Sales without invoices.
- Expenses without invoices.
- Employees' remuneration not subject to salary tax.
- Payment to non-registered suppliers.

Significant developments

Effective 1 July 2017:

- Introduction of a 20% penalty on any overdue tax liability plus interest at the prevailing bank lending rate plus 5% *per annum* for each month or part of the month that the tax remains unpaid.
- Increasing penalties for offences to 200,000 Malawian kwachas (MWK) for the first month plus an additional MWK 50,000 for each month or part thereof where a person:
  - fails to comply with any notice served by the Commissioner General under the Taxation Act
  - gives incorrect information or omits any relevant information from any statement required to be made to the Commissioner General
  - fails to keep records, books, or accounts required to be kept
  - fails to comply with provisions requiring the appointment of a public officer of the company, or
  - fails to furnish any other person with a certificate of the extent of the examination of the records in preparing the schedules supporting any return.
- Increasing the penalties for failure to or defaulting to file prescribed returns. The penalties are now MWK 300,000 for the first month and MWK 50,000 for each month or part thereof that the failure continues.
- Increasing penalties for omissions, wrongful deductions, and claims, as well as failure to withhold and remit tax on income due to persons not resident in Malawi, to 20% in the first month or part thereof and interest at the prevailing bank lending rate plus 5% *per annum* for each month or part of the month that the tax remains unpaid.
- Any intent to defraud is now subject to a penalty of the greater of MWK 200,000 and twice the difference between the tax charged and what would have been charged.
- Assisting in making an incorrect return is subject to a penalty of MWK 200,000 in the first month or part thereof and an additional MWK 10,000 for each month or part thereof that the penalty remains unpaid.
- There are MWK 1 million penalties for obstructing officers, forceful rescue of seized property, physical assault of officers, and inciting a person to refuse to pay tax.
- The transfer pricing legislation has been refined, related parties have been defined, and documentation regulations, as well as general transfer pricing regulations, have been introduced. Maintenance of contemporaneous documentation is now a mandatory requirement.
- There are now penalties for failure to complete documentation in compliance with withholding tax (WHT) regulations.
- There are also penalties and interest for failure to remit the WHT and pay-as-you-earn (PAYE), as well as fringe benefits tax.

Taxes on corporate income

Malawi does not have separate legislation for the determination of taxable income of different types of legal persons. Taxation of all income is included in the Taxation Act.

Section 11 of the Taxation Act defines income as the total amount in cash or otherwise, including any capital gain, received by or accrued to a person in any year or period of assessment from a source within or deemed to be within Malawi. The taxpayer's assessable income excludes any amount exempt from tax under this Act.

Income deemed to arise in Malawi

The liability for Malawi tax is based on whether the income is sourced from Malawi, irrespective of the residence of the recipient of such income. Certain transactions may be deemed to be from a source within Malawi even if carried out outside Malawi. Section 27 of the Taxation Act limits the income that may be deemed to have arisen in Malawi to the following:

- Remuneration for services rendered or work performed in Malawi.
- Remuneration for services rendered or work performed in or out of Malawi where the amount may be claimed as a tax-deductible expense by a permanent establishment (PE) in Malawi.
- Amounts incurred, claimed, or claimable in connection with a PE in Malawi.
- Realised exchange gains and losses arising in connection with a PE in Malawi or foreign exchange assets and liabilities held in Malawi.
- Capital gains and losses realised with respect to tangible property located in Malawi and interests in companies incorporated in Malawi.
- Interest not charged on a loan by a lender to another person is deemed to be income accruing to the lender.

Summary of tax rates

Entity	Income tax rate (%)
Locally incorporated companies (1)	30
Branches of companies not incorporated in Malawi	35
Companies in Export Processing Zones	30
Companies in priority industries (2):	
For a period not exceeding ten years	0
In all other cases for companies incorporated in Malawi	15
In all other cases for Malawi branches of external companies	20

Notes

1. In the case of a mining company, there is a mineral royalty, as prescribed in the regulations, as a separate tax. The mineral royalty is a tax-deductible expense.
2. Agricultural produce processing and power generation are designated as priority industries.

Non-resident tax

Non-resident tax is payable on income sourced from Malawi at the rate of 15% of the gross income and 10% for income derived from a mining project by way of interest, royalty, payment for independent personal services, or dividend.

Any income payable to a person who is not resident in Malawi (i.e. who has not been in Malawi for an aggregate period of 183 days) arising from a source within Malawi is liable to a final WHT of 15% of the gross of such income. Non-resident tax is applicable where the recipient of the income does not have a PE in Malawi from which the income emanated.

Non-resident tax may not be withheld on income of residents of countries that have a standing double tax agreement (DTA) with Malawi, subject to the provisions of the specific DTAs. *For details of applicable WHT rates, see the Withholding taxes section*. Currently, the following countries have a DTA with Malawi: Denmark, France, Norway, South Africa, Sweden, Switzerland, and the United Kingdom.

Local income taxes

There are no district or local income taxes in Malawi.

Corporate residence

A corporate entity is considered a resident for tax purposes in Malawi if it has a PE in Malawi.

Permanent establishment (PE)

The Taxation Act defines a PE as 'an office or other fixed place of business through which business activity is carried on'. This short definition is wide in scope. Care must be exercised when considering this definition in situations that may be affected by a DTA. Each DTA contains a specific and far more detailed definition of what constitutes a PE.

Other taxes

Value-added tax (VAT)

VAT is applicable on taxable goods and services. There are three classes of supplies for VAT: taxable supplies (at the rate of 16.5%), zero-rated supplies, and exempt supplies.

A taxable person can claim input VAT on inputs used in making taxable supplies.

A taxable person should complete VAT returns and make VAT payment, where applicable, on a monthly basis within 25 days after the end of the month.

Zero-rated supplies include exercise books, fertilisers, motor vehicles for the transport of goods, and salt.

The following supplies are tax exempt: machinery and financial services.

Customs duties

Customs duty is applicable on goods imported into Malawi. The basis for calculating duty is cost, insurance, and freight (CIF). There are three types of import duties: customs duty, import excise, and import VAT. The rate of custom duty varies from product to product.

The following are the customs and excise measures that are effective in Malawi:

- Returning residents will have to clear, duty free, a motor vehicle owned for more than 12 months under CPC 430.

- Duty free on importation of diagnostic and laboratory reagent under CPC 405 by Health Institutions.
- Removal of VAT on imported goods on water supply.
- Removal of duty on imported electronic fiscal devices.
- Removal of taxes applicable on large buses with seating capacity of more than 45 passengers (including the driver).
- Reintroduction of the Industrial Rebate System. This is a major relief to the manufacturing sector; however, given the abuse of the scheme in the past and the Minister's intimation, it will be subject to serious monitoring by the Malawi Revenue Authority (MRA). Taxpayers will be required to register with the MRA.
- Other measures are in alignment with the Common Market for Eastern and South Africa (COMESA) and South African Development Community (SADC) tariff structures.

Excise duties

Domestic excise is chargeable on certain goods manufactured in Malawi and on certain services, such as alcoholic drinks, tobacco, and cell phone airtime. The rate of excise varies depending on the goods and services.

Tobacco levy

Buyers of tobacco must pay a levy of 0.2% for every kilogram of tobacco bought.

Property taxes

There are no property taxes in Malawi.

Transfer taxes

There are no transfer taxes in Malawi.

Stamp duties

Stamp duties apply on certain documentation.

Turnover tax

Turnover tax is applicable for businesses with a turnover between MWK 2 million and MWK 6 million. The turnover tax rate is 2% of turnover.

Resource rent tax (RRT) for miners

Miners pay RRT of 15% on after-tax profits, determined by using a prescribed formula. The prescribed formula is:

$$r = (40.5 - t) / (100 - t) \times 100$$

Where:

- r is the rate of RRT expressed as a percentage, and
- t is the rate applicable for income tax on companies.

Payroll taxes

Under pay-as-you-earn (PAYE) regulations, the employer is required to withhold tax from employees' salaries and remit to the tax authority on their behalf. There are penalties for non-compliance with the regulatory requirements.

Social security contributions

Under the National Pension Scheme (NPS), an employee contributes a minimum of 5% of the pensionable emoluments while the employer contributes at least 10% of the employee's pensionable emoluments. Contributions by the employer are tax deductible up to a maximum of 15% of the employee's pensionable emoluments while those made by the employee are not.

Fringe benefits tax (FBT)

A fringe benefit is defined as any asset, service, or other benefit in kind provided by or on behalf of an employer to an employee if such benefit includes an element of personal benefit to the employee. The employer providing such benefits is liable for payment of FBT. FBT is charged at the rate of 30% of the taxable figure.

Take note that a benefit need not be wholly for personal use in order to be considered for FBT.

Note as well that no benefit in cash, no matter what it is termed as, can be treated as a fringe benefit. All monies paid in cash (rather than in kind) should be considered for PAYE deduction.

However, subsistence allowances, given to employees working out of their duty station for instance, presumably to cater wholly, exclusively, and necessarily for their needs, such as accommodation, meals, transport, etc., ought not be taxed. This applies also for reimbursement of expenses incurred in business.

Every employer shall register for FBT within the month in which one begins to provide fringe benefits.

The sums due as FBT shall be remitted to the MRA in quarterly instalments not later than 14 days after the end of each quarter of a period of 12 months ending 30 June, and remittance should be accompanied with a duly completed FBT return in Form FBT 2.

Note that the value for FBT should not be included in the employee's certificate of gross emoluments.

Assessment of housing fringe benefits

The taxable value of a housing fringe benefit is the greatest of (i) 10% of salary where the house is unfurnished, (ii) 12% of salary if furnished, or (iii) the rental value.

Where the house occupied by the employee is owned by the employer, the taxable value is reduced by 50%.

Motor vehicles

FBT is applicable on motor vehicles allocated for use by members of staff and does not include pool cars or cars that are strictly commercial in nature.

The taxable value is 15% of the original cost of the vehicle.

School fees (for children/dependants)

50% of the cost to the employer for school fees is a taxable benefit, where payment is made directly to the educational institution. Education allowances payable to employees are not subject to FBT as the allowance is considered part of normal salary and taxable as such.

Utilities, household items, vacations, travel, and domestic services

The taxable value of utilities (e.g. electricity, water, and telephone expenses), household items, vacations, travel, and domestic services (e.g. gardener, cook, house boy, guard, nanny) is the entire cost to the employer. Except that for a house owned by the employer, the cost of a gardener, security guard, and watchman shall not constitute a taxable benefit.

Interest-free loans and loans given at interest lower than the commercial rate

Where an employer gives a loan to an employee that is interest-free or bears interest that is lower than the predetermined commercial rate, the difference between the interest offered and the commercial rate is a taxable benefit.

Branch income

There is a 35% tax on taxable income of a branch of a foreign company.

No dividend WHT is applicable on repatriation of profits.

Income determination

Inventory valuation

Inventory is stated at cost or net realisable value (i.e. market price) for tax purposes. There is no specific requirement for the valuation of cost. The only legal emphasis is consistency in the application of the selected method. This means that one cannot change from one valuation method to another over different tax periods.

Capital gains

The tax basis for capital gains is the cost of the asset adjusted by the applicable consumer price index (inflation index). Once determined, the taxable gain is subject to corporate tax at the rate applicable to the particular entity.

Capital gains arising from the disposal of personal and domestic assets not used in connection with trade are exempt from corporate tax.

Capital gains arising from the sale of shares held for more than one year traded on the Malawi Stock Exchange are not taxable.

Rollover relief

If a business asset is sold and the taxpayer acquires a qualifying replacement asset, the taxpayer may claim rollover relief. This means that the taxpayer does not immediately pay the tax on the gain. Instead, the cost of the replacement asset is reduced by the amount of the gain. The taxpayer must declare this in the tax return.

A qualifying replacement asset is an asset similar to, or related in service or use to, the asset disposed of. The replacement asset must be acquired within 18 months of the disposal giving rise to the gain.

Dividend income

Dividend income is exempt from corporate tax; however, dividends received from Malawi sources are subject to a 10% dividend WHT, which is a final tax. Note that although the word 'final' has not been defined, it is applied as meaning that dividend WHT suffered may not be offset against an income tax liability.

Interest income

Interest is added to the other income categories and taxed at a rate applicable to the person that earns the income. There is a mandatory WHT on interest earned from financial institutions unless the earner is exempted.

There is deemed interest on any interest-free loans and balances. The deemed interest is taxable income to the lender.

Royalty income

Except for mineral royalties, royalty income is added to other income and taxed at a rate applicable to the person that earns it. Royalties earned from a mining project are taxable at 10% where the recipient in a non-resident.

Foreign exchange gains and losses

Foreign exchange gains realised on foreign currency assets or liabilities are taxable.

Foreign exchange losses realised on foreign currency assets or liabilities are tax deductible to the extent of any unrealised foreign exchange gains; otherwise, they are carried forward until there is no limitation.

Unrealised gains and losses are carried forward until realised and then included in income or allowable expenditures. The maintenance of records that accurately track unrealised exchange rate adjustments from year to year is necessary to ensure correct tax computations.

Tax-exempt income

The following are common examples of other tax-exempt income:

- The income of agricultural, mining, and commercial institutions or societies not operating for private pecuniary profit or gain of the members.
- The income of clubs, societies, and associations formed, organised, and operated solely or principally for social welfare or civic improvement or other similar purpose, provided that the income of such bodies may not be divided among or used for the benefit of the members or shareholders.
- The income of ecclesiastical, charitable, and educational institutions of a public character.

Foreign income

Generally, income whose source is not Malawi is not taxable in Malawi.

Deductions

Taxable income is calculated by deducting allowable items from assessable income. Section 28 of the Taxation Act defines tax-allowable deductions as any expenditures and losses (not being of a capital nature) wholly, exclusively, and necessarily incurred by the taxpayer for the purpose of trade or in the production of income.

Capital allowances

Capital allowances (i.e. depreciation allowances) are applicable as stipulated in the Taxation Act at various rates.

Capital allowances, which are available to companies and individuals in business, are allowed as follows:

	Allowances (%)		
Asset	**Initial**	**Investment**	**Annual**
Industrial and farm buildings, hotels, and docks (1, 2, 3)	10	40/100	5
Staff housing (3)	10	-	5
Plant, machinery, and equipment (1, 2, 3, 4)	20	40/100	10/20
Furniture and fittings (3)	20	-	10
Motor vehicles (3, 4, 5, 6)	20	-	20
Commercial buildings (7)	-	-	2.5
Computers	20	-	40

Notes

1. The 100% investment allowance is available only on new and unused qualifying assets, *as indicated above*, belonging to and used by a manufacturer or farmer. The rate for used qualifying assets is 40%. The investment allowance is claimable only in the first year of use.
2. Where an investment allowance is claimed, the initial allowance is not allowed to be claimed on the same asset. The initial allowance is claimable only in the first year of use.
3. Annual allowances at the above rates are based on cost less investment and initial and annual allowances previously granted.
4. Investment allowance on plant and machinery excludes motor vehicles intended or adapted for use on roads.
5. A 20% annual allowance is standard, but the Commissioner General may vary the amount.
6. No initial allowance is granted on private motor vehicles. These include saloons, sedans, station wagons, and double cabin pickups. However, the restriction does not apply where the motor vehicle is used for hiring purposes.
7. The building must be newly constructed at a cost of no less than MWK 100 million.

On disposal, assets are subject to balancing charges (capital gains) or balancing allowances.

If an asset is subject to extensive use, such as machinery working double shifts, so that its expected economic life is reduced, the Commissioner General may agree to increase the rates of annual allowances.

Lease, patent, trademark, and copyright premium

The tax-deductible amount of a premium paid for the right of use or occupation of land or buildings, plant or machinery, patent design, trademark, copyright, or any other property of a similar nature is one of the following:

- The amount of premium or consideration divided by the number of years for which the right of occupation or use is granted.
- Where the period for which the right of occupation or use is granted exceeds 25 years, the deduction is one-twenty-fifth of the premium or consideration.

The premium is tax deductible only where the asset or right with respect to which the premium or consideration is paid is used for the generation of income. If a taxpayer acquires ownership of the asset or right, no further deduction of the premium or consideration is allowed from the date ownership is acquired.

Goodwill

The legislation does not prescribe treatment for goodwill. It has been the practice that goodwill is not deductible for tax purposes.

Pre-operating expenditures

A manufacturer may claim as a deduction any expenditure incurred in the course of establishing the business, provided that the following are true:

- The expenditure was incurred not more than 18 months before commencing business.
- The expenditure would have been allowed as a deduction if it had been incurred after commencing business.

Interest expenses

Interest that arises out of financing operations is allowable, while interest due to late payment of a debt is not allowable.

Bad debt

Specific bad debts are tax deductible and taxable in the following year. Bad debts written off are allowable and taxable upon eventual recovery.

Charitable contributions

Donations to approved charities and approved non-profit institutions formed for the purpose of social welfare, civic improvement, educational development, or other similar purposes are deductible. The minimum individual donation allowable is MWK 500. The minimum donation for other approved charities is MWK 250. In both cases, there is no maximum donation.

Social contributions

50% of social contributions towards construction of hospitals and schools, and sponsorship of school sports activities, are tax deductible.

Research and development (R&D) expenditures

Research expenditures are fully allowable as a deduction if they are for 'experiments and research relating to trade'.

Pension contributions

The tax-allowable amount of ordinary pension contributions made by an employer to an approved pension fund is subject to limitations. The limit with respect to each employee is the lowest of one of the following *per annum*:

- The actual contribution.
- Up to 15% of employee's annual salary.

Fines and penalties

Fines and penalties are not tax deductible in any way.

Taxes
Taxes are not allowed as deductible expenses, except where they are local taxes.

Net operating losses
Current taxable income may be offset against net operating losses brought forward, and current operating losses may be increased by net unexhausted trading losses brought forward. Losses may be carried forward for six years. Net operating losses may not be carried back.

Payments to foreign affiliates
A deduction is allowed for payments to foreign affiliates if such payments are expended wholly, exclusively, and necessarily for the production of income or for the purposes of trade, and it can be demonstrated that the transaction is at arm's length.

Group taxation

Group taxation is not permitted in Malawi.

Transfer pricing
There are transfer pricing regulations in Malawi. The legislation requires taxpayers to have mandatory contemporaneous transfer pricing documentation. Malawi transfer pricing regulations follow the Organisation for Economic Co-operation and Development (OECD) transfer pricing guidelines.

The transfer pricing legislation further provides for the definition of related parties, as well as general transfer pricing regulations.

There is also a tax anti-avoidance provision that is used to check transactions between related parties. If transactions between related parties result in profits that are lower than what would be expected if the company was trading with an independent party, then the tax authorities can challenge the transaction.

Thin capitalisation
Thin capitalisation has been introduced in Malawi. However, the rules and regulations governing thin capitalisation have not been enacted. The acceptable level of gearing is therefore not yet provided.

Consequently, there are no restrictions on the level of external borrowings. If a Malawi company wants to borrow money from a foreign entity (whether or not a bank), it will require exchange control approval. In such instances, the Reserve Bank does not consider the debt-to-equity ratio. It looks at the terms and conditions to see that they are what would be commonly available on the open market between unrelated parties. As you can see, this is an anti-transfer pricing measure.

If a new application is made for exchange control approval of foreign ownership (normally this is when there is a new business/investment into Malawi), the Reserve Bank will look at the external-debt-to-local-equity ratio. There are no fixed rules, but the Reserve Bank does not normally like external debt to be more than twice equity (i.e. 1:2 equity to external debt). It does give approval for external ownership where the proportion of external debt is higher than this as it looks at each proposal on its own merit. The applicant would have to justify the higher level of external debt in such a case.

Controlled foreign companies (CFCs)

There is no CFC regime in Malawi.

Tax credits and incentives

Foreign tax credit

Malawi does not have a provision for recognition of a foreign tax credit because the taxation regime is based on source.

Export allowances

Exporters, including those manufacturing in bond, are entitled to claim additional tax allowances for non-traditional exports:

- On the export of non-traditional products, there is a 25% tax allowance on taxable income derived from exports.
- There is a 25% transport tax allowance on international transport costs for non-traditional exports. Traditional exports are tea, coffee, cane sugar, and unmanufactured tobacco and tobacco refuse.

Export allowances may not be claimed in respect of exports from mining operations.

Investment allowance

There is a 100% investment allowance on new and unused industrial buildings, plant, and machinery for taxpayers in the manufacturing industry. A 40% investment allowance for used versions of the same items is also applicable.

Farming operations

Farming operations receive a 100% allowance with respect to expenditures incurred during any year of assessment on the following:

- Stumping, levelling, and clearing of land.
- Work in connection with the prevention of soil erosion.
- Boreholes.
- Wells.
- Aerial and geophysical surveys.
- Water control work, including any canal, channel, dyke, furrow, and any flood control structure, whether or not of a permanent nature.
- Water conservation work, meaning any reservoir, water dam, or embankment constructed for the impounding of water. In the case of water conservation work, the Taxation Act limits the amount deductible to amounts actually paid, where the farmer incurs a liability in terms of any law relating to natural resources.

Where a farmer derives taxable income from growing timber, the farmer may elect that the taxable income is determined in accordance with the following rules:

- Carryforward the cost of planting the timber until the timber reaches maturity.
- Add annually to the cost of planting the timber an amount calculated as 5% of the cost of planting the timber until the timber reaches maturity.

- When the timber is sold, a proportionate amount of the total of the carryforward cost and annual added cost is deducted from the proceeds.
- In each year of assessment, the annual added cost is treated as taxable income in the hands of the farmer.

A farmer may not deduct any expenditure that has been recovered through a subsidy or claim a capital allowance on any assets where the expenditure has been recovered through a subsidy.

Mining operations

Mining operations receive a 100% allowance with respect to mining expenditures incurred during any year of assessment. Mining expenditures are defined as capital expenditures incurred in Malawi by a person carrying on or about to carry on mining operations in Malawi:

- In searching for or in discovering and testing or in winning access to deposits of minerals.
- In the acquisition of or of rights in or over such deposits, other than the acquisition from a person who has carried on mining operations in relation to such deposits.
- In the provision of plant and machinery and industrial buildings that would have little or no value to such person if the mine ceased to work.
- On the construction of any buildings or works that would have little or no value if the mine ceased to be worked.
- On development, general administration, and management prior to the commencement of mining operations.

Persons engaged in mining operations are not entitled to claim the export tax allowance on non-traditional exports or the 15% transport tax allowance on international transport costs for non-traditional exports.

Withholding taxes

Dividend WHT

Dividend WHT is a final tax and is charged at 10%. The dividend is not included in the taxpayer's taxable income, and the WHT is not deducted from the taxpayer's tax liability.

Resident WHT rates

Nature of payment	**WHT rate (%)**
Royalties	20
Rents	15
Payment of more than MWK 60,000 *per annum* for any supplies to traders and institutions	3
Commission	20
Payment for carriage and haulage	10
Payment to contractors and subcontractors in the building and construction industries	4
Payment for public entertainment	20
Payment of more than MWK 15,000 for casual labour	20
Services	20
Bank interest	20

Nature of payment	WHT rate (%)
Fees	10

Non-resident tax (WHT on income due to non-residence)

Income sourced from Malawi but not attributable to a PE in Malawi is subject to a final WHT as follows:

- 10% on income derived from a mining project as interest, royalty, payment for independent personal services, or dividend.
- 15% on all other income.

Non-resident WHT treatment under tax treaties

	WHT (%)				
Recipient	Dividends	Interest	Royalties	Rent	Management fees
Non-resident (1)	15	15	15	15	15
Treaty:					
France	0	0	0	15	0
Norway	5	10	5	15	0
South Africa	10	15	0	0	15
Sweden	0	0	0	15	0
Switzerland	0	0	0	15	0
United Kingdom	0	0	0	15	15

Notes

1. *See Non-resident tax in the Taxes on corporate income section.*

WHT exemption

There is WHT exemption on local supplies for compliant resident taxpayers. A ‘compliant taxpayer’ is defined as one that has settled all their tax liabilities with the tax authorities, including customs and excise.

Tax administration

Taxable period

The taxable period for income tax is a 12-month period ending on 30 June of each year. For businesses whose year-end is 31 July and 31 August, the applicable tax year-end is the preceding 30 June, while all the years ending in the subsequent months have the following 30 June as a year-end.

Tax returns

Income tax returns are due within 180 days after the end of the financial year. There is now legislation that provides for electronic filing of tax returns.

Payment of tax

Tax is payable in quarterly instalments within 25 days of the month following the end of the quarter, with the balance of the tax being paid upon submission of the return.

Penalties and interest

- There is a 20% penalty on any overdue tax liability plus interest at the prevailing bank lending rate plus 5% *per annum* for each month or part of the month that the tax remains unpaid.
- Penalties for offences are MWK 200,000 for the first month plus an additional MWK 50,000 for each month or part thereof where a person:
  - fails to comply with any notice served by the Commissioner General under the Taxation Act
  - gives incorrect information or omits any relevant information from any statement required to be made to the Commissioner General
  - fails to keep records, books, or accounts required to be kept
  - fails to comply with provisions requiring the appointment of a public officer of the company, or
  - fails to furnish any other person with a certificate of the extent of the examination of the records in preparing the schedules supporting any return.
- Penalties for failure to or defaulting to file prescribed returns are MWK 300,000 for the first month and MWK 50,000 for each month or part thereof that the failure continues.
- Penalties for omissions, wrongful deductions, and claims, as well as failure to withhold and remit tax on income due to persons not resident in Malawi, to 20% in the first month or part thereof and interest at the prevailing bank lending rate plus 5% *per annum* for each month or part of the month that the tax remains unpaid.
- Any intent to defraud is subject to a penalty of the greater of MWK 200,000 and twice the difference between the tax charged and what would have been charged.
- Assisting in making an incorrect return is subject to a penalty of MWK 200,000 in the first month or part thereof and an additional MWK 10,000 for each month or part thereof that the penalty remains unpaid.
- There are MWK 1 million penalties for obstructing officers, forceful rescue of seized property, physical assault of officers, and inciting a person to refuse to pay tax.
- There are penalties for failure to complete documentation in compliance with WHT regulations.
- There are also penalties and interest for failure to remit the WHT and PAYE, as well as fringe benefits tax.

Interest on outstanding tax liability is charged at the commercial lending rate plus 5% *per annum*.

Tax audit process

The target for the tax authorities is to audit 30% of the taxpayers in any fiscal year. This translates to approximately three years per audit cycle.

Statute of limitations

There is no statute of limitations in Malawi, except for the mandatory seven-year period for keeping records.

Topics of focus for tax authorities

The tax authorities have recently focussed on transfer pricing and have consequently established a unit responsible for this. All multinationals are under scrutiny to check if they are dealing at arm's length with related entities.

Commissioner General's power to increase taxable income

The Commissioner General is empowered to increase the taxable income and liability of a taxpayer when of the opinion that the main purpose or one of the main purposes of a transaction was the avoidance or reduction of tax or where the main benefit that might have been expected to accrue from a transaction was the avoidance or reduction of tax.

Significant developments

Goods and services tax (GST)

The new government has reduced the GST standard tax rate of 6% to 0%, effective from 1 June 2018. The new government has also announced that the sales and services tax will be reintroduced in place of GST, which is to be abolished. These changes are expected to take place in September 2018.

Digital advertising

The Malaysian tax authorities recently issued a practice note to state their position that payments for use of applications (Apps) to create advertising campaigns constitute royalty under the domestic law.

Taxes on corporate income

For both resident and non-resident companies, corporate income tax (CIT) is imposed on income accruing in or derived from Malaysia. The current CIT rates are provided in the following table:

Type of company	Chargeable income (MYR)	CIT rate for year of assessment 2018 (%)
Resident company (other than company described below)		24*
Resident company: • with paid-up capital of 2.5 million Malaysian ringgit (MYR) or less • that does not control, directly or indirectly, another company that has paid-up capital of more than MYR 2.5 million, and • is not controlled, directly or indirectly, by another company that has paid-up capital of more than MYR 2.5 million.	On the first 500,000	18
	In excess of 500,000	24*
Non-resident company		24

* For years of assessment 2017 and 2018, CIT is reduced based on the incremental chargeable income for companies, limited liability partnerships, trust bodies, executor of estate of an individual domiciled outside Malaysia at the time of death, and receiver appointed by the court. The rates as follows are applicable:

% of increase in chargeable income compared to immediate preceding year of assessment	% point reduction	Income tax rate applicable for incremental portion of chargeable income (%)
Less than 5.00	Nil	24

% of increase in chargeable income compared to immediate preceding year of assessment	% point reduction	Income tax rate applicable for incremental portion of chargeable income (%)
5.00 to 9.99	1	23
10.00 to 14.99	2	22
15.00 to 19.99	3	21
20.00 and above	4	20

Petroleum income tax

Petroleum income tax is imposed at the rate of 38% on income from petroleum operations in Malaysia. An effective petroleum income tax rate of 25% applies on income from petroleum operations in marginal fields. No other taxes are imposed on income from petroleum operations.

Local income taxes

There are no other local, state, or provincial government taxes on income in Malaysia.

Corporate residence

A company is tax resident in Malaysia in a basis year (normally the financial year) if, at any time during the basis year, the management and control of its affairs are exercised in Malaysia. Generally, a company is regarded as resident in Malaysia if, at any time during the basis period for a year of assessment, at least one meeting of the Board of Directors is held in Malaysia concerning the management and control of the company.

Permanent establishment (PE)

Generally, a non-resident entity is regarded as having a PE in Malaysia if it has a fixed place of business in Malaysia, where the business of the entity is wholly or partly carried on. A non-resident company may also be deemed to have a PE in Malaysia under certain circumstances, such as the following:

- It is represented by a dependent agent in Malaysia who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.
- It carries on supervisory activities in Malaysia for six/nine months in connection with a construction, installation, or assembly project.

Other taxes

Goods and services tax (GST)

GST was introduced on 1 April 2015 at the standard rate of 6%. Businesses making taxable supplies where the annual sales turnover exceeds MYR 500,000 must register for GST, which is administered by the Royal Malaysian Customs Department. Effective from 1 June 2018, the GST rate has been reduced to 0%. The GST will be replaced by the sales and services tax in September 2018.

Import duties

Import duties are levied on goods that are subject to import duties and imported into the country. Import duties are generally levied on an *ad valorem* basis but may also be imposed on a specific basis. The *ad valorem* rates of import duties range from 2% to

60%. Raw materials, machinery, essential foodstuffs, and pharmaceutical products are generally non-dutiable or subject to duties at lower rates.

Excise duties

Excise duties are imposed on a selected range of goods manufactured and imported into Malaysia. Goods that are subject to excise duty include beer/stout, cider and perry, rice wine, mead, un-denatured ethyl alcohol, brandy, whisky, rum and tafia, gin, cigarettes containing tobacco, motor vehicles, motorcycles, playing cards, and mahjong tiles.

The rate of excise duties vary from a composite rate of MYR 0.1 per litre and 15% of the value for certain types of spirituous beverages, to as much as 105% of the value of motorcars (depending on engine capacity).

Property tax

Property tax is levied on the gross annual value of property as determined by the local state authorities.

Real property gains tax (RPGT)

RPGT is charged upon gains from disposals of real property, which is defined as:

- any land situated in Malaysia, as well as any interest, option, or other right in or over such land, or
- shares in a real property company (RPC), which is a controlled company holding real property or shares in another RPC or a combination of both, where the total defined value is not less than 75% of its total tangible assets.

RPGT is imposed on companies as follows:

Holding period from date of acquisition	RPGT rate (%)
Up to three years	30
In the fourth year	20
In the fifth year	15
Exceeding five years	5

Stamp duty

Malaysia imposes stamp duty, which is payable by the buyer/transferee, on chargeable instruments. Some examples are provided as follows:

Transaction type	Value chargeable	Stamp duty rate (%)
Sale/transfer of properties (excluding stock, shares, or marketable securities)	Market value	1 to 3
Sale/transfer of stock, shares, or marketable securities	Consideration paid or market value, whichever is higher	0.3
Service/loan agreements	Value of services/loans	0.5

Payroll taxes

Under the Monthly Tax Deduction scheme, employers are required to deduct the prescribed amount of tax from employees' salaries each month, to be remitted to the tax authorities not later than the 15th day of each calendar month.

Social security contributions

Employees' Provident Fund (EPF)

The Malaysian EPF is a compulsory pension scheme for all Malaysians. The EPF provides for compulsory retirement savings and contributions for all Malaysian citizens and Malaysian permanent residents who are working in Malaysia. It is not compulsory for non-Malaysian citizens and non-Malaysian permanent residents to contribute to the EPF, but they may elect to do so.

	Malaysian citizens and permanent residents (mandatory)		Expatriates and foreign workers (voluntary)	
	% of contribution of employee's wages (minimum)			
Contribution by	Employer	Employee	Employer	Employee
Up to age 60:				
Income > MYR 5,000	12.0%	11.0%	MYR 5 per person	11.0%
Income ≤ MYR 5,000	13.0%			
Age 60 and above, up to 75:				
Income > MYR 5,000	6.0%	5.5%	MYR 5 per person	5.5%
Income ≤ MYR 5,000	6.5%			

Social Security Organisation

Malaysia also has a Social Security Organisation (SOCSO) who administers the Employment Injury Insurance Scheme (EIIS) and the Invalidity Pension Scheme (IPS). All employees with monthly wages below MYR 4,000 are covered by the schemes, and employees who qualify for the schemes will continue to remain within the schemes notwithstanding that their monthly wages may subsequently exceed MYR 4,000. A monthly contribution must be made and may fall under one of two categories:

- Both the employer and employee make monthly contributions to EIIS and IPS. The sum is based on the employee's monthly wages and is restricted to a maximum of MYR 69.05 for the employer and MYR 19.75 for the employee.
- The employer makes a contribution to EIIS only for employees who are not eligible to be covered under the IPS, with the amount restricted to a monthly maximum of MYR 49.90.

Human resource development levy

Employers engaged in the manufacturing and services sectors that employ more than a specified number of employees must contribute to the Human Resource Development Fund (HRDF). The levy required to be paid is at the rate of 1% of the employees' monthly wages on a monthly basis.

Windfall profit levy

A levy is imposed on crude palm oil and crude palm kernel oil where the price exceeds MYR 2,500 per ton in Peninsula Malaysia, and MYR 3,000 per ton in the states of Sabah and Sarawak.

Contract levy

A levy of 0.125% on contract works having a contract sum above MYR 500,000 is imposed on every registered contractor by the Construction Industry Development Board.

Branch income

Tax rates on branch profits of a company are the same as CIT rates. No tax is withheld on transfer of profits to a foreign head office.

Income determination

Inventory valuation

Inventories are generally stated at lower of cost or net realisable value. Cost may be determined using one of several methods (e.g. unit cost, average cost, or first in first out [FIFO]), as long as the basis used is consistent for each year.

Capital gains

Generally, gains on capital assets are not subject to tax, except for gains arising from the disposal of real property situated in Malaysia, which is subject to RPGT (*see the Other taxes section for more information*).

Dividend income

Malaysia is under the single-tier tax system. Dividends are exempt in the hands of shareholders. Companies are not required to deduct tax from dividends paid to shareholders, and no tax credits will be available for offset against the recipient's tax liability. Corporate shareholders receiving exempt single-tier dividends can, in turn, distribute such dividends to their own shareholders, who are also exempt on such receipts.

Stock dividends

A Malaysian corporation may distribute bonus shares tax-free to shareholders.

Interest income

Interest income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. However, exemption is provided on interest income received in Malaysia from outside Malaysia. Other exemptions granted include interest income earned by a non-resident person from deposits placed in designated financial institutions in Malaysia.

Royalty income

Royalty income accruing in or derived from Malaysia or received in Malaysia from outside Malaysia is subject to CIT. Malaysia has a wide definition of royalty that also includes software, visual images or sounds transmitted via satellite, cable, or fibre optic, and radio frequency spectrum. Payments to non-residents falling within the definition of royalty will be subject to withholding tax (WHT) requirements. However, certain royalty income earned by a non-resident person may be exempted from tax.

Foreign income

Under the Income Tax Act 1967, a Malaysian tax-resident company and a unit trust are not taxed on their foreign-sourced income, regardless of whether such income is received in Malaysia. However, income of a resident company from the business of air/sea transport, banking, or insurance is assessable on a worldwide basis.

Taxation on a worldwide basis does not apply when income attributable to a Labuan business activity of a Labuan branch or subsidiary of a Malaysian bank is subject to tax under the Labuan Business Activity Tax Act 1990. This exception will not apply if the Labuan entity has made an irrevocable election to be taxed under the Income Tax Act 1967 in respect of its Labuan business activity.

Relief from double taxation is available by means of a bilateral credit if there is a governing tax treaty or unilateral relief where there is no treaty. The relief is restricted to the lower of Malaysian tax payable or foreign tax paid if there is a treaty, or one-half of the foreign tax paid if there is no treaty.

Undistributed income of foreign subsidiaries is not taxable.

Deductions

Capital allowance

Capital allowance (tax depreciation) on industrial buildings, plant, and machinery is available at prescribed rates for all types of businesses. Initial allowance is granted in the year the expenditure is incurred and the asset is in use for the purpose of the business. Annual allowance at the prescribed rates calculated on cost is given for every year during which the asset is in use at the end of the basis year for the purposes of the business. The following are examples of capital allowance rates currently available:

Qualifying asset	Initial allowance (%)	Annual allowance (%)
Industrial building, whether constructed or purchased	10	3
Heavy machinery	20	20
General plant and machinery	20	14
Furniture and fixtures	20	10
Office equipment	20	10
Motor vehicles*	20	20*
Small value assets of less than MYR 1,300 (subject to a maximum total cost of MYR 13,000)	-	100

* Restrictions apply on maximum qualifying capital expenditure.

Accelerated capital allowance is available for certain types of industrial building, plant, and machinery, some of which includes buildings used as a warehouse, buildings used as a school or an educational institution, computers, information technology equipment, environmental protection equipment, waste recycling equipment, and plant and machinery used in specific industries.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible, as these expenses are capital in nature.

Start-up expenses

In general, start-up expenses incurred before the commencement of a trade, profession, or business are capital in nature, as they were expended to put the person in a position to earn income. However, there are specific deductions allowed, such as incorporation expenses and recruitment expenses (conditions apply).

Interest expenses

Interest expense is allowed as a deduction if the expense was incurred on any money borrowed and employed in the production of gross income or laid out on assets used or held for the production of gross income. Where a borrowing is partly used to finance non-business operations, the proportion of interest expense will be allowed against the non-business income.

Bad debt

Debts must be specifically identified and reasonably estimated to be irrecoverable to qualify for a tax deduction.

Donations to charitable institutions

A deduction is allowed for cash donations to approved institutions (defined) made in the basis period for a year of assessment. The deduction is limited to 10% of the aggregate income of that company for a year of assessment.

Fines and penalties

Fines and penalties are generally not deductible.

Taxes

Taxes on income are generally not deductible, whereas indirect taxes are deductible.

Net operating losses

The carryforward of business losses and capital allowances is not available for deduction in subsequent years of assessment if the company does not meet the conditions of a shareholders' continuity test. However, per policy issued by the Ministry of Finance, these conditions currently apply only to dormant companies. Carryforward of business losses and capital allowances is unlimited in time for non-dormant companies.

Current-year business losses may be utilised against all sources of income. Utilisation of carried-forward losses is restricted to income from business sources only. Utilisation of capital allowance is also restricted to income from the same underlying business source.

Currently, there are no provisions to carry back losses to prior years of assessment.

Payments to foreign affiliates

A Malaysian company can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided that these are made at arm's length and the relevant WHTs, where applicable, have been paid.

Group taxation

A company that qualifies for group relief may surrender a maximum of 70% of its adjusted loss for a year of assessment to one or more related companies if the following conditions are met by both the claimant and surrendering companies:

- Both must be resident and incorporated in Malaysia.

- Each has paid-up capital of ordinary shares exceeding MYR 2.5 million at the beginning of the basis period.
- Both have the same (12-month) accounting period.
- They are 'related' throughout the basis period for a particular year of assessment as well as the 12 months preceding that basis period.
- Both are not currently enjoying specific stipulated incentives, such as pioneer status, investment tax allowance, reinvestment allowance, etc.

'Related company' is defined by the Income Tax Act 1967 and involves the application of a two-tier test. The companies are regarded as 'related' if:

- either company owns at least 70% of the ordinary share capital of the other company or a third company owns at least 70% of each of the companies, and
- the holders of ordinary shares are entitled to at least 70% of the distributable profits and assets of the company on winding up.

Companies that wish to avail themselves of group relief must make an irrevocable election to surrender or claim the tax loss in the return to be filed with the Inland Revenue Board for that year of assessment.

Transfer pricing

The Director General of Inland Revenue (DGIR) is empowered to make adjustments on transactions of goods and services if the DGIR is of the opinion that the transactions were not entered into on an arm's-length basis.

The transfer pricing rules that apply to controlled transactions (defined, including financial assistance) specify the methods to determine the arm's-length price and the circumstances under which the DGIR may re-characterise transactions. The advance pricing arrangement (APA) rules that apply only to cross-border transactions outline the application procedures for unilateral, bilateral, or multilateral APAs.

Country-by-country (CbC) reporting

The CbC Rules require that Malaysian multinational corporation (MNC) groups with total consolidated group revenues of MYR 3 billion to prepare and submit CbC reports to the tax authorities no later than 12 months after the close of each financial year. Malaysian entities of foreign MNC groups will generally not be required to prepare and file CbC reports as the obligation to file will be with the ultimate holding company in the jurisdiction it is tax resident in. However, the Malaysian entities of the foreign MNC group will have an obligation to inform/notify the tax authorities, by the end of its financial year, if it is the holding company or has been appointed as the surrogate holding company. If it is neither the holding company nor surrogate holding company, the Malaysian entities must notify the tax authorities of the identity and tax residence of the entity responsible for preparing the CbC report.

Earning stripping rules

The thin capitalisation provision is to be replaced with the implementation of the earning stripping rules with effect from 1 January 2019. Under the rules, interest deductions will be limited to a fixed percentage (within the range of 10% to 30%) of profit, measured using earnings before interest, taxes, depreciation, and amortisation (EBITDA). The rules have yet to be issued or gazetted.

Controlled foreign companies (CFCs)

There are no CFC rules in Malaysia.

Tax credits and incentives

Malaysia has a wide variety of incentives covering the major industry sectors. Tax incentives can be granted through income exemption or by way of allowances. Generally, when income is exempted, any dividends paid out of such exempt income are not taxable in the hands of the shareholders. Where incentives are given by way of allowances, any unutilised allowances generally may be carried forward indefinitely to be utilised against future statutory income. The following are the major types of incentives available in Malaysia.

Pioneer status (PS) and investment tax allowance (ITA)

Companies in the manufacturing, agricultural, hotel, and tourism sectors, or any other industrial or commercial sector, that participate in a promoted activity or produce a promoted product may be eligible for either PS or an ITA.

PS is given by way of exemption from CIT on 70% of the statutory income for five years and the remaining 30% is taxed at the prevailing CIT rate. An ITA is granted on 60% qualifying capital expenditure incurred for a period of five years to be utilised against 70% of the statutory income, while the 30% balance is taxed at the prevailing CIT rate.

A company that intends to undertake reinvestment before expiration of its PS or ITA status may opt for reinvestment allowance, provided it surrenders its PS or ITA status.

The PS and ITA incentives are enhanced for the following types of projects:

	Pioneer status		Investment tax allowance	
Qualifying industry	**Incentive**	**TRP (1)**	**Incentive**	**TRP (1)**
Projects of national and strategic importance involving heavy capital investment and high technology.	100% of SI (2)	5 + 5	100% QCE (3) against 100% SI	5
High-technology companies engaged in areas of new and emerging technologies.	100% of SI	5	60% QCE against 100% SI	5
Companies manufacturing specialised machinery and equipment.	100% of SI	10	100% QCE against 100% SI	5
Existing locally owned companies reinvesting in production of heavy machinery, specialised machinery, and equipment.	70% of increased SI	5	60% new QCE against 70% SI	5
Companies providing technical and vocational training, and private higher education institution providing qualifying science courses.	-	-	100% QCE against 70% SI	10
New companies investing and existing companies reinvesting in utilising oil palm biomass to produce value-added products.	100% of SI	10	100% QCE against 100% SI	5
Small scale companies (defined) that meet with specified conditions.	100% of SI	5	60% QCE against 100% SI	5

	Pioneer status		Investment tax allowance	
Qualifying industry	Incentive	TRP (1)	Incentive	TRP (1)
Hotel operators undertaking new investments in 4 and 5 star hotels in Sabah/Sarawak (for applications until 31 December 2020).	100% of SI	5	100% QCE against 100% SI	5
Hotel operators undertaking new investments in 4 and 5 star hotels in Peninsular Malaysia (for applications until 31 December 2020).	70% of SI	5	60% QCE against 70% SI	5

Notes

1. Tax relief period (in terms of years).
2. Statutory income.
3. Qualifying capital expenditure.

Special incentive schemes

Reinvestment allowance

A resident company in operation for not less than 36 months that incurs capital expenditure to expand, modernise, automate, or diversify its existing manufacturing business or approved agricultural project is entitled to reinvestment allowance as follows:

- The allowance is given for 15 years from the first year of claim.
- An allowance of 60% of QCE incurred to be utilised against 70% of statutory income. The remaining 30% is taxed as the prevailing CIT rate.
- The 70% restriction does not apply to projects that achieved the level of productivity as prescribed by the Minister of Finance.
- The allowance will be withdrawn if the asset for which the allowance is granted is disposed of within five years.

A special reinvestment allowance is provided by extending the existing incentive period for up to three years, from year of assessment 2016 to 2018.

Approved service projects

A resident company undertaking a project approved by the Minister of Finance in the transportation, communications, utilities, and services subsectors may enjoy the following incentives:

- Investment allowance of 60% of QCE incurred within five years to be utilised against 70% statutory income.
- Alternatively, income tax exemption of 70% of statutory income for a period of five years.
- Buildings used solely for the purposes of such projects qualify for an industrial building allowance.

Export incentives

A resident company engaged in manufacturing or agriculture that exports manufactured products, agricultural produce, or services is entitled to allowances between 10% and 100% of increased exports (subject to satisfying prescribed conditions), which is deductible at up to 70% of statutory income.

Regional operations

Principal hub

A principal hub is a locally incorporated company that uses Malaysia as a base for conducting its regional and global businesses and operations through management, control, and support of key functions, such as management of risk, strategic decisions, finance, and human resources. CIT at tiered rates (0%, 5%, or 10%) is given for a period of up to ten years, subject to conditions being met (for applications from 1 May 2015 to 31 December 2020).

Other available non-fiscal incentives available include:

- No equity/ownership conditions.
- Foreign exchange administration flexibilities and expatriate positions.
- Customs duty exemption for raw materials, components, or finished products brought into free zones, licensed and bonded warehouses for production or repackaging, cargo consolidation, and integration before distribution to its final customers for goods-based companies.

International trading company

International trading companies are exempt for five years on income equivalent to 20% of increased export value, up to a maximum of 70% of statutory income. To qualify for the incentive, the company must meet the following three conditions:

- Be incorporated in Malaysia, with 60% Malaysian ownership.
- Achieve minimum annual sales of MYR 10 million, not more than 20% of which may be derived from the trading of commodities.
- Use local services (banking, finance, and insurance) and infrastructure (local ports and airports) in its operations.

Financial services sector

Islamic banking and takaful business

Effective from year of assessment 2007 until year of assessment 2016, full income tax exemption for ten years is granted to:

- Islamic banks licensed under the Islamic Financial Services Act 2013, on income from Islamic banking business conducted in international currencies.
- *Takaful* (Islamic insurance) companies licensed under the Islamic Financial Services Act 2013, on income from *takaful* business conducted in international currencies.

The above incentive will be extended until year of assessment 2020 when the gazette order is issued.

Stamp duty exemption is also provided on instruments executed (from 1 January 2017 to 31 December 2020) pertaining to Islamic banking and *takaful* business transacted in international currencies.

Islamic fund management

Full income tax exemption is available on statutory income on management fees received by resident fund management companies for managing funds of foreign and local investors established under Syariah principles (until year of assessment 2020). Such funds must be approved by the Securities Commission.

Special purpose vehicle (SPV) for Islamic financing

An SPV established solely for the purpose of issuance of Islamic securities under the Syariah principles (approved by the Securities Commission or established under the Labuan Companies Act 1990) is not subject to income tax and is not required to comply with administrative procedures under the income tax law. The company that establishes the approved SPV is deemed to be the recipient of the SPV's income and will be taxed accordingly, but that company will be allowed a deduction for the cost of issuance of Islamic securities.

Tun Razak Exchange (TRX) (formerly known as Kuala Lumpur International Financial District)

The TRX is a joint property development comprising office towers for finance and banking, residences, and retail spaces in Kuala Lumpur. To accelerate the development of the TRX, the following incentives have been given:

- Stamp duty exemption on loan and service agreements for TRX Marquee status companies.
- Industrial building allowance and accelerated capital allowance for TRX Marquee status companies.
- Income tax exemption of 70% of statutory income for five years for property developers in TRX.
- Additional 50% tax deduction of rental payment incurred by TRX Marquee status companies for buildings used for business in TRX.
- Deduction of relocation cost incurred by TRX Marquee status companies to relocate to TRX.

Real estate investment trusts (REIT)/Property trust fund (PTF)

REIT/PTFs are vehicles that mobilise funds from unit holders comprising individuals and companies for investments in the property sector and related assets. REIT/PTFs are exempted from tax on all income, provided that at least 90% of their total income is distributed to unit holders. With effect from year of assessment 2017, this exemption only applies to REIT/PTFs that are listed on the Bursa Malaysia. If the 90% distribution condition is not complied with, all income will be taxed at the prevailing income tax rate at the REIT/PTF level and tax credit will be claimed by the unit holders on distributions received from the REIT/PTF.

Unit holders are taxed as follows:

Unit holders	WHT rate
Individuals (whether resident or non-resident), body of persons, or other unincorporated persons	10% (until 31 December 2019)
Non-resident company	24%
Resident company	None (income to be included in annual tax return)
Institutional investor (pension fund, collective investment scheme, or other person approved by the Minister of Finance)	10% (until 31 December 2019)

Other incentives available are:

- RPGT and stamp duty exemptions on disposal/transfer of real property to an REIT/PTF.

- Tax deduction given for consultancy, legal, and valuation service fees incurred on the establishment of an REIT.

Foreign fund management company

A foreign fund management company providing fund management services to foreign clients is taxed at a concessionary rate of 10% in respect of income derived from the management of foreign funds, while income arising from services rendered to clients in Malaysia is taxed at the prevailing CIT rate.

A foreign fund management company is a Malaysian incorporated company licensed under the Capital Markets and Services Act 2007. Its activities are regulated by the Securities Commission.

Venture capital company (VCC)

A VCC investing in a venture company (VC), which is not the VCC's related company at the point of first investment, will be given a deduction on the value of investment made in a VC. Where the deduction is not claimed, the VCC is eligible for the following income tax exemption on income from all sources, other than interest income from savings or fixed deposits, and profits from Syariah-based deposits:

Conditions	Exemption period
• At least 70% of invested funds is invested in VC, or • At least 50% of invested funds is invested in VC in the form of seed capital.	10 years

Budget 2018 proposes to reduce the investment limit in a VC at the seed, start-up capital, or early stage financing to 50%, allow the balance of 50% for other investments, and make the exemption period for five years from year of assessment 2018 to 2022, when gazetted.

Petroleum sector

The following incentives are provided for petroleum operations:

- Accelerated capital allowance on qualifying capital expenditure incurred from year of assessment 2010 to 2024 for petroleum operations in marginal fields.
- Investment allowance of 60% of qualifying capital expenditure to be utilised against 70% statutory income for a period of ten years.
- Exemption for a portion of chargeable income from marginal fields resulting in a reduction of the effective tax rate from 38% to 25% for petroleum operations in marginal fields.

Special economic regions

The following special economic regions were launched as part of the Malaysian government's plan for regional growth and development:

Economic region	Location
Iskandar Malaysia (formerly known as Iskandar Development Region [IDR]): *www.iskandarmalaysia.com.my*	Southern Johor
Northern Corridor Economic Region: *www.koridorutara.com.my*	States of Perlis, Kedah, Penang, and northern Perak
East Coast Economic Region: *www.ecerdc.com.my*	States of Kelantan, Terengganu, Pahang, and district of Mersing in Johor

Economic region	Location
Sabah Development Corridor: *www.sedia.com.my*	Western, central, and eastern regions of Sabah
Sarawak Corridor of Renewable Energy: *www.sarawakscore.com.my*	Central Sarawak

Special incentives, on top of the existing incentives given by the Malaysian government, will be customised for the purpose of each economic region. At present, special legislation has been enacted only in respect of Iskandar Malaysia (IM) and East Coast Economic Region (ECER).

Iskandar Malaysia

Entity	Incentive
IDR-status company	10 years income tax exemption on statutory income from the provision of qualifying services to a person situated within designated nodes in the IDR or outside Malaysia. Operations commenced before 31 December 2015.
Developer	Income tax exemption on rental or disposal of buildings in designated nodes (until year of assessment 2020).
Development manager	Income tax exemption on statutory income from the provision of management, supervisory, and marketing services to an approved developer (until year of assessment 2020).
Non-resident service provider	Income tax and WHT exemptions on income from technical fees or royalties received from IDR-status companies.
Individuals working in IDR	A qualified knowledge worker is taxed at the rate of 15% on chargeable income from employment with a designated company engaged in a qualified activity (e.g. green technology, educational services, healthcare services, creative industries, financial advisory and consulting services, logistics services, tourism) in that specified region. Employment must have commenced between 24 October 2009 and 31 December 2015.

East Coast Economic Region

Entity	Incentive
Qualifying person undertaking qualifying activity	Income tax exemption on SI for 10 years or income tax exemption equivalent to 100% of QCE incurred for 5 years (applications received from 13 June 2008 to 31 December 2020). WHT exemption on fees for technical advice, assistance, or services, or royalty paid to non-residents (until 31 December 2020). Stamp duty exemption on instruments of transfer of real property, or lease of land, or building used for the purpose of carrying on a qualifying activity (executed on or after 13 June 2008 but not later than 31 December 2020).
Qualifying person undertaking special qualifying activity	Income tax exemption at a rate of 70% to 100%, for a period as determined by the Minister (applications received from 13 June 2008 to 31 December 2020). Income tax exemption equivalent to a rate of 60% to 100% of QCE incurred and within a period as determined by the Minister (applications received from 13 June 2008 to 31 December 2020). WHT exemption on fees for technical advice, assistance, or services, or royalty paid to non-residents (until 31 December 2020).

Entity	Incentive
Approved developer undertaking development in industrial park or free zone	Income tax exemption for 10 years in respect of income derived from: • disposal of any right over any land, or disposal of a building, or rights over building, or part of building, or • rental of building or part of building. Applications received from 13 June 2008 to 31 December 2020.
Approved park managers	Income tax exemption, for 10 years, of SI derived from the provision of park management services in the industrial park or free zones (applications received from 13 June 2008 to 31 December 2020).
Approved development manager	Income tax exemption, for 10 years, of SI derived from the provision of management, supervisory, or marketing services relating to the development of an industrial park or free zone (applications received from 13 June 2008 to 31 December 2020).
Investor investing in related company	A deduction equivalent to the value of investment made into a related company carrying out qualifying activity or special qualifying activity (applications received from 13 June 2008 to 31 December 2020).
Qualifying person who sponsors a hallmark event	A deduction for an amount not exceeding MYR 1 million per year of assessment in respect of cash contribution or contribution in kind for a hallmark event carried on in ECER from 13 June 2008 to 31 December 2020 (applications received from 13 June 2008 to 31 December 2020).

Incentive for less-developed areas

To enhance the special incentive package available in the economic corridors to include more less-developed areas, the following incentives are given to existing companies expanding to less-developed areas or newly established companies (for applications from 1 January 2015 to 31 December 2020):

- 100% income tax exemption for up to 15 years of assessment (5+5+5) commencing from the first year of assessment statutory income is derived, or
- income tax exemption of 100% of qualifying capital expenditure (ITA) that can be offset against 100% statutory income for ten years.

The company must undertake manufacturing or services activities in less-developed areas that create employment and rural development.

The other incentives available for less-developed areas are:

- Stamp duty exemption on transfer or lease of land or building.
- WHT exemption on fees for technical advice, assistance, or services, or royalty relating to manufacturing and services activities, up to 31 December 2020.
- Import duty exemption on raw materials and components, machinery, and equipment that are not produced locally and used directly in the manufacturing or services activity.

Information and communication technology (ICT)

MSC Malaysia

MSC Malaysia is Malaysia's initiative for the global information technology (IT) industry and is designed to be the research and development (R&D) centre for industries based on IT. It is an ICT hub equipped with high-capacity global telecommunications and logistics networks. MSC Malaysia is also supported by secure cyber laws, strategic policies, and a range of financial and non-financial incentives for investors. It is managed by the Multimedia Development Corporation (MDeC), a 'one-stop shop' that acts as the approving authority for companies applying for MSC Malaysia status.

MSC Malaysia status is awarded to both local and foreign companies that develop or use multimedia technologies to produce or enhance their products and services as well as for process development. MSC Malaysia companies are eligible for incentives, which include the following:

- PS (five + extendable by five years) of 100% on statutory income or ITA of 100% for five years for a new company or existing company on its additional income.
- Eligibility for R&D grants (for majority Malaysian-owned MSC Malaysia company).
- Exemption from indirect taxes on multimedia equipment.
- Unrestricted employment of local and foreign knowledge workers.
- Freedom to source funds globally for investments.
- Protection of intellectual property and cyber laws.
- No censorship of the Internet.
- Globally competitive telecommunication tariffs and services guarantees, world-class physical and IT infrastructure, and excellent R&D facilities.

Green incentives

Green technology projects

Companies that undertake any of the following green technology projects will be eligible for an ITA of 100% of QCE against 70% statutory income for QCE incurred from 25 October 2013 to year of assessment 2020 (applications to be received by 31 December 2020):

- Renewable energy.
- Energy efficiency.
- Green building.
- Green data centre.
- Waste management.

Green technology services

Companies that provides services, such as advisory, design, feasibility study, testing, and commission, in the following areas will be eligible for income tax exemption of 100% of statutory income from year of assessment 2013 to 2020 (applications to be received by 31 December 2020):

- Renewable energy.
- Energy efficiency.
- Electric vehicle.
- Green building.
- Green data centre.
- Green certification and verification.
- Green township.

Green technology assets

Companies that purchase green technology assets listed on the MyHijau directory will be eligible for an ITA of 100% of QCE incurred from 25 October 2013 to year of assessment 2020 (applications to be received by 31 December 2020).

Waste eco parks (WEPs)

The following industry players in WEPs will be eligible for incentives for applications received from 1 January 2016 until 31 December 2020. The WEP incentive is to promote waste management in an integrated manner.

Entity	Incentive	Incentive period
Developer	70% income tax exemption of statutory income derived from rentals of buildings, fees from usage of waste collection and separation facilities, and fees from waste water treatment facilities located in the WEP.	Year of assessment 2016 to 2025
Manager	70% income tax exemption of statutory income derived from services related to management, maintenance, supervision, and marketing of the WEP.	Year of assessment 2016 to 2025
Operator	• 100% income tax exemption for five years on statutory income derived from qualifying activities undertaken in the WEP, or • ITA of 100% of QCE incurred within five years, against 70% of statutory income.	Five years

Biotechnology industry

Companies undertaking biotechnology activity with approved bionexus status from Malaysian Biotechnology Corporation Sdn Bhd will be eligible for the following incentives:

- Full income tax exemption on statutory income for ten years from the first year in which the company derives statutory income or ITA of 100% on QCE incurred for a period of five years.
- Concessionary tax rate of 20% on statutory income from qualifying activities for ten years upon expiry of the tax exempt period.
- Accelerated industrial building allowance (over ten years) for buildings used solely for the purpose of its new business or expansion project.
- Exemption of import duty and sales tax on import of raw materials and machinery.

Research and development (R&D)

Contract R&D company

Companies that provide R&D services to third parties are eligible for:

- full exemption of their statutory income for a period of five years (extendable by five years), or
- ITA of 100% of QCE incurred within a period of ten (extendable by ten years) to be utilised against 70% of statutory income.

R&D company

The ITA incentive is also available to companies undertaking R&D services for their group and third parties.

In-house R&D

Companies undertaking in-house R&D projects are eligible for ITA at the rate of 50% of QCE incurred within a period of ten years (extendable by ten years) to be utilised against 70% of statutory income.

Commercialisation of resource-based R&D findings

A company that invests for the sole purpose of financing a project on commercialisation of resource-based R&D findings (which is wholly owned by a public research institute or public institute of higher learning in Malaysia) is given a deduction equivalent to the value of that investment.

The subsidiary undertaking the commercialisation of R&D findings is granted 100% tax exemption on statutory income for ten years.

Other incentives

Shipping

A tax-resident person (including a partnership) carrying on shipping business using Malaysian ships is given income tax exemption of 70% of statutory income, determined on a per ship basis. The balance of 30% of statutory income is deemed to be total income chargeable to tax.

Incentives for Mines Wellness City (MWC)

The Malaysian Investment Development Authority has issued guidelines on incentives for MWC:

	Incentive	Application period
Operator	• PS of 70% of statutory income for five years for income from qualifying activities in MWC. • ITA of 60% on QCE incurred within five years, against 70% of statutory income.	Applications received on or after 1 January 2013 to 31 December 2026.
Development manager	PS of 100% exemption on statutory income from management, consultancy, supervisory, or marketing services to MWC developer in MWC from the first year of assessment statutory income is derived until year of assessment 2023.	Applications received on or after 1 January 2013.
Developer	1. 100% exemption on statutory income from disposal of rights over land/building from the first year of assessment statutory income is derived until year of assessment 2023, or 2. Income tax exemption on rental income from the first year of assessment statutory income is derived until year of assessment 2026, and 3. Stamp duty exemption of 50% on instrument of transfer/lease of land/building.	1 and 2: Applications received on or after 1 January 2013. 3: Instruments executed from 1 January 2013 to 31 December 2023.

Capital allowance for increased automation

Manufacturing companies that have been in operation for at least 36 months are eligible for the following incentives, where they have incurred expenditure in automation equipment used directly in the manufacturing activities and resulting in reduced man hours and increased productivity:

- For high labour intensive industries (rubber products, plastics, wood, furniture, and textiles industries): 200% automation capital allowance on first MYR 4 million QCE (years of assessment 2015 to 2017, proposed extension to 31 December 2020).
- Other industries: 200% automation capital allowance on first MYR 2 million QCE (years of assessment 2015 to 2020).

Foreign tax credit

See Foreign income in the Income determination section for a discussion of the foreign tax credit regime.

Withholding taxes

Corporations making payments of the following types of income are required to withhold tax at the rates shown in the table below. *See Note 5 for other sources of income subject to WHT.*

Notes

* Treaties pending ratification

Restricted tax treaties dealing with taxation of specific transport operations in international traffic have also been signed with Argentina and the United States (US).

1. Dividends:
   - Malaysia has no WHT on dividends in addition to tax on the profits out of which the dividends are declared. Some treaties provide for a maximum WHT on dividends should Malaysia impose such a WHT in the future.
2. Interest:
   - Interest on loans given to or guaranteed by the Malaysian government is exempt from tax.
   - Interest paid to a non-resident by a commercial or merchant bank operating in Malaysia is also exempt from tax.
3. Royalty:
   a. Approved royalty payments under certain treaty provisions are exempt from WHT.
   b. Royalty income received by non-resident franchisors under franchised education scheme programmes by the Ministry of Education is exempted from tax.
   c. Royalty does not include payments in respect of the operation of oil or gas wells, or the extraction of mineral deposits or other natural resources.
   d. Royalty does not include amount paid in respect of motion picture films or of tapes for radio or television broadcasting.
   e. Royalty does not include natural resource royalties.
   f. Royalty does not include royalty paid in respect of (literary or artistic copyrights - Norway only) or of motion picture films or of tapes for television (or radio - Thailand only) broadcasting, or of the operation of a mine, oil well, quarry, or any other place of extraction of natural resources or of timber or other forest produce.
4. Special classes of income:
   - Contract payments to non-resident contractors in respect of services under a contract project are subject to a 13% deduction of tax (10% on account of the contractors' tax liability and 3% on account of their employees' tax liability). This deduction of tax at source does not represent a final tax, which is determined upon the filing of the tax return.
   - Payments made to non-residents in respect of the provision of technical services performed in Malaysia and rental of movable properties are subject to a 10% WHT (unless exempted under statutory provisions for purpose of granting incentives).
5. Other income:
   - WHT is also applied in respect of income of a non-resident from sources other than the following:
     - Sources shown in the preceding table.
     - A business source.
     - An employment source.
   - The rate of WHT on such income is 10%. This is applicable on payments made to residents of all the treaty partners listed, except for certain countries (including Germany, Turkmenistan, Bosnia and Herzegovina, Senegal, and Jordan) where the respective tax treaties have provided for such type of income to be taxed only in the contracting state in which the recipient is resident.

Tax administration

Taxable period

Assessment of income is on a current-year basis. A company is taxed on income from all sources (whether business or non-business) arising in its financial year ending in the calendar year that coincides with that particular year of assessment. For example, a company that closes its accounts on 30 June of each year is taxed on income earned during the financial year ending on 30 June 2018 for year of assessment 2018.

Tax returns

Under the self-assessment system, companies are required to submit a return of income within seven months from the date of closing of accounts. Particulars required to be specified in the return include the amount of chargeable income and tax payable by the company. The tax return is deemed to be a notice of assessment and is deemed served on the company upon the date the tax return is submitted.

'E-filing' or online filing of tax returns via the Internet is available. E-filing is encouraged by the Inland Revenue Board.

Payment of tax

Tax payable under an assessment upon submission of a tax return is due and payable by the last day of the seventh month from the date of closing of accounts.

Companies are required to furnish estimates of their tax payable for a year of assessment no later than 30 days before the beginning of the basis period (normally the financial year). However, a newly established company with paid-up capital of MYR 2.5 million or less that meets with certain specified conditions is exempted from this requirement for two years, beginning from the year of assessment in which the company commences operation. A revised estimate can be submitted in the sixth and ninth months of the basis period for a year of assessment.

Companies are then required to pay tax by monthly instalments (based on the estimates submitted) commencing from the second month of the company's basis period.

A company commencing operations in a year of assessment is not required to furnish estimates of tax payable or to make instalment payments if the basis period for the year of assessment in which the company commences operations is less than six months.

Tax audit process

Following the issuance of the general tax audit framework, tax audit frameworks for the financial and insurance industry and for WHTs were issued. These tax audit frameworks outline the rights and responsibilities of audit officers, taxpayers, and tax agents in respect of a tax audit. A tax audit may cover a period of one to three years of assessment determined in accordance with the audit focus. The years of assessment to be covered in a tax audit may, however, be extended depending on the issues identified during an audit.

Statute of limitations

Additional assessments can be made within five years after the expiration of the relevant year of assessment. This time limit is not applicable where fraud, wilful default, or negligence has been committed.

Topics of focus for tax authorities

Some issues that the tax authorities have focused on recently include:

- Deductibility of certain expenses (e.g. entertainment, provisions, management service fees, allocated expenses from foreign related counterparts).
- The correctness of tax incentive claims.

Other issues

Intergovernmental agreements (IGAs)

Malaysia and the United States had, on 30 June 2014, reached an agreement in substance on a Model 1 IGA to implement the Foreign Account Tax Compliance Act (FATCA). Although not signed, Malaysia has, however, been included in the US Treasury's list of jurisdictions that are treated as having an IGA in effect with the United States.

Under the IGA, reporting Malaysia-based financial institutions will provide the Malaysian Inland Revenue Board with the required information of accounts of US persons. The information of which will then be exchanged between the Malaysian and US tax authorities. The IGA is currently being finalised and will be signed on a date to be announced.

Common Reporting Standard (CRS)

Malaysia is committed to exchanging CRS information from 2018. Under the CRS, Malaysian financial institutions (MYFIs) are required to collect and report financial account information on non-residents.

The reporting financial Institution is defined to mean any financial institution (FI):

- that is resident in Malaysia (excluding branches located outside Malaysia), and
- any branch of an FI that is not resident in Malaysia if it is located in Malaysia.

Once an MYFI has applied the due diligence procedures in respect of the accounts it holds and has identified reportable accounts, it must report certain information regarding those accounts to the tax authorities. A reporting MYFI with no reportable accounts is required to make a nil return annually to the Malaysian Inland Revenue Board.

Significant developments

The following are some of the more significant developments that were introduced in Maltese tax law during 2017 and the first few months of 2018:

- The minimum shareholding requirement of a 'participating holding' under the Maltese Income Tax Act has been reduced from 10% to 5%. Such update will enable Maltese companies holding at least 5% of the equity shares, rather than 10%, to claim a participation exemption (subject to the satisfaction of other conditions) on dividend income and gains derived by a Maltese company from a qualifying 'participating holding' or from the disposal of such holding.
- A notional interest deduction (NID) system has been introduced, aiming to approximate the tax treatment of equity with that of debt.
- The reduced rate of 1.5% stamp duty with respect to certain gratuitous transfers by individuals of marketable securities/certain commercial tenements has been extended to 30 September 2018.
- An Agreement for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income has entered into force between Malta and Azerbaijan with effect from 27 December 2016, while a similar double tax treaty (DTT) between Malta and Vietnam entered into force with effect from 25 November 2016.
- DTTs between Malta and Andorra and between Malta and Ukraine entered into force as of 1 January 2018.
- Malta ratified the Organisation for Economic Co-operation and Development (OECD) Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) (MLI).
- By virtue of the Tax Credits Supporting the Refurbishment of Hotels and Restaurants Regulations, Certify Scheme Regulations, as well as Investment Aid for Energy Efficiency Projects Regulations, an undertaking may be assisted by the Malta Enterprise. Moreover, various amendments were made to the Malta Enterprise Act *as outlined in the Tax credits and incentives section.*
- A tax exemption in terms of the income generated from shipping activities or the sale or transfer of a ship or vessel, which qualifies as a tonnage tax vessel, has been introduced, subject to certain conditions being satisfied.
- A Convention on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income was signed (yet to enter into force) between the Republic of Malta and Ethiopia.

Taxes on corporate income

A company incorporated in Malta is considered as both domiciled and resident in Malta and is consequently taxable on a worldwide basis. A non-Maltese incorporated company that is resident in Malta through management and control is subject to Maltese tax on income arising in Malta and on income received in/remitted to Malta.

Companies are subject to income tax at a flat rate of 35%. There is no corporate tax structure separate from income tax.

Petroleum profits tax

Petroleum profits tax is levied as income tax with similar deductions being allowed in respect of incurred expenditure. In the case of a Production Sharing Contract signed after 1 January 1996, any petroleum profits are taxed at the standard corporate tax rate of 35%. However, all other petroleum profits are subject to a 50% tax rate.

Insurance profits tax

Insurance profits tax is levied as income tax and subject to the normal standard tax rate of 35% as other corporate profits; however, the manner in which such profits are ascertained is subject to a number of detailed rules that take into account the special nature of the insurance industry. In the case of non-resident companies, the computation is applied with reference only to business carried on in or from Malta.

Shipping profits tax

A tonnage tax system is applicable under Maltese law. Such regime covers profits from shipping activities as defined under the applicable regulations that are derived by qualifying Maltese-flagged and European Union (EU)/European Economic Area (EEA) vessels as well as non-EU/EEA vessels satisfying certain additional rules. Furthermore, qualifying ship management activities are also entitled to the tonnage tax system.

Recent amendments to the Maltese tonnage tax regulations allow the exemption of certain shipping income from being charged under income tax. These amendments provide that, subject to the fulfilment of certain conditions, which conditions are modelled on the EU Community Guidelines on state aid to maritime transport, and the full payment of all relevant tonnage taxes by a shipping organisation, a shipping organisation shall not be charged further income tax on the income derived from shipping activities. Income derived from ship management activities may also qualify for the tonnage tax exemption. Furthermore, any further tax derived from income or profit gained from the sale or other transfer of a tonnage tax ship, which ship had been acquired and sold whilst under the tonnage tax system, or from the disposal of any rights to acquire a ship, which when delivered or completed would qualify as a tonnage tax ship, would be exempt.

Corporate residence

All companies incorporated in Malta are considered to be both domiciled and resident in Malta. Other bodies of persons (including companies incorporated overseas) are considered to be resident in Malta when the control and management of their business are exercised in the country.

Permanent establishment (PE)

Although Maltese tax legislation contains a number of references to the term ‘permanent establishment’, the term is not defined by Maltese legislation. Indeed, in terms of Maltese domestic tax law, a non-resident is, in principle, subject to Maltese tax on income arising in Malta, irrespective of the existence or otherwise of a PE in Malta (subject to any DTT provisions that would apply if in conflict with Maltese tax law).

In the event the Maltese Inland Revenue is required to interpret such a term, reference would typically be made to the definition contained in the OECD Model Convention.

Other taxes

Value-added tax (VAT)

Supplies of goods and services in Malta are subject to VAT at the standard rate of 18% (7% on accommodation in hotels and licensed premises; 5% on supply of electricity, the importation of works of art, collector's items and antiques, certain confectionery, medical accessories, printed matter, and items for exclusive use by the disabled). Exports to countries outside the European Union, food, and certain other goods and services are exempt from VAT and provide a right to credit of VAT remitted.

Customs duties

Goods imported from outside the European Union may be subject to customs duties. A Customs Code provides for customs procedures and concepts, which are based on European Community requirements.

Excise duties

Excise duties are chargeable on certain energy products, certain alcoholic drinks, certain manufactured tobacco products, and mobile telephony services.

Property taxes

Maltese tax legislation does not contain any wealth taxes or other similar taxes on property, save for the property transfers tax outlined below.

Property transfer taxes

Transfers of immovable property situated in Malta are generally subject to a final withholding tax (WHT), which, in most cases, is charged on the transfer value of the property. In the case of transfers of Maltese immovable property made on or after 1 January 2015, the WHT on such transfer should, in general, be 8% or 10% (the latter rate applying in the case where the property was acquired before 1 January 2004). Certain other rates of WHT may apply in specific circumstances.

The final tax rate on transfers of regenerated immovable property situated in urban conservation areas is set at 5% of the transfer value, subject to the satisfaction of a number of conditions.

Stamp duty

Stamp duty is charged on, among other transactions, transfers of immovable property (5% for both residents and non-residents; a reduced rate of 2% in respect of transfers of immovable property situated in Gozo) and marketable securities (2%; 5% in the case of transfers of shares in property companies).

In the case of the transfer by gratuitous title of (i) marketable securities owned by individuals and of (ii) commercial tenements (i.e. business property) that had been used in a family business for a minimum period of three years preceding the transfer, to the transferor's spouse, descendants, and ascendants in the direct line and their spouses, or in the absence of descendants to such transferor's brothers or sisters and their descendants, stamp duty chargeable is at a reduced rate of 1.5%.

This reduced rate applies to transfers by gratuitous title made on or after 1 April 2017 but prior to 1 October 2018. Once this reduced rate is applied, no other exemption or duty relief will apply to such transfers.

In addition, in the case of a transfer of immovable property situated within an urban conservation area or scheduled by the Malta Environment and Planning Authority, and where such transfer occurs before 1 January 2019 to a person who does not require a permit by the Minister for the purposes of the Immovable Property Act, the stamp duty chargeable is at a reduced rate of 2.5%. Such reduced rate is subject to the satisfaction of a number of conditions.

In the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor would be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a stamp duty liability (although certain exceptions/exemptions may apply).

Maltese legislation also provides for the possibility of a stamp duty exemption in a number of instances, subject to the satisfaction of certain conditions. Some of the more commonly availed of exemptions include the acquisition or disposal of marketable securities by or in the following: (i) licensed collective investment schemes; (ii) licensed persons providing management, administration, safekeeping, or investment advice to collective investment schemes; (iii) companies being owned more than 50% by non-Maltese residents and satisfying certain other conditions; and (iv) a company being owned more than 50% by non-Maltese residents and that carries on or intends to carry on more than 90% of its business outside of Malta.

Payroll taxes

In terms of the Final Settlement System (FSS) rules, an employer is required to withhold income tax and social security contributions (*see below*) at source from the employees' salaries. Such deductions of tax/social security should be forwarded by the employer to the Maltese Inland Revenue within specific timeframes.

Employer's social security contributions

Employers are required to pay social security contributions at the rate of 10% of the individual employee's salary and at fixed rates, for calendar year 2018, of 45.58 euros (EUR) per week for annual salaries exceeding EUR 23,702, in the case where the employee is born on or after 1 January 1962 (note that the employee is also required to pay an equivalent weekly amount).

The rates of social security generally increase annually and take effect from the commencement of the calendar year in question. These rates are generally published at the beginning of the year.

Branch income

The tax rate on branch income for branches set up in Malta is the same as that for Maltese resident companies. Other than the tax charged on a branch's income, no tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Inventory valuations are generally made at the lower of cost or market value. In general, the book and tax methods of inventory valuation will conform. However, the last in first out (LIFO) method is not accepted for taxation purposes. Obsolescence is accepted where proven, but there are no provisions to take into account the effects of monetary inflation on the inventory valuation.

Capital gains

Tax is chargeable on capital gains realised on the transfer of immovable property (real estate), shares and other securities, business, goodwill, business permits, copyrights, patents, trade names, trademarks, any other intellectual property (IP), interests in a partnership, and beneficial interests in a trust.

In respect of transfer of Maltese immovable property, a WHT system applies (*see Property transfer taxes in the Other taxes section*).

Furthermore, *similarly to the stamp duty situation set out in the Other taxes section*, in the event that the market value of shares held by a person is reduced following a change in the company's issued share capital or voting rights and the value shifts onto the other shareholders, the transferor will be deemed to have transferred the said value to the transferee(s) and such value shifting may be subject to a tax on capital gains (although certain exceptions/exemptions may apply).

No tax is levied on investments that yield a fixed rate of return. A tax exemption applies in certain instances and subject to the satisfaction of certain conditions on the capital gain arising on the transfer of shares in a company listed on a recognised stock exchange other than shares held in certain collective investment schemes.

Subject to the satisfaction of certain conditions, if the asset is transferred between group companies, no loss or gain is deemed to arise from the transfer. Note that a provision exists that brings to charge the transfer of shares in property companies (as specifically defined) that were originally subject to intra-group tax deferral when the transferee ceases to be a member of the original group within six years from the date of such intra-group transfer.

Gains realised from the transfer of other assets fall outside the scope of the tax. Gains arising outside Malta and derived by a company that is either not domiciled or not ordinarily resident in Malta are not subject to tax. There are also a number of exemptions provided in the law. For example, gains realised by non-residents on transfers of units in Maltese collective investment schemes, similar investments relating to linked long-term insurance business and shares, or securities in Maltese companies (except for companies holding certain Maltese immovable property) are exempt from tax.

Rollover relief

Rollover relief is granted with respect to capital assets used in a business for a period of at least three years and transferred and replaced within one year by an asset used solely for similar business purposes (i.e. no tax is chargeable on the capital gain). In such instances, the cost of acquisition of the new asset is reduced by the gain on the transfer of the previous asset that would otherwise have been taxable.

Maltese tax law also provides for the surrendering and claiming of allowable losses between companies that form part of the same group (*see the Group taxation section for more information*) as well as for reorganisation relief, subject to certain specific conditions.

Dividend income

Dividends received by one resident company from another, whether or not a subsidiary, are taxable on the gross amount in the recipient's hands. If the distributed profits have been taxed, no further tax should be chargeable to the recipient company. However, for resident shareholders, if the corporate rate of tax in the year in which the profits are earned is lower than that in the year in which they are distributed, an amount equivalent to the difference in rates (topping up) is payable. If the distribution is made from untaxed income, the dividend will be tax-free in the hands of the recipient company.

Dividends and gains on disposal of shares received by a corporate investor from a non-resident company (or from a non-resident partnership, subject to certain conditions), as well as profits from a PE, including a foreign branch, may qualify for a participation exemption in Malta, subject to the satisfaction of certain statutory conditions. Instead of claiming the participation exemption, the relevant Maltese tax may be paid and then, upon a distribution of such taxed profits, the shareholder may claim a full refund of the tax suffered on such profits in terms of Malta's system of taxation of dividends.

The participation exemption may also apply to gains upon the disposal of equity holdings in Maltese-resident entities. Distributions of taxed income by Maltese-resident companies are not subject to further tax under the full imputation system.

Stock dividends

A Maltese company may distribute bonus shares from profits, whether of an income or capital nature, and from share premium and capital redemption reserves. When bonus shares represent a capitalisation of profits, they are deemed to be dividends for tax purposes. Such bonus shares are subject to tax in the recipients' hands, gross of any tax paid at the corporate level on the relative profits, but tax credits equivalent to the gross-up of tax are available to stockholders.

Interest income

Interest is chargeable to tax under the provisions of Article 4(1)(c) of the Income Tax Act and subject to the standard corporate tax rate. Nevertheless, in the event the receipt of interest falls within the definition of 'investment income' as established by Maltese tax legislation, a WHT of 15% may be generally applicable. Furthermore, in the case of interest income payable to non-Maltese residents, such interest should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

Royalty income

Similar to interest income, royalty income is chargeable to tax under the provisions of Article (4)(1)(e) of the Income Tax Act (*see Intellectual property in the Deductions section for a description of the possibility of a tax deduction for expenditure of a capital nature on IP or any IP rights*). In the case of royalty income payable to non-Maltese residents, such royalty should be exempt from Maltese tax, subject to the satisfaction of certain statutory conditions.

Rental income

Corporates and individuals in receipt of income from the letting of urban and/or rural property and of commercial tenements and clubs, provided that such properties are not being rented to or from a related body of persons (as defined), have the option to apply a final 15% tax on the gross rental income (other tax rates may apply in specific circumstances).

Otherwise, the rental income is subject to normal rates of tax, but special tax deduction rules apply.

Foreign income

A company is taxable on its worldwide income when it is ordinarily resident and domiciled in Malta. A company that is either not ordinarily resident or not domiciled in Malta is taxable on its foreign income only insofar as such income is remitted to/received in Malta. Foreign tax is relieved by way of tax credits. This may occur under the terms of a DTT. Where no treaty exists, the foreign tax can be relieved through a system of unilateral relief. Relief for underlying tax is also granted with respect to dividend income, either in terms of a DTT or as unilateral relief. Such relief may be available if, among other things, evidence of tax paid abroad is produced.

Profits of Malta resident companies are subdivided for Maltese tax purposes into five accounts: the Immovable Property Account, the Final Tax Account, the Maltese Taxed Account, the Untaxed Account, and the Foreign Income Account. The last of these includes, among other things, taxable profits of Maltese-resident companies resulting from foreign investments; profits of a foreign PE; and profits resulting from foreign investments, assets, or liabilities of an onshore bank licensed in Malta. Income allocated to the Foreign Income Account for which no evidence of tax paid abroad is available can qualify for a flat-rate foreign tax credit of 25%.

The Immovable Property Account includes profits and income derived directly or indirectly from immovable property situated in Malta. The Final Tax Account includes, among other items, profits that have been subject to a final tax at source or were exempt from tax and such exemption is extended to shareholders upon a distribution of such profits. The Maltese Taxed Account includes any other taxed profits while the Untaxed Account represents the difference between the distributable profits and the profits allocated to the other taxed accounts.

Under Malta's system of taxation of dividends, shareholders receiving distributions from the Maltese Taxed Account and/or the Foreign Income Account may be entitled to a tax refund of part of the tax suffered by the distributing Maltese company on such profits being distributed. The tax refund may be either a six-sevenths refund, a five-sevenths refund, or a two-thirds refund of the tax suffered by the Maltese distributing company on the distributed profits. The type of the tax refund depends on the nature of the income to be distributed.

Deductions

The basic condition for deductibility of expenses is that deductions are allowable only with respect to expenditures that are wholly and exclusively incurred in the production of income.

In order to be in a position to claim a tax deduction, a valid tax invoice/other equivalent document sustaining the expense may have to be provided if requested by the Maltese Inland Revenue.

Apart from the general tax deductibility rule stated above, the Maltese Income Tax Act also provides a number of exceptions whereby specific expenses of a capital nature may also be tax deductible, subject to the satisfaction of the statutory conditions applicable thereto. The following are some further comments on specific items of expenditure.

Depreciation and depletion

Tax depreciation is computed on the straight-line method. The rate of depreciation on plant and machinery varies according to the category of the plant and machinery in question.

Maltese tax law prescribes the minimum number of years over which items of plant and machinery are to be depreciated as follows:

Category	Years
Computers and electronic equipment	4
Computer software	4
Motor vehicles	5
Furniture, fixtures, fittings, and soft furnishings	10
Equipment used for constructions of buildings and excavation	6
Catering equipment	6
Aircraft - aircraft airframe	6
Aircraft - engines	6
Aircraft - engine or airframe overhaul	6
Aircraft - interiors and other parts	4
Ships and vessels	10
Electrical and plumbing installations and sanitary fittings	15
Cable infrastructure	20
Pipeline infrastructure	20
Communications and broadcasting equipment	6
Medical equipment	6
Lifts and escalators	10
Air conditioners	6
Equipment mainly designed or used for the production of water or electricity	6
Other machinery	5
Other plant	10

The wear and tear rate on industrial buildings and structures (including hotels, car parks, and offices) may not exceed 2% *per annum*. New acquisitions of industrial buildings and structures are entitled to a concurrent extra 10% allowance in the year of acquisition. Tax depreciation is not required to conform to book depreciation.

The total allowances over the asset's useful life may not exceed 100% of its cost. If a surplus arises on disposal of a tax-depreciated asset, it is either added to the year's income or utilised to reduce the cost of any replacement. If the asset has been under-depreciated, a balancing allowance is granted.

No deduction is available for the depletion of natural resources.

The rules on tax deductions for wear and tear of plant and machinery provide for certain specific treatment in particular situations, including, among other things, the following:

- To establish the cost of an asset when it is transferred between related companies, the lower of the actual cost of the asset or the tax written-down value adjusted by any balancing charge or allowance incurred by the transferring company should be applied.
- Deductions for wear and tear are allowed only where proper records and documentation have been kept that support the cost of the respective assets.
- A proportional deduction is allowed where an asset is used partly in the production of income and partly for other purposes.

Intellectual property (IP)

Maltese tax law provides for a tax deduction for expenditure of a capital nature on IP or any IP rights incurred in the production of income. Such expenditure should be tax deductible over the life of the relevant IP but, in any case, over a minimum period of three consecutive years.

Goodwill

In the event that goodwill were to fall within the purport of IP for the purposes of the tax deductibility rules under Maltese tax law, then it may possibly be argued that an expenditure on goodwill may be tax deductible. However, this would need to be analysed on a case-by-case basis.

Start-up expenses

Certain pre-trading expenses (i.e. staff training, advertising, salaries/wages) are also allowed as a deduction, subject to the satisfaction of the following conditions:

i. The expenditure is incurred not more than 18 months before the commencement of the trade or business.
ii. The expenditure is not deductible in ascertaining the trading or business income of the person carrying on such trade or business but would have been so deductible under (i) above had it been incurred after that time.

In the event the above conditions are satisfied, such expenditure is treated as incurred on the day on which the trade or business is first carried on by the person.

Interest expenses

Interest on any borrowed money is an allowable deduction if it is paid on capital employed in acquiring income. The expense is allowable even though the borrowing would have been made for a capital purpose, but it is deductible only against the income derived in the same year from the employment of that capital. This special rule is in addition to the deduction for interest paid on money due on revenue account (such interest should be deductible under the general rule of deductibility), such as interest on trade debts or charged on normal business overdraft facilities. There is a restriction in respect of interest deductibility where the relevant advance is in connection with the financing of Maltese immovable property and subject to certain other conditions.

Bad debt

Bad debts incurred in any trade, business, profession, or vocation are allowed in the year they become bad if proved to the satisfaction of the tax authorities. No deduction is given for provisions for bad debts and for bad debts incurred in activities other than a trade, business, profession, or vocation. Any bad debt that is later recovered is deemed as income for the year in which it is received.

Charitable contributions

The general rule is that charitable contributions are not deductible for Maltese tax purposes unless expressly provided for by law.

Fines and penalties

The general rule is that fines and penalties are not deductible for Maltese tax purposes. Nevertheless, there is an exception to this general rule that provides that interest paid or payable by any person in terms of the Maltese VAT Act will be treated as expenses incurred in the production of the income of that person for income tax purposes.

Taxes

Technically, taxes suffered should not be deductible for Maltese tax purposes. However, the typical interpretation of the Maltese Inland Revenue is that as long as no relief of double taxation is claimed for the tax, then such tax should be available as a tax deduction.

Other significant items

Capital expenditures on scientific research and patents are written off over a number of years. In the case of scientific research, a deduction may be granted at 150% of the expenditure.

The Income Tax (Deductions) Rules of 2001 provide for specific conditions on deductions with respect to the use of cars and the payment of employee compensation. The cost on which capital allowances on certain motor vehicles may be claimed is restricted to EUR 14,000. Deductions for lease payments on cars are restricted in a manner that corresponds with the stated restriction of EUR 14,000 that applies to capital allowances on owned cars. With respect to payment of employee compensation, the Deduction Rules require that in order for employee compensation to be allowed as a deduction for tax purposes in the hands of the employing company, it must have been duly accounted for. In particular, the employee compensation must have been reported on the appropriate forms and within the statutory time limit to the Maltese Inland Revenue. The rules also provide for restrictions on deductibility of emoluments with respect to the payment of certain fringe benefits to employees.

A new tax deduction in respect of transportation costs of employees to and from the place of work using means of transport capable of carrying more than eight persons has been introduced. Under the applicable rules, undertakings may claim a deduction against its income equivalent to 150% of the employee transportation costs incurred in the relative year, subject to certain conditions being satisfied.

Net operating losses

Net operating losses may be carried forward indefinitely until absorbed. There is no carryback of losses, not even in terminal years. Unabsorbed capital allowances may be carried forward only against the same underlying source of income. Where the source ceases to exist, any remaining balance of unabsorbed capital allowances is lost.

Certain rules apply in relation to the discretion of the Commissioner for Revenue to allow tax losses/capital allowances to be taken over by the surviving company following a merger/division.

Payments to foreign affiliates

There are no restrictions on the deductibility of royalties, interest (except for interest, discount, or premium that are in any manner connected to Maltese immovable property and subject to the satisfaction of certain other statutory conditions, in which case, the interest/discount/premium should not be tax deductible in Malta), and service fees paid to foreign affiliates as long as the particular expenses are considered to be incurred in the production of the particular income and satisfy the applicable statutory conditions. Interest, discount, premium, or royalties derived by non-residents are exempt from tax, subject to the applicable statutory requirements.

Notional interest deduction (NID)

The NID is optional and is calculated by multiplying the deemed notional interest rate by the balance of risk capital that the undertaking has at year-end. The undertaking shall be entitled to a deduction for sums that are deemed to be payable by way of interest on risk capital or such part thereof as may be determined by the undertaking for the particular year. The notional interest rate is the risk-free rate set on Malta Government Stocks with a remaining term of approximately 20 years plus a premium of 5%. The risk capital of the undertaking includes mainly share capital, share premium, reserves, and interest-free loans as at year-end. The NID may also be claimed by a Maltese PE of a non-Maltese resident undertaking. In that case, the risk capital is taken to be the capital attributable to the PE.

The maximum deduction in any given year cannot exceed 90% of chargeable income, and any excess can then be carried forward to the following year. Certain anti-avoidance rules apply to prevent abuses of the NID.

Group taxation

Two companies that for tax purposes are resident exclusively in Malta, where one company is a 50% plus subsidiary of the other or both are 50% plus subsidiaries of a third Malta-resident company, qualify as members of a group of companies. Allowable losses may be surrendered by a company to another company within the group where both companies have concurrent accounting periods and form part of such group throughout the entire basis year for which this relief is claimed. The possibility of income tax consolidation is contemplated in Maltese tax law; however, rules covering the precise terms and conditions of such tax consolidation are still to be issued.

Transfer pricing

Malta does not operate a sophisticated transfer pricing regime. There are some general anti-avoidance provisions and brief references to transactions at arm's length. However, the Maltese tax authorities will typically still consider it desirable that transactions between residents and non-residents broadly adhere to the arm's-length principle, that is, prices that would have been concluded between independent enterprises. However, no specific rules are available on the manner in which an arm's-length price is to be established.

Country-by-country (CbC) reporting

The CbC reporting requirement applies to Multinational Enterprise Groups (MNE Groups), being any group that includes two or more enterprises (including any PEs) the tax residence of which falls in two different jurisdictions, in respect of fiscal years starting on or after 1 January 2016. The Regulations apply for MNE Groups having a total consolidated group revenue of at least EUR 750 million (or an equivalent amount in local currency) during the fiscal year immediately preceding the reporting year.

Thin capitalisation

The Maltese tax regime does not contain thin capitalisation rules.

Controlled foreign companies (CFCs)

No anti-CFC rules or legislation are applicable in Malta.

Tax credits and incentives

Foreign tax credit

A credit for foreign taxes may be applied against the Maltese tax charge (*see Foreign income in the Income determination section for more information*).

Inbound investment

Investments by foreigners may be readily repatriated together with profits.

The Malta Enterprise Act and other related legislation provide a comprehensive package of incentives for inbound investment. These incentives are reserved for enterprises carrying on certain activities in Malta, mainly manufacturing activities. The focus is on high-value-added activities, and approval of a project's eligibility for benefits by the Malta Enterprise may be required. In general, eligibility does not depend on whether the company produces for the local or for export markets. The main tax incentives include the following:

- Enterprises carrying out qualifying activities, which mainly include manufacturing activities, qualify for investment tax credits whereby a percentage of qualifying expenditures are off-set against the tax charge (not against taxable income). The Investment Aid (July 2014) Regulations, 2014 (the 'Regulations') were issued on 24 October 2014, and guidelines in this regard have been published by Malta Enterprise. Such guidelines form the basis of the investment aid scheme that is in force until 31 December 2020. The Regulations apply to qualifying undertakings, which may benefit from investment tax credits in respect of certain qualifying activities, which are quantified as a percentage of qualifying expenditure incurred in terms of the guidelines. The tax credits range between 15% and 35% of the qualifying expenditure for projects commencing before 31 December 2017 and between 10% and 30% for projects commencing between 1 January 2018 and 31 December 2020, depending on the undertaking's size.
- Certain tax credits and special incentives may be available, subject to certain conditions. These tax credits are calculated on the basis of specific expenditures incurred by a company, while the special incentives grant tax exemptions on all or part of the chargeable income in specified circumstances.
- No further tax is charged on distributions from profits that had previously been taxed at a reduced rate. This benefit is also extended to amounts that were not

subject to tax on account of the investment allowance, investment tax credits, and specific tax credits/special incentives.

The combination of certain tax treaties and Maltese domestic law lowers the Maltese tax rate on certain companies receiving certain industrial assistance (i.e. mainly assistance in terms of the Malta Enterprise Act, Business Promotion Act, and Business Promotion Regulations) to 15%.

In addition, the Seed Investment Scheme (Income Tax) rules have been introduced with the aim of encouraging access to finance to small and medium-sized enterprises (SMEs). In terms of these rules, 'qualifying investors' should be entitled to a tax credit amounting to 35% of the aggregate value of their investment in qualifying companies (total tax credit not exceeding EUR 250,000 *per annum*). Such tax credit would be set off against the tax due by the qualifying investor in respect of any income or gains brought to charge to tax in the year of assessment following the basis year when the investments are made. The tax credit may be carried forward until it is fully absorbed. In addition, qualifying investors may be entitled to an exemption from tax in respect of any gains or profits derived from the disposal of their qualifying investments, where such investments are disposed of after the lapse of three years from the date of subscription to the equity shares.

International business profits

Other Maltese tax considerations that may be relevant in an international business context include the following:

- Maltese tax law provides for a beneficial tax treatment in respect of securitisation vehicles and similarly to re-insurance special purpose vehicles.
- A beneficial tax regime is available in respect of collective investment schemes.
- The Maltese fiscal implications relative to trusts and private foundations vary, depending on a number of circumstances, including: (i) the particulars of the parties involved (e.g. domicile or residence of the trustees/administrator or beneficiaries), (ii) the act or event under review (e.g. the settlement of property, transfers of beneficial interests, distributions of trust/foundation assets), and (iii) the nature of the trust/foundation assets. Furthermore, in certain circumstances, tax transparency provisions are set out in the law, particularly so as to allow, among other things, the application of tax exemptions that would have applied to beneficiaries if there was no trust relationship or foundation.
- An option exists for a step-up in the cost of acquisition of assets situated outside Malta (including companies) effecting a change in domicile or residence or becoming Maltese companies as a result of cross-border mergers.

Other tax credits

A tax credit for micro enterprises is provided under the Micro Invest Scheme. The credit amounts to 45% (or 65% for undertakings operating in Gozo) of eligible capital expenditure incurred, which tax credit would then be utilised against the tax incurred on income derived from the qualifying trade or business activity for that financial year, subject to certain maximum limits applied over three consecutive fiscal years. For capital expenditure incurred as of calendar year 2017, the applicant undertaking cannot employ more than 50 full-time employees (previously, the maximum was set at 30 full-time employees). Also as of calendar year 2017, the maximum eligible tax credits per single undertaking has been increased to EUR 50,000 (from EUR 30,000) over any period of three consecutive fiscal years. This maximum credit is further increased to EUR 70,000 in respect of undertakings operating in Gozo, family businesses, and female-owned undertakings.

Withholding taxes

Domestic corporations paying certain types of income are subject to deduction of tax-at-source obligations as follows:

	WHT (%)		
Recipient	**Dividends (1)**	**Interest**	**Royalties**
Resident corporations	0	35	0
Resident individuals	0/15 (4)	25	0

Notes

Treaties relating to international air and shipping traffic are in force with Switzerland and the United States (US).

The numbers in parentheses refer to the following notes:

1. No WHT is imposed on dividends distributed by Maltese companies (except for distributions of untaxed income to resident persons other than companies, *refer to Note 5*) because no additional tax is imposed on distributions other than the tax charged on the company with respect to the distributed profits. Malta makes no distinction between portfolio and substantial holdings. Under Maltese law, the dividend is grossed up by a figure representing the tax imposed on the company's profits when these were originally earned thereby. Under Malta's full-imputation system of taxation of dividends, the corporate tax is assimilated with the shareholder's personal income tax with respect to the dividend. In the shareholder's hands, the dividend is taxed at the gross amount, and the relevant amount of corporate tax offsets the shareholder's tax liability on income from all taxable sources with no further tax liability being imposed on the shareholder in respect of such dividends.
2. Interest and royalty income derived by non-residents is exempt from tax in Malta as long as certain conditions are complied with (e.g. they are not effectively connected to a PE of the recipient situated in Malta).
3. On the basis that Malta operates the full-imputation system of dividends, dividends are not subject to further tax when distributed by a company registered in Malta to a non-Maltese resident. Furthermore, if the rate provided under the Dividends Article in the respective treaty provides for a lower rate than the Maltese corporate tax rate incurred by the company on the respective profits (standard corporate tax rate of 35%), then this may result in a refund of Maltese tax in terms of Malta's full imputation system (such a refund situation may arise in the treaties with Austria, Bulgaria, Kuwait, Libya, and Romania). In a number of treaties, the rate of deduction and of tax is reduced to 15% in the case of companies enjoying certain tax incentives. *See also Note 1 with respect to Malta's full-imputation system of taxation of dividends.*
4. Distributions of dividends by a Maltese company where the dividend represents a distribution of untaxed income attracts a 15% WHT where the shareholder is (i) a Maltese resident other than a company, (ii) a non-resident person who is directly or indirectly owned and controlled by, or acts on behalf of, a Maltese domiciled and ordinarily-resident individual, or (iii) an EU/ EEA individual who has declared that at least 90% of worldwide income is derived from Malta.

Tax administration

Taxable period

The year of assessment is a calendar year, but a company may obtain authorisation from the Maltese Inland Revenue to have a different year-end (i.e. other than 31 December).

Tax returns

An income tax return for income earned during the previous year must be filed for every year of assessment. The tax return for a company must be submitted by the later of nine months following the end of the financial year or by 31 March following the year of assessment (however, in recent years, the Commissioner for Revenue has provided concessionary extensions to such statutory deadlines in the case where the tax return is submitted electronically). Penalties are incurred on late filing of returns. The tax return submitted by the company is a self-assessment, and the Commissioner for Revenue will not raise an assessment unless the Commissioner is not in agreement with the self-assessment.

Payment of tax

Companies pay tax in the currency in which their share capital is denominated.

During the basis tax year, a company is generally required to make provisional tax (PT) payments every four months. In general, the PT payments are based on the last self-assessment filed by the company, and payments are divided into three instalments of 20%, 30%, and 50%, respectively. Any tax liability that is still due at the tax return date after deducting all tax credits must be settled immediately with the submission of the return. Interest at 0.54% per month is charged on any unpaid tax.

In certain instances, especially for companies with mostly international operations, PT may not be payable, and the tax payment is normally paid on the earlier of the date profits are distributed or 18 months after the end of the relative accounting period.

Tax audit process

The Maltese Inland Revenue is entitled to raise an investigation and notify the taxpayer in writing that the department is initiating a tax enquiry. In such investigations, the taxpayer will typically be required to provide information and supporting documentation in respect of queries raised by the Revenue. The taxpayer has a right to appoint a representative on their behalf.

Statute of limitations

An assessment may be issued by the Maltese Inland Revenue no later than six years from the end of the respective tax year. In the event of non-full disclosure or wilful incorrect/misleading information, the aforesaid prescription period will not apply.

In respect of the payment of tax, additional tax, interest, or any penalty, an action may be taken during any time from the date on which it becomes due and payable up to eight years from that date or, where an assessment in respect thereof has been made, from the date on which that assessment becomes final and conclusive.

Topics of focus for tax authorities

The Maltese Inland Revenue is following closely international tax developments, such as the OECD BEPS initiative and the Anti-Tax Avoidance Package, and is also involved in discussions/representations on such matters in various fora.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

The agreement concluded between the Republic of Malta and the United States to improve international tax compliance and to implement the FATCA (the 'Agreement') entered into force on 26 June 2014. On 18 November 2014, the FATCA Regulations were accordingly issued implementing the said intergovernmental agreement (IGA). Guidelines on the implementation and interpretation of the FATCA Regulations and the said Agreement have been issued by the Maltese Inland Revenue.

Furthermore, the Exchange of Information (United States of America) (FATCA) (Amendment) Order was enacted in 2015.

During 2017, the Maltese Inland Revenue Department received all the required information for FATCA on all account holders that were United States Reportable Accounts from the financial institutions that were classified as Reporting Financial Institutions in Malta.

The Common Reporting Standard (CRS) and EU Council Directive 2014/107/EU

By virtue of LN 384 of 2015 entitled the 'Cooperation with Other Jurisdiction on Tax Matters (Amendment) Regulations, 2015', the EU Council Directive 2014/107/EU of 9 December 2014 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation (DAC2) and the CRS have been accordingly implemented into Maltese legislation, with effect from 1 January 2016.

Guidelines on the implementation and interpretation of the DAC2 and CRS have also been issued by the Maltese Inland Revenue.

For the year 2017, Reporting Malta Financial Institutions were required to submit information on 'new' account holders or high-value, pre-existing individual account holders.

During 2017, the Maltese Inland Revenue Department updated the online reporting tool available to Maltese Financial Institutions that were classified as Reporting Malta Financial Institutions for DAC2 and CRS purposes. The reporting tool now includes both the report to be submitted relating to the FATCA as well as DAC2/CRS.

Significant developments

In the Finance (Miscellaneous Provisions) Act 2017, several new income tax incentives were introduced.

An income tax exemption is available for companies set up on or after 1 July 2017 that are involved in innovation-driven activities for intellectual property (IP) assets developed in Mauritius. The exemption will apply for eight tax years, starting from the tax year in which the company starts its innovation-driven activities. Similar tax exemptions have been introduced for income derived from the manufacture of pharmaceutical products, medical devices, and high-tech products by companies incorporated after 8 June 2017; these will be available from eight years from the tax year in which the company starts operation.

Income derived from the exploitation and use of deep ocean water for air conditioning installations, facilities, and services will be exempted for eight tax years. Additionally, a company incurring expenditure on deep ocean water air conditioning may deduct from its gross income twice the amount of the expenditure incurred in that tax year. That deduction will be allowed for five consecutive tax years, starting from the year in which the expenditure is incurred.

During the period from 1 July 2017 to 30 June 2022, if a person has incurred any qualifying expenditure on research and development (R&D) as described below that is directly related to one's existing trade or business, one may, in the tax year in which the qualifying expenditure was incurred, deduct twice the amount of the expenditure, provided that the R&D is carried out in Mauritius and no annual allowances have been claimed on the same. The term 'qualifying expenditure' means any expenditure relating to R&D, including expenditure on innovation, improvement, or development of a process, product, or service as well as staff costs, consumable items, computer software directly used in R&D, and development and subcontracted R&D.

A company involved in the export of goods will be liable to income tax at the reduced rate of 3% on the chargeable income attributable to that export, as computed on the basis of the following formula:

Chargeable income attributable to that export = (A x C/B), in which:

- A is the gross income derived from the export of goods in that income year.
- B is the gross income derived from all the activities of the company for that income year.
- C is the chargeable income of the company for that income year.

Mauritius

Taxes on corporate income

A corporation resident in Mauritius is subject to tax on its worldwide income. A non-resident corporation is liable to tax on any Mauritius-source income, subject to any applicable tax treaty provisions.

Corporations are liable to income tax on their net income, currently at a flat rate of 15%. Companies engaged in the export of goods are liable to be taxed at the rate of 3% on the chargeable income attributable to that export based on a prescribed formula.

Mauritius has a credit system of taxation whereby foreign tax credit is given on any foreign-source income declared in Mauritius on which foreign tax of similar character to Mauritian tax has been imposed.

All corporate bodies incorporated in Mauritius (except companies holding a Category 2 Global Business Licence and certain approved funds and associations) are subject to income tax. This applies to all associations and other registered bodies. Income derived by local partnerships is shared and taxed in the hands of the partners. Foreign corporations carrying on business, or having a place of business, in Mauritius are also liable to income tax on income derived from Mauritius. Resident *sociétés* are not liable to corporate tax.

Société means a *société* formed under any enactment in Mauritius and includes:

- a *société de fait* or a *société en participation*
- a limited partnership
- a joint venture, and
- a *société* or partnership formed under the law of a foreign country.

Income tax is payable on total net income before distribution at the following rates:

Entity	Rate (%)
Global Business Category 1 (GBC1) companies and offshore trusts (*see below*)	15
Freeport operators or Private Freeport Developers carrying on Freeport activities other than providing goods and services on local markets	Exempt
Global Business Category 2 (GBC2) companies (*see below*)	Exempt
All other companies	15

Global Business Category 1 (GBC1) companies are liable to tax at the rate of 15%. However, they are entitled to a foreign tax credit equivalent to the higher of 80% of the Mauritius tax chargeable or the actual tax suffered abroad in respect of foreign-source income. The maximum effective tax rate is therefore 3%.

Global Business Category 2 (GBC2) companies incorporated under the laws of Mauritius are exempt from income tax and are not tax residents for treaty purposes. *For more information, see the Tax credits and incentives section*.

Special levies

Banks

All banks are required to pay a special levy calculated according to their book profit and their operating income derived during, or its chargeable income in respect of, the preceding year. 'Operating income' means the sum of net interest income and other income before deducting non-interest expense.

The rates of the special levy on banks are as follows:

Year of assessment commencing	Rates
1 July 2017	Global Business/Non-residents: 3.4% on book profit and 1% on operating income; Local transactions: 10% of chargeable income
1 July 2018 and in respect of every subsequent year of assessment	1.7% on book profit; 0.5% on operating income

Except where the levy is computed on chargeable income, no levy shall be paid in a year where in the preceding year:

- the bank incurred a loss, or
- the book profit of the bank did not exceed 5% of its operating income.

Corporate Social Responsibility (CSR) Fund

Every year, a company has to set up a CSR Fund equivalent to 2% of its chargeable income of the preceding year.

At least 50% of the CSR Fund set up on or after 1 January 2017 up to 31 December 2017 should be remitted to the Mauritius Revenue Authority (MRA), and at least 75% of the CSR Fund set up on or after 1 January 2018 should be remitted to the MRA.

In respect of the CSR Fund set up before 1 January 2019, the remaining amount of the CSR Fund shall be used to implement a CSR Programme in accordance with the company's own CSR Framework. For the CSR Fund set up on or after 1 January 2019, the remaining amount shall be used to implement a CSR Programme or finance a non-governmental organisation implementing a CSR Programme in the following priority areas of intervention:

- Dealing with health problems resulting from substance abuse and poor sanitation.
- Educational support targeting families in the Social Register of Mauritius.
- Family protection; protection to victims of domestic violence.
- Poverty alleviation targeting families listed in the Social Register of Mauritius.
- Social housing targeting families in the Social Register of Mauritius.
- Supporting persons with severe disabilities.

Any amount unspent (to a CSR Programme) shall be remitted to the MRA together with the company's annual return. The amount to be remitted to the MRA could be reduced upon prior written approval from the National CSR Foundation. This is where the company intends to spend the unremitted amount within the priority areas of intervention.

No CSR money shall be spent by a company on the following activities:

- Activities discriminating on the basis of race, place of origin, political opinion, colour, or creed.
- Activities targeting shareholders, senior staff, or their family members.

- Activities that are against public safety and national interest.
- Religious, political, trade union, self-financing, staff welfare, and marketing activities.

Where the amount paid out of the CSR Fund is in excess to the amount provided for under that CSR Fund, such excess may be carried forward and offset in equal instalments against any amount to be remitted to the MRA in respect of five succeeding years starting from year of assessment 2016/17.

Where a company is required to submit an Advance Payment System (APS) statement, it should remit 25% of the CSR amount to be remitted to the MRA together with the APS statements, and the final 25% is to be remitted on the submission of the final return.

Note that the following entities are not subject to the CSR regulations:

- A company holding a GBC1 Licence under the Financial Services Act.
- A bank holding a banking licence under the Banking Act, in respect of its income derived from its banking transactions with non-residents or with corporations holding a Global Business Licence under the Financial Services Act.
- An Integrated Resort Scheme (IRS) company referred to in the Investment Promotion (Real Estate Development Scheme) Regulations 2007.
- A non-resident *société*, a foundation, a trust, or a trustee of a unit trust scheme.

Also note the following:

- The CSR Fund shall apply in all respects to a resident *société*, other than a resident *société* holding a Global Business Licence under the Financial Services Act, its net income shall be deemed to be its chargeable income, and any distribution of its net income shall, for the purposes of the CSR Fund, be deemed to be dividends.

Local income taxes

Local income taxes levied by local administration, such as urban councils, do not exist in Mauritius.

Corporate residence

Under domestic law, a company is resident in Mauritius for tax purposes if it is incorporated in Mauritius or centrally managed or controlled in Mauritius.

A company not incorporated in Mauritius is resident in Mauritius only if it is centrally managed and controlled in Mauritius.

In the absence of a tax treaty, any income derived from the following is taxed in Mauritius:

- Any business carried on wholly or partly in Mauritius.
- Any contract wholly or partly performed in Mauritius.

A GBC2 company is not considered a resident in Mauritius for the purposes of double taxation treaties (DTTs).

Under a tax treaty, a company is considered a resident in Mauritius if it is incorporated in Mauritius or if its effective management is in Mauritius.

Permanent establishment (PE)

Generally, a PE is created under a tax treaty if one of the following criteria is met:

- Branch, office, factory, workshop, or installation used for extraction of natural resources.
- Building site, construction, installation, assembly, or supervisory services where the activity on the site lasts for a minimum of six months or 12 months, depending on the tax treaty.

Other taxes

Value-added tax (VAT)

VAT is charged by VAT-registered entities at the standard rate of 15% on all goods and services supplied by them in Mauritius (except those taxed at 0%), other than the following exempt supplies (not an exhaustive list):

- Bread, wheat, and cereal flours (excluding wheat flour).
- Medical, hospital, and dental services, including clinical laboratory services, services provided in a health institution, and veterinary services.
- Educational and training services provided by institutions approved by the Mauritius Qualification Authority.
- Construction of building for residential purpose, provided letter of intent relating to an IRS was issued prior to 1 October 2006.
- Sale or transfer of an immovable property, a building or part of a building, apartment, flat, or tenement.
- Banking services, except:
  - services provided to merchants accepting credit/debit card
  - services in respect of safe deposit locker, and issue and renewal of credit/debit cards
  - services for keeping and maintaining customer's accounts, and
  - services supplied by a bank holding a banking licence under Banking Act 2004 in respect of its banking transactions with non-residents and corporations holding a Global Business Licence.

An entity should register for VAT if turnover exceeds 6 million Mauritian rupees (MUR) a year. However, certain service providers (e.g. accountants and auditors, attorneys and solicitors, consultants, surveyors, valuers) should register for VAT irrespective of their turnover.

VAT-registered persons with annual taxable turnover exceeding MUR 10 million should submit their VAT return monthly and electronically by the end of the month following the end of the taxable month. Otherwise, VAT return filing is completed quarterly (i.e. within 20 days following the end of a taxable quarter). The taxable quarter is a period of three months ending at the end of March, June, September, or December. Also, where the VAT-registered persons are filing pay-as-you-earn (PAYE) returns electronically under the Income Tax Act (ITA), they are required to file the VAT returns electronically by the end of the month following the taxable period.

Customs duties

Customs duty is levied on commodities imported into Mauritius. The rate of duty applicable is the rate in force under the Customs Tariff Act at the time the bill of entry is validated at the Customs.

A number of exemptions and concessions are available to industries, organisations, and persons under the Customs Tariff Act.

Excise taxes

An excise duty is levied at the time of importation on selected commodities, which includes spirits, vehicles, and petroleum products at corresponding prescribed rates. A levy is also chargeable on some specified excisable goods, whether the goods are for home consumption or not, at corresponding prescribed rates.

Campement site tax

Per the Land (Duties and Taxes) Act, every owner of a campement site situated in a specified zone is subject to an annual tax known as the campement site tax, varying between MUR 2 to MUR 6 per square metre.

The tax shall be payable to the authorised officer on or before 31 July in every year.

Land transfer tax

Per the Land (Duties and Taxes) Act, land transfer tax is levied on the transfer of land and is payable by the transferor at the rate of 5%.

Land transfer tax is also payable at the above rates by the transferor upon transfer of the shares of a company owning immovable properties, based on the value of shares or property, whichever is the lower.

The following transactions are not subject to land transfer duty (non-exhaustive list):

- A transfer of immovable property from ascendant to descendant (or vice versa).
- A transfer of immovable property or shares between companies forming part of a group of companies, as defined in the Companies Act 2001.
- A transfer of immovable property where such transfer takes place between companies having the same shareholders for the sole purpose of merging.

Leasehold tax

Per the Land (Duties and Taxes) Act, leasehold tax is levied on the registration of a deed of transfer of leasehold rights in state land. The leasehold tax is levied on the open market value of the leasehold right at the time of transfer at the rate of 20% and is payable by the transferor and transferee in equal proportion (i.e. 10% each).

Registration duty

The Registration Duty Act provides, among others, for a duty at an effective rate of 5% of the sum of money paid as a condition of an exchange of immovable property, or a division in kind of immovable property, where such sum does not exceed MUR 100,000.

The transfer of shares of a company other than those listed on the Stock Exchange of Mauritius or traded on the secondary market is subject to registration duty if the company holds immovable property.

Stamp duty

Stamp duty is levied and paid to the Registrar General on every document at the time of registration, transcription, inscription, or erasure of inscription. Stamp duty varies from MUR 25 to MUR 1,000.

Payroll taxes

Every employer has to register with the MRA as an employer and has to withhold income tax from the emolument of the employee at the time the emolument is made available to the employee.

The employer has to remit the amount withheld within 20 days from the end of the month in which the tax was withheld. Where the employer has 25 or more employees, the PAYE return and tax withheld should be remitted electronically. In cases where the employer has less than 25 employees, the PAYE return and tax withheld may be remitted electronically.

Failure to comply with the above entails a penalty of 5% of the unpaid tax and an interest of 1% per month or part of the month during which the tax remained unpaid.

Social security contributions

National Pensions Fund (NPF)

Contributions to the NPF are payable by the employer at 6% of cash remuneration, up to a maximum remuneration of MUR 16,995 per month. Employees contribute to the NPF at 3%, subject to a maximum amount of MUR 510 per month.

National Savings Fund (NSF)

Employers are required to contribute 2.5% of remuneration to the NSF, subject to a maximum of MUR 425 per month per employee, and to pay a monthly levy of 1.5% of basic salaries and wages of every employee. Employees are required to pay a 1% levy, subject to a maximum amount of MUR 170 per month.

Branch income

Tax rates on branch income are the same as on corporate profits. No tax is withheld on the remittance of profits by way of dividend to a head office.

Income determination

Inventory valuation

Inventories should be valued at the lower of historical cost or net realisable value. The last in first out (LIFO) basis of valuation is not allowed for tax purposes.

Conformity is required between book and tax reporting. Where the MRA is not satisfied that the basis of valuation is acceptable (e.g. where the LIFO basis has been applied), it will make such adjustment as it believes is appropriate to determine the profits arising from the business carried on.

Capital gains

There is no tax on capital gains in Mauritius. However, certain transactions are taxed as ordinary business profit instead of capital gains. Where a transaction is in the nature of trade, the MRA may take the view that it is an ordinary trading transaction and assess the gains derived as income.

Any gains derived from the sale of shares held for less than six months are classified as trading income and are therefore taxed as ordinary income.

Gains realised from the sale of any property or interest in property acquired in the course of a business, as part of a profit-making undertaking or scheme, are taxable as ordinary income.

Dividend income

Companies, whether resident or not, are exempt from tax on dividends received from resident companies.

Dividend income received from abroad by a company resident in Mauritius (non-GBC1 company) is subject to tax at the rate of 15%. Credit for any foreign tax withheld is given, subject to documentary evidence provided to the MRA.

Dividend income received from abroad by a GBC1 company is subject to tax at an effective rate of 3%.

Stock dividends

A resident company can distribute stock dividends (bonus shares) proportionately to all of its shareholders. Stock dividends *per se* or convertible into cash are not taxable in the hands of the recipient. Dividends in kind (i.e. other than cash or shares) are treated as taxable benefits.

Interest income

Interest income received by resident companies (non-GBC1 companies) is liable to tax at the rate of 15%.

A GBC1 company receiving interest income from abroad is liable to tax at the effective rate of 3%.

Interest income paid by any person, other than by banks or non-bank deposit-taking institutions under the Banking Act, to individuals and non-residents is liable to withholding tax (WHT) at the rate of 15% (final tax).

Royalty income

Royalty income received locally is subject to tax at the rate of 15%.

Royalty income received from abroad is subject to tax at the rate of 15%. Any tax withheld from abroad will be allowed as a foreign tax credit. However, a company holding a GBC1 Licence receiving royalty income from abroad on which no foreign tax is suffered will be entitled to a deemed foreign tax credit of 80% of the Mauritian tax payable.

Foreign income

Resident corporations are taxed on their worldwide income, but tax credit and treaty relief is generally available in order to avoid double taxation (*see Foreign tax credits in the Tax credits and incentives section for more information*).

Undistributed income of foreign subsidiaries is not subject to any special taxation as long as the income of the foreign subsidiary before distribution is not included in the accounts of the local parent company. Dividends paid by the foreign subsidiary to the local parent company will, however, be taxable to the latter, whether or not such dividends are actually received in Mauritius.

Deductions

Depreciation

Annual allowance rates vary between 5% and 100% of base value (unless stated otherwise), as per the following table:

	Rate of annual allowance	
	Percentage of	
Capital expenditure incurred on	**Base value**	**Cost**
Industrial premises, excluding hotels		5
Industrial premises dedicated to manufacturing	30	
Commercial premises		5
Hotels	30	
Plant or machinery:		
Costing MUR 50,000 or less		100
Costing more than MUR 50,000:		
Ships or aircraft	20	
Aircraft and aircraft simulators leased by a company engaged in aircraft leasing		100
Motor vehicles	25	
Electronic and high precision machinery or equipment, computer hardware and peripherals, and computer software	50	
Plant and machinery (excluding passenger car) by a manufacturing company		50
Furniture and fittings	20	
Other	35	
Improvement on agricultural land for agricultural purposes	25	
Scientific research	25	
Golf courses	15	
Acquisition of patent	25	
Green technology equipment		50
Landscaping and other earth works for embellishment		50
Acquisition or improvement of any other item of a capital nature that is subject to depreciation under the normal accounting principles		5

Tax depreciation need not conform to book depreciation. Depreciation is generally recaptured on disposal or sale when balancing charges or allowances are computed.

Goodwill

Goodwill amortised under normal accounting principles is not allowed as an expense for tax purposes. However, the cost amount can be capitalised, and an annual allowance of 5% of cost can be claimed.

Leasing agreements

There has been a substantial increase in leasing activity over the last decade. Where an asset is transferred under a financial lease agreement, the lessee is entitled to capital allowances on the value of the asset, including finance charges, as if it was an outright sale by the lessor.

On the other hand, the lessor cannot capitalise the leased assets in its books, and no capital allowance is claimed on the assets leased. However, the lessor is taxable on the interest income derived from the assets leased.

There are no special rules for operating leases.

Set-up costs

Set-up costs are not deductible for tax purposes, as they are considered pre-operational expenses.

Interest expenses

Expenditure incurred on interest is deductible, provided it is incurred in respect of capital employed exclusively in the production of income.

A request can be made by the tax authorities to support any claim made in respect of interest expense by a certificate from a qualified auditor certifying that the amount of interest claimed has been incurred on capital employed exclusively in the production of gross income.

Interest paid by a GBC1 company to a non-resident is exempt from corporate tax.

The tax authorities may refuse to allow a deduction on expenditure incurred as interest where it is found that:

- the interest is payable to a non-resident who is not chargeable to tax on the amount of the interest, or
- the interest is not likely to be paid in cash within a reasonable time.

Bad debt

A provision for bad or doubtful debt is generally not deductible unless a court ruling has been obtained against the debtor.

Charitable contributions

Donations/gifts, whether to charitable institutions or not, are not deductible for tax purposes.

Fines and penalties

Fines and penalties are not deductible for tax purposes as they are expenses not exclusively incurred for the production of gross income.

Taxes

Income taxes and foreign taxes paid are not normally deductible; however, some taxes (e.g. municipal taxes relating to buildings, land transfer tax, irrecoverable input VAT) are deductible.

Other significant items

A bank or an approved financial institution may claim as deductions any irrecoverable loans due by a company in liquidation in respect of which winding-up procedures have started or by a company in receivership.

Net operating losses

Losses made in an accounting year are carried forward for a maximum of five years.

A company may claim to carry forward to an income year any loss it incurred in any former income year, provided the company can demonstrate a 50% continuity of shareholding at the end of those income years. Losses resulting from capital allowances can be carried forward indefinitely. Loss carrybacks are not permitted.

Where a company takes over another company engaged in manufacturing activities, or two or more companies engaged in manufacturing activities merge into one company, any unrelieved loss of the acquiree may be transferred to the acquirer in the income year in which the takeover takes place, on such conditions relating to safeguard of employment as may be approved by the Minister of Finance.

Payments to foreign affiliates

Royalties, interest, and service fees payable to foreign affiliates are allowed as expenses, provided they correspond to actual expenses incurred, are reasonable, and do not exceed what would be paid under an arm's-length agreement. There are certain limitations if the recipient of the interest is not liable to Mauritius tax. Royalties paid to non-residents by GBC1 companies, banks out of their foreign-source income as defined in the ITA, and trusts are tax-exempt.

Group taxation

There are no group taxation provisions in the Mauritius tax legislation other than the transfer of losses by tax incentive companies, sugar factory operators, subsidiaries located in the Island of Rodrigues, and manufacturing companies upon their take-over (*see Net operating losses in the Deductions section for more information*).

Transfer pricing

Mauritius does not have any specific transfer pricing legislation. However, it does contain an arm's-length provision requiring transactions between related parties to reflect a commercially objective value, which would be the amount charged for the services were the parties not connected.

Country-by-country (CbC) reporting

The government of Mauritius enacted the Income Tax (Country-by-Country Reporting) Regulations 2018 on 19 February 2018. These regulations will be effective for the reporting fiscal years of multinational enterprise (MNE) groups beginning on or after 1 July 2018.

The Director General shall use the CbC report for the purpose of:

- assessing high-level transfer pricing risks and other base erosion and profit shifting (BEPS) related risks in Mauritius and the risk of non-compliance by members of an MNE group with applicable transfer pricing rules, and
- economic and statistical analysis, where appropriate.

Any person who fails to comply with any provision of CbC reporting regulations shall commit an offence and shall, on conviction, be liable to a fine not exceeding MUR 5,000 and to imprisonment for a term not exceeding six months.

Thin capitalisation

Mauritius does not have specific thin capitalisation legislation; however, it does have other anti-avoidance provisions as described below:

If a company has issued debentures to each of its shareholders, subject to the number, the nominal value, or paid-up value of the shares in that company, any interest paid on debentures and claimed as a deductible expense may be disallowed and treated as a dividend.

Controlled foreign companies (CFCs)

There are no CFC rules under Mauritius tax legislation.

Tax credits and incentives

Global Business Category 1 and 2 companies

A GBC1 company can trade with a Mauritian resident as well as non-residents.

However, any trading with residents should be only incidental to the main operations with non-residents and should be subject to the Financial Services Commission's (FSC's) approval.

Transactions made with a Mauritian resident are taxed at the rate of 15%, whereas transactions with non-residents are taxed at an effective tax rate of 3%.

The registration and application of GBC1 companies should be submitted to the FSC through a duly licensed Management Company on a prescribed form accompanied by the following:

- The certified supporting documents.
- The applicable processing fees and relevant fees.

A GBC1 company is tax resident in Mauritius and may apply for a Tax Residence Certificate (TRC) from the Director General of the MRA should this be required by the tax authorities in the jurisdiction in which the company is conducting its business.

Investors may benefit from an extensive network of DTTs. Entities holding a GBC1 Licence wishing to avail to the benefits of a DTT must obtain a TRC issued by the MRA.

A GBC1 company is encouraged to have more substance in Mauritius by ascertaining the following:

- It has at least two directors, resident in Mauritius, of sufficient calibre to exercise independence of mind and judgment.
- It maintains, at all times, its principal bank account in Mauritius.
- It keeps and maintains, at all times, its accounting records at its registered office in Mauritius.
- It prepares, or proposes to prepare, its statutory financial statements and causes or proposes to have such financial statements to be audited in Mauritius.

In addition to the requirements mentioned above, when determining whether a corporation is managed and controlled from Mauritius, the Commission shall also consider whether a corporation meets at least one of the following criteria:

- The corporation has or shall have office premises in Mauritius.
- The corporation employs or shall employ on a full-time basis, at the administrative/technical level, at least one person who shall be resident in Mauritius.
- The corporation's constitution contains a clause whereby all disputes arising out of the constitution shall be resolved by way of arbitration in Mauritius.
- The corporation holds, or is expected to hold, within the next 12 months, assets (excluding cash held in a bank account or shares/interests in another corporation holding a Global Business Licence) that are worth at least 100,000 United States dollars (USD) in Mauritius.
- The corporation's shares are listed on a securities exchange licensed by the Commission.
- The corporation has, or is expected to have, a yearly expenditure in Mauritius that can be reasonably expected from any similar corporation that is controlled and managed from Mauritius.

A GBC1 company can apply for a TRC to show substance in Mauritius. The TRC is generally issued within a period of seven days from the date of application, provided that the person has submitted the return required under the ITA 1995.

A GBC2 company is required to have, at all times, a registered agent in Mauritius. Only a management company shall act as the registered agent of a company holding a GBC2 Licence. A GBC2 company is defined as a resident corporation conducting business outside Mauritius and can engage in activities other than the following:

- Banking.
- Financial services.
- Holding, managing, or otherwise dealing with a collective investment fund or scheme as a professional functionary.
- Providing registered office facilities, nominee services, directorship services, secretarial services, or other services for corporations.
- Providing trusteeship services by way of business.

An applicant for a GBC2 Licence must submit the following forms/documents to the FSC through a management company:

- The application form, duly filled in and signed.
- The certified supporting documents.
- The applicable processing fees and relevant fees.

The fees payable to the FSC for registering a GBC1 and a GBC2 company are as follows:

Fee	GBC1 (USD)	GBC2 (USD)
Processing	500	100
Annual Licensing	1,750	235*

* This amount excludes the annual registration fee of USD 65, or such other fee as the Registrar of Companies may determine, payable to the Registrar of Companies.

The TRC is renewable on an annual basis and issued in two formats, one specific to India and one general for any other country.

A GBC2 company is a limited liability company incorporated in Mauritius. However, GBC2 companies are exempt from Mauritius tax and are not required to file tax returns. GBC2 companies are therefore not able to access the tax treaty network of Mauritius.

Companies in the Freeport zone

The income of a Freeport operator derived from Freeport activities is exempt from income tax, except for income that is derived from goods or services provided on the local market.

Income tax exemption for vessel owners

Owners of foreign vessels registered in Mauritius are exempt from income tax on income derived from the operation of such vessels, including any income derived from the chartering of such vessels. Owners of local vessels registered in Mauritius are also exempt to the extent that the income is derived from deep-sea international trade only.

Innovation-driven activities

An income tax exemption is available for companies set up on or after 1 July 2017 that are involved in innovation-driven activities for IP assets developed in Mauritius. The exemption will apply for eight tax years, starting from the tax year in which the company starts its innovation-driven activities.

Manufacture of pharmaceutical products, medical devices

An income tax exemption is available for companies set up on or after 8 June 2017 for the manufacture of pharmaceutical products, medical devices, and high-tech products by companies incorporated after 8 June 2017. This exemption also applies for eight tax years, starting from the tax year in which the company starts its operations.

Green economy

Income derived from the exploitation and use of deep ocean water for air conditioning installations, facilities, and services will be exempted for eight tax years. Further, a company incurring expenditure on deep ocean water air conditioning may deduct from its gross income twice the amount of the expenditure incurred in that tax year. That deduction will be allowed for five consecutive tax years, starting from the year in which the expenditure is incurred.

Another tax exemption has been granted for interest derived by individuals and companies from debentures or bonds issued by a company to finance renewable energy projects (the issue must be approved by the Director General of the MRA).

If a company incurs expenditure in a tax year for the acquisition and setting up of a water desalination plant, it may deduct from its gross income twice the amount of the expenditure incurred in that tax year.

R&D expenditure

During a period from 1 July 2017 to 30 June 2022, if a person has incurred any qualifying expenditure on R&D as described below that is directly related to one's existing trade or business, one may, in the tax year in which the qualifying expenditure was incurred, deduct twice the amount of the expenditure, provided that the R&D is carried out in Mauritius and no annual allowances have been claimed on the same.

The term 'qualifying expenditure' means any expenditure relating to R&D, including expenditure on innovation, improvement, or development of a process, product, or service as well as staff costs, consumable items, computer software directly used in R&D, and development and subcontracted R&D.

Export of goods

A reduced corporate tax rate has been introduced for exports of goods so that if, in a tax year, a company is engaged in the export of goods, it will be liable to income tax at the reduced rate of 3% on the chargeable income attributable to that export, as computed on the basis of the following formula:

Chargeable income attributable to that export = (A x C/B), in which:

- A is the gross income derived from the export of goods in that income year.
- B is the gross income derived from all the activities of the company for that income year.
- C is the chargeable income of the company for that income year.

Foreign tax credits

Generally, double taxation is avoided by means of unilateral credit relief for foreign tax paid. The net amount of foreign income that has borne tax is grossed up at the foreign rate of tax, and the foreign tax paid is allowed as a credit against the Mauritius tax payable. However, the tax credit cannot exceed the Mauritius tax referable to the relevant foreign income. Unused credit is not refunded.

Regarding foreign income derived from countries with which Mauritius has DTTs, a tax credit is given for foreign tax in accordance with the treaties. There are clauses in the DTTs that provide that income arising from certain specified foreign sources is to be exempt from Mauritius tax.

Mauritius has signed DTTs with 43 countries (*see the Withholding taxes section for a listing*).

The following treaties await ratification: Cabo Verde, Gabon, Ghana, Jersey, Kenya, Morocco, Nigeria, and Russia.

The following treaties await signature: Cote d'Ivoire, Gibraltar, Malawi, and The Gambia.

The following treaties are being negotiated: Algeria, Burkina Faso, Canada, Czech Republic, Greece, Hong Kong, Lesotho, Mali, Montenegro, North Sudan, Portugal, Republic of Iran, Saudi Arabia, Spain, St. Kitts and Nevis, Tanzania, Vietnam, Yemen, and Zambia.

A GBC1 company may, in the absence of evidence of payment of foreign tax, claim as tax credit (presumed tax credit) an amount equal to 80% of the Mauritius tax chargeable on the foreign-source income. The presumed tax credit may also be claimed by a bank against the tax payable on income derived from banking transactions with non-residents and with GBC1 and GBC2 companies.

In the case of foreign dividends, the general tax credit includes foreign tax imposed on the profits out of which the dividends are paid (underlying tax), provided that the shareholding in the foreign company is at least 5%.

Mauritius also allows a tax-sparing credit under its local tax legislation.

Withholding taxes

There is no WHT in Mauritius for payments made by GBC companies to non-residents not carrying out any business in Mauritius. There is no WHT on dividends received from resident companies and on payments made by a company having an annual turnover of less than MUR 6 million. The table below shows the rates of WHT applicable for the following payments:

Payment	WHT (%)
Interest payable by any persons (other than banks or non-bank deposit-taking institutions operating under the Banking Act) to individuals and non-resident companies	15
Royalties payable to:	
Residents	10
Non-residents	15
Rent	5
Payments to contractors and sub-contractors	0.75
Payments to providers of services (accountant/accounting firm, architect, attorney/solicitor, barrister, dentist, doctor, engineer, land surveyor, legal consultant, project manager in the construction industry, quantity surveyor, property valuer, and tax adviser or representative)	3
Payments made by ministry, government department, local authority, statutory body, or the Rodrigues Regional Assembly on contracts, other than payments to contractors and sub-contractors and payments to providers of services as specified above:	
For the procurement of goods and services under a single contract, where the payment exceeds MUR 300,000	1
For the procurement of goods under a contract, where the payment exceeds MUR 100,000	1
For the procurement of services under a contract, where the payment exceeds MUR 30,000	3
Payments made to the owner of an immovable property or one's agent	5
Payments made to a non-resident for any services rendered in Mauritius	10
Payment of management fees to an individual by any person, other than an individual, to a:	
Resident	5
Non-resident	10
Payment made by a person in connection with activities performed in Mauritius by a non-resident entertainer or sportsperson	10

Reduced WHT rates with treaty countries are provided below.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	0	15	15
Treaty:	(1)		
Bangladesh, People's Republic of	10	(2)	(2)

United Kingdom	10/15	(2)	15
Zambia	5/15	10	5
Zimbabwe	10/20	10	15

Notes

1. The domestic rate of WHT on dividends is 0%. For completeness, the treaty rates that would apply if the domestic rate was higher are provided.
2. Same rate as under domestic law.
3. 10% of the gross amount of the interest if the beneficial owner is a financial institution, an insurance company, or an investment company receiving income from financial investments; 15% in all other cases.
4. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 15% in all other cases.
5. 5% of the gross amount of the royalties received as consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematograph films, tapes, or discs for radio or television broadcasting. 15% is applicable on the gross amount of the royalties in any other case.

Tax administration

Taxable period

Companies are assessed for a year beginning 1 July and ending 30 June on their income for the preceding year ending 30 June. Where a company closes its accounts at a date other than 30 June, it may elect to adopt as a basis year the accounting year ending in the 12-month period preceding the year of assessment.

Tax returns

Every company, both taxpayer and non-taxpayer, must file a return of its income on the basis of the income year preceding the year of assessment. The return must be filed within six months of the financial year-end.

Payment of tax

Any tax due should be paid when the return is filed and within the six months deadline.

Advance Payment System (APS)

Every company (except non-resident trusts and non-resident partnerships) having gross income exceeding MUR 10 million or that has taxable income is required to submit an APS statement and pay any tax for the quarter immediately following the end of the accounting year.

Tax under APS can be calculated based on the following:

- 25% of taxable income for the accounting year immediately preceding the commencement of that quarter or
- the actual taxable income of the current quarter.

The APS statement shall be filed and tax (if any) shall be payable within three months from the end of the quarter.

Companies that are required to contribute to the CSR Fund should, while submitting their APS statement, remit 25% of the CSR amount to be remitted to the MRA.

Penalties

If timely payment is not made, a penalty representing 5% of the amount of tax due is payable. In addition, interest at the rate of 0.5% of the tax unpaid for each month or part of a month is payable until the tax is paid. A penalty of MUR 2,000 for each month or part of a month is also prescribed for failure to file a return, subject to a maximum of MUR 20,000.

Tax audit process

Tax audits are carried out on a sample basis throughout the year. Generally, the audits are fairly detailed, but more protracted enquiries are carried out into cases where fraud is suspected.

Statute of limitations

While there is no statutory time limit for recovering tax already assessed, the Director General is barred from making an assessment for a period beyond three years preceding the current tax year.

Topics of focus for tax authorities

The MRA pays special attention to the arm's-length nature of any transactions between related parties and evidence of foreign tax suffered predominantly for GBC1 companies in respect of their claim for actual foreign tax credit.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 27 December 2013, the government of the Republic of Mauritius and the government of the United States of America signed an Agreement for the Exchange of Information Relating to Taxes (the Agreement) to set the legal framework to enable exchange of tax information between the two countries. This was followed by the signing of another agreement known as the Inter-Governmental Agreement (Model 1 IGA) to improve international tax compliance and to implement FATCA. Both agreements have been published in the Government Gazette No. 61 of 5 July 2014 as GN 135 of 2014. Both the Agreement and the IGA entered into force on 29 August 2014.

The Agreement provides for exchange of tax information (upon request, spontaneous and automatic) between Mauritius and the United States. The IGA provides for the automatic reporting and exchange of information in relation to accounts held with Mauritius financial institutions by US persons and the reciprocal exchange of information regarding financial accounts held by Mauritius residents in the United States.

The MRA has issued guidance notes (available on MRA's website) to provide practical assistance to financial institutions, businesses, their advisers, and officials dealing with the application of FATCA.

Corporate Reporting Standards (CRS)

Mauritius signed the Organisation for Economic Co-operation and Development (OECD) Convention on Mutual Administrative Assistance in Tax Matters in June 2015 and, as a member of the Early Adopters Group, the country had initially planned to implement the CRS early. The effective date of 1 January 2016 was subsequently deferred to 1 January 2017, and the first reporting will now start from 31 July 2018.

The Mauritius ITA was amended to enact the CRS, and the MRA is the competent authority to administer the process. Under the CRS, financial institutions (FIs) will need to report accounts held by non-residents to the MRA, which will be used for eventual exchange with other jurisdictions. In line with the OECD commentaries and handbook on the CRS, the MRA published a set of guidance notes in April 2016 (MRA Guidance Notes) to help identify which FIs have reporting obligations as well as set out the type of financial information and accounts that will need to be reported.

Base Erosion and Profit Shifting (BEPS)

As a member of the all-inclusive framework, Mauritius has pledged commitments to implement the BEPS Actions. At an initial stage, all participating countries have to adopt the minimum standards, namely Action 5: Harmful tax practices, Action 6: Treaty abuse, Action 13: CbC reporting, and Action 15: Multilateral instrument (MLI) to implement the treaty measures in the BEPS framework.

Mauritius has already signed off to the MLI on 5 July 2017 by adopting the principal purpose test as a measure to address treaty abuse. As far as Action 5 is concerned, Mauritius has recently been reviewed by the OECD's Forum of Harmful Tax Practices (FHTP) and the European Union (EU) on its different regimes. Global Business regimes, Freeport, and captive insurance were regarded as being harmful by both the OECD and European Union. Mauritius has already given commitment to address the concerns by 2018.

Mauritius enacted the Income Tax (Country-by-Country Reporting) Regulations 2018 on 19 February 2018. These regulations will be effective for the reporting fiscal years of MNE groups beginning on or after 1 July 2018. *See Country-by-country (CbC) reporting in the Group taxation section*.

Significant developments

On 1 July 2018, general elections will be celebrated through which a new President and Federal Congress representatives will be elected. The new administration will take over on 1 December 2018.

The above also implies that the Tax Certainty Agreement, executed by the current President, would end on 30 November 2018. The agreement, in broad terms, represents a commitment of the executive branch to maintain the Mexican tax framework without significant changes affecting taxpayers after the 2014 Tax Reform. At this point of time, no significant changes are expected to the Mexican Tax Laws; however, such assumption may change once the new administration takes over.

On 22 March 2018, the Organisation for Economic Co-operation and Development (OECD) announced the fifth jurisdiction has deposited its instrument of ratification, acceptance, or approval of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) (the MLI). That means that the MLI will enter into force on the first day of the month following the expiration of a period of three calendar months beginning on the date of deposit of the fifth instrument of ratification, acceptance, or approval (i.e. on 1 July 2018). In this regard, it is important to note that the majority of the Double Tax Treaties (DTTs) entered into by Mexico are covered by the MLI (except for several exceptions, among others, Indonesia and Switzerland, which chose not to correspond with Mexico in marking the tax conventions as covered under the MLI, and the United States of America, which decided not to join the MLI). Regardless of the above, the modifications on the precise date the conventions covered by the MLI will be effective for Mexican tax purposes is yet unknown, as the Mexican Congress must conclude the approval process of the MLI.

On 24 April 2018, Mexico became the first country to ratify the Trans-Pacific Partnership (TPP) trade deal. The TTP includes Australia, Canada, Chile, Japan, New Zealand, Singapore, and Vietnam, among others, creating new opportunities that are expected to boost Mexico's trade and investment with such jurisdictions.

Taxes on corporate income

Federal corporate income tax (CIT)

CIT applies to Mexican resident taxpayers' income from worldwide sources, as well as to foreign residents on the income attributed to their permanent establishments (PEs) located in Mexico.

The federal CIT rate is 30%.

All corporate entities, including associations of a civil nature, branches, etc., are subject to the tax rules applicable to Mexican corporations (unless specifically ruled out, such as not-for-profit organisations).

Taxpayers engaged exclusively in agriculture, livestock, fishing, and forestry activities are subject to a reduction of 30% of their tax liability.

Provisions to recognise the effects of inflation for tax purposes in the areas of monetary assets and liabilities (annual monetary adjustment) and depreciable assets are provided in the Mexican Income Tax Law, even though recent inflation rates have been stable at low levels.

Once a corporation has paid its CIT, after-tax earnings (i.e. earnings arising from the after-tax earnings account, *Cuenta de Utilidad Fiscal Neta* or CUFIN) may be distributed to the shareholders with no tax charge at the corporate level. A withholding tax (WHT) on dividend payments to individuals or foreign residents (including foreign corporations) applies at the rate of 10%; this WHT does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

Tax paid on dividends distributed in excess of CUFIN can be credited against the CIT of the year or in the two fiscal years following the year in which the tax on the non-CUFIN distributions was paid. The CUFIN of the tax years in which the credit is applied must be reduced by an amount equal to the grossed-up dividend distribution.

Local income tax

There are no state taxes on corporate net income.

Corporate residence

The Mexican Federal Tax Code provides that corporations are deemed residents in Mexico if the principal centre of administration or the effective place of management is located in Mexico. A specific definition of 'tax resident' in any tax treaty overrides domestic law definitions, provided the taxpayer is eligible to apply the treaty.

When a company ceases to be a Mexican resident in terms of the Mexican Federal Tax Code or any tax treaty, it is deemed to be liquidated for tax purposes. In such cases, a notification is required at least 15 days before the change, and the CIT return must be filed with the Mexican tax authorities within 15 working days following the date on which the change of tax residency takes place.

Permanent establishment (PE)

The Mexican Income Tax Law considers a PE to be any place in Mexico where business activities or services are carried out or rendered by non-residents, such as agencies, offices, mining exploration sites, or any other place of exploration, extraction, or exploitation of natural resources, regardless of the length of time involved.

A foreign insurance company could also be considered as having a PE when it engages in activities consisting of insuring risk or collecting premiums (with the exception of reinsurance activities) in Mexico through a party other than an independent agent.

Sites used for display, storage, or purchasing facilities; inventories imported in-bond to be processed by a third party; short-term construction services; and offices to carry out auxiliary or preliminary activities and information gathering or scientific research are not considered to create a PE in Mexico. Non-residents may also keep merchandise in bonded warehouses (including merchandise delivered for importation into Mexico) without being considered as having a PE.

Based on the Hydrocarbons Law, foreign residents are deemed to have a PE when conducting certain oil and gas activities in Mexico for more than 30 days. This implies that the foreigner would need to satisfy all enrolment, compliance, documentation, withholding, and tax filing and payment obligations applicable to Mexican branches of foreign residents.

A non-resident is not considered to have a PE in Mexico as a result of the legal or economic relationships maintained with companies carrying out certain inventory processing activities (i.e. *Maquiladoras*) that process goods or merchandise maintained in Mexico by the non-resident by using assets provided by the non-resident or any related party, as long as certain requirements are met. The requirements include the conditions that the non-resident be resident in a tax treaty country and that the *Maquiladora* complies with the transfer pricing provisions ('safe harbour') to determine its tax profit, as provided in the Mexican Income Tax Law, or secure an advance pricing agreement (APA) negotiated with the Mexican tax authorities.

Maquila operations are generally defined as those with the following characteristics:

- Raw materials are supplied by a foreign resident (with which a *Maquila* contract is in place) and are temporarily imported to be processed, transformed, or repaired and are subsequently exported, including, for these purposes, virtual import-export operations.
- The *Maquila* is also permitted to import goods in accordance with the permanent importation regime. Additionally, local purchases are allowed, as long as such goods are consumed in production and/or exported with the temporarily-imported inventory.
- The processing, transformation, or repair of goods must be performed with temporarily-imported machinery and equipment (M&E) that is the property of the foreign principal. In this regard, the foreign principal must own at least 30% of such M&E. It is important to mention that this M&E may not have been previously owned by the *Maquila* or by any other Mexican-related party.

Parties resident abroad and engaged in *Maquila* operations through shelter *Maquila* companies may not be considered as creating a PE in Mexico when certain requirements are met and certain information is provided to the Mexican Tax Administration in relation to the gross revenues earned and income taxes paid by its non-Mexican-related party. This PE protection is limited to four years, but non-Mexican residents may opt to comply with their tax obligations through the shelter *Maquiladora* for an additional four-year period without triggering a PE, subject to the compliance of certain requirements. However, the eligible non-Mexican residents would be taxed under safe harbour provisions at a 30% CIT rate to determine their tax liability, which, under this scenario, would be determined by the Mexican shelter *Maquila*.

A definition of PE in any tax treaty overrides domestic law definitions where the taxpayer is eligible to apply the corresponding tax treaty.

Other taxes

Value-added tax (VAT)

VAT is payable at the general rate of 16% on sales of goods and services, as well as on lease payments and imports of goods and services. The sale of medicines, as well as the sale of most food products, is zero-rated. The principal VAT-exempt transactions are the sale of land, credit instruments (including equity shares), residential construction, interest paid by banks, medical services, education, salaries and wages, rentals of residential property, and the sale of non-amortisable participation certificates on real estate investment trusts (REITs), provided specific requirements are satisfied.

Temporary imports under IMMEX and similar programs are subject to the general 16% VAT rate. Such imports may qualify for VAT relief when obtaining special certification from the tax authorities related to the adequate control of such imports. The relief is applied in the form of an immediate VAT credit when clearing customs, which means that the temporary import is done on a cashless basis for VAT. Companies not covered by the certification may apply the same cashless treatment if they post a bond as payment guarantee.

The VAT law also taxes sales in Mexico of temporarily imported goods by non-residents to (i) other non-residents, (ii) *Maquiladoras*, or (iii) companies in the automotive industry.

The 0% VAT rate, which generally means that no VAT is payable, is applicable to a substantial number of transactions, including the sale of books, magazines, and newspapers published by the taxpayer, the exportation of goods and certain services (including some *Maquiladora* activities intended for exportation), the sale of certain basic foodstuffs, agricultural goods and services, sales and rentals of farm M&E, and other specified transactions.

VAT paid by business enterprises on their purchases and expenses related to VATable activities (including activities subject to the 0% VAT rate) may usually be credited against their liability for VAT they collect from customers on their own sales, services rendered, etc. The input VAT credit on goods or services of a general nature, or those not specially identified with either taxable or exempt activities for VAT purposes, is computed based on a VAT ratio proportional to the VATable versus VAT activities (taxable and exempt) carried out by the taxpayer. Creditable VAT paid on purchases and expenses in excess of VAT collected from customers is recoverable via either a refund, offset against other Federal taxes, or a credit against subsequent VAT liabilities.

VAT is a ‘cash basis’ tax, with few exceptions (e.g. VAT on some types of interest must be paid on an accrued basis); consequently, only the receipt of payment for goods or services triggers the output VAT liability, and an input VAT credit may be claimed only when the taxpayer pays VAT to its providers of goods and services. VAT is calculated for each calendar month as a final tax. In addition, VAT overpayments may be used to offset the tax liabilities arising from other federal taxes.

VAT must generally be withheld by Mexican residents acquiring or leasing tangible goods from non-residents if such foreign residents do not have a PE in the country to which income is attributed. Mexican business entities are required to withhold VAT on payments to individuals or entities for services consisting of ground transportation of goods. Mexican corporations must also withhold VAT on commissions paid to individuals, as well as on independent services rendered by Mexican individuals, and on tangible goods leased from individuals.

An information return related to the VATable activities carried out by the taxpayer must be filed on a monthly basis. Definitive monthly VAT payments are required by the 17th day of the immediately following month.

Subcontracting

VAT paid for subcontracted labour will be creditable to the extent that the contractor obtains from the subcontractor (i) a copy of the VAT return showing VAT was remitted to the Mexican tax authorities, (ii) a copy of the acknowledgement of receipt issued by the tax authorities, and (iii) copies of any other information submitted to the tax authorities related to the VAT payment.

Pre-operating expenses

Under current VAT law, a VAT credit is granted in the pre-operating period (i.e. the period prior to the start of the taxable activities) based on an estimate of expected future activities subject to VAT. However, there is no adjustment mechanism if the actual activities subject to VAT differ from the estimated activities.

The provision provides that VAT credits from expenses and certain investments in the pre-operating period can be used on the first VAT return for the month in which the company actually carries out activities subject to VAT, or in the month in which the company incurs the expense or makes the disbursement (in which case it can request a refund), provided that, in the latter case, the taxpayer provides information related to the VATable activities to be performed. In both cases, there will be a mandatory adjustment to the VAT credited once a 12-month period has elapsed from the date on which the credit was applied.

In addition, if the taxpayer does not perform taxable activities once the pre-operating period has ended, a reimbursement of any refund should be remitted to the tax authorities. This rule will not apply to taxpayers engaged in extraction activities, such as mining and oil.

Customs duties/import tariffs

Mexico's commercial conditions provide an excellent business and investment opportunity. Mexico is a member of the World Trade Organization (WTO), the Asia-Pacific Economic Cooperation Mechanism (APEC), and the OECD.

Mexico lies in a strategic geographical location for international trade, sharing borders with the United States (US) and representing an easy entry to the rest of Latin America, while also facing Europe and Asia.

Mexico has signed multiple Free Trade Agreements (FTAs), which provide for preferential duty rates on foreign trade operations with many more countries. FTAs signed by Mexico include the North American Free Trade Agreement (NAFTA) and agreements with the European Union (EU), the European Free Trade Association (EFTA), and Japan, among many other countries. Most FTAs provide 0% duty rates for almost 90% of the goods to be imported into Mexico.

General Import Duty rates range from 0% to 35%, but most imports fall within the range of 3% to 20% (exceptionally, certain food products, shoes, and textiles pay higher duties).

In general, temporary imports are exempt from customs duties (except for fixed assets in certain transactions). *For VAT payments on temporary imports, see above.*

Excise tax

The excise tax law (*Impuesto Especial Sobre Producción y Servicios* or IEPS) levies substantial federal excise rates on the importation and/or sale of certain taxable items, such as gasoline (% variable), beer (26.5%), wine (26.5% to 53%), spirits (53%), and cigarettes and other tobacco products (160% plus an additional quota), and on certain services related to these activities, such as commission, mediation, and distribution of excise taxable items, as well as services for raffles and gambling (30%). Excise tax is also applicable to certain telecommunications services (3%).

The excise tax law applies to soft drinks at 1 Mexican peso (MXN) per litre and to 'junk' food at an 8% rate. In both cases, the excise tax is payable by the producer or importer.

In general terms, goods are exempt from IEPS when exported. The input IEPS paid by exporters on their purchases is not creditable, and that tax becomes an additional cost.

IEPS is payable (output tax) and creditable (input tax) on a cash basis. It is payable on the date that the charge invoiced is collected from the client and can be credited when the respective payment is made to the supplier. On imports, IEPS is creditable when paid at the customs offices.

In certain cases, the IEPS legislation allows taxpayers that are not subject to this tax to credit IEPS paid on the acquisition and/or the importation of certain goods.

There is a specific procedure to calculate the tax for beer producers, bottlers, and importers; however, the tax can never be lower than 26.5%.

Among other obligations, IEPS taxpayers must file information returns before the Mexican Tax Administration periodically.

Property taxes

Annual taxes on real property are levied by Mexico City and all the states at widely varying rates applied to values shown in the property tax records. Assessed values have increased substantially recently in Mexico City and some other areas.

Title transfer taxes

The transfer of real estate is, almost without exception, subject to a variable transfer tax at rates averaging 2% to 5% on the highest of the value of the transaction, fair market value, or registered municipality value. The tax is levied by most states and Mexico City.

Stamp taxes

There are no stamp taxes in Mexico.

Payroll taxes

Most Mexican states levy a relatively low tax on salaries and other income earned by employees, which is payable by the employer (e.g. Mexico City imposes a 3% payroll tax payable by the employer).

Social security contributions

Employers and employees are required to make contributions to the social security system. These contributions are based on the daily salary plus any other compensation paid to the employee. There are various different rates that the employers are compelled to pay to the Mexican Social Security Ministry and or Housing Ministry that may vary in proportion of the so-called base salary of their Mexican employees and the type of concepts for which the compensation is given to the employee. For example, 2% on the base salary of the employee is paid by the employer for the concept of retirement, 5% on the employee base housing contribution salary for the concept of housing must be paid by the employer, among others.

Compulsory profit sharing

Although not a tax, every business unit with employees (irrespective of the type of organisation) is required to distribute a portion of its annual profits among all employees, except general directors and managers. The amount distributable to the employees is 10% of an adjusted taxable income. The main difference between the taxable income and the profit sharing base is that the tax losses cannot be applied against the profit sharing base.

No profit sharing is paid during the first year of operations. Also, special rules apply for personal service entities and for entities deriving their income from rental activities, both of which can limit their profit sharing payment to the equivalent of one month of regular salary.

The profit sharing amount paid out is a deductible item for CIT purposes, provided certain requirements are met.

Vehicle taxes

There is no federal tax on the ownership of vehicles; however, the states may impose a similar tax.

Tax is still levied on the acquisition of new vehicles. This tax is payable in addition to the VAT on the purchase. Note that some vehicles considered as ‘hybrid’ (e.g. battery assisted vehicles) are not subject to the new vehicle acquisition tax.

Branch income

Mexican branches of foreign corporations (i.e. PEs) are generally subject to the same tax rules as Mexican corporations, with some exceptions. Such exceptions include that branches may deduct *pro rata* allocations of head office expenses, provided certain requirements are satisfied (such as the existence of an applicable tax treaty and a comprehensive agreement for the exchange of tax information between the relevant territory and Mexico), but may not deduct remittances to their head offices, even when such remittances are classified as royalties, fees, commissions, services, or interest.

In general terms, profit distributions to the head office (other than those regarded as a return to the head office of the capital invested into the branch, which are reflected in their 'remittances accounts') either in cash or in kind from branches or other PEs are subject to the statutory CIT rate on the grossed-up distribution, unless the remittance is made from the CUFIN account balance (i.e. the after-tax earnings account).

Branches are also subject to the 10% WHT on profit distributions, which can be reduced or eliminated based on any applicable tax treaty provision.

Income determination

Recognition of income

Income is generally recognised on an accrual basis. However, the service revenues of civil entities that render professional services (e.g. law and accounting firms) and low-income entities (as defined in the Mexican Income Tax Law) are reported on a cash basis.

Inventory valuation

The costing system to be used will be the incurred cost system, based on historic costs or pre-determined costs. If the requirements provided in the regulations of the Mexican Income Tax Law are met, the direct cost system (based on historical costs) may be used.

Inventory may be determined by any of the following methods:

- First in first out (FIFO).
- Identifiable costs.
- Average cost.
- Retail.

The FIFO method must be applied to each type of merchandise and each movement. The monetary FIFO method may not be used. Taxpayers selling goods that are identifiable by serial numbers, at a cost exceeding MXN 50,000, must determine their inventory by the identifiable cost method.

Once elected, a method is compulsory for five years and can be changed only if the requirements established in the regulations of the Mexican Income Tax Law are fulfilled. The monetary results of the change in method are amortised over the following five years.

For accounting purposes, different methods and certain variations can be adopted. However, a record of the differences must be maintained, and such difference will not be taxable or deductible.

The cost of imported goods may be deducted (and included in the cost of goods sold) only if it can be supported that the goods were legally imported into the country.

Capital gains

Capital gains are taxed as follows.

Securities

Gains on securities are included in regular taxable income.

The tax basis of shares of Mexican corporations sold may be increased by the inflation adjustment applicable for the holding period.

When computing the tax basis of the shares, there are certain items to be considered, such as: (i) the movement in the after-tax earnings account (CUFIN) of the issuing company (including the possible negative CUFIN effects), as adjusted for inflation, (ii) the unamortised prior years' tax losses at the date of the sale, (iii) tax losses arising prior to the date on which the shares were acquired and amortised during the holding period, and (iv) any capital reductions of the issuing company.

When the sum of: (i) the CUFIN balance at the date of acquisition of the shares, (ii) the capital reductions paid, (iii) the unamortised prior years' tax losses at the date of the sale, and (iv) the negative CUFIN balance of the issuing corporation is higher than the sum of: (i) the CUFIN balance at the date of the sale and (ii) the tax losses arising prior to the date on which the shares were acquired, and amortised during the shares' holding period, the difference must be subtracted from the tax basis of the shares to be disposed of (potentially resulting in the shares' tax basis being equal to zero).

When the aforementioned difference exceeds the tax basis of the shares disposed of, this excess (restated by inflation) must be subtracted from the tax basis of the shares in any subsequent share sale by the same taxpayer, even if the shares are issued by a different company.

The aforementioned procedure allows the average cost (tax basis) of the shares to be determined, which is then updated and considered as the acquisition cost for future sales.

A different but simpler procedure is available (optionally) for computing the tax basis of shares held during a period of 12 months or less.

Deduction of losses arising from the sale of shares is limited to the value of gains from similar transactions in the same or the following ten fiscal years. Losses may not be deducted by non-residents selling shares.

A gain from the sale of shares is considered Mexican-source income when the transferred shares are issued by a Mexican resident or when more than 50% of their book value arises directly or indirectly from immovable property located in Mexico, including cases where the shareholding is structured in different levels.

In general terms, the sale by non-residents of shares issued by a Mexican company is subject to a 25% WHT applicable to the gross amount of the transaction (i.e. without deductions). However, there may be the option for gains realised by non-residents on the sale of shares issued by a Mexican company to be taxed by applying the 35% rate to the net gain. The tax rate for these purposes is generally the same as the top bracket rate for individuals (currently 35%), unless a lower tax treaty rate is applicable.

This net income election is available only if the foreign shareholder income is not deemed to be subject to a regime considered as a 'preferred tax regime jurisdiction' (i.e. tax haven, which is deemed to exist when the non-Mexican resident income is not subject to taxation or taxed at a rate lower than 75% of the tax that would be paid in Mexico) or resides in a country with a territorial tax system. The non-resident seller must have previously appointed a representative in Mexico and have a public accountant assigned to issue a statutory tax audit report on the transfer of shares. The public accountant issuing the respective report must specify the accounting value of the shares sold and explain the factors used in determining the sales price and the market value of the shares if shares are sold between related parties.

The representative is jointly liable for the tax on the sale of shares, even when the statutory report is issued by a public accountant.

The tax authorities may authorise the deferral of taxes that would otherwise be triggered by the transfer of shares in a group reorganisation to the extent it is a share-for-share type of deal (the authorisation must be obtained prior to the share transfer). The price used on the transaction must be at arm's length. The tax deferred, adjusted for inflation, is due upon the sale of the originally transferred shares outside the same interest group. An interest group consists of shareholders that have over 50% common voting stock of the companies.

In principle, authorisations for tax deferral are not granted if the party acquiring or selling the shares is resident in a tax haven or is a resident of a country that has not signed a comprehensive exchange of information agreement with Mexico. However, in the latter case, an authorisation may still be granted if the taxpayer provides documentation to the Mexican tax authorities stating that the taxpayer has authorised the foreign tax authorities to provide information to the Mexican authorities regarding the operation in question.

If the share sale qualifies as an exempt reorganisation under tax treaty rules, the non-resident must appoint a legal representative in Mexico prior to the sale and file a notice with the Mexican Tax Administration informing them of such appointment and the details of the reorganisation process intended to be carried out. Additionally, certain formal requirements are established in the regulations of the Mexican Income Tax Law that must be satisfied when carrying out this type of transaction.

Tax treaty rules (optionally) override domestic law rules when the seller resides in a tax treaty country.

Shares sold through the stock market

Capital gains realised on (i) the sale of shares issued by Mexican companies, (ii) securities exclusively representing such shares, (iii) shares issued by foreign companies quoted in the Mexican stock market, and (iv) derivative financial operations referenced to stock indexes and/or to the aforementioned shares, when the sale is conducted in stock markets or in derivative markets recognised under the Securities Market Law, are subject to a 10% income tax rate.

The applicable income tax on the gain obtained must be withheld by the broker/intermediary; however, there is no obligation to make this withholding if the investor is a resident in a country with which Mexico has signed a tax treaty to avoid double taxation and provides the broker with a sworn statement explaining said situation and providing their registration number or tax ID issued by the proper authorities in their country. If this is not provided, the income tax must be withheld.

When a non-Mexican resident sells shares that do not satisfy the above requirements to be taxed at a 10% income tax rate, they must pay their tax by applying either 25% of the sale price or 35% of the net gain, complying with the requirements established for these purposes in the domestic law.

Real estate

In determining the taxable gain of real estate, the cost basis of land and buildings may be adjusted (i.e. increased) for tax purposes on the basis of the period of time for which the assets have been held. This adjustment is performed by applying inflation adjustment factors to the net undepreciated balance. Similar rules apply to non-residents electing to pay tax on net income by appointing a legal representative in Mexico. The rate of tax on the net gain is 35% (or lower treaty rate). Otherwise, the 25% final WHT on gross income applies to non-residents.

Machinery and equipment (M&E)

Gains or losses from the disposal of machinery, equipment, and other fixed assets are also calculated after adjusting the basis in these assets, by applying inflation factors to the net undepreciated balance.

Inflationary gain or loss

Taxpayers are required to calculate an adjustment for inflation (resulting in additional taxable income or deductible expense) on an annual basis by applying the percentage increases in the National Consumer Price Index (NCPI) to the value of essentially all liabilities, reduced by monetary assets, including bank balances, investments (except in shares), and some debt and receivables.

Dividend income

Dividends received by Mexican corporations from other Mexican corporations need not be included in gross income. Dividend income must be included within the recipient corporation's CUFIN.

No further corporate-level taxes apply on dividends distributed out of the CUFIN. However, non-CUFIN distributions (i.e. distributions that for any reason have not been subject to CIT) are subject to tax at the level of the distributing company at the general income tax rate on the grossed-up distribution at the effective rate of 42.86%. This tax is creditable in the year of payment or two subsequent years.

Interest income

Interest received by Mexican corporations is generally subject to tax on an accrual basis and included in gross income (*see also Inflationary gain or loss above*).

Royalty income

Royalties received by Mexican taxpayers are taxable income at the general corporate rate (i.e. 30%). Such revenue shall be accrued for tax purposes at the earliest of the due date for the royalty payment collection or the issuance of the corresponding invoice.

Governmental assistance

When the government grants economic or financial assistance to taxpayers through governmental budgetary programs, the cash received will not be treated as taxable revenue to the extent that (i) there is a public list of beneficiaries, (ii) the funds are wire-transferred to the beneficiaries' accounts, (iii) if applicable, the tax authorities issue a certificate of good tax standing to the beneficiary, and (iv) the assets or services the taxpayer acquires with the grant are not deducted.

Foreign income

A Mexican corporation is taxed on foreign-source income when earned. Double taxation is reduced, or possibly eliminated, by means of foreign tax credits. However, the undistributed profits of a foreign subsidiary are not subject to Mexican tax until dividends are paid, with the exception of companies with investments in entities with income subject to a preferred tax regime (tax haven or PTR) (*discussed below*), in which case income is generally taxable even if no distributions are received from those entities.

Investments in tax havens (income subject to PTRs)

Investments in tax havens include those made directly or indirectly in entities, branches, real property, shares, bank accounts, or investment accounts, and any kind of participation in entities, trusts, joint ventures, or investment funds, as well as in any other similar legal entities created or incorporated in accordance with foreign law and located in a tax haven, and including those that are carried out through an intermediary.

A business, entity, trust, or joint venture is considered to be located in a tax haven when it has a physical presence, an address, a post office box, or effective management in a tax haven, or when its bank account is held in or through financing entities located in a tax haven.

Unless it can be demonstrated that the taxpayer does not have management control of the foreign investments, the taxpayer must include the income generated through such entities or foreign vehicles in the proportion that corresponds to their direct or indirect participation in the capital of the entity or vehicle.

Income and profits subject to PTRs are taxed separately. This income cannot be combined with other taxable income or losses and it is not considered for purposes of making advance income tax payments. Tax applicable to this type of income is payable together with the annual CIT return.

The classification of a PTR is not based on the location of the investment but on the tax effectively paid on the income generated abroad. An investment is considered subject to a PTR if the income is not subject to tax or tax paid abroad is less than 75% of the income tax that would have been incurred and paid in Mexico if the income had been taxed under Mexican rules.

In general, interest income and the annual inflationary adjustment made to liabilities of the investment in the tax haven are included in taxable income without subtracting the annual inflationary adjustment on receivables. However, the annual inflationary adjustment on receivables may be subtracted from interest income earned, provided an information return is filed.

Tax on investments in a PTR is determined by applying the general CIT rate to taxable income (currently 30%). Additionally, net operating loss carryforwards associated with an investment in a PTR may be amortised against the tax profit of the following tax years arising from investments in a PTR, and tax deductions related to the investment may also be applied, as long as accounting records pertaining to those investments are available and the annual information return on the investments is filed on time.

Undistributed income from investments in entities located in a PTR need not be immediately included in taxable income (under the provisions discussed above) in certain particular cases (e.g. income arising from qualified active business activities in accordance with the applicable legislation and in the case of passive income from indirect investments in a tax haven when certain strict conditions are met).

Income earned in a PTR will be taxed until its distribution where the PTR income arises from a business activity. This treatment will not be applicable, however, if income such as interest, dividends, royalties, certain capital gains, and rents (i.e. passive income) represent more than 20% of the total income generated.

Other specific cases of income on which the tax may apply until distribution include the case of share transfers within the same group and for income derived from royalties and interest that do not represent a tax deduction for Mexican tax residents, to the extent that certain specific requirements are satisfied.

Maquiladoras

As discussed in the Corporate residence section, companies operating under an IMMEX program (*Maquiladoras*/in-bond processing companies) are considered to not have a PE in Mexico. This is the case for the non-resident principal that owns the M&E and inventory, to the extent it is a resident of a country that has a tax treaty in force with Mexico, complies with all the terms and requirements of the treaty, satisfies any mutual agreements between Mexico and its treaty partner, and complies with the transfer pricing provisions provided in the law.

Revenues associated with productive activities must be derived solely from *Maquila* activities. Additionally, the rules on M&E ownership are consistent with the IMMEX Decree definition (i.e. 30% or more of the M&E used in the *Maquila* operation must be owned by the foreign principal).

The effective income tax rate on *Maquila* profits is 30%.

In terms of transfer pricing, only the safe harbour and advance pricing agreement (APA) alternatives are applicable to *Maquilas*.

Under a Presidential Decree published in Mexico's Official Gazette, the following benefits are also granted to the *Maquiladora* industry:

- An additional deduction for 47% of tax-exempt benefits paid to employees involved in the relevant *Maquila* operation (since 2014, the Mexican tax law limits this deduction to 53% of tax-exempt benefits). *Maquiladoras* applying this benefit should inform the Mexican tax authorities of the amount of the benefit granted, and how it was determined, in a report due March of each taxable year.
- For sales of goods that are located in Mexico between a foreign resident and a *Maquiladora* that are taxed at the 16% VAT rate, the *Maquiladora* may credit the VAT in the same month of the sale if certain certification requirements are met. This benefit applies if a certification is secured.

Additionally, among other rules, the Miscellaneous Tax Regulations (MTRs) include further guidance in connection with the *Maquiladora* industry, as follows:

- Revenues associated with productive activities must derive solely from *Maquila* activities. In this regard, this rule provides that such revenues may also include those obtained for other *Maquila* services rendered to related parties resident abroad and other miscellaneous income, provided that the *Maquila's* books clearly identify every type of income and related expenses.

- Income relating to the manufacture and distribution of finished goods for resale cannot be considered as 'solely derived from *Maquila* manufacturing activities'.
- The MTRs also provided that a foreign principal may still apply safe harbour protection relating to PE immunity contemplated in the 2013 Income Tax Law, provided that the foreign principal is resident in a country with which Mexico has a DTT and the principal is fully compliant with any treaty requirements applicable to its Mexican activities.

Deductions

The applicable deduction requirements must be complied with no later than the last day of the tax year to which the deduction applies, although the invoice supporting the expense may be provided up to the date on which the tax return for the period in question is filed (or comes due). An expense invoice must contain a date within the year for which the deduction is claimed.

Deductions for certain business expenses are limited (e.g. business meals, use of company-owned cars).

Depreciation and amortisation

Straight-line depreciation is permitted at the rates specified in the law (i.e. estimated lives for assets are 20 years for buildings, 3.3 years for computers, 4 years for cars [the deductibility threshold for cars has been raised from MXN 130,000 to MXN 175,000, for electric cars the limit is MXN 250,000 starting from 2017], 10 years for certain M&E, etc.), and the deduction may be increased by applying the percentage increases in the NCPI from the month in which the asset was originally acquired. When an asset is disposed of or becomes useless, the remaining undepreciated historical cost may also be deducted, after application of the appropriate inflation adjustment factor to the undepreciated historical cost.

Starting from 2016, companies, including those dedicated to transportation infrastructure and those that invest in hydrocarbon-related activities and the generation of electricity, who have obtained revenues in the prior tax year up to MXN 100 million, can apply an accelerated depreciation (i.e. lump-sum deduction) for investments in new fixed assets that were acquired in the last quarter of the 2015 tax year, or in 2016 or 2017. The accelerated depreciation rate varies from around 60% to 90% depending on the type of assets and the year of acquisition (i.e. 2016 or 2017).

Intangible assets for the exploitation of goods that are in the public domain, or for rendering public services under concession, are considered deferred assets (i.e. not deducted as incurred). Therefore, these assets are subject to amortisation for income tax purposes.

Specific annual depreciation rates are established for goods used in certain industries.

Goodwill

Goodwill is a non-deductible item for Mexican tax purposes, and the corresponding input VAT (if any) will not be creditable.

Start-up expenses

Start-up expenses incurred prior to the commencement of operations may be amortised at the rate of 10% per year, after applying the adjustment factors.

Interest expenses

In general terms, interest expenses are deductible items if, among others, the principal is invested in the main activity of the Mexican taxpayer, withholding obligations are complied with, informative returns disclosing information related to the loan and transactions carried out with related parties are filed, thin capitalisation rules (3:1 debt-to-equity ratio) are satisfied, the transaction is at arm's length, and the interest does not fall into the deemed dividend criteria (*see the rules for the deductibility of interest payments at the end of this section*).

Bad debts

Bad debts may be deducted on the earlier of the date on which the debt prescribes or the date on which the taxpayer substantiates the practical impossibility of collection, as defined by the law, among other detailed rules.

Charitable contributions

The maximum amount for deductible donations is limited to 7% of the taxable income of the previous year.

Fines and penalties

In general terms, fines and penalties are non-deductible items for income tax purposes, except interest for underpayment of taxes.

Taxes

In general, all federal, state, and local taxes levied on a company (not including those required to be withheld from other parties) represent deductible expenses for CIT purposes, with the following exceptions:

- CIT.
- Federal VAT and excise tax when the company is entitled to credit the tax.
- Taxes on acquisitions of fixed assets and real estate, which must be capitalised and deducted as part of the total cost of such assets to be depreciated.

Subcontracting

Payments derived from labour subcontracting will be deductible when, among other requirements, the contractor obtains from the subcontractor (i) copies of the tax receipts for salary payments made to the employees performing the outsourced services, (ii) a copy of the acknowledgement of receipt, and (iii) a copy of the tax return showing that the income tax withholding and contributions to the Mexican Social Security Institute were paid.

Net operating losses

Subject to certain limitations, losses incurred in prior years by a business may be carried forward and deducted from income earned over a subsequent ten-year period. Net operating loss carrybacks are not allowed.

Losses carried forward may be increased by the percentage increase in the NCPI between the seventh and 12th months of the fiscal year in which they are incurred and thereafter up to the sixth month of the fiscal year in which they are applied.

In the case of entities engaged in activities related to the exploration and production of hydrocarbons in maritime waters at depths of 500 metres or more, net operating losses (following the same adjustment rules mentioned above) may be used to reduce their taxable income within the following 15 years.

Tax loss carryforwards are non-transferable, not even by virtue of a merger. However, the tax losses the surviving entity had prior to the merger may continue to be used to offset the income derived from the same business activities that originated them and, with certain restrictions, may also be used to offset income that derives from new business activities. In the case of a spin-off, tax loss carryforwards should be divided between the surviving entity and the spun-off entities in accordance with their main business activity, prior to the spin-off, as follows:

- Commercial main business activity: In proportion to inventory and accounts receivable.
- Other non-commercial entrepreneurial activities: In proportion to fixed assets.

Current tax legislation may limit the offsetting of tax loss carryforwards upon direct or indirect changes in ownership that imply a change in control of the Mexican entity in certain situations (i.e. whenever the revenue of the last three years is less than the tax loss carryforwards updated for inflation balance of the year prior to the change in control, among other situations). The limitation, if applicable, would limit the netting of tax loss carryforwards available prior to the change in control against the income derived from the same business activities that originated them.

Payments to foreign affiliates

Taxable income and authorised deductions must be determined on the basis of prices that would be agreed with independent parties in comparable transactions (arm's-length values).

For this purpose, taxpayers must secure and maintain contemporaneous documentation supporting transactions with related parties residing abroad, supporting that income and deductions are based on fair market values in accordance with Mexican transfer pricing principles. The documentation must be prepared per type of transaction and must include all operations carried out with related parties.

Domestic transactions with affiliates must also be supported by the application of a recognised transfer pricing method selected in accordance with the Mexican tax legislation in connection with the particularities of the transactions.

Payments made to entities whose income is deemed to be subject to a PTR are considered non-deductible unless it is possible to support that the price of the transaction is substantially the same to the one that would have been used among non-related parties in comparable transactions. Unless otherwise supported, it is assumed that operations with companies, entities, or trusts whose income is subject to a PTR are carried out between or among related parties and that the transactions are not at arm's length.

The sale price of shares (other than publicly traded shares) sold to a related party must be set at market value in accordance with Mexican transfer pricing provisions, and the transaction must be supported by the corresponding contemporaneous transfer pricing documentation.

Payments to non-residents of a prorated portion of expenses (i.e. allocations of expenses) are, in principle, not deductible for Mexican corporations. However, per current administrative tax rules, they may be deductible if a comprehensive set of requirements is complied with.

Payments made by Mexican residents to domestic or foreign related parties, which are in the hands of such related parties also deductible, are not deductible for the Mexican resident unless the corresponding income is included in the related party taxable income in the same or in a subsequent tax year.

Technical assistance, royalties, and interest payments

In order to be deductible, payments related to technical assistance, the transfer of technology, or royalties must be made directly to companies with the required technical capabilities to provide the corresponding service and should correspond to services actually received. In some situations, the payments may be made to a third party to the extent the relevant agreement expressly includes it.

A deduction for technical assistance, interest, or royalty payments (including those treated as royalties related to industrial M&E leases) is disallowed when paid to a foreign related party entity that controls or is controlled by the Mexican taxpayer and at least one of the following scenarios is applicable:

- The recipient of the income item is a fiscally transparent entity in its residency jurisdiction, unless its shareholders or members are subject to tax for income received by such transparent entity and the payment made by the Mexican resident to the foreign entity is at arm's length.
- The recipient entity considers the payment to be disregarded for tax purposes in its residency jurisdiction.
- The recipient does not include the payment as part of its taxable income in its residency jurisdiction.

Group taxation

The Mexican Income Tax Law previously included a chapter that allowed certain holding companies to file a consolidated income tax return with their majority-owned subsidiaries. Tax consolidation was applicable for CIT purposes but not for other taxes (e.g. VAT) or compulsory employee profit sharing.

Companies that, until 2013, consolidated with their subsidiaries for tax purposes were entitled to reduce their deferred tax by crediting against the consolidated tax the tax on dividends paid between members of the group, and to reduce by up to 50% the consolidated tax by applying losses (valued at 15%) incurred by the controlled entities.

The tax consolidation regime was repealed starting in 2014, and a simplified tax consolidation (deferral) regime was introduced.

Mexico

Due to the repeal of the former tax consolidation regime, the Mexican Income Tax Law provides three options for computing the deferred consolidated income tax benefit, which will be payable over a five-year period.

The main requirements for applying the current tax consolidation (deferral) regime are as follows:

- That the Mexican tax resident holding entity holds, directly or indirectly (through other Mexican entities), 80% or more of the shares of the entities that would form part of the consolidation regime.
- That the Mexican holding entity is not held in more than 80% of other entities, unless such other entities are resident of a jurisdiction having an in-force broad exchange information agreement with Mexico.

Shares that qualify as placed among the general investing public and non-voting shares are not considered for the purposes of determining the proportions described above.

As of May 2018, Albania, Andorra, Anguilla, Argentina, Aruba, Australia, Austria, Azerbaijan, Bahamas, Bahrain, Barbados, Belgium, Belize, Bermuda, Brazil, British Virgin Islands, Bulgaria, Caicos Islands, Cameroon, Canada, Cayman Islands, Chile, China, Colombia, Cook Islands, Costa Rica, Croatia, Curaçao, Cyprus, the Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Georgia, Germany, Ghana, Gibraltar, Greece, Greenland, Guatemala, Guernsey, Hong Kong, Hungary, Iceland, India, Ireland, Isle of Man, Israel, Italy, Japan, Jersey, Kazakhstan, the Republic of Korea, Kuwait, Latvia, Lebanon, Liechtenstein, Lithuania, Luxembourg, Malaysia, Malta, Marshall Islands, Mauritius, Monaco, Montserrat, Nauru, the Netherlands, the Netherlands Antilles, New Zealand, Nigeria, Niue, Northern Ireland, Norway, Pakistan, Panama, Poland, Portugal, Qatar, Romania, Russia, Saint Kitts and Nevis, Saint Vincent and the Grenadines, Samoa, San Marino, San Martin, Saudi Arabia, Senegal, Seychelles, Singapore, Slovak Republic, Slovenia, South Africa, Spain, St. Lucia, Sweden, Switzerland, Tunisia, Turkey, Turks Islands, Uganda, Ukraine, United Arab Emirates, the United Kingdom, the United States, and Uruguay are considered to have broad exchange information agreements on tax matters with Mexico; other agreements or tax treaties that might include an information exchange agreement on tax matters are awaiting ratification or being negotiated.

The Mexican Tax Administration must authorise the application of the consolidation regime, and written consent of the legal representative of each of the companies that would be participating must be filed before 15 August of the year prior to the first year of consolidation to request the proper authorisation. Special tax accounts should be kept by each of the companies of the group.

There are some types of entities that would not qualify for the consolidation regime, among others, non-profit entities, credit institutions, insurance corporations, trusts, auxiliary credit institutions, stock exchange entities, foreign exchange houses and capital investment companies, non-resident companies, companies in liquidation, civil or social associations, cooperatives, and *maquiladoras*.

In general terms, the current consolidation regime allows an individual company to offset losses against profits of other companies in the same group during a three-year deferral period.

The deferred income tax must be paid by each of the entities of the group on the same date on which they are required to file their annual income tax return for the year following that in which the three-year deferral period concludes. The deferred income tax will be paid updated with the accumulated inflation adjustment from the month in which the tax was deferred to the month in which the tax is paid.

The deferral benefit must be paid before the three-year deferral period if:

- a member leaves the consolidated group
- the ownership percentage is reduced, or
- the group is deconsolidated.

Transfer pricing

Mexican transfer pricing legislation is based on the OECD principles. This has resulted in the implementation of transfer pricing guidelines that are in line with the global economy and trade.

In general terms, from a Mexican transfer pricing perspective, all related-party transactions (including certain joint-venture relationships) must be performed at arm's length.

Those taxpayers who are required to present an informative return with respect to their tax status (a DISIF for its acronym in Spanish) are required to present information relating to transactions carried out with related parties and foreign related parties for each tax year. The DISIF must be filed, when applicable, as part of the annual corporate tax return of Mexican legal entities.

Local legislation allows the selection of both traditional methods and profit-based methods consistent with the OECD guidelines. However, the legislation provides a strict ordering criteria for the application of a method, starting with the comparable uncontrolled price (CUP) method. Other methods different from the CUP may only be applied if the CUP method is justifiably not applicable based on the specific facts and circumstances of each transaction.

Mexican legislation is generally 'form over substance' oriented; consequently, contractual terms remain relevant when defining the economic substance of the transactions subject to the transfer pricing analysis.

Reliable financial information is not always publicly available for Mexican entities. Hence, reliance is often placed on foreign information, which is then adjusted to properly reflect local market conditions and render the transactions in question more comparable.

Country-by-country (CbC) reporting

In 2016, the Mexican government enacted the requirement to file a master information return (Master file), local information return (Local file), and CbC report on a calendar-year basis, starting in FY 2016 and due by 31 December 2017. The provisions of the Mexican Income Tax Law on this obligation are consistent with the OECD's Base Erosion and Profit Shifting (BEPS) with respect to Action Plan 13: Guidance on the Implementation of Transfer Pricing Documentation and Country by Country Reporting. Note that the filing of Master and Local files is required by Mexican taxpayers exceeding the established threshold, while the CbC report is required only for Mexican multinational groups meeting certain group revenue thresholds. However, Mexican tax authorities may also request a CbC report concerning foreign multinational groups. In both cases, specific thresholds for presenting documentation is established.

Failure to file the reports is subject to fines and disqualification of the taxpayer from entering into contracts with the Mexican public sector.

Thin capitalisation

Interest generated by excess debt lent by a foreign related party to a Mexican resident is non-deductible for CIT purposes. Excess debt is defined as that exceeding three times the value of shareholders' equity (i.e. a 3:1 debt-to-equity ratio) as per the taxpayer's Mexican Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS) balance sheet.

In principle, all interest-bearing debts are considered in determining the annual average debt for purposes of calculating the ratio and thereby the disallowed interest expense amount. However, certain debts incurred for construction, operation, or maintenance of productive infrastructure associated with Mexico's strategic areas or to generate electricity may be excluded from the computation.

Taxpayers may also be able to obtain a ruling from the Mexican Tax Administration in order to apply a higher financial leverage (i.e. not the 3:1 debt-to-equity ratio) if they support with the Mexican tax authorities that the particularities of their business activities required a higher leverage. Also, the thin capitalisation rules do not apply to entities that are part of the Mexican financial sector for the realisation of their business activities.

In addition, taxpayers may be entitled to use the sum of the average balances of their capital contributions account (CUCA) and their (CUFIN) to determine the 3:1 debt-to-equity ratio instead of shareholders' equity. Taxpayers that opt to apply this alternative for the thin capitalisation computation must continue to use it for at least five years. Note that the alternative computation is mandatory for those taxpayers that do not apply Mexican GAAP.

Specific provisions dealing with the disallowance of interest expenses for debt financing structured though back-to-back loans should also be closely observed.

Controlled foreign companies (CFCs)

See Foreign income in the Income determination section for a description of the taxation of undistributed profits of foreign subsidiaries.

Tax credits and incentives

Foreign tax credit

The Mexican Income Tax law allows Mexican corporations and individuals to credit for Mexican income tax purposes the income tax paid abroad in connection with non-Mexican source income. The tax credit would only be applicable if the relevant income item from non-Mexican source is deemed as taxable for Mexican tax purposes in respect to the full amount (i.e. including the income tax paid abroad).

In general, creditability is available in respect of foreign income taxes withheld from foreign-source income or paid with a tax return filed in the foreign country in the name of the Mexican resident or by a foreign branch of a Mexican corporation. However, in the case of profit or dividend distributions by non-Mexican resident legal entities to Mexican resident legal entities, the proportional income tax paid by the non-Mexican resident distributors would be creditable in Mexico. Note that the Mexican Income Tax Law provides a specific computation to determine the proportional income tax paid abroad.

Furthermore, the creditability of the proportional income tax paid abroad in respect of dividend or profit distributions mentioned in the preceding paragraph would only be applicable if the Mexican resident entity receiving the dividend or profits holds at least 10% of the equity of the foreign distributing entity during a six-month period prior to the distribution.

In the case of dividend or profit distributions from a foreign legal entity that are in turn distributed to another foreign legal entity that then distributes the dividend to the Mexican legal entity, Mexican income tax credit for the proportional income taxes paid by both foreign legal entities may be allowed, in accordance with a specific computation provided by the Mexican Income Tax Law. Note that the creditability is strictly limited to two foreign corporate levels. In addition, the creditability in such cases would only be applicable if the entity distributing the dividends on the second corporate level resides in a jurisdiction having an in-force broad exchange of information agreement with Mexico and the Mexican entity holds an indirect 5% participation in such non-Mexican resident entity equity during the six-month period prior to the dividend distribution.

The foreign tax credit will be allowed up to the effective Mexican rate of tax on the taxable income (tax result) shown by the annual return on a country-by-country basis and per income type limitation. Taxpayers who are not in a position to take full credit for the taxes paid to a foreign country on foreign-source income are allowed a ten-year carryforward of such excess foreign taxes, provided certain compliance requirements are met and the credit would be limited to the corporate tax rate in Mexico of 30%.

The Mexican tax authorities have published internal criterion to determine whether or not a foreign tax should be considered as an income tax for purposes of applying the aforementioned creditability provisions. Such criteria provides, among other situations, that the main qualifying feature to be met is that the relevant tax is levied on income (i.e. revenue subtracted by authorised deductions in similar moments to those established by the Mexican Income Tax Law). Note that such criterion is not binding to taxpayers and refers to a law that was amended in 2014; however, it is still consulted in practice as it provides insight on the Mexican tax authorities view on such topic.

Duty-deferral programs

A deferral program is an authorisation provided by the Mexican Ministry of Economy to those companies importing raw materials or fixed assets to manufacture finished products within Mexico for export.

In addition to the benefits described for CIT purposes in the *Income determination section, Maquiladoras under the IMMEX program are entitled to the following customs benefits:*

- No payment of import duties for temporarily imported raw materials, as long as they are exported.
- Temporarily imported raw materials and fixed assets will not be subject to VAT when the Mexican entity importing the goods obtains a VAT certification (*see VAT in the Other taxes section*) from the tax authorities related to the adequate control of such imports or posts a bond guaranteeing the VAT payment until the goods are exported.

Another program allowing preferential duty rates is the Sectorial Relief Program (known as PROSEC), which allows manufacturers to apply lower duty rates on the import of raw materials and machinery required for their productive processes, regardless of their country of origin and regardless of if they are for the Mexican market or for export. These programs were created by the federal government in order to establish competitive tariff conditions for Mexican manufacturers needing to import raw materials and fixed assets from non-NAFTA or trade partner countries.

Companies in Mexico that carry out import operations with values of MXN 300 million per semester, or IMMEX companies, can take advantage of significant customs and administrative benefits if registered into the 'Certified Company Registry' (authorised by the Ministry of Finance). In addition, companies that comply with certain requirements regarding controls and security within their supply chain, regardless of the MXN 300 million obligation, can also obtain the 'Certified Company Registry'; this specific type of registry is known as New Scheme of Certified Companies (NEEC for its acronym in Spanish), which is different from the newer VAT certification for IMMEX companies mentioned before.

In general terms, the main benefits provided by the Certified Company Registry allows simplified procedures to process imports and exports, including the reduction in time and number of reviews when clearing goods at customs facilities.

Research and development (R&D) incentives

The Mexican Income Tax Law provides a 30% tax credit for R&D expenses, including investments in R&D. The tax credit will be equal to current-year R&D expenses in excess of the average R&D expenses incurred in the previous three years. This incentive cannot be combined with other tax incentives. The government will set up a committee to analyse and approve R&D credits. Further, taxpayers will have to file an information return each February with details of the R&D expenses to be validated by the authorities. Additional rules for the R&D tax credit were published in the Mexican Official Gazette in February 2017 and are in force since 17 March 2017. The given rules provide clarity on the procedural requirements to apply for such tax incentive, some limitations, and a list of expenses that are deemed as qualifying for purposes of obtaining the tax incentive benefits (e.g. fees paid to third party investigators, expenses incurred in testing, tools for testing, specialised equipment necessary for the development of the project, laboratory equipment, among others).

Employment incentives

An incentive offers a credit equivalent to 100% of the income tax corresponding to the salary paid to workers/employees with certain types of disabilities.

An additional deduction, equivalent to 25% of the salary paid to such workers/employees, is also available.

Both benefits cannot be applied in the same fiscal year.

Incentives for investments in movie production

A limited credit is applicable for investments in movie production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Incentives for investments in theatre production

A limited credit is applicable for investments in theatre production activities through an immediate tax credit, which is capped at 10% of the total income tax of the prior year, provided certain requirements are met.

Real estate investment incentives

Some tax benefits exist for qualifying real estate investment trusts (i.e. REITs or the so-called FIBRAS for its acronym in Spanish) in Mexico.

Capital investment

There are certain incentives to encourage risk capital investments in Mexico.

Special Economic Zones (ZEE)

The ZEE were introduced by the Mexican government with the aim of promoting economic growth and investment in certain estates of the country that have fallen behind with respect to others parts of Mexico in industrial and economic development (e.g. Chiapas, Guerrero, Michoacán, among others).

In this regard, from a tax perspective, the Mexican government provided tax incentives to investors in the ZEE which projects should be aimed at encouraging the creation of jobs and infrastructure to promote the economic development of the region.

The specific tax incentives for the ZEE were introduced via decrees in the later part of 2017 and are effective from 30 September 2017. The main tax incentives from an income tax perspective and VAT perspectives are the following:

- From an income tax perspective, taxpayers obtaining income generated within the ZEE will be granted an income tax reduction of 100% during the first ten fiscal years and a 50% income tax reduction for the following five fiscal years, subject to the compliance of certain requirements.
- From a VAT perspective, 0% VAT rate will be applicable to goods acquired by investors in the ZEE to the extent certain documentation requirements are satisfied. Furthermore, investors in the ZEE may be able to obtain accelerated VAT refunds for goods acquired by Mexican residents located outside the ZEE. Further, Mexican residents outside the ZEE may apply a 0% VAT rate to services or the leasing of goods provided to investors in the ZEE, subject to the compliance of certain requirements. In addition, no VAT is applicable to transaction among taxpayers within the ZEE.

Note that additional tax incentives may be available at a state level; however, those are typically negotiated with the local tax authorities on a case-by-case basis and depend on the nature of each specific investment project.

Other incentives

Certain other specific and limited tax incentives are available for taxpayers engaged in certain activities (e.g. those engaged in air or sea transportation of goods or passengers with respect to aircraft and ships with a federal government commercial concession or permit; in the agricultural and forestry sectors; and in-bond warehouses with respect to real property used for the storage, safeguarding, or conservation of goods or merchandise).

Taxpayers dedicated exclusively to the generation of energy from renewable sources or efficient energy through co-generation systems and that have fully deducted their investments shall establish an account designated as a 'Tax Profit Account for Investments in Renewable Energy', which will allow for the distribution of dividends without payment of CIT.

Individual shareholders of companies that reinvest profits generated from 2014 to 2016 are entitled to a reduction in tax on dividends of up to 5% to the extent such profits are distributed beginning in 2019.

Withholding taxes

Payments to Mexican residents

Payments to resident corporations and PEs in Mexico are generally not subject to WHT.

Payments by resident corporations to resident individuals are subject to WHT as follows:

Payment	WHT (%)
Wages, salaries, and other remuneration	0 to 35
Fees:	
Members of boards of directors and advisory boards	35.0
Other professional fees	10.0
Lease payments on real property	10.0
Interest on securities (1)	0.6
Interest on non-qualified securities	20.0
Dividends	10.0
Miscellaneous types of income of individuals, usually sporadic payments	20.0

Note

1. WHT on interest paid by financial institutions to Mexican resident investors is generally set at 0.6% of the invested capital.

Payments to non-residents

Income tax must usually be withheld from payments to non-resident corporations and individuals. In the case of non-tax treaty countries, the statutory withholding rates are as noted below.

Income tax of 40%, with no deductions, must be withheld on most payments made to foreign-related parties whose income is deemed to be subject to a PTR, in lieu of the tax provided in the domestic law for non-PTR foreign resident entities. This is not applicable in certain cases, such as on income not subject to Mexican taxation in accordance with the regular provisions for income earned by non-residents from a source of wealth located in Mexico, income from dividends, and certain types of interest, including interest payments made to foreign banks. In these cases, the regular provisions of the domestic law should be applied to determine the income tax withholding.

Additionally, revenues for intermediation services, including commissions for brokerage, agents, distribution, and assignment, and generally all income from the negotiation of third-party interests, are also subject to 40% WHT when paid to residents whose income is subject to a PTR. The 40% may be reduced if the foreign related party beneficiary resides in a country with which Mexico has signed a comprehensive exchange of information agreement.

Non-residents' wages and salaries are taxed on the basis of a 12-month earnings period at the following income tax withholding rates:

Taxable income (MXN)		
From	To	WHT (%)
0	125,900	0
125,901	1,000,000	15
1,000,001	and above	30

The above mentioned rates are also applicable to retirement fund payouts.

However, no tax arises on compensation (wages, salaries, or fees other than board fees) paid by a non-resident with no establishment in Mexico (even if not subject to tax) to which the services relate, provided the individual remains in Mexico for fewer than 183 days (consecutive or not) in any 12-month period.

The tax, when applicable, is withheld if the income is paid by a resident (or a non-resident PE located in Mexico). Otherwise, the tax is generally payable within 15 working days of the associated payment, by the foreign party earning the Mexican-sourced income.

Statutory withholding rates (not mentioned above) under local legislation are as follows:

Payment	WHT (%)
Professional fees for services rendered in Mexico	25
Lease payments:	
Lease of real property	25
Lease of containers imported on a temporary basis, airplanes, and ships authorised by the Mexican Government to be commercially exploited in the transportation of goods or persons	5
Lease of personal property	25
Time-sharing services (1)	25
Charter agreements	10
Sales:	
Real property located in Mexico (1)	25
Shares of Mexican companies (1, 2)	25
Transfers of ownership of Mexican public debt by other than the original creditors (intended to cover debt-for-equity swaps) (1)	25
Derivative transactions:	
On capital (1)	25

Mexico

Payment	WHT (%)
On debt (3)	Same rates applicable to interest
Interest (4):	
Paid to foreign government financing entities, to duly registered foreign banks and other entities that provide financing with funds obtained by issuing publicly traded debt instruments abroad, registered with the Ministry of Finance (5)	10
Interest on debt instruments placed abroad (6)	4.9
Interest payments to specific foreign financial institutions (7)	4.9
Other interest payments (not otherwise included above) paid by Mexican financial institutions to residents abroad	21
Paid to foreign suppliers of M&E, to others to finance purchases of such assets or inventory or working capital loans if the lender is duly registered	21
Paid to reinsurance entities	15
Other interest payments	35
Financial leases (on the portion deemed to qualify as interest or finance charge)	15
Dividends (12)	10
Royalties (8):	
For the use of railroad cars	5
For the use of copyrights on scientific, literary, or art works, including motion pictures and radio and television recordings, as well as software and payments for the transmission of video and audio signals via satellite, cable, optic fibre, and similar media	25
On patents, invention or improvement certificates, trademarks, brand names, and advertising	35
For the use of drawings or models, plans, formulas, or procedures, and of scientific, commercial, and industrial equipment; on amounts paid for information regarding scientific, commercial, and industrial experience; and for technical assistance	25
Short-term construction and the respective installation, maintenance, technical direction, or supervision (9)	25
Reinsurance premiums	2
Income obtained by athletes and artists (1)	25
Income derived from prizes (e.g. lottery tickets or raffles) (10)	1/21
Other income (forgiven debts, indemnifications, rights to participate in business, investments, etc.)	35

Notes

1. The non-resident may elect to pay tax at a rate of 35% (*see Note 11 below for the rate applicable thereafter*) on the net taxable profit in the case of (i) time-sharing services, (ii) share sales, (iii) sales of real property, (iv) activities of sportsmen/artists, and (v) derivative stock and debt transactions, provided that the non-resident recipient of the income has a legal representative resident in Mexico and to the extent that the following specific requirements are met:
   - For time-sharing services, the resident legal representative must keep the audited financial statements of the foreign resident, or the financial statements included in the foreign resident taxpayer's informative return on their tax status, available for inspection by the Mexican tax authorities.
   - For share sales, a tax opinion issued by a registered public accountant is required (not applicable to foreign residents whose income is subject to a PTR or resides in a territorial tax regime).
   - For shares and debt-for-equity swap transactions, this election is available only where the foreign taxpayer whose income is not subject to a PTR or resides in a country with a territorial tax system. It should be noted that there is an option to defer Mexican income tax arising from the sale of shares on a share-for-share basis within the same group due to a corporate reorganisation, provided certain conditions are met.
2. The sale of shares through the Mexican Stock Exchange is subject to a 10% WHT. When the investor is a resident in a country with which Mexico has signed a tax treaty, such withholding will not apply if certain requirements are satisfied.

3. The applicable WHT rate (based on the WHT rates for interest) for debt-derivative transactions is applied on a net basis. However, if the transaction is liquidated in kind, the applicable WHT rate (on the same net basis) is 10%.
4. Interest payments to non-residents are exempt from Mexican income tax when they are paid on the following:
   - Loans to the federal government or to the Bank of Mexico (Central Bank) or bonds issued by the latter organisation to be acquired and paid abroad.
   - Loans for three or more years granted or guaranteed by duly registered financial entities that promote exports through special financing.
   - Preferential loans granted or guaranteed by foreign financial entities to institutions authorised to receive tax-deductible donations in Mexico, provided these institutions are properly registered and use the funds for purposes consistent with their status.
   - Loans derived from bonds issued by the federal government or the Bank of Mexico placed on a recognised national stock exchange, to the extent the beneficial owner is a foreign resident.
5. A 4.9% WHT rate is applicable when the interest is paid to banks resident in countries with which Mexico has signed a tax treaty.
6. The 4.9% WHT rate applies, provided the placement is handled through banks or brokerage firms resident in a country with which Mexico has signed a tax treaty if there is compliance with the information requirements established in the general rules issued by the Ministry of Finance. If there is failure to comply with these requirements, the 10% WHT rate applies. The 4.9% and 10% WHT rates mentioned in the preceding paragraphs do not apply, and instead a 35% WHT rate is applicable to interest, when the direct or indirect beneficiaries of the interest, either individually or jointly with related parties, receive more than 5% of the interest arising from the instrument in question, and are either (i) holders of more than 10% of the voting shares of the issuing company, either directly or indirectly, either individually or jointly with related parties, or (ii) business entities holding more than 20% of their shares, either directly or indirectly, either individually or jointly with parties related to the issuer.
7. The 4.9% WHT rate is applicable to interest payments made to foreign financial institutions in which the Mexican federal government or the Mexican Central Bank has equity participation.
8. The WHT rate is applied to the gross amount of the payment.
9. The non-resident taxpayer may elect to pay 35% tax on the net profit if the taxpayer has a resident legal representative and so informs the customer, who then makes no withholding. When business activities last for more than 183 days, the foreign taxpayer is deemed to have a PE in Mexico for tax purposes and is taxed in the same manner and subject to the same rules as a local resident corporation or branch.
10. The 21% federal rate is applied only in the case of non-qualifying prizes (i.e. income derived from prizes that is subject to a state tax that exceeds a rate of 6%).
11. The statutory WHT rates mentioned above may be reduced by applying tax treaty provisions. During the last two decades, Mexico has embarked on a policy of negotiating a network of tax treaties with its main trading and investment partners (*see table below*).
12. The 10% WHT on dividend payments to foreign residents does not apply to distributions of profits subject to corporate-level tax prior to 2014. If a corporation makes a distribution out of earnings that for any reason have not been subject to CIT, such as distributions of book earnings (i.e. not yet recognised for tax purposes in Mexico), the corporation will also be subject to CIT on the grossed-up distributed earnings (gross-up factor is 1.4286).

As of March 2018, the treaties with the following countries are pending ratification while waiting for the completion of specific formalities by the respective governments in order to become effective, have not been published yet in the Official Gazette, or are under negotiation: Costa Rica, Egypt, Guatemala, Iran, Lebanon, Malaysia, Morocco, Nicaragua, Oman, Pakistan, Philippines, Slovenia, Thailand, and Venezuela.

Tax treaties with the countries listed in the following table have been published in the Official Gazette and are in force.

The WHT rates negotiated under the tax treaties are as follows:

	WHT (%)			
	Dividends			
Recipient	Portfolio	Substantial holdings	Interest	Royalties
Argentina	15	10 (2)	12	10/15 (42)
Australia	15	0 (1)	10/15 (25)	10

Notes

The applicable tax rates on dividends paid abroad in accordance with the tax treaties executed by Mexico are detailed below; however, under domestic law, no withholding is applied on distributions of profits subject to corporate-level tax generated prior to 2014, when the 10% dividend WHT started applying.

There are certain specific cases of interest paid to parties resident abroad that might be exempted by certain tax treaties (e.g. interest paid to a pension fund or paid by a bank, interest paid on certain loans granted or guaranteed by certain entities for exports under preferable conditions), which are not detailed in the information below.

The Tax Reform gives the Mexican tax authorities the ability to require that the foreign-related party provide a sworn statement through its legal representative confirming that the item of income for which a treaty benefit is claimed would otherwise be subject to double taxation.

1. This rate applies when the recipient corporation that is the beneficial owner of the dividend (except for civil partnerships) directly owns at least 10% of the capital of the distributing corporation. In the case of Barbados, Hungary, and South Africa, the specific exclusion of civil partnerships is not included.
2. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 25% of the capital of the distributing company. In the case of Argentina specifically, there must be a direct ownership of 25% of the capital of the distributing company. In the case of Belgium, no WHT would apply if the beneficial owner holds for an uninterrupted period of at least 12 months shares representing directly at least 10% of the capital of the company paying the dividends or to pension funds if certain requirements are met.
3. This rate applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 25% of the capital of the company distributing the dividends.
4. This rate applies where the recipient corporation that is the beneficial owner of the dividend owns at least 10% of the voting shares of the paying corporation. The Mexico-US tax treaty contains a most-favoured nation clause.
5. This rate applies where a company that is the beneficial owner of the dividends (except for civil partnerships, although limited liability partnerships are included) directly owns at least 10% of the voting shares of the company distributing the dividends.
6. This rate applies where a company that is the beneficial owner of the dividends owns at least 20% of the voting shares of the company paying the dividends.
7. This is the maximum WHT rate for dividends, with no distinction for substantial holdings. In the case of Ecuador and India, the tax payable on dividends paid to residents in Mexico must not exceed a limit established in the treaty.
8. The 5% rate applies when a company that is the beneficial owner of the dividends owns at least 25% of the voting shares of the company paying dividends during the six months prior to the end of the tax period in which dividends are paid. Under certain particular rules and provided this ownership requirement is satisfied, dividend payments are only subject to tax in the country of residence of the recipient of the dividends.
9. No withholding applies when more than 50% of the shares of the recipient corporation are owned by residents of France or Mexico or when the beneficial owner of the dividend is a resident individual. Accordingly, the WHT applies to dividends when more than 50% of the recipient corporation's shares are owned by residents of other countries. However, the WHT must not exceed 5% when the party receiving the dividend is the effective beneficiary of said dividend. Dividends paid by a company resident in France to a resident of Mexico, other than a company that directly or indirectly holds at least 10% of the capital stock of the first-mentioned company, may also be taxed in France, in accordance with the law of France, but if the recipient of the dividends is the beneficial owner, the tax thus charged must not exceed 15% of the gross amount of the dividends.
10. The 5% rate applies where the company that is the beneficial owner of dividends directly or indirectly owns at least 10% of the capital of the company distributing the dividends. There is a 10% tax rate that applies when these same ownership requirements are satisfied, but the company paying dividends

is a resident of Israel (provided dividends are paid from earnings taxed in Israel at a tax rate lower than the regular corporate tax rate in Israel).

11. The applicable tax rate on the gross amount of the dividends when the recipient company (beneficial owner) (except for civil partnerships) directly holds at least 10% of the capital of the corporation paying the dividend must not exceed 5% in the case of Luxembourg and 8% in the case of Mexico. The protocol of the Mexico-Luxembourg tax treaty states that this rate might be reviewed in the future by the contracting states if the WHT is not fully creditable, and can be adjusted under the principle of avoiding double taxation, provided the adjusted WHT rate is not lower than 5%.
12. Dividends paid by a company resident in Mexico to a company resident in the Netherlands (which is the beneficiary of said dividends) are subject to a maximum tax of 5% on the gross amount of the dividends if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying said dividends. However, as long as a company resident in the Netherlands is not subject to Dutch income tax on dividends received from a company resident in Mexico under the terms of the Dutch income tax law and any future amendments thereto, the dividends mentioned in the preceding paragraph may only be taxed in the Netherlands (not in Mexico).
13. The Mexico-New Zealand tax treaty contains a most-favoured nation clause that may be applicable in the future.
14. The exemption on dividend WHT is not applicable in the case of deemed dividends.
15. To the extent certain requirements provided in the Protocol are met, the WHT may be reduced to 0%.
16. The 10% rate applies to loans from banks. In the case of Belgium, the 5% rate is available for loans from banks and on interest paid from bonds that are regularly and substantially traded on a recognised securities market, and the 10% rate applies in all other cases.
17. The 5% WHT rate is applicable to interest paid to banks.
18. The 5% rate applies to interest on loans from banks, insurance companies, and retirement and pension plans. However, in the case of Saudi Arabia, interest income on loans from insurance companies is excluded for the reduced 5% WHT rate.
19. The 10% rate applies to interest on loans from banks, insurance companies, and securities regularly and substantially traded on a recognised national stock exchange.
20. The 4.9% rate applies to interest on loans from banks and insurance companies and to interest on securities regularly and substantially traded on a recognised national stock exchange.
21. In the case of the Netherlands, the 5% rate applies to interest on loans from banks and to interest on securities regularly and substantially traded on a recognised national stock exchange. In the case of the United Kingdom, the 5% rate extends to interest paid to insurance companies. In the case of Spain, the 4.9% rate applies to interest on loans from banks, interest on securities regularly and substantially traded on a recognised national stock exchange, and interest paid to insurance companies.
22. The updated WHT rates of the Tax Convention are effective as of 27 September 2017.
23. The 10% rate on interest applies in the case of interest paid to the original seller of M&E and interest paid by banks.
24. The 10% rate applies to interest on loans from banks and to interest derived from bonds or securities that are regularly and substantially traded on a recognised securities market, as well as to interest paid by the purchaser of M&E to a beneficial owner that is the seller of the M&E.
25. The 10% rate applies to interest on loans from banks and insurance companies, to interest on securities regularly and substantially traded on a recognised national stock exchange, to interest paid to the original seller of M&E in a sale on credit, and to interest paid by banks.
26. The 5% rate is applicable to interest on loans granted by banks and insurance companies, securities traded on a recognised securities market, and the sale on credit of M&E.
27. It is understood that the definition of royalties applies to any type of payment received for the provision of technical assistance services. The 15% rate applies to royalties arising from the use of, or the right to use, trademarks.
28. The original rate is 15% but has been reduced to 10% as long as the Netherlands does not impose a WHT.
29. The reduced WHT rate results from the application of the most-favoured nation clause.
30. The 5% rate applies to industrial, commercial, and scientific equipment.
31. The 10% rate also applies to fees for technical assistance, which are payments of any kind, other than those mentioned in Articles 14 and 15 of the treaty as consideration for managerial or technical or consultancy services, including the provision of services of technical or other personnel.
32. This rate applies where the company that is the beneficial owner of the dividends directly owns at least 25% of the capital of the distributing company.
33. The treaty broadly defines royalties and includes payments related to certain software.
34. This rate applies where the company that is the beneficial owner of the dividends directly or indirectly owns at least 10% of the capital of the distributing company.
35. The 5% rate applies on the gross amount of the interest paid to, among others, banks and insurance institutions.
36. No withholding applies where the company that is the beneficial owner of the dividends (except for civil partnerships) directly owns at least 10% of the capital of the company distributing the dividends or when the dividends are distributed to a pension fund.
37. The updated protocol of the Italy Tax Convention is applicable since 16 April 2015. In the case of Belgium, the new protocol entered into force in general as of 1 January 2018.
38. The 4.9% rate applies on the gross amount of the interest paid to banks and pension funds or pension schemes; the 10% rate applies on the gross amount of the interest paid in any other case.

39. The 5% rate applies on the gross amount of the interest paid to and by banks; the 10% rate applies on the gross amount of the interest in all other cases.
40. The 5% rate applies on the gross amount of the interest if the beneficial owner of the interest is a bank; the 10% rate applies on the gross amount of the interest in all other cases.
41. The 10% rate applies on the gross amount of the interest if it is paid to a bank; the 15% rate applies on the gross amount of the interest in all other cases.
42. The 10% rate applies on the gross amount of royalties derived from the use of intellectual property over literary, theatre, musical, artistic, or scientific works; the use of patents, designs, models, plans, formulas or secret procedures, computer programs, commercial equipment, industrial equipment, scientific equipment, or for information related to industrial, commercial, or scientific experiences or the rendering of technical assistance services; the 15% rate applies on the gross amount of the royalty in all other cases.
43. Even though the tax conventions are currently in force, the withholding reduced rates and provisions related to other taxes would be applicable until 1 January 2019, per articles 30 and 29 of the Jamaica and Saudi Arabia Tax Conventions, accordingly.

Tax administration

Taxable period

In general terms, the taxable period in Mexico is the calendar year.

Tax returns

Corporate taxpayers are required to file annual CIT returns for the preceding calendar year by 31 March of the following year.

Thereafter, taxpayers meeting certain size criteria or belonging to a group that, as a whole, meets these criteria must submit a tax-compliance informative return along with the preceding calendar year annual CIT return (i.e. 31 March of the following year).

In lieu of submitting the tax-compliance informative return, business taxpayers meeting certain size criteria may elect to file a tax-compliance audit report on an annual basis with the Mexican Audit Administration. This audit report covers all federal taxes other than customs duties and consists of audited financial statements and detailed schedules, together with a report by the auditor stating that no irregularities were observed in respect of the taxpayer's compliance with its federal tax liabilities. This report must be filled electronically, and the auditor must be an independent certified public accountant (CPA) registered with the Mexican Audit Administration. The amount of detailed information required to be filed, and the auditor's responsibility in connection therewith, is significant.

Employees' profit sharing payments are generally due by 31 May of the year following that in which the corresponding profit was obtained.

Information returns must also be filed not later than 15 February each year, reporting on, amongst others, the following activities performed in the immediately preceding year:

- Payments made to parties resident abroad.
- Loans received from or guaranteed by non-residents.
- Transactions conducted through a business trust.
- Parties to which the taxpayer makes payments and withholds income tax.
- Parties to which the taxpayer has made donations.
- Parties to which the taxpayer has paid dividends, and the value of such payments.
- Transactions carried out with suppliers and clients, either local or overseas.

Taxpayers making salary payments are also required to file information returns reporting salaries paid and salary credit paid in the immediately preceding calendar year.

An annual information return must be filed on investments made or held in a tax haven. This must be filed in February of the immediately following year.

An information return on transactions carried out with non-resident-related parties must be filed together with the annual CIT return (no later than March of the following year).

The informative tax status return corresponding to fiscal year 2018 must be filed in 2019 on the same date the annual corporate tax return is filed. However, an exception is provided for Mexican residents, which are only required to file the informative tax status return for transactions with non-Mexican residents if the amount of such transactions is less than a MXN 100 million.

Taxpayers allowed to elect to file the tax report will not be obligated to file the information return stating their tax status.

Payment of tax

Corporate taxpayers are required to make estimated payments of CIT by the 17th day of each month based on their estimated taxable income at the end of the previous month and calculated principally by applying the profit factor to the cumulative monthly gross income. The profit factor is determined by dividing the taxable profit by gross income shown in the annual return for the preceding year, or, if no profit factor is to be found in that annual return, the factor appearing in the year preceding that and so on, up to five years, with certain adjustments. For this purpose, gross income includes nominal income, excluding inflationary adjustments. The balance of CIT for the year is due at the same time as the annual return.

Special procedures are provided for computing advance CIT payments and for obtaining authorisation to reduce the amounts of monthly advances after the sixth month of the year. No advance payments or adjustments thereto are required in the first year of operations.

Tax audit process

In general terms, for taxpayers that elected to file a tax-compliance audit report, the tax audit (tax inspection) may start with a review of the audit report prepared by the independent CPA. At this point, the tax authorities may finish the audit if they are satisfied with the information provided by the CPA; otherwise, tax authorities may initiate a direct review on the taxpayer either at the tax authority's offices or at the taxpayer's facilities. Tax authorities may request several documents from the taxpayer and third parties that carried out transactions with the audited taxpayer.

Tax audits should be concluded within the following 12 months after the audit was initiated. The period to conclude tax audits for taxpayers that are either part of the financial system or consolidated for tax purposes is 18 months. In cases where the Mexican tax authorities request information to tax authorities from foreign jurisdictions, the period to conclude the audit is two years. The above periods might be suspended under certain circumstances (e.g. a judicial recourse or appeal initiated by the taxpayer against the tax authorities). Upon conclusion of the audit, the tax authorities should issue either a notification explaining tax underpayments observed during the audit process or a notification of conclusion if no issues remain open at the end of the inspection.

Finally, tax authorities should issue a notification of assessment within the six months after the conclusion of the tax audit. At this point, all underpayments claimed by the tax authorities become due.

Concluding Agreements

The Prodecon is a decentralised Mexican government organisation that acts as the Ombudsman of Mexican taxpayers, providing advice and issuing recommendations to the tax authorities. In recent years, Prodecon's Concluding Agreements have become more common and have had a positive impact for taxpayers when it comes to reconciling differences with the tax authority in regards to an audit and controversial assessments.

The agreement applies when a taxpayer is dissatisfied with the authority's tax assessment as a result of an audit. The taxpayer then should file a petition to the Prodecon, noting the facts, omissions, and support elements to expose its defending arguments. The Prodecon then notifies the authority and proposes an agreement to settle the difference and conclude the audit without further procedures. The authority has 20 days to indicate whether or not it accepts the terms that arise in the Conclusive Agreement.

Statute of limitations

In general, the right of the tax authorities to collect taxes, review tax returns, or claim additional tax expires five years after the date the respective return is filed. However, in cases where the taxpayer has not secured a federal tax registration number, has no accounting records, has failed to keep accounting records for the required five-year period, or has not filed a tax return, the statute of limitations expires in ten years. Similarly, the period for claiming a refund of overpaid tax expires after five years.

Topics of focus for tax authorities

Although there are no formal written communications from the tax authorities dealing with their topics of focus, in recent years the tax authorities have focused audits on transactions with non-residents, inter-company transactions, transfer pricing, social security contributions, and customs duties, among other areas.

Other issues

Relevant transactions disclosure

The Mexican Supreme Court, for years prior to 2018, ruled against the tax provision that established that taxpayers are subject to report relevant transactions on a quarterly basis, concluding such reporting obligation did not comply with the legal certainty principle, as the reporting scenarios were not included in the text of the law. As a consequence of the aforementioned ruling, the Mexican tax authorities incorporated the tax provision into the text of the 2018 Federal Revenue Law.

In line with the above, the relevant transactions reporting includes share acquisitions or dispositions, extraordinary transactions with related parties, and corporate reorganisations, among others.

Cash deposits reporting

Financial institutions are required to report, by 15 February of each year, to the Revenue Administration Service (*Servicio de Administracion Tributaria* or SAT) the information on customers making monthly cash deposits in excess of MXN 15,000.

International Financial Reporting Standards (IFRS) adoption

All companies listed on the Mexican Stock Exchange are required to submit annual consolidated financial statements accompanied by the opinion of a Mexican independent CPA. These financial statements must be prepared in conformity with IFRS and cover three years. Financial institutions and insurance companies must also file audited financial statements with the appropriate regulatory agency.

The elective adoption of IFRS in Mexico for other companies presents great challenges and opportunities. Changing from Mexican Financial Reporting Standards (MFRS) to IFRS requires companies to review their financial reporting procedures and criteria. Major changes in the requirements often have a ripple effect, impacting many aspects of a company's information reporting organisation.

Nevertheless, the benefits to Mexican companies in reporting under IFRS are numerous. Among the greatest of these is the opening up of the Mexican Stock Market to overseas investors. By adopting IFRS, investors are able to compare two companies on different sides of the world with greater ease, and thus it is hoped that the change will encourage investment in Mexican companies.

Adoption of IFRS is not a straightforward process, and it will require time and effort on the part of the adopting entities to be able to ensure a smooth transition from MFRS to IFRS and ensure that the changes and benefits from this transition are duly implemented.

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)

FATCA was enacted in 2010 by the US Congress to target non-compliance by US taxpayers using foreign accounts. FATCA requires foreign financial institutions (FFIs) to report to the US Internal Revenue Service (IRS) information about financial accounts held by US taxpayers or by foreign entities in which US taxpayers hold a substantial ownership interest.

Mexico signed an IGA with the US Treasury on 19 November 2012 under which Mexican financial institutions are required to report US-owned account information directly to the Mexican tax authority, rather than to the US IRS. The Mexican tax authority will then share that information with the US IRS.

The IGA provides that the United States will reciprocate with the sharing of information.

Mexican tax authorities have issued a set of administrative rules for banks and other financial and related entities to comply with the FATCA IGA.

Common Reporting Standard (CRS)

Mexican legal entities and legal figures that are financial institutions resident in Mexico or abroad with Mexican branches are required to report financial information of their clients since 2016 in line with the CRS, which was introduced at the OECD level on 15 July 2014.

The CRS obligation to financial institutions in Mexico was included in the 2016 Tax Reform to the Mexican Federal Tax Code, which broadly implies identifying the residency of their clients and the reportable accounts and filing such information to the Mexican tax authorities. In this regard, the Mexican tax authorities will exchange that information automatically with the respective jurisdictions participating in the multilateral exchange of information agreement signed on October 2014 by more than 50 countries. Depending on the particular jurisdiction, the exchange of information was set to start with 2016 data; however, with some jurisdictions, the exchange of information was agreed to start with 2017 and 2018 data.

In line with the above, Mexico started exchanging information in 2017 with respect to fiscal year 2016 and effectively received in the latter part of 2017 information of Spain, Germany, Malta, and the Netherlands, among others jurisdictions, as expressly mentioned by the Mexican tax authorities press releases.

Significant developments

Corporate income tax (CIT)

As of 1 January 2018, expenses from financial allocations for the benefit of trade unions are deductible up to 0.15% of the payroll fund if used in accordance with the collective labour agreement. This amendment applies starting with 1 January 2017.

At the same time, starting with 1 January 2018, expenses for granting meal tickets are deductible within the limits provided by law.

Starting with 1 January 2018, taxpayers may opt for the new methodology for calculating fixed assets' depreciation for tax purposes. Thus, fixed assets' evidence may be held for each asset in part by applying the straight-line method of depreciation. Starting with 2019, the new methodology shall be mandatory.

The tax rate on income from operational activity of small and medium enterprises that are not registered as value-added tax (VAT) payers has been increased to 4%. The conditions for applying this regime have also been modified.

Payroll taxes

As of 1 January 2018, all payroll taxes are reported through a unified tax return by the 25th day of the month following the reporting one.

Health insurance contributions are to be paid by 25th day of the month following the one in which salary and other compensations were paid.

In addition, as of 1 January 2018, the taxable income for health insurance contributions purposes has been mostly aligned to that of personal income tax (PIT).

Value-added tax (VAT)

Starting with 1 January 2018, the list of VAT-related terms has been amended and extended in line with European Union (EU) Directives.

The 8% VAT rate applies to thermal energy produced from solid biofuels and delivered to public institutions.

The ceiling for registering as a VAT payer has been increased to 1.2 million Moldovan lei (MDL).

Additional specifications have been provided for the place of goods and services delivery.

Excise duties

The list of excise duties terms has been amended and extended in line with EU Directives. Articles of jewellery made from precious metals have been excluded from the list of excisable goods.

Tax administration

Starting from 1 January 2018, the 50% fine reduction for tax infringements is also to be applied for social security and health insurance contributions.

Law on information technology (IT) parks

Starting from 1 January 2017, a new law on IT parks entered into force. Following it, the first IT park started its activity in January 2018. The law provides for certain tax incentives for the IT parks' residents.

Under this law, each park resident is subject to a single tax of 7% of sales income, but not less than the minimum amount due per employee. The minimum amount of single tax per employee is set at 30% of the national average forecasted salary for that year.

Taxes on corporate income

Resident companies generally must calculate their taxable base for CIT purposes on their worldwide income. Permanent establishments (PEs), unlike resident companies, are only required to calculate their taxable base for CIT purposes on income sourced in Moldova.

The CIT rate is 12%. If the Moldovan Tax Authority (MTA), applying indirect methods, re-assesses the income amount compared to the declared gross income, a 15% CIT rate may be applied to the excess amount.

Individual entrepreneurs are subject to progressive rates of 7% for annual income up to MDL 33,000 and 18% for annual income exceeding MDL 33,000.

Farming enterprises are subject to a 7% CIT rate.

Small and medium companies that are not registered as VAT payers may opt for a special CIT regime of 4% on their turnover (under specific conditions).

Local income taxes

There is no separate CIT at the local level. CIT is distributed between the national state budget and local budgets depending on the establishment of the entity and its subdivisions in accordance with the existing rules.

Corporate residence

According to Moldovan tax law, a tax resident is a legal entity organised or managed in Moldova or that has its main place of business in Moldova. In practice, tax residency is determined by the place of incorporation.

Permanent establishment (PE)

Based on the Moldovan tax law, a PE is a fixed place of business through which a non-resident carries out, wholly or partly, either directly or through a dependent agent, entrepreneurial activity in the territory of Moldova.

Due to the regulatory environment in Moldova, as well as certain difficulties in operating a PE in Moldova, foreign enterprises operating through a PE in Moldova are not common.

Other taxes

Value-added tax (VAT)

The standard VAT rate in Moldova is currently 20%. It is generally applied to local supplies of goods and services as well as to goods subject to import and services subject to the reverse-charge mechanism.

Apart from the above, certain types of supplies are subject to reduced VAT rates. For instance, local supplies of bread and bakery products; milk and dairy products; transport and distribution of natural gases services; biofuels used for electricity, heating, and hot water production; and specific phytotechnical, horticultural, and zootechnical products are subject to the reduced 8% VAT rate.

A number of supplies are VAT exempted with the right to be deducted, including international transportation and exports of goods or services. Certain supplies are VAT exempted without a deduction right, including financial services and the sale or rental of dwellings and land.

Input VAT

Input VAT incurred on acquisitions of goods and/or services may be deducted, provided it is incurred by a VAT-registered payer to perform VATable supplies within its business activity.

If input VAT relates to acquisitions destined to perform mixed supplies (i.e. both VATable and VAT-exempt ones), the input VAT deduction right is exercised on a pro-rata basis.

VAT refunds

Should a company register a deductible input VAT exceeding its output VAT, this balance can be partially refunded only if the company carries out a specific range of business activities (e.g. export supplies, international transportation services, production of bakery and dairy products, leasing activity). Otherwise, such VAT amount may be carried forward to the following months, offset against the company's future output VAT liabilities.

Additionally, VAT payers performing capital investments in Moldova may be entitled to refund the recoverable VAT related to these kinds of capital investments, provided such assets are used for product manufacture, service supply, and execution of works.

The possibility to refund the VAT against future obligations to the national public budget is also available, at the request of taxpayers not having debts to the national public budget.

VAT administration

A company is required to register for VAT purposes if the total turnover within the last 12 consecutive months reached the threshold of MDL 1.2 million. Also, companies can follow voluntary registration for VAT purposes if they only intend to perform taxable supplies.

All VAT payers registered for VAT purposes must submit electronic tax returns. VAT liabilities must be declared and settled monthly no later than the 25th day of the month following the reporting one.

Generally, VAT payers are required to issue VAT invoices for the VATable supplies performed, as well as to keep detailed records of their acquisitions and supplies in the correspondent VAT ledgers, according to a set of specific rules.

Additionally, all companies registered as VAT payers are required to register their VAT invoices with a taxable basis exceeding MDL 100,000 in the general electronic register of VAT invoices within ten working days from the date of issuing (with some specific exceptions).

VAT payers are entitled to a deduction of the amount of VAT paid to suppliers for material values and services purchased in Moldova if the VAT invoice is not registered by the seller in the register only on condition that the tax authorities are duly informed of such non-registration of VAT invoice.

Customs duties

Moldova's current customs framework is regulated by the Customs Code, Law on Customs Tariff, International Agreements concluded by Moldova to date, and by other legal acts.

Customs duties include customs procedural taxes, customs taxes, VAT, and excise duties. In general, any kind of goods and means of transport may enter and leave the territory of Moldova without any restriction. However, certain limitations specifically provided by the legislation are in force, which cover goods and means of transport crossing the border by breaching state security, public order, environment, etc.

Customs regimes

Definitive and suspensive customs regimes are provided under Moldovan law.

Definitive customs regimes refer to import and export, while suspensive customs regimes comprise transit, bonded warehouse, inward processing relief (with suspension), processing under customs control, temporary admission, and outward processing relief.

Customs valuation

Under Moldovan customs legislation, the customs valuation is generally performed in accordance with the customs valuation principles in the General Agreement on Tariffs and Trade (GATT).

The customs value is determined based on one of the six provided valuation methods (i.e. transaction value, transaction value of identical goods, transaction value of similar goods, deductive value, computed value, and reserve method). If the first method is not applicable, then the second method should be applied and so forth.

Preferential tariff treatment

Moldova has concluded free trade arrangements (FTAs) to date with most of the Commonwealth of Independent States (CIS) countries and is also a Central European Free Trade Agreement (CEFTA) contracting state. A preferential tariff treatment is granted for specific categories of goods, depending on their origin and in accordance with the FTAs to which Moldova is a party.

Also, further to the Association Agreement with the European Union, the customs duties on goods originating in the other party are eliminated. The origin of goods can be proven with an EUR.1 movement certificate or an origin declaration.

Customs duties applicable on imports performed in the Republic of Moldova are eliminated, except for products free of customs duties within the limits of the tariff quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.

Customs duties applicable on imports performed from the European Union are eliminated, except for the following products:

- Products free of customs duties within the limits of the tariff quotas. In case these limits are exceeded, the most-favoured-nation customs duty rate shall apply.
- Products subject to entry price for which the *ad valorem* component of the import duty is exempted.
- Products subject to the anti-circumvention mechanism.

Elimination of the customs duties on some specific categories of goods will be gradually made.

Favourable tariff treatment

A favourable tariff treatment presumes a reduction or an exemption from customs duty upon import of specific goods into Moldova, depending on their type or final destination, according to domestic customs law or international agreements to which Moldova is a party.

Moldovan customs law provides the following exemptions, among others, from customs duty:

- Goods imported by individuals for personal use, not exceeding a specific threshold.
- Goods released in Moldova under transit, bonded warehouse, or inward processing relief regimes.
- Moldovan goods previously exported and released back within a three-year term in the same status, as well as compensatory products obtained under outward processing relief.
- Certain movable goods imported by legal entities carrying out leasing activities for the purpose of paying off their contractual liabilities derived from lease agreements concluded with Moldovan individuals or legal entities.
- Goods imported by legal entities for non-commercial purposes whose customs value does not exceed 100 euros (EUR).
- Samples of goods with customs value not exceeding EUR 22 for one import operation.

- Aircraft, helicopters, locomotives, multiple units for railways providing public transportation of passengers, and parts thereof (only certain tariff headings as provided by law).
- Certain vehicles imported free of charge (donation), regardless of the exploitation term, for certain special purposes.

Customs administration

Moldovan customs legislation provides for:

- the concepts and procedures of post clearance audit
- the obligation of individuals and companies to maintain the necessary documents for customs control for five years, and
- the obligation of individuals and companies that perform external trade transactions to maintain the related documents for the purposes of post clearance audit for five years.

The Customs Service of Moldova uses procedures for issuing binding tariff and binding origin information. Additionally, companies may use the electronic procedure of customs clearance for the export of goods, as well as specific simplified customs procedures.

Excise duties

Excise duties apply to the production and import of cars, tobacco, alcohol, petrol and lubricants, and other goods. Special excise rates for each type of excisable goods are established in the tax code. The rates are widely variable and are based on multiple factors. The excise duty rates are generally indicated as a percentage applied to the value of goods or as a fixed amount for a certain quantity of excisable goods. However, for specific types of excisable duties, mixed excise duty rates are applicable.

The following are liable for excise duties:

- Any individual or legal entity producing and/or processing excisable goods on the territory of Moldova.
- Any individual or legal entity importing excisable goods, unless there is no specific exemption provided.

Businesses or individuals that produce and/or process excisable goods on the territory of Moldova (or intend to do so) must possess excise duty certificates, which must be granted by the tax authorities before these operations are actually carried out. It is mandatory for individuals or businesses, upon submitting the relevant applications to the tax authorities, to attach the details of the excise premises.

Under certain circumstances, excise duty exemptions may apply. Some excise-liable goods are subject to mandatory excise stamp marking and labelling.

Tax on immovable property

Tax on immovable property is a local tax paid on real estate (i.e. land and/or construction on the land) by the property owner or owner of material rights. Residents and non-residents owning real estate located in the territory of Moldova have similar obligations.

The 0.3% rate on immovable property used for entrepreneurial activity is applied either on the property's estimated value (if such exists) or on its book value, while the maximum tax rate on property used for agricultural activities is 0.1% of the property's book value.

Tax rates for real estate housing, including villages (communes) from Chisinau and Balti municipalities, are generally higher than for real estate housing from other municipalities.

Separate rates are applicable for agricultural land with construction buildings on it.

Tax on immovable property is paid in equal instalments on 15 August and 15 October for property owned before 30 June. For property acquired after 30 June, the tax is paid by 25 March.

Companies and individual entrepreneurs who own immovable property will be obligated to declare the immovable property tax by 25 July of the current fiscal period.

In the event of an owner change during the fiscal year, the previous owner may request recalculation of the real estate tax in proportion to the period in which they were subject to taxation.

Transfer taxes

Transfer taxes may be applied for notary acts performed by authorised notaries and other persons empowered by law. Transfer taxes are applied upon authentication by a notary of sale-purchase agreements regarding plots of land; transfers of houses into private property; alienation agreements of houses, apartments, garages, and other constructions; authentication of mortgage agreements; and other evaluative contracts.

Stamp taxes

According to the law on state tax, stamp tax (state duty) is the amount charged by specifically authorised state bodies from individuals and legal entities for the exercise of certain actions or issuance of legal documents of interest to them.

Stamp taxes may be applied for, but not limited to, the following:

- Claims submitted to courts of justice.
- Registration of civil status documents.
- Issuance of passports to Moldovan citizens and other related documentation.
- Residence registration.
- Redemption of goods from the state.
- Registration of mortgage, for issue of extracts from the Real Estate Register.
- Notary acts (i.e. for notarisation of sale-purchase agreements of immovable assets).
- Application of the apostil.

Payroll taxes

Salaries and other remunerations provided by an employer to its employees are subject to personal income tax (PIT). Thus, an employer is liable to withhold and pay PIT from employees' taxable income, as follows:

- 7% for annual income up to MDL 33,000 (limit applicable for 2018).
- 18% for annual income that exceeds MDL 33,000 (limit applicable for 2018).

Also, there are available deductions, each resident taxpayer being allowed to claim a personal allowance and allowance for spouse of MDL 11,280 a year and allowance for each dependant of MDL 2,520.

All payroll taxes are reported through a unified payroll tax return by the 25th day of the month following the reporting one.

Social security contributions

Employers must pay social security contributions of 23% of their employees' gross salary and other recompense to the Social Security Fund. Employees pay an individual contribution in the amount of 6% of their gross salary and other recompense. The legislation provides an annual fixed social security contribution for other categories of taxpayers in an amount approved for each year (e.g. MDL 8,424 applicable for 2018).

Companies report their social security contribution liabilities on a monthly basis (with certain exceptions) through the unique payroll tax return. The social security contribution due by both employer and employee must be transferred by the employer to the budget no later than the 25th day of the month following the reporting one.

A fine equal to double the amount of social security contributions is applied in case of diminishing or hiding the salary funds and other remuneration and the related social security contributions.

Health insurance contributions

The mandatory health insurance contribution, computed as a percentage of wages and other remuneration, is established at 4.5% for each payer category (employers and employees). The legislation also provides for an annual fixed amount of health insurance contribution paid by other categories of taxpayers in an amount approved for each year (e.g. MDL 4,056 applicable in 2018).

The mandatory health insurance contributions are declared on a monthly basis through the unique payroll tax return. The mandatory health insurance contribution due by both employer and employee must be transferred to the budget by the 25th day of the month following the moment of payment of salary and other remunerations.

As of 1 January 2018, the taxable income for health insurance contributions purposes has been mostly aligned to that of PIT.

A fine equal to the amount of contributions is applied in case of diminishing or hiding the salary funds and other remuneration from which the compulsory health insurance contributions are due.

Environmental pollution payments

Payments for environmental pollution are administered by the MTA. Subject to these payments are producers, importers, and/or purchasers of the specific types of goods that, during their usage, produces pollutants.

Companies should generally submit reports on environmental pollution payments on a monthly basis. The environmental pollution payments due by a company must be transferred to the budget no later than the 25th day of the month following the reporting one.

Road taxes

Road taxes are fees collected for the use of roads and/or protection zones of the roads outside the locality limits.

The system of road taxes includes the following:

- Tax for the use of roads by vehicles registered in Moldova.
- Tax for the use of roads of Moldova by vehicles not registered in Moldova (vignette).
- Tax for the use of roads by the vehicles with total mass, axle loads, or dimensions exceeding the admitted limits.
- Tax for the use of road protection zones outside the localities for carrying out construction or installation works.
- Tax for the use of road protection zones outside the locality limits for placing outdoor advertisements.
- Tax for the use of road protection zones outside the locality limits for placing roadside service objects.

Depending on the type of road tax, the tax law establishes the taxable person, deadlines for payment of the road tax, tax rates, exemptions (e.g. a legal entity or an individual shall pay road tax on vehicles registered in Moldova (i) on the date of state registration of vehicle or (ii) on the date of the vehicle inspection/annual technical testing of the vehicle).

Road tax rates for the use of roads by vehicles registered in Moldova vary depending on the type of vehicle and its specific characteristics (engine capacity, weight, etc.).

The fixed tax rates for vignette vary from EUR 4 to EUR 85, depending on the period the vehicle stays in the territory of Moldova.

Local taxes and duties

Local taxation in Moldova refers to the application of the following main types of taxes and duties:

- Taxes on the following natural resources:
  - Water.
  - Mineral exploration.
  - Geological exploration.
  - Mining operations.
  - Usage of underground areas for the construction of underground structures not related to mining operations.
  - Exploitation of underground structures within the performance of entrepreneurial activity, not related to mining operations.
  - Standing wood.
- Tax on immovable property.
- Duty for the right to perform local auctions and lotteries.
- Tax on advertising placement and tax on advertising devices.
- Fee for the right to use local symbols.
- Land improvement duty.
- Tax for commercial and/or services providing units.
- Parking tax.
- Hotel room occupancy tax.
- Resort fee.

Local authorities are authorised to establish the levels of tax rates for local taxes.

Branch income

Branches

Moldovan law does not distinguish between branches of non-resident companies and local companies established by a foreign investor. A non-resident's branch is established and registered in Moldova as a legal enterprise fully owned by the foreign investor. As such, it is subject to the same tax regime as local incorporated companies.

On the other hand, the concept of a tax PE does exist in Moldova. Generally, the PE of a non-resident entity will be subject to CIT in Moldova on any profits attributable to that PE. Since there is no local concept of a legal branch that is not a legal entity, non-residents do not typically intentionally operate in Moldova through a taxable PE.

Representative offices

Representative offices are often established by non-resident entities as a first step to operating in Moldova. According to the tax law, a representative office can engage only in auxiliary or preparatory activities. A representative office can perform only a limited range of activities without being considered a PE of the non-resident.

All representative offices must submit, by 25 March of the year following the reporting year, the required Tax Reporting Statement on the activity conducted during the year concerned.

Income determination

Resident legal entities are taxed on their worldwide income, while non-resident entities are taxed on their Moldovan-source income. Taxable income is computed as accounting profit adjusted in accordance with tax legislation.

Inventory valuation

Under the National Accounting Standards, the following inventory valuation methods are mandatory: specific identification, first in first out (FIFO), and weighted average cost.

Assets are generally valued at their acquisition cost, production cost, or market value.

Capital gains

Taxable gain is generally calculated as 50% of the difference between the sale price and the fiscal value of the capital assets (i.e. all costs related to the acquisition of capital assets). This taxable portion of the capital gain is then taxed at the standard tax rates.

This capital gain should be included in the total gross amount of income for the year in which the capital assets were sold (alienated). Capital gains may be decreased by capital losses registered in the current or previous year. Some examples of capital assets include shares, plots of land, options to purchase or sell capital assets, etc.

Specific exemptions might be applied in relation of certain transactions with capital assets.

Dividend income

Starting with profits earned in 2012, dividends paid by Moldovan legal entities to other Moldovan legal entities are taxed with the applicable final 6% withholding tax (WHT), while the distribution of dividends from profit earned during the period between 2008 and 2011 remain subject to the previously applicable final WHT of 15%.

Dividends received by Moldovan legal entities from foreign legal entities are included in taxable income and taxed at the applicable 12% CIT rate. According to Moldovan legislation, the beneficiary of such dividends is entitled to a credit for the tax paid in the foreign country, within certain limits.

Interest income

In general, the interest income derived by legal entities is included in the total taxable amount and taxed at the applicable 12% CIT rate unless a specific exemption is provided (e.g. interest from state bonds).

Royalty income

Royalties are defined as payments of any kind received in consideration for the use of, or the right to use, any copyright and/or ancillary right of a literary, artistic, or scientific work, including moving pictures, patent, trademark, design or model, plan, software, secret formula or process, or for information concerning industrial, commercial, or scientific expertise.

The following specific types of payments are not considered royalty under the Moldovan tax law:

- Payments for software purchase, intended solely for the operation of that software, including its installation, deployment, storage, customisation, or updating.
- Payments for the full acquisition of a software copyright or a limited right to copy it solely for the purpose of its use by the user or for the purpose of selling it under a distribution contract.
- Payments for obtaining the rights to distribute a product or service without giving the right to reproduction.
- Payments for access to satellites through the hiring of transponders or the use of cables or pipelines for the transport of energy, gas, or oil, where the customer is not in possession of transponders, cables, pipes, fibre optics, or similar technologies.
- Payments for the use of electronic communications services in roaming agreements, radio frequencies, and electronic communications between operators.

In general, royalties derived by legal entities are included in the total taxable amount and taxed at the applicable 12% CIT rate.

Exchange gains and losses

Revenues obtained from foreign exchange differences are to be included in taxable income. Foreign exchange losses are CIT deductible in the period they are incurred.

In certain circumstances (e.g. high depreciation of the national currency), foreign exchange differences should be capitalised to the value of assets in relation to which the expenses were incurred.

Non-taxable revenues

Moldovan tax law provides for the following main types of non-taxable revenues:

- Contributions to the capital of an entity.
- Income earned while benefiting from income tax incentives.
- Money received from special funds in the form of grants from government-approved programmes.
- Income from reversing impairment losses on depreciation of fixed and other assets.
- Income obtained under international projects and grants that contribute to the long-term development of education and research.

Foreign income

Resident legal entities are taxed on their worldwide income. The legal entities, under certain conditions, can benefit from tax credits provided under a double tax treaty (DTT) or can apply for unilateral tax credits against income tax paid in any foreign country if this income is subject to taxation in Moldova. Such tax credit shall not exceed the amount that would have been estimated at the CIT rate applicable in the given tax period. Otherwise, there is no specific tax deferral regime.

Deductions

As a general rule, expenses incurred by a company are deductible for CIT purposes only if they are deemed as ordinary and necessary, aimed at deriving taxable income, and justified with adequate supporting documentation.

The rate of deductible expenses for business purposes (ordinary and necessary) that are not adequately supported by necessary documentation is 0.2% from taxable income.

Depreciation and amortisation

Fixed assets are subject to CIT depreciation under the diminishing-balance method if their useful economic life exceeds one year and acquisition costs exceed MDL 6,000.

According to the fiscal law, fixed assets are divided into five categories of property. These categories are set out according to specific rules, mainly on the assets' useful life (i.e. the number of years during which the assets' utilisation generates economic advantages; the useful life for each type of depreciating asset is regulated by governmental decision). The depreciation rates vary as follows:

- First category (e.g. buildings): 5%.
- Second category (e.g. constructions): 8%.
- Third category (e.g. roads, certain equipment): 12.5%.
- Fourth category (e.g. industrial equipment): 20%.
- Fifth category (e.g. cars, computers, furniture): 30%.

Starting with 1 January 2018, taxpayers may opt for a new methodology for calculating fixed assets' depreciation for tax purposes. Thus, fixed assets evidence may be held for each asset in part by applying the straight-line method of depreciation and not for groups of assets. Starting with 2019, the new methodology shall be mandatory.

Intangible assets are subject to CIT amortisation according to the straight-line method. Moldovan tax law does not contain specific provisions regarding the useful life for intangible assets for tax purposes.

Goodwill

According to the National Accounting Standards, goodwill is not recognised as an intangible asset.

Start-up expenses

According to the National Accounting Standards, start-up expenses incurred by companies (e.g. stamp taxes paid upon company registration, drawing up of registration documents, manufacture of stamp) are not recognised as an intangible asset. Therefore, such expenses are to be treated as current expenses.

Interest expenses

Different CIT deductibility rules apply for interest on loans used for carrying out operational activities and for loans used for investment activities performed on an occasional basis.

As a general rule, deductions for interest expenses are allowed for CIT purposes, provided such expenses are deemed as ordinary and necessary for carrying out the activities of the business. Expenses should also be incurred for the purposes of obtaining taxable income and justified by adequate backup documentation.

If the interest paid by a Moldovan company relates to its operational or day-to-day activities, the related expenses are deductible for CIT purposes, taking into account the following:

- Interest expenses incurred by businesses, based on loan agreements, for the benefit of individuals and legal entities (except financial institutions, micro-financing organisations, and leasing companies) are deductible for CIT purposes within a specific limit established by law. Specifically, such interest expenses are deductible up to the limit of the average weighted interest rate on credit loans offered by banks to legal entities, depending on the period of the loan and its currency (e.g. different limits are applied for loans in Moldovan lei and those in foreign currency).
- If the loan is obtained for the purpose of acquiring/building fixed assets, the related interest expense should be capitalised to the initial fiscal value of such assets until they are put into exploitation. The deductibility of such interest expense is capped at the above limit. The excess difference is treated as a non-deductible expense for CIT purposes.

If interest relates to an investment activity, the interest expense is deductible for CIT purposes within the limit of the income derived from the investment.

Bad debt

Bad debts are deductible for CIT purposes, provided certain conditions are fulfilled and justifying documents are made available.

Charitable contributions

Charity and sponsorship expenses are deductible for CIT purposes if borne for the benefit of public authorities and public institutions financed from the state budget, as well as non-profit organisations and family-type foster homes within certain conditions, at up to 5% of taxable income.

Fines and penalties

Fines and penalties related to CIT, related to other taxes and due payments to the state budget, or for violations of legal acts are not deductible for CIT purposes.

Taxes

CIT incurred in line with requirements of the Moldovan tax law is not deductible for CIT purposes.

Other taxes are generally deductible for CIT purposes, except those paid on behalf of another person.

Other significant items

Among others, the following expenses are also generally deductible for CIT purposes:

- Research and development (R&D) expenses incurred during the fiscal year as current expenses, should certain conditions be met.
- Business trip expenses, protocol expenses, and expenses on insurance of business entities, within the limits approved by the government.
- Waste, spoilage, and perishability expenses, within the threshold approved by the company's manager.
- Leasing companies are allowed to deduct provisions to cover claims related to non-recovery of lease rates and interest rates up to 5% from the weighted average balance from the account receivables, provided certain conditions are met.
- Financial institutions are allowed to deduct loss loan provisions of assets and conditional commitments calculated according to International Financial Reporting Standards (IFRS).
- Micro-finance organisations are allowed to deduct loss loan provisions calculated according to requirements established by the National Commission on the Financial Markets.

Non-deductible expenses

Among others, the following expenses are generally not deductible for CIT purposes:

- Expenses not adequately supported by necessary documentation, except the 0.2% rate *as mentioned above*.
- Provisions, except for financial institutions, micro-finance organisations, and leasing companies *as mentioned above*.
- Losses incurred from transactions between affiliated parties.

Fiscal losses

Fiscal losses may only be carried forward for five consecutive years following the year the losses were incurred, provided the company records taxable income. If the company recorded fiscal losses for more than one year, such losses are carried forward in the order in which they arose. Fiscal losses are recorded on off-balance-sheet accounts.

Losses may not be carried back.

Payments to foreign affiliates

A Moldovan legal entity generally may deduct expenses related to payments to foreign affiliates to the extent that these amounts were actually paid and are not in excess of what it would have paid to an unrelated entity (i.e. arm's length). However, the payer is required to hold documentary evidence for the actually performed transactions. Still, certain types of expenses may follow general rules of deductibility that would limit their amount (e.g. interest expenses on loan agreements).

Group taxation

Moldovan tax law does not provide for group taxation.

Transfer pricing

Currently, transfer pricing regulations in Moldova are at an initial development stage. Formal transfer pricing documentation requirements might be introduced in the Moldovan tax law in the near future.

Moldova is currently not an Organisation for Economic Co-operation and Development (OECD) member country, and the domestic law does not provide for any reference to the possibility of applying the OECD Transfer Pricing Guidelines.

As a general rule, under Moldovan tax provisions, transactions concluded between related persons are taken into consideration only if the interdependence of these persons does not influence the outcome of the transaction. The arm's-length principle applies to transactions with both resident and non-resident related parties.

With reference to the transactions carried out by Moldovan companies with related parties, Moldovan tax law provides the following specific provisions:

- No deduction is allowed for losses incurred on the sale or exchange of property, performance of work, or supply of services between related parties, carried out either directly or through intermediaries (regardless of whether the transaction price corresponds to the market value).
- No deduction is allowed for expenses incurred in relation to related parties if no justification is available for payments and if such expenses do not represent necessary and ordinary business expenses.

In accordance with Moldovan tax law, a company is considered the taxpayer's related party if one of the following conditions exists:

- The company controls the taxpayer.
- The company is controlled by the taxpayer.
- Both the company and the taxpayer are under common control of a third party.

From a tax perspective, control is the ownership (either directly or through one or more related persons) of 50% or more in value of the capital or voting power of one of the companies. For this purpose, an individual will be treated as owning all equity interest that is directly or indirectly owned by members of one's family.

Two individuals are related parties if they are spouses or relatives up to the fourth degree.

Thin capitalisation

Moldovan tax law does not provide for a specific thin capitalisation regime.

The deductibility of interest expenses follows the deductibility regime as described under Interest expenses in the Deductions section.

Controlled foreign companies (CFCs)

Moldovan tax law does not contain CFC provisions.

Tax credits and incentives

Foreign tax credit

Income tax paid in any foreign country, if this income is subject to taxation in Moldova, is allowed for tax credit, provided that the taxpayer submits a document that justifies payment (withholding) of the income tax outside of Moldova, certified by the competent body of the respective foreign country, with its translation into the state language.

The amount of tax credit for any taxable year should not exceed the amount that would have been estimated at the rate applicable in Moldova with regard to this income.

A tax paid in a foreign country should be creditable for the year in which the income is taxable in Moldova.

Free entrepreneurial zones (FEZs)

FEZs are territories where domestic and foreign investors can carry out entrepreneurial activities on preferential terms (i.e. favourable tax, customs, visa, and other regimes). There are currently seven FEZs in Moldova.

The following types of activities may be carried out in an FEZ:

- Production of goods preferentially for export, excluding alcohol and alcoholic products.
- Sorting, packing, marking, and other similar operations of goods transiting the customs territory of Moldova.
- External commercial activities.
- Other supportive activities.

There is also an international free port (Giurgiulesti International Free Port) and airport (Marculesti International Free Airport) with status similar to FEZs that can benefit from specific tax and customs incentives.

FEZ incentives

For the 2018 year, the following CIT incentives for FEZ investors have been maintained:

- Entities that are established in the FEZ and export goods and services from the FEZ outside the customs territory of Moldova or deliver the produced goods to other FEZ residents for goods to be exported are entitled to apply only 50% of applicable CIT rate on such gains. For other cases, the CIT rate is 75% of the established one.
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to

other FEZ residents for goods to be exported is CIT exempted for a period of three years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least 1 million United States dollars (USD).
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for a period of five years, provided that the FEZ residents invested in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital equivalent to at least USD 5 million.
- The income obtained from export of goods (services) originating from the FEZ outside the customs territory of Moldova or from supply of the produced goods to other FEZ residents for goods to be exported is CIT exempted for an additional period of time, provided that the FEZ residents performed additional investments in the fixed assets of their enterprises and/or in development of the infrastructure of the FEZ capital (under certain conditions).

From a VAT standpoint, goods and services supplied in the FEZ from abroad, from the FEZ outside the customs territory of Moldova, in the FEZ from other areas of Moldova, and those supplied to residents of other FEZs are VAT exempted with the right to deduct (with some exceptions).

According to the customs provisions, goods are introduced into the FEZ with no VAT or customs duty and are not subject to economic policy measures, according to specific criteria. However, certain taxes in specific situations might be incurred by residents of the FEZ. Investors in the FEZ are guaranteed and protected from changes in legislation for a general period of up to ten years, while under certain conditions this period may be extended to 20 years.

Law on information technology (IT) parks

Starting 1 January 2017, a new law on IT parks entered into force. The law provides for certain tax incentives for the IT parks' residents.

Under this law, residents of the parks could be legal persons or individuals registered in the Republic of Moldova as conducting entrepreneurial activity that carry out as their principal activity one or more of the following activities:

- Custom software activities (client-oriented software).
- Computer games editing activities.
- Editing activities of other software products.
- Management activities (management and exploitation) of calculation means.
- Data processing, webpage administration, and other related activities.
- Web portal activities.
- IT consulting activities.
- Other IT services related activities.

In this context, the principal activity is that which generates 70% of a park resident's sales income.

The residents of the parks will pay a single tax that includes:

- CIT.
- PIT.

- Mandatory social security contributions due by employers and employees.
- Mandatory health insurance contributions due by employers and employees.
- Local taxes.
- Tax on immovable property.
- Road tax applied to vehicles registered in Moldova.

The single tax of 7% of sales income, but not less than the minimum amount due per employee, is to be calculated and paid monthly by each park resident. The minimum amount of single tax per employee is set at 30% of the national average forecasted salary for that year (e.g. MDL 6,150 for 2018).

The employees of park residents will be granted all types of social insurance benefits established by the law. The insured monthly income when determining those benefits will be 60% of the national average forecasted salary for that year (e.g. MDL 6,150 for 2018).

Withholding taxes

Residents

Resident legal entities making payments to individuals (other than salary payments) must withhold and pay WHT to the MTA at the following rates:

- Preliminary WHT:
  - 7% preliminary withholding of payments made for the benefit of resident individuals, unless such payments are tax exempt.
  - 15% preliminary withholding from interests.

  The beneficiary deducts (i.e. recovers) the amount of preliminary WHT from annual income tax due.

- Final WHT:
  - 10% final withholding of an individual's income derived from leasing, rent, and usufruct of movable and immovable property.
  - 6% final withholding of dividends paid out to individuals, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
  - 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
  - 5% from payments performed for the benefit of individuals, other than individual entrepreneurs and farmers, on income obtained from supplying phytotechnical, horticultural, and zootechnical products, except natural milk.
  - 10% from payments performed for the benefit of individuals, other than individual entrepreneurs and farmers, on income obtained from supplying goods through consignments trade units.
  - 18% from winnings from promotional campaigns, on each win value exceeding the personal allowance (i.e. MDL 11,280).
  - 18% from gambling winnings, except winnings from lotteries and sport bets.

  The tax charged to residents under this paragraph is a final one and exempts the recipient of such income from including it into gross income, as well as from declaring it.

The following tax treatment applies to royalty payments to residents:

- Practicing entrepreneurial activity: No WHT at source is applied.
- Resident individuals: A final WHT of 12% is applied, without including such income in the gross income of individuals (except royalty income of individuals aged 60 and over in the field of literature and art).

Also, earnings from promotional campaigns are considered non-taxable income sources if the value of each does not exceed the personal allowance (MDL 11,280 in 2018). Earnings from lottery and sports betting are considered non-taxable, irrespective of the amount earned.

Non-residents

The following WHT rates apply upon payments to non-residents:

- 6% for dividend payouts, except for dividends for the profits received between 2008 and 2011, for which the WHT rate is 15%.
- 15% from the amount withdrawn from the share capital related to the increase arisen from the distribution of net profit and/or other sources identified as equity among shareholders (associates) throughout the 2010 to 2011 fiscal period, in accordance with the share capital venture quota.
- 12% for other revenues.

Double tax treaties (DTTs)

The DTTs in force between Moldova and other countries may provide for more favourable tax rates than those provided by the local provisions. For their application, the foreign beneficiary of such income should provide the paying entity with its fiscal residency certificate before the payments are actually made. The Moldovan tax law expressly provides that the DTTs prevail over the national provisions. The only exception refers to the case where the domestic norms provide for more favourable tax rates (i.e. in such circumstances, the domestic ones shall apply).

Currently, Moldova has 48 operational DTTs, as outlined below:

	WHT * (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	6/15 **	12	12
Treaty:			
Albania	5/10	5	10
Armenia	5/15	10	10
Austria	5/15	5	5
Azerbaijan	8/15	10	10
Belarus	15	10	15
Belgium	15	15	0
Bosnia and Herzegovina	5/10	10	10
Bulgaria	5/15	10	10
Canada	5/15	10	10
China	5/10	10	10
Croatia	5/10	5	10
Cyprus	5/10	5	5
Czech Republic	5/15	5	10
Estonia	10	10	10

Recipient	WHT * (%)		
	Dividends	Interest	Royalties
Finland	5/15	5	3/7
Germany	15	5	0
Greece	5/15	10	8
Hungary	5/15	10	0
Ireland	5/10	5	5
Israel	5/10	5	5
Italy	5/15	5	5
Japan	15	10	0/10
Kazakhstan	10/15	10	10
Kuwait	0/5	2	10
Kyrgyzstan	5/15	10	10
Latvia	10	10	10
Lithuania	10	10	10
Luxembourg	5/10	5	5
Macedonia	5/10	5	10
Malta	5	5	5
Montenegro	5/15	10	10

Turkey	10/15	10	10
Turkmenistan	10	10	10
Ukraine	5/15	10	10
United Kingdom	0/5/10	0/5	5
Uzbekistan	5/15	10	15

* If multiple rates are listed, then the WHT rate to be applied is subject to fulfilment of specific criteria provided by the DTT.

** 15% on dividends referring to the profit earned incurred during the period 2008 to 2011.

Tax administration

Taxable period

The tax year for CIT purposes is the calendar year. For new business entities, the fiscal year is considered the period beginning with the registration date until the end of the calendar year. Starting with 2017, certain taxpayers have the right to choose a tax period different from the calendar one.

For WHT and VAT purposes, the fiscal period is the calendar month starting the first day of the month.

Tax returns

An annual CIT return must be submitted to the MTA by 25 March of the year following the reporting year.

WHT and payroll liabilities must be declared and settled monthly, no later than the 25th day of the month following the reporting one.

Farming enterprises and individual entrepreneurs with an annual average number of employees not exceeding three and not registered as VAT payers must submit a unified annual tax return, provided certain conditions are met.

Companies that have, according to the average number of employees recorded in the previous year, more than five people employed under individual employment agreements or other contracts have to submit their tax returns by using automated methods of electronic reporting.

IT park residents must submit the single tax return to the MTA by the 25th day of the month following the reporting one. Such reporting is done electronically.

Adjusted tax returns

Taxpayers who discover that the tax return previously submitted contains an error are able to submit an adjusted tax return, provided that no written decision was issued by the tax authority in order to initiate a tax audit and the related tax period is not covered by a tax control.

Late interest payments will not be applicable in amounts higher than the tax liability resulting from the adjusted tax return submitted, and no fines will be applicable if the tax duties are paid before the announcement of a tax audit.

A fine will not apply in certain circumstances of fiscal violations specified by law, and, if already established, it will be entirely cancelled if no additional tax liabilities arise.

Companies that have miscalculated the taxes, and this was not detected in the previous tax audit, are absolved from fines and late interest payments for violations identified within the repeated tax audit.

Companies keeping the accounting records and preparing financial reports under IFRS or under the National Accounting Standards will not be fined for violation of accounting and record keeping for a period of up to two years from the date of implementation (transition) to those standards in case such violation represents an obstacle for performing tax audit.

Payment of tax

Taxpayers must declare and pay the applicable CIT by 25 March of the year following the reporting year. Taxpayers are also required to pay interim CIT, no later than 25 March, 25 June, 25 September, and 25 December, amounts equal to 25% of either the total estimated value of the CIT due for the current fiscal period or the total value of the calculated CIT for the previous fiscal period.

Fines and penalties

The MTA is entitled to apply a fine of 30% of the diminished tax liabilities (including CIT ones).

Under the tax law, the MTA is entitled to apply a fine in the amount of the undeclared tax if it is a result of tax evasion.

Taxpayers who settle amounts as assessed by the MTA within three business days and have no other outstanding liabilities may benefit from a 50% reduction of the fines applied by the tax authorities.

In addition, certain special provisions regarding tax evasion apply. The term 'tax evasion' is defined under Moldovan tax law as diminishing the tax liabilities by more than MDL 75,000 by means of including in accounting, tax, or financial documents deliberately distorted data on income or expenses or by hiding other objects of taxation. Should the amount of the tax due exceed MDL 75,000, the tax evasion is regarded as a criminal offence. According to the Moldovan Criminal Code, legal entities can be punished for tax evasion with a fine up to MDL 300,000 and preclusion from performing certain activities or winding-up.

Among the most important fines and sanctions for non-compliance with applicable tax law, the following are worth mentioning:

- The fine for the performance by the taxpayer of an economic activity with the issuance of a bill without using the existing cash register is MDL 5,000 (other fines might also be applied for non-compliance with rules related to use of cash registers).
- The fine for the failure to provide the VAT invoice in accordance with the tax law is MDL 3,600 for each VAT invoice but capped to MDL 72,000. The same fines are applicable for failure to register the fiscal invoice in the general electronic register managed by the tax authorities.
- The fine for hindering the execution of a tax audit by not providing access to production, storage, commercial, or other facilities is MDL 10,000.
- The fine for submitting a tax return containing unauthentic information is MDL 1,000 for each tax return, capped to MDL 7,000.

Tax audit process

The rules governing the tax audit process are stated in the tax code. Generally, the tax audit duration and frequency depends on its type. For instance, a tax audit performed at the taxpayer premises should not exceed two months (with some exceptions) and should be performed no more than once per year for the same taxes and duties, except for specific circumstances provided by law.

Also, a tax audit can be performed on a more frequent basis within certain specific circumstances (e.g. refund of VAT and other taxes, reorganisation).

A repeated tax audit for already audited periods can be performed in a number of cases, for instance:

- In case the results of previous controls are inconclusive, incomplete, or not satisfactory.
- If certain circumstances are identified that attest to the existence of tax infringements.

- In case of reorganisation or liquidation.

Statute of limitations

Under the general tax rule, the Moldovan tax authorities can assess tax liabilities no later than four years after the last date established for the submission of the relevant tax report or for the settlement of that tax liability (if submission of the tax report is not required). This limitation term does not apply in case of tax-related crimes or non-submitting of the corresponding tax returns.

Topics of focus for tax authorities

There are no specific topics of focus for the tax authorities. Generally, it depends on the nature of the taxpayer and the specifics of the activity it performs. The main criterion for selection of a company to be subject to a tax audit is a risk based one.

In addition, tax authorities are currently focused on promoting voluntary compliance of the taxpayers.

Rulings

From 2017, the concept of advanced binding ruling has been introduced in the Moldovan tax law.

The binding ruling under the Moldova tax law represents an administrative act issued by the MTA in order to solve claims submitted by individuals and legal entities that perform entrepreneurial activity, regarding the applicability of the tax legislation on the future specific situations and/or transactions. The anticipated individualised tax ruling is mandatory for MTA and other entities with tax administration attributions, provided certain conditions are met. The procedure of issuing and rejecting of advanced binding rulings is to be determined by the Ministry of Finance.

The law also provides for the possibility of obtaining comfort letters. Taxpayers that inadequately computed tax liabilities due to incorrect written explanations issued by the MTA may not be subject to sanctions (i.e. fines and late-payment penalties). Tax liabilities may still be recomputed by the MTA. Written explanations are issued by the MTA free of charge and may remain valid for an indefinite period of time, unless cancelled by new legislation or other rulings. Such explanations are generally issued by the Moldovan competent authorities during a period of up to one month.

Other issues

The legislation and the approach of the state authorities in Moldova related to corporate taxation have been and are expected to be subject to changes. Moreover, based on the publicly available sources, the Ministry of Finance intends to redraft the Moldovan Tax Code.

Taxpayers should seek professional advice on specific issues, given that only limited interpretations have been issued by the MTA.

US Foreign Account Tax Compliance Act (FATCA)

On 30 June 2014, the US Treasury announced that an intergovernmental agreement (IGA) was ‘in effect’, and, on 26 November 2014, the US Treasury and Moldova signed the Agreement for Cooperation to Facilitate the Implementation of FATCA, based on

IGA Model 2. Currently, Moldova applies FATCA requirements. The FATCA agreement was ratified by the Republic of Moldova Parliament on 10 December 2015.

Association Agreement with the European Union

As of 27 June 2014, the Republic of Moldova ratified the Association Agreement with the European Union. In this respect, a number of legislative changes have started to enter into force in a gradual way in order to harmonise local legislation with EU legislation (primarily in the area of indirect taxation).

Significant developments

Currently, the Mongolian government is in the process of introducing new tax legislations, which are in public discussion. These laws are expected to be implemented in 2019. Specific changes and updates will be provided when more information is available.

Introduction of 'ultimate holder' concept for tax purposes

The Parliament of Mongolia amended the General Taxation Law of Mongolia and other several laws on 9 December 2017. Under these amendments, a concept of an 'ultimate holder' of a legal entity is newly introduced for tax purposes. Any change of ultimate holders of a legal entity that maintains a mining licence or land-use (or possess) right is deemed as a sale of its mining licence or land-use right and subject to a 30% corporate income tax (CIT).

Taxes on corporate income

Mongolian resident economic entities are taxable on aggregate annual income earned worldwide. Non-resident economic entities carrying out business activities in Mongolia are taxable on the income earned in the territory of Mongolia and from Mongolian sources.

Mongolian CIT is levied at the following rates, using a progressive-rate scale that ranges from 10% to 25%, as follows:

- 10% applies to the first 3 billion Mongolian tugrik (MNT) of annual taxable income.
- 25% applies to any excess of MNT 3 billion of annual taxable income.

However, the income described in the chart below is excluded when determining the annual taxable income and is taxed at different tax rates on a gross basis:

Source of income	Applicable tax rate (%)
Dividends	10
Royalties	10
Interest	10
Gambling, betting games, and lotteries (net)	40
Sale of immovable property	2
Sale of rights (e.g. mining licences, special activity licences, and other rights granted by the authorised organisations for conducting specific activities)	30

'Ultimate holder'

With the introduction of the amendment to the General Taxation Law of Mongolia, a concept of an 'ultimate holder' of a legal entity is newly introduced for tax purposes.

Any change of ultimate holders of a legal entity that maintains a mining licence or land-use (or possess) right is deemed as a sale of its mining licence or land-use right and subject to a 30% CIT. Importantly, a tax obligation is imposed on the legal entity holding such rights, but not the person who earns the income from the transaction.

'Ultimate holder' refers to the following types of persons who exercise control over management and assets of a legal entity, directly or indirectly, with a chain of ownership at one or more levels of legal entities through a number of shares, percentage of participation, or a number of voting rights:

- Holders of a majority of voting rights of a legal entity.
- Holders of a majority number of shares or shares with the highest market value of a legal entity.
- Similar others.

Assessing taxable income

In general, taxable income shall be assessed based on the value of rights pro-rated to the number of shares or percentage of participation that are transferred from a right-holding entity or its ultimate holders. For the purpose of certainty, the Ministry of Finance passed the Decrees No. 379 and 380, dated 25 December 2017, which set the following methodologies to assess taxable income:

- Methodology to assess and impose taxes on income from sales of the right to use or possess land (Decree No. 379).
- Methodology to determine the value of mining licences and assess taxes on income from transfer of mining licences (Decree No. 380).

Penalties

Breach of the above-mentioned legislative requirements (including failure to comply with requirements for assessing taxes, reporting and/or concealing relevant documents and information, and providing false documentation for tax purposes) shall be subject to cancellation of the respective rights (a mining licence and/or the respective right to use or possess land).

Local income taxes

CIT is levied at the state level in Mongolia. There are no provincial or local corporate income taxes.

Corporate residence

A resident legal entity is an economic entity formed under the laws of Mongolia or a foreign economic entity that has its place of management in Mongolia. There has not been further development of this concept, so it cannot be assumed that the standard place of effective management or control test will apply.

A non-resident company is a foreign economic entity that conducts its business in Mongolia and earns income from Mongolian sources.

Permanent establishment (PE)

Although there is a theoretical possibility to establish a branch of a foreign entity in Mongolia, it is currently not practically possible due to uncertainties in the law related to the legal status of such entity, filing procedures, etc.

It is also possible to register a non-resident PE in Mongolia with the tax authorities, but practically, only for foreign entities from countries that Mongolia has double tax treaties (DTTs) with. However, neither the legal status nor respective taxation rules are clear. According to the draft law on CIT, which is under public discussion at the moment, the time threshold for PE creation can be three months.

Other taxes

Value-added tax (VAT)

According to the VAT Law, a person (covering legal entities, individuals, and PEs) whose sales income has reached MNT 50 million or more has to be registered as a VAT withholder. The threshold for voluntary registration is MNT 10 million of sales income. A sale of fixed assets is not considered for the VAT registration thresholds.

VAT at the rate of 10% is imposed on the supply of goods, services, and works imported, exported, and sold in Mongolia.

One of specific features of the Mongolian VAT legislation is that works and services received from a non-resident (irrespective of whether they are supplied in Mongolia or not) are subject to VAT under the reverse-charge procedure (the RC VAT).

Customs duty

A customs tariff varies between 5% and 40% depending on the type of goods imported into Mongolia, except for gas condense, petroleum oils, crude, oils obtained from bituminous minerals, automatic data processing machines, electrical machinery, equipment and parts, medical equipment, and pure-bred livestock, which are zero-rated.

Export duties apply to certain exported goods, such as unprocessed camel wool, wood, and wooden materials.

Excise tax

Excise tax is levied on goods manufactured in or imported into Mongolia, such as tobacco, alcohol, gasoline and diesel fuel, and passenger vehicles. Excise tax is also levied on the physical units of special-purpose technical devices and equipment used for betting games and gambling and on the activities of individuals and legal entities that conduct such activities. Currently, the excise tax rate on the goods such as alcohol and tobacco varies between MNT 320 and MNT 19,140 per 1 litre of alcohol and 100 cigarettes of tobacco, and it will be increased by 5% in 2019 and 4% in 2020 and later years. For special-purpose technical devices and equipment, it varies between MNT 4.35 million and MNT 116 million per unit according to the origin and type.

The excise tax rates for gasoline and diesel that are produced in Mongolia are as follows:

- Gasoline:
  - MNT 0 to MNT 15,950 per tonne (up to 90 octane).
  - MNT 0 to MNT 17,400 per tonne (above 90 octane).
- Diesel: MNT 0 to MNT 21,750 per tonne.

For imported gasoline and diesel, the excise tax rates vary between MNT 0 and MNT 850,000, depending on the port of import.

Excise tax for imported automobiles varies between MNT 375,000 and MNT 65,975,000, depending on the year of production, type of automobile, and engine capacity.

Immovable property tax

Immovable property tax is an annual tax that varies between 0.6% and 1%, depending on the decisions made by the local representatives' committee, on the value of the immovable property that is owned. For tax purposes, the value used is the value registered with the government registration authority. If the property is unregistered, the insured value is used. In the absence of either a registered or insured value, the accounting value is used.

This tax does not apply to property of legal entities that are financed through the state budget, to any dwelling houses, or to any public nature buildings and construction.

Transfer taxes

Mongolia does not have a separate transfer tax. Transfer of certain rights (like land possession or usage rights and mining licences) is treated as sale of right and taxed at 30% under CIT law (*for more details, please refer to the Taxes on corporate income section*). For individuals, transfer of a land right is subject to 10% under personal income tax (PIT) law.

In the case of transfer of property, stamp duty will be applied.

Stamp duty

Under the Law of Mongolia on State Stamp Duties, there are 45 types of activities subject to stamp duties, including the following:

- Settlement of a legal dispute by a court.
- Court involvement in arbitration.
- Notary services.
- Consulate services.
- State registration services for legal entities.
- Registration services for foreign invested economic entities and representative offices of foreign organisations.
- Other specific activities that need permissions and rights from the state authorities.

The amount of duty varies depending on the types of services or activities involved.

Payroll taxes

There are no payroll taxes applicable for the employer other than social insurance contribution by employer (*see below*). The employer should withhold PIT at 10% or 20% from employees' employment income (10% rate is applied for Mongolian tax residents, whereas 20% rate is applied for tax non-residents) and submit PIT returns electronically on a quarterly basis.

Social insurance contribution by employer

Employers' social insurance contribution depends on the industry type and is subject to rates between 12% and 14%, which is comprised of 8% for pension, 1% for benefits, 2% for health, 0.2% for unemployment, and 0.8% to 2.8% for industrial accident and occupational disease insurance. Employer charges are not capped. Social insurance taxes paid by employers are deductible in determining taxable income.

The employer should also withhold social insurance taxes (10%) from employees and submit returns electronically and by paper before the 5th day of the following month on a monthly basis. Payments should be made before the end of the month to the social insurance fund account.

Fees and taxes applicable to the extractive industry

A range of fees and other taxes are payable for activities in the extractive industry. The primary ones include the following:

- Mining License Fee that is agreed to up front and stated in the mining licence.
- Mining Royalty Tax.
- Water Pollution Fee.
- Air Pollution Fee.
- Land Use Fee.
- Natural Resources Usage Fee.

Branch income

The repatriation of profits from branches of foreign legal entities is subject to branch profits tax at a rate of 20%.

Please note that it appears it is no longer possible for foreign legal entities to establish a branch in Mongolia. However, the above provision remains in place for branches that were previously established in Mongolia.

Income determination

Inventory valuation

There is no specific provision in the tax law for inventory valuation.

Capital gains

Capital and ordinary transactions are treated in the same way for tax purposes (i.e. included in annual taxable income). An exception is provided for income from sales of immovable property, which is subject to tax of 2% on gross sales proceeds.

In terms of tax base, taxation rules of capital gains of non-residents is not clear. The CIT Law could be interpreted in a way that the net gain from disposal of shares in a Mongolian company should be subject to CIT. However, since there was no mechanism in practice for non-resident companies to declare income in Mongolia and show the basis for the taxable gain, only withholding tax (WHT) (20% on the gross payment) charged at source of payment is available. With the introduction of an 'ultimate holder' concept, applicable from 1 January 2018, under the general rule, the Mongolian entities whose shares are traded will act as withholding agents to report and withhold the taxes of non-resident income from sale of its shares when there is a mining licence or a land right attached to the shares. Except for cases with mining licences and land rights, no mechanism for taxation of capital gains currently exists if the transaction takes place between two non-residents that have no taxable presence in Mongolia.

Dividend income

Dividend income earned by a Mongolian resident entity is subject to WHT of 10%. Dividend income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Interest income

Interest income is subject to a special income tax of 10%. Interest income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Rental income

Rental income is included in taxable income for tax determination.

Royalty income

Royalty income is taxed at a special rate of 10%. Royalty income to be remitted out of the country to a foreign tax resident is subject to WHT at 20% but may be reduced by an applicable DTT.

Partnership income

There is no transparent partnership concept in Mongolia. Partnership income is treated as income of a legal entity and is subject to CIT.

Unrealised currency exchange gains/losses

Unrealised currency exchange gains are not considered as taxable income, and, at the same time, unrealised losses are not deductible from taxable income.

Foreign income

Mongolian legal entities pay tax on their worldwide income. Unremitted earnings are taxed the same as ordinary earnings.

Credit relief is available with respect to foreign tax on income arising from countries that have DTTs with Mongolia, capped at the level of Mongolian tax that would have been due on the same income in Mongolia.

Deductions

Expenses mostly associated with generating aggregate annual income are deductible for CIT purposes (provided proper documentation is in place), and a list of these expenses is provided in the legislation. Expenses not on this list are not deductible.

Accrued expenses

Accrued expenses are deductible only if they are supported by valid documentation.

Contingent liabilities

Contingent liabilities are not deductible.

Depreciation and amortisation

Depreciation of fixed assets and amortisation of intangibles are deductible within the limits provided in tax legislation. A straight-line method is used and the years of usage are determined for tax purposes.

Non-current asset class		Useful life (in years)
1	Building and construction	40
2	Machinery and equipment	10
3	Computer, computer parts, and software	3
4	Intangible asset with undefined useful life	10
5	Intangible asset with defined useful life (includes licence for mineral exploration and extraction)	Period in force
6	Other non-current asset	10
7	Building and facilities of manufacture, management of technology park, unit production, and buildings within technology park	20
8	Machineries, mechanism, equipment, technical parts of manufacturing within the management technology park, unit production, and technology park	3

Goodwill

There is no specific provision in the tax law regarding the deductibility of goodwill.

Organisational and start-up expenses

Organisational and start-up expenses are not deductible.

Interest expenses

Interest expenses are deductible. However, there are limits with respect to the deductibility of interest expense. *See Thin capitalisation in the Group taxation section for more information*.

Bad debt

Bad debt provisions are not deductible. There is no clear guidance in the tax legislation as to whether bad debt is deductible or not; however, in practice, the tax authorities disallow deductibility of bad debt.

Charitable contributions

Charitable contributions are not deductible, except for donations to the fund of vocational training.

Pension expenses

Compulsory pension insurance premiums paid to the Social Security Authority of Mongolia are deductible. Additional voluntary insurance premiums are deductible but shall not exceed 15% of taxable income. Pension provisions or internal pension fund expenses are not deductible.

Payment for directors

If a payment for directors is a salary payment on which social insurance and PIT is levied, it is considered as deductible.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not in the list of permitted deductions. Per anti-corruption law, monetary amounts involved with respect to such payments will be confiscated and criminal proceedings will be instituted.

Fines and penalties

Fines and penalties are not deductible for tax purposes.

Taxes

Certain taxes paid by a taxpayer, as well as social contributions of employers, are generally deductible for tax purposes.

Tax losses

Tax losses generally may be carried forward for up to two years. However, the annual amount of carried forward losses deductible from taxable income may not exceed 50% of the taxable income in the tax year.

Legal entities involved in the infrastructure and mining industries may carry forward 100% of their losses for up to four to eight years, depending on their investment period and based on government regulations.

There is no provision for the carryback of losses.

Payments to foreign affiliates

As a general rule, deductible expenses shall be supported by proper documentation. Deductibility of payments to foreign affiliates depends on the nature of the payment, as follows:

- Interest payments are deductible but with restrictions (i.e. thin capitalisation rule may apply, interest paid on loans for construction of buildings and installation of equipment needs to be capitalised during that period).
- Dividend payments are not deductible.
- Technical assistance service payments are deductible if applicable taxes were levied.
- Payments for other services are deductible if applicable taxes were levied.

Group taxation

There are no rules permitting grouping for tax purposes in Mongolia.

Transfer pricing

Transfer pricing provisions are addressed in the CIT Law and the General Tax Law of Mongolia.

Per the CIT Law of Mongolia, if the following relation is present with a taxpayer, then it is considered as ‘a related party’:

- Holds 20% or more of the common stock.
- Has the right to receive 20% or more of the dividends or distributions.
- Has the right to appoint 20% or more of the management of the economic entity or is otherwise able to determine its policies.

If related parties have sold or transferred goods, performed work, or rendered services among themselves below or above fair market value, the tax authority shall determine gross taxable income of such goods, work, and services based on value involving transactions of similar goods, work, and services among non-related parties.

The General Tax Law provides for a broader definition of related entities for transfer pricing purposes, which is "entities authorised to directly and indirectly participate in management, control, and property rights of any foreign and Mongolian legal entities". Per Article 48.3 of the General Tax Law, "if prices, payments, and fees (hereinafter the 'price') used in cooperative production, in the provision of technical services, in sending human resources, in purchase and sales transactions between related entities abroad and Mongolia are higher or lower than fair market value, then the fair market value method shall be used in order to determine taxable income".

Beginning from 2017, the Mongolian tax authorities introduced the rules strengthening the reporting requirements for transactions between related parties (transfer pricing rules). Under these reporting requirements, in particular, the affected Mongolian entities will need to disclose the very specific information, including the amount of income (profit) and/or expenses related to the covered related-party transactions, their profitability, transfer pricing methods applied, list of comparable entities used for a benchmarking study, etc. In case of non-submission/delay of submission of the transfer pricing report, there is an administration penalty (MNT 1.5 million).

Thin capitalisation

A thin capitalisation rule applies to direct shareholders, and interest paid in excess of the 3:1 debt-to-equity ratio is not deductible and is treated as a dividend. This is applied on an investor-by-investor basis as opposed to the company as a whole; no restriction applies to interest that is not paid to an investor.

Controlled foreign companies (CFCs)

There are no special CFC rules in Mongolia.

Tax credits and incentives

At present, the following types of incentives exist in Mongolia:

- Until 1 January 2021, a tax credit of 90% is available to a taxpayer conducting business activities in the following industries, provided annual/assessable income of a taxpayer does not exceed MNT 1.5 billion:
  - Agriculture, livestock industry, farming industry, and other auxiliary activities.
  - Food industry.
  - Fabric and clothing industry.
  - Construction materials industry.
- Tax stabilisation of certain taxes per investment made (*see below*).
- Interest on government notes payable (bonds) is exempt from CIT.

- Income earned from the production and/or sale of produced equipment and spare parts intended for the activities of small or medium-sized production businesses in the territory of Mongolia is exempt from CIT.
- Income earned from the sale of a technique or equipment that economises natural resources, reduces environmental contamination, and is nature-oriented is exempt from CIT.
- Tax losses incurred by a business entity involved in the infrastructure and mining sector in a given tax year shall be deducted from taxable income for four to eight consecutive years after such tax year. The period will depend on the size of the investment, as defined from time to time by the responsible government agency.
- In the event that a business entity or a citizen has been found to have made a donation of up to MNT 1 million to support non-governmental organisations founded by citizens having developmental disabilities, such amount shall be deducted from taxable income of such business entity or citizen for the given tax year.
- A 50% tax reduction is available from CIT for an economic entity that produces or grows the following products:
  - Cereal, potatoes, and vegetables.
  - Milk.
  - Fruits and berries.
  - Fodder plants.
- Free Trade Zones (FTZs) have a special regime in terms of tax and customs (*see below*).

Foreign investment incentives

The Law on Investment provides tax incentives, including exemptions from tax, tax credits, possibility to use accelerated depreciation for tax purposes, tax loss carryforward, and deduction of employee training costs from taxable income.

Tax stabilisation

The Law on Investment also provides a 'stabilisation certificate' in order to create a more stable tax environment in Mongolia. By obtaining a stabilisation certificate, investors can stabilise applicable rates of the following taxes:

- CIT.
- Customs duties.
- VAT.
- Minerals royalties.

The holder of a stabilisation certificate can stabilise tax rates for a period from 5 to 18 years, depending on amount of investment, industry of investment, and geographic location of investment in Mongolia (*see Stabilisation certificate terms below*). Under the valid period of a stabilisation certificate, investors also have the right to apply effective tax rates provided in general legislation if such rates are more beneficial for investors.

The criteria of issuing a stabilisation certificate are:

- the total investment amount specified in the business plan and feasibility study reaches thresholds specified in the stabilisation certificate terms (*see below*)
- an environmental impact assessment should be carried out
- the investment should create new permanent jobs, and
- the investment should introduce innovative technology.

An investor who made an investment in tobacco and alcohol related activities cannot benefit from tax stabilisation.

If certain conditions are met, the stabilisation certificate period may be extended by 1.5 times for some projects.

The conditions are that the projects:

- produce products that substitute for imported products or export-oriented products that are important for the long-term social and economic development of Mongolia, that will require investment of more than MNT 500 billion, and have a development period of more than three years, or
- produce value-added, processed products for export.

In addition to above, the law provides for incentives with respect to customs duty (exemption) and VAT (zero-rate) on imported equipment and machinery during the construction period of specific projects, as below:

- Construction of a factory for processing construction materials, petroleum, agricultural products, and products intended for export.
- Nano, bio, and innovation technology plant construction.
- Construction of power plants and railroads.

Stabilisation certificate terms

For the mining, heavy industry, and infrastructure sectors, a stabilisation certificate is issued as follows:

	Stabilisation certificate terms (years)					
Investment amount (MNT in billions)	Ulaanbaatar Region	Central Region (Gobisumber, Dornogobi, Dundgobi, Darkhan-Uul, Umnugobi, Selenge, Tuw)	Khangai Region (Arkhangai, Bayankhongor, Bulgan, Orkhon, Uwurkhangai, Khuwsgul)	Eastern Region (Dornod, Sukhbaatar, Khentii)	Western Region (Bayan-Ulgii, Gobi-Altai, Zawkhan, Uws, Khowd)	Period within which investment must be made (years)
30 to 100	5	6	6	7	8	2
100 to 300	8	9	9	10	11	3
300 to 500	10	11	11	12	13	4
more than 500	15	16	16	17	18	5

For any other sector, a stabilisation certificate is issued as follows:

Investment amount (MNT in billions)						
Ulaanbaatar Region	Central Region (Gobisumber, Dornogobi, Dundgobi, Darkhan-Uul, Umnugobi, Selenge, Tuw)	Khangai Region (Arkhangai, Bayankhongor, Bulgan, Orkhon, Uwurkhangai, Khuwsgul)	Eastern Region (Dornod, Sukhbaatar, Khentii)	Western Region (Bayan-Ulgii, Gobi-Altai, Zawkhan, Uws, Khowd)	Stabilisation certificate terms (years)	Period within which investment must be made (years)
10 to 30	5 to 15	4 to 12	3 to 10	2 to 8	5	2
30 to 100	15 to 50	12 to 40	10 to 30	8 to 25	8	3
100 to 200	50 to 100	40 to 80	30 to 60	25 to 50	10	4
more than 200	more than 100	more than 80	more than 60	more than 50	15	5

Free Trade Zones (FTZs)

Establishing FTZs

According to the FTZ Law, FTZs can be established not only at the border ports but also in qualifying regions proposed by the government. The Parliament will decide the proposed plan.

FTZs are under state protection. A joint free border trade zone covering multiple countries' borders can be established and will be regulated through international agreements between the governments.

Tax and customs regime

CIT

Businesses that have invested 500,000 United States dollars (USD) or more in the FTZs operating to improve infrastructures, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

For businesses with more than USD 300,000 invested in building warehouses, loading and unloading facilities, hotels, tourist camps, or manufacturers of export and import-substituted goods in the FTZ shall receive a CIT discount equal to 50% of their invested capital in the FTZ.

Loss-making entities in the FTZs can carry forward their losses reflected on their CIT return up to five years from the time of becoming fully operational to reduce their future tax payable.

Entities using innovated and enhanced technology in their businesses shall be fully exempted from CIT for the first five years from the time of starting operation in the FTZs.

VAT

Goods imported to the FTZs are not subject to VAT. If goods are to be transferred from the customs territory to the FTZs, there will also be no VAT on those goods, and any previously paid VAT will be reimbursed accordingly based on related documents.

There will be a 0% rate on VAT for domestic goods to be transferred from the customs territory to the FTZs.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers' personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from VAT when entered into the customs territory.

There will be no VAT imposed on goods and services manufactured and sold by registered individuals and businesses in the FTZs.

Customs and excise taxes

Goods imported to the FTZs are not subject to customs and excise taxes. If goods are to be transferred from the customs territory to the FTZs, there will be no customs and excise taxes on those goods, and any of these taxes previously paid will be reimbursed accordingly based on related documents.

In addition to purchases per Article 38.1.4 of the Law on Custom Tax and Tariff (which refer to goods for passengers' personal use), purchases in the FTZ of up to MNT 3 million made by passengers are exempt from customs tax when entered into the customs territory.

Any goods, except purchases made by passengers as mentioned above, are subject to customs and related taxes as required in the regulation when transferred from the FTZs to the customs territory.

Goods exported from the FTZs are not subject to taxation.

Land payments and property taxes in the FTZ

Individuals and businesses may request a land possession and usage right in the FTZs through either project bid or auction.

Entities operating in trade, tourism, and hotel sectors in the FTZs are fully exempted from land possession and usage right payment for the first five years from commencement of operation. This payment is further reduced up to 50% for the following three years.

Businesses operating to improve infrastructures in the FTZs, such as energy and heating sources, pipeline networks, clean water supplies, wastewater sewage, auto roads, railways, airports, and basic communication lines, will be fully exempted from land payment for the first ten years from start of operation.

Buildings and facilities built and registered in the FTZs are fully exempted from the immovable property tax.

Foreign tax credit

A foreign tax credit is available for foreign taxes paid up to the amount of the Mongolian tax liability that would have been due on the same amount based on an applicable DTT.

Withholding taxes

Dividends, interest, and royalties paid, and payments made for goods sold and work/services provided (directly or electronically), to non-residents are subject to WHT at a 20% rate. Interest provided to non-residents on bonds issued by Mongolian commercial banks and listed on the domestic or foreign stock exchange are subject to WHT at 10%.

Dividends, interest, and royalties paid to resident companies and individuals are all subject to WHT at 10%.

Current DTTs

	Beneficial WHT rates (%)			
Recipient	**Dividends**	**Interest**	**Royalties**	**Technical fees**
Non-treaty	20	20	20	20

Notes

1. 5% if the recipient is a company (excluding partnerships) and directly owns at least 10% of the capital of the company paying dividends.
2. 5% if the beneficial owner is a company (excluding partnerships) and directly or indirectly holds at least 10% of the capital of the company paying dividends.
3. 5% if the beneficial owner is a company that directly or indirectly controls at least 10% of the voting power in the company paying dividends.
4. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 10% of the company.
5. 5% if the beneficial owner is a company (excluding partnerships) and directly owns at least 25% of the capital of the company paying dividends.
6. No tax if dividends paid to the government/certain public bodies.
7. 5% if the beneficial owner is a company and directly or indirectly holds at least 10% of the capital of the company paying dividends.
8. 7% if interest is paid to a bank that is the beneficial owner of the interest and carrying on a *bona fide* banking business.
9. 5% if the beneficial owner is a company and directly owns at least 25% of the capital of the company paying dividends.
10. 5% if interest is received by a bank or a similar financial institution.
11. 5% if the beneficial owner of the royalties in the meaning of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.
12. 5% if the beneficial owner of the royalties in the meaning of copyright royalties and other payments for production or reproduction of any literary, dramatic, and other work, royalties for the use of, or the right to use, computer software or any patent, or for information concerning industrial, commercial, or scientific experience; 10% in all other cases.

Tax administration

Taxable period

The tax year is the calendar year.

Tax returns

Companies must submit a quarterly return by the 20th day of the month following the end of each quarter and an annual return by 10 February after the end of the tax year.

A withholder must prepare and submit a quarterly return of the tax deducted by the 20th day of the first month of the following quarter and an annual return by 10 February after the end of the tax year.

Payment of tax

A taxpayer shall pay the taxes due in advance by the 25th day of each month in accordance with the payment schedule based on the previous year. Year-end settlement is made by 10 February of the following year (along with the annual tax statement).

In practice, the Mongolian tax authorities allow concessions as follows:

Where total tax paid exceeds the tax liability, the excess may be credited against other taxes due or credited against future tax payments. The overpayment also may, theoretically, be refunded; however, the practice of refunding in Mongolia is not clear or consistent.

An economic entity or organisation that has withheld tax from a payment of dividends, royalties, sale of rights, or a payment of income to a taxpayer should transfer the WHT to the tax authorities within seven working days. Tax withheld relating to the sale of immovable property should be transferred to the tax authorities within ten working days.

Tax audit process

The tax audit cycle is not clearly stated in the tax laws. However, the regular cycle in Mongolia is three to five years in practice, and it is very common if the company requests a refund from tax authorities or liquidates its company. Moreover, a tax audit can come anytime if the tax authorities suspect some risk or misuse of the legislation or receive information from a trustworthy source about tax evasion.

Statute of limitations

The statute of limitations in Mongolia is five years for tax arrears, fines, and penalties. However, the dispute settlement timeframe shall not pertain to payment of tax, fine, and penalty debts.

Topics of focus for tax authorities

The tax authorities normally focus their attention on issues like understatement of income, overstatement of expenses, and withholding obligations of taxpayers.

Another hot topic in Mongolia right now is transfer pricing. The transfer pricing concept is at an early stage of development. Nevertheless, the basic principle governing Mongolian transfer pricing rules is that transactions between related parties should be undertaken at fair market value.

The tax authorities introduced new transfer pricing regulation. This transfer pricing regulation applies to controlled transactions between related parties. The list of controlled transactions, transfer pricing methods to be applied, transfer pricing documentation requirements, and very concise comparability analysis items are based on the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines.

PE is also becoming one of the focus areas of the tax authorities. Although it is possible for PEs to be registered as taxpayers, determination of taxable income of PE is still in question.

Significant developments

Value-added tax (VAT)

Montenegrin VAT Law and the Rulebook on application of VAT Law are amended. The most important changes relate to the increase of the standard VAT rate to 21%, amendments of the rules for determining the place of supply of services, and introduction of the procedure for appointment of a fiscal representative (*see Value-added tax [VAT] in the Other taxes section for more information*).

Customs duty

During 2017, Customs Law was amended. The amendments introduce the institute of authorised economic operator and other procedural related matters.

Taxes on corporate income

Entities operating in Montenegro are subject to a 9% corporate profit tax (CPT).

Resident taxpayers are taxed on their worldwide profit. Non-resident taxpayers are taxed on their Montenegrin-sourced income or income attributed to their Montenegrin permanent establishment (PE). Non-residents are also subject to withholding tax (WHT) on income sourced in Montenegro (*see the Withholding taxes section for more information*).

Local income taxes

No local (i.e. municipality) corporate income taxes exist in Montenegro.

Corporate residence

A legal entity is considered to be a tax resident if it is incorporated in Montenegro. In addition, a foreign corporation may also be deemed a Montenegrin tax resident if the corporation has a place of effective management in Montenegro. No explicit rules exist for determination of effective management. In practice, it usually is the place where key managerial decisions are made or where the board of directors sits.

Permanent establishment (PE)

Montenegrin tax legislation contains very basic PE rules following, in main features, the guidelines set out in the Commentary to the Organisation for Economic Co-operation and Development (OECD) Model Tax Treaty. PE is defined as a fixed place of business through which a non-resident carries out business in Montenegro. PE is deemed to exist in case of a non-resident having one of the following in Montenegro:

place of management, branch office, office, factory, workshop, mine, gas or oil site, stone pit, or any other place of natural resources exploitation in Montenegro. A construction site constitutes a PE only if construction activities last longer than six months.

PE is not deemed to exist in case of a non-resident having storage of inventory in Montenegro only for the purpose of delivery of goods or having operations in Montenegro that are of a preparatory or auxiliary nature.

Other taxes

Value-added tax (VAT)

The main principles of the Montenegrin VAT are in line with the European Union (EU) Sixth Directive guidelines. Taxable supplies are subject to a general 21% VAT rate; however, certain supplies are taxed at a reduced 7% rate (e.g. bread, milk, books, medicines, computers) and 0% rate (e.g. export of goods, supply of gasoline for vessels in international traffic).

In principle, the VAT base is comprised of consideration (in cash, goods, or services) received for supplies, including taxes, except VAT (e.g. customs, excise duty), and direct costs (e.g. commissions, cost of packing, transport). If the consideration is not paid in cash, or if an exchange of goods for services takes place, the tax base will be the market value of the goods or services received at the time of supply. The VAT base cannot be lower than the cost of goods sold.

Registration for VAT in Montenegro may be either voluntary or mandatory. Voluntary VAT registration is possible for small taxpayers who have not realised turnover exceeding 18,000 euros (EUR) in the last 12-month period. Once registered, a company may not apply for deregistration for at least three years. VAT registration is mandatory for an entity that realises turnover exceeding the EUR 18,000 threshold in any 12-month period.

VAT is calculated and paid on a calendar-month basis (i.e. a VAT return must be submitted and VAT liability must be cleared monthly). VAT calculated on imports is paid along with customs duties.

Customs duty

Exports

There are no export duties in Montenegro, nor is it forbidden to export any goods. Exceptionally, the Montenegrin government can impose quantity limitation of exports only in case of critical shortage of certain goods or for the purpose of protection of non-renewable natural resources, under certain conditions.

Imports

Customs duties are paid on goods imported into the customs territory of Montenegro in accordance with the rates and tariffs set forth in the Customs Tariffs, which is in line with the harmonised system of tariff codes prescribed by the World Trade Organization (WTO). Customs duties can be levied in two manners, as *ad valorem* or specific duty per unit of goods.

For agricultural and alimentary products, a combined duty has been determined, that is, both *ad valorem* and specific duty are charged simultaneously.

Ad valorem duties are prescribed within the scope from 0% to 30%. Specific duties range from EUR 0.04 per 1kg to EUR 1 per 1kg.

Customs rates stipulated by international agreements are only applied to goods of preferential origin from countries covered by such agreements. The most important free trade agreements that Montenegro signed are with the European Union, the European Free Trade Association (EFTA), the Central European Free Trade Agreement (CEFTA) states, Russia, Turkey, and Ukraine.

Excise duty

Legal entities that are importers or producers of the following products are subject to excise duty:

- Alcoholic and alcohol beverages.
- Tobacco products, including non-combustible tobacco.
- Mineral oils, their derivatives and substitutes, and coal.
- Mineralised water with sugar or aroma.
- Liquid for charging electronic cigarettes.

Excise duty can be prescribed as a fixed amount and/or as a certain percentage (*ad valorem*).

Tax on coffee

Tax on coffee is payable on coffee imported and produced in Montenegro. The tax rate varies from EUR 0.80/kg to EUR 1.30/kg, depending on the type of the coffee. Tax on coffee is also payable for products and beverages that contain coffee. The tax rate for these products is EUR 2.50/kg for one kg of net coffee contained in the final product.

Property tax

Property tax is payable by legal entities who own or have user rights over real estate located in Montenegro. The annual tax is levied at proportional rates, ranging from 0.25% to 1% on the market value of assets as of 1 January of the current year. In case of acquisition of new property, the taxpayer is obligated to submit a tax return to the tax authorities within 30 days from the acquisition date (i.e. registration return for property tax) and to declare annual property tax by the submission of annual returns. Tax is payable in two instalments, based on decisions issued by the tax authorities.

Property transfer tax

Transfer tax of 3% is payable on the acquisition of ownership rights over immovable property.

The taxable base is the market value of the immovable property at the time of the acquisition. A taxpayer (i.e. the acquirer of immovable property) is obligated to self-assess a tax liability, submit a tax return, and settle a tax liability within 15 days from the contract date.

Stamp taxes

No stamp taxes are in place in Montenegro.

Payroll tax

Employment income includes all receipts paid or provided to an individual based on employment (salaries, pensions, benefits in kind, insurance premiums, benefits, and awards above the non-taxable thresholds). Income generated through other types of personal engagements similar to employment (e.g. temporary jobs) is also considered employment income.

While employees are the taxpayers, the employer is responsible for calculating and withholding personal income tax (PIT) on behalf of its employees.

Employment income is subject to WHT at a flat rate of 9%. Gross salary exceeding average monthly gross salary in Montenegro for the previous year published by the relevant authority is subject to 11% PIT. The 11% rate applies to the part of the salary exceeding the prescribed threshold, while the 9% rate applies to the part of the salary below (and including) this threshold.

Social security contributions

Social security contributions for pension and disability insurance, health insurance, and unemployment insurance are calculated and withheld by an employer from the salary paid to an employee. Unlike the other two types of social security contributions, pension and disability insurance contributions are subject to a specific annual cap (EUR 52,308 for 2017).

Social security contributions are payable by the employer and employee at different rates. The amount borne by the employer is treated as an operating cost while the portion payable by the employee is taken from the gross salary.

The rates paid by the employer are as follows:

- Pension and disability insurance: 5.5%.
- Health insurance: 4.3%.
- Unemployment insurance: 0.5%.

The rates paid by the employee are as follows:

- Pension and disability insurance: 15%.
- Health insurance: 8.5%.
- Unemployment insurance: 0.5%.

Environmental charges

Legal entities are subject to environmental charges for the following:

- Use of firing or electrical feed equipment with power greater than 1MW.
- Import of substances harmful to the atmosphere.
- Production or deposit of dangerous waste.
- Tax for use of road vehicles (vignettes).
- Charges for access to certain services that are of general interest (for use of mobile telephones, electricity, cable television connection, space denominated for consumers of tobacco products and acoustic devices).

Branch income

Non-residents carrying out business in Montenegro through a PE are taxed on their Montenegrin-source income at a rate of 9%. A branch is considered to be a PE.

Income determination

Taxable profit is calculated by adjusting the accounting profit (determined in accordance with International Financial Reporting Standards [IFRS] and accounting legislation) in accordance with the provisions of the CPT Law.

Inventory valuation

Inventory is valued by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used for book purposes, an adjustment for tax purposes should be made.

Capital gains

Capital gains realised by the sale or transfer of real estate or other property rights, as well as shares and other securities, are subject to the 9% CPT rate.

Capital gains may be offset against capital losses occurring in the same period. A capital loss may be carried forward for five years.

Dividend income

Dividend income of the recipient is exempt from CPT in Montenegro if the distributor is a Montenegrin corporate taxpayer.

Interest income

Interest income is included in taxable profit and subject to 9% CPT.

Royalty income

Royalty income is included in taxable profit and subject to 9% CPT.

Foreign income

A Montenegrin resident receiving foreign income is granted a tax credit in the amount of the tax paid abroad but limited to the amount that would be calculated using Montenegrin rates.

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation

Depreciable assets are tangible and intangible assets with a useful life of at least one year and an individual acquisition value of at least EUR 300.

Intangible and fixed assets are divided into five depreciation groups, with depreciation rates prescribed for each group (I - 5%, II - 15%, III - 20%, IV - 25%, and V - 30%). A straight-line depreciation method is prescribed for assets classified in the first group (real estate), while a declining-balance method is applicable for assets classified in the other groups.

Goodwill

Goodwill is determined according to IFRS and is subject to impairment. There are no other special provisions on goodwill.

Start-up expenses

There are no special provisions regarding treatment of start-up expenses. Consequently, they will be deductible if they are incurred for business purposes and properly documented under the general expense deductibility rule.

Interest expenses

Interest expenses are generally deductible if they are business related and properly documented. Also, interest and related cost of loans paid out to a creditor with the status of a related party are recognised as expenses only in the amount that does not exceed market interest rates between unrelated parties. The exceeding amount is not recognised as an expense, but it is included in the taxable profit and subject to 9% CPT.

Interest paid out to non-resident legal entities (unless it is revenue of a PE of a non-resident legal entity) is subject to WHT levied at 9%.

Bad debt

Write-offs and provisions for doubtful debts are considered deductible, provided that:

- written-off/provided receivables were previously included in the taxpayer's revenues
- doubtful debts were written-off as uncollectible
- the taxpayer can provide proof of filing a lawsuit, that enforced proceedings were instigated, or that receivables were reported in bankruptcy or liquidations proceedings, and
- such receivables are older than 365 days.

Charitable contributions

Expenses incurred for social purposes, reduction of poverty, protecting persons with disabilities, child and youth social care, elderly care, protection and promotion of human and minority rights, the rule of law, civil society and volunteerism, Montenegro's Euro-Atlantic and European integration, art, technical culture, promotion of agriculture and rural development, sustainable development, consumer protection, gender equality, the fight against corruption and organised crime, and the fight against addictions are recognised for CPT purposes, up to a threshold of 3.5% of total revenue.

Expenditures for the above-mentioned purposes are recognised regardless of whether they are made in cash, goods, rights, or services.

Expenses incurred in this regard will be deductible for CPT purposes only if they are made to legal entities, which are engaged in provision of the aforementioned services in accordance with specific regulations, and if received funds are used by such entities exclusively for the above-mentioned purposes.

Impairment of assets

Expenses incurred on the basis of impairment of assets are not deductible for CPT purposes. Impairment expenses are deductible in the period in which assets are disposed of or damaged due to *force majeure*.

Salary costs and costs related to termination of employment

Salary costs, severance payments related to retirement of employees, costs related to technological surplus, and other payments related to termination of employment are recognised as deductible in the tax period in which they are paid (not in the period in which they are accrued).

Fines and penalties

Penalty interest for late payment of taxes is not CPT deductible.

Taxes

The basic deductibility rule is that business expenses incurred for business purposes are CPT deductible. Following that rule, CPT Law provides for full deductibility of taxes.

Other significant items

The following expenditures are also recognised for CPT purposes, up to the prescribed threshold:

- Entertaining expenses, up to 1% of total revenue.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue unless the amount of the fees has been determined by law.
- Provisions for redundancy payments and jubilee awards recognised as expenditures, up to the amount prescribed by the labour legislation.
- Increase of provisions of balance sheet receivables and the provisions for off-balance sheet losses are recognised as expenses in the bank's tax assessment form, in the amounts calculated at the level of the bank, which were, in accordance with the bank's internal acts, reported in the bank's profit and loss statement as an expense in the tax period, in accordance with the regulations of the Central Bank of Montenegro.
- Increase of indirect write-off made according to the receivables collectability and technical provisions are recognised as expense in the insurance company's tax assessment form in the amount prescribed by the insurance legislation.
- Provisions for special risks of brokers and dealers, up to the amounts prescribed by the securities law.
- Provisions for renewable natural resources, warranties for the sale of goods and services (guarantee period), and the expected loss from court process (delicate agreements) if accounted for in accordance with the accounting legislation.

Net operating losses

The taxpayer is entitled to carry forward losses incurred in an accounting period over the following five years. Carryback of losses is not allowed.

Payments to foreign affiliates

Supplies of goods or services from a foreign group entity not established in Montenegro to a Montenegrin entity must be valued at arm's length. Excess expenses recorded over market value are treated as non-deductible expenses.

With respect to payment of charges of a PE, CPT Law provides that administrative costs charged by the non-resident head office are non-deductible for CPT at the level of the PE.

Group taxation

Tax consolidation is permitted for a group of companies in which all of the members are Montenegrin residents and the parent company directly or indirectly controls at least 75% of the shares in the other companies. Each company files its own tax return, and the parent company files a consolidated tax return for the entire group.

Each company is taxed based on its contribution to the consolidated taxable profit (or loss) of the group.

Tax consolidation is binding for at least five years.

Transfer pricing

The difference between the transfer price and arm's-length price is included in the taxable profit and is taxed accordingly. Parties considered to be related are the parties between whom special relations exist, which could directly impact the conditions or economical results of the transaction between them.

Methods permitted in determining arm's-length price are the comparable uncontrolled price (CUP) method (as the primary method), resale minus method, or cost plus method.

There are no other rules or guidelines introduced apart from the above rules in respect to transfer pricing.

Thin capitalisation

There are no thin capitalisation provisions in place in Montenegro.

Controlled foreign companies (CFCs)

There are no CFC rules in Montenegro.

Tax credits and incentives

The CPT Law provides four tax incentives related to businesses: one for newly established businesses in underdeveloped municipalities, one for non-governmental organisations (NGOs), a discount for settling of CPT liability by the prescribed deadline, and a foreign tax credit.

Tax exemption for newly established businesses in underdeveloped municipalities

Newly established production companies located in underdeveloped municipalities are entitled to an eight-year tax exemption. The maximum amount of tax exemption for the period of eight years is limited to EUR 200,000.

The incentive is applicable to companies whose business units are established in underdeveloped regions. In that case, tax holiday is proportional to the amount of profit generated by such unit over the total profit for the period of eight years from establishment of the unit.

The tax incentive is not applicable to a taxpayer operating in the sectors of (i) primary production of agricultural products, (ii) transport, (iii) shipbuilding, (iv) fishery, (v) steel production, (vi) trade, and (vii) catering, except primary catering facilities.

Tax exemption for NGOs

NGOs registered for business activity are permitted to decrease the corporate tax base by EUR 4,000, with the condition that profit is used for realisation of the main goals of an NGO.

Discount for settling CPT liability on time

A discount of 6%, which is applied on the amount of the calculated CPT liability, is available to taxpayers that settle their CPT liability by the prescribed deadline (i.e. by 31 March of the current year for the tax liability of the previous year).

Foreign tax credit

Resident taxpayers are entitled to a tax credit up to the amount of corporate tax paid in another country on income realised in that country. This tax credit is equal to the tax paid in another country but may not exceed the amount of the tax that would have been paid in Montenegro.

Withholding taxes

Montenegrin CPT Law imposes WHT on income realised from a Montenegrin source and distributed to a non-resident. The scope of the WHT applies to dividends and profit distribution, capital gains, interest, royalties, intellectual property rights fees, rental income, fees for consulting, market research, and audit services, as well as to income earned on the basis of performing entertainment, artistic, sport, or similar programmes in Montenegro.

WHT will also be payable on income earned by non-resident or resident individuals on the basis of repurchase of used products, semi-final products, and agricultural products from a manufacturer registered for VAT purposes.

Distributions of dividends and share of profits are also subject to WHT if the recipient is a Montenegrin resident (either an individual or legal entity).

The general WHT rate is 9%.

Application of a double tax treaty (DTT) may reduce or eliminate Montenegrin WHT. To qualify for the beneficial rates prescribed by the treaty, a non-resident must prove tax residency of a relevant treaty country and beneficial ownership over the income. In order to qualify for a preferential tax rate according to a DTT, a non-resident will need to provide the tax residency certificate filled out and stamped by the relevant authority of its country of residence.

Although Serbia is regarded as the legal successor of the Serbia and Montenegro State Union that ceased to exist in June 2006, the Republic of Montenegro, upon its Decision on Independence (dated 3 June 2006), continues to honour international treaties that were applicable in the State Union, including those executed by State Union's legal predecessors (Federal Republic of Yugoslavia and Socialist Federal Republic of Yugoslavia, i.e. former Yugoslavia). However, a quite low statutory WHT rate of 9%, which was enacted after most of the treaties had been introduced, is usually more beneficial than treaty rates.

The list of the treaties is provided below:

	WHT (%)			
Recipient	**Dividends (1)**	**Interest**	**Royalties**	**Applicable from**
Non-treaty	9	9	9	
Treaty:				
Albania	5/15	10	10	2006
Austria	5/10 (8)	10	5/10 (4)	2016
Azerbaijan	10	10 (7)	10	2014
Belgium	10/15	15	10	1982
Belorussia	5/15	8	10	1999
Bosnia and Herzegovina	5/10	10	10	2006
Bulgaria	5/15	10	10	2001

Sweden	5/15	0	0	1982
Switzerland	5/15	10	10	2006
Turkey	5/15	10	10	2008

Recipient	WHT (%) Dividends (1)	Interest	Royalties	Applicable from
Ukraine	5/10	0/10 (7)	10	2002
United Arab Emirates	5/10 (8)	10	5/10 (4)	2014
United Kingdom	5/15	10	10	1983

Notes

1. If the recipient company owns/controls at least 25% of the equity of the paying company, the lower of the two rates applies.
2. A new DTT was signed with Egypt in 2005, but it is not applicable yet. Meanwhile, the old treaty is still applicable.
3. Instruments of ratification have not been exchanged between the two countries.
4. A tax rate of 5% will be applicable to literary, scientific, and work of art, films and works created like films, or other sources of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedure.
5. Only in cases when dividends are to be paid to Montenegrin residents. If paid to Malaysian residents, they are taxable at 9% in Montenegro.
6. A 5% rate is applicable for intellectual property and 10% rate for industrial property.
7. A 0% rate is applicable in cases when the income recipient is the government or government-owned banks.
8. A 5% rate is applicable in cases when the beneficial owner is a company that holds at least 5% of the capital of the payer of the income. In all other cases, a 10% rate applies.

Tax administration

Taxable period

The tax year in Montenegro is the calendar year.

Tax returns

Tax returns and supplementary documents (e.g. tax depreciation form) must be filed with the tax authorities by the end of March of the following year.

Payment of tax

CPT is paid by the end of March of the following year for the previous year. Alternatively, CPT may be paid in six annual instalments at the taxpayer's request. A discount of 6% is applicable on the amount of the calculated CPT liability for the timely payment of the tax due (*see the Tax credits and incentives section for additional information*).

Taxation of non-residents

Montenegrin CPT Law contains specific rules for assessment and mechanisms for taxation of:

- capital gains of non-residents in transactions with other non-resident entities or resident and non-resident individuals, and
- Montenegrin-sourced income realised by non-residents on the basis of lease of movable and immovable assets from a person who is not obligated to calculate, withhold, and pay WHT (i.e. non-resident entities or resident and non-resident individuals).

The non-resident is obligated to file the tax return, via their Montenegrin tax representative (tax agent), within 30 days from generating income. Tax liability will be determined based on the decision issued by the Montenegrin tax authorities.

Tax audit process
There are no particular provisions regarding the audit cycle in Montenegro.

Statute of limitations
The right to assess taxes expires within five years after the end of the year in which the tax should have been assessed.

The right to collect taxes expires within five years after the end of the year in which tax has been determined.

Topic on focus for tax authorities
According to our best knowledge, the focus of the tax authorities is proper documenting of expenses, WHT, and VAT. Apart from this, we are expecting that in the near future the focus of the tax authorities will be transfer pricing, following trends of the countries in the region.

Other issues

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)
Montenegro and the United States reached an 'agreement in substance' on a Model 1 IGA and consented to this status as of 30 June 2014. In accordance with this status, the text of such IGA has not been released, and financial institutions in Montenegro are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

On 1 June 2017, Montenegro signed an IGA in order to implement provisions of the FATCA and to promote transparency between Montenegro and the United States on tax matters. The Agreement was ratified on 1 March 2018, and it is applicable from 28 March 2018.

Significant developments

Application of progressive corporate income tax (CIT) rates

Starting 1 January 2018, Moroccan CIT is levied at the following rates, using a progressive rate scale (instead of a proportional rate scale):

Taxable income (MAD*)		
From	To	CIT rate (%)
0	300,000	10
300,001	1,000,000	20
1,000,001	and above	31

* Moroccan dirham

Credit institutions and insurance companies remain subject to a flat CIT rate of 37%.

Modification of the tax regime applicable to capital gains on non-depreciable assets recorded following merger/demerger operations

Starting 1 January 2018, the capital gains on non-depreciable assets recorded following a merger/demerger operation cannot be offset against available losses.

Carryforward of losses by merging companies

Starting 1 January 2018, absorbing companies are allowed to carry forward the amortisation loss on following fiscal years.

Taxes on corporate income

In general, the Moroccan tax code considers that all revenues and capital gains generated in Morocco are subject to Moroccan taxation.

Companies are taxed on the difference between their trading income and expenditure. Business expenses incurred in the operation of the business are generally deductible unless specifically excluded.

The CIT rates are as follows (progressive scale):

Taxable income (MAD)		
From	To	CIT rate (%)
0	300,000	10

Taxable income (MAD)		
From	To	CIT rate (%)
300,001	1,000,000	20
1,000,001	and above	31

A higher CIT rate of 37% applies to credit institutions and insurance companies.

Non-resident companies can, under certain conditions, opt for an alternative tax at the rate of 8% of the amount of their contract, whatever the taxable income is.

Minimum contribution

CIT cannot be lower than a minimum contribution of 0.5% (or 0.25% for specific products) levied on the turnover and other specific revenues. The minimum contribution is not due during the first 36 months following the beginning of activities.

Local income taxes

There are no provincial or local taxes levied on income in Morocco.

Corporate residence

Companies, whether or not established in Morocco, are subject to CIT on all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco, even when these are of an occasional nature.

Permanent establishment (PE)

The notion of PE is not explicitly defined under Moroccan tax law.

However, the Moroccan tax authorities apply this concept for non-resident companies according to some determined criteria that are inspired from the various tax treaties that Morocco has signed with other countries.

Indeed, the question of whether an entity will be deemed to have a PE in Morocco is a question of fact, in particular, subject to having, in Morocco, any fixed place of business through which a foreign entity conducts industrial or commercial activity for an indefinite or substantial period of time.

The term fixed place of business includes, for instance, a place of management or operations, a branch, an agency, a premises used as a sales outlet, a construction of assembly project, or a purchasing office. Also, in some specific cases, a non-resident company may be deemed as having a PE if it operates in Morocco through a dependent agent.

Other taxes

Value-added tax (VAT)

VAT is levied under the Moroccan Tax Code and is due on all industrial, commercial, and handicraft transactions taking place in Morocco, as well as on importation operations.

The standard rate of VAT is 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated operations.

The sale of goods is considered as taking place in Morocco, and thus subject to VAT, if the goods sold are delivered in Morocco.

The sale of services is considered as taking place in Morocco, and thus subject to VAT, if the services sold are consumed or used in Morocco.

Two types of exemptions from VAT are provided. The first is an exemption with credit, equivalent to the zero tax concept. The second is an exemption without credit.

The zero-rated supplies include (but are not limited to) supplies of the following goods or services:

- Exported goods and services.
- Certain agricultural equipment supplied under prescribed circumstances.
- Investment goods recorded as fixed assets in the company accounting and acquired during the first 24 months following the beginning of activity.
- Offshore banks for certain specific operations, such as interest and commissions.
- Goods and services rendered to companies established in free trade zones (FTZs).
- Activities related to hydrocarbon exploration, etc.

Exempt supplies without deduction right include (but are not limited to) supplies of the following goods or services:

- Milk, sugar, bread, cereals.
- Fiscal stamps.
- Newspapers, books, documentaries.
- Interest on government loans.

Customs duties

Importation of goods in Morocco gives rise to payment of importation duties, the VAT on importation, and the special tax on importation called *Taxe Parafiscale à l'Importation* (TPI).

Customs duties are computed on the basis of the *ad valorem* value of the goods at the time of their entrance into Morocco.

Customs duties can be reduced if the imported products are covered by free trade agreements signed by Morocco or other specific regulatory dispositions.

Under Moroccan tax law, the importation operations are subject to VAT at the rate of 20%. Lower rates of 7%, 10%, and 14% apply to specifically designated importations.

The Moroccan tax law also offers some economical customs regimes that provide VAT exemptions with credit (equivalent to zero rate).

The TPI rate is 0.25% levied on the value of the imported goods.

Excise taxes

Excise taxes apply to specific products imported or produced in Morocco, such as tobacco, alcohol, and lubricants.

Professional tax

A professional tax is levied on individuals and enterprises that carry out a professional activity in Morocco.

The tax consists of a tax on the rental value of business premises (rented or owned) and fixed assets. The tax rates range from 10% to 30%, with exemption for the first five years of activity.

The rental value is exempted for the portion of cost exceeding MAD 50 million.

Registration duties

Registration duties are due on all written or verbal conventions, such as property transfer of real estate, shares, or rights; company set up; equity increase; and goodwill transfer.

The rates of registration duties range from 1% to 6%. A flat rate of MAD 200 is also applicable to specific operations and conventions.

The applicable rate for the transfer of goodwill is 6%.

Payroll taxes

Individual income tax on salaries is paid by way of withholdings made by resident employers.

Social security contributions

The only mandatory social security regime in Morocco is the one managed by the CNSS fund (*Caisse Nationale de Sécurité Sociale*).

The CNSS rates are as follows and apply to the gross salary, excluding exempted allowances and indemnities:

Contribution	Employee portion (%)	Employer portion (%)	Computation basis ceiling (MAD)
Family allocation	-	6.40	-
Social allocation	4.29	8.60	6,000
Professional tax	-	1.60	-
Mandatory medical care	2.26	4.11	-

Branch income

Non-resident entities are subject to income tax at normal CIT rates derived from all profits or income relating to property that they own, activities that they carry on, and profit-making transactions that they carry out in Morocco.

The taxation is levied to the portion of income allocable to the branch located in Morocco.

In addition, a 15% 'branch tax' applies to a non-resident's after-tax profits. Some treaties may provide protection against the application of the branch tax.

For resident entities having branches in Morocco, the income is taxable in the hands of the head office at normal CIT rates.

Income determination

Inventory valuation

Cost of inventory must be determined in accordance with the first in first out (FIFO) or the average cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains are taxable as a part of ordinary business income.

Dividend income

Dividends received by corporate shareholders from Moroccan-resident entities subject to CIT must be included in business profits of the recipient company, but the dividends are 100% deductible in the computation of taxable income.

The participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Interest income

Interest income received from tax resident entities (other than financial institutions) is subject to a withholding tax (WHT) at the rate of 20%. The WHT is deductible from CIT.

Rents/royalties income

Rents and royalties income are taxable as a part of ordinary business income.

Foreign income

The income derived from activities carried out in a foreign country is not subject to taxation in Morocco unless the taxation is granted by treaty dispositions.

Note that the participation exemption in Morocco is also applicable to dividends derived from foreign subsidiaries.

Deductions

Depreciation

Fixed assets are normally depreciated according to their economic life duration according to the provision of the accounting regulation.

Depreciation is computed according to two methods: the straight-line method and the declining-balance method.

The tax regulation (through administrative guidelines) has provided indicative depreciation rates applicable when the company activity or the asset to be depreciated is specific or particular.

Indicative depreciation rates are as follows:

Asset	Depreciation rate (%)
Business premises and buildings	4 to 5
Light construction (metal frame construction)	10

Asset	Depreciation rate (%)
Production equipment, tools, and construction fittings	10 to 15
Huge computer facilities	10 to 20
Computers and related items (printers) and programs, as well as vehicles (cars, trucks, vans, lifters)	20 to 25
Office furniture and software	20
Non-significant tools	30

Goodwill

Under Moroccan tax law, goodwill cannot be subject to amortisation. However, a decrease of the value of goodwill is allowed to be recorded through provisions.

Start-up expenses

The development as well as incorporation expenses shall be capitalised and depreciated for tax purposes over a period of five years.

The carryforward of any loss due to the above expenses is limited to a period of four years.

Interest expenses

Interest on loans granted by direct shareholders is deductible if the capital is fully paid in. Also, the deductible interest is limited to (i) the portion of the loan that does not exceed the share capital equity and (ii) the interest rate provided, annually, by the Ministry of Finance (2.22% in 2018).

Bad debt

Bad debts that are definitively non-recoverable (after all recovery procedures have been undertaken) are treated, from a tax point of view, as deductible losses.

Charitable contributions

Charitable contributions made by companies are deductible only if they are granted to foundations and societies explicitly provided by law.

The contributions made to the community enterprise are deductible at up to 0.2% of the company turnover.

Fines and penalties

Fines and penalties are not tax deductible expenses if they relate to infringements to legal and regulatory dispositions.

However, expenses relating to late payment penalties (calculated in accordance with the provisions of the law) should be tax deductible.

Taxes

Taxes constitute deductible expenses, except CIT itself and recoverable taxes.

Net operating losses

Tax losses may be carried forward for a period of four years from the end of the loss-making accounting period. However, the portion of a loss that relates to depreciation may be carried forward indefinitely.

A carryback mechanism is not allowed under Moroccan law.

Payments to foreign affiliates

Payments to foreign affiliates are allowed under Moroccan law. However, such payments should respect the arm's-length principle and foreign exchange regulations.

Group taxation

Under Moroccan law, consolidation or group taxation is not allowed.

Transfer pricing

Morocco has a general provision within its tax legislation requiring transactions between related parties to be at arm's length.

Where a Moroccan company is directly or indirectly connected with enterprises situated inside or outside Morocco, profits transferred indirectly to such enterprises, by means of increases or decreases in buying or selling prices or by any other means, must be included among taxable profits on the tax return.

In order to determine the amount to be included among taxable profits, Moroccan tax authorities will make comparisons with other similar companies carrying on normal business activities or by means of direct assessment based on information available to the tax authorities.

Thin capitalisation

No specific thin capitalisation rules exist in Morocco.

However, the tax law restricts the interest rate on debts issued by shareholders and the basis of calculating deductible interests.

Interest incurred is tax deductible if the shareholder's capital is fully paid. Additionally, the sum of the shareholder loans generating deductible interests should not exceed the equity capital subscribed, and the applicable interest rate should not exceed the official rate calculated annually on the basis of six months treasury bills.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in Morocco.

Tax credits and incentives

The Moroccan tax law provides several tax incentives for specific sectors of activities.

Export companies

Export companies are exempt from CIT on their profits related to their export turnover during the first five years following their first export transaction. These companies benefit from a reduced CIT rate of 17.5% in subsequent years.

Hotel companies

Hotel companies are fully exempt from CIT on their profits relating to foreign currency turnover for the first five years following their first accommodation operation in foreign currency. They also benefit from a reduced CIT rate of 17.5% on such profits for subsequent years.

Mining companies

Exporting mining companies, including those that sell products to export companies, benefit from a reduced CIT rate of 17.5%.

Agricultural companies

Small-scale companies

Agricultural companies with a turnover of less than MAD 5 million qualify for a total exemption of CIT. If such companies realise a turnover that exceeds MAD 5 million in year (n), they become liable to CIT in year (n), year (n+1), year (n+2), and year (n+3).

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

Medium and large-scale companies

Finance Law 2014 provides for a progressive approach to tax medium and large-scale agricultural companies that realise a turnover exceeding MAD 5 million. As such, companies with a turnover exceeding MAD 35 million, MAD 20 million, or MAD 10 million should become liable to CIT, respectively, in 2016, 2018, and 2020.

Moreover, such companies qualify for a reduced rate of 17.5% during the first five fiscal years following the first year during which they become liable to CIT.

Capital risk companies

Capital risk companies are exempt from CIT on profits derived within the scope of their activities (these are profits related to purchases of companies' shares that support such companies' development and the sales of such shares thereafter).

Hydrocarbon companies

Companies holding hydrocarbon exploration and exploitation permits are exempt from CIT for ten years from the beginning of hydrocarbon regular production.

Banks and holding companies located in offshore zones

Banks and holding companies located in offshore zones benefit from a reduction in CIT for the first 15 years of operation.

Banks may opt for a minimum CIT of 25,000 United States dollars (USD) or pay the tax at a reduced rate of 10%.

Holding companies pay a flat tax of USD 500 during the first 15 years.

Casablanca Finance City

A law was enacted in 2010 for the setting up of a finance area in Casablanca, called, Casablanca Finance City.

The Casablanca Finance City statute may be granted to specific financial institutions as well as non-financial institutions that offer such services as auditing, fiscal, legal, financial, actuarial, and human resources management advisory.

The above statute may also be granted to regional and international headquarters.

Entities established in Casablanca Finance City are exempt, for their export turnover, from CIT during the first five years following the date they obtain the Casablanca Finance City statute. These companies benefit, for the export turnover, from a reduced rate of 8.75% in subsequent years.

Free trade zones (FTZs)

The activities that must be necessarily performed by the companies established in the FTZs are mainly the following (the activities may vary for each FTZ):

- Food processing industries.
- Textile and leather industries.
- Metallurgic, mechanic, electric, and electronic industries.
- Chemical and special chemical industries.
- Services connected with the aforementioned activities.

Entities established in FTZs are exempt, for their export turnover, from CIT during the first five years. These companies benefit, for the export turnover, from a reduced CIT rate of 8.75% for the following 20 years.

Moreover, for entities established in FTZs, the dividends paid to non-residents relating to activities performed in the FTZ are totally exempted from the WHT on dividends.

Listed shares

Non-resident entities are exempt from capital gains derived from the sale of stocks listed on the Casablanca stock exchange, excluding the shares of real estate entities.

Foreign tax credit

Income tax paid on income earned from outside Morocco may be credited against CIT payable in Morocco if provided by treaty.

Withholding taxes

WHT on dividends

The standard WHT rate on dividends is set at 15% according to the Moroccan law (unless reduced by treaty).

WHT does not apply to dividends paid to Moroccan companies subject to Moroccan CIT, subject to the delivery of a property attestation.

A branch tax of 15% applies to the net income transferred by the Moroccan branch to foreign entities (may be reduced by the tax treaty).

WHT on interests

The standard WHT on interest paid to non-resident entities is set at 10% as provided by the Moroccan law (unless reduced by treaty). However, the Moroccan law provides that interest on loans granted in foreign currency with a maturity exceeding ten years is exempt from WHT.

WHT on services paid to non-resident entities

According to the Moroccan tax code, all payments of all kinds of services rendered by non-resident entities are subject to WHT at the rate of 10%.

However, it shall be noted that treaty dispositions limit the scope of application of WHT only to remunerations that constitute royalties. Such dispositions overrule the domestic tax law provided by the Moroccan law.

Treaty WHT rates

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

	WHT (%)			
	Dividends			
Recipient	Individuals and non-qualified companies	Qualifying companies	Interest (1)	Royalties
Non-treaty	15	15	10	10
Treaty:				
Arab Maghreb Union (2)	(3)	(3)	(3)	(3)

United Kingdom	15	10	10	10
United States	15	10	10	10

Notes

1. Some treaties provide for an exemption for certain types of interest (e.g. interest paid to public bodies and institutions). Such exemptions are not dealt with in this treaty chart.
2. The member states of the Arab Maghreb Union are Algeria, Libya, Mauritania, Morocco, and Tunisia.
3. There is no limitation on WHT under the treaty.
4. The lower rate (i.e. 5%) usually applies to copyright royalties and other similar payments in respect of the production or reproduction of any literary, artistic, or dramatic work (excluding cinematographic and television films), while the 10% rate applies to other types of royalties.

Tax administration

Taxable period

The taxable period corresponds to 12 months. The first taxable period can be less than one year but should never exceed it.

Tax returns

CIT returns must be filed within three months following the closing of the fiscal year.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments of 25% each based on the CIT of the previous year.

In case the CIT of the year exceeds the sum of the four instalments, the company should proceed to tax regularisation along with the submitting of the taxable income return after three months following the closing of the fiscal year (i.e. 31 March for fiscal year corresponding to the calendar year). Otherwise, the exceeding tax amount should be offset against the following instalments without limitations.

Penalties

Finance Law 2016 provides for the application of the following rates for penalties and late payment interest:

In case of late tax return:

- 5% penalty in case the tax return is submitted within 30 days following the legal deadline, or in case of corrective return.
- 15% penalty in case the tax return is submitted after the above mentioned 30 days.
- 20% penalty in case of automatic taxation due to non-submission of tax return.

In case of late tax payment:

- 5% penalty in case the tax payment is made within 30 days following the legal deadline.
- 10% penalty in case the tax is paid after the above mentioned 30 days.
- 20% penalty in case of non-payment or late payment of VAT and other WHTs.
- 5% interest related to the first month late tax payment and 0.5% interest for the following months.

Statute of limitations

The statute of limitations runs until the end of the following fourth year. This period may be extended in case of deficits or credits.

Topics of focus of tax authorities

The topics of focus of tax authorities depend on each specific situation (sector of activity, company size, etc.). However, it is very common to find the following points:

- Transfer pricing.
- Tax treatment of provisions.
- Taxation of indemnities and benefits granted to employees.

Other issues

Exchange controls

Foreign investors are allowed, following the accomplishment of some formalities, to freely transfer abroad the whole proceeds of their investments in Morocco (i.e. dividends, shares sale price, and liquidation income under the condition that the initial investment is realised in one of the foreign currencies listed by the Moroccan Central Bank).

However, some specific transfers of funds into and out of Morocco are subject to prior authorisations from the exchange control office.

Choice of business entity

The legal vehicles used by foreign companies for the purpose of setting up a business in Morocco are the branch and the subsidiary.

Under subsidiary form, the foreign entities generally opt for the corporation (SA) or the limited liability company (SARL).

The SARL is most adequate for companies with low investment capital while the SA is most appropriate for companies that are investing an important amount of capital. In general, the rules relating to the organisation and functioning of an SARL are more flexible than those required for an SA.

Significant developments

On 12 September 2017, the Mozambican Council of Ministers approved the Decree no. 70/2017 of 6 December that regulates the transfer pricing regime.

This regime contain rules with huge impact in the transactions between related entities, introduces some concepts, and lists the obligations related with information to be provided for transfer pricing purposes. Main topics include the following:

- The concept of 'related parties' is introduced for the purpose of transfer pricing.
- A number of methods are listed to determine the terms and conditions that would be established in compliance with the 'arm's-length principle'.
- Specific rules are established to be observed in the agreements to be entered between related parties.
- The list of information and documentation is established that the taxpayer should obtain, prepare, and maintain to justify the adopted transfer pricing method.

Taxes on corporate income

Corporate entities and other entities with headquarters or effective management in Mozambique (i.e. resident entities) are subject to corporate income tax (CIT) based on their worldwide income. On the other hand, corporate entities and other entities without headquarters or with a permanent establishment (PE) in Mozambique (i.e. non-resident entities) are only subject to CIT on the income earned in Mozambique.

CIT is levied on taxable profits, defined as accounting profits adjusted to comply with tax law rules, at a tax rate of 32%. Non-resident entities without a PE in Mozambique are only subject to withholding tax (WHT) in Mozambique in respect to income earned in Mozambique.

Specific tax regime and tax benefits for mining activity

Under the specific tax regime for mining activity, namely the tax on mining production (TMP), the value of mining products is determined by the price of the last sale by the taxable person, which must match with the price of reference in the international market, or, if there was no sale, is determined by the price of reference in the international market.

The rates for mining products are as follows:

- 8% for diamonds.
- 6% for precious metals, precious stone and semi-precious stone, and heavy sand.
- 3% for base metals, coal, and others.
- 1.5% for sand and stone.

Such rates can be reduced to 50% when the products are used in Mozambique for the development of local industry.

The settlement of the TMP is performed on the tenth day of the month that follows the production.

Surface tax (ST) is a tax due for entities undertaking a mining activity in the country. ST is based on the type of mining title and year of activities, with exception of the mining concession for mineral water that has an amount of 85,000 Mozambican metical (MZN) per mining title.

The additional settlement for the TMP and ST must be made within 30 days from the tax settlement.

At the end of each year, the taxpayer must report the yearly profit for each mining title separately.

The holder of the mining title also pays the tax on mining resource rent (TMRR), and, for its deduction, the concessionaire must provide information to the tax authorities on the accumulated net cash flows, corresponding to the taxable income.

The applicable rate for TMRR is 20%.

At the beginning of the fiscal year, each taxpayer must prepare a forecast to TMRR that must be regularly updated and presented by 31 May of the fiscal year. The TMRR is paid in two instalments (50% in August and 50% in November) based on the forecast.

The specific tax regime for mining activities was recently amended by Law no. 15/2017 of 28 December, which introduced the following changes:

Capital gains

- Capital gains arising from the onerous or gratuitous alienation, whether direct or indirect, of mining rights situated in Mozambique are considered as capital gains.
- Capital gains are taxed in full (32% rate), the liability for payment is jointly and severally liable between seller, purchaser, and holder of the mining right, and the respective tax must be paid within 30 days from date of alienation.

Stability clause

- Possibility to negotiate a tax stability for a period of ten years, effective upon a proven investment of 5 million United States dollars (USD).

US dollar accounts

- Possibility to adopt US dollars as the currency to present the company's accounts, subject to prior authorisation from the Minister of Finance, not subject to alteration during the life of the project.
- Companies are eligible if an investment equal to or greater than the equivalent of USD 500 million is made and more than 90% of its transactions are in US dollars.

Audited accounts

- Companies are required to have the accounts certified by an independent auditor.

Specific tax regime and tax benefits for oil and gas operations

In accordance with the specific tax regime and tax benefits for oil and gas operations, the obligation to pay the tax on oil production (TOP) is deemed to be at the time that the oil produced comes to the station defined in the concession agreement.

The settlement of the TOP is made by the taxpayer, which must submit the official form to the tax administration by the tenth day of the following month of the production, and, if the taxpayer fails to do so, the tax administration will make the necessary assessments based on the elements it has and the application of penalties established in article 22 of the mentioned regulation.

The TOP rates are the following: 10% for crude oil and condensate and 6% for natural gas and liquefied natural gas (LNG), which can be reduced by 50% in cases where the production is to be used for the development of local industry. It is considered local industry if the sale is for the national hydrocarbon company (ENH, E.P).

After the settlement made by the taxpayer, the tax administration shall evaluate the official model and can make corrections to it. If a correction is to be made, the tax administration has the prerogative to conduct an additional settlement, in which it must charge or cancel the calculated difference, and this amount must be corrected in 30 days from the tax assessment.

It is important to mention that the government has a period of time to notify the taxpayer to pay in kind, which is within 12 months in advance, starting from the first day of the month to which the tax relates, indicating the quantity of oil and delivery point.

In order to have benefits established in Law no. 27/2014 of 23 September, the taxpayer must apply to the Customs Services for the exemption. In this request, the applicant must attach the global list of the goods to import for the determination of eligible goods for the exemption.

The violation of this regulation is subject to impeditive sanctions, suspensive sanctions, and extinctive sanctions.

The specific tax regime for oil and gas was recently amended by Law no. 14/2017 of 28 December, which introduced the following changes:

Capital gains

- Capital gains arising from the onerous or gratuitous alienation, whether direct or indirect, of petroleum rights situated in Mozambique are considered as capital gains.
- Capital gains are taxed in full (32% rate), the liability for payment is jointly and severally liable between seller, purchaser, and holder of the petroleum right, and the respective tax must be paid within 30 days from date of alienation.

Stability clause

- Possibility to negotiate a tax stability for a period of ten years, effective upon a proven investment of USD 100 million.

US dollar accounts

- Possibility to adopt US dollars as the currency to present the company's accounts, subject to prior authorisation from the Minister of Finance, not subject to alteration during the life of the project.
- Companies are eligible if an investment equal to or greater than the equivalent of USD 500 million is made and more than 90% of its transactions are in US dollars.

Audited accounts

- Companies are required to have the accounts certified by an independent auditor.

Local income taxes

See Municipality taxes in the Other taxes section.

Corporate residence

Corporate residence is determined on the basis of a company's place of incorporation or effective management. Thus, all companies with headquarters or effective management in Mozambique are considered tax residents and are liable for CIT on their worldwide income.

Permanent establishment (PE)

Under the relevant internal legislation, a non-resident entity is deemed to have a PE in Mozambique whenever any of the following circumstances exists:

- It has premises or other fixed places of business through which industrial, trading, agricultural, rendering of services, or similar activities are totally or partially carried out.
- It has an office, branch, plant, workshop, mines, quarries, oil or natural gas wells, or other places of extraction of natural resources.
- It has a construction, installation, or assembly site when the duration of works exceed six months, including the activities of coordination, inspection, and supervision connected to these sites.
- It has persons or hired personnel, acting and dealing in Mozambique, who are not independent agents in the terms of the law but rather acting on behalf of the company with legal capacity to conclude contracts on its behalf and its name within the scope of the company's activities.

Other taxes

Value-added tax (VAT)

VAT is chargeable on the sale of most goods and services as well as on imports. The standard rate is 17%. Usually, VAT is recoverable by corporate entities, except for those engaged in special business activities (e.g. financial and insurance operations, leasing [exemption with restrictions], sale of immovable property, some exempt activities).

Customs duties

Customs duties are charged on importation of goods into Mozambique, and the applicable rates vary from 0% to 20%. Mozambique is part of the Southern African Development Community (SADC) protocol on commercial trade that exempts from customs duties some goods produced within the SADC region. However, in order to benefit from the exemption, the importer should provide proof of the origin of the said goods through the presentation of the certificate of origin of goods.

Mozambique also has signed agreements with the European Union (EU) based on which preferential rates are applicable on certain goods imported from such region.

Excise taxes

Excise duties are levied on certain goods manufactured locally or imported, which are identified in a specific table that is an integrant part of the Excise Duty Act and indicates the applicable rates. Amongst others, the said table includes goods such as tobacco, beer and other alcoholic beverages, vehicles, cosmetics, cloths, airplanes, boats, etc.

Examples of excise duty rates include the following:

- Alcoholic beverages: 40% (55% for wine of fresh grape).
- Tobacco: 75%.
- Air vehicles without engines: 35%.
- Boats and other recreational or sportive crafts: 35%.
- Cloths and respective accessories: 30%.

Property transfer taxes (SISA)

In Mozambique, a property transfer tax is charged on transfers of real estate, excluding the land, which is owned by the state. The rate of tax is 2% of the selling price of the building. When the beneficiaries live in a country with a privileged tax regime, the applicable rate is 10%.

Stamp duties and service charges

Various documents require the payment of stamp duties. Service charges are payable for the performance of certain services for official purposes, such as those rendered by public notaries. These duties vary generally from 0.03% to 50% on the amount of the transaction supported by the document to be stamped. In some other cases, the stamp duty comprises fixed amounts, ranging from MZN 0.50 to MZN 5,000.

Payroll taxes

All remunerations paid to employees are subject to monthly withholding as per the tax rates that are established in a specific schedule approved by law, depending on the gross monthly amounts received and number of dependents of the taxpayer. The employer is obligated to withhold at source the tax due by the employees.

The monthly withholding rates vary from 0% to 32%, being withheld definitively at source if the individual has only received employment income throughout the year and has already been subject to taxation at source by a Mozambican company. In all the other situations, and/or if the individual opts to file one's annual tax return, monthly income tax withholdings are deemed as payment on account for the final annual tax.

The amounts withheld by the company shall be delivered to the tax authorities up to the 20th day of the following month.

In case any tax is paid by the company on behalf of employees, such cost will not be accepted as a deductible cost unless this is treated as part of the remuneration cost and taxed at the hands of the employee as employment income.

Social security contributions

Social security contributions are payable by employers and employees on monthly remuneration. The aggregate rate of contribution is 7%, with 4% paid by the employer and the remaining 3% by the employee. No ceiling is applicable.

Municipality taxes

Municipality taxes that should be considered for corporate purposes include the following:

Municipality tax on real estate

The municipality tax on real estate is levied annually on the value of immovable assets situated within the municipality and owned or possessed by corporate entities. Effective tax rates range from 0.4% (for housing purposes) to 0.7% (for office purposes or mixed activities) of the building value, depending on the municipality.

Municipality tax on economic activities

The municipality tax on economic activities is levied on commercial or industrial activities carried out within a municipal territory. The tax depends on the activity being carried out, adjusted by coefficients, which are based on the zone and total area of the premises in square metres. In Maputo, this tax is calculated based on the following formula:

Maputo tax on economic activities = Basis rate x Index of category x Index of location x Index of area occupied

Where the basis rate is the applicable maximum amount of the national minimum salary of the specific activity sector (for the year 2018, the highest minimum wage varies from MZN 4,150 to MZN 11,897.60).

Where the index of category varies from 1.3 to 3.0, depending on the activity sector (e.g. commercial sector, industrial, rendering of services).

Where the index of the location varies from 1.3 to 1.5, depending on the location of the premises within the municipality.

Where the index of the area occupied varies from 1.2 to 1.5, depending on the nature of the activities and the space occupied by the premises.

Municipal vehicles tax

The municipal vehicles tax is levied on the use of specific vehicles (e.g. light and heavy vehicles less than 25 years old, motorcycles less than 15 years old, aeroplanes, and boats for private use). This tax is due by the owners who are residents of a municipality, regardless of the place of registration of the vehicle owned.

The rate varies, depending on specific criteria, such as type of fuel, engine capacity, period of registration, and weight.

This tax must be paid between January and March or within 30 days after the acquisition of the vehicle.

Branch income

From a tax perspective, branches are liable for Mozambican CIT as a PE; consequently, branches are subject to CIT on the income earned in Mozambique, being subject to tax at a rate of 32%. However, on the grounds that branches do not distribute dividends, the 20% WHT does not apply to the after-tax profits arising in Mozambique.

Income determination

Inventory valuation

All inventory valuation methods generally accepted according to international accounting principles are permitted for tax purposes, provided that the method is:

- used by the taxpayer consistently and
- based on arm's-length prices duly documented and effectively exercised.

Based on the above assumptions, last in first out (LIFO) and first in first out (FIFO) methods are allowed. Write-downs and depreciation of inventories are not allowed. Conformity between book and tax reporting is required.

Large companies began adopting International Financial Reporting Standards (IFRS) in 2010.

Capital gains

Capital gains less any capital losses derived from the sale or disposal of tangible fixed assets, including insurance indemnities received in case of accident, are taxed as part of normal income. If a taxpayer reinvests the sale proceeds within three tax years following the year of sale, the gain may be deferred until the end of the third year. A three-year reinvestment period may be accepted, provided a prior application is submitted to the Minister of Finance. However, if the taxpayer does not realise the reinvestment, the CIT that was not assessed during the three-year period will be assessed, along with compensatory interest.

Capital gains arising from indirect transfers of participating interests of assets located in the country are subject to taxation. Capital gains resulting from the disposal of shares, participating interests, or rights in general, between non-residents, whether direct or indirect, free or for consideration, are taxable in Mozambique, provided the transaction involves assets located in the country.

Dividend income

In the case of resident companies, income arising from dividends is excluded from taxable income, provided that the shares that a resident company holds in another resident company represents at least 20% of the total capital and are held for at least two consecutive years (or with an undertaking to hold the shares for this period). The same applies to income arising from risk capital companies and holding companies (*Sociedade Gestora de Participações Sociais* or SGPSs) or from subsidiaries as a result of the application of technical reserves in insurance companies. However, in the case of holdings, the percentage of share capital decreases to 10% and shares should be held for at least one year.

If the shareholding falls outside the parameters indicated above, the tax withheld (20%) constitutes a payment on account. A tax credit corresponding to 62.5% of the CIT is attributable to the gross-up dividend.

Interest income

Interest is subject to 20% WHT. In the case of foreign entities, the WHT is considered as a definitive tax. In the case of resident entities, it is considered as an advance of the final tax.

Interests on treasury bonds and public debt bonds listed on the stock exchange are subject to definitive WHT at 20%.

Royalty income

Royalty income is subject to 20% WHT. In the case of resident entities, royalty income is considered as an advance of the final tax. In the case of foreign entities, the WHT is considered as a definitive tax.

In case royalty income is earned by a foreign entity with tax residency in a country with which Mozambique signed a double taxation treaty (DTT), the tax rate can vary from 5% to 10%, depending on the DTT.

Foreign income

Mozambican resident companies are taxed on the total income earned on a worldwide basis. Please note that there is no provision on tax deferral in Mozambique in relation to income earned abroad. DTTs allow tax paid abroad to offset Mozambican CIT. Mozambique has signed DTTs with Botswana, India, Italy, Macau, Mauritius, Portugal, South Africa, the United Arab Emirates, and Vietnam.

Deductions

Depreciation

Depreciation is a deductible cost for CIT purposes according to the regulations of the CIT Code, subject to restrictive and specific rules.

The main legal principles regarding depreciation are as follows:

- The establishment of the applicable rates falls under the competence of the Ministry of Finance.
- The calculation is carried out on a straight-line basis in accordance with the rates applicable.

The main depreciation rates are:

Assets	Rate (%)
Tangible assets:	
Industrial buildings	2.00
Residential buildings	10.00
Office and administrative buildings	2.00

Assets	Rate (%)
Machinery and installations, air conditioning, and telephone equipment	12.50
Lifts	8.33
Tools	25.00
Laboratory equipment	12.50
Telex and interior equipment	10.00
Furniture and filing systems	10.00
Typewriters and accounting machines	16.66
Computers and printers	25.00
Computer servers	20.00
Warehouse and filing installations:	
Of concrete	5.00
Of wood	6.66
Of steel	8.33
Trucks	20.00
Automobiles	25.00
Intangible assets:	
Pre-operating expenses incurred prior to the commencement of business	33.33
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33
Patents	10.00
Manufacturing licences, concessionaire agreements, and similar rights	5.00 (1)
Trademark or premium of taking over leases of real estate	(2)

Notes

1. Subject to certain conditions set forth by the tax authorities.
2. Depreciation is only allowed in cases of effective reduction of value within the limits regarded as reasonable by the tax authorities.

Accelerated depreciation

New immovable assets, used for the furtherance of the business, may be depreciated by increasing to 50% the normal depreciation rates approved by law. This benefit is also granted to rehabilitated immovable assets, machinery, and equipment used in agro-industrial activities, provided there is an investment project duly approved by the government.

Goodwill

Although goodwill is considered for accounting purposes in Mozambique, there is no provision for goodwill in the tax legislation. Consequently, goodwill should be regarded as an intangible asset for tax amortisation purposes.

Interest expenses

A basic principle regarding acceptance of costs and expenditures requires that these are necessary for the company's/branch's activity (i.e. indispensable to generate the profits and gains obtained by the company). This concept includes, among others, interest and other financial costs that are, in principle, also deductible for tax purposes unless the tax authorities assume that the interest rate applicable in one transaction is higher than the applicable rate applicable in the market, with the exceeding amount being subject to taxation.

Interest and other types of remuneration above the Maputo Interbank Offered Rate (MAIBOR) plus two percentage points at time of payment on the shareholders' loans are not tax-deductible costs.

Provisions and impairment losses

In Mozambique, companies are able to create all the provisions necessary and relevant for the normal course of business. However, for tax purposes, only the provisions and impairment losses listed below can be deducted as a cost:

- Bad debts.
- Depreciation of stock.
- Ongoing judicial procedures.
- Credit institutions/Insurance companies.
- Reconstruction of mines.
- Rehabilitation of land.

Any other provisions reflected in the company's accounts will not be accepted as tax-deductible costs.

Bad debt

With regards to provisions for bad debts, companies are only allowed to deduct 1.5% per year (and 6% accumulated) of the provisions created for bad debts.

Charitable contributions

Donations can be deducted as costs for tax purposes, provided specific requirements are met and the beneficiaries thereof are:

- Social and cultural organisations that, acting without lucrative intent, carry out actions in art, education, science, health, preservation and restoration of cultural patrimony, or social activities: Donations can be deducted up to the limit of 5% of the previous year's taxable income.
- The Mozambican state: Donations can be fully deducted.

It is important to note that this deduction is not applicable automatically, as it is necessary to present proof that the donation was previously communicated to and approved by the Ministry of Finance.

Fines and penalties

Fines and other penalties paid due to any infringement, which do not have a contractual basis, including interest, are not accepted as tax-deductible costs.

Taxes

Taxes paid in relation to the activities of a company are tax deductible, excluding CIT itself.

Net operating losses

Carryback of losses is not allowed in Mozambique. On the other hand, losses may be carried forward for a period of five consecutive years.

Payments to foreign affiliates

Any payments to non-residents are allowed as deductible expenses, provided that the amount does not exceed normal rates and that the taxpayer is able to prove that a business transaction was carried out with the non-resident company. The tax authorities may redetermine taxable income if, due to a special relationship between the Mozambican and non-resident companies, certain conditions existed that allowed a calculation of profit that differed from the profit that would have been calculated without the existence of such relationship (i.e. the arm's-length principle).

Group taxation

There are no group taxation provisions available in Mozambique. Each member of a group of companies preparing consolidated accounts for accounting purposes must file separate tax returns in order to be taxed on its profits on a stand-alone basis.

Transfer pricing

The tax authorities may proceed with the necessary corrections for assessing the profits for tax purposes whenever:

- by virtue of special relations between the taxpayer and other entities, different conditions from those that should be normally agreed upon between independent entities have been established, and
- in consequence of those conditions, the profits for accounts purposes are different from those that would have resulted had such special relations not existed.

The corrections above shall be equally applicable whenever the profits for accounts purposes regarding non-resident entities are different from those that should have resulted if the non-resident entity were a separate entity carrying out similar activities in similar conditions and with total independence.

The corrections referred to above will also be applicable to entities that carry out activities simultaneously subject and not subject to the CIT Code, provided that similar evasion regarding such activities is verified.

Whenever these corrections are applicable to one taxpayer of CIT (Taxpayer 1) by virtue of special relations with another taxpayer of CIT or of individual income tax (Taxpayer 2), the adjustments reflecting the corrections made in the calculation of the profits for tax purposes of Taxpayer 1 shall be applicable in the assessment of the profits for tax purposes of Taxpayer 2.

Although the definition of 'special relation' had been previously introduced into the transfer pricing regime foreseen in the CIT Code, the specific transfer pricing regulations were only recently approved and entered into force on 1 January 2018.

This regime contain rules with huge impact in the transactions between related entities, introduces some concepts, and lists the obligations related with information to be provided for transfer pricing purposes. Main topics include the following:

- The concept of 'related parties' for the purpose of transfer pricing is defined in more detail.

- A number of methods are listed to determine the terms and conditions that would be established in compliance with the 'arm's-length principle'.
- Specific rules are established to be observed in the agreements to be entered between related parties.
- The list of information and documentation is established that the taxpayer should obtain, prepare, and maintain to justify the adopted transfer pricing method.

Thin capitalisation

Where loans from related foreign corporations exceed twice the corresponding equity in the borrowing Mozambican corporation, the interest on the excess borrowing is not tax deductible. Thin capitalisation rules are in force.

According to the Mozambican thin capitalisation rules, subsidiaries are considered and treated as thinly capitalised companies if and to the extent that, as at any date of the tax period, any of their relevant debt-to-equity ratios exceed a factor of two.

'Relevant debt-to-equity ratio', within the context of the law, means the ratio between, on one hand, the amount of direct and indirect indebtedness of a Mozambican company towards a specially related non-resident, and on the other, the amount of equity that this non-resident holds in the Mozambican company.

A 'specially related non-resident', for these purposes, is an entity with special links with another, which includes any entity that:

- holds, either directly or indirectly, at least 25% of the share capital of the Mozambican company
- though holding less than 25%, has a significant influence on its management, or
- both taxpayer and non-resident entity are under control of the same entity, which has participation in their share capital, either directly or indirectly.

Under any of these circumstances, interest paid to such specially related non-residents is not allowed as a tax-deductible cost for the Mozambican company in the part that corresponds to the excessive indebtedness, unless the company can prove that it could have obtained the same level of indebtedness at comparable conditions from unrelated parties, taking into account the nature of its business, its sector of activity, dimension, and other relevant criteria.

Controlled foreign companies (CFCs)

Profits obtained by companies residing outside Mozambique and subject therein to a regime that is clearly more favourable shall be allocated to shareholders residing in Mozambique in proportion to their respective shareholding and irrespective of whether or not they are distributed, provided that the shareholder holds a direct or indirect shareholding of at least 25% or at least 10% if more than 50% of a non-resident company's capital is held directly or indirectly by resident shareholders.

A company is considered subject to a clearly more favourable tax regime if residing in a free-tax territory, where income grows free of tax or the effective tax rate is equal to or less than 60% of the Mozambican annual CIT rate, which is 32%.

Tax credits and incentives

Foreign tax credit

Resident companies are allowed to deduct a credit correspondent to a tax paid abroad. The tax credit to be deducted should be equal to the lower of the amount of Mozambican corporate tax imputed to income obtained abroad or the amount of foreign tax effectively paid.

Inbound investment incentives

In addition to the guarantees of ownership and remittance of funds abroad, the Mozambican government also guarantees the concession of tax and customs incentives. The incentives vary depending on whether a company is starting a new venture or rehabilitating one and also on the nature of the project to be developed. The incentives discussed in this section are the generic benefits applicable to standard projects. Certain specific benefits also may be applicable depending on the activities of the industry for the investment project (e.g. agriculture, tourism, science and technology).

Exemption from import duties

An exemption from customs duties and VAT applies upon the importation of capital equipment listed in Section K of the Customs Tariff Schedule.

Tax credit for investment

Investments in new fixed tangible assets used in the operations of an enterprise within the Mozambican territory may benefit from an investment tax credit equal to 5% to 10% of the total investment realised, for a period of five years. This investment tax credit is offset against CIT, up to the total amount of the tax assessment. This incentive does not apply when the investment in tangible fixed assets is with respect to the construction, acquisition, restoration, or extension of buildings, passenger vehicles, furnishings, and articles of comfort and decoration, leisure equipment, advanced technology, or other assets not directly associated with the production activity carried out by the enterprise. When the project is located outside Maputo City, this tax credit is increased to up to 10%.

Advanced technology incentive

The amount invested in specialised equipment classified as advanced technology during the first five years from the date of commencement of activity may be deducted from taxable income for purposes of calculating CIT, up to a maximum of 10% of taxable income.

Professional training incentive

Investment expenditures for professional training of Mozambican workers shall, up to a maximum amount of 5% of the taxable income (10% in case of professional training related to new/high technology equipment), be deductible from taxable income for the purposes of calculating CIT during the first five years from the date of the commencement of such activities.

Exploration incentives

During a period of five years counting from the date of exploration (i.e. the date the implementing company starts the activities approved under the investment project terms of authorisation), the following expenditures may be treated as deductible expenditures for purposes of calculating CIT:

- In the case of undertakings carried out in the City of Maputo, 110% of the value of expenditures for the construction and rehabilitation of roads, railways, airports, telecommunications, water supply, electric energy, and other works of public utility is deductible for tax purposes.
- In the case of undertakings carried out in the rest of the provinces, an amount equal to 120% of the expenditures referred to in the paragraph above is deductible for tax purposes.
- In the case of expenditures for the acquisition for personal ownership of works of art and other objects that are representative of Mozambican culture, as well as activities that contribute to the development of such works, 50% of the expenditures are deductible for tax purposes.

Withholding taxes

Any non-resident entity carrying out economic activities in Mozambique, without being registered as a taxpayer, is liable to a final and definitive 20% WHT that is applied on all income earned. An exception exists for (i) telecommunications and international transport, as well as the respective installation and assembly of equipment made by those same entities, (ii) construction and rehabilitation of production, transport, and distribution of electricity infrastructures in the rural zones under the public projects of rural electrification; and (iii) maritime vessels freight for fishing and coasting activities, all of which are subject to a 10% WHT rate.

Both Mozambican resident and non-resident recipients are liable to tax on dividends at a tax rate of 20%.

Tax treaties

In accordance with Mozambique's DTTs, the following tax rates are applicable to dividends, interest, and royalties:

	WHT (%)			
Recipient	**Dividends**	**Interest**	**Royalties**	**Capital gains on shares**
Non-treaty	20	20	20	20
Treaty:				
Botswana	0/12 (4, 5)	10	10	0
India	7.5	10	10	0
Italy	15	10	10	0
Macau	10	10	10	0
Mauritius	8/10/15 (1, 2, 3)	8	5	0
Portugal	10	10	10	(6)
South Africa	8/15 (1, 3)	8	5	0
United Arab Emirates	0	0	5	0
Vietnam	10	10	10	0

Notes

1. The 8% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
2. The 10% rate applies if the recipient of the dividends is a company that has less than 25% of the share capital in the company that distributes the dividends.
3. The 15% rate applies in all other cases.

4. The 0% rate applies if the recipient of the dividends is a company that has more than 25% of the share capital in the company that distributes the dividends.
5. The 12% rate applies in all other cases.
6. Gains are only taxed in the other state if assets of the entity sold are composed of more than 50% immovable assets.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year may be applied (if previously authorised by the Ministry of Finance) for companies that carry out activities that justify a different year (e.g. held at more than 50% by a company with a different year) or non-resident companies with a PE in Mozambique.

Tax returns

CIT assessment must be prepared by the companies on annual returns, based on the accounting records and on adjustments prescribed by the tax regulations.

The submission of the annual tax return is due by the last working day of May for companies using the calendar year as their tax year. For companies with a tax year that is not coincident with the calendar year, the presentation of the tax return is due by the last day of the fifth month subsequent to the respective year-end.

Payment of tax

Mozambican companies and non-resident companies with a PE in Mozambique must pay CIT as follows:

- In three advance payments (based on 80% of the preceding tax year's CIT), due in May, July, and September of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the fifth, seventh, and ninth months of the respective tax year.
- In three special advance payments (based on 0.5% of the preceding year's turnover less the advance payments made in previous years, which cannot be less than MZN 30,000 or more than MZN 100,000) due in June, August, and October of the respective tax year; or, if the tax year chosen is not coincident with the calendar year, in the sixth, eighth, and tenth months of the respective year.

Final tax should be paid by the last working day of May or the fifth month after the tax year-end in cases where a different tax year is adopted.

Tax audit process

The tax authorities may carry out an inspection whenever necessary. Normally, the inspection occurs after the taxpayer files a refund application or on a random basis.

Statute of limitations

The statute of limitations period is five years, but the company documents must be kept for ten years.

Topics of focus for tax authorities

Based on our experience and through assistance provided to several clients during audit reviews, we noted that the Inspectors are focusing their attention on the following aspects:

- Confirmation of the amounts reported on the monthly VAT forms and the annual tax return to determinate if the figures are the same or not or if there are non-declared sales.
- Confirmation of whether the non-deductible costs were added back to the tax computation for CIT purposes.
- Deductibility of VAT.
- Analysis of supplier invoices to confirm the right of deduction of VAT.
- Analysis of the company's sales for verification of whether there are undisclosed sales.
- Authorisation for electronic invoicing.
- VAT on self-assessment.
- Mandatory books, namely, ledger (*diário*), day book (*razão*), and inventory and balance (*inventário e balanço*).
- WHT on payments to non-resident entities.
- Thin capitalisation.

Significant developments

Union Taxation Law 2018 was enacted on 30 March 2018, and the provisions of the Law are effective from 1 April 2018. In particular, the Union Taxation Law 2018 has introduced changes to the fiscal year-end of taxpayers, commercial tax, and specific goods tax regime.

Taxes on corporate income

Foreign investors may register their companies under the Myanmar Companies Act (CA) or in conjunction with the Myanmar Investment Law (MIL) or Myanmar Special Economic Zone Law (Myanmar SEZ Law). The new MIL 2016 was enacted on 18 October 2016. The new MIL is a consolidation of the Myanmar Citizen Investment Law (2013) and the Myanmar Foreign Investment Law (MFIL) (2012). The Myanmar Citizen Investment Law and MFIL have been repealed with effect from 18 October 2016. New rules governing the implementation of the new MIL were enacted on 30 March 2017. Investment permits issued under the old investment laws continue to be valid.

The differences between companies registered under the CA and the Myanmar Investment Commission (MIC)/SEZ are in relation to their eligibility for tax incentives and longer land use terms, as well as minimum foreign share capital requirements.

Generally, resident companies are taxed on a worldwide basis, and, as such, income from sources outside Myanmar is taxable.

Non-resident companies are taxed only on income derived from sources within Myanmar. Income received from any capital assets within Myanmar and from any source of income within Myanmar is deemed to be income received within Myanmar. The income is generally subject to tax under the normal rules for residents.

A company registered under the MIC/SEZ is entitled to enjoy certain exemptions and relief from taxes (*see the Tax credits and incentives section for details*).

Type of taxpayer or income	Tax rate (%)
Companies incorporated in Myanmar under the Myanmar CA or Special Companies Act	25
Enterprises operating under the MIC or SEZ	25
Non-resident foreign organisations registered under the Myanmar CA or Special Companies Act, such as a branch of a foreign company	25

Local income taxes

There is no separate corporate income tax at the local level.

Corporate residence

A resident company is a company as defined and formed under the Myanmar CA or any other existing law of Myanmar.

A non-resident company is one that is not formed under the Myanmar CA or any other existing law of Myanmar. Generally, foreign branches registered in Myanmar are deemed to be non-resident companies.

Permanent establishment (PE)

Currently, there is no definition of a PE under the Myanmar Income Tax Act. Under the Myanmar Income Tax Act, the Myanmar tax authorities are empowered to collect income tax from a non-resident foreigner on its income sourced within Myanmar. In current practice, the Myanmar tax authorities seek to collect taxes from a non-resident foreigner on its income received from Myanmar by way of a withholding tax (WHT) mechanism, regardless of whether the foreigner has a PE or taxable presence in Myanmar or not. The term 'PE' may be defined in the tax treaties that Myanmar has with other countries. Subject to the relevant tax treaty, a foreigner who is tax resident of the treaty country may not be subject to Myanmar taxes if it does not have a PE in Myanmar.

Other taxes

Value-added tax (VAT)

There is no VAT in Myanmar.

Commercial tax

Commercial tax, at rates ranging from 0% to 8%, is levied as a turnover tax on goods and services. Generally, commercial tax is imposed at the rate of 5%. The commercial tax that a business charges and collects is known as output tax, which has to be paid to the Myanmar tax authorities. Commercial tax incurred on business purchases and expenses are known as input tax. Businesses that are registered for commercial tax can claim commercial input tax if certain conditions are satisfied.

Commercial tax is imposed on a wide range of specified goods and services traded, produced, or rendered within the country, based on the sales proceeds, and on imported goods (*see Customs duties below for details*). There are 86 goods exempted from commercial tax.

All services are subject to 5% commercial tax except for 30 types of services that are specifically exempt from commercial tax (e.g. life insurance, banking and financial services that are operated with the permission of the Central Bank of Myanmar, microfinance, public transportation, publishing services).

No commercial tax is imposed if the proceeds from production and sales of goods, receipts from services, or proceeds from trading for a financial year are not more than 50 million Myanmar kyats (MMK).

Commercial tax is zero-rated on all exports, except for electricity (8%) and crude oil (5%).

Companies registered under the MIC/SEZ may, at the discretion of the MIC/SEZ Committee, be granted exemption from commercial tax during certain stipulated periods (*see the Tax credits and incentives section for details*).

Specific goods tax

The Specific Goods Tax Law replaces commercial tax on a list of specific goods that are imported into Myanmar, manufactured in Myanmar, or exported to a foreign country. The list of specific goods include cigarettes, tobacco leaves, virginia leaves, cheroots, cigars, pipe tobaccos, and betel-chewing tobacco; beers, wine, and alcoholic beverages; wood logs and wood cuttings; raw jade, rubies, sapphires, emeralds, diamonds, and other precious gems; polished jade, rubies, sapphires, emeralds, diamonds, and other precious gems; jewellery studded with polished jade, rubies, sapphires, emeralds, diamonds, and other precious gems; vans, saloons, sedans and estate wagons, and coupe cars except double cab 4-door pickups from the range of 1501 cc to 4001 cc and above; and kerosene, petrol, diesel, and aviation jet fuel, as well as natural gas. The specific goods tax rates range from 5% to 80%.

Specific goods tax is zero-rated on all exports, except for natural gas, wood logs and wood cuttings, raw gemstones, and processed gemstones. The tax rates range from 5% to 15%.

Under the Specific Goods Tax Law, only a manufacturer of special goods can claim and offset the specific goods tax incurred on purchase of raw materials/semi-finished goods against the specific goods tax charged on sale of specific goods.

On top of special goods tax, commercial tax of 5% will also be imposed.

Companies registered under the MIC/SEZ may, at the discretion of the MIC/SEZ Committee, be granted exemption from internal taxes, which may cover specific goods tax, during certain stipulated periods (*see the Tax credits and incentives section for details*).

Customs duties

Customs duty is levied under the Customs Tariff of Myanmar (2017) at rates of up to 40%.

Companies registered under the MIC/SEZ may, at the discretion of the MIC/SEZ Committee, be granted exemption from customs duties during certain stipulated periods (*see the Tax credits and incentives section for details*).

Excise duties

Excise duty is levied on alcoholic drinks and is collected by the General Administration Department under the Ministry of Home Affairs.

Property taxes

Immovable property (land and buildings) in Myanmar is subject to property tax.

Stamp duties

Stamp duty is levied on various types of instruments, and some rates are given below:

- 2% of the amount or value of the consideration for conveyances of properties, for the sale or transfer of immovable property except those in the Nay Pyi Taw, plus an additional 2% for a consideration equal to the market value of the property. Conveyance of immovable properties located in Yangon is subject to an additional duty of 2% pursuant to Yangon Development Trust Act 1921. Conveyance of immovable properties located in Nay Pyi Taw is subject to an additional duty of 2% pursuant to Nay Pyi Taw Development Law 2009.
- 0.1% of share value for the transfer of shares.
- 0.5% of the amount or value secured for bonds.
- 0.5% of the annual value of rent for immovable properties lease agreements between one and three years, and 2% of the average annual value of rent where the term of the lease agreement is more than three years. 2% stamp duty will also be applicable on lease premium.

Capital gains taxes

Capital gains tax is levied on gains from the sale, exchange, or transfer of capital assets (i.e. any land, building, vehicle, and any capital assets of an enterprise, which include shares, bonds, and similar instruments).

Capital gains from the sale, exchange, or transfer of capital assets in the oil and gas sector are taxed at different rates from those in other sectors.

Type of taxpayer	Tax rate (%)
Resident companies	10
Non-resident companies	10
Transfer of shares in an oil and gas company or interest in production sharing contracts	40 to 50

Tax returns for capital gains must be filed within 30 days from the date of disposal of the capital assets. Capital gains tax payments are required to be made within 30 days from the date of disposal of the capital assets. The date of disposal refers to the date of execution of the deed of disposal or the date of delivery of the capital assets, whichever is earlier.

Registration taxes

There is a registration fee of MMK 250,000 payable to the Directorate of Investment and Company Administration for setting up a company or a branch in Myanmar. In addition to the registration fee, there may be other administrative expenses or stamp duty payable on the company's memorandum of agreement and memorandum of understanding.

Payroll taxes

An employer is responsible for deducting income tax due from salaries at the time of payment to employees and must pay the amount within seven days from the date of deduction. If the employer fails to deduct and pay the tax, the employer is deemed to be a defaulter and held responsible for such payment. In addition, the employer is also responsible for filing the statement of annual salary within three months after the end of the income year, and failure to file by the stipulated deadline (i.e. 30 June every year) may result in a penalty of 10% of the amount of tax to be deducted on annual salaries.

Social security contributions

An employer with five or more employees is required to provide Social Security Scheme benefits to those workers, such as health and social care insurance and insurance against employment-related injuries.

The rates of contribution by employees and employers are 2% and 3% of the total salaries and wages, respectively. The contribution must be made in Myanmar kyats for all currencies that the salaries are paid in within 15 days of the following month, using the exchange rate prescribed by the Myanmar Foreign Trade Bank (MFTB) on the first day of the relevant month.

The maximum contribution is limited to MMK 9,000 by the employer and MMK 6,000 by the employee.

Contributions made by the employees are deductible for tax purposes in the hands of the employees. The employer is obligated to withhold the employees' contributions from their salaries.

Branch income

Generally, foreign branches are deemed to be non-resident companies. Non-resident companies are taxed only on income derived from sources within Myanmar. Non-resident companies pay tax at the same rate as resident companies. This means a branch of a foreign company will pay tax at the 25% rate. The income is generally subject to tax under the normal rules for residents.

Income determination

Income is categorised as income from a profession, business, property, capital gains, other sources, and undisclosed sources, as well as income that has escaped tax assessment. Income from capital gains is assessed separately.

Tax is levied on total income, after the deduction of allowable expenditure and depreciation.

The Ministry of Planning and Finance, with the approval of the government, may, by notification, prescribe, amend, and add assessable income and rates of income tax.

Inventory valuation

There are no prescribed inventory valuation methods for tax purposes.

Capital gains

Income from capital gains is assessed separately. *See Capital gains tax in the Other taxes section for details*.

Dividend income

Myanmar has a one-tier corporate tax system, under which shares of profits received by a Myanmar taxpayer from an association of persons (i.e. partnerships, joint ventures, companies, etc.) are exempted from income tax.

Interest income

Interest income and income from movable property are treated as business income.

Royalty income

There is no specific provision under the current Myanmar Income Tax Law governing the taxability of royalty income. Royalty income is generally treated as business income.

Foreign income

Resident companies are taxed on a worldwide basis, and, as such, income from sources outside Myanmar is taxable in Myanmar.

Non-resident companies are not taxed on their foreign income.

There is no deferral regime available to foreign income in Myanmar.

Deductions

In respect of business income, deductions are allowed for expenditure incurred for the purpose of earning income.

Non-deductible items include capital expenditure, personal expenditure, expenditure that is not commensurate with the volume of business, irrelevant expenses and expenses incurred not for production of income, payments made to any member of an association of persons other than a company or a cooperative society, and inappropriate expenditure.

Depreciation and amortisation

Income from movable property is considered as business income, and depreciation allowance for the cost of such movable property can be deducted. Income from immovable property is generally computed in the same way as business income, except that no depreciation allowance can be deducted.

Technically, a taxpayer entity is required to claim tax depreciation on the qualifying assets used for its business purposes based on rates prescribed under the Myanmar Income Tax Law, using a prescribed tax depreciation claim form. A taxpayer is entitled to full-year tax depreciation in the year the asset is acquired. On the other hand, no tax depreciation is allowed in the year the asset is disposed of.

The tax depreciation rates of fixed assets, as prescribed under the Income Tax Regulations, are as follows:

- Buildings: 1.25% to 10%.
- Furniture and fittings installed in buildings: 5% to 10%.
- Machinery and plant: 2.5% to 20%.
- Various kinds of vehicles: 12.5% to 20%.
- Any fixed assets that are not prescribed: 5%.

Goodwill

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of goodwill.

Start-up expenses

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of start-up expenses. Generally, any operating expenses incurred before the commencement of business are not tax deductible. Myanmar tax authorities view pre-commencement expenses as capital in nature and not deductible for tax purposes. In current practice, capital expenditures incurred prior to the commencement of business should be allowed for tax depreciation where they relate to qualifying fixed assets.

Interest expenses

There is currently no specific provision in the Myanmar Income Tax Law indicating the tax treatment of interest expenses. In current practice, interest expenses and the related financing costs are likely deductible only in the year these expenses are incurred, provided that the interest expenses incurred are commensurate with the volume of business or benefits that the taxpayer received. Interest expenses incurred before the commencement of business generally are not tax deductible or tax depreciable.

Bad debt

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of bad debt.

Charitable contributions

Deductible charitable donations are limited to those made to the approved charitable organisations/activities and are subject to an overall limitation of 25% of total income.

Fines and penalties

Fines and penalties are generally not deductible as they are not incurred in the production of business income.

Taxes

There is no specific provision under the current Myanmar Income Tax Law governing the tax deductibility of taxes paid.

Net operating losses

Ordinary losses

Losses from any source may be set off against income accruing from any other sources in that year, except where the loss is from capital assets or a share of loss from an association of persons. Losses that are not fully deducted in a year can be carried forward and set off against profits in the next three consecutive years.

There is no provision for the carrying back of losses.

Capital losses

Capital losses and a share of loss from an association of persons cannot be set off against income from other sources or carried forward.

Payments to foreign affiliates

A Myanmar corporation can claim a deduction for royalties, management service fees, and interest charges paid to affiliates, provided that these payments are commensurate with the volume of business.

Group taxation

There is no group taxation regime in Myanmar.

Transfer pricing regime

There are currently no transfer pricing rules in Myanmar.

Thin capitalisation rules

Generally, there is currently no specific safe harbour with respect to a debt-to-equity ratio for Myanmar tax purposes. The Central Bank of Myanmar (CBM) has set a maximum debt-to-equity ratio of 3:1 or 4:1 (as part of the criteria for a Myanmar entity to obtain a foreign loan).

Controlled foreign company (CFC) regime

There are currently no CFC rules in Myanmar.

Tax credits and incentives

Myanmar Investment Law (MIL)

The new MIL 2016 was enacted on 18 October 2016. The new MIL is a consolidation of the Myanmar Citizen Investment Law (2013) and the MFIL (2012). The Myanmar Citizen Investment Law and MFIL have been repealed with effect from 18 October 2016.

The list of tax benefits under the new MIL are as follows:

1. For investments in sectors listed in a notification to be issued by the Commission in order to promote investment, exemption from corporate tax for seven, five, or three years, depending on whether the investment takes place in an underdeveloped, moderately developed, or adequately developed region or state. The designation of these zones are subject to change from time to time, depending on the development in the respective regions.
2. Income tax exemptions shall only be granted to sectors that the Commission has specified as sectors that are promoted for investments.
3. The Commission may allow more favourable exemptions and reliefs for locations where Myanmar citizen-owned businesses are operated. The government may also provide subsidies, funding, capacity building, and training to Myanmar citizen investors and citizen-owned small and medium-sized enterprises.
4. Exemption from customs duties or other internal taxes or both on machineries, equipment, instruments machinery components, spare parts, construction materials not available locally, and materials used in the business that are imported as they are actually required, during the construction period, or during the preparatory period of the investment business.

5. Exemption or relief from customs duties and/or other domestic taxes on raw materials and semi-finished goods that are imported for the production of export goods by wholly export investment businesses.
6. Right to obtain a refund, based on the amount of exported goods, of customs duties and/or other domestic taxes paid at the time of importation of raw materials and semi-finished goods that are used to manufacture the products in the country and re-export them.
7. If the volume of investment is increased and the original investment business is expanded during the period of investment, exemption or relief from customs duties or other internal taxes or both on machineries, equipment, instruments, machinery components, spare parts, materials used in the business, and construction materials not available locally, which are imported as they are actually required for use in the business that is being expanded.
8. Exemption or relief from income tax if the profits obtained from the investment business is reinvested in the same business or in a similar type of investment business within one year.
9. Right to deduct depreciation for the purpose of income tax assessment, after computing such depreciation from the year of commencement of commercial operation based on an accelerated depreciation rate (which is less than the stipulated lifetime of the asset).
10. Right to deduct expenses from assessable income incurred for research and development (R&D) related to the investment activities/business required for the development of the country and carried out in the country.
11. Foreign investors will pay income tax at the rates applicable to citizens residing within the country.

Union of Myanmar Foreign Investment Law (MFIL) incentives

Under the MFIL, companies registered under the MFIL that have obtained permits from the MIC were entitled to the following special benefits and tax incentives, which were granted at the MIC's discretion:

1. Exemption from income tax for up to five consecutive years for an enterprise. The exemption may be extended for a further reasonable period, depending on the success of the enterprise.
2. Exemption or relief from income tax on profits of a business that are maintained in a reserve fund and subsequently re-invested in Myanmar.
3. The right to deduct depreciation of machinery, equipment, building, or other capital assets used in the business at rates prescribed by the MIC.
4. Relief from income tax for up to 50% of the profits accrued from the export of manufactured goods.
5. The right to pay income tax on the income of foreigners at the rates applicable to citizens residing within the country.
6. The right to deduct from taxable income R&D costs that are necessary for the country.
7. The right to carry forward tax losses for up to three consecutive years, provided the losses are sustained within two years from the end of the tax exemption in (1) above.
8. Exemption or relief from customs duty and/or other internal taxes on imported machinery, equipment, instruments, machinery components, spare parts, and materials used in the business, which are required for use during the period of construction.

9. Exemption or relief from customs duty or other internal taxes on imported raw materials for the first three years of commercial production following the completion of construction.
10. If the investor increases the amount of investment and expands the business within the approved timeframe, it may enjoy exemption and/or relief from customs duty or other internal taxes on machinery, equipment, instruments, machinery components, spare parts, and materials that are imported for the expansion of business.
11. Exemption from commercial tax on goods that are manufactured for export.

Except for item (1) above, the other exemptions and reliefs are subject to discretion of the MIC.

Special economic zones (SEZs)

In addition to foreign investment under the MFIL, foreign investors may invest under the Myanmar Special Economic Zone Law of 2014 (Myanmar SEZ Law).

The Myanmar SEZ Law is a basic law for any SEZ within Myanmar. The main regulatory body handling foreign investment under the Myanmar SEZ Law is the Central Body for the Myanmar SEZ.

The Myanmar SEZ Law contains provisions relating to the exempted zone, business promoted zone, other zone, exempted zone business, other business, developers and investors, exemptions and reliefs, restrictions, duties of developers or investors, land use, banks and finance management and insurance business, management and inspection of commodities by the customs department, quarantine, labour and guarantee of non-nationalisation, dispute resolution, WHT, bank and financial management and insurance business, etc.

Incentives under the Myanmar SEZ Law include:

For investors:

- Income tax holidays for the first seven years starting from the date of commercial operation in respect of those investment businesses operated in an exempted zone or exempted zone businesses.
- Income tax holidays for the first five years starting from the date of commercial operation in respect of those investment businesses operated in a business promoted zone or other business in a promoted zone.
- 50% income tax relief for the investment businesses operated in an exempted zone and a business promoted zone for the second five-year period.
- For the third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported for investors in exempted zones; whereas, for investors in prompted zones, exemption on customs duty and other taxes for the first five years in respect of machinery and equipment imported that are required for construction starting from the date of commercial operation, followed by 50% relief of customs duty and other taxes for a further five years.
- Carry forward of loss for five years from the year the loss is sustained.

For developers:

- Income tax holidays for the first eight years starting from the date of commercial operation.
- 50% income tax relief for the second five-year period.
- For the third five-year period, 50% income tax relief on the profits of the business if they are maintained for re-investment in a reserve fund and re-invested therein within one year after the reserve is made.
- Exemption on customs duty and other taxes for raw materials, machinery and equipment, and certain types of goods imported.
- Carry forward of loss for five years from the year the loss is sustained.

Land use may be granted under an initial lease of up to 50 years and renewable for a period of an additional 25 years. Developers/investors may rent, mortgage, or sell land and buildings to another person for investment purposes within the term granted with the approval of the management committee concerned.

Investors seeking to register an entity under the SEZ need to obtain an investment permit from the relevant SEZ Management Committee.

Foreign tax credit

There is no provision for unilateral relief. Relief may be available pursuant to a tax treaty, but the application of the tax treaties is at the sole discretion of the Ministry of Planning and Finance.

Withholding taxes

Any person making the following payments is required to withhold income tax at the time of payment at the rates listed below. The tax withheld must be paid to the Internal Revenue Department (IRD) within seven days from the date of withholding.

Tax withheld from payments to residents (and branches registered in Myanmar) will be set off against the tax due on their final assessments. Tax withheld from payments to non-resident companies (except the branches registered in Myanmar) is a final tax.

The application of the tax treaties is at the sole discretion of the Ministry of Planning and Finance.

For payments made by state organisations, state enterprises, development committees, co-operative societies, foreign companies, foreign enterprises and organisations, local companies, and under an existing law for purchase of goods, work performed, or supply of services and hiring within the country under a tender, contract, quotation, or other modes, the WHT rate is 2% if the payment is made to a resident and 2.5% if it is made to a non-resident.

	WHT (%)		
Recipient	**Dividends (1)**	**Interest**	**Royalties**
Resident national or resident foreigner	0	0	10
Non-resident corporations and individuals:			
Non-treaty	0	15	15
Treaty:			

Recipient	WHT (%) Dividends (1)	Interest	Royalties
India	0	10 (2)	10
Korea, Republic of	0	10 (2)	10/15 (3)
Laos	0	10	10
Malaysia	0	10 (2)	10
Singapore	0	8/10 (2, 4)	10/15 (3)
Thailand	0	10 (2)	5/10/15 (5)
United Kingdom	0	Not covered	0 (6)
Vietnam	0	10 (2)	10

Notes

1. There is no WHT on dividends, branch profits, and share of profits of an association of persons that have been taxed.
2. Exempt if paid to the government.
3. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
4. Lower rate if received by a bank or a financial institution.
5. The 5% rate applies for payments in connection with copyrights of literary, artistic, or scientific work, and the 10% rate applies to payments for services of a managerial or consultancy nature, and for information concerning industrial, commercial, or scientific experience.
6. Exempt if the amount is fair and reasonable.

Tax administration

Taxable period

The taxable period of a company is the same as its financial year (income year), which is from 1 April to 31 March. Income earned during the financial year is assessed to tax in the assessment year, which is the year following the financial year. Under the Union Taxation Law 2018, it is stated that the tax fiscal year for 2018/19 will remain the same (i.e. 1 April to 31 March) for all taxpayers except state-owned enterprises, which are required to file tax returns based on the budget year ending 30 September starting 2018/19, from 1 October 2018.

It is also stated in the Union Taxation Law 2018 that the fiscal year for Specific Goods Tax Law, Commercial Tax Law, and Income Tax Law shall be the same for all taxpayers, including both private taxpayers and state-owned enterprises, starting from 1 October 2019. In other words, all taxpayers are required to follow the new financial period of 30 September year-end beginning 1 October 2019. At this juncture, there is no guideline issued by the IRD/Directorate of Investment and Company Administration (DICA) addressing transition issues regarding the change of financial year-end for 2019/20 for private taxpayers. A private taxpayer is likely to have a financial period from 1 April 2018 to 31 March 2019 followed by a financial period from 1 April 2019 to 30 September 2019.

Tax returns

In general, annual income tax returns must be filed within three months from the end of the financial year.

Tax returns for capital gains must be filed within 30 days from the date of disposal of the capital assets.

If a taxpayer discontinues one's business, returns must be filed within one month from the date of discontinuance of business.

The failure of a taxpayer to file income tax returns, knowing that assessable income has been obtained, is deemed to have 'fraudulent intention'.

Payment of tax

Advance corporate tax payments are made in quarterly instalments within ten days from the end of the relevant quarter throughout the income tax year based on the estimated total income for the year. The advance payments and any taxes withheld are creditable against the final tax liability. The date for settling the final tax liability is specified in the notice of demand issued by the IRD.

Capital gains tax needs to be paid within 30 days from the date of disposal of capital assets.

Tax audit process

Under the Myanmar Income Tax Law, if it is found that there is a fraudulent intention to evade tax, the assessment or reassessment of income tax can be made at any time on the income that has escaped assessment of tax.

Failure by a taxpayer to file a return of income knowing that assessable income has been obtained, failure to comply with the notice of the IRD to submit accounts and documents, including the tax return and profit and loss accounts within the time prescribed, or submitting forged instruments and other documents are included within the meaning of fraudulent intention. If the tax authority in the course of investigation finds that a taxpayer has concealed income or particulars relating to income, the taxpayer may be permitted to fully disclose the facts within the specified time. In addition, the taxpayer must pay a penalty equal to 100% of the tax increased on account of the concealment. If the taxpayer fails to disclose the particulars within the specified time or discloses less than the income concealed, the taxpayer will also be subject to prosecution, in addition to paying the tax and penalty. If the taxpayer is found guilty, the taxpayer may be punishable with imprisonment for between three to ten years.

Statute of limitations

The statute of limitation to raise an assessment is three years after the financial year-end. It does not apply in cases of fraudulent default. Mere filing of the income tax return and payment of advance tax in time does not constitute a final tax assessment.

Topics of focus for tax authorities

The following issues are currently being focused on by the tax authorities:

- Timely filing of tax returns and payment of taxes (i.e. corporate tax, commercial tax, employer tax, specific goods tax, etc.).
- Tax deductibility of donations for corporate tax purposes.
- WHT compliance on both domestic and cross-border transactions.
- Stamp duty compliance (i.e. the application of the duty rates and timeliness of payment).
- Related-party transactions (e.g. payment of management fee to head office, shareholder loans).

Significant developments

There have been no significant corporate tax developments in Namibia during the past year.

Taxes on corporate income

Namibia has a source-based tax system, which means that income from a source within Namibia or deemed to be within Namibia will be subject to tax in Namibia, unless a specific exemption is available.

Income earned by foreign companies from a source within or deemed to be within Namibia will be subject to tax in Namibia. In such cases, the foreign entity must determine whether it is obligated to register a local entity or branch. A foreign company is required to register a local company (local subsidiary) or an external company (branch) if it has established a place of business in Namibia.

In the event that Namibia has entered into a double tax agreement (DTA) with the country where the foreign company resides, such entity will only be taxable in Namibia if it has established a permanent establishment (PE) in Namibia. If a PE exists, only the portion of income attributable to the PE will be subject to tax in Namibia.

Non-residents who do not have a place of business in Namibia may, however, be subject to withholding taxes (WHTs). *See the Withholding taxes section for more information.*

Calculation of taxable income

Gross income	The total amount, in cash or otherwise, received by or accrued to any person from a source within, or deemed to be within, Namibia, excluding receipts of a capital nature (provisions for specific inclusions in gross income and amounts deemed to be from a Namibian source exist).
Less: Exemptions	The Income Tax Act provides for certain amounts to be specifically exempt from tax.
Equals: Income	
Less: Deductions	Expenditures and losses actually incurred to generate income may be deducted, provided that these expenses are not of a capital nature.
	The Income Tax Act specifically provides for certain expenditures to be deductible and allows a deduction for capital allowances.
	Only expenses incurred to generate 'income' may be deducted. Expenses incurred to generate income exempt from tax are not deductible. Apportionment should be considered when expenses are incurred to generate both income and exempt income.
Equals: Taxable income	Taxable income is taxed at the corporate tax rate *as set out under the Tax rates section below.*

Namibia, Republic of

Tax rates

The corporate tax rates are summarised below:

Entity	2017/18 tax rate (%)
Domestic companies and close corporations (excluding entities mentioned below)	32
Branches of foreign companies	32
Registered manufacturers (only applicable for the first ten years of registration)	18
Diamond mining companies and companies that render services to such companies in connection with diamond mining	55
Mining companies (other than diamond mining companies) and companies that render services to such companies in connection with mining	37.5
Long-term insurers (the rate is applied to gross investment income)	12.8
Petroleum income tax rate	35

Local income taxes

Namibia does not levy income taxes at the local, state, or provincial levels.

Corporate residence

The Namibian tax system is based on source and not on residency. Income derived or deemed to be derived from sources within Namibia are subject to tax.

The source is determined as the place where income originates or is earned, not the place of payment. If goods are sold pursuant to a contract entered into within Namibia, the source of income is deemed to arise in Namibia, regardless of the place of delivery or transfer of title.

Certain types of income arising outside Namibia may, in the hands of a domestic company, be deemed to arise in Namibia and be taxed as such. Examples are interest and certain copyright royalties arising outside Namibia.

Permanent establishment (PE)

The term 'permanent establishment' is not defined or recognised in the Income Tax Act, but it is included in all DTAs concluded with Namibia.

A PE includes a fixed place of business. The establishment of a local entity or branch will usually create a PE, although the provisions of the related tax treaty should be considered.

Except for the PE concept embodied in the tax treaties and WHT on service provisions, corporate residence is of little tax significance since transactions are taxed on a source basis.

For the list of DTAs, please see the Withholding taxes section.

Other taxes

Value-added tax (VAT)

VAT is a transaction tax, and the implications will vary for different transactions. Some transactions are taxed at a rate of 15% or 0% while other transactions are exempt from VAT. Input tax deductions may be claimed, subject to certain provisions.

VAT is levied on every taxable supply by a registered person. A taxable supply means any supply of goods or services in the course or furtherance of a taxable activity. A taxable activity means any activity that is carried on continuously or regularly in Namibia that involves the supply of goods or services for consideration.

VAT is payable on all imports for home consumption in Namibia, subject to certain exemptions (e.g. in terms of a technical assistance agreement, donations to the state, goods of which the local supply is zero-rated).

Import VAT is payable on the greater of the free on board (FOB) value plus 10% or the market value. The payment may be deferred in terms of an import VAT account registered with the Directorate of Inland Revenue to the 20th day of the month following the month of importation. Penalties of 10% per month or part of a month and 20% interest on outstanding import VAT, according to the Customs Asycuda reports on import VAT account numbers, are levied by the Directorate of Inland Revenue.

A company/branch is required to register for VAT if it supplies goods or services on a regular basis for consideration and if its taxable supplies (standard rated and zero-rated supplies) exceed 500,000 Namibian dollars (NAD) in any 12-month period.

The Value-added Tax Act, 2000 (as amended) also makes provision for voluntary VAT registration, provided that taxable supplies exceeded or will exceed NAD 200,000 in any 12-month period and the applicant is in good tax standing, has a fixed place of business, and will keep acceptable accounting records.

A registered VAT vendor is entitled to deduct input tax credits paid in the course of taxable supplies made to such person, provided that a tax invoice is available to support the input tax deduction. It is also important to take note of deemed input tax deductions and prohibited input deductions. Import VAT paid may be deducted only as input tax if the import was in furtherance of a taxable activity and the required documentation (e.g. stamped customs entries) is held by the importer.

VAT returns are due within 25 days following the month to which the VAT relates.

The Inland Revenue system automatically selects VAT periods for audits. An audit will focus on deposits made into bank statements and whether VAT was charged as required. It will also focus on whether tax invoices meet the criteria as set out in the VAT Act.

Shareholders of companies and members of close corporations may be held liable jointly or severally for VAT debts of the company or close corporation.

Customs and excise duties

Namibia is a member of the Southern African Customs Union (SACU), and customs duties are not levied on intra-SACU trade (i.e. between Botswana, Lesotho, Namibia, South Africa, and Swaziland).

Customs duties are payable according to the Common Customs Tariff of SACU on imports from outside SACU. Preferential duty rates apply on imports from Southern African Development Community (SADC) countries, while goods may be imported free of customs duties from Zimbabwe in terms of the Namibia-Zimbabwe Free Trade Agreement.

Excise duties are levied on local production of excisable products (e.g. cigarettes, liquor, fuel) and are included on most excisable products imported from another SACU country in terms of the duty at source procedures. Identical excise duty rates are applied throughout the SACU. Importation of excisable products from outside the SACU is subject to customs duties and specific customs duties.

Current specific excise/customs duty rates for the above-mentioned products are as follows:

- Cigarettes: NAD 7.76/10 cigarettes.
- Beer: NAD 95.03/litre absolute alcohol (AA).
- Spirits (whisky, rum, brandy, gin, vodka, etc.): NAD 190.08/litre AA.
- Petrol: 3.909 cents/litre.
- Diesel and biodiesel: 3.817 cents/litre.
- Illuminating kerosene (paraffin): 3.817 cents/litre.

Namibia intends to introduce additional duties on certain excisable products at a rate of 5%. Enabling legislation has not been drafted yet.

Ad valorem excise/customs duties are levied on certain products (e.g. motor vehicles, perfumes) in addition to the normal customs duties.

Ad valorem excise/customs duty rates are as follows for the above-mentioned goods:

- Motor vehicles: ([0.00003 x A] - 0.75)%, with a maximum of 25%, where 'A' is the recommended retail price, exclusive of VAT.
- Perfumes: 7%.

Customs fuel levies are payable on petrol, diesel, and illuminating kerosene. The current customs fuel levies are as follows:

- Petrol: NAD 0.25/litre.
- Diesel: NAD 0.25/litre.
- Illuminating kerosene (paraffin): NAD 0.25/litre.

An increase in fuel levies of another NAD 0.25/litre was announced by the Minister of Finance during March 2018, but legislation has not been promulgated yet in this regard.

Fuel levies payable to the Namibian Road Fund Administration (RFA) may be claimed back for certain non-road operations (e.g. mining, farming, construction) under certain conditions (e.g. NAD 0.9 of the current RFA fuel levy of NAD 1.14 used in mining operations may be claimed back from the RFA).

Surety in the form of a provisional payment, bank, or insurance guarantee is required by Customs on most temporary imports to cover import VAT and customs duties (if applicable).

It is possible to import goods that are subject to customs duties into registered Customs' bonded warehouses, where goods are kept for later use. In this case, the payment of duties may be deferred until the goods are taken out of the bonded warehouse for home consumption or acquitted if the goods are subsequently exported.

Namibia has introduced the AsycudaWorld customs clearing system, which is a web-based, Java-enabled system utilised at points of entry. All land border posts, airports, and harbours are linked to the AsycudaWorld system.

Property taxes

Property taxes are levied by municipalities based on municipal valuations of properties.

Transfer duty

Transfer duty is payable at 12% of the acquisition value where property is acquired by non-natural persons (a sliding scale applies to property purchases by natural persons). While it is normally payable by the buyer, the agreement for the sale of the property may determine the person liable to pay these costs.

Amendments to the Transfer Duty Act were proposed to include transfer duty on the sales of shares/members interest in property/mining right-owning entities. These amendments have not been enacted or promulgated per the Government Gazette.

Stamp duty

Certain transactions may attract stamp duty. The amount of stamp duty payable differs and is based on the nature of every individual transaction.

The basic transactions can be summarised as follows:

Transaction	Stamp duty
Agreements or contracts (other than those where duty is specifically provided for in the Act)	NAD 5
Lease agreement or lease	The stamp duty will be based on lease payments, together with additional considerations specified in the lease agreement
Transfer or issue of marketable securities and other share transactions	NAD 2 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction
Transfer deed relating to immovable property purchased	NAD 12 for every NAD 1,000 or part thereof of the value/consideration, depending on the specific transaction

Additional stamp duty of NAD 5 for every NAD 1,000 of debt secured is payable on the registration of a bond over immovable property.

Annual duty

Annual duty is levied in terms of the Companies Act at an amount of NAD 4 for every NAD 10,000 (or part thereof) of the issued share capital of a company, with a minimum duty of NAD 80 *per annum*. Issued share capital includes ordinary shares, share premium, and preference shares.

Since a branch does not issue share capital, the issued share capital of the head office will be used to calculate the annual duty payable in Namibia.

Payroll taxes

Any remuneration paid by an employer to an employee will place an obligation on the employer to withhold employee taxes. The employee taxes are due on the 20th day of the month following the month during which the payment was made. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Namibia's Individual tax summary at www.pwc.com/taxsummaries.*

Late payment of employee taxes will result in penalties of 10% per month and interest of 20% *per annum*. Both penalties and interest are limited to the amount of tax outstanding.

Social security contributions

Social security contributions are payable by the employer for employees working in Namibia. Social security is based on a principle of 50/50 contributions from employers and employees. It is calculated at 0.9% of earnings, with a minimum monthly contribution of NAD 2.70 and a maximum monthly contribution of NAD 81 each (i.e. the total maximum monthly contribution of both the employer and the employee will amount to NAD 162).

Workmen's compensation

Under the Employees Compensation Act, employers are required to contribute to a fund that provides cash benefits for industrial injury, disability, and death. Contribution rates vary according to inherent occupational risk, from less than 1% in most low-risk commercial/administrative occupations to 8% for high-risk sectors (drilling, tunnelling, and rock-blasting). Employees whose annual remuneration exceeds NAD 81,300 are normally excluded from coverage.

Branch income

Branch income that is received or accrued from a source within, or deemed to be within, Namibia is taxable in Namibia based on the normal corporate tax rules.

A branch is regarded as an extension of its foreign head office. A branch may, therefore, not deduct fees paid to its foreign head office (unless a tax treaty provides for such a deduction), as it is argued that a branch cannot transact with itself. Reimbursement of actual expenses may, however, be deducted, subject to the normal deduction rules.

Transfer pricing rules apply to transactions between a branch and cross-border related parties.

Income determination

Inventory valuation

Inventory is valued at cost for tax purposes in Namibia.

The last in first out (LIFO) basis of valuation is only accepted if:

- written consent was obtained from the Minister of Finance before such taxpayer renders one's income tax return for the first year of assessment for which the LIFO basis was adopted by the taxpayer, and
- various conditions are met by the taxpayer as determined by the Minister of Finance.

Capital gains

Other than profits on the sale of mining and petroleum licences/rights, and the transfer of any share/interest (whether directly or indirectly) in a company owning a mineral/petroleum licence or right, capital gains are not taxed in Namibia.

Mining and Petroleum licences/rights

The sale, donation, expropriation, cession, grant, or any other alienation or transfer of ownership of any share or member's interest in a company that holds a mineral or petroleum licence/right, whether directly or indirectly, is included in the definition of gross income. The definition also specifically includes a sale of shares in a company for a licence or right to mine minerals or oil and gas in Namibia.

Dividend income

Dividends received are exempt from tax. Non-resident shareholders tax (NRST) should be withheld on dividends declared to non-resident shareholders. *For more information on NRST, see the Withholding taxes section.*

Interest income

Namibian companies are taxed on interest received from a Namibian source. Persons other than Namibian companies are subject to a final WHT on interest from banks and unit trusts. Interest paid to non-residents is subject to WHT on interest. *For more information, see the Withholding taxes section.*

Partnership income

The relevant partners of a partnership are regarded as the responsible taxpayers and not the partnership itself.

In practice, the assessment of a partnership is treated like that of a private business. The partnership is first treated as a business entity on its own in terms of income and expenditure. The profit or loss at the end of the year is then allocated to the individual partners. If they derived a profit from the partnership, it is added to their other non-partnership income; or if the partnership made a loss, the partners have the right to deduct it from their non-partnership income.

Rental income

Companies are taxed on rental income received from a Namibian source.

Royalty income

Companies are taxed on royalty income received from a Namibian source.

Foreign income

Corporate tax in Namibia is determined on the source basis; consequently, only income from a Namibian source or deemed Namibian source is subject to corporate tax.

Deductions

Capital allowances

The cost (including finance charges) of vehicles, machinery, equipment, and other articles used by the taxpayer to generate income is deductible in three equal annual allowances claimable from the date the costs were incurred and not only when the asset was taken into use. No apportionment is allowed where an asset is held for less than 12 months.

Buildings used by the taxpayer to generate income qualify for an initial allowance of 20% of erection costs in the year they are first brought into use. Thereafter, an annual allowance of 4% is deductible for the 20 following years. Additions to existing buildings (not alterations, improvements, or repairs) qualify for the same 20% and 4% deductions. Note that the allowance is calculated on the cost of erection and not the cost of acquisition. The allowance is also only calculated for a period of 21 years from the date of erection.

Registered manufacturers can claim 20% of the erection costs of the building in the year it is first brought into use, and 8% for ten years thereafter (*see Manufacturing in the Tax credits and incentives section*).

Mining exploration and initial development expenditure incurred before commencement of mining production are deductible in full in the first year that income is generated from the mine. Subsequent developmental expenditures are written off in three equal annual allowances.

Capital allowances may also be deducted with respect to patents, trademarks, leasehold improvements, etc.

A recovery or recapture of allowances previously claimed should be included in the gross income of a taxpayer in the event that the allowance is recovered or recaptured by way of disposal, withdrawal from trade for non-trade purposes, or removal from Namibia. The recapture is calculated at the market value of the asset.

Goodwill

The amortisation of goodwill is not deductible for tax purposes and should be excluded from calculating taxable income.

Start-up expenses

Mining

The Income Tax Act allows exploration and initial development expenditure to be deducted in full during the year in which the mine commences with production. All exploration expenses incurred before the commencement of mining is therefore deferred until such time that the mine commences production.

All other industries

The general deduction formula determines that only expenses incurred in the production of income that are not of a capital nature may be claimed for tax purposes. The Income Tax Act defines income as ‘income in any year or period of assessment’.

Interest expenses

A deduction is allowed in respect of financing expenditure incurred in respect of any financing agreement for the acquisition of fixed assets utilised in ordinary trade activities.

The general deduction formula determines that only expenses incurred in the production of taxable income that are not of a capital nature may be claimed for tax purposes. Therefore, where the interest can be argued to be incurred in the production of income, the interest expense will be deductible.

Thin capitalisation legislation may be applied to interest paid on cross-border, related-party loans (*see Thin capitalisation in the Group taxation section*).

Bad debt

The Income Tax Act allows a specific deduction for bad debts, provided that the amount written off was previously included in the taxpayer's income.

Furthermore, the Income Tax Act prohibits the following deduction from taxable income:

"any loss or expense, the deduction of which would otherwise be allowable, to the extent to which it is recoverable under any contract of insurance, guarantee, security, or indemnity".

Accordingly, where the bad debts are recoverable under insurance, the amounts are not deductible for tax purposes.

Charitable contributions/donations

A specific deduction for donations is allowed, provided that it is made to a registered welfare organisation or an approved educational institution. It is a further requirement that a certificate should be issued by the welfare organisation/educational institution in respect of the donation and submitted with the entity's tax return in order for it to qualify as a deduction. However, this deduction may not create or increase a tax loss.

Fines and penalties

In terms of practise applied by Inland Revenue, tax penalties and fines are not deductible for tax purposes.

Taxes

Taxes levied on income are not allowed as a deduction.

Net operating losses

Assessed tax losses may be carried forward indefinitely if the company continues the same trade. Tax laws do not allow losses to be transferred to other members of a group, and anti-avoidance provisions may be triggered by transactions designed to transfer or exploit assessed losses.

If a company ceases to trade for a full fiscal year, its assessed losses are forfeited, regardless of subsequent activities. Assessed losses are also reduced in the event of a compromise agreement with creditors.

Namibian tax legislation does not provide for the carrying back of tax losses.

Payments to foreign affiliates

For information on payments to foreign affiliates, please refer to the Branch income section, Group taxation section, and Withholding taxes section.

Group taxation

No taxation of combined operations is allowed in Namibia where operations are conducted in a group.

Transfer pricing

The Minister of Finance confirmed that enforcing transfer pricing laws are high on their agenda and that they are working with, amongst others, the Finish Revenue Authority and the African Tax Administration Forum.

Namibian transfer pricing legislation is aimed at enforcing the arm's-length principle in cross-border transactions carried out between connected persons. It is based on guidance set out by the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for multinational enterprises and tax administrations.

The objective of the transfer pricing legislation is to provide taxpayers with guidelines regarding the procedures to be followed in the determination of arm's-length prices, taking into account the Namibian business environment. It also sets out the Minister of Finance's views on documentation and other practical issues that are relevant in setting and reviewing transfer pricing in international agreements.

The transfer pricing legislation is essentially aimed at ensuring that cross-border transactions between companies operating in a multinational group are fairly priced and that profits are not stripped out of Namibia and taxed in lower tax jurisdictions. The legislation achieves this by giving the Minister of Finance (who essentially delegates to the Directorate of Inland Revenue) the power to adjust any non-market related prices charged or paid by Namibian entities in cross-border transactions with related parties to arm's-length prices and to tax the Namibian entity as if the transactions had been carried out at market-related prices.

In terms of the normal penalty provisions of the Income Tax Act, the Directorate of Inland Revenue may levy penalties of up to 200% on any amount of underpaid tax. Consequently, the Inland Revenue may invoke such provisions in the event that a taxpayer's taxable income is understated as a result of prices that were charged in affected transactions, which were not carried out at arm's length. Further, interest will be charged on the unpaid amounts at 20% *per annum*.

Thin capitalisation

The Minister of Finance may, if any amount of financial assistance provided by a foreign connected person is excessive in relation to a company's fixed capital (being share capital, share premium, accumulated profits, whether capital or not), disallow, for income tax purposes, the deduction of any interest or other charges payable by the Namibian person on the 'excessive portion' of the financial assistance provided by the foreigner.

There is no guidance that provides a definition for 'excessive'. Therefore, each case should be considered on the basis of the facts provided. The 3:1 ratio is applied by the Bank of Namibia for exchange control purposes, and this guideline is therefore deemed suitable until otherwise determined by Inland Revenue.

Controlled foreign companies (CFCs)

CFC rules are not applicable in Namibia.

Tax credits and incentives

Foreign tax credit

A tax credit may be claimed in Namibia for foreign taxes paid on dividends, royalties, and similar income, limited to the amount of tax payable in Namibia. Proof of the taxes paid in the foreign jurisdiction should be provided to Inland Revenue in order to claim the tax credit.

Manufacturing

The following is a high-level comparison of the different tax treatments for normal companies and registered manufacturing companies. This description does not consider the specific conditions that should be met in order for these incentives to be utilised.

Note that only the building allowance and preferential tax rate (*as set out below*) may create or increase a tax loss.

Building allowance

A building allowance is deductible with respect to buildings used for purposes of trade.

For normal companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 4% during the 20 years that follow.

For registered manufacturing companies, the allowance is calculated as 20% of the cost of erection in the year in which the building enters service and 8% during the ten years that follow.

Employee cost allowances

For normal companies, expenditures for remuneration and training of employees are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of remuneration and training of employees that are directly engaged in the manufacturing process are deductible. However, this allowance may not create or increase a tax loss. Deductions sought for training should be approved by the government.

Export expenditure allowance

For normal companies, export expenditures incurred are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of costs incurred in an export country, in order to export Namibian manufactured goods to such country, may be deducted. However, this allowance may not create or increase a tax loss.

Export allowance

Any taxpayer (not required to be a registered manufacturer) that derives income from the export of goods manufactured in Namibia, excluding meat or fish, may deduct an export allowance equal to 80% of the taxable income derived from the export of manufactured goods.

Gross profit derived from the export of manufactured goods as a percentage of total gross profit should be used to determine the percentage of taxable income that is used to calculate the export allowance. However, this allowance may not create or increase a tax loss.

Transport allowance

For normal companies, land-based transport costs (i.e. transport by road or rail) are deductible for tax purposes.

For registered manufacturing companies, an additional allowance of 25% of land-based transport cost in respect of material and components used in the manufacturing process or equipment imported for direct use in the manufacturing process may be deducted. However, this allowance may not create or increase a tax loss.

Preferential tax rate

The normal tax rate for companies other than mining companies or registered manufacturers is 32%.

The tax rate for a registered manufacturer for taxable income with respect to the manufacturing activity for which they are registered is 18%. This preferential rate is applicable for a period of ten years from registration as a manufacturer.

Export Processing Zones (EPZs)

In order to become an EPZ company, a particular entity must register with the EPZ governing body and obtain approval from Inland Revenue.

An EPZ company qualifies for the following benefits:

- The company is exempt from corporate tax.
- No VAT is payable on the sale of goods or services rendered in the zone.
- No VAT is payable on goods imported or manufactured in the zone.
- No customs or excise duty is payable on goods imported into the zone.
- No stamp duty or transfer duty is payable in relation to the transfer of movable or immovable property in the zone.
- A 75% refund of expenditures incurred in training Namibian citizens.
- Some of the provisions in the Labour Relations Act do not apply in the zone.

Enterprises must comply with the following requirements in order to qualify for EPZ status:

- Goods must be exported to countries other than countries in the SACU.
- Industrial employment must be created or increased.
- Namibia's export earnings must be increased as a result of manufactured goods exported.

EPZ companies may not be involved in retail business operations.

Withholding taxes

WHTs are applicable where certain payments are made to non-Namibian residents.

Dividends

Dividends declared by a Namibian company to a non-resident holding company are subject to NRST, a WHT. NRST is payable at the standard rate of 10% if at least 25% of shares are held in the Namibian company and the shareholder is a company. In all other cases, the NRST payable is 20%. DTA relief may be available.

NRST is payable within 20 days after declaration of a dividend.

Interest

A WHT of 10%, calculated on the gross amount of interest, is payable on interest accruing to any person, other than a Namibian company, from a registered Namibian banking institution or unit trust scheme. The tax withheld is a final tax, and the financial institution is responsible to withhold the tax.

Namibian companies, however, are taxed on interest at the corporate tax rate.

It is the obligation of the financial institution to withhold the tax and pay such tax to the revenue authorities.

WHT of 10% is payable on the interest accruing or paid to a non-resident. The WHT is payable within 20 days after the interest payment was made. Interest is deemed to be paid on the earlier of the date on which the interest is paid or becomes due and payable.

Treaty relief may be available.

Royalties or similar payments

WHT on royalties are payable when a Namibian company pays a royalty to a non-resident. WHT is levied at a fixed rate of 10% and is payable within 20 days after the end of the month during which the liability for payment is incurred.

A royalty includes payment for the use or right to use any patent or design, trademark, copyright, model, pattern, plan, formula, or process, or any other property or right of a similar nature. A royalty also includes the imparting of any scientific, technical, industrial, or commercial knowledge or information for use in Namibia. The nature of fees payable should therefore be carefully considered in order to determine whether the relevant amount represents a royalty. It also include payments made for the use or right to use industrial, commercial, or scientific equipment (i.e. rentals).

Treaty relief may be available.

Services

Any Namibian resident paying a management or consultancy fee to a non-resident must withhold tax at 10%.

Management and consulting fees are specifically defined as: “any amount payable for administrative, managerial, technical, or consultative services or any similar services, whether such services are of a professional nature or not”.

A branch is specifically included in the definition of a resident.

The rate is subject to DTA relief, where applicable.

Fees paid to non-resident directors and foreign entertainers are subject to WHT of 25%. No treaty relief is available.

Summary of WHT payable

The WHT rates and treaty relief for Namibian DTAs can be summarised as follows. Note that the tax treaties contain certain requirements that should be met before the reduced tax rate may be applied.

The definitions of dividends, interest, and royalties in the various treaties should also be considered.

	WHT (%)				
Recipient	**Dividends**	**Interest**	**Royalties**	**Management, administrative, technical, and consulting fees**	**Directors fees**
Non-treaty	10/20 (1)	10 (2)	10	10	25
Treaty:					
Botswana	10	10	10	10 (7)	25
France	5/15 (3)	10	10	0	25
Germany	10/15 (3)	0	10	0	25
India	10	10	10	10	25
Malaysia	5/10 (1)	10	5	5	25
Mauritius	5/10 (1)	10	5	0	25
Romania	10 to 15 (4)	10	5	0	25
Russian Federation	5/10 (5)	10	5	0	25
South Africa	5/15 (1)	10	10	0	25
Sweden	5/15 (3)	10	5	10 (7)	25
United Kingdom	5/10/15 (6)	N/A	5	0	25

Notes

1. Lower rate applies where at least 25% of shares are held in the Namibian company. Higher rate applies otherwise.
2. Namibian companies are taxed at the corporate tax rate on interest received.
3. Lower rate applies where at least 10% of shares are held in the Namibian company. Higher rate applies otherwise.
4. Rate depends on shareholding.
5. Lower rate applies where at least 25% of shares are held in the Namibian company and recipient directly invested at least 100,000 United States dollars (USD) in the equity capital of the company paying the dividend. Higher rate applies otherwise.
6. 5% where at least 50% of shares are held in the Namibian company. 10% where at least 25% of shares are held in the Namibian company. 15% otherwise.
7. Local rates are lower than the 15% rate per the treaty.

Mining royalties

The Minerals (Prospecting and Mining) Act levies a royalty on minerals won or mined by a licence holder in Namibia, based on the table below:

Group of minerals	Market value of minerals levied as a royalty (%)
Rough diamonds	10
Rough emeralds, rubies, and sapphires	10
Unprocessed dimension stone	5
Gold, copper, zinc, and other base metals	3
Semi-precious stones	2
Nuclear fuel minerals	3
Industrial minerals	2
Non-nuclear fuel minerals	2
Oil and gas	5

Tax administration

Taxable period

The tax year for companies and close corporations is aligned with the financial year.

Tax returns

The income tax return is due within seven months after the financial year-end of the company and can be extended to five months after the seventh month due date, provided that no other prior year income tax returns are outstanding.

Payment of tax

The first provisional payment for income tax is due within six months from the commencement of the company's financial year (at least 40% of tax payable at year-end is paid on first submission). The second provisional payment is due on/before the last day of the respective tax year (at least 80% of tax payable at year-end is paid on second submission). The final provisional payment is due within seven months after the financial year-end of the company.

WHT on dividends are due within 20 days after declaration of the dividend.

WHT on royalties or similar payments are due within 20 days after the end of the month during which the liability for payment of the royalty was incurred.

WHT on services is payable to Inland Revenue within 20 days after the end of the month during which the amount was deducted or withheld.

WHT on interest is due within 20 days after the end of the month during which the interest was paid. Interest is deemed to be paid on the earlier of actual payment or when the interest becomes due and payable.

It is advised that if relief is available under the DTA, a nil form should still be submitted when payment is made to non-residents. The amount of DTA relief claimed should be disclosed on the form submitted.

No cheques are accepted as a means of payment at Inland Revenue.

Penalties and interest

The penalties and interest due for late submissions and payments can be summarised as follows:

Tax area	Reason	Penalty	Interest (per annum)
1st provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	None
	Late payment	10% per month *	20%*
	Under-estimation	Up to 100% of underpaid amount	None
2nd provisional tax	Late submission	NAD 100 per day penalty for outstanding provisional tax returns	None
	Late payment	10% per month *	20%
	Under-estimation	Up to 100% of underpaid amount	None
Income tax return	Late submission	10% one-off penalty if taxes were paid late	None
	Late payment	Where tax return is submitted late, then 10% once-off penalty	20%
	Omission/incorrect statement	Up to 200%	20%
WHT	Late payment	10% per month *	20%
	Late submission	None	None

* Both penalties and interest are limited to the amount of taxes outstanding.

Anti-avoidance

Note that the Income Tax Act, Act 24 of 1981, contains an anti-avoidance section, Section 95, which enables the Receiver of Revenue to disregard the implications of a transaction or scheme if it can be proven that:

- such transaction or scheme had been entered into to avoid or postpone the payment of any duty or levy imposed by the Act
- such transaction or scheme was entered into or carried out by means or in a manner that would not normally be employed in the entering into or carrying out of a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, or has created rights or obligations that would not normally be created between persons dealing at arm's length under a transaction, operation, or scheme of the nature of the transaction, operation, or scheme in question, and
- such transaction or scheme was entered into or carried out solely or mainly for the purposes of the avoidance or the postponement of liability for the payment of any tax duty or levy.

The Receiver of Revenue can, at its sole discretion, impose Section 95 on any transaction or scheme, which will place the onus on the taxpayer to prove that any/all of the requirements noted above will not be applicable to the transaction or scheme.

Tax audit process

The tax audit process is a discretionary process instituted by Inland Revenue. Inland Revenue will inspect the validity of invoices and whether such expenses are deductible for tax purposes.

Generally, income tax audits are initiated on amounts being refunded to taxpayers, with the focus being on high-value refunds.

Subsequent to an audit, a letter will be sent to the taxpayer indicating changes made to the return of income.

In the event that the taxpayer agrees with the outcome, an assessment is issued. Where the taxpayer is not satisfied with the outcome, an objection may be lodged within 90 days.

Statute of limitations

There is no statute of limitation in respect of claiming a refund for excess income tax paid. Debts to the state prescribe after 30 years.

Topics of focus for tax authority

Topics of focus for the tax authority include import VAT, general compliance, transfer pricing, payment of subsistence and travel allowances to employees, and employee taxes.

Significant developments

The corporate tax system of the Netherlands contains a number of well-known features providing for an attractive investment climate, such as: the fiscal unity regime with tax consolidation for group companies, a full participation exemption for capital gains and dividends from qualifying participations, and several favourable tax regimes (e.g. for patent income, investment vehicles, and income from ocean shipping activities). There is currently no withholding taxation on interest or royalty payments made by the taxpayer.

On 19 September 2017 (Budget Day), the Dutch Ministry of Finance published the 2018 Dutch Tax Package. By the end of 2017, the Senate approved the Tax Package. Most changes have taken effect as of 1 January 2018 and apply to financial years starting on or after that date. In addition, a 'coalition agreement' expressing the intentions of the newly formed government was published in the second half of 2017. The coalition agreement foresees a number of changes in the current corporate income and dividend withholding tax regime, but there is yet no actual legislative proposal to amend those taxes accordingly.

Because of the 2018 Tax Package, a foreign entity holding a substantial interest in a company domiciled in the Netherlands may only be treated as a non-resident company subject to (Dutch) corporate income tax (CIT) if one of its main purposes is to help another to avoid personal income taxation. Before 2018, such tax liability also existed if one of the main purposes was to help another to avoid dividend withholding tax (WHT). The 2018 Tax Package introduced a dividend WHT obligation for holding cooperatives domiciled in the Netherlands in so far as there are 'qualifying membership rights', which entitle the holder to at least 5% of the annual profits or liquidation proceeds, in that cooperative. Additionally, it broadened the dividend WHT exemption in participation situations within the European Union (EU)/European Economic Area (EEA) by making it available to situations of third countries that have entered into a tax treaty or similar arrangement with the Netherlands, provided that the treaty or arrangement contains a dividend article. Note, however, that there are some additional tax treaty domicile requirements that must be complied with.

Also note that the new coalition has expressed the intention to abolish the dividend WHT by 2020, except in cases of abuse, and to reduce the CIT rate from 25% to 21% by 2021.

On 22 February 2018, the European Court of Justice (ECJ) issued its judgement in the joined cases C-398/16 and C-399/16 on the consequences of EU law for the Dutch fiscal unity regime. It ruled the 'per element approach' applicable to the Dutch regime. In reaction to the ECJ's decision, the Dutch Ministry of Finance will amend several provisions of the Corporate Income Tax Act (CITA) and Dividend Withholding Tax Act (DWTA) with retroactive effect to 25 October 2017, the date of the Advocate General (A-G) Campos Sanchéz-Bordona's Opinion in those cases. Despite the presence of a Dutch fiscal unity, the amended provisions will apply as if there was no fiscal unity. The amendments include the application of the rules on 'the deduction of interest on loans that are directly or indirectly granted by a group company in order to finance an acquisition or capital contribution deduction' and on the 'deduction of excess interest on debts that are deemed to be related to the financing of participations' as if there is no fiscal unity. The same holds true for elements of the participation exemption with respect to the portfolio investment participations and the 'anti-mismatch' rule, as well as for the limitation of the utilisation of losses after a change of 30% or more of the ultimate control in a company and the effective reduction of dividend WHT payments in case of certain re-distributions of dividend. The actual legislative proposal is expected in the course of 2018.

As of 1 January 2017, most proposals of the 2017 Dutch Tax Package have become applicable to financial years starting on or after that date. For the application of the interest deduction restriction aimed at profit drainage and in the case of certain acquisition debts, the term 'related entity' is extended to include, among other things, entities that form a collaborating group. Also, the Dutch innovation box regime is aligned with the modified nexus approach as described in the Organisation for Economic Co-operation and Development (OECD) report on Action 5. Transitional measures apply to certain assets, especially those created before 1 July 2016 (e.g. the continuing application of the current innovation box regime). Additionally, as of 1 January 2017, seaports are no longer be exempt from CIT.

Treaty developments

The Netherlands pursue an active tax treaty policy in order to maintain and extend its wide tax treaty network. Most Dutch bilateral tax treaties are based on the OECD Model Tax Convention. The Netherlands has concluded bilateral tax treaties for the avoidance of double taxation on income and capital (DTCs) with over 90 countries worldwide.

Taxes on corporate income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted or excluded from the tax base. Non-resident entities only have a limited tax liability with regard to income from Dutch sources.

Standard corporate income tax (CIT) rate

The standard CIT rate currently stands at 25%. There are two taxable income brackets. A lower rate of 20% applies to the first income bracket, which consists of taxable income up to 200,000 euros (EUR). The standard rate applies to the excess of the taxable income.

The earlier proposal to increase the first bracket to EUR 250,000 per 2018, to EUR 300,000 per 2020, and to EUR 350,000 as of 2021, is withdrawn. The first bracket will continue to apply to taxable income up to EUR 200,000.

However, the new coalition has expressed its intention to reduce both the lower and standard CIT rate starting from 2019. The rate will be reduced in steps from 25% to

24% in 2019, to 22.5% in 2020, and to 21% in 2021. The lower rate will decrease by the same steps, from 20% to 19% in 2019, to 17.5% in 2020, and to 16% in 2021. There is no legislative proposal yet.

Fiscal investment fund regime

In general terms, under the existing fiscal investment fund regime, the CIT rate for fiscal investment funds is 0%, provided that their profit is made available to the shareholders and holders of certificates of participation no later than eight months after year-end.

Fiscal investment funds may also invest in real estate development (or redevelopment) activities, provided that these activities take place through a subsidiary subject to Dutch CIT and the development (or redevelopment) activities are exercised for the benefit of real estate that is (or will be) forming part of the fund's own portfolio, an affiliated fiscal investment fund's portfolio, the portfolio of a company in which the fund or the affiliated fund has a substantial interest, or for the benefit of the subsidiary's own portfolio ('project development' subsidiary). Fiscal investment funds that invest in real estate are allowed to hold a taxable subsidiary that provides customary services in relation to the real estate held by the Dutch real estate investment trust (REIT). Examples are conference facilities or the exploitation of an in-house restaurant.

Exempt investment fund regime

The exempt investment fund regime exists next to the fiscal investment fund regime described above. In accordance with the exempt investment fund regime, investment funds as defined in the Dutch Financial Supervision Act (*Wet op het financieel toezicht*), which meet certain conditions, can request an exemption from CIT. Apart from the exempt status for CIT purposes, the exempt investment fund is not obligated to withhold dividend WHT with regard to profit distributions to its shareholders.

Innovation box regime

A special regime applies with respect to profits, including royalties, derived from a self-developed intangible asset (developed after 31 December 2006). In this so-called innovation box, the taxpayer may opt, under certain conditions, for the application of a lower effective rate on taxable profits derived from these intangible assets. Following the 2018 Dutch Tax Package, the effective tax rate of the innovation box is increased to 7% as of 1 January 2018 (previously 5%).

The innovation box is applicable if at least 30% of the profits have been originated by the patent. Companies that have incurred certain qualified research and development (R&D) costs for the development of intellectual property (IP) for which no patent was granted are also entitled to the favourable effective tax rate. This is subject to the condition that these qualified R&D assets became part of the company's assets after 31 December 2007.

The lower effective tax rate only applies to positive income, allowing innovation losses to be taken into account in full. It is also possible to include profits from an intangible asset derived in the period between the patent application and the granting of the patent in the innovation box regime (not for R&D assets).

The outcomes of the OECD/G20's base erosion and profit shifting (BEPS) project have influenced the Dutch innovation box regime. As of 2017, the Dutch innovation box regime is aligned with the modified nexus approach as described in the OECD report on Action 5. Transitional measures apply to certain assets, especially those created before 1 July 2016 (e.g. the continuing application of the former innovation box regime).

Tonnage tax regime

In order to stimulate entrepreneurs engaged in ocean shipping, a favourable regime (known as the Dutch tonnage tax regime) may be available to certain shipping companies. Under this regime, the taxable profit of a sea-going vessel is based on its registered net tonnage multiplied by a fixed amount of deemed profit per ton instead of the actual profits from the exploitation. The regime only applies to the calculation of the profit related to the qualifying shipping activities. These activities include operating vessels in international traffic (including transportation for the purpose of the exploitation of natural resources at sea), cable and pipe-laying activities at the bottom of the sea, and towing and dredging and connected activities. The profits from the qualifying activities are taxed at a deemed tonnage profit according to a five bracket regressive scale system. The tonnage tax regime applies upon request and for a fixed period of ten years or multiples of the ten-year period.

Local income taxes

There are no provincial or municipal corporate income taxes in the Netherlands.

Corporate residence

In the Netherlands, corporate residence is determined by each corporation's facts and circumstances. Management and control are important factors in this respect. Companies incorporated under Dutch law are deemed to be residents of the Netherlands (although not with respect to certain provisions, such as the participation exemption and fiscal unity).

Permanent establishment (PE)

Non-resident companies that are neither incorporated nor effectively managed in the Netherlands are limited in their liability to tax in the Netherlands if they receive Dutch-source income. This could be, for instance, business income derived from a Dutch PE or permanent representative. The definition of a PE for Dutch tax purposes is largely inspired by the OECD Model Convention definition and commentary.

The concept of a PE is also of relevance for resident corporate taxpayers. The Netherlands provides international double taxation relief, amongst others, with respect to income attributable to business activities carried on through a PE abroad.

The outcomes of the OECD/G20's BEPS project may influence the definition of a PE to be included in new or newly renegotiated Dutch tax treaties. The Netherlands has announced that the outcomes of the final report on Action 7 ('Preventing the Artificial Avoidance of Permanent Establishment Status') have now become part of Netherlands' tax treaty policy. In addition, the Netherlands has signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument or MLI) to implement the tax treaty related outcomes of, amongst other, BEPS Action 7. With respect to the MLI provisions relating to the definition of PE, the Netherlands has made some reservations and notifications at the time of the signature. Those relate to the MLI provision on the 'Artificial Avoidance of Permanent Establishment Status through Commissionaire Arrangements and Similar

Strategies', the MLI provision on the 'Artificial Avoidance of Permanent Establishment Status through the Specific Activity Exemptions', and the MLI provision on the 'Splitting-up of Contracts'.

Other taxes

Value-added tax (VAT)

VAT, known in Dutch as the *Belasting over de Toegevoegde Waarde* or BTW, is payable on sales of goods and on services rendered in the Netherlands as well as on the importation of goods and on the 'intra-European' acquisition of goods. There are three VAT rates, which are 21%, 6%, and 0%.

The main VAT rate is 21%.

The reduced 6% VAT rate is applicable on certain prime necessities (and also on certain energy-saving insulation activities on houses).

The special 0% VAT rate is applicable mainly to intra-EU supplies, exports, imports stored in bonded warehouses, services rendered in connection with the above, and certain other services.

The following are exempt from VAT:

- The supply of immovable property two years after putting it into use and lease. However, if the lessee's use of the immovable property is 90% or more for input VAT-deductible purposes, the lessor and lessee may opt to be subject to VAT on rent, in which case the lessor may deduct the VAT charged in respect of the property.
- Medical, cultural, social, and educational services.
- Services provided by banks and other financial institutions in connection with payment transactions and the granting of credit facilities.
- Insurance transactions.
- Transactions in shares.

Customs and excise tax

Many goods imported to the Netherlands from outside the European Union are subject to customs and excise duties. The tariffs and rates that apply to the different goods vary widely and change regularly.

An excise tax is levied on certain consumer goods (e.g. cigarettes, cigars, mineral oils, alcoholic products). If the goods are used solely as raw materials, no excise tax is levied. The excise tax is refundable if the article is exported.

Immovable property tax

Municipalities impose an annual immovable property tax on the owners of immovable property. The rates depend on the municipality. The taxable basis is the market value of the immovable property. Please note that the (assessment of the) value is also of importance for CIT, as depreciation might be limited based on this value (*see Limited depreciation of immovable property in the Deductions section*).

Transfer tax on immovable property

Acquisition of economic or legal ownership of immovable property in the Netherlands is subject to a 6% transfer tax on market value. Some exemptions are available. Real estate transfer tax on dwellings is 2%.

Transfer tax on acquisition of shares in a real estate entity

The acquisition of shares in an entity that owns real estate may also be subject to transfer tax if that entity is characterised as a so-called real estate entity. The threshold for qualifying as a real estate entity is met if more than 50% of the assets of the entity consist of real estate and at least 30% consist of Dutch immovable property.

Stamp duty

There are no stamp duties in the Netherlands.

Capital tax

The Netherlands do not levy capital tax on capital transactions (e.g. issue or increase capital).

Payroll taxes

Employers must withhold wage tax from the employee's gross salary and transfer the amount to the tax authorities. Employees may treat the withheld wage tax as an advance levy of income tax. The income tax due is settled with the withheld wage tax. *The tax tables applicable to individuals are provided in the Taxes on personal income section of the Netherlands Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

Employers must withhold national insurance contributions from the employee's salary at an aggregate rate of 27.65% (2018) calculated on the first EUR 33,994 (2018) of each employee's gross salary and transfer the amount to the tax authorities. The employer bears the burden of the employee's insurance contributions, which are also calculated by reference to the employee's salary. Under circumstances, it may be required to pay or withhold a contribution based on the Health Care Insurance Act.

Insurance tax

An insurance tax is payable on insurance premiums if the insured is a resident of the Netherlands or if the insured object is in the Netherlands. The insurance tax rate is 21%. Several exemptions are available (e.g. insurances of ships and aircraft operated in international traffic are exempt from insurance tax). In certain situations, an insurer outside the European Union may be required to take on a tax representative in the Netherlands.

Waste management contribution

Companies annually bringing 50,000 or more kilograms of packing material on the market must pay a 'waste management contribution' (*Afvalbeheersbijdrage*). The amount payable varies to the total weight and type of packaging. The contribution aims to cover the costs of recycling package materials.

Producers and importers of packaging expecting to exceed the threshold must register with the Packaging Waste Fund (*Afvalfonds Verpakkingen*) upfront. In the current year, they must file an estimation of the expected total volume of packing material. The contribution is then provisionally calculated. Before 1 April of the next calendar year, the actual amount and type of packaging must be reported. The actual contribution payable is recalculated accordingly.

Branch income

Rates for Dutch branch profits are the same as for other corporate profits, but no tax is withheld on transfers of profits to the head office. The tax base is, in principle, calculated on the same rules as for Dutch-resident companies.

Income determination

Inventory valuation

In general, stock/inventory is stated at the lower of cost or market value. Cost may be determined on the basis of first in first out (FIFO), last in first out (LIFO), base stock, or average cost. The LIFO system may be used for commercial/financial and tax purposes.

There is no requirement of conformity between commercial/financial and tax reporting.

Capital gains

Capital gains are taxed as ordinary income. However, capital gains realised on disposal of shares qualifying for the participation exemption are tax exempt (*see Dividend income below*).

The gain on disposal of depreciable assets may be carried over to a special tax deferral reinvestment reserve but must then be deducted from the acquisition cost of the later acquired assets. Except in special circumstances, the reserve cannot be maintained for more than three consecutive years. If the reserve has not been fully applied after three years, the remainder will be liable to taxation.

Capital losses are deductible unless attributable to the disposal of a shareholding qualifying for the participation exemption.

Dividend income

Subject to meeting the conditions for the participation exemption, a Dutch company or branch of a foreign company is exempt from Dutch tax on all benefits connected with a qualifying shareholding, including cash dividends, dividends in kind, bonus shares, hidden profit distributions, capital gains, and currency exchange results.

Participation exemption

The participation exemption will apply to a shareholding in a Dutch company if the holding is at least 5% of the investee's capital, provided the conditions are met.

As a general rule, the participation exemption is applicable as long as the participation is not held as a portfolio investment. The intention of the parent company, which can be based on particular facts and circumstances, is decisive. Regardless of the company's intention, the participation exemption also is applicable if the sufficient tax test (i.e. the income is subject to a real profit tax of at least 10%) or the asset test (i.e. the subsidiary's assets do not usually consist of more than 50% of portfolio investments) is met.

For portfolio investment participations not qualifying for the participation exemption, double taxation will be avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax. Until recently, the application of the rules on portfolio investment participations could be avoided through the inclusion of the companies concerned in a fiscal unity. In reaction to the ECJ's decision in the joined cases C-398/16 and C-399/16 in which the ECJ ruled the 'per element approach' applicable to the Dutch fiscal unity regime, the Dutch Ministry of Finance will amend several provisions of the CITA and DWTA with retroactive effect to 25 October 2017. These amendments will also have an impact on the elements of the participation exemption with respect to the portfolio investment participations. The amended provisions will apply as if there was no fiscal unity. The actual legislative proposal is expected in the course of 2018.

Due to the amendments to the EU's Parent-Subsidiary Directive, a corporate taxpayer is not eligible for the participation exemption or participation credit for received distributed profits to the extent that such distributed profits are deductible by the subsidiary. Similar rules apply throughout the European Union.

Dividends not qualifying under the participation exemption regime for an exemption or credit are taxable in full at the ordinary CIT rate.

Interests of 25% or more in a company of which the assets consist (nearly) exclusively of portfolio investments should be annually valued, as an asset, at the fair market value.

Costs related to the acquisition and disposal of a participation (e.g. legal fees, compensations, notary fees) are not deductible for corporate tax.

Losses arising from the liquidation of a (foreign) subsidiary are deductible for CIT, subject to certain conditions.

Note that a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations (*see Anti-abuse rules regarding interest and loans in the Deductions section*).

Profits derived from a company that was created by converting a foreign PE only qualify for the participation exemption after they exceed the losses from the PE during the previous years insofar as those losses reduced the taxable profits in the Netherlands before 1 January 2012. Under certain circumstances, such as the alienation of (part of) the shares of the company, all non-recaptured losses will be added to the profits of the Dutch parent company at once. Note that the scope of these anti-abuse provisions has been extended by including situations in which a foreign intermediate holding company is interposed.

In April 2015, legislation was adopted introducing the compartmentalisation doctrine, based on case law. The legislation has retroactive effect to 14 June 2013. Based on the compartmentalisation doctrine, a taxpayer that derives income from a participation that first qualified but at a certain point in time no longer qualifies for the participation exemption, or *vice versa*, must attribute the income to the taxable and the tax-exempt period accordingly. The legislation applies to all changes in the application of the participation exemption regime irrespective of whether caused by a change in facts and circumstances or change in legislation. It applies to both capital gains and dividend distributions. Changes that occurred before 14 June 2013 are affected. However, if in favour of the taxpayer, changes caused by modification of legislation before 1 January 2007 are not taken into account. In April 2015, the Dutch State Secretary for Finance announced its willingness to limit the retroactive effects in such cases.

Stock dividends

Stock dividends are taxed as dividend income to the extent that they are paid out of earned surplus. They are not taxable if paid out of share premium ('agio'), provided the share premium account was not created pursuant to a share-for-share merger, in which only Dutch companies were involved. In the case of a share-for-share merger, in which shares in foreign subsidiaries were contributed to a Dutch company, the Dutch company can distribute the difference between the fair market value and the paid-in capital of the subsidiaries being contributed as a stock dividend without triggering Dutch dividend WHT (step-up in basis), provided certain requirements are met.

Interest income

Interest income is taxed as ordinary income against the regular CIT rate.

Royalty income

Royalty income is taxed as ordinary income against the regular CIT rate.

Work in progress

Profits with regard to work in progress should be accounted before actual completion, to the extent that the work is completed. All project costs should be recognised in the year the costs occurred.

Foreign income

In general, a Dutch resident company is subject to CIT on its worldwide income. However, certain income can be exempted (e.g. due to the application of the participation exemption described above) or excluded from the tax base.

Certain foreign-sourced income (foreign branch income, real estate income, and other income) is 'excluded' from the Dutch taxable base. The so-called 'object exemption' or 'base exemption', a method to provide relief for international juridical double taxation in situations of Dutch companies with a PE abroad, is designed as a tax base adjustment instead of a real exemption. Consequently, losses of foreign PEs can no longer be offset against profits of the Dutch head office (except for final losses), but currency exchange results are still included in the tax base. Also, if the foreign activities cease, any losses upon 'liquidation' can, in principle, be deducted. For certain low-taxed passive PEs, the object exemption is replaced by a credit system.

Double taxation of foreign dividends, interest, and royalties is relieved by a tax credit provided by Dutch tax treaties or unilaterally if the payer of the income streams is a resident of a developing country designated by Ministerial Order. If no treaty or unilateral relief applies, a deduction of the foreign tax paid is allowed in computing the net taxable income.

However, relief by exemption is given for dividends from foreign investments qualifying for the participation exemption, as discussed above. In that case, there is no Dutch tax to credit against taxes withheld in the subsidiary's country of residence.

In most circumstances, the foreign dividend is exempt for Dutch CIT under the participation exemption, as previously discussed. As a consequence, foreign WHT cannot be credited, and the WHT constitutes a real cost for the companies concerned. A credit of the foreign WHT is granted against Dutch dividend WHT due on the distribution to foreign parents of the Dutch company. The credit amounts to a maximum of 3% of the gross dividend paid, to the extent that it can be paid out of foreign-source dividends received that have been subject to at least a 5% WHT and the foreign company is liable to CIT. This tax credit does not result in taxable income for CIT purposes.

Deductions

Depreciation, amortisation, and depletion

Generally, depreciation may be computed by a straight-line or a reducing-balance method or, in accordance with any other sound business practice, on the basis of historical cost. Depreciation is applied from the date the asset comes into use. Dutch tax law includes specific rules (*see below*) that potentially limit the depreciation of assets (e.g. immovable property, goodwill, and other fixed assets).

A depletion allowance for natural resources may be granted for tax purposes when it conforms to sound business practice and is appropriate for accounting purposes.

Limited depreciation of immovable property

There are special provisions for depreciation of immovable property. A distinction is made between immovable property held for investment purposes and buildings used in a trade or business.

Investment property cannot be depreciated to an amount lower than the official property's fair market value for tax purposes, which is known as *WOZ-waarde*. In other words, a property will not be subject to depreciation unless the carrying amount of the building and the land on which it is located is higher than its value for tax purposes. This value is determined by the municipal tax authorities annually. As this value is based on the assumption that the property is free of lease, the value for tax purposes of commercial real estate may be lower than fair market value.

Alternatively, the depreciation of buildings employed in a trade or business is limited to 50% of the property's value for tax purposes. It should still be possible to value immovable property at fair market value if this is demonstrably lower than the current book value. In addition, anti-abuse measures apply to prevent the division of land and buildings into separate legal entities or to related individuals.

Note that maintenance costs continue to qualify for tax relief and any maintenance-related value increase does not lead to a compulsory upward revaluation of the property. Moreover, a property is not required to be revaluated as its value increases due to market developments.

Depreciation of land is not permitted.

The sale of depreciated assets triggers tax on the difference between the sale price and the depreciated book value unless a reinvestment reserve is set up (*see Capital gains in the Income determination section*).

Limited amortisation of goodwill and depreciation of fixed assets

With regard to goodwill, the amortisation for tax purposes is limited to 10% of the purchase price *per annum*. Furthermore, the tax depreciation of other fixed assets (i.e. inventory, equipment) is limited to 20% of the purchase price or production costs *per annum*.

Accelerated depreciation

The law provides accelerated depreciation of several specific assets. Accelerated depreciation applies to investments in assets that are in the interest of the protection of the environment in the Netherlands and that appear on the so-called VAMIL (*Vervroegde Afschrijving Milieu-investeringen*) list. From 2011, the accelerated depreciation facility for investments in environment-improving assets is limited to 75% of the total (investment) costs. Prior to 2011, 100% of the investment costs were eligible for the facility.

Accelerated depreciation also is available for certain other designated assets (e.g. investments of starting entrepreneurs).

Also eligible for accelerated depreciation are certain investments made in new business assets in 2009, 2010, and 2011 and between 1 July 2013 and 31 December 2013. Certain conditions apply. Investment costs minus residual value of sea-vessels that are operated mainly from the Netherlands may be depreciated straight-line over five years. Instead of accelerated depreciation, these taxpayers may choose immediate taxation (*see Tonnage tax regime in the Taxes on corporate income section*).

Anti-abuse rules regarding interest and loans

Due to existing anti-abuse rules, the deduction for interest paid on intra-group debts relating to certain transactions is disallowed. However, if the taxpayer provides credible evidence of overriding commercial reasons for the transaction as well as the loan, or of taxation of the interest in the hands of the recipient at an effective tax rate that is considered adequate by Dutch standards, the interest may be deductible.

Furthermore, interest paid on certain profit participating loans will be qualified as a dividend and will not be tax deductible. Interest received upon these loans may meet the definitions for the participation exemption if the creditor also holds a qualifying participation in the debtor. Intra-group conduits may be denied a credit of foreign WHT with respect to royalties or interest received if no economic risk is deployed.

If the interest payment to a group company relates to a loan that is directly or indirectly granted by a group company in order to finance an acquisition or capital contribution, the interest will be deductible only if the loan and the underlying transaction are based predominantly on sound business considerations ('the double business motive test') or if the interest received is effectively and sufficiently taxed by Dutch standards. Under the 'double business motive test', it thus must be substantiated that there are sound business reasons for both the loan and the transaction.

When the debt ultimately is financed externally (outside the group) and a direct relationship exists between the internal debt and the ultimate external financing, it can be substantiated that there are sound business reasons for the loan. Furthermore, the use of tax losses or similar relief claims by the recipient of the inter-company interest may adversely affect the deductibility of the interest paid. Also, the law states that the interest deduction related to indebted dividend distributions, paid back capital, and capital contributions is not only possible in case of sound business reasons but also if the interest is taxed in the hands of the creditor at an effective tax rate that is considered adequate by Dutch standards. The latter requirement means that the interest needs to be subject to an effective tax rate of at least 10% over taxable profits determined according to Dutch standards. For the determination of 'a taxable base according to Dutch tax standards', the tax base limitation for the innovation box is not taken into account.

If the taxpayer makes a reasonable case that the interest is taxable at an effective tax rate of at least 10%, the tax authorities, nevertheless, have the option to substantiate that either the liability or the corresponding transaction is not based on sound business reasons. The tax authorities also have the option to substantiate that the liability is incurred in order to compensate losses or other rights that were formed in that year or that will be formed shortly thereafter. This is also applicable to existing loans.

In addition, the deduction of interest (including costs and currency exchange results) on excess acquisition debt is restricted if the acquired company subsequently joins a Dutch fiscal unity with the taxpayer. The acquisition debt is considered excessive in so far as it exceeds 60% of the acquisition price. The interest expenses may only be deducted from the acquiring company's 'own profits', meaning that the profits of the target company that was added to the fiscal unity are not taken into consideration. The restriction is not applicable if the interest on the debt does not exceed EUR 1 million. Contrary to the other existing interest deduction restrictions illustrated above, this measure also relates to interest on loans obtained from third parties.

Furthermore, a provision limits the deduction of excess interest on debts that are deemed to be related to the financing of participations. Under this rule, the taxpayer is deemed to have debt relating to the financing of participations to the extent that the average cost price of its participations exceeds its average equity. This is a mathematical test. However, a few exceptions apply. For example, the cost prices of the participations that at the time of the initial acquisition led to an extension of the operational activities of the group are not taken into account for the purpose of the mathematical test. The 'participation debt' calculated may consist of both loans from affiliated and third parties. The interest on the deemed participation debt is not deductible to the extent the amount of the interest exceeds EUR 750,000. The provision for excessive participation interest also contains a number of specific anti-abuse measures.

Until recently, the application of the rules on 'the deduction of interest on loans that are directly or indirectly granted by a group company in order to finance an acquisition or capital contribution deduction' and on the 'deduction of excess interest on debts that are deemed to be related to the financing of participations' could be avoided in fiscal unity situations. However, the Ministry of Finance has announced that those rules will apply as if there was no fiscal unity. This as a reaction to the ECJ's decision in the joined cases C-398/16 and C-399/16 in which the ECJ ruled the 'per element approach' applicable to the Dutch fiscal unity regime. The actual legislative proposal is expected in the course of 2018 and will have retroactive effect to 25 October 2017.

Provision for bad debt

It is possible to make a provision for future expenses with a cause existing on the balance sheet of the tax year in question. Therefore, a provision may be made for bad debts.

Charitable contributions

Charitable contributions are deductible if certain conditions are met. The gift must be documented in writing and contributed to a qualifying charity (ANBI or SBBI). The deductible amount may not exceed 50% of the taxable profits, with a maximum of EUR 100,000.

Limited deductibility of costs relating to remuneration by way of shares

Any remunerations by way of shares, profit-sharing certificates, option rights on shares, or similar rights are not deductible. However, grandfathering rules exist for situations where option rights have been granted to employees before 24 May 2006.

Costs related to so-called stock appreciation rights for employees that earn an income that exceeds EUR 500,000 are not deductible.

Fines and penalties

Most criminal fines and penalties are not tax deductible. This applies, for instance, to fines imposed by a Dutch criminal judge, administrative fines, disciplinary fines, and penalties from a European institution.

Taxes

Certain taxes, such as the tax on insurance transactions, are deductible. Tax paid on the transfer of immovable property must be included in the cost price and taken into account in the course of normal depreciation. The CIT itself is not deductible.

Other significant items

Deduction of certain expenses (e.g. costs for food, drink, and entertainment) paid by employers for employees are not deductible, in part. These costs are often referred to as mixed costs. The non-deductible portion is 0.4% of the total taxable wages of all employees but never less than EUR 4,500 per year. Alternatively, the employer may choose to deduct only 73.5% of the actual expenses.

Net operating losses

Tax losses can be carried back one year and carried forward nine years. This also applies to start-up losses.

With regard to losses arising in the years 2009, 2010, and 2011, corporate taxpayers may opt for a temporary extension of the carryback period for losses from one to three years. This option, however, also means that the maximum period for loss carryforward will be limited to six years (instead of nine). Furthermore, the extended measure is limited to EUR 10 million loss carryback per extra year.

Complex rules may prohibit the utilisation of net operating losses after a change of 30% or more of the ultimate control in a company. Furthermore, limitations exist on loss utilisation for holding/finance companies. Based on these rules, losses incurred by a mere holding or group finance company can be offset only against holding or finance income in preceding and following years, provided that certain strict conditions are met. These conditions are meant to counter tax planning, whereby the Dutch company concerned acquires (e.g. by way of equity contribution or exchange) other assets that enhance its income streams and its capacity to make use of the losses. Companies carrying out significant other activities (with 25 or more full-time employees) are, in principle, unaffected by these loss relief restrictions.

Until recently, the application of these rules could be avoided in fiscal unity situations (where the company can leverage on the non-decreased activities of its subsidiaries), but the Ministry of Finance has now announced that the rules will not apply to fiscal unity situations as of 25 October 2017 because the ECJ decided in line with the A-G Campos Sanchéz-Bordona Opinion in the cases C-398/16 and C-399/16. The legislative proposal is expected in the course of 2018.

Payments to foreign affiliates

A Dutch corporation generally can claim a deduction for royalties, management service fees, and most other charges paid to foreign affiliates, to the extent that the amounts are not in excess of what it would pay an unrelated entity (i.e. arm's-length principle). Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third-party prices.

Group taxation

Fiscal unity regime

A Dutch-resident parent company and its Dutch-resident subsidiaries (if the parent owns at least 95% of the shares) may, under certain conditions, file a tax return as one entity (fiscal unity). Group taxation is available for companies having their place of effective management in the Netherlands, both for Dutch tax and treaty purposes.

The main feature of the fiscal unity is that profits of one company can be offset against losses of another company forming part of that fiscal unity. Furthermore, inter-company transactions are eliminated.

A cross-border fiscal unity is not possible. In February 2010, the ECJ decided that the Dutch fiscal unity regime does not violate EU law (the freedom of establishment), insofar as it disallows a cross-border fiscal unity. However, the ECJ has not yet explicitly dealt with the effects of the fiscal unity regime, other than cross-border loss utilisation, such as the transfer of assets between group companies without immediate taxation and the use of 'final losses'. The Dutch Supreme Court will possibly deal with those issues at a later stage.

It does follow from EU law that Dutch resident companies should not be denied a fiscal unity amongst them merely because of a non-resident parent or intermediary company if located within the EU/EEA. On 16 June 2014, the ECJ decided that the Dutch fiscal unity regime does violate EU law to the extent it denies a fiscal unity between a Dutch resident parent company and its Dutch resident subsidiaries because of a non-Dutch resident EU/EEA intermediary holding company and insofar as it disallows a fiscal unity between two Dutch resident 'sister' companies that are held by a non-Dutch EU/EEA parent company.

The CIT law therefore now explicitly allows a Dutch fiscal unity between Dutch entities that are linked via a non-Dutch resident EU/EEA intermediary holding company or via an EU/EEA parent company.

On 22 February 2018, the ECJ issued its judgement in the joined cases C-398/16 and C-399/16 on the consequences of EU law for the Dutch fiscal unity regime. It ruled the 'per element approach' applicable to the Dutch regime. In reaction to the ECJ's decision, the Dutch Ministry of Finance will amend several provisions of the CITA and DWTA with retroactive effect to 25 October 2017, the date of the Advocate General (A-G) Campos Sanchéz-Bordona's Opinion in those cases. Despite the presence of a Dutch fiscal unity, the amended provisions will apply as if there was no fiscal unity. The actual legislative proposal is expected in the course of 2018.

Transfer pricing rules

Based on a general transfer pricing provision in the CIT law, all transactions between related parties must be at arm's length. Furthermore, a specific transfer pricing provision exists with respect to the transactions of an interest and royalty conduit company. Dutch companies are obligated to produce transfer pricing documentation describing the calculation of the transfer price and the comparability of the transfer price with third-party prices. If a transaction between related parties is not at arm's length, the taxable income may be corrected by the tax authorities. Moreover, transactions that do not meet the arm's-length test may constitute a contribution of informal capital or a hidden profit distribution.

On the basis of a decree of the State Secretary for Finance regarding transfer pricing, companies may request an advance tax ruling (ATR) and an advance pricing agreement (APA). An ATR may be requested on the classification of activities and an APA may be required on the classification of activities and the arm's-length character of the transfer price.

Country-by-country (CbC) reporting

The Netherlands has implemented the OECD outcomes in the area of country-by-country (CbC) reporting. The documentation obligations include the requirement for eligible taxpayers to produce a CbC report, a master file, and a local file.

Thin capitalisation

There are currently no thin capitalisation rules in the Netherlands.

Controlled foreign companies (CFCs)

Dutch tax law does not provide for specific legislation regarding CFCs. However, interests of 25% or more in a company of which the assets consist (nearly) exclusively of low-taxed portfolio investments should be annually valued, as an asset, at the fair market value. The participation exemption is not applicable to portfolio investment participations unless these participations are qualifying portfolio investment participations for the participation exemption. A portfolio investment participation can only qualify for the participation exemption if either the intention of holding the participation is not an investment intention or if the participation is, in itself, either subject to sufficient tax or if the participation holds sufficient qualifying assets. This rule prevents shareholders of low-taxed portfolio investment participations from benefitting from the Dutch participation exemption because dividends not qualifying under the participation exemption are taxable in full at the ordinary CIT rate. Double taxation is avoided by applying the tax credit method, unless the portfolio investment shareholding effectively is not subject to tax at all. For EU shareholdings, it is optional to credit the actual underlying tax.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Small investments

There is a system of deductions for small investments, the so-called small scale investment deduction. To calculate this annual deduction, investments of more than EUR 450 each are totalled to determine the percentage of the deduction.

Total of investments (EUR)	Deduction
0 to 2,300	0
2,301 to 56,642	28% of the value of the total of small investments
56,643 to 104,891	EUR 15,863
104,892 to 314,673	EUR 15,863 minus 7.56% of the amount exceeding EUR 104,891
Above 314,673	No deduction

Investments in energy-efficient assets

For investments in new energy-efficient business assets that meet the Energy List requirements, an additional deduction (EIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. The allowance equals a percentage of the annual amount, with a maximum of EUR 121 million, of eligible energy investments. The right to the EIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency (*www.rvo.nl*). An investment can be reported in phases, but the minimum amount for notification is EUR 2,500. For 2018, the allowance is set at 54.5%.

Investments in environmental assets

For investments in certain new environmental improving assets that meet the Environment List requirements, an additional deduction (MIA) from corporate income is available. The minimum investment amount per asset is EUR 2,500. In 2018, the allowance equals 36%, 27%, or 13.5% (depending on the ministerial classification of the assets) of the annual amount, with a maximum of EUR 25 million, of eligible environmental investments. The right to the MIA is declared with the tax return, provided the investment is reported previously in good time to the Netherlands Enterprise Agency. An investment can be reported in phases, but the minimum amount for notification is EUR 2,500.

New technology

Wage costs

Conducting certain R&D activities on applied new technology is subsidised by a reduction of wage tax to be paid on wages of employees engaged in R&D of technologically new products. The subsidy accrues to the employer when the employee is credited for the normal amount of wage tax. The subsidy is based on specific legislation (WBSO).

To obtain the relief under the R&D incentive programme, taxpayers must file an electronic/online application with the Netherlands Enterprise Agency. The taxpayer will receive an R&D declaration. The budget for this subsidy is fixed, so the amount of the subsidy is dependent on budget availability. Note that self-developed and utilised software falls within the scope of the R&D incentive under certain conditions.

The WBSO application for R&D includes not only salary costs but also other costs and expenses related to R&D. The benefit of the fiscal scheme is awarded in the form of a wage tax reduction. In 2018, the benefit amounts to 32% of the first EUR 350,000 of R&D costs (both salary and other costs and expenses). For start-ups, this amounts to 40%. For R&D costs above EUR 350,000, this amounts to 14%. Note that the maximum benefit cannot exceed the total amount of wage tax due. Instead of applying for the real costs and expenses (non-salary costs), the taxpayer may choose to take into account a fixed amount based on R&D hours. The fixed amount is EUR 10 per hour as long as the total R&D hours do not exceed 1,800 and EUR 4 for every hour above. Withholding agents are obligated to report the number of hours, costs, and expenses jointly for all R&D statements granted in a calendar year.

Withholding taxes

Dividends from Dutch corporations are generally subject to a 15% Dutch dividend WHT. In general, this does not apply to the Dutch cooperative (i.e. 'co-op') in a business driven structure, a widely used vehicle for holding and financing activities.

The Netherlands does not levy a WHT on interest and royalty payments.

Domestic corporations are required to withhold taxes as follows:

Recipient	Dividends (%) (1)
Resident corporations	0/15
Resident individuals	15
Non-resident corporations and individuals:	
Non-treaty situations	15

Notes

1. A 0% WHT rate applies to payments to a resident corporation when its shareholding qualifies for the participation exemption and the shares form part of a company whose activities are carried on in the Netherlands. However, dividend WHT may be levied on certain profit participating loans.
2. The lower rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company.
3. The 5% rate is applicable if the foreign company directly owns 10% of capital of the Dutch company. The 0% rate is applicable if the dividend originates from ordinary taxed profits and the dividend is tax exempt in the hands of the recipient.
4. Based upon the treaty concluded with former Yugoslavia.
5. Negotiations on (revisions of) tax treaties are currently pending with Angola, Aruba Australia, Belgium, Brazil, Chile, Colombia, Costa Rica, France, Indonesia, Kenya, New Zealand, Poland, Saint Martin, Singapore, Slovak Republic, and Spain. The revised treaty with the Czech Republic is signed but not yet effective.
6. Indicates that this country is a member state of the European Union. The EU Parent/Subsidiary Directive applies from 1 January 1992. According to the Directive, dividends paid by a Dutch company (BV or NV) to a qualifying parent company resident in another EU member state must be exempt from Dutch WHT, provided certain conditions are met. Among other things, the EU parent company must hold at least 10% of the Dutch dividend-paying company's capital (or, in certain cases, voting rights) for a continuous period of at least one year. Please note that the Dutch tax legislation is more lenient with respect to the minimum holding; it only requires a holding of 5% at the moment of distribution. A provisional exemption from dividend WHT will apply from the start of the one-year holding period. The exemption will be cancelled retroactively if, following the dividend distribution, the one-year holding requirement is not actually met. The Dutch dividend-distributing company must provide to the Dutch tax authorities a satisfactory guarantee for the payment of dividend WHT that, but for the provisional exemption, would be due. The exemption is also applicable if the parent company is a resident of a EU

member state and owns at least 10% of the (voting) shares in the Dutch company but only on the basis of reciprocity (Finland, Germany, Greece, Luxembourg, Spain, and United Kingdom). Should the WHT exemption not be available under the EU Parent/Subsidiary Directive, the treaty rate(s) set out in the right-hand side of the same column (following 'or') will apply.

7. The lower rate applies if the foreign company directly or indirectly owns at least 25% of the capital of the Dutch company.
8. The lower rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company.
9. The 0% rate applies if the foreign company directly owns at least 50% of the capital of the Dutch company, or invested more than EUR 250,000 in the Dutch company or directly owns 25% of the capital of the Dutch company and has a statement indicating that the investment in Dutch capital is, directly or indirectly, guaranteed by the government of Belarus.
10. The 5% rate applies if the foreign company directly or indirectly owns at least 25% of the capital or at least 10% of the voting rights in the Dutch company.
11. The treaty is not applicable for Hong Kong and Taiwan.
12. The 5% of rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the payer company. The 10% rate applies if the beneficial owner is a pension fund that is resident in the Netherlands. The 15% rate applies in other cases.
13. The lower rate applies if the foreign company owns at least 25% of the voting rights in the Dutch company.
14. The 5% rate is applicable if the Italian company owns at least 50% of the voting shares in the Dutch company for a continuous period of at least 12 months prior to the date chosen for distribution of a dividend. The 10% rate is applicable if the Italian company owns at least 10% of the voting shares in the Dutch company for the continuous period mentioned above. In other cases, the dividend WHT rate is 15%.
15. The 5% rate applies if the foreign company owns at least 10% of the voting shares of the Dutch company for a continuous period of at least six months immediately before the end of the book year to which the dividend distribution relates. No WHT is levied if the foreign company directly or indirectly owns at least 50% of the voting power in the Dutch company distributing the dividends for a period of six months. Also, no WHT is levied if the foreign company is a pension fund.
16. The lower rate applies if the foreign company directly or indirectly owns at least 10% of the capital of the Dutch company.
17. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or if it has invested more than 1 million United States dollars (USD) in the Dutch company, insofar as the government of Kazakhstan has guaranteed the investment; the 5% rate applies if the recipient company owns at least 10% of the capital of the paying company.
18. These rates do not apply to dividend payments to Luxembourg '1929' holding companies.
19. A 0% rate is only applicable to certain pension funds. The 5% rate is applicable only to shareholdings of at least 10%.
20. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company and invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 15% rate is applicable on portfolio investments.
21. The rate is 15% unless the dividend is paid to a company holding at least 25% of the paid-up capital in the Dutch company. In this latter case, the WHT rate will be reduced to: (i) 5% if the dividends received are subject to a profits tax in the other state of at least 5.5% on the dividend or (ii) 7.5% if the profits tax is less than 5.5%. The combined CIT of the other state and Dutch dividend WHT for participations of at least 25% must not exceed 8.3%. Depending on the tax percentage levied in the other state, the Dutch dividend WHT will be restituted accordingly.
22. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns 10% of the capital of the Dutch company. The 0% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% of the capital of the Dutch company.
23. The 5% rate is applicable if the recipient of the dividend is the beneficial owner and directly owns at least 25% in the capital of the Dutch company with a minimum investment of at least EUR 75,000.
24. The Netherlands applies the treaty with the former Soviet Union unilaterally to Kyrgyzstan, Tajikistan, and Turkmenistan.
25. The lower treaty rate applies if the Spanish company owns 50% or more of the capital of the Dutch company or if the Spanish company owns 25% or more of the capital of the Dutch company and another Spanish company also owns 25% or more of that capital.
26. The 0% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 300,000 in the Dutch company. The 5% rate is applicable if the foreign company directly owns 20% or more of the capital of the Dutch company.
27. The lower rate applies if the foreign company directly owns at least 10% of the voting rights in the Dutch company. On 8 March 2004, the Netherlands and the United States signed a protocol amending the applicable tax treaty. Based on this protocol, the WHT on dividends will be reduced to 0% if the receiving company owns 80% or more of the voting power of the distributing company, provided that certain other conditions are also met. This reduction of the dividend WHT has taken effect as of 1 January 2005.
28. The 5% rate is applicable if the foreign company directly owns 25% or more of the capital of the Dutch company. The 0% rate is applicable if the dividend for that company qualifies for the participation exemption in the Netherlands. The 15% rate is applicable to portfolio dividends.

29. The 5% rate is applicable if the foreign company directly or indirectly owns at least 50% of the capital of the Dutch company or invested more than USD 10 million in the Dutch company. The 7% rate applies to the foreign company owning, directly or indirectly, at least 25% of the capital of the Dutch company.
30. No dividend WHT is due if the share in the participation is at least 50% and at least USD 250,000 capital is paid in, in the participation. A dividend WHT of 5% is due if the share in the participation is at least 25%.
31. A dividend WHT of 5% is due if the share in the participation is at least 10%. No dividend WHT is due if the share in the participation is at least 50% and at least USD 2 million capital is paid in, in the participation.
32. Based upon most-favoured nation principle.
33. The 0% rate applies if a company controls at least 10% of the voting power of the Dutch company paying the dividends. The 15% rate applies to dividends arising from income from immovable property, distributed by certain tax exempt real estate investment vehicles (e.g. REITs or FBIs).
34. In case a Thai company holds at least a 25% share in a Thai company, the Dutch dividend WHT rate is 5%.
35. If a share of at least 50% is held by a company, no dividend WHT is due. If the share the company holds is less than 50%, 5% dividend WHT is due.
36. As of 29 December 2004, Switzerland and the European Union concluded a treaty in light of the EU Savings Directive. The treaty, amongst others, contains a clause that no dividend tax is withheld if certain requirements are met. The main requirements are that a shareholding of at least 25% is held directly for a period of at least two years and both corporations are not subjected to a special tax regime. Please note that even though the treatment of dividend appears to be equal to the treatment on the basis of the EU Parent-Subsidiary Directive, the Directive is, in fact, not applicable to Switzerland.
37. The 0% rate applies if the foreign company directly owns at least 5% of the capital of the Dutch company.
38. The 5% rate applies if the foreign company directly owns at least 25% of the capital of the Dutch company with a minimum investment of at least EUR 200,000 in the Dutch company.
39. The 0% rate applies if the foreign company directly owns at least 7.5% of the capital of the Dutch company.
40. The WHT rates are based on the Dutch '*Belastingregeling voor het Koninkrijk*'.
41. The WHT rates for the Caribbean Netherlands are based on the Dutch '*Belastingregeling voor het land Nederland*'.
42. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 10% (15% threshold for the Panama Treaty) of the shares of the Dutch company, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
43. The 0% rate applies if the foreign company directly owns at least 10% of the capital of the Dutch company, is a pension fund, or, as far as Switzerland is concerned, the beneficial owner is a social security scheme.
44. Because the treaty with Mongolia is not applicable anymore, the national WHT rate applies.
45. The 5% rate applies if the foreign company is the beneficial owner of the dividends and directly owns at least 10% of the capital of the Dutch company or is a pension fund.
46. The 0% rate applies if the shareholder is a pension fund or a governmental entity. The 0% rate also applies if the foreign company is the beneficial owner of the dividends and directly owns at least 10% of the capital of the Dutch company and meets one or more of the following criteria: it is listed on a recognised stock exchange, more than 50 of the shares is held by an entity listed at a recognised stock exchange, is the head office of a multinational or engages in group financing, has at least three qualifying employees, is commercially active and the dividends are connected to the business activities, is commercially active and the main purpose of the entity or shareholding is not the benefits of the tax arrangement, the shares are held for more than 50% by natural persons resident in the Netherlands or the other state.

Tax administration

Taxable period

Generally, the tax year is equal to the calendar year. However, corporate taxpayers may deviate from this by adopting a different financial year.

Tax returns

Corporate taxpayers are required to file a tax return annually. The due date is generally five months after the end of the company's financial year. This filing due date may be extended upon request by the taxpayer.

The Dutch tax authorities generally make a provisional assessment before issuing the final assessment after a full examination of the return. The final assessment must be issued within three years following the financial year. This period is prolonged with the time of the extension for filing the tax return. The Dutch tax authorities may issue an additional assessment if it appears that the amount of CIT payable (as calculated in the final assessment) is too low.

During the current tax year, a provisional assessment can be issued on the basis of prior years' taxable income or on an estimation provided by the taxpayer.

Payment of tax

The CIT assessed must be paid within two months of the date of the provisional or final assessment. Interest is payable on the CIT due. The interest is calculated from six months following the financial year. The minimum interest rate is 8%.

Refund of tax unduly levied

If a corporate taxpayer is entitled to a refund of Dutch CIT or WHT because the levy appeared to be in conflict with EU law, the Netherlands might be obligated to repay with interest for the period from the levy to the refund. The taxpayer must file a request at the Dutch tax authorities within six weeks after the refund.

Interest on late payment dividend WHT

Interest is calculated on late payments or refunds of Dutch dividend WHT.

Tax audit process

Corporate taxpayers might be subject to regular audits by tax inspectors. This forms part of the so-called vertical monitoring tasks of the national tax authorities. In recent years, there has been a tendency towards a more enhanced cooperation between tax authorities and taxpayers in the Netherlands (*see Horizontal monitoring in this section below*). Part of this trend is that there are to be less audits in retrospect.

Statute of limitations

Under certain conditions, the tax administration can impose an additional assessment within five years from the year in which the tax debt originated (if the filing due date was extended on request, this period is added). In case of income from abroad, the period for additional assessment is extended to 12 years. In 2013, the Dutch tax legislator published a proposal to reduce the period for the issuing of an additional assessment to three years after the tax return is received by the Dutch tax authorities. The same proposal also suggests extending that period to 12 years in case the taxpayer intentionally filed an incorrect tax return. This proposal, however, is recently withdrawn.

Advance pricing agreement (APA)/Advance tax ruling (ATR)

Taxpayers are able to obtain (legal) certainty concerning their CIT positions. They may request the Dutch tax authorities to conclude an APA with respect to the transfer pricing of controlled transactions. Taxpayers may also request the Dutch tax authorities to provide an ATR with respect to the CIT implications of a (contemplated) set of transactions.

Horizontal monitoring

If the taxpayer is willing, the Dutch tax authorities, in certain cases, shift their method from vertical monitoring to horizontal monitoring. Emphasis is placed on cooperation and on the responsibilities of the parties involved, instead of retrospective control. Horizontal monitoring is based on mutual trust, understanding, and transparency between the taxpayers and the Dutch tax authorities. It aims at reducing administrative burdens and providing legal certainty in advance. Taxpayers need to have a solid Tax Control Framework.

Topics of focus for tax authorities

The topics of focus for the Dutch tax authorities may vary.

Other issues

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA) with the United States (US)

The Netherlands signed an FATCA IGA with the United States on 18 December 2013. As of 1 July 2014, banks and insurers must be compliant with the FATCA provisions. This US-based legislation is implemented in Netherlands' domestic law and applies to all financial institutions worldwide. The FATCA IGA is based on the standard Model 1A IGA of 4 November 2013 and provides for specific exemptions.

Common Reporting Standard (CRS)

The CRS is implemented in Netherland's domestic law as of 1 January 2016. The same holds true for the amended EU Directive on Administrative Cooperation.

Based on this domestic law, financial service companies in the Netherlands must comply with certain administrative obligations and report information on foreign account holders to the Dutch tax authorities. This information may include account numbers and the balance on a bank account of foreign account holders.

Base erosion and profit shifting (BEPS)

According to the Netherlands, the BEPS issues should be addressed through international cooperation. As a member of the OECD, the Netherlands is an active participant in the BEPS project of the OECD and supporting its goals. As a consequence, the Netherlands will enact legislation when agreement is reached within the OECD on the BEPS project and all parties agreed to implement. One example of this type of legislation is the OECD CbC reporting implementation package that has been published in the OECD report on Action 13 in 2015. As of 1 January 2016, the Netherlands has implemented CbC reporting in domestic law in accordance with the system and methods as prescribed in the OECD CbC reporting package. Another example concerns the OECD recommendations on innovation box rules. As of 1 January 2017, the Dutch innovation box regime is aligned with the modified nexus approach as described in the OECD report on Action 5.

The Netherlands has signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (Multilateral Instrument or MLI) to implement the tax treaty related outcomes of BEPS. The Netherlands wishes 82 of its bilateral tax treaties to be covered by the MLI.

EU state aid

In 2014, the European Commission (EC) opened an investigation to examine whether a specific, individual ruling issued by the Dutch tax authorities on the calculation of the taxable basis for CIT purposes complies with the EU rules on state aid. The EC has concluded that this ruling does, in fact, constitute state aid. The Dutch Ministry of Finance has appealed the decision.

It is expected that the EC may also investigate other tax rulings. However, the EC has explicitly stated that it does not expect to encounter systematic irregularities in the Dutch tax ruling system as such.

Significant developments

Employee share schemes

In March 2018, the government enacted the Taxation (Annual Rates for 2017/18, Employment and Investment Income, and Remedial Matters) Act 2018. The Act introduces new rules for the taxation of employee share schemes and how to determine the amount and time of derivation of income and when expenditure is incurred under an employee share scheme. The purpose of the changes is to effect tax neutral treatment of employee share schemes relative to cash-based schemes. The rules also include a new definition of employee share scheme that means the rules apply to share benefits provided to employees (past, present, and future) and shareholder-employees. With some exceptions, the rules will come into effect from 29 September 2018, which is six months after legislative enactment.

Base erosion and profit shifting (BEPS) update

In May 2018, the Taxation (Neutralising Base Erosion and Profit Shifting) Bill, which was introduced into Parliament in December 2017, was reported back. The Bill represents the accumulation of extensive work conducted by Officials following the finalisation of the Organisation for Economic Co-operation and Development's (OECD's) BEPS framework in late 2015. Measures contained within the Bill seek to prevent multinationals from achieving tax advantages by using:

- artificially high interest rates on loans from related parties to extract profits out of New Zealand
- hybrid mismatching arrangements that exploit differences between countries' tax rules to achieve an advantageous tax position
- artificial arrangements to avoid having a permanent establishment (PE) for tax purposes in New Zealand, and
- related-party transactions to shift profits into offshore group members in a manner that does not reflect the actual economic activities undertaken in New Zealand and offshore.

The Bill is expected to be enacted by mid-2018.

Research and development (R&D) tax credit

The government released a Discussion Document for public consultation in May 2018, which proposes the introduction of a 12.5% R&D tax credit on eligible expenditure for businesses undertaking R&D in New Zealand. A maximum tax credit of 15 million New Zealand dollars (NZD) will be available each year.

It is expected that the tax credit will be enacted in early 2019 and be available for eligible expenditure incurred from 1 April 2019.

Goods and services tax (GST) on low-value imported goods

In May 2018, the government sought feedback on a proposal to introduce GST on the importation of low-value goods. The proposal would require offshore suppliers of goods supplied to New Zealand consumers to charge and remit GST on goods valued at less than NZD 400. Offshore suppliers supplying a total value of goods and services to New Zealand consumers above NZD 60,000 in a 12-month period would be required to register for GST purposes.

Consultation is currently underway, with the changes expected to be introduced to Parliament before the end of 2018 and effective from 1 October 2019.

Customs and excise duties

The Customs and Excise Act was enacted in March 2018 and represents a monumental step towards replacing and modernising the current customs legislation. Some of the key substantive changes affecting importers, exporters, and manufacturers include:

- moves to streamline the GST at the border for business importers
- a more flexible disputes regime
- ability to declare a provisional value for imported goods in specified cases
- ability to obtain rulings on more matters, including valuation, and
- more clarity on administrative penalties.

Double tax agreements (DTAs)

New Zealand is currently negotiating new and updating DTAs with a number of countries, including China, Luxembourg, and the United Kingdom.

The OECD's Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) was signed by New Zealand on 7 June 2017. The signing of the MLI will enable signatory countries to quickly update existing DTAs to include articles on PE avoidance, treaty abuse, dispute resolution, and hybrid mismatches.

An update to the existing DTA between New Zealand and Hong Kong was signed in June 2017. The new protocol allows automatic and spontaneous exchanges of tax information, with the first automatic exchange of information expected to occur before 30 September 2018.

Taxes on corporate income

New Zealand resident companies are taxed on their worldwide income, and non-resident companies (including branches) are taxed on New Zealand-sourced income.

The New Zealand corporate income tax (CIT) rate is 28%.

Local income taxes

There are no state or municipal income taxes in New Zealand.

Corporate residence

Residence is determined by place of incorporation, location of head office, centre of management, or by directors' exercising control of the company in New Zealand.

Permanent establishment (PE)

Generally, DTAs to which New Zealand is a party define a PE by reference to a fixed place of business through which the company's business is carried on. A PE can also exist without a fixed place of business if the employees of the overseas company habitually exercise an authority to conclude contracts in New Zealand or provide services in New Zealand for a period of time.

Other taxes

Goods and services tax (GST)

GST is a form of value-added tax (VAT) that applies to most supplies of goods and services, including services and intangibles supplied remotely by an offshore supplier to New Zealand resident consumers. The narrow category of exempt supplies includes financial services. The rate applied to taxable supplies is currently 15% or 0%.

The 0% rate applies to a few supplies only, including exports and financial services supplied to other registered businesses. The 0% rate also applies to the sale of land between two GST-registered parties if the purchaser acquires the land with the intention of using it to make taxable supplies and the land is not intended to be used as a principal place of residence for the purchaser or an associate.

There is also a 'reverse charge' mechanism that requires the self-assessment of GST on the value of certain services imported by GST-registered persons.

GST is also imposed on remote services provided by non-residents to New Zealand private consumers. The concept of 'remote services' is wide and includes streamed and downloaded digital products (e.g. music, movie, and game downloads, e-books, e-magazines) as well as remotely provided webinars, software, web design and publishing, insurance, gambling, consulting, IT, and professional services.

Non-residents who do not make taxable supplies in New Zealand can register for GST, provided they meet certain criteria, allowing them to claim a refund for their input GST costs.

Customs duties

Customs duty is levied on some imported goods at rates generally ranging from 1% to 10%.

Excise duty

Excise duty is levied, in addition to GST, on alcoholic beverages (e.g. wines, beers, spirits), tobacco products, and certain fuels (e.g. compressed natural gas, gasoline). The excise duties are levied item-by-item at rates that vary considerably.

Property taxes

Local authorities levy tax known as 'rates' on land within their territorial boundaries. Rates are levied on properties based on the properties' rateable value.

Residential land withholding tax (RLWT)

RLWT applies to the sale of residential land in New Zealand by an 'RLWT offshore person'. RLWT applies where the land was acquired on or after 1 October 2015 through 28 March 2018 and owned for less than two years before being sold, or where the land was acquired on or after 29 March 2018 and owned for less than five years before being sold.

An 'RLWT offshore person' includes all non-New Zealand citizens and non-permanent residents. It also includes a New Zealand citizen who is living overseas if they have been overseas for the last three years. A holder of a New Zealand residence class visa may be an offshore person if they are outside New Zealand and have not been in New Zealand within the last 12 months. New Zealand trusts and companies may also be 'offshore persons' if there are significant offshore interests in them.

The amount of RLWT to be deducted is the lessor of:

- 10% of the sale
- the gain on sale x the RLWT rate (28% for companies, incorporated clubs, and societies; 33% for individuals, all other non-individuals, and companies acting as trustees of a trust), or
- the sale price less outstanding local authority rates or less security discharged amount, depending on which party is withholding the tax.

Transfer taxes

There are no taxes on the transfer of property in New Zealand.

Stamp duty

Stamp duty has been abolished in respect of instruments executed after 20 May 1999.

Accident compensation levy

A statutory-based scheme of accident insurance is funded in part by premiums payable by employers and employees.

Premiums paid by employers (including the self-employed) fund insurance for work-related accidents. Employers are liable to pay a residual claims levy and an employer levy. The employer levy payable is determined according to the industry or risk classification of the employer and the level of earnings of employees.

Fringe benefit tax (FBT)

Employers are subject to a tax-deductible FBT on the value of non-cash fringe benefits provided to their employees. Employers can elect to pay FBT at flat rates (for the 2018/19 income year, 49.25% on attributed benefits and 42.86% on pool benefits, i.e. those benefits that cannot be attributed to a particular employee) applied against the value of the benefit or can attribute fringe benefits to individual employees and pay FBT based on each employee's marginal tax rate.

Under the attribution option, the applicable FBT rate depends on the net remuneration (including fringe benefits) paid to the employee. The attribution calculation treats the fringe benefit as if it was paid in cash and calculates FBT as the notional increase in income that otherwise would have arisen.

The current multi-rates are:

Net remuneration (NZD)	FBT rate (%)
12,530 or less	11.73
12,531 to 40,580	21.21
40,581 to 55,980	42.86
Greater than 55,980	49.25

Fringe benefits include motor vehicles available for private use, loans at below prescribed interest rates, contributions to medical insurance schemes, and non-monetary employer contributions to superannuation schemes.

In relation to motor vehicles, employers can value a vehicle on an annual basis either using 20% of the cost price or market value (GST inclusive) of the vehicle (depending on whether the vehicle is owned or leased by the employer) or 36% of the vehicle's tax written down value (GST inclusive). In each case, the FBT value must be reduced proportionately for whole days when the vehicle is not available for private use at any time.

FBT is also applicable to benefits received by an employee from a third party where there is an arrangement between the employer and the third party and where the benefit would be subject to FBT if it had been provided by the employer.

Employer superannuation contribution tax (ESCT)

Employers' contributions to an approved superannuation fund (excluding foreign schemes) are subject to ESCT. This includes employer contributions to KiwiSaver (or other qualifying registered superannuation schemes).

ESCT is generally deducted at the employee's relevant progressive rate based on the total salary or wages and employer superannuation cash contributions paid to the employee in the previous year.

Salary or wages plus superannuation contributions (NZD)	ESCT rate (%)
Up to 16,800	10.5
16,801 to 57,600	17.5
57,601 to 84,000	30.0
Over 84,000	33.0

Non-resident contractor's tax (NRCT)

New Zealand imposes an obligation to deduct NRCT on those making contract payments to non-residents in relation to certain contract activities undertaken in New Zealand. Contract activities generally relate to services but also include the granting of a right to use property in New Zealand. The NRCT rate is generally 15% (or 45% for individuals and 20% for companies if the relevant paperwork is not provided). Some contractors are eligible to apply for a certificate of exemption or a reduced rate certificate.

In additional to a certificate of exemption, no NRCT is required to be withheld if the non-resident has full relief from tax under a DTA and is present in New Zealand for no more than 92 days in a 12-month period.

Payments for contract work amounting to less than NZD 15,000 in a 12-month period are also exempt from NRCT. In such cases, contractors themselves are responsible for paying any New Zealand tax owed at the end of the year (provided there is no relief from tax under a DTA).

Branch income

A non-resident company is taxed on income generated by business wholly or partially carried on in New Zealand. Branch profits are subject to ordinary corporate rates of taxation, and there is no withholding tax (WHT) on repatriated profits.

Income determination

Inventory valuation

Inventory must be valued by a cost-valuation method or, where market-selling value is lower than cost, may be valued at market-selling value. If the inventory is shares, it must be valued at cost. Cost is determined under New Zealand Generally Accepted Accounting Practice (NZ GAAP). Acceptable cost flow methods are first in first out (FIFO) or weighted-average cost. Some valuation concessions are available to small taxpayers.

Capital gains

There is no separate capital gains tax. However, the income tax legislation specifically includes various forms of gain that would otherwise be considered a capital gain within the definition of 'income'. Taxable income includes gains on the sale of real estate in certain circumstances and on personal property where the taxpayer acquired the property for resale or deals in such property or where a profit-making purpose or scheme can be deemed or imputed.

Dividend income

Inter-corporate dividends paid between New Zealand resident companies are exempt where there is 100% common ownership.

Dividends from a foreign company

A dividend derived by a company resident in New Zealand from a foreign company is treated as exempt income unless it is:

- a dividend on a fixed rate share or a dividend for which the foreign company has received a tax deduction in its home jurisdiction, or
- a dividend from a portfolio foreign investment fund (FIF) (i.e. interests under 10%) that is exempt from FIF rules (e.g. an interest in an Australian listed company).

Dividends from foreign companies derived by taxpayers other than companies are taxable (generally with a credit for any foreign WHTs).

Supplementary dividend tax credit regime

Previously, the supplementary dividend tax credit regime (commonly referred to as FITC) ensured that foreign investors were not taxed at more than the New Zealand corporate tax rate by effectively rebating the New Zealand WHT to the extent that the dividend was fully imputed. As non-resident withholding tax (NRWT) rates have been reduced to nil on most fully imputed dividends, a supplementary dividend tax credit is generally no longer required.

The supplementary dividend tax credit regime applies only to fully imputed dividends paid to shareholders holding less than 10% of the shares in the company and NRWT rates of at least 15%.

Broadly therefore:

- only portfolio investors (i.e. those with less than 10% holdings) with NRWT rates of at least 15% will qualify for relief under the supplementary dividend rules, and
- a zero rate of NRWT applies to dividends paid to non-portfolio shareholders (i.e. shareholders with more than 10% holdings) and to any other dividends subject to lower tax rates, to the extent they are fully imputed.

Stock dividends

Bonus issues can be taxable or non-taxable. With a taxable bonus issue, the amount capitalised becomes available for tax-free distribution upon a subsequent share cancellation. With a non-taxable bonus issue, the amount capitalised is not available for tax-free distribution upon a subsequent share cancellation.

Shares issued under profit distribution plans (PDPs) are treated as taxable dividends.

Interest income

All interest derived by a company is income. The financial arrangement rules may require income for tax purposes to be recognised on an accrual basis. When this is not required (because the person is classified as a 'cash basis' person), interest income is recognised as and when it is received.

Royalty income

All royalty payments derived by a company is income. Royalty income includes payments for the supply of knowhow. It also includes a payment of any kind derived as consideration for a copyright, patent, plant variety right, trademark, design or model, plan, and secret formula.

Other significant items

The taxation of debt and debt instruments is governed by the financial arrangements rules, a specific set of timing rules. Income or expenditure (including foreign exchange gains and losses) from financial arrangements must be recognised on an accrual basis (generally, yield to maturity or other commercially acceptable method). These rules do not apply to the income or expenditure of a non-resident if the financial arrangement does not relate to a business carried on in New Zealand.

Foreign income

A New Zealand corporation is taxed on foreign passive income as earned. Double taxation with respect to all types of taxable income, including interest, rents, and royalties, is avoided by the recognition of foreign tax credits.

New Zealand does not offer specific tax deferral rules.

Deductions

Depreciation and depletion

For tax purposes, depreciation of property can be computed under the diminishing-value method, the straight-line method, or a pooling method. The rates of depreciation depend on the following factors:

- Type of asset.
- Whether the asset is acquired new or second-hand (i.e. used).

Taxpayers must use the economic depreciation rates prescribed by Inland Revenue. Fixed-life intangible property (including the right to use land and resource consents) is depreciable on a straight-line basis over its legal life. Any depreciation recovered on the sale of an asset (up to its original cost) is taxable in the year of sale.

The double-declining-balance (diminishing value) method applies to most plant and equipment. Under the double-declining-balance method, equipment with an estimated useful life of ten years results in diminishing value depreciation deductions of 20% *per annum* (i.e. double the straight-line rate of 10% over the equipment's ten-year life). Buildings, certain motor vehicles, high-residual-value property, fixed-life intangible property, and property acquired prior to the introduction of the new rules cannot be depreciated under the double-declining-balance method.

The depreciation rate for buildings with an estimated useful life of 50 years or more is 0% as of the 2011/12 income year.

Goodwill

Goodwill is generally regarded as a capital asset, thus any payment for goodwill is non-deductible. There is a limited exception for payments made to preserve goodwill.

Start-up expenses

Expenses incurred by a company before the commencement of the business are generally regarded as outgoings of a capital nature and are therefore not deductible. However, certain expenditure on scientific research may be deductible, provided that it is incurred for the purpose of the company deriving assessable income.

Research and development (R&D)

R&D costs are tax deductible. Expenses written off as immaterial and not tested against certain asset-recognition criteria are not automatically deductible for tax purposes.

Unsuccessful software development costs

Taxpayers are allowed an upfront deduction for expenditure incurred on unsuccessful software development projects in the year that the development is abandoned.

Interest expense

Generally, interest incurred by most companies is deductible, subject to thin capitalisation rules (*see the Group taxation section*).

Bad debt

A company is allowed a deduction for bad debt in the income year in which the debt is physically written off by the company.

Charitable contributions

A company is generally allowed a deduction for charitable contributions it makes to an approved Inland Revenue donee organisation or a charity that performs its activities in New Zealand. The list of approved donee organisations is available on Inland Revenue's website. The deduction available for charitable contributions is limited to the company's net income for that income year.

Entertainment expenditure

Entertainment expenditure is generally only 50% deductible. However, entertainment expenditure incurred overseas is 100% deductible.

Legal expenditure

Legal expenditure is deductible if the expenditure is:

- incurred in deriving assessable or excluded income or
- incurred in the course of carrying on a business for the purpose of deriving assessable or excluded income.

However, the expenditure is not deductible if it is of a capital, private, or domestic nature.

Taxpayers with business-related legal expenditure of NZD 10,000 or less are able to deduct the full amount of the expenditure in the year it is incurred, whether or not it is capital in nature.

Fines and penalties

Generally, no deduction is available where a company has incurred expenditure on fines or penalties paid in breach of statute or regulation. Expenditure on other fines and penalties requires further evaluation before its deductibility can be determined.

Taxes

FBT is deductible, as is GST payable on the value of a fringe benefit.

Net operating losses

Losses may be carried forward indefinitely for offset against future profits, subject to the company maintaining 49% continuity of ownership. There is no loss carryback. Losses of a subsidiary are preserved on a spinout (i.e. when shares in the subsidiary are transferred to shareholders of its parent company).

Payments to foreign affiliates

A New Zealand corporation can claim a deduction for royalties, management service fees, and interest charges paid to non-resident associates, provided the charges satisfy the 'arm's-length principle', which forms the basis of New Zealand's transfer pricing regime.

Group taxation

Groups of resident companies that have 100% common ownership may elect to be subject to the consolidated group regime. The group is effectively treated as a single company, and transfers of assets, dividends, interest, and management fees among members of the group are generally disregarded for tax purposes. The group files a single return and is issued a single assessment. Group members are jointly and severally liable for tax purposes, unless an election is made to limit the liability to one or more companies in the group.

Outside of the consolidated group regime, companies that are 66% or more commonly owned constitute a 'group'. Group companies are able to offset losses by election as well as by subvention payment. A subvention payment is a payment made by the profit company to the loss company and cannot exceed the amount of the loss company's loss. The payment is deductible to the profit company and assessable to the loss company.

Companies that are more than 66% commonly owned but not wholly owned may transfer imputation credits as part of loss grouping (i.e. loss offsets or subvention payments). This allows the company receiving the benefit of the loss grouping to pay a fully imputed dividend despite engaging in loss grouping and allows the company to retain the benefit of the loss transfer.

Certain companies subject to special bases of assessment (e.g. mining companies other than petroleum extraction companies) are excluded from the grouping provisions. Branches of non-resident companies may be included, provided they continue to carry on business in New Zealand through a fixed establishment.

Losses incurred by a dual-resident company are not available for offset by election or subvention payment.

Transfer pricing

The transfer pricing rules are based on OECD principles and require taxpayers to value all cross-border transactions with associates on an arm's-length basis.

The transfer pricing rules apply to arrangements for the acquisition or supply of goods, services, money, intangible property, and anything else (other than non-fixed rate shares) where the supplier and acquirer are associated persons. Similar rules apply to the apportionment of branch profits.

Various methods are available for determining the 'arm's-length consideration'. The taxpayer is required to use the method that produces the most reliable measure of the amount that independent parties would have paid or received in respect of the same or similar transactions. Inland Revenue has published guidelines that make it clear that documentation is required to support a taxpayer's transfer prices. However, currently there is no legal requirement to maintain transfer pricing documentation in New Zealand.

Significant changes are proposed to the transfer pricing rules as part of a series of BEPS-related proposals included in legislation before Parliament. The new concept of a 'control group' is being introduced, which is when members of a group are consolidated for accounting purposes. Those who meet the definition of a 'control group' will be subject to more restricted transfer pricing rules. These changes are expected to come into effect for income years beginning on or after 1 July 2018.

Country-by-country (CbC) reporting requirements

New CbC reporting requirements have been published by the OECD in order to address BEPS. In New Zealand, the first reporting of CbC data took place during the 2017 calendar year.

Each year, the New Zealand Inland Revenue will contact the New Zealand headquartered corporate groups required to file the CbC report and provide templates and guidance.

Thin capitalisation

'Inbound' thin capitalisation rules apply to New Zealand taxpayers controlled by non-residents, including branches of non-residents. The aim of the rules is to ensure that New Zealand entities or branches do not deduct a disproportionately high amount of the worldwide group's interest expense. This is achieved by deeming income in New Zealand when, and to the extent that, the New Zealand entities in the group are thinly capitalised (i.e. excessively debt funded).

The inbound rules include situations where non-residents are 'acting together' and include trusts where the majority of settlements have come from non-residents or from entities subject to the thin capitalisation rules.

The 'outbound' thin capitalisation rules are intended to operate as a base protection measure to prevent New Zealand residents with controlled foreign company (CFC) investments and certain FIF investments from allocating an excessive portion of their interest cost against the New Zealand tax base.

To reduce taxpayer compliance costs, the outbound thin capitalisation rules do not apply when the New Zealand taxpayer has 90% or more of their assets in New Zealand.

Further concessions are available under the 'outbound rules' to taxpayers who do not fall below this threshold. If the taxpayer's interest deduction and dividends paid for fixed rate shares (the finance cost) is below NZD 1 million, no apportionment of deductible interest is required. If the finance cost is above NZD 1 million, but below NZD 2 million, the interest apportionment may be reduced.

An apportionment of deductible interest is required under the thin capitalisation rules when the debt percentage (calculated as the total group interest bearing debt/total group assets of a New Zealand entity or group) exceeds both:

- 60% (for 'inbound' thin capitalisation) or 75% (for 'outbound' thin capitalisation) and
- 110% of the worldwide group's debt percentage.

The use of the debt-to-asset ratio differs from most thin capitalisation models that apply to an entity's debt-to-equity ratio. All interest (both related and unrelated party) is subject to apportionment.

Foreign-owned banks operating in New Zealand are subject to specific thin capitalisation rules that deem income if the bank does not hold a level of equity equivalent to 6% of their New Zealand banking risk-weighted assets. In addition, banks are required to have sufficient equity to equity fund offshore investments that do not give rise to New Zealand taxable income in full.

Significant changes are proposed to the thin capitalisation rules as part of a series of BEPS-related proposals currently before Parliament. These changes are expected to come into effect for income years beginning on or after 1 July 2018. The proposed changes include:

- A 'restricted transfer pricing rule' within the transfer pricing regime, which would require inbound related-party loans to be priced as plain vanilla senior debt with a rebuttable presumption of parental support, unless the foreign parent has substantial third-party debt that includes those terms.
- An administrative safe harbour in the form of an interest rate cap calculated with reference to the credit rating of the New Zealand borrower's ultimate parent company.
- An anti-avoidance rule to ensure that taxpayers do not repay loans just before year-end for thin capitalisation purposes.
- Measuring total assets net of non-debt liabilities, excluding any interest-free shareholders loans.

Controlled foreign companies (CFCs)

The CFC regime imposes New Zealand tax on the notional share of income attributable to residents (companies, trusts, and individuals) with interests in certain CFCs.

Central to the regime is the definition of a CFC. When five or fewer New Zealand residents directly or indirectly control more than 50% of a foreign company, or when a single New Zealand resident directly or indirectly controls 40% or more of a foreign company (unless a non-associated non-resident has equal or greater control), that company is a CFC. For interests that do not meet the definition of a CFC, the investment may be taxed under the FIF regime (*see below*).

Note that a person with an income interest in a CFC does not have attributed CFC income or losses if:

- the Australian exemption applies or
- the CFC passes an active business test.

If the exemptions do not apply, only the CFC's passive (attributable) income is subject to tax on attribution (on an accrual basis). However, no income attribution is required if a New Zealand resident has an income interest of less than 10% in the CFC.

Active business test

A CFC passes the active business test if it has passive (attributable) income that is less than 5% of its total income. For the purposes of the test, taxpayers measure passive and total income using either financial accounting (audited International Financial Reporting Standards [IFRS] or NZ GAAP accounts) or tax measures of income.

CFCs in the same country may be consolidated for calculating the 5% ratio, subject to certain conditions.

Australian exemption

A person with an interest in a CFC does not have attributed CFC income or a loss if the CFC is a resident in, and subject to income tax in, Australia and meets certain other criteria.

Passive (attributable) income

Attributable, or passive, income is income that is highly mobile and not location-specific (i.e. income where there is a risk that it could easily be shifted out of the New Zealand tax base).

The broad categories of attributable income are as follows:

- Certain types of dividend that would be taxable if received by a New Zealand resident company.
- Certain interest.
- Certain royalties.
- Certain rents.
- Certain amounts for financial arrangements.
- Income from services performed in New Zealand.
- Income from offshore insurance business and life insurance policies.
- Personal services income.
- Income from the disposal of revenue account property.
- Certain income related to telecommunications services.

Taxpayers must disclose interests in CFCs in their annual tax returns. Failure to disclose CFC interests can result in the imposition of penalties.

Foreign investment funds (FIFs)

The FIF regime is an extension of the CFC regime, which subjects persons with interests in certain foreign entities (which are not CFCs) to New Zealand tax. It also applies when the investor does not have a sufficient interest in a foreign entity to be taxed under the CFC regime.

Common examples of investments classified as FIFs include foreign companies, unit trusts, and life insurance policies issued by foreign entities not subject to New Zealand tax.

The FIF rules can be split into two regimes:

- The portfolio FIF rules, which apply to interests of less than 10% in an FIF.
- The non-portfolio FIF rules, which apply to interests of 10% or more that are outside the CFC rules.

Portfolio FIF rules

The portfolio FIF rules apply to interests of less than 10% in foreign companies, foreign superannuation schemes, and foreign life insurance policies issued by non-resident life insurers (if the CFC rules do not apply). However, a New Zealand resident does not generally have FIF income when:

- the total cost of FIF interests held by the individual does not exceed NZD 50,000
- the income interest is in certain Australian Stock Exchange (ASX) listed companies or certain Australian unit trusts, or
- the CFC rules apply.

There are also exemptions for interests in certain foreign employment-related superannuation schemes. These include interests held by returning residents and new migrants acquired before the person became a New Zealand resident or within the first five years of New Zealand residence.

When an interest is exempt from the FIF rules, distributions are subject to tax on a receipts basis in accordance with normal principles.

The taxable income of a New Zealand resident with an interest in an FIF that does not qualify for one of the exemptions is calculated using one of the following methods:

- Fair dividend rate (FDR).
- Comparative value.
- Cost.
- Deemed rate of return.
- Attributable FIF income.

The nature of the interest held and the availability of information restrict the choice of method.

Taxpayers must disclose interests in certain FIFs in their annual tax returns. Failure to disclose can result in the imposition of penalties.

Non-portfolio FIF rules

The active business exemption (which applies for CFCs) also includes certain non-portfolio FIFs. If the FIF fails the active business test, passive income will be attributed to the New Zealand shareholders. There is also an exemption for shareholders with a 10% or greater interest in an FIF that is resident and subject to tax in Australia.

When investors do not have sufficient information to perform the calculations required under the active business test (or choose not to apply the active business test), they will be able to use one of the attribution methods for portfolio FIF investments (*see above*).

Tax credits and incentives

Foreign tax credits

If a New Zealand resident company derives overseas income that is subject to New Zealand income tax, the company is generally allowed a credit for the foreign income tax paid in respect of that income. Generally, the credit is limited to the lesser of the actual overseas tax paid on the overseas income or the New Zealand tax applicable to the overseas income.

Foreign tax credits can only be used if the taxpayer is in a tax paying position. If foreign tax credits are not claimed in the current year, they are forfeited.

Inbound investment incentives

There are limited, specific tax incentives designed to encourage the flow of investment funds into New Zealand.

Legislation encourages foreign venture capital investment into unlisted New Zealand companies. Gains derived by certain non-residents from the sale of shares (held on revenue account and owned for at least 12 months) in New Zealand unlisted companies that do not have certain prohibited activities as their main activity are exempt from income tax. The rules apply to foreign investors who are resident in all of the countries with which New Zealand has a DTA (except Switzerland) and who invest into New Zealand venture capital opportunities.

Capital investment incentives

Investment allowances on fixed assets are not available.

Trans-Tasman imputation

Elective rules allow trans-Tasman groups of companies to attach both imputation credits (representing New Zealand tax paid) and franking credits (representing Australian tax paid) to dividends paid to shareholders.

The regime allows eligible wholly owned groups of Australian and/or New Zealand companies to group for imputation purposes only. Groups with both Australian and New Zealand members are known as trans-Tasman imputation groups (TTIGs). New Zealand companies within a trans-Tasman group maintain a separate 'resident imputation subgroup' account.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax on gross income, as shown in the table below.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Resident corporations	33 (1)	28 (1)	0
Resident individuals	33	max 33	-
Non-resident corporations and individuals		(2)	
Non-treaty	0/15/30 (3)	15 (4)	15
Treaty:

United States	0/5/15 (16)	0/10 (16)	5
Vietnam	5/15 (17)	10	10

Notes

1. Resident WHT applies to both interest and dividends. Unless the recipient corporation holds an exemption certificate, and if the recipient provides a tax file number, the default rate of the interest WHT is 28%. Recipients can elect for the rate of interest withholding to be 28% or 33%. The rate of interest WHT is 33% where the recipient does not provide a tax file number.

   The rate of WHT on dividends paid is 33%, but the tax is reduced by the aggregate imputation and withholding payment credits attached to the dividend or taxable bonus share. Interest and dividends paid between group companies and in certain other limited circumstances are exempt from the WHT.

   Where a fully imputed dividend is paid to a corporate shareholder, there is no requirement to withhold RWT or NRWT.

2. Resident corporations paying interest to non-associated, non-resident corporations and individuals need not withhold tax if they have approved-issuer status and the security under which interest is payable is registered with Inland Revenue. In this case, the resident corporation pays a 2% levy (tax deductible) on the interest payments instead of the WHT otherwise applicable.
3. NRWT is imposed on dividends at the following rates, regardless of the jurisdiction to which the dividends are paid:
   - 0% for fully imputed dividends paid to a shareholder holding 10% or more of the direct voting interests in the company and fully imputed non-cash dividends.
   - 15% for fully imputed cash dividends paid to a shareholder holding less than 10%.
   - 30% in most other cases, subject to any relief available under a DTA.
4. Net interest income is subject to reassessment at the company tax rate where the payer and the recipient are ‘associated persons’, but WHT is the minimum liability. NRWT is not imposed where the recipient of the interest has a fixed establishment in New Zealand.
5. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 80% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
6. The WHT on dividends is reduced from 15% to 5% for an investor who holds at least 10% of the shares in the company that pays the dividend. The WHT rate on royalties is reduced from 15% to 10% generally, with a further reduced rate of 5% for royalties relating to copyright, computer software, and others.
7. The WHT on interest is reduced to 10% if the interest received is derived from loans granted by banks or insurance companies. In all other cases, 15%.

8. The WHT on interest may differ in accordance with the rates prescribed by New Zealand legislation for interest paid to 'associated persons'.
9. The WHT on dividends is reduced from 15% to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend. The rate reduces to 0% if the investing company holds 50% or more of the shares in the other company and meets other criteria. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
10. The WHT rate on dividends is reduced from 15% to 0% for an investor who holds at least 10% of the voting power in the company paying the dividend (subject to certain conditions being met). The WHT rate on interest is 10% generally and 0% if it is payable to eligible financial institutions.
11. The 0% WHT rate applies where the foreign company owns at least 80% of the voting rights in the paying company (directly or indirectly) for 12 months prior to the date the dividend is paid and meets other criteria. The 5% rate applies if the foreign company has a direct interest of at least 10% of the voting rights in the paying company.
12. The WHT rate on dividends will reduce from 15% to a maximum of 5% for an investor who holds at least 10% of the shares in the company that pays the dividend.
13. The standard WHT rate on dividends reduces to 5% for an investing company that has at least a 10% shareholding in the company paying the dividend.
14. The WHT rate on interest is reduced to 10% if it is received by a financial institution or it is paid with respect to debt arising from a sale on credit of any equipment, merchandise, or services. The WHT rate is reduced to 10% for certain types of royalty.
15. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 25% of the capital of the company paying the dividends and 15% in all other cases. The WHT rate on interest is reduced to 10% if the interest is paid to a bank and 15% in all other cases.
16. The WHT rate on dividends is 5% for an investor who holds at least 10% of the shares in the company that pays the dividend; 0% if the investor holds 80% or more of the shares in the company and meets other criteria; 15% in all other cases. The WHT rate on interest is 10% but is reduced to 0% if it is payable to eligible financial institutions.
17. The WHT rate on dividends is reduced to 5% if the beneficial owner is a company holding at least 50% of the voting power in the company paying the dividends and 15% in all other cases.

Tax administration

Taxable period

Tax returns are based on the fiscal year ending 31 March, although other fiscal year-ends are possible if permission is obtained.

Tax returns

The system is one of self-assessment, under which the corporation files an income tax return each year. For those not linked to a tax agent, returns must be filed by 7 July for balance dates between 1 October and 31 March, or by the seventh day of the fourth month following a balance date between 1 April and 30 September. The filing date for taxpayers linked to a tax agent is extended to 31 March of the following year.

Payment of tax

Terminal tax payment is due on 7 February for balance dates between 31 March and 30 September. For other balance dates, terminal tax payments are generally due on the seventh day of the 11th month following the balance date. The terminal tax due date is extended by two months for taxpayers linked to a tax agent.

Provisional tax payments are generally due in three instalments: (i) 28th day of the seventh month before the balance date, (ii) 28th day of the third month before the balance date, (iii) 28th day of the month following the balance date.

Calculating provisional tax

For the 2018/19 income year (i.e. year ending 31 March 2019), provisional taxpayers have the following five options:

1. Where the 2017/18 return of income has been filed, 2018/19 provisional tax can be based on 105% of the 2017/18 residual income tax.

2. Where the 2017/18 return of income has not been filed, due to an extension of time for filing, 2018/19 provisional tax can be based on 110% of the 2016/17 residual income tax, but only for the first two instalments. The final instalment must be calculated based on the first option above.
3. Provisional tax can be based on a fair and reasonable estimate of the 2018/19 residual income tax.
4. The GST ratio option.
5. The Accounting Income Method (AIM).

The GST ratio option enables smaller taxpayers to align their provisional tax payments with their cash flow and reduce their exposure to use of money interest. The option is intended to benefit those taxpayers with declining, seasonal, or fluctuating income. This option calculates provisional tax by reference to the taxpayer's GST taxable supplies in the relevant provisional tax instalment period.

With effect from 1 April 2018, a new method for calculating provisional tax payable, the AIM, is available for businesses with gross annual income of less than NSD 5 million. AIM uses accounting information from the business' accounting software for a period as a basis for calculating the tax liability of the business for that period. The resulting amount is payable by the taxpayer as a provisional tax instalment.

Taxpayers can also make voluntary payments. Such payments can be made to minimise exposure to use of money interest. A taxpayer choosing to estimate residual income tax is required to take reasonable care when estimating.

When the taxpayer's return of income for the year is furnished, the provisional tax paid for that year is credited against the tax assessed. This results in either a refund or further tax to pay by way of terminal tax.

For the 2017 year and prior, where provisional tax paid was less than the amount of income tax deemed due on that instalment date, interest was imposed. If provisional tax was overpaid, interest was payable to the taxpayer. Interest was deductible for tax purposes by business taxpayers, and interest earned on overpaid provisional tax was gross income for tax purposes.

From the 2018 year and onwards, there will be no interest charged by or received from Inland Revenue if the first and second instalments are in line with the standard uplift method (described as options 1 and 2 above). A taxpayer will be exposed to full use-of money interest (UOMI) from the point they choose to estimate. 'Provisional tax associates' should use the same method (i.e. standard or estimation).

Use-of-money interest (UOMI)

From 8 May 2017, the interest rate for unpaid tax is 8.22%, while the rate for overpaid tax is 1.02%.

Tax pooling

Taxpayers are able to pool their provisional tax payments with those of other taxpayers through an arrangement with a commercial intermediary. Tax pooling allows underpayments to be offset by overpayments within the same pool and *vice versa*.

Tax penalties

An initial late payment penalty of 1% applies if a tax payment is not made on the due date. A further 4% late payment penalty applies if the payment is not made within seven days of the due date. For the 2017 year and prior, an incremental late payment penalty of 1% was imposed monthly until payment was made. The 1% monthly penalty is no longer being charged on amounts that remain unpaid for the 2018 year onwards.

Inland Revenue is required to notify a taxpayer the first time their payment is late rather than imposing an immediate late payment penalty. If payment is not made by a certain date, a late payment penalty will be imposed. Taxpayers will be entitled to one notification every two years. After receiving a first warning, Inland Revenue will not send further notifications for two years, and an initial late payment penalty will be imposed in the normal manner.

Shortfall penalties

Shortfall penalties, calculated as a percentage of the tax shortfall resulting from the action or position taken by the taxpayer in a tax return, may also apply.

There is a 50% discount on certain penalties where the taxpayer has a past record of 'good behaviour' and, in certain circumstances, a cap of NZD 50,000 on shortfall penalties for not taking reasonable care or for taking an unacceptable tax position.

Tax audit process

Inland Revenue maintains an active audit programme across all tax types and taxpayer profiles and regularly publishes information about their compliance focus. Often, Inland Revenue audits are preceded by a risk review where Inland Revenue requests information in order to evaluate the risk of non-compliance. Where this review detects an issue that requires further inspection, Inland Revenue will then advise that an audit will be commenced.

Statute of limitations

The general rule is that Inland Revenue has four years from the end of the New Zealand income tax year (31 March) in which the return is filed to re-assess the return, unless the return is fraudulent, wilfully misleading, or omits income of a particular nature or source.

Topics of focus for tax authorities

For multinational corporations, Inland Revenue highlights tax avoidance, transfer pricing, CFCs, and international financing arrangements as key risk areas, in tune with the OECD's current dialogue on the BEPS work. In particular, Inland Revenue is focussing on the following:

- Transfer pricing: Lack of transfer pricing documentation, major downwards shifts in profitability, widely differing profits between local entities and their global group members, unsustainable levels of royalties or management fees, transactions with low or no tax jurisdictions, and chronically recurring losses.
- CFCs: Technical compliance, possible New Zealand tax residency of CFCs through local management control or director decision making.
- BEPS concerns: Taxation of digital goods and services provided over the internet, hybrid mismatches occurring as a result of variances in tax treatment between countries, and misuse of tax treaties.

- GST: Associated party transactions, non-routine transactions, and zero rating of goods or services.
- Non-residents: Transactions with non-residents and non-resident contractors.

For small-to-medium sized enterprises (SMEs), Inland Revenue is focussing on GST errors, employer deductions, NRCT, and other minor filing errors.

Other key focus areas include the following:

- Aggressive tax planning.
- Central and local government.
- Life insurance providers.
- Trusts.
- Fraud and identity theft.
- Charities.
- The property sector.
- Under-reporting income and operating outside the system.

Other issues

Financial reporting standards for SMEs

The Financial Reporting Act 2013, along with the Financial Reporting (Amendments to other Enactments) Act 2013, changed the financial reporting and audit requirements for some New Zealand entities. As of 1 April 2014, entities that do not fall under the definition of 'large' or have 'public accountability' do not have to prepare general purpose financial statements in accordance with NZ GAAP. Entities that no longer have to prepare general purpose financial statements under the Financial Reporting Act 2013 are still required to prepare special purpose financial statements for tax purposes. Inland Revenue has provided the minimum requirements for financial statements in an Order in Council. These include:

- a balance sheet, profit and loss, and supporting notes or schedules
- accounts based on double entry cost-based accrual accounting
- tax values utilised for the determination of income and expenditure and preparation of the balance sheet
- a statement of accounting policies and changes
- a reconciliation of the financial statements to taxable income, and
- a schedule of related-party transactions.

BEPS Multilateral Instrument (MLI)

New Zealand signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI) in June 2017. New Zealand has ratified the MLI. However, to complete the process, New Zealand needs to deposit the instrument of ratification with the OECD.

The MLI will enter into force on 1 July 2018, given five signatories have now completed the ratification process. The MLI will enter into force for relevant New Zealand treaties three months after New Zealand has deposited the instrument of ratification with the OECD, provided the other treaty partner has also completed its ratification process.

Significant developments

There have been no significant corporate tax developments in Nicaragua during the past year.

Taxes on corporate income

Nicaragua has a territorial income tax system under which only income generated in, or that causes effects in, Nicaragua is generally subject to income tax. The corporate income tax (CIT) is imposed on a corporation's profits, which consist of business/trading income, and passive income. Capital incomes and capital gains are subject to definitive withholding tax (WHT). General business expenses are allowed as a deduction in computing taxable income.

Corporate income tax (CIT) rate

CIT is levied only on domestic-sourced income at a flat rate of the higher of:

- 30% of net taxable income (i.e. gross taxable income less allowed deductions), or
- a definitive minimum tax of 1% on gross income obtained during the fiscal year.

If the company does not have net income, 30% of net income will not be greater than 1% of gross income.

The law establishes the following exceptions to the 1% definitive minimum tax:

- First three fiscal periods of recently incorporated entities. For tax purposes, the beginning of business operations is when a company generates taxable income.
- Taxpayers whose sales prices are controlled by the government.
- Taxpayers that ceased operations on account of *force majeure*.
- Investments subject to a period of development. The Treasury Ministry must approve such period.

Local income taxes

See Municipal sales and services tax in the Other taxes section.

Corporate residence

Legal entities considered as a tax resident must comply with one of the following criteria:

- Registered according to the Laws of Nicaragua.
- Have their fiscal domicile in the territory of Nicaragua.
- Have their place of management located in the territory of Nicaragua.

The legal forms permitted in Nicaragua to constitute a corporation are stock corporations or limited liability companies, either as subsidiaries or branches.

Permanent establishment (PE)

Law 822 has incorporated a definition of 'permanent establishment' into the Nicaraguan income tax regime. This term means a place through which a non-resident taxpayer wholly or partially carries on business, including, *inter alia*, the following: a place of management; a branch; an office or agent; a factory; a workshop; and a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

Such definition also includes a building site or construction or installation project or connected supervision activities, but only if its duration exceeds six months; and the performance of consultancy services, provided that they exceed six months within an annual period.

A PE may also be created where a person other than an agent of independent status acts on behalf of a non-resident taxpayer if:

- this person has in Nicaragua authority to habitually conclude contracts or undertake acts in the name of the non-resident taxpayer, or
- even though this person does not have such authority, this person habitually maintains in Nicaragua a warehouse of goods or merchandise from which this person regularly delivers goods or merchandise in the name of the non-resident taxpayer.

These PE rules will not apply to a branch or PE of non-resident taxpayers operating business activities of marine and air transportation of cargo and passengers, as well as land cargo transportation.

Other taxes

Value-added tax (VAT)

The following transactions are subject to VAT when performed within Nicaragua:

- Supplies of goods.
- Supplies of services.
- Importations of goods.
- Exports of goods and services.

VAT is imposed at a 15% rate on the sale of goods, rendering of services, grant of use of assets, and import of goods. Export of goods and services are subject to a 0% rate.

VAT exemptions are available for certain items, including medicine, real estate transfer, sale of used goods, basic food products, credit instruments, tuition, and textbooks and educational supplies.

Taxpayers may recover VAT paid for the purchase of goods and services used to generate other goods and services subject to VAT. This is known as VAT liquidation, which is determined by subtracting VAT credits paid on transactions needed to generate taxable income for VAT purposes from VAT collected on the sales of goods or the rendering of services. Note that VAT paid on transactions to generate non-taxable income for VAT purposes are not allowed as VAT credits.

The exemption with right to deduct input VAT applies when:

- the input VAT is necessary in the business activity process for selling of goods or provision of services, and
- the tax is properly detailed in the invoice of a legal document.

VAT returns must be filed on a monthly basis, with payment due in full on the same day. Taxpayers registered as high taxpayers (with annual income greater than 60 million Nicaraguan córdobas [NIO]) must present an advanced bi-weekly VAT return in the first five business days after the 15th day of each month and a definite return in the first 15 days of the following month.

Selective consumption tax

A selective consumption tax is applied to goods that are considered to be non-essential. The tax base is the cost, insurance, and freight (CIF) price for imported items, and the tax is levied and paid only at that stage (based on the list of products published as an appendix to Law 822).

Customs duties

Customs duties relate to the importation of any good within the Nicaragua territory for commercial purposes. The following taxes apply to imports, depending on the product:

- Import Custom Duties (DAI), which are the local tariff liens in the importation of goods agreed to in the Central American Import Tariff.
- Excise Tax (ISC), which is an indirect tax levied on selective consumption of goods (e.g. tobacco cigarettes).
- VAT.

Temporary Admission for Active Processing (TAP) regime

Exporters can apply for the TAP regime, which is designed to allow the importation of goods without payment of duties, import taxes, or other taxes, on condition of being transformed (i.e. subject to any subsequent operation) to be re-exported or exonerated.

Transfer taxes

Nicaragua’s tax system does not impose transfer taxes.

Stamp taxes

Stamp duty is levied on certain types of documents issued in Nicaragua.

Payroll taxes

The employer is responsible to withhold and pay employee income tax on a monthly basis through withholding income tax return Form IR-122, according to progressive tax rates.

Social security contributions

In principle, social charges apply to nationals and legal residents from the first day of employment on a monthly basis. Social security contributions are calculated upon the gross salary of the employee, as follows:

	Social security rates (%)				
	Pension	Family health	Labour healthcare	War victims	Total
Employer	10.00	6.00	1.50	1.50	19.00
Employee	4.00	2.25	0	0	6.25

The employer must also pay 2% of its payroll, on a monthly basis, for Training Tax (INATEC).

Municipal sales and services tax

A monthly 1% tax is levied on all sales of goods and rendering of services in each of the municipalities of the country.

Municipal registration tax

An annual 2% tax is levied by each municipality on the average of income received in the months of October, November, and December of the previous year. In the case of the incorporation of a new establishment or enterprise, the municipal registration tax is 1% of the capital invested.

Real estate municipal tax

The real estate municipal tax is an annual tax that is levied at a rate of 1% on 80% of cadastral value, as recorded by the government. If the cadastral value is not available, the cost or fiscal appraisal value may be used.

Branch income

Branch income received is subject to the general CIT. The repatriation of income from the branch to the head office in the form of dividends, profits, capital gains, or any other form that suggests the income repatriated is an economic benefit is considered taxable.

Income determination

Taxable income is determined by the sum of all income derived from Nicaraguan sources, less allowable deductions, which generally include all expenses necessary to generate taxable income. Taxable income is computed according to International Financial Reporting Standards (IFRS) and modified, as required, by Nicaraguan income tax law.

Inventory valuation

Last in first out (LIFO), first in first out (FIFO), and the average cost methods are accepted for inventory valuation purposes. The tax authorities must authorise the change of a valuation method.

Capital gains and losses

Capital income and capital gains and losses are subject to definitive WHT and are not treated as ordinary taxable corporate income. The general rule is that capital income and capital gains for tax residents are subject to 10% WHT; however, the following exceptions apply:

- Capital gains derived from the sale or transfer of Nicaraguan shares that took place out of the territory of Nicaragua are subject to 5% WHT over the transaction value.
- Capital income derived from the lease of fixed assets and non-fixed assets for tax residents are subject to 7% and 5% WHT, respectively; in the case of tax non-residents, they are subject to 10.5% and 7.5% WHT, respectively.
- Capital gains derived from the transfer of assets subject to annotation in the public registry (e.g. real estate, vehicles) will be subject to a WHT based on the amount of the transaction, as follows:

Good value (USD*)		
From	Through	WHT rate (%)
0.01	50,000.00	1
50,000.01	100,000.00	2
100,000.01	200,000.00	3
200,000.01	or more	4

* United States dollars

Dividend income

Stock dividends paid by Nicaraguan entities to resident shareholders are subject to a 10% definitive WHT (15% in the case of non-resident shareholders).

Interest income

Interest received from a Nicaraguan source by residents of Nicaragua, as well as the interest gained by residents from deposits placed in the national financial system, is subject to a 10% WHT (15% in the case of non-residents).

Interest earned on government bonds and securities is considered taxable income subject to a 10% WHT.

The WHT will not apply if the beneficiary of the interest payment is included in the list of exempt International Credit Institutions and Agencies or Foreign Governments Development Institutions, provided in the Ministerial Agreement 24-2014, which requires that the beneficiary should request the Finance and Public Credit Ministry for the corresponding exemption recognition.

Royalty income

Royalties are treated as capital income subject to a 10% WHT (15% in the case of non-residents).

Foreign income

Business enterprises are subject to CIT only on Nicaraguan-source income.

Deductions

Depreciation

Depreciation must be computed using the straight-line method. Depending on the type of construction and the estimated life of fixed assets, annual rates for depreciation are as follows:

Asset	Rate (%)
Buildings	3/5/10
Vehicles	12/20/33
Plant and equipment	10/14/20
Other assets	10/20/50

Alternative method of depreciation

Taxpayers under the TAP regime (*see Customs duties in the Other taxes section*) may, at their convenience, request a different depreciation rate (i.e. accelerated depreciation) from the tax authorities. Used fixed assets acquired abroad may also be subject to a different depreciation rate.

Goodwill

Goodwill, meaning the excess paid over book value in a transaction, can be deductible for CIT purposes if the capital gain is considered in the seller's CIT return. However, the tax authorities must authorise the tax periods in which the goodwill will be amortised.

Start-up expenses

Start-up expenses are amortised over a three-year period of time after the beginning of business operations.

Interest expenses

As a general rule, deduction of interest is allowed when derived from loans of financial institutions; however, the interest paid derived from loans of non-financial institutions will be deductible up to the amount resulting from applying the average lending rate of the national bank at the date of obtaining the loan, if fixed, or at the date of each payment, if variable.

In order for interest paid to a non-resident to be deductible, the corresponding 15% WHT must be withheld and paid.

Bad debt

Corporations are allowed a deduction for receivables as an allowance for doubtful accounts as long as there is supporting documentation of the credit, identification documents of the debtor and creditor, and administrative and judicial collection proof.

Charitable contributions

A deduction is allowed, at up to 10% of the corporation's income, for charitable contributions made to the government and its institutions, the Red Cross, and other organisations.

Compensation

A deduction of up to 10% of the accumulated profits before this expense is allowed for payments made to employees as bonuses or in addition to their salaries or wages.

Life insurance

A deduction is allowed for employee insurance payments made.

Fines and penalties

Penalties or charges made by tax, customs, social security, or municipal authorities are not deductible for CIT purposes.

Taxes

In principle, income tax expense is not deductible for CIT purposes. Municipal or local taxes (i.e. real estate tax, monthly sales and services tax, annual registration tax) are deductible from CIT.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to three years. The carryback of losses is not allowed.

Payments to foreign affiliates

Payments made from affiliates to foreign related parties are deductible for CIT purposes, provided the following requirements are met:

- The expenses (i.e. royalties, interest, and services) are needed to generate taxable income.
- The expenses are duly supported (e.g. agreements, invoices, payment receipts).
- The expenses are incurred within the fiscal period.
- The WHT is applied and paid to the tax authorities.

Group taxation

Group taxation is permitted only when previously approved by the tax authorities. The economic group must submit a business case to the tax administration justifying the economic reason of their request.

Transfer pricing

The Nicaragua tax system recognises transfer pricing as a method of trading. Law 822 regulates transfer pricing rules based on the Organisation for Economic Co-operation and Development (OECD) regulations (including contemporaneous documentation requirements), and it has been in effect since 30 June 2017.

Thin capitalisation

The Nicaragua tax system does not impose any form of thin capitalisation rules.

Controlled foreign companies (CFCs)

Nicaragua does not have any CFC rules.

Tax credits and incentives

Foreign tax credit

The Nicaragua tax system does not recognise any form of foreign tax credit.

Tourism incentives

Under present law, and on a case-by-case basis, new companies with tourist activities may request and the government may grant, during the facilities' construction phase, total exemption of customs duties and partial or total CIT exemption for a maximum period of ten years.

Renewable energy incentives

The renewable energy sector is covered by a special law with tax benefits or exemptions in CIT, VAT, customs duties, and municipal tax.

Free trade zones (FTZs)

The Nicaraguan government amended Decree No. 46-91, and enacted Law 915/2015 - Export Free Trade Zone Law, which provides for several types of export free zones (e.g. for processing, industrial production, logistics and outsourcing services).

Although the law does not bring major changes with respect to Decree No. 46-91, it has modified the tax exemption period to FTZ users, and, as of the publication of this law (i.e. 16 October 2015), they will qualify for a ten-year income tax holiday, which can be extended for an additional ten years. Once the full tax exemption expires, qualifying companies will be entitled to a 60% exemption. These incentives are subject to the approval of the National Free Zone Commission.

Qualifying companies are entitled to exemptions from capital tax and stamp duties, indirect and excise taxes, export taxes on locally made products, municipal taxes, and the immovable property transfer tax and capital gains tax on the alienation of immovable property if they are closing their operations in the FTZ and the immovable property will remain there.

Raw materials, machinery, equipment, spare parts, samples, molds, and accessories required for the operation of companies in the FTZs are exempt from import duties.

Withholding taxes

Payments to residents

Dividend payments to resident shareholders (corporations or individuals) are subject to 10% WHT.

Payments of royalties to resident individuals or corporations are subject to 10% WHT.

Interest paid to a resident individual or legal entity is subject to 10% WHT.

Professional services provided by an individual are subject to 10% WHT.

Payments on the local acquisition of goods and services are subject to 2% WHT.

Payments to non-residents

Payments of dividends, interest, royalties, and service fees to non-resident corporations are subject to WHT, as follows:

Payment	WHT rate (%)
Dividends	15
Interest:	
Non-financial companies	15
Financial companies	15
Royalties	15
Services provided in general	15
TV and radio programming or subscription	15

Payments of any kind of income to non-resident individuals are subject to WHT of 15%.

In principle, Nicaragua has not signed any agreement or treaty with any country to avoid double taxation.

Transactions with tax havens

Expenses that are paid by Nicaraguan residents to an individual or entity that is a resident of a tax haven are subject to a 17% WHT. For this purpose, a tax haven may be:

- a foreign territory where the income tax is 'substantially' lower than the Nicaraguan income tax
- a foreign country or territory that has been listed, for the corresponding taxable year, as an un-cooperative jurisdiction by the Global Forum on Transparency and Exchange of Information for Tax Purposes, or
- a foreign territory that is listed by the Nicaraguan Public Credit and Finance Ministry.

Tax administration

Taxable period

The standard tax year in Nicaragua is the calendar year (from 1 January to 31 December); however, companies can obtain authorisation from the tax authorities in order to change or have a different year-end: 31 March, 30 June, or 30 September.

Tax returns

Without exception, all corporations are required to file CIT returns for a fiscal year within the following three months after the fiscal year-end.

Payment of tax

Corporations shall pay fiscal-year income tax in monthly advance payments. The monthly payable amount is calculated as 1% of gross income.

Final CIT payment is due with the final CIT return (i.e. within the following three months after the fiscal year-end).

Tax audit process

The tax authorities are entitled to conduct a tax audit of the taxpayer when considered necessary. The taxpayer has the obligation to submit before the tax auditor the corporate information and documents related to the generation of income.

Statute of limitations

The statute of limitation in Nicaragua is up to the last four fiscal-ended periods.

Topics of focus for tax authorities

In Nicaragua, tax audits are determined randomly; however, high taxpayers or taxpayers who request reimbursement of tax credit are more likely to be audited. For corporate tax compliance, the tax authorities normally seeks information in regards to taxpayer operations through the advance income tax returns.

Significant developments

Federal government increases excise duties on tobacco and alcoholic products

The President of Nigeria, on the recommendation of the Tariff Technical Committee of the Ministry of Finance, approved an increase to the excise duties on tobacco and alcoholic beverages effective from 4 June 2018.

The increase will be introduced in phases over a three-year period from 2018 to 2020 to moderate the impact of the increase on the price of the products.

The Voluntary Assets and Income Declaration Scheme (VAIDS)

On 29 June 2017, the Acting President of Nigeria formally launched the VAIDS. The Scheme commenced on 1 July 2017 and lasted for a period of nine months. The VAIDS is an initiative designed to encourage voluntary disclosure of previously undisclosed assets and income for the purpose of payment of all outstanding tax liabilities.

The legal basis for the Scheme is an Executive Order signed into law by the Acting President and a Memorandum of Understanding signed between the Federal Inland Revenue Service (FIRS) and the State Internal Revenue Services. Taxpayers who made full and honest declarations will enjoy waiver of interest and penalty, immunity from prosecution, confidentiality, exemption from tax audits for the periods covered, and flexible payment of tax due for up to three years.

The Scheme was applicable to all persons (individuals, companies, executors, trustees, partnerships, etc.) liable to tax in Nigeria. Taxes covered include corporate income tax (CIT), personal income tax (PIT), petroleum profit tax (PPT), capital gains tax (CGT), value-added tax (VAT), stamp duties, tertiary education tax, and information technology levy. Taxpayers who failed to participate in the Scheme will be investigated and if found culpable will be subject to criminal prosecution and subsequent inclusion in a 'name and shame' list.

The Scheme has been implemented by the FIRS in collaboration with all 36 State Internal Revenue Services and the Federal Capital Territory (FCT) IRS. The government will gather intelligence locally and through various international conventions and multilateral agreements to obtain information required for prosecution of defaulting taxpayers or those who make false declarations. An international forensic and asset tracing company has also been engaged to support this process.

Nigeria signs double taxation treaty (DTT) with Singapore

Nigeria and Singapore have signed a treaty for the avoidance of double taxation on income and capital gains tax between the two countries.

When ratified by the National Assembly, the treaty will provide enhanced reliefs to investors and businesses between both countries to eliminate or reduce the incidence of double taxation in addition to exchange of information and mutual assistance on tax matters.

Nigeria ratifies DTT with Spain

On 26 January 2018, the Nigerian government announced the ratification of the Nigeria-Spain DTT.

The DTT was initially negotiated in June 2009 and presented to the National Assembly for ratification in 2016, alongside DTTs with Sweden and South Korea.

Nigeria signs Organisation for Economic Co-operation and Development (OECD) Multilateral Instruments to Curb Tax Avoidance and Evasion

On 17 August 2017, Nigeria became a signatory to two major international multilateral instruments to address tax avoidance and evasion. These are the OECD's Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) ('Multilateral Instrument' or 'MLI') and the Multilateral Competent Authority Agreement for the Common Reporting Standard (CRS MCAA).

The MLI will cause amendments to be made to Nigeria's existing tax treaties. The aim of these amendments is to limit treaty abuse and other forms of tax avoidance. The CRS MCAA will potentially allow the Nigerian tax authorities to automatically receive financial information on Nigerian nationals who hold bank accounts in any of the nearly 100 foreign jurisdictions that have signed the CRS MCAA.

The list of pioneer industries has been amended and suspension on grant of the incentive lifted

The federal government of Nigeria has lifted the suspension of the pioneer status incentive after embarking on a review of the incentive to address identified lapses, abuses, and loopholes. On 2 August 2017, the Federal Executive Council approved a new Pioneer Status Incentive Policy based on the comprehensive review of the scheme. As part of the new regime, 27 new industries have been added to the list of eligible industries, while new Application Guidelines have been issued.

Revised Guidelines on Export Expansion Grant (EEG) Scheme

The EEG Scheme was introduced in 1986 through the Export (Incentives and Miscellaneous Provisions) Act (amended in 1992) to stimulate non-oil exports. The scheme is administered by the Nigerian Export Promotion Council (NEPC). The scheme was suspended in 2014 to ensure a review and redesign in order to prevent abuse and ensure that the scheme is fit for purpose.

Before the suspension of the scheme, the incentive was granted in the form of a negotiable duty credit certificate (NDCC) utilisable by exporters for payment of import and excise duties. The NDCC has now been replaced with the Export Credit Certificate (ECC), which can be used to settle all federal government taxes, such as

VAT, withholding tax (WHT), CIT, etc. It can also be used to purchase government bonds and repay government credit facilities and debts due to the Assets Management Company of Nigeria (AMCON).

To encourage export of value added and processed/manufactured products, exporters are divided into four categories with maximum applicable EEG rates as indicated below:

- Fully manufactured products: 15%.
- Semi-manufactured products: 10%.
- Processed/intermediate products: 7.5%.
- Merchants/primary agricultural commodities: 5%.

The revised guidelines were released and effective from 1 January 2017.

Taxes on corporate income

Resident companies are liable to CIT on their worldwide income while non-residents are subject to CIT on their Nigeria-source income.

The CIT rate is 30%, assessed on a preceding year basis (i.e. tax is charged on profits for the accounting year ending in the year preceding assessment).

Investment income paid by a Nigerian resident to a non-resident is sourced in Nigeria and subject to WHT at source, which serves as the final tax.

In respect of business profits, a non-resident company that has a fixed base or a permanent establishment (PE) in Nigeria is taxable on the profits attributable to that fixed base. As such, it is required to register for CIT and file its tax returns. Any WHT deducted at source from its Nigeria-source income is available as offset against the CIT liability.

Small company rates

For small companies in the manufacturing industry and wholly export-oriented companies with turnover not exceeding 1 million Nigerian naira (NGN), the CIT rate is reduced to 20% in the first five calendar years of operation.

Petroleum profit tax (PPT)

PPT is a tax on the income of companies engaged in upstream petroleum operations *in lieu* of CIT.

The PPT rates vary as follows:

- 50% for petroleum operations under production sharing contracts (PSC) with the Nigerian National Petroleum Corporation (NNPC).
- 65.75% for non-PSC operations, including joint ventures (JVs), in the first five years during which the company has not fully amortised all pre-production capitalised expenditure.
- 85% for non-PSC operations after the first five years.

Tertiary education tax

Tertiary education tax is imposed on every Nigerian resident company at the rate of 2% of the assessable profit for each year of assessment. The tax is payable within two months of an assessment notice from the FIRS. In practice, many companies pay the tax on a self-assessment basis along with their CIT.

For companies subject to PPT, tertiary education tax is to be treated as an allowable deduction. For other companies, income/profit taxes are not deductible in arriving at taxable income. Non-resident companies and unincorporated entities are exempt from tertiary education tax.

Minimum tax

Minimum tax is payable by companies having no taxable profits for the year or where the tax on profits is below the minimum tax. However, companies in the first four calendar years of business, companies engaged in the agriculture business, or companies that have foreign equity capital of at least 25% are exempt from minimum tax.

Minimum tax payable is calculated as follows:

- Where the turnover of the company is NGN 500,000 or below, minimum tax is the highest of:
  - 0.5% of gross profits
  - 0.5% of net assets
  - 0.25% of paid-up capital, or
  - 0.25% of turnover of the company for the year.
- Where the turnover is higher than NGN 500,000, minimum tax is the highest of the calculations listed above plus 0.125% of turnover in excess of NGN 500,000.

Alternative tax on distribution

There is a tax on distribution where a company pays a dividend in excess of its taxable profit. Such a company will be charged tax on the dividend paid as if the dividend is the taxable profit of the company for that year of assessment.

Enforcement of advance CIT on interim dividends

The leadership at the FIRS has commenced the strict enforcement of advance CIT on interim dividends. Companies that declare interim dividends are required by the law to be subject to advance CIT at 30% of the interim dividend paid. The advance CIT is creditable against the final CIT computed at the end of the year.

Alternative tax on deemed profit

The law allows the FIRS to assess and charge companies to tax on a fair and reasonable percentage of turnover under the following circumstances:

- When the trade or business produces no assessable profits.
- When the trade or business produces assessable profits that, in the opinion of the Board of the FIRS, are less than might be expected to arise from that trade or business.
- When the true amount of the assessable profits of the company cannot be ascertained.

Local income taxes

CIT is payable only to the federal government. State governments collect income taxes of individuals and unincorporated entities, while local governments are only allowed to collect levies and rates but not income tax.

Corporate residence

A company is considered resident in Nigeria if such a company is registered or incorporated under the Companies and Allied Matters Act. This means that a company formed outside Nigeria under the laws in force in the foreign territory will be considered as a non-resident company for CIT purposes.

Permanent establishment (PE)

Fixed base is not defined but is generally considered to be a location with a degree of permanence. The following would generally not be considered to be a fixed base:

- The use of facilities solely for the purpose of storage or display of goods or merchandise.
- The use of facilities solely for the collection of information.

Other activities that could trigger a tax presence in Nigeria include a dependent agency arrangement, execution of a turnkey project, or artificial arrangements between related parties.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 5%. Based on the 2018 Budget Speech delivered by the President, there was no specific proposal to change the VAT rate in 2018.

Zero-rated items include non-oil exports, goods and services purchased by diplomats, and goods and services purchased for use in humanitarian donor-funded projects. Exempt items include plants and machinery for use in export processing zones (EPZs) or free trade zones (FTZs), basic food items, medical products and services, pharmaceutical products, books and educational materials, and exported services. Commissions on stock market transactions are also exempted from VAT.

Government agencies and oil and gas companies are required to deduct at source VAT charged by their suppliers and remit it to the tax authority. All other organisations are required to collect VAT charged on their invoices from their customers for filing and payment to the tax authority.

The FIRS has implemented a platform for auto tracking and remittance of VAT known as FIRS VAT-Collect. Some of the users of the system are domestic airlines (for instant remittance of VAT on their ticket sales) and other retailers.

Customs duties

Customs duties in Nigeria are levied only on imports. Rates vary for different items, typically from 5% to 35%, and are assessed with reference to the prevailing Harmonized Commodity and Coding System (HS code).

Nigeria

Excise duties

Excise duty is applicable on beer and stout, wines, spirits, cigarettes, and homogenised tobacco manufactured in or imported into Nigeria at 20%.

Excise duties on tobacco and alcoholic beverages has increased effective 4 June 2018. The new regime applies only to tobacco and its products (such as cigarettes) and alcoholic beverages (beers and stouts, spirits, and wines) as follows:

Tobacco

For 2018, in addition to the 20% ad valorem rate, a specific rate of NGN 1 will be paid on each cigarette stick (NGN 20 per pack of 20 sticks).

In 2019, the specific rate will increase to NGN 2 per stick (NGN 40 per pack of 20 sticks). In 2020, the specific rate will increase to NGN 2.90k per stick (NGN 58 per pack of 20 sticks).

Beer and stout

With respect to alcoholic beverages, no ad valorem rate is applicable.

In 2018, NGN 0.30k per centilitre (cl) is payable on beer and stout. In 2019 and 2020, NGN 0.35k per cl will be payable.

Wines

In 2018, NGN 1.25k per cl is payable on wines. In 2019 and 2020, NGN 1.50k per cl will be payable.

Spirits

In 2018, NGN 1.50k per cl is payable on spirits. In 2019, NGN 1.75k per cl will be payable. In 2020, NGN 2.00k per cl will be payable.

Property taxes

Property taxes in Nigeria are usually levied annually by the state government with varying rates depending on the state and the location of the property within the state. The two major property taxes are governor's consent fee and land registration fee. In Lagos (which is the economic hub of Nigeria), governor's consent fee, land registration fees, and other levies payable to the state give rise to a total levy of 3% of the fair value of the land.

Also, Right of Occupancy fee and tenement rates are chargeable by state and local government authorities.

Stamp duties

Under the Stamp Duty Act, stamp duty is payable on any agreement executed in Nigeria or relating, whatsoever, to any property situated in or to any matter or thing done in Nigeria. Instruments that are required to be stamped under the Stamp Duties Act must be stamped within 40 days of first execution.

Stamp duty is chargeable either at fixed rates or *ad valorem* (i.e. in proportion to the value of the consideration), depending on the class of instrument. Stamp duty is imposed at the rate of 0.75% on the authorised share capital at incorporation of a company or on registration of new shares.

All deposit banks and financial institutions are required to charge stamp duties of NGN 50 on every eligible transaction above NGN 1,000. There are exemptions for transactions between accounts held by the same bank customer and for salary accounts.

Capital gains tax (CGT)

Gains accruing to a chargeable person (individual or company) on the disposal of chargeable assets shall be subject to tax under the CGT Act at the rate of 10%. There is no distinction between long-term and short-term gains and no inflation adjustment to cost for CGT purposes.

All forms of assets, including options, debts, goodwill, and foreign currency, other than those specifically exempt, are liable for CGT. The gains on the disposal of shares are exempt from CGT.

CGT is applicable on the chargeable gains received or brought into Nigeria in respect of assets situated outside Nigeria.

Capital losses are not allowed as an offset against chargeable gains accruing to a person from the disposal of any assets.

Payroll contribution

Under the Employee Compensation Act, all employers were required to contribute 1% of their payroll cost in the first two years of commencement of the Act (2010 to 2012). Subsequently, assessments were expected to be issued by the Nigeria Social Insurance Trust Fund, the body empowered to administer and implement the Act. In practice, a contribution of 1% of payroll continues to apply.

Pension contributions

Employers with at least 15 employees are required to participate in a contributory pension scheme for their employees. The minimum contribution is 18% of monthly emolument (with a minimum contribution of 10% by the employer and 8% by the employee). If the employer decides to bear all the contribution, the minimum contribution is 20% of monthly emolument. Mandatory and/or voluntary contributions by the employers are deductible for CIT purposes.

National Housing Fund (NHF) contributions

NHF contributions are applicable to Nigerian employees earning a minimum of NGN 3,000 *per annum*. The employer is required to deduct 2.5% of basic salary from employees earning more than NGN 3,000 *per annum* and remit it to the Federal Mortgage Bank of Nigeria within one month of deduction.

Information technology levy

A company with an annual turnover of NGN 100 million or more is required to pay 1% of its profit before CIT as information technology tax. This levy is deductible for CIT purposes when paid (typically in the year of assessment following that in which the payment was made).

This tax is applicable to:

- Banking and other financial activities, including capital and money market operators, mortgage institutions, and micro-finance banks.

- Insurance activities, including brokerage.
- Pension fund administration, pension management, and related services.
- GSM service providers and telecommunication companies.
- Cyber and internet services providers.

Levy on contracts awarded in the upstream oil and gas sector

The Nigerian Content Development Act was introduced to increase the level of Nigerian participation in the oil and gas industry. The Act imposes a levy of 1% on every contract awarded in the upstream oil and gas sector of the economy. Any violation of the Act is liable for a fine of 5% of the contract value and may result in outright cancellation of the contract.

Branch income

Except in rare circumstances, it is illegal for a non-resident company to operate through a branch in Nigeria. The Nigeria-source income of a non-resident company is taxable at the CIT rate of 30% (*see the Taxes on corporate income section for more information*).

Income determination

The following income is subject to CIT in Nigeria:

- Profits accruing in, derived from, brought into, or received in Nigeria in respect of any trade or business.
- Dividends, interest, royalties, discounts, charges, or annuities.
- Rent or any premium arising from the right granted to any person for the use or occupation of any property, where applicable.
- Any source of annual profits or gain not falling within the preceding categories.
- Fees, dues, and allowances (wherever paid) for services rendered.
- Any amount of profits or gains arising from the acquisition or disposal of short-term money instruments like federal government securities, treasury bills, treasury or savings certificates, debenture certificates, and treasury bonds.

Inventory valuation

The first in first out (FIFO) valuation method is commonly used. Average and standard cost methods are also allowed, but last in first out (LIFO) is not permitted. Other than the accounting requirement in the local generally accepted accounting principles (GAAP), there are no special statutory provisions for inventory valuation.

Capital gains

Capital gains are not subject to CIT, but may be subject to CGT. *See Capital gains tax in the Other taxes section for more information*.

Dividend income

Dividends received by a Nigerian resident company from another Nigerian resident company are taxable at source (*see the Withholding taxes section for more information*) and not subject to further tax.

Dividends received from non-resident companies are taxable except if repatriated into Nigeria through government-approved channels (i.e. any financial institution authorised by the Central Bank of Nigeria to deal in foreign currency transactions).

Dividends received from small manufacturing companies are exempt for CIT purposes during the first five years of operation. Dividends from investments in wholly export-oriented businesses are also exempt.

Stock dividends

Stock dividends (bonus shares) are not taxable at source or included in the taxable income of the recipient company.

Interest income

Interest received by a Nigerian company is liable to tax at the CIT rate of 30% with tax withheld at 10% available as an offset against the final tax liability.

Interest on government bonds is tax exempt. Interest on foreign currency domiciliary accounts is also exempt.

Interest payable to a non-resident investor is liable to WHT at 10%, which is the final tax. Recipients who are resident in a country with a DTT with Nigeria enjoy a reduced rate of 7.5%.

Royalty income

Royalties received by a Nigerian company are liable to tax at the CIT rate of 30%. WHT at 10% is available as an offset against the final CIT liability.

Royalties received by a Nigerian company from non-resident payers are taxable except if repatriated into Nigeria through government-approved channels.

Non-resident companies who receive Nigerian royalties are subject only to WHT at 10%, which is reduced to 7.5% if a treaty is in place with Nigeria.

Other significant items

The following entities' income or profit is exempt for CIT purposes:

- Statutory or registered friendly societies.
- Co-operative societies registered under any ecclesiastical, charitable, or education establishments of a public character.
- Profit of a company established within an EPZ or FTZ (*see the Tax credits and incentives section*).
- Profit of a registered trade union.
- Export profits, as long as proceeds are brought into Nigeria through government-approved channels and invested in raw materials, spare parts, and plant and machinery (*see Export incentives in the Tax credits and incentives section*).

Foreign income

A Nigerian resident company is taxable on its worldwide income. On the other hand, a non-resident company is subject to tax only on income derived from Nigeria.

Dividends, interest, rents, and royalties earned abroad and brought into Nigeria through government-approved channels are exempt from Nigerian tax; otherwise, the income is taxable at the CIT rate of 30% and tertiary education tax at 2%. Government-approved channels mean the Central Bank of Nigeria and any bank or financial institution authorised to carry out foreign exchange transactions.

Taxable foreign income earned by a Nigerian tax resident entity cannot be legally deferred.

Deductions

Expenses are deductible for CIT purposes if they are wholly, reasonably, exclusively, and necessarily incurred for the business or trade.

Depreciation

Capital allowances are calculated on a straight-line basis. Capital allowances claimable in any year are restricted to two-thirds of assessable profits for all companies, except companies in the manufacturing and agricultural sectors, which are excluded from this restriction.

The following are the capital allowance rates on fixed assets (qualifying expenditures):

Qualifying expenditure	Initial allowance (%)	Annual allowance (%)
Building (industrial and non-industrial)	15	10
Furniture and fittings	25	20
Plant expenditure (1)	50/95	0/25
Mining expenditure	95	0
Plantation equipment	95	0
Motor vehicle (2)	50/95	0/25
Ranching and plantation expenditure	30	50
Housing estate expenditure	50	25
Research and development (R&D)	95	0

Notes

1. 95% initial allowance for plant used in agricultural production; others 50%.
2. 95% initial allowance is granted for motor vehicles used for public transportation if the company has a fleet of at least three buses; all other motor vehicles 50%.

The initial allowance is first deducted, and the balance is written off on a straight-line basis over a fixed period, depending on the rates of annual allowance. There is a requirement that assets not yet disposed of cannot be fully written off in the books. A nominal amount of NGN 10 per asset must be retained in the books till the assets are disposed of. However, where 95% has been claimed as an initial allowance, the 5% balance is the value that must be maintained in the books until the final disposal of the asset.

When assets are sold, the proceeds over the tax written-down value are taxed at 30% to the extent of the allowances already claimed.

Goodwill

There is no tax deduction for goodwill.

Start-up expenses

Start-up expenses are not specifically stated as non-deductible in the tax law, but, in practice, they are usually not allowed by the tax authority. This is based on the assumption that start-up expenses are not directly attributable to any taxable income of the company, which is a fundamental condition for tax deductibility of expenses.

Interest expense

Interest on money borrowed and employed in producing taxable income is a deductible expense. There is currently no thin capitalisation regulation in Nigeria, but general anti-avoidance rules are usually applied to limit deductible interest on related-party loans.

Bad debt

Bad debt incurred in the course of trade is deductible.

Charitable contributions

Donations are deductible, subject to the provisions of the law.

Fines and penalties

Any punitive payments for default or violation of law are expressly not deductible for CIT purposes. In practice, this is usually extended to include default surcharges and other avoidable fines.

Taxes

Any tax on income or profit is not deductible except where such tax was paid on profit earned outside Nigeria. In this case, if the source country has no DTT with Nigeria, the foreign tax paid is allowed as a deduction for CIT purposes. State and local taxes (business rates) and levies may be deducted from taxable income.

Other significant items

Other deductible expenses include the following:

- Sum payable by way of interest on capital borrowed.
- Rent for the period.
- Expenses incurred in respect of salary and wages.
- Expenses incurred for repair of assets.
- Liability incurred for purpose of trade.
- R&D costs.

Net operating losses

Losses can be carried forward indefinitely, except for insurance companies, where losses can only be carried forward for four years. Losses made from one line of business cannot be relieved against another line of business. Losses cannot be carried back.

Payments to foreign affiliates

Payments considered to be artificial are not deductible for CIT purposes. Royalties, management fees, and technical fees require the approval of the National Office for Technology Acquisition and Promotion (NOTAP) for exchange control purposes and for tax deduction. NOTAP-approved royalties and technical fees are limited to a range of 1% to 5% of net sales, while management fees are limited to a range of 2% to 5% of profit before tax, and consultancy fees are limited to 5% of total project cost. Technical fees are limited to approved man-hour rates.

Trademark fees are disallowed where the trademark owner has more than 75% equity participation in the local company.

Group taxation

There are currently no provisions for group taxation, group relief, or group filing of tax returns in Nigeria. Each legal entity within a group is treated as distinct and separate for CIT purposes.

Transfer pricing

The transfer pricing regulations are applied in a manner consistent with the arm's-length principle in Article 9 of the United Nations (UN) and OECD Model Tax Conventions on Income and Capital and the OECD Transfer Pricing Guidelines for Multi-national Enterprises and Tax Administrations. However, where there are inconsistencies between the model conventions and the local legislation, the provisions of the relevant local tax laws shall prevail.

The rules cover all transactions between 'connected taxable persons', which is broadly defined to include individuals, PEs created by head offices, subsidiaries, associates, partnerships, joint ventures, and trusts to the extent that they participate directly or indirectly in the management, control, or capital of another, or both of which have common control, management, or shareholders. Specifically, the rules apply to sale and purchase of goods; lease or sale of tangible assets; licensing, transfer, or use of intangible assets; provision of services; lending or borrowing of money; manufacturing arrangements; and any transaction that may affect profit and loss or any other incidental matter.

The rules are applicable to both domestic and cross-border related-party transactions.

Thin capitalisation

Nigeria has no thin capitalisation rules. However, interest charged between related parties is expected to reflect arm's-length transactions. The tax authority may disallow any related-party interest considered to be excessive.

Note that the tax authorities are currently considering introducing a formal thin capitalisation rule with a likely 3:1 debt-to-equity ratio.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Nigeria.

Tax credits and incentives

Nigeria has various tax incentives intended to encourage investment in key sectors of the economy, as follows.

Tax holidays

Pioneer companies investing in specified industrial activities may, on application, be granted a tax holiday for three years initially, which may be extended for up to two years upon satisfaction of specified conditions. Examples of economic activities that may be granted a tax holiday include glass and glassware manufacturing, manufacturing of fertilisers, and steel manufacturing.

A new company that engages in the mining of solid minerals is exempt from tax for the first three years of its operation.

Rural location incentives

Certain incentives are available to companies located in rural areas. The incentives take the form of tax reductions at graduated rates for enterprises located at least 20 kilometres from available electricity, water, and tarred roads.

Export incentives

Export processing zones (EPZs) and free trade zones (FTZs) are locations within Nigeria designated by the government as free areas where export trade activities can be carried on free of tax and foreign exchange restrictions.

A company that is engaged in an approved manufacturing activity in an EPZ and incurs expenditures in its qualifying building and plant equipment is entitled to 100% capital allowance in that year of assessment.

In addition, a company that is 100% export oriented but located outside an EPZ will enjoy a three year tax holiday, provided the company is not formed by splitting up or reconstruction of an already existing business and the export proceeds form at least 75% of its turnover.

Profits of companies whose supplies are exclusively inputs to the manufacture of products for export are exempt from tax. Such companies are expected to obtain a certificate of purchase of the input from the exporter in order to claim tax exemption.

Where plant and machinery are transferred to a new company, the tax written down value of the asset transferred must not exceed 25% of the total value of plant and machinery in the new company. The company should also repatriate at least 75% of the export earnings to Nigeria and place it in a Nigerian domiciliary account in order to qualify for a tax holiday.

Profits of any Nigerian company in respect of goods exported from Nigeria are exempt from tax, provided that the proceeds from such exports are repatriated to Nigeria and are used exclusively for the purchase of raw materials, plant, equipment, and spare parts.

In order to streamline the administration of permissible taxes within the tax free zones, the Oil and Gas Free Zone Authority (OGFZA) has established the Free Zones Tax Administration (FZTA) Unit with effect from January 2015. Going forward, all tax matters relating to the free zones will be coordinated by the FZTA.

Export Expansion Grant (EEG) Scheme

The EEG Scheme grants the Export Credit Certificate (ECC) as an incentive that can be used to settle all federal government taxes, such as VAT, WHT, CIT, etc. It can also be used to purchase government bonds and repay government credit facilities and debts due to the Assets Management Company of Nigeria (AMCON).

To encourage export of value added and processed/manufactured products, exporters are divided into four categories with maximum applicable EEG rates as indicated below:

- Fully manufactured products: 15%.
- Semi-manufactured products: 10%.
- Processed/intermediate products: 7.5%.
- Merchants/primary agricultural commodities: 5%.

Gas utilisation incentives

Companies engaged in gas utilisation are entitled to:

- A tax-free period for up to five years.
- Accelerated capital allowance after the tax-free period.
- Tax-free dividends during the tax-free period.

Tourism incentives

25% of the income derived from tourism by hotels in convertible currencies is exempt from tax if such income is put in a reserve fund to be utilised within five years for expansion or construction of new hotels and other facilities for tourism development.

Interest incentives

Interest accruing on deposit accounts of a non-resident company is tax-exempt, provided the deposits are made by transfer of funds to Nigeria on or after 1 January 1990 and the depositor does not become non-resident after making the deposit while in Nigeria.

Interest on foreign-currency domiciliary accounts is also tax-exempt.

Interest on any foreign loans, and interest on any loan granted by a bank for the purpose of manufacturing goods for export, is exempt from tax as follows:

Repayment period	Moratorium	Exemption (%)
Over 7 years	Not less than 2 years	100
5 to 7 years	Not less than 1.5 years	70
2 to 4 years	Not less than 1 year	40

Interest on any loan granted by a bank to a company engaged in agricultural trade, fabrication of local plant and machinery, or as working capital to any cottage industry is 100% tax free if the loan has a moratorium of not less than 18 months and the rate of interest is not more than the base lending rate.

Investment allowances

An investment allowance of 10% on the cost of qualifying expenditures in respect of plant and machinery is available as a deduction from assessable profits in the year of purchase. There is no restriction to the full claim of capital allowance in any year of assessment for companies in the mining, manufacturing, and agricultural sectors.

Foreign tax credit

Nigeria does not grant automatic tax credits to Nigerian companies for foreign tax on income derived from other countries. The Nigerian tax laws already provide for tax exemption for dividends, interest, and royalties.

Foreign tax credits are only granted based on the provisions of existing DTTs and partial credits as applicable to Commonwealth countries. In this regard, full tax credits are usually provided for in the DTTs. Tax credits for members of Commonwealth countries are granted at up to half the Nigerian CIT rate.

Withholding taxes

WHT is applicable on specified transactions as indicated below. There is no distinction between the WHT rates for resident companies or individuals and non-resident companies or individuals.

Types of payment	WHT for companies (%)	WHT for individuals (%)
Dividends, interest, and rents	10	10
Directors fees	N/A	10
Hire of equipment	10	10
Royalties	10	5
Commission, consultancy, technical, service fees	10	5
Management fees	10	5
Construction/building (excluding survey, design, and deliveries)	5	5
Contracts other than sales in the ordinary course of business	5	5

The period for filing WHT is 21 days after the duty to deduct arose for deductions from companies.

The penalty for failure to deduct or remit tax is 10% of the amount not deducted/ remitted.

Note that companies are required to submit, in electronic form, a schedule of all their suppliers for the month showing the tax identification number (TIN), address of the suppliers, the nature of the transaction, WHT deducted, and invoice number.

Double tax treaties (DTTs)

Nigeria has DTTs with the countries listed in the table below. Nigeria also has tax treaties with Kenya, Mauritius, and Poland; however, these treaties have not been ratified by the Nigerian National Assembly. The tax treaties with South Korea, Spain, and Sweden are still in the process of being ratified.

	WHT (%)			
Recipient	Dividend	Interest	Royalties	Management/ Technical fees
Non-treaty	10	10	10	10
Treaty:				
Belgium	7.5	7.5	7.5	10

Recipient	WHT (%) Dividend	Interest	Royalties	Management/ Technical fees
Canada	7.5	7.5	7.5	10
China	7.5	7.5	7.5	10
Czech Republic	7.5	7.5	7.5	10
France	7.5	7.5	7.5	10
Netherlands	7.5	7.5	7.5	10
Pakistan	7.5	7.5	7.5	10
Philippines	7.5	7.5	7.5	10
Romania	7.5	7.5	7.5	10
Slovakia	7.5	7.5	7.5	10
South Africa	7.5	7.5	7.5	10
South Korea *	7.5	7.5	7.5	10
Spain	7.5	7.5	7.5	10
Sweden *	7.5	7.5	7.5	10
United Kingdom	7.5	7.5	7.5	10

* The tax treaties with South Korea and Sweden are still being ratified.

Tax administration

Taxable period

The taxable period is the fiscal year, which runs from 1 January to 31 December.

Tax returns

Companies are required to register for tax and file their audited accounts and tax computations with the FIRS within six months of their financial year-end on a self-assessment basis or 18 months after incorporation (whichever comes first). A company may file an application for extension of filing tax returns for up to two months at the discretion of the FIRS.

Upon registration, a company is issued a TIN, which serves as the company's file number for all federal taxes and future correspondence with the FIRS.

The company must file the following documents with the tax authority on an annual basis:

- Tax computation for the relevant year of assessment.
- The audited financial statements for the respective period; this should be in conformity with the International Financial Reporting Standards (IFRS).
- A duly completed and signed self-assessment form for CIT.
- Evidence of remittance of the income tax liability (partly or in full).

PPT is payable on an actual year basis. Estimated tax returns must be filed within two months of the fiscal year. Actual tax returns should be filed within five months after the end of the accounting period, that is, not later than 31 May.

Assessment

Nigerian companies file their tax returns based on a self-assessment system where the taxpayer prepares its annual returns and determines its tax liability. However, the

FIRS may apply a best of judgment (BOJ) assessment where it is of the opinion that the tax returns filed are deliberately misstated or where no returns are filed within the stipulated period.

Payment of tax

CIT

A company that files its self-assessment within six months after the accounting year-end can apply to the FIRS in writing to pay its income tax in instalments. The maximum number of instalments the FIRS may approve is three. Evidence of the first instalment has to accompany the tax returns filed in order to qualify for the instalment payment. However, all payments have to be made not later than eight months after the financial year-end.

Assessments are made on a preceding year basis. This means that the financial statements for a period ended in 2017 will form the basis for the 2018 year of assessment.

PPT

Payments with respect to PPT in any accounting period of 12 months are made in 12 instalments, with a final 13th instalment (if there is an underpayment). The first instalment for the year is due by the end of March.

Penalty for non-compliance

Failure to file CIT returns attracts a penalty of NGN 25,000 for the first month and NGN 5,000 for each subsequent month of default. Late payment of CIT attracts a 10% penalty and interest at the commercial rate.

Late submission of PPT returns attracts an initial penalty of NGN 10,000 and NGN 2,000 for each day such failure continues, while late payment of tax attracts a penalty of 5% of the tax not paid.

Tax audit process

Generally, the tax authority will commence a desk examination of a taxpayer's returns immediately after filing. This may be followed by a tax monitoring exercise whereby tax officers visit taxpayers to conduct an interview and on-site high level review of their tax affairs.

Random or specific tax audit may be carried out usually within six years of filing tax returns. In unusual cases, a back-duty tax investigation may be conducted for more than six years, especially where a tax fraud or wilful default is suspected.

In the past, tax audits took a long time to conclude, usually between three to five years. However, the tax authorities are seeking ways to improve the average turnaround time.

New methodology for tax audit

FIRS has now implemented an audit methodology that contains a dashboard for monitoring the progress of tax audits. Altogether there is a timescale of three months from commencement of audit to completion broken into one or two weeks for different activities (field work, initial report, reconciliation meetings, assessment). Colour green, amber, or red are used to indicate if everything is 'on time', 'becoming due', or 'overdue', respectively.

Statute of limitations

The tax authority may carry out a tax audit and issue an additional assessment within six years from the relevant tax year. However, the limitation does not apply in the event of a fraud, wilful default, or neglect by the company.

Topics of focus for tax authorities

The tax authorities are currently exploring ways to generate more tax revenue. As a result, certain areas of taxation, such as transfer pricing, filing of tax returns by PEs, and review of tax incentives and waivers have become a central focus for tax authorities.

There has been increased scrutiny by the FIRS on related-party transactions as a way of preventing taxpayers from shifting profits away from Nigeria. It is expected that transfer pricing audits are expected to be an area of focus in the next one to two years.

Further, for non-resident entities that create a PE in Nigeria, the tax authorities are focused on ensuring that they file full tax returns, including audited accounts, as opposed to filing on a deemed-profit basis. It is expected that the expenses of these PEs will be scrutinised for tax deductibility.

The tax authorities at the federal and state levels are sealing up companies, putting up non-compliance stickers, and holding principal officers of organisations to public scrutiny and prosecution under the tax law for non-compliance in terms of tax default or failure to make timely payments or to file tax returns. On a related note, the Lagos state government has set-up a rapid tax prosecution unit to prosecute tax evaders with considerations to a jail term.

Other issues

The OECD Multilateral Instruments

On 17 August 2017, Nigeria became a signatory to the OECD's Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) ('Multilateral Instrument' or 'MLI') and the Multilateral Competent Authority Agreement for the Common Reporting Standard (CRS MCAA).

The MLI

Nigeria signed the MLI and also submitted its MLI position listing DTTs with 19 treaty partners for amendment. These include the agreements that are already in force and those that are not yet in force (e.g. DTTs with Korea, Mauritius, United Arab Emirates). Also, of the 19 agreements, 13 treaty partners (including Belgium, Canada, China, Netherlands, and the United Kingdom) have all listed their DTTs with Nigeria for amendment under the MLI. Nigeria and its treaty partners will need to subsequently agree on any parts of their proposals that do not match. Subsequent to this, each partner will then need to undertake the local domestication process to ensure that the changes become law.

The CRS MCAA

The CRS MCAA allows signatory countries to obtain financial information from financial institutions and automatically exchange the information with other jurisdictions that have signed up to the convention. Notably, the CRS MCAA will allow jurisdictions to exchange the following information:

- Name, address, and tax identification number of taxpayers.
- Taxpayer's account number.
- Name of the reporting financial institution.
- The taxpayer's account balance at the end of the reporting period.

Nigeria became the 94th jurisdiction to join the CRS MCAA. Some of the other signatories to the CRS MCAA include Bermuda, Cayman Islands, China, France, Germany, Mauritius, the Netherlands, Spain, Switzerland, and the United Kingdom.

Significant developments

National Budget for 2018: Tax changes

The National Budget for 2018 included some changes in the Norwegian tax legislation. The main changes are the following:

- The tax rate is reduced from 24% to 23% as of the income year 2018 and applies, in general, to both individuals and enterprises. The resource rent tax for hydropower companies is increased by 1.4% to 35.7%, and the special tax rate on petroleum is increased by 1% to 55%, to ensure that the general reduction of the tax rates are proceeds neutral in relation to these sectors.
- Production equipment and production installations will be exempt from property tax from 2019, with a seven-year transitional period.

Revised National Budget 2018

- The Ministry of Finance has proposed new documentation requirements that non-resident shareholders in Norwegian companies must fulfil in order to achieve a reduced or zero withholding tax (WHT) rate on dividend distributions. The new documentation requirements are supposed to enter into force 1 January 2019.
- In the revised National Budget for 2018, the Ministry of Finance stated that it will reconsider the proposal and try to simplify the documentation requirements. The Directorate of Taxes has been assigned to prepare a proposal that is supposed to be sent on for public consultation in June 2018.

Taxes on corporate income

A Norwegian resident company is, as a starting point, subject to corporate income tax (CIT) on its worldwide income. Non-resident companies are, as a starting point, liable for CIT in Norway when engaged in a business that is either conducted in or managed from Norway.

CIT is, in general, assessed at a rate of 23%. Certain companies within the financial sector are assessed at a CIT rate of 25%.

As a general rule, income is taxable when the right to receive it arises and costs are deductible when the liability to cover the costs arises. The actual payment is generally not relevant.

Petroleum tax regime

All upstream petroleum activity on the Norwegian Continental Shelf (NCS) is taxable to Norway.

Taxation is based on net income at a marginal tax rate of 78%, which is comprised of the ordinary 23% CIT rate and a 55% special tax. All income is subject to 23% CIT, while only income from offshore production and pipeline transportation of petroleum from the NCS (offshore tax regime) is subject to the additional 55% special tax. The ordinary and special tax rates were changed in 2018 (from 24% and 54%, respectively, in 2017). However, the marginal tax rate remains the same, and the purpose of the changes in the special tax rate (from 54% to 55%) and uplift (from 5.4% to 5.3%) is to leave the deduction value of the uplift unchanged (*see below*).

All upstream activity on the NCS must be consolidated within the company. There is no ring fence per oil field, and tax consolidation against other activity is limited. Crude oil sales from most of the fields are taxed at a predetermined market price set by an official board (i.e. the norm price). In theory, a norm price may be imposed on gas sales, but this has not been implemented. Instead, an extensive reporting requirement was implemented in October 2012. Investments in installations for the exploitation and production of petroleum, as well as investments in pipelines, are depreciated linearly over six years.

An investment-based 'supplementary depreciation' (uplift) of 21.2% (5.3% per year for four years) is granted on investments in installations for the exploitation and production of petroleum, as well as investments in pipelines. The rate was reduced from 5.4% in 2017 to 5.3% in 2018. The new rate applies for investments made on or after 1 January 2018. Special transitional rules apply for investments made before 5 May 2013, and an uplift rate of 7.5% may still apply in some cases. The uplift is deducted against the special tax base. Losses and unused uplift may be carried forward indefinitely with an annual interest. Both depreciation and uplift may be claimed from the year of the investment, regardless of whether title has passed or the asset has been taken into use. If the upstream activity on the NCS ceases, the tax value of losses carried forward and unused uplift may either be sold or compensated by the Norwegian state. Exploration costs are tax deductible as incurred. If a loss is created due to exploration costs, the taxpayer may claim that the tax value of such a loss is repaid in the year following the income year in which the loss was created.

Special rules apply as to the deductibility of net interest costs in the special tax basis (55%).

A special regime ensures that transfer of licences on NCS is tax exempt; there is no step up in the tax basis.

Note that dividends that stem from income subject to the special tax regime are exempted from dividend WHT.

The Oil Taxation Office (OTO) has a special responsibility for the taxation of the petroleum sector. Generally, the OTO has a high focus on transfer pricing.

Hydro power tax regime

The hydro power tax regime is applicable for the taxation of income derived from the production, sales, transfer, or distribution of hydro power.

Taxation is based on net income at a marginal tax rate of 58.7%, which is comprised of the ordinary 23% CIT rate and a 35.7% resource rent tax. All income is subject to 23% CIT, while only income from hydro power production is subject to the additional 35.7% resource rent tax.

The resource rent is calculated per hydro power plant. The gross income is, with some exceptions, calculated based on spot market price per hour multiplied by actual production. In addition, actual income from green certificates is included in the gross income. Deductible costs will be the same as for CIT; that is, expenses related to the power plant except for interest expenses, which are not deductible. Uplift is granted. Special rules apply to the depreciation of investments in hydro power plants. Rent expenditure and depreciation related to waterfalls are not deductible, and waterfalls are not included in the basis for uplift. Tax consolidation is mandatory within the company and, provided the conditions for group taxation are fulfilled, available on a group level. Losses (negative resource rent) on a company (eventually on a group) level will be compensated by the Norwegian state.

Shipping tonnage tax regime

The tonnage tax rules in Norway are in line with those found in other European Union (EU)/European Economic Area (EEA) countries and imply that shipping income will be tax-exempt on a permanent basis. On 14 December 2017, the European Free Trade Association (EFTA) Surveillance Authority (ESA) announced that the Norwegian tonnage tax regime is approved for a new ten-year period, with certain amendments.

Norwegian tonnage-taxed companies are allowed to keep only certain kinds of assets inside the tonnage regime (legal assets) and are not allowed to have income from non-tonnage-taxed activities except financial income. If the requirements are not fulfilled, the company will fall outside the scope of the model and be taxed at the ordinary rate (23%).

Qualifying assets

A tonnage-taxed company must own at least one qualifying asset (i.e. a vessel, for example bulk tankers, container vessels, car carriers, tugboats, and entrepreneurial vessels and auxiliary vessels for use in the petroleum industry), new building contracts, a 3% share in another tonnage-taxed limited company, or a 3% ownership interest in a qualifying partnership or controlled foreign company (CFC).

One of the important amendments from the ESA announced in December 2017 relates to the inclusion of windmill farm entrepreneurial vessels to the regime. More precisely, this means that vessels engaged in the construction, maintenance, repair, and disassembly of windmills at sea are eligible under the scheme as of the income year 2017.

Non-self-propelled barges are eligible for the tonnage tax regime with effect from 1 January 2018, provided certain conditions are met.

Qualifying and legal business activities/income

Qualifying business income is income from the operation of the company's own and chartered vessels. With effect from 1 January 2018, there are limitations on chartering out vessels on bareboat. The limitations on bareboat chartering out in the approved regime are different for vessels in the offshore sector and vessels outside the offshore sector (traditional shipping). The following limitations apply for bareboat chartering out in the offshore sector:

- Chartering out on bareboat terms may not exceed 50% of the company's fleet during an income year, alternatively over a period of four years.
- Bareboat chartering out must not exceed a contract period of five years, with a possibility to extend the contract by another three years.
- The strategic management of vessels chartered out on bareboat terms must be carried out from an EEA state.

On bareboat chartering out outside the offshore sector, a distinction must be made between contracts regarded as operational lease and financial lease.

Chartering out on contracts regarded as financial lease are not permitted under the regime.

Bareboat contracts regarded as operational lease are allowed with the following limitations:

- Chartering out on bareboat terms may not exceed 40% of the fleet per income year, alternatively over a period of four years.
- The chartering period may not exceed one half of the vessel's life-time.
- The strategic management of vessels chartered out on bareboat terms must be carried out from an EEA state.

For both the offshore sector and traditional shipping, the share of allowed bareboat chartering out is measured on group level.

The limitations on bareboat chartering out will not apply to existing contracts that are not regarded as long-term. The assessment of what constitutes a long-term contract are different in and outside the offshore sector. Further, a transitional period will be implemented for the companies subject to the updated rules.

Chartering in of vessels on time-charter terms is, with effect from 1 January 2018, limited to 90% of non-EEA flagged vessels. These rules are not applicable for existing time-charter contracts.

Furthermore, gains upon disposal of vessels and new building contracts are exempt from taxation.

Income from related activities, such as the sale of goods and services onboard vessels, loading and discharging vessels, or leasing out containers and operations of ticket offices, is also exempt from taxation. The exemption also applies to income from the strategic and commercial management of the company's owned and chartered vessels, as well as vessels owned or operated by group companies (more than 50% joint ownership), and vessels operated according to a pool agreement. Pure management companies are not included (i.e. all companies must have at least one qualifying asset).

Financial income is permitted, except for income from shares in unlisted companies and ownership interests in partnerships that are not taxed under the tonnage tax system. The condition is that financial activities do not constitute a separate business. Net financial income is subject to ordinary taxation (23%). Currency gains and losses are partly taxable/deductible, and interest costs are partly deductible, depending on the proportion between the company's finance capital and total book capital.

Entrance into the tonnage tax system

Entry into the tonnage tax system is optional and may take place with effect from 1 January every year, provided that the company has fulfilled the conditions for the application into the tonnage tax system from the beginning of the year. Newly established companies will have direct entry and may enter into the tonnage tax system from the date of incorporation. All qualifying companies within the same group are obligated to make the same election (tonnage taxation or ordinary taxation).

Companies that enter into the tonnage tax system are subject to a formal ten-year lock-in period. If a company exits the tonnage tax system before the lock-in period expires, it will be excluded from the tonnage tax system until after the initial lock-in period has ended.

Upon entry into the tonnage tax system, the difference between market value and tax value of the company's assets (including vessels, new building contracts, ownership interests in partnerships, and shares in CFCs/tax exempt assets) is taxed as a capital gain (23%) that can be transferred to the gain and loss account. 20% of the balance will be entered as income each year (balance method). There is continuity for financial assets and assets covered by the tax-exemption rules (qualifying shares and derivatives).

Exit from the tonnage tax system

A shipping company may exit the regime on a voluntary basis or may be obligated to do so after breaching specific company requirements within the tonnage tax system. There should be no exit charge when leaving the regime, and the tax value on the company's assets will be adjusted to market value at the time of exit. However, a company that has untaxed gains calculated upon entry into the tonnage tax system could have a tax liability upon exit.

Local income taxes

There is no county or municipal CIT in Norway.

Corporate residence

Companies that are registered and incorporated in Norway in accordance with Norwegian company law are, as a general rule, regarded as tax resident in Norway and taxable for their worldwide income. If effective management at the board/director level is carried out outside Norway, residency in Norway for tax purposes may cease, and the company may be subject to exit taxation. Note that several factors should be considered in order to determine whether tax residency has moved (e.g. other management functions and the overall connection to Norway).

Foreign corporations will be regarded as tax resident in Norway if the place of effective management is in Norway. The place of effective management will be deemed to be in Norway if, for example, the board of directors makes its decisions in Norway.

Permanent establishment (PE)

According to Norwegian domestic law, a foreign company is liable to tax in Norway when engaged in a business that is either conducted in or managed from Norway. The tax liability is limited to income that is derived from Norwegian sources. As a general rule, non-residents without a PE are not liable for tax on capital gains when selling Norwegian financial instruments. However, if the financial instrument is connected to a business that is conducted in or managed from Norway, the sale of the financial instrument can trigger taxation in Norway.

The legislation does not contain a reference to the treaty concepts of 'permanent establishment' or 'permanent representative'. The threshold for tax liability is normally lower under Norwegian domestic law than the taxing right afforded to source states under double tax treaties (DTTs).

With respect to DTTs, the Norwegian tax authorities will, to a large extent, follow the Organisation for Economic Co-operation and Development (OECD) Commentaries when interpreting the relevant DTT, provided the wording is similar to the OECD Model Tax Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate is 25% and applies to all supplies of goods and services not qualifying for another rate or an exemption. A reduced rate of 15% applies to supply of food and beverages, excluding tobacco, alcohol, medication, and water from waterworks. The reduced rate is not applicable to the supply of food and beverages consumed in restaurants and other food establishments.

Applicable from 1 January 2018, the reduced VAT rate of 10% has been increased to 12%. This new VAT rate applies to the television licence fee charged for broadcasting services provided by the Norwegian Broadcasting Company (NRK), domestic passenger transport services and procurement of such services, domestic ferry services related to transport of vehicles, accommodation services, cinema tickets, museum and gallery tickets, amusement park tickets, and sports events.

Exemptions with credit (zero-rated) include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Export of goods and services.
- Goods and services for Norwegian offshore and non-resident ships.
- Transfer of a going concern.
- Supply of newspapers (including e-newspapers) and books (does not include e-books, which are subject to the 25% VAT rate).
- Sale of vessels and aircraft for use in taxable activity.
- Sale of vessels for use in search and rescue.

Exemptions without credit include, but are not limited to, the following (please note that there might be specific conditions for the exemptions to apply):

- Supply of works of art owned by the artist.
- Health services.

- Social services.
- Financial services, including banking, insurance, and the sale of shares (entities within the financial services sector are, in general, subject to a special financial activities tax, *see below*).
- Educational services.
- Sale and lease of real estate (accommodation and lease of parking lots are taxable).
- Services supplied by cultural and entertainment institutions.

Exemptions, whereby an option to tax is available, include the letting of immovable property to VAT-liable lessees following a specific VAT registration with the VAT authorities. Please note that an ordinary VAT-registered business is not required to specifically register for letting of property.

The registration threshold is met when supplies subject to VAT in accordance with the Norwegian VAT legislation (including self-supplies) exceed 50,000 Norwegian kroner (NOK) during a 12-month period. For charitable and public utility institutions and organisations, the threshold is NOK 140,000.

Customs duties

There are quite extensive customs duties on agricultural products, which must be paid upon importation. However, it is often possible to avoid customs duties on these products partly or completely by applying for an exemption from the agricultural authorities in advance. Some of these exemptions are subject to tariff quotas.

Clothes and some other textile products are also subject to customs duties upon importation to Norway, but imports comprised by free trade agreements (such as the EEA with the EU) and the General System of Preferences (for developing countries) are exempt. As a result, clothes will, as a general rule, not be subject to customs duties as long as the importer presents the necessary certificates of origin.

There are no customs duties on other products than agricultural products, clothes, and textile products.

Excise taxes

Excise taxes are calculated on import and domestic production of the following:

- Petroleum products, including gas.
- Alcoholic beverages.
- Non-alcoholic beverages.
- Ethanol for technical purposes.
- Tobacco.
- Chocolate, candy, sugar, etc.
- Products containing the chemicals TRI/PER.
- Products containing the propellant gases HFK/PFK.

There are also excise taxes related to the following:

- Registration of vehicles.
- Use of vehicles.
- Emissions of NOx.
- Sale of electricity.
- Flight passengers.

Property taxes

Real estate may, under certain conditions, be subject to property tax. It is up to the different municipalities to choose whether it wants to impose property tax on real estate. Not all municipalities impose property tax on real estate. The applicable rate varies between 0.2% and 0.7%, which is decided by the municipality. The tax base will normally be the estimated market value (with some adjustments).

Production equipment and production installations will be exempt from property tax from 2019, with a seven-year transitional period.

Hydro power producers must pay property tax on the hydro power plant's capitalised value using a capital interest rate of 4.5%. However, the basis for the calculation of the property tax should fall in the range of NOK 0.95 to NOK 2.74 per kWh of the power plant average production for the last seven years. For hydro power plants with nominal capacity less than 10,000 kVA, the property tax base will be the same as the tax value for income tax purposes.

Stamp taxes

A tax is levied on the registration of a change of ownership of real estate. The tax is calculated at 2.5% of the fair market value.

Net wealth taxes

There is no net wealth tax or other capital taxes for limited liability companies, investment funds, state-owned enterprises (according to the State-owned Enterprise Act), inter-municipal companies, and companies in which somebody owns a part in or receives income from, when the responsibility for the companies' liabilities is limited to the companies' capital.

Some institutional holders (e.g. mutual insurance companies, savings banks, cooperatives, taxable pension funds, self-owned finance institutions, mortgage credit associations) pay 0.15% (state) net wealth tax. The maximum net wealth tax rate for a corporate body is 0.85% (state and municipal tax figures for fiscal year 2018).

From the income year 2018, shares in quoted limited liability companies and equity funds are valued at 80% of quoted value as of 1 January of the year after the relevant income year for net wealth tax purposes. If quoted both on the Norwegian and a foreign stock exchange, the Norwegian stock exchange value will be applicable. If not quoted, the basis for taxation is, as a rule, the company's net taxable value for wealth tax purposes as of 1 January of the income year in question. The basis for taxation of non-quoted shares in foreign companies is, as a starting point, the assumed market value of the shares as of 1 January of the assessment year.

Payroll taxes

There are no payroll taxes other than national insurance contributions and financial activities tax (*see below*).

National insurance contributions

Employers are subject to pay employers' national insurance contributions on the employees' gross salary. The employers' contribution rate varies between 0% and 14.1% based on the municipality of the head office of the business. The contribution shall be reported and paid on a bimonthly basis.

Financial activities tax

Entities within the financial services sector are, in general, subject to a special payroll tax. The tax rate is 5% and shall be calculated on the wage base. Companies where the employees use more than 30% of their time on financial services exempt from VAT will be comprised by the tax.

Exit tax

The exit rules levy taxes upon the migration of assets or liabilities. The tax is calculated by reference to the accrued but unrealised gains at the time of migration at a rate of 23% (25%). Exit tax is also levied if Norwegian CFC taxation lapses because the control requirement is no longer met or if:

- a Norwegian tax resident company transfers its tax residency (effective management) to another country
- a Norwegian tax resident company has assets or liabilities that are transferred to a PE that is tax exempt pursuant to a DTT, or
- a foreign company has assets or liabilities that are transferred from a Norwegian PE to the head office or a foreign PE of the same company.

Transfer of assets or liabilities from a PE of a Norwegian company to another PE in a country where the DTT in question is based on the credit method is, however, not regarded as a taxable event.

According to the rules, the tax treatment is different depending on the type of assets being transferred. Business-related operational equipment and financial assets being transferred out of Norwegian taxing jurisdiction are considered as taxable events, but the tax charge may be deferred if certain conditions are met. The main conditions are that the taxpayer is resident within the EEA/EU and has provided a guarantee for the deferred tax and interest charge. The transfer of intangible assets and inventory trigger immediate and unconditional exit taxation.

De minimis exception rules apply when determining whether the exit tax may be levied. Exit tax on the transfer of tangible assets is applicable only if the unrealised capital gains exceed NOK 5 million. Exit tax on the transfer of other assets and liabilities is only applicable if the unrealised capital gains exceed NOK 1 million.

Carbon dioxide (CO2) tax

A CO2 tax is calculated on petroleum that is flared and on natural gas emitted into the air, as well as on CO2 that is separated from petroleum and emitted into the air, and on installations used for production or transportation of petroleum. The CO2 tax is regarded as a normal operating cost for CIT purposes and is a fully deductible cost both for corporate and special tax calculations.

Type of petroleum	NOK per l/Sm3/kg
Petrol	1.16
Petroleum:	
Light oil, diesel oil	1.33
Residue	1.33
Aviation turbine kerosene	1.28

Type of petroleum	NOK per l/Sm3/kg
Domestic used gas:	
Natural gas	1.00
LPG	1.50
Reduced rate natural gas	0.057
Reduced rate LPG	0.00
Continental shelf:	
Light oil, diesel oil	1.06
Residue	1.06
Natural gas	7.30

Natural resource tax

A NOK 0.013 per kWh natural resource tax applies to hydro power activities, based on one-seventh of the produced kWh for the income year in question and the six previous years. The natural resource tax is creditable against the standard CIT.

Branch income

Branch income is taxed at the corporate rate of 23% (25% for certain entities within the financial sector, i.e. the same as Norwegian companies). The basis for taxation is gross income less deductible costs. Both direct and indirect costs related to the activities carried out in Norway may be deductible.

There is no branch profit tax or other repatriation taxes. However, if assets and/or liabilities are transferred from a PE in Norway to the head office or another foreign PE of the same company, this may trigger exit taxation. The transfer of assets to another corporate entity is subject to regular taxation.

Income determination

Inventory valuation

Inventory is valued at cost. Cost is normally determined using the first in first out (FIFO) method. The last in first out (LIFO) method is not acceptable for tax purposes. Conformity between book and tax reporting is not required.

Capital gains

Capital gains realised in the course of a business activity are almost always regarded as taxable income. Gains resulting from real estate transactions are taxed, regardless of whether they are incurred in connection with business activity. Losses may be offset against the taxpayer's other income.

Capital gains realised on both business-related and non-business-related securities are, in principle, taxable. In general, any capital gains realised on bonds at maturity are regarded as taxable income. Correspondingly, realised losses will be eligible for deductions.

Tax-exemption rules for corporate shareholders

Under the tax-exemption rules, corporate shareholders are generally exempt from tax on dividends received and capital gains on qualifying shares and on derivatives where the underlying object is qualifying shares. Correspondingly, losses on shares are, in general, non-deductible. All operational expenses related to exempt income from shares are fully tax deductible. In order to limit the benefit of these deductions, the tax-exemption method is, with some exemptions, limited to 97% for received dividends, and the remaining 3% is taxable for Norwegian corporate shareholders giving an effective tax rate of 0.69% (0.75% for certain entities within the financial sector). The 3% taxable income is calculated on dividends. Dividend distributions within a tax group (where the ultimate parent company directly or indirectly owns more than 90% of the shares and voting rights) are fully tax exempt. In addition, the tax-exemption method also applies for certain distributions from partnerships and, under certain conditions, to foreign-resident companies with taxable activity in Norway (3% of the income taxable at 23% [25%]). However, distributions on hybrid instruments will not be tax exempt if the distribution is deductible for the distributing company.

Note that an investment in a company resident in a low-tax country in the EEA has to fulfil certain substance requirements to qualify for the tax-exemption rules. These requirements are intended to be in line with the substance requirements of the European Court of Justice's (ECJ's) decision in the Cadbury Schweppes case. A country is considered a low-tax country if the level of effective taxation is less than two-thirds of the tax that would have been due had the foreign company been resident in Norway. This is the same test used for the CFC regime (*see the Group taxation section for more information*).

However, for investments outside the EEA, the tax exemption rules apply only if a shareholder owns 10% or more of the share capital and the voting rights of the foreign company for a consecutive period of two or more years. To be able to deduct losses on the realisation of shareholdings outside the EEA, the shareholder and/or a related party may not own 10% or more of the share capital and the voting rights of the foreign company in a two-year period prior to the realisation. For dividends, the holding period of two years does not have to be met when dividends are distributed, but can also be met after the dividend date.

Shareholdings in low-tax countries outside of the EEA do not qualify for the tax-exemption rules. The Directorate of Taxes has published a non-exhaustive list of low-tax jurisdictions (black list) and non-low-tax jurisdictions (white list).

Acquisition and sales related costs (e.g. broker fees) must be added to the cost price of the shares for tax purposes. Costs incurred to manage acquired tax-exempt shares are, however, tax deductible.

Norway's internal tax rules do not allow taxation of a non-resident's capital gain on the disposal of financial instruments, including shares in Norwegian companies, unless the non-resident has a PE to which the financial instrument may be allocated.

Stock dividends

Stock dividends (bonus shares) are not taxable on receipt, provided that the dividends have been distributed in accordance with the Limited Liability Company Acts and distributed in proportion with the ownership level of the shares.

Tax treatment of investments in security funds

The taxation of the investment in security funds will be determined by the share ratio in the fund. Distributions from security funds with a share interest between 20% and

80% will be split between dividend and interest income calculated on a *pro rata* basis based on the share interest in the fund. Furthermore, distributions from funds with more than 80% shares will only be taxed as dividends, and funds with less than 20% shares will only be taxed as interest.

Interest income

In general, interest income is taxable on an accrual basis.

Royalty income

In general, royalty income is taxable on an accrual basis.

Foreign income

A Norwegian resident company is subject to CIT on its worldwide income. Double taxation of foreign-source income, including foreign-branch income and CFC income, is mitigated either through tax treaties or domestic tax provisions. A deduction for foreign tax may either be claimed as an expense or as a credit against Norwegian tax payable on that income. In most circumstances, foreign dividends are exempt according to the tax-exemption rules. As a consequence, foreign WHT may not be credited and constitutes a real cost for the companies concerned.

Norway does not have any legislation for the deferral of tax on foreign income.

Deductions

Depreciation

In Norway, the declining-balance method of depreciation is mandatory for capitalised assets. The depreciation rates given below are the maximum rates.

There is a duty to capitalise an asset that has a value of NOK 15,000 or higher and has an economic life of at least three years.

Asset	Depreciation rate (%)
Office equipment machines, etc.	30
Acquired goodwill/business value	20
Trucks, lorries, buses, taxis, vehicles for persons with disabilities	24/30 (1)
Cars, tractors, other vehicular machinery, instruments, fixtures and furniture, etc.	20
Ships, vessels, offshore rigs, etc.	14
Aircraft, helicopters	12
Construction for transmission and distribution of electric power and electronic equipment in a power company	5 (2)
Buildings and construction, hotels, hostels, inns, etc.	4/6/10 (3)
Office buildings	2
Fixed technical installations in buildings, including heating plant, cooling and freezing plant, electrical installation, sanitary installation, elevator, etc.	10

Notes

1. An increased depreciation rate of 30% applies to certain electric delivery trucks.
2. Auxiliary and supplementary installations in industrial plants will be depreciated together with the building and constructions group (10% depreciation if expected operating time is less than 20 years).

In addition, constructions for transfer and distribution of energy, and electronic equipment, used in other business activities than power generation will be depreciated at 5%.

3. The applicable rate is 10% if, from the date of its erection, the structure has an economic life of 20 years or less.

Norwegian tax regulations allow for accelerated depreciation of wind power plants. According to the rules, the main assets in wind power plants acquired between 19 June 2015 and 31 December 2020 can be depreciated on a linear basis over five years, provided that the project did not commence prior to 19 June 2015.

Special depreciation rules apply to assets moved in and out of Norwegian jurisdiction to and from companies resident outside the EEA.

Goodwill

Acquired goodwill may be amortised according to the declining-balance method at a maximum of 20% *per annum*. The tax authorities have, however, on several occasions recently questioned the allocation to goodwill and claimed that a part of the purchase price should be allocated to intellectual property (IP), concessions, etc. Intangibles other than goodwill are amortisable on the condition that they are subject to an evident loss in value (impairment test) or if they are time-limited.

Start-up expenses

In general, start-up expenses are deductible, provided that the costs are borne by the company. Start-up costs could include costs related to registration in the Register of Business Enterprises, lawyers and accountants fees, drafting articles of association and shareholders agreement, etc.

Interest expenses

In general, interest expenses are deductible. Norway does not have a rule distinguishing between different income categories (as in the United Kingdom). If income is exempt from taxation in Norway pursuant to a tax treaty, corresponding costs or losses are not tax deductible.

Limitations on tax deductible inter-company interest expenses apply. *Please see the detailed description under Thin capitalisation in the Group taxation section for further information*.

Bad debts

In general, receivables are tax deductible if the debt is clearly irrecoverable or realised (e.g. if the receivable is sold to a third party, converted to share capital, or waived) and is sufficiently connected to the company's business (the business requirement). For accounts receivables, a calculated rate multiplied by the total account receivables at year-end may be deducted. The rate is calculated based on the two preceding years losses on such receivables multiplied by a fixed rate set by the Ministry of Finance.

Losses on receivables between group companies (with more than 90% direct or indirect mutual ownership of shares) and partnerships are, as a main rule, not tax deductible. However, trade receivables and losses on receivables created in connection with mergers or demergers are deductible for tax purposes.

Charitable contributions

Donations to certain charitable institutions are tax deductible. The upper limit for the tax deduction per year is NOK 40,000. The same limit applies to individuals and companies. The receiving entity must be pre-approved by the Norwegian tax authorities.

Fines and penalties

Fines and penalties are normally not tax deductible. This also applies to some administrative charges that are penal in nature. Charges that have no statutory basis in Norwegian law may be tax deductible, provided that the general conditions are fulfilled.

Taxes

Real estate tax, as well as foreign income and capital taxes paid by the taxpayer, are deductible when determining corporate income. Foreign taxes derived from income that is taxable in Norway are deductible only if they have not been credited against Norwegian tax payable.

Net operating losses

Losses may be carried forward indefinitely. Losses incurred in the year of ceasing business may be carried back for a period of two years.

Payments to foreign affiliates

Royalties and service fees paid to related foreign companies are fully deductible, provided they meet the arm's-length principle. As regards loans, the tax authorities require that the entity in question is able to service its debts. In addition, any loan terms should be comparable to those that would have been agreed upon by unrelated parties. Interest on financing, to the extent that these rules are not satisfied, may be regarded as dividends and are thus non-deductible and, in certain cases, subject to Norwegian WHT. In addition, limitations on tax deductible inter-company interest expenses apply. *Please see the detailed description under Thin capitalisation in the Group taxation section for further information*.

Group taxation

Income taxes are assessed on companies individually, not on a consolidated basis. This may be avoided through group contributions between Norwegian companies, provided common direct or indirect (including foreign) ownership and voting rights is more than 90%. Furthermore, the Norwegian group contribution rules are, under certain conditions, also applicable to Norwegian branches of foreign companies that are resident within the EEA. Note that group contributions are not deductible for companies engaged in oil and gas producing activities subject to the Petroleum Tax Act.

Assets may, pursuant to the Group Regulations, be transferred tax-free between group companies at tax book value for tax purposes and at market value for financial book purposes. However, a guarantee for the latent tax liability created by the transfer must be provided upon request by the tax authorities.

Payment must equal market value of the assets transferred. The same applies to payment in the form of shares. If the transferee loses the affiliation with the tax group while still owning the transferred assets, the transferor will be taxed for the difference between the tax book value and the market value of the assets.

Transfer pricing

In Norway, the arm's-length principle for related-party transactions is incorporated into the Tax Act. The transfer pricing provision of the Tax Act states that the OECD Guidelines 'shall be taken into account' when addressing transfer pricing issues under Norwegian tax law.

Transfer pricing has increasingly become the focus of the tax authorities' attention in recent years. It is fairly common for the Norwegian tax authorities to choose test cases that are subject to substantial investment. During the most recent years, focus has been on business restructuring, commissionaire arrangements, and the financing of operations.

Norway has an advance pricing agreement (APA) regime. It is also becoming more common to discuss complex cases with the tax authorities on a non-binding basis in advance of implementation or before assessment. However, there are no particular Norwegian safe harbour rules or any other official guidance of how to price specific transactions, etc.

Country-by-country (CbC) reporting

Norway has implemented CbC reporting rules for multinational groups with a joint income of more than NOK 6.5 billion. The report is to be submitted, at the latest, by 31 December of the year after the relevant accounting year. The report for the accounting year 2017 has to be submitted by 31 December 2018.

Thin capitalisation

There is no fixed debt-to-equity ratio requirement in Norwegian tax law. However, for companies that are part of a group, adjustments may be made under the arm's-length provisions. Generally, these provisions apply only if the company has obtained a larger loan from a group company than an independent credit institution would have granted, or if the agreed level of interest is higher than an independent credit institution would have required. Naturally, this analysis will vary based on the actual company's credit worthiness, which consists of several elements, such as the nature of the business, financial status, future income possibilities, and group relationships. As such, there is no applicable 'safe harbour'. The company must also be able to service its debts.

If a Norwegian entity is regarded as being thinly capitalised, part of the entity's interest and debts may be reclassified to dividend and equity.

Limitations apply to tax-deductible inter-company interest expenses. In general, interest expenses to related parties that exceed 25% of a Norwegian company's taxable earnings before interest, taxes, depreciation, and amortisation (EBITDA), with some adjustments, will not be tax deductible. The regulations only apply to companies that have more than NOK 5 million in total net interest expenses.

Two parties are related if one party directly or indirectly owns or controls the other party by at least 50%. Related parties may be resident in Norway or abroad.

External loans can also, under certain conditions, be regarded as intra-group loans if an entity has provided a guarantee for the debt of a related party. However, an exemption applies if the guarantee is provided by a company that is more than 50% owned by the borrower or a company that is controlled by the borrower or if the security is the shares in the borrower.

The interest deductibility limitation is calculated for each entity in the group. Disallowed interest deductions may be carried forward for ten years.

The limitation applies both to local and foreign companies that have a taxable presence in Norway, as well as partnerships, CFCs, etc.

The EFTA Surveillance Authority (ESA) has issued a reasoned opinion stating that the Norwegian interest limitation rules might violate Norway's obligations under the EEA Agreement. The Norwegian Ministry of Finance has rejected this in their reply to the ESA dated 31 January 2017. The outcome of the investigation and effect for previous and future years is still pending.

Controlled foreign companies (CFCs)

Norwegian residents are taxed directly on their allocable part of the profits from a CFC's income if the company is resident in a low-tax country, irrespective of whether income is distributed to the Norwegian investor. A low-tax country, in this respect, is a country where the effective foreign income taxation of the company's profits is less than two-thirds of the effective taxation that would have been due had the company been resident in Norway. A condition for such taxation is that 50% or more of the foreign company's shares or capital is held or controlled, directly or indirectly, by Norwegian taxpayers (alone or together), based on the status at the beginning and end of the income year in question.

Note that if Norwegian taxpayers own or control more than 60% of the shares or capital at the end of the income year, Norwegian control exists irrespective of the level of control at the beginning of the year. Norwegian control ceases to exist if Norwegian taxpayers own or control less than 50% of the shares or capital at both the beginning and end of the income year or less than 40% of the shares or capital at the end of the income year.

On the condition that Norway has signed a tax treaty with the country involved and the company in question is covered by the treaty, the CFC rules will be applicable only if the income of the entity in question is mainly of a passive nature. Furthermore, CFC taxation may also be prohibited if the company in question is resident within the EEA and cannot be deemed as a wholly artificial arrangement as outlined in the ECJ's decision in the Cadbury Schweppes case. Hence, CFC taxation will be avoided for EEA companies that fulfil certain substance requirements.

Tax credits and incentives

Foreign tax credit

Norwegian limited liability companies that have paid taxes on foreign-source income may, under certain conditions, offset the Norwegian tax paid against the foreign tax paid. The tax credit is limited to the lower of the Norwegian tax paid on the same type of foreign income and the foreign tax actually paid. It is possible to carry forward unused foreign taxes for five years. A credit claimed in accordance with the regulations stated above may not be used in addition to deductions pursuant to other rules and regulations. These rules are very technical, and it should be noted that there are two different 'baskets' of income.

Roll-over regulations

Upon application, the Ministry of Finance has the authority to grant tax relief on the transfer of assets within a group. The transfer may be carried out between group companies (more than 90% ownership and voting rights) or partnerships (with mainly the same owners). If a tax relief is granted, the transfer would not trigger any taxation at the time of the transfer, but all tax positions, including the tax basis of the transferred assets, will be transferred to the acquiring company. A condition for the tax relief is normally that the companies remain within the group.

The Ministry of Finance also has the authority to grant tax relief on the realisation of property, business, shares, etc. during a reorganisation. The reorganisation must improve the efficiency of the business to qualify for tax relief, and, accordingly, administrative effects would not be sufficient. The tax relief must also help companies to carry out the reorganisation. In addition, the tax relief must not reduce the Norwegian tax base; the tax positions would be transferred to the new taxpayer.

SkatteFUNN research and development (R&D) tax incentive scheme

The SkatteFUNN R&D tax incentive scheme is a government program that is designed to stimulate R&D in Norwegian trade and industry. Businesses and enterprises that are subject to taxation in Norway are eligible to apply for tax relief.

All Norwegian companies and branches with R&D projects can apply for a deduction of up to 20% of incurred costs, limited up to a cost base of NOK 25 million for self-developed R&D and NOK 50 million for R&D purchased from approved institutions. If the company does not have taxable income for the income year in question, the company will receive a cash refund for the year following the income year.

The main criterion for applying for SkatteFUNN is that the company has an R&D project with the aim of developing a new or improved asset, service, or production process. There are no requirements regarding type of business. A distinction is made against ordinary product development without developing new knowledge, functions, etc., the ordinary day-to-day business operations, etc.

The application for SkatteFUNN must be approved by Norges Forskningsråd (The Research Council of Norway) and is awarded for a period of a maximum of three years. If the application is approved, there is a requirement to submit a form attested by the company's auditor, together with the ordinary tax return, in order to obtain the tax incentive.

Withholding taxes

Norway levies WHT on dividends. However, no WHT is levied on payments of royalties and interest, except on interest derived from primary capital certificates ('*Egenkapitalbevis*').

The internal WHT rate on dividends is 25%, which may either be reduced under the tax-exemption rules or by an applicable tax treaty. To qualify for the tax-exemption rules, the recipient of the dividends has to be a corporate investor resident in an EEA country and must also fulfil certain substance requirements.

10. 10% of the capital for an uninterrupted 24-month period.
11. 80% of voting rights.
12. 20% of the capital provided that such dividends are exempt from tax in the other state.
13. 10% of the capital for an uninterrupted 12-month period.

Tax administration

Taxable period

The income tax year normally runs from 1 January to 31 December, with assessments being issued no later than 1 December in the following calendar year. Companies are liable for both advance payments and final settlements in the calendar year of assessment. Companies with a financial year other than the calendar year may use the financial year for tax purposes in certain instances (e.g. if they belong to a foreign group with a deviating accounting year, they may use the financial year of the group for tax purposes).

Tax returns

Companies are, in general, required to file their tax returns electronically by the end of May in the year following their financial year. Upon application, an extension of the time limit to file the tax return will normally be granted. The tax returns and the basic attachments are obligatory for all corporate taxpayers. Additional requirements may apply for specific business sectors, such as hydro power production. Under the petroleum tax regime, the filing deadline is the end of April.

The taxpayer is responsible for reporting the taxable income in the tax return, which will be the basis for the tax assessment. The taxpayer can voluntarily change information given in the tax return for up to three years after submitting. This does not apply to the income years prior to 2016, where an appeal must be filed in order to amend the tax assessment.

Payment of tax

Companies are required to make advance payments of tax on 15 February and 15 April in the year following the income year. The two payments should together cover all of the expected CIT to be assessed. Any balance must be paid three weeks after the assessment has been made public (i.e. in the autumn of the year following the relevant accounting year).

The above applies to all corporate taxpayers, except for taxpayers under the petroleum tax regime, where tax shall be paid in six instalments.

Tax audit process

The Norwegian tax system is tax return based. The Norwegian tax office carries out tax audits based on different selection criterions. A tax audit can be caused by a review of the tax return, random selection of companies or business sectors, information obtained from other parties, etc.

The tax office normally gives notice of an upcoming tax audit, but it can also be unannounced. The examination generally takes place by formal, written communication, and the process can take from a few weeks to several years.

In general, a reassessment of the tax assessment requires a notice from the tax authorities with a reasonable timeframe for the taxpayer to give a reply to the notified amendments.

Statute of limitations

Norway introduced new statutes of limitations for reassessing tax assessment as of 2017. The general reassessment period is five years (from the year after the income year in question). A ten-year limit applies in cases where the taxpayer has demonstrated gross negligence. The reassessment period will apply to the income year 2015 going forward. For the years 2012 to 2014, the old reassessment period will, in general, apply to the advantage of the taxpayer (*see below*).

After the old statutes of limitations, the tax office has a ten-year limit for reassessing tax assessment (from the year after the income year in question). However, a two-year limit applies for negative adjustments and a three-year limit for positive adjustments if the taxpayer has provided sufficient and correct information in the tax return.

The taxpayer may file an appeal on the resolutions made by the tax authorities within six weeks after they were sent to the taxpayer. The time limit for appealing other decisions is normally three weeks after the tax office's decision. This applies both under the new and previous rule set.

Topics of focus for tax authorities

The tax office's topics of focus can vary each year and from region to region. The primary topics of focus lately have been thin capitalisation/interest limitation, transfer pricing, and (cross-border) reorganisations. Due to a recent judgement from the Norwegian Supreme Court, it is possible that the tax office will focus more on the survivability of tax positions not connected to specific assets (e.g. losses carried forward when the taxpayer has been part in a merger, demerger, or the ownership has been altered).

Other issues

Foreign Account Tax Compliance Act (FATCA) agreement with the United States

In April 2013, Norway entered into an FATCA agreement with the United States. The agreement is based on the US FATCA regulations and is the basis for information exchange between the Norwegian and US tax authorities with regards to financial transactions.

According to the agreement, Norwegian financial institutions can report to the Norwegian authorities instead of reporting to the US authorities. It is expected that this will ease the reporting liabilities for Norwegian financial institutions.

Common Reporting Standard (CRS) regime

Norway has also entered into agreements with other countries concerning the automatic exchange of information relating to financial accounts in order to prevent tax evasion and international tax crime. Under the agreements, the Norwegian tax authorities will receive information from foreign financial institutions and tax authorities regarding persons liable to tax to Norway.

In addition, financial institutions are liable to report certain financial information about their clients, accounts, etc. to the Norwegian Tax Administration, which will forward the information to the relevant foreign tax authorities.

Base Erosion and Profit Shifting (BEPS)

Norway is positive to the BEPS project and seeks to be an active contributor to implement measures that facilitate its objectives of preventing base erosion and profit shifting. Norway has, over the last few years, adopted regulations for, among others, tax treatment of hybrid instruments, interest limitation rules, transfer pricing regulations and CbC reporting, and the MLI as a result of the BEPS action points.

Multilateral Instrument (MLI)

On 7 June 2017, Norway signed the MLI, and the preliminary Norwegian MLI positions were published 6 July 2017. Norway included 28 treaties to be covered tax agreements and, in addition, several other treaties are under negotiation.

Significant developments

There have been no significant corporate tax developments in Oman during the past year.

Taxes on corporate income

The Income Tax Law seeks to tax worldwide income of entities formed in Oman and the Oman-source income of branches and other forms of permanent establishment (PE).

The rate of income tax is uniform for all types of business entities, regardless of whether it is a corporate entity and/or whether it is registered or not.

The income tax rate is 15% for all taxpayers other than Omani proprietorships ('establishments') and limited liability companies (LLCs) that fulfil the conditions of small and medium enterprises (SMEs).

For Omani proprietorships ('establishments') and LLCs that meet the following requirements:

- registered capital does not exceed 50,000 Omani rial (OMR) at the beginning of the tax year
- gross income does not exceed OMR 100,000 for any tax year
- average number of employees during the tax year does not exceed 15, and
- taxpayer activities do not include air/sea transport; extraction of natural resources; banking, insurance, or financial services; public utility concessions; or other activities to be decided by the Minister of Finance after approval by the Council of Ministers,

a 3% tax rate is effective and is coupled with a requirement for SME taxpayers to file income tax returns.

Petroleum income tax

Special provisions are applicable to the taxation of income derived from the sale of petroleum. The tax rate specified for such companies is 55%. However, the tax rates are applied on income as determined by the individual Exploration and Production Sharing Agreement entered into between the government of Oman and the company engaged in the sale of petroleum. Under these agreements, the government pays the company's share of income tax from amounts withheld from the government's share of production. Consequently, the income tax is not actually borne by the company.

Local income taxes
There are no regional or local income taxes in Oman.

Corporate residence

The term 'resident' is not defined in the tax law.

Permanent establishment (PE)
PE is defined in very broad terms and includes places of sale, places of management, branches, offices, factories, workshops, mines, quarries, other places of extraction of natural resources, and a building site, place of construction, or assembly project (if it continues for more than 90 days). However, the mere use of storage or display facilities does not constitute a PE. The definition of PE references carrying on business in Oman, either directly or through a dependent agent.

Additionally, the definition stipulates that a total stay of 90 days during a 12-month period creates a PE in Oman. However, this 90-day period applies to rendering of consultancy services or other services only. Under this definition, while the sale of goods into Oman will not be deemed to be a taxable activity, a contract for the supply and installation of equipment is likely to attract tax. By the same criterion, services rendered by personnel visiting Oman will be treated as taxable activities, applying the 90-day rule.

Other taxes

Value-added tax (VAT)
Oman has announced its intention, along with other Gulf Cooperation Council (GCC) member countries, to implement VAT. The implementation date is expected to be 1 January 2019. The rate of VAT will be 5%.

Customs duty
Customs duty of 5% of cost, insurance, and freight (CIF) value applies to most non-GCC source goods. Exemptions apply for certain food items, medical supplies, etc.

Excise taxes
There are no excise taxes in Oman.

Property taxes
There are no property taxes in Oman.

Stamp duty
Stamp duty is applicable on transfer of land and property at 5% of the value.

Payroll taxes
There are no payroll taxes in Oman other than social security contributions (*see below*).

Social security contributions
A 17.5% social security contribution is applicable to employees who are Omani nationals, but not to expatriate employees. The employee pays a contribution of 7% of

salary, and the employer pays the balance of 10.5%. The employer is also required to contribute for insurance for work-related injuries in the amount of 1% of the salary of the employee. This brings the total monthly social security and insurance contributions to be made by the employer to 11.5%.

Municipal taxes

Municipal taxes apply to the following items:

- Property rents: 3%.
- Hotel occupancy: 5%.
- Leisure and cinema houses: 10%.

Branch income

The tax rate for branches of foreign entities (regardless of country) is a flat 15%.

Expenses incurred by the head office that can be identified as directly related to the branch's activity are deductible. The deduction for other head office expenses is limited to 3% of the branch's gross income for the year. This rate is 5% for banks and insurance companies, and 10% for high-tech industrial activities.

Income determination

Inventory valuation

Inventory should be valued using a method that complies with International Accounting Standards.

Capital gains

Gains on sales of securities listed on the Muscat Securities Market are exempt from taxation. Gains on transfers of other assets are taxable as ordinary income.

Dividend income

Dividends received from Omani entities are exempt from taxation. Foreign-source dividends are taxable at the same rates as corporate income.

Stock dividends

There are no provisions in the tax law that address stock dividends.

Interest income

Interest income is taxable as business income.

Rent/royalty income

Rental income and royalties are taxed as business income.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable. Similarly, any unrealised loss is not deductible from the total taxable income.

Exempt income

The following income is exempt from income tax in Oman:

- Dividends received from an Omani company.
- Profits or gains on disposal of securities listed on Muscat Security Market.
- Omani marine companies, whether wholly owned by Omanis or with foreign and Omani ownership and registered in Oman, are exempt from tax. Foreign marine companies conducting activities in Oman through an authorised agent are exempted from tax with effect from the date of commencement of activity, provided that reciprocal treatment is afforded by the country of the foreign company.
- Income realised by foreign airlines carrying on business through PEs in Oman is exempt from tax. This exemption is limited to the extent of the income from operating airplanes for international transport, provided reciprocal treatment is accorded in the airline's home country.
- Income realised by investment funds established in Oman under the Capital Market Authority Law or established overseas for dealing in shares and securities listed on Muscat Security Market is exempt.
- Foreign companies engaged in oil and gas exploration activities, while taxable under the law, normally have their tax obligations discharged by the government under the terms of the Exploration and Production Sharing Agreement.
- Foreign companies working for the government in projects deemed to be of national importance may be able to negotiate a tax protection clause whereby any tax paid by them is reimbursed by the government.

See Exempt activities in the Tax credits and incentives section for a description of exemptions from tax for income from certain principal activities.

Foreign income

Worldwide income of an entity formed in Oman is taxed in Oman. Credit for foreign taxes paid is given under the law; however, this may not exceed the amount of Omani tax payable on such income.

The Oman tax law does not contain rules on deferral of foreign income.

Deductions

Depreciation

Depreciation is taken on a straight-line basis on the following classes of assets at the annual rates shown.

Asset	**Rate (%)**
Permanent buildings	4
Semi-permanent buildings	15
Docks, quays, jetties, sea barriers in ports, pipelines, roads, and railway lines	10
Aircraft and ships	15
Hospital buildings, educational establishments, and equipment for scientific research	100

The rate of depreciation allowed is doubled in the case of buildings used for industrial purposes.

The tax law also provides for calculation of depreciation on a net book value basis for the following classes of assets. A 'pooling' concept is permitted, whereby assets subject to the same rate of depreciation may be pooled together for purposes of depreciation.

Pool	Rate (%)
First pool is comprised of tractors, cranes, and other heavy machinery and equipment, including computer software installations, furniture and fixtures, vehicles, computer software, and intellectual property (IP) rights	33.33
Second pool is comprised of drilling equipment	10
Third pool is comprised of 'other machinery and equipment' not included above	15

Goodwill

Goodwill is amortisable for tax purposes, generally over the life assigned for International Financial Reporting Standards (IFRS) accounting purposes.

Start-up expenses

Expenses incurred before the commencement of business are allowed as a deduction in the first taxable year (or period).

Interest expenses

Deduction of expenses incurred for the purpose of earning income is generally allowed. Interest expense is allowed for loans from unrelated parties or on loans from banks. Interest paid to related parties is allowed only to the extent the loan terms are at arm's length and subject to satisfaction of the 2:1 debt-to-equity ratio (*see Thin capitalisation in the Group taxation section*).

Bad debts and other contingencies

Amounts charged to the profit and loss account for creating provisions in respect of bad debts, stock obsolescence, warranties, and similar types of contingencies are not tax deductible. Deduction is allowed only at the time of write-off. However, provisions created by licensed banks in respect of bad debts are allowable within the limits approved/required by the Central Bank of Oman.

Charitable contributions

Charitable donations (in cash or kind) are limited to specified institutions and organisations and are subject to an overall limitation of 5% of gross income.

Meals, entertainment, officers' compensation, etc.

All expenses incurred for the generation of gross total income are allowed. There are no specific restrictions on deduction for expenses like meals and entertainment, compensation for officers, and life insurance payments for employees. There are limits on the deductibility of directors' fees.

Social security payments

Social security contributions paid by employers in respect of employees may also be deducted.

Pension payments

Contributions to pension funds, domestic and foreign, are deductible, provided the fund is licensed (in Oman or the country where it was established) and complies with certain other specified conditions.

Illegal payments

Payments of bribes or kickbacks, and other illegal payments, are not deductible.

Fines and penalties

Civil fines and penalties are not deductible.

Taxes

Taxes on income, whether incurred in Oman or elsewhere, are not deductible in arriving at taxable income. A credit may be available for taxes paid in a foreign jurisdiction.

Other significant items/restrictions on allowable expenses

The tax law has imposed restrictions on the deductibility of certain other expenses. The principal items affected are the following:

- Sponsorship fees paid to Omani sponsors are restricted to 5% of net taxable income before sponsorship fees. Net taxable income is determined after offsetting any losses carried forward.
- Charges or expenses allocated from the head office or other group companies are limited to 3% of gross income (5% for banks and insurance companies, and 10% for high-tech industrial activities).
- Commissions paid by insurance companies are restricted to 25% of net premiums collected.
- Leasing companies are treated at par with banks as far as deduction for loan loss provision is concerned. Leasing companies are allowed deductions for loan loss provisions, subject to the limits or recommendations of the Central Bank of Oman.
- Losses arising on sale of investments listed on the Muscat Security Market are not allowed as a deduction from taxable income.
- Any expense or costs that have been incurred to generate income exempted from tax are not allowed as a deduction from taxable income.
- Amounts paid as tax consultancy or advisory fees are disallowed.

Net operating losses

Carryforward of losses is limited to five years, except in the case of companies that incurred losses during a mandatory tax-exempt period, where the net losses may be carried forward indefinitely for offset against future profits.

Carryback of losses is not allowed.

Payments to foreign affiliates

Payments to foreign affiliates normally receive in-depth scrutiny from the tax authorities. Accordingly, proper documentation should be obtained in order to establish that these transactions are made at an arm's-length basis.

Group taxation

Businesses are taxed as separate entities, and the tax law does not recognise group taxation.

Transfer pricing

Transactions between related parties must be valued at arm's length. There is no specific guidance on acceptable methods for determining an arm's-length price.

Inter-company payments

All inter-company payments are scrutinised in detail to ensure that the profits are not transferred to avoid payment of tax.

Thin capitalisation

If the debt-to-equity ratio exceeds 2:1 in the case of related-party debt, interest on the excess debt is not deductible for tax purposes. This rule does not apply to banks and insurance companies, PEs of foreign companies, or proprietary (Omani owned) establishments.

Controlled foreign companies (CFCs)

There is no CFC regime in Oman.

Tax credits and incentives

Foreign tax credit

A foreign tax credit is available to Omani companies or establishments (proprietorships) that suffer foreign taxes on income that is also taxed in Oman. The credit is limited to the amount of tax incurred in Oman. The taxpayer is required to submit an application to the Secretariat General for Taxation to claim such credit.

Exempt activities

Up to introduction of Royal Decree 9/2017 on 26 February 2017, income from the principal activities listed below was exempt from tax, provided an exemption was applied for and obtained.

- Industry and mining.
- Export of products manufactured or processed locally.
- Operation of hotels or tourist villages.
- Agriculture and animal husbandry and the processing of agricultural produce.
- Fishing and fish processing and aquaculture.
- University education, college or institutes of higher studies, private schools, nurseries, training colleges, and institutes.

The exemption is valid for a period of five years from the date of commencement of production or the practice of activities and may be made subject to such conditions as the Minister of Commerce and industry may specify. The exemption was renewable for a period not exceeding five years, subject to approval by the Financial Affairs and Energy Resources Council.

Effective for tax years beginning after 31 December 2016, tax exemptions are available only for industrial (manufacturing) activities. Exemptions are no longer available for mining, export of locally manufactured goods, operation of hotels and tourist villages, agriculture, fishing, or education.

In addition, new industrial exemptions are limited to the initial five-year period, with no renewal.

Existing tax exemptions are not impacted, but the changes will look to impact pending renewal applications.

See Exempt income in the Income determination section for a description of other income items exempt from tax.

Withholding taxes

Foreign companies that do not have a PE in Oman for tax purposes and that derive income from Oman in the nature of the following are subject to withholding tax (WHT) at 10% of gross income from such sources:

- Dividends.
- Interest.
- Royalties.
- Consideration for research and development.
- Consideration for the use of or right to use computer software.
- Management fees.
- Provision of services.

Such WHT is required to be withheld by the Omani-based company and paid to the tax department within 14 days of the end of the month in which tax is deducted or payments are due or made to the foreign company.

Under clarifications issued by Oman tax authorities, WHT on dividends applies only to dividends paid by joint stock companies, not LLCs.

As of 1 March 2018, WHT on services applies whether the services are performed in Oman or abroad. Previously, the tax authorities had taken a position that services performed entirely outside Oman were not subject to WHT.

The term 'royalty' has been defined under the law to include consideration for the use of IP, including computer software, cinematography films, tapes, discs, or any other media, patents, trademarks, drawings, etc. The term further includes consideration for using industrial, commercial, or scientific equipment and consideration for information concerning industrial, commercial, or scientific experience or consideration for granting rights to exploit mining or other natural resources.

Double tax treaties (DTTs)

The maximum WHT rates provided by the Oman DTTs are shown in the table below. There are also agreements with various countries that are not yet in force.

The table provides a summary of WHT rates under Oman tax treaties in force as of 1 March 2018. Under some treaties, dividends qualify for a reduced WHT rate if the beneficial owner is a corporation that owns a specified percentage of the voting power of the distributing corporation. Also, under some treaties, a lower WHT rate applies to interest on government debt or government-assisted debt.

	WHT (%)			
Recipient	**Dividends**	**Interest**	**Royalties**	**Services**
Foreign companies:

Notes

1. The 0% rate applies to literary, dramatic, and musical copyright royalties, computer software royalties, and to industrial, commercial, or scientific experience. The 10% rate applies in other cases.
2. The 0% rate applies if the beneficial owner of the dividends is: (i) the government, a political subdivision, or the central bank; (ii) a pension scheme; or (iii) in the case of Oman, the State General Reserve Fund, the Omani Investment Fund, and any other statutory body or institution wholly owned by the government of Oman. The 5% rate applies if the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the payer company. The 15% rate applies in other cases.
3. The 0% rate applies to interest paid: (i) to the government, a political subdivision, or the central bank; (ii) in the case of Oman, to the State General Reserve Fund, the Omani Investment Fund, and any other statutory body or institution wholly owned by the government; (iii) on the credit sale of equipment, merchandise, or services; (iv) on a loan granted by a bank; (v) to a pension fund; or (vi) on inter-company loans. In other cases, the 5% rate applies.
4. The 10% rate applies to interest paid to financial institutions, including insurance companies. The 15% rate applies in other cases.

5. The 15% rate applies to dividends paid from profits derived directly or indirectly from immovable property by an investment company or investment fund, the income of which is subject to favourable tax treatment.
6. Applies to technical, managerial, or consultancy services rendered in Oman.
7. 10% minimum shareholding required.
8. 15% minimum shareholding required.
9. 20% minimum shareholding required.
10. 60% minimum shareholding required.
11. 25% to 60% minimum shareholding required.

Tax administration

Taxable period

The tax year is the calendar year. Assessments can be made on the basis of a year-end other than 31 December, provided permission is granted in advance by the Omani tax authorities and the company then adheres to the year-end on a consistent basis.

Tax returns

A provisional declaration of tax must be submitted in the prescribed form within three months from the end of the accounting period to which it relates. The final annual return of income should be submitted in the prescribed format within six months from the end of the accounting period to which it relates. Reasonable time extensions can be sought and are normally provided for filing the provisional and annual returns of income, but these do not defer payment of tax, which will be subject to additional tax at 1% per month from the due date to the actual date of payment.

In the case of companies having a paid-up capital in excess of OMR 20,000, the annual return of income should be accompanied by audited accounts signed by an auditor registered in Oman. The law requires accounts to be drawn up in accordance with IFRS or any similar standards as approved by the Secretary General of Taxation (SGT), consistently applied. It specifically provides for accrual accounting unless prior permission of the SGT has been obtained. The accounts must be submitted in local currency unless prior approval of the SGT has been obtained for submitting them in foreign currency.

In the case of SMEs falling in the category of the 3% tax rate, the tax returns must be filed and accompanied by a simplified income statement within three months of the year-end.

Delay or failure in submitting the provisional or annual returns may attract a penalty of not less than OMR 100 and not more than OMR 2,000.

Failure to file the provisional or annual returns of income may result in an estimated profit assessment by the SGT.

Failure to submit audited accounts as required under the Law is deemed to result in an incomplete annual return of income and may attract an estimated profit assessment. The requirement of submitting audited financial statements has been relaxed for SME taxpayers who fall in the category of the 3% tax rate.

The law confers wide powers on the SGT for requesting information. Experience has shown that, notwithstanding the presentation of audited accounts, the tax department requests very detailed information and supporting documentation relating to revenue and expenses. Failure to provide such information or the provision of incorrect information can result in an additional assessment by the SGT and/or various penalties on the company and/or the officer responsible for providing the information.

Payment of tax

Any tax estimated to be payable in respect of an accounting period should be paid with the provisional assessment and 'topped up' for any additional amount computed as payable following submission of the annual return of income. Failure to pay taxes by the due date attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

The difference between the amount paid and the amount assessed, subject to filing of an objection, should be paid within one month from the date of the assessment. The additional amount assessed attracts interest at the rate of 1% per month from the date on which such tax was due to the date of payment.

Under the Law, the SGT has the authority, with the approval of the Minister and the Tax Committee, to sequester and sell the assets of a taxable entity to recover the taxes due.

If decisive proof is presented to the SGT that any person has paid tax for any year exceeding the tax due and payable for such tax year as finally settled, such person has the right to recover the tax. However, if any tax has become payable by such person in respect of another tax year, the excess amount will be adjusted against the future tax liability. Any request for recovery must be presented within five years from the end of the tax year in which the right to refund arises; otherwise, such right shall lapse.

Where the taxpayer fails to declare correct income in the tax return for any tax year, the SGT may impose a fine in the range of 1% to 25% of the difference between the amount on the basis of the correct taxable income and the amount of tax as per the return submitted.

Objections and appeals

A company has a right to object to any assessment issued by the SGT. The objection document should be prepared in writing (in English and in Arabic) and filed with the office of the SGT within 45 days from the date of assessment. The SGT is required to give a judgment within five months, extendable up to another three months at the SGT's discretion, from the date of receiving the objection. The tax demanded may be kept in abeyance on request. No additional tax is payable until the SGT issues the judgment.

Statute of limitations

Prior to Royal Decree 9/2017, the tax authorities had a period of up to five years from the end of the year in which a tax return is submitted to complete the assessment for that tax year. However, where the entity has not submitted any tax return, the tax authorities had a period of ten years to complete the assessments.

Self-assessment regime

The Royal Decree 9/2017 introduced the self-assessment regime, where the assessments will be carried out on a sample basis and the statute of limitation will be only three years from the end of the year in which a tax return is submitted. Where the entity has not submitted the tax returns, the tax authorities have a period of five years to complete the assessments.

Maintenance of records

The Law requires accounting records and supporting documentation to be maintained for ten years after the end of the accounting period to which these records relate.

Topics of focus for tax authorities

Related-party transactions are likely to attract particular scrutiny by the tax authorities. Taxpayers should maintain extensive documentation that proves that transactions are carried on at arm’s length.

Significant developments

- The generally applicable corporate tax rate of 30% (relevant for tax year 2018) will be reduced by 1% each year until a rate of 25% is applicable for tax year 2023 and onwards.
- The corporate tax rate for 'small companies', presently 25%, will also be reduced by 1% each year until a rate of 20% is applicable for tax year 2023 and onwards.
- Super tax, presently leviable at 3%, is to be gradually phased out in the case of persons (including companies, other than banking companies) by 1% each year, until tax year 2021.
- Tax on 'undistributed reserves' in case of public companies has been reduced from 7.5% to 5%. Previously, no tax was payable where a company distributed at least 40% of after tax profits. Such threshold is now being reduced to 20%. Moreover, issuance of bonus shares shall no longer be considered as distribution of profits for the purposes of these provisions.
- Tax at 5% earlier applicable on issue of bonus shares has been abolished.
- 'Fees for offshore digital services' received by non-resident persons have been made subject to final tax (like royalties and 'fees for technical services') at the rate of 5% of the gross amount.
- Income from turnkey contracts derived by non-resident persons and their affiliates, that form part of an overall arrangement for supply of goods, installation, construction, assembly, commission, guarantee, and supervisory activities, is to be considered as Pakistan-source income.
- Under the domestic law, scope of expression of 'permanent establishment' (PE) has been enhanced to include (i) fixed place of business used by non-resident persons/affiliates for execution of 'composite' contracts and (ii) those persons who are habitually engaged in execution of contracts on behalf of non-residents.
- The concept of controlled foreign company (CFC) has been introduced with the aim to bring into the tax net passive incomes earned by foreign companies, owned by residents, that are not repatriated into Pakistan.
- Gain derived outside Pakistan on disposal of a Pakistani asset, held by a non-resident company, has been included in the ambit of Pakistan-source income.
- Income from services rendered by PEs of non-resident persons have now also been made subject to 'minimum tax' (and thus brought on par with resident corporate service providers).
- Tax authorities have been empowered to disregard an entity/corporate structure having no economic substance or executed as part of a 'tax avoidance scheme'.
- Adjustment of unabsorbed depreciation/amortisation against taxable profits of subsequent years has been restricted to 50% of taxable profits in case of profits of

10 million Pakistani rupees (PKR) or more. The remaining amounts shall, however, remain eligible for carryforward/adjustment in future years.

- Gain on disposal of listed and other securities held for more than five years but less than six years were earlier taxable at 0%; however, now these have been made taxable at 15% (20% for non-filers).
- The rate of tax chargeable/deductible on dividends received by a company from collective investment schemes, real estate investment trust (REIT) schemes, or mutual funds (other than stock funds) has been reduced from 25% to 15%.
- 'Commercial importers', earlier subject to tax on a presumptive basis, have now been made subject to tax under the normal tax regime, with tax at 5% of the import value considered to be a minimum tax on related transaction.
- The exemption on income from export of computer software, information technology (IT) services, or IT-enabled services, has been extended to tax year 2025.
- The tax credit on investment in plant and machinery and newly established undertakings is extended for a period up to 30 June 2021.
- A one-time amnesty scheme has been announced for declaration of undisclosed domestic incomes/assets by 30 June 2018 for companies on the basis of payment of tax at 2% to 5% (depending on the category of such assets).

Taxes on corporate income

A resident company is taxed on its worldwide income. Non-resident companies operating in Pakistan through a branch are taxed on their Pakistan-source income attributable to the branch at rates applicable to a company.

The federal corporate tax rates on taxable income (for tax year 2018) are as follows:

Company type	Tax rate (%)
Banking company	35
Public company other than a banking company	30
Any other company	30
Small company (*see the Tax credits and incentives section for more information*)	25

The tax rates for 'companies' as well as 'small companies' will be reduced gradually from tax year 2019 in the following manner:

Tax year	Company (%)	Small company (%)
2019	29	24
2020	28	23
2021	27	22
2022	26	21
2023 and onwards	25	20

The term 'public company' implies a company listed on any stock exchange in Pakistan or one in which not less than 50% of the shares are held by the federal government or a public trust.

In the case of a *modaraba* (*see the Income determination section for a definition*), income, except relating to trading and manufacturing activities, is exempt from tax, provided that 90% of its profit is distributed to the certificate holders as cash dividends.

The final tax regime (FTR) for resident taxpayers, a presumptive tax scheme where taxes are withheld at the source on the sale of goods and execution of contracts, is considered the final tax liability in respect of income arising from the sale or contract.

In the case of exports, tax collected at the time of realisation of foreign-exchange proceeds is treated as the final tax for that income. The exporters can also opt out of such regime, subject to the condition that tax deducted on exports is offered as minimum tax.

The FTR is also applicable to non-resident taxpayers, at their option. However, it is only applicable in cases of receipts on account of the execution of a contract for construction, assembly, or installation, including a contract for the supply of management activities in relation to such project as well as certain contracts for services and contracts for advertisement services rendered by television satellite channels.

Commercial importers (persons engaged in the import of goods where the goods are sold in the same condition as they were when imported) were subject to tax on presumptive tax basis, though an option was provided for under the law to opt out of FTR. This regime has now been abolished, and commercial imports have been made taxable under the normal tax regime, with tax at 5% of import value (as increased by applicable duties/taxes) considered as a 'minimum tax' on such transaction.

Taxation of a PE

The following principles shall apply in computing taxable income of a PE:

- It is a distinct and separate entity dealing independently with the non-resident of which it is a PE.
- In addition to business expenditure, executive and administrative expenditure, whether incurred in Pakistan or elsewhere, will be allowed as deductions.
- Head office expenditure, including rent, salaries, travelling, and any other expenditure that may be prescribed, shall be allowed as a deduction in proportion to the turnover of the PE in the same proportion as the non-resident's total head office expenditure bears to its worldwide turnover.
- Royalties, compensation for services (including management services), and interest on loans (except in banking business) payable or receivable to or from a PE's head office shall be considered in computing taxable income of the PE.
- No deduction will be allowed for any interest paid on loans acquired by a non-resident to finance the operations of a PE (or for the insurance premium in respect of such loans).
- Income from rendition of services derived by a PE of a non-resident person has been made subject to 'minimum tax' at 8% (of the gross consideration).

Taxation of certain contracts executed by non-resident persons

Income derived by non-resident persons/their affiliates from turnkey contracts that are part of an overall arrangement for supply of goods, installation, construction, assembly, commission, guarantee, and supervisory activities, including offshore supply of goods, now constitutes Pakistan-source income.

Necessary amendments to this effect have also been made in the definition of a PE by way of introduction of the concept of 'cohesive business operations', which includes:

- an overall arrangement for the supply of goods, installation, construction, assembly, commission, guarantees, or supervisory activities, and all or principal activities are undertaken or performed either by the person or the associates of the person, and
- supply of goods include the goods imported in the name of the associate or any other person, whether or not the title to the goods passes outside Pakistan.

The objective of these amendments seems an attempt to tax income of a non-resident arising from transactions wholly undertaken outside Pakistan (such as income relating to supply of goods where the title is passed outside Pakistan) in case the same is part of a 'cohesive business operation'. It is, however, clear that the double tax treaty (DTT) provisions would override these provisions and thus the same would only apply in non-treaty cases.

Minimum tax on turnover

Where the tax payable by a company is less than 1.25% of the turnover, the company is required to pay a minimum tax equivalent to 1.25% of the turnover. Tax paid in excess of normal tax liability can be carried forward for adjustment against tax liability of a subsequent tax year. However, such tax can only be adjusted against tax liability of the five tax years immediately succeeding the tax year for which the amount was paid.

The minimum tax rate for companies providing services is 8% of the turnover, except for certain specified services sectors, which are allowed concessions, subject to fulfilment of certain conditions.

Alternate Corporate Tax (ACT)

Under the ACT, the minimum tax liability of a company is the higher of 17% of accounting income or the corporate tax liability determined under the Ordinance, including minimum tax on turnover. This concept is applicable for all companies except insurance companies, companies engaged in exploration and production of petroleum, banking companies, and companies enjoying a reduced rate of tax.

Exempt incomes, income taxable under the FTR, capital gain on disposal of specified listed securities, income entitled to 100% tax credit on account of equity investment, and income of non-profit organisations, trusts, and welfare institutions are not subject to levy of ACT.

Super tax

The levy of 'super tax' has been extended up to tax year 2021 in the case of banking companies and up to tax year 2020 in the case of other persons. The revised rates of super tax are as follows:

Tax year	Banking company (%)	Persons other than banking company (%)
2018	0	3
2019	4	2
2020	3	1
2021	2	0

Local taxes on income

No provincial or local taxes are payable in respect of income of companies.

Corporate residence

A company is resident in Pakistan if it is incorporated or formed by or under the law of Pakistan or if the control and management of its affairs is situated wholly in Pakistan in that year.

The term 'company' includes a trust, a cooperative society, a finance society, or any other society established or constituted by or under any law; a corporate body incorporated outside Pakistan; and any foreign association, incorporated or unincorporated, that the Central Revenue authorities may declare to be a company.

Permanent establishment (PE)

A PE is a place of business through which the business of a non-resident is wholly or partly carried out, including:

- A place of management, branch, office, factory or workshop, premises for soliciting orders, warehouse, permanent sales exhibition, or sales outlet, except a liaison office.
- An agriculture, pastoral, or forestry property.
- A mine, oil or gas well, quarry, or any other place of extraction of natural resources.
- A building site; a construction, assembly, or installation project; or supervisory activities connected with such site or project if such activity continued for more than 90 days within any 12-month period.
- The furnishing of services, including consultancy services, by any person through employees or other personnel engaged by the person for that purpose.
- A person acting in Pakistan on behalf of the person, other than an agent of independent status (excluding a person acting exclusively/almost exclusively on behalf of such person) in the ordinary course of business.
- Any substantial equipment installed, or other asset or property capable of activity giving rise to income.
- A person who habitually exercises authority to conclude contracts on behalf of another person or plays a principal role in execution of contacts that are concluded without any material variations and these contracts are:
  - in the name of the person
  - for the transfer of the ownership of or for the granting of the right to use property owned by that enterprise or that the enterprise has the right to use, or
  - for the provision of services by that person.
- A fixed place of business that is used or maintained by a person if the person or an associate of a person carries on business at that place or at another place in Pakistan and:
  - that place or other place constitutes a PE of the person or an associate of the person under this sub-clause, or
  - business carried on by the person or an associate of the person at the same place or at more than one place constitutes complementary functions that are part of a cohesive business operation.

The definition of a PE provided in a DTT will prevail in cases where a DTT is executed by Pakistan with the related country of origin of the PE.

Other taxes

Value-added tax (VAT)

VAT (locally termed as 'sales tax') is ordinarily levied at 17% on the value of goods, unless specifically exempt, after allowing related input credits. Export of goods is subject to sales tax at 0%.

Sales tax on services is levied by all four provinces, Islamabad Capital Territory, Gilgit-Baltistan, Azad Jammu, and Kashmir at rates ranging from 13% to 16%. Sales tax paid on services, federal sales tax on goods, and federal excise duty are adjustable against each other, with a few exceptions.

Significant zero-rated goods are as follows:

- Supplies and repair and maintenance of certain ships and aircraft.
- Supplies to diplomatic missions and diplomats.
- Supplies of raw materials, components, and goods for export processing zones.
- Supplies of locally manufactured plant and machinery to export processing zones and supplies of certain specified machinery to the exploration and production sector.
- Supplies to exporters.

Significant exemptions are as follows:

- Live animals and live poultry.
- Live plants.
- Vegetables, pulses, edible fruits (excluding imported fruits), certain spices, sugar cane, edible oils, etc.
- Milk preparations.
- Newsprints, newspapers, journals, periodicals, and books.
- Agricultural produce not subjected to any process.

Customs and import duties

Customs and certain other duties are collected at the import stage at varying rates classified under the Harmonized System (HS) Code.

Excise duty

Federal excise duty (FED) is leviable on certain types of manufacturing, import of goods, and rendering of services at varying rates. Sales tax on services, which is a replacement of FED, under the constitution, is to be levied and collected by the provinces on services rendered within their jurisdictions.

Property taxes

Property owners are required to pay property tax levied and collected by provincial governments through municipal governments at varying rates.

Stamp duty

In the case of sale or transfer of immovable property, stamp duty is payable (with varying rates on the basis of location of the property) on the value of the property.

Payroll taxes

Other than social security contributions (*see below*), employers are not responsible to pay any other tax in respect of their employees or their salaries.

Social security contributions

Nominal social security and Employees Old Age Benefit contribution is collected from the employers and the employees. Employers are responsible to collect and pay on a monthly basis.

Branch income

The rates of tax for a branch of a company incorporated outside Pakistan are the same as those applicable on resident companies, other than public and banking companies. Tax at the rate of 15% is levied on the transfer of after tax profits by a branch to the head office, with an exception for companies engaged in the oil and gas exploration and production business.

Payments to a branch in Pakistan of a non-resident are subject to deduction of tax at source on the same basis as a resident in the case of sale of goods, rendering of professional services, and execution of contracts. In other circumstances, a reduced/0% withholding tax (WHT) certificate can be obtained from the Commissioner of Income Tax.

Pakistan has presently executed agreements for avoidance of double taxation with 65 countries.

Income determination

Inventory valuation

Inventories are to be stated at the lower of cost or market. The first in first out (FIFO) and average methods are accepted. Conformity of methods used for book and tax reporting is desirable, and the method used should be consistently applied.

Capital gains

Capital gain on the sale of immovable property acquired on or after 1 July 2016, on which depreciation is not allowed, is taxed at the rate of 10% if disposed of within one year, 7.5% if disposed of within two years, and 5% if disposed of within three years. However, if the retention period is more than three years, such gain is not taxable. Capital gain on the sale of immovable property acquired before 1 July 2016 is taxed at 5% if disposed of within three years. No tax is payable if the retention period is more than three years.

Gain on the disposal of shares of a resident company or a non-resident company, whose assets wholly or principally consist of immovable property situated in Pakistan or rights to explore/exploit natural resources in Pakistan, shall be Pakistan-source income.

Tax rates on capital gains on the sale of shares of public companies, *modaraba*, and other specified 'securities' are exempt from tax if the date of acquisition of shares is before 1 July 2013. Capital gains on such instruments for tax years 2018 and 2019 are taxed as follows:

Pakistan

Holding period	Tax rates - Filers (%) Securities acquired before 1 July 2016	Tax rates - Filers (%) Securities acquired after 1 July 2016	Tax rates - Non-filers (%) Securities acquired before 1 July 2016	Tax rates - Non-filers (%) Securities acquired after 1 July 2016
Less than 12 months	15	15	18	20
12 months or more, but less than 24 months	12.5	15	16	20
24 months or more	7.5	15	11	20

Capital gain on future commodity contracts entered into by members of the Pakistan Mercantile Exchange is 5% for both filers and non-filers.

Capital gain, other than on statutory depreciable assets, realised within one year of acquisition is fully taxed; after one year, 75% of such gains are taxed and 25% are exempt.

Capital gains on statutory depreciable assets (other than immovable property) are chargeable to tax as normal business income in the year of sale. They are measured as the difference between the sale proceeds and the tax written-down value of the relevant asset sold.

In the case of an asset disposal transaction that is on a non-arm's-length basis, fair market value of the asset shall be taken to be the consideration received by the seller, as well as the cost for the buyer.

Where assets are transferred outside Pakistan, the original cost is treated as the sale price, which means that the entire depreciation is recaptured at the time of export, except if the assets are used in oil or gas exploration, in which case only the initial depreciation is recaptured.

No gain or loss shall be taken to arise on disposal of an asset by a resident company to another resident company, provided certain conditions are met. The required conditions include, *inter alia*, that the transferor is 100% owned by the transferee or *vice versa* or both companies are 100% owned by a third company, and the transferee income is not exempt in the year of transfer. The scheme of arrangement is approved by the Securities and Exchange Commission of Pakistan or State Bank of Pakistan.

Any distribution to the shareholders of a company, to the extent that it relates to undistributed profits, is treated as a dividend.

Capital loss can be offset only against capital gains. Unabsorbed capital loss (except that arising on disposal of listed securities) can be carried forward for adjustment against capital gains for six years.

Capital gain derived on disposal of assets by non-residents outside Pakistan

Gain on disposal/alienation of any asset derived outside Pakistan by a non-resident person in respect of any asset located in Pakistan now constitutes Pakistan-source income.

With respect to shares of a company, however, the asset shall be treated to be located in Pakistan if:

- the share or interest derives, directly or indirectly, its value principally or wholly from the assets located in Pakistan
- the share or interest representing 10% or more of the share capital of the non-resident company is disposed or alienated, and
- the share or interest, as mentioned above, derives its value principally from an asset located in Pakistan if on the last day of the preceding tax year the value of such asset exceeds PKR 100 million and represents at least 50% of value of total assets.

Where the entire assets of the non-resident company are outside Pakistan, a share or interest in such company will be treated as located in Pakistan to the extent of reasonable attribution.

The above gain is subject to income tax (with no further incidence of tax under any other provisions of law) at the higher of:

- 20% of the amount representing the difference between fair market value and cost of acquisition of the asset, or
- 10% of the fair market value of the asset.

Dividend income

Dividend income is subject to tax/WHT of 15% or a lower tax treaty rate. A rate of 20% is applicable for persons receiving dividend income but not filing income tax returns (non-filers).

The deduction at source shall be the full and final discharge of tax liability on dividend income. However, in case of non-filers filing a return of dividend income, they will be entitled to a refund of 5% of the 20% tax withheld on dividend income (over and above the applicable tax charging rate of 15% on such dividends).

Interest income

Interest earned by a company is taxed as its income from other sources. Interest earned by a non-resident company without a PE in Pakistan attracts WHT at the rate of 10%, except where a lower rate is provided in the related DTT, which is also the final tax on such income.

Income from royalties and fees for technical services/offshore digital services

Royalties received by non-residents are deemed to accrue or arise in Pakistan and are taxable if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.

Income from 'fees for technical services' and 'fees for offshore digital services' are deemed to accrue or arise in Pakistan if paid by a resident in Pakistan or borne by a PE of a non-resident in Pakistan.

'Fees for technical services' means any consideration for the rendering of any managerial, technical, or consultancy services (including the provision of the services of technical or other personnel), but does not include consideration for any construction, assembly, or like project undertaken by the recipient or consideration that would be income of the recipient chargeable under the head salary.

'Fee for offshore digital services' means consideration for rendering or providing services of online advertising and online collection of data processing or any facility for online sale of services.

Other significant items

Liabilities allowed as a tax deduction in a tax year and remaining unpaid for three subsequent years are deemed to be income in the first tax year following the said three years. Such items are then allowed as a deduction in the year the liability is discharged.

Agricultural income is exempt from income tax.

Foreign income

A resident company is taxed on its worldwide income and on its foreign income as earned. Double taxation of foreign income is avoided by means of foreign tax credits; this relief is allowed to the resident company on the doubly taxed income at the lower of the Pakistan or foreign tax rate.

Foreign loss can only be offset against foreign income and can be carried forward for six years.

Modaraba

Modaraba (profit sharing) is a financing vehicle that enables a management company to control and manage the business of a *modaraba* company with a minimum of 10% equity participation. The management company is entitled to remuneration based on an agreed percentage (but not exceeding 10%) of annual profits of the *modaraba* business. A *modaraba* can be for a specific purpose or many purposes and for a limited or unlimited period. The income of a *modaraba* not relating to trading or manufacturing activity is exempt from tax if 90% of its profits are distributed as cash dividend.

Deductions

Depreciation

Normal depreciation is allowed at the following prescribed rates by applying the reducing-balance method.

Assets	Depreciation rate (%)
Buildings	10
Furniture	15
Machinery and equipment, including motor vehicles and ships	15
Computer hardware, including monitors and printers	30
Aircraft and aero engines	30
Below-ground installations in mineral oil concerns	100
Offshore platform	20

All depreciable assets put into service for the first time in Pakistan during a tax year, other than road transport vehicles not plying for hire, furniture (including fixtures), plant and machinery used previously in Pakistan, or plant and machinery for which a deduction has been allowed under another section of this ordinance, for the entire cost of the asset, shall be entitled to an initial allowance at 25% of the cost of the asset.

Initial depreciation rate for buildings is 15%. First year depreciation allowance is available for specified assets.

Book depreciation need not conform to tax depreciation. Unabsorbed tax depreciation not set off against the income of the year is carried forward and added to depreciation of the assets of the same business in the following year. Tax depreciation can be carried forward for adjustment against income of future years for an unlimited period. However, such deprecation is only allowed to be set off to the extent of 50% of taxable profits of a particular (succeeding) tax year in cases where the same is PKR 10 million or more. The remaining amount can, however, still be carried forward/adjusted in future tax years.

Amortisation of intangibles

The cost incurred on acquisition of a patent, invention, design or model, secret formula or process, copyright, software, quota, licence, intellectual property (IP), or other like property or right, and any expenditure that provides an advantage or benefit for a period of more than one year, is allowed as a deduction on a straight-line basis over the useful life of the asset, but not exceeding a period of ten years.

Any payment made against acquisition of goodwill will also be amortised under these provisions.

Unabsorbed tax amortisation not set off against the income of the year is carried forward and added to amortisation of the assets of the same business in the following year. Tax amortisation can be carried forward for adjustment against income of future years for an unlimited period. However, such amortisation is only allowed to be set off to the extent of 50% of taxable profits of a particular (succeeding) tax year, in cases where the same is PKR 10 million or more. The remaining amount can be carried forward/adjusted in future tax years.

Organisational and start-up expenses

Expenditure incurred before the commencement of a business wholly and exclusively to derive income chargeable to tax can be deducted over a period of five years.

Interest expense

Interest expense is allowed as an expense if required WHT is deducted and deposited in the government treasury.

Bad debt

Bad debts are allowed as deductible expenditure if the following conditions are satisfied:

- Debts are included previously in the income chargeable to tax.
- Debts are written off in the financial statements.
- There are reasonable grounds for believing that the debt is irrecoverable.

Charitable contributions

See Charitable donations credit in the Tax credits and incentives section.

Fines and penalties

Fines or penalties that are not paid or payable for the violation of any law, rule, or regulation are allowable as tax deductible expenses.

Taxes

Taxes on income are not deductible. Sales tax and excise tax are tax deductible where these are to be absorbed by the business; otherwise, these are passed on to the consumer.

Other significant items

Expenditure on scientific research incurred in Pakistan wholly and exclusively for the purpose of deriving income chargeable to tax is an allowable expenditure.

Exchange gains and loss on foreign currency loans specifically obtained for acquiring an asset are adjusted against the depreciable cost of the asset.

Any lease rental incurred by a person in the tax year to a scheduled bank, financial institution, approved *modaraba*, or approved leasing company shall be a deductible expense. However, financial charges paid for the above-mentioned leases are added back into the taxable income of the company.

Net operating losses

Operating losses may be carried forward and set off against the profits of the succeeding six years of the same business in which the losses were incurred. Unabsorbed depreciation can be carried forward indefinitely.

Carried forward losses of an entity in the case of group relief cannot be utilised if the ownership of the holding company is reduced to less than 55% and 75% if one of the companies is a listed company or none of the companies is a listed company, respectively.

Business losses can be carried forward up to a period of six years in the case of the amalgamation of two companies, with the condition that the same business is continued for a minimum period of five years.

The carrying back of losses is not permitted.

Payments to foreign affiliates

The deductibility of a head office expenditure of a non-resident taxpayer is limited to the same proportion of total head office expenditure as the Pakistan turnover has with the total world turnover. However, such domestic rules are overridden if the branch is a tax resident of a country having an agreement for avoidance of double taxation (treaty) and that treaty provides a different basis.

Group taxation

A locally incorporated holding company and subsidiary of a 100% owned group may be taxed as one group by giving an irrevocable option for taxation as one fiscal unit. The relief is not available for losses prior to formation of the group. The group is available if the companies are designated as entitled to avail group relief by the Securities and Exchange Commission of Pakistan. Inter-corporate dividends are, however, exempt from levy of tax in case of entities availing group taxation and filing consolidated group returns.

Any company that is the subsidiary of a holding company may surrender its assessed loss for the year to its holding company or its subsidiary (in the proportion of the shareholding held by the holding company in the subsidiary), or between another subsidiary of the holding company, provided that the holding company directly holds 55% or more capital of the subsidiary if one of the companies is a listed company. However, if none of the companies is a listed company, the holding requirement is 75% or more. The loss can be surrendered for a maximum of three years, and the required holding is for at least five years.

Transfer pricing

The tax authorities have the power in respect of a transaction between associates to distribute, apportion, or allocate income, deductions, or tax credits between such associates to reflect the income that would have been realised in an arm's-length transaction. Companies are required to maintain specified records and documents for transactions between associates, and tax authorities can require information and documents for such transactions.

Transfer pricing documentation and country-by-country (CbC) reporting

Transfer pricing documentation requirements have also recently been introduced in law in order to comply with the requirements of various international Conventions/ Agreements executed by the government (*see Base Erosion and Profit Shifting [BEPS] in the Other issues section*), *inter alia*, including the following:

- Every taxpayer, being a constituent entity of a multinational entity (MNE) group having turnover of more than PKR 100 million, is required to keep, maintain, and make available a 'Master File', containing certain prescribed information.
- Every taxpayer entity in Pakistan that has undertaken transactions exceeding the monetary limit of PKR 50 million with related parties is required to keep, maintain, and make available a 'Local File', containing the prescribed information/details.

Every ultimate parent entity or surrogate parent entity in Pakistan that is part of an MNE group resident in Pakistan and whose consolidated group revenue is 750 million euros (EUR) or more during a fiscal year is required to file a CbC report for each country wherein the constituent entities of the MNE group operates.

A constituent entity (including a PE of a company) of an MNE group (not being the ultimate parent or surrogate parent) is also required to furnish a CbC report in case:

- The ultimate parent is not obligated to file such report in its country of residence (other than in cases where its consolidated group revenue is EUR 750 million or below).
- The ultimate parent is required to file a CbC report in its country of residence, but such country does not have any Competent Authority Agreement in place with Pakistan.
- There has been a systemic failure due to which such information cannot be exchanged.

The CbC report should contain the following information for each country wherein the constituent entities of the MNE group operates:

- Revenues from related and unrelated parties.
- Profit/loss before income tax.
- Income tax paid.
- Income tax accrued.
- Stated capital.
- Accumulated earnings.
- Number of employees.
- Tangible assets other than cash.
- Main business activities.

Thin capitalisation

Where a foreign-controlled resident company (other than a financial institution or a banking company) or a branch of a foreign company operating in Pakistan has a foreign-debt-to-foreign-equity ratio in excess of 3:1 at any time during a year, a deduction shall be disallowed for the profit on debt (interest) paid by the company in that year on that part of the debt that exceeds the 3:1 ratio.

Controlled foreign companies (CFCs)

The concept of taxation of incomes of CFCs has been introduced whereby attributable incomes of CFC that are retained and not repatriated to Pakistan have been brought into tax ambit and subjected to tax on the basis of the tax rate applicable to dividends (i.e. 15%).

A company shall be classifiable as a CFC if:

- more than 50% of its capital or voting rights are directly or indirectly held by Pakistani resident persons or if more than 40% of such capital or voting rights is held by a single Pakistani resident person
- tax paid in respect of income derived or accrued in a foreign tax year is less than 60% of tax payable on the said income under this Ordinance
- the non-resident company does not derive active business income (as defined in the provisions), and
- the shares of the company are not traded on any recognised stock exchange in the relevant jurisdiction.

There will be no tax incidence under these provisions in case the voting rights or capital held by the resident person is less than 10% or income of the CFC is less than PKR 10 million. Moreover, no further tax is payable at the time of actual distribution.

Tax credits and incentives

Tax credits are available to corporate taxpayers for employment generation, enlistment on a stock exchange, and making of investments in newly established undertakings, as well as those for extensions, expansion, balancing, modernisation, and replacements carried out in existing undertakings.

Tax exemptions

Profits and gains derived from an electric power generation project set up in Pakistan are exempt from tax.

Profits and gains derived by a company from the export of computer software, IT services, or IT-enabled services are exempt from tax up until 30 June 2025.

Profits and gains derived by refineries, which are setup between 1 July 2018 and 30 June 2023, have been granted exemption from tax for a period of 20 years, upon fulfilment of certain conditions.

Low-cost housing projects have been incentivised by allowing a reduction in tax liability (arising on profits and gains) by 50%, subject to fulfilment of certain conditions.

Profits and gains from new manufacturing units set up in Khyber Pakhtunkhwa and Baluchistan are exempt from tax for five years if set up between 1 July 2015 and 30 June 2018.

Profits and gains from electricity transmission projects are exempt from tax for ten years if set up between 1 July 2015 and 30 June 2018.

Income derived by an enterprise set up in 'special economic zones' is exempt from tax for a period of ten years, starting from commencement of commercial operations/ production, subject to certain conditions. These 'special economic zones' have been established in different territories of the country.

Profits and gains derived by liquefied natural gas terminal operators and terminal owners are exempt from tax for a period of five years beginning from the date of commercial production.

Small companies

Activities of small companies are encouraged with a reduced income tax rate of 25% (*see the Taxes on corporate income section*).

A small company has been defined to mean a company that:

- is registered on or after 1 July 2005 under the Companies Ordinance, 1984
- has a paid-up capital plus undistributed reserves not exceeding PKR 50 million
- has employees not exceeding 250 at any time during the year
- has an annual turnover not exceeding PKR 250 million, and
- is not formed by splitting up or the reconstitution of business already in existence.

Charitable donations credit

Companies are allowed a tax credit equivalent to 20% of their taxable income in respect of donations to:

- any board of education or university in Pakistan, established by or under federal or provincial law
- any educational institution, hospital, or relief fund established or run in Pakistan by federal government, provincial government, or local government, and
- any non-profit organisation.

Companies are also allowed a straight deduction against taxable income (up to 20% of taxable income) in case of donations made to certain approved institutions.

Foreign tax credit

Where a resident taxpayer derives foreign-source income on which foreign income tax is paid within two years from the year in which it is derived, the taxpayer is allowed a tax credit equal to the lower of (i) the foreign income tax paid or (ii) the Pakistan tax payable in respect of that income. However, foreign tax paid is not refundable.

Withholding taxes

WHT on payments of royalty and FTS, when royalty or FTS is not attributable to a PE in Pakistan, is 15% or a lower treaty rate of royalty or gross fees. The tax withheld is deemed to be the final tax liability of the non-resident. In the case of a non-resident where royalty or FTS is attributable to a PE in Pakistan, the amount of royalty/FTS shall be chargeable to tax as normal income, and withholding on payments can be avoided, subject to approval of the commissioner. If a reduced rate is available in a tax treaty, such rate would be applicable.

Resident corporations making certain types of payments must withhold tax as follows:

	WHT (%)		
Recipient (1, 2, 3)	**Dividends**	**Interest**	**Royalties**
Resident individuals	15	10	N/A
Resident corporations	15	10	0

Notes

1. This table is a summary only and does not reproduce all the provisions that may be relevant in determining the application of WHT in each tax treaty.

2. Resident and non-resident imply tax status.
3. Individuals and companies are required to render annual returns of income and pay tax at the applicable rates. Credit is given for WHT deducted.
4. WHT rates for interest and royalties given to non-resident corporations (treaty countries) also apply to non-resident individuals.
5. The following remarks for dividends should be noted:
   - The inter-corporate rate of tax on dividends received by a foreign corporation is 15%; corresponding treaty WHT rates in excess of 15% have been specified.
   - The rates given in the table for treaty countries relate to recipient corporations. The maximum rate, as stated above, in respect of inter-corporate dividends is 15%.
6. Certain treaties provide for tax exemption of interest paid to the government or the central bank of the contracting state and on foreign loans specifically approved by the federal government.
7. No concession is provided under the treaty.
8. Royalties are exempt from tax, provided the recipient does not have a PE in Pakistan.
9. Inter-corporate dividend where companies are entitled to group relief is exempt.
10. WHT rate depends on percentage of holding in the company.
11. This rate applies if the paying company is engaged in the industrial undertaking.
12. Consideration for technical know-how or information concerning industrial, commercial, or scientific experience.
13. This rate applies if the beneficial owner is a bank.
14. This rate applies if the paying company operates in preferred areas.
15. This rate applies if the company is owned by the government.
16. 5% is applicable for royalties payable for copyright of a literary, artistic, or scientific work, but excluding cinematograph films and tapes for television or broadcasting. All other royalties are taxable at 15%.
17. 18% is applicable for royalties payable for patent, trademark, design or model, plan, secret formula, or process of any industrial or scientific equipment, or for information concerning industrial and scientific experience; 15% for copyright of literary, artistic, or scientific work; and 10% for copyright of cinematograph films or tapes for television or radio broadcasting.
18. 10% is applicable for royalties payable for copyright of literary, artistic, and scientific work. All other royalties are taxable at 20%.
19. The rate applies if the beneficial owner is a financial institution, an insurance company, or investment company.
20. 15% applies if the beneficial owner of dividends is a company.
21. 0% applicable in case interest is being earned by the government, a company 51% or more shares of which are held by the government, or the loan is guaranteed by the government or any of its institutions.

Tax administration

Taxable period

The tax year is 1 July through 30 June. However, tax authorities are empowered to approve a special year-end.

Tax returns

All companies are required to file an income tax return each year by 31 December for the preceding financial year (1 July through 30 June) by accounting for business income on an accrual basis. If the special year granted by the tax authorities ends between 1 July and 31 December, then the tax return is required to be filed by 30 September following the year-end.

An across-the-board self-assessment scheme is in place whereby assessment is taken to be finalised upon filing of the return. The Commissioner, however, has powers to amend the assessment if it is believed that the Ordinance has been incorrectly applied or there is definite information that the assessment made is incorrect. These powers are to be exercised within a prescribed time frame. In the case of transactions between associates, the Commissioner can substitute the transaction value with the fair market consideration. The Commissioner is also empowered to determine tax liability according to the substance of the transaction, disregarding formal arrangements between the parties.

Tax authorities can require a non-filer to file income tax return for any of the last ten years.

Payment of tax

Companies are required to pay advance tax on the basis of tax liability of the immediately preceding tax year in respect of their income (excluding capital gains and presumptive income). The advance tax is to be paid after adjusting the taxes withheld at source (other than the tax withheld relating to FTR).

Advance tax is required to be paid in four quarterly instalments on or before 25 September, 25 December, 25 March, and 15 June in each financial year. Credit for tax paid in a tax year shall be allowed against tax liability of that year. However, in case of banking companies, such advance tax is payable on a monthly basis.

The total tax liability is to be discharged at the time of filing the return of income.

Advance taxes and taxes withheld are adjustable against the tax payable with the return of income.

Tax audit process

The Federal Board of Revenue (FBR) is authorised to prescribe criteria for selection of audit of taxpayers who have filed their returns for a tax year. Based on such criteria, cases are selected through computer ballot separately for income tax, sales tax, and federal excise duty (though recently, the concept of a composite tax audit has also been introduced). The returns are examined by tax authorities, and related documents and information are requisitioned. Show cause notices are then raised and, on receipt of explanations from taxpayers, income or loss is assessed. In case of disagreement with assessments, the taxpayer has the right to agitate the issues before appellate forums.

A taxpayer shall not be selected by the FBR and the Commissioner of Inland Revenue for a tax audit where its income tax affairs were already audited in any of the preceding three tax years. The Commissioner may, however, still select a taxpayer for audit with the approval of the FBR.

Statute of limitations

An audit of the tax return filed by a taxpayer can be conducted by the tax authorities within five years of the end of the financial year in which the return is filed.

Advance rulings

A non-resident not operating in Pakistan through a PE can apply to the FBR to issue an advance ruling setting out the Board's position regarding application of the provisions of the Income Tax Ordinance to a transaction proposed or entered into by the taxpayer. The tax ruling, once issued, is binding on tax authorities.

Topics of focus of tax authorities

Tax authorities focus on the following issues:

- WHT.
- Transfer pricing.
- Relationship of expenditure with the business of the taxpayer.
- Advance tax.
- Payment of tax due within the time prescribed.

- Audit of returns filed.
- Compliance by taxpayers.
- Collection of arrears.

Other issues

Special rules

Special rules are applicable for computation of income from exploration and production of petroleum, mineral deposits, insurance, and banking business.

United States (US) Foreign Account Tax Compliance Act (FATCA)

Pakistan is under active negotiation with the United States for executing an agreement for compliance with FATCA; however, banks and other entities affected by FATCA are required to register with the US Internal Revenue Service (IRS).

Base Erosion and Profit Shifting (BEPS)

On 12 September 2016, Pakistan signed the Multilateral Convention on Mutual Administrative Assistance in Tax Matters ('Convention') under the aegis of the Organisation for Economic Co-operation and Development (OECD), as part of prevention of BEPS. BEPS refers to tax planning strategies that exploit gaps and mismatches in national tax laws to shift profits to low or no tax locations. Accordingly, on the recommendations of the BEPS Action Plan, amendments have also been introduced in the relevant fiscal laws in order to fulfil its obligations under the Convention.

Pursuant to the above Convention, the following agreements were signed by Pakistan:

- Automatic Exchange of Tax Related Information (dated 7 June 2017).
- Multilateral Competent Authorities Agreement (dated 21 June 2017).

Keeping in view these Conventions/Agreements, relevant fiscal laws have been amended/enacted to provide for the following:

- Transfer pricing documentation and country-by-country (CbC) reporting (*see Transfer pricing in the Group taxation section for more information*).
- Controlled foreign companies (*see Controlled foreign companies [CFCs] in Group taxation section for more information*).
- Treaty abuse/shopping (*see below*).
- Common Reporting Standard (*see below*).

Treaty abuse/shopping

Tax authorities have been empowered to disregard an entity or a corporate structure not having any economic substance or that entered into such as a part of a 'tax avoidance scheme', such expression being defined to mean a transaction entered into with the primary purposes of tax avoidance or 'reduction in tax liability'. 'Reduction in tax liability', *inter alia*, includes within its scope that achieved as a result of availing benefit under a DTT.

Further, provisions of law granting an overriding status to treatment provided for in DTTs have also been accordingly amended to the effect that any re-characterisation of income/transactions would not be ineffective on account of such provisions.

This amendment signifies that the substance of the transaction will form the basis of taxation and no rescue would be available on the basis of structure designed to avail treaty benefits.

Common Reporting Standard (CRS)

In order to implement the directives contained in the Convention, the FBR was earlier empowered to obtain information from banks/financial institutions regarding non-resident persons for the purposes of automatic exchange of information under bilateral agreements. Now, in exercise of these provisions, the CRS has also been made part of the income tax law, by way of insertion in the relevant Income Tax Rules.

Under the CRS, tax authorities of countries that are signatory to the Convention/ Information Exchange Agreements will share information with the FBR with respect to financial accounts (broadly meaning accounts maintained by banks/financial institutions, including custodial and depository accounts) in their jurisdiction held by Pakistani residents. Pakistan will also provide corresponding information to the foreign tax authorities on accounts held by residents of jurisdiction in Pakistan.

The CRS requires the banks and other financial institutions to provide certain information or to undertake certain due diligence with respect to certain financial accounts. The CRS is aimed to reduce tax evasion by taxpayers using offshore financial accounts held both directly and indirectly through enhanced information sharing and collaboration.

Significant developments

There have been no significant corporate tax developments in Panama during the past year.

Taxes on corporate income

Panamanian income tax is levied based on the territoriality principle. Panamanian-source income is subject to taxation whether it is received by a resident or non-resident entity. Residency is only relevant to determine if the entity is subject to withholding tax (WHT) or not.

Corporations are subject to income tax at a fixed rate of 25%.

The tax base (i.e. amount to which the tax rate will apply) for companies whose taxable income is greater than 1.5 million United States dollars (USD) is the greater of:

- net taxable income calculated on the normal basis or
- 4.67% of the gross taxable income (excluding exempted and non-taxable income and foreign-source income); this is called the alternate calculation of income tax (*Calculo Alternativo del Impuesto sobre la Renta* or CAIR).

If the entity's tax year results in a loss due to the alternative calculation, the taxpayer may request to the tax administration (the General Directorate of Income, i.e. *Dirección General de Ingresos* or DGI) not to be subject to the CAIR.

The taxpayer may also request not to apply the CAIR if its effective income tax rate is higher than the applicable income tax rate (i.e. 25%). Here is an example of such an instance:

Net taxable income		**USD**
a	Total revenues	2,000.00
b	Deductible costs and expenses	1,950.00
c	Net taxable income	50.00

CAIR		**USD**
d	Presumptive net taxable income (4.67% x a)	93.40
e	Income tax (25% x d)	23.35

CAIR effective tax rate		
f	Presumptive income tax (e)	USD 23.35
g	Net taxable income (c)	USD 50.00
h	Effective tax rate (f/g)	46.70%

The DGI has a six-month period to reach a decision on such requests; otherwise, the petition will be considered as granted.

Local municipal tax

Local municipal tax is charged based on the gross income generated by the business through the corresponding accounting period; it also depends on the type of activity being conducted by the corporation. In most cases, it cannot exceed USD 2,000 per month for each activity performed.

An Annual Municipal Tax Return for the District of Panama or District of San Miguelito must be filed before the Municipal Authorities in the first 90 calendar days after the ending of the fiscal year. In case the taxpayer does not file the return before the deadline, a USD 500 penalty will be applicable.

Corporate residence

A company is considered as a tax resident when it has been incorporated in Panama and if Panama is regarded as the place where the central management is located. Entities incorporated abroad may also be registered with the tax administration in order to avoid WHT.

Permanent establishment (PE)

Panama follows the Organisation for Economic Co-operation and Development (OECD) PE rules.

The income referable to a PE or fixed place of business is the income obtained by the PE, as if it was an independent or different entity, taking into consideration the activities developed, assets used, and risks assumed.

Other taxes

Movable goods and services transfer tax (ITBMS)

The movable goods and services transfer tax (*Impuesto de Transferencia de Bienes Muebles y Prestación de Servicios* or ITBMS) is the Panamanian value-added tax (VAT).

The general tax rate is currently 7%.

Alcoholic beverages and hotel accommodation are taxed at 10%, and tobacco and tobacco-derived products are taxed at 15%.

ITBMS is calculated on the value-added through a method of tax credits (i.e. ITBMS paid on transactions to produce taxable transactions) and tax debits (i.e. ITBMS collected on transactions).

Exports are not taxed, and the ITBMS paid to generate the exports may be refunded. The sale of goods such as medicines, foods, and certain products for babies are not taxed and may allow the supplier to recover the ITBMS as an exporter if certain criteria is met.

Medical services and transportation, among other services, are not taxed but do not produce ITBMS credit for the supplier.

The statute of limitations is five years.

Customs duties

All goods introduced into the Panamanian territory from another country are subject to customs duties. The duty rates are provided by the Panamanian Customs and Tariffs Office.

Customs duties may only be assessed by authorised customs brokers.

Excise tax (selective consumption tax)

The selective consumption tax is applied to goods (e.g. jewellery, expensive automobiles, guns, tobacco, alcoholic beverages) and services (e.g. mobile, cable TV, satellite TV) that are considered as non-essential. The tax base is the cost, insurance, and freight (CIF) price plus import duties for imported items and sales price for all other activities. The tax is levied at only one stage: on the importation of the taxed products; on the sale of taxed goods produced in Panama; and, for services, when the service is invoiced, the service is completely rendered, or upon receipt of advance payments, whichever occurs first.

Different tax rates apply depending on the type of service or good, with a minimum of 5% on soft drinks and 100% on tobacco products.

Immovable Property Tax

In Panama, all owners of real estate should pay Immovable Property Tax annually at a rate between 0% and 2.10%, depending on the value of the property.

Starting 1 January 2019, new immovable property tax rates will apply between 0% and 1.0%, according to the value and type of property.

Stamp duty

Stamp duty is charged at a rate of USD 0.10 per USD 100 (or fraction thereof) only on certain commercial contracts.

Capital gains tax

In case of transfer of real estate property, a 2% real estate transfer tax plus a 3% income tax advance payment must be remitted (calculated over the gross transaction amount or the cadastral value, whichever is greater). The 3% may be deemed definitive; contrariwise, the tax will be assessed at 10% of the gain and the 3% of the advance payment will be credited. Any amount in excess may be subject to rebate.

The rates as described in the table below will be applicable to the transfer of real estate if:

- the transferor's core business is the sale of real estate with new constructions

- it is the first transfer of the real estate after the new construction is built, and
- the construction permit was issued after 1 January 2010.

New housing construction	Rate (%)
Up to USD 35,000	0.5
From USD 35,000 up to USD 80,000	1.5
Greater than USD 80,000	2.5
New commercial construction	4.5

When transferring new housing real estate, the real estate transfer tax (2%) does not apply if the transfer occurs within the next two years after an Occupancy Permit is issued.

The transfer of securities is subject to a 5% WHT, and the tax rate on capital gain is 10%. The law establishes the application of a 5% WHT that will be applied by the buyer. The seller may accept the WHT as definitive or perform the calculation of the gain, apply the rate of 10%, and deduct the applied WHT. In case the WHT is superior, the taxpayer can choose to claim the return of payments made in excess.

Example:

Sales price (a)	1,000
Cost (b)	900
Benefit (c)	100
WHT at 5% of (a)	50
Tax at 10% of (c)	10
Payment in excess	40

The sale of fixed assets is subject to 10% on the capital gain, and there is no WHT.

Franchise tax

Franchise tax must be paid by all corporations on an annual basis (USD 300 per year). The deadline for payment depends on the date of incorporation of the company. If the company was incorporated on any date during the first six months of the year, the due date for payment will be on 15 July of each year. If it was incorporated in the last six months, the due date will be 15 January of each year.

Non-profit organisations, cooperatives, and civil partnerships are not subject to franchise tax.

Operations Notice tax

The Operations Notice tax is an annual tax on equity at a rate of 2%, with a minimum tax amount of USD 100 and a maximum tax amount of USD 60,000. In case of free zones or special trade areas, the tax will be calculated at a rate of 1% with a minimum tax amount of USD 100 up to a maximum tax amount of USD 50,000.

The tax base is the outcome from total assets less total liabilities (excluding liabilities with related parties abroad). Special considerations apply under certain double tax treaties (DTTs).

Payroll taxes

In addition to social security tax (*see below*), the following payroll taxes are applicable.

Educational insurance tax

Educational insurance tax is assessed at the rate of 1.25% for employees and 1.50% for employers on salaries and wages paid. There is no maximum limit on the taxable amount.

Professional risk tax

Professional risk tax is an additional tax applicable to employers at 0.33% to 6.25% according to the type of industry.

Social security tax

Social security tax is assessed at a rate of 9.75% on wages and other compensation paid, including compensation in kind, for employees and 12.25% for employers. There is no maximum limit on the taxable amount.

Branch income

For tax purposes, branches are considered separate entities from the head office and must therefore keep accounts separately and will have separate tax liability.

Branches located within the Panamanian territory must pay dividend tax through definitive WHT of 10% of net taxable income generated by the Panamanian branch, less all income taxes paid by the same corporation in Panama. This amount will be paid jointly on filing the corresponding income tax return.

Income determination

Under the territoriality principle, the following will not be considered as taxable income:

- All income produced outside Panama.
- All income generated from operations or services performed outside the Panamanian territory.

Inventory valuation

Inventory should be valued at the start of any business and, subsequently, at least once every accounting period. All assets must be grouped, depending on their nature, with certain characteristics indicated (e.g. the unit of measurement, the name of the asset, the price of the unit, the total value of units). Reference to the accounting records should also be included.

Inventories are generally stated at cost and can be valued using the compound average cost method, first in first out (FIFO) method, retail method, or specific identification method. Since all entities must keep legal records, any adjustment resulting from using different methods of inventory valuation for tax purposes and financial purposes should be recorded and must be reported to the proper authorities. Once a taxpayer adopts a method, they must maintain it for at least five years.

Capital gains

See Capital gains tax in the Other taxes section for a description of how capital gains are taxed in Panama.

Dividend income

Panamanian legislation establishes that distribution of dividends of a Panamanian source are subject to definitive WHT, applied at the moment of distribution. Generally, dividends are subject to income tax at a rate of 10% without taking into consideration the way of payment, types of stock, assets, or money.

For companies with mixed-source income, dividend tax applies at a 5% rate on dividends paid from foreign-source income and from income derived from exports, as well as exempt income from banking account interests and interests and earnings derived from securities issued by the government.

Free zone users are taxed at a 5% rate as well for local-source income.

Loans to shareholders are deemed as dividend distributions, subject to a 10% withholding even in the cases where the 5% tax rate applies.

Notwithstanding the aforementioned, if the entity's shares are issued to bearer, they will be subject to dividend tax at a rate of 20%.

Dividend tax is levied if the entity meets one of the following criteria: (i) requires an operation permit to operate in Panama, (ii) requires an operation key to operate at the Colon Free Zone, (iii) is established in a Fuel Free Zone, (iv) is established in a free zone or special zone, or (v) produces Panamanian-source taxable income. Dividend tax also does not apply to dividends paid on income received as a dividend if the entity is not required to withhold dividend tax or if the entity withheld the tax.

A complementary tax applies each tax year that the entity distributes less than 40% of the net profits after income tax. The complementary tax is an advance payment of the dividend tax, calculated on the difference of the distributed dividends and 40% of the net profits after income tax, and applies the corresponding tax rate. If complementary tax is paid, then the entity may offset the paid complementary tax with the dividend tax when the corresponding dividend is decreed.

Inter-company dividends

The distribution of dividends derived from income received as dividends from other entities is not subject to income tax or dividend tax as long as the entity that paid the dividend in the first instance was exempt from withholding any dividend tax, or, if it was required to, made the corresponding withholding.

Interest income

Interest income is subject to income tax to the extent that it reflects operations carried out in Panama. Foreign beneficiaries are subject to WHT. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

Royalty income

Royalty income is subject to income tax to the extent that it reflects operations carried out in Panama. Foreign beneficiaries are subject to WHT to the extent that the payer has a deduction. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

Foreign income

Panamanian resident companies are taxed on their income generated within the Panamanian territory. Any other income generated abroad will be exempt from income tax payment but may be subject to dividend tax (*see above*).

Deductions

Taxable income is determined by deducting from the Panamanian-source income all costs, expenses, and non-taxable income applicable and permitted by law. The deductibility of costs and expenses depend on the relation of such costs and expenses with the generation or preservation of income source. Special restrictions apply to the following:

- Depreciation.
- Bad debt.
- Charitable contributions.

Costs and expenses related to non-taxable income are not considered as deductible. Thus, the taxpayer must split the expenses and costs related to taxable transactions from those related to non-taxable transactions. The expenses and costs allocated to taxed transactions may not exceed the amount from multiplying the portion of taxable income from the total income by the total costs and expenses.

Example:	**Taxable**	**Non-taxable**	**Total**
Income	100	50	150
	66.7%	33.3%	100%
Costs and expenses	83.38	41.62	125

Depreciation and depletion

The straight-line and sum-of-the-years-digits methods of depreciation are allowed, as well as any other method.

Assets	**Straight-line (%)**
Buildings	3⅓ as maximum
Machinery and equipment	33 as maximum
Furniture and fixtures	33 as maximum
Vehicles	33 as maximum

In the case of mines, depletion will be deductible during the useful life or depending on the state contract methodology.

Goodwill

Goodwill expenses are deductible only when the transferring agent declares them as income.

Start-up expenses

Start-up expenses are deductible through the amortisation process, over a maximum term of five years.

Interest expenses

Interest expenses are deductible only in cases where the interest relates to the generation or conservation of taxable income from a Panamanian source. No thin capitalisation rules are in force.

Bad debt

A taxpayer may deduct bad debts by opting for one of the following options:

- Deducting gains and losses annually to the value of such accounts in the fiscal year.
- Charging an annual profit and loss figure for the establishment of a reserve to meet contingencies of this nature.

Charitable contributions

Donations made in cash or in kind to the government, charitable or educational institutions, activities to promote HIV disease awareness, or political parties are deductible, with certain restrictions and limited to 1% of taxable income.

Fines and penalties

Fines and penalties are not deductible.

Taxes

The national and municipal taxes that affect capital, sales, and other operations related to taxable income producing activity are deductible.

Net operating losses

Losses incurred by common taxpayers may be carried forward and deducted from taxable profits for the following five years, at a rate of 20% each year, but limited to 50% of taxable income. Loss carrybacks are not allowed, and losses are not allowed for estimated income tax purposes.

Payments to foreign affiliates

A payment to a foreign entity (including affiliates) in a foreign country will be subject to WHT anytime it represents a deductible cost or expense for the payer. The tax base will be 50% of the remittance, and the income tax rate applicable is 25%.

Group taxation

In Panama, there are no group taxation rules.

Transfer pricing

Transfer pricing obligation is extended to all the transactions carried out with foreign-related parties, in case these operations have effect in determining the tax base. There is an obligation to file an annual Transfer Pricing Informative Statement (‘Form 930’), which includes all the operations carried out with foreign-related parties during the fiscal year under analysis. This report should be filed six months after the fiscal year has ended. Failure to submit or late submission of this Form will be penalised with a fine equivalent to 1% of the total sum of operations carried out with foreign-related parties and will never exceed USD 1 million.

Law established the formal requirement for the preparation of a Transfer Pricing Study. However, the taxpayer should only present the Study in case the Panamanian Tax Authority requires it, within 45 working days, starting a day after the notification. Tax Authorities are allowed to fine those taxpayers that fail to present the Transfer Pricing Informative Statement or any required documents before the deadline; fines ranging from 1,000 Panama balboas (PAB) to PAB 5,000 will be applied the first time, from PAB 5,000 to PAB 10,000 in case of recurrence, and the closure of the establishment for 2 to 15 days in case of non-compliance.

Thin capitalisation

There are currently no thin capitalisation rules in Panama.

Controlled foreign companies (CFCs)

There are no provisions regarding CFCs in Panama.

Tax credits and incentives

Foreign tax credit

Foreign tax credits are applicable only with countries with which Panama has signed a DTT (*see the Withholding taxes section for a list of countries with which Panama has signed a DTT*).

Free zones

Entities established in free zones may enjoy exemption from import duties on goods, income tax, sales tax, export tax, and selective consumption tax derived from royalties on exportation and re-exportation activities. Aside from trading activities, the following businesses may also apply for the regime: higher education centres, scientific research centres, specialised centres for health services, high technology businesses, assembling businesses, semi processed or finished products processing businesses, services businesses, environmental service businesses, general services, logistics services businesses, and manufacturing businesses.

Tourism, industry, and agriculture allowances

The Incentive Law for Tourism Development grants several tax benefits (e.g. exemption from import duties on certain tourism services and related goods for companies dedicated to tourism), but only for those corporations with a signed tourism agreement with the government. Income tax exemptions may apply in special cases.

In general, income from individuals or corporations that engage in agricultural production activities will be exempted from income tax if annual gross income is lower than USD 250,000.

Forestry plantations were totally exempted from income tax payment until 2018 if the lot planted had been duly registered at the Forestry Registry of the Environmental National Authority and resolution with approval from this authority had been issued.

Special laws

The Panamanian government has enacted special laws regarding tax exemptions for certain activities performed in Panama, such as call centres (Law No. 54 of 2001), and tax exemptions for certain appointed areas, such as the Panama Pacific Economic Zone (Law No. 41 of 2004) and Law No. 41 of 2007, which creates a special regime for the establishment and operation of regional headquarters in Panama (SEM Regime).

By means of Law No. 8 of 2010, Real Estate Investment Societies may deduct the profits distributed to their shareholders, provided that these Real Estate Investment Societies:

- raise long-term funds in a securities market
- are registered in the National Securities Commission
- distribute no less than 90% of their free cash flow
- register in the General Direction of Revenues, and
- withhold 20% of the profits distributed as an income tax advance payment on behalf of the shareholder, which may be deemed the definitive tax to be paid by the shareholder.

Withholding taxes

Royalties and commissions on services paid to foreign entities are taxed through the application of the corresponding tax rate (i.e. 25%) over 50% of remittance under the concept of WHT (effective tax rate is 12.5%). The taxpayer may decide not to withhold taxes and consequently not deduct the expense.

Payment of interest is also subject to income tax on 50% of the interest paid to a beneficiary abroad on loans invested in Panama, but the payer must proceed with the WHT even if one does not deduct the interest.

If the beneficiary is registered as a taxpayer in Panama before the tax administration, no WHT may be required.

If, according to a special law, the payment of interest, royalties, dividends, fees, etc. is exempt from WHT, said exemption will not apply if the beneficial owner of the payment can credit the taxes that would have been paid in Panama in its country of residence. In the event that the credit application is not allowed in the country of residence, the taxpayer must request a formal opinion from an independent expert stating the non-applicability of the tax credit in the country of residence.

Recipient	Dividends (%)	Interest (%)	Royalties (%)
Foreign corporations	5/10/20*	12.5	12.5

** See the description of Dividend income in the Income determination section.*

In case of treaties, special rules are applicable in order to avoid double taxation.

	WHT (%)			
Recipient	Dividends	Interest	Royalties	Fees
Barbados	5/7.5 (1)	0/5/7.5 (2)	7.5	0/7.5 (3)
Czech Republic	10	0/5/10 (18)	10	0
France	5/15 (6)	0/5 (4)	5	N/A

United Arab Emirates	5	0/5 (4)	5	0/12.5 (17)
United Kingdom	0/15 (15)	0/5 (16)	5	N/A
Vietnam	5/7/12.5 (22)	10	10	7.5

Notes

1. Depending on the percentage of ownership held by the beneficial owner (at least 25% to apply the 5% rate).
2. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 7.5% rate will apply.
3. If the services are not rendered in any of the states, the income will only be taxed in the state where such income arose.
4. If paid to government financial institutions, the 0% rate will apply.
5. 3% for the use or right to use industrial, commercial, or scientific equipment.
6. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 5% rate).
7. Depending on the person or entity receiving the payment. If the beneficial owner is a bank, the 5% rate will apply; if the beneficial owner is the Central Bank of either state, the 0% rate will apply; in all other cases, the 10% rate will apply.
8. The 12.5% rate applies if the person rendering the services is in the other state for more than 60 days.
9. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange. Also, no WHT is levied if the foreign company is a bank or insurance company, a state or political subdivision, a headquarter owning at least 10% of the shares of the Dutch company, or a pension fund.
10. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 10% rate).
11. If the services are rendered in Panama, then the 10% rate will apply.
12. Depending on the percentage of ownership held by the beneficial owner (at least 10% to apply the 4% rate).
13. 5% WHT rate is levied if the recipient (excluding partnerships) is a shareholder with at least a 40% direct interest in the paying company; otherwise, a 10% rate is levied. No WHT is levied if the recipient is a shareholder with at least an 80% direct interest in the paying company, and (i) its shares are listed on a stock exchange, (ii) the recipient is at least 50% owned by residents from either of the two countries, (iii) the recipient is owned by shareholders resident for tax purposes in third countries by a proportion of less than 25%, and (iv) the recipient is owned (an interest of more than 25%) by residents in third countries, provided that a tax treaty for the avoidance of double taxation has been signed with the country of the company paying the dividends and that this tax treaty establishes the same or more favourable conditions. No WHT is levied for dividends paid to pension funds.
14. If the services are rendered in Panama, then the 7.5% rate will be applicable.
15. No WHT is levied if the foreign company (beneficial owner) receiving the dividends directly holds at least 15% of the shares of the company paying the dividends, provided that the shares of the foreign company are regularly traded on a recognised stock exchange or at least 50% of the shares of the foreign company is owned by residents of either contracting state or by companies the shares of which are regularly traded on a recognised stock exchange.
16. 5% but only if: (I) the interest is beneficially owned by: (i) an individual, (ii) a company with shares regularly traded on a recognised stock exchange, (iii) a financial institution or (II) the interest is paid by:

(i) a state, political subdivision, or local authority, (ii) a bank, or (iii) on a quoted eurobond. The 0% rate will apply if it is paid to the Central Bank of either state.
17. If the person is more than 90 days in Panama, then the 12.5% rate will apply.
18. 0% applies for sales on credit and payments to the Central Bank; 5% for payments to banks in general; and 10% for all other cases.
19. 5% if the beneficial owner is resident of a contracting state or the beneficial owner is a pension scheme.
20. 5% if the beneficial owner has contributed at least 25% of the stock capital; 10% for all other cases.
21. If paid to financial institutions, the 5% rate will apply.
22. 5% if the beneficial owner has contributed more than 50% of the capital stock; 7% if the beneficial owner has contributed between 25% and 50% of the capital stock; 12.5% for all other cases.

Tax administration

Taxable period

The accounting period is the period for which the company makes its accounts. Returns shall be made upon completion of the accounting period and may not exceed 12 months. For most companies, it is usually from 1 January to 31 December.

Tax returns

The due date for filing is three months after the end of the fiscal year, with the possibility for an extension of up to one additional month.

Payment of tax

Income tax payment shall be made depending on the income tax return and shall be made no longer than three months after closing of the corresponding accounting period.

Taxpayers must pay estimated taxes (usually the same amount as generated income) at the end of the sixth, ninth, and 12th month after the end of the corresponding accounting period.

Tax audit process

Tax authorities select the taxpayers subject to audit based on internal criterion.

Statute of limitations

The tax administration may audit the income tax returns filed within the last three years from the last day of the year on which the tax return was filed.

With regard to VAT, the tax administration has the authority to charge this tax within five years from the last day of the following month in which the tax was due to be paid.

Topics of focus for tax authorities

Among the topics of focus are non-deductible expenses, withholdings, and VAT.

Other issues

US Foreign Account Tax Compliance Act (FATCA) and the Common Reporting Standard (CRS)

Panama signed the Model 1 Intergovernmental Agreement (IGA) for FATCA purposes with the US Treasury in order for Panamanian Banks to subscribe to the terms of FATCA. For this purpose, Law 51 of 2016 and Executive Decree 124 of 2017 were created to complement the IGA and establish the procedures and deadlines for the financial institutions required to perform the due diligence and send the reports to the Tax Authority.

In 2016, Panama committed to automatically exchange information starting in 2018, according to the CRS. Same as the IGA-FATCA, the CRS also includes the automatic information exchange of financial information for tax purposes, based on the agreements signed by the Tax Authority (DGI) and the CAAs.

Significant developments

The 2018 National Budget was handed down in November 2017 and introduced a number of tax changes, including:

- removal of training levy and double deduction for staff training costs
- implementation of a pay now and litigate later policy
- the introduction of transitional provisions for exiting projects in respect of additional profits tax (rent tax), which, following an amended last year, is applicable to all resource projects in Papua New Guinea (PNG)
- making registering taxpayer identification numbers a legal requirement for operating a business
- removing the right to claim certain goods and services tax (GST) input tax credits for educational institutions
- simplifying the administration of non-resident insurer's tax, and
- making shareholders liable for tax liabilities of companies.

In some cases, the changes in the 2017 National Budget produced seemingly unintended consequences, and corrections of these unintended consequences were included in the 2018 Budget.

A comprehensive review of the tax system in Papua New Guinea was completed at the end of 2015, and Treasury continues to assess the recommendations from the review. It is expected that further reform of the tax system will be undertaken in the next few years.

Taxes on corporate income

PNG resident companies are liable for income tax on their worldwide income. Companies that are not resident in Papua New Guinea are only required to remit tax on income sourced in Papua New Guinea. A non-resident's PNG-sourced passive income, including dividends, interest, and royalties, may be subject to withholding tax (WHT). It is ordinarily the case that the payer of the dividend, interest, or royalty must withhold the relevant amount of the tax and remit this to PNG's Internal Revenue Commission (IRC).

Papua New Guinea levies corporate income tax (CIT) on companies on a flat rate basis.

Generally, trading profits and other income (except income that is specifically exempt) of resident companies in Papua New Guinea are assessed tax at a rate of 30%, whereas non-resident companies operating in Papua New Guinea are assessed tax at a rate of 48%.

Overseas shippers

Income derived by overseas shippers or charterers carrying passengers, livestock, mail, or goods out of Papua New Guinea is taxable in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 5% of the gross income, which is taxable at the non-resident rate of 48% in the case of companies. The IRC may exempt the overseas shipper from tax if the shipper's home country exempts PNG shippers from a similar tax.

Local income taxes

There are no provincial or local income taxes in Papua New Guinea.

Corporate residence

A company will be deemed a resident for CIT purposes if it meets either the (i) incorporation test or (ii) the management and control test.

Incorporation test

A company incorporated in Papua New Guinea is automatically regarded as a PNG tax resident. However, the operation of the law of another country and a relevant double taxation treaty (DTT) may result in a company also being treated as resident in another country.

Management and control test

A company is a PNG tax resident if it is managed and controlled in Papua New Guinea, regardless of where it is incorporated. Generally, a company is managed and controlled in Papua New Guinea if key decisions affecting the company are made at directors' meetings held in Papua New Guinea. This also includes a company incorporated outside Papua New Guinea that trades in Papua New Guinea and has its voting power controlled by resident shareholders.

Dual residence

An entity may be a tax resident of both Papua New Guinea and another country by application of domestic legislation. A DTT entered into between Papua New Guinea and another country may contain a tiebreaker test to determine the country of residence for the purposes of the DTT.

Permanent establishment (PE)

The concept of 'permanent establishment' has limited significance in the domestic taxation law of Papua New Guinea and is defined to mean a place at or through which a person carries on any business. Under domestic taxation law, Papua New Guinea will seek to tax the PNG-sourced income of a non-resident irrespective of whether or not that income is derived at or through a PE in Papua New Guinea.

Where PNG has entered into a DTT, the concept of PE becomes more important as it will then be one of the factors determining Papua New Guinea's taxing rights over income sourced in Papua New Guinea, particularly with respect to the business profits of a non-resident company. In general terms, Papua New Guinea's DTTs:

- define a PE to be a fixed place at or through which the business of an enterprise is wholly or partly carried on, and
- deem a PE to exist in various circumstances, including those relating to the presence of substantial equipment in the contracting state and the time spent by personnel of an enterprise furnishing services in a contracting state.

Other taxes

Goods and services tax (GST)

The GST rate is 10% and applies to most goods and services supplied in Papua New Guinea. Exported goods and services attract a zero rate of GST. Goods and services, other than motor cars, supplied to mining, petroleum, or gas companies are also zero-rated. Some goods and services are exempt, including medical, educational, and financial services. Land is excluded from GST, but buildings and other improvements are subject to the tax.

An import GST deferral scheme is also available. Taxpayers wishing to participate in the import deferral scheme are required to apply for approval by the IRC and must have a good history of tax compliance in order to qualify.

Directors of companies that fail to comply with GST obligations are personally liable for a penalty equal to the outstanding tax liability that the company ought to have remitted to the IRC.

Customs duties

The majority of manufacturing inputs (including plant and machinery) attract no customs duties, and other customs duty rates are being progressively reduced. The remaining rates for customs duties vary depending on the nature of the good being imported and are assessed on the total value of the goods imported, including cost, insurance, and freight (CIF). Customs bonds may be issued for the temporary importation of goods that are to be re-exported within 12 months.

Excise taxes

Although customs duties are now minimal in many cases, some goods, most notably motor vehicles, now attract excise tax. Private motor vehicles generally attract excise tax at the rate of 60%, whereas work vehicles attract excise tax of 10%. Excise taxes can also apply to some domestically produced goods, including refined fuel products, alcohol, and tobacco. The tobacco excise tax is levied at 5% biannually (10% annually).

Land tax

Land tax is imposed annually by provincial governments on the unimproved value of the land, and the power to levy land tax is vested exclusively with the provincial governments. In Papua New Guinea, land tax is difficult to implement and faces major geographical and social problems.

Stamp duties

Stamp duty applies at varying rates on documents and certain transactions. Of particular note is duty charged on the conveyance of property, which rises to a maximum of 5% where the value of the property being transferred exceeds 100,000 PNG kina (PGK). The duty is payable by the purchaser, and a 5% duty on the unencumbered value of land may also be payable where there is a transfer of shares in certain landholding companies.

Other dutiable transactions include share transfers (including some share buy-backs), which are subject to a rate of 1%. The Collector of Stamp Duties has the power to amend assessments and refund overpayments of stamp duty.

The Stamp Duties Act was amended to implement a rental income compliance system. The amendment effectively makes it compulsory for a landlord to provide their Taxation Identification Number (TIN) on lease documents, as lease documents will not otherwise be stamped.

Stamp duty is payable on documents executed outside Papua New Guinea that relate to property or matters done or to be done in Papua New Guinea.

Export duties

Timber

Export duty on timber logs (not sawn timber or plantation logs) is calculated with reference to the freight on board (FOB) value per cubic metre of exported logs and rates that increase as the value of the exported logs increase.

Spices

Levies are imposed from time to time on the export of specified spices (e.g. vanilla).

Payroll taxes

Salary or wages tax (SWT)

Businesses paying salary or wages to employees are required to withhold SWT (calculated at the prescribed marginal rates) and remit to the IRC on the seventh day of the month following the month of payment.

Salary or wages is defined as remuneration paid to employees in cash or kind, including benefits such as accommodation and transportation.

Normal employment-related receipts and benefits also include any remuneration paid as consultancy fees or fees for professional services, where the remuneration is paid wholly or substantially for personal services performed in Papua New Guinea.

Directors are personally liable for any unpaid SWT obligations of their companies. Directors who fail to ensure their company complies with its SWT reporting obligations may be penalised at a rate of 20% of the unpaid tax liability *per annum*. After three months of non-payment of outstanding SWT, directors will not be able to obtain a remission of penalties imposed.

Contributions to employee superannuation funds

Contributions to employee superannuation funds are compulsory for entities with 15 or more permanent employees. The employer's compulsory contribution is 8.4% of each employee's gross basic salary. The employee's minimum contribution is 6.0%.

Membership is generally compulsory for citizens. Non-citizens are currently exempt; however, this is under continuing review.

Contributions must be paid to an authorised superannuation fund. Contributions paid to an authorised fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible.

Training levy

The training levy is abolished effective from 1 January 2018.

Previously, all businesses whose annual payroll exceeded PGK 200,000 were subject to a 2% training levy, calculated on the sum of the taxable salaries, including benefits, of all personnel. Qualifying expenses incurred in training PNG citizen employees were creditable up to the actual amount of the levy. The training levy, if payable, was not tax-deductible.

Departure tax

A departure tax is collected by airlines issuing tickets for persons departing Papua New Guinea.

Gaming machine tax

Papua New Guinea imposes a 74% tax on gross revenue from gaming machines.

Resource project production levies

Production royalties of 2% are payable to the national government on the net smelter return from mining operations. These royalties are tax-deductible. A royalty, at the rate of 2% of the wellhead value, is also payable from the production of petroleum and gas operations. Holders of new petroleum development licences are entitled to treat royalties as income tax paid. However, new petroleum projects will also pay a tax-deductible development levy calculated at the same rate of 2% of the wellhead value.

Mining projects are also required to pay a production levy to the Mineral Resources Authority calculated at a rate between 0.25% and 0.5% of the assessable income from production.

Branch income

Income derived by a non-resident contractor for services in Papua New Guinea is usually subject to a WHT at the rate of 15% of gross income. The provisions extend to payments for the following:

- The installation, maintenance, and use in Papua New Guinea of substantial equipment or machinery.
- Construction projects.
- For the lease or charter of any industrial, commercial, or scientific equipment or any machinery or vehicle.
- Consultancy or management services.

Where the non-resident contractor rules do not apply, the non-resident company will be subject to income tax at the non-resident tax rate of 48% on its PNG-sourced taxable income (*see the Income determination section for a definition of taxable income*).

PNG branch remittances are not liable for dividend WHT or any branch profits or similar tax.

Income determination

Taxable income is defined as the sum of assessable income minus allowable deductions. In practice, profits are calculated for tax purposes by reference to the profits reported in the financial accounts. Accounts must be prepared in accordance with PNG accounting principles, which follow the International Financial Reporting Standards (IFRS).

Inventory valuation

There is no form of stock relief or trading stock valuation adjustment to recognise the effects of inflation in Papua New Guinea. There is a once-only option to adopt the lowest of the cost amount, the market selling value, or the replacement value (which, in practice, may mean that book and tax valuations for trading stock are not aligned). Where the option is not exercised, the value of the stock is deemed to be the cost price; however, neither the income tax law nor the associated regulations provide detailed guidance on what constitutes 'cost price' (the Commissioner General of Internal Revenue has not produced any related guidance to date). It will generally be the case that where a taxpayer has determined a cost price in accordance with IFRS, that cost price will also be accepted for income tax purposes.

In special circumstances, the Commissioner General of Internal Revenue may accept a lower valuation.

Capital gains

There is no general capital gains tax in Papua New Guinea. However, profits arising on the sale of property acquired for the purpose of resale at a profit, or from the carrying out of a profit-making scheme, are taxable as ordinary income.

Dividend income

Unless otherwise exempt from CIT, dividends are included in the assessable income of a shareholder.

Inter-company dividends

Dividends received by a resident company from other companies, whether resident or non-resident, while being assessable to tax, are generally subject to a full tax rebate and are effectively received tax-free. However, where a company has losses on other activities or losses carried over from earlier years, those losses are applied against dividend income before the calculation of the dividend rebate.

Stock dividends

In most cases, the payment of a dividend by way of the issue of shares is subject to the same taxation treatment as the payment of a dividend by way of cash or the distribution of other property. However, dividends paid by the issue of shares wholly and exclusively out of profits arising from the sale or revaluation of assets not acquired for the purpose of resale at a profit are exempt from income tax and dividends WHT.

Interest income

Unless exempt under specific provisions, interest paid or credited by a financial institution, the Central Bank, or a company to a person resident in Papua New Guinea is includable in income, and the person making the payment of or crediting interest in the account is liable to withhold and pay tax upon the amount.

Royalty income

Tax is imposed on royalties and similar payments made to non-residents who do not have a PE in Papua New Guinea. The tax must be withheld by the payer on behalf of the payee and remitted to the IRC. The tax payable on royalties paid to a party who is not an 'associated person' is the lesser of:

- 48% of the net royalty (i.e. gross royalty, less applicable expenses), and
- 10% of the gross royalty.

Royalty payments to a non-resident 'associated person' are liable for a WHT of 30% of gross payments (subject to any DTT), with no option to adopt the net income basis.

The definition of 'associated person' is detailed and widely drawn. Broadly, it encompasses relatives, partners, companies under effective common control, and related trust interests.

There is also a 5% WHT on mining, petroleum, timber, and fishing royalties to landowners.

Partnership income

A partner's share of the assessable income of the partnership less all allowable deductions to the partnership is includable in the partner's assessable income for the year of income. Likewise, the partner's individual interest in a partnership loss incurred in the year of income is an allowable deduction. Further, if income is exempt income to the partnership, this income will be exempt income to the individual partner relative to their individual interest.

Unrealised exchange gains/losses

Generally, foreign exchange gains realised and derived from debts made on or after 11 November 1986 or denominated in a currency other than the Papua New Guinea kina are included in assessable income.

Foreign income

PNG resident companies are liable for CIT on their income from all sources (i.e. including foreign-sourced income). A foreign tax credit may be available to offset foreign tax paid against PNG tax payable (*see the Tax credits and incentives section for more information*).

There are no provisions in Papua New Guinea that permit the deferral of the taxation of income derived outside Papua New Guinea. Subject to the operation of a DTT, foreign-sourced income derived by a resident of Papua New Guinea is subject to tax in Papua New Guinea in the year in which it is derived, irrespective of whether or not that income is repatriated to Papua New Guinea.

Deductions

General deduction provisions provide that all losses and expenditures, to the extent incurred in gaining or producing the assessable income or necessarily incurred in carrying on a business for the purpose of gaining or producing that income, are allowable deductions. However, the general deduction provisions do not allow a deduction to the extent a loss or expenditure is an outgoing of capital, or of a capital, private, or domestic nature, or incurred in relation to the gaining or production of exempt income.

Depreciation

Depreciation is allowed for equipment and other assets at prescribed rates. A taxpayer must use the diminishing-value method unless an election is made to use the prime-cost method. The applicable diminishing-value rates are 150% of the prime-cost rates.

Plant, machinery, and equipment

Plant, machinery, and equipment (including buildings) are depreciable at rates according to their estimated lives. A taxpayer other than a taxpayer who derives income from mining, petroleum, or gas operations may elect to claim special accelerated depreciation rates for certain capital items. For example, flexible depreciation rates (up to 100%) may be claimed on new industrial plant with a life exceeding five years that is used for manufacturing purposes. Other new plant and articles used in manufacturing, construction, transport, storage, communication, and agricultural production are eligible for an accelerated deduction equal to 20% of cost in the year of purchase. New plant and articles used for tourism are eligible for an accelerated deduction equal to 55% of cost in the year of purchase.

Motor vehicles

Motor vehicles are generally depreciable at 20% of prime cost. There is no upper limit in value for depreciation purposes.

Buildings

Buildings forming an integral part of plant, machinery, and equipment are depreciable at a prime-cost rate of up to 7.5%, depending on the construction materials. Buildings housing plants eligible for the one-year write-off deduction (*see comments on new industrial plant under Plant, machinery, and equipment above*) can be written off in the year of construction. Other income-producing buildings may qualify for the accelerated deduction of 20% in the year of purchase.

Agricultural and fishing plants

Most items of new agricultural and commercial fishing plants qualify for 100% depreciation, as do boats and ships, including ancillary equipment, used solely as dive boats or for scuba diving by accredited tour operators. Other new items having a life exceeding five years used by a person carrying on agricultural operations are eligible for accelerated depreciation in the initial year of use.

Goodwill

A deduction is not available for goodwill or the amortisation of goodwill in Papua New Guinea (this being an amount not deductible under ordinary concepts and an item for which there is no specific deduction provision).

Start-up expenses

It will generally be the case that start-up expenses will not be deductible in Papua New Guinea. Such expenses are generally either capital, or of a capital nature, or incurred prior to the derivation of assessable income. There is no specific deduction provision for the deductibility of start-up expenses.

Interest expenses

A deduction is generally available for interest incurred on an arm's-length basis, subject to meeting the general principles for deductibility and the requirements under the thin capitalisation rules (*see Thin capitalisation in the Group taxation section*). Where interest is incurred in connection with the construction or acquisition of a plant or capital asset, that interest is not immediately deductible. Rather, such interest is deemed to form part of the cost of that asset (and in the case of a plant will then form part of the base from which future depreciation deductions may be claimed).

Bad debt

Bad debts are deductible if they have previously been included in assessable income and written off by year-end or if the bad debt was in respect of money lent in the ordinary course of the taxpayer's business of money lending.

Double deductions

An additional amount equal to the actual amount of expenditure incurred is deductible in respect of certain expenditures (e.g. export market development costs, certain donations). In other words, a 'double deduction' is available with respect to these items.

Donations

It is considered that donations made by a corporate taxpayer meet the general principles for deductibility and hence will generally be deductible (notwithstanding the specific provision dealing with gifts to charitable bodies has no current effect as there are no charitable bodies approved by the Commissioner General of Internal Revenue for this purpose). There are specific provisions in Papua New Guinea's taxation law dealing with the deductibility of certain donations, some of which provide a deduction for up to 200% of the value of the amount donated.

Pension expenses

Contributions paid to an authorised superannuation fund are tax-deductible to the extent that they do not exceed 15% of the relevant employee's gross taxable salary. Contributions to non-resident funds are not tax-deductible. *See the Other taxes section for more information*.

Taxes

A deduction is not allowable in respect of payments of income tax. Other taxes may be deductible, subject to meeting the general principles for deductibility.

Net operating losses

Domestic

Trading losses may be offset against all income received in the same accounting period or carried forward and offset against future trading profits. The limitation period on the carryforward of losses is generally 20 years. Losses may not be carried back against prior years' profits. Primary production losses and resource project losses may be carried forward without a time limitation, although, again, they may not be carried back (*see the Tax credits and incentives section for more information*).

Note that the carryforward of losses is subject to a 50% or more continuity of shareholding and control test, or a continuity of business test where there is a breach of the ownership test.

Foreign

Losses incurred by a resident taxpayer from a source outside Papua New Guinea (other than in relation to export market development) are not deductible against assessable income derived within Papua New Guinea. In practice, overseas losses can be carried forward and offset against overseas income for up to 20 years.

Payments to foreign affiliates

The deduction available to a taxpayer for management fees paid to an associated person is limited to the greater of:

- 2% of assessable income derived from PNG sources by the taxpayer or
- 2% of the total allowable deductions, excluding management fees incurred by the taxpayer in Papua New Guinea.

The limitation applies to both resident and non-resident taxpayers. Special rules apply to mining, petroleum, and gas companies. These limits may not apply where the recipient of the management fee is resident in a country with which Papua New Guinea has a DTT or where it can be demonstrated that the management fee arrangements do not have the purposes or effect of avoiding or altering the income tax payable in Papua New Guinea.

Group taxation

Companies are assessed for CIT separately, regardless of whether they are part of a group of associated or related companies. Losses of one company within a group cannot be offset for tax purposes against the profits of another company within that group.

The Companies Act allows two or more companies to amalgamate and continue as one, and provisions are in place to allow this to occur without any adverse CIT consequences.

Transfer pricing

Papua New Guinea has transfer pricing provisions that require transactions with foreign affiliates to be conducted on an arm's-length basis. Disclosure of such transactions is done through an international dealings schedule (IDS). Corporate taxpayers (including companies, superannuation funds, and unit trusts) that have transactions or dealings with international affiliates that exceed PGK 100,000 in an income year or have aggregate loan balances with international affiliates in excess of PGK 2 million at any time during an income year are required to prepare and lodge an IDS with their income tax return for that year of income.

Thin capitalisation

Thin capitalisation rules apply to prevent taxpayers from incurring excessive levels of debt. By excessively gearing their investments, companies are able to claim greater tax deductions through the interest expense charged on such debt. Thin capitalisation rules typically feature a debt-to-equity ratio that governs the ratio by which companies can borrow from related parties relative to their equity. Any interest charged on debt that exceeds this ratio will not be deductible for CIT purposes.

Papua New Guinea's thin capitalisation rules apply a debt-to-equity ratio of 3:1 to PNG resource companies and 2:1 to all other PNG companies.

These rules do not apply to licensed financial institutions and do not apply to interest paid under domestic debt for non-resource companies. If the ratio is breached, a proportion of the interest on foreign debt will be denied as a tax deduction. For resource companies, a proportion of interest on all debt will be denied.

Controlled foreign companies (CFCs)

Papua New Guinea does not have CFC rules.

Tax credits and incentives

In this section, we comment on the more significant tax credits and incentives available in Papua New Guinea, followed by a summary of those with more limited application.

Foreign tax credit

A foreign tax credit may be available to offset foreign tax paid against PNG tax payable. The foreign tax credit is limited to either the foreign tax paid or the average PNG tax payable on that foreign income, whichever is less. There is no mechanism to carry forward excess foreign tax credits for utilisation in a subsequent year.

Primary production incentives

Key incentives that are available with specific application to primary production activities include:

- Outright deductions for certain capital expenditures, including clearing, preparing, or conserving land for agriculture; eradicating pests; providing labourers' accommodation; and for the conservation and conveyance of water.
- A 100% deduction is available for a new plant used directly for the purposes of agricultural production, and an initial 20% accelerated depreciation deduction is allowed for a new plant with a life exceeding five years.
- Losses incurred in carrying on a primary production business can be carried forward indefinitely; they are not restricted to the 20-year limit that generally applies to company tax losses.
- Agricultural companies may transfer to their shareholders the benefit of the outright tax deduction available for many types of capital expenditures. The total deduction available to shareholders may not exceed the amounts paid on their shares.
- As part of promoting investment in primary production, a 20% tax rate is prescribed in respect of 'incentive rate primary production income' derived by a company (as opposed to the normal 30% tax rate for a resident company or 48% for a non-resident company) for up to ten years.

Agricultural production extension services deduction

A 150% deduction is available for expenditure on services provided free of charge to smallholder growers, including the provision of advice, training, and technical assistance in relation to primary production to assist growers with production, processing, packaging, and marketing issues.

Double deduction for export market development costs

Expenditure incurred in the promotion for sale outside Papua New Guinea of goods manufactured in Papua New Guinea or tourism promotion is eligible for double deduction. The total tax saving cannot exceed 75% of the expenditure incurred.

Export incentives

Prior to 1 January 2015, the net export income from the export sale of certain types of goods was exempt for the first four years of income, with a partial exemption in the following three years. This exemption is not applicable from 1 January 2015 (except in respect of goods that qualified for the exemption prior to that date).

Tax credit for infrastructure development by agricultural, mining, petroleum, and gas companies

A tax credit is available to agricultural, mining, petroleum, gas, and certain tourism companies that incur expenditure on a prescribed infrastructure development. In the case of taxpayers engaged in mining, petroleum, and gas operations, the credit is limited to 0.75% of the assessable income or the amount of tax payable for the year (in respect of that mining, petroleum, or gas project), whichever is less. Excess expenditure over the 0.75% or tax payable may be included in the following year's rebate claim.

Unutilised credits or excess expenditure can generally only be carried forward for two years. In the case of taxpayers engaged in agricultural production, the credit is limited to 1.5% of the assessable income or the amount of tax payable for the year, whichever is less.

A prescribed infrastructure development includes a school, aid post, hospital road, and other capital assets that have been approved as such by the Department of National Planning and the IRC. It cannot be an expenditure required under the Mining Act or the Oil and Gas Act.

Other tax incentives in Papua New Guinea

Other tax incentives available in Papua New Guinea include:

- Manufacturers' wage subsidy.
- Immediate deduction for the costs of acquiring and installing solar heating plant.
- A ten-year tax exemption for qualifying new business located in prescribed remote areas of Papua New Guinea.
- A specific deduction for environmental protection and clean-up costs.

Incentives for petroleum, mining, and gas operations

Special incentives and rules apply to mining, petroleum, and gas exploration, extraction, and production activities. The main aspects are as follows:

Project basis of assessment

A project basis of assessment (ring-fencing) is adopted for all resource projects. This means losses from other operations, regardless of whether or not they are resource related, cannot generally be offset against resource project income from a particular ring-fenced project. However, there are some concessions to the ring-fencing principle in respect of exploration expenditure and expenditure in respect of discontinued projects and losses arising from site restoration costs.

In general, all costs incurred in the exploration and development phases of the project are accumulated and amortised over the life of the project. Once production starts, an immediate deduction is allowed for 'normal' operating and administration expenses. Capital expenditure incurred after the start of production are capitalised and amortised over the life of the project.

Rate of tax

A standardised rate of 30% applies to all companies resident in Papua New Guinea.

Interest deductions

Interest is not deductible prior to the commencement of a resource project. Following the issue of a resource development licence, a person carrying on a resource project or exploration in relation to a resource project may claim a deduction against resource income for interest on money borrowed for carrying on the relevant operations or exploration. This is subject to a number of conditions, including the resource company maintaining a debt-to-equity ratio of 3:1 (*see Thin capitalisation in the Group taxation section*).

Capital allowances

Allowable exploration expenditures (AEE) are amortised over the life of the resource project. The deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. The amount of the deduction is limited to the amount of income remaining after deducting all other deductions, other than deductions for allowable capital expenditure. In other words, the deduction cannot create a tax loss.

Allowable capital expenditures (ACE) are amortised over the life of the resource project. The ACE is split into two categories: capital expenditures with an estimated effective life of more than ten years (long-life ACE) and capital expenditures with an estimated effective life of less than ten years (short-life ACE).

The annual deduction for long-life ACE is claimed on a straight-line basis over ten years.

Where the remaining life of the project is less than ten years, the rate at which the deduction is allowed is calculated by referring to the remaining life of the project. For short-life ACE, the annual deduction is calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less. For new mining projects, the deductions for both long-life ACE and short-life ACE are calculated by dividing the unamortised balance by either the remaining life of the project or four, whichever is less.

The amount of the deduction for ACE is limited to the amount of income remaining after deducting all other deductions. In other words, the deduction cannot create a tax loss.

Off-licence exploration expenditure

A major easing of the ring-fencing principle applies to taxpayers that are involved in a producing project where the taxpayer or a related party incurs exploration expenditure outside the area of the productive project. In this situation, the taxpayer can elect (whether or not it is currently involved in a producing project) to add such exploration expenditure to an exploration pool that can be amortised against income from the producing project.

The amount allowable as a deduction from this exploration pool in respect of resource operations carried on by the taxpayer or a related corporation is the lesser of:

- 25% of the total undeducted balance of expenditure in the exploration pool or
- such amount as reduces CIT (other than additional profits tax [*see below*]) that would, but for this deduction, be payable by the taxpayer and its related corporations in respect of those resource operations for that year of income, by 10% (or 25% for mining projects).

Management fees

Once a resource project derives assessable income, the deduction for management fees is restricted to 2% of operating expenses other than management fees. During the exploration phase of a project, the amount of management fees that can be treated as allowable exploration expenditure is limited to 2% of the exploration expenditure other than management fees. Furthermore, during the development phase, the amount of management fees that can be treated as allowable capital expenditure is limited to 2% of the allowable capital expenditure other than management fees.

Transfer of expenditure

When interests are transferred from one taxpayer to another, the vendor and purchaser can agree to transfer deduction entitlements for the unamortised balances of allowable exploration expenditure and allowable capital expenditure to the purchaser.

Liquefied natural gas (LNG) project

A number of provisions with specific application to the PNG LNG project have been included in the Income Tax Act, Stamp Duties Act, Goods and Services Tax Act, Customs Act, and Excise Act.

Additional profits tax

A modified additional profits tax applies to all resource projects (mining, petroleum, and gas). The additional profits tax applies a tax rate of 30% to returns in excess of a 15% hurdle rate.

Withholding taxes

Dividends, interest, royalties, and technical/management fees

The following WHT rates apply to dividends, interest, royalties, and technical fees under PNG domestic law and tax treaties. PNG domestic legislation provides an exemption from WHT for dividends and interest in certain circumstances. The higher rates quoted are the maximum rates allowable under the treaties.

	WHT (%)			
Recipient	**Dividends**	**Interest (1)**	**Royalties**	**Technical fees**
Resident company	0	15	0	0
Resident individual	15	15	0	0
Non-resident corporations and individuals	15	15	10/30 (2)	17
Treaty:				
Australia	15	10	10	0
Canada	15	10	10	0
China	15	10	10	0
Fiji	15	10	15	15
Germany (3)	15	10	10	10
Indonesia	15	10	10	10
Korea, Republic of	15	10	10	0
Malaysia	15	15	10	10
New Zealand	15	10	10	0
Singapore	15	10	10	0
United Kingdom	15	10	10	10

Notes

1. There is no WHT on interest when:
   - interest is paid or credited to a licensed financial institution in Papua New Guinea, the Bank of Papua New Guinea, or the state, or
   - the interest income is otherwise exempt income in the hands of the recipient.
2. A royalty paid to a non-resident associate of the payee will suffer a 30% WHT. Where the non-resident is not an associate of the payee, the WHT rate will be 10% (or 48% of the taxable income derived from the royalty if the non-resident chooses to lodge an income tax return in Papua New Guinea).
3. The treaty with Germany has not yet been ratified by Germany.

Business income WHT

Income derived by local contractors in certain industries is covered by the business income WHT regime. The industries affected include:

- Building and construction.
- Road transport.
- Motor vehicle repairs.
- Security.
- Equipment hire.

Businesses affected are required to have a certificate of compliance and to produce it when entering into contracts with their customers. Payers are required to file an annual income reporting statement where they make either an eligible payment of PGK 500 or more in relation to one contract or eligible payments for several contracts exceeding PGK 5,000 in the year of income in relation to a single payee. Payers are required to deduct a 10% WHT if payees do not produce a certificate of compliance.

Non-resident insurer WHT

Premiums paid to non-resident insurers in respect of insurance contracts on property situated in Papua New Guinea or insured events that can only occur in Papua New

Guinea are subject to tax in Papua New Guinea. The tax is calculated on a deemed taxable income equal to 10% of the gross premium, which is taxed at the non-resident tax rates of 48% (companies) or 30% (unincorporated associations). Tax treaties may limit the rate of tax applied.

Tax administration

Taxable period

The tax year is generally the period 1 January to 31 December; however, application may be made for a substituted tax year-end. These will normally be granted where the substituted tax year-end coincides with the accounting year-end of an overseas holding company. A company's tax year does not need to be the same as its accounting period.

Tax returns

Papua New Guinea operates on a full assessment basis, and companies are required to lodge an annual CIT return showing the calculation of taxable income for the year. In addition, the return must provide detailed disclosures in relation to income derived and expenses incurred during the year of income.

A company must file a tax return by 28 February in the year following the year of income to which the return relates. However, the following automatic extensions apply where the company lodges its return through a registered tax agent:

- Six months from the taxpayer's year-end for taxable returns and partnership returns.
- Eight months from the taxpayer's year-end for resource company returns in a tax payable position.
- Ten months from the taxpayer's year-end for non-taxable returns.

Payment of tax

CIT is collected under a provisional tax system. Under this system, tax is paid in respect of a company's current year profits (i.e. payments made in the year of income are in respect of income derived in the same year as the payment is due).

Provisional tax is assessed by the IRC based on the last return lodged. In the event that no tax was payable on the previous year's return, the Commissioner General has the right to estimate the amount of tax based on any other information available.

Provisional tax is payable in three equal instalments by 30 April, 31 July, and 31 October.

Applications may be made to reduce provisional tax assessed if the tax due for the year in question is expected to be lower than the provisional tax assessed. Where estimated provisional tax is less than 75% of the income tax ultimately assessed, additional tax may be levied. Additional tax at a rate of 20% will be assessed, based on the difference between the estimate lodged and the provisional tax originally determined, or the actual tax payable, whichever is less. The Commissioner General has the discretion to require payment of additional tax.

Mining, petroleum, and gas companies are subject to advance payments tax, a system that broadly mirrors the provisional tax system in place for non-resource companies. The main difference for resource companies is they have the option to lodge an estimate of their taxable income for the year prior to 30 April, 31 July, and 31 October each year, which the IRC uses to assess each advance payments tax instalment.

Following the lodgement of the CIT return, the IRC will serve a notice of assessment on the company. The balance of tax payable for a year of income, after the application of provisional tax (or advance payments tax in the case of a resource company) and other tax credits or rebates, is due to be paid within 30 days of the date of service of the notice of assessment.

Tax audit process

There is no prescribed tax audit process in Papua New Guinea, and resource constraints have limited the IRC's audit activities.

Period for amendment of assessments

Where the IRC considers that a taxpayer made a full and true disclosure of all the material facts necessary for assessing their returns as originally assessed, the IRC may only amend an assessment that increases the tax liability of the taxpayer within three years from the date that tax became due and payable under the original assessment.

Where the IRC considers that a taxpayer did not make a full and true disclosure of all the material facts necessary for the assessment of their returns, and there has been an avoidance of tax, then:

- the IRC may amend any assessments previously issued to the participants if the IRC is of the opinion that the avoidance of tax was due to fraud or evasion (i.e. no time limit applies), or
- in cases of tax avoidance due to reasons other than fraud or evasion, the IRC may amend an assessment within six years from the date that tax became due and payable under the original assessment.

Topics of focus for the Internal Revenue Commission (IRC)

In late 2011, the IRC issued Taxation Circular No 2011/2, which provided guidance on transfer pricing matters in Papua New Guinea. The IRC continues to consider transfer pricing as an area of focus.

The IRC has indicated an increased focus on the effective collection of taxes and tax compliance through the implementation of a new Standard Integrated Tax Accounting System (SIGTAS).

The IRC has not otherwise publicly announced areas of focus for audit programs.

Significant developments

The tax authority (SET) issued a Decree on 27 September 2017 (N° 7795/17) including the creation of the National Electronic Invoicing System (SIFEN). This means that in the short-term the issuance of electronic invoices will be mandatory for local companies.

The SET will issue electronic invoicing regulations during the first semester of 2018, outlining the conditions and requirements to start the pilot project to implement the SIFEN. Further developments will be reported as they occur.

In addition to this, the Chamber of Senators approved the Law proposal regarding the elimination of bearer shares (equities without owner identification). According to this law, the companies' shares must be nominated within two years from the date of the law be acted by the government.

The government has announced the start of the process to apply to the Organisation for Economic Co-operation and Development (OECD) as a full member. This means that there is a significant trend towards establishing transfer pricing rules in the short term in Paraguay since it would be one of the OECD application requirements. In this context, Paraguay signed an Agreement to avoid Double Taxation with Uruguay on 8 September 2017. However, it is not enacted yet because it is pending approval by Congress.

Taxes on corporate income

Income is taxed in Paraguay according to the resource principle (i.e. the territorial system of taxation).

There are three tax systems in Paraguay, depending on the type of taxpayer, as follows:

- Commercial income tax (CIT): For income from commercial, industrial, and service activities, the general income tax rate of 10% applies. *See Capital gains and Dividend income in the Income determination section for a description of how such income is taxed*. Note that dividend distributions require an additional 5% tax that must be paid on the amount of dividend approved for distribution at the shareholder meeting.
- Agriculture income tax (AIT): For income from agricultural and cattle activities, the tax rate is 10% (determined by annual income).
- Little taxpayer income tax (LTIT): For those taxpayers with annual income of less than 100 million Paraguayan guaraníes (PYG), a single tax at a rate of 10% applies.

Local income taxes

There are no other income taxes (i.e. municipal tax on income, etc.) or patrimony taxes in Paraguay.

Corporate residence

Corporate legal residence is determined as the place where direction or central management takes place, unless the corporation's charter states otherwise.

Permanent establishment (PE)

The Paraguayan Tax Law establishes the definition of a PE.

The following activities may be considered as a PE in the country:

- Branches or agencies.
- A factory, industrial plant, or cattle ranch entity.
- Mine activities, or any other natural resources extraction activities.
- Civil construction or assemble activities that exceed 12 months.

If a person provides instructions related to the agreement of certain operations on behalf of a foreign entity, this operation may be considered as a PE in the country, except in cases where the mentioned instructions are related to the purchase of goods.

Other taxes

Value-added tax (VAT)

VAT applies to all corporations and to individuals or associations of individuals rendering personal services.

The general VAT rate is 10%, but a special VAT rate of 5% applies for selling and leasing real estate, basic groceries, farming products, and pharmaceutical products.

Customs taxes

As products are introduced into Paraguay directly by the local importer, the importer is responsible for payment of the related taxes (VAT on imports) before clearing the goods from Paraguayan customs, apart from customs tariffs. The other expenses involved in the import of products are the following:

- Port rates (between 0.65% and 1.50% of customs valuation).
- Customs valuation service (0.5% of customs valuation).
- Consular fee (approximately 50 United States dollars [USD] for each commercial document receiving a visa or legalisation from the Paraguayan consulate at the originating country).
- Indian contribution fee (7% on consular fee).
- IT system utilisation fee (between USD 15 and USD 50 according to importation value).

Other expenses should be added to the above, such as photocopying, handling fees, customs agent fees, etc.

Excise taxes

The excise tax, called the selective tax on consumption, is assessed on local goods and imported products listed, either specifically or generically, in the legislation. The importation of goods listed and the first sale of goods produced in Paraguay are taxed. The selective tax on consumption is collected independently of customs duty.

Some goods subject to this tax include whiskey and other alcoholic beverages, beer, tobacco products, petroleum, etc.

Real estate tax

Real estate tax is levied annually at 1% of the fiscal value of the property, which is generally less than actual value (or market value). A tax rate of 0.5% applies if the area of rural property is smaller than five hectares and is used for agricultural or cattle ranching. In certain areas, an additional tax is levied on the fiscal value of vacant and semi-vacant land when the area of the built-up portion falls within certain determined percentage limits. Large tracts of land in rural areas are subject to an additional tax determined on a percentage basis and to a proportional tax of 0.5% to 1% on the fiscal value of tracts with areas ranging from 10,000 to 60,000 or more hectares.

The 1992 Paraguayan Constitution established that municipalities and departments are entitled to the tax revenues directly related to real estate. Collection of these taxes is the responsibility of municipal governments.

Stamp taxes

There are no stamp taxes in Paraguay.

Payroll taxes

There are no payroll taxes other than social security contributions (*see below*).

However, although it is determined by Individual Income Tax Regulation (Decree 6560/16) Law that the employer must withhold the personal income tax (PIT) of employees, the application of this provision is not in force yet

Social security contributions

In Paraguay, there is a compulsory social security system through which it is required that the employers register their employees.

The calculation basis constitutes every wage item, in cash or goods, except the annual mandatory bonus and family allowance.

The monthly rates are as follows:

Contribution	Commercial entity (%)	Financial entity (%)
Employee	9.0	11
Employer	16.5	17
Total	25.5	28

The employee's contribution is withheld from salary by the employer, which is a designated withholding agent. The employer's contributions are computed on total payroll and are paid together with the employee's withholding to the Social Security Institute.

Branch income

Branches are taxed at the same rate as domestic corporations. Profits transferred or credited to the head office are subject to a 15% withholding tax (WHT) when remitted to the head office abroad.

Additionally, the payment of dividends (by the head office's instructions) is subject to a tax rate of 5%, which has to be paid at the time of the remittance and charged to the local entity.

Income determination

Inventory valuation

Taxpayers may adopt any method of inventory valuation, provided it is technically acceptable according to tax administration criteria (e.g. first in first out [FIFO], average cost). The valuation must be applied consistently and may be changed only with the prior approval of the Treasury Ministry.

Damaged, deteriorated, and obsolete inventories may be written down to fixed values by the taxpayer. The tax administration can reject valuations that are not realistic.

Capital gains

Gains on all assets, tangible and intangible, are taxable as part of profits and subject to income tax at a rate of 10%. Foreign currency exchange gains are also taxable at the same tax rate.

Dividend income

Dividends are taxable income when the recipient (or shareholder) is a non-resident, in which case a 15% WHT applies. An additional 5% tax is charged to local entities when the income or dividend is distributed to a local (resident) or foreign (non-resident) shareholder.

Stock dividends

Stock dividends are not taxable income, except when dividends represent more than 30% of the taxable income of an investor.

The mentioned exemption is not applicable in relation to the 15% WHT (in case of foreign shareholders) and 5% additional tax for dividend distribution (charged to the local entity that made the distribution).

Interest income

Interest income of a Paraguayan resident from capital abroad is subject to income tax. This case is the only exception to the resource principle rules enacted under Paraguay Tax Law.

Royalty income

It should be highlighted that the criterion to determine the source of royalties' income is the place where the rights are used, based on the terms agreed between the parties. Thus, in case of royalties' income from of a registered trademark where the use of it is in Paraguay, the royalties' income would be taxable.

However, royalties' income of a local taxpayer paid by a foreign entity would not be subject to tax in Paraguay as long as the goods commercialised are being sold abroad, in which case this income is considered as foreign-source income.

Foreign income

Foreign-source income is not taxable. However, interest, commissions, and capital gains are considered Paraguayan-source income and subject to CIT when the investor is resident in Paraguay.

Deductions

Depreciation and depletion

The maximum allowable depreciation rates range from 2.5% for urban buildings to 25% for computer equipment. Depreciation is calculated using the straight-line method based on the useful life of assets as determined by the Treasurer. The Treasurer may also authorise the use of other depreciation or depletion methods that are deemed to be technically justified and generally accepted.

Fixed assets must be revalued annually based on the increase of the price index. Capital gains derived from the revaluation of fixed assets are not taxable income.

Goodwill

Amortisation of goodwill is not deductible.

Start-up expenses

Amortisation of start-up expenses may occur over three to five years, depending on the taxpayer's decision.

Interest expenses

The interest expenses on loans taken for Paraguayan residents or Paraguayan taxpayers may be considered as deductible expenses.

Additionally, it is important to mention that certain investment projects may be subject to a special exemption of the taxes on the interest, commission, and other expenses for loans taken for banking entities abroad (*see Investment incentives in the Tax credits and incentives section*).

Extraordinary losses/bad debts

The deduction of extraordinary losses (theft and damage) and bad debts require the meeting of certain conditions (e.g. communication to the tax authority, evaluation of the actual loss in monetary terms, audit review). Regarding bad debts, they can be deductible three years from the date from which they arise.

Charitable contributions

The deduction of a donation is subject to formal registration of the beneficiary entity as a public benefactor before the Treasury Ministry.

Executive remuneration

The deduction of executive remuneration is limited to a percentage defined according to the enterprise's profits. However, in the event that the executive employees are subject to PIT, the deduction of their salaries is not limited for CIT purpose.

Fines and penalties

Fines and penalties are considered as non-deductible expenses for income tax purposes.

Taxes

In general, all taxes mentioned in the *Other taxes section are deductible. Income tax and any fiscal surcharges or fines are not deductible.*

Other significant items

General provisions for expenses or other potential losses are not deductible.

Other specific non-deductible items include:

- Interest on capital, loans, or any other investment by an owner, partner, or shareholder in a business.
- Personal expenses of an owner, partner, or shareholder, except when they are subject to PIT.
- Money drawn on account of future earnings.
- Direct expenses incurred in earning non-taxable income.
- Earnings from any fiscal period that are retained in the business as capital increases or reserve accounts.

Net operating losses

Net operating losses are not permitted to be carried forward and applied against future years.

Losses may not be carried back in Paraguay. However, a taxpayer may modify one's tax returns at a later date.

Payments to foreign affiliates

There are no limits on the deductibility of payments to foreign affiliates, including management fees, royalties, research and development (R&D), and general and administrative expenses, provided that the taxpayer maintains corresponding legal documentation that includes the country of origin and applies appropriate WHT. *See the Withholding taxes section for the applicable WHT rates*.

Group taxation

Group taxation is not permitted in Paraguay.

Transfer pricing

There are no transfer pricing rules in current Paraguayan legislation requiring compliance with certain conditions or minimum prices for the purpose of fiscal deductions, except for the following regulation applicable to importations and exportations:

"In the case of importers, it will be assumed that, in the absence of proof to the contrary, the cost of goods introduced to the country may not exceed the wholesalers price ruling in their place of origin plus freight and insurance costs and expenses to Paraguayan territory, and therefore, the excess of such value will constitute taxable income for the importers.

In the case of exporters, where a price has been fixed or the price declared is lower than the wholesalers price in Paraguay plus the freight and insurance costs and expenses to point of destination, this latter aggregate value shall be taken as the basis for determining the exporter's taxable income.

To this effect, the nature of the goods and the transaction mode adopted will be taken into account." (Section 16 of Law No. 2421/04).

Thin capitalisation

There are no thin capitalisation rules in Paraguay.

Controlled foreign companies (CFCs)

There are no provisions in Paraguay for CFCs.

Tax credits and incentives

Foreign tax credit

Foreign tax credits are not applied to local tax payments in Paraguay.

Investment incentives

The framework of economic investment was established in the Law No. 60/90, which offers some special tax exemption benefits to foreign and local investors.

The benefits of the Law No. 60/90 may be available for the following investments:

- Cash, financing, provision of credit, or other financial instruments, under the conditions established by the administration of the President of Paraguay and the corresponding ministries.
- Capital goods, raw materials, and inputs for local industry for the fabrication of capital goods.
- Transfers of licensing rights with respect to trademarks, industrial processes and models, and other technologies.
- Technically specialised services.
- Capital leases.
- Other forms that the administration of the President of Paraguay and the corresponding ministries determined by law.

The investment incentives included in Law No. 60/90 that remain enacted after tax law modification (Law No. 2421/04) are the exemptions from certain fiscal, municipal, and customs duties taxes.

When the amount of financing for an investment is equal to or greater than USD 5 million, it will be exempt from WHTs on interest, commissions, and capital that have to be paid to financial or banking entities abroad. This benefit is for five years.

If the investment is at least USD 5 million and the project is approved by the tax authorities, the dividends and profits derived from the project are tax exempt. The mentioned exemption is granted for five years and may be extended to ten years.

Maquila tax exemptions (Law No. 1064/97)

Under the 'Maquila' Regime, investors may import goods or products to be assembled, repaired, improved, worked on, or processed with the purpose of exporting such goods or products, prior to the addition of value or the 'Paraguayan component'. This regime is subject to a special tax treatment: a 1% tax rate applies to the value added within Paraguayan territory.

Innovative regulations allow for virtual commerce between *maquila* factories, which improve the utilisation of goods imported under the temporary regime (called 'virtual maquila').

This regime also establishes the service *maquila*, which enjoys the same tax benefits, and its main purpose is to provide support to entities abroad (currently, there are call centres that benefit from this regime).

Paraguayan legislation does not impose restrictions in terms of the types of products and services that the *maquila* industry may comprise. The *maquila* activity's national policy is regulated and supervised by the National Council of the *Maquila* Industry for Export (CNIME). Both individuals and legal entities domiciled in Paraguay, whether national or foreign, may take advantage of these regulatory benefits.

This industry has been receiving broad government support, given that it is considered an element of social interest in the strive to combat unemployment. There are currently over 130 *maquila* companies in the country.

Free trade zones (called 'zona franca' Law No. 523/95)

Free trade zones, where all types of commercial, industrial, and service activities may be carried out, constitute a relevant incentive for business.

The legal framework governing such zones offer several advantages in terms of tax exemptions, as well as a special tax regime with an income tax rate of 0.5%.

The main purpose of free trade zones is the development of activities in connection with foreign markets; however, operations within the country are also allowed.

Law No. 523/95, 'which authorises and establishes the Free Trade Zone Regime', and its regulatory Decree No. 15,554/96, 'which regulates the Free Trade Zone Law', among others, establish the guidelines related to activities within free trade zones.

The aforementioned regulation establishes two main entities, the 'concessionaire', responsible for providing the necessary infrastructure for freight operational management, and the user, responsible for carrying out the commercial, industrial, or service activity. The regulation therefore establishes the administrative measures that enable operations in free trade zones and its supervision, control, and development.

There are currently two free trade zones located in the Alto Paraná region (northeastern region, in close proximity to the border with Brazil and Argentina), in which national and international companies actively operate.

Other incentives

- Exports are exempt from certain customs duties and from VAT.
- A Capital Market Law (No. 1,284/98) established incentives for issuance of bonds abroad.
- Under the Export Incentives Regime, exports are VAT exempt. The legislation recognises a tax credit for pre-production stages. A Temporary or Provisional Admission Regime is also in place, which exempts imports from import tariffs and VAT.

Withholding taxes

In accordance with the regulations in force, foreign entities may be subject to income tax withholdings in respect of services rendered to them deemed to be of Paraguayan source, including payments made by the branch or affiliate of a foreign home office.

Business income tax regulations consider that branches, agencies, or PEs of foreign entities are taxpayers, independently from the foreign home office status.

The withholdings are to be made from the payments made by local entities for such services.

WHT on payments made by a domestic corporation

	WHT (%)				
	Dividends (1)				
Recipient	Portfolio	Substantial holdings	Interest (2)	Royalties (2)	Fees (2)
Non-resident corporations	15	15	6/15/30 (3)	15/30 (4)	15/30 (5, 6)
Non-resident individuals	10	10	10 (3)	10 (6)	10 (6)
Tax treaty with Chile:					
Non-resident corporations	10	10	10/15 (7)		
Non-resident individuals	10	10			

Notes

1. Local entities are required to pay an additional 5% WHT when the income or dividend is distributed.
2. In the case of financing operations (loans), royalties, and other services provided for non-resident corporations or individuals, the local taxpayer must withhold the VAT at a rate of 10%.
3. The WHT on interest is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The 'effective' tax rate is 15%. For financing loans, the WHT effective tax rate is 6%. Regarding individuals, considering that they will obtain income from Paraguayan sources, whether they will be subject to PIT or CIT depends on the kind of operations.
4. The WHT on royalties is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, when the payment is not directly made to the head office or shareholders that have control of the local subsidiary, the WHT is based on 50% of the amount paid. The 'effective' tax rate is 15%.
5. The WHT on fees is based on 100% of the amount paid when remitted to the head office abroad. The tax rate is 30%. In other cases, it is based on 50% of the amount paid. The 'effective' tax rate is 15%.
6. Fees for technical assistance services rendered by non-resident corporations are subject to WHT at a rate of 15% on the amount paid. In case the mentioned services are rendered by the head offices or direct shareholder, the tax rate is increased to 30%.

Fees for personal services rendered by non-resident individuals are subject to PIT. The withholding of PIT has to be made on 50% of the amount paid. The tax rate is 20% (effective tax rate of 10%).

7. In case of a loan to Chile, the WHT on the interest is 15% if the loan is provided by a bank or insurance company. On the other hand, if the loan is provided by an associated company or head office, the tax rate is 10%. Regarding VAT WHT, *see Note 2.*

Tax administration

Taxable period

For the CIT and LTIT, the taxable period is the calendar year. Regarding the AIT, the taxable period is as follows:

- In the event a taxpayer is subject to AIT exclusively, the tax period is from 1 July to 30 June of the following year.
- If a taxpayer is subject to AIT and CIT according to the activities performed, the taxable period is the calendar year.

Tax returns

Income tax returns are submitted on a fiscal-year basis as a self-assessment and must be filed by the fourth month following the end of the fiscal year.

Payment of tax

Income tax is due on varying days in the fourth month following the end of the fiscal year, depending on the taxpayer ID number, according to a calendar established by the Treasury Ministry. Four equal advance payments are made throughout the year, calculated based on 100% of the tax due in the previous year. Payments must be made in May, July, September, and November of each year after the due date for filing the income tax return, according to the calendar established by the tax authorities.

Penalties

Tax legislation provides the following penalties:

- Late payment of income tax is penalised by a fine varying from 4% to a maximum of 14%, plus interest at 0.116% per day.
- Tax fraud is punished by a charge of from one to three times the value of the tax in default.
- Tax law infringements are penalised through fines varying from the equivalent of USD 10 to USD 250.
- Omission of payment incurs a fine of 50% of the tax pending.

Tax audit process

The auditing process is performed by the tax authorities when there is a certainty or suspicion of tax evasion. Additionally, the taxpayer may be audited according to a draw process that is made by the tax authority.

The tax law also establishes an obligatory tax audit, which has to be made by external auditors, when the taxpayer obtains PYG 6 billion of gross income during the year. An annual audit report on tax compliance rules is presented to and reviewed by the tax authorities. When a tax issue is identified, the tax authority may apply a penalty to the taxpayer.

Statute of limitations

The tax authority may audit the last five fiscal years.

Topics of focus for tax authorities

The tax authority is focusing on purchases invoices. It is important to note, that in order to consider an expense as deductible for tax purposes, it must comply with the formal requirements established by Law.

In addition to this, these vouchers must also comply with the mentioned formal requirements in order to consider them as a part of the VAT credit.

While there are not transfer pricing rules in force in Paraguay, the government has announced the start of the process to apply to the OECD as a full member. This means that there is a significant trend towards establishing transfer pricing rules in the short term in Paraguay since it is one of the OECD application requirements.

Significant developments

On 25 October 2017, Peru signed the Multilateral Convention on Mutual Administrative Assistance.

In March 2018, the official launch of the 'program of implementation of the recommendations of the Public governance study' was carried out. The aforementioned program aims to make progress in efficiency and effectiveness in public management, decentralisation, multilevel governance, open government, citizen participation, and accountability.

On 3 May 2018, the executive branch requested the Congress to delegate legislative faculties to legislate on tax and financial matters.

Taxes on corporate income

Companies incorporated in Peru are considered resident in Peru for tax purposes and thus subject to a corporate income tax (CIT) rate of 29.5% on worldwide net income.

For purpose of determining taxable income, such entities are allowed to deduct expenses to the extent that they are necessary to generate or maintain the source of taxable income. Requirements, limitations, and/or caps may apply to the deduction of certain expenses (thin capitalisation rules), bad debt provisions, salaries, travel expenses, gifts, donations, penalties, etc.

The Peruvian Income Tax Law (PITL) allows crediting for various payments against income tax, including income taxes paid in advance, amounts paid for certain other taxes, and income taxes paid in foreign tax jurisdictions, provided that the foreign country's tax rate is not higher than the Peruvian CIT rate and the taxable income qualifies as foreign-source income for Peruvian income tax purposes.

Dividends and any other type of profit distributions are taxed at a rate of 5% upon distribution, when the distribution is made to a non-resident entity (either individuals or legal entities) and to resident individuals, or when the distribution is agreed to by the shareholders, whichever happens first (resident legal entities are not subject to withholding tax [WHT] over dividends received from other Peruvian corporations). The entity distributing dividends or profits is liable for WHT at the aforementioned rates.

Nevertheless, enterprises are subject to an additional tax rate of 5% on every amount or payment in kind that, as result of a tax audit, is construed as taxable income to the extent that it is an indirect distribution of such income that escapes further control from the tax administration, including income that has not been declared.

On the other hand, companies incorporated abroad are considered as non-domiciled in Peru for tax purposes and thus subject, in most cases, to an income tax rate of 30% over the gross Peruvian-source income. As a general rule, foreign companies are not allowed to deduct expenses and are taxed on gross income.

Local income taxes

There are no local or provincial taxes on income in Peru.

Corporate residence

For income tax purposes, the following entities, among others, are considered as resident entities in Peru:

- Corporations duly incorporated in Peru.
- Branches, agencies, and permanent establishments (PEs) in Peru of non-resident individuals or entities.
- Partnerships and limited liability companies.

Permanent establishment (PE)

According to the PITL, a foreign company is considered to have a PE (i) if it has a fixed place of business through which it carries out business activities in whole or in part; (ii) if an individual has a power of attorney of a foreign entity and uses it on a regular basis to sign agreements on behalf of the foreign entity; and (iii) if the person with powers of attorney of the foreign entity keeps in Peru inventory and/or goods to be negotiated in Peru on behalf of the foreign entity.

The consequence of a PE presence in Peru is that the PE will be obligated to comply with all the formal and substantial tax obligations of any domiciled taxpayer, meaning that it will have to be registered before the tax administration (get a tax identification [RUC] number), issue/receive invoices, keep full accounting books, file monthly and yearly tax returns, withhold taxes, allocate a reasonable income for its Peruvian source activities, etc. If a PE presence is determined, then the tax contingency will have to be quantified by calculating the taxes, fines, and interest accrued as from the moment in which the PE presence can be deemed, except for the period barred by statute of limitations.

Other taxes

Value-added tax (VAT)

The general rate of VAT is 18% (16% of VAT itself plus 2% of municipal promotion tax). VAT is applicable to the following operations:

- Sale of goods within the country.
- Rendering or first use of services within the country.
- Construction contracts.

- The first sale of real estate made by constructors.
- Import of goods.

For all transactions, the vendor is subject to VAT, except in the case of importation of goods or services rendered abroad, but economically used within Peru, for which VAT is self-assessed by the importers and users, respectively.

The VAT law follows a debit/credit system, and input VAT may be offset by output VAT. Should excess input VAT be obtained in a particular month, it shall offset output VAT obtained during the following months, until it is exhausted.

The export of movable goods (including the sale of goods in the international zone of ports and airports) is not subject to VAT, nor is the exportation of the services that meet concurrently with the four requirements that the VAT law states. Thus, VAT paid upon the acquisition of goods, rendering of services, construction agreements, and the importation of goods related to exported goods or services creates a positive VAT export balance.

The positive balance may offset output VAT, income tax, or any other outstanding tax debt in favour of the central government. If the positive balance is not completely offset, as the amount of the aforementioned tax obligations is insufficient, the taxpayer may apply for a refund.

Tax Obligatory Payment System (SPOT)

The SPOT is applicable to the sale of certain goods and the rendering of services subject to Peruvian VAT. The main purpose of the SPOT is to generate funds to enable the payment of tax obligations by the VAT payer.

According to the SPOT, all the sales of goods listed in the appendices of the Resolution that are levied with VAT will be subject to withholding, applying the rates established for each kind of good (1.5%, 4%, 10%, or 15%).

Since 1 April 2018, the services subject to VAT are subject to the SPOT with a withholding rate of 4%, 10%, or 12%.

The purchaser or service recipient must withhold a percentage of the transaction price and deposit such amount within the seller's or service provider's State Bank (*Banco de la Nación*) account. It is important to note that the right of the purchaser or user of the service to offset input VAT related to such goods and services may be exercised only after the deposit with the State Bank has been executed.

The amount deposited is applied towards the payment of the seller's or service provider's Peruvian tax obligations (not just VAT). If after three consecutive months such amount is not used, the seller or service provider may request a refund or use the amount to pay withholdings applicable to purchasers or services recipients.

Customs duties

Customs duties applied to imports are linked to their classification under the Customs Tariff, given by NANDINA subheading that is determined by the information provided by the importer (through the invoice and other complementary information), as well as the physical recognition by the Customs Officer at the time of customs clearance.

As such, the taxes required are:

- *Ad valorem* customs duty (rates of 0%, 6%, and 11%, as the case may be).
- VAT (16%).
- Municipal promotion tax (2%).

Other taxes that may apply, depending on the equipment, include the following:

- Selective consumption tax.
- Specific duties.
- Antidumping and compensatory.
- VAT perception.

There are no restrictions on imports and exports, although there is a limited list of products that cannot be imported or exported. Exports are not subject to any taxes. The importation of most capital goods is subject to the 0% rate.

The government is empowered to grant duty exemptions under certain circumstances and also to temporarily suspend the assessment of duties on certain products. Customs duties are imposed on an *ad valorem* basis (the carriage, insurance, and freight [CIF] value of the imported goods). Goods are classified for customs duty purposes under the Harmonized System.

Pursuant to the drawback regime, an exporter may apply for a refund of customs duties paid upon: (i) the importation of goods contained in exported goods or (ii) the importation of goods that are consumed during the production of exported goods.

The refund rate is currently 4% of the freight on board (FOB) value of the exported good, provided such amount does not exceed 50% of the good's production cost. The refund will proceed for each type of good exported and for the first 20 million United States dollars (USD) worth of goods exported per year (the excess will not be subject to refund).

For such purposes, the beneficiaries of the drawback regime are the manufacturer/ exporter companies whose cost of production has been increased by the customs duties paid upon the importation of: (i) raw material, (ii) intermediate products, or (iii) pieces incorporated or consumed in the production of exported goods. Note that fuel or any other energy source used to generate heat or energy for purposes of obtaining the exported good is not considered as raw material.

Excise tax

The sale of specific goods, including fuel, cigarettes, beer, liquor, and vehicles, is subject to excise tax.

Excise tax rates, and the manner on which the tax is applied, depend on the type of goods or services.

Since May 2018, the tax rate for the aforementioned products has increased, based on the argument that their production has the highest negative incidence on health and on the environment. For example, liquors with 20% or more alcohol have a new tax rate of 40%. In addition, sugary drinks, such as soda, with 6 grams or more per 100 millilitres are subject to a rate of 25%.

Real estate property tax

The real estate property tax is levied on the value of urban and rural real estate property. Individuals and legal entities owning the referred real estate properties are considered taxpayers for such purposes. The taxable base is calculated taking into account the value of all the properties owned in a specific local district, as reflected in the internal records of the corresponding local authorities.

The tax is calculated and paid on an annual basis applying the following progressive cumulative scale:

Real estate's value	Real estate property tax rate (%)
Up to 15 tax units	0.2
For the excess of 15 tax units and up to 60 tax units	0.6
Over 60 tax units	1.0

Real estate transfer tax

The real estate transfer tax is levied on all transfers of urban and rural real estate property. The taxpayer is the purchaser of the property. The taxable base is equivalent to the consideration agreed upon by the parties to the transaction, provided it is higher than the property's value (in the relevant year for purposes of the real estate property tax) as reflected in the internal records of the corresponding local authorities.

The tax rate is 3% and must be borne exclusively by the buyer, regardless of whatever the parties agree. The first ten tax units (approximately USD 12,461) of the taxable base are exempt from this tax.

Stamp taxes

There are no stamp taxes in Peru.

Payroll taxes

Payroll taxes in Peru are only those characterised as social security contributions (*see below*).

Social security contributions

Health contributions

Employers shall make monthly health contribution payments equal to 9% of the compensation paid to employees.

Employees shall be affiliated either to the National Health System (EsSalud) or the Private Health System (EPS), according to what option they choose. In the latter, a portion (25%) of the amount paid to the EPS may be used by the employer as a credit to be offset against EsSalud contributions.

Insurance for high-risk work

Employees who perform high-risk activities established in Law 26790, such as mineral extraction and iron and steel smelting, among others, must have a complementary insurance for high-risk work, which provides coverage such as health care, temporary or permanent disability pensions, and burial expenses relating to work accidents or professional diseases. This insurance is compulsory and must be paid for by the employer.

Pension funds contributions

Employers shall apply monthly withholdings for pension funds contributions equal to 13% of the remuneration received by the employee in cases where the employee is affiliated with the National Pension System (ONP) or approximately 12.4% in cases where the employee is affiliated with the Private Pension System (AFP). In this last case, 10% corresponds to the personal pension account and almost 2.4% to insurance and commissions for managing the fund.

Regarding the termination of employment of foreign individuals who leave the country, their pension funds in an AFP may be wired to an account of the employee in a foreign bank (the aforementioned 10%).

Financial transactions tax (FTT)

FTT is applied at a rate of 0.005% on all debits and/or credits on bank accounts held by the taxpayers.

The following operations, among others, are exempted from the FTT:

- Operations made between accounts of the same holder.
- Credits to bank accounts for payment of salaries.
- Credits and debits to bank accounts of diplomatic representations and international organisations recognised in Peru.

Payments of FTT are deductible as expenses for income tax purposes.

Temporary net assets tax (TNAT)

Companies subject to income tax are obligated to pay TNAT, except for companies that are in preoperative stages or that commenced business on 1 January of the fiscal year in which TNAT must be paid.

The taxable basis is the value of the assets set forth in the taxpayer's balance sheet as of 31 December of the year prior to that of the tax payment, adjusted for deductions and amortisations accepted by the Peruvian law.

The amount of TNAT is determined by applying the following rates on the taxable basis:

- Up to 1 million Peruvian soles (PEN): 0%.
- Excess of PEN 1 million: 0.4%.

The amount paid for TNAT may be credited against the taxpayer's income tax. If not totally used, the remaining TNAT may be refunded by the tax administration.

Special taxation on mining industry

The new mining royalty (NMR) regime, special mining tax (SMT), and special mining contribution (SMC) are economic considerations paid to the Peruvian government for the exploitation of mineral resources. The NMR applies to metallic and non-metallic mineral resources, while the SMT and SMC only apply to metallic mineral resources.

The SMC is only applicable to mining companies with projects with tax stability agreements in force. Such companies have voluntarily entered into agreements with the Peruvian government with the purpose of paying this contribution. This special contribution is determined for each stability agreement entered into.

In all three cases, the tax basis is the operating profit of the company, and the special rates and considerations are explained below:

	New mining royalty (NMR)	Special mining tax (SMT)	Special mining contribution (SMC)
Concept	No tax stability	No tax stability	With tax stability
Regime	Previous mining royalty modified	New	New
Cumulative progressive scale based on operating margin	1% to 12%	2% to 8.4%	4% to 13.2%
Minimum payment	1% of the sales revenue	N/A	N/A

The amounts paid will be deductible for income tax purposes as long as they are actually paid during the fiscal year.

Energy and Mining Investment Regulatory Agency (OSINERGMIN) contribution

The basis for calculating the OSINERGMIN contribution is the monthly invoicing of activities directly related to OSINERGMIN's regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.14% in 2018.

Agency for Environmental Assessment and Enforcement (OEFA) contribution

The basis for calculating the OEFA contribution is the monthly invoicing of activities directly related to OEFA's regulatory scope (mining activities), after deducting the VAT. The applicable rate is 0.11% in 2018.

Branch income

Branches, agencies, and PEs of non-resident companies or entities incorporated in Peru are subject to income tax at a rate of 29.5% on their Peruvian-source income.

For tax purposes, branches or subsidiaries are subject to the same obligations applicable to all companies in Peru, including income tax, VAT, FTT, filing of the corresponding income tax and VAT returns, issuance of invoices, etc.

Nevertheless, the following important differences between subsidiaries and branches resident in Peru must be taken into account:

- Branches are subject to income tax only for their Peruvian-source income, while subsidiaries are subject to income tax on their global-source income (both Peruvian and foreign income).
- For branches, the WHT on profit for distribution is applied on the date the annual income tax return is submitted. Subsidiaries are subject to the WHT on the date in which the corresponding shareholders agreement took place or the date when the beneficiary receives the dividends, whichever occurs first. For non-domiciled shareholders, the withholding will be applied whenever the dividend is actually

paid, without taking into account the moment in which the shareholder agreement is executed.

Income determination

Inventory valuation

The first in first out (FIFO), average, specific-identification, retail, and normal or base-stock methods are allowed for inventory valuation. The last in first out (LIFO) method is not permitted.

Capital gains

Capital gains are taxed as ordinary income. However, capital gains derived from the sale of stock issued by a Peruvian company through the Lima Stock Exchange are taxed at a 5% rate, provided that the seller is a non-domiciled party.

An exemption has been granted as of January 2016 until December 2019 for the sale of shares performed through the Lima Stock Exchange as long as these requirements are met:

- No more than 10% interest is transferred.
- The stock has market presence.

Dividend income

Cash dividends distributed to resident corporations are not subject to any taxes.

Interest income

The PITL establishes that the WHT rate on interest arising from loans for non-resident corporations is 4.99%, provided the following requirements are met:

- In case of cash loans, the entrance into Peru of the foreign currency must be duly accredited.
- The credit must not accrue an effective interest that surpasses the preferential rate prevailing in the place where it comes from, plus three points.
- If the credit proceeds from the United States or from Europe, the company shall apply the preferential rate to the London Interbank Offered Rate (LIBOR) plus four points.
- The loan must be destined to finance business or taxable activities.
- The parties involved must not qualify as related parties for tax purposes.

Royalty income

Royalties paid to non-domiciled parties are subject to a 30% withholding rate, to the extent that the goods or rights generating royalties are economically used in the country or the royalties are paid by a domiciled taxpayer.

Foreign income

A Peruvian corporation is taxed on Peruvian and foreign-source income. For active income of foreign source, the company must pay taxes in the fiscal year in which the earned income is accrued. For passive income, the company must pay taxes in the fiscal year in which the income is perceived.

Deductions

Acceptable payment methods

Obligations that are fulfilled through cash payments exceeding PEN 3,500 must be made via bank account deposits, wire transfers, payment orders, credit cards, non-negotiable cheques, or other means of payment provided by entities of the Peruvian financial system. Failure to use one of these payment methods when such an obligation exists will result in the disallowance of deductions for any expenses or costs for income tax purposes and the disallowance of a credit for the corresponding VAT.

Expenses derived from transactions entered into with entities resident in tax havens

Certain expenses are not tax-deductible, including expenses incurred with respect to transactions with (i) entities resident in tax havens on the list attached to the PITL regulations, (ii) PEs located in tax havens, or (iii) entities that generate revenues or income through tax havens.

Nonetheless, expenses incurred from the following transactions are excluded from the above-mentioned limitations, provided the consideration paid falls within market value:

- Interest on loans.
- Insurance premiums.
- Leases of aircraft or ships.
- Maritime freight.
- Fees for passing through the Panama Canal.

Depreciation

Assets may be depreciated for tax purposes via the straight-line method, capped at the following rates, but without exceeding the amount of the financial depreciation:

Assets	Depreciation rate (%)
Cattle (both labour and reproduction) and fishing nets	25
Vehicles (except trains) and any kind of ovens	20
Machines and equipment used for mining, oil and construction activities, excluding furniture, household, and office goods	20
Equipment for data processing	25
Machines and equipment acquired as of 1 January 1991	10
Other fixed assets	10

Buildings must be subject to a flat 5% depreciation rate, regardless of the financial depreciation.

Amortisation of intangible assets

The amortisation of property rights, trademarks, patents, and manufacturing procedures, as well as other similar intangible assets, are not deductible for income tax purposes. However, the price paid for intangible assets of a limited duration, at the taxpayer's choice, may be considered as an expense and applied to the results in a single year or amortised proportionally over a ten-year term.

The Peruvian tax administration, prior to an opinion from the corresponding technical organism, is permitted to determine the real value of those intangible assets for tax purposes when the price does not reflect the real one.

Organisational and start-up expenses

Organisation expenses, pre-operating expenses (including initial operations and further expansion of operations), and interest accrued during the pre-operating period may be expensed in the first period of operation or amortised using the straight-line method over a maximum of ten years. However, once a company has elected to recover start-up costs via the straight-line method, it may revoke such election only upon receiving approval of the tax authorities.

Interest expenses

In general terms, interest on loans and related expenses are deductible, provided they are related to the acquisition of goods or services incurred, or to be incurred, in order to obtain or produce taxable income or to maintain the source of such income.

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the net equity of the debtor as of the end of the previous fiscal year (*see Thin capitalisation in the Group taxation section*).

Bad debts

Write-offs of bad debts and equitable provisions are deductible, provided that the accounts to which they belong are determined. For the provisions of bad debts, it is necessary that:

- there is a debt due and the taxpayer can provide evidence of the financial difficulties of the debtor that could foresee a risk in the collection of the debt, and
- the provision is registered separately in the inventory and balance book at the fiscal year closing. In this sense, a generic bad debt provision will not be deductible in the assessment of the net taxable income, nor will bad debts whose terms have not yet elapsed.

Bear in mind that the following debts are not considered bad debts:

- Debts incurred between related parties.
- Debts guaranteed by banks or financial companies by means of rights over real property, money deposits, or purchase-sale agreements with reservation of right of legal ownership.
- Debts that have been subject to renewal or express extension.

Charitable contributions

Donations made to entities of the public sector, except companies, and to non-profit associations with certain purposes are deductible, provided that the receiver of the donation is duly qualified by the tax administration.

The deduction will be limited to 10% of the net income of the donor and only during the fiscal year in which it is granted (carryforward of the donation is disallowed). This means that if the donor does not obtain taxable income in the fiscal year in which the donation is made, no deduction will be available.

In addition, companies can deduct the expenses for the food they donate. This donation requires the food to no longer have commercial value and be apt for human consumption. The deduction cannot exceed 1.5% of the total sales that the donor makes.

Profit sharing

Entities with more than 20 employees, provided they obtain taxable income during the fiscal year, must distribute a percentage (5%, 8%, or 10% depending on the industry) of their profits (the basis is the tax profit of the fiscal year) among their employees. The amount of distribution for each employee depends on the effective working days during the year and annual remuneration.

Employee's retributions and health insurance premiums

Employee's retributions paid during a fiscal year may be deducted in such year, provided the payments are made by the employer before the term to file its annual income tax return expires. Likewise, health insurance premiums for employees, their spouses, and children are deductible.

Vehicle expenses deductions

Vehicle expenses may be deducted, provided the vehicles are essential to a company's business activities and are continually used for such purpose. There is a limitation on the tax deductibility of car expenses used for administrative of representation purposes, depending on the amount of income generated by the company. The number of company cars assigned to directors, managers, and representatives of a company may not exceed five under any circumstances.

Fines and penalties

Fines and penalties are not deductible for income tax purposes.

Taxes

Other taxes assessable on properties and activities generating taxable income are deductible for income tax purposes.

Net operating losses (NOLs)

Tax losses may be offset according to either of the following systems:

- Against net income generated within the following four fiscal years after the year in which the loss is incurred. Any losses that are not offset within such period may not be carried forward to any future year.
- Against 50% of the net income generated in the following fiscal years after the year in which the loss was generated. Under this system, there is no time limitation for carrying forward the losses.

After choosing one of the aforementioned systems, the taxpayer will not be able to change the system until the accumulated tax losses from prior fiscal years are exhausted. Losses will not be carried back to years prior to the year in which the loss is generated.

Payments to foreign affiliates

Payment of royalties to non-resident affiliates is permitted and deductible from gross income.

Group taxation

Group taxation is prohibited in Peru.

Transfer pricing

The rules related to market value and transfer pricing establish that, in any kind of transaction, the value assigned to the goods and services must be the market value for tax purposes. If such value differs from the market value, either by overvaluation or sub-valuation, the tax administration will proceed to adjust it for both the purchaser and the seller, even when one of them is a non-domiciled entity, provided that the value agreed to results in a lower tax than the one that would have applied if transfer pricing rules had been applied. The adjustment will be imputed in the taxable period in which the operations with related parties were performed.

In case of transactions between related parties or those entered with tax havens, the market value will be equivalent to the value agreed with independent parties in similar transactions, being mandatory to support such value with a transfer pricing study.

The law states that transfer pricing rules will not apply for VAT purposes.

Benefit test requirement

For inter-company services, the benefit test must be accomplished as of 2017. Such test is considered accomplished when the service rendered provides economic or commercial value to the recipient of the service, improving or maintaining its commercial position.

The providers cost structure must be proved. Low-value services must not exceed a margin of 5%.

Formal obligations

New formal obligations have been approved. Such obligations are the following:

- Informative tax return - Local report: Mandatory for taxpayers with profits higher than 2,300 tax units. They must report their transactions that generate taxable income and deductible costs/expenses. In force as of 2017.
- Informative tax return - Master report: Mandatory for companies that are part of a group with profits higher than 20,000 tax units. They must report the organisational structure of the group, description of their business, their transfer pricing policies for intangibles and financing, and their financial and tax status. In force as of 2018.
- Informative tax return - Country-by-country (CbC) report: Mandatory for companies within a multinational group. They must report the global distribution of profits, taxes paid, and their business activities for each entity in the group in any country. In force as of 2018.

Tax price adjustments

Adjustments to prices are only required whenever the price paid generates a higher tax deduction or a lower income tax in Peru; consequently, the existence of a tax prejudice will be required for an adjustment to be requested.

Adjustments are performed individually (on each operation) and not in an overall or global manner.

The adjustment of the value assigned by the tax administration or the taxpayer will be effective for both the transferor and the purchaser or transferee, without any constraints. In the case of non-domiciled parties, the bilateral adjustment will only proceed on transactions that could trigger taxable income in Peru and/or deductions for determining the income tax in Peru.

The adjustments are attributed to the corresponding tax period, according to the attribution rules depicted in the PITL (accrual regime for corporate taxpayers). However, when, under such rules, the adjustment cannot be attributed to a particular period, the adjustment will be allocated among all tax periods where income or expense has been allocated, in proportion.

Operations where no consideration has been paid are subject to transfer pricing rules. In this kind of transaction, the adjustment shall be allocated to the period or periods in which revenue would have accrued if consideration had been paid and the income was to be acknowledged by a domiciled taxpayer. On the other hand, if the income were to be recognised by a non-domiciled taxpayer, it would be attributed to the period or periods where the expenses accrued, even if it was a non-deductible expense, and the domiciled taxpayer would be responsible for payment.

Commodities

There is a specific methodology for determining prices in the sales of internationally traded commodities to tax havens or intermediaries.

In this methodology, it is required to determine the price of the specified operation based on the international price without taking into account the particularities of each case.

Thin capitalisation

In the case of loans entered into between related parties, the amount of interest to be deducted is limited to interest from indebtedness not exceeding three times the entities net equity as of the end of the previous fiscal year. In this connection, even though Peruvian corporate law has no requirements as to a minimum amount of share capital to incorporate a legal entity, it should be noted that having a small share capital may jeopardise the deductibility of interest payable for loans granted by related entities since, in case of newly incorporated entities, the share capital (equity) to be considered for calculating the thin capitalisation limit is the original one (this is, the one with which the entity was incorporated). In any case, this will only trigger a deductibility problem for the fiscal year in which the entity is incorporated, since for the following fiscal year the thin capitalisation rule will be calculated on the basis of the net equity at the end of the prior fiscal year (which, at that moment, may have already been increased through new contributions or capitalisations).

Controlled foreign companies (CFCs)

CFC rules are in force in order to avoid the deferral of income tax on passive income obtained from CFCs (defined as at least 50% of ownership, voting rights, or gains) by domiciled taxpayers, provided such companies are situated in tax havens or jurisdictions with nil or reduced tax rates.

Taxation of indirect disposal of shares in Peruvian entities

The indirect transfer of Peruvian shares of a foreign entity that, in turn, owns (directly or indirectly through other entities) shares of a Peruvian entity is levied with income tax, provided that both of the following conditions are met:

- During the 12 months prior to the transfer, the market value of the Peruvian entity's shares owned by the foreign entity equals 50% or more of the market value of the foreign entity's shares.
- During any given 12-month period, shares representing 10% or more of the foreign entity's share capital are transferred.

Tax credits and incentives

Foreign tax credit

Pursuant to the PITL, taxpayers may deduct the foreign income taxes paid due to their foreign-source income levied by the PITL, provided that it doesn't exceed the amount that results from applying the average rate of the taxpayer to the incomes obtained abroad, or the tax paid abroad. The amount that, for any circumstance, is not used in the corresponding fiscal year cannot be set off (or compensated) in others fiscal years or be refunded.

Also, the following will be taken into account:

- Tax credit will be granted for the entire tax paid abroad that falls upon income taxed by the PITL.
- Taxes paid abroad, whatever its denomination, shall bear the characteristics of income taxes.
- Tax credit will only be granted when the payment of the foreign income tax is supported by reliable documentation.

Special deduction regime for projects related to scientific research, technological development, and technological innovation

A special deduction regime has been established for projects related to scientific research, technological development, and technological innovation. According to this incentive, taxpayers investing in these projects will be able to deduct 175% or 150% of the expenses incurred in them.

In that sense, the taxpayer may have the following deductions:

- 175% of the expenses incurred if the project is executed directly by the taxpayer or through centres of scientific research, technological development, and technological innovation domiciled in Peru.
- 150% of the expenses incurred if the project is executed by non-domiciled centres of scientific research, technological development, and technological innovation.

There are some requirements that must be fulfilled in order to access the benefit.

Early recovery of VAT

Companies in a preoperative stage with large projects in process may apply for early recovery of VAT prior to commencing operations. An investment agreement with the government (the Ministry of its sector) is required.

Stability agreement

Investors may enter into stability agreements with the government, either under the general regime or specific regimes (i.e. mining and petroleum).

Under the general regime, investors may enter into Juridical Stability Agreements that guarantee the following advantages for a ten-year period:

- Stability of the income tax regime in force at the time the agreement is entered into with respect to dividends and profit distribution.
- Stability of the Peruvian government monetary policy, according to which there is a complete absence of exchange controls, foreign currency can be freely acquired or sold at whatever exchange rate the market offers, and funds can be remitted abroad without any previous authorisation.
- Right of non-discrimination between foreign and local investors.

Under the mining regime, local mining companies may enter into stability agreements of guarantees and investment promotion measures that guarantee the following for 10, 12, or 15 years:

- Stability of the overall tax regime.
- Stability of the overall administrative regime.
- Free disposition of funds (foreign currency) arising from export operations.
- No exchange rate discrimination.
- Free trade of products.
- Stability of special regimes for tax refunds, temporary importation, etc.

Oil and gas companies may enter into stability agreements that guarantee the following for the term of the contract:

- Stability of the overall tax regime.
- Free disposition of funds (foreign currency) arising from export operations.
- Free convertibility of its funds.
- Free trade of products.

Investment promotion in the Amazon

Certain tax benefits with regard to VAT and income tax have been established for taxpayers located in the area designated by the law as the 'Amazon' and that are engaged in the following activities:

- Agriculture and livestock enterprises.
- Aquaculture.
- Fishing.
- Tourism.
- Manufacturing activities linked to the processing, transformation, and commercialisation of primary products originating in the activities listed above and in forest transformation, provided these products are produced in the area.

Special zones - Centres of Export, Transformation, Industry, Commercialisation, and Services (CETICOS)

CETICOS are geographical areas duly delimited with customs primary zone status and special treatment, destined to generate development poles through industrial, *maquila*, assembling, or storage activities. CETICOS are located in Paita, Ilo, and Matarani cities.

Agribusiness and agro-exporting activities may be performed within a CETICOS. Agribusiness activity is primarily the transformation of agro-farming products produced in the country. Such transformation must be carried out at CETICOS.

Companies engaged in industrial, *maquila*, or assembling activities, established or set up in the CETICOS, until 31 December 2022, are exempt from income tax, VAT, excise tax, municipal promotion tax, as well as from any other taxes, fees, contributions levied by the Central Administration, and even taxes that require express exempt regulation.

Withholding taxes

Domestic corporations are required to withhold income tax with respect to income paid to non-resident entities at the following rates:

Type of payment	WHT (%)
Dividends or profit distributions	5
Interest on non-related party loans, provided certain requirements are fulfilled	4.99
Interest on related party loans	30
Interest paid by Peruvian financial entities or banks to foreign beneficiaries for credit lines used in Peru	4.99
Royalties	30
Digital services	30
Technical assistance	15
Lease of vessels or aircraft	10
Other income	30
Sale of securities within Peru (Lima Stock Exchange)	0 or 5
Sale of securities outside Peru	30

Note that resident taxpayers may not deduct the WHT of a third party, except in the case of loans provided by non-resident creditors, to the extent that the debtor has contractually assumed the obligation of bearing the WHT cost.

If the retribution for technical assistance exceeds 140 tax units, a report issued by an audit firm will be required, in which is stated that the technical assistance has been effectively rendered in order to apply the 15% WHT rate; otherwise, a WHT rate of 30% will apply.

Capital gains derived from the sale of stocks issued by a Peruvian company through the Lima Stock Exchange are taxed at a 0% or 5% rate. *See Capital gains in the Income determination section for a description of an exemption granted as of January 2016 until December 2019*.

In the case of the services mentioned below that entail the execution of activities both in Peru and abroad, non-resident entities are subject to a 30% WHT (except for the lease of vessels and aircraft, which are subject to a 10% WHT) on deemed Peru-source income determined by applying the following percentages to gross income:

Type of payment	Deemed Peruvian-source income (%)
Insurance	7
Lease of vessels	80
Lease of aircraft	60
Air transport	1
Maritime transport	2
Telecom services	5
International news services	10
Distribution of movies, records, and similar products	20
Supply of containers	15
Demurrage of containers	80
Rights for broadcasting live foreign TV shows within Peru	20

Tax treaties

Peru has entered into treaties with Brazil, Canada, Chile, Korea, Mexico, Portugal, and Switzerland regarding double taxation on income tax under the Organisation for Economic Co-operation and Development (OECD) Model. Double taxation treaties (DTTs) with Spain and Thailand are not in force, as ratification by the Peruvian Congress is still pending. In addition, Peru, as a member of the Andean Community, which also includes Bolivia, Colombia, and Ecuador, is subject to a double-taxation standard (based in source income and not on the OECD Model).

Please see the chart below for the reduced WHT rates that apply under DTTs in force.

	WHT (%)				
Recipient	**Dividends**	**Interest**	**Royalties**	**Technical assistance**	**Digital services**
Non-treaty	5	4.99/30	30	15	30
Treaty:					
Brazil	10/15 (1)	15	15	15	15
Canada	10/15 (1)	15	15	N/A	N/A
Chile	10/15 (1)	15	15	N/A	N/A
Korea	10	15	15	10	N/A
Mexico	10/15 (1)	15	15	N/A	N/A
Portugal	10/15 (1)	10/15 (2)	15	10 (3)	N/A
Switzerland	10/15 (1)	10/15 (2)	15	10	10

Notes

1. The lower rate applies in case the beneficial owner is a company that controls at least 20% (Brazil), 10% (Canada, Portugal, and Switzerland), or 25% (Chile and Mexico) of the voting power in the company paying the dividends.
2. The lower rate applies to loans from banks (Portugal and Switzerland) and sale on credit of industrial, commercial, and scientific equipment (Switzerland).
3. The treaty rate applies to technical assistance in connection with copyrights, goods, or rights that generate royalties.

Tax administration

Taxable period

According to law, the fiscal year is the calendar year.

Tax returns

The filing deadline for the income tax return is generally the first week of April. The system is one of self-assessment, but the tax return filed with the tax authorities is subject to review.

Payment of tax

Income tax payments are due in 12 monthly instalments. The due date for the final income tax payment for a year is generally the first week of April.

The estimated payment calculation system has been established, and the amount of the estimated payment will be the greater of the result of multiplying the net revenue of the month by (i) 1.5% or (ii) the applicable coefficient. The coefficient is calculated by dividing the income generated in the previous fiscal year by the income tax that was determined.

Tax authority

The National Superintendency of Customs and Tax Administration (SUNAT) is responsible for administering all of the aforementioned taxes (income tax, VAT, etc.). Companies resident in Peru must be registered with the tax administration (Taxpayer's Registry).

The Tax Court is a specialised administrative tribunal, which depends on the Ministry of Economy and Finance, but is otherwise autonomous regarding its specific functions. Its mission is to rule over tax controversies that may arise between the tax administration and the taxpayers, by interpreting and applying the corresponding tax legislation, issuing mandatory observance jurisprudence, and establishing homogenous criteria that continue to support the progress of the tax system.

Finally, taxpayers are entitled to file an appeal before the Judiciary (Court) against resolutions issued by the Tax Court, but payment of the tax debt must be performed or guarantees must be provided.

Tax audit process

The tax audit performed by the SUNAT includes all the aspects of the tax and period being subject to review. The tax audit is formal, and the process is fully regulated.

The SUNAT is also able to conduct partial audits of limited scope.

Statute of limitations

Pursuant to the Peruvian tax legislation, the SUNAT is entitled to audit taxpayers in order to assess their tax liabilities, request the payment of any due tax, and assess any applicable penalty for up to (i) four years from 1 January of the year following the date the corresponding tax return had to be filed, (ii) six years to the extent that the corresponding tax return was not filed, and (iii) ten years when the tax withheld by the taxpayer has not been paid to the SUNAT.

Topics of focus for tax authorities

The SUNAT mainly focuses on the following topics:

- Deduction of expenses, including cost share expenses.
- Market value of transactions between related parties.
- Peruvian source income WHT.
- Income tax advance payments.

General Anti-avoidance Rule (GAAR)

The GAAR (provision XVI of the Tax Code) allows the SUNAT to consider the acts, situations, and economic activities performed, established, or desired by the taxpayers in order to determine the real nature of the taxable event. To this extent, provision XVI establishes that when tax evasion is detected, the SUNAT is entitled to collect the tax debt and fines; reduce the amount of balances due, NOLs, or tax credits; or eliminate any tax advantage, without prejudice, to recover any amount that was wrongfully reimbursed.

While interpreting the tax legislation, substance should be selected over a legal form. The fact that a taxpayer's transactions are legal does not imply that they are acceptable with reference to the underlying meaning embedded in the tax rules. Thus, where there is no business purpose except to obtain a tax benefit, the SUNAT should challenge such transactions as artificial and apply the corresponding tax rules.

However, the faculty of the SUNAT to apply provision XVI of the Tax Code has been suspended, with the exception of the first and last paragraphs of said provision.

Other issues

Foreign Account Tax Compliance Act (FATCA)

A Model 1 Intergovernmental agreement (IGA) is treated as 'in effect' by the United States (US) Treasury as of 1 May 2014. The US and Peruvian governments have reached an agreement in substance, and Peru has consented to disclose this status. In accordance with this status, the text of such IGA has not been released, and financial institutions in Peru are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Peru as a full member of the OECD

Victor Shinguiyama, the national Superintendent of the Peruvian tributary administration, pointed out that Peru will initiate the exchange of financial and tributary information with more than 100 countries from 2020.

Significant developments

Tax Reform for Acceleration and Inclusion (TRAIN)

On 19 December 2017, the President signed into law Republic Act No. 10963, otherwise known as the Tax Reform for Acceleration and Inclusion (TRAIN) law. The law amends several provisions of the National Internal Revenue Code of 1997 on individual income taxation, passive income taxation for corporations, estate tax, donor's tax, value-added tax (VAT), excise tax, and documentary stamp tax, among others.

The TRAIN law took effect on 1 January 2018, following its complete publication in the Official Gazette on 27 December 2017. The affected sections of this summary were updated accordingly.

Reinstatement of Notice of Informal Conference in the tax audit process

Revenue Regulation No. 7-2018 reinstated the issuance of a Notice of Informal Conference during tax audits.

Under this Revenue Regulation, the taxpayer shall be informed, in writing, by the concerned tax office of the discrepancy in the taxpayer's payment of one's internal revenue taxes for the purpose of an Informal Conference to afford the taxpayer with an opportunity to present one's side.

The Informal Conference must be held within 30 days from receipt of the notice. If it is found that the taxpayer is still liable for deficiency taxes, and the taxpayer is not amenable, the tax office shall proceed to issue a deficiency tax assessment.

Reversion of authority to accredit and register customs brokers and importers to the Bureau of Customs (BOC)

This Order was issued to revert the authority to accredit and register customs brokers and importers to the Bureau of Customs (BOC) for purposes of simplifying the process. The Importer's Clearance Certificates (ICC) and Broker's Clearance Certificates (BCC) are no longer pre-requisites in securing accreditation from the BOC since the Bureau of Internal Revenue (BIR) will no longer accept ICC and BCC applications effective 1 March 2018.

Pending legislation

Please note this information is current as of 1 June 2018. Any changes in current legislation will be announced after 1 June 2018. Please visit the Worldwide Tax

Summaries website at *www.pwc.com/taxsummaries* to see any significant corporate tax developments that occurred after 1 June 2018.

Taxes on corporate income

A domestic corporation is subject to tax on its worldwide income. On the other hand, a foreign corporation is subject to tax only on income from Philippine sources (*see the descriptions of Resident foreign corporations and Non-resident foreign corporations below*).

Domestic corporations

The following corporate income tax (CIT) rates apply to domestic corporations:

Income	CIT rate (%)
In general, on net income from all sources.	30
Minimum corporate income tax (MCIT) on gross income, beginning in the fourth taxable year following the year of commencement of business operations. MCIT is imposed where the CIT at 30% is less than 2% MCIT on gross income.	2
Proprietary educational institutions and non-profit hospitals, on net income if gross income from unrelated trade, business, and other activities does not exceed 50% of the total gross income from all sources.	10
Non-stock, non-profit educational institutions (all assets and revenues used actually, directly, and exclusively for educational purposes) and other non-profit organisations.	Exempt

Certain passive income from domestic sources is subject to final tax rather than ordinary income tax (*see the Income determination section*).

Improperly accumulated earnings tax

An improperly accumulated earnings tax of 10% is imposed on improperly accumulated income. The tax applies to every corporation formed or used for the purpose of avoiding income tax with respect to its shareholders, or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed. Exceptions are made for publicly held corporations, banks and non-bank financial intermediaries, and insurance companies.

Resident foreign corporations

Resident foreign corporations (i.e. foreign corporations engaged in trade or business in the Philippines through a branch office) are taxed in the same manner as domestic corporations (except on capital gains on the sale of buildings not used in business, which are taxable as ordinary income), but only on Philippine-source income.

International carriers are subject to an income tax of 2.5% on their gross Philippine billings unless a lower rate is available under an existing tax treaty. Exemption from this tax is also available under international agreements to which the Philippines is a signatory or on the basis of reciprocity in cases where the home country of the international carrier grants income tax exemption to Philippine carriers.

Income of offshore banking units (OBUs) and foreign currency deposit units (FCDUs) of depository banks from foreign currency transactions with non-residents, other OBUs, or FCDUs and local commercial banks (including branches of foreign banks) authorised by the *Bangko Sentral ng Pilipinas* (BSP; central bank) to transact business with OBUs and FCDUs are exempt from all taxes except net income specified by the Secretary of Finance upon recommendation of the Monetary Board. Interest income from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to a 10% final income tax.

Regional or area headquarters of multinational corporations that do not earn or derive income from the Philippines, and that act as supervisory, communications, and coordinating centres for their affiliates, subsidiaries, or branches in the Asia-Pacific region and other foreign markets are not subject to CIT.

Regional operating headquarters (ROHQ) pay a tax of 10% on their taxable income. An ROHQ is a branch established in the Philippines by a multinational company that is engaged in any of the following services: general administration and planning, business planning and coordination, sourcing and procurement of raw materials and components, corporate finance advisory services, marketing control and sales promotion, training and personnel management, logistic services, research and development services and product development, technical support and maintenance, data processing and communication, or business development.

Non-resident foreign corporations

In general, non-resident foreign corporations are taxed on gross income received from sources within the Philippines at 30%, except for reinsurance premiums, which are exempt. Interest on foreign loans is taxed at 20%. Dividends from domestic corporations, however, are subject to a final withholding tax (WHT) at the rate of 15% if the country in which the corporation is domiciled does not impose income tax on such dividends or allows a tax deemed paid credit of 15%.

Lower rates or exemption on the above income may be available under an applicable tax treaty.

Rentals and charter fees payable to non-resident owners of vessels chartered by Philippine nationals are subject to a final tax of 4.5%. Rentals, charters, and other fees derived by non-resident lessors of aircraft, machinery, and other equipment are subject to a final tax of 7.5%.

Local income taxes

See Local government taxes in the Other taxes section for a description of local taxes on sales or receipts.

Corporate residence

A domestic corporation is a corporation that is created or organised under Philippine laws. A foreign corporation that is duly licensed to engage in trade or business within the Philippines is referred to as a 'resident foreign corporation'.

Permanent establishment (PE)

The business profits provision in most Philippine treaties permits the Philippines to tax only those profits attributable to a PE. While Philippine treaties adopt the United Nations (UN) Model Convention, Organisation for Economic Co-operation and Development (OECD) commentaries have often been cited by tax authorities to support their interpretation of treaty provisions. The main implication is that most

Philippine treaties contain a rule deeming a PE to arise when services are performed in the Philippines for a specified period of time.

Other taxes

Value-added tax (VAT)

VAT applies to practically all sales of services and imports, as well as to the sale, barter, exchange, or lease of goods or properties (tangible or intangible). The tax is equivalent to a uniform rate of 12%, based on the gross selling price of goods or properties sold, or gross receipts from the sale of services. On importation of goods, the basis of the tax is the value used by the Bureau of Customs (BOC) in determining tariff and customs duties plus customs duties, excise taxes, if any, and other charges. Where the valuation used by the BOC is by volume or quantity, the VAT basis is the landed cost plus excise taxes, if any.

Certain transactions are zero-rated or exempt from VAT. Export sales by VAT-registered persons are zero-rated.

Certain sales of services exempt from VAT, including services provided by financial intermediaries, are subject to percentage taxes based on gross sales, receipts, or income. A 3% percentage tax also applies to persons who are not VAT-registered because their annual sales or receipts do not exceed the VAT threshold of 3 million Philippine pesos (PHP), as increased by the TRAIN law.

Some of the VAT rules that were amended under the TRAIN are as follows:

- VAT exemption for lease of a residential unit increased from PHP 12,800 to PHP 15,000 and is no longer subject to automatic adjustment.
- Beginning in 2021, the threshold of the VAT-exempt sale of a house and lot and other residential dwellings will be reduced to PHP 2 million and sale of a residential lot will be subject to VAT.
- Upon establishment of an enhanced VAT refund system, 12% VAT will apply on:
  - Sales of raw materials or packaging materials to a non-resident buyer for delivery to resident local export-oriented enterprises.
  - Sales of raw materials or packaging materials to export-oriented enterprises whose export sales exceed 70% of total annual production.
  - Those considered export sales under Executive Order No. 226, otherwise known as the Omnibus Investment Code of 1987, and other special laws.
  - Processing, manufacturing, or repacking goods for other persons doing business outside the Philippines which goods are subsequently exported, where the services are paid for in acceptable foreign currency and accounted for in accordance with the rules and regulations of the BSP.
  - Services performed by subcontractors and/or contractors in processing, converting, or manufacturing goods for an enterprise whose export sales exceed 70% of total annual production.
- Additional VAT exemptions:
  - Sale or lease of goods and services to senior citizens and persons with disabilities as provided under relevant laws.
  - Sale of drugs and medicines for diabetes, high cholesterol, and hypertension starting in 2019.
  - Sale of gold to the BSP (previously VAT zero-rated).

- Transfers of property pursuant to Section 40(C)(2) of the Tax Code.
- Association dues, membership fees, and other assessments and charges collected by condominium corporations.

Customs duties

Applicable customs duties are determined based on the tariff classification of the import product. As with the rest of the Association of South East Asian Nations (ASEAN) countries, tariff classification in the Philippines is based on the ASEAN Harmonised Tariff Nomenclature (AHTN), which is patterned after the Harmonised Commodity Classification and Coding System (HS) Convention and its 2002 revisions. The latest edition, HS Code 2012, entered into force on 1 January 2012. With HS Code 2012, the overall AHTN tariff lines were reduced by 247, or an approximately 4% cut in the number of AHTN tariff lines in 2010. Although 267 classification rulings were issued to address commonly raised valuation and tariff classification, it is still advisable that tariff classification rulings from the Philippine Tariff Commission be secured prior to importation into the Philippines in case of uncertainty as to the correct classification of a product. Note that while the tariff classification rulings issued by the Philippine Tariff Commission do not prevent the BOC from conducting its own verification, these rulings carry persuasive reference in support of the classification and duty rate used by an importer.

The Philippines adopts the World Trade Organization (WTO) Valuation Agreement, where the declared invoice price is used as the basis for determining customs duties.

As a protective measure, the Philippines retains higher tariff rates (20% to 50%) on sensitive agricultural products, such as grains, livestock and meat products, sugar, certain vegetables, and coffee. A few agricultural commodities are subject to minimum access volumes, but these represent less than 1% of all tariff lines.

In view of the existing free trade agreements in the region, such as the ASEAN Free Trade Area (AFTA), the ASEAN-China Free Trade Area (ACFTA), the ASEAN-Korea Free Trade Area (AKFTA), the ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), the ASEAN-Japan Comprehensive Economic Partnership Agreement (AJCEPA), the ASEAN-INDIA Free Trade Area (AIFTA), the European Free Trade Association (EFTA), and the Philippine-Japan Economic Partnership Agreement (PJEPA), the Philippines has taken steps to progressively eliminate tariffs. Tariff reductions for the Philippines range from 10% to 35% for most products included in the Normal Track list.

Excise taxes

Excise taxes apply to services and to goods manufactured or produced in the Philippines for domestic sales, consumption, or for any other disposition and to things imported.

Below is the new excise tax schedule under the TRAIN law:

Manufactured oils and other fuels

Description	Units	2018 (PHP)	2019 (PHP)	2020 (PHP)
Lubricating oils and greases	Per litre	8.00	9.00	10.00
Processed gas	Per litre	8.00	9.00	10.00
Waxes and petrolatum	Per kilo	8.00	9.00	10.00
Denatured alcohol	Per litre	8.00	9.00	10.00

Description	Units	2018 (PHP)	2019 (PHP)	2020 (PHP)
Naphtha	Per litre	7.00	9.00	10.00
Unleaded premium gasoline	Per litre	7.00	9.00	10.00
Aviation turbo jet fuel	Per litre	4.00	4.00	4.00
Kerosene	Per litre	3.00	4.00	5.00
Diesel fuel oil	Per litre	2.50	4.50	6.00
Liquefied petroleum gas	Per kilo	1.00	2.00	3.00
Asphalts	Per kilo	8.00	9.00	10.00
Bunker fuel oil	Per litre	2.50	4.50	6.00
Petroleum coke	Per ton	2.50	4.50	6.00

Automobiles

Automobile (PHP)		
Over	**Up to**	**Excise tax rate (%)**
0	600,000	4
600,000	1,000,000	10
1,000,000	4,000,000	20
4,000,000		50

Hybrid vehicles shall be subject to 50% of the applicable excise tax rates.

Purely electric vehicles and pick-ups shall be exempt from excise tax.

Sweetened beverages

Description	Excise tax (PHP/litre)
Using purely caloric sweetener, purely non-caloric sweetener, or mixture of both	6.00
Using purely high-fructose corn syrup	12.00
Using purely coconut sap sugar / purely steviol glycosides	Exempt

Cigars and cigarettes

Effective date	Excise tax (PHP/pack)
1 January 2018	32.50
1 July 2018	35.00
1 January 2020	37.50
1 January 2022	40.00

Cosmetic procedures

5% excise tax is imposed on gross receipts from invasive cosmetic procedures and surgeries directly and solely towards altering or enhancing the patient's appearance for aesthetic purposes. However, this will not cover procedures necessary to ameliorate a deformity arising from, or directly related to, a congenital or developmental defect or abnormality, a personal injury resulting from an accident or trauma, or disfiguring disease, tumour, virus or infection.

Documentary stamp tax (DST)

DST is payable at varying rates on various documents and transactions. The following table contains selected examples as revised under the TRAIN law:

Taxable document/transaction (tax base)	DST rate
Original issue of shares	PHP 2.00 for every PHP 200 of the par value or actual consideration for no-par shares
Sale, barter, or exchange of shares of stock listed and traded through the local stock exchange	Exempt
Other sales agreement, agreement to sell, memoranda of sales, delivery or transfer of shares or certificates of stock	PHP 1.50 for every PHP 200 of the par value or 50% of the DST paid upon original issuance of no-par shares
Certificate of profits, interest in property or accumulations	PHP 1.00 for every PHP 200 of the face value
Non-exempt debt instruments	PHP 1.50 for every PHP 200 of the issue price.
Bank check, draft, certificate of deposit not bearing interest, other instruments	PHP 3.00 for each instrument
Deed of sale, conveyance of real property	PHP 15 for each PHP 1,000 of consideration/ value or fractional part thereof
Bills of exchange or drafts	PHP 0.60 on each PHP 200 of the issue price
Acceptance of bills of exchange and others	PHP 0.60 on each PHP 200 of the face value
Foreign bills of exchange and letters of credit	PHP 0.60 on each PHP 200 of the face value
Policies of annuities or other instruments	PHP 1.00 on each PHP 200 of premium or instalment payment
Pre-need plans	PHP 0.40 on each PHP 200 of the premium or contribution collected
Certificates	PHP 30.00 per certificate
Warehouse receipts	PHP 30.00 per warehouse receipt (valued at PHP 200 or more)
Jai-alai, horse race tickets, lotto, or other authorised number games	PHP 0.20 on every PHP 1.00 cost of the ticket
Bills of lading or receipts	Exempt if bill/receipts not exceeding PHP 100; PHP 2.00 for bill/receipts not exceeding PHP 1,000; or PHP 20.00 for bill/receipts exceeding PHP 1,000
Proxies	PHP 30.00 on each proxy of voting
Powers of attorney	PHP 10.00 on each power of attorney; except acts connected with claims due to/from the government
Leases and other hiring agreements	PHP 6.00 for the first PHP 2,000 + PHP 2.00 for every PHP 1,000 thereafter
Mortgages, pledges, and deeds of trust	PHP 40.00 for the first PHP 5,000 + PHP 20.00 on every PHP 5,000 thereafter

DST on life insurance policies

Life insurance policy (PHP)	DST (PHP)
Does not exceed 100,000	Exempt
Exceeds 100,000 but does not exceed 300,000	20.00
Exceeds 300,000 but does not exceed 500,000	50.00
Exceeds 500,000 but does not exceed 750,000	100.00
Exceeds 750,000 but does not exceed 1,000,000	150.00
Exceeds 1,000,000	200.00

DST on charter party and similar instruments

Registered tonnage	DST rate
Does not exceed 1,000 tons	PHP 1,000 + an additional tax of PHP 100 for each month or fraction of a month in excess of 6 months

Registered tonnage	DST rate
Exceeds 1,000 tons and does not exceed 10,000 tons	PHP 2,000 + an additional tax of PHP 200 for each month or fraction of a month in excess of 6 months
Exceeds 10,000 tons	PHP 3,000 + an additional tax of PHP 300 for each month or fraction of a month in excess of 6 months

Capital gains tax

Capital gains arise from the sale or exchange of 'capital assets'. Capital assets are property held by the taxpayer (whether or not connected with its trade), other than the following:

- Inventories or property held primarily for sale to customers in the ordinary course of business.
- Real property or depreciable property used in trade or business.
- Property of a kind that would be included in the inventory of the taxpayer if on hand at the close of the taxable year.

Capital losses are deductible only to the extent of capital gains.

There are no holding period requirements for capital assets of corporations.

A 6% final tax is imposed on the higher of the gross selling price or fair market value upon the sale, exchange, or disposition of land or buildings not actually used in the business of a corporation. The tax is withheld by the buyer at the time of sale.

Net capital gains derived from the sale, exchange, transfer, or similar transactions of shares of stock not traded through a local stock exchange are now taxed at a flat 15% rate under the TRAIN law. This new rate only applies to domestic corporations. For foreign corporations, the old rates are applicable (i.e. 5% on the first PHP 100,000 of gains, and 10% on gains in excess of PHP 100,000). Sales of shares of stock listed and traded on a local stock exchange, other than the sale by a dealer in securities, are subject to a stock transaction tax of 0.5% based on the gross selling price, provided the listed corporation observes a minimum public ownership of at least 10% based on the company's issued and outstanding shares, exclusive of any treasury shares or such percentage as may be prescribed by the Securities and Exchange Commission (SEC) or Philippine Stock Exchange (PSE), whichever is higher; otherwise, the 5%/10% tax shall apply.

Capital gains from the sale of bonds, debentures, or other certificates of indebtedness with a maturity of more than five years are exempt from tax.

A tax is levied on every sale, barter, exchange, or other disposition through an initial public offering (IPO) of shares of stock in closely held corporations. A 'closely held corporation' is any corporation of which at least 50% in value of the total outstanding capital stock, or at least 50% of the total combined voting power of all classes of stock entitled to vote, is owned directly or indirectly by, or for, not more than 20 individuals. The tax rates provided hereunder are based on the proportion of the gross selling price, or gross value in money, of the shares of stock sold, bartered, exchanged, or otherwise disposed of to the total outstanding shares of stock after listing on the local stock exchange.

Proportion of sale to total shares	Tax rate (%)
25% or less	4
Over 25% but not over 33.33%	2
Over 33.33%	1

Payroll taxes

There are no payroll taxes other than social security contributions (*see below*).

Social security contributions

Corporations doing business in the Philippines must be registered with social institutions, such as the Social Security System (SSS), Home Development Mutual Fund (HDMF), and Philippine Health Corporation (PHIC), upon employment of any employee and prior to the due date of the remittance of any social contributions.

Employee contributions for social security are deducted from the employee's salary payments. For 2018, the maximum monthly deductions remain at PHP 581.30 for SSS, PHP 100 for HDMF, and PHP 550.00 for PHIC.

Employers are also required to make contributions. Employers' maximum contribution for each employee is PHP 1,178.70 per month for SSS. Employer contributions for HDMF and PHIC are generally of the same amount as the employee contributions.

Fringe benefits tax

Under the TRAIN law, a final tax of 35%, payable by the employer, is imposed on the grossed-up monetary value of fringe benefits (e.g. housing, expense accounts, vehicles of any kind, household personnel, interest on loans at lower than market rates [the current benchmark rate is 12%], membership dues for social and athletic clubs, foreign travel expenses, holiday and vacation expenses, educational assistance, insurance) furnished or granted to managerial or supervisory personnel by the employer. An exception is for fringe benefits required by the nature of or necessary to the trade, business, or profession of the employer, or when the fringe benefit is for the convenience or advantage of the employer.

The following fringe benefits are not subject to the tax:

- Those authorised and exempted from tax under special laws.
- Contributions of the employer for the benefit of the employee to retirement, insurance, and hospitalisation benefit plans.
- Those granted to rank-and-file employees (however, the employees may be subject to WHT on compensation).
- Those of relatively small value or *de minimis* benefits.

The fringe benefits tax is payable on a calendar quarter basis and is an additional deductible expense for the employer. Fringe benefits already subjected to fringe benefits tax will no longer form part of the employee's taxable income.

The grossed-up monetary value of the fringe benefit is generally computed by dividing the actual monetary value of the benefit by 65%.

Donor's taxes

Donor's tax is a tax on a donation or gift, and is imposed on the gratuitous transfer of property. It shall apply whether the transfer is in trust or otherwise, whether the gift is direct or indirect, and whether the property is real or personal, tangible or intangible.

Under the TRAIN law, the donor's tax rate is fixed at 6% based on total gifts in excess of PHP 250,000 made during the calendar year whether the donee is a stranger or not.

Local government taxes

Local government units impose local business taxes, which are generally based on the gross sales or gross receipts of the prior year, and real property taxes, which are levied annually on the basis of a fixed proportion of the value of the real property (taxable value). The local business tax rate varies depending on the location of the business, but generally shall not exceed 3%. Real property located in a province may be subject to real property tax of not more than 1% of its taxable value, while real property in a city (or municipality in Metro Manila) may be subject to real property tax of not more 2% of its taxable value.

Branch income

The income tax rate on branch profits is the same as on corporate profits. In general, profits remitted abroad by a branch office are subject to a 15% tax rate, based on the total profits applied or earmarked for remittance, without any deduction for the tax component thereof. A lower rate may apply under certain tax treaties. Profits from qualified activities remitted by a branch registered with the Philippine Economic Zone Authority (PEZA) are tax exempt.

Income determination

Inventory valuation

Inventories are generally stated at cost or at the lower of cost or market. Last in first out (LIFO) is not allowed for tax purposes. Generally, the inventory valuation method for tax purposes must conform to that used for financial reporting purposes.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information.*

Dividend income

Dividends received by a domestic or resident foreign corporation from another domestic corporation are not subject to tax. These dividends are excluded from the taxable income of the recipient.

Dividends received by a non-resident foreign corporation from a domestic corporation are subject to a general final WHT at the rate of 30%. A lower rate of 15% applies if the country in which the corporation is domiciled either does not impose income tax on such dividends or allows a tax deemed paid credit of 15%. Treaty rates ranging from 10% to 25% may also apply if the recipient is a resident of a country with which the Philippines has a tax treaty (*see the Withholding taxes section*).

Stock dividends

A Philippine corporation can distribute stock dividends tax-free, proportionately to all shareholders.

Interest income

Interest on bank savings, time deposits, deposit substitutes, and money market placements received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%, while interest income derived from FCDU deposits is subject to a final tax of 15% under the TRAIN law. Such income is excluded from gross income reportable in CIT returns.

Interest income of OBUs and FCDUs from foreign currency loans granted to residents other than OBUs or local commercial banks shall be subject to 10% tax.

Royalty income

Royalties received by domestic or resident foreign corporations from a domestic corporation are subject to a final tax of 20%.

Other significant items

Other items exempt from CIT include the following:

- Proceeds of life insurance policies.
- Return of policy premium.
- Gifts, bequests, and devises.
- Interest on certain government securities.
- Income exempt under a treaty.
- Gains from sale, exchange, or retirement of bonds.
- Gains from redemption of shares of stock in mutual fund companies.

Foreign income

A Philippine (domestic) corporation is taxed on its worldwide income. A domestic corporation is taxed on income from foreign sources when earned or received, depending on the accounting method used by the taxpayer.

Income earned through a foreign subsidiary is taxed only when paid to a Philippine resident shareholder as a dividend. Meanwhile, income earned through a foreign branch is taxed as it accrues. The losses incurred by the foreign branch are deductible against other income earned by the Philippine corporation.

Double taxation is generally relieved through a credit for foreign taxes. However, a taxpayer can take a deduction for foreign taxes instead, if that leads to a more favourable outcome.

Deductions

Corporate taxpayers can avail themselves of the optional standard deduction computed at 40% of gross income. The optional standard deduction is *in lieu* of the itemised operating expenses.

Depreciation and depletion

Depreciation is generally computed on a straight-line basis, although any reasonable method may be elected if the aggregate amount of depreciation, plus salvage value at the end of the useful life of the property, will equal the cost of the property. Gain on the sale of depreciated property is taxable as ordinary income. Generally, tax depreciation should conform to book depreciation, unless the former includes incentives.

Properties used in petroleum operations may be depreciated over a period of ten years using the straight-line or declining-balance method, at the option of the service contractor. Properties used in mining operations with expected life of more than ten years may be depreciated over any number of years between five years and their expected life.

A cost depletion allowance is available as follows:

- For oil and gas wells, depletion is based on actual reduction in flow and production ascertained, not by flush flow, but by the settled production or regular flow.
- For mines, depletion is allowable up to an amount not to exceed the market value, as used for purposes of imposing the mining *ad valorem* taxes, of the products mined and sold during the year.

Goodwill

Goodwill is not deductible for tax purposes.

Start-up expenses

Start-up expenses are deductible when incurred.

Interest expenses

The allowable deduction for interest expense is reduced by an amount equal to 33% of interest income that is subject to final tax.

Bad debts

Bad debts are deductible expenses when written-off, subject to certain requirements.

Charitable contributions

The deduction for charitable contributions ordinarily may not exceed 5% of taxable income. However, contributions to certain institutions are 100% deductible, subject to certain conditions.

Entertainment expenses

Entertainment, amusement, and recreation expenses should not exceed 0.5% of net sales for taxpayers engaged in the sale of goods or properties, or 1% of net revenue for taxpayers engaged in the sale of services, including professionals and lessors of properties.

Special deductions

Special deductions are allowed for certain businesses (e.g. insurance, mining, petroleum, and real estate investment trust).

Fines and penalties

Fines and penalties are deductible as necessary and ordinary business expenses. Surcharge and compromise penalty imposed for non-payment or late payment of taxes is not deductible for tax purposes.

Taxes

Corporate taxpayers can claim a deduction for all taxes paid or accrued within the taxable year in connection with their trade or business, except for the following:

- Philippine CIT.
- Income taxes imposed by authority of any foreign country, unless the taxpayer elects to take a deduction *in lieu* of a foreign tax credit.
- Donor's taxes.
- Taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

In the case of a foreign corporation, deductions for taxes are allowed only if they are connected with income from sources within the Philippines.

Net operating losses

A net operating loss for any taxable year immediately preceding the current taxable year, which had not been previously offset as a deduction from gross income, may be carried over as a deduction from gross income for the next three consecutive taxable years immediately following the year of this loss (except losses during the period when the taxpayer was tax-exempt), provided there has been no substantial change in the ownership of the business or enterprise.

For mines, other than oil and gas wells, a net operating loss calculated without the benefit of incentives provided for under Executive Order (EO) No. 226, or the Omnibus Investments Code of 1987, as amended, incurred in any of the first ten years of operation may be carried over as a deduction from taxable income for the next five years immediately following the year of such loss.

Loss carrybacks are not allowed.

Payments to foreign affiliates

A Philippine corporation can claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are equal to what it would pay an unrelated entity, and the appropriate WHTs are withheld and remitted.

The registration of licensing and management agreements, now known as technology transfer arrangements (TTAs), has been liberalised. Only TTAs not conforming to certain provisions of the Intellectual Property Code require approval by, and registration with, the Documentation, Information, and Technology Transfer Bureau of the Intellectual Property Office (formerly Bureau of Patents, Trademarks, and Technology Transfer) to render the contracts enforceable.

Head office expense allocations

A resident foreign corporation is allowed to claim allocated head office expenses as a deduction, subject to certain requirements.

Group taxation

There is no group taxation in the Philippines.

Transfer pricing

Transfer Pricing Regulations govern the cross-border and domestic transactions between associated enterprises. The Regulations state that the 'arm's-length principle' shall be adopted in determining the transfer price in related-party transactions. The application of the arm's-length principle may follow a 'three-step' approach prescribed by the BIR under the Regulations, to wit: (i) the conduct of a comparability analysis, (ii) the identification of the tested party and the appropriate transfer pricing method, and (iii) the determination of the arm's-length results.

Taxpayers must keep adequate documentation supporting their transfer prices so that they can defend their transfer pricing analysis, mitigate the risk of transfer pricing adjustments arising from tax examinations, and support their applications for Mutual Agreement Procedure (MAP). There is also a 'contemporaneous' requirement that transfer pricing documents must exist or be brought into existence at the time the taxpayers develop or implement any arrangements that may raise transfer pricing issues. This can generally mean that while transfer pricing documentation is not required to be submitted together with the tax returns, such documents should be retained and submitted to the BIR when required or requested. There is no prescribed period within which such documentation may be made available, but it should be available in cases of audit/investigation.

An Advance Pricing Arrangement (APA) is an agreement entered into between the taxpayer and the BIR to determine in advance an appropriate set of criteria (e.g. method, comparables, appropriate adjustments thereto) to ascertain the transfer prices of controlled transactions over a fixed period of time. It is currently available to taxpayers, but the BIR is still in the process of drafting more detailed guidelines. The APA is not mandatory, but may be advisable since the purpose of the APA is to reduce the risk of transfer pricing re-examination and double taxation.

Transactions entered into prior to the Transfer Pricing Regulations becoming effective in February 2013 shall be governed by the laws and other administrative issuances prevailing at the time the controlled transactions were entered into.

Thin capitalisation

There are generally no thin capitalisation rules in the Philippines.

Controlled foreign companies (CFCs)

There are no CFC rules in the Philippines.

Tax credits and incentives

Foreign tax credit

Domestic corporations are allowed to claim a credit for any income taxes paid to a foreign country, provided that the taxes are not claimed as deductions. Foreign corporations are not allowed foreign tax credits.

Credits for foreign taxes are determined on a country-by-country basis. The amount of foreign tax credit in respect of the tax paid in a country shall not exceed the same proportion of the tax against which the tax credit is taken, which the taxpayer's income from the country bears to its entire taxable income. There is, however, a further limitation based on the total amount of foreign-sourced income that the taxpayer earns. The total amount of foreign tax credits shall not exceed the same proportion of the tax against which the tax credit is taken that the taxpayer's foreign-sourced income bears to its entire taxable income.

Export incentives

Tax incentives available to export enterprises registered with the Board of Investments (BOI) are as follows:

- Income tax holiday (ITH) giving full exemption from CIT for six years for pioneer firms and those locating in less-developed areas and four years for non-pioneer firms. The ITH period starts to run from the date of commercial operation, or target date of operation, whichever is earlier. If prescribed conditions are met, the ITH period may be extended by up to three years. In no case, however, can the total ITH period exceed eight years. Expanding export-oriented firms are also allowed a three-year ITH on the incremental income. Subject to certain exceptions, new and expansion projects located in the National Capital Region (NCR) or Metro Manila are no longer entitled to ITH.
- Tax and duty exemption on imported spare parts and supplies for export producers with a customs bonded manufacturing warehouse exporting at least 70% of annual production, if foreign-owned, or 50%, if Filipino-owned.
- Full deduction of the cost of major infrastructure undertaken by enterprises in less-developed areas.
- Additional deduction of 50% of the incremental labour expense if the prescribed ratio of capital assets to annual labour is met and 100% of the incremental labour if located in less-developed areas within five years from date of registration (this incentive cannot be availed of simultaneously with the ITH).
- Ten-year exemption from taxes and duties on importation of breeding stock and genetic materials.
- Tax credit on domestic breeding stocks and genetic materials (ten years).
- Exemption from wharfage, any export tax, duty, impost, or fees.
- Tax credits equivalent to taxes and duties paid on purchases of raw materials, supplies, and semi-manufactured products forming part of the products for export.

Other incentives

Export and free-trade enterprises, information technology (IT) enterprises, and special economic zone developers/operators (including IT buildings located in Metro Manila and IT parks) registered with PEZA are entitled to an ITH of six years for pioneer firms and four years for non-pioneer firms. Foreign articles brought into the zones will be exempt from import duties and taxes. Local purchases of goods from VAT-registered suppliers outside the economic zones are zero-rated. After the lapse of the ITH period, enterprises registered and operating within special economic zones/export processing zones will pay only a 5% special tax on gross income earned from registered activities *in lieu* of all local and national taxes.

A regional or area headquarters established in the country as a supervisory, communications, and coordination centre for a corporation's subsidiaries, affiliates, and branches in the Asia-Pacific region, and whose headquarters do not derive income from the Philippines, are not subject to any CIT nor VAT and are entitled to certain non-tax incentives.

An ROHQ that is allowed to derive income in the Philippines by performing qualifying business services to its affiliates, subsidiaries, or branches in the Philippines, in the Asia-Pacific Region, and other foreign markets may avail itself of the following incentives:

- Income tax at the preferential rate of 10% of its taxable income.
- Exemption from all kinds of local taxes, fees, or charges imposed by a local government unit, except real property tax on land improvements and equipment.
- Tax and duty-free importation of equipment and materials for training and conferences that are needed and used solely for its functions as an ROHQ and are not locally available, subject to the prior approval of the BOI.
- Importation of new motor vehicles, subject to the payment of corresponding duties and taxes.
- Exemption from travel tax, specific immigration fees, and requirements, subject to certain conditions.

The following are the incentives granted to exporters under the Export Development Act (Republic Act [RA] No. 7844):

- Exemption from Presidential Decree No. 1853 (requiring 100% of Letter of Credit), provided that the importation shall be used for the production of goods and services for export.
- Tax credit for incremental export performance. The tax credit for increase in current export revenues shall be computed as a percentage to be applied on the incremental export revenue converted to pesos at the current rate. The percentages or rates are as follows:
    - For the first 5% increase in annual export revenues over the previous year: 2.5%.
    - For the next 5% increase: 5.0%.
    - For the next 5% increase: 7.5%.
    - In excess: 10%.

  Note that this incentive is not available for exporters enjoying ITH or VAT exemption or whose local VAT is below 10%.

- In addition to the above incentives, all existing incentives being enjoyed by the enterprise if registered with the BOI, PEZA, Subic Bay Metropolitan Authority (SBMA), Clark Development Corporation (CDC), or other ecozone regulating agencies.

Withholding taxes

Corporations and individuals engaged in business are required to withhold the appropriate tax on income payments to non-residents, generally at the rate of 30% in the case of payments to non-resident foreign corporations or 25% for non-resident aliens not engaged in trade or business. *For WHT on resident corporations, see the discussions in the Income determination section*.

Tax treaty rates

For countries with which the Philippines has concluded tax treaties, the maximum rates of taxes to be withheld are as follows:

As of 16 March 2018:

	WHT (%)		
Recipient	**Dividends (1)**	**Interest (2)**	**Royalties**
Non-treaty	15/30 (12)	30	30
Treaty:			
Australia	15/25 (3, 4)	10/15 (5)	15/25 (6)
Austria	10/25 (7)	10/15 (5, 8)	10/15 (6, 9)
Bahrain	10/15 (7)	10	10/15 (10)
Bangladesh	10/15 (11)	15	15
Belgium	10/15 (7)	10	15
Brazil	15/25 (25)	10/15 (5)	15/25 (6)
Canada	15/25 (3, 7)	10/15 (5)	25 (9)
China, People's Republic of	10/15 (7)	10	10/15 (13)
Czech Republic	10/15 (7)	10	10/15 (14)
Denmark	10/15 (11)	10	15
Finland	15 (3, 7)	10/15 (5)	15/25 (15)
France	10/15 (3, 7)	10/15 (5)	15
Germany	5/10/15 (11, 24)	10	10
Hungary	15/20 (3, 11)	15	15 (9)
India	15/20 (3, 7)	10/15 (5, 17)	15/30 (6)
Indonesia	15/20 (3, 11)	10/15 (5)	15/25 (6)
Israel	10/15 (7)	10	15 (9)
Italy	15	10/15 (5)	15/25 (6, 18)
Japan	10/15 (3, 7)	10	10/15 (19)
Korea, Republic of	10/25 (11)	10/15 (5)	10/15 (6)
Kuwait	10/15 (7)	10	20
Malaysia	15/25 (26)	15	15/25 (6, 18)
Netherlands	10/15 (7)	10/15 (5, 16, 17)	10/15 (6)
New Zealand	15	10 (5)	15
Nigeria	12.5/15 (7)	15	20
Norway	15/25 (3, 7)	15	7.5/10/25 (9, 20)
Pakistan	15/25 (3, 11)	10/15 (5)	15/25 (6)
Poland	10/15 (11)	10	15
Qatar	10/15 (7)	10	15
Romania	10/15 (11)	10/15 (5, 16, 17)	10/15/25 (21)
Russia	15	15	15
Singapore	15/25 (3, 22)	10/15 (5)	15/25 (6, 18)
Spain	10/15 (7)	10/15 (5, 16)	10/15/20 (23)
Sweden	10/15 (11)	10	15
Switzerland	10/15 (7)	10	15
Thailand	15	10/15/25 (5)	15/25 (6, 18)
Turkey	10/15 (11)	10	10/15 (13, 19)
United Arab Emirates	10/15 (7)	10	10
United Kingdom	15/25 (3, 7)	10/15 (5)	15/25 (6, 19)
United States	20/25 (3, 7)	10/15 (5)	15/25 (6, 9)
Vietnam	10/15 (11)	15	15

Notes

1. The lower rate generally applies if the beneficial owner of the dividends is a company with a substantial ownership in the dividend paying company.
2. Interest derived by a foreign government or its agencies is typically exempt from Philippine tax. Many treaties also contain special rules for both Philippine and home country taxation of interest paid on instruments secured by a government agency of one of the countries. Such provisions have been excluded from the analysis.
3. A 15% rate applies under domestic law if the home country exempts the dividend from tax or permits a 15% or greater credit for corporate taxes paid by the company paying the dividend.
4. Entitlement to the lower rate depends on how the dividend will be taxed in Australia.
5. The 10% rate applies to interest paid in respect of the public issues of bonds, debentures, or similar obligations.
6. The lower rate applies to royalties paid by an enterprise registered with the Philippine BOI and engaged in preferred areas of activity.
7. The threshold for substantial ownership is 10%.
8. The 10% rate also applies to interest paid by a company registered with the BOI and engaged in preferred pioneer areas of investment in the Philippines.
9. The treaty also contains a most-favoured-nation rule, limiting the Philippine tax on royalties to the lowest rate of Philippine tax that may be imposed on royalties of the same kind paid in similar circumstances to a resident of a third state.
10. The 15% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work including cinematograph films or tapes for television or broadcasting.
11. The threshold for substantial ownership is 25%.
12. *For a description of when each rate applies, see Dividend income in the Income determination section.*
13. The 10% rate applies to the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. Strictly, application of the rate is generally at the discretion of the Philippine Competent Authorities, but the BIR has never raised this as an issue.
14. The 10% rate applies to royalties arising from the use of, or the right to use, any copyright of literary, artistic, or scientific work (other than copyright of cinematograph films), any patent, trademark, design or model, plan, secret formula or process, or from the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
15. The 15% rate applies to royalties paid by an enterprise registered and engaged in preferred areas of activities, and to royalties in respect of cinematographic films or tapes for television or broadcasting, and for the use of, or the right to use, any copyright. The 25% rate applies to other royalties.
16. The 10% rate also applies to interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
17. The 10% rate also applies to interest paid on any loans granted by a bank.
18. The 15% rate also applies to royalties in respect of cinematographic films or tapes for television or broadcasting.
19. The 15% rate applies to royalties paid for the use of, or the right to use, cinematographic films and films or tapes for radio or television broadcasting.
20. The 7.5% rate applies to the lease of containers. The 10% rate applies to royalties paid by an enterprise registered with the BOI. The 25% rate applies to other royalties.
21. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 15% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 25% rate applies to all other royalties.
22. The threshold for substantial ownership is 15%.
23. The 10% rate applies to royalties paid by an enterprise registered with the BOI and engaged in preferred pioneer areas of activity. The 20% rate applies to rentals from cinematographic films and tapes for television or broadcasting. The 15% rate applies to all other royalties.
24. The threshold for substantial ownership is 70% for the 5% rate to apply.
25. The 15% rate applies if the recipient is a company, including a partnership.
26. The 15% rate applies if the recipient is a company.

Tax administration

Taxable period

The accounting period must follow a 12-month fiscal period but may or may not follow the calendar year. Most Philippine companies have a fiscal year that ends in December or March.

Tax returns

Corporations should file their returns and compute their income on the basis of an accounting period of 12 months.

Corporate taxpayers file self-assessed returns. Electronic filing and payment of taxes are available under the Electronic Filing and Payment System (eFPS) of the BIR.

The following corporate taxpayers who are not covered by eFPS are required to use Electronic BIR Forms (eBIRForms) in filing their tax returns:

- Accredited tax agents/practitioners and all their client-taxpayers who authorised them to file on their behalf.
- Accredited printers of principal and supplementary receipts/invoices.
- One-time transaction taxpayers.
- Those who shall file a 'No Payment' return, except senior citizens or persons with disabilities filing their own return, employees deriving purely compensation income and the income tax of which has been withheld correctly, employees qualified for substituted filing but opted to file for an income tax return and are filing for purposes of promotion (Philippine National Police and Armed Forces of the Philippines), loans, scholarships, foreign travel requirements, etc.
- Government-owned or controlled corporations.
- Local government units, except barangays.
- Cooperatives registered with the National Electrifications Administration and Local Water Utilities Administrations.

Taxpayers who are required to file their returns using eFPS or eBIRForms but fail to do so shall be subject to a penalty of PHP 1,000 per return and civil penalties equivalent to 25% of the tax due.

A domestic or resident foreign corporation is required to file income tax returns on a quarterly basis. Within 60 days from the close of the first three quarters of its taxable year, the corporation must file a return summarising its gross income and deductions for the year to date. A final annual income tax return must be filed on or before the 15th day of the fourth month following the close of the taxable year.

Corporate taxpayers must file their income tax returns using one of three different forms, depending on their tax regime (i.e. subject only to the regular income tax, tax exempt, or with mixed income subject to multiple tax rates or special/preferential rates).

Payment of tax

Every corporation files cumulative quarterly income tax returns for the first three quarters and pays the tax due within 60 days after each quarter. A final adjustment return covering the total taxable income of the preceding taxable year must be filed on the 15th day of the fourth month following the close of the taxable year. The balance of the tax due after deducting the quarterly payments must be paid, while the excess may be claimed as a refund or tax credit. Excess estimated quarterly income taxes paid may be carried over and credited against estimated quarterly income tax liabilities for succeeding taxable years. Once the option to carry over has been made, such option is irrevocable, and no cash refund or tax credit certificate (TCC) is allowed, except upon liquidation of the company.

Since additional modes of payment of taxes are now available through credit, debit, and prepaid cards under recently issued Revenue Regulations, taxpayers may choose from the available online payment facilities provided by the Electronic Payment Service Provider (EPSP) to process tax payments. However, only accredited Authorised Agent Banks (AABs) may accept such payments, and accreditation of AABs is subject to compliance with certain conditions under existing Regulations.

Payment of taxes through the Card Payment Facility shall be deemed made on the date and time appearing in the system-generated payment confirmation receipt issued to the taxpayer-cardholder by the AAB-acquirer, provided that the payment was actually received by the BIR. The taxpayer is not relieved of, and has a continuing liability for, such taxes until the payment is actually received by the BIR.

Annual statutory audit

An annual statutory audit is required for all corporations with authorised capital stock or paid-up capital exceeding PHP 50,000, including branches of foreign corporations. It is also required for any corporation whose gross sales or earnings exceed PHP 150,000 in any quarter.

Statute of limitations

There is no statutory obligation on the Tax Commissioner to make an assessment for internal revenue taxes, and most taxes are collected based on the taxpayer's self-calculation. If an assessment is to be issued, however, it must be done within three years from the deadline or the date of actual filing of the return, whichever is later. The taxpayer and the Commissioner can, however, agree in writing to extend this period.

In the case of a false or fraudulent return or of failure to file a return, the tax may be assessed or a proceeding in court for collection may be commenced without assessment at any time within ten years from the discovery of the falsity, fraud, or omission.

Any internal revenue tax that has been assessed within the period of limitation may be collected by distraint or levy or by a proceeding in court within five years following the assessment of the tax.

The prescription periods are suspended in certain circumstances, such as when the offender is absent from the Philippines, when the Commissioner grants a taxpayer's request for a reinvestigation, or when the taxpayer and the BIR agree to extend the prescriptive period for assessment through a written waiver.

In the case of overpayment of tax, a claim for refund or credit may be filed with the BIR within two years from the date of erroneous payment of the tax. If the claim is denied or no decision is received from the BIR, a petition for review may be filed with the Court of Tax Appeals (CTA). This must be filed before the two-year period expires, and in the case of a denied claim, within 30 days from the receipt of the denial.

Topics of focus for tax authorities

During audits, the BIR generally covers all applicable internal revenue taxes. With the issuance of certain regulations in recent years, assessment issues involving transfer pricing, inter-company advances, donor's tax, and improperly accumulated earnings tax have become more prevalent.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

Under FATCA, financial institutions outside the United States shall report each year to the US Internal Revenue Service (IRS) information about accounts held by US citizens. The said financial institutions that fail to comply with FATCA are subject to a 30% WHT on US-sourced 'fixed, determinable, annual, or periodic income', which shall be withheld by their counterparties in the United States.

In the absence of an intergovernmental agreement (IGA), participating foreign financial institutions (FFIs) in the Philippines individually signed an FFI Agreement with the IRS.

Under Model 1 of the IGA, FFIs will provide information on US accounts to the BIR, which information will be relayed to the IRS.

Currently, Model 1 of the IGA is treated as 'in effect' by the US Treasury as of 30 November 2014. The United States and the Philippines have reached an agreement in substance, and the Philippine government has consented to disclose this status. In accordance with this status, the text of such IGA has not been released and financial institutions in the Philippines are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

On 1 December 2016, President Duterte ratified the agreement that was then transmitted to the Senate on 6 December 2016 for concurrence but with no available status to date.

Significant developments

Changes in corporate income tax (CIT) regulations

As of 1 January 2018, separation of income/loss sourced from capital transactions from other income/loss sources has been introduced. Taxpayers now have to recognise revenues and costs related to each 'basket' separately. There is no possibility to set-off income derived from one 'basket' with loss borne in the other 'basket'. Income in both baskets is taxed at 19% CIT. Apart from share/capital transactions, the capital basket includes royalties, license fees, and similar rights.

A limitation of deductibility of financial costs has also been introduced. Deductibility restrictions are applicable both to internal and external financing costs (not only interest). The deductibility limit for the excess of financing costs over financing revenue is set at 30% of tax earnings before interest, taxes, depreciation, and amortisation (EBITDA). The limit will apply if the excess is over 3 million Polish zloty (PLN).

A 'minimum income tax level' for taxpayers holding substantial real estate, which has initial value over PLN 10 million, has been introduced. 'Minimum tax' is payable monthly at 0.035% of the excess of the initial value of the building over PLN 10 million (0.42% annually). Consequently, tax will be due regardless of the level of actual income derived by the taxpayer. This minimum tax can be set-off against CIT if CIT is higher.

There are further changes in CIT deductibility rules, as follows:

- Deductibility of interest from debt push-down structures is excluded.
- Deductibility of costs in sale and lease-back transactions is limited at the level of prior revenues.
- A one-off write-down for fixed assets of small value is possible for assets worth up to PLN 10,000 (previously PLN 3,500).

Changes in transfer pricing rules

As of 1 January 2018, there is a decrease of the minimal revenue-to-income ratio of the tax group from 3% to 2%. The tax group will lose the status of taxpayer retroactively (from the date of registration as a tax group) in case of breach of certain conditions, and companies forming the tax group will be obligated to reconcile for CIT purposes as independent taxpayers retroactively for prior years. Group members will be obligated to set intra-group transaction terms at arm's length. However, there will be no formal obligation to prepare statutory transfer pricing documentation for such transactions.

Costs from related parties, including advisory, management, data processing, marketing, market research, insurance, guarantees, royalties, and transfer of risk connected with bad loan receivables (e.g. via insurance, derivatives, guarantees), will be limited to 5% of tax EBITDA.

Excluded from the above are accounting, legal, and recruitment services, and all services covered with advance pricing agreements (APAs), as well as costs of intangible services directly related to production of goods/provision of services. A limit will apply if the excess is over PLN 3 million.

Poland to start publishing largest companies' tax data

The amendment of 24 November 2017 to the Polish Corporate Income Tax (CIT) Act provided for an annual publication by the Ministry of Finance (MoF) of individual tax data of CIT payers with the highest revenues and all Tax Capital Groups. This took effect 1 January 2018, with the first tax data for the years 2012 to 2017 being published in April 2018 for the years 2012 to 2016 and in July 2018 for year 2017.

The individual tax data to be published by the MoF includes information on:

- Taxpayer's name.
- Tax identification number (NIP).
- Revenues.
- Tax-deductible costs.
- Income or incurred loss.
- Tax base.
- Tax due.

In addition, the published information may be extended with data on the effective tax rate.

New controlled foreign companies (CFC) rules

As of 1 January 2018, there is a change of criteria for qualifying a foreign company as subject to CFC rules (i.e. change of shareholding levels from 25% to 50%, focus on effective tax rate as opposed to nominal tax rate). The catalogue of revenue deemed as 'passive' for the purpose of CFC rules has also been broadened, and the 'passive income' ratio has decreased from 50% to 33%.

Multilateral Instrument to Modify Bilateral Tax Treaties (MLI)

On 14 November 2017, the Act on ratification of the MLI was published in the official Journal of Laws. The MLI globally implements mechanisms created to prevent international profit shifting to locations where they are subject to reduced taxation or non-taxation. Poland is the third country (after Austria and Isle of Man) to ratify the MLI. Poland declared 78 double taxation treaties (DTTs) for the MLI's purposes. Among declared DTTs, there are, *inter alia*, DTTs with Austria, Belgium, Canada, Cyprus, Denmark, France, Holland, Ireland, Luxembourg, Malta, Mexico, Norway, Sweden, and the United Kingdom. At the moment of signing the MLI, Poland has declared 77 DTTs in which the method of avoiding double taxation used to this point (i.e. the tax exemption method) may be replaced by the tax credit method.

Retail tax

On 1 September 2016, the Retail Tax Act of 6 July 2016 entered into force, but was quickly suspended for 2016 and 2017 due to European Commission (EC) investigation into the Polish tax on the retail sector. As a result, the new retail tax was postponed until 1 January 2019.

Standard Audit File for Tax (SAF-T)

From 1 July 2016, taxpayers are obligated to implement a SAF-T. The new legislation obligates the value-added tax (VAT) registered taxpayers (except those exempt from VAT) to keep computerised records of all data required to fill out tax returns and recapitulation statements. Taxpayers are obligated to transmit details of VAT records as a SAF-T without any additional request from the tax authorities. The data have to be filed monthly by the 25th day of the next month.

A new obligation to file documents in the SAF-T format, both in the case of an inspection and with respect to the VAT records, was imposed on large enterprises from 1 July 2016. Micro, small, and medium enterprises are given the choice to transmit their data during a tax inspection in the SAF-T format or not. As of July 2018, these three groups will be obligated by law to transmit data in the SAF-T format during tax inspection.

Small and medium enterprises are obligated to file VAT records in the SAF-T format from 1 January 2017. Micro enterprises are obligated to start filing VAT data in the SAF-T format from the beginning of 2018.

The obligation to transmit data in the SAF-T format also applies to companies whose fixed establishment is outside Poland but which are registered for VAT in Poland.

Taxes on corporate income

The CIT is the only tax levied on corporate income. The standard CIT rate is 19%.

As of 1 January 2017, a lowered 15% CIT rate was introduced for so-called ‘small taxpayers’ (i.e. entities whose sales revenue, including output VAT, for the previous year didn’t exceed the equivalent in Polish zloty of 1.2 million euros [EUR] and for taxpayers starting business activity, in their first tax year).

Polish tax residents are subject to tax on their worldwide income. Non-residents are taxed only on their Polish-sourced income. The tax authorities’ right to tax a non-resident is further limited if the non-resident’s country of residence concluded a DTT with Poland. In this case, the Polish tax authorities are, as a rule, entitled to tax only the portion of the non-resident’s income that may be attributed to a permanent establishment (PE) located in Poland if such income has arisen in Poland for the foreign tax resident. Exceptions relate to specific types of income, such as royalties, interest, dividends, and capital gains, which may be in Poland even if no PE exists.

As of 1 January 2018, separation of income/loss sourced from capital transactions from other income/loss sources has been introduced. Taxpayers now have to recognise revenues and costs related to each ‘basket’ separately. There is no possibility to set-off income derived from one ‘basket’ with loss borne in the other ‘basket’. Income in both baskets is taxed at 19% CIT. Apart from share/capital transactions, the capital basket includes royalties, license fees, and similar rights.

Polish companies with foreign participation may be set up as either limited liability companies or joint-stock companies. There is no limitation on the percentage of foreign participation. Both types are subject to the general CIT rules, including the standard 19% tax rate (and other rates, depending on the type of revenue sourced in Poland).

The same rate applies to branches of foreign companies (*see the Branch income section for more information*).

Certain entities are explicitly excluded from the group of taxpayers under the CIT law (e.g. Treasury, National Bank of Poland). Polish and European Union (EU)/European Economic Area (EEA) based investment funds are also exempted on the grounds of such provision.

As of 1 January 2018, the 'minimum income tax level' for taxpayers holding substantial real estate, which has initial value over PLN 10 million, has been introduced. 'Minimum tax' is payable monthly at 0.035% of excess of the initial value of the building over PLN 10 million (0.42% annually). Consequently, tax will be due regardless of the level of actual income derived by the taxpayer. This minimum tax can be set-off against CIT if CIT is higher.

Local income taxes

There are no provincial or local income taxes in Poland.

Corporate residence

A company is considered to be a resident in Poland if its registered office or management is located in Poland.

Permanent establishment (PE)

PE under Polish CIT law

According to Polish CIT law, the following are understood to be a PE:

- A permanent place of business through which a non-Polish tax resident conducts its business activities, in whole or in part, within the territory of Poland; in particular, a branch, agency, office, factory, workshop, or place of extraction of natural resources.
- A construction site, construction, assembly, or installation works carried on within the territory of Poland by a non-Polish tax resident.
- A person who, on behalf and for the benefit of a non-Polish tax resident, operates in Poland, provided such person holds and exercises a power of attorney to enter into agreements on one's behalf.

We note that Polish CIT law:

- does not encompass any provisions concerning the period required for construction works to create a PE
- does not include provisions indicating that an independent agent does not create a PE, and
- does not include provisions indicating that actions of an auxiliary or preparatory character do not lead to creation of a PE in Poland.

PE from a DTT perspective

In general, the provisions of DTTs concluded by Poland are based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention on Income and on Capital (OECD Model), except for provisions related to taxation of royalties, which are based on the United Nations (UN) Model Double Taxation Convention.

As a principle, treaties based on the OECD Model provide for the following concepts, which determine whether activities of a foreign entrepreneur constitute a PE (usually in Article 5):

- Fixed place of business concept.
- Dependent agent concept.
- Construction PE concept.

Note that some DTTs concluded by Poland also encompass other PE concepts (e.g. service PE concept or offshore PE concept).

Other taxes

Value-added tax (VAT)

Polish VAT applies to the following activities:

- Supplies of goods and services within the territory of Poland.
- Exports of goods outside the territory of the European Union.
- Imports of goods from countries that do not belong to the European Union.
- Intra-Community acquisitions of goods (imports from countries belonging to the European Union).
- Intra-Community supplies of goods (exports to the countries belonging to the European Union).

VAT rates

The VAT rates are 23% (standard rate), 8%, 5%, 0%, and exemption.

The standard 23% VAT rate generally applies to the supply of all goods and services, except for those that are covered by special VAT provisions that provide other rates or treatments.

Supplies covered by a reduced rate of 8% include, among others, supplies of pharmaceutical products and passenger transport services and also supply of goods for the Social Housing Programme (no greater than 150 square metres).

Supplies covered by a reduced rate of 5% include books and journals, unprocessed food, and basic food.

Zero-rated activities include, among others, exports of goods to countries outside the European Union.

VAT-exempt supplies include, among others, certain financial, insurance, and educational services.

Basic calculation rules

In general, the VAT due equals the VAT on outputs decreased by the VAT on inputs (in other words, input VAT is deducted from output VAT). Input VAT may be deducted from output VAT when a business (with a VAT payer status) receives an invoice for goods or services purchased. Input VAT may not be deducted unless a purchased supply is linked to the VATable activities. Furthermore, the deductibility of input VAT is restricted by the VAT law with respect to the purchase of certain goods and services. In addition, subject to numerous conditions, output VAT may be reduced when receivables, resulting from VATable sales, become uncollectible.

VAT split payment from 2018

Poland is proposing to introduce an anti-VAT fraud split payment regime from 1 July 2018. Split payment will be applied on a voluntary basis. The purchaser will be entitled to choose the split payment mechanism or to pay the total invoice amount directly to the supplier of the goods or services. Under this split VAT payment mechanism, the supplier should issue an invoice for the net and VAT amounts; however, the customer will only pay the net amount to the supplier. The VAT share should be paid directly to the tax authorities, hence eradicating the 'collection' role of the suppliers. This system will only apply on domestic transactions and will not affect invoice requirements.

VAT refunds

The Polish VAT law allows direct refunds when input VAT (available for deduction) exceeds output VAT.

A Polish business may also be entitled to the VAT refund owed by another country under certain circumstances. Likewise, a foreign business having seat or fixed place of business for VAT purposes outside of Poland may be, in most cases, entitled to the refund of Polish VAT. If the respective countries belong to the European Union, the procedure is substantially simplified due to the EU Directive, which provides favourable rules for businesses based in EU countries that are seeking VAT refunds in other EU countries (i.e. electronic VAT refunds are possible).

International services

The treatment of international services largely depends on the place of supply since it is determinative of whether particular services are subject to the Polish VAT. The Polish VAT applies only to those services that are supplied within Poland.

Reporting rules

Generally, the VAT reporting period is one month. VAT returns should be submitted by the 25th day of the month following the VAT reporting period. Legislation obligates the VAT-registered taxpayers (except those exempt from VAT) to keep computerised records of all data required to fill out tax returns and recapitulation statements. Documents must be filed in the SAF-T format, both in the case of an inspection and with respect to the VAT records.

Customs duties

As a member of the European Union, Poland belongs to a customs union, thus only goods imported from non-EU countries or exported from Poland to non-EU countries are subject to customs duties and formalities. Moreover, all the Community customs regulations are directly applicable in Poland. The most important act is the Community Customs Code and its implementing provisions, as well as the Community Customs Tariff.

These regulations are supplemented with certain Polish national rules, especially in respect to procedures and specific areas that are not defined in the Community customs law (e.g. strict regulations concerning the export of works of art and animals, limits on the amount of cash that may be brought from Poland to non-EU countries).

Excise duties

Excise duties are levied on the production, sale, import, and intra-Community acquisition of 'excise goods', which are listed in the excise duty law and include (among others) alcohol, cigarettes, energy products (e.g. petrol, oils, gas), passenger cars, and electricity.

Depending on the excise goods in question, one of four methods of calculating excise tax may be applicable:

- A percentage of the taxable base.
- An amount per unit.
- A percentage of the maximum retail price.
- An amount per unit and a percentage of the maximum retail price.

The excise rate for car petrol is PLN 1,540 per 1,000 litres.

Passenger cars are subject to the following excise rates:

- 3.1% for cars with engine cubic capacity that does not exceed 2,000 cc.
- 18.6% for cars with engine cubic capacity that exceeds 2,000 cc.

Notwithstanding the above, Polish excise duty law provides for a wide system of excise duty exemptions as well as 0% taxation. Under specified circumstances, such preferential treatment may apply to specified goods that are otherwise taxed based on general rules. This concerns, for example, specific energy products used for other purposes than as a fuel or for heating.

There is also an excise duty placed on coal. Depending on the type of coal product, the excise rates are PLN 30.5 per 1,000 kg of coal, PLN 11 per 1,000 kg of lignite, and PLN 35.2 per 1,000 kg of coke. In practice, there are a wide range of excise duty exemptions (practically, Poland has used all the exemption options provided in the EU Directive); nevertheless, many new administrative obligations have been set for entities producing, distributing, and using coal. The fulfilment of those obligations is necessary in order to apply an excise duty exemption.

Property taxes

Property tax rates are fixed by municipalities within limits set in the Law on Local Taxes and Fees. In 2018, land used for business purposes is subject to a rate limit of PLN 0.91 per square metre. Buildings used for business purposes are subject to a rate limit of PLN 23.10 per square metre.

Transfer taxes

A transfer tax may apply to certain civil law transactions, determined as a percentage of the transaction (i.e. such as sale, loan, donation). A tax obligation on civil law transactions does not arise when one of the parties of the transaction is a VAT payer.

Stamp duty

In Poland, some activities are charged a stamp duty. Payment is required, for example, in connection with the submission of a power of attorney, after completion of an official act, or the issue of a certificate or permit.

Capital tax

A share capital increase (in case of corporations) and contribution/contribution increase (in case of partnerships) is subject to a 0.5% capital tax, payable by a company or partnership that receives a capital contribution. This tax applies equally to limited liability companies as well as joint-stock companies. A merger, division, or transformation of a corporation into another corporation is not subject to capital tax, even if the transaction results in a share capital increase. A similar exemption applies to a capital increase resulting from (i) an in-kind contribution of an enterprise or its organised part or (ii) contribution of shares of the other corporation giving the majority of votes in this corporation or contribution of additional shares in case the corporation to which the shares are contributed already has the majority of votes.

Payroll taxes

There are no payroll taxes other than social security contributions (*see below*).

Social security contributions

Both the employer and the employee are obligated to contribute to the Polish social security system. Apart from paying its own share, the employer is obligated to withhold the employee‘s share of the social security contributions and remit them to the Social Security Authorities (ZUS). In both cases, the relevant payments shall be made monthly.

The employer pays total contributions in a range of 19.48% to 22.14% of the employee's gross salary (the employer's contribution rate includes an accident insurance element that varies according to the number of employees insured and the business sector). The contribution rate for the employee is 13.71% of gross salary. The social security shares payable by the employer and the employee are tax-deductible items in their respective income tax settlements.

The rates apply to salaries below the cap of PLN 133,290 in 2018. The cap changes every year. After exceeding this cap, the salary is subject to a contribution rate of 3.22% to 6.41% payable by the employer and 2.45% payable by the employee.

Tax on certain financial institutions

A tax on certain financial institutions (so-called 'banking tax') is levied on:

- Banks, branches of foreign banks, branches of credit institutions, and credit unions.
- Insurance companies, reinsurance companies, branches of international insurance companies and international reinsurance companies, and main branches of international insurance companies and international reinsurance companies.
- The lending institutions within the meaning of the Consumer Credit Act.

Tax at the rate 0.44% per year (0.0366% per month) is levied on the assets of the taxpayers less (i) PLN 4 billion in case of banks, (ii) PLN 2 billion in case of (re-) insurance companies, and (iii) PLN 200 million in case of lending institutions. In case of (re-)insurance companies and lending companies, tax is levied on the consolidated assets of the capital group companies.

Retail tax

On 1 September 2016, the Retail Tax Act of 6 July 2016 entered into force, but was quickly suspended until 1 January 2019 due to an EC investigation into the Polish tax on the retail sector (*see below*).

Based on the Retail Tax Act, retailers are to be taxed on the revenues achieved on retail sales, which should be understood as sales of goods to consumers for remuneration, in case an agreement is concluded on the business premises or away from business premises of the given taxpayer. Thus, e-commerce sales should not be subject to this tax. In this context, the services associated with retail sales should also be subject to taxation, unless they are recorded separately than the sale of goods.

Retail tax rates

The retail tax should be imposed on the excess of revenues over the amount of PLN 17 million, calculated, in principal, based on the turnover registered by the cash registers. The Act introduces two tax rates: 0.8% of the tax base for the given month, in the part not exceeding the amount of PLN 170 million, and 1.4% of the excess of the tax base, in the part exceeding the amount of PLN 170 million.

The retailers shall be obligated to submit tax returns and calculate and pay retail tax in the monthly settlement periods. However, no tax return must be submitted in case the revenues in the given month do not exceed the value of PLN 17 million.

Retail tax exemptions

The Retail Tax Act includes certain exemptions from taxation, among others, in respect of:

- energy, water, natural gas, and heat supply to consumers made by network utilities
- supply of some fuels designated for heating fuel purposes, and
- supply of medicines, special purpose nutrition, and reimbursed or partially-refunded medical products.

Retail tax postponed until 2019

On 19 September 2016, the EC opened an in-depth investigation into the Polish tax on the retail sector. The EC has concerns that the progressive rates based on turnover give companies with a low turnover a selective advantage over their competitors in breach of EU state aid rules. The EC has also issued an injunction, requiring Poland to suspend the application of the tax until the EC has concluded its assessment. At this stage, the EC has concerns that the application of progressive rates based on turnover confers a selective advantage on companies with low turnover and therefore involves state aid within the meaning of the EU rules. This progressive rate structure has the effect that companies with low turnover either pay no retail tax or pay substantially lower average rates than companies with high turnover.

As a result, the new retail tax was postponed until 1 January 2019. This means retailers are not obligated to pay tax in years 2016 to 2018.

Branch income

Foreign businesses are allowed, under certain conditions, to establish their branch offices (exclusively within the scope of their 'foreign' business activity) and representative offices (exclusively with regard to promotion and advertising) in Poland.

A branch office almost always has PE status in Poland. Once a branch is established, the foreign company pays CIT at the standard rate of 19%, based on the income attributable to the operations of the Polish branch. For this purpose, as well as for accounting purposes, a branch is obligated to keep accounting books that include all the data necessary to establish the taxable base. In this respect, general income determination rules relevant to Polish companies apply to branches as well. In the few cases in which a branch can demonstrate, based on a DTT, that its business presence in Poland does not constitute a PE, its profits are not subject to Polish CIT.

Income determination

The tax base for CIT purposes is the overall income, which is the difference between aggregated taxable revenue and aggregated tax-deductible costs. A tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue.

Subject to numerous exemptions, the tax base includes all sources of income. Consequently, there is no special treatment for income such as capital gains or interest.

In practice, taxable income is calculated by adjusting the profit reported for accounting purposes. The relevant adjustments are necessary due to differences between tax and accounting treatment of numerous revenue and cost items. As a result, the taxable base is usually higher than the accounting profit.

As of 1 January 2018, there is a separation of income/loss sourced from capital transactions from other income/loss sources. Taxpayers now have to recognise revenues and costs related to each 'basket' separately. There is no possibility to set-off income derived from one 'basket' with loss borne in the other 'basket'. Income in both baskets is taxed at 19% CIT. Apart from share/capital transactions, the capital basket includes royalties, license fees, and similar rights.

Inventory valuation

Generally, the value of inventory shortages may be included as a tax-deductible cost. Other write-offs in the value of inventory are not recognised for tax purposes until the inventory in question is sold.

When inventory is lost or sold, a tax deduction is allowed for the costs incurred when the inventory was purchased. The methods acceptable for inventory valuation for tax (and accounting) purposes are standard cost, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO).

Capital gains

There is no separate capital gains tax. Capital gains or losses are aggregated with an entity's other taxable income or losses. Capital losses are tax-deductible.

Dividend income

Domestic dividend income

Dividends received from Polish residents (domestic dividends) are excluded from overall income. Instead, such dividends are subject to a 19% withholding tax (WHT), which is withheld and remitted to the tax office by the payer of dividends. Based on a participation exemption, however, domestic dividends are not subject to the 19% WHT if the Polish beneficiary holds at least a 10% share in the paying company for at least two years.

The revenue arising from voluntary redemption of shares is not treated as a dividend for tax purposes and does not enjoy the benefits of the participation exemption (i.e. the method of redemption, whether voluntary or automatic, will matter).

Dividend income from abroad

Generally, dividends received by a Polish corporate tax resident from a non-resident are treated as regular income and taxed at the standard CIT rate. CIT on such dividends paid in other countries may be credited proportionately against Polish CIT.

Additionally, dividends received from entities seated in the European Union (including Poland), EEA member states, or Switzerland can benefit from CIT exemption if the Polish company owns, respectively, at least 10% (in respect to companies seated in the EU/EEA member states) or 25% (in respect to companies seated in Switzerland) in the share capital of the payer for two consecutive years (and certain other conditions are met).

Dividends received from non-EU/non-EEA member states may benefit from underlying tax credit. If a Polish company or a PE of a company from an EU/EEA member state located in Poland receives a dividend from a company seated in a non-EU/non-EEA country, it may deduct the tax paid by the payer on profits out of which the dividend was paid. The deduction is only possible if the Polish company/company from EU/EEA, which PE is located in Poland, holds (for two consecutive years) at least 75% of shares of the dividend payer. The tax may be deducted in an appropriate proportion. Furthermore, the deduction is possible if there is a DTT. Based on the provisions of the relevant DTT or other agreement concluded by Poland, the Polish tax authority may exchange tax information with its counterparty.

Anti-avoidance regulations

The participation exemption on dividends and other profit-sharing payments does not apply to the legal transaction or series of legal transactions that, having been put into place for the main purpose or one of the main purposes of obtaining a tax advantage, are not genuine, having regard to all relevant facts and circumstances.

Based on the introduced provisions, a 'not genuine' legal transaction is such transaction that is undertaken in order to benefit from the tax exemption but does not reflect economic reality (i.e. it is not conducted for valid commercial reasons and its result is, in particular, transfer of shares' ownership of the company paying the dividend or achieving, by this company, income [revenue] paid in the form of a dividend).

Interest income

Interest income is aggregated with an entity's other taxable income.

Royalty income

A 20% WHT is imposed on royalties paid to non-residents. Royalties paid to resident companies are taxed as ordinary income at the level of the beneficiaries of the royalties. There is no WHT on royalties if the conditions for the application of the EU Interests & Royalties Directive are met.

Only a beneficial owner is able to apply exemption from WHT on royalties.

Foreign income

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland (*see Foreign tax credit in the Tax credits and incentives section*).

CFC rules entered into force as of 1 January 2015 (*see Controlled foreign companies [CFCs] in the Group taxation section for more information*).

Deductions

Generally, a tax-deductible cost is defined as a cost incurred for the purposes of deriving revenues, as well as for the purpose of securing or preserving a source of revenue. The last element of the definition of a tax-deductible cost was added to reduce uncertainties surrounding the deductibility of business expenses that do not directly generate revenue.

The CIT law provides a list of items that are not deductible for tax purposes, even if the items meet the general conditions described above. This list contains over 60 items including, among others, the following:

- Written-off, lapsed accounts receivable.
- Entertainment costs.
- Accrued but unpaid interest.
- Accounting and comparable provisions.
- Tax penalties and penalty interest.
- A portion of the insurance premium paid on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).
- A portion of the depreciation write-offs made on a passenger car (i.e. the portion calculated on the excess of the car value over EUR 20,000).

As of 1 January 2018, there are further changes in CIT deductibility rules, as follows:

- Deductibility of interest from debt push-down structures is excluded.
- Deductibility of costs in sale and lease-back transactions is limited at the level of prior revenues.
- A one-off write-down for fixed assets of small value is possible for assets worth up to PLN 10,000 (previously PLN 3,500).

There is also a limitation of deductibility of costs from certain intangible services and royalties. Costs from related parties, including advisory, management, data processing, marketing, market research, insurance, guarantees, royalties, and transfer of risk connected with bad loan receivables (e.g. via insurance, derivatives, guarantees), are limited to 5% of tax EBITDA under new rules.

Excluded from the above are accounting, legal, and recruitment services, and all services covered with APAs, as well as costs of intangible services directly related to production of goods/provision of services. A limit will apply if the excess is over PLN 3 million.

A limitation of deductibility of financial costs has also been introduced by new rules. Deductibility restrictions are applicable both to internal and external financing costs (not only interest). The deductibility limit for the excess of financing costs over financing revenue is set at 30% of tax EBITDA. The limit applies if the excess is over PLN 3 million.

Furthermore, expenses incurred in connection with the acquisition of fixed and intangible assets (e.g. licences, trademarks, know-how) are not directly deductible. Instead, the acquired assets are subject to depreciation. If such assets are sold, a business is entitled to deduct the net value (cost of acquisition reduced by the overall value of the tax depreciation allowances made). Similar treatment relates to the acquisition of shares or land, except that these particular assets are not depreciable. Therefore, the full cost of an acquisition of shares or land may be deducted when such assets are sold.

Depreciation

Depreciation write-offs are treated as a tax-deductible cost. Generally, depreciation allowances are calculated based on the straight-line method and the maximum annual rates provided in the CIT law. If this is the case, a taxpayer deducts equal annual write-offs, calculated by multiplying the maximum rate of depreciation by the asset's initial value until the total value of write-offs equals the initial value (typically, the initial value equals the purchase price).

For certain categories of machinery and vehicles (but not passenger cars), the reducing-balance depreciation method may be applied. Under this method, the tax depreciation may be accelerated during the initial period of the asset's use by multiplying the statutory maximum rate by two. The rate is then applied to the net value of fixed assets (i.e. initial value reduced by earlier annual write-offs). The reducing-balance method is applied until the annual depreciation write-off equals the hypothetical write-off that would be made under the straight-line method. From this point, the depreciation allowance is taken based on the straight-line method for its remaining useful life.

The main categories of assets and the related statutory annual tax depreciation rate are as follows:

Assets	Depreciation rate (%)
Various buildings and constructions	1.5 to 10
Machinery and equipment (general)	7 to 20
Machinery for road building and construction	18 to 20
Machinery for paper industry	14
Office equipment	20
Computers	30

Apart from the above, the Polish CIT law includes provisions for accelerated depreciation (within specified limits) for assets used in deteriorated conditions and for second-hand assets.

Goodwill

Under the provisions of CIT law, goodwill is subject to tax amortisation if it is created as a result of acquisition of an enterprise, or its organised part, made in one of the following ways: (i) purchase; (ii) payable use, provided that the user of such enterprise/organised part of an enterprise makes the depreciation write-offs; or (iii) contribution to a company based on commercialisation and privatisation regulations. The goodwill is amortised for tax purposes for a minimum period of five years.

Start-up expenses

There are no specific provisions in the Polish CIT law relating to start-up expenses; the general rules of tax deductibility described above apply.

Interest expenses

Accrued interest on loans and credit that were paid or capitalised are deductible for CIT purposes. Polish CIT law provides some exceptions, such as instances where costs are not associated with earning revenue.

In Poland, there are also some limitations of interest tax deductibility connected with thin capitalisation regulations. *See Thin capitalisation in the Group taxation section for more information.*

Bad debt

As a general rule, debts written off as uncollectable cannot be considered as tax deductible. However, in certain situations, the provisions of Polish CIT law provide some exceptions. According to these provisions, only strictly defined uncollectable debts (which based on the CIT law were booked as taxable revenues) may be considered by the taxpayer as a tax-deductible cost, provided that their uncollectability was properly documented (e.g. by a court decision). In some cases, uncollectability may be considered probable (e.g. debtor's death).

Charitable contributions

Companies are entitled to deduct donations for the purposes of public benefit and to volunteer activity organisations up to a total amount not exceeding 10% of income; however, deductions may not be made for donations to:

- natural persons or
- legal persons or organisational units having no legal personality who carry on economic activity consisting in the production of electronic goods; fuel; tobacco; spirits, wines, beers, and other alcohol beverages containing over 1.5% alcohol; products made of noble metals or containing such metals; or incomes received from trading in such goods.

Donations for religious practice purposes can be deducted up to a total amount not exceeding 10% of income.

Additionally, the donations of food products made for the purposes of so-called public benefit constitute tax deductible costs in the amount of production costs or purchase price.

Fines and penalties

Fines and penalties can be recognised as tax deductible items if they meet the general conditions. However, the Polish CIT law provides some exceptions, which include contractual penalties and indemnities for defects in supplied goods, works, and services performed; delayed supply of non-defective goods; and delay in the elimination of defects in goods, works, and services performed.

Taxes

Income tax, certain industry-specific taxes (e.g. banking tax), and, in most cases, VAT incurred on purchases are not deductible. However, as a rule, VAT is deductible for CIT purposes if it cannot be offset against the company's output VAT. Other taxes, if paid in the course of business activities, are generally deductible in full.

Net operating losses

A tax loss reported in a tax year may be carried forward over the next five consecutive tax years; however, in any particular tax year, the taxpayer may not deduct more than 50% of the loss incurred in the year for which it was reported. For example, a taxpayer that incurred PLN 100 annual loss in 2017 may carry it forward to 2018 through 2022. However, the maximum loss deduction in any of these years may not exceed PLN 50 (assuming that there are no other losses available for deduction).

Currently, there is no possibility to carry back tax losses in Poland.

Payments to foreign affiliates

Deductions may be claimed for royalties, management services, and interest charges paid to foreign affiliates. However, note that interest expenses are subject to the thin capitalisation restrictions (*see Thin capitalisation in the Group taxation section for more information*). Furthermore, note that transactions with related companies should be made according to the market conditions. Where a company shifts income to another entity (especially a foreign entity), the tax authorities may adjust the taxable base upward (*see Transfer pricing in the Group taxation section for more information*).

The Polish CIT Law also includes a so-called 'beneficial owner' clause with respect to interests and royalties. In line with the relevant provisions, similarly as in many DTTs, only the beneficial owner (i.e. not an agent, representative, trustee, etc.) can benefit from WHT exemptions under the Polish CIT Law.

Cash payments

The Polish CIT Law provides for a cash expense value limit, in line with which transactions having value over PLN 15,000 can only be recognised as tax deductible costs if settled using a bank transfer.

Group taxation

The CIT law includes provisions on group taxation (i.e. in theory, a group of companies). If a group of companies meets certain conditions, it can be treated as a single taxpayer. However, the required conditions are extremely demanding and very few taxpayers of this type exist.

As of 1 January 2018, there has been a change of rules regarding CIT groups. Since 1 January 2018, there is a decrease of the minimal revenue-to-income ratio of the tax group from 3% to 2%. The tax group will lose the status of taxpayer retroactively (from the date of registration as a tax group) in case of breach of certain conditions, and companies forming the tax group will be obligated to reconcile for CIT purposes as independent taxpayers retroactively for prior years. Group members will be obligated to set intra-group transaction terms at arm's length. However, there will be no formal obligation to prepare statutory transfer pricing documentation for such transactions.

Transfer pricing

Transactions between related parties should be conducted in accordance with the arm's-length principle. The tax authorities may increase the taxable base if the pricing method applied between related parties differs from what would have been applied between unrelated parties in a similar business transaction and the difference results in income being understated by a Polish taxpayer. The regulations apply to domestic transactions as well as cross-border ones. Similar rules also apply to transactions between Polish residents and the residents of tax havens. These transactions may be subject to the transfer pricing principles even if the parties thereto are not related. The CIT law also contains detailed requirements for transfer pricing documentation.

Transfer pricing regulations are currently undergoing major changes resulting from implementation of the Base Erosion and Profit Shifting (BEPS) Action 13 in Poland.

The biggest Polish capital groups (with consolidated revenues exceeding EUR 750 million) are obligated to provide, in Poland, information on their taxable income, tax paid, and their place of business unless the consolidating entity is a subsidiary of a foreign party. In this case, the obligation is shifted abroad.

Taxpayers are also obligated to prepare transfer pricing documentation in an extended format covering not only the description of a transaction but also 'other events included in the accounting books' if they were agreed to by related parties and influence the taxpayer's taxable income or loss. If the taxpayer's revenue or expenses exceed EUR 10 million in the preceding financial year, the requirements increase. The taxpayer is obligated to provide a benchmarking study verifying the arm's-length character of related-party transactions. Furthermore, taxpayers whose annual revenues or expenses exceed EUR 20 million in the preceding financial year are also obligated to provide group transfer pricing documentation (master file) presenting the character of settlements from the group perspective. Finally, taxpayers whose revenue exceeds EUR 10 million are obligated to attach to their tax return a summary of their related-party transactions using a special form.

The taxpayers are obligated to submit a statement alongside their CIT return, confirming that complete local transfer pricing documentation and benchmarking studies, as required by the transfer pricing regulations, have been prepared.

Although the regulations are generally in line with the OECD recommendations, the transfer pricing documentation and benchmarking studies required by the Polish transfer pricing regulations must meet certain specific Polish requirements as well.

Taxpayers can mitigate the transfer pricing risk by applying for an APA. The tax authorities may not challenge the methodology agreed upon, but may verify whether the methodology is followed in practice.

Country-by-country (CbC) reporting

The Act of 9 March 2017 r. on the exchange of tax information with other states (Journal of Laws from 2017, No. 648) introduces a comprehensive regulation concerning the international exchange of tax information within a single legal Act.

In particular, this Act contains regulations requiring the taxpayers belonging to a group with consolidated net turnover exceeding EUR 750 million in the previous financial year to provide additional information about entities that form part of a group of entities (CbC report).

Information about entities that form part of a group of entities

The obligation to file a CbC report applies to entities operating in groups that:

- prepare consolidated financial statements,
- conduct cross-border operations, and
- earned consolidated net turnover for the previous financial year exceeding EUR 750 million.

The obligation is effective for the reporting financial year beginning after 31 December 2015.

The Act provides that, as a rule, a CbC report is to be provided by the ultimate parent company in the group (in Poland: if it has its registered office or seat of management here).

Additional obligations for the Polish taxpayers

However, a Polish taxpayer that is not an ultimate parent company may be obligated to submit a CbC report if:

- the ultimate parent company is not under such obligation in the state in which its registered office or seat of management is located
- the authorities of the state in which the ultimate parent company's registered office or seat of management is located did not conclude an agreement on the exchange of information with Poland within 12 months from the end of the reporting year
- the state in which the ultimate parent company's registered office or seat of management is located has suspended the automatic exchange of information, or
- no other group entity has been designated to prepare such information.

In addition, each Polish entity that belongs to a group obligated to submit a CbC report will have to:

- notify that it is an ultimate parent company, or
- specify the reporting entity and the state in which the information will be provided.

This information must be submitted to the Chief of the National Fiscal Administration (*Krajowa Administracja Skarbowa* or KAS).

A CbC report should, as a rule, be provided within 12 months from the end of a reporting year (i.e. for 2017: by the end of 2018).

If the ultimate parent company does not prepare information about the group, the Polish company is obligated to prepare and provide such information on its own no earlier than for the year beginning after 31 December 2016. However, the Polish taxpayer may voluntarily file such information also for the year beginning after 31 December 2015.

Taxpayers will have to notify of the entity responsible for preparing the CbC report by the end of the group's financial year.

Thin capitalisation

As of 1 January 2018, new thin capitalisation rules entered into force. Previously, the amount of tax-deductible interest on intra-group loans was correlated with the level of equity. New rules introduced deductibility restrictions:

- applicable both to internal and internal financing, and
- correlated with tax EBITDA.

Tax deductibility of interest is disallowed to the extent: (the excess of interest costs over interest revenue) exceeds 30% * ((taxable revenues - interest revenues) - (tax deductible costs - depreciation of fixed assets and intangibles - interest cost))

However, the new rules should provide for a 'safe harbour' of PLN 3 million of tax deductible interest per year. The amount of interest non-deductible in a given tax year may be carried forward and deducted in five subsequent years (still subject to general limitations of 30% EBITDA).

Restrictions are not applicable to financial entities (e.g. banks, credit institutions, as well as open-end and closed-end investment funds).

Under the grandfathering rules, loans granted and effectively disbursed by the moment of entry of the amendments into force are still subject to previously binding thin capitalisation rules; however, no longer than by 31 December 2018.

Controlled foreign companies (CFCs)

An additional income tax is imposed on direct and indirect shareholders (Polish tax residents) of a company/PE from the EU/EEA (or other country that concluded a DTT with Poland) if the following conditions are jointly met:

- Polish company has 50% direct or indirect participation in foreign company's income, voting rights, or capital for at least 30 consecutive days.
- Foreign company derives its income mainly (i.e. at least 33%) from so-called 'passive' sources (e.g. dividends [with an exception for dividends exempt under the Parent-Subsidiary Directive], interest, royalties, capital gains).
- Foreign company's/PE's income is subject to taxation at nominal rates lower than 14.25% (calculated as 75% of the 19% CIT rate applicable in Poland), is not subject to taxation at all, or is exempt from taxation.

The tax regime also affects taxpayers that are owners of foreign companies located in countries recognised as applying harmful tax competition or countries not participating in exchange of tax information with the European Union or Poland under a certain treaty.

Under the regime, income earned by the CFCs is subject to the 19% CIT rate. As a general rule, taxpayers are allowed to decrease the tax due in Poland by the amount of tax already paid abroad by the CFCs. The tax base is to cover the whole amount of income earned by the CFCs (including the passive income and the income earned on the actual business) that can be allocated to the Polish shareholders. The tax base is calculated proportionally to the period in which particular taxpayers were foreign entity's shareholders. If the CFCs are located in tax havens, the shareholders are to pay the tax on the whole amount of income earned by the CFCs (independently of their actual share in the income).

In certain cases, tax on income from the CFCs will not be levied if the CFC performs actual economic activity, defined as below, *inter alia*:

- Incorporation must correspond with an actual establishment intended to carry on genuine economic activities. In particular, the CFC should physically exist in terms of premises, staff, and equipment.
- The CFC does not create an artificial arrangement without a link with the economic reality.
- There is proportionality between the actual economic activities carried out by the CFC and the extent to which the CFC exists in terms of premises, staff, and equipment.
- Agreements concluded by the CFC have business justification and are in line with its economic interest.

Furthermore, certain administrative and reporting obligations have been introduced with CFC rules (e.g. obligation to maintain a register of the CFCs, filing separate tax returns presenting the amount of income generated through the CFC).

Tax credits and incentives

Foreign tax credit

Resident corporations are taxed on their worldwide income unless there is an applicable DTT in place between Poland and the relevant country that provides that the foreign income shall be exempt from taxation in Poland. In all other cases (in particular, when the income is not covered by any treaty), Poland uses the ordinary credit method to avoid double taxation. Therefore, a Polish resident is liable for income tax imposed on its worldwide income, but the tax is proportionately reduced by the income tax paid abroad.

Special Economic Zones (SEZs)

Polish legislation provides investment incentives related to business activities carried out in 14 zones defined as SEZs. A business entity can benefit from tax incentives, provided that the entity obtains a permit from the Ministry of Economic Development to conduct business activities there and meets other legal requirements. Note that a CIT credit applies only to income earned on activity conducted within the territory of SEZs and covered by permit.

In general, the amount of the tax incentive depends on project location and size of the enterprise. For large enterprises, it can be 15% to 50% of eligible expenditures (i.e. investment expenditures or two-year labour costs). In other words, the CIT credit allows the investor to avoid paying income tax up to the limit calculated on the basis of eligible expenditures and state aid intensity (percentage as above). In case of investment valued PLN 20 million and intensity aid of 40%, the investor would be entitled not to pay tax due up to PLN 8 million. If the available limit of the tax credit exceeds the annual tax due generated on SEZ activity, the excess may be utilised in the following tax years. Consequently, in the case of significant investments, it is possible for businesses that run activities in the SEZs to enjoy exemption from income tax for a considerable period. According to current regulations, the deadline for utilising the available tax credit is the end of 2026 (previously 2020).

Note that in the case of small enterprises, the limit of the tax credit may be increased by 20%. In the case of medium-sized enterprises, the limit of the tax credit may be increased by 10%.

Tax relief for research and development (R&D)

Entrepreneurs have the possibility of a tax deduction of costs incurred for R&D. The value of the deduction varies depending on the size of the company and type of eligible costs.

Eligible costs include the following six categories of R&D expenditures:

- Employees' wages and social contributions.
- Purchase of commodities and raw materials.
- Expertise, research, and opinions bought from scientific units.
- Payments for use of research equipment.
- Amortisation of intangible assets and fixed assets, excluding passenger cars, buildings, and constructions.
- Costs of obtaining intellectual property (IP) protection.

To benefit from the tax relief, each entity needs to perform R&D works and prepare a record of the eligible costs incurred in relation to R&D works in a given year. It is not important whether the R&D works end with success or the level of innovativeness of future effects of those works. Tax relief is also allowed for qualifying projects in progress (e.g. projects launched in previous years).

As of 1 January 2018, there is an increase of the existing deductions in income taxes from 50% and 30% (depending on the category of eligible costs and the size of the taxpayer) to 100% of qualified costs, irrespective of their category and size of the taxpayer (which has hitherto differentiated the allowed deduction limits). This means that all taxpayers benefiting from R&D tax relief will be able to save in income tax PLN 19 on every PLN 100 of qualified costs starting from 2018.

As of 1 January 2018, taxpayers may deduct expenditure incurred on employees that covers the costs of staff hired by taxpayers for R&D purposes under selected civil law contracts (previously only on an employment contract basis).

The new regulations also clarify that R&D tax relief is available to taxpayers who, during the tax year, have operated in an SEZ on the basis of a permit, regarding eligible costs that were not recognised as costs of running the activity covered by the SEZ's permit.

Withholding taxes

Domestic provisions: General rules

The general domestic WHT rate for dividends is 19%. Dividends also encompass income from liquidation of a company and the income from the redemption of shares (with the exception of gain from voluntary redemption, which is treated as a capital gain subject to the 19% CIT rate in Poland if the gain is realised by a taxpayer from a non-treaty country or the treaty includes a so-called ‘real estate clause’).

The general WHT rate on interest and royalties paid to non-residents is 20% (10% regarding services of sea or air transportation). These WHT rates may be reduced by DTTs.

There is also a 20% WHT on payments made to non-residents for intangible services (such as consulting services). However, if a payment is made to a country that has a DTT with Poland, this tax may be avoided with the completion of certain minimal administrative formalities. Few treaties treat payments for technical services as royalties (e.g. India).

The ‘beneficial owner’ definition determines that entities receiving royalties and interests must constitute the beneficial owner in order to apply the exemption from WHT tax on interest and royalties.

Special treatment: EU Directives

The CIT law provisions and certain EU Directives provide special treatment for dividends, interest, and royalties paid to numerous European countries.

In general, the transitional rules on interest and royalty payments paid by Polish corporate residents to associated EU or EEA companies, as well as the full exemption after 1 July 2013, only apply to interest and royalty payments between associated companies (parent-subsidiary relationships or sister-sister relationships) in which capital involvements are significant, i.e. the paying company owns or is owned at least 25% by the company receiving interest or the company that pays interest and the company that receives interest are owned at least 25% by the same parent company. Shareholding should be kept for a minimum of two consecutive years.

Dividends paid to corporate residents of EU and EEA countries are exempt from WHT, subject to certain conditions specified in the CIT law. The basic requirement is that the foreign beneficiary holds at least 10% of the shares in the Polish company for a minimum of two consecutive years.

In relation to all given payments (i.e. dividends, interest, royalties), the condition regarding holding shares is also fulfilled if two years passes after the day of the dividend/interest/royalty payment. If the period is interrupted afterwards, the company is obligated to pay the tax at the standard rate with interest.

Note that several additional conditions have to be met for the reduced rate/exemption from the WHT based on the Directive to be applied (e.g. the company receiving the dividend/interest/royalty cannot be exempt from tax on all its income, regardless of its source; the recipient has to have ownership title to the shares in the Polish company).

Additionally, the CIT law states that in order to enjoy the exemption from WHT on dividends and decreased WHT rate on interest and royalties, based on the Directives’ provisions, the relevant DTT or other agreement concluded by Poland should allow exchange of tax information between the tax authorities of Poland and the country of the payment recipient.

Given the fact that Poland did not conclude a DTT with Liechtenstein, payments made to tax residents of Liechtenstein should not benefit from the Directive.

Treaty rates

If EU special rules do not apply, the domestic WHT rates can be decreased by a DTT concluded between Poland and the payment recipient's country of residence if certain administrative conditions are met (i.e. the payer obtains a valid certificate of a fiscal residence of the payment recipient/beneficial owner).

The following table lists the WHT rates as provided in the treaties concluded by Poland. Notably, the following table shows only rates that result from general treaty provisions; the treaties themselves occasionally include special provisions (applicable in special circumstances or to special entities) that provide lower WHT rates than the ones listed.

Furthermore, if a treaty rate is higher than a domestic one, the latter should apply.

Notes

1. When the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
2. When interest is paid to the government, the central bank of the state, including local authorities or other government bodies.
3. When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
4. When interest is paid to the government, a political subdivision, or a local authority in connection with:
   - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
   - a sale on credit of any industrial, commercial, or scientific equipment, or
   - any loan granted by a bank.
5. When the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends.
6. When the interest is paid:
   - to the Central Bank of Poland
   - to the Central Bank of Bangladesh
   - to the government of the Republic of Poland or the government of the Republic of Bangladesh, or
   - in respect of a loan made or guaranteed or insured by the government of the other state, or any agency including a financial institution owned or controlled by the government.
7. When the beneficial owner is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends.
8. When the beneficial owner is a company (other than a partnership):
   - that directly holds at least 25% of the capital of the company paying the dividends or
   - that directly holds at least 10% of the capital of the company paying the dividends, and the value of investments in the company is at least EUR 500,000 or is equal to the amount in the other currency.
9. When interest is paid:
   - on a loan granted, guaranteed, or insured, or a credit granted, guaranteed, or insured, by a general system organised by the state, including political subdivisions or local authorities for purposes of promoting exports
   - on a loan of whatever kind, except in the form of bearer securities, granted by a banking company, or
   - to other states, including political subdivisions and local authorities.
10. When interest is paid to the government, including local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government.
11. When interest is paid in respect of a loan made, guaranteed, or insured by the state or agreed public body.
12. Copyright royalties and other similar payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (not including royalties in respect of motion picture films and works on film or videotape for use in connection with television).
13. When the beneficial owner is a company that directly controls 20% of the voting stock of the company paying the dividends.
14. For the use of, or the right to use, any industrial, commercial, or scientific equipment.
15. When interest is paid:
    - to the government, a local authority, and the central bank or any financial institution wholly owned by that government or
    - to the other resident of the other state with respect to debt-claims indirectly financed by the government of the other state, a local authority, and the central bank or any financial institution wholly owned by the government.
16. For the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films, and films or tapes for radio or television broadcasting, or any patent, know-how, trademark, design or model, plan, secret formula, or process.
17. The Protocol of 22 March 2012 has entered into force. The Protocol introduces a maximum 5% rate of WHT on dividends and exempts dividends paid to an immediate parent company (other than partnership) that owns at least 10% of the capital of the company paying the dividend.
18. When the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends.
19. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period.

20. When the beneficial owner is a pension fund or other similar institution providing pension schemes in which individuals may participate in order to secure retirement benefits, when such pension fund or other similar institution is established, recognised for tax purposes and controlled in accordance with the laws of the other state.
21. When interest is paid:
    - on a loan of whatever kind granted, insured, or guaranteed by a financial institution owned or controlled by the state
    - in connection with the sale on credit of any industrial, commercial, or scientific equipment
    - in respect of a bond, debenture, or other similar obligations of the government of the state, or of a political subdivision or local authority, or
    - to the other state, or to a political subdivision or local authority.
22. When interest is paid to the government of the other state, including local authorities and the central bank.
23. When the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
24. When interest is paid to the government of the other state, including political subdivisions and local authorities, the central bank, or any financial institution owned by the government or on loans guaranteed by the government.
25. From copyright of literary, artistic, or scientific work.
26. When the beneficial owner is the government of the other state or central bank.
27. When the interest, subject to certain exceptions related to silent shareholders, is paid:
    - to the government of Poland or Germany on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports
    - in connection with the sale on credit of any industrial, commercial, or scientific equipment
    - in connection with the sale on credit goods between companies, or
    - on any loan of whatever kind granted by a bank.
28. If the following conditions are met:
    - Interests paid to:
        - the government, a political sub-division, or a local authority of the other contracting state or
        - the central bank of other contracting state.
    - When the beneficial owner is a resident of the other contracting state and is derived in connection with a loan or credit extended or endorsed by:
        - Bank Handlowy (in scope of financing export and import) - for Poland
        - the Export-Import Bank of India (in scope of financing export and import) - for India
        - any institution in the other contracting state in charge of public financing of external trade, or
        - any other person, provided that the loan or credit is approved by the government of the first mentioned contracting state.
29. When the beneficial owner is the government, ministry, other governmental institution, municipality, central bank, or any other bank wholly owned by the government of the other contracting state.
30. When the beneficial owner is a resident of the other contracting state and directly holds at least 25% of the voting power of the company paying the dividends.
31. Interest paid in connection with:
    - the sale on credit of any industrial, commercial, or scientific equipment
    - the sale on credit of any merchandise by one enterprise to another, or
    - on any loan of whatever kind granted by the bank.
32. When the beneficial owner is a company that directly holds at least 15% of the capital of the company paying the dividends.
33. If the following conditions are met:
    - When the payer of interests is the government or contracting state or a local authority of thereof.
    - Interest is paid to the government of other contracting state or local authority thereof (including financing institutions) wholly owned by other contracting state or local authority thereof.
    - Interest is paid to any other entity, including financial institutions, in relation to loans made in application of an agreement concluded between governments of contracting states.
34. When beneficial owner is the government of other contracting state, including local authorities thereof, the central bank, any financial institutions controlled by that government or any resident of the other contracting state with respect to debt-claims, guaranteed or indirectly financed by institutions mentioned above.
35. For payments connected with copyrights, literary, artistic, and scientific activity, including payments connected with films for cinemas and films and tapes for TV.
36. When the beneficial owner is a company that directly or indirectly holds, at least 20% of the capital of the company paying the dividends.
37. When interest is paid to the government or local authorities.
38. Interest arising in a contracting state in respect of loans or credits made, insured, or guaranteed:
    - in the case of Korea, by the Export-Import Bank of Korea, Korea Development Bank, Korea Finance Corporation (KoFC), Korea Trade Insurance Corporation (K-sure), Korea Investment Corporation, and any other financial institution, performing similar functions of a governmental nature, established and owned by the government of Korea, and
    - in the case of Poland, by the *Korporacja Ubezpieczeń Kredytów Eksportowych* S.A (KUKE S.A.), Bank *Gospodarstwa Krajowego* (BGK), and any other financial institution, performing similar functions of a governmental nature, established and owned by the government of Poland, and
    - paid to a resident of the other contracting state shall be taxable only in that other state.
39. If the recipient is the beneficial owner.

40. Interest paid to government or central bank.
41. When the beneficial owner is:
    - the government of the other contracting state, entity, or any governmental institution or
    - a company that is a resident of the other contracting state and at least 25% of its capital is directly or indirectly owned by the entities mentioned above.
42. If the following conditions are met:
    - When the beneficial owner is:
        - the government of the other contracting state, entity, or governmental institution or
        - a company that is a resident of the other contracting state and at least 25% of its capital is owned directly or indirectly by the entities mentioned above.
    - When interest is paid in connection with loans guaranteed by the entities mentioned above.
43. When interest is paid:
    - to the government, including the local authorities, to the central bank or any financial institution controlled by that government, or on loans guaranteed by that government or
    - to the resident in the other contracting state.
44. If the following conditions are met:
    - When the beneficial owner is other contracting state.
    - When interest is paid in connection with loans and credits granted by bank.
45. Dividends paid by:
    - a resident of Poland to a resident of Malaysia who is subject to Malaysian tax in respect thereof or
    - a resident of Malaysia to a resident of Poland who is subject to Polish tax in respect thereof.
46. Interest paid to resident of Poland on an approved loan or a long-term loan.
47. Royalties paid to resident of Poland by resident of Malaysia and approved by the competent authority of Malaysia.
48. If the following conditions are met:
    - When the beneficial owner is:
        - a contracting state, a political subdivision, or a local authority, or The National Bank of Poland or Banco de Mexico or
        - a recognised pension or retirement fund provided that its income is generally exempt from tax in this state.
    - When interest:
        - is paid by any of entities mentioned above
        - arises in Poland and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by Banco de Comercio Exterior, S.N.C., Nacional Financiera, S.N.C. or Banco National de Obras y Servicios Publicos S.N.C., or
        - arises in Mexico and is paid in respect of a loan for a period not less than three years granted, guaranteed, or insured by PKO S.A., Corporation of Credit Insurance, and Bank Handlowy in Warsaw.
49. If the following conditions are met:
    - When the beneficial owner is a bank or insurance company.
    - When interest is derived from bonds and securities that are regularly and substantially traded on a recognised securities market.
50. When dividends are paid to the company that directly holds at least 10% of the capital paying the dividends on the day they are paid and has done (or will do) so for an interrupted 24-month period from which that date falls.
51. When interest is paid:
    - by a resident of Pakistan to a Polish company or enterprise on loans approved by the MoF of the government of Pakistan
    - to the State Bank of Pakistan from sources in Poland, or
    - to Bank Handlowy in Poland from the sources in Pakistan.
52. For payments of any kind received in consideration for the use of, or the right to use:
    - any copyright, patent, trademark, design or model, plan, secret formula, or process
    - an industrial, commercial, or scientific equipment, or
    - motion picture films, and works on films and videotapes for use in connection with television.
53. For payments received in consideration of technical know-how concerning industrial, commercial, or scientific experience.
54. Interests paid in respect of:
    - a bond, debenture, or other similar obligations of the government, state, political subdivision, or local authority thereof or
    - a loan or credit extended, guaranteed, insured, or refinanced by:
        - Central Bank of Philippines - for Philippines
        - Central Bank of Poland - for Poland, or
        - other lending institutions as specified and agreed in letters of exchange between competent authorities of the contracting states.
55. When dividends are paid to the company that directly holds at least 25% of the capital stock of the company paying the dividends for an uninterrupted 24-month period prior to the payment.
56. If the following conditions are met:
    - When the debtor of such interests is the government, a political subdivision, or local authority.
    - When the interest is paid to the government of other contracting state, a political subdivision, or local authority thereof, or an institution or body in connection with any financing granted by them under an agreement between the governments of the contracting states.

- Loans or credit made on central banks of contracting states and any other financial institution controlled by the state and financing external business that may be agreed upon between the competent authorities of the contracting states.

57. Interests paid to government, administrative, territorial, or the central bank.
58. Dividends paid by:
    - the company that is a resident of Singapore to a resident of Poland (as long as Singapore does not impose a tax on dividends in addition to the tax chargeable on the profits or income of a company) or
    - to government of either contracting state with respect to shares in joint stock companies of that other state.
59. Interest paid to government.
60. Interests paid to government, local authorities, or the central bank.
61. Interests:
    - received by any banking institution that is a resident of contracting state
    - derived from contracting state of the other contracting state either directly or through any agency, or
    - accruing to any company, partnership, or other body of persons resident in the contracting state for any loans in money, goods, and services or in any other form, granted by them to the government of the other contracting state, or to a state corporation, or to any state institution, or to any other institution, to the capital of which, the other contracting state has made any contribution, or to a credit agency, or an undertaking in that other contracting state with the approval of the government of the same state.
62. For payment in consideration, for the use of, or the right to use, any copyrights or cinematograph films.
63. If the following conditions are met:
    - When recipient is a contracting state, or one of its local authorities, or the statutory body of either, including the central bank; or when interests are paid by a contracting state, or one of its local authorities, or the statutory body of either.
    - Such interest is paid in respect of any debt-claim or loan guaranteed, insured, or supported by a contracting state or another person acting on state's behalf.
64. Payments payable to contracting state or a state owned company in respect of tape or films.
65. Royalties made as consideration, for the alienation, or the use of, or the right to use, any copyright of literary, artistic, or scientific work, excluding cinematographic films or tapes for television or broadcasting.
66. When the beneficial owner is the government or a government institution.
67. When dividends are paid to a company that is the resident of the other contracting state and that directly holds at least 10% of the capital, paying the dividends on the day they are paid and has done (or will do so) for an uninterrupted 24-month period from which that date falls.
68. When interests are paid to the government, a political subdivision, or a local authority in connection with:
    - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
    - the sale on credit of any industrial, commercial, or scientific equipment, or
    - any loan granted by a bank.
69. When the beneficial owner is a company that directly holds at least 10% of the outstanding shares of the voting stock of the company paying the dividends.
70. When the beneficial owner is a company that directly holds at least 20% of the capital of the company paying the dividends.
71. When the beneficial owner is:
    - the government or a local authority or
    - the National Bank of Poland or the Central Bank of Uzbekistan Republic.
72. For payment of any kind, received in consideration, for the use of, or the right to use:
    - any patent, design or model, plan, secret formula, or process or
    - any information concerning industrial or scientific experience.
73. Treaty allows application of the domestic tax rate.
74. As long as Iceland does not levy tax at source of income, interest is taxable only in the contracting state of which the beneficial owner of the interest is a resident.
75. When interest is paid to the government, a political subdivision, or a local authority in connection with:
    - a loan granted, insured, or guaranteed by a governmental institution for the purposes of promoting exports
    - a sale on credit of any industrial, commercial, or scientific equipment
    - any loan granted by a bank
    - in respect of a bond, debenture, or other similar obligations of the government of a contracting state, or of a political subdivision or local authority thereof, or
    - to the other contracting state, or to a political subdivision or local authority thereof.
76. When the tax is charged by Poland.
77. When the dividends are paid by a company resident of Poland to a resident of Malta that directly holds at least 10% of the capital company paying the dividends on the date they are paid and has done so or will have done so for an uninterrupted 24-month period in which that date falls.
78. When the recipient is the beneficial owner.
79. According to the Protocol of 22 March 2012, which has entered into force, the maximum WHT rate on interest paid is 5%. However, when interest is paid to the government, including political sub-divisions and local authorities, the central bank, or any statutory body of the state with respect to loans or

credits made or guaranteed by the government of the other state, including political sub-divisions and local authorities, the central bank, or any statutory body of the other state, it shall be exempt from tax in the first mentioned contracting state.

80. There is a WHT exemption on interest payable: (i) on any loan or credit granted by a bank; (ii) to the government of the other contracting state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government; or (iii) to a resident of the other state in connection with any loan or credit guaranteed by the government of the other state, including any political subdivision or local authority thereof, the central bank, or any financial institution owned or controlled by that government. The maximum rate of WHT on interest is 5%.
81. The maximum WHT rate on royalties is 10%.
82. The lower rate applies to fees for technical services.
83. When interest is paid: (i) by the government of a contracting state, administrative subdivision, or local authority thereof; (ii) to the government of the other contracting state, administrative subdivision, or a local authority thereof; or (iii) to the central bank of the other contracting state or a corporate body (including financial institution) controlled or owned by that state, a political or administrative subdivision, or local authority thereof.
84. If the recipient of the interest is the beneficial owner and interest is paid: (i) to the Republic of Poland or the State of Qatar; (ii) on a loan of whatever kind granted, insured, or guaranteed by a public institution for purposes of promoting exports; (iii) in connection with the sale on credit of any industrial, commercial, of scientific equipment; or (iv) on any loan of whatever kind granted by a bank.
85. The treaty rate is 15% for all types of interest. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 5% in respect of interest (i) paid to a bank or insurance company or (ii) derived from bonds or securities that are regularly and substantially traded on a recognised securities market.
86. The general treaty rate is 15%. However, by virtue of a most-favoured-nation clause of the protocol (and since the Chile-Spain treaty provides a reduced rate), the rate is reduced to 10%.
87. The Protocol of 22 March 2012 has not changed the WHT rate in relation to royalties; however, the beneficial owner clause was introduced. Additionally, the new DTT amends the definition of 'royalties'.
88. When the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends, where such holding is being possessed for an uninterrupted period of no less than two years and the dividends are declared within that period.
89. When royalties are paid for the use of, or right to use, industrial, commercial, or scientific equipment.

Tax administration

Taxable period

The taxable period is the calendar year (between 1 January and 31 December). Companies are entitled to choose another (than calendar) fiscal year (e.g. between 1 April and 31 March).

Tax returns

The annual CIT return should be submitted to the tax office within three months following the end of the tax year.

Payment of tax

The same deadline as the CIT return applies to the settlement of the annual CIT liability. In financial terms, the final settlement is not significant since most of the annual liability is paid by CIT advances throughout the tax year.

The CIT advances should be paid for each month by the 20th day of the following month. Entities that started business activities (except for companies organised as a result of certain transformations) and entities whose gross sales revenue (including VAT) in the prior tax year did not exceed EUR 1.2 million are entitled to opt to make advance settlements on a quarterly basis (instead of a monthly basis).

Tax audit process

The tax authorities generally shall notify its intention to initiate a tax audit. The inspection shall be initiated not earlier than after seven days and not later than 30 days from the receipt of the notice.

The duration of all audits in one calendar year may not exceed the following:

- For micro entrepreneurs: 12 working days.
- For small entrepreneurs: 18 working days.
- For medium entrepreneurs: 24 working days.
- For large entrepreneurs: 48 working days.

The rules mentioned above do not apply to the inspection commenced by the customs and revenue office. This kind of tax inspection is initiated without issuing a notification and in practice there is a possibility to prolong the inspection without any specific time limits.

Statute of limitations

Tax liability expires five years after the end of the calendar year in which the tax payment deadline passed. There are also situations when the statute of limitations can be suspended or interrupted (e.g. litigation).

Topics of focus for tax authorities

According to recent statements from the MoF, the focus of the tax audit authorities is on transactions between related parties (transfer pricing issues), VAT frauds, and tax restructuring. Moreover, traditionally, tax audits usually cover:

- Validity of the VAT refund.
- Possibility to correct excise duty resulting from post-transaction rebate.
- Correctness of settlements concerning the use of a trademark.

General anti-abuse rule (GAAR)

According to amendments to the Tax Ordinance Act and certain other acts, legal transactions with the main purpose of obtaining a tax advantage contrary to the tax regulations shall not result in tax benefit. Tax consequences of such transactions will be assessed as if an alternative 'appropriate' transaction had taken place. Furthermore, if transactions carried out by a taxpayer do not have any real economic or business rationale other than tax avoidance, tax authorities may completely disregard them.

The GAAR will be applied to the tax benefits received after the amendments were introduced (i.e. 15 July 2016). This means that the sole fact that the transaction was carried out before the amendments entered into force may not exclude application of the regulations in case the taxpayer obtains a tax benefit after the GAAR is introduced.

Other issues

United States Foreign Account Tax Compliance Act (US FATCA)

On 2 April 2014, the US Treasury announced that an intergovernmental agreement (IGA) was 'in effect' and, on 7 October 2014, the US Treasury and Poland signed and released the IGA. As of 4 May 2015, the President has signed the bill, which confirmed IGA ratification.

National Fiscal Administration introduced

As of 1 March 2017, the National Fiscal Administration (*Krajowa Administracja Skarbowa* or KAS) was introduced. The KAS is a specialised government administration engaged primarily with tasks related to obtaining revenues from taxes, duties, fees, and non-tax budget receivables.

The following offices were created as part of the KAS:

- The Head of the National Fiscal Administration (*Szef Krajowej Administracji Skarbowej*).
- Director of the National Fiscal Information (*Dyrektor Krajowej Informacji Skarbowej*).
- Directors of chambers of fiscal administration (*dyrektorzy izb administracji skarbowej*).
- The heads of customs and revenue offices (*naczelnicy urzędów celno-skarbowych*).
- The heads of tax offices (*naczelnicy urzędów skarbowych*).

Multilateral Instrument to Modify Bilateral Tax Treaties (MLI)

On 14 November 2017, the Act on ratification of the MLI was published in the official Journal of Laws. The MLI globally implements mechanisms created to prevent international profit shifting to locations where they are subject to reduced taxation or non-taxation. Poland is the third country (after Austria and Isle of Man) to ratify the MLI. Poland declared 78 DTTs for the MLI's purposes. Among declared DTTs, there are, *inter alia*, DTTs with Austria, Belgium, Canada, Cyprus, Denmark, France, Holland, Ireland, Luxembourg, Malta, Mexico, Norway, Sweden, and the United Kingdom. At the moment of signing the MLI, Poland has declared 77 DTTs in which the method of avoiding double taxation used to this point (i.e. the tax exemption method) may be replaced by the tax credit method.

Significant developments

January 2018: Jersey, Isle of Man, and Uruguay are back on the Portuguese black list

Following the publication of the 2018 State Budget Law, Jersey, Isle of Man, and Uruguay have been placed, once again, on the Portuguese black list. This measure is effective 1 January 2018.

December 2017: 2018 State Budget Law published

Law 114/2017, dated 29 December, was published in the Official Gazette, having approved the 2018 State Budget Law. The measures became effective on 1 January 2018. The main tax measures included are the following:

Corporate income tax (CIT)

- Capital gains: The territorial scope of liability to tax in Portugal has been extended, leaving capital gains liable to taxation when they result from the transfer of share capital in non-resident entities, provided those shares grant rights, at any given time in the previous 365 days, to immovable property in Portugal (in line with Base Erosion and Profit Shifting [BEPS] Action 6, preventing the granting of treaty benefits in inappropriate circumstances).
- Limitation on the tax deductibility of financing expenses: It is approved that the option for the computation of the limitation to the deductibility of financing expenses at a group level under the special regime of group taxation is automatically renewed for periods of one year after the minimum maintenance period of three years, unless a statement of changes is submitted communicating its waiver.
- State surtax: Increased from 7% to 9% when the taxable profit is over 35 million euros (EUR).
- Tax benefits:
  - All types of credits for share capital increases are now eligible for the purposes of the conventional remuneration of share capital tax benefit.
  - Regarding the tax benefit for the reinvestment of retained earnings (DLRR), the reinvestment term is extended to three years (previously two). It was also approved that the maximum amount of retained earnings that may be used per tax year for the purposes of this tax benefit is increased to EUR 7.5 million (instead of the previous EUR 5 million). Additionally, the deduction can be made up to 50% of the CIT due for micro and small enterprises (previously 25%).
  - The request for the application of the incentive regime for research and development (SIFIDE) shall be submitted up to the end of May (previously the end of July), and a fee can be charged for its evaluation.

- Some tax benefits, such as the net job creation, swaps and loans of non-resident financial entities, deposits of non-resident credit institutions, savings plans in shares, among others, were not renewed and will expire on 1 July 2018 if no additional legislation is published.

Value-added tax (VAT) and excise duties

- It is approved that the taxpayers who benefit from a deferral scheme for the payment of VAT due on previous imports may still opt to self-assess the VAT due on imports, as the deferral schemes no longer prevent the applicability of this regime.
- The excise duties on oil and energetic products, tobacco, alcohol, and alcoholic beverages have increased.

Stamp duty

- The taxation on consumer credit will increase to 0.12% for credits with undetermined term or determined under one year (previously 0.105%) and to 1.5% for credits with determined term over one year.
- There is a new tax compliance obligation of reporting monthly the transactions subject to stamp duty (even if exempt).

Property transfer tax

- The statute of limitations for the property transfer tax is increased to 12 years (previously eight years) for taxpayers that are resident for tax purposes in territories or countries with a more favourable tax regime.
- The property transfer tax, stamp duty, and emoluments exemptions in connection to restructuring operations become automatic (previously a request had to be submitted and the exemption granted by the Ministry of Finance [MoF]) unless the operations require the approval of the Competition Authority. This is not applicable to some demerger operations.

Property tax

- Historical stores of social, cultural, or historical relevance, recognised as such by the municipalities are exempt from property tax. Expenses incurred with the maintenance and preservation of these historical stores are accepted as cost with a 10% mark-up.

General tax law

- The communication to the tax authorities regarding the transfers and remittances of funds to entities located in a country or territory with a favourable tax regime is anticipated to March (previously July).
- From 2018 onwards, taxpayers may use tax credits due by the tax authorities to make payments to third parties, provided that this operation is previously authorised by the tax authorities and the taxpayers.

December 2017: Amendment to the protocol of the tax treaty between Portugal and France

An amendment to the protocol of the tax treaty between Portugal and France has been approved and ratified. The protocol entered into force on 1 December 2017 and is applicable from 1 January 2018 onwards.

The amendment concerns new procedures and mechanisms for the exchange of information and mutual assistance on tax matters. It also introduces a limitation on benefits clause (beneficial ownership).

August 2017: Transposition of European Union (EU) Directives on matters of central register of beneficial ownership, record retention, reporting obligations and mandatory automatic exchange of information on advance cross-border rulings, advance pricing agreements (APAs), and country-by-country (CbC) reporting

Law 89/2017, dated 21 August, approved the regime of central register of beneficial ownership, regarding corporate and other legal entities incorporated in Portugal, including details of the beneficial interests held in those entities. The regime results from the transposition of Chapter III of Directive (EU) 2015/849 of the European Parliament and of the Council, of 20 May 2015, on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing.

Law 98/2017, dated 24 August, amends several legal diplomas (among others, the General Tax Law, the CIT Code, and the Regime of Tax Penalties). This law regulates mandatory automatic exchange of information in case of advance cross-border binding rulings and advance tax and transfer pricing agreements, as well as CbC reporting, transposing Directive (EU) 2015/2376 of 8 December and Directive (EU) 2016/881 of 25 May, both regarding mandatory automatic exchange of information in the field of taxation.

July 2017: Entry into force of tax treaties with the Republic of Vietnam, the Kingdom of Bahrain, and the Sultanate of Oman

Following publication of the respective Notices in the Official Gazette, the tax treaties concluded between Portugal and the Republic of Vietnam, between Portugal and the Kingdom of Bahrain, and between Portugal and the Sultanate of Oman have entered into force. All the tax treaties apply from 1 January 2017. Both the Kingdom of Bahrain and the Sultanate of Oman are included in the Portuguese black list.

June 2017: Portugal signs the Multilateral Convention (MLI) to implement tax treaty related measures to prevent base erosion and profit shifting (BEPS)

Portugal signed the MLI on 8 June 2017 aiming at implementing tax treaty related measures to prevent BEPS. The provisional list of reservations and notifications to the MLI was also published. The MLI is not yet in force.

May 2017: Publication of data regarding transfer to offshores and end of bearer shares

The Portuguese tax authorities are required to publish on their website, on an annual basis, all transfers, including respective amount and reason, made to offshores, as well as statistics about such transfers, and, among other matters, the outcome and number of tax audits, as well as corrections to the taxable income and additional assessments of tax raised. This is established under Law 14/2017, dated 3 May.

Following the publication of Law 15/2017, dated 3 May, the issuance of bearer securities is no longer allowed. Further regulation is still expected.

Taxes on corporate income

Resident companies in Portugal are taxed on their worldwide income.

There is an optional regime to exclude from taxation the profits and losses allocated to a foreign permanent establishment (PE) of a Portuguese company. The regime applies provided that (i) the profit allocated to that PE is subject to and not exempt from a tax foreseen in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to the Portuguese CIT where the legal rate is not lower than 60% of the standard CIT rate, and (ii) the PE is not located in a black-listed jurisdiction. The regime is not applicable to the profit allocated to the foreign PE up to the amount of the losses attributable to that PE that have been taken into account by the Portuguese taxpayer when computing the respective taxable income of the previous five tax years (12 tax years in case of small and medium-sized enterprises [SMEs]). This is an optional regime that must cover, at least, all the PEs located in the same jurisdiction, and is mandatory for a minimum three-year period.

CIT is also applicable to Portugal-source income attributable to a PE of a non-resident company in Portugal. Special withholding tax (WHT) rates apply to income generated in Portugal that is attributable to non-residents without a PE in Portugal (*see the Withholding taxes section for more information*).

A flat CIT rate of 21% applies on the global amount of taxable income realised by companies resident for tax purposes in the Portugal mainland or in the Autonomous Region of Madeira (also applicable to Portuguese PEs of foreign entities).

A reduced CIT rate of 17% (16% in case of the Autonomous Region of Madeira) applies to SMEs on the first EUR 15,000 of taxable income (the standard CIT rate shall apply on the excess). Additionally, SMEs that are located in Portuguese inland regions benefit from a rate of 12.5% on the first EUR 15,000 of the taxable amount, also being subject to the standard CIT rate on the excess. In both cases, reference is made to the concept of micro, small, and medium-sized companies as foreseen in the EU Commission Recommendation 2003/361, concerning the definition of micro, small, and medium-sized enterprises.

Entities that do not carry out a commercial, industrial, or agricultural activity as their main activity are subject to a 21% CIT rate on the global amount of their taxable income.

A lower CIT rate of 16.8% applies to companies that are tax resident in the Autonomous Region of the Azores, including PEs of foreign entities registered therein.

Surtaxes

The following surtaxes may also apply:

- A local surtax (*Derrama*) of up to 1.5% of taxable income, prior to the deduction of any available carryforward tax losses, is levied in certain municipalities. The local surtax is assessed and paid when filing the CIT return.
- A state surtax (*Derrama Estadual*) applies (prior to the deduction of any available carryforward tax losses) at the following rates:
  - 3% applicable to the taxable profit exceeding EUR 1.5 million and up to EUR 7.5 million.

- 5% applicable to the taxable profit exceeding EUR 7.5 million and up to EUR 35 million.
- 9% applicable to the taxable profit exceeding EUR 35 million.

The state surtax is levied on resident taxpayers carrying on commercial, industrial, or agricultural activity and by non-residents with a PE in Portugal. The state surtax is paid in three instalments.

A regional surtax (*Derrama Regional*) applies in the Autonomous Region of Madeira on the same terms as the state surtax. In the Autonomous Region of the Azores, a reduction of 20% of the above rates shall be applicable.

Autonomous taxation

Autonomous taxation applies at different rates on certain expenses incurred by entities subject to CIT. It is self-assessed in addition to CIT (even if no CIT is due) at the following rates:

- Representation and entertainment expenses: 10%.
- Mileage allowance: 5%.
- *Per diem* allowance: 5%.
- Non-documented expenses: 50% (70% for partially or fully exempted taxpayers).
- Company car expenses (including depreciation, rentals, leasing, insurance, maintenance, repairs, fuel, and taxes), except fully electric cars, vehicles allocated to public transport, or vehicles that are taxed as income in kind for personal income tax (PIT) purposes, depending on the acquisition cost and regardless of the year of acquisition:
  - Acquisition cost lower than EUR 25,000: 10%.
  - Acquisition cost between EUR 25,000 and EUR 35,000: 27.5%.
  - Acquisition cost of EUR 35,000 or more: 35%.
- Dividends distributed to wholly or partially exempt taxpayers regarding participations held for less than one year: 23%.
- The total amount of the expenses incurred with any compensation paid as a result of the termination of functions of managers or board members if not related to the productivity targets previously established under the existing labour relation; or the amount that exceeds the remuneration that would be received by the manager or the board member until the term of the labour agreement, in case of redundancy prior to that term; or, in all cases, if the liability for the payment is shifted to another entity: 35%.
- The total amount of the expenses incurred with bonuses paid to managers or board members if the respective amount corresponds to more than 25% of the annual salary and exceeds EUR 27,500: 35%.
- Payments made to open accounts of financial institutions in a jurisdiction with a clearly more favourable tax regime, unless proof is made that the operations effectively took place and do not have abnormal conditions or exaggerated amounts: 35%.

All of the above-mentioned rates of autonomous taxation are increased by 10% if the taxpayer has tax losses in the tax year in which the expenses are incurred.

Corporate residence

A resident company is one whose head office or effective management is located in Portugal.

Permanent establishment (PE)

Under Portuguese tax law, any fixed place of business in Portugal through which the business of an enterprise is wholly or partly carried on is deemed to constitute a PE in Portugal.

A fixed place of business comprises, among others, a place of management, a branch, an office, a factory, a workshop, a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources, and also a building site or a construction or installation project if it lasts more than six months (time period may differ considering the applicable tax treaty).

A PE may also be deemed to exist in case of a person (a dependent agent), which is not an independent agent, acting, in the Portuguese territory on behalf of a company, with powers to intermediate and conclude binding contracts for that company, within the scope of its business activity.

No PE should exist where a fixed place of business in Portugal is used solely for carrying out ancillary or preparatory activities, or, in the case of a company, carries out its activities in Portugal through a broker, general commission agent, or other agent of an independent status, acting in the normal course of its business, bearing all related business risks.

Additionally, the term PE shall be deemed not to include the following actions:

- Use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display, or delivery.
- Maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise.
- Maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise, or of collecting information, for the enterprise.
- Maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character.
- Maintenance of a fixed place of business solely for any combination of activities mentioned above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

VAT rates

There are three VAT rates: the standard rate of 23% (22% in the Autonomous Region of Madeira; 18% in the Autonomous Region of the Azores), the intermediate rate of 13% (12% in Madeira; 9% in the Azores), and the reduced rate of 6% (5% in Madeira; 4% in the Azores).

The intermediate rate applies to supplies of some foodstuffs and to admissions to concerts, shows, theatre, cinemas, circus, and bullfighting. The intermediate rate is also applicable to pre-cooked meals, in ready-to-eat and take away or home delivery regimes, and to food and beverage services rendered, excluding alcoholic beverages, soft drinks, juices, nectars, and carbonated water, or added carbon dioxide or other substances.

The reduced rate applies to the supplies of some basic foodstuffs, periodical publications, books, pharmaceutical products, hotel accommodation, agricultural goods, and passenger transport.

Exports and intra-EU supplies of goods are zero-rated.

Supplies of goods

Supplies of goods are subject to VAT in Portugal if the goods are located in Portugal at the moment their transport or dispatch to the customer begins. If the goods are located in Portugal and there is no transport or dispatch, then supplies of the goods are subject to VAT at the moment they are put at the disposal of the customer.

Supplies of services

Supplies of services are subject to VAT in Portugal whenever: (i) acquired by taxable persons that have their business, a fixed establishment, domicile, or residence in Portugal to which the services are provided (B2B rule) or (ii) supplied to non-taxable persons if the provider has established its business, a fixed establishment, domicile, or residence in Portugal from where these services are provided (B2C rule).

Regardless of the place where the service provider and the acquirer are established, and of the acquirer being a taxable person, the supply of the following services is subject to VAT in Portugal if physically carried out in Portugal:

- Services connected with immovable property in Portugal.
- Passenger transport for the distances covered in Portugal.
- Admission to cultural, artistic, scientific, sporting, educational, entertainment, or similar events in Portugal.
- Restaurant and catering services in Portugal.
- Short-term hiring of a means of transport (up to 30 days, for boats up to 90 days) if the means of transport are put at the disposal of the customer in Portugal.

The supply of the following services is subject to VAT in Portugal if physically carried out in Portugal and if the acquirer is a non-taxable person:

- Transport of goods, other than intra-Community transport of goods, for the distances covered in Portugal.
- Intra-Community transport of goods if the place of departure is Portugal.
- Valuations of and work on movable property.
- Services and ancillary services relating to cultural, artistic, sporting, scientific, educational, entertainment, or similar activities, such as fairs and exhibitions, including the supply of services of the organisers; and hiring of a means of transport, other than short-term hiring, when the acquirer is established, has one’s permanent address, or usually resides in Portugal.

Telecommunications, broadcasting, television, and electronic services supplied to non-taxable persons are taxed in Portugal when the customer, a non-taxable person, is established, has one's permanent address, or usually resides herein.

Customs duties

Customs duties are regulated by the Community Customs Code. Therefore, the rules foreseen for the import and export of goods in Portugal are similar to the rules applicable in other EU member states.

The customs duties' rates applied in Portugal vary according to the origin of the goods. There are several origin agreements that exempt from customs duties the importation of goods from certain countries or that determine reduced rates.

Excise duties

There are different types of excise duties, such as petroleum and energy products tax, alcohol and alcoholic beverages tax, tobacco tax, and vehicle tax.

The tax applicable to petroleum and energetic products depends on the goods supplied, and it varies for leaded petrol between EUR 359 and EUR 650 per 1,000 kg.

Due to the Green Tax Reform, there is a CO2 adding factor to excise duties on petroleum and energetic products, which, in 2018, is 2.271654 for gasoline and 2.474862 for diesel. The adding factor is extensive to petroleum, coal, natural gas, coke, liquefied petroleum gas (LPG), and fuel oil.

The excise duty applies on the supply of natural gas when used for carbonate fuel final consumers at the rate of EUR 0.303307/GgJ and when used as propellant at the rate of EUR 1.15/GJ.

The tax applicable to alcohol and alcoholic beverages also depends on the type of good supplied, varying between EUR 8.34 per hectolitre for a certain type of beer and EUR 1,386.93 per hectolitre for spirits.

Non-alcoholic beverages with added sugar are also liable to excise duties of EUR 16.69 or EUR 8.34 per 1,000 litres, depending on whether the added sugar amounts exceed the 80g/litre amount or not.

The tax applicable to tobacco (*ad valorem*) also varies in accordance with the type of product supplied, namely it varies between 15% of the sale price for cigarettes, 16% for fine-cut tobacco for rolling, 25% for cigars and cigarillos, and 50% of the sale price for tobacco used in a water pipe.

The tax applicable to vehicles varies in accordance with the type of vehicle, the fuel used, and the cylinder of the vehicle. The higher taxation is applicable for cars used for the transport of passengers using petrol as fuel and the lower taxation is applicable for motorcycles.

An excise duty on consumption of electricity is due by producers, traders, self-producers, and consumers that buy electricity in organised markets. The tax applicable to electricity varies between EUR 1/kw to EUR 1.1/kw.

Property tax (Imposto Municipal sobre Imóveis or IMI)

IMI is a municipal property tax computed on the tax registration value (TRV) of urban and rural properties located in Portuguese territory. For urban properties, the TRV is determined by means of a valuation, based on the type of property, calculated by reference to a formula based on objective criteria, such as the construction cost per square metre, area, age, construction quality, and comfort indexes. IMI is due by the real estate owner, the usufructuary, or the holder of the surface right of a real estate unit with reference to 31 December of the year that it concerns.

IMI is levied at the following rates, in addition to corporate or individual tax assessed on actual income generated by real estate:

Real estate type	IMI (%)
Urban real estate	0.3 to 0.45
Rural real estate	0.8
Real estate owned by residents in a black-listed jurisdiction (except individuals)	7.5

The list of countries, territories, and regions that provide a more favourable tax regime ('black-listed jurisdictions') is presented below:

- American Samoa
- Andorra (1)
- Anguilla (1)
- Antigua and Barbuda (1)
- Aruba
- Ascension Island
- Bahamas
- Bahrain
- Barbados
- Belize (1)
- Bermuda (1)
- Bolivia
- British Virgin Islands (1)
- Brunei
- Cayman Islands (1)
- Channel Islands (1, 2)
- Christmas Island
- Cocos (Keeling)
- Cook Islands
- Costa Rica
- Djibouti
- Dominica (1)
- Falkland Islands or Malvinas
- Fiji Islands
- French Polynesia
- Gambia
- Gibraltar (1)
- Grenada
- Guam
- Guyana
- Honduras
- Hong Kong
- Isle of Man (1)
- Jamaica
- Jordan
- Kingdom of Tonga
- Kiribati
- Kuwait
- Labuan
- Lebanon
- Liberia (1)
- Liechtenstein
- Marianas
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- Netherlands Antilles
- Niue Island
- Norfolk Island
- Pacific Islands
- Palau Islands
- Panama
- Pitcairn Island
- Puerto Rico
- Qatar
- Queshm Island
- Saint Helena
- Saint Kitts and Nevis (1)
- Saint Lucia (1)
- Saint Pierre and Miquelon
- Saint Vincent and the Grenadines
- San Marino
- Seychelles
- Solomon Islands
- Sultanate of Oman
- Svalbard
- Swaziland
- The Maldives
- Tokelau
- Trinidad and Tobago
- Tristan da Cunha
- Turks and Caicos (1)
- Tuvalu
- United Arab Emirates
- United States Virgin Islands
- Uruguay
- Vanuatu
- Western Samoa
- Yemen Arab Republic

Notes

1. The Portuguese authorities have signed tax information exchange agreements (TIEAs) with these jurisdictions (in case of the Channel Islands, only with Guernsey and Jersey). The following TIEAs are in force: Andorra, Bermuda, Cayman Islands, Gibraltar, Isle of Man, Jersey, and Saint Lucia.
2. Alderney, Brechou, Great Sark, Guernsey, Herm, Jersey, Jethou, Lihou, and Little Sark.

IMI rates are annually increased three times when urban real estate is vacant or in ruins for a period of over one year.

IMI exemptions and reductions

Urban real estate subject to urban rehabilitation

There is an IMI exemption available to urban real estate subject to urban rehabilitation for a three-year period, renewable for an additional five-year period in case of buildings intended for lease for permanent abode or main permanent abode.

This exemption is only available to buildings located in urban rehabilitation areas or buildings built more than 30 years ago.

Historical stores

Historical stores, recognised by the municipalities as establishments of historical, cultural, or social interest and that integrate the national inventory, will be exempt from IMI from the year in which these situations occur.

Real estate part of a tourism complex granted with tourism utility

Real estate that is part of a tourism complex granted with tourism utility benefits from IMI exemption for a period of seven years.

Urban real estate intended for the production of energy from renewable sources

Urban real estate exclusively intended for the production of energy from renewable sources benefits from a 50% reduction of the IMI rate.

Other benefits of environmental nature attributed to real estate

By resolution of the municipal assembly, municipalities may determine a reduction of up to 25% of the IMI rate, applicable to urban real estate with energy efficiency.

Tax incentives for forestry activity

IMI exemption is applicable to rural real estate corresponding to forest areas covered by a forest intervention zone and to rural real estate intended for forestry exploitation under a forest management plan.

Tax regime for investment promotion (RFAI)

Companies with investments that qualify for the RFAI can benefit from an exemption or reduction from IMI for a period of up to ten years regarding real estate acquired and regarded as an eligible investment.

Additional to the IMI (AIMI)

AIMI is due by individuals and corporations, as well as by structures or collective bodies without autonomous legal personality and undivided inheritances, that are owners, usufructuaries, or have the surface right of urban properties located in Portugal.

Urban properties classified as 'trade, industry, or services' and 'others' are excluded from AIMI.

The taxable basis corresponds to the sum of the TRV of all the urban properties held by each taxpayer, reported as of 1 January of each year.

Properties that benefited from IMI exemption in the previous year are excluded from the taxable basis.

The applicable rates are 0.4% for corporations and 7.5% for urban properties owned by entities in tax havens.

AIMI is assessed by the Portuguese Tax Authority (PTA) in June of each year, with the respective payment made in September.

Construction and housing cooperatives are no longer exempt from AIMI when they are the owners, have the right of surface, or the usufruct, exclusively, of properties intended for social housing or controlled-costs.

On the other hand, it is foreseen the exclusion of taxation of properties that are exclusively intended for the construction of social housing or controlled-costs owned by construction and housing cooperatives or residents' associations.

The properties owned by construction and housing cooperatives, as well as residents' associations, will be excluded from taxation.

Properties owned by condominiums regarding which their tax registration value does not exceed 20 times the annual value of the Social Support Index (EUR 120,092) will also be excluded from taxation.

CIT credit

Taxpayers have the option to deduct the AIMI paid, limited to the fraction of the tax corresponding to the income generated by properties subject to AIMI, in the scope of lease or accommodation activities. This deduction option (deduction to the CIT fraction) jeopardises the deduction of AIMI in the determination of CITable income.

Property transfer tax (Imposto Municipal sobre as Transmissões Onerosas de Imóveis or IMT)

IMT is a municipal tax levied on the transfer for consideration of real estate located in the Portuguese territory. The tax is due by the acquirer at the rates shown below, and the taxable basis is the same as for IMI or the price agreed upon by the contracting parties, whichever is higher. Note that the acquisition of more than 75% of the share capital of a company incorporated as a limited liability company (*Sociedade por quotas*), which owns real estate located in Portugal, is also subject to IMT.

Real estate type	IMT (%)
Rural real estate	5.0
Urban real estate (for residential purposes)	up to 6.0
Other urban real estate and other acquisitions for consideration	6.5
The acquirer is a tax resident in a black-listed jurisdiction (except individuals)	10.0

IMT exemptions

- Acquisition of properties for resale by real estate trading companies.
- Acquisition of properties intended for urban rehabilitation.
- Acquisition of property or autonomous fraction of urban property intended to install a tourism complex to which has been attributed tourism utility.
- Acquisition of real estate by Real Estate Investment Funds for Residential Letting (REIFRLs).
- Restructuring operations or cooperation arrangements.
- Acquisition of buildings individually classified as of national/public/municipal interest.
- Exemption or reduction of the IMT rate, regarding the acquisition of property that constitutes eligible investment under the RFAI.

Stamp duty

Stamp duty is payable on a wide variety of transactions and documents, at rates that may be set in specific amounts or on a percentage basis. Important examples include the following:

Item	Stamp duty (%)
Loans (on the principal) (1):	
With determined term, over one year	0.5 to 0.6
Current account/overdraft/credit with undetermined term or determined term under one year	0.04 per month or fraction
Guarantees:	
Undetermined/five or more years	0.6
Over one year	0.5
Under one year	0.04 per month or fraction
Operations of financial institutions:	
Interest and commissions charged	4
Commission on banking guarantees	3
Commission for insurance brokers	2
Insurance premiums	3 to 9
Real estate transfer for consideration or donation	0.8
Letting or sub-letting (applied on the amount of a month of rent)	10
Donations and inheritances	10
Sale of business as a going concern	5
State's social gambling, included in the bet price	4.5
State's social gambling exceeding EUR 5,000	20
Collective Investment Vehicles (CIVs) investing in money market instruments and deposits (quarterly, on net asset value)	0.0025
Other CIVs (quarterly, on net asset value)	0.0125
Repos	0.5

Notes

1. In case of loans to consumers, tax rates are increased by approximately 90%.

Stamp duty exemptions

Some acts are exempt from stamp duty, such as the ones mentioned below (the exemption may depend on certain requirements):

- Guarantees on stock exchange dealings regarding securities and derivatives.

- Transactions between financial institutions, when directly related to lending/ security operations.
- Short-term treasury needs (less than one year) granted by venture capital companies to companies in which they hold a participation, as well as granted by any company to companies dominated by them or with a shareholding with voting rights of at least 10% or with a purchase price of at least EUR 5 million, as well as to financing between companies in a dominant or group relationship.
- Short-term shareholders' loans (less than one year) in case of direct shareholding of 10% or more, held for one year or more.
- Shareholders' loans, including the respective interest, not reimbursed before one year, when provided by shareholders, of at least 10%, of the share capital and as long as the shareholding is maintained for a consecutive period of one year, or since the incorporation of the subsidiary, provided that, in this case, the participation has been maintained during that period.
- Interest on loans for permanent housing.
- Free transfer of property to spouse, or *de facto* spouse, descendants, and ascendants.
- Mergers or cooperation operations.
- Warranties provided in favour of the state in the management of its direct public debt, and in favour of the Institute for the Management of Social Security Capitalization Funds, in its own name or on behalf of the funds under its management, for the exclusive purpose of covering its exposure to credit risk.
- Warranties provided in favour of the state or social security institutions upon the payment of debt by instalments under enforcement procedures or relating to the recovery of tax and social security credits.
- Under the RFAI, companies are exempt from stamp duty on the acquisition of real estate property that constitutes relevant investment, according to the terms of this regime.
- Securities repos or similar rights exchanged in stock markets, as well as repo and fiduciary sales in guarantee, performed by financial institutions and intermediated by central counterparts, are also exempt from stamp duty.
- Report agreements traded in an exchange stock.

Payroll taxes

There are no payroll taxes other than social security contributions (*see below*).

Social security contributions

Employers are required to make monthly social security contributions at the standard rate of 23.75% on the monthly gross remuneration of their employees.

Social security contributions are deductible for CIT purposes.

Financial sector contribution

Portuguese headquartered credit institutions, Portuguese subsidiaries of foreign credit institutions, as well as branches in Portugal of foreign credit institutions, including EU residents, are subject to a financial sector contribution, applicable on a taxable base composed as follows:

- Base I: Liabilities less the amount of the deposits covered by deposit guarantee schemes, such as the Deposit Guarantee Fund, the Mutual Agricultural Credit Guarantee Fund, or other officially recognised deposit guarantee scheme under the EU Directives. For this purpose, liabilities are defined as the set of elements accounted for in the balance sheet representing liabilities towards third parties,

irrespective of their form or nature (excluding, amongst others, items accounted for as equity, liabilities for defined benefit retirement plans, provisions, liabilities concerning the revaluation of financial derivatives).
- Base II: The notional amount of off-balance sheet financial derivatives, excluding hedging derivatives and back-to-back derivatives.

The financial sector contribution is applicable at a maximum of 0.11% on Base I and at 0.00030% on Base II.

Branch income

The profits of a Portuguese branch are taxed on the same basis as corporate profits. Income remitted by a Portuguese branch to the foreign head office is not subject to taxation in Portugal.

Income determination

Taxable profit is based on accounting income adjusted according to specific provisions of the tax legislation, when applicable.

Inventory valuation

Inventories are valued at the lower of the following values: cost or net realisable value. The first in first out (FIFO) and average-cost methods of valuation are accepted. The last in first out (LIFO) method is not allowed.

Inventory adjustments are deductible for tax purposes on the amount accounted for in the tax year, capped at the difference between the acquisition or production value and, if lower, the net realisable value (duly documented) with reference to the balance sheet.

Capital gains

Under the participation exemption regime, capital gains and capital losses realised on the transfer of shares can be exempt from taxation. This rule applies to all types of Portuguese companies (holdings and operational companies) and includes capital gains on the transfer of shares derived from a non-tax-neutral merger, division, transfer of assets, or exchange of shares, and also in case of a transfer of supplementary capital entries. The regime applies provided that, at the date of the transaction, the following requirements are met:

- The shares are held for a consecutive period of at least one year.
- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the entity from which the shares are transferred.
- The taxpayer is not covered by the tax transparency regime (i.e. imputation of profits to individual or corporate shareholders, regardless of effective distribution).
- The entity from which shares are transferred is not resident in a black-listed jurisdiction.

- The assets of the entity from which shares are transferred are not directly or indirectly comprised of more than 50% of real estate located in Portugal and acquired on or after 1 January 2014 (except real estate allocated to an agricultural, industrial, or commercial activity that does not consist of buying and selling real estate).

This regime also applies to capital gains and capital losses realised by a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- A European Economic Area (EEA) resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a double tax treaty (DTT) (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject to and not exempt in its state of residence from an income tax similar to the Portuguese CIT, which legal rate is not lower than 60% of the standard Portuguese CIT rate (meaning 12.6%).

Where the participation exemption regime on the transfer of shares does not apply, the positive net difference between capital gains and capital losses arising from the transfer of shares is taxed as part of normal income. The same applies on the disposal of tangible fixed assets, intangibles, biological assets, and investment properties. In certain circumstances, only 50% of the net gains on disposal of tangible fixed assets, intangibles, and biological assets (investment properties are not covered) is taxed as part of normal income, provided the sales proceeds are reinvested.

The regime also applies to capital gains and capital losses realised and related with shares held by a company with head office or place of effective management in Portugal that transfers its tax residence to another EU member state or to an EEA member state.

Capital gains and capital losses are determined by the difference between the sales proceeds, net of related costs, and the acquisition value, net of impairment losses and tax deductible depreciation or amortisation, adjusted by the inflation index (in the case of at least two years of ownership).

Dividend income

Under the participation exemption regime, profits distributed to a Portuguese parent company are exempt from taxation, provided that the following requirements are met:

- The taxpayer directly, or directly and indirectly, holds at least 10% of the share capital or voting rights in the subsidiary.
- The shares are held for a consecutive period of at least one year (or maintained for that period).
- The taxpayer is not covered by the tax transparency regime.
- The subsidiary is subject to and not exempt from CIT, an income tax mentioned in Article 2 of the EU Parent/Subsidiary Directive (Council Directive 2011/96/EU), or a tax similar to CIT with a legal rate that is not lower than 60% of the standard CIT rate.
- The subsidiary is not resident in a black-listed jurisdiction.

This regime also applies to profits distributed to a Portuguese PE of:

- An EU resident entity, which complies with the requirements foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An EEA resident entity, subject to tax cooperation obligations similar to the ones established within the European Union, provided that the entity complies with requirements that are comparable to those foreseen in Article 2 of the EU Parent/Subsidiary Directive.
- An entity resident in a state with which Portugal has concluded a DTT (except if resident in a black-listed jurisdiction) that foresees exchange of information and is subject to and not exempt in its state of residence from an income tax similar to the Portuguese CIT.

The participation exemption regime on profits is denied in case of an arrangement or series of arrangements which main purpose or purposes is to obtain a tax advantage that defeats the object and purpose of eliminating double taxation on profits, in case such arrangement or series of arrangements is not regarded as genuine, all facts and circumstances considered. For completeness, an arrangement or series of arrangements is not regarded as genuine if it is not based on valid economic reasons and has no economic reality.

Interest income

Interest income obtained by Portuguese taxpayers is taxed as part of normal income and taxed at the standard CIT rate. Any WHT incurred in interest income received is treated as a payment on account of the final CIT liability, refundable even if no CIT is due, in case of domestic interest income.

Royalty income

Royalty income obtained by Portuguese taxpayers is taxed as part of normal income and taxed at the standard CIT rate. Any WHT incurred in royalty income received is treated as a payment on account of the final CIT liability, refundable even if no CIT is due, in case of domestic royalty income.

Certain royalty income may benefit from the patent box regime (*see the Tax credits and incentives section*).

Foreign income

A Portuguese company is taxed on all its foreign income; however, there is an optional regime to exclude from taxation the profits and losses allocated to a foreign PE (*see the Taxes on corporate income section for more information*).

Taxes paid abroad can be offset against corresponding Portuguese tax (*see Foreign tax credit in the Tax credits and incentives section for more information*).

There are no provisions concerning tax deferral of income earned abroad.

Deductions

Depreciation and amortisation

The qualifying cost of an asset for tax purposes is the acquisition or production cost.

Depreciation must be computed by using the straight-line method or the declining-balance method. The latter cannot be applied to buildings, passenger vehicles, furniture, social welfare equipment, or second-hand assets.

Straight-line rates of depreciation are normally consistent with rates privately used by business and industry and are increased, for the purposes of applying the declining-balance method, by coefficients of:

- 1.5 if assets have a useful life of less than five years.
- 2 if useful life is five or six years.
- 2.5 for useful lives in excess of six years.

Different depreciation methods may be applied without previous approval from the PTA (annual depreciation cannot, however, exceed the depreciation resulting from using either the straight-line or declining-balance methods).

Some examples relating to the maximum straight-line depreciation rate are as follows:

Type of asset	Depreciation rate (%)
Office building	2
Industrial building	5
Electronic equipment	20
Computers	33.33
Ordinary tool and paintings	25
Engines and machine tools	12.5
Office equipment	20
Furniture	12.5
Software	33.33
Passenger vehicles	25

Rates can be reduced by 50% in any one year at the taxpayer's option. If the reduction is more than 50%, the difference is not allowed for tax purposes at a future date. A total of 60% of additional depreciation on revaluation of fixed assets, as permitted by law from time to time, is allowed for tax purposes.

Depreciation rates of tangible assets may be increased by 25% in the case of companies with a schedule of two shifts (for three shifts, 50%), given the faster deterioration of those assets.

Assets with an acquisition value lower than EUR 1,000 can be depreciated in the acquisition year, unless the assets are part of a set of elements that should be depreciated as a whole.

Depreciation of yachts and airplanes that are not essential for business activities is not allowed as a cost for tax purposes.

Depreciation of passenger cars and certain other vehicles on the part of their cost of acquisition that exceeds certain amounts (as defined by law), with reference to their acquisition value, is also disallowed as a cost for tax purposes. The following caps apply (i.e. disallowed cost above the values below):

- EUR 29,927.87 of acquisition cost in the case of vehicles acquired until 31 December 2009.
- EUR 40,000 of acquisition cost in the case of vehicles acquired between 1 January 2010 and 31 December 2010.
- EUR 30,000 of acquisition cost in the case of vehicles acquired between 1 January 2011 and 31 December 2011 (EUR 45,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost in the case of vehicles acquired between 1 January 2012 and 31 December 2014 (EUR 50,000 in the case of electric vehicles).
- EUR 25,000 of acquisition cost in the case of vehicles acquired from 1 January 2015 onwards (EUR 62,500 in the case of fully electric vehicles; EUR 50,000 in the case of hybrid plug-in vehicles; EUR 37,500 in the case of vehicles that use LPG or compressed natural gas).

Development expenses, patents, trademarks, licences, and similar rights may be amortised for tax purposes if acquired for a limited period of time.

The cost of acquisition of certain intangibles with unlimited life (i.e. trademarks, permits, production processes, models, and other industrial property rights) can be amortised for tax purposes over a period of 20 years.

Depreciation of non-consumable biological assets is tax deductible.

Expenses relating to assets generated internally are deductible for tax purposes in the tax year in which the cost is incurred.

Goodwill

Goodwill acquired as a result of a taxable corporate restructure or business combination can be amortised for tax purposes over a 20-year period, except if related with shareholdings.

Start-up expenses

Start-up and research expenses are deductible for tax purposes in the respective tax year.

Limitation on the deductibility of financing expenses

Companies may only deduct net financing expenses up to the higher of the following limits:

- EUR 1 million or
- 30% of the earnings before depreciations, amortisation, taxes, and net financing expenses, adjusted for tax purposes.

In the cases where the taxable year is less than a calendar year, the EUR 1 million limit is reduced proportionally to the duration of the taxable year.

Besides Portuguese tax resident entities, PEs of non-resident entities are also covered by the scope of this rule. Entities subject to the supervision of the Portuguese Central Bank (*Banco de Portugal*) and the Portuguese Insurance and Pension Fund Supervisory Authority (*Autoridade de Supervisão de Seguros e Fundos de Pensões*), as well as Portuguese branches of financial entities or insurance companies resident for tax purposes in the European Union, are excluded from this rule.

No distinction is made between bank and intra-group financing, domestic or foreign financing (EU or non-EU).

Financing expenses considered as excessive (not deductible) in a certain fiscal year may be deductible in the following five fiscal years, provided that, together with the net financing expenses of that year, the above-mentioned limits are not exceeded.

Additionally, where financing expenses do not exceed 30% (or the applicable percentage) of the earnings before depreciation, net financing expenses, and taxes, the unused difference is added to the maximum deductible amount in the following five tax years, until its total deduction.

For the purposes of the regime, net financing expenses consist of, among others, any amounts due in connection to the remuneration of financing, including interest on overdraft facilities, short-term loans, bonds, financial expenses related to financial leases, or exchange losses, deducted from the profits or gains of the same nature.

Where the special regime of group taxation applies, there is the option to make the calculation considering the net financial expenses of the group and the sum of all the respective earnings before interest, taxes, depreciation, and amortisation (EBITDA) adjusted for tax purposes.

Interest on shareholder loans

If the rate applicable to interest and other compensation regarding loans provided by the shareholders to the company is higher than the Euro Interbank Offered Rate (EURIBOR) 12-month rate rounded up with a spread of 2% (at the date the loan was granted), the amount paid in excess is not tax deductible. This rule does not apply when the shareholder is a resident of a tax treaty country or when the interest rate is at arm's length under the transfer pricing provisions.

In the case of SMEs, shareholders' loans with an interest rate of the EURIBOR 12-month rate plus a spread up to 6% are tax deductible.

Bad debt

Impairment losses on doubtful debts are deductible for tax purposes when an insolvency or recovery has been requested or the credits have been claimed in court.

The annual amount of accumulated impairment losses on doubtful debts due for more than six months, with evidence that measures towards its recovery were taken, is capped at the following percentages of the debts:

- More than 6 and less than 12 months: 25%.
- More than 12 and less than 18 months: 50%.
- More than 18 and less than 24 months: 75%.
- More than 24 months: 100%.

Amounts guaranteed by insurance or mortgage, or due or secured by the state, autonomous regions, or municipalities, or due by related parties (e.g. 10% shareholding) are not considered as doubtful debts, and the respective impairment loss is disallowed for tax purposes. Credits due by related parties may still be considered as doubtful debts, provided the recovery of those credits is challenged in court.

The ageing of bills of exchange is calculated from the date when the respective payment is due.

Uncollectable debts are allowed as tax deductible costs if supported under insolvency, recovery enforcement, or in an out-of-court conciliation procedure for the viability of insolvent companies or companies in a difficult economic situation (mediated by the Institute for the Support of Small and Medium-Sized Enterprises or IAPMEI). This rule applies to the amount of the uncollectable debts that were not deducted for tax purposes as impairment losses (or for which the amount was insufficient).

Charitable contributions

Donations to authorised charitable institutions are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 150%. Donations to authorised educational, sport, and environmental institutions are allowable at up to 0.6% of turnover, with the possibility of the cost being raised up to 140%.

Donations to the state, municipalities, and foundations where the state or municipalities participate in the initial capital are fully deductible, with the possibility of the cost being raised up to 140%. Special application may be made by certain entities in order to be included under the referred regime.

Donations of computers, software equipment, training, and consultancy in the area of computers granted to the state, municipalities, foundations, and museums, as well as to authorised charitable and cultural institutions, are allowable at up to 0.8% of turnover, with the possibility of the cost being raised up to 140%.

Vacation accrual

Vacation allowance is tax deductible in the year in which the benefit accrues, regardless of the year in which payment is made.

Pension expenses

Contributions to pension, invalidity, and health schemes are tax deductible up to a rate of 15% of annual staff expenses, provided that, among other conditions, they are available to all employees and the management and disposition of the benefits are outside the control of the taxpayer, such as under an insured scheme with vested benefits.

Fines and penalties

Fines and penalties for infractions that do not have a contractual nature, including late assessment interest, are disallowed for CIT purposes.

Taxes

All taxes other than CIT, autonomous taxation, state surtax (*Derrama Estadual*), and local surtax (*Derrama*) constitute a normal business expense.

Other significant items

The costs borne from the acquisition of social passes are regarded as tax-deductible costs to the extent the employer attributes them on a general basis.

Uninsured losses, including indemnities to third parties, are disallowed unless the risk could not be insured.

Non-documented expenses are not tax deductible and are subject to a 50% autonomous taxation for fully taxable entities.

Net operating losses

Tax losses generated in tax years starting on or after 1 January 2017 can be carried forward for five years, except for SMEs that may still benefit from the 12-year carryforward period. Tax losses generated in tax years starting on or after 1 January 2014, and until those assessed with the 2016 fiscal year, can be carried forward for 12 years. As of 1 January 2017, there is no obligation to use the FIFO method when using carried forward tax losses, meaning taxpayers may opt to use first the losses with the smaller carryforward period. The deduction of carried forward tax losses is capped at 70% of the taxable income.

Carryback of losses is not allowed.

The tax losses carried forward are lost in case of a change in direct ownership of the company of at least 50% shareholding or voting rights (not applicable in case of changes within the same group of companies, under certain conditions).

In special cases of economical merits, the MoF may authorise the use of tax losses upon a request filed by the taxpayer up to 30 days after those changes occur.

Payments to foreign affiliates

A Portuguese corporation is allowed to deduct royalties, interest, and other costs paid to foreign affiliates, provided the amounts are at arm's length. Service fees paid are allowed if there is adequate proof that the service was effectively rendered (an invoice is required in cases where the supplier of the goods or services is obligated to issue such document; otherwise, other supporting documents are required) and has economic substance, as well as if the amount is at arm's length.

Payments to entities resident in a black-listed jurisdiction

Payments made or due, indirectly, to entities resident in a black-listed jurisdiction, when the taxable person has or should have had knowledge of the final purpose given to such payments, will be non-deductible for tax purposes, except if the taxpayer demonstrates that such charges relate to genuine transactions and are not of an abnormal or exaggerated amount. Such knowledge is presumed whenever there are special relations between the taxpayer and the entities in a black-listed jurisdiction or between the taxpayer and the legal representative, fiduciary, or intermediary.

Group taxation

Special regime for group taxation

Taxation under the special tax regime for groups of companies is available, upon the filing of a special form with the PTA, to companies with head office and effective management in Portugal.

The group taxation regime may apply, provided one of the companies directly or indirectly holds 75% or more of the statutory capital of the others and more than 50% of the voting rights.

Tax grouping generally enables the group companies to offset losses incurred by one company against profits of another company.

Tax losses obtained prior to the beginning of the tax grouping can be carried forward and offset only up to the particular company's taxable income (*for the carryforward of tax losses regime, see Net operating losses in the Deductions section*).

To be taxed under this regime, the group companies must meet the following conditions:

- Must be tax resident in Portugal (even if held through an EU or EEA group company).
- Must be subject to the normal regime of taxation at the highest corporate tax rate.
- Must maintain a minimum holding participation of 75%.
- All companies must be held by the parent company for more than one year (excluding newly incorporated companies).
- Cannot be dormant for more than one year.
- Cannot be dissolved or insolvent.
- Cannot have tax losses in the three years prior to the regime application, unless the companies have been held by the parent company for more than two years.
- Cannot have a tax period different from that of the parent company.

Additionally, the parent company:

- should not be controlled by any other Portuguese-resident company that fulfils the requirements to be the parent company and
- should not have opted out from this regime in the three previous years.

When the regime comes to an end or when one company ceases to qualify for this regime, the tax losses obtained during the regime cannot be carried forward and deducted against future individual taxable income of the companies. The parent company is responsible for demonstrating that the requirements for the application of the group taxation regime are met.

It is possible to apply the group taxation regime if the dominant company has its registered head office or place of effective management in an EU or EEA country (in the later case, provided there is administrative cooperation on tax matters similar to the one in place with the European Union). In addition, among others, the following requirements must be met:

- The dominant company owns the dominated companies for more than one year with reference to the date at which the regime starts to apply.
- The dominant company is not directly or indirectly 75% held by a Portuguese dominant company.
- The dominant company is subject to and not exempt from a tax as per Article 2 of Council Directive 2011/96.
- The dominant company is incorporated as a limited liability company.

Transfer pricing

The PTA is entitled to adjust taxable income if the taxpayer and another individual or entity, due to their special relationship, have established particular conditions that diverge from the conditions normally agreed upon between independent entities and distort the results that would arise if those relations were at arm's length. Portugal's transfer pricing legislation broadly follows the Organisation for Economic Co-operation and Development (OECD) guidelines.

Companies with sales and other profits higher than EUR 3 million are required to prepare transfer pricing documentation, which should be filed with the PTA if requested. Penalties arise from non-compliance with this obligation.

An advance pricing agreement (APA) mechanism allows taxpayers and the PTA to establish agreements on a taxpayer's future transfer pricing policy. This aims to guarantee compliance with the arm's-length principle. This regime applies to transactions carried out with related parties and between a PE and the respective head office.

The conclusion of an APA implies the payment of a charge calculated with reference to the taxpayer's turnover, capped at EUR 35,000. This charge is reduced by 50% in the case of a renewal or revision of an existing APA. The duration of these agreements is established in the agreement itself; however, they cannot exceed three years, but can be revised or renewed.

The assessment of an APA procedure takes 180 days for unilateral APAs, and 360 days for bilateral or multilateral APAs. This period is reduced to 100 business days for APAs concluded in connection with a relevant investment project in Portugal, as foreseen in the Tax Investment Code (*Código Fiscal do Investimento*).

For the PTA to confirm compliance of the transfer pricing method(s) with the terms and conditions set out in the APA, the taxpayer must prepare an annual report. The report must be made available to the PTA before the last business day of May in the year following that in which the transactions took place (i.e. when the tax year corresponds to the calendar year). Failure to comply invalidates the APA.

Country-by-country (CbC) reporting

Taxpayers are required to submit the CbC report, which applies to entities belonging to an economic group with an annual consolidated revenue in the preceding tax year of at least EUR 750 million. The report should be filed by the end of the 12th month following the end of the tax year to which it relates (starting in 2016).

Additionally, taxpayers need to communicate to the PTA, until the last day of the fifth month following the end of the Portuguese entity's tax year, which of the group entities is responsible for the CbC report for that year, as well as its fiscal jurisdiction and its tax ID.

Thin capitalisation

Thin capitalisation rules have been revoked following the adoption of rules for the limitation on the deductibility of financing expenses. *See Limitation on the deductibility of financing expenses in the Deductions section for more information.*

Controlled foreign companies (CFCs)

Profits or income derived by an entity resident in a black-listed jurisdiction, or in a jurisdiction where it is subject to an effective tax rate equal to or lower than 60% of the Portuguese standard CIT rate, exempt, or not subject to a tax similar to the Portuguese CIT, are imputed to the Portuguese taxpayer, provided it holds, directly or indirectly, at least 25% of the share capital, voting rights, or rights on income or assets of that entity

(10% if more than 50% of the capital, voting rights, or rights on income or assets of that entity is held by Portuguese taxpayers). Upon distribution of the profits, a deduction is available for previously imputed income.

CFC rules also apply if the controlled entity (*as defined above*) is held by a Portuguese entity through a legal representative, fiduciary, or intermediary.

CFC rules do not apply if the CFC is resident in another EU country or in an EEA member state (bound to administrative cooperation on tax matters), provided that there are valid economic reasons underlying the incorporation and running of such company and it carries out agricultural, commercial, industrial, or services activities.

Upon a dividend distribution by the CFC, the tax credit of the tax paid abroad, which is not used, cannot be carried forward to subsequent tax years.

Tax credits and incentives

Foreign tax credit

International juridical double taxation

Taxes paid abroad can be offset against corresponding Portuguese tax, capped at the lower of (i) the tax liability corresponding to the foreign income, net of costs directly or indirectly incurred, or (ii) the foreign tax paid. In both cases, it is limited to the foreign tax as foreseen in the applicable DTT. This foreign tax credit can be carried forward for five years. The computation of the amount of the tax credit is determined per jurisdiction, considering the total amount of the respective income, except in relation to income obtained by foreign PEs (the deduction in this case is assessed individually).

International economic double taxation

Taxpayers may opt to apply a tax credit (underlying tax credit) for international economic double taxation regarding profits or reserves received, to which the participation exemption regime on profits does not apply, and provided that the taxpayer holds (or becomes the holder of) at least 10% of the share capital of the subsidiary for a period of one year.

When choosing the above-mentioned option, the taxpayer shall add to the taxable income the amount of the income tax related to the distributed profits or reserves that has been effectively paid abroad by the subsidiary.

General tax benefits and incentives

Contractual tax incentives

Relevant investment projects up to 2020 (minimum investment of EUR 3 million) that qualify for strategic economic interest and promote the creation of jobs are eligible for tax incentives, as foreseen in the Tax Benefits Code and the Investment Tax Code. These are granted on a case-by-case basis under a government contract for a period not exceeding ten years and include a tax credit of 10% to 25% of the investment in addition to exemptions or reductions from property transfer tax, property tax, and stamp duty.

Patent box regime

Industrial property rights registered on or after 1 July 2016

The new patent box regime is in line with BEPS Action 5 (Authorised Nexus Approach) and foresees a 50% deduction of the total income derived from the sale or granting of the temporary use of industrial property rights (i.e. patents and industrial drawings and models), limited by the ratio between the eligible expenses and the total expenses incurred in developing or using the intellectual property (IP)-protected assets. The new regime also foresees a 30% mark-up of the eligible expenses incurred with the development of the assets with IP protection, capped at the amount of the total expenses incurred with the development of those assets. The regime continues to be applied to income derived from industrial property rights derived from research and development (R&D) developed internally. Transactions with associated enterprises, including entities resident in black-listed jurisdictions, are excluded.

Costs/expenses not directly connected with the activities of R&D are excluded from the computation, such as interest or real estate depreciation.

The applicability of this regime will require a clear distinction in the accounting records in respect of profits, as well as expenses, associated with the IP in order to be able to distinguish them from other source profits and expenses.

This new regime applies only to patents and other industrial models or drawings registered on or after 1 July 2016 and will be in force until 30 June 2021.

Industrial property rights registered on or after 1 January 2014 and up to 30 June 2016

Income derived from the sale or granting of the temporary use of industrial property rights (i.e. patents and industrial drawings and models) is 50% exempt. The regime applies to income derived from industrial property rights derived from R&D developed internally or contracted from third parties. Transactions with associated enterprises, including entities resident in black-listed jurisdictions, are excluded. The regime applies to the above-mentioned industrial property rights registered on or after 1 January 2014 and until 30 June 2016, and is in force until 30 June 2021.

Collective Investment Vehicles (CIVs)

CIT

The taxable profit of a CIV corresponds to the net income of the period, computed in accordance with the applicable accounting standards, while disregarding the following:

- Investment income, rental income, and capital gains (unless if derived from ‘offshore’ entities).
- Expenses related to the income referred to above.
- Non-deductible expenses under article 23-A of the CIT Code.
- Income and expenses related to management fees and other commissions reverting to the CIV.

Tax losses generated by the CIV follow the regime foreseen in the CIT Code, with the necessary amendments.

The taxable profit assessed by a CIV is subject to the standard CIT rate. CIVs are exempt from municipal and state surtax; however, they are subject to autonomous taxation rates as foreseen in the CIT Code.

CIT due by a CIV is assessed in the periodical CIT return. Respective payment should be made until the last day of the time limit foreseen for the submission of the form.

Stamp duty

Stamp duty is also levied on the net asset value of the CIV, as follows:

- For CIVs investing exclusively in money market instruments and deposits, at a rate of 0.0025%.
- For other CIVs, at a rate of 0.0125%.

The tax is assessed quarterly, in March, June, September, and December of each year, and should be paid by the CIV by the 20th day of the month following the end of the quarter.

Taxation of a CIV's investors

Regarding the taxation of income obtained by holders of participation units/ shareholdings in the CIV, the taxation 'at exit' rule is applicable.

Income obtained by resident investors is subject to taxation at the PIT level (generally, at the rate of 28%) and CIT level (being considered in the taxable profit of the investors).

Income obtained by non-resident investors without PE benefit from a favourable tax regime:

- Taxation at the rate of 10% in case of income arising from Real Estate Investment Funds (REIFs) and Real Estate Investment Companies.
- Exemption in case of income arising from Securities Investment Funds and Securities Investment Companies.

This regime does not apply, being instead applicable the PIT and CIT regime foreseen for resident investors, whenever the investors are tax residents in 'offshore' jurisdictions or, as a general rule, are held more than 25% by tax residents in Portugal.

Pension funds

Pension funds are exempt from CIT and IMT.

The CIT exemption is applicable to pension funds incorporated under the Portuguese law as well as to pension funds established in another EU country or in an EEA member state (bound to administrative cooperation on tax matters) that cumulatively fulfil the following requirements:

- Exclusively assure the payment of retirement pensions granted from elderly, handicapped, surviving, pre-retired, health, and post-employment benefits, as well as death benefits when complementary and ancillary to the previously mentioned.
- Are managed by pension funds professional institutions to which Directive 2003/41/ EC, of the European Parliament and Council, applies.
- Are the effective beneficiaries of the income.

- In the case of dividend distributions, the related shareholding should have been held for a consecutive one-year period.

Contractors for North Atlantic Treaty Organization (NATO) infrastructures

Contractors for NATO infrastructures are exempt from CIT.

Net young employment creation

150% of the costs related to net increase job creation, under labour contracts without term, for employees up to 35 years (including) of age and for long-term unemployed individuals may be deducted from taxable income. For this purpose, the fixed remunerations paid and the contributions made by the employer to social security should be considered. The maximum amount of annual increase on deductible costs for each eligible employee is 14 times the national minimum retribution (EUR 580 in 2018).

The increase in 50% of the expenses incurred with the same employer is applicable to more than one employee, provided that there are no special relations.

This tax benefit is not cumulative with any tax benefits or other incentives (e.g. social security) concerning the same employee.

This deduction applies for a period of five years for each employee.

Research and development (R&D) (Sistema de Incentivos Fiscais em Investigação e Desenvolvimento Empresarial or SIFIDE II)

Portuguese tax resident companies carrying out commercial, industrial, or agricultural activities, and non-resident companies with a PE in the Portuguese territory, are allowed to deduct from the CIT due, up to the respective amount, the value of eligible expenses incurred with R&D, in a double percentage as follows:

- Base rate: 32.5% of the R&D expenses incurred; this rate is increased by 15% in case of SMEs that do not benefit from the incremental rate of 50% (applicable to entities that had completed two years of activity).
- Incremental rate: 50% of the difference between the R&D expenses made in the tax year and the average amount of the R&D expenses made in the previous two years, up to the limit of EUR 1.5 million.

Expenses that, due to insufficient tax due, cannot be deducted in the tax year they were incurred can be carried forward for eight years.

Eligible expenses related to allowances paid to personnel directly involved with R&D tasks are capped at 55% of the operational expenses incurred.

Expenses incurred in connection with projects that include, exclusively, third parties, including contracts and R&D services, are not considered.

Expenses relating to staff with a minimum academic qualification of level 8 of the National Qualifications Framework are considered at 120% of their amount.

Expenses related to the making of eco-design products will be increased by 10%. This increase will depend on the submission and approval of the project to the Portuguese Environment Agency.

Expenses related to demonstrations are eligible for the SIFIDE II regime, provided they are notified up front.

Expenses incurred with the acquisition, registration, and maintenance of patents, essential for the performance of R&D activities and audits, are accepted only for micro, small, or medium-sized companies.

The deduction of R&D expenses requires that the entity develops agricultural, industrial, or commercial activities or services as its main business activity.

The applications should be submitted by the end of May of the year following the year in which the investment was made, and applications referring to years previous to that fiscal year will not be accepted.

The regime applies until 2020.

Incentives for the acquisition of companies in a difficult economic situation

The regime of incentives applicable to the acquisition of companies in a difficult economic situation may also apply to cases approved by IAPMEI within the scope of the Incentive System for the Revitalization and Modernization of Companies (SIRME). Under this regime, the acquiring company may deduct tax losses assessed but not yet used by the acquired company for a period of five years in proportion of its participation in the share capital of the acquired company, capped at 60% of the taxable income.

Tax regime for investment promotion (Regime Fiscal de Apoio Ao Investimento or RFAI)

RFAI establishes several tax incentives to investment realised within specific business sectors.

Among other incentives, companies that invest in certain regions can benefit from a deduction against CIT otherwise payable (capped at 50% of the CIT due) of 25% (for qualified investments lower than EUR 10 million) or 10% (for the part of qualified investments exceeding that limit) of the qualified investment. Companies are also able to carry forward any unused credit for ten years and may benefit from exemptions or reductions from property transfer tax (IMT), property tax (IMI), and stamp duty on the acquisition of real estate for investment purposes. IMT exemptions are subject to the approval of the municipality where the real estate is located and where the investment is made.

Loan interest and lease rentals on imported equipment

When paid by the state, regional authorities, and public services, loan interest and lease rentals on imported equipment can qualify for partial or full exemption from tax upon an appropriate application.

Real Estate Investment Fund for Residential Lease (REIFRL)

A regime is applicable to REIFRL and to Real Estate Investment Companies for Residential Lease (REICRL) incorporated in accordance with the Portuguese law until 31 December 2014.

The following benefits are established for this tax regime:

- CIT exemption on income obtained by REIFRLs.
- CIT exemption for the income obtained by participation unit holders, except for the capital gains arising from the sale of such participation units.

The above-referred tax regime and respective exemptions are not applicable to entities resident in a black-listed jurisdiction.

Incentives to urban rehabilitation

Incentives are applicable to real estate property covered by rehabilitation projects undertaken until 2020.

REIFs that have been incorporated between 2008 and 31 December 2013 may benefit from:

- CIT: The income obtained by REIFs is tax exempt when the funds are incorporated in accordance with the Portuguese law, and respective assets are comprised of at least 75% real estate subject to rehabilitation projects in qualifying areas.
- Property transfer tax: The available tax benefits will cover only buildings located in urban rehabilitation areas or buildings built more than 30 years ago, as follows:
  - IMT exemption on the acquisition of buildings, provided that the rehabilitation works are initiated within three years.
  - IMT exemption on the first transfer of buildings intended for lease for permanent abode and, in case of buildings located in an urban rehabilitation area, buildings intended for main permanent abode.
  - The granting of the above-mentioned exemptions depends on a decision in this respect of the municipality of the area of the real estate property.
- Property tax: There is an IMI exemption available for urban properties subject to rehabilitation works for a period of three years, renewable for an additional five-year period in case of buildings intended for lease for permanent abode or main permanent abode. Again, the granting of this exemption depends on a decision in this respect of the municipality of the area of the real estate property.

Conventional remuneration of share capital/notional interest deduction

This regime foresees a deduction of 7% of credits or the current year profits, up to EUR 2 million, upon the incorporation of an entity or on capital increases. The deduction is made in the tax period where the entries are made and in the following five tax periods.

This benefit is applicable to all entities and is not limited to the *de minimis* rule.

This tax benefit will not be applicable when it is or has been applied, in the same tax period or in the previous five tax periods, to entities that hold, directly or indirectly, a shareholding in the beneficiary entity, or are held, directly or indirectly, by the same entity, to the extent of the amount of the capital contributions of the entities that have benefited from this regime.

For the taxpayers that use this benefit, the limitation of the net financing expenses will be the higher value between EUR 1 million and 25% of the income before depreciation, amortisation, net financing expenses, and taxes (instead of the standard 30%).

Tax benefits and incentives for non-resident corporate entities

Capital gains

Capital gains on the sale of shares and quotas held in a Portuguese company by a non-resident company may be tax exempt. However, there are some important exceptions, such as:

- Where the non-resident shareholder (without a PE in Portugal) is owned more than 25%, directly or indirectly, by a Portuguese resident company, except when the following cumulative conditions are met in respect of the non-resident shareholder:
  - Is resident in an EU member state, an EEA member state (bounded by an agreement for administrative cooperation in tax matters similar to the EU's), or a state that has a tax treaty in force foreseeing exchange of information.
  - Is subject to and not exempt from corporation tax as foreseen in EU Council Directive (Directive 2011/96/EU, dated 30 November) or a tax similar to the Portuguese CIT (in the latter case, provided that the legal rate is not lower than 60% of the standard Portuguese CIT rate that now stands at 21%).
  - Directly, or directly and indirectly, holds at least 10% of the share capital or of the voting rights of the Portuguese resident entity being sold for a minimum holding period of one consecutive year.
  - Is not part of an artificial scheme which purpose or main purpose does not aim at obtaining a tax advantage.
- Where the non-resident shareholder is located in a black-listed jurisdiction.
- Where the assets of the company sold consist in more than 50% of immovable property located in Portugal or, in case of a holding company, if it is in a control relationship with a Portuguese resident company whose assets consist in more than 50% of immovable property located in Portugal.

Capital gains arising from the transfer of equity or similar rights in non-resident entities shall also be subject to taxation in Portugal when, in any moment of the previous 365 days, the value of such equity or rights derives, directly or indirectly, in more than 50% from immovable properties located in Portuguese territory (except if these immovable properties are allocated to agricultural, industrial, or commercial activities other than the buying and selling of real estate).

Government and corporate bonds

Interest and capital gains on government and corporate bonds are tax exempt (where held by entities not located in black-listed jurisdictions) under certain conditions.

Interest paid by resident credit institutions

Interest paid by resident credit institutions to non-resident financial companies deriving from loans as well as gains arising from swap transactions are tax exempt.

Tax regime applicable to external loans

Interest derived from *Schuldscheindarlehen* loan agreements signed by the Public Treasury Institute (IGCP), on behalf of the Portuguese Republic, is tax exempt, provided the creditor is not resident in Portugal and has no PE herein to which the loan can be allocated to.

Special tax regime applicable to debt securities issued by non-resident entities

Income from debt securities representing public and non-public debt issued by non-resident entities is tax exempt, provided that the income is considered to be obtained in Portugal, under Portuguese tax rules, and paid by the Portuguese state as a guarantor of the obligations undertaken by the entities in which it owns a participation, together with other EU member states.

Repo operations

Gains obtained by non-resident financial institutions on securities' repo operations undertaken with resident credit institution are exempt from CIT, provided that such gains are not attributable to Portuguese PEs of non-resident financial institutions.

Securities repos or similar rights exchanged in stock markets, as well as the repo and fiduciary sales in guarantee, performed by financial institutions intermediated by central counterparties, are also exempt from stamp duty.

Madeira International Business Centre (MIBC)

Entities licensed to operate in the MIBC until 31 December 2020 benefit from a special tax regime, which is applicable until 31 December 2027.

The MIBC special tax regime provides a reduced CIT rate of 5% on qualifying foreign-source income, based on thresholds of taxable income and job creation requirements. MIBC-licensed entities also benefit from an 80% exemption from stamp duty, property taxes, and municipal and regional surtaxes.

Non-resident shareholders (except if domiciled in black-listed jurisdictions) of MIBC-licensed entities benefit from an exemption from WHT on dividend distributions, regardless of the percentage of ownership or holding period, and shareholders' loans.

Other non-resident entities, regardless of their tax residence, that carry out business with MIBC-licensed entities benefit from an exemption from WHT on interest, royalties, technical assistance, and service income received, regardless of their tax domicile, provided that the income received is related with the activity of the MIBC-licensed entity.

MIBC-licensed companies generally benefit from Portugal's network of DTTs. EU laws and regulations apply to Madeira.

The MIBC special tax regime is not available to entities pursuing intra-group services (head office activities and business and management consulting), financing, and insurance activities. Certain productive activities are also excluded.

Tax benefits and incentives to investment in the Autonomous Region of Madeira

The Investment Tax Code applicable to the Autonomous Region of Madeira adapts the tax benefits and incentives foreseen for the mainland to the Autonomous Region of Madeira.

The main adjustments are made in the following tax benefits and incentives:

- Contractual tax benefits regime: Investment projects in Madeira Island amounting to EUR 1.5 million and EUR 500,000 in Porto Santo Island in the sectors foreseen under the EU guidelines for regional aid are consider as eligible. The CIT credit is available at up to 35% of the relevant investment, provided some conditions are met. Exemptions or reductions from property taxes and exemptions from stamp duty are also available.
- Tax regime for investment support: Investments in specific business sectors are eligible for a CIT credit of up to 35% of the relevant investments until EUR 1.5 million of investment and up to 15% for the relevant investments above that amount. The unused credit can be carried forward for a ten-year period. Exemptions or reductions from property taxes and exemptions from stamp duty are available.
- Reinvestment of retained earnings: Micro, small, and medium-sized companies in Madeira that reinvest up to 15% of their retained earnings, capped at EUR 1.5 million, are eligible for a CIT credit of up to 25% of the tax due.
- R&D incentives: 32.5% of R&D expenses, including acquisition of assets, costs with qualified staff and board members involved in the R&D activities, among others, might be deductible to the taxable amount in the period they are incurred or in the following eight years. An additional 50% deduction might be available for increases in the average R&D expenses in comparison with the two previous years, limited to EUR 1.5 million.

Investment projects developed in 'Brava Valley' will benefit from an additional deduction of 10% in all the tax benefits and incentives available. The above incentives are subject to the *de minimis* rule within the context of European Union Commission's (EC) Regulation 651/2014 of 16 June.

Withholding taxes

General WHT rates

Recipient	Residents (%) (1)	Non-residents (%) (1)
Dividends	25 (2)	25 (3, 4)
Interest	25	0 (5)/25 (4)
Royalties	25	0 (5)/25
Banks deposits	25 (6)	25 (4, 6)
Property income	25	25
Service charges	0	25 (7)
Remuneration of board members	21.5	21.5
Other	25	25

Notes

1. For residents, tax withheld constitutes a payment on account of final corporate or individual income tax due. For non-residents, tax withheld is the final tax, except for property income, in which case it is a payment on account.
2. Not subject to WHT in the case of holdings of at least 10% owned for at least one year.
3. Not subject to WHT if the non-resident entity meets the following requirements (the rule also applies to a PE in another EU or EEA member state of an entity that meets the following requirements):
   - Directly, or directly and indirectly, holds at least 10% of the share capital or of voting rights in the Portuguese subsidiary (25% in the case of a parent company resident for tax purposes in Switzerland), for a minimum period of one year (two years in the case of a parent company resident for tax purposes in Switzerland).
   - Is resident in an EU member state, an EEA member state (bounded to administrative cooperation in tax matters similar to the EU's), or a state with which Portugal has concluded a tax treaty that foresees exchange of information.

- Is subject to and not exempt from an income tax mentioned in Article 2 of Council Directive 2011/96/EU, dated 30 November, or a tax similar to CIT, and in case of a resident in a tax treaty state, the applicable legal rate is not lower than 60% of the standard CIT rate.

4. WHT rate is increased to 35% when the income is paid or due to entities resident in black-listed jurisdictions.
5. Not subject to WHT if the EU Interest & Royalty Directive 2003/49 applies.
6. WHT rate is increased to 35% when the income is paid in bank accounts open in the name of one or more account holders but on behalf of non-identified third parties.
7. Not subject to WHT if a tax treaty is applicable.

Tax treaty rates

Tax treaties reduce the above-mentioned rates as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Algeria (3)	10/15	15	10

Notes

1. The lower of the listed rates applies to royalties when the beneficiary holds 50% or less of the paying company's share capital.
2. There is no WHT on dividends if the EU Parent/Subsidiary Directive applies.
3. The lower of the listed rates applies to dividends when the beneficiary directly holds 25% or more of share capital. Depending on each DTT, a two year holding period may be required.

4. The lower rate applies to interest on debentures raised in France after 1 January 1965 or on significant loans or debentures raised in Portugal or abroad under major development projects listed in the treaty annex.
5. The lower of the listed rates applies to bank loans, but if interest is payable from Portugal, the bank loans must qualify as being of economic or social interest or fall under an approved development plan.
6. The lower of the listed rates applies to interest received by financial institutions.
7. The lower of the listed rates applies to technical assistance.
8. The lower of the listed rates applies on interest related to loans with a minimum maturity of two years.
9. The rate of 5% regarding interest applies to bonds interest or other securities transacted in the stock market. The rate of 10% applies to loans from banks or insurance companies or credit selling of equipment.
10. The rate of 5% regarding royalties applies to equipment lease.
11. The rate of 10% applies if the company that is paying the dividends is a resident of Israel and the dividends derive from profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israel company tax. The rate of 5% applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
12. The treaty is signed but not yet in force.
13. The lower of the listed rates on dividends applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends. Depending on each DTT, a one year holding period may be required. In the case of Saudi Arabia, the 10% minimum holding requirement is waived in case the beneficial owner is the state or a public entity.
14. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that for an uninterrupted period of at least 12 months prior to the payment of the dividends or if the company paying the dividends has existed for less than 12 months, during the lifetime of the company, directly holds at least 10% of the capital of the company paying the dividends, or if the beneficial owner of the dividends is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; and, (ii) in the case of Norway, the government of Norway, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Norway.
15. A WHT rate of 5% on dividends applies in case of shareholdings of at least 25% on the company distributing the dividends, as well as for an exemption on dividends, in case of shareholdings of at least 25% held for at least two years. An exemption from WHT is also foreseen regarding interest and royalties, when paid between associated companies (shareholdings of at least 25% held for at least two years), in line with the Agreement between the European Community and the Swiss Confederation.
16. The lower of the listed rates applies to dividends if the beneficial owner is a company (other than a partnership) that (i) directly holds at least 10% of the capital of the Portuguese company paying the dividends or (ii) directly controls at least 10% of the voting rights of the Peruvian company paying the dividends.
17. The lower of the listed rates applies to interest related to credits of any nature granted by a financial institution or, in the case of the Ivory Coast, Saudi Arabia, the Sultanate of Oman, Vietnam, and São Tomé and Principe, when the beneficial owner or the entity paying the interest is the state or other public body (including the central bank) of the contracting states.
18. The lower of the listed rates applies to royalties paid for technical assistance provided in connection with the use of, or the right to use of, author's rights, or information concerning industrial, commercial, or scientific experience.
19. The rate of 5% on dividends applies if the beneficial owner is: (i) in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Bank of Portugal; (ii) in the case of the Sultanate of Oman, its government, the Central Bank of Oman, the state's general reserve fund, or the Omani Investment Fund. The rate of 10% applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
20. The rate of 5% on dividends applies if the beneficial owner is a company (other than a partnership) that directly holds at least 70% of the capital of the company paying the dividends. The rate of 10% on dividends applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
21. The lower rate on dividends applies if the beneficial owner holds, directly or indirectly, at least 5% of the capital of the company paying the dividends.
22. The rate of 5% applies to royalties paid in connection with the use of, or the right to use of, author's rights.

Tax administration

Taxable period

The tax year is, as a general rule, the calendar year. A different tax year is allowed in the case of companies obligated to accounting consolidation and of PEs of non-resident entities, which can adopt the tax period of the non-resident company. The different tax year should, however, coincide with the period to which the financial statements concern. If the option of a tax year different from the calendar year is taken, the new tax period must be maintained for a minimum of five years. The five-year minimum period is not applicable if the taxpayer is transferred to a group of companies that are subject to consolidation of financial statements and the holding company has a fiscal year different from the one that was being adopted by the taxpayer.

Tax returns

The annual CIT return must be submitted by electronic data transmission by the last day of May of the year following the year of income. Whenever the tax year ends on a date other than 31 December, the annual CIT return shall be submitted by electronic data transmission by the last day of the fifth month following the year-end. The system is one of self-assessment.

Payment of tax

Tax is paid in instalments. Three payments on account are due in July, September, and up to 15 December of the year in which taxable income arises corresponding to 95% of the previous year's corporate tax assessment (for taxpayers with a turnover above EUR 500,000; 80% if below this amount). Payments on account are not required if the previous year's corporate tax assessment is less than EUR 200. The third payment may be suspended upon declaring that no further tax is due in respect of the current year. However, interest is assessed at a rate of 4% if this results in postponing more than 20% of the tax that would otherwise have been paid.

A last instalment is paid (or received) through self-assessment upon filing the annual tax return in May of the following year.

If the tax year ends on a date other than 31 December, interim payments take place in the seventh, ninth, and up to the 15th of the 12th month of the tax year.

Filing of the annual tax return together with the final payment is in the fifth month following the close of the tax year.

Three additional payments on account of *Derrama Estadual* are due on the same dates as the interim payments mentioned above. The additional payments on account correspond to 2.5% of the taxable profit above EUR 1.5 million and up to EUR 7.5 million, 4.5% of the taxable profit above EUR 7.5 million and up to EUR 35 million, and 8.5% of the taxable profit above EUR 35 million, assessed in the previous year.

In particular situations, a special payment on account is due of a minimum of EUR 850 up to EUR 70,000, paid in March, or in March and October (the third or the third and tenth month of the tax year if it ends on a date other than 31 December).

Interest and penalties

Late assessment interest is due in case of delay on the assessment of taxes due. Late assessment interest is computed on a daily basis. The current rate of late assessment interest is 4% (year).

Late penalty interest is due in case of delay in the payment of the tax assessed. The current rate is 4.857%. Late penalty interest is computed on a daily basis. Tax penalties for companies are capped at EUR 165,000 in the case of intention and EUR 45,000 in the case of negligence. In general, in case of failure or late payment of CIT, companies are liable to a penalty varying between 30% and 100% of the tax due, capped at EUR 45,000 (in case of negligence).

Specific tax penalties apply regarding transfer pricing documentation (including CbC reporting) and the CFC regime (between EUR 1,000 and EUR 10,000 for companies) and regarding omissions or inaccuracies regarding ruling requests (between EUR 750 and EUR 22,500 for companies in the case of urgent rulings or 25% of the previous amounts in the case of non-urgent rulings).

There is the possibility of applying for penalty reduction, provided certain requirements are met (e.g. regularisation of the tax situation/payment of the tax due; situation where there was no damage to the Revenue).

Tax audit process

Taxpayers are audited by the PTA based on several criteria, as detailed in a specific document prepared by the PTA.

The PTA must notify the taxpayers of the preliminary conclusions reached in cases where these may lead to tax assessment acts unfavourable to the taxpayers, further to which taxpayers may present their argumentation.

The PTA must then prepare a final report of the tax audit performed, identifying the facts detected.

Tax audits may be initiated within the statute of limitations (*see below*).

Tax audits must be concluded within six months. A prorogation of the deadline to one year may apply under certain conditions (e.g. complexity of the facts involved, necessity to make use of mechanisms of mutual assistance on tax matters, additional/new information being provided by the taxpayer).

The PTA releases, on a periodical basis, a list of taxpayers that, due to the nature of their activities, their turnover, or other criteria, are subject to regular monitorisation. There is also a specific department for large taxpayers.

Statute of limitations

The statute of limitations period is four years, but can be extended in case of tax losses. Regarding facts involving black-listed jurisdictions, the statute of limitations for the right to assess taxes is extended to 12 years while the time period allowed to collect taxes is extended to 15 years. The statute of limitations period is also increased from four to 12 years in case of facts related to deposit and securities accounts in financial institutions outside the European Union.

When a tax inspection is legally suspended, the statute of limitations period is also suspended.

Topics of focus for tax authorities

Currently, the PTA has been exhibiting a more aggressive approach, especially with regards to the fight against tax fraud and evasion, mainly by aggravating taxation in fields where tax avoidance is significant and by introducing additional compliance and reporting obligations.

Increased focus has also been verified on transfer pricing matters, mainly on the transfer pricing policies in transactions with non-resident entities and especially in case of payments made to entities that are resident in black-listed jurisdictions. In this regard, cooperation on transfer pricing matters with other tax administrations has been strengthened.

Situations of recognition of PEs in Portugal, usually triggered by inspections to VAT registers, are recurrent.

Anti-avoidance

A general anti-avoidance provision is in force, pursuant to which contracts and other acts are ineffective whenever it is demonstrated that they were tax driven to reduce taxation that would be due under contracts bearing a similar economic effect, in which case taxation would be based on the latter.

The anti-avoidance procedure is initiated within the general term foreseen (statute of limitations) and is flexible in terms of proof by the PTA.

Anti-avoidance rules are not applicable in cases where a request for obtaining binding information is not answered by the PTA within 150 days.

Binding rulings

Binding rulings can be:

- Urgent: A decision should be taken in 75 days; these are subject to the payment of a fee ranging between EUR 2,550 and EUR 25,500, depending on the complexity of the matter; if no decision is taken within the deadline established, there is a tacit approval of the taxpayer's understanding of the tax matter.
- Non-urgent: A decision should be taken in 150 days; no fees are charged; a decision is required (no tacit approval, as in case of an urgent ruling).

Fight against tax fraud and evasion

It is mandatory that payments above EUR 1,000 are made by a means that allows the identification of the recipient of the income (e.g. bank transfer, nominative cheque, direct debit).

Council Directive 2011/16/EU, on the matter of administrative cooperation in the field of taxation, has been transposed to the Portuguese legislation, reviewing the exchange information mechanisms between tax authorities and aiming at a more effective action against tax evasion and fraud at an international level.

Other issues

Portuguese base erosion and profit shifting (BEPS) inspired measures

The Portuguese tax legislation includes the following provisions that are in line with BEPS:

- Anti-hybrid rules, very much in line with BEPS Action 2.
- CFC rules, very much in line with BEPS Action 3.
- Interest deduction limitation rules, very much in line with BEPS Action 4.

- Exchange of information, with the conclusion of agreements with black-listed jurisdictions, transposition of Council Directive 2011/16/EU, introduction of exchange of information clause in existing tax treaties and in the new tax treaties signed, amendment of patent box regime, very much in line with BEPS Action 5.
- Anti-treaty shopping and limitation on benefits clauses in tax treaties, very much in line with BEPS Action 6.
- Mandatory disclosure of aggressive tax planning schemes, very much in line with BEPS Action 12.
- Mandatory CbC reporting, in line with BEPS Action 13.

Portugal was one of the signatory countries of the Multilateral Instrument (MLI) in June 2017

Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS)

Since 2014, Portugal has embraced and implemented the FATCA and the global CRS for Automatic Exchange of Financial Account Information (the AEOI standard).

The implementation of the FATCA was made on an intergovernmental basis, through a Model 1 FATCA Intergovernmental Agreement. In 2014, the FATCA obligations were introduced in the Portuguese legal system, through the approval of the Financial Information Reporting Regime (FIRR). Two years later (2016), additional FATCA Complementary Regulations were approved, laying down rules on due diligence procedures and deadlines.

Also, Portugal is one of the CRS's early adopters. On 29 October 2014, it signed the Multilateral Competent Authority Agreement (MCAA) for the CRS, formally reaffirming its commitment to start exchanging financial information automatically under the AEOI standard from 2017.

In October 2016, Portugal introduced into its domestic legal system a mechanism for reciprocal automatic exchange of information, with respect to residents in other EU member states and any other CRS participating jurisdictions, through the enactment of the Decree-Law No.64/2016, of 11 October. This law also transposed the Council Directive 2014/107/EU, of 9 December 2014 (also known as DAC2), amending the Council Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation.

With the adoption and implementation of these mechanisms, Portugal became part of the first set of jurisdictions that are exchanging financial account information with other jurisdictions committed to the CRS, on an automatic basis and at a global and multilateral level.

Transfers to offshores

Under Law 14/2017, the Portuguese tax authorities are required to publish on their website, on an annual basis, all transfers, including respective amount and reason, made to offshores, as well as statistics about such transfers.

Significant developments

There have been no significant corporate tax developments in Puerto Rico during the past year.

Pending legislation

Please note that this summary is current as of 1 June 2018. Significant tax reform is expected after June 2018. Please visit the Worldwide Tax Summaries website at *www.pwc.com/taxsummaries* to see any significant corporate tax developments that occurred after 1 June 2018.

Taxes on corporate income

A domestic corporation is taxable in Puerto Rico on its worldwide income. A foreign corporation engaged in trade or business in Puerto Rico is taxed at the regular corporate tax rates on income from Puerto Rico sources that is effectively connected income and at a 29% withholding tax (WHT) rate on its Puerto Rico-source gross income not effectively connected with that business.

The current corporate income tax (CIT) rate is comprised of a 20% normal tax and a graduated surtax (computed on the 'surtax net income').

The 'surtax net income' is basically the net taxable income subject to regular tax less a surtax deduction in the amount of 25,000 United States dollars (USD). The graduated surtax rates are as follows:

- 5% for surtax net income up to USD 75,000.
- USD 3,750 plus 15% of surtax net income from USD 75,001 to USD 125,000.
- USD 11,250 plus 16% of surtax net income from USD 125,001 to USD 175,000.
- USD 19,250 plus 17% of surtax net income from USD 175,001 to USD 225,000.
- USD 27,750 plus 18% of surtax net income from USD 225,001 to USD 275,000.
- USD 36,750 plus 19% of surtax net income in excess of USD 275,000 for a maximum nominal tax rate of nearly 39%.

The determination of the applicable surtax rate is made on a consolidated basis for controlled groups and related companies, so the net taxable income of all the entities subject to tax in Puerto Rico within said groups has to be combined for the determination of the applicable surtax rate.

Alternative minimum tax (AMT)

The AMT includes various AMT adjustments in order to calculate the tentative minimum tax. Such minimum tax is subject to a 30% flat rate.

For AMT purposes, expenses paid or incurred for services performed by a related party outside Puerto Rico are considered a permanent adjustment in the determination of the alternative minimum net income (i.e. non-deductible for AMT purposes).

In determining the alternative minimum net income, the net operating loss (NOL) is limited to 70% of the alternative minimum net income. Also, the amount of the tax credit available with respect to the AMT paid in prior years that may be claimed against the current year regular tax is limited to 25% of the current net regular tax over the AMT for such taxable year. The AMT credit can be carried forward indefinitely.

Tax on deemed dividends

A 10% tax is imposed on certain corporation on the deemed dividend amount attributable to a foreign owner. A foreign owner is defined as any non-resident person (or entity not engaged in a trade or business in Puerto Rico) who directly owns 50% or more of the corporation’s stocks. The deemed dividend amount is computed using the lesser of the average value of the total foreign assets or the accumulated earnings and profits of the corporation.

Tax on improper accumulation of income

A surtax of 50% is imposed on corporations that improperly accumulate earnings to prevent the imposition of tax on shareholders or partners rather than paying the earnings out as dividends. The tax is not imposed on accumulated earnings and profits but is imposed on the net income for the year computed without taking capital loss carryover or NOL carryover deductions, and reduced by the following items: Puerto Rico income taxes paid or accrued, disallowed net capital losses, and charitable contributions in excess of the deductible amount. The net income does not include industrial income exempted from income taxes under Industrial Incentives Acts. However, an exempt business can be subject to the penalty tax on non-exempt income.

Corporate residence

A corporation organised or created under the laws of Puerto Rico is a domestic corporation. A domestic corporation is a resident corporation even if it does not conduct business operations in Puerto Rico. A corporation created elsewhere is considered a foreign corporation.

Permanent establishment (PE)

The Puerto Rico Tax Code does not provide specific guidance on PE. Facts and circumstances need to be analysed in order to determine if a corporation has created a PE in Puerto Rico or not. However, having an office or fixed place of business in Puerto Rico may deem the corporation to be engaged in a trade or business in Puerto Rico (i.e. having a PE).

Sourcing rules pursuant to Act No. 154

Act No. 154’s source rules are segregated into two parts. The first part treats a non-Puerto Rico resident manufacturing entity as having an office or fixed place of business in Puerto Rico merely as a result of engaging in transactions above a certain threshold with a related Puerto Rico entity. The second part treats a portion of the income earned by a non-Puerto Rico resident entity as Puerto Rico-source income.

Act No. 154's source rule applies where a non-Puerto Rico resident purchases goods and services from a related company that manufactures personal property or performs services in Puerto Rico that account for 10% or more of the total gross receipts of the seller from sales of such property or services in Puerto Rico, or at least 10% of the purchase cost of personal property and services acquired by the purchaser, for the taxable year or any of the three prior taxable years.

Where Act No. 154's source rule applies, a portion of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as Puerto Rico-source income that is effectively connected with the conduct of a Puerto Rico trade or business. The portion of the non-Puerto Rico resident's income that is treated as Puerto Rico source is determined under an equally weighted, four-factor (i.e. purchases, sales, property, and payroll) formulary apportionment method. Where the purchaser fails to provide adequate documentation regarding the formulary apportionment factors, 50% of the income of the non-Puerto Rico resident purchaser from the sale outside of Puerto Rico of personal property manufactured or produced in whole or part in Puerto Rico by the related Puerto Rico seller will be treated as sourced where the property is manufactured or produced (i.e. Puerto Rico). The source rule also will apply to agency and commissionaire arrangements, in addition to buy-sell transactions involving related parties. In addition, the source rule contains an anti-abuse provision that disregards a transaction, for purposes of the source rule, where one of the principal purposes of the transaction is avoidance of the source rule.

Other taxes

Sales and use tax (SUT)

As a general rule, the SUT shall be applied, collected, and paid on all transactions of taxable items in Puerto Rico. Taxable items consist of tangible personal property, taxable services, admissions, and what is known as bundled transactions. Excluded from this definition are professional associations and certain membership fees; stamps issued by professional associations, the Commonwealth of Puerto Rico, or the federal government; human blood, tissue, and organs; maintenance fees paid to resident associations; air and maritime tickets; real property; and bingos, raffles, and lottery. Other transactions that are exempt from SUT include export transactions; duty-free stores located at airport or maritime ports; prescription medicines; insulin; taxable items acquired for certain manufacturing operations (e.g. raw materials); and food and ingredients for food (except for prepared food, diet supplements, sweets, and carbonated beverages).

The SUT rate is imposed at 10.5% at the state level and an additional 1% at the municipal level, for an aggregate 11.5%. Designated professional services and business-to-business (B2B) services are taxed at a 4% SUT rate.

Taxable services that are excluded from SUT include, among others, the following:

- Services rendered by merchants with annual volume of business of less than USD 50,000.

- Services rendered by a non-resident to a related party that is engaged in a Puerto Rico trade or business and holds a tax grant pursuant to Act No. 73-2008, Act No. 83-2010, Act No. 20-2012, or any similar act.
- Intangible rights.
- Advertising and promotion services.
- Construction subcontracted services and subcontracted telecommunication services.
- Toll manufacturing services or contract manufacturing services.
- Repair, maintenance, and conditioning of aircraft provided by a merchant that holds a tax grant pursuant to Act No. 73-2008 or any other similar act.

SUT should be remitted to the Puerto Rico government as 10.5% or 4% to the Puerto Rico Treasury Department (PRTD) and the remaining 1% to the corresponding municipality.

Tangible personal property introduced into Puerto Rico is subject to use tax upon importation, holding the release on the ports until the use tax is satisfied, unless the taxpayer is a bonded merchant or an eligible reseller. The use tax paid upon importation of the merchandise can be claimed as a credit on the SUT return.

Every natural or juridical person who does or wishes to do business of any kind in Puerto Rico shall request registration in the Merchant's Registry of the PRTD at least 30 days before starting operations. Once the registration application is filled out and approved, the Secretary of the Treasury will grant a Merchant's Registration Certificate. This certificate constitutes the merchant's authorisation to do business in Puerto Rico and confirms the merchant's obligation as a withholding agent. The Merchant's Registration Certificate shall be displayed, at all times, in a visible place for the general public in the commercial establishment for which it was issued. Please note that if a merchant is doing business in one or more of the 78 municipalities in Puerto Rico, the merchant only needs to register with the PRTD.

Unless specifically exempted, all persons selling taxable items are required to file a monthly SUT return. This return shall be filed electronically with the PRTD no later than the 20th day of the calendar month following the month during which the sales occurred. Also, all persons that import tangible property to Puerto Rico must file a use tax on imports return no later than the tenth day of the calendar month following the import.

There is a credit for purchases of products manufactured in Puerto Rico for purposes of SUT. In general, the credit will be 10% of the excess of the purchases of eligible products over the average of the purchases of eligible products for three out of ten prior taxable years. This credit can be carried forward until exhausted. It is important to note that the credit used will be considered taxable income for income tax purposes of the year the credit is taken.

Customs duties and import tariffs

Puerto Rico does not have customs duty and import tariff provisions. Since Puerto Rico is a Commonwealth of the United States, it follows the United States' customs duties and import tariffs.

Excise taxes

There are certain articles subject to a special excise tax, such as cigarettes, fuels, crude oils, vehicles, alcoholic beverages, cement, sugar, and plastic products, among others.

Act No. 154's excise tax

Companies with manufacturing operations in Puerto Rico may be subject to an excise tax on goods or services provided to offshore-related entities under Act No. 154 of 2010, as amended. This Act created an excise tax that works in tandem with Act No. 154's source rules. Where the excise tax applies, it is in lieu of the tax that otherwise would arise from the application of Act No. 154's source rules. Under this excise tax rule, offshore purchasers that acquire goods from Puerto Rico sellers with gross receipts in excess of USD 75 million for any of the three preceding taxable years and that otherwise meet the source-of-income rule thresholds (set forth above) are subject to this excise tax equal to the 'applicable percentage of the value' of such personal property or services, which is essentially a scaled-back percentage. The excise tax rate phases out as follows:

- 3.75% between 1 January 2012 and 31 December 2012.
- 4.00% between 1 January 2013 and 31 December 2027.

Various tax credits are provided to offset the excise tax mentioned above.

The excise tax is collected by the Puerto Rico seller on receipts from the sale of personal property or services rendered to a related offshore purchaser. The tax has to be deposited with the Secretary of the Treasury on or before the 13th day of the month following the sale. Each person required to collect the excise tax must file a quarterly excise tax return on 30 April, 31 July, 31 October, and 1 January and pay any remaining tax liability not deposited on a monthly basis, as outlined above.

Act No. 154 sets forth the process for which a credit may be claimed for (i) taxes paid to any of the states of the United States on the acquisition of personal property and services and (ii) taxes paid to Puerto Rico by another member of the taxpayer's controlled group on a series of purchases.

Personal property taxes

Every corporation engaged in a trade or business in Puerto Rico that on 1 January of each year owns personal property used in its trade or business within Puerto Rico, whether it is leased to another entity or not, is subject to tax on such property. The tax is self-assessed by the corporation, and it is paid together with the filing of an annual return. The tax ranges between 5.80% and 9.83%, depending on the municipality.

The tax return must be filed electronically through the Municipal Revenue Collection Center (MRCC) website (*www.crimpr.net*). In order to file the return, every taxpayer with over USD 3 million in volume of business and specialist who had prepared more than five returns for the prior taxable year need to register using this website. The signature and certification of the return will be satisfied by virtue of the electronic filing. Also, all returns filed electronically should be accompanied by the corresponding payment due on or before 15 May.

Every corporation must substantially satisfy its personal property tax liability, if any, through estimated tax payments. The amount of estimated taxes should be paid in equal instalments on the 15th day of August, November, February, and May of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual personal property tax for the year or 100% of the personal property tax as reflected in the personal property tax return for the preceding taxable year, whichever is less. Any tax not covered by the estimated tax payments should be paid along with the personal property tax return. Failure to pay the tax by the due dates indicated above may result in a penalty of 5% of the instalment due.

A 5% statutory discount is available if 100% of the personal property tax, as reflected in the personal property tax return for the preceding taxable year, is made by the first instalment date (15 August).

In general, all personal property not specifically exempted, including cash, finished goods inventory, supplies, and depreciable property, is subject to the tax. The personal property tax is generally based on the book value of the asset as of 1 January. Finished goods inventory, however, is assessed on the average of the monthly balances for the 12-month period preceding 1 January of each year.

The valuation of the personal property subject to tax is determined by multiplying the book value of such property by the applicable tax rate determined by the municipality in which the property is located. If the book value of depreciable property is below its estimated residual value, the property should be assessed at its estimated residual value.

Real property taxes

The property tax system is administered by the MRCC. The tax on real property is directly assessed by the MRCC and may be paid in two instalments. The tax, (which varies from a minimum of 8.03% to a maximum of 11.83%, depending on the municipality) is applied to an amount based on the hypothetical fair market value (FMV) of the relevant property in the year 1957. In general terms, this hypothetical FMV normally ranges between 40% and 50% of the cost of the property.

Transfer taxes

Puerto Rico does not have transfer tax provisions.

Stamp taxes

Puerto Rico does not have stamp tax provisions. However, recordation fees are imposed at the time of officially recording a real estate transaction with the Puerto Rico Property Registry.

Withholding taxes on salaries and wages

All employers are required to withhold Puerto Rico income tax from all wages paid to its employees.

Federal Social Security and Medicare (FICA)

The Federal Social Security and Medicare Law applies in full in Puerto Rico. The tax rate is imposed on both the employer and the employee. For 2018, the tax rate is 7.65%, which consists of 6.2% of Social Security and 1.45% of Medicare Tax. The Social Security Tax is calculated on the first USD 128,400 (year 2017) of wages received, and the Medicare Tax is calculated on the total wages, without ceiling.

In addition, an employer must withhold a 0.9% Additional Medicare Tax from wages paid to an employee in excess of USD 200,000 (for a single taxpayer; married filing jointly is USD 250,000 and married filing separately is USD 125,000) in a calendar year. The employer is required to begin withholding Additional Medicare Tax in the pay period in which wages are paid in excess of USD 200,000 to an employee and continue to withhold it each pay period until the end of the calendar year. Additional Medicare

Tax is only imposed on the employee. There is no employer share of Additional Medicare Tax. All wages that are subject to Medicare tax are subject to Additional Medicare Tax withholding if paid in excess of the USD 200,000 withholding threshold.

State (PR) Unemployment Tax (SUTA)

The unemployment tax is paid only by the employer and is paid on the first USD 7,000 of total wages paid to each employee during the calendar year, based on an experience rating system. In addition, the employer must also pay a special tax equal to 1% of the wages subject to unemployment tax. However, the special tax together with the experience-based tax cannot exceed 5.4%.

Federal Unemployment Tax (FUTA)

Similar to the FICA, FUTA also applies in Puerto Rico. All persons who employ at least one individual during any 20-week period or pay USD 1,500 or more in salaries during any trimester of the calendar year are subject to the FUTA tax.

The employer is solely responsible for payment of the tax. The rate is 6.0% on the first USD 7,000 of total wages paid during the calendar year to each employee. However, a credit of 5.4% is granted for the PR unemployment tax paid. Therefore, the effective tax rate is 0.6% (6.0% less 5.4%).

Disability insurance

The Puerto Rico Department of Labor and Human Resources Bureau of Employment Security also administers the disability insurance program. This program is funded principally through the imposition of a tax, in equal amounts, on the employer and employee.

A contributory tax of 0.6% is imposed on the first USD 9,000 of the total wages paid in the year. From the total tax, half (0.3%) is paid by the employer and the other half by the employee.

Employers may establish private insurance plans if approved by the Puerto Rico Department of Labor and Human Resources.

Workmen's Accident Compensation Insurance

The Workmen's Accident Compensation Insurance Act (WACA) establishes a compulsory insurance program that covers employees who suffer injury, become disabled, or lose their lives due to a job related accident. The insurance premium is based on total wages paid during the government's fiscal year, which runs from 1 July to 30 June. The actual rates vary among industry types. The employer is solely responsible for payment of the assessed premium.

Chauffeurs' Social Security

Every employer having one or more drivers is subject to Chauffeurs' Social Security tax. It also applies to an employer whose employees are usually or regularly required or allowed to operate a motor vehicle as an inherent part of their work.

The tax is imposed on both the employer and the employee as follows:

- Every employer must pay USD 0.30 per week or fraction thereof for each covered employee.
- Every employee must pay USD 0.50 per week or fraction thereof.

Municipal license tax

Every corporation is required to file an annual volume-of-business declaration with each of the municipalities in which it establishes or conducts business operations during the year. The declaration must indicate the actual volume of business (i.e. net sales, gross income from any service rendered, and other gross receipts) attributable to each municipality. When a business operates in more than one municipality but does not receive income in all of them, the license tax shall be computed based on a distribution of sales apportioned to each municipality by square feet of the building used in each municipality.

For a non-financial business, the license tax payment varies from a minimum of 0.20% to a maximum of 0.50%, depending on each municipality. The payment must be made in two equal instalments on or before 15 July and 15 January on the basis of the volume of business generated by the entity during its accounting year ended within the immediately preceding calendar year before the due date of the declaration. A 5% discount is available when the tax is fully paid on the declaration due date (on or before five working days after 15 April of each year).

For the first six months after a new business is established, the new company is generally exempt from the municipal license tax, provided that the business informs the municipality that it has established a new business in the municipality within the first 30 days of operations and requests the provisional license tax as established in each municipality. A copy of the municipal licence is generally requested as a perquisite for obtaining other licences and permits in Puerto Rico.

Branch income

Corporations operating in Puerto Rico as a branch may be subject to a 10% tax on the dividend equivalent amount (commonly known as the branch profit tax or BPT). The BPT should be determined and paid along with the CIT return. There will not be an income tax withholding at source at the time cash transfers are made by the Puerto Rico branch to its home office outside of Puerto Rico.

Income determination

The gross income of a corporation generally includes business income, profits from the sale of property, interest, dividends, and income derived from any source, unless specifically exempted by law.

A corporation's net income is generally calculated in accordance with the method used for financial statement purposes, except for various items of income and expenses, which are treated differently. For example, the cash method of accounting may not be used by a corporation with inventory or with an average annual gross income in excess of USD 1 million. Long-term contract methods and the instalment method can be used for regular tax calculations.

Inventory valuation

In general, inventory is valued at the lower of cost or market. Retail merchants can use the retail method of accounting.

Capital gains

Tax-advantaged treatment is provided for net long-term gains (holding period of more than one year) from the sale of capital assets. For corporations, net long-term capital gains, reduced by any short-term capital losses, are subject to an alternative (preferential) tax of 20% in lieu of the regular CIT rates.

Dividend income

Dividends from a corporation that derives 20% or more of its profits from sources within Puerto Rico are taxable in Puerto Rico. However, a dividends-received deduction may apply.

Dividends-received deduction

All corporations engaged in trade or business in Puerto Rico are entitled to an 85% deduction on dividends received from a domestic corporation but not in excess of 85% of the net income of the corporation. A 100% dividends-received deduction applies for dividends received from taxable controlled domestic corporations (if ownership in a corporation is 80% or more).

Interest income

Interest income is generally taxable, except interest from obligations of the federal government or any state, or territory, or political subdivisions; the District of Columbia; and the Commonwealth of Puerto Rico or any of its instrumentalities or political subdivisions.

Royalty income

Royalties from property located in Puerto Rico or from any interest in such property are included in gross income.

Partnership income

The income (loss) of a partnership passes through to its partners so that the partnership itself is not subject to tax. Thus, each partner generally accounts for their distributive share of the partnership's taxable income (loss).

Other income

Service fees are generally taxable as ordinary income.

Foreign income

Generally, a Puerto Rico domestic corporation is taxed on its worldwide income, including foreign income earned and foreign dividends when received. Double taxation is avoided by means of foreign tax credit or deduction. In the case of resident foreign corporations, these are only taxed on their Puerto Rico-source income and on their effectively connected Puerto Rico income (i.e. foreign income won't be taxable for Puerto Rico purposes).

Deductions

All ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business are deductible by corporations operating in Puerto Rico.

Depreciation

A reasonable depreciation allowance is deductible for the exhaustion, wear and tear, and obsolescence of property used in business. The most common depreciation method used by corporations is the straight-line method. Nevertheless, any other consistent method may be used in lieu of the straight-line method as long as it is in accordance with the recognised trade practice. In addition, a corporation (other than one that is exempt under an Industrial Incentives Act) can elect an accelerated depreciation method for new or used tangible property acquired by purchase in taxable years commencing after 30 June 1995.

For property acquired after 31 December 2009, when using the straight-line depreciation method, the useful life has to be determined based on the same rules of accelerated depreciation.

Assets	Useful life (years)
3 year property (e.g. computers, electronic equipment)	3
5 year property (e.g. automobiles, transportation equipment)	5
7 year property (e.g. certain furniture and fixtures, air transportation equipment)	7
10 year property (e.g. furniture and fixtures, printing equipment, other machinery and equipment)	10
15 year property (e.g. certain air transportation equipment, natural gas plants)	15
20 year property (e.g. vessels, land improvements)	20
Real property leased for residential purposes	30
Other real property	35

For intangibles (other than goodwill) acquired or created after 1 September 2010, the deduction is calculated using the straight-line method over the lower of a useful life of 15 years or the intangible's useful life.

Goodwill

The cost of goodwill is generally capitalised and amortised ratably over 15 years.

Start-up expenses

Generally, start-up expenditures may be deducted in the tax year in which the trade or business begins or they may be ratably amortised over five years.

Interest expenses

In general, interest expense is deductible without limitation. However, interest expenses related to exempt income are not deductible. If interest is paid to a non-Puerto Rico resident related party, a 29% withholding at source applies. If the 29% withholding is not withheld, no deduction is available.

Bad debt

Bad debt resulting from a trade or business may be deducted in the year the debt becomes worthless (i.e. uncollectible). The reserve method is not admissible for Puerto Rico purposes.

Charitable contributions

Deductions for allowed charitable contributions are limited to 10% of net income, computed regardless of the contributions.

Rent expense

Corporations are entitled to a rent expense deduction if the rented property is used in the business.

Employee remuneration

Corporations may deduct payments of reasonable salaries or other compensation for services actually rendered.

Insurance premiums

Insurance premiums paid or accrued on risks related to a trade or business are deductible, as well as premiums on group life policies covering employees where the beneficiary is not the corporation. No deduction is allowed for premiums paid to an insurance company not authorised to provide insurance in Puerto Rico or through an agent or broker not authorised to operate in Puerto Rico.

Meals and entertainment

Meals and entertainment expenses are deductible, subject to a 50% limitation. Travelling expenses are fully deductible if the trip is for business purposes.

Automobiles expenses

A corporation is allowed to depreciate non-cargo automobiles used in a trade or business over a five year useful life (three years in the case of sales persons) up to a maximum base of USD 30,000 for a maximum annual depreciation of USD 6,000.

On the other hand, for non-cargo automobile maintenance expenses (e.g. gas, repairs, insurance), a deduction based on USD 0.60 per mile is allowed.

Fines and penalties

Penalty payments, such as with respect to Commonwealth taxes, whether on account of negligence, delinquency, or fraud, are not deductible from gross income.

Taxes

A corporation is allowed a deduction for taxes paid (except for Puerto Rico CIT), including income tax paid to the United States, its other possessions, and any foreign country. The deduction is in lieu of claiming a foreign tax credit.

Other significant items

The cost of incidental repairs (not adding value to the property) is deductible as a business expense.

Subject to certain limitations, savings and retirement plans for the benefit of employees are deductible if qualified by the Secretary of the Treasury.

Net operating losses (NOLs)

All corporations are generally entitled to the NOL deduction in computing their tax. NOLs created from taxable years beginning prior to 31 December 2012 (and after 31 December 2004) may be carried forward for 12 taxable years (there are no carryback provisions). For taxable years beginning after 31 December 2012, the NOL carryforward period is ten years. The use of the NOL deduction is limited to 80% of the taxable income for the year. The NOL to be carried forward should exclude the deductible portion of the expenses or payments to foreign affiliates.

Also, losses from sales or exchanges of capital assets are allowed only to the extent of gains from such sales or exchanges. The carryforward period in this instance, however, is seven years. The use of capital losses is limited to 80% of the capital gains for the taxable year.

Payments to foreign affiliates

51% of expenses attributable to payments made to a related party that is not engaged in a trade or business in Puerto Rico or to the home office located outside of Puerto Rico (i.e. foreign affiliate) will not be deductible for purposes of computing the net taxable income, as long as these payments are not subject to income taxes in Puerto Rico.

The Secretary of the Treasury has the authority to grant a 100% deduction for the expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico via the waiver mechanism. However, the deduction is limited to 60% of the expenses that qualify for the waiver.

Expenses paid or incurred with related parties not engaged in a trade or business in Puerto Rico for which a waiver from the Secretary of the Treasury is not obtained do not generate NOL carryforward (i.e. the expenses are added back to the NOL). In other words, the non-disallowed portion of the payments to foreign affiliates/branches will not be allowed if this particular portion causes a NOL.

Group taxation

Puerto Rico does not have group taxation rules. In other words, corporations cannot file a consolidated return for Puerto Rico CIT purposes.

Transfer pricing

There are no specific transfer pricing rules in Puerto Rico.

Thin capitalisation

There are no specific thin capitalisation rules in Puerto Rico.

Controlled foreign companies (CFCs)

There are no specific CFC rules in Puerto Rico.

Tax credits and incentives

A corporation engaged in specific eligible activities may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to the Puerto Rico Office of Industrial Tax Exemption (OITE) under Act No. 73 of 28 May 2008 (Act No. 73).

A corporation engaged in eligible activities related to the exportation of services may apply for a reduced CIT rate, among other incentives, through the request of a Tax Exemption Grant to OITE under Act No. 20 of 17 January 2012 (Act No. 20), instead of through Act No. 73.

The Governor of Puerto Rico issued various administrative orders during taxable years 2017 and 2018 imposing limitations with respect to the utilisation of credits.

Tax rate incentives

Under Act No. 73

Exempt entities may elect one of the following two scenarios:

- General scenario: 4% CIT rate with a WHT rate on royalty payments of 12%. Under this scenario, the amount of WHT on the royalty payments is creditable against the 4% CIT.
- Alternate scenario: 8% CIT rate with a WHT rate on royalty payments of 2%. Under this scenario, the WHT on royalty payments is creditable against the 8% CIT.

Companies may elect one of these scenarios at the time of applying for the benefits under the Act. However, there are other possibilities:

- 4% fixed income tax rate on Incentive Development Income (IDI), excluding income from certain investments provided by Section 2(j).
- Pioneer industries are eligible for a 1% CIT rate.
- Activities for the development in Puerto Rico of intangible property are eligible for a 0% CIT rate.
- Any exempt business having operations at a municipality located in a 'low or intermediate development zone' may reduce its CIT rate by an additional 5%.
- Any exempt business having operations in Vieques and Culebra may be totally exempt from income taxes during the first ten years of operations as established in the Act. The remaining years covered by its tax decree may qualify for a 2% CIT rate.

Under Act No. 20

- 4% CIT on export services income or
- 3% CIT when more than 90% of the eligible business's gross income is derived from export services and such services are considered strategic services, according to the criteria established in Act No. 20.

Special deductions

Special deductions under Act No. 73 are available for capital investment in buildings, structure, machinery and equipment, and the NOL carryforwards.

There are no special deductions allowed under Act No. 20.

Credits

The following credits are only available under Act No. 73. Please note that no credits are allowed under Act No. 20.

Credit for purchases of Puerto Rico manufactured product

Subject to certain limitations, the credit for purchases of products manufactured in Puerto Rico is 25% (35% in the case of recycled products).

Job creation credit

There is a credit for every incremental job applicable to exempt business starting operations after 1 July 2008. The amount of the credit (maximum of USD 5,000 per each employment) depends upon the location of the industrial development zone.

Research and development (R&D) investment credit

A 50% credit is granted for the eligible investment in R&D activities, including operational expenditures, clinical trials, infrastructure, renewable energy, or intellectual property (IP).

The 'Electricity, Water and Sewer Services Subsidies and Overdue Payments Reform Act' (Act No. 22) amends the 'Economic Incentives Act for the Development of Puerto Rico' (Act No. 73) in order to provide that existing businesses that hold a tax grant under Act No. 73 will not be allowed to claim R&D credits against an electric energy, water, and/or sewer services bill unless the PRTD certifies the availability of the credit.

Energy investment credit

A 50% credit is granted for the eligible investment in the acquisition of machinery and equipment for the creation of energy.

Energy cost credit

There is also a 3% credit (which could be increased up to 10% if certain employment requirements are met) for payments made to the Puerto Rico Power Authority during the corresponding taxable year. This credit is available for a ten-year period starting as of 1 July 2008. Additional credits (for the purpose of reducing the cost of energy) may be available to industrial units, subject to certain limitations. Act No. 22 of 2016 eliminates the energy credits to new applicants for tax grants under Act No. 73.

Technology transfer credit

A 12% credit (2% in the case of exempt businesses that opted for the alternate tax) is available for payments made to resident entities for the use or privilege of using intangible property in Puerto Rico.

Strategic projects investment credit

There is a 50% credit for eligible investment in strategic projects, including activities for the design, development, and construction of dams.

Industrial investment credit

There is a 50% credit, up to a maximum of USD 8 million, for cash invested in the purchase of 50% or more of the stock or operating assets of an exempt business that is in the process of shutting down operations, amounts used to start-up a small or medium-exempt business, or amounts used for a substantial expansion of an exempt business.

Property tax incentives

Similar to the previous incentives laws, Act No. 73 allows for a 90% property tax exemption on personal and real property. However, Act No. 73 introduced a methodology for the classification and assessment of real property owned by the exempt businesses. Under the provisions of Act No. 73, a taxpayer can self-assess one's real property tax responsibility (similar to the current personal property tax system) and remit the related tax liability due along with a real property tax return (to be issued by the MRCC) by 15 May of each year. The self-appraisal method is only applicable to real property that has not been appraised by the MRCC and is mainly limited to machinery and equipment classified as real property. Note that this method is not available for assets such as land, buildings, and building equipment.

For purposes of Act No. 20, there is a 100% exemption from property taxes during the first five years of operations in the case of eligible services as call centres, management services, and shared services. After said five-year period, a 90% exemption will apply during the term remaining under the Tax Exemption Grant.

Municipal license tax and other municipal tax incentives

Under Act No. 73, the municipal license tax exemption continues at 60% for exempted businesses. Exempt businesses operating in Vieques or Culebra are 90% exempt; small or medium-exempt businesses are 75% exempt; and central or regional corporate headquarters providing managerial services to affiliated companies are 100% exempt during the first five years after becoming eligible for the exemption.

There are no municipal tax exemptions under Act No. 20.

Foreign tax credit

Generally, in any year, a taxpayer can choose whether to take as a credit (subject to limitation) or as a deduction the foreign income and excess profit taxes paid or accrued during the taxable year to any foreign country. A foreign tax credit reduces the Puerto Rico income tax liability dollar for dollar, while a deduction reduces the Puerto Rico income tax liability at the marginal rate of the taxpayer. There are no carryforward provisions for foreign tax credit purposes.

Withholding taxes

Corporations not engaged in a trade or business in Puerto Rico are subject to a 29% WHT at source on certain gross income items (considered fixed or determinable, annual or periodical [FDAP]) from Puerto Rico sources.

FDAP income may include interest received from a related person, rents, royalties, salaries, annuities, compensation, remuneration, and net capital gains. However, if the payment received is from dividends, a 10% WHT should apply.

The payer, as a withholding agent, is responsible for the withholding and remittance of the 29% (10% in the case of dividends) to the PRTD. Such tax is due on or before the 15th day of the month following the receipt of the income by the non-resident corporation. An annual informative return is also required to be filed no later than 15 April of the following year.

Tax treaties

There are no tax treaties between foreign countries and Puerto Rico.

Tax administration

Taxable period

The annual accounting period may be on the basis of the calendar year, a fiscal year ending on the last day of a month, or a 52/53 week year.

Tax returns

The Puerto Rico tax system is based on the principle of self-assessment. A corporate taxpayer is required to file an annual income tax return by the 15th day of the fourth month following the close of its tax year. In general terms, a taxpayer can obtain an automatic extension of three months to file its income tax return. Failure to timely file can result in penalties.

A corporate taxpayer may also be subject to file a personal property tax return by 15 May and/or a volume of business declaration by the fifth business day after 15 April.

Payment of tax

A corporation must substantially satisfy its annual income tax liability, if any, through estimated income tax payments. The amount of estimated income taxes should be paid on equal instalments on the 15th day of the fourth, sixth, ninth, and 12th month of the taxable year of the corporation. The estimated payments should equal or exceed 90% of the actual tax for the year (including AMT) or, in cases where a CIT return was filed by the corporation in the preceding year, 100% of such tax liability. Any tax not covered by the estimated tax payments should be paid along with the CIT return. Failure to pay the tax by the due dates indicated above may result in a penalty of 10% of the instalment due.

Annual report

Every corporation is required to file an annual corporation report with the Puerto Rico Department of State. This annual report must be filed by the 15th day of April along with a USD 150 annual fee and a balance sheet as of the close of operations of the prior year. The report should be filed through the Puerto Rico Department of State's website. In the case of for-profit corporations, if the volume of business exceeds USD 3 million, the annual report must be accompanied by a balance sheet certified by a certified public accountant (CPA) licensed in Puerto Rico. In the event that the volume of business does not exceed USD 3 million, a balance sheet prepared under Generally Accepted Accounting Principles (GAAP) by a person with a general knowledge in accounting has to be submitted along with the corporate annual report. An extension of 60 days (an additional 30-day period may be requested) for filing the annual report can be obtained if timely requested. The Secretary of State is authorised to impose a penalty for failure to timely or accurately file the annual corporate report that would be between USD 75 and USD 2,000 if a non-profit corporation, and between USD 750 and USD 2,000 if a for-profit corporation.

Audited financial statements

Accounting records must be prepared in accordance with the GAAP followed in the United States. Domestic (i.e. incorporated in Puerto Rico) or foreign corporations with volume of business of more than USD 3 million must include, with their CIT return, audited financial statements of the Puerto Rico operations for the accounting year ended on or before the preceding 31 December. The financial statements should be submitted with an audit report issued by a CPA licensed in Puerto Rico.

Also, qualified and disclaimer opinions are now allowed to the extent that the qualification or disclaimer does not result from a restriction in scope. However, no adverse opinions are allowed. All groups of related entities engaged in a trade or business in Puerto Rico are required to file consolidated or combined financial statements (CFS), which should contain a consolidating schedule and general information of the related parties. The determination of the gross income threshold for purposes of the audited financial statement requirement should be made taking into consideration the volume of business of all the entities within a controlled group. In the case of foreign entities, these will be able to submit audited financial statements with their Puerto Rico operations on a stand-alone basis; in other words, the CFS will not be required. The requirement for audited financial statements will not apply to non-profit organisations.

With respect to the municipal license and personal property tax filings, the threshold amount for the audited financial statements requirement is gross revenues of more than USD 3 million, regardless of the corporate residency (i.e. foreign or domestic).

Supplemental information is also required to be included as part of the audited financial statements to be filed with the income tax return, volume of business declaration, and personal property tax return. The due date for the supplemental information is the last day of the month following the CIT due date, including extensions (i.e. 31 August 2018). The supplemental information must be submitted electronically and separately from the audited financial statements.

Tax audit process

Many taxpayers are under audit by the PRTD. The audits may include income, payroll, withholding, and sales and use taxes.

Statute of limitations

The PRTD generally has four years after an original return is filed to assess income, payroll, and sales and use taxes. A return will be deemed to have been filed on the later of (i) its due date or (ii) the date the return was actually filed.

Topics of focus for tax authorities

Currently, the PRTD is focused on SUT, intercompany loans, withholding at source, and payments to foreign affiliates, among others.

Significant developments

Implementation of a value-added tax (VAT) in 2018/19

The Gulf Cooperation Council (GCC) countries have signed a VAT common framework, which forms the legal basis for the introduction of a VAT system in each of the GCC member states (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates [UAE]). Saudi Arabia and the United Arab Emirates have implemented VAT as of January 2018. The other GCC member states are expected to issue their own VAT legislation shortly. The Cabinet of Qatar has approved a draft law on VAT and its Executive Regulations as put forth by the Qatar Ministry of Finance. The laws and respective executive regulations have not been published yet. It is expected that VAT at the rate of 5% will be implemented in 2018/19.

Inclusive Framework on Base Erosion and Profit Shifting (BEPS)

On 14 November 2017, Qatar joined the 'Inclusive Framework on BEPS' and pledged to implement the new international BEPS minimum standards.

Country-by-Country Reporting (CbCR) Multilateral Competent Authority Agreement (MCAA)

Qatar became a signatory of the Multilateral Convention on Mutual Administrative Assistance in Tax Matters on 10 November 2017 and the CbCR MCAA on 20 December 2017. The regulations pertaining to CbCR filing in Qatar had not been published by the date of this review. It is expected that further transfer pricing regulations, including Master File and Local File, may also be introduced shortly.

Common Reporting Standard (CRS)

On 10 November 2017, Qatar signed the CRS Multilateral Competent Authority Agreement (CRS MCAA).

Qatar Financial Centre (QFC): New 'local source' income definition

Recently amended QFC Tax Rules and Regulations modify the definition of 'local source' income. According to the new provisions, if certain conditions are met, profits arising in or derived from Qatar by a QFC non-regulated entity from the provision of services for use outside Qatar would not form a part of local source taxable profits and would not be subject to tax.

Qatar

Taxes on corporate income

An entity that is wholly or partially foreign owned and that derives income from sources in Qatar is taxable in Qatar. In the case of a joint venture, the tax liability of the joint venture is dependent upon the foreign partners' share of the joint venture's profit. Currently, no corporate income tax (CIT) is levied on a corporate entity that is wholly owned by Qatari nationals and GCC nationals.

Unless specifically exempt from tax, an entity will be taxable in Qatar if it has generated Qatar-source income, regardless of the place of its incorporation.

Taxable income generally is subject to a flat (CIT) rate of 10%, with certain exceptions available.

The following tax rates apply in the specific circumstances noted:

- If a special agreement was reached with the government of Qatar prior to 1 January 2010, the rate specified in the agreement continues to apply. If no rate is specified in the agreement, a rate of 35% will be used.
- The rate applied with respect to oil operations, as defined in Law No. 3 of 2007, may not be less than 35%.
- Payments made to non-residents with respect to certain service activities not connected with a permanent establishment (PE) in Qatar are subject to WHTs (*see the Withholding taxes section*).

The amount of tax payable is reduced for companies that are partly foreign owned, depending on the extent of local ownership.

Local income taxes

There are no local, state, or provincial government taxes on income in Qatar.

Corporate residence

It is important to recognise that residence is not the basis used to determine whether an entity is taxable for CIT purposes in Qatar. Accordingly, a CIT exposure in Qatar may arise even if a company is not resident in Qatar. However, residence is relevant when considering whether withholding tax (WHT) will apply on payments received rather than CIT.

A company is resident in Qatar if it is incorporated in accordance with Qatari laws, its head office is situated in Qatar, or its place of effective management and control is in Qatar.

Permanent establishment (PE)

A PE is defined as a fixed place of business through which the business of a taxpayer is wholly or partly carried on. A PE is deemed to include a branch, office, factory, workshop, mine, oil or gas well, quarry, a building site, an assembly project, or a place of exploration, extraction, or exploitation of natural resources. A PE also includes activity carried on by the taxpayer through a person acting on behalf of the taxpayer or in the taxpayer's interest, other than an agent of an independent status.

To date, the Qatar tax department has permitted a PE to register for tax purposes and file an annual tax return. However, if a PE is not registered in the commercial register, it is in contravention of the Foreign Investment Law. Following introduction of the tax administration system (TAS), the risk may increase of the Qatar tax department querying why the PE has not registered in the commercial register as the commercial registration number is ordinarily required as part of the online filing process.

Other taxes

Value-added tax (VAT)

Currently, Qatar imposes no VAT or sales tax on operations in Qatar. However, the introduction of VAT in Qatar under a common GCC framework is expected in 2018/19. The anticipated tax rate is 5%.

Customs duties

Customs duties are applied to goods with an origin outside the GCC countries, normally at a rate of 5%. Higher rates sometimes apply for specific types of goods, such as tobacco products. Temporary import exemptions are sometimes available.

Excise taxes

Implementation of a selective excise tax is expected in 2018/19. Tobacco, certain luxury products, and sugar-sweetened beverages are to be taxed upon importation or production in Qatar.

Property taxes

There are no property taxes in Qatar. However, fees may be payable to the government by the owner on the registration of property and by the landlord on the registration of leases.

Transfer taxes

There are no transfer taxes in Qatar; however, share transfers of state entities require formal confirmation of 'No Objection' from the tax authorities prior to the transfer being updated in the commercial register.

Stamp taxes

There are no stamp taxes in Qatar.

Payroll taxes

Employed individuals' salaries, wages, and allowances are not subject to income tax.

Social security contributions

Employers have to pay social insurance in respect of Qatari employees but have no obligations for employees of other nationalities.

Branch income

The profits of a branch owned by a foreign parent entity are subject to the same tax rules as apply to other forms of taxable entities.

Income determination

CIT is levied on a company's Qatar-source income. Some examples of Qatar-source income include:

- Income derived from an activity carried on in Qatar.
- Income derived from contracts wholly or partially performed in Qatar.
- Income from real estate situated in Qatar, including income from the sale of shares of companies with assets consisting of mainly real estate situated in Qatar.
- Income from shares in companies resident in Qatar.

Inventory valuation

Inventory must be valued in accordance with International Financial Reporting Standards (IFRS).

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. Specific rules exist in respect of gains realised on the disposal of real estate. Capital gains generated by a non-resident on the sale of shares in a Qatar company are an area of focus for the tax authorities.

Dividend income

Dividends are not taxable in Qatar if received from profits that have been subject to Qatar tax or from companies that are exempt from Qatar tax.

Interest income

Interest arising in Qatar and bank interest realised outside Qatar, if it results from the taxpayer's activity in Qatar, are taxed as ordinary income.

Royalty income

Royalty income is taxed as ordinary income.

Foreign income

Non-Qatar-sourced income is not subject to tax in Qatar.

Deductions

Taxable income is determined after deducting all expenditures, costs, and losses incurred to generate gross income. A deduction is usually available for expenses that are not considered to be 'capital' in nature and are incurred in generating Qatar-source revenue.

Depreciation

Depreciation should be calculated in accordance with rates specified by the Qatar tax law and the related regulations. In practice, however, the deduction for depreciation is restricted to the amount of the accounting depreciation.

For certain assets, depreciation is calculated on the cost on a straight-line basis. The rates of depreciation are as follows:

Assets	Depreciation rate (% per annum)
Buildings and constructions, including roads, bridges, pipelines, storage tanks, and port ducts inside the establishment and excluding ready-made light constructions	5
Ships and boats	10
Airplanes and helicopters	20
Drilling instruments	15
Intangible assets:	
Pre-establishment expenses	50
Trademarks, patents, and the like	Amortised over the expected lifetime of the asset, provided that the amortisation allowance shall not exceed 15% per annum.

Other assets will be divided into groups and depreciated on a reducing-balance basis. The rates of depreciation are as follows:

Group	Asset	Depreciation rate (% per annum)
I	Computer hardware and software accessories	33.33
II	Machinery, plant, equipment, electrical devices, means of transportation of goods and persons, including cars, vehicles, trucks, and cranes	20
III	Furniture, fixtures and fittings, and other fixed assets	15

Goodwill

There are no specific provisions dealing with the taxation of goodwill. Accordingly, the accounting treatment should be followed from a tax perspective.

Interest expenses

Interest on loans used for the purpose of the taxpayer's activity is tax deductible, except where the loan is between a Qatar branch and its head office or a party related to the head office.

Bad debt

Bad debts approved by the tax authorities in accordance with the criteria set out in the tax law are deductible.

Charitable contributions

Donations, gift aid, and subscriptions to charitable, humanitarian, scientific, cultural, or sporting activities paid in Qatar to government authorities or public bodies are deductible, provided the value does not exceed 5% of net profit in the year in which the deduction is claimed.

Fines and penalties

Fines and penalties are not deductible for Qatar tax purposes.

Taxes

Taxes and duties, other than the income tax, provided for in the law are deductible.

Other significant items

Other deductible expenditures include the following:

- Employee costs (including salaries, wages, gratuities, and other end of service benefits).
- Losses resulting from the sale of assets.
- Rents.
- Insurance premiums.

Net operating losses

Losses may be deducted from net income during the year. Losses can be carried forward for three years after the year in which they were incurred. Losses cannot be carried back.

Allocations of overhead costs to branches

The branch's share of head office expenses (i.e. indirect or allocated overhead) generally is deductible only up to a certain limit. The deduction is capped at 3% (1% for banks) of the total revenue less certain other costs.

Group taxation

There is no definition of a 'group' for Qatar tax purposes; consequently, there is no concept of group taxation.

Transfer pricing

The executive regulations, which supplement Qatar's tax law, have made it clear that the anti-avoidance provision will be applied to related-party transactions. In determining the arm's-length value, the unrelated comparable price method should be used (i.e. the price of services or goods that would have been applied should the transaction be between unrelated parties). It is possible to make an application to the Qatar tax authorities to use another method approved by the Organisation for Economic Co-operation and Development (OECD).

Thin capitalisation

There are no specific thin capitalisation rules in Qatar, although consideration should be given to the anti-avoidance provision noted above.

Controlled foreign companies (CFCs)

There are no CFC provisions in Qatar.

Tax credits and incentives

Foreign tax credit

The executive regulations of Qatar's tax law provide that income tax paid outside Qatar is deductible as an expense for the purposes of determining taxable income, provided such income is taxable in Qatar.

Qatar Science and Technology Park (QSTP)

Qatar has established the QSTP, which is aimed at entities with research and development (R&D) activities. QSTP entities can be fully exempt from Qatar tax; however, tax-exempt entities are required to file tax returns.

Other tax exemptions

An application for a tax exemption may be made for certain projects that are considered to be strategically significant to the Qatar economy. The exemptions are generally granted for a period of three or six years. Applications for an exemption are assessed based on certain criteria set out in the Qatar tax law.

Notwithstanding the fact that an exemption is granted, an entity that is exempt is still required to file a tax return under the Qatar tax law.

Withholding taxes

WHT is levied on certain payments made to non-residents in relation to royalties and technical services (the applicable rate is 5%) and on interest, commissions, brokerage fees, directors' fees, attendance fees, and any other payments for services carried out wholly or partly in Qatar (the applicable rate is 7%). The executive regulations have excluded certain payments from the scope of WHT. Dividends are not subject to WHT.

The company that makes the payment to its foreign supplier is required to withhold the tax and remit to the tax department the funds that were withheld by the 16th day of the following month. In the event that the company does not make a payment to the tax department, the company will be liable for a penalty equal to the amount of unpaid tax due, in addition to the WHT.

Retention system

Pursuant to circulars issued by the tax department, a retention system is in place whereby certain final contract amounts are required to be retained from payments made to Qatari resident entities and non-resident entities with a PE in Qatar in connection with services performed in Qatar. All ministries; government departments; public, semi-public, and private establishments; and Qatar taxpayers are required to retain. Companies resident in Qatar and permanent branches can secure a release of the final payment by presenting a tax card. A retention equivalent to the higher of 3% of the contract value (less the value of supply and work carried out abroad) or the final contractual payment will apply to temporary branches registered for activities of at least one year until they produce a no objection letter from the Qatar tax authorities. All other non-residents are expected to be subject to WHT in respect of payments that fall within the scope of WHT.

Tax treaties

Qatar has a growing double taxation treaty (DTT) network with over 60 DTTs currently in force. The WHT rates under these treaties in respect of dividends, interest, and royalties are as follows:

	WHT (%)			
Recipient	**Dividends ***	**Interest**	**Royalties**	**Effective date**
Non-treaty	0	7	5	

Recipient	WHT (%) Dividends *	Interest	Royalties	Effective date
Treaty:				
Algeria	0	0	0/5 (12)	1 Jan 2012
Armenia	5/10 (1)	5	5	1 Jan 2008

Yemen (11)				1 Jan 2004

* Dividends are not subject to WHT according to domestic tax law of Qatar.

Notes

1. 5% if capital exceeds 100,000 United States dollars (USD), and 10% in all other cases.
2. 0% if the beneficial owner is a company that owns at least 10%, 5% if 10% direct participation is held by an individual who has resided in the relevant state for a period of at least 48 months, and 10% in all other cases.
3. 5% if the beneficial owner is a company that has owned, directly or indirectly, at least 25%, and 10% if participation is less than 25%.
4. 5% if the beneficial owner is a company that owns at least 10%, and 10% in all other cases (i.e. less than 10% shareholding).
5. 0% if the beneficial owner is a company that owns at least 7.5%, and 10% in all other cases (i.e. less than 7.5% shareholding).
6. 5% if the beneficial owner is a company that owns at least 10%, and 15% in all other cases (i.e. less than 10% shareholding).
7. 5% if the beneficial owner is a company that directly holds at least 10%, 10% if the beneficial owner is an individual that directly holds at least 10%, and 15% in all other cases.
8. 10% if the beneficial owner is a company that has owned at least 25%, and 15% in all other cases (i.e. less than 25% shareholding).
9. 0% where the beneficial owner of the interest carries on business in the other contracting state where the interest arises (i.e. through a PE therein), and 5% if the contracting company does not have a PE.
10. 0% if interest arising in contracting state is derived from government debt, and 10% if the contracting company does not have a PE.
11. It should be noted that there is limited information available in respect of the treaty with this country, and the date provided above may be the date on which the treaty was signed or entered into force rather than its effective date.
12. Reduced to zero if the beneficial owner has a PE in the contracting state.
13. 0% if the beneficial owner is a company, and 5% in all other cases.
14. 5% if the beneficial owner is a bank, and 10% in all other cases.
15. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends. 7.5% in all other cases.
16. 0% if the interest derived from a contracting state and paid for the government or the central bank in the other state. 10% in all other cases.
17. 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, at least 50% of the capital of the company paying the dividends or has invested more than USD 10 million in the capital of the company paying the dividends. 12.5% in all other cases.
18. 5% of the gross amount of the royalties in respect of payments of any kind received as a consideration for the use of, or the right to use, any patent, design or model, plan, secret formula or process, or

for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. 10% in all other cases.

19. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
20. 0% if the interest is derived from government debt or arises in respect of any debt instrument listed on a recognised stock exchange. 10% in all other cases.
21. 5% if the beneficial owner is a company that has owned, directly or indirectly, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power or of the total issued shares of the company paying the dividends, and if the company paying the dividends is not entitled to a tax deduction of dividends. 10% in all other cases.
22. 0% if interest is derived from government debt or if the beneficial owner is either: (i) a bank, (ii) an insurance company, (iii) a securities dealer, or (iv) any other enterprise, provided that, in the three taxable years preceding the taxable year in which the interest is paid, the enterprise derives more than 50% of its liabilities from the issuance of bonds in the financial markets or from taking deposits at interest and more than 50% of the assets of the enterprise consist of debt-claims against persons that are not associated with the enterprise. 10% in all other cases.
23. 10% if the beneficial owner is a company (excluding partnerships) that directly holds at least 10% of the capital of the paying company. 15% in all other cases.
24. 0% if dividends are paid to the other contracting state. 5% if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends. 10% in all other cases.
25. 0% if the beneficial owner of the interest is the other contracting state, its political subdivisions, local authorities, statutory bodies, Central Bank, or any entity wholly owned, directly or indirectly, by that other state, including, in the case of Qatar, Qatar Investment Authority and Qatar Holding.
26. 0% if the beneficial owner is a company that directly holds at least 10% of the capital of the payer company; or the beneficial owner is an entity wholly owned by the other state or authority, if that state, authority, or entity directly holds at least 5% of the capital of the payer company; or the dividends are paid by a company whose shares are substantially and regularly traded on a stock exchange of one of the contracting states, and the beneficial owner is a resident of the other state who directly holds at least 1% of the capital of the payer company; or in some other cases.

Tax administration

Taxable period

The tax year is generally the same as the calendar year, although advance approval may be sought from the Qatar tax authorities to use a company's accounting year-end.

Tax returns

The tax return is due within four months from the end of a company's accounting period.

Payment of tax

The tax payable is based on the tax declaration and should be paid on the same day that the tax return is due.

Late filing penalties

The Qatar tax law contains a penalty regime, which imposes a penalty for the late filing of a tax return. In addition, a penalty applies where there is a late payment of tax.

Objection and appeals process

It is possible for a taxpayer to initially object directly to the tax department regarding a decision related to a tax position. If the objection is unsuccessful with respect to altering the tax department's decision, an appeal may be made by the taxpayer to the Tax Appeals Committee. Based on the Tax Appeals Committee's decision with respect to the appeal, a final appeal may be made by either the tax department or the taxpayer to the administrative chamber of the court. The law prescribes time limits for each stage of the appeal process.

Accounting and audit requirements

A company's CIT return is required to be accompanied by audited financial statements if the company's capital or profit exceeds 100,000 Qatari riyal (QAR) or the head office is situated outside Qatar. The audit report must be signed by a Qatar-registered auditor.

Qatar tax law requires accounts to be prepared in accordance with IFRS.

Accounting record retention

All accounting books, registers, and documents relating to activity in Qatar are required to be retained in Qatar for a ten-year period.

Anti-avoidance provision

The Qatar tax law contains an anti-avoidance provision that gives the Qatar tax authorities wide powers to counteract transactions that have been carried out with a tax avoidance purpose. These powers include substituting an arm's-length value or re-characterising transactions.

Topics of focus for tax authorities

The following areas appear to be the focus of the Qatar tax authorities from a tax compliance perspective:

- Representative offices of non-residents are being required to file tax returns, notwithstanding the fact that they may only be promoting their business.
- The Qatar tax authorities are closely examining the taxpayer's activities to establish whether or not a PE exists. This is a particular area of focus where a taxpayer submits a claim for a refund of WHT on the basis of application of the provisions of a DTT. If a taxpayer has a PE, the Foreign Investment Law requires that PE to be formally registered as a company or a temporary branch.
- Related-party transactions and large and unusual items of expenditure are being scrutinised by the Qatar tax authorities. *See the Group taxation section for comments on the anti-avoidance provision and transfer pricing*.
- The allocation of head office general and administrative expenses to a Qatar branch of a foreign company.
- Capital gains generated on the sale of shares by a non-resident in a Qatari company.

Other issues

The Qatar Financial Centre (QFC)

The QFC was established in 2005 to attract companies in the financial services sector. The QFC has its own tax regulations and rules, and the State of Qatar tax laws do not apply to the licensed activities of entities established in the QFC.

The QFC is an onshore regime that operates within its own legal, tax, and regulatory framework, which is independent of, but runs parallel to, the existing framework in the State of Qatar. The QFC has its own Civil and Commercial Courts, as well as an independent Regulatory Tribunal. The legal framework is modelled closely after the English common law and existing major financial centres.

QFC-established entities can access the local market, be 100% foreign owned, are subject to no currency restrictions, and can repatriate 100% of their profit. Whilst entities can currently be based at any of the QFC's designated premises in Qatar (which are not confined to a specific zone), the QFC has recently announced an initiative to move all existing and future QFC entities to Msheireb Downtown Doha, a special designated area, by 2018.

Regulated activities

Regulated activities include activities such as financial, banking, and investment business; insurance and reinsurance business; funds administration; fund advisory; fiduciary business; and other financial-related business.

Non-regulated activities

Permitted non-regulated activities were originally limited to professional services in support of financial firms (e.g. services generally provided by accounting, audit, and legal firms). The QFC subsequently expanded the scope of permitted non-regulated activities to include services such as intellectual property (IP) management and treasury for all sectors and consultancy services in relation to information technology (IT), real estate, recruitment, and sports and event management. The above-mentioned services are not exhaustive, and the QFC authority continues to consider novel types of professional 'business-to-business (B2B) services' on a case-by-case basis, to the extent that the envisaged business is a strategic fit for the QFC. The opportunity now exists for a non-regulated business to incorporate a 100% foreign owned entity within the QFC. The QFC is also available to Qatari investors, and they can enjoy benefits similar to those awarded under the State Tax Law (i.e. exemption from CIT), provided the business is 90% Qatari owned.

The QFC also offers the possibility for investors to set up special purpose companies for the purpose of a transaction or a series of transactions. There is a streamlined and quicker process for setting up such vehicles, which are also not subject to the same corporate compliance obligations as the other QFC entities.

In addition, single-family offices can be incorporated in the QFC for the sole purpose of providing services to and carrying on activities in relation to a 'single family' (i.e. investment and financial activities or services, arranging or providing custodian of fiduciary services). The single family must have a minimum investable or liquid assets of USD 5 million and must be under the management of a single family.

The QFC has recently amended its Tax Rules and Regulations, which, *inter alia*, modifies the definition of 'local source' income. According to the new provisions, profits arising in or derived from Qatar by a QFC entity from the provision of services for use outside Qatar would not form a part of local source taxable profits and would not be subject to tax. The new provisions apply to firms licensed in non-regulated activities that fulfil certain substantiation criteria.

Tax environment

The key features of the QFC tax environment are as follows:

- Unregulated QFC LLCs with a minimum 90% Qatari ownership benefit from a 0% concessionary CIT rate.
- Low general CIT rate of 10% on locally sourced profits.
- Extensive tax exemptions for qualifying activities, dividends, and capital gains.
- No WHT on payments from Qatar.
- Access to Qatar's DTT network with over 60 jurisdictions.
- VAT may be introduced in the future, but is currently not applicable.

- No personal income tax (PIT) for expatriate employees.
- Online tax administration system.
- Advance ruling services providing QFC entities with a high degree of certainty.
- Statutory protection for investors, whereby QFC tax authority must review tax returns within 12 months of filing.
- Group loss relief available.
- No tax exemption for profits of Qatari partners in joint ventures where the Qatari ownership is less than 90%.

Foreign Account Tax Compliance Act (FATCA)

To implement FATCA in Qatar, Qatar and the US government concluded a Model 1B Inter-governmental Agreement (IGA) in 2015.

Financial institutions based in Qatar should not be subject to a 30% WHT on their US-source income, provided they meet the requirements established by the Agreement.

Qatar Central Bank (QCB) Regulated Financial Institutions are required to provide the information to the QCB FATCA Unit. The information should be further transferred to the US Internal Revenue Service (IRS) through the Ministry of Finance.

Common Reporting Standard (CRS)

On 10 November 2017, Qatar signed the CRS Multilateral Competent Authority Agreement (CRS MCAA) re-confirming its commitment to implement the automatic exchange of financial account information pursuant to the OECD/G20 CRS in time to commence the exchanges in 2018.

Significant developments

Corporate taxation

Anti-Tax Avoidance Directive (ATAD) provisions have been transposed into the national legislation. This brings a new set of interest deductibility limitation, exit taxation, anti-abuse, and controlled foreign company (CFC) rules.

The threshold under which a company is considered a micro-company has been increased as of 1 January 2018.

Value-added tax (VAT)

A VAT split-payment mechanism was introduced in Romania.

Taxes on corporate income

The standard profit tax rate is 16% for Romanian companies and foreign companies operating through a permanent establishment (PE) in Romania. Resident companies are taxed on their worldwide income, unless a double tax treaty (DTT) stipulates otherwise. Non-resident companies are taxed on all income derived from Romanian taxpayers, regardless of whether the services are rendered in Romania or abroad.

The profit tax due for nightclubs and gambling operations is either 5% of the revenue obtained from such activities or 16% of the taxable profit, whichever is higher.

Micro-company tax regime

Micro-companies are subject to a mandatory revenue tax rate (*see details below*) in lieu of the standard profit tax.

The condition for a company to be considered a micro-company is to have a maximum revenue at the end of the previous year of 1 million euros (EUR) (the threshold was increased from EUR 500,000 as of 1 January 2018). All the previous exceptions under which certain companies were not considered micro-companies (i.e. the capital limit, the industry, etc.) have been repealed.

The tax rates used for micro-company income tax are:

- 1% for micro-companies with one or more employees.
- 3% for micro-companies with no employees.

Newly established companies are required to follow the micro-company tax regime starting with the first fiscal year.

Micro-companies can opt once for applying profit tax if they fulfil both of the following conditions:

- Have a subscribed share capital of at least 45,000 Romanian leu (RON).
- Have at least two employees.

Local income taxes

There are no county or local taxes on corporate income.

Corporate residence

A company is considered tax resident in Romania if it was set-up under Romanian law or has its 'place of effective management' (POEM) in Romania. POEM represents the place where strategic economic decisions necessary to ensure the management of the foreign company are taken and/or the place where the most senior person or group of persons who manage and control the activity of the foreign entity operate.

Permanent establishment (PE)

A PE is generally defined as being the place through which the activity of a non-resident company is conducted, fully or partially, directly or through a dependent agent.

Once a PE is created, Romania has the right to tax the profits of the non-resident parent company derived from the activities performed through the PE.

In defining the PE concept, reference can be made to Article 5 - 'Permanent establishment' of the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention, which has been transferred from the Methodological Norms to the Fiscal Code.

The Romanian legislation explicitly states the conditions that trigger a PE:

- Fixed base PE is created through a place of business with a certain degree of permanency through which business is conducted in Romania (with some exceptions).
- Agency PE is created through agents with a dependent status that operate in Romania on behalf of the foreign company.

The registration, reporting, and tax payment requirements for a PE are similar to those for a Romanian company.

Consolidation of PE revenues and expenses belonging to the same foreign legal entity is possible. *For further information, please see the Group taxation section*.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 19%.The standard VAT rate is applied to all supplies of goods and services (including imports) that neither qualify for an exemption (with or without credit) nor for a reduced VAT rate.

The reduced VAT rate of 9% is levied on supply of prostheses and accessories to them, defined as per specific legislation, with the exception of dental prostheses, which are tax exempt; supply of medicines for human and veterinarian use; accommodation in hotels or in areas with a similar function, including the lease of land arranged for camping; restaurants and catering services, except for alcoholic beverages, other than beer classified under CN 22 03 00 10; supply of food, including non-alcoholic drinks, for human and animal consumption; supply of drinking water and irrigation water used in agriculture; supply of fertilizers and pesticides used in agriculture; seeds and other agricultural products intended for sowing or planting; as well as supplies of specific services used in the agricultural sector.

The supply of school manuals, books, newspapers, and some magazines, as well as the provisions of services consisting of the allowance of access to castles, museums, cinemas, and others, is subject to the reduced VAT rate of 5%. Sports events are also included in the category of operations subject to the reduced VAT rate of 5%, as well as the supply of dwelling places as part of the social policy (including land on which they are built).

VAT exemption without credit applies to a range of activities, including the supply of services in relation to banking, finance, and insurance. However, some financial services are subject to the standard VAT rate of 19% (e.g. factoring, debt collection, managing and safekeeping certain equity papers). The VAT exemption without credit also applies to medical, welfare, and educational activities if performed by licensed entities.

There are also operations exempt with credit (i.e. deduction right for the related input VAT), such as the following:

- Supply of goods shipped or transported outside the European Union (EU), and related services.
- Intra-Community supply of goods.
- International transport of passengers.
- Goods placed into free trade zones and free warehouses.
- Supply of goods to a bonded warehouse, a VAT warehouse, and related services.
- Supply of goods that are placed under suspensive customs regimes.
- Supply of services in connection with goods placed under suspensive customs regimes or goods placed into free trade zones.
- Supply of goods and services to diplomatic missions, international organisations, and North Atlantic Treaty Organization (NATO) forces.

VAT on imported goods will continue to be paid at customs, except for taxable persons registered for VAT purposes that obtain an import VAT deferment certificate from the customs authorities. For these taxpayers, the VAT is not paid in customs but shown in the VAT return as both input and output VAT. The import VAT deferment certificate is available only to companies for which the value of imports (excluding imports of goods subject to harmonised excise) performed in the previous year/previous 12 consecutive months has exceeded the threshold of RON 100 million, to companies with Approved Economic Operators (AEO) status, and to those companies registered for VAT purposes in Romania authorised to perform in-house customs clearance formalities.

VAT consolidation

Companies established in Romania that are legally independent but are closely related in terms of financial, economic, and organisational purposes may choose to form a tax group, as long as they apply the same fiscal period. However, transactions between the members of the group fall within the scope of VAT.

Place of VAT taxation

The rules for establishing the place of VAT taxation for supply of goods and services are determined based on the same rules as those presented in the EU 2006/112/EC and EU 2008/8/EC Directives. Services provided by non-resident entities to Romanian companies with deemed place of supply in Romania are subject to Romanian VAT under the reverse-charge mechanism, provided that no VAT exemption is applicable.

Reverse-charge mechanism

Under the VAT reverse-charge mechanism, VAT is not actually paid, but only shown in the VAT return as both input and output tax, provided that both the beneficiary and the supplier are registered for VAT purposes.

As a general rule, the reverse-charge mechanism applies either for intra-Community acquisitions of goods performed in Romania or for services performed by non-resident entities that are not established, nor have a fixed establishment, in Romania. Under the general rule, the place of supply of services is where the beneficiary is established or has a fixed establishment (e.g. consultancy, marketing services).

Domestic supplies of cereals and industrial plants performed between companies registered for VAT purposes will be subject to the reverse-charge mechanism. The measure applies until 31 December 2018. Also, the reverse-charge mechanism is applicable for the supply of buildings, parts of buildings, and plots of land, and, until 31 December 2018, to the supply of mobile phones, PC tablets, laptops, gaming consoles, and devices with integrated circuits (provided that the value of such goods, excluding VAT, mentioned on an invoice is equal to/higher than RON 22,500).

Limited VAT deduction right

The VAT deduction right related to the acquisition of road vehicles used for the transport of passengers and vehicles that meet certain characteristics, as well as the acquisition of fuel and all related services used for the respective vehicles, is limited to 50%, except for some specific exceptions (e.g. vehicles used by sales agents, taxis, transport services).

VAT compliance

The annual turnover threshold for VAT registration in Romania is the Romanian leu equivalent of EUR 65,000, computed based on the exchange rate from the date of EU accession (i.e. RON 220,000). We expect this threshold to be increased to EUR 88,500 (applicable until 2020), as Romania receded an authorisation from the European Commission (EC) to do so. Companies surpassing the VAT registration threshold will be liable to charge VAT for the advance payments received before registering for VAT purposes related to goods delivered/services performed after the registration date.

As a general rule, the fiscal period is the calendar month. For taxable persons registered for VAT purposes whose previous year-end turnover (from taxable operations, VAT exempt, and outside the Romanian VAT scope operations with deduction right) did not exceed EUR 100,000, the fiscal period is the calendar quarter.

Taxable persons must keep complete and detailed records for calculation of VAT liabilities.

VAT returns should be submitted to the tax authorities by the 25th day of the month following the end of the fiscal period; the VAT payment is due by the same date. The VAT return can be submitted by electronic means.

Taxable persons not registered for VAT purposes in Romania and not required to register are liable to pay VAT and to submit a special VAT return in connection to services rendered by/provided to non-residents. These obligations must be fulfilled by the 25th day of the month following that when the services are supplied.

Taxable persons are required to file VAT statements related to acquisitions/supplies of goods/services performed on Romanian territory on a monthly/quarterly basis, based on invoices issued/received to/from taxable persons registered for VAT purposes in Romania. These obligations should be fulfilled within 30 days.

A taxable person registered for VAT purposes who does not exceed the exemption threshold of RON 220,000 during the course of a calendar year may request de-registration from the VAT registered persons record between the first and tenth day of each month following the fiscal period used (month or quarter).

The cash accounting VAT scheme (CAVS)

The CAVS is optional for taxpayers with a turnover lower than RON 2,250,000 registered in the previous year and for newly founded companies. The right to deduct the input VAT for the acquisitions of goods/services from companies applying the CAVS is deferred until the date the payment is performed.

The VAT split-payment mechanism

The VAT split-payment system is mandatory for the following categories of taxpayers:

- Taxpayers that have, as of 31 December 2017, outstanding VAT liabilities and have not paid them by 31 January 2018: (i) for large taxpayers, more than RON 15,000; (ii) for medium taxpayers, more than RON 10,000; (iii) for other taxpayers, more than RON 5,000.
- Taxpayers that have, as of 1 January 2018, outstanding VAT liabilities and do not pay them within 60 business days, at the same levels as above.
- Taxpayers in insolvency or insolvency prevention procedures.

Taxpayers registered for VAT purposes not applying the system but making purchases from those who apply the system will be required to make split payments. The system is optional for any taxpayer. Taxable persons choosing for the optional application of this system will benefit from a 5% reduction in profit tax/micro-company tax.

Customs and international trade

Customs duties

Customs duties are those specified in the EU Common Customs Tariff and are expressed as a percentage applied to the customs value (i.e. *ad valorem* taxes), as a fixed amount applied to a specific quantity (i.e. specific taxes), or as a combination of the above.

Agricultural products (i.e. products from Chapters 1 to 24 of the EU Common Customs Tariff) are subject to specific taxation.

In certain cases (e.g. meat), the customs duty rate is established with regard to the cost, insurance, and freight (CIF) or the entry price of the products. In other cases, the customs duty rate is established by adding additional duties, such as agricultural components, to the *ad valorem* tax.

Customs value

The customs value is determined and declared by importers in accordance with the provisions of the Union Customs Code and its Delegated, Implementing, and Transitional Regulations, which took over the rules set up by the World Trade Organization (WTO) Customs Valuation Agreement (i.e. the Agreement pertaining to the implementation of Article VII of the General Agreement on Trade and Tariffs [GATT]).

Authorised Economic Operator (AEO) status

Operators that obtain AEO status benefit from simplifications regarding customs inspection, obtaining certain customs authorisations, and performing customs formalities.

Moreover, through the AEO authorisation, the holder is recognised by the customs authorities as a reliable person, giving comfort as regards observance of the safety and security standards, and can benefit from easier admittance to certain customs simplifications.

In addition, companies certified as an AEO may apply for a certificate granting the benefit to defer the payment of the VAT in customs upon import. Moreover, in case of imports followed by VAT-exempt intra-Community supplies, companies registered for VAT purposes in Romania having AEO status are not required to lodge a VAT guarantee.

Operators authorised as an AEO will be checked at least once every three years for assessing whether they comply with the certification criteria.

Binding Tariff Information (BTI)/Binding Origin Information (BOI)

Companies can obtain rulings (BTI) from the Romanian customs authorities on the tariff classification of imported goods that are binding for the customs authorities for a three-year period, whenever goods identical to those described in the BTI are imported.

A similar type of ruling can also be obtained regarding the origin of goods (BOI). They are also valid for a period of three years from the data of issue.

The BTI and BOI shall be binding for the holder of the decisions.

Trade measures

For some agricultural products, the European Union generally imposes specific measures (e.g. values or quantitative allowances) on imports from other countries. It is mandatory to obtain an import licence before importing such products.

Moreover, import/export licences from relevant authorities are also required for commodities regarded as potentially hazardous to human health or to the environment (e.g. some chemical products, certain types of waste and scrap), for commodities the end-use of which is controlled (e.g. explosives), or for dual use products (i.e. both civil and military).

Excise duties

Harmonised excise products

The following products are subject to harmonised excise duties: alcohol and alcoholic beverages, manufactured tobacco, energy products (e.g. unleaded gasoline, diesel, gas, coal), and electricity.

Excise duties are due when excise products are released for consumption (e.g. imported into Romania, taken out of an excise duty suspension arrangement).

Ethyl alcohol and other alcoholic products are exempt from the payment of excise duties if they are denatured and used in the pharmaceuticals or cosmetics industry.

Some energy products subject to movement control are excepted from excise duty, provided that an end-user authorisation is obtained and the payment of excise duties is secured.

Manufactured tobacco is also exempt from excise duties when exclusively intended for scientific and quality testing.

In some cases, traders can claim a refund of the excise duties paid (e.g. excise duty paid for goods released for consumption in Romania, but intended for consumption in other EU member states; excise duties paid for goods released for consumption and then returned to the production tax warehouse for recycling, reconditioning, or destruction; excise duties paid for goods released for consumption in Romania and then exported).

For cigarettes, the excise duty due is equal to the sum of the specific excise duty and the *ad valorem* excise duty. The specific excise duty expressed in RON/1,000 cigarettes is annually determined based on the weighted average retail price, the legal percentage related to the *ad valorem* excise duty, and the total excise duty. The specific excise duty for cigarettes has been set at RON 337.727/1,000 cigarettes for the period 1 April 2018 to 31 March 2019, inclusively.

The excise duty rate for ethyl alcohol is RON 3,306.98/hectolitre of pure alcohol.

The excise duty level for fermented sparkling beverages, other than beer and wines, is set at RON 47.38/hectolitre of product, while the excise duty level for apple and pear cider and mead is nil.

The excise duty level for intermediary products is set at RON 396.84/hectolitre of product, and the level for beer is set at RON 3.30/hectolitre/1 Plato degree.

The current levels of excise duties are RON 2,268.23/1,000 litres for leaded gasoline, 1,976.36/1,000 litres for unleaded gasoline, and RON 1,838.04/1,000 litres for diesel, respectively.

Companies selling fuel in gas stations have to register with the tax authorities. The same obligation applies for companies performing wholesales of fuel, alcoholic drinks, or tobacco products.

Other excise products

Other excise products are:

- Heated tobacco products, which by heating generate an aerosol that can be inhaled without the combustion of tobacco mixture (falling under CN 2403 99 90).
- Liquids containing nicotine (falling under CN 3824 99 56) for inhaling using an electronic device (i.e. electronic cigarette).

Excise duties should be paid no later than the 25th day inclusive of the month following the one:

- in which they were sold on the national market for domestic products, or
- when the actual receipt takes place for products received from EU countries, except for the excisable goods imported, for which the excise duty is to be paid when the goods are released for free circulation.

Economic operators performing directly intra-Community acquisitions/imports of such goods are entitled to request a refund of the excise duties paid if the products are exported, supplied to another EU member state, or returned to the supplier. For the production/intra-Community acquisitions/imports of such products, prior authorisation is requested.

Property taxes

Building tax

The building tax calculation method differentiates between buildings depending on their destination usage:

- Residential buildings: Tax rate between 0.08% and 0.2% (applicable to the taxable value as per the specific table provided by the law for individuals and the value resulted from the evaluation report for legal entities).
- Non-residential buildings: Tax rate between 0.2% and 1.3%. In the case of a building used for agricultural purposes, the applicable tax rate is 0.4%.

Local authorities have been granted the authority to increase local tax allowances by 50%.

The increased tax rate for building tax due by legal entities is 5% (if no revaluation was performed during the last three years).

If a building was acquired during a fiscal year, the building tax for the entire year is due by the seller. The buyer is liable to pay the tax starting with the next year.

Building tax is paid annually, in two equal instalments, by 31 March and 30 September. For the payment of the entire annual tax by 31 March, a reduction of up to 10% is granted by the Local Council.

Land tax

Owners of land are subject to land tax established at a fixed amount per square metre, depending on the rank of the area where the land is located and the area or category of land use, in accordance with the classification made by the Local Council.

Similar to building tax, land tax is paid annually, in two equal instalments, by 31 March and 30 September. A 10% reduction is granted for full advance payment of this tax by 31 March.

Transfer taxes

There are no transfer taxes for companies for the transfer of property. The income derived from such a transfer will be included into the taxable profits of the company and subject to the flat tax rate.

Stamp duty

For judicial claims, issue of licences and certificates, and documentary transactions that require authentication, stamp duty (in the form of notary fee) has to be paid.

Payroll taxes

Employers withhold, on a monthly basis, the mandatory employee's social security contributions (*see below*) and the income tax (10%) from the employee's gross salary and wire the amounts to the Romanian tax authorities.

Social security contributions

As of 1 January 2018, the social security contributions paid by the employer have been transferred to the employees.

The employer pays an insurance contribution for work of 2.25% and social insurance contribution of 4% for uncommon work conditions and 8% for special work conditions.

Environmental taxes

For certain activities (e.g. selling ferrous and non-ferrous waste, hazardous substances, activities that generate polluting emissions, introducing on the national market packaging materials and packed products/tyres, introducing on the national market electric and electronic equipment, and batteries and accumulators), companies have the obligation to declare and pay (by the case) related contributions to the Environmental Fund.

In certain cases (e.g. for the contribution related to packaging materials introduced on the national market and to the management of the related packaging waste), the contribution to the Environmental Fund depends on the degree to which companies achieve the annual packaging waste recovery/recycling targets. Thus, the contribution to the Environmental Fund is currently RON 2/kg of packaging introduced onto the market and is owed for the difference between the annual packaging waste recovery target stipulated by law and the packaging waste recovery/recycling target actually achieved by companies.

Companies conducting activities that result in the discharge of air-pollutant emissions from fixed sources (e.g. nitrogen oxides, sulphur oxides, persistent organic pollutants, heavy metal emissions, such as lead, cadmium, mercury) have to pay contributions to the Environmental Fund of between RON 0.02/kg and RON 20/kg.

A tax amounting to RON 0.3/kg is levied (one time only) on industrial oils and lubricants placed on the market; the tax must be distinctly stipulated on the purchase documents.

Producers/importers/exporters of electrical and electronic equipment and batteries and accumulators have to register with the National Agency for Environmental Protection and have to declare to the Environmental Fund Administration the categories and quantities of electrical and electronic equipment and batteries and accumulators introduced on the national market and to fulfil annual recovery/recycling targets for the waste that will be generated by these equipment.

Specific tax for certain activities

Economic operators in the tourism, hotel, restaurants, bars, and catering sector will pay a specific tax, regardless of the size of the turnover and the level of profits. The tax will be calculated according to the area of the business, the place where other variables take place.

Thus, whether or not profitable, the restaurants, bars, or cafés will apply this tax system, which will negatively affect small businesses, especially.

The declaration and payment of the specific tax will be made half-yearly until the 25th day of the month following the semester for which the tax is due. Thus, the payment amount will be half the annual tax.

Branch income

Branch

A foreign company can set up a branch in Romania, as long as the branch only operates in the same field of activity as the parent company. A branch is considered to have the same legal personality as the parent company and is not a separate legal entity (no own share capital, no separate name, etc.).

Profits derived by the branch are taxed at the standard profit tax rate of 16%.

Representative offices

Representative offices are often established as a first step to operating in Romania. A representative office can undertake only auxiliary or preparatory activities, cannot trade in its own name, and cannot engage in any commercial activities. A representative office can perform only a limited range of activities without being considered a PE for profit tax purposes.

A tax on representative offices is due by any foreign legal person with a representative office authorised to operate in Romania according to the law. The tax is paid on an annual basis. The amount to be paid for a fiscal year is RON 18,000. If a representative office is set up or closed down during a year, the tax due for that year is pro-rated for the months that the representative office was operational in that fiscal year.

The representative office of a foreign legal person has to declare and pay the tax to the state budget by the last day of February of the tax year.

Income determination

The taxable profit of a company is calculated as the difference between the revenue derived from any source and the expenses incurred in obtaining the taxable revenue throughout the tax year, adjusted for fiscal purposes by deducting non-taxable revenue and adding non-deductible expenses. Other elements similar to revenue and expenses are also to be taken into account when calculating the taxable profit.

For taxpayers that apply International Financial Reporting Standards (IFRS) (i.e. financial institutions and listed companies), there are specific rules in relation to the fiscal value assessment, profit tax computation, adjustments for step-down in value, amortisation, and fiscal treatment of deferred profit tax.

Inventory valuation

The methods permitted for inventory valuation under Romanian law are standard cost, detailed sale price, average (weighted) cost, first in first out (FIFO), and last in first out (LIFO). The accounting method is also recognised for tax purposes.

Assets are generally valued at their acquisition cost, production cost, or market value. Fixed assets may be re-valued at certain points in time for various purposes.

Capital gains

Capital gains earned by a Romanian resident company are included in their ordinary profits and are taxed at 16%. Capital gains obtained by non-residents from real estate property located in Romania or from the sale of shares held in a Romanian company are also taxable in Romania. However, the income may be subject to treaty protection.

Participation exemption applies for capital gains derived by a Romanian legal entity from participations of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

Dividend income

Dividends distributed by a company resident in another EU member state to a Romanian company are tax exempt if the Romanian company has held, prior to the time of distribution, a minimum of 10% of the shares in the respective non-resident company for an uninterrupted period of at least one year.

The Romanian Fiscal Code incorporates the amendments to the European Directive no. 2011/96/EU, relating to the application of a common system of taxation in the case of parent companies and subsidiaries of different member states. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive's principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions mentioned above will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

Participation exemption applies for dividends derived by a Romanian legal entity from participation of at least 10%, held for a minimum period of one year, in a subsidiary established in a state with which Romania has a DTT.

The tax rate on dividends is 5% for both dividends paid to Romanian companies and to non-resident companies. Non-residents may be eligible for a reduced rate under DTTs.

Interest and royalty income

Interest and royalty payments made by Romanian companies to other Romanian companies are taxable income in the hands of the beneficiary.

Romanian-sourced interest and royalty payments of an affiliated company, resident in an EU member state, are exempt from withholding tax (WHT), provided that certain conditions are met, e.g.:

- 25% minimum direct holding of the share capital (i.e. one company has a direct minimum holding of 25% in the share capital of the other company or a third company has a direct minimum holding of 25% in the share capital of both companies involved in the payment of the interest and royalties).
- The holding period must be maintained for an uninterrupted period of at least two years prior to the payment of the interest and royalties.
- The company receiving the interest or royalty payments must be the beneficial owner of these payments.

Fiduciary contracts

If the settlor of a fiduciary contract is also the beneficiary, then:

- the transfer of the patrimony from the settlor to the fiduciary is not considered a taxable transfer, and
- the fiduciary will keep separate bookkeeping entry for the fiduciary patrimony and will communicate to the settlor, on a quarterly basis, the income and expenses resulting from the administration of the patrimony.

If the beneficiary is the fiduciary or a third party, the expenses recorded from the transfer of the patrimony from the settlor to the fiduciary is considered non-deductible.

Other significant items

The other most relevant types of non-taxable revenue stipulated by the Romanian Fiscal Code are:

- Favourable fluctuations in the price of shares and long-term bonds registered by the company in which the shares and long-term bonds are held, as a result of capitalisation of reserves, benefits, or share premiums.
- Revenue from reversal or cancellation of provisions/expenses that were previously non-deductible, recovery of expenses that were previously non-deductible, and revenue from reversal or cancellation of interest and late payment penalties that were previously non-deductible.
- Revenue from the annulment of a reserve registered as a result of a participation in nature to the capital of other legal entities.
- Revenue from deferred income tax.
- Revenue resulting from the change in the fair value of real estate investments/ biological assets owned by the taxpayers applying IFRS.

- Non-taxable revenue expressly provided for under agreements and memoranda enforced by regulatory documents.

Foreign income

Resident companies are taxed on their worldwide income unless a DTT provides otherwise. However, in case of foreign subsidiaries of Romanian companies, income is not taxed in Romania until remitted back. Otherwise, there is no specific tax deferral regime in place.

Deductions

Expenses fall into three categories: deductible expenses, limited deductibility expenses, and non-deductible expenses.

Deductible expenses

As a general rule, expenses are deductible only if incurred for business purposes.

Some of the deductible expenses specifically mentioned by the Romanian Fiscal Code include:

- Marketing and advertising expenses.
- Research and development (R&D) expenses that are not recognised as intangible assets for accounting purposes.
- Expenses incurred for environmental protection and resource conservation.
- Expenses incurred for management improvement; updating information technology (IT) systems; introducing, maintaining, and developing quality management systems; and obtaining quality compliance confirmation.
- Losses incurred when writing off client receivables in any of the following cases:
  - The bankruptcy procedure of the debtor was closed due to a court ruling.
  - The debtor is deceased and the receivable cannot be recovered from the heirs.
  - The debtor is dissolved or liquidated.
  - The debtor has major financial difficulties affecting its entire patrimony.
- Expenses related to losses from the valuation of shares and long-term bonds.
- Travel and accommodation expenses related to business; this also includes transportation of personnel to and from the workplace.
- Daily allowances for expenses incurred by employees in connection to travels in Romania and abroad.
- Expenses incurred from professional training and development of employees.
- Expenses related to benefits granted to employees as equity instruments settled with cash, at the moment of the effective granting, if the benefits are subject to personal income tax (PIT).
- Expenses incurred in connection to work safety, prevention of work accidents and occupational diseases, the related insurance contributions, and professional risk insurance premiums.
- Expenses incurred in connection to the acquisition of packaging materials during the useful life set by the taxpayer.
- Fines, interest, penalties, and other increased payments due under commercial contracts.

Note that credit institutions apply IFRS rules, and certain deductibility rules are provided for this category of taxpayers.

Limited deductibility expenses

The deductibility of the following expenses is limited:

- Interest expenses and foreign exchange losses under thin capitalisation rules (*see the Group taxation section for more information*).
- Provision and reserve expenses (*see details below*).
- Depreciation and reduction in value of fixed assets under fiscal depreciation rules (*see details below*).
- Perishable goods and losses resulted from transport/storage, according to law.
- Protocol expenses are deductible at up to 2% of the accounting profit, adjusted with protocol and profit tax expenses. Output VAT related to gifts of at least RON 100 offered by taxpayers fall under the protocol expenses category.
- Social expenses are deductible at up to 5% of salary expenses and include, among other items, maternity allowances, expenses for nursery tickets, funeral benefits, and allowances for serious or incurable diseases and prostheses, as well as expenses for the proper operation of certain activities or units under taxpayers' administration (i.e. kindergartens, nurseries, health services supplied for occupational diseases and work accidents prior to admission to health establishments, canteens, sports clubs, clubs, etc.), gifts represented by money of in kind, including gift tickets given to employees and their children, and medical services granted in case of professional diseases and labour accidents until transfer to a hospital. Expenses incurred for benefits granted under a collective labour agreement are also deductible within the same limits.
- Expenses incurred with lunch vouchers and holiday vouchers given by employers, according to law.
- Technological losses within the internal consumption norm required for the production of a good or provision of a service.
- Expenses incurred for functioning, maintenance, and repairs corresponding to an establishment represented by an individual's personal property, used as well for individual purposes, deductible in the limit of the surfaces at the disposal of the company based on the contractual agreements.
- Expenses incurred with electricity at the level of the technological internal consumption norm or, in case it is missing, at the level of the norm approved by the National Authority for Energy, including the commercial consumption for the taxpayers in the electricity distribution business.
- Taxes and fees paid to non-government organisations or professional associations related to the taxpayer's activity are deductible up to the limit of EUR 4,000 per year.
- All direct expenses attributable to vehicles with up to nine seats that are not used exclusively for business purposes are 50% deductible for profit tax purposes, under certain conditions provided by law. These expenses are fully deductible for vehicles used for the following activities:
  - Emergency, safety and security, courier services, cars used by sales and acquisitions agents.
  - Paid transportation services and taxi activities.
  - Rental.
  - Driving schools.
  - Vehicles used as commodities.
- For vehicles with up to nine seats, tax depreciation is limited to a maximum of RON 1,500 per month for each vehicle starting from 1 February 2013.

Non-deductible expenses

Expenses deemed non-deductible include, among other items, the following:

- Domestic profit tax, including differences from previous years or from the current year, and profit tax paid in foreign countries, deferred tax registered according to accounting standards.
- Expenses with tax not withheld at source in the name of non-resident individuals and legal entities.
- Expenses related to non-taxable revenues.
- Interest, fines, and penalties due to Romanian or foreign authorities, according to legal provisions, with the exception of the ones pertaining to agreements concluded with these authorities.
- Expenses incurred for management, consultancy, assistance, or other supply of services performed by a non-resident located in a state that has no exchange of information agreement concluded with Romania. These provisions are applicable if the expenses are incurred in respect of transactions deemed as artificial.
- Sponsorship and patronage expenses and expenses for private scholarships. Taxpayers are, however, granted a fiscal credit of up to 0.5% of turnover and 20% of the profit tax due, whichever is lower. Taxpayers that do not benefit from fiscal credit in the year when they grant sponsorship according to the law may carry forward the fiscal credit for the next seven consecutive years.
- Losses incurred when writing off client receivables, for the amount not covered by a provision, in any cases other than the following: a reorganisation plan was applied through a court decision in accordance to Law no. 85/2014; the bankruptcy procedure of the debtor was closed due to a court ruling; the debtor is deceased and the receivable cannot be recovered from the heirs; the debtor is dissolved or liquidated; or the debtor has major financial difficulties affecting its entire patrimony.
- Expenses resulting from the adjustment of acquired receivables, provided insurance contracts have been put in place.
- Expenses resulted from benefits granted to employees as equity instruments settled with shares/cash, unless subjected to PIT.
- Expenses in favour of shareholders, other than those related to goods or services provided by the shareholders at market value.
- Expenses incurred with insurance premiums unrelated to the risks and assets of the taxpayer's business, with the exception of those that relate to goods representing a banking guarantee for the loans used for business purposes.
- Expenses registered in the accounting records based on documents issued by an inactive taxpayer, according to the provisions of the Fiscal Procedure Code, with the exception of those representing acquisitions of goods performed during foreclosure procedures or from legal entities in bankruptcy procedure according to Law no. 85/2014.
- Expenses relating to missing or damaged non-imputable inventories or tangible assets, as well as related VAT, if the case. These expenses are deductible in case any of the following conditions are applicable to the inventory/assets:
  - They were destroyed following natural disasters or major force situations in the conditions provided by the methodical norms.
  - Insurance contracts have been set up in respect of these.
  - They were degraded from a qualitative perspective, and the proof of destruction is available.
  - They have a validity/expiry term that has passed, according to law.
- Expenses reflected in accounting records, irrespective of their nature, that later prove to be related to acts of corruption as defined under the law.

Note that credit institutions apply IFRS rules, and certain non-deductibility rules are provided for this category of taxpayers.

Depreciation

Romanian law makes an explicit distinction between fiscal and accounting depreciation. Fiscal depreciation is treated as an expense deductible from the tax base, while accounting depreciation is treated as a non-deductible expense. Companies should maintain a separate record to reflect the separate computation of the fiscal and accounting depreciation. Any accounting revaluations of fixed assets are not taken into account in computing the tax depreciation.

Assets are generally depreciated using the straight-line method. However, accelerated or degressive depreciation methods may be used to determine fiscal depreciation, while the accounting depreciation method may be different.

The useful lives to be used for tax purposes are the ones stated in the Official Fixed Assets Catalogue, published under government decision. Ranges are provided for classes of fixed assets, from which the taxpayers can choose the useful life (e.g. office and housing buildings: 40 to 60 years, commercial buildings: 32 to 48 years, commercial furnishings: 9 to 15 years, automobiles: 4 to 6 years).

For vehicles with up to nine seats, the fiscal depreciation is limited to a maximum of RON 1,500 per month for each vehicle. Certain categories of vehicles are exempt from this monthly deduction limitation (e.g. used exclusively for emergency, security, or delivery service; used for paid passenger transport; or used for paid supply of services).

Land cannot be depreciated.

Accelerated depreciation

Under the Romanian Fiscal Code, machinery and technical equipment, computers and their peripherals, as well as patents, may be depreciated by using the accelerated method, under which a maximum of 50% of the asset's fiscal value may be deducted during the first year of usage, while the rest of the asset's value can be depreciated using the straight-line method over the remaining useful life.

Goodwill

As a rule, goodwill is deemed non-depreciable from a Romanian fiscal perspective.

Start-up expenses

According to accounting rules, start-up expenses may be capitalised and depreciated over a maximum period of five years. However, according to the fiscal rules, start-up expenses should not be depreciated for tax purposes.

Provisions and reserves

As a general rule, provisions and reserves are non-deductible for profit tax purposes. However, there are certain provisions and reserves that are deductible, such as:

- Setting up or increasing the legal reserve fund up to 5% of the accounting profit, adjusted with profit tax expense, and until it reaches 20% of the share capital.
- Provisions related to guarantees for proper execution granted to the clients.
- Provisions for depreciation of receivables are deductible at up to 30% if the related receivables meet the following conditions simultaneously:

- Not collected for a period exceeding 270 days from the due date.
  - Not guaranteed by another person.
  - Due by a person not affiliated with the taxpayer.
- Bad debt provisions are fully deductible if all the following conditions are met:
  - The debtor is a company declared bankrupt by a court ruling or an individual for whom insolvency procedure has been declared based on:
    - Reimbursement plan.
    - Asset liquidation.
    - Simplified procedure.
  - Receivables are not guaranteed by another person.
  - The debtor is not a related party.
- Specific provisions established by non-banking financial institutions and other legal persons according to their incorporation law.
- Adjustments for impairment set up by credit institutions that apply IFRS and prudential filters set up according to regulations issued by the National Bank of Romania.
- Technical reserves set up by insurance and reinsurance companies, in accordance with their regulatory legal framework, except for the equalisation reserve.
- Risk provisions for transactions carried out on financial markets, in accordance with the rules issued by the Romanian National Securities Commission.
- Provisions and adjustments for impairment of receivables that were acquired by legal persons from credit institutions in order to be collected, for the difference between the receivables value and the amount due to the assignee, provided several conditions are met.
- Reserves from revaluation of fixed assets and land made after 1 January 2004, which are deductible through depreciation or through expenses triggered by assets sold or written off, are taxable at the same time and for the same amount as the tax depreciation deduction (i.e. when the assets are sold or written off).
- In case the level of the subscribed share capital was reduced, the part of the legal reserve corresponding to the reduction that was previously deducted represents an element similar to revenues.

The reduction or cancellation of any provision or reserve deducted from the taxable profit, due to changing the destination of the provision or reserve, distribution towards shareholders in any form, liquidation, spin-off, merger, or any other reason, is included in the taxable revenue and taxed accordingly.

Note that special rules are applicable to credit institutions that are required to apply IFRS rules.

Fiscal losses

Companies are allowed to carry forward fiscal losses declared in the annual profit tax returns for a period of up to seven years, based on the FIFO method. No related adjustment for inflation is allowed.

Any loss incurred by a PE of a Romanian company located in a non-EU/European Free Trade Association (EFTA) member state or in a country that has a DTT in place with Romania is only deductible for tax purposes from the revenue derived by that PE, and losses can be carried forward only for a period of five years.

For foreign legal persons, carryforward of losses applies only to revenue and expenses attributable to their PE in Romania.

Losses incurred by a company can be transferred within a merger/spin-off operation and can be recovered by the successors, in proportion to the assets and liabilities transferred. The successors of these restructuring operations are able to use such losses during the remaining period.

Carryback of losses is not available in Romania.

Payments to foreign affiliates

Transactions with Romanian-affiliated companies and with non-resident related parties fall within the scope of the investigations regarding compliance with transfer pricing legislation (*see Transfer pricing in the Group taxation section*).

Group taxation

There is no tax consolidation or group taxation in Romania, except for PE consolidation. Members of a group must file separate returns and are taxed separately. Losses incurred by group members cannot be offset against profits made by other members of the group.

Consolidation of PEs

Foreign legal entities that perform economic activities in Romania through several PEs must register one of them as their PE designated to fulfil the fiscal obligations for all the PEs owned.

The revenues and expenses of all the PEs belonging to the same foreign legal entity will be cumulated at the level of the designated PE.

Transfer pricing

Transfer pricing requirements are applicable to transactions between Romanian related parties as well as foreign related parties.

Transactions between related parties should observe the arm's-length principle. If transfer prices are not set at arm's length, the Romanian tax authorities have the right to adjust the taxpayer's revenue or expenses so as to reflect the market value.

Traditional transfer pricing methods (i.e. comparable uncontrolled prices, cost plus, and resale price methods), as well as any other methods that are in line with the OECD Transfer Pricing Guidelines (i.e. transactional net margin and profit split methods), may be used for setting transfer prices.

Transfer pricing documentation

Taxpayers engaged in related party transactions have to prepare and make their transfer pricing documentation file available, irrespective of whether the transfer pricing documentation file has been requested by the Romanian tax authorities.

Transfer pricing audit activity has significantly increased during the past few years, and requests for presenting the transfer pricing documentation file have started to become common practice. We are aware of recent cases where the Romanian tax authorities adjusted the taxable result of local taxpayers in accordance with the applicable regulations.

The content of the transfer pricing documentation file has been approved by order of the president of the National Agency for Tax Administration. The Order is supplemented by the Transfer Pricing Guidelines issued by the OECD and the Code of Conduct on transfer pricing documentation for associated enterprises in the European Union Transfer Pricing Document (EUTPD).

The deadline for presenting the transfer pricing documentation file will not exceed three calendar months, with the possibility of a single extension equal to the period initially established.

Failure to present the transfer pricing documentation file or presenting an incomplete file following two consecutive requests may trigger estimation of transfer prices by the tax authorities on the basis of generally available information.

Advance pricing agreement (APA)

Taxpayers engaged in transactions with related parties have the possibility to apply for an APA. These taxpayers can also schedule a pre-filing meeting to discuss the feasibility of the APA.

The request for an APA is filed together with the relevant documentation and payment evidence of the fee (ranging between EUR 10,000 and EUR 20,000). The required documentation is based on the EUTPD and suggests, up front, the content of the APA.

The term provided by the Fiscal Procedural Code for issuance of an APA is 12 months for unilateral APAs and 18 months for bilateral and multilateral APAs. The APA is issued for a period of up to five years. In exceptional cases, such as long-term agreements, it may be issued for a longer period.

APAs are opposable and binding on the tax authorities as long as there are no material changes in the critical assumptions. In this view, the beneficiaries are obligated to submit an annual report on compliance with the terms and conditions of the agreement.

If taxpayers do not agree with the content of the APA, they can notify the National Agency for Tax Administration within 15 days. In this case, the agreement does not produce any legal effects.

Country-by-country (CbC) reporting

Romania implemented CbC reporting requirements, transposing the provisions of Directive (EU) 2016/881 into the national legislation. The new CbC reporting provisions follow the OECD Base Erosion and Profit Shifting (BEPS) Project Action 13 initiative.

As such, *a* Romanian tax-resident entity that is the ultimate parent entity of a multinational enterprise (MNE) group with consolidated revenues of EUR 750 million or more, and is required to prepare consolidated financial statements of the group, has to file a CbC report with the Romanian tax authorities within 12 months of the last day of the MNE group's reporting fiscal year. The Romanian legislation also provides for filing of CbC reporting by a so-called 'surrogate parent' (i.e. a Romanian tax-resident entity may be appointed by the MNE group to file a CbC report in Romania on its behalf).

In addition, other Romanian resident entities will be required to file a CbC report if one of the criteria below is met:

- The ultimate parent entity of the group does not have the obligation to file a CbC report in its own jurisdiction of tax residence.
- The jurisdiction in which the ultimate parent entity is resident for tax purposes has a current international agreement to which Romania is a party but does not have a qualifying competent authority agreement in effect to which Romania is a party.
- There is a persistent failure in the automatic exchange procedure with the competent authority of the ultimate parent company required to file CbC reporting.

Moreover, failure to provide the CbC report in time or with incomplete/incorrect data will trigger the following penalties:

- For failing to file a CbC report, the penalty ranges from RON 70,000 to RON 100,000.
- For late filing of a CbC report or for incomplete/incorrect data in a CbC report, the penalty ranges from RON 30,000 to RON 50,000.

Thin capitalisation

If the company's equity is negative or the debt-to-equity ratio is higher than 3:1, expenses incurred from interest charges and net losses related to foreign exchange differences on long-term loans are fully non-deductible. However, these expenses may be carried forward to the following fiscal years and become fully tax deductible in the year the debt-to-equity ratio becomes lower than or equal to 3:1.

Debt included in the calculation of the debt-to-equity ratio is represented by all such (non-financial institution) loans with a maturity period of over one year.

The equity includes share capital, share/merger premiums, reserves, retained earnings, current year earnings, and other equity elements. Both debt and equity are calculated as the average of values existing at the beginning and at the end of the period for which profit tax is calculated.

Loans with a reimbursement term of longer than one year for which no interest is due according to the contract are also taken into consideration.

The deductibility of interest expenses and net foreign exchange losses related to long-term loans (with a maturity period of over one year) is further subject to the safe harbour rule. The safe harbour rule limits the deductibility of interest on such loans to a maximum of 4% for loans denominated in foreign currency and to the National Bank of Romania's reference interest rate for Romanian leu loans (currently set at 1.75%). Interest expenses recorded over this limit are tax non-deductible and cannot be carried forward in future periods.

Controlled foreign companies (CFCs)

New rules have been introduced regarding the taxation of CFCs. Under these rules, a taxpayer should include in its taxable base, in proportion with its holding in the CFC, the latter's non-distributed income derived from the following categories:

- Interest or any other income generated by financial assets.
- Royalties or any other income generated from intellectual property (IP).
- Dividends and income from the disposal of shares.

- Income from financial leasing.
- Income from insurance, banking, and other financial activities.
- Income from invoicing companies that earn sales and services income from goods and services purchased from and sold to associated enterprises, and add no or little economic value.

A company is considered a CFC if the following conditions are both met:

- The taxpayer by itself, or together with its associated enterprises, holds a direct or indirect participation of more than 50% of the voting rights, or owns directly or indirectly more than 50% of the capital or is entitled to receive more than 50% of the profits of that company.
- The actual profit tax paid on its profits by the company or PE is lower than the difference between the profit tax that would have been charged for the company or PE under the applicable Romanian profit tax provisions and the actual profit tax paid on its profits by the company or PE.

Exit taxation

Romania transposed the provisions of the Anti-Tax Avoidance Directive into national law, introducing rules on exit tax. Thus, a taxpayer will be subject to profit tax (at 16% tax rate) for transfer of business carried out by a PE, transfer of assets, or transfer of residence. The taxable base should be calculated as the difference between the market value of the assets and their fiscal value.

Tax credits and incentives

Foreign tax credits

- Tax credits for taxes paid to a foreign state may be obtained in Romania only if the DTT concluded between Romania and the foreign state applies and only if proper documentation confirming the tax was paid is available.
- A Romanian PE of a legal entity resident in the European Union or the European Economic Area (EEA) that obtains revenues from another EU or EEA member state, taxed both in Romania and in that member state, may claim a tax credit in Romania under the applicable tax law provisions.

Tax exemption for reinvested profits

The profit invested in technological equipment, electronic computers and peripheral equipment, cash registers and machinery, control and invoicing machinery and devices, as well as in software, produced and/or acquired, including on the basis of the financial leasing contracts, and commissioned/used for the purpose of pursuing the economic activity, is tax exempt under the Romanian Fiscal Code. The equipment subject to this incentive cannot be depreciated by using the accelerated method.

Research and development (R&D) incentives

Companies can benefit from an additional deduction of 50% of the eligible expenses for their R&D activities. Moreover, accelerated depreciation may be applied for devices and equipment used in the R&D activity.

In order to benefit from this supplementary deduction, the eligible R&D activities must be applicative research and/or technological development relevant to the taxpayer's activity and must be performed in Romania or in the EU/EEA member states.

The additional deduction for R&D activities is not available if the R&D project's objectives are not met.

Exemption from profit tax for taxpayers engaged exclusively in innovation and R&D activities

Taxpayers that exclusively perform innovation and R&D activities on scientific research and technological development and related activities are exempt from profit tax for the first ten years of activity.

Tax incentives related to professional and technical education

When determining the taxable profit, expenses for organising and developing professional and technical studies as per specific education legislation are considered deductible.

Local tax exemptions for business located in industrial parks

No property tax is due for buildings and constructions located in an industrial park. Also, land within industrial parks is exempt from land tax.

The incentives granted for the set up and development of industrial parks include:

- Local tax exemptions/reductions for immovable assets and land related to the industrial park.
- Other incentives that may be granted by the local tax authorities.
- Development programmes for infrastructure, investments, and equipment endowments granted by local and central public administration, companies, and foreign financial assistance.
- Concessions and structural funds for development.

The companies operating within the industrial park benefit from:

- Various services offered by the park administrator free of charge or with reduced fees.
- Advantageous conditions with regard to location, use of the infrastructure, and communications of the park, with payment in instalments.

Local Councils may grant land tax exemptions for owners of land situated in degraded or polluted areas, but not included in the area of improvement, at taxpayer's request and with the approval of the Ministry of Agriculture and Rural Development and the Ministry of Environment.

Land tax exemptions apply from the first day of the month following approval being obtained.

Other incentives granted to taxpayers

For justified claims of the taxpayers, the tax authorities may grant incentives for the payment of taxes, such as the rescheduling of tax payments due.

Rescheduling of tax payment obligations may be granted by the tax authorities to individuals and legal entities upon request. The time-frame for the rescheduling is a maximum of five years.

In order to benefit from the rescheduling of tax payment obligations, taxpayers must meet certain conditions and also provide a guarantee.

Withholding taxes

Domestic dividend tax

The dividend tax rate for the dividend distribution between Romanian legal entities is 5%. The tax is eliminated if there is a shareholding percentage of a minimum of 10% for an uninterrupted period of at least one year.

WHT for non-residents

The provisions of the Parent-Subsidiary Directive (2011/96) and of the Interest and Royalties Directive (2003/49) as transposed into the domestic fiscal legislation apply only to EU member states, with the member states of the European Free Trade Association (Iceland, Norway, and Lichtenstein) being excluded.

All income obtained by non-residents from Romanian taxpayers for the provision of services rendered in Romania or abroad is subject to 16% WHT rate in Romania.

Non-resident companies not operating through a PE are subject to a 16% WHT on revenue sourced in Romania, such as interest, royalties, revenue from services, commissions, and revenue derived from liquidation of a Romanian legal entity.

The tax rate for dividend revenues derived by non-residents from Romania is 5%.

Certain specific provisions and exceptions apply to non-resident WHT, as follows:

- A 50% WHT applies to payments made by Romanian residents (e.g. dividends, interest, royalties, commissions, services) to non-residents in countries that do not have an exchange of information agreement concluded with Romania, regardless of whether the beneficiary of the income is resident of a state with which Romania has concluded a DTT or not. However, this WHT is applicable only to the extent such payments result from artificial transactions.
- As Romania is an EU member state, the provisions of the Parent-Subsidiary Directive apply. Consequently, dividends paid by Romanian companies to companies resident in one of the EU/EEA member states are exempt from WHT if the dividend beneficiary has held, at the time of distribution, a minimum of 10% of the shares of the Romanian company for an uninterrupted period of at least one year.
- Dividend and interest income obtained from Romania by EEA-registered pension funds is exempt from WHT.
- Romania has implemented the Interest and Royalties Directive. Payments of interest and royalties made by a Romanian company to another company resident in an EU member state are tax exempt from WHT if the non-resident company held, for an uninterrupted period of at least two years, at least 25% of the share capital of the Romanian company prior to the time of payment.

In order to apply EU legislation, non-resident recipients of the income are required to present a certificate of tax residence and a declaration attesting to compliance with the necessary requirements provided by the European Directives.

The Romanian Fiscal Code incorporates the recent amendments to the European Parent-Subsidiary Directive no. 2011/96/EU. The legislation introduces the anti-abuse rule for preventing unlawful tax practices used to obtain tax benefits contrary to the Directive's principles. Also, dividends received by a Romanian legal entity from a foreign legal entity under certain conditions will not be taxed as long as those dividends are not treated as deductible expenses by the paying subsidiary.

The following categories of income derived by non-residents from Romania are exempt from WHT:

- Interest income and income derived from the sale of debt instruments issued by the Romanian authorities (e.g. government bonds).
- Revenue from international transportation and accessory services.
- Prizes obtained by individual non-residents from artistic, cultural, or sport festivals/competitions paid from public funds.
- Income obtained from a partnership constituted in Romania by a non-resident company (the related profits are subject to corporate profit tax).

Measures are in place for the purpose of eliminating the discriminatory treatment applied to non-residents deriving interest revenues and/or revenues from freelancing activities in Romania that are subject to WHT applied to the gross value of the income.

Legal entities/individuals resident in member states of the European Union or the Economic European Area deriving interest revenues and/or revenues from freelancing activities in Romania may opt for the regularisation of the WHT by way of declaring and paying in Romania the corporate income tax/income tax related to the revenues obtained.

The tax withheld and paid is deemed as an advance payment in connection with the corporate income tax/income tax.

The possibility for regularisation of the WHT is only applied in the case of revenues derived from Romania by residents of member states of the European Union or the European Economic Area, provided that a Convention for the Avoidance of Double Taxation or a legal instrument for the exchange of information is concluded between Romania and those states.

Notes

1. The lower rate applies to a participation of at least 25%.
2. The lower rate applies to a participation of at least 10% where the dividends are paid out of profits that have been subject to a normal rate of company tax.
3. The lower interest rate applies if one of the following requirements is fulfilled:
   - The payer or the recipient of the interest is the government of a contracting state itself, a local authority or an administrative-territorial unit thereof, or the Central Bank of a contracting state.
   - The interest is paid in respect of a loan granted, approved, guaranteed, of insured by the government of a contracting state, the Central Bank of a contracting state, or any financial institution owned or controlled by the government of a contracting state.
   - The interest is paid in respect of a loan granted by a bank or any other financial institution (including an insurance company).
   - The interest is paid on a loan made for a period of more than two years.
   - The interest is paid in connection with the sale on credit of any industrial, commercial, or scientific equipment.
4. The lower rate applies to a participation of at least 10%.
5. The treaty concluded with the former Socialist Republic of Yugoslavia (Socialist republic) signed in 1986.
6. The zero rate applies to interest paid by public bodies.
7. The lower rate applies to copyright royalties (excluding films), computer software, patents, and know-how.
8. The 15% withheld at source in Romania on the commission paid to an Egyptian resident shall be given as a credit to be deducted from the income tax charged in Egypt.

9. The lower rate applies to royalties for computer software and industrial, commercial, or scientific equipment.
10. The lower rate applies if and as long as Germany, under its domestic law, does not levy WHT on interest paid to a resident of Romania.
11. The higher rate applies to industrial royalties.
12. The lower rate applies to a participation of at least 40%.
13. The lower rate applies if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
14. The lower rate applies if the recipient is a company that directly owns at least 25% of the capital of the company paying the dividends.
15. The lower rate applies for royalties that consist of payments of any kind received as a consideration for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience, or for the use of, or the right to use, industrial, commercial, or scientific equipment, cinematograph films, or tapes for television or broadcasting. The higher rate applies if the royalties consist of payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work.
16. The lower rate applies if such recipient is the beneficial owner and if such interest is paid:
    - in connection with the sale on credit of any industrial, commercial, or scientific equipment
    - on any loan of whatever kind granted by a bank or other financial institution (including an insurance company)
    - on any loan of whatever kind made for a period of more than two years, or
    - on any debt-claim of whatever kind guaranteed, insured, or directly or indirectly financed by or on behalf of the government of either contracting state.
17. The lower interest rate applies if the royalties are beneficially owned by a resident of a contracting state and refer to the right to use any copyright of literary, artistic, or scientific work, including motion pictures or films, recordings on tape or other media used for radio or television broadcasting, or other means of reproduction or transmission.
18. The lower rate applies to interest paid in connection with the sale on credit of any industrial or scientific equipment, of any merchandise by one enterprise to another enterprise, or on a loan granted by banks.
19. The lower rate applies to interest paid by public bodies.
20. The lower rate applies for cultural royalties; the higher rate applies for industrial royalties.
21. The lower rate applies for interest arising in a contracting state and derived by the government of the other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank of that other contracting state or any financial institution performing functions of a governmental nature, or by any resident of the other Contracting State with respect to debt claims guaranteed or indirectly financed by the government of that other contracting state, including local authorities thereof and administrative-territorial units thereof, the Central Bank of that other contracting state or any financial institution performing functions of a governmental nature.
22. The lower rate applies for royalties related to the right to use any patent, trademark, design or model plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
23. The lower rate applies if the beneficial owner of the dividends is the government of Kuwait or a company in whose capital the government directly or indirectly owns at least 51% and the remaining capital of such company is owned by residents of Kuwait.
24. The lower rate applies if the beneficial owner of the interest is a company, including a bank or a financial institution, that is a resident of Kuwait and in whose capital the government directly or indirectly owns at least 25% and the remaining capital of such company is owned by residents of Kuwait.
25. Interest shall not be taxed in the state where it arises if the indebtedness on which such interest is paid, guaranteed, insured, or financed by the other state or by a financial institution that is a resident of that other state.
26. The lower rate applies for interest to which a resident of Romania is beneficially entitled if the loan or other indebtedness in respect of which the interest is paid is an approved loan or a long-term loan.
27. The lower rate applies for royalties for the use of, or the right to use, any copyright, trademark, design or model, plan, secret formula or process, or for the use of, or the right to use, information concerning industrial, commercial, or scientific experience.
28. 0% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 15% of the gross amount of the dividends in all other cases.
29. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania. Interest paid to a bank or financial institution (including an insurance company) and interest paid on a loan made for a period of more than two years are exempt.
30. The lower rate applies if, and as long as, the Netherlands does not levy a WHT on interest/royalties paid to a resident of Romania.
31. The lower rate applies if the recipient is a company (excluding partnership) and during the part of the paying corporation's taxable year that precedes the date of payment of the dividends and during the whole of its prior taxable year (if any) at least 25% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation.
32. The lower rate applies if such interest is paid:

- in connection with the sale on credit of any industrial, commercial, or scientific machine or equipment, or similar installation
- on any loan of whatever kind granted by a bank, or
- in respect of public issues of bonds, debentures, or similar obligations.

33. 10% of the gross amount of the royalties, where the royalties are paid by an enterprise registered with the Romanian Agency for Development, in the case of Romania and with the Board of Investments, in the case of the Philippines and engaged in preferred pioneer areas of activities; 15% of the gross amount of the royalties, in respect of cinematographic films and tapes for television or broadcasting; 25% of the gross amount of the royalties, in all other cases.
34. As long as Poland does not introduce in its domestic legislation the WHT of commissions paid to non-residents, the provisions of paragraph 2 of Article 13 are not applying and the commissions are taxable only in the residence country of the beneficial owner of the commission.
35. The lower rate applies if the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owns at least 25% of the capital stock (capital social) of the company paying the dividends.
36. The lower rate applies to participations of at least 50%; the 5% rate applies to participations of at least 10%.
37. According to the treaty concluded between Romania and the former Yugoslavia (Federal Republic of). This is applicable in Serbia and Montenegro.
38. The lower rate applies to royalties for the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or industrial, commercial, or scientific equipment, or for information concerning, industrial, commercial, or scientific experience.
39. The lower rate applies if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
40. The lower rate applies if the dividends are beneficially owned by a resident of the other contracting state that is:
    - a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends
    - a pension fund or other similar institution providing pension schemes, or
    - the government of that other state, a political subdivision, local authority, or administrative-territorial unit thereof, or the Central Bank of that other state.
41. The lower rate applies to the extent that such interest is paid:
    - in respect of a loan, debt-claim, or credit that is owed to, or made, provided, guaranteed, or insured by that state or a political subdivision, local authority, administrative-territorial unit, or export financing institution thereof, or
    - by a company to a company of the other contracting state where such company is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital or where both companies are held by a third company that has directly a minimum holding of 25%, both in the capital of the first company and in the capital of the second company.
42. The lower rate applies as long as the Swiss Confederation, in accordance with its domestic legislation, does not levy a WHT on royalties paid to non-residents.
43. The lower rate applies if the company paying the dividends engages in an industrial undertaking and the recipient company, excluding partnership, directly holds at least 25% of the capital of the former company.
44. 10% of the gross amount of the interest if it is received by any financial institution (including an insurance company); 20% of the gross amount of the interest in the case of interest on credit sale; 25% of the gross amount of the interest in other cases.
45. Interest arising in Romania and paid to government of Turkey or to the Central Bank of Turkey shall be exempt from Romanian tax.
46. Interest arising in a contracting state shall be exempt from tax in that state if it is derived and beneficially owned by the government of the other contracting state, a local authority or an administrative-territorial unit thereof, or any agency or bank unit or institution of that government, a local authority or an administrative-territorial unit, or if the debt-claims of a resident of the other contracting state are warranted, insured, or directly or indirectly financed by a financial institution wholly owned by the government of the other contracting state.
47. The lower rate applies for use or lease of any patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific equipment.
48. 0% if the beneficial owner of the dividends is (i) the government of any contracting state or any governmental institutions or entity thereof or (ii) a company that is a resident of either contracting state and the capital of which is directly or indirectly owned (at least 25%) by the government or governmental institutions of either contracting states.
49. Interest arising in Romania and paid to the government of the United Arab Emirates or its financial institutions shall be exempted from Romanian taxes.
50. The lower rate applies for approved industrial royalties.
51. The lower rate applies if the beneficial owner is a company that directly or indirectly controls at least 25% of the voting power in the company paying the dividends.
52. The lower rate applies in the case of royalties received as consideration for the use of, or the right to use, any copyright of literary, dramatic, musical, artistic, or scientific work (including cinematograph films and films or tapes for radio or television broadcasting).
53. If certain conditions are met.

54. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% of the gross amount of the dividends in all other cases.
55. The 0% rate applies for certain government institutions, the 3% rate applies for a participation of at least 15%, and the 5% rate applies to all other cases.
56. If and as long as the Hong Kong Special Administrative Region levies no WHT on interest, the percentage shall be reduced to zero. The competent authority of the Hong Kong Special Administrative Region shall inform the competent authority of Romania of any changes made in the internal legislation of the Hong Kong Special Administrative Region regarding the imposition of a WHT on interest.
57. The lower rate applies to interest arising from credit sale of equipment, merchandise, or services, to loans granted by financial institutions, to a political subdivision, local authority, or administrative-territorial unit, or to any entity wholly or mainly owned by the state; the 3% rate applies in other cases.

In order to apply the provisions of the relevant DTT, the non-resident recipient of the income should provide to the Romanian paying company a tax residency certificate attesting its tax residency for the purpose of the DTT.

If the tax rates prescribed by domestic legislation differ from those prescribed by the DTT, then the most favourable rate will apply. The tax rate applicable to income obtained by a resident of an EU member state in Romania is the most favourable rate provided under either domestic legislation, the EU Directives transposed into domestic legislation, or the DTT.

Tax administration

Taxable period

The fiscal year is the calendar year or the period during which the entity existed if it was set up or ceased to exist during that calendar year.

Taxpayers with a financial year different from the calendar year have the option to align the tax year to the financial year. The first amended tax year will start on 1 January and will end on the last day of the amended tax year.

The period in which a taxpayer has to communicate to the territorial tax bodies the intention of changing the fiscal year period is within 15 days as of the beginning of the new fiscal year.

Tax returns

Taxpayers (except for non-profit organisations and taxpayers deriving most of their income from agriculture) must submit the profit tax returns by the 25th day of the first month following the first, second, and third quarters. The annual profit tax return is due by 25 March of the following year if the fiscal years equals the calendar year; for the cases where the fiscal year is different than the calendar year, the annual profit tax return is due by 25th day of the third month after the end of the company's fiscal year.

Non-profit organisations and taxpayers that obtain income mainly from agricultural activities have to declare and pay annual profit tax by 25 February of the year following the reporting period.

Taxpayers (except those specifically mentioned by law) may opt to declare and pay the annual profit tax by making quarterly advance payments (*see Payment of tax below*). The decision to take this option has to be communicated by 31 January of the fiscal year in which the taxpayer wants to apply the option and it has to be maintained for at least two consecutive years.

Large and medium-sized taxpayers have the obligation to submit fiscal forms online, using the *www.e-guvernare.ro* portal. The electronic signature of the tax returns can only be made using a qualified certificate issued by a legally accredited certification services provider. Other categories of taxpayers may file their tax return electronically as an alternative way of compliance.

Taxpayers required to withhold tax, with the exception of salary payers, are required to submit a statement to the tax authorities regarding the tax withheld for each beneficiary of income. This statement must be submitted for the previous year by the last day of February of the current fiscal year and refers to the tax withheld and paid by Romanian residents on income obtained in Romania by non-resident beneficiaries.

If taxpayers have failed to submit their tax returns, the tax authorities will assess, by way of default, all the tax obligations found in the taxpayer's fiscal liability records for each fiscal period in which tax returns were not submitted.

Payment of tax

Taxpayers (except for banks, non-profit organisations, taxpayers deriving most of their income from agriculture) must pay the quarterly profit tax by the 25th day of the first month following the first, second, and third quarters. The final profit tax payment is generally due on the 25th day of the third month after the end of the company's fiscal year. Banks and branches of foreign banks in Romania are required to apply the system of advance quarterly profit tax payments. Other taxpayers, with some exceptions mentioned by law, may use this system as an alternative reporting and payment procedure.

The anticipated quarterly payments are calculated as a quarter of the previous year's profit tax increased by the consumer price index (CPI) inflation rate, with the payments due by the 25th day of the month following the end of the quarter. The CPI inflation rate is published by Order of the Ministry of Finance by 15 April of the year for which the advance payments are made. For 2018, the CPI inflation rate was 103.1%. If taxpayers incur fiscal losses in the first year of the application of the option, the advance profit tax payments are calculated by applying the profit tax rate to the accounting profit for the period in which tax payments are made in advance.

Non-profit organisations and taxpayers that obtain income mainly from crop production have to pay annual profit tax by 25 February of the following year.

Newly established banks and branches of foreign banks in Romania (i.e. without a previous year history) or those that incurred fiscal losses in the previous year make quarterly advance payments at the level of the amount resulted from applying the profit tax rate on the accounting profit for the period for which the advance payment is made.

For the last quarter of the fiscal year, the deadline for the obligation to declare and make advance payment will be the 25th day of the last month of that fiscal year.

Late-payment penalty

The late-payment interest rate is 0.02% for each day of delay. Subsequent late-payment penalties also apply.

The penalty is set at 0.01% per day of delay. This penalty does not apply to main tax obligations not declared by the taxpayer and is established by a tax inspection authority decision.

A non-declaration penalty is applicable, at 0.08% per day, starting from the day following the due date until the date of payment. This penalty applies to the main tax obligations declared incorrectly or not declared by the taxpayer and is established by a tax inspection authority decision.

Non-resident companies

Non-resident companies deriving income from the sale of real estate located in Romania or from the sale of shares held in a Romanian company (except if participation exemption applies) are subject to a 16% profit tax in Romania and are liable to declare and pay such tax. Non-residents may appoint a tax agent/representative to fulfil this requirement. However, if the buyer is a Romanian company or a Romanian PE of a non-resident company, the obligation to declare and pay the annual profit tax rests with the buyer.

In case of income from sale/transfer of shares held by a non-resident in a Romanian entity, the obligation of the buyer to withhold the tax (in case the buyer is a Romanian entity) has been eliminated.

For capital gains tax declaration and payment, the Romanian legislation requires the following tax returns to be submitted:

- Quarterly statements, starting the 25th day of the month following the quarter in which the non-resident first earned capital gains taxable in Romania.
- An annual profit tax return.

The quarterly statements and annual return must be submitted during the entire period in which the non-resident is registered with the Romanian tax authorities, even if, throughout that period, it no longer carries out transactions generating taxable revenue in Romania.

Tax audit process

Tax inspections can be carried out in respect of all legal persons, irrespective of their organisational structure, that are bound to determine, withhold, and pay taxes, duties, contributions, and other amounts owed to the general consolidated budget.

The tax authorities may not inspect the same taxes for a period previously inspected unless additional data is obtained of which the tax inspectors were unaware when carrying out the first inspection or calculation errors were made.

Prior to the tax inspection commencing, the tax authorities must notify the taxpayer in writing, by sending a tax inspection notice, except in the cases explicitly laid down in the Fiscal Procedural Code.

Tax inspections are generally carried out at the taxpayer's business premises and may not exceed a six-month period in the case of large taxpayers or three months for other taxpayers. For taxpayers that have secondary offices, the tax inspections may not exceed six months. The tax authorities may suspend the tax inspection if they deem it necessary for the clarification of the taxpayer's tax status.

Before finalisation of the tax inspection, the tax authorities are required to inform the taxpayer of their findings and the tax consequences and allow the taxpayer to express its point of view, within three days from the ending of the tax inspection. Upon completion of the tax inspection, the authorities conclude a tax inspection report, based on which the tax assessment is made, which in turn is to be communicated to the taxpayer within 30 days from the ending of the tax inspection.

Statute of limitations

As a general rule, the statute of limitation is five years and it begins to run on 1 July of the year following that for which the tax obligation is for, provided the law does not dispose otherwise. However, the statute can be suspended for the duration of a tax inspection but will recommence after the inspection has been completed.

Topics of focus for tax authorities

Areas of focus during tax audits include:

- VAT reimbursable positions.
- Deductibility of service expenses.
- Transfer pricing.
- Transactions with tax havens.

Other issues

Mergers and acquisitions

Mergers, spin-offs, transfers of assets, and exchanges of shares between two Romanian companies should not trigger capital gains tax.

In the case of a relocation of the registered office of a European Company (SE) and a European Cooperative Society (SCE) from Romania to another EU member state, no tax will apply on the difference between the market value of the transferred assets and liabilities and their fiscal value, provided certain conditions are met. There will also be no tax on such movements at the shareholder level. Therefore, a tax basis step-up may be achieved in the case of Romanian shareholders.

If a Romanian company has a PE in another EU member state, and the Romanian company is dissolved as a result of a cross-border reorganisation, the Romanian tax authorities will not have the right to tax the PE.

There are provisions for the recovery of fiscal losses in the case of restructuring operations carried out by Romanian legal entities and those involving Romanian legal entities and residents of other EU member states. Herewith, the right to recover fiscal losses by legal entities that are successors of merger or spin-off operations is regulated. The recovery is correlated with the assets and liabilities transferred according to the merger/spin-off project. Also, some amendments are provided to the Romanian Company Law simplifying and, in some cases, reducing the time-frame for performing the legal steps that have to be followed in case of mergers and spin-offs.

For taxpayers going through a restructuring process, the right to carry forward non-deductible interest expenses and net foreign exchange losses is split between the beneficiary and the assignor in proportion to the assets and liabilities transferred.

The amendments applicable to domestic mergers, total or partial spin-offs, transfer of assets, and exchange of shares have been harmonised with those applicable to similar cross-border transactions. The neutrality of in-kind contributions to a company's equity has been eliminated, except for cases involving a transfer of a going concern. Transfers carried out during a partial spin-off will not be subject to profit tax only if a transfer of a going concern takes place and the transferor maintains at least one line of activity.

EU state aid investigations

There are no investigations launched by the European Commission on whether Romania granted selective tax advantages to certain companies in the form of state aid.

Measures taken by Romania in respect to base erosion and profit shifting (BEPS)

Anti-hybrid and general anti-avoidance rules (GAAR) related to BEPS Action 2 and Action 6

The Romanian Fiscal Code incorporates the anti-hybrid provisions and the GAAR of the European Directive no. 2011/96/EU, on the common system of taxation applicable in the case of parent companies and subsidiaries of different member states, with its amendments.

The anti-hybrid rule states that income received by a Romanian entity from its qualifying subsidiary will not be tax exempt if such dividend was treated as a deductible expense by the subsidiary.

The GAAR states that member states shall not grant the benefits of the Directive to an arrangement or a series of arrangements that, having been put into place for the main purpose of obtaining a tax advantage that defeats the object or purpose of the Directive, are not genuine, having regard to all relevant facts and circumstances.

Recently, Romania transposed ATAD provisions and introduced a new anti-abuse rule applicable to an arrangement or a series of arrangements that, with regard to all relevant facts and circumstances, are not genuine, having been undertaken for the main purpose of, or having as one of the main purposes, obtaining a tax advantage that defeats the object or purpose of the applicable tax law. Specifically, the above-mentioned arrangements are to be ignored when calculating the tax liabilities attributed to a taxpayer.

Tightened restrictions on interest deductibility related to BEPS Action 4

As of 1 January 2018, the exceeding borrowing costs (calculated as the difference between any debt-related costs, including foreign exchange expenses and capitalised interest, and income from interest and other economically equivalent income) incurred in a fiscal period that exceed the deductible threshold of EUR 200,000 will be deductible for profit tax purposes up to the limit of 10% of the calculation base. The non-deductible exceeding borrowing costs can be carried forward indefinitely. The limitation also applies to any debt-related costs in connection with loans granted by financial institutions.

The calculation base is determined as the gross accounting profit, minus non-taxable revenues, plus exceeding borrowing costs and deductible tax depreciation.

If the calculation base is zero or negative, the exceeding borrowing costs are treated as non-deductible for profit tax purposes during the current tax period, but can be carried forward indefinitely.

The above-mentioned interest deductibility rules also apply to financial institutions, but not to independent entities (i.e. entities that are not part of a consolidated group for financial accounting purposes and do not have related parties and PEs), which can fully deduct exceeding borrowing costs.

The new rules will also apply to interest and foreign exchange losses carried forward from the past and accumulated as at 31 December 2017.

Substance over form requirements related to BEPS Action 5 and Action 6

A definition of a cross-border artificial transaction was introduced since 2016 in the Romanian Fiscal Code as well as the possibility of a cross-border transaction or a group of cross-border transactions being reclassified by the tax authorities so as to reflect their true nature. The Romanian anti-abuse rules in the Romanian Fiscal Code define 'artificial cross-border transaction' as a transaction or series of transactions without economic substance that normally would not be used as part of normal business practices and is intended to avoid tax or obtain tax benefits that otherwise could not be achieved. The anti-abuse rules provide that for such transactions advantage of DTTs cannot be taken.

Also, a 50% WHT rate can apply for income paid in a state with which Romania does not have a legal instrument in place for the exchange of information. Specifically, the 50% rate will apply only in situations where the income is paid as part of a transaction deemed artificial.

Transfer pricing related to BEPS Action 13

Taxpayers engaged in related-party transactions have to prepare and make their transfer pricing documentation file available based on certain materiality thresholds.

Large taxpayers that carry out inter-company transactions equal to or above certain thresholds are required to prepare transfer pricing documentation on an annual basis.

The rest of large taxpayers, and also the small and medium-sized taxpayers that carry out inter-company transactions equal to or above certain limits, have an obligation to prepare transfer pricing documentation where a written request is made by the tax inspector during a tax audit. The deadline for presenting the transfer pricing documentation is between 30 and 60 calendar days. A one-off extension of no more than 30 calendar days is allowed.

The content of the transfer pricing documentation file includes the elements referred to in the latest version of 'Chapter V: Documentation of the OECD Transfer Pricing Guidelines'.

Intergovernmental agreements (IGAs)

A Model 1 IGA is treated as 'in effect' by the United States (US) Treasury as of 2 April 2014.

The Model 1 IGA between the US and Romanian governments was signed on 28 May 2015 in order to improve international tax compliance and to implement the Foreign

Account Tax Compliance Act (FATCA). The agreement will enhance transparency between the two countries in the field of taxation, promote growing cooperation in combating tax evasion practises, simplify implementation of financial information transmission, and increase legal certainty for financial institutions in Romania.

The agreement between Romania and the United States to improve international tax compliance and implementation of FATCA was ratified by the Romanian Parliament and published in the Official Gazette on 30 October 2015.

Common Reporting Standard (CRS)

The status regarding the implementation of the CRS, as developed by the OECD, is the following:

- On 29 October 2014, the Romanian Minister of Finance signed the Declaration to comply with the provisions of the Multilateral Competent Authority Agreement (MCAA) on Automatic Exchange of Financial Account Information.
- On 1 November 2014, the Convention on Mutual Administrative Assistance in Tax Matters was enforced in Romania.
- In April 2016, the Romania government ratified the MCAA.

These two official documents are part of the process of implementing the CRS issued in February 2014 by the OECD.

Based on the MCAA, Romania implemented the first automatic information exchange by September 2017.

In addition, Romania transposed the provisions of Directive 2011/16/EU as amended and supplemented by Directive 2014/107/EU regarding the mandatory automatic exchange of information in the field of taxation. As such, Romania introduced in the national legislation a requirement for financial institutions to implement reporting and due diligence rules, which are fully consistent with the CRS developed by the OECD.

Under the CRS and FATCA, reporting financial institutions (e.g. depositary institutions [banks, credit co-operative organisations, savings and credit banks for housing, mortgage loans banks], custodial institutions, investment entities, and specified insurance companies) are required to report to the tax authorities the following information:

- Identity of the person (name, address, jurisdiction of residence, number/tax identification number [TIN], date and place of birth, if applicable).
- Identity of the entity that is the account holder (name, address, jurisdiction/jurisdiction of residence, number/TIN of the entity and the person(s) controlling the entity, as well as their date and place of birth, etc.).
- The account number, name, and identification number of the reporting financial institution, and information on the account balance or value.
- For deposit accounts, the total gross amount of interest paid or credited to the account during the calendar year.
- For custody accounts, the total gross amount of interest, dividends, or other earnings generated from assets held in the account, as well as the amount of gross revenue from the sale or redemption of financial assets.

Significant developments

Recent significant changes in tax legislation

Taxation of movable property

Under the Russian Tax Code (RTC), all Russian legal entities and permanent establishments (PEs) of foreign legal entities were exempt from tax on movable property recorded as fixed assets since 1 January 2013. However, this tax incentive becomes a regional incentive starting from 2018. Russian taxpayers must check the laws of particular constituent regions before applying the incentive.

Investment deduction

The mechanism of investment deduction was introduced in the RTC. Starting from 2018, taxpayers will choose between using the standard method of depreciation of their fixed assets and deducting investment expenditures directly from the amount of tax within the set limit.

The law grants Russian constituent regions the right to introduce the deduction, and the regions reserve the option to decide whether to exercise that right. In addition, regions determine the categories of fixed assets (and taxpayers) that are or are not eligible for the deduction.

This tax regime is applicable only to newly commissioned (or modernised) assets with a useful life of 3 to 20 years (e.g. buildings, machinery, transport). *Please refer to Depreciation and amortisation in the Deductions section for details.*

Three-tier transfer pricing documentation

A requirement to prepare three-tier transfer pricing documentation for the financial years starting in 2017 has been introduced to the RTC. Thus, multinational groups of companies (MNCs) with a total income (revenue) over 50 billion Russian rubles (RUB) under consolidated financial statements for the previous financial year must submit three-tier documentation to tax authorities, including Master file, Local file, and Country-by-Country (CbC) report, as well as a notification on their membership in an MNC.

Taxes on corporate income

Corporate income tax (CIT)

Russian legal entities pay tax on their worldwide income (credit relief is available for foreign tax paid, up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules).

The maximum CIT rate for all taxpayers in the Russian Federation has been set at 20%. In the period 2017 through 2020, the following allocation proportion applies: 3% of CIT revenues is allocated to the federal budget, whereas 17% is allocated to the budgets of the relevant constituent regions. Individual Russian constituent regions may bring their CIT rates down to 12.5%; thus, the total minimum tax rate may be reduced to 15.5%.

Foreign legal entities (FLEs) pay tax on Russia-source income derived through a PE at 20% and are also subject to withholding tax (WHT) on income from Russian sources not related to a PE (at rates varying from 10% to 20%, depending on the type of income and the method used to calculate it).

Local income taxes

There are no provincial, municipal, or local taxes on income in the Russian Federation.

Corporate residence

FLEs managed from Russia can be recognised as Russian tax residents. Russian tax residency means that the worldwide income of such entities is taxable in Russia.

The tax residency rules set basic and additional criteria for determining the place of management. Moreover, the rules specify those situations that do not affect residency status (e.g. preparation of consolidated financial statements in Russia). Nevertheless, when assessing the risk of a company being deemed a Russian tax resident, it is advisable to evaluate all relevant facts and circumstances, even if the company's activities carried out in Russia would technically qualify for such exemptions.

The rules also specify four situations when a company may be deemed a Russian tax resident only on a willing basis. These situations are when a company is:

- a party to a production sharing agreement (PSA)
- an 'active' foreign holding or sub-holding company (subject to compliance with certain conditions)
- an operator of a new subsea field (or a direct shareholder of such an operator), or
- engaged as its core activity in offering for lease or sublease marine or mixed river-ocean vessels and/or the international transportation of goods, passengers, and their baggage, and providing related services.

Permanent establishment (PE)

A 'permanent establishment' is broadly defined in the RTC as 'a branch, division, office, bureau, agency, or any other place through which a foreign legal entity regularly carries out its business activities in Russia'.

Other taxes

Value-added tax (VAT)

VAT is a federal tax in Russia, which is payable to the federal budget.

There is no separate VAT registration in Russia (with the exception of electronic services). The established general tax registration requirements are applicable to all taxes, including VAT.

Taxpayers follow a 'classical' input-output VAT system, whereby a VAT payer generally accounts for VAT on a full sales price of the transaction and is entitled to recover input VAT incurred on inventory costs and other related business expenses. Although not originally based on the European Union (EU) model, the Russian VAT system has, nonetheless, converged more with it. Currently, however, it still differs from the EU VAT system in various ways.

Output VAT

VAT usually applies to the value of goods, work, services, or property rights supplied in Russia. The standard VAT rate is 18% in Russia (with a lower rate of 10% applicable to certain basic foodstuffs, children's clothing, medicines and medical products, printed publications, etc.). The same VAT rates (as for domestic supplies) apply to imports of goods into Russia.

Exports of goods, international transportation and other services related to the export of goods from Russia, international passenger transportation, and certain other supplies are zero-rated with the right of input VAT recovery. The application of the 0% VAT rate and recovery of relevant input VAT amounts are confirmed by submitting a number of documents to the tax authorities within certain time limits. Recovery of input VAT related to the export of goods (except for exports of raw materials) is performed according to general recovery rules (i.e. prior to submission of confirmation documents to the tax authorities). Special rules are in place for the documentary confirmation of the right to tax export supplies to Customs Union member countries at the 0% VAT rate. Since 1 January 2018, it is possible to waive the application of the 0% VAT rate in respect of export of goods, international transportation, and other services related to the export of goods from Russia and apply the 18% VAT rate.

The list of VAT-exempt goods and services includes basic banking and insurance services, services provided by financial companies (depositaries, brokers, and some others), educational services provided by certified establishments, sales of certain essential medical equipment, passenger transportation, and certain other socially important services. Most accredited offices of FLEs (as well as their accredited employees) may be exempt from VAT on property rental payments. The provision of VAT-exempt supplies does not entail the right to recovery of attributable input VAT. Instead, costs associated with non-recoverable input VAT are, in most cases, deductible for CIT purposes.

A list of services rendered through the Internet or other similar electronic networks by foreign suppliers to Russian individuals are subject to Russian VAT. From 1 January 2019, new changes will be introduced, and these changes will require foreign entities to register for VAT purposes and pay taxes if they provide electronic services to legal entities and individual entrepreneurs. Depending on the particular type of service, either the 18% VAT rate or a VAT exemption may apply. If a foreign supplier is directly involved in settlements for electronic services provided, it would be required to register for tax purposes in Russia and fulfil its Russian VAT obligations (including payment of Russian VAT and filing VAT returns with the tax authorities).

Withholding VAT

The Russian VAT law provides rules for determining where services are supplied in terms of VAT. These rules divide all services into different categories in order to determine where they are deemed to have been supplied for VAT purposes. For example, certain services are deemed to have been supplied where they are performed, whereas some are deemed to have been supplied where the 'buyer' of the services carries out its activity, some where the relevant movable or immovable property is located, and still others where the 'seller' has its place of activity, etc.

Under the reverse-charge mechanism, a Russian buyer must account for VAT on any payment it makes to a non-tax registered foreign company if the payment is connected to the supply of goods or services considered to have been supplied in Russia, based on the VAT place of supply rules, and that do not fall under any VAT exemptions based on domestic VAT law. In such circumstances under the law, the Russian buyer shall act as a tax agent for Russian VAT purposes by withholding Russian VAT at the rate of 18/118 from payments to the foreign supplier and remit such VAT withheld to the Russian budget. The VAT withheld may be recovered by Russian payers in accordance with the standard input VAT recovery rules as provided by law.

Input VAT recovery

Taxpayers are usually eligible to recover input VAT associated with the purchase of goods, work, services, or property rights, provided that they adhere to the set of rules established by VAT legislation. Input VAT can potentially be recovered by the taxpayer in the following cases:

- VAT related to goods, services, or work acquired for the purpose of conducting VATable transactions.
- Input VAT related to advance payments remitted to Russian suppliers of goods (work, services), provided that such acquired goods (work, services) are for use in VATable activities. Please note that taxpayers are entitled (rather than obligated) to apply this rule, and they may choose whether or not to exercise this right.

Effective 1 January 2018, a tax-free system is established in Russia. Foreign individuals are entitled to refund VAT paid upon retail purchase of goods. The refund is available if the amount of purchase is higher than RUB 10,000 and the location where the goods were purchased is included in the special list established by the government.

VAT compliance requirements

Each taxpayer performing VATable supplies of goods, work, services, or property rights must issue VAT invoices and provide them to customers. A taxpayer supplying VATable goods, work, or services to a customer that is not a VAT payer may opt not to issue a VAT invoice if agreed in writing with the customer. VAT invoices must be issued within five days after the supply has occurred. The VAT invoice is a standard form that is established by the government. Compliance with invoicing requirements is crucial for the buyer's ability to recover input VAT.

Incoming and outgoing VAT invoices should usually be registered by taxpayers in special purchases and sales VAT ledgers.

VAT returns must be submitted electronically to the tax authorities on a quarterly basis. VAT must be paid after the end of each quarter in three instalments, no later than the 25th day of each of the three consecutive months following the quarter, except for remittal of VAT withheld by Russian buyers under the reverse-charge mechanism, which is to be remitted on the date of the external payment.

Import VAT

Import VAT is payable to customs upon importation of goods. The tax base for import VAT is generally the customs value of the imported goods, including excise duties. Either the 18% or 10% VAT rate may apply upon import of goods in Russia, depending on the specifics of the goods. Import VAT may generally be claimed for recovery by the importer, provided that the established requirements for such recovery are met.

A limited scope of goods is eligible for exemption from import VAT. The list of such goods includes, for example, certain medical products and goods designated for diplomatic corps. Relief from import VAT is available on certain technological equipment (including their components and spare parts), analogues of which are not produced in Russia. The list of such equipment has been established by the Russian government.

Import duties

Goods imported into the Russian Federation are subject to customs duties. The rate depends on the type of asset and the country of its origin (generally from 0% to 20% of the customs value). There is special relief from customs duties for qualifying goods contributed to the charter capital of Russian companies with foreign investments.

Russia was admitted to the World Trade Organization (WTO) in 2012.

Russia is a member of the Eurasian Economic Union (EAEU) as well (together with Belarus, Kazakhstan, Armenia, and Kyrgyzstan). The Union has a single customs territory, and sales between the member states are exempt from clearance formalities. Members of the EAEU apply unified customs tariffs and customs valuation methodology.

Customs processing fee

Goods transported across the Russian Federation's customs border are subject to a customs processing fee with a flat rate. The fee depends on the customs value of transported goods. The fee is usually insignificant.

Excise duty

Excise taxes are generally paid by producers of excisable products on their domestic supplies. Excise taxes are also charged on imports of excisable goods. Exports of excisable products are generally exempt from excise taxes. Excisable goods include cars, tobacco, alcohol, and certain oil products. Special excise rates for each type of excisable goods are established in the RTC. The rates vary widely and are based on various factors.

Property tax

The maximum property tax rate is 2.2%, and regional legislative bodies have the right to reduce it. Property tax is charged on fixed assets only (including leased out property). Intangible assets, inventories, work-in-progress, and financial assets are not subject to property tax in Russia.

Property tax is not charged on:

- fixed assets included in the first or second depreciation groups (equipment used for up to three years), or
- movable property entered into a company's books as of 1 January 2013 as fixed assets, except for property obtained as a result of:
  - reorganisation or liquidation of legal entities, or
  - transfer or acquisition from related parties.

Starting from 2018, the exemption of movable property is available only in those Russian constituent regions where local legislation allows it. The maximum tax rate applicable to such property in 2018 is 1.1%.

From 2015 through 2034, a zero rate applies to trunk gas pipelines and structures constituting integral parts of such pipelines, as well as gas production project sites and helium production and storage facilities, subject to certain conditions (e.g. initial commissioning after 1 January 2015).

At the same time, the property of natural monopolies, which was previously exempted, is now taxed. The tax rates applicable under the laws of Russia's constituent regions to public railroads, trunk pipelines, power lines, and facilities constituting an integral technical component of the above objects cannot exceed 1.9% in 2018.

In most cases, the average book value of fixed assets is taxed.

Certain real estate properties are taxed based on their cadastral value (which is close to their market value), namely:

- Administrative and business centres.
- Shopping centres and premises therein.
- Offices, retail outlets, public eateries, and consumer facilities.
- Immovable property of foreign entities with no PE in Russia or not related to their operations through a PE in Russia.

The tax rate for such properties may not exceed 2%.

Actual tax rates and special rules for determining the taxable base for certain properties are currently set by individual constituent regions. According to the law of the City of Moscow, the tax rates on such property equal 1.5% in 2018.

Transfer taxes

There are no transfer taxes in Russia.

Transport tax

Transport tax is imposed on certain types of land, water, and air transport registered in Russia. Fixed rates apply (per unit of horsepower, gross tonnage, or unit of transport), which may differ based on engine capacity, gross tonnage, and type of transport. The actual rates in Russia's regions may be subject to a maximum ten-fold increase/reduction by the legislative bodies of individual Russian constituent regions. Reporting and payment rules have been established by regional legislative authorities.

A multiplier (up to three) depends on the age and cost of a car. For example, in the City of Moscow, the tax may be as high as RUB 200,000 per year for the most high-end class of vehicle.

Payroll taxes

There are no payroll taxes in addition to social contributions (*see below*) that an employer is responsible for.

Social contributions

The annual salaries of all employees are taxed under the following rules in 2018:

- Contributions to the Social Insurance Fund: Only the first RUB 815,000 of salary is taxed (at a rate of 2.9%).
- Contributions to the Pension Fund: The first RUB 1,021,000 is taxed at 22%, and the excess is taxed at 10%.
- Contributions to the Medical Insurance Fund: A 5.1% rate applies to the total salary.

Remuneration of foreign nationals temporarily staying in Russia are covered by (i) pension insurance contributions at a rate of 22% within the threshold of RUB 1,021,000 and a 10% top-up charge on remuneration paid in excess of the threshold and (ii) social insurance contributions at a rate of 1.8% within the threshold of RUB 815,000. The only exception made is for highly qualified specialists who hold a relevant work permit.

Mineral Resources Extraction Tax (MRET)

The MRET calculation depends on the type of mineral resource.

The MRET for coal, oil, gas, and gas condensate is calculated using the extracted volume of the relevant resource. The tax rate is established as a fixed rate multiplied by various coefficients linked to world prices and field characteristics. A zero MRET rate applies to oil extracted from greenfields in certain regions of Russia (e.g. Eastern Siberia, internal and territorial waters in the northern polar zone, the Azov and Caspian Seas, and the Nenets and Yamal regions) during their initial production stage.

The MRET on other natural resources depends on the value of the resources extracted. The tax rate varies from 3.8% to 8%. For instance, 3.8% for potassium salt, 4.8% for ferrous metals, 6% for products containing gold, and 8% for non-ferrous metals and diamonds.

Reduced MRET rates apply to investors in Russia's Far East (*see Regional incentives in the Tax credits and incentives section for more details*).

Environmental levy

An environmental fee must be paid by manufacturers and importers of goods to be disposed of after they are no longer fit for use or consumption because of wear and tear, broken down by certain groups of goods. These include paper and paper products, rubber and plastic products, textile and leather, metals, and electronics.

It should be noted that the fee is not technically a tax, and is established by a special law that is not part of the RTC. It is levied on entities operating in specific industries whose products are determined to have an environmental impact that warrants compensation.

The fee is calculated by multiplying three values: (mass/quantity of goods subject to utilisation [or mass of packaging]) * (levy rate) * (utilisation standard in relative units).

The following groups of goods are subject to the highest environmental fee amounts in 2018: rechargeable batteries, computer hardware, consumer electronics, and some types of industrial equipment.

Trade levy

Regional authorities may introduce a trade levy in their respective municipalities (or federal cities). It is to be applied towards assets used in retail and wholesale trade.

To date, the levy has only been enacted by Moscow.

Branch income

FLEs pay tax on profits attributable to a PE. The profits of an FLE's PE are calculated primarily on the same basis as Russian legal entities, including the composition of tax-deductible expenses. Although the RTC does not specifically mention the deductibility of expenses incurred outside of Russia by a foreign corporate head office with respect to its PE in Russia (including a reasonable allocation of administration costs), most double taxation treaties (DTTs) provide for such an option.

Russian tax law has recently been amended to include a special provision on the taxable income of PEs. When determining the taxable income of a PE in Russia, its functions, assets, and economic and commercial risks should be taken into account. This provision does not contain any guidance on specific transfer pricing methods that taxpayers should follow. In addition, court practice regarding this approach has not yet been developed.

If an FLE conducts free-of-charge preparatory and/or auxiliary services for the benefit of third parties, then a PE would be considered to have been formed, and the tax base of such a PE would be calculated as 20% of its expenses related to such activities.

FLEs operating in Russia through a PE must follow the filing and payment schedules established for Russian legal entities. Although they do not make monthly advance payments, they should pay CIT on a quarterly and annual basis.

Income determination

The accounting period in Russia is the calendar year. Different periods are not permitted. The taxable base is calculated on an accrual basis (only small-scale taxpayers are allowed to use a cash basis).

Taxable income is to be calculated following the rules and principles established in the RTC. Taxpayers must maintain tax accounting registers. Statutory accounts may be used for computing tax items for which accounting methods are the same. In practice, most taxpayers use statutory accounts as a basis and apply adjustments so as to arrive at their taxable income.

Inventory valuation

Inventory can be valued using one of the following methods: first in first out (FIFO), average cost, and individual unit cost.

Capital gains

Capital gains are subject to the same 20% CIT rate and are added to ordinary income in order to arrive at the taxable income.

There are two tax baskets for taxpayers performing operations with securities and derivatives: (i) general and (ii) results from operations with non-listed securities and non-listed derivatives. A loss on the second basket cannot be offset with profits on the first basket (however, the opposite offset is possible). It is worth noting that prices charged in transactions with securities and derivatives should be compared with the market price only if a transaction is controlled under transfer pricing rules.

Gains from the sale of fixed assets and other property are equal to the difference between the sale price and their net book value for tax purposes. Losses resulting from the sale of fixed assets should be deducted in equal monthly instalments during the period, defined as the difference between their normative useful life and the actual time of use.

A significant exemption is available for capital gains from the sale or other disposal (including redemption) of shares in Russian entities (interests in Russian entities' charter capital). One of the following conditions must be met in order to apply the 0% tax rate:

1. The shares have been non-listed securities over the entire period of the taxpayer's ownership.
2. The shares are listed securities, and the company issuing shares has been active in the high-tech/innovation sector of the economy over the entire period of the taxpayer's ownership.
3. As of the date of acquisition by the taxpayer, the shares qualified as non-listed securities and, as of the date of their sale by this taxpayer or of another disposal (including redemption) by this taxpayer, they are listed securities in the high-tech/innovative sector of the economy.
4. Real estate in Russia accounts for less than 50% (directly or indirectly) of the total assets of the company issuing shares.

The benefit is available provided that shares have been continuously held by a taxpayer for more than five years for bullets 1 and 4 and more than one year for bullets 2 and 3. One more criteria applies to bullets 1 and 4: shares have to be acquired by a taxpayer after 1 January 2011.

Dividend income

Dividends earned by Russian legal entities from Russian legal entities or FLEs are taxed in Russia at a 13% flat rate.

Dividends earned from 'strategic investments' are exempt from Russian income tax. An investment is considered strategic when:

- the owner (recipient of dividends) owns at least 50% of the capital of the payer of dividends or owns depository receipts entitling it to receive at least 50% of the total amount of dividends paid out, and
- the shares or depository receipts have been owned for at least 365 calendar days on the date the dividends are declared.

Dividends from companies domiciled in offshore zones with preferential tax regimes are not eligible for this tax exemption. The Ministry of Finance maintains a list of offshore zones.

Tax on dividends from abroad withheld in the source country may be credited against Russian tax.

The standard 15% tax rate is applicable to dividends paid by Russian legal entities to FLEs. The tax should be withheld by the Russian legal entity paying dividends. The tax may be reduced based on a relevant DTT, usually to 10% or 5% (*see the Withholding taxes section for more details*).

Interest income

Interest income is taxed on an accrual basis. A standard CIT rate of 20% is applied to interest income, except for interest on government and municipal securities, which are taxed at 0%, 9%, or 15%, depending on the type of security.

The WHT rate on interest income paid abroad equals 20% and may be reduced (typically to zero) under a relevant DTT.

The level of interest income recognised for tax purposes may be subject to control (*see Interest expense in the Deductions section for more details*).

Royalty income

There is no separate tax on royalty income. A standard CIT rate of 20% applies.

Exchange gains and losses

Foreign exchange gains and losses are recognised for tax purposes on an accrual basis only.

Foreign income

Russian legal entities pay tax on their worldwide income. Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Current tax legislation does not contain provisions that allow tax deferral with respect to foreign income.

Deductions

Expenses are deducted on an accrual basis. The main criteria for deductibility of expenses is that the expense is properly documented, aimed at generating income, and not specified in the RTC as non-deductible for tax purposes.

Depreciation and amortisation

Two methods of depreciation are allowed: the straight-line method and the declining-balance method. The useful lifespans of assets for tax purposes are established in the Classification of Fixed Assets, which was approved by the Russian government, for example:

Fixed asset	Useful life (years)
Personal computer	2 to 3
Automobile	3 to 5
Truck (capacity above five tonnes)	7 to 10
Aircraft	10 to 15
Blast furnace	20 to 25

Accelerated depreciation is permitted in respect to some types of property (a special ratio of up to three may be applied). It is prohibited to apply several special coefficients to a normal rate of depreciation.

An upfront premium is allowed, which means that a taxpayer has the right to deduct 10% (or 30% for certain categories of fixed assets) of the cost of fixed assets purchased (or built) in the month when the depreciation started. The balance is depreciated over the useful life of the asset. A premium must be recaptured if a relevant asset is sold within five years of its acquisition (the requirement to recapture has not applied to sales to unrelated parties since 2013).

Intangible assets are amortised over their useful life, or over ten years (two years for certain types of intangible assets) if their useful life cannot be determined.

Starting from 2018, a new tax benefit stimulating the renewal of fixed assets applies. Taxpayers will have a choice to use depreciation or to deduct the cost of investment (cost of fixed assets acquired) directly from CIT. The choice is available in constituent regions where an appropriate law is adopted. Up to 90% of expenses can be deducted from the regional CIT and up to 10% from the federal CIT. Considering this, the amount of regional CIT must be at least 5% of the tax base before applying the deduction. The amount of federal CIT may be reduced to zero. The Russian regions may set a cap on the amount of the deduction. If the amount of investments exceeds the set cap, it may be carried forward for unlimited number of years. The deduction is applicable only to newly commissioned (or modernised) assets with a useful life of 3 to 20 years (e.g. buildings, machinery, transport). Only a few Russian regions have introduced the benefit, as it is associated with a temporary decrease in tax collection. There is no information as to whether the regime will be introduced in Moscow and St. Petersburg.

Goodwill

Under Russian tax law, a mark-up (the difference between the acquisition value and net assets of the business [property complex] purchased) should be recognised as goodwill for tax purposes and may be amortised by a buyer over five years. However, this tax regime often does not apply since a business (subject of a deal) needs to be registered as a property complex with the government authorities. However, sellers almost never do this.

Start-up expenses

Russian tax law does not contain specific provisions on the deductibility of start-up expenses. In some cases, they may not be deducted by either a parent company or a subsidiary for tax purposes.

Interest expenses

The tax authorities can audit interest income and expenses only for transactions that are deemed as controlled under Russian transfer pricing rules (this means transactions with related parties in most cases) and only in accordance with these rules.

The following table shows how the market corridors (safe harbours) are applied to interest accrued:

Debt currency	Type of loan	Safe harbour rates
Russian rubles (RUB)	Ruble-denominated loans between Russian entities	75% to 125% of the Central Bank of Russia (CBR) key rate
	Other ruble-denominated loans	75% to 125% of the CBR key rate
Euros (EUR)	Foreign currency-denominated loans	EURIBOR +4% to EURIBOR +7%
Chinese renminbi (CNY)		SHIBOR +4% to SHIBOR +7%
British pounds (GBP)		LIBOR in GBP +4% to LIBOR in GBP +7%
Swiss francs (CHF) or Japanese yen (JPY)		LIBOR in relevant currency +2% to LIBOR in relevant currency +5%
Other		LIBOR in United States dollars (USD) +4% to LIBOR in USD +7%

The CBR's key rate has been 7.25% since 26 March 2018.

Free-of-charge loans between Russian related parties are not controlled under transfer pricing rules.

Bad debt

Losses in the form of bad debts written off are usually deductible. Companies may create a bad debt provision. The method of accrual for the provision for tax purposes may differ from that in financial accounting, as it is based only on the overdue payment period (i.e. if the delay exceeds 90 days, the full amount of the account receivable is included in the reserve).

A tax deductible bad debt provision can be created only to the extent of the excess of amounts receivable over amounts payable (if any) to the same counterparty.

Charitable contributions

Russian tax law does not provide any benefits with respect to charitable contributions. Such expenses are not deductible for tax purposes.

Research and development (R&D) expenses

R&D expenses (including R&D with a negative result) are deductible within one year after completion. Certain R&D expenses may be deducted using a coefficient of 1.5. The list of R&D categories is determined by the Russian government. A provision for future R&D expenses may be accrued for tax purposes.

Insurance premiums

Expenses related to all types of obligatory insurance are deductible and subject to government tariff limitations, wherever established. Voluntary insurance expenses are deductible to the extent that they relate to the insurance of damage and losses related to certain classes of assets, and the insurance of construction activity risks. Contract liability insurance expenses are deductible to the extent that such insurance is required by an international treaty to which Russia is a party or a generally accepted international trade custom.

Long-term life and pension insurance is deductible within a limit of 12% of the payroll fund. Voluntary medical insurance is deductible within a limit of 6% of the payroll fund.

Fines and penalties

Fines and penalties paid to contractors for violating contractual terms may be deducted for tax purposes.

Fines and penalties paid to a government budget are not deductible.

Taxes

Taxes paid by a taxpayer, as well as social contributions of employers, are deductible for tax purposes. Trade levies are credited against CIT.

Net operating and capital losses

The amount of a recognised loss of prior periods cannot exceed 50% of the current year tax base for CIT purposes. This limitation applies from 2017 through 2020. Starting from 2021, recognition of the entire amount of losses will be possible again.

At the same time, the limitation on carryforward of losses for a ten-year period has been abolished in principle (which means that losses incurred since 2007 may be carried forward until fully recognised).

Carryback of losses is not allowed.

Losses from the sale of fixed assets are recognised evenly during the remaining useful life.

Losses and income from different tax baskets are determined separately (*see Capital gains in the Income determination section for more details*).

Payments to foreign affiliates

There are no special tax provisions with respect to the deductibility of payments to foreign affiliates for services provided. They may be deducted in full if general deductibility criteria are met. Charges with respect to administrative support provided by foreign affiliates may be deductible. However, due care should be taken with regard to the documents used to support the nature and actual receipt of service.

Group taxation

Consolidated taxpayer regime

The consolidated taxpayer regime is available for large Russian corporate groups. A group can comprise two or more Russian entities in which the direct or indirect equity interest of one member in the charter/share capital of the other members equals at least 90%. In order to establish and apply this regime, all group members should meet the following requirements:

- At least RUB 10 billion in total CIT, VAT, excise tax, and MRET paid during the year preceding the year of tax registration of a new consolidated group.
- At least RUB 100 billion in sales proceeds and other income.
- Total value of assets of at least RUB 300 billion.

The advantages of applying this regime are as follows. First, transactions among group member entities are not controllable under Russian transfer pricing legislation (with one exception: transactions with mineral resources subject to MRET with a percentage rate are still subject to control). Second, for the purposes of calculating CIT, it is possible to consolidate group member entities' profits and losses.

A limitation on recognition of losses incurred by loss-making members of a consolidated group has been introduced. The limit is set as 50% of the given consolidated group's tax base for the current (tax) period.

Transfer pricing

Russian transfer pricing legislation is essentially based on Organisation for Economic Co-operation and Development (OECD) principles, with certain important deviations. This legislation establishes criteria for related parties and controlled transactions, transfer pricing methods for determining arm's-length prices/profitability, a list of permitted information sources, and compliance requirements.

According to the Base Erosion and Profit Shifting (BEPS) Action 13 report, Russia has implemented three-tier transfer pricing documentation. The requirement is applicable to financial years starting in 2017. Thus, MNCs with a total income (revenue) over RUB 50 billion under consolidated financial statements for the previous financial year must submit three-tier documentation to tax authorities, including Master file, Local file, and CbC report, as well as a notification on their membership in an MNC.

Advanced pricing agreements (APAs), including bilateral APAs, are available to Russian companies registered as 'largest' taxpayers.

Thin capitalisation

Under the RTC, interests are deductible if the debt does not exceed the amount of equity by three times (12.5 times for banks and leasing companies). If the debt amount exceeds this limit, excess interest will be reclassified for taxation purposes as dividends paid to foreign shareholders. Such dividends are not deductible for CIT purposes and are subject to WHT at the rate of 15% (treaty benefits may apply to reduce the rate).

Three types of Russian borrowers' debt are subject to thin capitalisation rules (with some exceptions provided):

- Debt to a foreign-related party if such a party has a direct or indirect equity interest in the borrower ('Party 1').
- Debt to a party related to Party 1 ('Party 2').
- Debt to another party if either Party 1 or Party 2 guaranteed the debt.

For debt from Party 1, the relationship would be defined based on the transfer pricing rules (in particular, the 25% participation criterion is applied).

The scope of thin capitalisation rules includes loans from foreign-related companies that do not hold a direct or indirect interest in Russian borrower (foreign 'sister' companies). At the same time, interest on loans from independent banks are exempted from the rules (provided the debt [both principal and interest] was not repaid by a foreign shareholder or its affiliates as a result of execution of a guarantee to the bank).

Among other features:

- Loans provided exclusively within Russia are not controlled (provided certain requirements are met).
- All listed liabilities of a taxpayer should be considered in aggregate (so the split of loans will not allow for avoiding the rules).
- A debt arising upon the issue of Eurobonds is not subject to the rules.

Controlled foreign companies (CFCs)

Under the Russian CFC rules, the retained earnings of a CFC that is controlled by a Russian tax resident are taxable in Russia on an annual basis (at the 20% CIT rate if the controlling person is a legal entity Russian tax resident, or at the 13% tax rate if the controlling person is an individual Russian tax resident).

Definition of a CFC

An entity is deemed to be a CFC (or other structure) if it meets the following criteria:

- it is not considered to be a Russian resident for tax purposes, but
- it is controlled by a Russian tax resident (control is determined based on ownership share and other metrics as outlined below).

A controlling person of a foreign company is defined as:

- a person whose direct and/or indirect participating interest in a foreign company (for individuals, jointly with their spouse and minor children) is more than 25%, or
- a person who directly or indirectly owns more than 10% of a foreign company if Russian tax residents (for individuals, jointly with their spouses and minor children) hold a direct or indirect interest(s) in the foreign company in excess of 50%.

The definition of 'control' is rather broad and thus could be construed to mean that control exists even when the percentage of a shareholding (interest) is less than the thresholds noted above. For example, the CFC Law stipulates that control may exist based on a management agreement or other means of control. Control may be established directly or indirectly. The existence of control should be determined on a case-by-case basis.

Available CFC exemptions

The CFC Law provides that profits earned by the following types of companies (or other structures) are exempt from CFC taxation in Russia:

- Non-profit organisations that do not distribute profits.
- Companies incorporated in the Eurasian Economic Union.
- Companies resident in jurisdictions that have a tax treaty with Russia and share tax-related information with Russia, and that pay tax at an effective rate equal to at least 75% of the Russian blended CIT rate.
- Companies that qualify as 'active companies' as defined by the CFC Law (i.e. companies deriving less than 20% of their total income from passive sources, such as dividends, royalties, interest, rental/lease income, capital gains, consulting fees, and certain other types of income).
- Active foreign holding companies or active foreign sub-holding companies (a share of direct participation of at least 75% during a period of at least 365 calendar days, where passive income [except active dividend income] does not exceed 5% of total income).
- Banks and insurance companies if they operate in a jurisdiction that has a tax treaty with Russia and shares tax-related information with Russia.
- Issuers of certain types of listed bonds or an organisation authorised to earn interest income payable on listed bonds, or an organisation that is the assignee of the rights and obligations related to listed bonds issued by another foreign company, subject to certain conditions (e.g. if the interest income earned should equal at least 90% of the company's total income for the period and these issuers operate in a jurisdiction that has a tax treaty with Russia and shares tax-related information with Russia).
- Companies participating in a PSA, concession agreement, or similar contract signed with the government of the relevant country, provided that the relevant income amounts to at least 90% of the company's total income for the period.
- Operators of new subsea fields (or direct shareholders of such operators).

In addition, *de minimis* exemptions from the CFC rules are available for profits below RUB 10 million for 2017 onwards.

These exemptions may be applied by Russian controlling parties when calculating their taxable base in Russia. If such an exemption is applicable, then a CFC's profits should not be included in the taxable base of its controlling party in Russia.

Calculating taxable profits

The taxable profits of a CFC are calculated using one of the following two methods:

- If the CFC is incorporated in a jurisdiction that has a tax treaty with Russia and shares tax-related information with Russia, then its profits are calculated based on its financial statements prepared in accordance with the laws of its home jurisdiction (provided that the financial statements are subject to audit).
- Profits are calculated in accordance with the requirements of the RTC. This method is more burdensome and likely to result in a higher Russian tax bill in most cases, as the RTC imposes a number of strict conditions on the tax deductibility of expenses.

A CFC's taxable profits may be reduced by the amount of dividends paid out of such profits during the tax year in which they were generated (interim dividends) and the subsequent 12 months.

Losses incurred by a CFC may be carried forward without any time limitations (subject to certain restrictions). Losses incurred by a CFC before 1 January 2015 may be carried forward up to the amount of losses for the three financial years preceding 1 January 2015 and may be deducted from the CFC's profit.

Relief from foreign taxes

Foreign taxes paid on the profits of a CFC, either under Russian law or the laws of a foreign jurisdiction, may be offset against the Russian tax liabilities charged on the CFC's attributed profits.

Implications for affected entities

If none of the available exemptions may be applied, the CFC's chargeable profits must be apportioned among the relevant Russian controlling persons in proportion to their interest(s) in the CFC, and such persons should be taxed on their portion(s) at the applicable rate. However, the Russian CFC rules have no implications for the CFC itself.

Tax credits and incentives

At present, there are several types of incentives in Russia:

- Regional incentives granted by regional or local authorities with respect to taxes paid to their budgets.
- Special tax regimes in special economic zones (SEZs).
- Regional investment projects and special investment contracts.
- Advanced Development Zones (ADZs).
- The free port of Vladivostok.
- Incentives related to certain activities (e.g. R&D and information technology [IT] related activities).
- Incentives related to specific projects (e.g. Skolkovo, 2018 FIFA World Cup).

The incentives are briefly described below.

Also note that Russian tax law provides for special tax regimes to support small and medium-sized enterprises (SMEs). These include unified and simplified tax regimes, as well as a unified agricultural tax.

Regional incentives

Many industrial regions of Russia offer numerous tax and non-tax incentives and benefits to investors.

Regional incentives in the form of reduced tax rates (primarily the given region's portion of CIT, property tax, and transport tax) are granted to certain classes of taxpayers, typically large investors or entities operating in specific industries. Local land tax incentives are frequently available for such investors as well. The size of an entry investment is usually in the range of around RUB 50 million to RUB 150 million. Some regions require a lesser amount, and some do not require any minimal amount at all (it is subject to negotiation).

There are also several notable non-tax incentives, including the allocation of budget subsidies, partial compensation of capital expenditures, provision of guarantees to banks, simplified access to infrastructure facilities, lower rental charges, and administrative and legal support, among others.

Special economic zones (SEZs)

The following types of SEZs have been established in Russia:

- Industrial zones.
- Technical research and implementation zones for scientific projects.
- Tourism and recreation zones for the development and effective use of Russia's wealth of tourist attractions.
- Port zones.

The minimum amount of investment to be eligible for such incentives are:

- RUB 120 million. The investment of RUB 40 million should be made within the first three years from the date of obtaining resident status for residents of industrial zones.
- RUB 400 million within three years from the date of obtaining resident status in a port zone in cases of port facilities construction (RUB 120 million in case of reconstruction).

Moreover, most regions provide their own incentives with respect to CIT and transport tax.

In addition, reduced social contribution rates are available for residents of industrial zones if they are engaged in R&D.

Residents of SEZs may also enjoy free customs zones.

Advanced Development Zones (ADZs)

ADZs have been initially established to develop the Russian Far East. Currently, ADZs are expanded to some other Russian regions such as ADZs in Republic Komi, Smolensk region, etc. ADZs offer special terms for companies operating in various industries (e.g. agriculture, textiles, chemicals, pharmaceuticals, furniture, telecommunications, education, science and technology, etc.), including CIT and property tax incentives, free customs zones, project financing, and simplified rules for hiring foreign employees. In particular, residents of ADZs are provided with the following tax incentives:

- Zero rate on the federal portion of CIT for a five-year period.
- Reduced regional portion of CIT (not more than 5% during the first five years of profitable sales and at least 10% during the subsequent five years). Specific rates are established by regional law.
- Reduced social contributions (7.6% instead of the standard 30%) during a ten-year period.

Free port Vladivostok

Residents of the port enjoy the following tax incentives:

- Zero rate on the federal portion of CIT for a five-year period.
- Reduced regional portion of CIT (not more than 5% during the first five years of profitable sales and at least 10% during the subsequent five years). Specific rates are established by regional law.

- Reduced social contributions (7.6% instead of the standard 30%) during a ten-year period.

Activities incentives

The following 'activities' incentives are available to taxpayers in Russia:

- Reduced CIT rate for IT companies in several regions.
- Certain R&D services are exempt from VAT.
- Certain R&D service-related expenses, as listed by the government, are deductible using a coefficient of 1.5.
- Fixed assets used in science and technology may be depreciated with an accelerated coefficient of up to 3.
- Reduced rates for contribution payments to social funds are established for IT companies.

Special project incentives

Participants in the Skolkovo Innovation Centre enjoy a number of benefits, the main ones of which are: exemption from CIT and property tax, as well as from VAT liability, and reduced rates for mandatory social fund contributions.

The same approach is applicable to the *Fédération Internationale de Football Association* (FIFA) and its contractors.

Regional investment projects and special investment contracts

Incentives related to specific projects are not limited to Skolkovo and the 2018 FIFA World Cup. In addition to these projects, there are two types of contracts that may be concluded directly with the Russian Federation: a special investment contract and a regional investment project. Investors who have concluded such contracts may enjoy a reduced CIT rate and a number of non-tax incentives, including privileges regarding rental payment for land plots, 'grandfather' clauses, etc.

Foreign tax credit

Credit relief is available for foreign taxes paid up to the amount of the Russian tax liability that would have been due on the same amount under Russian rules.

Withholding taxes

Under the general provisions of the RTC, income earned by an FLE and not attributed to a PE in Russia is subject to WHT in Russia (to be withheld at source). WHT rates are as follows:

- 15% on dividends and income from participation in Russian enterprises with foreign investments.
- 10% on freight income.
- 20% on certain other income from Russian sources, including royalties and interest.
- 20% of revenue or 20% of the margin on capital gains (from the sale of immovable property in Russia or non-listed shares in Russian subsidiaries where the immovable property in Russia accounts for more than 50% of assets).

Taxation of margins (rather than gross income received from the types of sales listed above) may be applied only if expenses are properly documented.

Income of foreign organisations (not performing activities in Russia through a PE) from the sale of certain listed securities of Russian entities (and their derivatives) is not regarded as income derived from sources in Russia subject to WHT.

The list of exempt income (not subject to WHT) also includes: (i) interest payments on Russian government securities; (ii) interest payments on tradable bonds, issued in accordance with the laws of foreign countries; and (iii) payments made by Russian companies to finance coupons on Eurobonds issued by special purpose vehicles (SPVs) incorporated outside of Russia.

Tax should be withheld by the tax agent and paid to the Russian budget. WHT rates may be reduced under a relevant DTT, provisions of which may be applied based on confirmation of tax residency, which is to be provided by a foreign company to the Russian tax agent prior to the payment date (no advance permission from the Russian tax authorities is required) and also as long as general conditions are fulfilled (proof of beneficial ownership, etc.).

The Russian tax authorities recognise the terms of treaties concluded by the Union of Soviet Socialist Republics (USSR) until they are renegotiated by the Russian government. Furthermore, the list of effective tax treaties is continuously updated.

Concept of 'beneficial ownership'

The concept of the actual owner of income (i.e. the 'beneficial owner') was introduced into Russian tax legislation by the so-called "Deoffshorisation" Law. It determines the ability to apply lower tax rates under a DTT.

There is not any test on beneficial ownership in the Russian tax legislation, which means that Russian tax agents cannot be entirely comfortable applying reduced tax rates on income paid abroad. In making any payments, they need to consider the risk of additional tax and penalties to be paid at their own expense.

According to the law, a tax agent has to request confirmation that a foreign entity is a beneficial owner of income. If the actual beneficial owner is known, the tax agent may apply the 'look through' approach (to use a treaty with the country where this beneficial owner resides).

If the beneficial owner is a Russian tax resident, the income paid is taxed under the RTC rules (note that a zero tax rate on dividends applies under special criteria).

Treaty rates

The list below indicates the WHT rates mentioned in treaties.

	WHT (%)			
Recipient	**Dividends**	**Interest (1)**	**Royalties**	**Construction site duration before creation of PE (months)**
Non-treaty	15	20	20	
Treaty:				
Albania/Russia	10	10	10	12
Algeria/Russia	5 (2)/15	0/15	15	6 months and an aggregated period of more than 3 months in any 12-month period for furnishing services
Argentina/Russia	10 (2)/15	0/15	15	6
Armenia/Russia	5 (2)/10	0/10	0	12

Recipient	WHT (%) Dividends	Interest (1)	Royalties	Construction site duration before creation of PE (months)
Australia/Russia	5 (3)/15	10	10	12
Austria/Russia	5 (4)/15	0	0	12
Azerbaijan/Russia	10	0/10	10	12
Belarus/Russia	15	0/10	10	No special provisions in the relevant DTT; local tax legislation provisions should apply
Belgium/Russia	10	0/10	0	12
Botswana/Russia	5 (2)/10	0/10	10	6
Brazil/Russia	10 (5)/15	0/15	15	9
Bulgaria/Russia	15	0/15	15	12
Canada/Russia	10 (6)/15	0/10	0 (7)/10	12
Chile/Russia	5 (2)/10	15	5 (8)/10	6
China/Russia	5 (9)/10	0	6	18
Croatia/Russia	5 (10)/10	10	10	12
Cuba/Russia	5 (11)/15	0/10	0 (12)/5	12
Cyprus/Russia	5 (13)/10	0	0	12

Notes

1. In most cases, a 0% tax rate applies to interest payments to the governments of contracting states and to payments guaranteed by the government.
2. If the beneficial owner of the dividends directly holds at least 25% of the capital of the company paying the dividends.
3. If the following conditions are met:
   - Dividends are paid to a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
   - The resident of the other contracting state has invested a minimum of 700,000 Australian dollars (AUD), or an equivalent amount in Russian rubles, in the capital of that company.
   - If the dividends are paid by a company that is resident in Russia, the dividends are exempt from Australian tax.
4. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends and the participation exceeds USD 100,000 or an equivalent amount in any other currency.
5. If the beneficial owner directly holds at least 20% of the total capital of the company paying the dividends.
6. If the beneficial owner of the dividends is a company that owns at least 10% of the voting stock (or in the case of Russia, if there is no voting stock, at least 10% of the statutory capital) of the company paying the dividends.
7. 0% WHT is applied to the following types of Royalties:
   - Royalties for the production or reproduction of any literary, dramatic, musical, or other artistic work (but not including royalties for motion picture films or works on film or videotape or other means of reproduction for use in connection with television broadcasting).
   - Royalties for the use of, or the right to use, computer software.
   - Royalties paid to an unrelated party for the use of, or the right to use, any patent or any information concerning industrial, commercial, or scientific experience.
8. For the use of any industrial, commercial, or scientific equipment.
9. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and this holding amounts to at least EUR 80,000 or its equivalent in any other currency.
10. If the beneficial owner of the dividends is a company that directly holds at least 25% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
11. If the beneficial owner of the dividends is a company (excluding partnerships) that directly holds at least 25% of the capital of the company paying the dividends.
12. Royalties paid for copyrights and other similar remuneration for the production of a literary, dramatic, musical, or artistic work.
13. If the beneficial owner of the dividends has directly invested in the capital of the company not less than EUR 100,000 or its equivalent in another currency.
14. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends, and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currencies of the contracting states at the moment when the dividends become due and payable.
15. If the following conditions are met:
    a. Where the beneficial owner of the dividends has invested in the company paying the dividends, irrespective of the form or the nature of such investments, a total value of at least 500,000 French francs (FF) or the equivalent in another currency; as the value of each investment is appreciated as of the date it is made.

b. Where that beneficial owner is a company that is liable to tax on profits under the general tax laws of the contracting state of which it is a resident and which is exempt from such tax in respect of such dividends.

16. If only one of the conditions of 15(a) or 15(b) are met.
17. If the beneficial owner of the dividends is a company that directly holds at least 10% of the basic or common stock of the company paying the dividends and such capital share amounts to at least EUR 80,000 or the equivalent value in rubles.
18. The 0% rate applies to income paid to governmental agencies or governmental financial institutions (to pension funds in case of Switzerland as well).
19. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends.
20. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and the foreign capital invested exceeds USD 100,000 or its equivalent in the national currency of the contracting state.
21. If the beneficial owner of the dividends is a company that directly holds at least 10% of the capital of the company paying the dividends (this share should be at least USD 100,000 or its equivalent in another currency).
22. The new treaty replaces the old treaty of 1986. We expect that the new treaty will be ratified in 2018, and it will take effect from 2019.
23. If the beneficial owner of the dividends is a company that has directly owned at least 15% of the voting power of the company paying the dividends for the period of 365 days ending on the date on which entitlement to the dividends is determined.
24. Notwithstanding the provisions of paragraphs 2 and 3 of this Article, dividends derived by a resident of a contracting state from shares of a company or comparable interests, such as interests in a partnership, trust, or investment fund, may be taxed in the other contracting state according to the laws of that other contracting state if, at any time during the 365 days preceding the payment of the dividends, these shares of comparable interests derived at least 50% of their value directly or indirectly from immovable property referred to in Article 6 of this Convention and situated in that other contracting state. The tax so charged shall not exceed 15% of the gross amount of the dividends.
25. Notwithstanding the provisions of paragraph 1 of this Article, interest arising in a contracting state that is determined by reference to receipts, sales, income, profits, or other cash flow of the debtor or a related person, to any change in the value of any property of the debtor or a related person or to any dividend, partnership distribution, or similar payment made by the debtor or a related person, or any other interest similar to such interest arising in a contracting state, may be taxed in that contracting state according to the laws of that contracting state, but if the beneficial owner of the interest is a resident of the other contracting state, the tax so charged shall not exceed 10% of the gross amount of the interest.
26. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 30% of the capital of the company paying the dividends and invests not less than USD 100,000 or the equivalent in local currencies to the company paying the dividends.
27. If the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of a company paying dividends and the capital invested exceeds USD 75,000.
28. Applicable to interbank loans only.
29. If the beneficial owner of the dividends directly holds at least 10% of the capital in the company paying the dividends and the investment exceeds EUR 80,000 or its equivalent in rubles.
30. Any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
31. Cinematograph films or tapes for radio or television broadcasting, any copyright of literary or artistic work.
32. If the invested amount equals or exceeds FF 1 million.
33. 5% where the participation interest is at least 20% (if the owner is not a partnership) and the investment exceeds EUR 100,000; 10% in all other cases.
34. If the beneficial owner of the dividends has invested in the capital of the company paying dividends of more than USD 500,000.
35. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the share capital of the company paying the dividends and has directly invested in the equity share capital of that company not less than the equivalent of USD 100,000.
36. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends and has invested in it at least 75,000 European Currency Units (ECU) or its equivalent in the national currencies of the contracting states.
37. If the beneficial owner of the dividends is a company that, for an uninterrupted period of two years prior to the payment of the dividends, directly owned at least 25% of the capital of the company paying the dividends.
38. If the beneficial owner of the dividends is a company that directly holds at least 15% of the capital of the company paying the dividends.
39. If residents of the other contracting state hold at least 30% of the capital of the company paying the dividends and have directly invested in the equity share capital (authorised fund) of that company an amount of not less than USD 100,000 or its equivalent in the currency of the first state.
40. If the following conditions are met:

   a. The beneficial owner of the dividends is a company (other than a partnership) that has invested at least ECU 100,000 or its equivalent in any other currency in the capital of the company paying the dividends.
   b. Those dividends are exempt from tax in the other contracting state.
41. If only one of the conditions of 40(a) or 40(b) are met.
42. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 10% of the share capital of the company paying the dividends (except for investment fund paying the dividends) and such capital share amounts to at least EUR 80,000 or the equivalent value in any other currency at the moment of actual distribution of dividends.
43. If the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends and the foreign capital invested exceeds 200,000 Swiss francs (CHF) or its equivalent in any other currency at the moment when the dividends become due.
44. Cinematography films, programmes, and recordings for radio or television broadcasting.
45. Any copyright of literary, artistic, or scientific work.
46. Any patent, trademark, design or model, plan, secret formula or process, any computer software programme, or for information concerning industrial, commercial, or scientific experience.
47. If a resident of the other contracting state has invested in its joint-stock capital (registered fund) at least USD 50,000 or its equivalent in the national currencies of the contracting states.
48. In the case of banks.
49. In the case of fees for technical assistance.
50. If the residents of the other contracting state have directly invested in the equity share capital of that company not less than USD 10 million.

Tax administration

All taxpayers are required to obtain tax registration and be assigned a taxpayer identification number, irrespective of whether their activities are subject to Russian taxation.

Taxable period

The taxable period runs from 1 January to 31 December.

Tax returns

An annual CIT return must be filed by 28 March of the year following the end of the reporting year.

Payment of tax

Companies pay advance CIT payments on a monthly or quarterly basis. The final payment for the year is due by 28 March of the following year.

Tax audit process

Tax dispute resolution at the pre-trial (administrative) stage

Tax disputes happen quite frequently in Russia. Most corporate taxpayers have to go through the tax litigation process at least once while doing business in the country.

At present, if taxpayers seek to challenge decisions and other documents/actions (or failure to act) of the tax authorities in court, before going to court, they must first contest such decisions/actions with the relevant higher tax office.

In recent times, tax disputes have been increasingly resolved at the pre-trial (administrative, superior tax office) stage. However, taxpayers cannot formally negotiate tax audit results or enter into formal settlement agreements with the tax authorities at the pre-trial stage. So, in many cases, they still must litigate in order to uphold their rights.

Tax dispute resolution in court

Taxpayers can file claims against the tax authorities through *arbitrazh* courts (i.e. courts that review and resolve economic disputes mainly among legal entities/entrepreneurs or between legal entities/entrepreneurs and state authorities, including the tax authorities). Claims may be filed with a court within three months after a contested decision takes effect or within three months after a taxpayer discovers that its rights have been violated (provided that the taxpayer has already sought redress through the mandatory pre-trial stage mentioned above).

Courts of the first instance (first level) initially review disputes and issue decisions. Decisions of a first instance court can be appealed to appellate courts (second instance or level) and *cassational* courts (third instance or level). If litigation goes through all three instances (levels), the process usually takes up to a year.

Resolutions/decisions of courts at these three levels may be appealed to the Russian Federation Supreme Court (as a supervisory authority). However, in practice, very few such disputes are actually heard by the Supreme Court.

Statute of limitations

The statute of limitations is established for three years. For example, tax authorities may examine 2017, 2016, and 2015 CIT returns by conducting a site tax audit in 2018.

Topics of focus for tax authorities

The recent court practice demonstrates that tax authorities concentrate on (i) tax evasion schemes and relationships with one-day contractors, (ii) financing structures and thin capitalisation rules, and (iii) passive income (e.g. interests, dividends, royalties) paid abroad.

Other issues

Common Reporting Standard (CRS) in Russia

Russia adopted Common Reporting Standard (CRS) legislation at the end of 2017. It enables Russian tax authorities to obtain information on financial accounts held by Russian tax resident individuals and companies from the tax authorities of the partner countries. The list of such partner countries is available on the OECD website:

www.oecd.org/tax/automatic-exchange/international-framework-for-the-crs/exchange-relationships

Russian tax authorities will provide similar information about foreign tax residents to partner countries. The exchange of information will occur annually. The first exchange is expected at the end of 2018.

Significant developments

A new income tax law, Law no. 16/2018, was gazetted on 16 April 2018, repealing Law no. 16/2005 of 18/08/2005 on direct income tax and all prior legal provisions, including the Commissioner General's rules and Ministerial orders contrary to this law. In the new law, a number of amendments were made. The more significant updates to the law relate to taxation of capital gains derived from sale or transfer of shares, the base and tax point for withholding taxes (WHTs), transfer pricing requirements, and inclusion of more anti-avoidance provisions.

Taxes on corporate income

Rwanda operates both a source and residence-based taxation system. This means that any income that is deemed to be from sources within Rwanda will be liable to tax in Rwanda. In addition, resident entities are taxed on their worldwide income. However, where such income is taxed in another country, a tax credit is allowed, which does not exceed the tax that would have been payable on the same income in Rwanda.

Non-resident entities are taxed on income sourced in Rwanda through a permanent establishment (PE).

The standard corporate income tax (CIT) rate is 30%. However, micro-enterprise companies (with turnover of less than 12 million Rwanda francs [RWF] in a tax period) pay flat tax amounts, and small businesses (whose turnover is between RWF 12 million and RWF 20 million in a tax period) pay a lump sum tax at the rate of 3% of turnover.

Special CIT regimes

There are special CIT rates for certain industries or sectors of the economy.

Newly listed companies on capital markets are taxed as follows for a period of five years:

- If a company sells at least 20% of their shares to the public, the CIT rate is 28%.
- If a company sells at least 30% of their shares to the public, the CIT rate is 25%.
- If a company sells at least 40% of their shares to the public, the CIT rate is 20%.

Companies and cooperatives that carry out micro-finance activities, approved by competent authorities, pay CIT at the rate of 0% for a period of five years from the time of their approval.

Registered investors in priority sectors can enjoy reduced CIT rates and tax holidays where certain conditions and thresholds are fulfilled. *See the Tax credits and incentives section for more information*.

Local income taxes

Rwandan legislation does not provide for any provincial or local taxes on income.

Corporate residence

Rwanda incorporated companies or associations are treated as Rwanda resident entities. In addition, companies incorporated overseas are also treated as Rwandan resident companies if they have a place of effective management in Rwanda at any time during the tax period. The term 'effective management' is not defined in the tax law.

Rwandan government companies are also considered to be residents in Rwanda.

Permanent establishment (PE)

The definition of a PE for Rwanda is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition. According to Rwandan tax law, a PE means a fixed place of business through which the business of a person is wholly or partially carried on.

For non-resident companies, CIT liability will arise if they have a PE in Rwanda through which a trade is carried on. The profits attributable to the PE will be taxed in Rwanda. However, there are no rules or guidance on how the PE's profit should be evaluated for Rwanda tax purposes. The general understanding is that entities are required to use transfer pricing methods to determine the level of profits that should be attributable to the PE based on the functions it performs.

In particular, the existence of the following triggers a PE:

- A place of management.
- A branch.
- A factory or workshop.
- A mine, quarry, or any other place for the exploitation of natural resources.
- A site set for construction, construction site, or a place where supervision or assembly works are carried out.
- A place of provision of services, including consulting services, carried on by a person, with the support of employees or other personnel, for more than 90 days in a 12-month period, either continuously or intermittently.

There are a number of specific exceptions from the definition of a PE. A person is deemed not to have a PE if that person:

a. uses facilities solely for the purpose of storage of goods or merchandise belonging to that person
b. maintains a stock of goods or merchandise belonging to that person solely for the purpose of storage
c. maintains a stock of goods or merchandise belonging to that person solely for the purpose of processing by another person
d. has a place of operation aimed purposely at purchasing goods or merchandise or at collecting information related to one's business, or

e. has a place of operation solely for the purpose of performing, within the context of one's activities, any other activities of a preparatory nature or intended to make them more effective.

Where a person, except an independent person (i.e. agent) concerned with (e) above, acts on behalf of another person (i.e. principal), and the agent has capacity to make contracts in the name of the principal, the principal is considered as owning a PE in respect of activities one's agent undertakes except if such activities of the agent are limited to those mentioned in (a) to (e) above.

However, a person is not considered as having a PE if one carries out activities through a broker, general commission agent, or any other private agent in accordance with procedures of the ordinary course of the activities of such an agent.

A company that controls or is controlled by another company does not, of itself, constitute either company to be a PE of the other.

Other taxes

Value-added tax (VAT)

VAT is levied on the supply of taxable goods and services in Rwanda as well as on the importation of taxable goods and services into Rwanda.

The threshold for VAT registration is taxable turnover of RWF 20 million in any relevant year or RWF 5 million in a calendar quarter.

The standard VAT rate is 18% and applies to goods and services that are neither exempt from VAT nor zero-rated.

Exports of goods and services are subject to VAT at 0%. Supplies to privileged persons, such as goods imported for official purposes of diplomatic missions, supplies made under special arrangements between the government of Rwanda and donors, and supplies or importation made under special technical aid agreements, are subject to VAT at 0%. Persons entitled to zero rating of goods or supplies received by them are required to pay VAT at the time of receiving the supply and then apply for a refund of the VAT paid.

Some supplies are exempt from VAT, the main categories being supply of water service, goods and services for health purposes, educational materials and services, transport services, books and newspapers, financial and insurance services, lending or leasing interests in land or building for residential purposes, funeral services, energy supplies, all unprocessed agricultural and livestock products, mobile handsets, and equipment for information, communication, and technology.

Suppliers who provide zero-rated services or goods are entitled to recover input VAT incurred in making the supply. This is unlike exempt supplies, where input VAT recovery is not allowed. Therefore, zero rating is preferable to exemption.

The VAT returns and relevant payment are due to the Rwanda Revenue Authority (RRA) on a monthly basis by the 15th day of the following month. However, taxpayers with annual turnover of RWF 200 million or below may elect to file VAT returns or make payments on a quarterly or monthly basis.

Rwanda

Customs duties

Rwanda is a member of the East African Community, which uses the East African Community Customs Act (EACMA) for levying import duty. The EACMA prescribes Common External Tariffs (CET) for goods originating outside the Customs Union. Goods are generally subject to import duty of 0% for raw materials and capital goods, 10% for intermediate goods, and 25% for finished goods.

Goods will only enjoy the preferential community tariffs if they meet the East African Community (EAC) Customs Union Rules of Origin.

Certain industries and items are also entitled to exemptions under the customs law (e.g. assemblers of bicycles and motor cycle kits, importers of gas cylinders, certain hotel equipment, solar equipment, and energy saving bulbs).

Enterprises established in Free Trade Zones are exempt from customs duty on machinery and inputs for exported products. There also exists an import duty remission scheme, where import duty may be remitted for raw materials used to manufacture goods for export. This is subject to a requirement for proof of export and execution of the bond.

All imported goods, except those listed as exempt, are also subject to the 1.5% Industrial Development Levy (IDL) and the 0.2% African Union Levy. Additionally, imported goods, regardless of whether they are exempted, are subject to a 0.2% Quality Inspection Fee (QIF). The levies are computed on the customs value of imported goods.

Excise taxes

Excise tax is imposed on the manufacturer or importation of certain commodities, mainly soft drinks, bottled water, cigarettes, alcohol, fuels, and lubricants.

The following rates apply in respect of products and services for which excise duty is applied:

- Juice from fruits: 5%.
- Soda and lemonade: 39%.
- Mineral water: 10%.
- Beer: 60%.
- Wine, brandies, liquors, and whisky: 70%.
- Cigarettes: 36% of retail price of a pack (of 20 rods) and RWF 30 per pack.
- Telephone communication: 10%.
- Premium (excluding benzene) fuel and gas oil: RWF 183/litre on premium fuel and RWF 150/litre on gas oil.
- Lubricants: 37%.
- Powdered milk: 10%.
- Vehicles with an engine capacity of above 2500cc: 15%.
- Vehicles with an engine capacity of between 1500cc and 2500cc: 10%.
- Vehicles with an engine capacity of less than 1500cc: 5%.

Property taxes/fixed asset tax

Local government levies fixed asset tax on:

- the market value of parcels of land

- the market value of buildings and all improvements thereto registered with the land registration centre and for which the owner has obtained a title deed from the time the building is inhabited or used for other activities
- the value of land exploited for quarry purposes, and
- the market value of usufruct with a title deed.

The tax rate is fixed at a thousandth (1/1000) of the taxable value per year. The tax payment must be paid not later than 31 March of the year.

Transfer taxes

There is a fixed fee of RWF 20,000 on transfer of property. However, no transfer of ownership of a fixed asset can be effected without a tax clearance certificate issued by the concerned decentralised entity.

Stamp taxes

There are no stamp duties in Rwanda.

Payroll taxes

Employers are required to withhold tax on payments to employees in respect of employment services that they have rendered. The tax is withheld through the pay-as-you-earn (PAYE) system. The tax deducted should be remitted to the RRA by the 15th day of the following month.

Social security contributions

All people working in Rwanda, both nationals and foreigners, are required to contribute to a national social security contribution fund managed by the Rwanda Social Security Board (RSSB). The employer is required to contribute 5% of the employee's gross salary to the scheme, while the employee's contribution is 3%.

Gross salary means total remuneration received by the employee, including allowances, bonuses, commissions, and all other cash benefits, as well as any fringe benefits, but excludes reimbursement of business expenses and transport allowances.

The social security contributions computed are required to be remitted to the RRA by the 15th day of the following month.

Maternity leave benefits scheme

The law governing maternity leave benefits requires all employers and employees to contribute towards a maternity fund, which is administered by the RSSB.

The law grants employed women full monthly salary for the entire 12 weeks duration of maternity leave. The main requirements affecting employers are summarised below:

- The employer is responsible for collecting and remitting the contributions to the RSSB.
- The total contribution for maternity leave benefits is 0.6% of the contribution base. The employer and the employee are each required to contribute 0.3%.
- The contribution base is the gross pay to the employee, including benefits in kind, but excluding termination benefits, retirement benefits, dismissal compensation, and any other allowances that have a compensatory character.
- The employer is required to declare and remit the collected contribution to the RSSB by 15th day of the month following the month to which the contribution relates.

Trading licence fee

Districts charge a trading licence fee, which is paid by any person who commences a profit-oriented activity in Rwanda. The tax year starts on 1 January, and the trading licence fee must be paid for a whole year. If such activity starts after January, the taxpayer must pay a trading licence fee equivalent to the remaining months, including the one in which the activities started.

The tax declaration is made not later than 31 March of the tax year. The trading licence fee is calculated on the basis of turnover, and the amount of the fee varies between RWF 60,000 (for turnover of less than RWF 40 million) and RWF 250,000 (for turnover of over RWF 150 million).

The turnover applied is as per the amount approved in the previous year by the RRA. Every year, not later than 31 January, the RRA submits the necessary data to the concerned decentralised entity.

There are also different trading licence fee rates for other small traders (not registered for VAT). These include vendors without shops, small-scale technicians who do not use machines, sewing machine operators, transporters of people and goods on motorcycles, non-VAT registered traders and technicians who use machines, all other vehicles besides bicycles, transport activities by motor boat, and other profit-oriented activities.

Branch income

The tax law does not prescribe special provisions for taxation of branches; consequently, tax rates on the profits of PEs are the same as for domestic corporations. PEs are subject to tax at a rate of 30% and treated as domestic companies.

A branch is considered a PE for the parent company; consequently, it is taxed on the income that is sourced from Rwanda only.

Income determination

Inventory valuation

Trading stock is valued at a lower of cost price or market price on the last day of the tax period. Work in progress is valued at cost.

Capital gains

Capital gains tax is charged on the direct or indirect sale or transfer of shares or debentures. The capital gains tax is charged at the rate of 5% of the capital gain. The capital gain on sale or transfer of shares is determined as the difference between the acquisition value of the shares and their selling or transfer price.

The capital gains tax is required to be withheld and accounted for by the company in which the share sale or share transfer transaction occurred.

The capital gains tax is required to be declared and paid within 15 days following the month in which the sale or transfer of shares occurred.

However, the following transactions are exempted from capital gains tax:

- Capital gains from the sale or transfer of shares on the capital market.
- Capital gains from the sale or transfer of units of collective investment schemes.
- Capital gains resulting from restructuring of companies in respect of the transferring company.

There is a general capital gains tax law in Rwanda that provides that capital gains arising from the sale of commercial immovable property are subject to tax at the rate of 30%. However, capital gains arising from secondary market transactions on listed securities are exempt from taxation.

In addition, a capital gain arising from a corporate restructuring is exempt from tax in respect of the transferring company.

Corporate restructuring is defined to include the following:

- a merger of two or more resident companies into a separate company
- the acquisition or a takeover of 50% or more of shares or voting rights by number or value in a resident company in exchange for shares of the purchasing company
- the acquisition of 50% or more of the assets and liabilities of a resident company by another resident company solely in exchange of shares in the purchasing company
- the acquisition of the entire company's assets so that its existence is replaced by the purchasing company, or
- splitting of a resident company into two or more resident companies.

Dividend income

Dividend income includes income from shares in any societies, other similar income that may be generated by all entities that pay CIT, as well as the outstanding balance after the taxation of income from the correction made by the tax administration in the transfer pricing.

Dividend income is subject to WHT at the flat rate of 15%. Where there is a double taxation agreement (DTA) between the recipient country and Rwanda, a lower rate as per the DTA will apply.

If dividend distribution has been subjected to WHT, this becomes the final tax. Consequently, dividends paid between resident companies and subjected to the WHT are not included in taxable income for CIT purposes.

Financial income

Financial income includes income from loans, income from deposits, and income from guarantees. It also includes income from government securities and bonds, as well as from negotiable securities issued by the government, securities issued by public and private companies, as well as income from cash negotiable securities.

Financial income is subject to WHT at the flat rate of 15%. Where there is a DTA between the recipient country and Rwanda, a lower rate as per the DTA will apply.

However, the following financial interests are not subject to the 15% WHT:

- Interests on deposits in financial institutions for at least a period of one year.
- Interests on loans granted by a foreign development financial institution exempted from income tax under applicable law in the country of origin.

- Interests paid by banks operating in Rwanda to banks or other foreign financial institutions.

Royalty income
Royalty income includes:

- all payments of any kind received as a prize for the use of, or the right to use, any copyright of literary, craftsmanship, or scientific work, including cinematograph films, films, or tapes used for radio or television broadcasting
- any payment received from using a trademark, design or model, computer application, and invention patent
- the price of using, or of the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific knowledge, and
- payments from use of natural resources.

Royalty income is subject to WHT at flat rate of 15%. Where there is a DTA between the recipient country and Rwanda, a lower rate as per the DTA will apply.

Rental income
Rental income includes all revenue derived from rent of machinery and other equipment, including agriculture and livestock equipment, in Rwanda. This is reduced by 10% of gross revenue deemed expenses, interest paid on loans, and depreciation expenses.

Foreign income
Resident companies and enterprises are taxed on their worldwide income. However, a foreign tax credit is granted in respect of taxes paid on the foreign income, subject to the limit of the tax that would have been paid in Rwanda on the same income.

There are no provisions in Rwanda for tax deferral of income earned abroad.

Deductions

A trading company is generally permitted to deduct expenses that are incurred wholly and exclusively for purposes of the company's trade, provided these costs are not capital in nature and are charged to the profit and loss account.

The Rwandan tax law stipulates that deductible expenses should fulfil the following conditions:

- Are incurred for the direct purpose of the business and are directly chargeable to the income.
- Correspond to a real expenses and can be substantiated with proper purchase receipts.
- Lead to a decrease in the net assets of the business.
- Are used for activities related to the tax period in which they are incurred.

Depreciation and amortisation
Accounting depreciation of fixed assets is not allowable as a deduction for tax purposes. The same applies in the case of amortisation of assets. However, businesses are allowed

specified deductions, referred to as tax depreciation in respect of specified classes of assets. This is deducted in arriving at taxable income.

Tax depreciation allowance is granted to persons who own depreciable assets at the end of the tax period and use such assets in the production of income.

Land, fine arts, antiquities, jewellery, and any other assets that are not subject to wear and tear or obsolescence are not depreciated. Buildings, heavy industrial equipment, and machineries are depreciated annually, each on its own, at a depreciation rate of 5% of the cost of acquisition, construction, refining, rehabilitation, or reconstruction.

Intangible assets, including goodwill that is purchased from a third party, are depreciated annually, each on its own, at a depreciation rate of 10%, while information and communication systems whose life is over 10 years are depreciated annually at the rate of 10% of the cost of acquisition.

Computers and accessories and information and communication systems whose life is under 10 years are granted tax depreciation at 50%.

Tax depreciation allowance is available on any other business asset at the rate of 25%.

Goodwill

As mentioned above, purchased goodwill will attract tax depreciation at the rate of 10%, which is an allowable deduction. However, amortisation of goodwill is not tax deductible.

Start-up expenses

There is no clear guidance on the tax treatment of start-up expenses. However, in practice, start-up expenses of a capital nature are not deductible for tax purposes. Where they relate to purchase of assets, respective tax depreciation is claimed. Start-up expenses of a revenue nature are tax deductible.

Interest expenses

Interest on borrowed money used for earning business profit or interest in respect of an amount payable for property acquired to earn income is deductible, provided the interest paid is pursuant to a legal obligation and is reasonable under the circumstances.

Thin capitalisation rules can limit interest deductions when debt owed to related entities exceeds four times the amount of the corporation's equity (*see Thin capitalisation in the Group taxation section*).

Bad debt

A bad debt provision will be deductible for tax purposes if it fulfils the following conditions:

a. The amount was previously included in the income of the taxpayer.
b. Debt is written off in the books of accounts.
c. Taxpayer has taken all possible steps in pursuing payment and has shown a court decision declaring the insolvency of one's debtor.

However, for an individual whose debt is less than RWF 3 million, in addition to the conditions referred to in (a) and (b), the taxpayer must provide proof that one has taken all reasonable steps over a period of three years to recover the debt.

Further, licensed commercial banks and leasing entities duly licensed as such are allowed to deduct, in determining business profit, any increase of the mandatory reserve for non-performing loans as required by the directives related to management of bank loans and similar institutions of the National Bank of Rwanda. Similarly, the business profit is increased by the entire amount recovered from bad debts deducted from such reserves.

Charitable contributions

Donations and gifts to charitable organisations and other non-profit making organisations are tax deductible to the extent of 1% of turnover. Consequently, donations to profit making organisations, irrespective of the amount, and any donations above 1% of turnover to non-profit making organisations are not allowed as deductions for CIT purposes.

Fines and penalties

Fines and similar penalties imposed for breaking the law or for statutory offences, such as late payment of taxes, are not tax deductible.

The law does not specify which type of non-statutory fines or penalties are not allowed for tax. For example, there is no guidance on whether fines or penalties paid for breach of contract are deductible or not.

Taxes

Income tax paid on business profit and recoverable VAT are not deductible for tax purposes. This includes any back taxes paid by the business.

Net operating losses

Tax losses can only be carried forward for five tax periods, earlier losses being deducted before later losses. However, on application, the tax administration may authorise the taxpayer to carry forward the tax loss for more than five tax periods. This is subject to fulfilment of certain conditions.

If the direct or indirect ownership of the share capital or the voting rights of an unlisted company changes more than 25% by value or by number during a tax period, such a company is restricted from carrying forward losses incurred during the tax period and previous tax periods.

There are no provisions for carrying back tax losses.

Payments to foreign affiliates

Royalties, management fees, and similar payments to non-residents are deductible expenses to the extent that:

- they do not exceed 2% of the turnover of the taxpayer, and
- they are incurred to earn income of the Rwandan company, adhere to the arm's-length principle, and comply with transfer pricing requirements.

Group taxation

There is no provision for group taxation in Rwanda. Each individual corporate group member is required to submit their own tax return on a stand-alone basis.

Transfer pricing

Rwandan transfer pricing legislation and the prescribed transfer pricing methods are generally consistent with OECD guidelines. The law requires that transactions between related parties be carried out under the arm's-length principle.

The tax law empowers the Commissioner General to adjust profits earned between related parties if the Commissioner General considers that the trading arrangements between related parties do not adhere to the arm's-length principle. The arm's-length principle requires that transfer prices charged between related parties are equivalent to those that would be charged between independent parties in the same circumstances.

Rwanda operates a self-assessment system; consequently, taxpayers are obligated to self-assess their compliance to the tax legislation, which includes transfer pricing policy. According to the new income tax law, related persons involved in controlled transactions are required to have documents justifying that their prices are applied according to the arm's-length principle. This means that companies are now expected to have transfer pricing policies and documentation.

Failure to do so would result into the tax administration's adjustment of transactions prices in accordance with general rules on transfer pricing, issued by an Order of the Minister.

Thin capitalisation

The interest paid on loans and advances from related entities is not tax deductible to the extent that the total amount of loans/advances exceeds four times the amount of equity during the tax period. For purposes of determining the above, equity excludes provisions and reserves. This provision does not apply to commercial banks, financial institutions, and insurance companies.

Controlled foreign companies (CFCs)

There are no provisions in Rwanda for CFCs.

Tax credits and incentives

There are tax incentives in the form of lower CIT rates (*see Special CIT regimes in the Taxes on corporate income section*) for registered investors.

The investment code also provides the following incentives to a registered investor:

- A seven-year tax holiday for investments in the following specific sectors: manufacturing, tourism, health, exports, energy projects producing at least 25 MW (excluding investors having an engineering procurement contract [EPC] executed on behalf of the government of Rwanda, and information and communications technology (ICT) with an investment involving manufacturing, assembly, and service. The investment should be of at least 50 million United States dollars (USD)

and the investor should contribute at least 30% of this investment in the form of equity in these sectors.
- A preferential CIT rate of 0% for international companies with their regional offices in Rwanda and that fulfil certain requirements.
- A preferential CIT rate of 15% for registered investors undertaking (i) exportation; (ii) energy generation, transmission, and distribution; (iii) transport of goods and related activities; (iv) mass transportation of passengers and goods; (v) ICT; (vi) financial services, including global business activities, private equity funds, fund management, wealth management, mutual funds, collective investment schemes, captive insurance schemes, venture capital, and asset backed securities; (vii) building of low-cost housing; and (viii) any another priority economic sector as may be determined by an Order of the Minister of Finance.
- Exemption from capital gains tax.
- Five-year tax holiday for micro-finance institutions.
- Customs exemption on products used in Export Processing Zones (EPZs).
- Prompt settlement of VAT refunds.

There are, however, certain conditions that have to be fulfilled to obtain the incentives above.

Foreign tax credit

Rwanda allows a foreign tax credit on income generated from business activities performed abroad by a tax resident. The income tax payable is offset by the foreign tax paid on that income. However, the foreign tax credit is limited to the amount of tax that would have been applicable on that income in Rwanda.

The credit is allowed where it is supported by appropriate evidence, such as a tax declaration, a WHT certificate, or any other similar acceptable document.

Withholding taxes

WHT of 15% of the total amount, excluding VAT, is required to be accounted for on payments or other methods of extinguishing an obligation made by resident individuals, including tax-exempt entities. The WHT is due where such payments or other methods of extinguishing an obligation are made to a person not registered with the tax administration or to a registered person who does not have recent income tax declaration.

Payments or other methods of extinguishing an obligation subject to WHT of 15% are related to the following:

- Dividends, except income distributed to the holders of shares or units in collective investment schemes.
- Financial interests, except interests on deposits in financial institutions for at least a period of one year; interests on loans granted by a foreign development financial institution exempted from income tax under applicable law in the country of origin; and interests paid by banks operating in Rwanda to banks or other foreign financial institutions.
- Royalties.
- Service fees, including management and technical service fees, except transport services.

- Performance payments made to a crafts person, a musician, an artist, a player, sports, cultural, and leisure activities, irrespective of whether paid directly or indirectly.
- Gambling activities.
- Goods sold in Rwanda.

However, money that is recorded in the books of account as a liability of a taxpayer to creditors and that reduces the taxable income is deemed a payment if it has exceeded six months following the tax period.

WHT is also applicable to non-resident persons for such payments on behalf of their PEs. This means that the local entity/PE is now required to declare and pay WHT at the time when the non-resident pays the foreign supplier on its behalf and not when the non-resident recharges for the costs.

As mentioned above, a WHT of 15% is required to be accounted for on dividends attributed to a company registered in Rwanda. However, the WHT shall be 5% if levied on:

- dividends and interest on securities listed on capital market when the beneficiary of the dividends or interest is a resident taxpayer of Rwanda or of the East African Community, and
- interests derived from treasury bonds with a maturity of at least three years.

There is also a WHT of 5% that is applicable on goods imported for commercial use. Public institutions are required to retain 3% on payments to winners of public tenders. However, businesses that possess a tax clearance certificate are exempted from deduction of the above WHT.

The WHT deducted should be remitted to the RRA within 15 days following the month of deduction.

Tax treaties

Rwanda has DTAs with Belgium, Jersey, Mauritius, Singapore, and South Africa. The WHT rates are as follows:

	WHT (%)			
Recipient	**Dividends**	**Interest**	**Royalty**	**Management or professional fees**
Non-treaty	15	15	15	15
Treaty:				
Belgium	15	10	10	10
Jersey	10	10	10	12
Mauritius	10	10	10	12
Singapore	7.5	10	10	10
South Africa	10/20	10	10	10

The DTAs contain conditions to be complied with for the preferential rates to apply; consequently, it is recommended that professional advice is sought before application.

Tax administration

Taxable period

The normal taxable period is between January and December. However, a different tax period can be allowed on approval by the Minister of Finance.

Tax returns

Companies are assessed with reference to accounting periods. This refers to the period for which a company prepares its accounts. However, an accounting period for CIT purposes cannot exceed 12 months, so companies preparing statutory accounts for longer than 12 months need to prepare more than one CIT return.

Rwanda operates a self-assessment regime. Quarterly tax returns are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). The annual tax return/declaration must be filed within three months after the tax period. The tax declaration must include audited financial statements as well as any other documents that may be requested by the tax administration.

Payment of tax

Advance CIT is payable in three instalments. Tax payments are due on 30 June, 30 September, and 31 December (or by the sixth, ninth, and 12th month of the tax period). Each instalment is 25% of the tax liability as calculated in the tax return/ declaration of the previous tax period. This amount can be reduced by WHT paid during the tax period. The final payment of CIT for taxpayers with a December year-end is 31 March of the following year. In the case of other accounting year-ends, the final CIT payment is due by the last day of the third month following the accounting year-end.

Tax audit process

Large taxpayers are selected for audit by the RRA on a regular basis. The RRA tends to audit two tax periods, but this can be extended on request by the taxpayer. Most audits are carried out onsite. The RRA may conduct a desk audit of the taxpayer's tax affairs where they note discrepancies on tax returns filed by the taxpayer, anomalies with turnover, or any other situations that justify an audit.

Under normal in-depth audits, the RRA is required to issue a taxpayer with a draft notice of assessment following the completion of the field audit. The draft assessment is referred to as a rectification note. The taxpayer is granted 30 days within which to respond. In case the tax issues are not resolved, a final notice of assessment is issued. The taxpayer is allowed 30 days within which to appeal. Once an appeal is submitted to the Commissioner General, the RRA has 30 days within which to respond to the objection. This can be extended by another 30 days but not beyond this period. At this stage, the appeal is handled by the appeal committee, and the taxpayer and the taxpayer's agent are invited for a meeting to provide explanations.

Once the final assessment is issued, the tax due is payable, although the Commissioner General has powers to suspend the payment pending the determination of the appeal.

There is a provision for resolving the dispute through an amicable settlement process. Taxpayers can opt for this approach while at the same time exploring the next stage of the appeal process.

A taxpayer that disagrees with the response on the final assessment can appeal to the high court within 30 days.

Statute of limitations

The RRA has powers to audit a taxpayer for a period going back five years, although this can be extended to ten years in case of fraud. Taxpayers are required to keep their records for a period of ten years.

Topics of focus for tax authorities

Topics of interest for the RRA include:

- Deduction of WHT on payments to non-resident persons and reverse VAT.
- Treatment of capital gains on disposal of assets.
- Recovery of reverse VAT on services that are regarded as being available in the local market.
- Reconciliation of turnover per financial statements to receipts as per taxpayer bank statements.
- Reconciliation of cost of sales to importations.
- Reconciliation of turnover per financial statements to turnover declared in the VAT returns.
- Reconciliation of employment/staff costs per financial statements to staff costs declared in the PAYE returns.
- Transfer pricing arrangements
- Supporting expenses with proper, sufficient documents.
- Carry forward of tax losses.
- Categorisation of business assets for tax depreciation purposes.

Significant developments

The government of Saint Kitts and Nevis has signed on to the Common Reporting Standards (CRS) and the Multilateral Convention on Mutual Administrative Assistance in Tax Matters, which would provide for exchange of tax information on a reciprocal basis.

On 14 November 2017, Saint Kitts and Nevis joined the Inclusive Framework (IF) on Base Erosion and Profit Shifting (BEPS). By joining the IF, Saint Kitts and Nevis will work on creating an equal footing with all other IF members on the implementation of the BEPS package and on developing further standards to address the remaining BEPS issues.

On 24 November 2017, Saint Kitts and Nevis signed a double taxation agreement (DTA) with the United Arab Emirates.

Taxes on corporate income

Companies incorporated in Saint Kitts and Nevis pay corporate income tax (CIT) on their worldwide income with relief available under existing DTAs. Non-resident companies deriving income from Saint Kitts and Nevis are liable for CIT and should be registered if they have a physical presence in Saint Kitts and Nevis.

Saint Kitts and Nevis imposes CIT at a flat rate of 33%.

Taxable income or assessable income is ascertained by deducting from income all expenses that are wholly and exclusively incurred during the year in the production of the income. Assessable income is normally arrived at by adjusting the net profit per the financial statements for non-taxable income, non-deductible expenses, and prior-period losses of up to 50% of chargeable income.

Where a person resident in Saint Kitts and Nevis makes a payment to another person not resident in Saint Kitts and Nevis, *as noted in the Withholding taxes section*, then withholding tax (WHT) at a rate of 15% must be deducted and remitted to the Inland Revenue within 15 days.

A company that carries on business exclusively with persons who are not resident in Saint Kitts and Nevis is exempt from all income, capital gains, and WHTs.

Companies registered under the Condominium Act are governed by that Act and are not required to pay CIT.

Corporate residence

A corporation is deemed to be resident if it is incorporated in Saint Kitts and Nevis or if it is registered as an external company doing business in Saint Kitts and Nevis under the Companies Act.

Permanent establishment (PE)

A PE is not defined in the Income Tax Act; however, any company that would meet the general definition of a PE must be registered.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 17%, while hotel accommodation, tour operators, and restaurants carry a reduced rate of 10%.

Most foods (excluding prepared food or meals from a restaurant, snackette, cafeteria, etc.; live animals; and plants), medicines, and funeral expenses by a licenced funeral home are exempt from VAT.

Persons who have made or are likely to make taxable supplies in excess of 96,000 East Caribbean dollars (XCD) for certain professional services and XCD 150,000 for other business activities in a continuous period of 12 calendar months are required to register for VAT.

Customs duties

All imports are subject to import duties, VAT, and customs service tax (CST). In all instances, certain exemptions will apply.

Customs duty is levied on a wide range of imported goods at rates from 0% to 70% as specified in the Custom Duties Act. VAT is applied at a rate of 17%, and CST at a rate of 6%. Customs duty is levied on goods based on the cost, insurance, and freight (CIF) values and rates determined by the Caribbean Community (CARICOM) Common External Tariff.

Excise tax

The excise tax applies to a small range of goods, such as alcoholic beverages, tobacco products, petroleum products, motor cycles, aerated beverages, and firearms. The excise tax rate ranges between 5% and 25%.

Property tax

Saint Kitts

Property tax in Saint Kitts is levied at varied rates on the basis of the market value of the real property (including land and building as assessed by the Chief Valuation Officer) and its class.

Property classes and rates of tax are as follows:

- Residential use property: 0.2%.
- Commercial use property: 0.3%.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.
- No property tax is assessed on any buildings, condominiums, etc. that are under construction.
- New residential use properties and condominiums are exempt from tax for one year from the date certified by the valuation officer.

Note that residential use properties located in the South East Peninsula are assigned values based on fixed rates for land (XCD 20 per square foot) and buildings (XCD 300 per square foot). Property tax is then applied at a rate of 0.2%.

Where property situated in the South East Peninsula area is not developed within five years, a surcharge can be assessed at the rate of 1% of the assessed market value *per annum*, and increased annually at the rate of 1% thereafter until it reaches a maximum rate of 5% of the assessed market value while the property remains undeveloped. If property is less than one acre, undeveloped, and owned by a resident for the purpose of erecting a house, such property is exempt from the surcharge upon application in writing to the Comptroller of Inland Revenue.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% *per annum* on the unpaid taxes.

Nevis

Property tax in Nevis is levied at varied rates on the basis of the market value of the real property (including land and buildings as assessed by the Chief Valuation Officer) and its class.

Property class and rates are as follows:

Property class	Building tax rate (%)	Land tax rate (%)
Residential	0.156	0.075
Commercial	0.3	0.2
Accommodation	0.3	0.2
Certified farming	0	0.01
Institutional	0.2	0.15

Commercial use property is defined as property that does not include accommodation use property or property used for certified farming operations.

Accommodation use property is defined as property for short-term accommodation and includes a guest house.

Annual allowances and tax rebates are available as follows:

- Residential use property and condominium allowance of XCD 80,000 from the taxable value.

- No property tax is assessed on any buildings, condominiums, etc. that are under construction.

Property tax is payable on or before 30 June of each year and is deemed to be in default if not paid within 30 days of becoming due. Interest is charged at a rate of 12% *per annum* on the unpaid taxes.

Alien land holding licences

To hold land as an owner, a non-citizen must first obtain an alien land holding licence and pay 10% of the market value of property or XCD 750, whichever is greater.

A non-citizen is required to obtain a licence to hold shares in a company that owns land, to vote at shareholders meetings of the company, and to be a director of the company. Each licence costs XCD 250.

If a non-citizen purchases land in the Frigate Bay area, then there is no requirement to obtain a licence and only a minimal fee of XCD 50 is payable.

If a non-citizen wishes to purchase land in the South East Peninsula, the non-citizen is required to obtain a licence prior to purchasing the property; however, the payment of the 10% licence fee will be waived.

Stamp duty

Stamp duty applies to a very wide range of transactions (e.g. bill of sale, lease, mortgage, contract, bill of lading). Stamp duty on transfer of real property, transfer of shares, mortgages, and bank loans to aliens is specifically covered below.

Transfer of real property

Stamp duty is levied on the consideration for the sale or the value of property as assessed by the Property Valuation Officer, whichever is higher.

The vendor is responsible for the payment of all stamp duty on property transfers on the following basis:

Type of property transfer		Rate
a.	Transfer of property for consideration in money or value in kind of not less than the value of the property	12%
b.	Transfer of property for consideration in money or value in kind of less than the value of the property	12%
c.	Transfer of property without consideration in money or value in kind	6%
d.	Transfer of property in any Special Development Area other than the South East Peninsula	14%
e.	Transfer of property situated in the South East Peninsula	18.50%
f.	Transfer of property other than stock or debenture stock or funded debt or land	2%
g.	Transfer of property between husband and wife and between parents and children and vice versa	XCD 100
h.	Transfer of land by will or by similar instrument	XCD 100
i.	Transfer of registered condominium units	5%

Where a developer has obtained concessions in connection with a house or building constructed on the land being transferred, the developer is required to pay stamp duty on the same basis as noted in a, b, and c above.

Where a developer has obtained concessions in connection with a house or building to be constructed on the land being transferred, then the developer will be required to pay stamp duty initially on the land on the same basis as noted in a, b, and c above. However, when the house or building is subsequently constructed on the land with the aid of the concession, the owner of the building shall pay stamp duty on the house or building as provided in a, b, and c above as if the concessions or any part thereof had not been utilised.

Where a developer has not obtained concessions in connection with a house or building constructed on the land being transferred, the developer will be required to pay stamp duty on the same basis as noted in a, b, and c in respect of the land only.

Transfer of shares

Stamp duty is levied on the value of the consideration for the sale of shares or debentures issued by or on behalf of a company or at the value assessed by the Property Valuation Officer, whichever is higher. The stamp duty is levied at a rate of 2%. If the company owns property and its value exceeds 50% of the value of the company's assets, then the stamp duty is calculated using the applicable rate on the transfer of real property (*see above*).

Mortgages

Stamp duty is levied on the total amount secured and is applicable to both the registration and discharge of the mortgage. The standard rate is 1%. For amounts secured in relation to a Special Development Area, the rate is 2%.

Bank loans to aliens

Stamp duty is levied on the total amount of a bank loan to aliens. The standard rate is 2.5%. For loans to finance development in a Special Development Area, the rate is 5%.

Life insurance premium tax

A premium tax of 5% is levied on the premium income of all life insurance companies, whether resident or non-resident. In addition, a registration fee of XCD 2 per XCD 1,000 of income or XCD 30, whichever is less, must be paid to the Comptroller of Inland Revenue.

General insurance premium tax

A premium tax of 5% is levied on the premium income (net of agent's commission) of all general insurance companies, whether resident or non-resident.

Social Security

The employer's portion of Social Security is 5% of chargeable income (on income of up to XCD 6,500 per month).

Housing and Social Development Levy (Social Services Levy)

The employer's portion of the Social Services Levy is 3% of chargeable income.

Employment Injury Benefit

The employer's portion of Employment Injury Benefit is 1% of chargeable income (on income of up to XCD 6,500 per month).

Severance Payment Fund
The employer's portion of the contribution to the Severance Payment Fund is 1% of chargeable income.

Branch income

Branch income is taxed on the same basis and at the same rate as the income of a corporation. A resident branch of a foreign company shall be regarded as a separate company and shall be taxed on the same basis as that of a locally registered corporation.

Recharges of expenses from head office to the branch will be subject to WHT at a rate of 10%; however, the recharges have to be justified and cannot be based on a percentage allocation.

Income determination

Inventory valuation
Inventories are generally stated at the lower of cost or net realisable value. The first in first out (FIFO) and average cost methods of valuation are generally used for book and tax purposes. However, the Comptroller of Inland Revenue will normally accept a method of valuation that conforms to standard accounting practice in the trade concerned. The last in first out (LIFO) method is not permitted for tax or book purposes.

Capital gains
Capital gains tax will be imposed if an asset is sold within one year of the date of acquisition. The maximum rate of tax will be 16.5% (one half the 33% CIT rate). Assets sold after one year will not attract capital gains tax.

Dividend income
Dividends received by a company resident in Saint Kitts and Nevis from another company resident in Saint Kitts and Nevis are taxed at source at the CIT rate of 33%. Credit is given to the recipient for the tax on the dividend in computing the tax liability.

Interest income
Interest income received by a company registered in Saint Kitts and Nevis is taxed at the CIT rate of 33%. Interest earned on local and other CARICOM government securities are normally exempt from the payment of CIT.

Royalty income
Royalties received by a corporation are taxable as income from a business or property. Royalties earned from CARICOM sources are normally exempt from the payment of CIT.

Foreign income
A Saint Kitts and Nevis corporation is taxed on foreign branch income when earned and on foreign dividends when received. Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in

other cases (the United Kingdom [UK] and CARICOM). There is also relief from British Commonwealth taxes. *See Foreign tax credit in the Tax credits and incentives section for more information*.

Deductions

Depreciation

Depreciation allowed for tax purposes is computed by the diminishing-balance method at prescribed rates. An initial allowance of 20% is granted on industrial buildings or structures and in respect of capital expenditure incurred on plant and machinery by a person carrying on a trade or undertaking, as defined. In addition, an annual allowance of between 2% and 5% is allowed on all buildings constructed after 1 March 1994. Concrete buildings are depreciated at a rate of 2%, while the rate varies for other buildings depending on the type of material used in construction. Conformity between book and tax depreciation is not required.

Any gain on the sale of depreciated assets is taxable as ordinary income up to the amount of tax depreciation recaptured.

Initial allowances and annual allowances cannot reduce the tax that would have been otherwise payable by more than 50%. Any initial allowance or annual allowance not utilised may be carried forward indefinitely.

Goodwill

Goodwill and trademarks are not depreciating assets, and amortisation is not allowed.

Start-up expenses

There are no specific provisions in relation to deductions for start-up expenses. However, the policy is that certain start-up expenses, such as costs of incorporation and other initial start-up costs, may qualify for a three to five year straight-line write-off, depending on the total dollar value.

Interest expenses

No specific restrictions will apply to interest paid on loans owing to shareholders, directors, their spouses, children or relatives, or to any related parties. Interest is only deductible to the extent that it was incurred in producing chargeable income.

Restriction on bad debts

Specific bad or doubtful debts in excess of 5% of total trade receivables will not be allowed as a deduction.

Charitable donations

Charitable donations are not deductible for tax purposes.

Contributions to a pension fund

Contributions made by an employer to a pension fund (approved by the Comptroller) on behalf of its employees are deductible, up to a maximum of 5% of annual earnings of the employee or XCD 2,000 *per annum*. Application should be made to the Ministry of Finance or to the Pension Fund Committee.

Restriction on compensation expenses

Salaries, wages, leave pay, fees, commissions, bonuses, gratuities, or any other perquisites or such other payments that an employee of a company receives in the course of their employment or the value of any benefit to such employee or to any member of an employee's family in excess of XCD 90,000 *per annum* will not be allowed as a deduction from chargeable profit.

Where an employee or shareholder receives remuneration in a tax year from two or more associated companies, the amount deductible in relation to the employee or shareholder in the tax year by all of the associated companies shall not exceed XCD 90,000. If the remuneration received by the employee or shareholder exceeds XCD 90,000, the amount deductible by each associated company will be equal to the allowable deduction of XCD 90,000 times the remuneration received from the associated company divided by the total remuneration paid to the employee or shareholder by all of the associated companies.

Fines and penalties

Fines and penalties imposed under tax laws of Saint Kitts and Nevis are not deductible expenses.

Taxes

There are no provisions in the Income Tax Act in relation to the deductibility of taxes paid by a company. However, in general, VAT, VAT input tax, and adjustments under the VAT Act are disregarded for income tax purposes. Other taxes, including property tax, transfer taxes, payroll taxes, and insurance premium taxes, except income tax and share transfer tax, are deductible to the extent they are incurred in producing chargeable income.

Net operating losses

Income tax losses may be carried forward for five years following the year in which the loss was incurred. However, the chargeable income of a company after deducting initial and annual capital allowances in any one income year may not be reduced by more than 50% by losses brought forward. No carryback of losses is permitted.

Payments to foreign affiliates

A company incorporated in Saint Kitts and Nevis may claim a deduction for royalties, management fees, and interest charges paid to foreign affiliates, provided the payments are equal to or less than what the corporation would pay to an unrelated entity. The deductibility of any payments to a foreign affiliate will be subject to an arm's-length test, and WHT will be payable at a rate of 10%.

Restriction on related-party expenses

Amounts paid or payable to related or associated persons for administration fees, management fees or expenses, head office charges and allocations, technical services, shared costs, and other similar charges are restricted to 5% of the taxpayer's gross sales or revenues.

Group taxation

Group taxation is not permitted in Saint Kitts and Nevis.

Transfer pricing

There are no provisions for transfer pricing in the tax laws of Saint Kitts and Nevis.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Saint Kitts and Nevis.

Controlled foreign companies (CFCs)

There are no specific rules relating to a controlled foreign entity in the tax laws of Saint Kitts and Nevis.

Tax credits and incentives

Tax incentives are currently available under the following legislation.

Income Tax Act and Subsidiary Legislation, Cap 20.22

The Income Tax Act provides that if a company is licensed under the Hotel Aids Ordinance and constructs a hotel with more than 30 rooms, the hotel will receive an exemption from CIT for a period of ten years beginning on the day it is first open for business. If the hotel has less than 30 rooms, then it will be entitled to a five-year tax holiday. During the tax holiday period, no initial deductions or annual capital allowance deductions shall be allowed. Thereafter, only the annual allowance will be allowed and will be computed on the total capital expenditure incurred during the holiday period less any assets sold. The net losses arising during the tax holiday period (i.e. the excess of accumulated tax losses over total profits) may be carried forward and set-off against profits following the expiration of the tax holiday in accordance with the normal rules for set-off of losses.

The Income Tax Act also provides that if a licence is granted to a pioneer manufacturer under the Pioneer Industries Act, the manufacturer is entitled to a five-year tax holiday (or up to ten years, at the discretion of the government) as provided in the licence.

Hotel Aids Act

The Hotel Aids Act provides that a licence may be granted to any person who desires to construct or extend an existing hotel to import building material and equipment free from import duties, as specified in the licence, for use in the construction of the hotel and to furnish and equip the hotel. The holder of a licence may not dispose of any hotel equipment within three years of being imported free of duties and taxes. Permission must be received from the Comptroller of Customs to dispose of any building material and hotel equipment within the three-year period.

Fiscal Incentives Act

The Fiscal Incentives Act provides that if a company is declared to be an approved enterprise to manufacture certain ‘approved products’, then the manufacturer is entitled to a tax holiday period of between ten and 15 years depending on the classification of the approved enterprise. The net losses arising during the tax holiday period (i.e. excess of all losses over all profits) may be carried forward and set-off against profits of the approved enterprise for the five-year period following the tax holiday period.

Small Business Development Act, 2009

The Small Business Development Act provides the framework for the promotion of investment opportunities in Saint Kitts and Nevis by introducing a system of registration of small businesses and a range of incentives that are available to locals. The incentives and concessions available to any small business that would be entitled for consideration are as follows:

- Concession on consumption tax applicable to professionals (e.g. engineers, doctors).
- Reduction in CIT for a minimum of three years to a maximum of five years.
- Relief from CIT by way of an allowable deduction on any monies borrowed from any financial institution, including any bank, non-bank, or credit union.
- Export incentives.
- Rebate of CIT.
- Exemption from or reduction in customs duty on inputs imported for use in the small business.
- Exemption from or reduction in customs duty on any plant, machinery, equipment, or motor vehicle imported for use in the small business.
- Reduction of property tax by up to 75%.

A small business to which this Act applies must meet all of the following criteria:

- No more than 25 employees.
- Net assets or paid up capital not exceeding XCD 1 million.
- Annual sales not exceeding XCD 2 million.
- Owned by citizens of Saint Kitts and Nevis.
- Not more than 25% owned or controlled by a company whose annual turnover or net assets exceed the limits noted above or by a subsidiary of a larger company.
- The composition of the board of directors is not controlled by a company whose annual turnover exceeds the criteria above.
- Has no agreement for managerial or other services to persons who are not citizens of Saint Kitts and Nevis or other CARICOM territories.

The registration fee for an approved small business is XCD 100. Each approved small business must, within six months after the end of its financial year, submit to the Registrar (person designated by the Minister to perform the functions of Registrar of Small Businesses) financial statements audited by an auditor in accordance with generally accepted international auditing standards.

Other incentives

Approved manufacturing, agricultural, and tourist ventures are permitted to import building material and equipment free of customs duties.

A Memorandum of Understanding (MOU) between the government and small hotel operators provides for certain conditions under which small hotel operators will be eligible for duty-free concessions on the refurbishment of their facilities every seven years, and on food and wine for their restaurant facilities where applicable. For purposes of this incentive package, a small hotel is defined as a hotel consisting of at least ten rooms and not exceeding 99 rooms.

Foreign tax credit

Double taxation is avoided by means of foreign tax credits where tax treaties exist and through deduction of foreign income taxes in other cases (the United Kingdom and

CARICOM). A foreign tax credit is also available to persons in Saint Kitts and Nevis who have paid or are liable to pay income tax in a country that is a member of the British Commonwealth (other than the United Kingdom).

Commonwealth relief: Residents

The relief available for a person resident in Saint Kitts and Nevis from tax payable in Saint Kitts and Nevis is the income tax rate in the British Commonwealth country if that rate does not exceed one half of the tax rate in Saint Kitts and Nevis. If the income tax rate in the British Commonwealth country exceeds the Saint Kitts and Nevis tax rate, then the relief will be limited to one half the tax rate in Saint Kitts and Nevis.

Commonwealth relief: Non-residents

The relief available in Saint Kitts and Nevis for a person not resident in Saint Kitts and Nevis from tax payable in Saint Kitts and Nevis is one half of the income tax rate in the British Commonwealth country if that rate does not exceed the tax rate in Saint Kitts and Nevis. In any other case, the relief will be limited to the amount by which the Saint Kitts and Nevis tax rate exceeded one half of the rate of income tax in the British Commonwealth country.

Withholding taxes

WHT at the rate of 15% should be withheld from payments made to non-residents in respect of the following:

- Dividends.
- Interest, annuities, premiums, and discounts.
- Rent, leases, contracts, and royalty payments.
- Natural resources.
- Commissions, remuneration, fees, and licences.
- Charges for the provision of personal services, commercial advice, and managerial skills.
- Administration, management, or head office expenses.
- Profits.
- Technical, professional, vocational, and any other service fees.
- Accounting, actuarial, legal, and audit expenses.
- Non-life insurance premiums.
- Any other annual or periodic payments or distributions.

Tax treaties

	WHT (%)				
Recipient	**Dividends**	**Interest**	**Royalties**	**Management fees**	**Entry into force**
Non-treaty	15	15	15	15	
Treaty:					
CARICOM	0	15	15	15	7 July 1995
Monaco	0/5 (1)	0 (2)	0 (2)	N/A	1 December 2011
San Marino	5/7.5/15 (3, 4)	0 (5)	0 (2)	N/A	12 February 2014
United Arab Emirates	0 (2)	0 (2)	0 (2)	N/A	Awaiting ratification
United Kingdom	0 (5)	0 (5)	0 (5)	N/A	28 January 1948

Notes

1. The rate is 5% if the beneficial owner is a company; 0% if the beneficial owner is an individual and resident of either contracting state or a partnership held by individuals and beneficial owners who are resident of either contracting state.
2. Taxable only in the state in which the beneficial owner is resident.
3. The rate of tax is 5% if the beneficial owner is a company that has directly held at least 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
4. The rate is 7.5% if the beneficial owner is a company that has directly held at least 10% but less than 25% of the capital of the company paying the dividends for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
5. Taxable only in the source state.

Tax administration

Taxable period

Taxes are assessed on a fiscal-year basis.

Tax returns

The taxpayer must file an information return on Form CIT-01 by the 15th day of the fourth month after the fiscal year-end along with the financial statements. The authorities either accept the self-assessment or issue a revised assessment. If a return is not filed on a timely basis, the authorities have the power to issue estimated assessments. There is a 5% penalty for late filing.

The taxpayer can object to assessments raised within one month and ask the Comptroller of Inland Revenue to review and revise. In the event that the objection is unsuccessful, the taxpayer may appeal to the Commissioners of Income Tax. Assessments may be reviewed and revised by the Comptroller within the year of assessment or within six years of the expiration of the assessment year.

Payment of tax

Advance tax is payable in quarterly instalments on 15 March, 15 June, 15 September, and 15 December of each year and is ordinarily based on the tax chargeable and assessed in the previous fiscal year. The standard amount of each instalment is determined as one quarter of the tax chargeable in the previous fiscal year. If the assessment for the prior year has not been finalised, the Comptroller of Inland Revenue can raise an assessment based on best judgement.

The balance of tax due after the final assessment is issued, as notified in the assessment, is payable on or before the 15th day of the fourth month after the fiscal year-end. If the Comptroller of Inland Revenue revises the assessment, then payment of the balance of taxes due is due one month after the date of issue of the revised assessment.

Tax is deemed to be in default if not paid by the 15th day of the fourth month after the fiscal year-end or within one month of the date of the notice of assessment, whichever is later. Interest of 1% per month or 12% *per annum* is charged on unpaid taxes in default.

Anti-avoidance provisions

The Comptroller of Inland Revenue can, by notice in writing:

- distribute, apportion, or allocate amounts to be deducted in calculating income tax paid between related persons as is necessary to reflect the chargeable income or tax payable as if the arrangement had been done at arm's length
- re-characterise the source and type of income, loss, or payments made under an arrangement, the form of which does not reflect its substance or is classified as an avoidance arrangement, and
- disregard an arrangement, transaction, or part of an arrangement or transaction that does not have substantial economic effect or is classified as an avoidance arrangement.

Tax audit process

The Saint Kitts and Nevis tax system for companies is based on self-assessment; however, the Inland Revenue Department (IRD) undertakes ongoing compliance activities to ensure that corporations are meeting their tax obligations. There is no specific approach used by the IRD in relation to compliance and audit activities. Compliance activities generally take the form of reviews of specific issues and audits.

Statute of limitations

Assessments may be reviewed and revised by the Comptroller of Inland Revenue within the year of assessment or within six years of the expiration of the assessment year.

Topics of focus for tax authorities

The IRD does not have any specific compliance program; however, when an audit is done, the focus is mainly on the detection of basic non-compliance, such as omission of income, inclusion of non-deductible expenses, and classification of items between expenses and capital items. In recent years, the IRD has been paying special attention to the application of WHT on payments made to non-resident persons and VAT on services imported into Saint Kitts and Nevis, mainly between related parties.

Other issues

Tax Information Exchange Agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Guernsey, India, Ireland, Liechtenstein, the Netherlands, the Netherlands Antilles, and Norway are in force. TIEAs have also been signed with the Faroes, Germany, Greenland, Iceland, New Zealand, Portugal, South Africa, and Sweden.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 31 August 2015, the Agreement between the Government of the United States of America and the Government of the Federation of Saint Kitts and Nevis to improve international tax compliance and to implement FATCA was made available.

Multilateral Convention on Mutual Administrative Assistance in Tax Matters

Saint Kitts and Nevis signed the Multilateral Convention on Mutual Administrative Assistance in Tax Matters in August 2016. Under the convention, Saint Kitts and Nevis will exchange tax information based on Organisation for Economic Co-operation and Development (OECD) standards, but is not required to collect taxes on behalf of another country or provide assistance in the service of related documents.

Common Reporting Standard (CRS)

In November 2014, the G20 countries endorsed a new CRS for automatic exchange of information developed by the OECD. Under the CRS, foreign tax authorities will provide information to the IRD relating to financial accounts in their jurisdiction held by Kittian residents. The IRD will, on a reciprocal basis, provide corresponding information to the foreign tax authorities on accounts held by residents of their jurisdiction in Saint Kitts and Nevis. Saint Kitts and Nevis has committed to implementing the CRS by September 2018.

Inclusive Framework (IF) on Base Erosion and Profit Shifting (BEPS)

On 14 November, Saint Kitts and Nevis joined the IF on BEPS. By joining the IF, Saint Kitts and Nevis will work on creating an equal footing with all other IF members on the implementation of the BEPS package and on developing further standards to address the remaining BEPS issues. As a signatory to the IF, Saint Kitts and Nevis has committed to implementing minimum standards related to:

- preferential regimes, including exchange of tax rulings (Action 5)
- treaty abuse (Action 6)
- country-by-country (CbC) reporting to tax authorities allied to wider transfer pricing documentation in Action 13, and
- improved mutual agreement procedures (MAP) for resolving disputes (Action 14).

Significant developments

Effective 1 February 2017, the value-added tax (VAT) rate was reduced from 15% to 12.5%.

Taxes on corporate income

Resident companies are taxed on gains or profits accrued directly or indirectly from all sources, whether in or out of Saint Lucia, and are subject to tax at a flat rate of 30%. The 30% tax rate is only applicable to companies that, prior to income year 2003, have no tax arrears and have complied with the requirements of any enactment administered by the Inland Revenue Department (IRD). The tax rate of 33.33% will still apply to those companies that have tax arrears and have not complied with the requirement.

Non-resident companies are taxed on Saint Lucia-source income. The gross amount of such income is liable to 25% withholding tax (WHT), while WHT of 15% applies to interest.

Associations of underwriters are taxed at 30% on 10% of the gross premium arising in Saint Lucia, and life insurance companies are taxed at 30% on 10% of the gross investment income arising in Saint Lucia.

Corporate residence

Companies are regarded as resident if they are incorporated in Saint Lucia or managed and controlled through a permanent establishment (PE) in Saint Lucia.

Permanent establishment (PE)

A PE is defined in Saint Lucia as a fixed place or premises through which the business is wholly or partly carried on.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 12.5%. There is also a 0% rate charged on certain goods and services. In respect of the hotel sector and related services, a reduced rate of 10% is applicable.

The threshold for registered taxpayers is currently set at 400,000 East Caribbean dollars (XCD) *per annum*. This means that it is not mandatory for businesses earning less than the threshold to register for VAT. The threshold is based on the annual sales turnover of the taxpayer.

The VAT rate of 0% has been legislated on certain supplies, which include, but are not limited to, the following:

- Goods to be exported.
- Goods for sale at duty-free shops.
- Fuel.
- Water.
- Electricity.

The following goods and services are exempted from payment of VAT, but this list is not exhaustive:

- Domestic residential rental.
- Educational services.
- Financial services.
- Insurance services.
- Medical services.
- Local transportation services.
- Certain food items (e.g. chicken, rice, milk, flour, bread).

The government secured the Caribbean Community and Common Market's (CARICOM's) approval to remove the import duty on medical supplies for a period of four years from 1 May 2012 to 30 April 2016. Although this was meant to be a temporary measure, the instrument instituting the exemption had no end date and there have been no official pronouncements terminating the exemption. Prescription drugs are currently exempt from VAT.

The government has also agreed to the establishment of a special VAT Refund Account in accordance with the provisions of the Financial Administration Act. This is to facilitate the timely processing and payment of refunds to taxpayers.

Customs duties

Customs duties are charged on a wide range of imported goods. Exemptions are granted for raw materials and plant and machinery used in manufacturing and for certain items imported by hotels under construction, extension, or refurbishing projects.

Excise taxes

Excise taxes are imposed on home-produced goods, mainly liquor, beer, and cigarettes. XCD 1.44 per litre of liquid applies to beer in glass bottles and XCD 3.50 per liquid gallon applies to beers in metal cans.

There is also an excise tax on fuel when fuel is imported by a wholesaler. Tax is included on the price of fuel paid at the gas pump. The tax rate formula is based on the current price provided by the supplier and regulated price at the gas pump.

Commercial property tax

Commercial property tax is assessed annually at 0.4% of the open market value of the property. The owner is required to obtain a commercial valuation assessing the open market value of the property. All new commercial properties completed after 1 April 2001 can benefit from a three-year tax exemption from commercial property tax.

Residential property tax

The property tax rate for residential property is 0.25% of the open market value.

Stamp tax

Stamp tax is charged on any document that evidences a legal or contractual relationship between two or more parties. Additionally, many types of commercial and legal documents must be stamped as evidence of the payment of taxes. Stamp tax may be charged either at a fixed rate or at an *ad valorem* rate, depending, for example, on the value of the property being transferred.

Instrument	Stamp duty rate
Conveyance or sale of immovable property (resident or non-resident purchaser)	2%
Conveyance or sale of immovable property:	
Non-resident vendor	10%
Resident vendor:	
XCD 50,000 to XCD 75,000	2.5%
XCD 75,0001 to XCD 150,000	3.5%
XCD 150,001 and over	5%
Conveyance or sale of debenture, stock, debt, or shares where less than 75% of assets comprise immovable property	Greater of 0.5% of net assets of company or XCD 10
Conveyance or sale of debenture, stock, debt, or shares where more than 75% of assets comprise immovable property:	
Non-resident vendor	10%
Resident vendor:	
XCD 50,000 to XCD 75,000	2.5%
XCD 75,001 to XCD 150,000	3.5%
XCD 150,001 and over	5%

Payroll taxes

Other than employers' portion of the statutory National Insurance Corporate (NIC) contributions (*see below*), there are no other payroll taxes, where the burden falls on the employer. Employers are, however, responsible for deducting the employees' income tax liability at source, through the pay-as-you-earn (PAYE) system.

Social security contributions

The employee's share of NIC contributions (for retirement, sickness, and disability benefits) is 5% of gross salary, up to a maximum contribution of XCD 250 per month (i.e. on a monthly salary of XCD 3,000). The employer matches the contribution and files monthly returns.

Branch income

The tax rate on branch income is the same as that on income earned by resident companies. No additional tax is withheld on transfers of profits to the head office.

Income determination

Inventory valuation

Inventory is generally valued at the lower of cost or market value. The Saint Lucia IRD will generally accept a valuation method that is in line with the common accounting practice of the particular trade or industry. First in first out (FIFO) or average costing are normally used for both book and tax purposes.

Obsolescence is permitted where it occurs, but there are no provisions to account for monetary inflation on inventory valuation.

Capital gains

There is no tax on capital gains except in instances where such gains comprise a portion of the income-earning activities of the business. In such instances, the corporate tax rate applies.

Dividend income

Dividends are tax exempt in Saint Lucia.

Inter-company dividends

Inter-company dividends are not subject to tax in Saint Lucia.

Interest income

The corporate tax rate applies to interest income. However, income earned on securities issued by member governments of the Eastern Caribbean Central Bank and income accruing from trading in securities under the Securities Act to any citizen or resident of any member state of the Organisation of Eastern Caribbean States or to any company incorporated in and registered in any member state of the Organisation of Eastern Caribbean States is tax exempt.

Any expenditure incurred for the purpose of producing exempt income is not deductible.

Royalty and rental income

The corporate tax rate applies to royalty and rental income. However, rental income from a residential accommodation shall be exempt from tax if certain requirements, as defined by regulations, are met.

Foreign exchange gains/losses

Foreign exchange gains or losses arising from foreign exchange transactions on trading items are assessable or deductible as realised gains or losses if settled within normal credit terms. Gains or losses on other instruments, including inter-company loans, are recognised only when actually realised.

Unrealised exchange gains/losses are not taxable/deductible.

Bribes, kickbacks, illegal payments

Bribes, kickbacks, and illegal payments received by a company are includible in taxable income.

Foreign income

Resident companies are taxed in Saint Lucia on income earned outside Saint Lucia. Reciprocal understandings exist with some countries for the avoidance of double taxation, and foreign tax is allowed as a credit against tax charged in Saint Lucia. Saint Lucia has no tax treaties with other countries, except for the member states that make up CARICOM. There is an agreement among the governments of CARICOM for the avoidance of double taxation. Where no agreement exists, the foreign tax offset is the lesser of the foreign tax paid or the tax payable on that income in Saint Lucia.

Tax deferral is not permitted in Saint Lucia.

Deductions

Accrued expenses are deductible as long as they are business related. Contingent liabilities are deductible expenses once they are recognised in the book of accounts.

Depreciation

The following capital allowances are available in Saint Lucia:

- An initial allowance of 20% is granted on the acquisition of industrial, agricultural, and commercial buildings (except for hotels and rental properties); on plant and machinery, including motor vehicles and furniture; and on fixtures and equipment.
- Thereafter, annual allowances for wear and tear, ranging from 10% to 33.33%, are granted on the reducing-balance method, except for industrial and agricultural buildings, which are allowed an annual rate of 5%, and commercial buildings (except for hotels and rental properties), which are allowed an annual rate of 2.5%.

The Comptroller of the IRD may also grant, on application, a higher rate for annual allowance for assets that have higher or abnormal wear and tear.

Gains on disposal are taxable as ordinary income to the extent of depreciation recovered, and any proceeds in excess of the cost of the asset are treated as a capital gain, which is not subject to tax. Where the proceeds on disposal are lower than the tax written-down value of the asset, a balancing allowance is granted for the shortfall.

Goodwill

Neither the amortisation of impaired goodwill nor the related write-off of it is an allowable deduction.

Organisational and start-up expenses

All expenditures incurred in connection with incorporation costs for the establishment of a new small business enterprise are allowable deductions. A small business enterprise is an enterprise incorporated during the year of income that:

- is wholly owned by citizens of Saint Lucia who have not been owners of previously incorporated businesses in Saint Lucia
- employs not more than 50 persons
- has gross income that does not exceed XCD 1 million
- engages in an activity on the listing of preferred business activities as approved by the Minister of Finance, and
- satisfies the provision of any law in force with respect to micro or small-scale business.

Interest expenses

Interest on any loan, including interest payable on debentures, is an allowable deduction to the extent that the amount of such loan was used for the purpose of producing assessable income.

Bad debt

Bad debt expense is deductible, provided it has been brought to account in generating the company's assessable income for any income year and that the company has taken all reasonable steps to establish that the collection of such debt is unlikely.

Charitable contributions

Charitable contributions are an allowable deduction when the contributions are made under a deed of covenant for a period of not less than three years to any religious, charitable, medical, or educational institution; sporting body; or fund of a public character, approved by Cabinet, if such contributions are made to the Saint Lucia National Trust. However, the deduction with respect to such contributions shall not exceed 25% of the assessable income of the company for that income year.

Pension expenses

Current annual contributions to an approved pension fund are deductible expenses. However, where a special payment is made to an approved pension fund, in relation to a period of service by an employee prior to the setting up of the approved pension fund, or to meet any actuarially ascertained insufficiency in the resources of the approved pension fund to meet its obligations to its employees, such amount shall be deductible as follows:

i. Where the special payment does not exceed the current annual contribution, such amount is wholly deductible.
ii. Where the special payment exceeds the current annual contribution, the special payment is an allowable deduction in such years of income, not exceeding five in number, as in the opinion of the Comptroller is reasonable under the circumstances.
iii. Where under (ii) above, annual deductions are allowable over a number of years of income, the first such deduction is allowable for the income year for which the special payment is made.

Taxes

VAT paid on goods imported or purchased, and sold in the ordinary course of business, are deductible for tax purposes. Property taxes are deductible where the property is used in producing assessable income. Income taxes, penalties, and interest on tax in arrears are not deductible.

Other significant items

Meals and entertainment, officer's compensation/life insurance, and payment to directors are deductible expenses, provided they are wholly and exclusively incurred by a company during that year of income for the purpose of producing its assessable income.

Net operating losses

Net operating losses may be carried forward for up to six years if the losses have not been fully absorbed earlier. In carrying losses forward, the amount that can be claimed in any subsequent year is restricted to one-half of the assessable income of that year. Losses may not be carried back.

Payments to foreign affiliates

There are no restrictions on the deductibility of interest paid to foreign affiliates if the transaction is carried out at arm's length and at commercial rates. However, deductions for management charges, allocations of head office expenses, royalties, and other charges that are subject to 25% WHT are restricted to the lesser of the aggregate of those charges or 10% of all allowable business deductions, excluding cost of sales and capital allowances.

Group taxation

Group tax filing is not allowed in Saint Lucia; however, group tax relief is available under certain circumstances to allow the trading losses, excluding the current loss, of a resident company within a group to offset the profits of another resident company within the same group. A claim for group relief requires the consent of the Comptroller of the IRD and is only available to resident companies.

Transfer pricing

Related-party transactions are accepted if they are made on an arm's-length basis. The IRD has the power under the Income Tax Act to make any adjustment deemed necessary to place such transactions at arm's length.

Thin capitalisation

No provision exists for thin capitalisation in Saint Lucia.

Controlled foreign companies (CFCs)

There are no provisions relevant to CFCs in Saint Lucia.

Tax credits and incentives

Foreign tax credit

Where income has accrued to a resident and has been taxed in a foreign country with which there is no double tax agreement (DTA) or is income to which a DTA, if there is one, does not relate, credit for tax on such income is allowed for the lesser of the tax payable in the foreign country or the tax charged under Saint Lucia tax law.

Tax holidays

Tax holidays are available for manufacturing companies. The incentives are aimed at increasing the manufacturing base of Saint Lucia, the level of exports, and the use of local materials and labour in production. An approved manufacturing enterprise will be granted a tax holiday, up to a maximum of 15 years. In determining the length of the tax holiday, the extent of the local value added to approved products is taken into account.

Investment incentives

Income tax incentives and other fiscal concessions are provided under the Fiscal Incentives Act, the Tourism Incentives Act, the Special Development Areas Act, and other concessions granted by the Cabinet of Ministers. The extent of the incentives and concessions granted are specific to the legislation or Cabinet conclusions and depend on the impact that the investment would have on local employment, exports, and the generation of foreign exchange earnings. The incentives granted include the following:

- Duty-free importation of raw materials, machinery, components, and spare parts and other inputs used in manufacturing, and the duty-free importation of construction materials, equipment, and other inputs used in the construction and operation of hotels and other hospitality products.
- Income tax waivers of up to 100% of the taxable income of companies engaged in manufacturing, tourism, and agriculture and other employment-generating activities, for periods of up to 15 years.
- Whole or partial waivers of property tax, stamp duties, Alien Landholding Licence fees, WHT, and VAT with respect to investments in specific areas, or in specific industries and activities.
- Guaranteed repatriation of capital and dividends. Remittance of profits and dividends are tax-free, as they are not subject to WHT.
- Export allowances for goods manufactured in Saint Lucia and exported. Companies that engage in such activity are given tax exemption on the export of such goods, up to a maximum of ten to 15 years.

Employment incentives

Employment incentives are available in the Income Tax Act for the following:

- Hiring university graduates. An additional deduction of 25% of salaries is provided for a maximum period of three years.
- Hiring persons in the offshore financial services industry with skills not available in Saint Lucia. A special tax concession is given to such persons that allows a prescribed percentage of an employee's or contractor's salary or fees to be exempt from income tax.

International Business Companies (IBCs) Act

IBCs are prohibited from conducting business in Saint Lucia and may elect to be exempted from income tax. Alternatively, IBCs may elect to be liable to income tax on their profits and gains at a rate of 1%. Freedom from exchange controls is granted to IBCs, as well as from stamp duty on the transfers of any property, assets, shares, debt obligation, or other securities. No WHT is levied on remittances of dividends and distributions, royalties, interest, management fees, or fees or other income paid by IBCs to persons outside Saint Lucia. Supplies to an IBC are also deemed to be an export, and VAT is applied at the rate of 0%.

Other incentives

Complete or partial waivers of income tax are available on the taxable profits of companies engaged in providing services to the offshore financial services industry.

Special tax concessions are also available for capital construction in the hotel industry. Capital expenditures on the construction of a hotel may offset profits for up to 15 years.

Withholding taxes

Resident corporations and persons that make certain payments of an income nature to residents or non-residents are required to withhold tax on these payments as follows:

Recipient	WHT (%)
Resident corporations:	
Payments to contractors	10
Equipment hire	10
Non-resident corporations:	
Interest	15/15 CARICOM
Royalties	25/15 CARICOM
Management fees	25/15 CARICOM
Commissions or fees (not by way of employment)	25
Income of a trust	25
Premiums, including insurance premiums	25
Any other payment of an income nature	25

Saint Lucia has only one DTA. This treaty, between the Caribbean territories, is referred to as the CARICOM Double Taxation Agreement. CARICOM is comprised of the following states:

- Antigua and Barbuda
- The Bahamas
- Barbados
- Belize
- Dominica
- Grenada
- Guyana
- Haiti
- Jamaica
- Montserrat
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Suriname
- Trinidad and Tobago

Tax administration

Taxable period

Returns must cover a 12-month period, which may be changed only with the Comptroller's permission.

Tax returns

Tax returns must be filed within three months of the company's fiscal year-end. An extension of the filing date may be obtained.

Financial statements must be submitted with the returns, together with a schedule reconciling taxable income with book income and various other schedules of additional information.

The system is one of self-assessment. Upon receipt of the returns, the IRD examines the information provided and issues a notice of assessment at any time, subject to the statute of limitations. The Revenue Department may also issue assessments in the absence of returns.

Payment of tax

Tax is payable in instalments on 25 March, 25 June, and 25 September in each year of income, based on the preceding year's income. Any remainder is payable within three months of the end of the fiscal year.

Penalties and interest

The following civil penalties and interest, which are non-deductible, are imposed:

- For late filing or for failure to file: 5% of the tax charge at filing date.
- For late payment: 10% of the unpaid tax at the due date.
- On tax and penalties unpaid: Monthly interest at a rate of 1.04%.
- Tax knowingly evaded or sought to be evaded: 100% of the tax.

Appeals

Within 30 days after the date of service of a notice of assessment or reassessment, the taxpayer may submit a written objection to the Revenue Department on any matters in such assessment or reassessment. If the Revenue Department confirms its assessment, the taxpayer may file an appeal with the Appeal Commission, which comprises seven persons appointed by the Minister of Finance. A decision by that body may be further appealed to the Saint Lucia High Court within 30 days. An appeal against an order from this Court may be made to the Court of Appeal.

Tax audit process

The IRD carries out audits of a selection of tax returns, usually at the taxpayer's place of business. Audits may be carried out at any time prior to the expiration of the statute of limitations, whether or not notices of assessment have been issued. The Revenue Department has wide powers in determining the information it requires for these audits.

Statute of limitations

Assessments are not final until six years after the end of the income year, within which period assessments may be made at any time. In cases of misrepresentation or failure to disclose any material fact, a reassessment can be made at any time.

Topics of focus for tax authorities

The tax authorities in Saint Lucia often focus on the deductibility of related-party expenses during the completion of tax audits and WHTs on head office or management charges.

Other issues

Tax Information Exchange Agreements (TIEAs)

TIEAs provide for the exchange of information on tax matters. TIEAs with Aruba, Australia, Belgium, Denmark, Finland, France, Germany, Iceland, Ireland, the Netherlands, Netherlands Antilles, Norway, Portugal, Sweden, the United Kingdom, and the United States are in force.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 19 November 2015, the government of the United States and the government of Saint Lucia signed an intergovernmental agreement (IGA) entitled, 'Agreement between the Government of the United States of America and the Government of St. Lucia to Improve International Tax Compliance and to Implement FATCA'. The IGA requires, in particular, the exchange of certain information with respect to US and Saint Lucia reportable accounts on an automatic basis, pursuant to the provisions of Article 4 of the Agreement between both Governments for the Exchange of Information with Respect to Taxes, done at Washington on January 1987 (the 'TIEA').

Multilateral Convention on Mutual Administrative Assistance in Tax Matters

Saint Lucia signed the Multilateral Convention on Mutual Administrative Assistance in Tax Matters in November 2016. Under the convention, Saint Lucia will exchange tax information based on Organisation for Economic Co-operation and Development (OECD) standards, but is not required to collect taxes on behalf of another country or provide assistance in the service of related documents.

Common Reporting Standard (CRS)

In November 2014, the G20 countries endorsed a new CRS for automatic exchange of information developed by the OECD. Under the CRS, foreign tax authorities will provide information to the IRD relating to financial accounts in their jurisdiction held by Saint Lucian residents. The IRD will, on a reciprocal basis, provide corresponding information to the foreign tax authorities on accounts held by residents of their jurisdiction in Saint Lucia. Saint Lucia has committed to implementing the CRS by September 2018.

Inclusive Framework (IF) on Base Erosion and Profit Shifting (BEPS)

In May 2018, Saint Lucia joined the IF on BEPS, becoming the 114th jurisdiction to do so. By joining the IF, Saint Lucia will work on creating an equal footing with all other IF members on the implementation of the BEPS package and on developing further standards to address the remaining BEPS issues. As a signatory to the IF, Saint Lucia has committed to implementing minimum standards related to:

- preferential regimes, including exchange of tax rulings (Action 5)
- treaty abuse (Action 6)
- country-by-country (CbC) reporting to tax authorities allied to wider transfer pricing documentation in Action 13, and
- improved mutual agreement procedures (MAP) for resolving disputes (Action 14).

Significant developments

Income tax

The Royal Decree No. (M / 131) dated 29/12/1438H (20 September 2017) has amended certain articles of the Law.

The key amendments are as follows:

Article 2: Persons subject to taxation

Persons subject to taxation also include a resident 'capital company' (includes a joint stock company and limited liability company) with respect to shares owned either directly or indirectly by persons operating in oil and hydrocarbon production.

Article 9: Intragroup transactions for certain assets

Intragroup transfers of cash, shares, financial securities, and other tangible and intangible assets can now be done tax neutrally. The 'cost base' of the relevant intragroup transactions will be at net book value to achieve the no gain no loss result.

Article 10: Tax exemptions extended

The types of income that are tax-exempt has been extended to include:

- Capital gains from the disposal of shares of a Saudi listed company that is listed on dual or multiple stock exchanges.
- Dividend income (cash or in kind) received by a Kingdom of Saudi Arabia (KSA) resident company from a foreign or KSA resident company, provided that:
  - the ownership in the company is 10% or more, and
  - the period of ownership is at least one year.

Article 17: Depreciation

The cost base of assets transferred or distributed between companies that are part of the same 'group' should be set at the net book value in line with Article 9 above.

Article 20: Contributions to authorised retirement funds

A capital company is now allowed to deduct its contribution to a retirement fund, a social insurance fund, or any other fund established for the purpose of settling employee end of service benefits or to meet staff medical expenses, provided they meet certain conditions.

It should be noted that there is a notification requirement to the General Authority of Zakat and Tax (GAZT) in order to claim any deduction of the contribution.

Article 43: Loss carry forward on change of ownership

Capital companies are now allowed to carry forward tax losses regardless of a change in the ownership or control in the company, provided the company continues to undertake the same activity. Previously, a change in control or ownership of 50% or more would result in carried forward tax losses being forfeited.

This amendment falls within the government's objective to encourage foreign investment.

The GAZT's right to information

The GAZT's right to obtain information from taxpayers now extends to the provisions of international bilateral/multilateral agreements.

Effective date

Amendments to Articles 2 and 20 are applicable from 1 January 2017.

All other amendments are effective from the commencement of the financial year immediately after the issuance of the said Royal Decree (i.e. for most companies it will be from 1 January 2018).

Amendments to the By-laws that provide further details concerning the above amendments have already been issued in February 2018.

Tax appeals

The Royal Decree No. (M / 113) dated 2/11/1438H (25 July 2017) has amended Articles 66 (objection and appeal) and 67 (formation and jurisdiction of preliminary objection and appeal committees) of the law.

The key amendments are as follows:

Article 66: Objection and appeal

The number of days within which to file an appeal against an assessment has been reduced from 60 days to 30 days.

The tax liability on the items not appealed is required to be settled before filing the appeal.

Article 66(f) relating to the appeal at the Board of Grievance (BOG) level has been deleted. As such, taxpayers will not be able to appeal further at the BOG level, and the decision of the Appeal Committee for Tax Violations and Disputes will be considered final.

Article 67: Formation and jurisdiction of preliminary objection and appeal committees

Two new appeal committees will be formed, namely: Committee for Resolution of Tax Violations and Disputes (CRTVD) appears functionally equivalent to the current Preliminary Appeal Committee, and Appeal Committee for Tax Violations and Disputes (ACTVD) appears functionally equivalent to the current Higher Appeal Committee.

The CRTVD and ACTVD will not hear any appeals filed after five years of the due date of liability under dispute or from the date of notification of disputed item unless there is a valid reason acceptable to the Appeal Committees.

The present structure of the Preliminary and Higher Appeal Committees will continue until the new Appeal Committees are formed.

France and KSA treaty application on royalty

In a recent tax case involving application of the provisions of the KSA and France double tax treaty (DTT), the Preliminary Appeal Committee has ruled in favour of a taxpayer resident in France with regard to application of withholding taxes (WHTs) on royalties.

In terms of the KSA domestic tax law, a 15% WHT rate is applicable on royalties paid from a KSA resident to a non-resident. However, based on the provisions of Article 8 of the KSA/France tax treaty, 'Royalties arising in KSA and paid to a resident of France shall be taxable in France'.

Accordingly, in the absence of any reduced WHT rates, no WHT should apply on payment of royalties from KSA to France. The GAZT initially challenged the approach of adopting no WHT on royalties paid to France; however, based on the Preliminary Appeal Committee decision, a ruling was made in favour of the taxpayer.

The above decision is significant for cases involving French companies with licensing and royalty arrangements with KSA residents.

Value-added tax

The KSA official VAT Law and VAT implementing regulations published on the GAZT website

Official VAT Law

The VAT Law was published by the GAZT on 28 July 2017 and entered into force from the start of the fiscal year following the date of its publication in the Official Gazette (i.e. 1 January 2018). The VAT Law is based on the VAT principles agreed upon in the Unified Gulf Cooperation Council (GCC) Agreement for VAT.

VAT registration

The VAT Law required taxpayers to register for VAT within 30 days from the date the law was published by the GAZT (28 July 2017). The VAT Law also required taxable persons to submit their advance VAT registration by 24 August 2017, although this was further extended to 20 December 2017.

VAT implementing regulations

Many details of the application of VAT, including specific VAT requirements, have been clarified in the implementing regulations.

In addition, the VAT regulations have been supported by user guides to help taxpayers in their understanding and interpretation of the legislation, as well as a number of advanced rulings as required, setting precedent for treatment of certain business-specific cases with regards to the application of VAT.

The Excise Tax Law for the Kingdom of Saudi Arabia published by the GAZT

The Excise Tax Law was published by the GAZT on 26 May 2017 and entered into effect on 11 June 2017. The implementation of excise tax by the Kingdom of Saudi Arabia follows the agreement of the GCC States on the GCC Unified Agreement for

Excise Taxes, which sets the common rules and principles of a region-wide excise tax system.

According to Article 6 of the Excise Tax Law, businesses that undertake any of the following activities must register for excise tax purposes:

- Import of excisable goods.
- Production of excisable goods.
- Acquisition of excisable goods under duty suspension arrangement.

The Excise Tax Executive Regulation, published on 6 June 2017, provides additional guidance regarding the application of the Excise Tax Law and taxpayers responsibilities in terms of registration and compliance. The regulations entered into force the same date as the Excise Tax Law (i.e. 11 June 2017).

See Value-added tax and excise tax in the Other taxes section for more information.

Taxes on corporate income

Only non-Saudi investors are liable for income tax in Saudi Arabia. In most cases, Saudi citizen investors (and citizens of the GCC countries, who are considered to be Saudi citizens for Saudi tax purposes) are liable for *Zakat*, an Islamic assessment. Where a company is owned by both Saudi and non-Saudi interests, the portion of taxable income attributable to the non-Saudi interest is subject to income tax, and the Saudi share goes into the basis on which *Zakat* is assessed.

According to the income tax law, the following persons are subject to income tax:

- A resident capital company to the extent of its non-Saudi shareholding.
- A resident non-Saudi natural person who carries on activities in Saudi Arabia.
- A non-resident person who carries out activities in Saudi Arabia through a permanent establishment (PE).
- A non-resident person who has other income subject to tax from sources within Saudi Arabia.
- A person engaged in natural gas investment fields.
- A person engaged in oil and other hydrocarbon production.
- A resident capital company with respect to shares owned either directly or indirectly by persons operating in oil and hydrocarbon production.

The rate of income tax is 20% of the net adjusted profits. WHT rates are between 5% and 20%. *Zakat* is charged on the company's *Zakat* base at 2.5%. *Zakat* base represents the net worth of the entity as calculated for *Zakat* purposes.

It should be noted that although the income tax rate is 20%, income from the following two activities is subject to different rates:

- Natural Gas Investment Tax (NGIT) shall be determined on the basis of the internal rate of return (IRR) on the cumulative annual cash flows of the taxpayer derived from natural gas investment activities. The rate applicable will be 30% if the IRR is 8% or less. The rate increases progressively up to 85% if the IRR equals or exceeds 20%.

- Income from oil and hydrocarbon production is subject to tax at a rate ranging from 50% to 85%.

Local income taxes

There are no local, state, or provincial government taxes on income other than the regular income tax or *Zakat* as mentioned above.

Corporate residence

A company is considered a resident company if it is formed under the Saudi Arabian Regulations for Companies or if its central management is located in Saudi Arabia.

Permanent establishment (PE)

According to the Saudi tax regulations, the following are the requirements for considering a non-resident party to have a PE:

- A PE of a non-resident in Saudi Arabia, unless otherwise provided below, consists of the permanent place of activity of the non-resident through which one carries out business, in full or in part, including business carried out through an agent.
- The following are considered a PE:
  - Construction sites, assembly facilities, and the exercise of related supervisory activities.
  - Installations or sites used for surveying for natural resources, drilling equipment, or ships used for surveying for natural resources, and the exercise of related supervisory activities.
  - A fixed location where a non-resident natural person carries out business.
  - A branch of a non-resident company that is licensed to carry out business in Saudi Arabia.
- A place is not considered a PE of a non-resident in Saudi Arabia if it is used in Saudi Arabia only to do the following:
  - Store, display, or deliver goods or products belonging to the non-resident.
  - Keep an inventory of goods or products belonging to the non-resident only for the purposes of processing by another person.
  - Purchase goods or products only for the collection of information for the non-resident.
  - Perform any other activities that are preparatory or auxiliary in nature for the interests of the non-resident.
  - Prepare contracts relating to loans, supply of products, or perform technical services for signature.
  - Execute any group of the activities mentioned above.
- A non-resident partner in a resident personal company is considered an owner to a PE in Saudi Arabia in the form of a share in a personal company.

Furthermore, the agent mentioned in the above article is identified as a dependent agent who has any of the following authorities:

- Negotiate on behalf of a non-resident.
- Conclude contracts on behalf of a non-resident.
- Has a stock of goods, owned by a non-resident, on hand in Saudi Arabia to supply the clients' demands regularly on behalf of the non-resident.

A place from which a non-resident carries out insurance and/or reinsurance activity in Saudi Arabia through an agent is considered a PE of the non-resident even though the agent is not authorised to negotiate and conclude contracts on behalf of the non-resident.

Other taxes

Value-added tax (VAT) and excise tax

VAT Law and implementing regulations have been published and are applicable from 1 January 2018.

VAT is imposed at a rate of 5% for most goods and services, with certain exceptions applicable.

The Excise Tax Law became effective on 11 June 2017 in Saudi Arabia, with only tobacco products (at 100%), soft drinks (at 50%), and energy drinks (at 100%) selected as goods subject to the excise tax in Saudi Arabia.

In order to comply with the Saudi Arabian Excise Tax Law, manufacturers and importers of excisable goods are required to register with the GAZT. Businesses that qualify to be under the scope of the Excise Tax Law that fail to register and comply with the guidance issued by the GAZT will be considered as tax evaders and will be imposed penalties.

Customs duties

Customs duties are imposed on imports according to tariff rates that are effective on the payment date in accordance with the Saudi Customs regulations. Customs duties are imposed on the price of the imported goods. This price is assessed based on the actual cost paid or on the agreed upon cost denominated in the currency of the exporting country. The price consists of the price of the imported goods as packed for shipping from the port of export plus freight and insurance cost to the Saudi port, which is converted to Saudi riyals at the exchange rates published by the Saudi Arabian Monetary Agency (SAMA) on the date of the declaration. In case this procedure is not achievable, the imported goods will be priced based on the most proximate comparable value that could be ascertained. Imported goods that are subject to customs duties based on weight are assessed based on the gross weight or the net weight as shown in the tariff schedules. The gross weight of the goods includes the goods weight, including all internal and external packing materials. Net weight of the goods excludes all internal and external packing materials, including the items used for separating and arranging the goods.

To encourage joint ventures in manufacturing, the government grants tariff protection from competing imports to locally produced, quality goods. Rates can be as high as 20%.

Penalties on smuggling goods vary from confiscation to collections of customs duties and penalties to imprisonment.

Payroll taxes

Since there is no individual income tax regime in Saudi Arabia, earnings from employment are not subject to income tax. Only the social insurance tax (*see below*) is applied on the payroll.

Social insurance tax

Social insurance tax is paid monthly based on (i) basic wage, (ii) cash or in-kind housing allowance, and (iii) commissions, with an upper limit of 45,000 Saudi riyals (SAR), is computed at 2% for non-Saudi employees, and is paid by the employer. For Saudi employees, the rate is 22% and is paid by both the employee (10%) and the employer (12%).

Based on Saudisation requirements, companies have to pay SAR 200 monthly per expatriate employee to the Labour Office for all the expatriate employees that exceed the Saudi national employees.

Other taxes

There is no form of stamp duty, transfer, sales, turnover, production, real estate, or property taxation except in so far as they may fall within the scope of *Zakat*, which is applicable only to Saudi nationals.

Branch income

Taxable income from a branch of a non-Saudi based corporation is taxed at 20%. Certain charges incurred by the headquarters are not deductible in the branch tax return.

Income determination

Inventory valuation

The weighted average-cost method is used for valuing inventory under Saudi tax law.

Capital gains

Capital gains are subject to income tax or *Zakat*, as appropriate, at the normal income tax or *Zakat* rate. However, capital gains realised from the disposal of shares in Saudi stock companies listed in the Saudi market are tax exempt, subject to certain conditions.

Dividend income

Dividend income that is received by a resident party is subject to income tax at the normal income tax rate. However, dividends paid to a non-resident party are subject to WHT at 5%.

Interest income

Interest income is subject to income tax at the normal income tax rate. However, interest paid to a non-resident party is subject to WHT at 5%.

Royalty income

Royalty income is subject to tax at the normal income tax rate. However, royalties paid to a non-resident party are subject to WHT at 15%.

Royalty is defined as per article one of the Saudi income tax law as follows:

“Payments received for use of or the right to use intellectual rights, including, but not limited to, copyright, patents, designs, industrial secrets, trademarks and trade names, know-how, trade secrets, business, goodwill, and payments received against the use of information related to industrial, commercial, or scientific expertise, or against granting the right to exploit natural and mineral resources.”

Imports and supply contracts

Saudi tax law provides that no profit will be considered to arise from a contract for the supply of goods to Saudi Arabia, provided delivery of the goods is either free on board (FOB) or cost, insurance, and freight (CIF) to a Saudi port. However, should the contract provide for the delivery and/or installation of materials at a point inside Saudi Arabia, the supplier may be considered to be carrying on business within Saudi Arabia, and, as a consequence, the contract may be subject to Saudi income taxation as follows:

- If the material cost was identified in the supply contract separately from the cost of work performed in Saudi Arabia, then, in the absence of a PE, a WHT on the work that will be performed in Saudi Arabia may be assessed, based on the type of services. However, if the contract qualifies the supplier to have a PE in Saudi Arabia, then income tax will be applied according to the Saudi tax regulations as for a normal taxpayer.
- If the supply contract indicates a total cost without segregation in the value of supply and the value of the other activities in Saudi Arabia, then the work performed in Saudi Arabia will be assigned a value equal to 10% of the contract value for each type of activity.

Foreign income

The gross income derived by a capital company resident in Saudi Arabia from its operations and of its branches inside and outside Saudi Arabia is subject to tax in Saudi Arabia. However, in order to avoid double taxation on the same income, the following exceptions and clarifications are to be considered:

- With respect to the income realised from investments in other resident capital companies and foreign capital companies (foreign dividends applicable from 1 January 2018) and in order to avoid double taxation, such income is to be excluded from being subject to tax under the following conditions:
  - The percentage of ownership in the company invested in is not less than 10%.
  - The period of ownership of shares is not less than one year.

Previously (up to 31 December 2017), foreign dividends were taxable unless a DTT provided relief.

There are no restrictions on repatriation of profits, fees, capital, salaries, or other monies.

Deductions

All expenses that are necessary and normal to the business, paid or accrued, are allowable deductions, provided the expense meets the following conditions:

- It is an actual expense, supported by a verifiable document or other qualifying evidence.
- It is related to the generation of taxable income.
- It is related to the subject tax year.
- It is of a non-capital nature.

Depreciation

A depreciation deduction is allowed under the following limitations as stipulated by the law:

- The asset is not intended for resale and is to be used, in full or in part, for the entity's purposes.
- The asset is of a depreciable nature that loses value because of use or because of wear and tear and obsolescence and has a value extending beyond the end of the taxable year.
- The asset is owned by the business, as per the ownership document for buildings and contracts and invoices for other assets.
- The asset depreciation is allowed even if the asset becomes inactive during the tax year.

Depreciation for tax purposes is calculated as follows, based on the following five categories of depreciable tangible or intangible assets, other than land:

Asset category	Depreciation rate (%)
Fixed buildings	5
Industrial and agricultural movable buildings	10
Factories, machines and equipment, computer application programs, passenger cars, and cargo vehicles	25
Expenditures for geological surveying, drilling, exploration, and other preliminary work to exploit and develop natural resources and their fields	20
All other tangible or intangible assets not included in previous categories, such as furniture, planes, ships and trains, and goodwill	10

The declining-balance method of depreciation, according to the above rates, should be followed for tax purposes. However, straight-line depreciation is allowed for *Zakat* payers as per Zakat regulations.

There are also rules for depreciation relating to assets either acquired or disposed of. Essentially, 50% of the allowable acquisition price or disposal proceeds is added to or subtracted from the asset pool in the first year, and the remaining 50% in the following year.

From 1 January 2018, the cost base of assets transferred or distributed between companies that are part of the same group should be set at the net book value.

Assets under build, own, and transfer (BOT) and build, own, operate, and transfer (BOOT) are allowed to be depreciated over the contract period. This presumes, although it is not clear, that assets under the BOT and BOOT schemes actually will have a separate grouping in addition to the above prescribed groups.

Start-up expenses

Tax treatment of start-up expenses depend on how they were treated under Saudi generally accepted accounting principles (GAAP). Generally, they can be fully expensed in the first financial year or can be capitalised and amortised.

Loan charges (interest expenses)

An interest deduction is limited to the lower of the loan charge incurred during the tax year, if related to income that is subject to tax, or the result of the following formula, whichever is less.

The taxpayer's total income from loan charges, plus 50% of (A minus B) as below:

A = income subject to tax other than income from loan charges.

B = expenses allowed under the law other than loan charge expenses.

Note that banks are not subject to this formula.

Bad debt

Bad debts are deductible, provided they meet all of the following conditions:

- The bad debt was previously declared in the appropriate year's income.
- The debt resulted from sale of goods or services.
- The company holds a certificate from the taxpayer's certified public accountant (CPA) certifying that the debt has been written off in the taxpayer's books and records, based on a decision by the taxpayer at the appropriate management level.
- Serious efforts have been exerted by the taxpayer to collect the debt with no success and the inability of the debtor to pay has been proved based on a judicial ruling or bankruptcy.
- The debt is not from a related party.
- There is a commitment by the taxpayer to reinstate, as income, any written-off debt whenever collected.

Charitable contributions

In determining the tax base of each taxpayer, a deduction is allowed for donations paid during the taxable year to public agencies or philanthropic societies licensed in Saudi Arabia, which are non-profit organisations and are allowed to receive donations.

Allocations and reserves

Allocations and reserves formed during the year are deductible as follows:

- Bank allocations to a reserve fund for doubtful debts are allowable deductions. However, a bank must submit a certificate from the SAMA stating the amount of doubtful debts and the amount of doubtful debts collected during the year that should be reinstated in the tax base of the year of collection.
- Insurance/reinsurance companies may deduct, based on industry standards, a reserve for unearned premiums and for unexpired risks, provided that it is reported in the tax base of the following year.

A reserve for unearned premiums means a part of premium amounts collected or stated in books that covers risks related to the future tax year(s). A reserve for unexpired risks mean the amount of compensation claimed or reported, but for which the payment process falls short of completion during the tax year.
- A taxpayer may reduce its book profit by the amount of reserves used during the year that had been readjusted when made to increase income or decrease expenses in the year of formation. Examples of such reserves are end-of-service awards, doubtful debt, and drops in prices. Such amounts are deductible, provided the following conditions are met:
  - The used amount was paid or accrued during the year, and it is supported by documentation.
  - The reserve had been adjusted in the year of formation to increase the tax base.

School fees
School fees paid by taxpayers for their employees' children are deductible expenses, provided they meet the following conditions:

- They are paid to a local licensed school.
- This benefit is stated in the employment contract.

Pension fund
Employers' contributions to employees' pension funds or savings funds established under Saudi Arabia's rules and regulations are deductible, provided that such contribution, one payment or in aggregate, is not in excess of 25% of the employee's income before the employer's contributions and that the fund meets the following criteria:

- The fund is established according to special provisions that clearly stipulate conditions of subscription and rights of subscribers.
- Such obligation is stated in the employment contract or in the Articles of Association of the establishment.
- The fund has a character independent of the establishment and has separate accounts audited by an independent CPA.

A capital company is allowed to deduct its contribution to a retirement fund, a social insurance fund, or any other fund established for the purpose of settling employee end-of-service benefits or to meet staff medical expenses, provided they meet certain conditions. It should be noted that there is a notification requirement to the GAZT in order to claim any deduction of the contribution.

Research and development (R&D)
A deduction is allowed for R&D expenditure incurred during the tax year in connection with the generation of income that is subject to tax. Such expenditure relates to technical, scientific, and engineering experiments; computer systems; or similar research. This provision does not apply to the acquisition of land and facilities, or to equipment used for research. Such facilities and equipment are subject to depreciation under the law.

Fines and penalties
Fines and penalties related to income tax, paid or payable in Saudi Arabia or to other countries, are not deductible.

Financial fines or penalties paid or payable to any party in Saudi Arabia, such as traffic fines or fines for causing damage to public utilities, are also not deductible.

Fines or penalties paid for breach of contractual obligations, such as fines on delayed or defaulted completion of contracts, are deductible, provided they are documented by the contracting party and the income from such penalties is reported in the year of recovery.

Taxes

Income taxes are not deductible.

Non-deductible expenses

The following expenses are non-deductible:

- Wages, salaries, and whatever is so deemed, in cash or in kind, paid to an owner, partner, or shareholder, or to a member of their families, being a parent, spouse, sons/daughters, and siblings (this provision does not apply to stockholders in a stock company).
- Compensation in cash or in kind paid to a partner, shareholder, or to a family member, including a parent, spouse, sons/daughters, and siblings, for a property or service to the extent that the compensation is higher than the fair market value of such property or service at time of transaction.
- Entertainment expenses incurred for events such as parties, sports competitions, entertainment trips and activities, etc.
- Expenses of a natural person for personal consumption, such as personal withdrawals, dependants' cost of living, or education.
- Any bribe or similar payment, which is considered an illegal practice in Saudi Arabia, even if paid abroad.
- Insurance commission in excess of 3% of total premiums collected in Saudi Arabia through an agent or others and regardless of whether or not the agent is a partner.

Net operating losses

A taxpayer may carry forward operational losses, as adjusted, to the years following the loss year until the cumulative loss is fully offset. The maximum profit percentage of any year that could be used to offset cumulative losses should not exceed 25% of the year's taxable profit as reported in the taxpayer's return. Carryback of losses is not allowed.

Payments to foreign affiliates

Payments made to headquarter offices located abroad by wholly owned local subsidiaries or branches are not deductible. Such payments include:

- royalties or commissions
- loan charges (interest expense) or any other financial fees (except loan charges paid by branches of foreign banks in Saudi Arabia to their non-resident head offices, which are considered as tax deductible expenses), and
- indirect administrative and general expenses allocated on an estimated basis.

The value of goods or services delivered to the taxpayer by related parties is not deductible to the extent that it is in excess of an arm's-length value.

Group taxation

Double taxation on the income of foreign investors realised from their investments in other resident companies is eliminated under the following conditions:

- Such income was subjected to tax in Saudi Arabia.
- The percentage of ownership in the company invested in is not less than 10%.
- The period of ownership of shares is not less than one year.

With respect to the income realised by a resident capital company from its investments and operations outside Saudi Arabia, it will be subject to tax in Saudi Arabia (unless an effective DTT between Saudi Arabia and the country invested in stipulates different provisions).

However, from 1 January 2018, dividend income (cash or in kind) received by a resident company from a foreign or resident company is exempt, provided that:

- the ownership in the company is 10% or more, and
- the period of ownership is at least one year.

For *Zakat* purposes, the concept of consolidation is acceptable and relief may be obtained for wholly owned subsidiaries by Saudi/GCC companies that are subject to *Zakat*.

Note that an entity operating in Saudi Arabia that has undertaken more than one project under the same commercial registration is required to consolidate the results of such projects into the financial statements of that entity and subject them to taxation as a single operation.

Transfer pricing

There are no specific transfer pricing rules in Saudi Arabia that impose or deem a charge to arise where the GAZT has reason to believe that a transaction has taken place at a value other than on an arm's-length basis. However, there is a generic provision that allows the GAZT to re-characterise or re-allocate income or expenses arising from a transaction if it is undertaken for the purposes of avoiding or reducing a tax liability in Saudi Arabia.

In addition to the above and based on the Ministerial Resolution (No. 1776) dated 19 March 2014, the GAZT is to issue guidelines/regulations on transfer pricing of transactions between related parties in accordance with the internationally accepted standards.

Thin capitalisation

There is no special legislation governing thin capitalisation for tax purposes. A Saudi company may deduct interest payments to affiliates, but not the head office, provided that the amount of debt and rate of interest are at arm's length and that the interest deductibility formula is met. A Saudi company may be financed with minimum capital, and there is no limit to the amount of debt that may be used.

Controlled foreign companies (CFCs)

There are no special rules for CFCs in Saudi Arabia. However, *as mentioned above*, the gross income derived by a capital company resident in Saudi Arabia from its operations and branches outside Saudi Arabia is subject to tax in Saudi Arabia.

Tax credits and incentives

Foreign tax credit

Income tax and related fines and penalties paid or payable to Saudi Arabia or to other countries are non-deductible expenses.

Incentives for investment in less-developed regions

The government of Saudi Arabia has granted tax concessions to the following six less-developed regions in Saudi Arabia, with the intention of attracting more investment:

- Ha'il.
- Jazan.
- Najran.
- Al-Baha.
- Al-Jouf.
- Northern territory.

These tax privileges are granted for a period of ten years from the start of any project.

The qualifying investing company's annual tax bill may be reduced by:

- Half the annual training expenditure on Saudis.
- Half the annual salaries paid to Saudis.
- 15% of the non-Saudi capital share, subject to certain conditions.

More deductions are granted if investment capital for any project exceeds SAR 1 million and if more than five employees of Saudi nationality have jobs of a technical or administrative nature with contracts of at least one year.

Customs incentives

An exemption from customs duties is available on machinery and raw materials that are required for approved projects, provided that they are not available in the local market. Such exemptions should be applied for prior to their importation and are subject to certain terms.

Withholding taxes

Payments made from a resident party or a PE to a non-resident party for services performed are subject to WHT. The rates vary between 5%, 15%, and 20% based on the type of service and whether the beneficiary is a related party.

The WHT should be paid within the first ten days of the month following the month during which the payment was made.

The domestic rate for WHT is 5% on dividends, 5% on interest, and 15% on royalties.

Tax treaties

Saudi Arabia has entered into tax treaties with several countries. Treaties currently or about to be in force are listed below. A number of other treaties are at various stages of negotiation.

DTTs have not yet been effectively tested in Saudi Arabia. However, they generally follow the Organisation for Economic Co-operation and Development (OECD) Model Treaty and may provide certain relief, including WHT on dividends, interest, and royalties.

The following are the treaty WHT rates for payments made from Saudi Arabia to treaty country recipients. Each tax treaty should be studied carefully because there could be exceptions to the general rules.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	5	5	15
Treaty:			
Algeria	0	0	7
Austria	5	5	10

Notes

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that has owned, directly or indirectly, at least 25% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
   - 10% of the gross amount of the dividends in all other cases.
2. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
3. Shall not exceed:
   - 5% of the gross amount of dividends if the beneficial owner is (i) a company or (ii) an entity wholly owned by the government.
   - 10% of the gross amount of the dividends in all other cases.
4. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
5. Shall not exceed:
   - 5% of the gross amount of the dividends.
   - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends.
6. Shall not exceed:
   - 5% of the gross amount of the dividends:
     - if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends or
     - if the beneficial owner is central bank or an entity that is wholly owned by the government.
   - 10% of the gross amount of the dividends in all other cases.
7. Shall not exceed:
   - 15% of the gross amount of the dividends where qualifying dividends are paid by a property investment vehicle.
   - 5% of the gross amount of the dividends in all other cases.
8. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 50% of the capital of the company paying the dividends, or has invested 20 million United States dollars (USD) or more, or any equivalent currency, in the capital of the company paying the dividends.
   - 12.5% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company that holds, directly or indirectly, during the period of 183 days ending on the date on which entitlement to the dividends is determined, at least 10% of the voting shares or of the total issued shares of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
10. Shall not exceed:
    - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    - 10% of the gross amount of the royalties in all other cases.

11. Shall not exceed:
    - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    - 8% of the gross amount of the royalties in all other cases.
12. Shall not exceed:
    - 7.5% of the gross amount of such royalties that are paid for rendering of any services or assistance of a technical or managerial nature.
    - 10% of the gross amount of such royalties in all other cases.
13. Shall not exceed:
    - 5% of the gross amount of the dividends.
    - The contracting state of which the company paying the dividends is a resident shall exempt from tax the dividends paid by that company to a company (other than a partnership) that is a resident of the other contracting state, as long as it directly holds at least 25% of the capital of the company paying the dividends or when paid to the government, the central bank, or any institution, agency, or fund wholly owned by the government of Ireland.
14. Shall not exceed:
    - 5% of the gross amount of the royalties that are paid for the use of, or the right to use, industrial, commercial, or scientific equipment.
    - 7% of the gross amount of the royalties in all other cases.
15. Shall not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner directly holds at least 20% of the capital of the company paying the dividends.
    - 15% of the gross amount of the dividends in all other cases.
16. Shall not exceed:
    - 2.5% of the gross amount of income from debt-claims for banking institutions.
    - 5% of the gross amount of income from debt-claims in all other cases.
17. The GAZT informed a taxpayer in a case where a royalty was paid by a Saudi company to an unrelated, third party that it was also taxable in Saudi Arabia, and requested settlement of 15% WHT, indicating that Saudi Arabia has the taxing right. However, the GAZT recently agreed to provide WHT relief under the treaty provisions.
18. Shall not exceed:
    - 5% of the gross amount of dividends if the beneficial owner is the government of the other contracting state, the central bank of that other contracting state, or any entity wholly owned by the government of that other contracting state.
    - 5% of the gross amount of dividends if the beneficial owner of dividends has invested to the capital of the company paying the dividends at least USD 300,000 or its equivalent in any other currency.
    - 7% of the gross amount of dividends in all other cases.
19. Shall not exceed:
    - 0% if income from debt-claims arising in a contracting state and paid to the government or the central bank of the other contracting state or any entity wholly owned by the government of that other contracting state or under a loan agreement approved by the government shall be exempt from tax in the first-mentioned contracting state.
    - 7% of the gross amount of income from debt-claims in all other cases.
20. Shall not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends or if beneficial owner is:
        - in the case of Saudi Arabia, the state, a political or administrative subdivision, or a local authority thereof (including The Saudi Arabian Monetary Agency) and wholly owned state entities and
        - in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Portugal.
    - 10% of the gross amount of the dividends in all other cases.
21. Shall be taxed only in the contracting state of which recipient is a resident if such income is paid to and beneficially owned by:
    - in the case of Saudi Arabia, the state, a political or administrative subdivision, or a local authority thereof (including The Saudi Arabian Monetary Agency) and wholly owned state entities and
    - in the case of Portugal, the state, a political or administrative subdivision, or a local authority thereof, or the Central Bank of Portugal.
22. Income from debt-claim arising in a contracting state shall be exempted from tax in that contracting state if the payer/beneficial owner of such income is the government of the other contracting state, an administrative subdivision or a local authority, or the Central Bank or any other financial institution wholly owned by the government of that other state.
23. Shall not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the company paying the dividends.
    - 10% of the gross amount of the dividends in all other cases.
24. Income from debt-claim arising in a contracting state shall be exempted from tax in that contracting state if the payer/beneficial owner of such income is the government of the other contracting state.

The GAZT offers a choice of automatic application of relevant tax treaty without going through the refund procedure. The choice is given to Saudi Arabia residents or PEs of non-residents that make payments subject to WHT in Saudi Arabia.

They can apply reduced rates or full relief upon making the payment. The following conditions are imposed on taxpayers that choose to apply DTT automatically:

- Report, via monthly WHT returns, the full details of each payment made to non-resident parties (beneficiaries).
- Still file a request form for application of DTT together with tax residence certificate of the beneficiary.
- Undertake full responsibility for any understatement of tax, including penalties.

As mentioned above, the GAZT provides a choice; taxpayers can still withhold tax and comply with the refund procedure.

The GAZT's view on virtual PE

Usually, a treaty's articles do not address technical services (except Vietnam/Malaysia, where it is part of royalties), so the source country should not have a taxing right unless a PE is created by the non-resident in Saudi Arabia. Also, the treaty with Spain does not have a 'service PE' article. Effectively, the provision of technical services provided totally outside Saudi Arabia or other services not defined should be taxable only in the country of residence.

However, an internal circular issued by the GAZT should be taken into consideration when applying WHT refund claims by non-residents. The circular relates to the interoperation of services PE (article 5(3)(b), not OECD but the United Nations [UN] model).

Tax administration

Taxable period

Tax filings are based on the company's fiscal year.

Tax returns

Returns are due to be filed with the GAZT within 120 days after the taxpayer's year-end. The system is one of self-assessment.

According to the tax authority, companies that are owned by Saudis only, or by Saudis and non-Saudis, must file audited financial statements along with the tax return.

Payment of tax

Final tax due must be paid within 120 days after the taxpayer's year-end.

Three equal advance tax payments are required to be made on the last day of the sixth, ninth, and 12th months for a current tax year, provided that the taxpayer has earned income during the year. Each advance payment is equal to 25% of the amount resulting from the taxpayer's tax liability based on the previous year return minus the withheld tax on reported income, if any. The taxpayer is not required to make advance tax payments if the result of the said formula is less than SAR 500,000. Late payment of an advance payment is subject to a delay penalty of 1% of the amount due for every 30 days of delay.

Tax audit process

There is no specific audit process followed by the GAZT; however, the most common ways for the GAZT to select companies for tax audits are the size of the company, the companies' shareholders nationality (totally owned by foreigners and branches of foreign companies), and certain risk assessment measures.

Statute of limitations

The GAZT may, with a reasoned notification, make or amend a tax assessment within five years from the end of the deadline specified for filing the tax declaration for the taxable year, or, at any time, upon a written consent of the taxpayer.

The GAZT may make or amend an assessment within ten years of the deadline specified for filing the tax declaration for the taxable year if a taxpayer does not file its tax declaration or it is found that the declaration is incomplete or incorrect with the intent of tax evasion.

A taxpayer may request a refund of overpaid amounts at any time within five years from the end of the overpaid taxable year.

Topics of focus for tax authorities

The GAZT emphasises the submission of a certificate from the General Organisation for Social Insurance (GOSI) along with a reconciliation statement between salaries and wages subject to GOSI and salaries and wages charged to the taxpayer's accounts duly certified by a Saudi licensed CPA.

The GAZT focuses on the payments made to non-resident parties to verify compliance with the WHT regulations by requesting a reconciliation statement for such payments with the annual WHT form.

The GAZT has also been requesting import value lists from the Customs Authority in order to confirm the value of goods imported and declared by taxpayers in their annual declarations during the financial period.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

Saudi Arabia signed a Model 1 Intergovernmental Agreement (IGA) in light of the FATCA dated 24 June 2014. The draft regulations were issued in February 2012 and the final regulations were released on 17 January 2013 with an amendment to some of the deadlines issued through a notice on 12 July 2013.

On 6 February 2017, the Saudi Arabian Cabinet formally approved the IGA between Saudi Arabia and the United States to improve international tax compliance and implement the FATCA. The IGA and related implementing regulations will reduce the burden for financial institutions and remove some of the implementation issues faced by Saudi Arabia financial institutions, including the legal impediments related to data protection and reporting restrictions.

Under the IGA, Saudi-based financial institutions will be treated as compliant with the FATCA and should not be subject to a 30% WHT on US-source income and gross proceeds unless a financial institution fails to meet the requirements set out in the IGA and Saudi implementing regulations.

The IGA, signed on 15 November 2016, requires financial institutions to report US reportable accounts to the local competent authority, which is the GAZT. In case of non-compliance with IGA requirements, the GAZT may subject the relevant financial institutions to penalties.

Common Reporting Standard (CRS)

On 2 November 2016, the OECD announced that the Kingdom of Saudi Arabia joined the CRS Multilateral Competent Authority Agreement (MCAA), committed to the first exchange of financial account information by September 2018 (2018 adopter).

Applicable for individuals and legal entities, it aims to give participating countries transparency on the financial assets that residents hold offshore.

The CRS requires financial institutions to identify customer tax residencies and report to local tax authorities financial accounts held directly or indirectly by foreign tax residents. It also requires those tax authorities (in participating countries) to exchange this information.

If you are tax resident of a country other than the Kingdom of Saudi Arabia or where you maintain your bank account, then under the CRS, KSA-based financial institutions may be required to provide details, including information relating to accounts, to the tax authority in the country of your tax residency through the GAZT in the Kingdom of Saudi Arabia. In case of non-compliance, the GAZT may subject the relevant financial institutions to penalties.

Significant developments

Amendments to the General Tax Code (GTC)

In March 2018, the Parliament approved a government bill introducing significant amendments to the GTC (Law No. 2018-10 of 30 March 2018 amending the GTC).

Key changes of the law are discussed below:

- Introduction of the Local Economic Contribution (*Contribution Economique Locale* or CEL), which will substitute for the business license tax. The CEL is made of two different taxes: The company's properties contribution (*contribution sur la valeur locative des locaux professionnels*) and the company added value contribution (*contribution sur la valeur ajoutée*). *See the Other taxes section for more information*.
- Further developments on transfer pricing regulations arising from Base Erosion and Profit Shifting (BEPS) Action 13, such as country-by-country (CbC) reporting, the automatic exchange of CbC reporting, and light transfer pricing documentation. *See the Group taxation section for more information*.
- Companies will face more stringent legislation in regards to the deductibility of interest paid to a shareholder upon a loan or account advances (extension of the limitation to interests paid to a related party, fully paid-up capital for all type of company, deferral mechanism of non-deductible interests, etc.)
- Extension of the withheld VAT regime (*Précompte de TVA*) until 2020.
- Changes will occur on excise taxes (introduction of a tax on plastic bags, increasing of the tax rate applicable to oil products, extension of the scope of tax levied on beverages to juices).
- New requirements are provided for the bank industry (limitation concerning the withholding tax [WHT] on income derived from investments and securities, extension of declarative obligations).
- Introduction of tax incentives:
  - Agricultural industry (VAT exemption with a right to deduct, VAT refund on energy consumption).
  - Oil and gas companies (deductibility of provisions, exemption of the minimum CIT and the tax on built real estate).
  - Renewable energy (30% tax credit, VAT exemption on production).

Taxes on corporate income

Branches and companies are liable for corporate income tax (CIT) at the rate of 30%.

Senegal

Residents are taxed upon their worldwide income. Non-residents are generally taxed via the existence of a permanent establishment (PE) on Senegal-source income.

WHTs may also apply to non-residents, as per the services delivered to Senegalese taxpayers, subject to the application of a double tax treaty (DTT).

Minimum CIT

A minimum CIT is due, in case of lack of profits, at the rate of 0.5% applied on the annual turnover. The minimum amount cannot be less than 500,000 *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF), and the maximum amount cannot be more than XOF 5 million.

Local income taxes

See the Other taxes section for a description of local taxes based on turnover and property.

Corporate residence

Companies are considered as Senegalese residents if they have a registered fixed establishment. Nonetheless, foreign companies that are not registered locally may be deemed to have a PE in Senegal in relation to their local activity and will then be subject to tax liabilities.

Permanent establishment (PE)

The criteria for a PE were derived from the former GTC and are close to the Organisation for Economic Co-operation and Development (OECD) standards. The current GTC does not include a PE provision, but the former one should be applicable. DTTs can be applicable and can provide specific definitions. These DTTs are based on the OECD model in most cases. *See the Withholding taxes section for a list of countries with which Senegal has concluded DTTs*.

Other taxes

Value-added tax (VAT)

Subject to certain exclusions, most commercial operations are subject to an 18% VAT.

VAT on tourism activities is 10%.

A 17% special tax on financial activities (mainly banking, money transfers, and change operations) is applicable instead of VAT.

VAT returns must be filed monthly.

Customs duties/Import tariffs

In the case of import of goods, the following tariffs apply:

- Customs duties: 0%, 5%, 10%, or 20%, depending on the nature of the goods.
- Statistical import charge: 1%.
- Community solidarity levy: 0.8% since 1 July 2017 (1% before July 2017).
- Economic Community of West African States (ECOWAS) levy: 0.5% (only applicable to products originating from non-ECOWAS countries).

- Senegalese Shippers Council (COSEC) royalty: 0.4% (only applicable on importation by sea).

Excise taxes

The products on which the Senegalese authorities levy excise tax, and the relevant excise tax rates, are as follows:

- Beverages: 40% for beverages containing alcohol, plus an additional tax ranging from XOF 1,500 to XOF 5,000 per litre; 5% for sparkling beverages and juices.
- Tobacco: 45%.
- Coffee: 5%.
- Tea: 5%.
- Fat: Rate varies from 10% to 15%.
- Private cars with a horsepower (tax engine rating) superior to 13CV: 10%.
- Cosmetic products: 10% (increased to 15% for depigmentation products).
- Oil products (rates per nature and per hectolitre): XOF 21,665 for super-petrol, XOF 19,847 for conventional petrol, XOF 3,856 for petrol for the use of pirogues, XOF 10,395 for diesel.
- Plastic bags: XOF 3 per gram.

Tax on built real estate

The tax on built real estate applies annually to owners of buildings other than factories and industrial premises. Companies are no longer liable to the tax on built real estate on their properties listed in the balance sheet.

The tax rate is 5%. It is applied on the basis of the rental value of the lands, buildings, etc.

Tax on non-built real estate

The tax on non-built real estate applies annually to owners of land without buildings, factories, industrial premises, or equipment fixed on the land. The tax rate is fixed at 5%. It is applied on the basis of the rental value of the land.

Stamp/registration duties

There are many stamp and/or registration duties, depending on the operations, such as the following:

Operation	Stamp and/or registration duty
Commercial, house, or equipment lease	2% applicable on the basis of the annual rent
Transfer of real estate	5% on the sales price
Transfer of debt	1% on the debt value
Pledge	1% on the guarantee value
Increase of the capital in cash	1% of the increase where the share capital is greater than XOF 100 million
Transfer of business	5% on the sales price
Transfer of shares	1% on the sales price (or the market value if higher)

Senegal

Payroll taxes

Pay-as-you-earn (PAYE)

All compensation (including salary, cash allowances, and benefits in kind) paid to employees is generally taxable. For the calculation of the personal income tax (PIT) to be withheld by the employer, the tax administration provides a tax table determined on a monthly basis so that no calculation is necessary.

Employer tax

Employers are subject to a 3% tax based on the total gross salaries paid to employees.

Social Security contributions

Social Security contributions are borne exclusively by the employer.

The rate for the industrial accident/occupational disease branch has to be confirmed by the authority when registering the entity with the Social Security Office (applicable rate to be stated within the related certificate).

Sector	Rate of contributions (only payable by employers) (%)	Maximum monthly basis of calculation (XOF)
Family	7	63,000
Industrial accident / Occupational disease	1/3/5	63,000

Retirement contributions

Retirement contributions are payable both by the employer and the employees:

	Rates of contributions (%)		
Regime	Payable by employers	Payable by employees (withheld on the salary)	Maximum monthly basis of calculation (XOF)
General	8.4	5.6	360,000
Executive	3.6	2.4	1,080,000

Employment medical coverage

The employer shall subscribe for all employees a medical coverage. The level of coverage depends on the type of agreement concluded with the dedicated organism. Usually, the employee is reimbursed for 80% of medical expenses, even though the law provides a range between 50% and 80%.

The maximum monthly rate is 15%, to be levied on a contribution rate that cannot exceed XOF 250,000, for both the employee and the employer.

Local Economic Contribution (Contribution Economique Locale or CEL)

The CEL is a new contribution replacing the business license tax and consisting of two different taxes:

- the company's properties contribution, and
- the company value added contribution.

The company's properties contribution is assessed annually on the rental value of the company's business premises. The rental value corresponds to 7% of the cost price.

The applicable rates are 15% for leases premises and 20% for owned premises, lands, and installations.

The company added value contribution is based on the added value produced by a company during the previous year. The tax rate is 1%. An upper ceiling of 70% of the turnover applies to the company added value contribution.

Specific tax rates are provided for companies such as operators of public telecommunication networks licensed in Senegal (0.30%) and port facility operators (1.5%).

Tax on telecommunication

The tax rate is 5% on telecommunication use and access. To offset the tax, the purchase of mobile telephones (and other types of telephones) remains exempt from VAT and customs duty.

There are also two specific taxes payable by companies in the telecommunications sector. These taxes represent 3% (for the tax called 'CDE') and 1% (for the tax called 'PST') of the annual turnover less the payments made to other operators for networking services.

Tax on vehicles

An owner of a motor vehicle (car, truck, or motorbike) must pay an annual tax fixed at XOF 1,000 per hectolitre, except for the pirogue gasoline.

Company tax on vehicles

In addition to the tax on vehicles, companies owning or renting vehicles (more than 15 days a year) must pay a specific annual tax on them. Rates range from XOF 50,000 to XOF 200,000, depending on the type and horsepower of the vehicle.

Branch income

In general, the tax on branch income is similar to that of corporate income. Nonetheless, a 10% duty is automatically applied to profits generated after CIT. It corresponds to an automatic application of the 10% tax on payment on dividends applicable to a company.

Headquarter expenses, which are a proration of the worldwide office expenses, may be allocated to the Senegal branch. This proration is based upon a ratio of the local turnover of the branch and the worldwide turnover of the parent company. It applies to the total amount of headquarters' expenses incurred by the company. In addition, the deductibility of headquarters' expenses is limited to 20% of the accounting profits before the deduction. This limitation does not apply to other types of services provided by headquarters, such as technical assistance.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) are permitted. Book and tax conformity is required.

Capital gains

Capital gains derived from the transfer of assets are subject to the 30% CIT. There is no basket system. Sales of stocks by a non-resident are liable to the 30% CIT, subject to the application of a DTT.

Dividend income

If a parent company domiciled in Senegal owns 10% of the subsidiary (main condition for the application of the parent-subsidiary corporation special taxation status), a 95% reduction on the dividends received is applicable for CIT purposes.

If these conditions are not met, dividends received by a company are subject to CIT as follows:

- 40% of the dividends are added back to the taxable profit.
- The company benefits from a tax credit upon the CIT equal to 40% of the tax on distributions withheld (at the general WHT rate of 10%).

Stock dividends

Stock dividends are unusual in Senegal. However, this kind of distribution would be taxable at the general WHT rate of 10% on the basis of its real value.

Interest income

Article 105 of the GTC provides a list of interests that are not subject to CIT. For instance, the following are not subject to CIT:

- Interest on sovereign debt.
- Interest on deposit accounts opened at the Housing Bank of Senegal (*Banque de l'Habitat du Senegal*).
- Interest on loans granted by the Central Bank.

Royalty income

There are no specific provisions for royalty income. In general and in case of foreign payment, they are subject to 20% WHT (subject to a DTT that can limit or exempt the WHT), and in any case to 18% reverse VAT.

Foreign income

In general, profits generated in Senegal are taxed under Senegal's income tax law. Profits generated outside Senegal and constituting a PE in the relevant country are not taxed in Senegal. A DTT can provide different rules.

Deductions

Depreciation and depletion

The rates of depreciation are not provided by the law. The rate is determined on the normal and predictable duration of use of the asset by taking into account normal wear and tear. In practice, there are standard rates for common assets. Accelerated depreciation can be applicable, subject to conditions.

Goodwill

There are no provisions in Senegal for goodwill.

Start-up expenses

Start-up expenses are deductible if justified and approved by the shareholders.

Interest expenses

Interests on current account advances or loans from a shareholder (directly or indirectly) or a related party are subject to restrictions as to their deduction from taxable income:

- The share capital of the company receiving the loan or advance shall be, beforehand, fully paid.
- The amount of the loan or advance shall not exceed the share capital of the company receiving it. It is not an individual but an overall ceiling on the total amount of loans and advances of all shareholders and seniors.
- The rate of interest shall not exceed the rate of advance of the Institute of Emissions plus 3 points. The rate published by the Ministry of Economy and Finance for 2017 is 3.5437%.

Bad debt

There are no provisions in Senegal for bad debt.

Charitable contributions

Only payments made to specific chartered organisations are deductible, at a rate of up to 0.5/100 of turnover. On the contrary, payments made to non-chartered organisations are not deductible.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

CIT and the company tax on vehicles are not deductible.

Other significant items

Provisions are deductible if they correspond to a risk or a probable cost that is more than possible and leads to a decrease in the assets. Provisions for paid holidays and retirement compensation are not deductible.

Net operating losses

Tax losses may be carried forward to the next three years. Losses corresponding to the depreciation of assets can be carried forward indefinitely. The carryback of losses is not allowed.

Payments to foreign affiliates

Reasonable royalties, interest, and management service fees paid to foreign parent companies are deductible. Supporting documents (e.g. invoices, contracts) will be necessary to prove that these expenses are justified.

Group taxation

Group taxation is not permitted in Senegal.

Transfer pricing

The transfer pricing regulations globally correspond to the OECD requirements standards (i.e. identifying related-party transactions, choosing the suitable transfer pricing method, and preparing documentation to support the selection of such method).

Companies with an annual turnover or amount of gross assets of at least XOF 5 billion are required to make available documentation upon a tax audit. This applies when the company directly or indirectly owns more than 50% of the share capital or more than 50% of the voting rights in another company.

An annual transfer pricing tax return shall also be provided with CIT filing (by April 30). This is a kind of simplified transfer pricing documentation, which includes information such as the description of the related companies and activities performed, group transfer pricing policy, intra-group flows, etc.

Country-by-country (CbC) reporting

Companies with group revenues exceeding XOF 491 billion must file a CbC report showing the allocation of revenues, profits, and taxes paid. The company shall prepare consolidated financial statements, and own directly or indirectly one or more legal entities located in Senegal.

The filing must be done electronically. The deadline is 12 months after the end of the fiscal year to which the CbC report relates.

Automatic exchange of the CbC report will take place between the Senegalese tax administration and other tax authorities of the jurisdictions in which the group operates and which have concluded a tax treaty providing such exchange with Senegal.

Thin capitalisation

There are no specific rules regarding thin capitalisation in Senegal. Nonetheless, the following tax and legal rules should be known:

- From a legal point of view (corporate law), the net assets must be equal to at least half of the share capital of the company. In case the net assets are lower than this threshold, the situation should be regularised by any lawful means within a period of two years following the financial year it appears. Otherwise, any third party can request the closing of the entity before the courts.

- The deductibility of interest paid to a shareholder upon a loan or an advance in general is limited to a maximum rate calculated on the Central Bank legal interest rate (currently fixed at 3.5%) plus 3 points, calculated on the amount of the share capital *(see Interest expenses in the Deductions section for more information*). Portions exceeding this limit are not deductible for CIT purpose.

Controlled foreign companies (CFCs)

There are no provisions in Senegal for CFCs.

Tax credits and incentives

Foreign tax credit

Usually, DTTs may provide some tax credit on the basis of the relationship between Senegalese entities and their partners located abroad. For each DTT, the specific process to enforce those tax credits either in Senegal or abroad (depending on the payments directions) are stipulated within that DTT. Nonetheless, as far Senegal is concerned, the practice consisting of enforcing foreign tax credits locally is very rare.

The Investment Code

The Investment Code applies to investments over XOF 100 million (mainly production, processing, industrial, tourism, agricultural, and complex trade). The benefits of the Investment Code include exemption from customs duties, suspension of VAT payment for three years, CIT limitation, etc. The tax benefits are directly integrated in the GTC and do not require administrative authorisation (i.e. as long the requirements are met, the taxpayers may benefit from those tax benefits).

Free export company status

Agriculture, industry, and telecommunications companies that have an exporting potential amounting to at least 80% of their turnover may qualify for the free export company status.

There are several advantages provided by the GTC for companies that qualify, including a CIT rate of 15%, exemption from the CEL, exemption from registration and stamp duty for incorporation or bylaws change purposes, and exemption from employer tax.

Miscellaneous incentives

There are a wide range of tax incentives, such as the special economic zone, which is an area designed to host economic activities that have a strong impact on economic growth and that focus their activities on exports (industrial activities, agrobusiness, ICT, tourism, medical services, port activities, and services in general).

Companies established within the zone benefit from a preferential tax regime (a 15% CIT, exemption from taxes and duties at the importation, exemption from CEL, etc.)

There are also some tax benefits for companies involved in the mining and petroleum sector (exemption from the CEL, employer tax, VAT [under conditions], etc.).

Withholding taxes

Senegal has various WHTs. The primary ones are as follows:

- 20% WHT on remuneration paid for services (including royalties) rendered by a foreign individual or foreign company.
- 5% WHT on remuneration paid for services rendered by a resident individual (liable for tax under lump sum taxation, among others) or resident company that are not subject to CIT.
- 10% WHT on dividends distributed.
- 13% WHT on bond interest.
- 8% WHT on deposits or guaranteed interest on accounts with a bank.
- 16% WHT on other revenues, notably interest on loans.

These WHTs may be limited by DTTs.

Double tax treaties (DTTs)

The DTTs concluded by Senegal are based on the OECD model in most cases. Senegal has concluded such treaties with the countries listed in the table below.

Treaty WHT rates are as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	10	8 to 16	20
Treaty:			
Belgium	10	15	10
Canada	10	16	15
France	10	15	15
Italy	10	15	15
Lebanon	10	10	10
Mauritania	10	16	N/A
Mauritius	N/A	N/A	N/A
Morocco	10	10	10
Norway	10	16	16
Portugal	5/10 (1)	10	10
Qatar	N/A	N/A	N/A
Spain	10	10	10
Tunisia	10	16	N/A
United Kingdom	5/8/10/15 (2)	10	10
WAEMU *	10	15	15

* West African Economic and Monetary Union (member states are Benin, Burkina-Faso, Côte d'Ivoire, Guinea-Bissau, Mali, Niger, and Togo).

Notes

1. The 5% rate is applicable if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies in all other cases.
2. The below rates are applicable in the following cases:
   - 5% if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends.
   - 8% if the beneficial owner is a pension scheme established in the United Kingdom.
   - 10% in all other cases.

- 15% if dividends deriving directly or indirectly from immovable property are paid by an investment vehicle resident in Senegal, whose income from such immoveable property is exempt from tax, and which distributes most of that income annually to a beneficial owner resident of the United Kingdom.

Tax administration

Taxable period

The tax year in Senegal is the calendar year.

Tax returns

Companies must file CIT returns by 30 April of the year following the tax year.

Also, in addition to the miscellaneous annual returns (business licence tax, company car tax, etc.) and other monthly tax returns (VAT, payroll taxes, WHT, etc.), taxpayers must file by 31 January for the prior financial year:

- An annual recapitulative payroll tax return.
- An annual recapitulative return on payment for services.

Payment of tax

CIT must be paid in two instalments (each equal to one-third of the previous year's tax) by 15 February and 30 April. The outstanding balance payment amount of the tax due must be paid by 15 June.

For the first financial year of a newly incorporated company, no instalment is due; the new company pays the whole CIT before 15 June of the following year.

Penalties

In case of late payment, a 5% interest of delay on the amount due plus an additional 0.5% duty per month of delay or portion of month of delay are applicable. This late payment is due when the taxpayer's regularisation is spontaneous.

On the other hand, if such payment is triggered by a tax audit from the authority itself after the deadline is crossed, the following penalties apply:

- 50% for any WHT and VAT.
- 25% for other taxes (CIT, business licence tax, taxes on real estate, registration duties, company car tax).

Also, the late filling of tax returns triggers an XOF 200,000 penalty per return.

Tax audit process

The tax authorities may request information, clarifications, or justification to the taxpayers. The taxpayers have 20 days to answer to those requests.

The tax authorities may also implement an inspection of the accounting documents at the premises of the taxpayer or at any place the taxpayer would consider more appropriate for material reasons upon a specific request. In such cases, a notice is sent to the taxpayer at least five days before the beginning of the inspection.

The tax authorities are not allowed to process a new tax inspection on a period already inspected by their services unless a new element or document is revealed after the first inspection was processed.

Where the tax authorities estimate that the taxpayer has not fulfilled all of one's tax obligation, a tax reassessment shall be transmitted to the taxpayer, who has 30 days in order to answer or comment on the findings.

After the tax authorities have received those comments, they can confirm partially or totally the reassessment within a statutory delay of 60 days.

Statute of limitations

The statute of limitations is, generally speaking, four years.

Topics of focus for tax authorities

With regards to corporate tax compliance, the tax authorities are generally focusing on certain expenses with forbidden or limited deductibility, such as depreciation of assets, provisions, interest, royalties/services fees, insurance premiums, head office costs, etc., but they usually define their approach according to the business sector of the company.

Recently, tax authorities have also focused on transfer pricing issues by requiring documentation upon their tax audit. The implementation of BEPS Action 13 is likely to result in more interest on this subject.

Significant developments

The latest amendments to the tax laws were enacted in December 2017 and April 2018 and relate to the corporate income tax (CIT) and value-added tax (VAT).

Starting from CIT assessment for 2018, tax depreciation of intangible assets will be equal to their accounting depreciation, while assets consisting of movable and immovable parts will be classified into tax depreciation groups pursuant to the manner in which they are recognised in the taxpayer's statutory financials. As of 1 April 2018, the scope of withholding tax (WHT) in terms of service fees paid to non-residents, other than those to tax havens, will include solely market research services, accounting and audit services, and other legal and business consulting services.

Most significant changes to the VAT Law relate to the rules that govern the status of supply of goods and services between the grantor of concession and concessionaire. As of 1 January 2018, supply of goods or services between the grantor and the concessionaire is not subject to VAT, provided that certain conditions are met. As of 1 July 2018, VAT payers will be obligated to submit a VAT assessment overview to the tax authorities, along with the VAT return. As of 1 January 2019, foreign taxpayers will have the right to a VAT refund if one performs taxable supply of goods and services in Serbia to a Serbian VAT payer.

Taxes on corporate income

Residents are taxed on their income generated in Serbia, as well as on their worldwide income. Non-residents are taxed only on their income sourced through a permanent establishment (PE) in Serbian territory.

The CIT rate is 15%.

Local income taxes

There are no municipal or local taxes on income in Serbia.

Corporate residence

A legal entity is considered to be a resident of Serbia if it is established or has its place of effective management and control in Serbia.

Permanent establishment (PE)

A PE is any permanent place of business through which a non-resident conducts its business.

Other taxes

Value-added tax (VAT)

The VAT was introduced on 1 January 2005 and generally follows the European Union's (EU's) Sixth Directive.

The standard VAT rate is 20% for most taxable supplies. A reduced VAT rate of 10% applies for basic food stuffs, daily newspapers, medicines, publications, public transportation services, utilities, etc.

In addition to these tax rates, there is a 0% tax rate with the right of deduction of the input VAT that applies to the export of goods, transport and other services directly related to exports, international air transport, etc.

A 0% tax rate without the right of deduction of the input VAT applies to trading in shares and other securities, insurance and reinsurance, and the lease of apartments, business premises, etc.

A taxpayer for VAT purposes is a person who independently, and in the course of its business activities, undertakes the supply of goods and services or import of goods. Business activity is defined as the permanent activity of a manufacturer, salesperson, or service provider for the purpose of gaining income. A branch or other operating unit can be a taxpayer.

A non-resident that carries out taxable supply of goods and services in Serbia is obligated to appoint a fiscal representative and to register for VAT in Serbia, irrespective of the amount of the turnover realised in the previous 12 months. A foreign entity that performs a taxable supply of goods and services exclusively to VAT payers or entities referred to as governmental institutions (which includes the Republic and its authorities, the territorial autonomy and local self-government authorities, as well as legal entities established under law or other act of the Republic, territorial autonomy, or local government authority for the purpose of execution of activities of the state administration or local government) or performs passengers transportation service by buses (in special case envisaged by the Law) has no obligation to appoint a fiscal representative in Serbia and to register for VAT. A foreign taxpayer that fails to register for VAT in Serbia may be subject to penalties for non-compliance.

The usual taxable period is a calendar month; however, if a taxpayer's total annual turnover is less than 50 million Serbian dinars (RSD), the taxable period is a calendar quarter. For newly established businesses, the VAT period is the calendar month for the current and next calendar year. Taxpayers are required to submit returns within 15 days of the end of each taxable period. Tax debtors who are not taxpayers are required to submit returns within ten days of the end of the taxable period.

Supply of goods and services between the grantor of concession and concessionaire is not subject to VAT as of 1 January 2018, provided that the following conditions are cumulatively met:

- Supply is performed based on the public private partnership contract with elements of concession.
- The grantor of the concession and concessionaire are VAT payers.

If such supply would be subject to VAT, the customer would be entitled to input VAT recovery.

As of 1 July 2018, VAT payers will be obligated to submit a VAT assessment overview to the tax authorities, along with the VAT return.

As of 1 January 2019, foreign taxpayers will have the right to a VAT refund if one performs taxable supply of goods and services in Serbia to a Serbian VAT payer.

Customs duties

Goods imported into Serbia are subject to customs duty rates provided in the Law on Customs Tariff. These rates are *ad valorem* (the only exception is related to the importation of other cigarettes containing tobacco, where a combined *ad valorem* and specific customs duty rate is prescribed) and apply to goods originating in countries that have a most favoured nation (MFN) status in trading with Serbia. Goods originating in other countries are subject to MFN duty rates increased by 70%.

At the moment, the only trading partner with Serbia that does not have MFN status is Taiwan.

Customs duty rates in Serbia range from 0% to 57.6%, with most being under 30%. At the moment, the 57.6% rate only applies to cigarettes containing tobacco.

Excise duties

Excise duties are levied on producers and importers of the following goods:

- Oil derivatives.
- Tobacco products.
- Alcoholic beverages.
- Coffee (green, roasted, ground, and coffee extracts).
- Bio liquids and biofuels.
- Fuels for filling electronic cigarettes.
- Electricity for final consumption.

Excise duty in Serbia is specific (for oil derivatives, alcoholic beverages, cigars, cigarillos, and coffee), *ad valorem* (for pipe tobacco), and combined (specific + *ad valorem* on retail price for cigarettes).

Excise duties stated in Serbian currency are adjusted on a half-year basis according to variations of the consumer price index (CPI) declared by relevant government bodies in charge of statistics. For oil derivatives, the government can modify the specific excise duty amounts during the year according to changes in prices of crude oil on the market.

Property tax

Property tax is payable annually in Serbia by all legal entities and individuals who own or have rights over real estate located in Serbia, such as:

- Ownership rights.
- Right of occupancy.
- Tenancy rights over an apartment or a building for a period longer than one year or for an indefinite period.

- Urban land usage right (municipal, public, and other state-owned land) larger than ten acres in area.

Where the taxpayer keeps books, the property tax on real estate is levied at a flat rate that cannot exceed 0.40%.

Transfer tax

Transfer tax is levied on the transfer for a consideration of rights over real estate when VAT is not payable on such a transfer; intellectual property rights; ownership over used vehicles, vessels, and aircraft (unless owned by the state); right to use urban and/or public building land; as well as rights relating to expropriated real estate.

The contract price is used as a tax base; however, the tax authorities have the right to adjust the tax base in case they estimate that the price agreed to in the contract is lower than under market conditions. The tax is payable at a 2.5% rate.

Stamp taxes

There are no stamp taxes in Serbia.

Capital gains tax of non-residents

Capital gains realised by non-residents from both residents or other non-residents are subject to 20% capital gain tax. Non-residents should appoint a fiscal representative in Serbia who should submit a tax return within 30 days from the realisation of capital gain. Based on the tax return, tax authorities will issue a decision assessing tax liability (if any).

In order to benefit from application of a relevant double tax treaty (DTT), the same rules are applicable as for WHT. Non-residents (i.e. the income recipient) must provide a tax residency certificate (on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence or official translation of certificate issued by foreign tax authorities), and the income recipient must be the beneficial owner of the income.

Payroll taxes and social security contributions

The employer is liable to withhold personal income tax (PIT) and social security contributions on payment of salaries to employees, at the following rates:

- 10% PIT.
- 19.9% social security contributions payable by the employee.
- 17.9% social security contributions payable by the employer.

The tax and contributions base is gross salary. The social security contributions base is limited to five average monthly salaries in Serbia.

Branch income

Non-residents carrying on business in Serbia through a branch are taxed on their Serbian-sourced income at the CIT rate of 15%. A branch is considered to be a PE.

Income determination

Taxable profit is determined by adjusting the accounting profit as stated in the profit and loss statement (determined in accordance with International Financial Reporting Standards [IFRS] and local accounting and audit legislation) and in accordance with the provisions of the CIT Law.

For taxpayers who, according to local legislation, are not obligated to apply IFRS, taxable profit is determined according to the special guidelines prescribed by the Ministry of Finance.

Inventory valuation

Cost of materials and the purchase value of merchandise are tax deductible up to an amount calculated by applying the average weighted cost method or the first in first out (FIFO) method. If another method is used, an adjustment for tax purposes should be made.

Capital gains

Capital gains are generated by the sale or other transfer of real estate, rights related to industrial property, as well as shares, stocks, securities, certain bonds, and investment units. A capital gain is determined as the difference between the sale and purchase price of the asset concerned, determined in accordance with the provisions of the Law. If the amount is negative, a capital loss is realised.

Capital gains and operational profit are disclosed in the same tax return, but they are taxed separately. Consequently, capital gains/losses cannot be used to offset business losses/gains.

However, capital gains can be offset with capital losses occurring in the same period. A capital loss can be carried forward for five years.

The capital gains tax rate is 15%.

However, the rate applicable for capital gains incurred by non-residents is 20%, unless envisaged otherwise by a relevant DTT (*see the Other taxes section for more information*).

Dividend income

Dividends received by a Serbian company from another Serbian company are not subject to CIT.

Dividends received from a non-resident will be treated as taxable income of a Serbian company and subject to 15% CIT. However, a Serbian entity will have the right to decrease its tax liability by taking a tax credit for the WHT and underlying CIT paid in a subsidiary's country, provided that the taxpayer holds at least 10% of the shares in the subsidiary. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income (*see the Tax credits and incentives section for more information*).

Interest income

Interest income will be included in accounting profit determined in accordance with IFRS and will be taxable at the CIT rate of 15%. A Serbian resident has the right to decrease its CIT liability for WHT on interest paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

Royalty income

Royalty income will be treated as business income and subject to the general CIT rate.

A resident taxpayer also has the right to decrease its CIT liability for WHT on royalties paid abroad. The amount of the tax credit should not exceed the amount of CIT that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income.

Unrealised currency exchange gains

Unrealised currency exchange gains will be included in accounting profits under IFRS rules. Serbian legislation does not provide any exception of taxation of this income.

Foreign income

Companies resident in Serbia are taxed on their worldwide income.

When profit generated in another country is taxed in the foreign country, a company has the right to decrease its tax liability by claiming a tax credit from the tax authorities in Serbia (*see the Tax credits and incentives section for more information*).

There are no provisions that provide for the possibility that taxation of income earned abroad may be deferred.

Deductions

Depreciation and amortisation

Fixed and intangible assets are divided into five groups, with depreciation and amortisation rates prescribed for each (Group I: 2.5%; II: 10%; III: 15%; IV: 20%; and V: 30%). A straight-line depreciation method is prescribed for the first group, which includes real estate, while a declining-balance method is applicable for assets in the other groups.

Assets subject to tax depreciation and amortisation are all tangible and intangible (except goodwill and renewable resources) assets with a useful life longer than one year that are recognised as non-current assets under IFRS.

Starting from CIT assessment for 2018, tax depreciation of intangible assets will be equal to their accounting depreciation, while assets consisting of movable and immovable parts will be classified into tax depreciation groups pursuant to the manner in which they are recognised in the taxpayer's statutory financials.

Goodwill

Goodwill is not subject to tax amortisation.

Start-up expenses
Generally, start-up expenses are tax deductible for CIT purposes.

Interest expenses
Interest on related-party loans exceeding thin capitalisation and transfer pricing thresholds are not deductible (*see the Group taxation section*).

Bad debts
Bad debt provisions are generally tax deductible if they are at least 60 days overdue. Provisions have to be made individually for each receivable.

Write-off of individual debts, except for those from debtors who are at the same time creditors, is recognised as an expense under the following conditions:

- They were written off as uncollectable.
- The taxpayer has initiated a court procedure to collect debt or duly reported the receivables in case of liquidation or bankruptcy procedure over the debtor.

Taxable income should be increased for receivables that are written-off and do not meet the above requirements and for which tax-deductible provisions were previously made.

Charitable contributions
Expenses for health care, scientific, educational, humanitarian, religious, ecological, cultural, and sport related purposes, as well as humanitarian aid given to the Republic of Serbia, its autonomous provinces, and the local government for sanitation of consequences that emerged during emergency situations, are deductible, at up to 5% of total revenues.

Fines and penalties
Fines and penalties (both commercial and those charged by the authorities) are not deductible.

Taxes
All taxes, duties, and contributions that do not depend on the profitability of the company are deductible in the tax period that the liability in this respect was settled.

Other significant items
The following other expenses are not recognised for CIT purposes:

- Non-documented expenses.
- Provisions for receivables from entities that are creditors at the same time, up to the amount of the liability due to that entity.
- Presents provided to political organisations.
- Presents provided to related parties.
- Penalty interest for late payment of taxes, contributions, and other charges.
- Expenses related to forced collection of taxes and other liabilities.
- Non-business related expense.
- Share in the profit paid to employees or other individuals.
- Calculated but unpaid redundancy payments (deductible when paid).
- Expenses related to employment costs, apart from salaries (deductible when paid).

- Impairment of assets (deductible in tax period in which asset is disposed of or used).
- Direct write-off of receivables (under certain conditions).
- Long-term provisions (deductible when paid).

The following other expenses are recognised for CIT purposes only up to a certain limit:

- Advertising and promotional expenses, up to 10% of total revenues.
- Business entertainment expenses, up to 0.5% of total revenues.
- Membership fees paid to chambers of commerce and other associations (except political parties), up to 0.1% of gross revenue.

Net operating losses

The taxpayer has the right to carry forward and utilise tax losses incurred over the following five years.

Carryback rules do not exist in Serbia.

Payments to foreign affiliates

Generally, there are no restrictions on the deductibility of royalties and service fees paid to foreign affiliates, provided they are at arm's length, appropriately documented (by agreements, contracts, calculation sheets, etc.), and incurred for business purposes only.

Payment of interest to foreign affiliates is restricted and regulated by thin capitalisation rules and transfer pricing rules (*see the Group taxation section*).

Group taxation

Tax grouping/consolidation is allowed to a group of companies where all members are Serbian residents and one company directly or indirectly controls at least 75% of the shares in another company. Each company files its own tax balance sheet, and the parent company files a consolidated tax balance sheet for the whole group.

In the consolidated tax balance sheet, losses of one or more companies are offset by the profits of other related companies. Each company is liable for the portion of tax attributable to its share of the group's taxable profit.

Once approved by the Ministry of Finance, tax grouping/consolidation applies for at least five years.

Transfer pricing

A transfer price is the price of transactions between related parties. Related parties exist if there is a possibility of control or influence over business decisions between them. Ownership of 25% or more, or a majority of shares, is considered as potential control. Influence over business decisions exists when an associated party holds 25% or more, or individually holds the greatest portion, of votes in the taxpayer's management bodies. If the same persons participate in management or control of both companies, a connection between them will be deemed to exist.

Close family members are also regarded as related parties. Non-resident entities from tax havens are considered as related parties of resident entities. The Serbian Ministry of

Finance prescribed the list of countries that are to be considered as tax havens for the application of relevant CIT Law provisions.

A company should disclose transactions with related parties separately at transfer prices and at arm's-length prices in its CIT calculation. Positive difference between these prices (adjustments of expenses) and negative difference (adjustments of revenues) is included in taxable profit.

Serbian CIT Law recognises the following methods for determining arm's-length prices:

- Comparable uncontrolled price (CUP).
- Cost plus.
- Resale minus.
- Transactional net margin (TNMM).
- Profit split.
- Any other method that allows determination of arm's-length prices if none of the above methods can be applied.

It is mandatory to prepare and submit transfer pricing documentation together with the CIT return.

Transfer pricing rules for intra-group loans

Any interest incurred on related-party loans exceeding the arm's-length interest rate is not tax deductible. Arm's-length interest is deemed to be the:

- weighted average key policy rate for the tax period for loans denominated in dinars, and
- weighted average interest rate at which domestic banks borrowed from foreign lenders in the related tax period for foreign currency loans.

These indicators are determined by the National Bank of Serbia and published by the Ministry of Finance. However, taxpayers are entitled to determine market interest rates by using all general methods for determining arm's-length interest rates. In case the taxpayer decides to determine interest rates by applying general methods, it will be obligated to apply such interest rates for assessment of all related-party loans.

Transfer pricing rules in this respect are applied up to the amount of tax-deductible interest determined in accordance with the thin capitalisation threshold (*see below*).

Thin capitalisation

The interest and related costs will be fully deductible if the loans from related parties do not exceed four times the taxpayer's net equity (ten times for banks and leasing companies). The amount of a taxpayer's net equity for this purpose is calculated as the average of the total assets less total liabilities at the beginning and the end of the year, while the amount of loans from related parties is calculated as a daily average for the year.

In cases where the loans from related parties exceed the prescribed threshold, the amount of non-deductible interest will be calculated as proportional to the amount of loans exceeding the 4:1 (10:1) threshold.

Controlled foreign companies (CFCs)

There are no CFC rules in Serbia.

Tax credits and incentives

Foreign tax credit

A Serbian entity is entitled to a tax credit for the WHT paid on foreign-sourced dividends and underlying CIT paid abroad (by its non-resident subsidiary), provided that the taxpayer holds at least 10% of the shares in the subsidiary for at least one year before filing a return. If the taxpayer holds less than 10% of the shares in the subsidiary, the tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Non-utilised tax credit can be carried forward by the parent company for five years.

A resident taxpayer also has the right to decrease its tax liability for WHT paid abroad on interest and authorship fees. The tax credit should not exceed the amount of tax that would be paid in Serbia on that income, where the tax basis represents 40% of the received gross income. Carryforward of unused tax credits is not allowed.

Tax holiday

A ten-year tax holiday is available for companies with a minimum investment in property, plant, and equipment (PPE) of RSD 1 billion. To qualify for the credit, a taxpayer must employ at least 100 new workers for an indefinite period. The tax holiday is available for the ten-year period in proportion to the investment made. The number of employees employed in the tax period in which the taxpayer qualified for the tax holiday must be retained throughout the whole tax holiday period.

Withholding taxes

WHT is calculated and paid at the rate of 20% on payments such as dividends/share in profit, royalties (including neighbouring authorship rights, intellectual property rights, and related rights), interest income, fees for services provided or used in Serbia, income from distributed surplus of a company in bankruptcy, revenues derived from the liquidation surplus of a company in liquidation, and lease payments for real estate and other assets made to a non-resident, unless a DTT applies to provide a reduced rate or exemption.

According to the latest amendments of the CIT Law, as of 1 April 2018, the scope of WHT in terms of service fees paid to non-residents, other than those to tax havens, will include solely market research services, accounting and audit services, and other legal and business consulting services.

WHT is also payable on a non-resident's income realised on the basis of performing entertaining, artistic, sports, and similar programs in Serbia, which is not taxed as income of an individual (performer, musician, sportsman, etc.).

In order to benefit from application of a relevant DTT, non-residents (i.e. the income recipient) must provide a tax residency certificate on the form prescribed by the Serbian Ministry of Finance stamped by the relevant body from the non-resident's country of residence.

Special WHT rules apply in case of non-resident entities from tax havens. WHT is payable at the rate of 25% on royalties, interest, income from lease of immovable property and other assets, and service fees paid to non-resident entities from tax havens. Dividend payments to non-residents from tax havens are subject to WHT at 20%. The Serbian Ministry of Finance publishes a list of jurisdictions that are regarded as tax havens (*http://www.poreskauprava.gov.rs/pravna-lica/pregled-propisa/pravilnici/312/pravilnik-o-listi-jurisdikcija-sa-preferencijalnim-poreskim-sistemom.html*).

WHT rates envisaged by applicable DTTs are provided in the following table.

	WHT (%)			
Recipient	**Dividends (1)**	**Interest**	**Royalties (3)**	**Applicable from**

Notes

1. If the recipient company owns/controls at least 25% (5% depending on the relevant DTT) of the equity of the paying company, the lower of the two rates applies.
2. The treaty has not been ratified by one of the parties.
3. A tax rate of 5% will be applicable to literary, scientific, and work of art; films and works created like films; or other source of reproduction tone or picture. A tax rate of 10% will be applicable to patents, petty patents, brands, models and samples, technical innovations, secret formulas, or technical procedures.
4. Only in cases when dividends are to be paid to Serbian residents. If paid to Malaysian residents, they are taxable at 20% in Serbia.
5. A 0% rate is applicable in cases when the income recipient is the government or government owned banks. In all other cases, a higher rate envisaged by the DTT should apply.
6. WHT rate refers solely to dividends distributed from Serbia. In Malta, WHT cannot be higher than CIT on profit before dividend distribution.
7. A 0% rate is applicable in cases when the dividend income recipient is the government of the contracting state.

Tax administration

Taxable period

The tax period in Serbia is the calendar year. However, entities have a possibility to opt for a different tax period other than the calendar year (subject to the approval of the Ministry of Finance), but still 12-months long. Once approved, such tax period must be applied for at least five years.

Tax returns

CIT returns, together with all supporting documents (e.g. tax depreciation and tax credit forms), must be filed with the tax authorities not later than 180 days after expiration of the tax year (e.g. 30 June).

A newly established company needs to register with the tax authorities within 15 days of registration with the Serbian Business Registry.

Payment of tax

CIT is payable monthly in advance instalments by the 15th day of the following month for the prior calendar month. The amount of payable advances is determined on the basis of a company's CIT calculation for the previous year.

The due date for final settlement of CIT liability is the date of filing the annual tax return.

Tax audit process

The tax authorities may undertake an unlimited number of tax audits in respect of the same taxes within a reviewed period. In principle, re-performing of an audit of the same tax within a reviewed period is based on existence of new facts that were previously unavailable to the tax authorities.

Statute of limitations

The statute of limitations period for assessment of tax liabilities is five years from the year in which tax should have been assessed. The statute of limitations for collection of tax liabilities is five years from the year in which tax was due for payment. This is with the exception of pension insurance contributions, which do not become statute barred.

The statute of limitations commences from 1 January of the year following the year in which the tax return/liability was due.

Topics of focus for tax authorities

Historically, audits by the tax authority have been focused primarily on VAT, PIT, and social security contributions assessment.

Other issues

Intergovernmental agreements (IGAs)

United States (US) Foreign Account Tax Compliance Act (FATCA)

FATCA is a set of regulations of the United States adopted in order to combat tax evasion. It requires that foreign financial institutions or other financial intermediaries participate in preventing tax evasion by reporting (i.e. providing) information concerning US 'account holders', which include bank account holders, investors, and shareholders, to the US Internal Revenue Service (IRS).

The Model 1 IGA has not yet been signed by the United States and Serbia. However, the IGA is treated as 'in effect' by the US Treasury as of 30 June 2014. Serbia has consented to disclose this status since the United States and Serbia have reached an agreement in substance. In accordance with this status, the text of such IGA has not been released and financial institutions in Serbia are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

The 2018 Budget was announced on 19 February 2018. Corporate tax changes include the following:

Key corporate tax changes include:

- Enhancement of the tax rebate for year of assessment 2018 (income year 2017) to 40% of tax payable, capped at 15,000 Singapore dollars (SGD), and extension of the rebate to year of assessment 2019 at 20% of tax payable, capped at SGD 10,000.
- Adjustments to the Partial Tax Exemption and Start-up Tax Exemption schemes from year of assessment 2020, which reduce the maximum exempt income to SGD 102,500 (previously SGD 152,000) and SGD 125,000 (previously SGD 200,000), respectively.
- Introduction of a 250% tax deduction for qualifying research and development (R&D) projects performed in Singapore, and 200% tax deductions for the first SGD 100,000 of qualifying intellectual property (IP) registration costs and the first SGD 100,000 of qualifying IP licensing costs.
- Introduction of investment allowances for submarine cable systems landing in Singapore.
- Higher cap for double deduction for prescribed travelling expenses (for which no prior approval is needed) under the Double Tax Deduction for Internationalisation scheme.
- Introduction of a tax framework for Singapore Variable Capital Companies (S-VACC).
- Tax transparency for specified income of Singapore-listed Real Estate Investment Trusts Exchange-Traded Funds (REIT-ETFs).
- Extension of the Enhanced-Tier Fund scheme to all forms of fund vehicles.
- Rationalisation of the withholding tax (WHT) exemptions for the financial sector.

Other Budget changes include the following:

- Introduction of a goods and services tax (GST) reverse charge on services imported by businesses that make exempt supplies or those that do not make any taxable supplies with effect from 1 January 2020.
- Requirement for overseas vendors providing digital services to register for GST with effect from 1 January 2020 if their global turnover is more than SGD 1 million annually and their online sales to Singapore consumers exceed SGD 100,000.
- Increase GST rate from 7% to 9% sometime between 2021 and 2025.
- Increase in buyer's stamp duty for residential property purchases.
- Introduction of carbon tax of SGD 5 per tonne of greenhouse gas emissions.

For details of the 2018 Budget proposals, refer to our 2018 Budget Commentary at *https://www.pwc.com/sg/en/publications/budget-commentary.html*

Taxes on corporate income

Companies (resident and non-resident) that carry on a business in Singapore are taxed on their Singapore-sourced income when it arises and on foreign-sourced income when it is remitted or deemed remitted to Singapore. Non-residents are subject to WHT on certain types of income (e.g. interest, royalties, technical service fees, rental of movable property) where these are deemed to arise in Singapore (*for details, see the Withholding taxes section*).

Tax on corporate income is imposed at a flat rate of 17%.

A partial tax exemption and a three-year start-up tax exemption for qualifying start-up companies are available.

Partial tax exemption (income taxable at normal rate):

Years of assessment 2018 to 2019			Year of assessment 2020 onwards		
Chargeable income (SGD)	**Exempt from tax**	**Exempt income (SGD)**	**Chargeable income (SGD)**	**Exempt from tax**	**Exempt income (SGD)**
First 10,000	75%	7,500	First 10,000	75%	7,500
Next 290,000	50%	145,000	Next 190,000	50%	95,000
Total		152,000	Total		102,500

Start-up tax exemption (income taxable at normal rate):

Years of assessment 2018 to 2019			Year of assessment 2020 onwards		
Chargeable income (SGD)	**Exempt from tax**	**Exempt income (SGD)**	**Chargeable income (SGD)**	**Exempt from tax**	**Exempt income (SGD)**
First 100,000	100%	100,000	First 100,000	75%	75,000
Next 200,000	50%	100,000	Next 100,000	50%	50,000
Total		200,000	Total		125,000

The start-up exemption is not available to property development and investment holding companies.

In addition, for the year of assessment 2018, there is a 40% corporate tax rebate. This rebate is capped at SGD 15,000. There is also a rebate of 20% of tax payable for year of assessment 2019, which is capped at SGD 10,000.

Singapore adopts a one-tier taxation system, under which all Singapore dividends are tax-exempt in the shareholder's hands.

Corporate residence

In Singapore, the tax residence of a corporation is determined by the place where the central management and control of its business is exercised. This is taken generally to mean the place where the directors meet to exercise *de facto* control. The Inland Revenue Authority of Singapore (IRAS) has also set out further guidance.

Permanent establishment (PE)

The presence of a PE is largely irrelevant, except for treaty purposes, as Singapore taxes with reference to the source of income rather than the presence of a PE.

However, a PE is a clear indication of source.

The definition of a PE in Singapore's double taxation agreements (DTAs) is largely based on the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention definition.

It is generally taken to be a fixed place through which the business of an enterprise is wholly or partly carried on, and normally includes a place of management, a branch, an office, a factory, a workshop, and a place of extraction of natural resources, etc.

In addition, and subject to the terms of the relevant agreements, a non-resident may have a PE in Singapore if one:

- has a building site or a construction, assembly, or installation project that lasts longer than a specified period, or supervisory activities connected with the building site or construction project
- furnishes services (including consultancy services) through employees in Singapore for more than a specified period, or
- has an agent in Singapore who has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of the enterprise.

The Singapore tax legislation defines a PE more broadly than most of the DTAs; however, as mentioned above, this is largely irrelevant where a treaty can take precedence.

Other taxes

Goods and services tax (GST)

GST is charged at 7% on the supply of goods and services made in Singapore by a taxable person in the course or furtherance of one's business. It was announced in the 2018 Budget that this rate would be increased to 9% sometime between 2021 and 2025.

The only exemptions from GST are prescribed financial services (including life insurance), the sale or rental of residential properties, and the import and local supply of investment precious metals (IPM). Zero-rating only applies to the export of goods and international services.

GST is also levied on imports of goods, at the time of importation. However, there are reliefs available to ease the cash-flow burden of import-export traders by suspending GST at the time of importation. GST is not currently charged on imports of services, although this will change from 1 January 2020 with the introduction of a reverse-charge on local businesses that make exempt supplies, and those which do not make any taxable supplies, to account for GST on the services they import. A non-registered business that imports services exceeding SGD 1 million in a year and is not entitled to full input tax credit if it were GST-registered will be required to register for GST to account for the reverse charge under the new rules. These businesses can in turn claim the GST accounted for as their input tax, subject to the normal rules for input tax recovery. In addition, overseas suppliers and electronic marketplace operators that make significant supplies of digital services to local consumers will be required to register for GST in Singapore.

A taxable person is one who is, or is required to be, registered for GST. GST registration is required if one's taxable turnover exceeds SGD 1 million per year. Voluntary registration is permitted if the taxable turnover is below the registration threshold, subject to conditions.

A supply of goods is made in Singapore if the goods are in Singapore at the time of supply, and a supply of services is made in Singapore if the supplier belongs in Singapore. Generally, a person belongs in Singapore if one's business establishment (including carrying on a business through a branch or agency) or fixed establishment is in Singapore.

A taxable person is allowed to credit the input GST paid on taxable purchases against the output GST chargeable on taxable supplies made. However, certain purchases are specifically denied an input GST deduction. These include supplies of goods and services such as non-business expenses, club subscription fees, family benefits, car rental expenses, motor vehicle expenses, medical expenses, and transactions involving betting, sweepstakes, lotteries, fruit machines, or games of chance.

A non-resident is not entitled to GST refunds except by appointing a resident business that is registered for GST to act on one's behalf. The resident tax agent can then recover import GST paid on behalf of the non-resident business but will be required to account for output GST on any subsequent supply of the non-resident's goods in Singapore.

Customs and excise duties

Singapore is essentially a free port with minimal import restrictions. Customs and excise duties are imposed on intoxicating liquors, tobacco products, motor vehicles, and petroleum products.

Property tax

Property tax is levied annually on the annual value of houses, land, buildings, or tenements.

For residential properties, owner-occupier tax rates range from 0% to 16% and non-owner occupier tax rates range from 10% to 20%. The tax rates depend on the annual value bands.

For non-residential properties, such as commercial and industrial buildings and land, the tax rate is 10%.

Stamp duties

Stamp duties are levied on written documents relating to immovable properties, leases, and stocks and shares.

Immovable properties

Stamp duties are typically payable by the buyer (i.e. buyer's stamp duty or BSD); however, seller's stamp duty (SSD) and additional buyer's stamp duty (ABSD) have been introduced as measures to cool the residential property market.

There is BSD of up to 4% on the purchase price or market value, whichever is the higher. There is an ABSD of up to 15% and an SSD of up to 15% on the price or market value of the property, whichever is the higher, depending on the type of property (residential or industrial), the residency status of the buyer, the holding period of the property, and the number of properties owned.

Foreigners of certain nationalities who fall within the scope of the respective free trade agreements will be accorded the same treatment as Singaporeans.

Certain transfers of equity interest in property holding entities (PHEs) that own (directly or indirectly) primarily Singapore residential properties could attract additional conveyance duty (ACD) for buyers and sellers who are significant owners (as defined) of PHEs, as well as for a buyer who would become a significant owner after acquiring an equity interest in the PHEs. For acquisition of equity interest in a company, share duty remains payable in addition to the ACD.

Leases

Leases attract duty at 0.4% of the total rent (for leases of up to four years) or 0.4% of four times the average annual rent for the period of the lease (for leases longer than four years), but leases with average annual rents not exceeding SGD 1,000 are exempt from stamp duty.

Stocks and shares

Instruments effecting the transfer of stocks and shares are subject to stamp duty of 0.2% on the purchase price or market value of the shares transferred, whichever is higher.

Foreign Worker Levy (FWL)

The FWL is a monthly levy of up to SGD 950 that employers are liable to pay for each foreign employee (Work Permit or S Pass holders) hired. The levy rate depends on the employee's qualifications, the employer's industry, and the ratio of foreigners to Singaporeans and permanent residents employed in the company. The government has announced that levy increases for Work Permit holders in the marine and process sectors that were originally proposed for 1 July 2016 will be deferred for yet another year till 1 July 2019.

Payroll taxes

Singapore does not have payroll withholding. When a non-Singapore citizen employee ceases employment in Singapore, leaves Singapore for an overseas posting, or leaves Singapore for a period exceeding three months, the employer needs to notify the Singapore tax authorities once the fact of cessation/departure is known to the employer, unless the employer is bearing full Singapore taxes for the employee, and withhold all monies due until tax clearance is issued. The notification must be made no later than one month prior to the date of cessation/departure, or two months from the date of cessation/departure where the employer is bearing full Singapore taxes for the employee. Non-Singapore citizen employees are also subject to tax on unexercised/

unvested stock options/awards on a deemed gain basis when they cease employment or leave Singapore.

Social security contributions

Central Provident Fund (CPF)

The CPF is Singapore's national pension scheme. Contributions are payable by Singapore citizens and permanent residents only. Generally, employers and employees contribute 17% and 20%, respectively, of ordinary monthly wages up to an income ceiling of SGD 6,000. Their respective maximum contributions are therefore SGD 1,020 and SGD 1,200. The rates are applicable to employees aged 55 years and below.

These rates also apply to additional wages (e.g. year-end bonus), up to a maximum contribution of:

If: Annual ordinary wages	**And:** Total wages	**Maximum contribution**
Not more than the ordinary wage ceiling of SGD 72,000	Not more than the maximum contribution of SGD 102,000	Actual additional wages
Not more than the ordinary wage ceiling of SGD 72,000	Exceed the maximum contribution of SGD 102,000	Difference between the maximum contribution of SGD 102,000 and annual ordinary wages
Exceed the ordinary wage ceiling of SGD 72,000	Not more than the maximum contribution of SGD 102,000	Actual additional wages
Exceed the ordinary wage ceiling of SGD 72,000	Exceed the maximum contribution of SGD 102,000	Difference between the maximum contribution and the ordinary wage ceiling (SGD 30,000)

Reduced rates apply for employees who are earning less than SGD 750 per month and those above 55, although these rates are being gradually increased.

Foreign nationals and their employers are precluded from making CPF contributions. Foreign employees who become Singapore permanent residents, and their employers, may contribute at reduced rates for the first two years.

Supplementary Retirement Scheme (SRS)

The SRS is a voluntary scheme to encourage employees and the self-employed to save for retirement over and above their CPF savings. The maximum amount to be contributed is subject to an income cap of SGD 102,000. Employers are allowed to contribute to their employees' SRS accounts. This is subject to a 15% contribution limit (capped at SGD 15,300) for Singapore citizens and permanent residents, and a 35% cap for foreigners (maximum SGD 35,700). Employees will be taxable on these employer contributions, but will be allowed corresponding tax relief. Relief is subject to a personal income tax (PIT) relief cap of SGD 80,000 that applies to the total amount of all tax reliefs claimed, including any SRS relief. There is no refund for SRS contributions already made, in the event the overall PIT relief cap is exceeded.

Carbon tax

Carbon tax at a rate of SGD 5 per tonne of carbon dioxide-equivalent (tCO2e) of emissions will be applied on the total greenhouse gas emissions of facilities that produce 25,000 or more tCO2e of emissions per year. The carbon tax will apply uniformly to all sectors, without exemption, and will take the form of a fixed-price credits-based mechanism. The first payment of the carbon tax will be in 2020, based on emissions in 2019.

Branch income

Tax rates on branch profits are the same as on corporate profits. There is no branch profits remittance tax on the repatriation of profits to the head office.

Income determination

Inventory valuation

There are no special rules as to which valuation basis should be adopted for inventories (stock-in-trade) in the case of a continuing business, as long as the basis is consistent from one year to another. However, a last in first out (LIFO) basis of valuation is not permitted for tax purposes. Generally, tax reporting conforms to book reporting.

Capital gains

There is no tax on capital gains. Where there is a series of transactions or where the holding period of an asset is relatively short, the tax authorities may take the view that a business is being carried on and attempt to assess the gains as trading profits of the corporation. The United Kingdom (UK) Badges of Trade, which are used in judicial decisions to distinguish capital and revenue transactions, are generally applied in determining this issue. They include the existence of a profit-seeking motive, the number of transactions, the nature of the asset, the existence of similar trading transactions or interests, the way the sale was carried out, the source of finance, the interval of time between purchase and sale, and the method of acquisition.

Gains derived by a company from the disposal of ordinary shares that take place between 1 June 2012 and 31 May 2022 will not be taxed if the company has held at least 20% of the ordinary shares in the investee company for a continuous period of at least 24 months prior to the disposal. This protection does not apply to gains derived by an insurance company or disposal of shares in certain companies that trade or hold immovable properties.

Dividend income

Singapore dividends are exempt in the hands of the recipient.

Interest income

Singapore-sourced interest income is taxable when it arises, and foreign-sourced interest is taxable when it is remitted or deemed to be remitted to Singapore. *For further details on foreign-sourced interest income and the availability of foreign tax credit, refer to Foreign income below*.

Royalty income

Singapore-sourced royalty income is taxable when it arises, and foreign-sourced royalty income is taxable when it is remitted or deemed to be remitted to Singapore. *For further details on foreign-sourced royalty income and the availability of foreign tax credit, refer to Foreign income below*.

Foreign income

A corporation, whether resident in Singapore or not, is taxed on foreign income when it is received in Singapore. Legislative provisions govern the basis of treating foreign income as received in Singapore. There are no special rules for taxing the undistributed income of foreign subsidiaries.

Where income is earned from treaty countries, double taxation is avoided by means of foreign tax credit granted under those treaties. For non-treaty countries, unilateral tax credit is given in respect of foreign tax on all foreign-sourced income. These foreign tax credits may be pooled, subject to certain conditions.

Foreign dividends, foreign branch profits, and foreign service fee income remitted to Singapore may be exempt from tax if they fulfil certain conditions.

Deductions

Depreciation

Tax depreciation is allowable at specified rates on buildings used in qualifying industry sectors, subject to conditions. In 2010, industrial building allowances were replaced by a Land Intensification Allowance. The latter provides for faster depreciation but is subject to approval as it is allowed as a tax incentive. Transitional provisions for industrial building allowances are available for taxpayers who committed to qualifying capital expenditure on or before 22 February 2010.

Tax depreciation is available on machinery and equipment on a straight-line basis over their specified working life for all types of business. In lieu of the straight-line basis, accelerated tax depreciation allowances can be claimed by all businesses on all machinery and equipment in equal instalments over three years.

A 100% depreciation allowance is available on capital expenditure incurred on computers, robots, standby generators, pollution control equipment, and prescribed automation equipment.

Writing down allowances on a straight-line basis over five years are allowable on the cost of acquisition of IP, subject to certain conditions. Taxpayers acquiring IP in the 2016 to 2019 income years may make an irrevocable election to claim the writing down allowances over 10 or 15 years instead of five.

In addition, enhanced allowances may be available for the acquisition of automation equipment and IP up to the year of assessment 2018 (*see Productivity and Innovation Credit [PIC] in the Tax credits and incentives section*).

Gains on tax depreciable property (i.e. the excess of proceeds over tax base) are taxed as ordinary income to the extent that tax depreciation has been allowed; that is, there is a clawback of tax depreciation on the disposal of the asset.

Goodwill

Payments for the acquisition of goodwill are generally capital in nature and not deductible.

Start-up expenses

Generally, expenses incurred prior to the commencement of business are not tax deductible. However, most businesses are allowed to deduct expenses incurred in the 12 months immediately preceding the accounting year in which the business earned its first dollar of trading income. Deductible expenses are those that would have been allowed a deduction had they been incurred after the business commenced operations.

In addition, deductions and writing down allowances are available for certain types of pre-commencement expenditure (acquisition of plant and machinery, R&D, etc.) that are deemed to be incurred on the first day on which the taxpayer carries on one's business.

Interest expenses

Interest incurred on capital employed in the production of income, and prescribed borrowing costs that are incurred as a substitute for interest or to reduce interest costs, will be allowed as a tax deduction.

Research and development (R&D) expenses

The following deductions are available for qualifying R&D expenditure, subject to conditions:

	Year of assessment 2018	Years of assessment 2019 to 2025
R&D carried out in Singapore	150% of qualifying R&D expenditure	250% of qualifying R&D expenditure
R&D carried out overseas	100% of qualifying R&D expenditure	

Expenditure incurred in relation to R&D cost-sharing arrangements are accorded the same tax treatment as R&D expenses.

Enhanced deductions may also be available under the PIC scheme up to the year of assessment 2018 (*see Productivity and Innovation Credit [PIC] in the Tax credits and incentives section*).

Bad debts

Bad trade debts and provisions for trade debts are deductible to the extent that they are incurred in the business and previously included as trading receipts. Doubtful debts are deductible if they are properly estimated and specific. General provisions for bad debts are not deductible.

Businesses that have elected to align their tax treatment of financial instruments with the accounting treatment prescribed by SFRS 39 (Financial Instruments: Recognition and Measurement) will be allowed a tax deduction for impairment losses on trade debts when they are incurred (regardless of whether they are general or specific provisions). Correspondingly, any reversal will be taxed. Businesses that have adopted SFRS 109 (Financial Instruments) will be allowed a tax deduction for impairment losses on trade debts when recognised in the profit and loss account, to the extent that the debts are credit impaired. Correspondingly, any reversal will be taxed.

Charitable contributions

Donations are deductible only if they are made in cash or another prescribed form and to an approved recipient. The deduction allowed for qualifying donations is generally 250% of the value of the donation. Businesses that send employees to volunteer and provide services to approved charitable institutions from 1 July 2016 to 31 December 2021 will be allowed to deduct 250% of the wages and incidental expenses incurred, subject to certain conditions.

Fines and penalties

Fines and penalties imposed for violations of the law are not deductible.

Taxes

Income taxes are generally not deductible in determining corporate income. However, irrecoverable GST is deductible under certain circumstances. The FWL and property taxes are deductible to the extent they are incurred wholly and exclusively in the production of income.

Other significant items

Private automobile expenses are not deductible.

The tax deduction for medical expenses is limited to 2% of total payroll if the employer implements certain portable medical insurance or benefit schemes. Otherwise, the amount deductible will be limited to 1% of total payroll. Where the company is exempt or taxed at a reduced rate, the excess expenses will be taxed at the prevailing corporate rate.

A tax deduction for employee share-based remuneration (stock awards or stock option schemes) is allowed only if treasury shares in the company or its holding company are purchased to fulfil such obligations. A company may also claim a tax deduction when the share-based remuneration scheme is administered by a special purpose vehicle (SPV). The deduction is restricted generally to the lowest of the actual outlay incurred by the company, its holding company, or the SPV.

Net operating losses

Loss carryover, including unutilised tax depreciation allowance, is unlimited, provided shareholdings in the loss-making corporation have not changed beyond 50% of the total number of issued shares. Additionally, for tax depreciation allowances to be carried forward, the same trade needs to be continued. The tax authorities may exercise discretion to allow carryover of tax losses and unutilised tax depreciation even when there has been a change in shareholding beyond 50%, absent any tax avoidance motives. Losses and tax depreciation of up to SGD 100,000 incurred by the company in the current year can be carried back for one year. The carryback of losses and tax depreciation is subject to the continuity of shareholding test and the same trade test for carryback of tax depreciation.

Payments to foreign affiliates

Payments to non-residents, including foreign affiliates, are deductible, provided they are fair and reasonable, are revenue in nature, and can be seen to be relevant to earning the payer's income.

Group taxation

A company is allowed to transfer excess current year trade losses, current year tax depreciation, and current year approved donations to another company within the same group if certain conditions are satisfied.

Broadly, to qualify for group relief, companies must be incorporated in Singapore, belong to the same group of companies where, among other things, there must be at least a 75% ownership relationship between claimant and transferor, and have the same accounting year-end. In addition, a group must comply with certain prescribed offset and apportionment rules.

Transfer pricing

The Income Tax Act contains specific transfer pricing provisions that define the arm's-length principle and provide the tax authorities with a right to make transfer pricing adjustments in cases where taxpayers do not comply with the arm's-length principle.

In 2017, these transfer pricing provisions were enhanced to introduce mandatory contemporaneous documentation requirements, penalties for non-compliance, and a surcharge to be imposed at 5% of the transfer pricing adjustment value. In general, businesses with turnover exceeding SGD 10 million are required to maintain contemporaneous transfer pricing documentation with effect from the year of assessment 2019, subject to certain exemptions as defined. Failure to comply with these requirements (including contemporaneous transfer pricing documentation) could result in a penalty not exceeding SGD 10,000. The tax authorities are also given the power to disregard the form of a transaction where the substance of it is inconsistent with the form.

The tax authorities have issued revised transfer pricing guidelines to supplement the provisions in the Income Tax Act. Guidance is also provided on matters relating to mutual agreement procedures (MAPs) and advance pricing arrangements (APAs).

Country-by-country (CbC) reporting

On 21 June 2017, Singapore signed the Multilateral Competent Authority Agreement on the exchange of CbC Reports. For income years beginning on or after 1 January 2017, Singapore-headquartered multinational enterprises with global revenues exceeding SGD 1,125 million have to submit to the IRAS an annual CbC report containing the income, taxes paid, and other indicators of level of economic activities in every tax jurisdiction where they operate. The IRAS will exchange CbC reports with jurisdictions with which Singapore has entered into bilateral agreements for the exchange of CbC reports.

Thin capitalisation

There are no formal thin capitalisation rules in Singapore. However, general anti-avoidance and transfer pricing provisions may operate in cases of abuse.

Controlled foreign companies

There are no CFC rules in Singapore.

Tax credits and incentives

There are various tax incentives available to taxpayers involved in specified activities or industries identified as being beneficial to Singapore's economic development.

Tax incentive applications are typically subject to an approval process during which the administering agency evaluates the applicant's business plans in detail. Successful applicants are required to satisfy rigorous requirements and are expected to make significant economic commitments in Singapore.

Generally, applicants are expected to carry out substantive, high value activities in Singapore, and will be required to commit to certain levels of local business spending and skilled employment. Some factors that will be considered include the use of Singapore as a base from which to implement regional growth strategies; introduction and anchoring of leading-edge skills, technology, and activities in Singapore; contributions to the growth of R&D and innovation capabilities; and potential spin-off to the rest of the economy.

Pioneer tax incentive

Corporations manufacturing approved products with high technological content or providing qualifying services may apply for tax exemption for five to 15 years for each qualifying project or activity under the pioneer tax incentive. Corporations may apply for their post-pioneer profits to be taxed at a reduced rate under the Development and Expansion Incentive, *as discussed below*.

Development and Expansion Incentive

Under the Development and Expansion Incentive, corporations engaging in new high-value-added projects, expanding or upgrading their operations, or undertaking incremental activities after their pioneer period may apply for their profits to be taxed at a reduced rate of not less than 5% for an initial period of up to ten years. The total tax relief period for each qualifying project or activity is subject to a maximum of 40 years (inclusive of the post-pioneer relief period previously granted, if applicable).

Investment allowance

Under the investment allowance, a tax exemption is granted on an amount of profits based on a specified percentage (of up to 100%) of the capital expenditure incurred for qualifying projects or activities within a period of up to five years (up to eight years for assets acquired on hire-purchase). Capital expenditure incurred for productive equipment placed overseas on approved projects may likewise be granted integrated investment allowances. Investment allowances of 100% of capital expenditure (net of grants) may be granted to businesses seeking to make substantial investment in automation, subject to a cap of SGD 10 million per project.

Incentives for internationalisation

The double tax deduction scheme for internationalisation allows companies expanding overseas to claim a double deduction for eligible expenses for specified market expansion and investment development activities. This includes manpower expenses incurred when Singaporeans are deployed to overseas entities.

Intellectual Property Development Incentive (IDI)

The IDI is a new incentive scheme that was introduced to encourage the exploitation of IP arising from R&D activities of the taxpayer. Income from the commercialisation of certain IP will be taxed at a concessionary rate. This incentive scheme is expected to be modelled after the modified nexus approach set out in the Action 5 report of the OECD base erosion and profit shifting (BEPS) project.

Productivity and Innovation Credit (PIC)

The PIC scheme provides for an enhanced 400% deduction for qualifying expenditure incurred in respect of six qualifying activities during the accounting periods that ended between 2010 and 2017 (i.e. years of assessment 2011 to 2018). The six qualifying activities are:

- The acquisition or leasing of prescribed IT and automation equipment.
- Staff training.
- The acquisition of IP.
- The registration of IP rights.
- R&D.
- Design.

The enhanced deduction is available only on the first SGD 400,000 of qualifying expenditure incurred each year on each of the qualifying activities, although, for the years of assessment 2015 to 2018, qualifying small and medium enterprises may claim PIC benefits for up to SGD 600,000 of such expenditure for each qualifying activity a year. The cap may be combined for certain years of assessment. Certain activities are subject to approval or minimum ownership requirements.

For the years of assessment 2013 to 2018, the acquisition of IP rights includes licensing of those rights, other than trademarks and any rights to the use of software.

With the expiry of the PIC scheme, the following further deductions have been introduced for the years of assessment 2019 to 2025:

- 250% deduction for qualifying expenditure incurred for R&D carried out in Singapore.
- 200% deduction for the first SGD 100,000 of qualifying expenditure incurred to register qualifying IP.
- 200% deduction for the first SGD 100,000 of expenditure incurred to license qualifying IP.

Mergers and acquisitions allowance

The mergers and acquisitions allowance allows a write-off, over five years, of 25% of the value of qualifying mergers or acquisitions deals executed between 1 April 2015 and 31 March 2020, subject to a cap of SGD 5 million (SGD 10 million for deals executed from 1 April 2016 to 31 March 2020) per year of assessment. This incentive is available to companies that are incorporated, tax resident, and carrying on a business in Singapore; however, this requirement may be waived for companies under the headquarters schemes (further details below) and the Maritime Sector Incentive (MSI) (further details below) for shipping-related supporting services (for share acquisitions completed from 17 February 2012 to 31 March 2020). A 200% tax allowance is also granted on transaction costs (capped at SGD 100,000 per year of assessment) incurred on qualifying deals.

Financial services incentives

Financial Sector Incentive (FSI) scheme

The FSI scheme covers a broad range of financial institutions, including bond intermediaries, Asian currency units, derivative traders, fund managers, equity capital market intermediaries, operational headquarters, providers of high-value-added processing services supporting financial activities, providers of trustee and custodian services, and trust management or administration services. Financial institutions that plan to expand their Singapore operations and are prepared to meet various strict qualifying conditions may apply for this incentive.

Under the FSI scheme, income from certain high growth, high-value-added activities, such as services and transactions relating to the bond market, derivatives market, equity market, and credit facilities syndication, may be taxed at 5%, while a broader range of financial activities will qualify for a 12% tax rate. This rate has been increased to 13.5% for awards granted or renewed from 1 June 2017, and the scope of qualifying income has been expanded (broadly speaking, certain currency, counterparty, and investment instrument restrictions have been removed). The tax incentive period may last for five, seven, or ten years, subject to certain conditions being met.

Finance and treasury centre (FTC)

Income derived by an FTC from approved FTC activities is taxed at a reduced rate of 8%. Approved activities include international treasury and fund management activities, corporate finance and advisory services, economic and investment research and analysis, and credit control and administration.

Interest payments to overseas banks and approved network companies are also exempt from WHT where the funds borrowed are used for approved activities.

Debt securities incentives

A package of tax concessions is available to various players in the Singapore bond market, including those involved in certain Islamic financing arrangements.

Insurance Business Development (IBD) scheme

The IBD scheme is an umbrella incentive for the insurance sector. Incentives offered under this scheme include a 10% concessionary tax rate for qualifying income of life, general, and composite insurers from carrying on insurance businesses from Singapore, and income derived from the provision of insurance broking and advisory services. This includes income from marine hull and liability insurance, captive insurance businesses, and qualifying specialised insurance.

Real Estate Investment Trusts (REITs)

Distributions made to foreign non-individual investors by a listed REIT out of rental income from Singapore real estate are subject to a reduced tax rate of 10%, subject to certain conditions being met. Listed REITs investing in foreign properties can apply for tax exemption for certain foreign income received in Singapore. Distributions out of this income similarly are exempt.

From 1 July 2018 to 31 March 2020, tax transparency treatment will be accorded for specified income of Singapore-listed REIT Exchange-Traded Funds (REIT-ETFs) so that there will be parity in tax treatments between investing in individual S-REITs and via REIT-ETFs with investments in S-REITs.

As a concession, Singapore-listed REITs are allowed to claim GST on expenses incurred for their business and for their special purpose vehicles, regardless of whether the REIT is eligible for GST registration, subject to a specified formula and certain conditions.

Islamic financing arrangements

The income tax, stamp duty, and GST treatment of prescribed Islamic financing arrangements and Islamic debt securities (*Sukuk*) are aligned with that of the conventional financing contracts to which they are economically equivalent, subject to certain conditions.

Infrastructure project finance incentives

Tax exemption is available for interest income earned from qualifying investments in qualifying infrastructure projects/assets. FSI companies that provide project finance advisory services related to qualifying projects/assets may enjoy certain tax concessions for their qualifying income, and companies that provide management services to qualifying business trusts and funds pay tax at 10% on their qualifying income.

Sovereign wealth funds

Tax exemption is available for income derived by a sovereign fund entity and an approved foreign government-owned entity from funds managed in Singapore.

Singapore Variable Capital Companies (S-VACC)

An S-VACC will be treated as a company and a single entity for tax purposes. The tax exemptions for income from funds managed in Singapore and the existing GST remission for funds will be extended to qualifying S-VACC. A 10% concessionary tax rate under FSI incentive for fund managers will be extended to approved fund managers managing an incentivised S-VACC. This tax framework will take effect when or after the regulatory framework for S-VACC comes into effect.

Headquarters schemes

Approved regional headquarters in Singapore are taxed at a concessionary rate of tax of 15% on qualifying overseas income. Depending on their level of economic commitments to Singapore, international headquarters can apply for various tax incentives, including tax exemption or concessionary tax rates on qualifying income.

Maritime Sector Incentive (MSI) scheme

The MSI scheme is the umbrella incentive for the maritime sector. Incentives offered include tax exemption for shipping companies and a 10% concessionary tax rate for international freight and logistics operators. Approved ship investment managers are also taxed at 10% on qualifying management-related income. The scheme also includes approved ship investment vehicles, which are tax exempt on their qualifying vessel lease income; approved container investment enterprises, which are taxed at 5% or 10% on qualifying income from container-leasing; and approved container investment management companies, which are taxed at 10% on qualifying management fees.

Qualifying ship operators and lessors under the MSI scheme also enjoy automatic tax exemption on gains from the disposal of vessels, vessels under construction, and new building contracts.

Global Trader Programme (GTP)

International traders are taxed at concessionary rates of 5% or 10% on qualifying income from physical trading, brokering of physical trades, and derivative trading income.

Other incentives

Other incentives include tax exemptions for not-for-profit organisations and a concessionary tax rate of 8% for approved aircraft lessors.

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes

Domestic corporations paying certain types of income to non-residents are required to withhold tax.

Unless a lower treaty rate applies, interest on loans and rentals from movable property are subject to WHT at the rate of 15%. Royalty payments are subject to WHT at the rate of 10%. The tax withheld represents a final tax and applies only to non-residents who are not carrying on any business in Singapore and who have no PE in Singapore. Technical assistance and management fees for services rendered in Singapore are taxed at the prevailing corporate rate. However, this is not a final tax. Royalties, interest, rental of movable property, technical assistance, and management fees can be exempt from WHT in certain situations or subject to a reduction in tax rates, usually under fiscal incentives or DTAs.

Payments made to public entertainers and non-resident professionals who perform services in Singapore are also subject to a final tax of 15% on their gross income. For public entertainers, this appears to be a final tax unless they qualify to be taxed as Singapore tax residents. However, non-resident professionals may elect to be taxed at the prevailing tax rate for non-resident individuals of 22% on net income if this results in a lower tax cost. The WHT rate on payments to non-resident entertainers was reduced to 10% from 22 February 2010 to 31 March 2020.

Ship charter fee payments are not subject to WHT.

The WHT rates are shown in the following table.

	WHT (%)		
Recipient	**Dividends (1)**	**Interest (2)**	**Royalties (2)**

Notes

1. Singapore has no WHT on dividends over and above the tax on the profits out of which the dividends are declared. However, some treaties provide for a maximum WHT on dividends should Singapore impose such a WHT in the future.
2. The non-treaty rates (a final tax) apply only to non-residents who do not carry on business in Singapore and who do not have a PE in Singapore. This rate may be further reduced by tax incentives.
3. Interest:
    a. Lower rate or exemption if received by a financial institution.
    b. Exempt if paid to the government.
    c. Lower rate or exemption if paid by an approved industrial undertaking.
    d. Exempt if paid by a bank and received by a bank.
    e. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
    f. Exempt if paid in respect of an approved loan or indebtedness.

   g. Exempt if paid to an approved pension fund.
   h. Lower rate if paid to a financial institution or insurance company or paid with respect to indebtedness arising from a sale on credit of any equipment, merchandise, or services.
   i. Exempt if paid by a financial institution.
   j. Exempt if paid by the government.
   k. Exempt if paid in respect of a loan, debt-claim, or credit that is guaranteed or insured by the government.
   l. Exempt if paid in respect of any debt instrument listed on a recognised stock exchange.
4. Royalties:
   a. Royalties on literary or artistic copyrights, including film royalties, are taxed at the non-treaty rate.
   b. Lower rate for payments in connection with industrial, commercial, or scientific equipment.
   c. Royalties on literary, artistic, or scientific work, except computer software, but including film royalties, are exempt.
   d. Lower rate of 5% for royalties on copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting, and 8% for royalties in connection with patents, trademarks, designs or model, plan, secret formula, or process, or industrial, commercial, or scientific equipment.
   e. Lower rate on copyright of literary, artistic, or scientific work, including cinematograph films, or films or tapes used for radio or television broadcasting.
   f. Lower rate for payments in connection with patents, designs, secret formulas/processes, or industrial, commercial, or scientific equipment/experience.
5. Treaties:
   a. Treaty with Bermuda covers only the exchange of information.
   b. Treaty with Chile covers only international ship operations.
   c. Treaties with Brazil, Hong Kong, and the United States cover only shipping and air transport activities.
   d. Treaty or lower rate applies from 1 January 2018.

Tax administration

Taxable period

The tax basis period is the calendar year; however, for business profits, the accounting period will generally be adopted.

Tax returns

Tax is computed for each tax year based on the income earned in the preceding year (the tax basis period). The corporation files an estimate of its income within three months of the end of the accounting period followed by a return of income by 30 November of the tax year, and the tax is assessed by the Comptroller of Income Tax. Mandatory electronic filing of tax returns will be introduced gradually. Certain companies will be required to file electronically from year of assessment 2018 (income year 2017). By year of assessment 2020 (income year 2019), all companies are expected to have adopted electronic filing. There is no fixed date for the issue of assessments.

Payment of tax

Assessed tax is payable within one month after the service of the notice of assessment, whether or not a notice of objection to the assessment has been lodged with the tax authorities. Application may be made to the Comptroller to pay estimated tax liabilities on a monthly basis. However, the Comptroller is under no obligation to grant such an application.

Late payment of tax will attract penalties, up to a maximum of 17% of the outstanding tax.

Tax audit process

The IRAS adopts a risk-based approach to identifying compliance risk, with a focus on improving the behaviour of taxpayers who pose a higher risk of non-compliance. It also prioritises and tailors specific compliance programmes that aim to identify taxpayers who have made mistakes in their tax returns, create an audit presence in the community to deter non-compliance by other taxpayers, educate taxpayers on their tax obligations and how to comply with these, and identify areas of tax law, policies, and processes where the tax system can be simplified.

Statute of limitations

The statute of limitations is four years from the year of assessment, but does not apply where there has been fraud or wilful default by the taxpayer.

Topics of focus for tax authorities

In the past, the IRAS has focussed its compliance efforts on:

- the timely filing of corporate tax returns
- PIC claims
- the classification of income and expenses for income taxable at concessionary and prevailing corporate tax rates
- group relief claims
- tax exemption for foreign-sourced dividends, and
- the recognition of income from construction contracts and provisions claimed by construction companies.

The IRAS has announced that, in addition to the above, it will be focussing on:

- wholesale of chemicals and chemical products, and
- travel agencies and ticketing agents.

Other issues

Exchange of information (EOI)

Generally, Singapore's tax treaties and EOI arrangements include provisions for the exchange of information for tax purposes. Treaty partners may make a request to the Comptroller of Income Tax for information, or the exchange may take the form of spontaneous EOI or automatic EOI.

Spontaneous EOI

Singapore has committed to spontaneously exchange certain rulings under the agreed framework for the compulsory spontaneous EOI set out in the BEPS Action 5 Report 'Countering Harmful Tax Practices More Effectively, taking into Account Transparency and Substance'.

International Tax Compliance Agreements

Singapore has also concluded the following international tax compliance agreements and will exchange information pursuant to those agreements as follows:

Foreign Account Tax Compliance Act (FATCA)

Singapore has a Model 1 FATCA intergovernmental agreement (IGA) with the United States in place to help ease the compliance burden of Singapore-based financial institutions (SGFIs). All Reporting SGFIs must submit a FATCA Return to the IRAS, setting out the required information in relation to every US Reportable Account.

Common Reporting Standard (CRS)

SGFIs are required to establish the tax residency of all their account holders. Further, they will need to report to the IRAS the requisite information for each Reportable Account relating to tax residents of jurisdictions with which Singapore has a Competent Authority Agreement to exchange information. The IRAS is expected to make the first exchange of CRS information in September 2018.

Adoption of International Financial Reporting Standards (IFRS)

Companies incorporated in Singapore and Singapore branches of foreign companies are required by the Companies Act to prepare and present financial statements that comply with the Singapore Financial Reporting Standards (SFRS). In Singapore, the Accounting Standards Council (ASC) has the statutory authority to issue SFRS for adoption.

The SFRS is principally based on and substantially similar to IFRS that are issued by the International Accounting Standards Board (IASB). Full convergence of the SFRS with IFRS for Singapore-listed companies was the strategic direction of the ASC set in 2009, and, on 29 December 2017, the ASC issued Singapore Financial Reporting Standards (International) (SFRS(I)s), Singapore's equivalent of the IFRS. Singapore-incorporated companies that have issued, or are in the process of issuing, equity or debt instruments for trading in a public market in Singapore are required to apply SFRS(I)s for annual periods beginning on or after 1 January 2018. Non-listed companies may voluntarily apply the new framework.

Companies are required to submit financial statements as part of their tax return filing. The IRAS generally accepts financial statements prepared for statutory filing, although companies that have been allowed to prepare their financial statements using standards other than SFRS, such as IFRS or the Generally Accepted Accounting Principles (GAAP) adopted by the United States, may be required to explain and/or account for any differences and make the necessary tax adjustments, if any.

In relation to financial instruments, the Income Tax Act has been amended to align the tax treatment with the accounting treatment prescribed by SFRS(I) 9 (Financial Instruments) and SFRS(I) 15 (Revenue from Contracts with Customers), and to allow tax adjustments to be made when the SFRS(I) is first applied. As a concession, the IRAS allows taxpayers to elect to align their tax reporting of lease income to the accounting treatment prescribed by SFRS 17 (Leases), which requires operating lease income to be recognised using the 'effective rent method'.

Sample corporate tax calculation

Accounting period ended 31 December 2017 (year of assessment 2018).

	SGD	SGD
Net profit before tax per accounts		5,857,500
Less:		
Singapore dividend (exempt)	1,500

Significant developments

A recent amendment to the tax legislation in the Slovak Republic (Slovakia) includes, *inter alia*, the following measures applicable from 1 January 2018:

- Participation exemption on taxation of capital gains.
- Tax exemptions for intangible assets (patent box) and a 'super-deduction' for research and development costs (R&D credit).
- Cancellation of tax license (minimum tax).
- Tax treatment of business combinations.
- Refined criteria for creating a permanent establishment (PE) in Slovakia and source of income rules.
- New tax anti-avoidance measures (e.g. with respect to hybrid mismatches and beneficial ownership test).
- Introduction of exit tax.
- Introduction of rules for controlled foreign corporations (CFCs) (effective from 2019).

Note that the legislation is expected to continue to be subject to frequent amendments and new official interpretations; consequently, it is advisable to contact PwC Bratislava for up-to-date information.

Taxes on corporate income

As a member state of the Organisation for Economic Co-operation and Development (OECD), the Slovak Republic's system of corporate taxation generally follows OECD guidelines and principles.

The corporate income tax (CIT) applies to the profits generated by all companies, including branches of foreign companies.

Slovak tax residents are taxed on their worldwide income. Slovak tax residents may utilise a method of elimination of double taxation if their income is taxed abroad. The exemption or credit method can be used to eliminate the double taxation, depending on the relevant double tax treaty (DTT) and the type of income.

Slovak tax non-residents are taxable in Slovakia on their Slovak-source income only. Slovak-source income is defined by local tax law and includes, *inter alia*, the business income of PEs and passive types of income, such as royalties, interest, and income from disposal of assets.

The CIT rate for 2018 is 21%.

Withholding tax (WHT) of 7% may apply to certain taxable dividend payments to individuals.

Further, some income, such as interest or royalties, may be subject to a 19% WHT rate. A specific 35% WHT rate applies for payments to taxpayers from non-treaty jurisdictions (i.e. where no DTT or tax information exchange agreement [TIEA] exists) or where the beneficial owners of the income cannot be identified, including payments of taxable dividends.

Tax license (minimum tax)

Tax license (minimum tax) was cancelled from 1 January 2018.

Taxpayers can claim a tax license from previous periods even after 31 December 2017 at the amount of a positive difference between the tax license and the tax calculated in the tax return for no more than three consecutive taxable periods for which the tax license was paid.

Local income taxes

Slovakia does not have local, state, or provincial CIT.

Corporate residence

A company is a tax resident in the Slovak Republic if it has its registered seat or effective place of management in the Slovak Republic.

Permanent establishment (PE)

A PE is created if:

- a foreign entrepreneur uses, either continually or repeatedly, a permanent place or facility for carrying out its business activities in Slovakia
- a foreign entrepreneur repeatedly mediates transportation and accommodation services, including via a digital platform
- an individual acting on behalf and in the name of a foreign entrepreneur repeatedly mediates or plays a leading role in concluding contracts or negotiating contract details, or
- the period of providing services by the foreign entrepreneur or by individuals working for this foreign entrepreneur in Slovakia is longer than 6 months in any consecutive 12-month period.

The conditions for creating a PE may be regulated in more detail by a DTT.

A PE need not be entered in the Slovak Commercial Register, but a foreign entrepreneur with a Slovak PE is taxable in Slovakia. A foreign entrepreneur with a Slovak PE has the same tax registration, filing, payment, and tax advance payment obligations as a Slovak company. The tax base of a PE may not be less than one that which would have been achieved if similar activities under similar conditions were performed as an independent entity (e.g. a Slovak company).

Other taxes

Value-added tax (VAT)

A basic VAT rate of 20% applies to all taxable supplies, with certain exceptions. Certain medical products, printed materials, and 'basic goods' (e.g. milk, butter, meat) classified under selected codes of the Common Customs Tariff have a VAT rate of 10%.

The threshold for obligatory VAT registration for taxable persons with their seat or permanent address, place of business, or VAT establishment in Slovakia is a turnover of 49,790 euros (EUR) for the previous consecutive 12 calendar months. Voluntary registration is also possible.

More taxable persons established in Slovakia (i.e. with a seat, place of business, or VAT establishment in Slovakia) can create a VAT group if certain conditions are met.

A VAT registration obligation in Slovakia arises for foreign persons (taxable persons without a seat or VAT establishment in Slovakia) before commencing activities subject to Slovak VAT where they could be liable to pay Slovak VAT, except import of goods. There is a list of supplies that foreign taxable persons can perform in Slovakia without a need to register for Slovak VAT, including:

- Supplies subject to VAT reverse-charge.
- Supplies subject to triangulation simplification performed by the first customer in a chain.
- Intra-Community supplies of imported goods if represented by a tax representative.
- VAT-exempt transport and supplementary services related to export and import.

This list, among others, includes local supplies of goods to taxable persons established in Slovakia as such supplies are subject to local VAT reverse-charge mechanism (i.e. person liable to pay VAT on such supplies is the customer). Foreign taxable persons already registered for Slovak VAT are not entitled to deduct input VAT via Slovak VAT return if such input VAT relates only to supplies subject to VAT reverse-charge. Foreign companies are able to claim Slovak input VAT via the VAT refund procedure, provided they meet the stipulated conditions.

Call-off stock simplification is available for foreign persons VAT registered in other European Union (EU) member states that transfer own goods to a warehouse located in Slovakia for the purpose of their subsequent local supply to one specific Slovak VAT payer. If the conditions of call-off stock simplification are met, a foreign person can avoid VAT registration in Slovakia. If call-off stock simplification applies, there will be no need to report intra-Community acquisition of own goods in Slovakia; the customer will self-charge Slovak VAT upon withdrawal of goods from the warehouse.

Exempt supplies without credit entitlement include, among others, certain postal services, financial and insurance services, education, public radio and TV broadcasting services, health and social services, the transfer and leasing of real estate (with exceptions), and lottery services. There are also exempt taxable supplies with credit entitlement, for example financial and insurance services provided to the customer established outside of the European Union, supply of goods to other EU member states, certain import of goods, and export of goods and services.

A special regime for payment of VAT by a supplier based on receipt of payment for supplied goods or services ('cash accounting') is available in Slovakia in very specific cases. This regime postpones the obligation to pay VAT until the customer pays the supplier for the supply. This cash accounting scheme can only be used by Slovak-established entities (i.e. with a seat, place of business, or fixed establishment in Slovakia) and if they meet certain conditions.

Supplies of certain types of goods and services between two Slovak VAT payers are subject to local reverse-charge. Such supplies among others include supplies of real estate, metal waste and scrap metal, agricultural crops, iron and steel, mobile phones and integrated circuit devices, etc. Local reverse-charge also applies to supply of construction works, supply of building or parts of buildings under construction, and supply of goods with assembly and installation falling under section F of Commission Regulation (EU) No. 1209/2014 establishing a new statistical classification of products by activity (CPA). For such supplies, the supplier will not charge VAT on the issued invoice and the recipient must apply a reverse-charge.

Customs duties

Goods imported from non-EU countries are subject to import customs clearance. Goods exported from the EU customs territory have to be declared for export customs clearance.

To communicate with the customs offices, each person must have an Economic Operator Registration and Identification Number (EORI), which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

The European customs nomenclature and customs tariffs are set by EU legislation. Customs procedures are harmonised within the European Union.

Excise taxes

Excise tax is charged on the release to tax-free circulation or import of tobacco products, wine, spirits, beer, mineral oil, electricity, coal, and natural gas. The excise tax rate depends on the customs classification of the product.

The excise duty administrator is the Customs Authority. Communication with the Customs Authority must be in electronic form if the company is a VAT payer registered in Slovakia or if it is represented by a tax adviser or attorney.

Immovable property tax

Immovable property tax, which is divided into land tax, building tax, and tax on apartments, is governed by the Act on Local Taxes. Immovable property tax is calculated based on the area of the real estate, its location, and its type, as well as the tax rate of each self-governing region.

The immovable property tax rate may vary significantly. Please find below the spread of the tax charges per square metre.

Property	Immovable property tax per square metre (EUR)
Four floor office building in centre of city of Bratislava	8.30 *
One floor hall rural area	0.66 to 6.40

* For each additional floor, add an additional tax of EUR 0.33.

Further, municipalities may opt to impose a local development levy that applies to real estate developments. If a municipality decides to impose the levy, its rate may be between EUR 10 and EUR 35 per square metre.

Transfer taxes

There are no transfer taxes in the Slovak Republic.

Stamp taxes

There are no stamp duties or similar taxes on share or other property transfers in the Slovak Republic, although small administrative fees are payable to register such transactions.

Turnover taxes

There are no turnover taxes in the Slovak Republic.

Payroll taxes

Taxable remuneration from employment includes all remuneration, whether monetary or non-monetary, including in-kind benefits provided to an employee. Statutory health insurance and social security contributions paid by the employee reduce taxable income. Obligatory employer's health insurance and social security contributions paid by the employer are not part of the employee's taxable income.

Employers must keep Slovak payroll records for employees and members of their statutory bodies.

The tax base up to EUR 35,268.06 is taxed at 19%. The exceeding part of the tax base is taxed at 25%.

A tax rate of 7% or 35% applies to taxable dividend income (e.g. dividends from profits generated from 1 January 2017) of individuals starting from 1 January 2017. The higher tax rate applies in case of dividends received from non-treaty jurisdictions.

Income of constitutional authorities from dependent activity is, in addition to the tax calculated as listed above, subject to a special tax rate of 5%.

Social security contributions

Employer's health insurance and social security contributions total 34.4% of employee remuneration. From 1 January 2018, the maximum assessment base for all types of social insurance was increased to EUR 6,384 monthly. Employers also pay injury insurance contributions of 0.8% of employees' total salary costs per month, which are not capped. The maximum assessment base for the purposes of health insurance is cancelled for all types of income, except dividend income. Dividend income paid out from the profit generated after 1 January 2017 is no longer subject to health insurance contributions. The rate of health insurance contributions for individuals who receive dividend income paid out from the profit generated before 31 December 2016 (except for dividends from listed shares) is 14% of the assessment base. In general, the payer of the dividend needs to withhold the health insurance contribution on the payment of the dividend.

Special tax on regulated industries

There is a special tax from activities of entities in regulated industries (e.g. energy, insurance and re-insurance, public healthcare insurance, electronic communications, pharmaceuticals, postal services, railway transport, public water distribution and sewerage, air transport). The tax is calculated as a multiple of the tax base, coefficient, and the tax rate. The liability to pay this special tax arises in case the accounting profit exceeds EUR 3 million.

The coefficient (maximum of 1) depends on the amount of income from the regulated activity. The monthly tax rate is 0.00726. Hence, the annual rate of the special tax can be up to 8.712%.

The tax rate will decrease to 0.00545 per month (i.e. maximum 6.54% *per annum*) in 2019 and 2020 and to 0.00363 per month (i.e. maximum 4.356% *per annum*) in 2021.

Special tax on banks

A special tax on banks is charged at a rate of up to 0.4% to the extent that the cumulative amount of special tax collected from all banks by the Tax Office does not reach the EUR 750 million threshold. The tax rate of 0.2% applies for 2017 to 2020.

The special tax on banks is calculated from the bank's liabilities recognised on the balance sheet net of deductions (e.g. the amount of the bank's equity, provided that its value is positive), the amount of the subordinated debt under a special regulation, and the amount of funds provided to the branch of a foreign bank.

Insurance premium tax (IPT)

IPT of 8% applies to non-life insurance premiums in Slovakia and is payable by insurance companies.

Motor vehicle tax

Vehicle tax applies to vehicles that are registered in the Slovak Republic and used for business purposes. The taxpayer is the entity that uses the vehicle for business purposes. The tax rate depends on engine capacity, vehicle size, etc. The motor vehicle tax is administrated by the Tax Office.

Branch income

A foreign company may trade through a Slovak branch, which must be registered in the Slovak Commercial Register. The taxable income of the branch must not be lower than that which an independent entity (e.g. a Slovak company) would achieve from carrying out similar activities under similar conditions. If the branch's taxable income cannot be assessed based on its income less costs, as adjusted for tax purposes, certain other methods may be used. A taxpayer may ask the tax authorities in writing to approve such a method.

Income determination

The tax base is generally the accounting result as determined under Slovak statutory accounting rules, adjusted for tax purposes.

Inventory valuation

Stock (i.e. inventory) is valuated at cost. Slovak legislation specifically provides for the use of the arithmetical average cost and first in first out (FIFO) methods to value stock. Last in first out (LIFO) may not be used. The tax treatment follows the accounting treatment.

Capital gains

Capital gains from the disposal of assets are included in the CIT base. The tax treatment of capital losses depends on the type of asset on which they arose.

Capital gains on the alienation of shares and participation interest in Slovak companies may be taxed in Slovakia, predominately if sold to a buyer who is a Slovak tax resident or has a PE to which the purchase is attributable.

The income from the sale of shares or participation interest of a company where the value of immovable property is more than 50% of the equity has its source in Slovakia.

However, as of 1 January 2018, income from the sale of shares in joint-stock companies, ownership interests in limited liability companies, or limited partnerships (hereafter 'participation') may be exempt from CIT if certain conditions are met. These conditions include the possession of at least 10% of shares or ownership interests for at least 24 months (counting from 1 January 2018 at the earliest).

A taxpayer who performs substantial functions in Slovakia, bears and manages the risks associated with the participation ownership, and has adequate personnel resources and material equipment to perform these functions may apply the tax exemption. However, the tax exemption does not apply to taxpayers who trade in securities, to the sale of companies in liquidation, bankruptcy, or restructuring, or to taxpayers in liquidation.

Exit tax

The exit tax applies to income in situations where taxpayers (Slovak tax residents and non-residents with a PE in Slovakia) transfer outside of Slovakia:

- individual property (transfer carried out by a tax resident from their headquarters in Slovakia to a PE in another country or by a tax non-resident from their PE in Slovakia to their headquarters of PE in another country)
- business activities (transfer carried out by a tax resident to another country or by a tax non-resident from their PE in Slovakia to another country), or
- tax residence (tax resident is no longer Slovak tax resident).

The tax is calculated by applying a 21% tax rate to a specific positive tax base, which is determined as follows:

- When transferring individual property, its fair (market) price at the time of exit will be considered as income and its tax value will be regarded as an expense.
- When transferring business activities, its fair (market) price of transferred asset and liabilities at the time of exit will be considered as income and the specific tax base will be calculated in the same way as when selling a business, or part thereof.

The exit tax must either be paid in one instalment in the period for filing the tax return or, upon request, in five annual instalments if it is a transfer to an EU or European

Economic Area (EEA) member state. When paying the tax in instalments, the taxpayer must also pay interest on outstanding instalments.

The new regulation on the exit tax also addresses the valuation of assets and liabilities for Slovak tax purposes where a Slovak tax non-resident becomes a tax resident in Slovakia.

The exit tax must be applied for taxable periods commencing on 1 January 2018 or later.

Dividend income

Dividends generated from profits arising until 31 December 2003 and from the profit arising in the period started since 1 January 2017 will be subject to taxation.

The tax regime for these dividends is as follows:

- Dividends from profits generated until 31 December 2003 and paid out from a Slovak tax resident company to a Slovak non-resident company will be subject to WHT of 19% (no taxation if subject to EU Parent/Subsidiary Directive exemption). If such dividends are paid to individuals (either Slovak tax residents or tax non-residents), the WHT of 7% will apply.
- Dividends from profits generated until 31 December 2003 and received by a Slovak company from foreign sources will be subject to taxation in Slovakia (no taxation if subject to EU Parent/Subsidiary Directive exemption).
- Dividends from profits generated after 1 January 2017 and received by a Slovak tax resident company from a non-contracting state company will be subject to tax of 35%.
- Dividends from profits generated after 1 January 2017 and paid out from a Slovak tax resident company to a non-contracting state company will be subject to WHT of 35%.
- Dividends received by a general partnership or a limited partnership and subsequently ‘paid’ to its partners of a non-contracting state will be subject to WHT of 35%.

However, dividends paid out of profits earned on or after 1 January 2004 and until 31 December 2016, and liquidation surpluses and settlement amounts to which shareholders became entitled on or after 1 January 2004, are not subject to tax.

Moreover, based on the anti-avoidance provisions, any dividends may be taxable in Slovakia if they are received through artificial structures with no genuine business reason and contrary to economic reality.

Interest and royalty income

Slovak-source interest income earned by taxpayers with limited, as well as unlimited, tax liability is subject to withholding at a flat tax rate of 19% (for states without a DTT, *please refer to the Withholding taxes section*), except where the recipient of the deposit interest or the yield is a Slovak investment fund, Slovak supplementary pension fund, Slovak bank or the branch of a foreign bank, or the Slovak Export-Import Bank.

Slovak-source royalty income of tax non-residents is subject to the 19% corporate flat tax rate (for states without a DTT, *please refer to the Withholding taxes section*).

Interest and royalty income is exempt if it is paid by a Slovak payer to a recipient who is a tax resident in the European Union and is a beneficial owner of this income, provided that for 24 months before the payment:

- the payer owns at least a 25% direct shareholding of the recipient of the income
- the recipient owns at least a 25% direct shareholding of the payer of the income, or
- a third entity resident in the European Union owns at least a 25% direct shareholding in both the payer and the recipient of the income.

Unrealised foreign exchange gains/losses

The taxpayer may decide whether to include unrealised foreign exchange differences relating to unsettled payables and receivables in the tax base in the tax period when they are accounted for or in the tax period when they are realised. However, the decision to include/stop including these differences when they are realised must be made on the CIT return.

Foreign income

Companies resident in the Slovak Republic are taxed on their worldwide income, including income of its foreign branches. A Slovak tax resident entity is able to deduct from its tax base a tax loss made by its taxable PE (e.g. branch) outside the Slovak Republic, adjusted for Slovak tax purposes.

Credit relief is available for foreign tax paid under most of Slovakia's DTTs. Alternatively, exemption of foreign income taxed abroad from taxation in Slovakia may apply.

Slovakia does not have provisions related to deferral.

Deductions

Depreciation and amortisation

Tangible fixed assets (acquisition value over EUR 1,700) are classified into six tax depreciation groups to which different depreciation periods apply. The possibility to use accelerated tax depreciation methods is limited to assets belonging to the tax depreciation groups 2 and 3.

Depreciation group	Assets	Depreciation (years)
1	Motor vehicles, office machines and computers, tools and implements	4
2	Combustion engines, outboard engines, most production line equipment, furniture	6
3	Electric motors, turbines, air-conditioning systems	8
4	Buildings made of metal, ships, railway locomotives	12
5	Buildings not involved in depreciation group no. 6 and engineer's sites not included in other depreciation groups	20
6	Administrative and residential buildings, hotels and buildings for culture, education, health, and public entertainment	40

Taxpayers do not have to depreciate an asset every year. Tax depreciation may be interrupted in any year and continued in a later year without a loss of the total tax depreciation available.

A lessee can depreciate a tangible fixed asset held under a financial lease. The tax depreciation base equals the acquisition value of the leased asset without VAT and financing costs plus expenses related to acquisition of the leased asset that the lessee incurred before the asset was put into use. The assets acquired under finance lease shall be amortised proportionally or using an accelerated method.

The value to be used as the basis for tax depreciation depends on how the asset is acquired and is usually based on one of the following:

- Acquisition costs (i.e. the price for which the asset was acquired).
- The taxpayer's own costs incurred, if the asset is acquired or produced internally.
- Intangibles (acquisition value of EUR 2,400 or more) and low value assets (acquisition value of EUR 1,700 or less) are amortised for tax purposes in line with their accounting amortisation (i.e. over the useful life of the asset).

Goodwill

Amortisation of purchased goodwill, including the goodwill on purchase of a business as a going concern, if it represents an identifiable intangible asset, is tax deductible over up to seven consecutive tax years.

For goodwill created at the contribution of business as a going concern or goodwill created at a merger, the tax deductibility of the goodwill depends on the method of tax treatment of this reorganisation. In general, if the reorganisation is performed for tax purposes at fair market values, the goodwill created will be tax deductible.

Start-up expenses

Start-up expenses are tax deductible in the period when incurred.

Interest expenses

In general, interest expenses incurred in order to generate taxable income can be treated as tax deductible, subject to thin capitalisation rules (*see Thin capitalisation in the Group taxation section*).

From 1 January 2018, interest on loans for the acquisition of shares is tax deductible only in the period of their sale, and if the income from this sale is not tax exempt.

Bad debt provisions

Provisions for unsecured receivables from loans created by banks, and bad debts of regular commercial companies, are fully tax deductible (subject to certain conditions) once the debt has been overdue for more than 1,080 days (20% of the bad debt is tax deductible when it has been overdue for more than 360 days, and 50% after 720 days), provided certain conditions are met. Provisions for bad debts in other circumstances can also be tax deductible if specific conditions are met (e.g. bad debts registered in bankruptcy proceedings).

Charitable contributions

Charitable contributions are treated as gifts, which are not tax deductible.

Pension expenses

Contributions to supplementary pension savings made by the Slovak employer on behalf of the employee, up to 6% of the gross salary of the employee participating in these plans, are tax deductible.

Fines and penalties

Penalties and fines are not tax deductible.

Allowance for students

Subject to specific conditions, taxpayers may deduct from their tax base a special allowance with respect to practical education provided to students of up to EUR 3,200 per student per year.

Transporting employees to place of work

The employer's expenses incurred on transporting employees to their place of work and back are tax deductible under the following conditions:

- Public transport is either verifiably not carried out at all or not in the extent as the employer needs.
- The employer uses a contract carrier or its own means of collective transport for 10+ persons for this purpose.

Taxes

Road tax, real estate tax, and most other such taxes are tax deductible. Social security contributions paid by an employer with respect to employees are also tax deductible. VAT charged to profit and loss is tax deductible only if certain conditions are met.

Other non-deductible expenses

Expenses are generally tax deductible if incurred to generate, secure, and maintain the entity's taxable income. However, certain other costs are specifically not tax deductible. These include entertainment costs, various provisions (e.g. provisions to tangible and intangible assets, certain bad debt provisions), and various expenses in excess of statutory limits (e.g. employee travel expenses and meal allowances).

Net operating losses

A company or branch may currently carry forward and utilise a tax loss equally over a period of four years following the year in which the loss arose.

For issues related to the interim provision regarding tax losses carried forward from years 2010 to 2013, please contact the local PwC Tax office.

Carryback of losses is not available in the Slovak Republic.

Payments to foreign affiliates

Generally, deductions may be claimed for royalties, management service fees, and interest charges paid to foreign affiliates, provided such amounts are at arm's length and subject to other limitations by the law (e.g. thin capitalisation rules).

Hybrid mismatches

From 1 January 2018, expenses incurred in so-called 'hybrid mismatches' to related parties are tax non-deductible if such expenses are:

- tax deductible for several entities
- are not included in taxable income of other entities, or
- are (in)directly used for financing the other entity, which results in multiple tax deductions or not including these expenses in the income of another entity.

Group taxation

There is no concept of group CIT in the Slovak Republic. Each company in a group is taxed individually.

Transfer pricing

Under the transfer pricing rules, prices in transactions between a Slovak company and its related parties should be at arm's length, which means the prices should be at rates similar to those that would be charged between unrelated parties for the same or similar transactions under comparable conditions. Although the OECD Transfer Pricing Guidelines were not formally implemented, they are usually followed for determination of arm's-length prices.

The transfer pricing documentation requirements also apply to domestic-related parties in addition to the rules for foreign-related parties. This means that the prices used between two Slovak related parties need to be set at an arm's-length basis for tax purposes. All provisions of the law on methods of determining such prices for the purpose of adjusting the tax base and the obligation to keep associated transfer pricing documentation also apply to domestic-related parties.

If transactions between the related parties are not made at arm's length, and this results in a reduction in the Slovak entity's corporate tax base, then the tax authorities can adjust the corporate tax base to that which it would have been if arm's-length prices had been used.

Based on the amendment of the Income Tax Act as of 1 January 2017, Slovak tax residents can request approval of an advance pricing agreement (APA) by the tax authorities. The amendment also sets fees for such APA approval in an amount of EUR 10,000 for unilateral APA approval and EUR 30,000 for multilateral APA approval (approval based on application of DTT).

In some cases, doubled penalties can be imposed for transfer pricing adjustments made by the Slovak tax authorities as a result of a tax audit initiated after 1 January 2017.

Transfer pricing documentation

All Slovak taxpayers must keep sufficient transfer pricing documentation to justify prices charged by or to their foreign-related parties. The Slovak Ministry of Finance has issued a guideline setting out detailed requirements for transfer pricing documentation (the Guideline).

The EU code of conduct was not formally implemented. However, the Guideline requires maintaining transfer pricing documentation in a form generally in line with the EU standards.

Slovak tax inspectors may require transfer pricing documentation. The deadline to provide transfer pricing documentation for taxpayers is 15 days, and the tax authority may request transfer pricing documentation without the formal opening of a tax audit.

Without such documentation, transfer pricing adjustments (increased tax base) are much more likely to be imposed.

Country-by-country (CbC) reporting

A newly proposed amendment to the Act on International Cooperation in Tax Administration introduced CbC reporting based on the base erosion and profit shifting (BEPS) plan with an aim to introduce automatic exchange of tax information between countries.

If consolidated revenues for a multinational enterprise (MNE) group of entities are higher than EUR 750 million for the immediately preceding financial year, the group is required to file CbC reporting.

The amendment defines parent entity, substitute parent entity, and principal entity. In most cases, the parent entity is obligated to file CbC reporting in the country in which it is the tax resident.

If a Slovak tax resident is not considered to be a parent entity, a substitute entity, or a principal entity (i.e. the entity that is required to file CbC reporting), it must announce to the Financial Directorate of the Slovak Republic the business name, address, identification number, and country of tax residence of the reporting entity by the filing due date of its income tax return. This notification requirement should already apply to the 2016 tax period.

The concept of a secondary obligation has also been introduced, which delegates the obligation to submit the CbC report to a surrogate parent entity or to another basic entity of the MNE if the parent or surrogate parent entity that is not the Slovak company does not prepare and submit the CbC report in the country of its tax residence. Therefore, Slovak tax residents may also be required to prepare a CbC report.

Thin capitalisation

The limit for the maximum amount of tax deductible interest and related fees on credits and loans between related parties is established as 25% of the adjusted earnings before interest, tax, depreciation, and amortisation (EBITDA), i.e. the sum of:

- accounting profit before tax
- depreciation and amortisation, and
- interest expenses included in the accounting profit before tax.

Controlled foreign corporations (CFCs)

The rules for CFCs seek to tax income artificially diverted by a Slovak parent company to a CFC if the income is paid without economic justification or to obtain a tax advantage for the Slovak company.

A company is considered a CFC if:

- it is controlled or managed, directly or indirectly, by the Slovak company (e.g. by voting rights, share capital, or share in profit), and
- the CIT paid in another country is lower than 50% of the tax the CFC would pay in Slovakia.

If income is diverted to a PE, it will only be sufficient (for purposes of the CFC assessment) to fulfil the second condition (i.e. the condition regarding the hypothetical Slovak tax).

The CFC's income will be taxed in Slovakia by including the CFC's tax base in the tax base of the Slovak parent company to the extent it is attributable to the assets/risks related to the significant functions of the Slovak company, which manages and controls the CFC.

To avoid double taxation, the Slovak parent company will be able to factor in the tax paid by the CFC abroad when calculating/paying tax in Slovakia.

The application of adjustments to the CFC tax base in line with transfer pricing rules will take precedence over the application of CFC rules for the taxation of profits.

The CFC rules will be applied for tax periods commencing on or after 1 January 2019.

Treatment of inter-company items

Dividends are not treated as taxable (subject to anti-avoidance provisions) if they are paid out of the profit after tax earned in the years 2004 to 2016. *For tax treatment of dividends paid out from profits realised before 2004 and from 2017 onwards, please see Dividend income in the Income determination section*.

In general, royalties, commissions, and other payments paid to foreign-related parties are tax deductible, provided they are incurred for genuine business reasons and the charges are in line with transfer pricing rules.

Tax credits and incentives

There are several types of investment incentives potentially available, including corporate tax credits, discounts on the price of publicly owned real estate, and financial support for creating jobs or for the acquisition of long-term assets. All of these are treated as state aid.

Various conditions must be met in order for a company to qualify for state aid. These include a minimum amount of investment in fixed assets, where the amount depends mainly on the type of project and where it is located, or a minimum number of newly created jobs.

Investment incentives

Investment incentives (including tax credits) are potentially available for projects in the following areas:

- Industry.
- Technology centres.
- Shared services centres.
- Tourism.

The granting of a tax relief is subject to approval of the Slovak authorities. If certain conditions are met, a taxpayer may apply tax relief in the ten subsequent years following the tax period in which the relief was granted.

Research and development (R&D) super deduction

Taxpayers who perform R&D activities may apply for a special form of support, the super-deduction of R&D costs. The total of the following items may be deducted from the tax base adjusted by the tax loss deduction:

- 100% of R&D costs incurred in the taxable period for which the tax return is filed.
- 100% of positive difference between the average of the total R&D costs incurred:
  - in the taxable period for which the taxpayer applies super-deduction, and in the immediately preceding taxable period, and
  - in the two immediately preceding taxable periods.

If a tax loss is recorded or if the tax base after the tax loss deduction is lower than the available deduction, the deduction may be applied in the next taxable period in which the taxpayer reports a positive tax base; however, this may not exceed four taxable periods immediately following the period in which the entitlement to make a deduction arose.

Tax exemption for intangible assets (Patent box)

The amendment of Income Tax Act valid since 1 January 2018 introduced a tax exemption of 50% for income from considerations for granting a right to use, or for using, a protected patent, utility model, or software created by the taxpayer (basic patent box). Tax exemption refers only to assets created by own activities and applies to tax periods in which amortisation of an intangible asset is included in tax expenses.

A similar exemption also applies to a certain part of income from selling goods that were manufactured on the basis of a protected patent or a utility model (extended patent box). Tax exemption accounts for 50% of income attributed to the sales price, less related costs and less profit margin.

If intangible research results acquired from another person are used to develop intangible assets, the tax exemption is reduced by a coefficient.

Entities applying this tax exemption are entered in a public register kept by the Financial Directorate of the Slovak Republic.

Foreign tax credit

Foreign tax credits are available if allotted under an applicable DTT.

Withholding taxes

Mainly, the following payments are subject to WHT when made by Slovak companies to foreign parties. According to the amendment of the Income Tax Act, effective from 1 January 2017, dividends will also be subject to WHT. However, a DTT may reduce or eliminate the rate.

Payments	WHT (%)
Fees for services	19/35
Royalties *	19/35
Interest on loans and deposits *	19/35
Dividends **	7/19/35

* Royalties and interest paid to related EU-resident companies are not subject to WHT if certain conditions are met.

** Dividends paid out of profits arising from 2004 to 2016 are not subject to Slovak WHT (subject to anti-avoidance provisions). *Please see Dividend income in the Income determination section.*

A 35% WHT rate applies on payments to taxpayers from non-contracting states (i.e. states that did not conclude either a DTT or TIEA with the Slovak Republic) or where the beneficial owner of the income is not (cannot be) identified.

Service fees may be subject to tax in Slovakia only if the service is provided in the territory of Slovakia or if paid for by a Slovak tax resident.

WHT should be paid to the Tax Office no later than 15 days from the end of the calendar month following that in which the payment was made. The withholding obligation lies with the Slovak resident taxpayer. The taxpayer must also notify the tax administrator of the tax withheld and transferred. If the tax is not properly withheld, the unpaid tax becomes the Slovak tax resident's tax liability, and a penalty may be assessed.

This table highlights countries with which Slovakia has entered into a DTT.

	WHT (%)

Notes

1. The 5% rate applies to literary, artistic, and scientific work copyright royalties. The 10% rate applies in other cases.
2. The 10% rate applies to industrial and public works equipment loans granted by a bank for a period of at least 10 years. The 15% rate applies in other cases.
3. The 25% rate applies to trademark royalties. The 15% rate applies in other cases.
4. The reduced WHT rate applies to artistic copyright royalties.
5. The 0% rate applies to literary, artistic, and scientific work copyright royalties. The 1% rate applies to finance leases of equipment. The 5% rate applies to operating leases of equipment, film, and broadcasting royalties, and to computer software royalties. The 10% rate applies to patent and trademark royalties and to information concerning industrial, commercial, and scientific experience.

6. The 0% rate applies to literary, artistic, and scientific work copyright royalties. The 5% rate applies in other cases.
7. The source state may tax the income at its domestic rate.
8. The 10% rate applies to film and broadcasting royalties. The 15% rate applies to copyright, patent, software, and trademark royalties, and to industrial, commercial, and scientific equipment and information royalties.
9. The 2% rate applies to government debt or government-assisted debt, the 5% rate applies when the recipient is a financial institution, and the 10% rate applies in other cases.
10. The 0% rate applies to copyright royalties. The 5% rate applies in other cases.
11. The 0% rate applies to cultural royalties and the 10% rate applies to industrial royalties.
12. *See the treaty for applicability of rates*.
13. The 5% rate applies to patent and trademark royalties and to industrial, commercial, and scientific equipment royalties.
14. The 10% rate applies to patent and trademark royalties, and to information concerning, industrial, commercial, and scientific experience. The 15% rate applies in other cases.
15. The 0% rate applies to interest received by a bank.
16. The 0% rate applies to copyright royalties and the 10% rate applies in other cases.
17. The 0% rate applies to the credit sale of equipment, merchandise, or services; a loan granted by a financial institution; a pension fund; or to interest paid by a company to a company of the other state that is affiliated with the company paying the interest by a direct minimum holding of 25% in the capital for at least two years prior to the payment of the interest or where both companies are held by a third company that has a direct a minimum holding of 25% for at least two years prior to the payment of the interest, both in the capital of the first company and in the capital of the second company. In other cases, the 5% rate applies.
18. The 0% rate applies to copyright royalties for literary, artistic, or scientific work, including cinematograph films or films or tapes. The 10% rate applies to patent and trademark royalties and to industrial, commercial, and scientific information royalties. However, patent and trademark royalties and industrial, commercial, and scientific information royalties are taxable at 0% if paid by a company resident in a state to a resident of the other state where the beneficial owner is a company that is affiliated with the company paying the royalties by a direct minimum holding of 25% in the capital for at least two years prior to the payment of the royalties or where both companies are held by a third company that has a direct minimum holding of 25% for at least two years prior to the payment of the royalties, both in the capital of the first company and in the capital of the second company.
19. The 5% rate applies to industrial, commercial, or scientific equipment royalties. The 10% rate applies in other cases.
20. The 5% rate applies to literary, artistic, and scientific works copyright royalties. The 15% rate applies in other cases.
21. The 0% rate applies to literary, artistic, and scientific work copyright royalties. The 10% rate applies in other cases.
22. The 0% rate applies to copyright royalties. The 10% rate applies in other cases.
23. The 5% rate applies to patent and secret formula royalties; industrial and scientific information royalties; and industrial, commercial, and scientific equipment royalties. The 10% rate applies to trademark royalties and commercial information royalties. The 15% rate applies in other cases.
24. The lower rate applies if the recipient is a company that directly owns at least a certain amount of the capital or a certain amount of the voting shares of the company paying the dividend.

Tax administration

Taxable period

The standard fiscal year is a calendar year, but a Slovak entity may opt to change this to a different 12-month period.

Tax returns

A corporate tax return must be filed together with the entity's financial statements within three months following the fiscal year-end. The taxpayer may extend the filing deadline by up to three months or six months (in case foreign income is included in the tax return). To extend the filing deadline, the taxpayer must notify the Tax Office before the normal filing deadline. After notification, the deadline is automatically extended.

Payment of tax

The balance of tax due for a fiscal year is payable by the filing deadline.

Advance payments of corporate tax must be paid monthly or quarterly during the current tax period. Instalments are usually based on the last known tax liability of the entity. It is not necessary to pay tax advances if the last tax liability did not exceed EUR 2,500.

Penalties

The penalties levied by the Tax Office will depend on the time elapsed from the deadline for filing the regular tax return to the date of filing the amended tax return or the start of the tax audit. The penalties are:

- 3% a year for self-assessment via an amended tax return.
- 7% a year for self-assessment within 15 days after notification that a tax audit has been opened ('self-disclosure').
- 10% a year for an assessment made by the Tax Office during a tax audit.

The penalties will be levied at a minimum of 1% of the assessed amount and a maximum of 100% of the assessed amount.

An 'aggregated penalty' applies for cases of more than one administrative offence.

Electronic communication obligations

As of 1 January 2018, all legal entities registered in the Commercial Register are required to deliver submissions to the Financial Administration electronically only.

Tax audit process

Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria that are not communicated to the public.

The taxpayers that utilise state aid in the form of tax relief are subject to specific tax audit in the year of utilisation of the tax relief.

The tax audit has to be finalised within one year.

Statute of limitations

A tax may not normally be assessed or additionally assessed more than five years (ten years when DTT treaty was applied, including transactions with foreign-related parties) after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax. If a tax inspection is undertaken within this five-year period, another five-year period commences from the end of the year in which the taxpayer was notified of this action.

If a taxpayer utilises a tax loss, a tax or additional tax cannot be assessed more than seven years after the end of the year in which the obligation to file a tax return in which a taxpayer reported the tax loss arose.

However, tax may be assessed, or additionally assessed, no later than ten years after the end of the year during which the obligation to file a tax return arose, or during which the taxpayer was obligated to pay the tax.

Topics of focus for tax authorities

The tax authorities, within a tax inspection, generally focus on transfer pricing, VAT, limited tax deductibility of special types of costs (e.g. entertainment, promotion costs), and tax incentives.

Other issues

Business combinations

The amendments to the Commercial Code from November 2017 have strengthened the legal and administrative requirements for carrying out mergers, fusions, and demergers of commercial companies (e.g. new obligation to submit a draft contract for a merger or demerger project to the tax authorities no later than 60 days before the date on which these transactions are to be approved by the company bodies).

In 2018, in-kind contributions, mergers, fusions, and demergers of commercial companies may only be performed for tax purposes in most cases at fair (market) values. Under this method, the taxpayer should value assets for tax purposes using their current market values, and the revaluation difference must be reflected in the appropriate company's tax returns within seven years of the transaction.

The historical price method may only be applied for mergers, fusions, and demergers of commercial companies, in-kind contributions, or cross-border transactions if certain conditions are met.

Adoption of International Financial Reporting Standards (IFRS)

Slovakia has adopted most of the principles of IFRS in its accounting law. However, there are still some differences between IFRS and Slovak accounting standards.

Obligation to prepare statutory financial statements according to IFRS

Financial institutions (banks, insurance companies, etc.) must prepare their statutory financial statements according to IFRS. In addition, a company that fulfils two or more of the following conditions, in two consecutive accounting periods, must prepare its statutory financial statements according to IFRS:

- The total value of assets is more than EUR 170 million.
- Net turnover exceeds EUR 170 million.
- The average number of employees in the individual accounting period exceeds 2,000.

An entity may decide to prepare its financial statements under IFRS if certain conditions are met.

If the Slovak taxpayer is obligated to prepare its financial statements under IFRS, the tax base is derived from either:

- the profit before tax under IFRS, adjusted for tax purposes using the 'IFRS Tax Bridge' issued by the Slovak Ministry of Finance, or
- the profit before tax under Slovak statutory accounting standards.

Tax information exchange agreements (TIEAs)

This table highlights countries with which Slovakia has entered into a TIEA.

- Albania
- Andorra
- Anguilla
- Argentina
- Aruba
- Azerbaijan
- Barbados
- Belize
- Bermuda
- British Virgin Islands
- Cameroon
- Cayman Islands
- Chile
- Colombia
- Cook Islands
- Costa Rica
- Curaçao
- Faroe Islands
- Ghana
- Gibraltar
- Greenland
- Guatemala
- Guernsey
- Isle of Man
- Jersey
- Liechtenstein
- Lebanon
- Malaysia
- Marshall Islands
- Mauritius
- Monaco
- Montserrat
- Nauru
- New Zealand
- Niue
- Pakistan
- Panama
- Samoa
- San Marino
- Saudi Arabia
- Senegal
- Seychelles
- St. Kitts and Nevis
- St. Lucia
- St. Maarten
- St. Vincent and the Grenadines
- Turks and Cacaos Island
- Uganda
- Uruguay

International agreements

The Slovak/United States (US) Intergovernmental Agreement (IGA) entered into force during 2015. However, financial institutions in the Slovak Republic were allowed to register on the Foreign Account Tax Compliance Act (FATCA) registration website consistent with the treatment of having an IGA in effect even earlier.

FATCA was implemented into Slovak legislation with effect from 1 January 2016, with a first reporting deadline of 30 June 2016.

The Common Reporting Standard (CRS) was also implemented into Slovak legislation with effect from 1 January 2016, and the first reporting deadline to the Slovak tax authorities was 30 June 2017.

Significant developments

There have been no significant corporate tax developments in Slovenia during the past year.

Taxes on corporate income

Slovenian tax residents are liable to pay corporate income tax (CIT) on their worldwide income. Slovenian tax non-residents are taxed only on income from sources in Slovenia, including income earned through permanent establishments (PEs) in Slovenia.

The CIT rate is 19%.

Non-profit taxpayers and charitable organisations, associations, foundations, etc. are exempt from CIT on their non-profit-making activities.

Investment funds, as well as pension funds and pension insurance companies, may be taxed at a rate of 0% if certain conditions are met.

Tonnage tax

A company may request to be subject to tonnage tax instead of CIT if it meets certain conditions (i.e. it operates in maritime transport in international shipping) and notifies the tax authorities in advance.

The tax base for tonnage tax is the sum of the tax bases for each of an entity's ships that are included in the tonnage tax regime. The tax base for a particular ship is calculated by multiplying the number of ship operating days by the daily tax base shown in the following table:

Net tonnage (NT)	EUR*/day for 100 net tonnes
For the first 1,000 tonnes	0.90
For the next 1,001 to 10,000 tonnes	0.67
For the next 10,001 to 25,000 tonnes	0.40
Above 25,001 tonnes	0.20

* euros

Local income taxes

There are no municipal or local taxes on income in Slovenia.

Corporate residence

A legal entity is considered to be a Slovenian tax resident if the entity has its statutory (registered) seat or place of effective management located in Slovenia. These conditions, however, do not exclude a society or any association of persons, including an association under civil or foreign law that does not have legal identity, from also being considered to be a Slovene tax resident.

Permanent establishment (PE)

The Slovene definition of a PE is generally in line with the definition set out in the Organisation for Economic Co-operation and Development (OECD) model tax treaty. Thus, it is a place of business in Slovenia in or through which the non-resident's activities are conducted in whole or in part. The following, in particular, are considered to constitute a PE:

- An office, branch, factory, workshop, mine, quarry, or other place where natural resources are obtained or exploited.
- A building site; construction, assembly, or installation site; or the supervision thereof if the duration of the activities concerned exceeds 12 months.

A place of business is not considered a non-resident's PE if the non-resident:

- only uses the premises in question for storage, display, or delivery of goods belonging to oneself
- only maintains inventories of goods belonging to oneself for the purpose of storage, display, or delivery
- only maintains inventories of goods belonging to oneself for the purpose of processing by third parties
- only maintains the place of business in question for the purpose of purchasing goods or collecting information for oneself
- only maintains the place of business for the purpose of engaging in any other preparatory or auxiliary activity for oneself, or
- only maintains the place of business in question for the purpose of any combination of activities referred to above, provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

Other taxes

Value-added tax (VAT)

A basic VAT rate of 22% applies to all taxable supplies.

A lower VAT rate of 9.5% generally applies to foodstuffs, live animals, seeds, plants, water supplies, medicines, medical equipment, transport of passengers, books, admission fees, royalties for writers and performers, certain works of art, certain residential properties, renovation of residential properties, cleaning of residential properties, hotel accommodation, use of sport facilities, burial and cremation services, public hygiene services, minor repairs of bicycles, shoes and clothing, domestic care services, hairdressing services, and supply of flowers.

Exempt supplies without credit entitlement include financial and insurance/reinsurance services, rent and lease of immovable goods (with exceptions), tax and court stamps, lottery services, trade of land, health and social services, etc. There are also other VAT-exempt transactions without a credit entitlement as well as exempt taxable supplies with a credit entitlement.

VAT grouping is not possible within Slovenia.

The threshold for VAT registration is EUR 50,000.

Customs duties

Goods imported from non-European Union (EU) countries are subject to import customs clearance, and goods being exported from the EU customs territory must be declared for export customs clearance. The person responsible for paying the customs debt is the declarant. The declarant is the person making the customs declaration in its own name or the person in whose name the customs declaration is made. The customs declaration should be made in the prescribed form and manner (in writing or by another action specified by law). Import or export duties are customs duties and other charges payable on the import or export of goods (excise duties, environmental tax, and motor vehicle tax).

For purposes of communication with the customs offices, each person has to be identified by an Economic Operator Registration and Identification (EORI) Number, which is registered by the customs authorities on request. EORI registration is mandatory for customs clearance.

Import VAT is charged based on customs declaration at the time of the import. However, if certain conditions are met, taxpayers are able to pay the import VAT through the VAT return at the end of the month. Accordingly, the importers are not forced to finance their import VAT, as they are able to account for it and deduct it in the same VAT return.

Excise tax

Excise tax is charged on the release into free tax circulation or import of tobacco products, alcohol and alcoholic drinks, fuel and mineral oils, and electricity. The table below presents the valid rates of excise tax.

Product	Excise tax rate
Cigarettes	From EUR 71.3238 per 1,000 pieces. In case the retail price of a pack of 20 cigarettes amounts to less than EUR 3.51, the excise tax is a minimum of EUR 109 per 1,000 pieces
Beer	EUR 12.10 per 1 volume % alcohol in 1 hl
Alcohol drinks (except wine)	EUR 132 per 1 hl
Ethyl alcohol	EUR 1,320 per 100 volume % alcohol in 1 hl
Unleaded petrol	EUR 507.80 per 1,000 l
Natural gas	EUR 0.0184 per m^3 for heating purposes and EUR 0.092 per m^3 for propelling purposes
Heating oil	EUR 15.02 per 1,000 kg
Electricity	EUR 3.05 per 1 MWh Usage of more than 10,000 MWh per year: EUR 1.80 per 1 MWh

Property tax

Currently, there is no specific tax levied on immovable property in Slovenia. However, charge for the use of building land is levied on vacant and constructed building land in possession of legal persons and individuals. Charge is set by local communities for vacant building land based on the area of the building land planned for building, and for constructed building land based on the useful area of the residential house or business premises thereon.

Real estate transfer tax

Real estate transfer tax of 2% is charged on real estate transfers and financial leases of real estate, unless VAT has been charged on the transaction.

Stamp tax

There is no stamp duty in Slovenia.

Payroll taxes

There are no payroll taxes other than social security contributions and withholding of personal income tax (PIT) in Slovenia. *The tax tables applicable to individuals are provided in the Taxes on personal income section of Slovenia's Individual tax summary at www.pwc.com/taxsummaries.*

Social security contributions

Both employer and employee must make social security contributions. Contributions are withheld by the Slovene employer at the payment of income. The basis for calculation of the social security contributions is the gross amount of income. The types of contributions are as follows:

Type of contribution	Employee (%)	Employer (%)
Pension insurance	15.50	8.85
Health insurance	6.36	6.56
Unemployment	0.14	0.06
Injury at work	0	0.53
Maternity leave	0.10	0.10
Totals	22.10	16.10

Financial services tax

Slovenia levies tax on financial services provided by banks and other financial institutions. The tax rate is 8.5% and is applied to the fee of the financial service.

Insurance premium tax

Insurance premium tax is levied on insurance premiums at the rate of 8.5% and paid by insurance companies, unless the insurance lasts for at least ten years.

Environmental tax

Environmental tax is charged on carbon dioxide (CO_2) emissions, waste disposal, lubricating oils and fluids, used tyres, and used motor vehicles.

Motor vehicle tax

Motor vehicle tax applies to all vehicles that are registered for the first time in Slovenia. The taxpayer is the entity that imports the vehicle from EU or non-EU countries. The tax rate depends on fuel range, engine power, and emission of CO_2 and ranges from 0.5% to 31%.

In addition to the motor vehicle tax described above, the government imposes an additional tax on motor vehicles with engine displacement above 2,500 ccm that ranges from 0% to 16%, depending on the engine size.

Water vessel tax

The existing water vessel tax is imposed on:

- vessels exceeding five metres in length that are entered in vessel registers, with the exception of vessels under construction
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not yet been entered into these registers, and
- vessels exceeding five metres in length whose owners are residents of the Republic of Slovenia and that comply with the technical conditions required for entry into the vessel registers referred to in the first bullet but have not been entered into these registers because they are registered abroad.

In addition to the water vessel tax described above, the government levies an additional tax on water vessels, depending on the length of the vessel:

Class of vessel length (in metres)		General part of tax liability (in EUR)	The liability per metre of length (in EUR)	The liability per kilowatt propulsion power (in EUR)
Above	To			
5	8	2.00	0.50	0.10
8	12	10.00	2.00	1.00
12		20.00	3.50	2.00

The tax liability decreases by 5% per each year of age of the vessel. The tax cannot, however, be lower than 50% of the tax liability calculated for a new vessel.

Branch income

If a branch meets the conditions, as set out in the tax legislation and relevant double tax treaty (DTT), to be treated as a PE, then it will be liable to pay tax in Slovenia on profits that are attributable to the PE.

The profit that is attributed to a PE is determined broadly in line with OECD principles. Generally, the attributable profit is the profit that would be expected to be earned by the PE if it were an independent taxpayer performing the same or similar activities and/or businesses.

A branch whose activities do not create a PE is not subject to CIT in Slovenia.

Income determination

Taxable profits are assessed in accordance with Slovenian Accounting Standards 2006 or International Financial Reporting Standards (IFRS) and modified for certain revenues and certain expenses, which are partly or wholly tax non-deductible.

Inventory valuation

Slovenian law allows the application of all the most commonly used inventory valuation methods, including the first in first out (FIFO), weighted average cost, and floating average prices methods.

Capital gains

Under certain circumstances, the gains made by a Slovenian taxpayer on the disposal of an equity shareholding are effectively 47.5% exempt from taxation. Similarly, 50% of a loss arising on the disposal of such a shareholding would not be deductible for CIT. This treatment applies to the disposal of shareholdings of at least 8% that have been held for at least six months and where the taxpayer disposing of the holding employed at least one person during the six-month holding period.

The above treatment is not available for the disposal of a shareholding of a company that is resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Dividend income

Dividends and similar income received by a Slovenian taxpayer are generally 95% exempt from taxation as long as the distributor was subject to Slovenian CIT or to a comparable profits tax. The exceptions to this are where dividends represent untaxed reserves of the distributor or where the distributor is tax resident in a country that:

- is outside the European Union
- has a corporate tax rate less than 12.5%, and
- is included in a list published by the Ministry of Finance.

Interest income

Interest and similar income received by a Slovenian taxpayer is included in the taxable base and can, in principle, reduce tax liability in the amount of withholding tax (WHT) paid abroad. Interest between related parties needs to be calculated in accordance with the arm's-length principle.

Royalty income

Royalties and similar income received by a Slovenian taxpayer are included in the taxable base and can, in principle, reduce tax liability in the amount of WHT paid abroad.

Foreign income

Foreign income, except dividends, received by a Slovenian entity from foreign sources is included in taxable income for CIT purposes in the same tax year as it arises unless the applicable DTT provides for an exemption.

Deductions

In general, business expenses that are necessary to generate taxable revenues are fully tax deductible.

Depreciation and amortisation

Depreciation of tangible fixed assets, amortisation of intangible assets, and depreciation of investment property are recognised as expenditures in line with the accounting treatment, up to a maximum of the amount calculated using the straight-line depreciation method and the maximum tax depreciation rates listed below. Any accounting depreciation in excess of these rates is not tax deductible in the period concerned, but may be deductible in subsequent tax periods until the asset is fully depreciated or disposed of.

The maximum annual depreciation rates are as follows:

Depreciation category	Types of assets	Annual depreciation rate (%)
1	Buildings, including investment property	3
2	Parts of buildings, including investment property	6
3	Equipment, vehicles, and machinery	20
4	Parts of equipment, and equipment for research activities	33.3
5	Computer equipment, hardware, and software	50
6	Crops lasting several years	10
7	Breeding animals	20
8	Other fixed assets	10

Goodwill

In general, if goodwill is impaired for accounting purposes, then the impairment cost may be treated as tax deductible. The amount that may be treated as tax deductible in any one tax period is limited to 20% of the initial value of the goodwill.

However, based on the amendments of the CIT Act, recognition of expenses from the amortisation of goodwill are, as of 1 January 2017 onwards, considered as non-deductible expenses.

Start-up expenses

In accordance with Slovene legislation, costs that occur prior to the entry of a legal entity into the court register may not be treated as tax deductible. Such a principle arises from a common legal principle whereby an entity may be subject to rights and obligations only after its establishment date. The date of entry into the court register is deemed to be the date of the establishment.

Related-party interest

Companies may deduct interest expense on loans from their owners or other associated parties up to a maximum of the amount calculated by using the prescribed interest rate published by the Ministry of Finance. Taxpayers must increase taxable profits by the amount of any excess interest expense unless they can prove that they could have received the loan on comparable terms from an unrelated party.

Provisions

Certain provisions are only 50% tax deductible when accrued, with the remaining 50% being treated as tax deductible when the provision is utilised. The provisions that are subject to this treatment are provisions for warranties granted when selling products or providing services, reorganisations/redundancies, anticipated losses from onerous contracts, pensions, long-service bonuses, and severance payments on retirement.

Bad debt

Bad debt provisions are only tax deductible if the amount does not exceed the lower of:

- the arithmetic mean of the bad debts written-off in the past three tax periods, under certain conditions specified in the tax law, and
- the amount corresponding to 1% of taxable revenues of the tax period.

In order to take advantage of this deduction, a company must be able to calculate amounts for both tests and then take the lower of the two amounts so calculated. If the company is not able to determine the amount for either, the cost of the bad debt provision is not tax deductible until the provision is utilised.

Costs of bad debts are tax deductible when the debt is finally written-off, provided there is a finalised court procedure, the creditor can demonstrate that it would cost more to pursue the debtor than the debt is worth, or the creditor can demonstrate that it has done everything required by good business practice to try to recover the debt.

Charitable contributions

A taxpayer may claim a reduction of its taxable profits for donations made for humanitarian, disabled, charitable, scientific, educational, medical, sports, cultural, ecological, and religious purposes to residents of Slovenia or of EU or European Economic Area (EEA) member states, up to 0.3% of the taxable person's taxable revenues. An additional allowance of 0.2% of the taxpayers' taxable revenues is available for payments made for cultural purposes and to voluntary organisations that work for the public interest to protect the public from natural and other disasters.

Compensation

Salaries and other payments relating to employment (e.g. wage compensation, holiday allowances, employer's social security contributions, long-service awards, severance benefits paid upon retirement, solidarity assistance, reimbursement of business related expenses) are generally fully tax deductible.

The costs of benefits in kind are also tax deductible if such benefits are taxed for the individual under the Personal Income Tax Act.

Pension allowances

Under certain conditions, a tax-deductible allowance for voluntary supplementary pension insurance may apply, of up to 24% of compulsory contributions for pension and disability insurance for insured employees, but may not exceed EUR 2,390 annually per employee.

Fines and penalties

Costs relating to compulsory collection of taxes and other levies are, in accordance with Slovene legislation, not tax deductible.

Taxes

Taxes paid by a shareholder as a natural person and VAT that was not deducted as an input VAT, even though there was a right to deduct, are not tax deductible. In addition, interests on late payment of taxes are not tax deductible.

Other significant items

The following expenses are considered unnecessary for the generation of taxable revenues and are not deductible for tax purposes:

- Expenses that are not directly necessary for performing business activities or are not incurred as a consequence of a business activity.
- Expenses of a private character.
- Expenses that do not correspond to standard business practice.

Some of the most common non-deductible expenses include:

- Penalties and the cost of bribes.
- Input VAT that could have been reclaimed in accordance with the VAT Act.
- Entertainment costs, which are only 50% tax deductible.
- Costs relating to the supervisory board, which are only 50% tax deductible.
- Legal and other costs of incorporation, which may be deductible for the parent company but not for the entity being incorporated.

Net operating losses

The use of retained tax losses is limited to a maximum of 50% of the actual tax base. Despite this limitation, tax losses may still be carried forward to subsequent years without a limitation, but loss carrybacks are not permitted. Loss relief may not exceed the amount of current taxable income. Generally, losses that are generated in multiple tax years are absorbed chronologically. The right to carry losses forward may be forfeited if the ownership of the capital or voting power of the taxpayer claiming the loss carryforward changes by more than 50% within the tax period and the taxpayer either has not performed business activities for two years prior to the change of ownership or substantially changes its business activity two years prior to or after the change in ownership.

Treatment of tax losses mentioned in the preceding paragraph does not apply for those losses that are generated in the year of the change of ownership or prior tax periods.

Payment to foreign affiliates

Payments to foreign affiliates are normally subject to WHT if there is no right to apply exemptions in accordance with Slovenian legislation or DTT. Payments similar to dividends, including disguised distribution of profit, are not tax deductible. Any other payments to foreign affiliates are tax deductible if they are made in accordance with the arm's-length principle.

Group taxation

Group tax returns were abolished with the introduction of the CIT Act on 1 January 2007.

Transfer pricing

Prices between a Slovenian entity and its related parties must be set, for tax purposes, at fair market value using the arm's-length principle. Broadly speaking, taxpayers are related by direct, indirect, or common shareholdings of over 25%; through a participation in management; or by control through other means, including through contractual terms.

For transactions between two related Slovenian tax residents, provided neither is in an 'advantaged' position (advantaged usually means having unutilised tax losses), there is no actual requirement for the companies to adjust their tax returns to reflect an arm's-length price.

Taxable persons must prepare transfer pricing documentation. The Slovenian rules regarding such documentation follow the EU Code of Conduct on transfer pricing documentation for associated enterprises in the EU (EU TPD).

Country-by-country (CbC) reporting

From January 2017 onwards, provisions of the Slovene Tax Procedure Act are in force imposing a CbC reporting obligation on the multinational enterprises with annual consolidated group revenue equal to or exceeding EUR 750 million. The first submission of CbC reporting was thus required for the financial year 2017, whereas the deadline for the submission of CbC reporting was within 12 months after the end of financial year (i.e. 31 December 2017). The CbC report will be first communicated to other member states in the year 2018 for the 2017 fiscal year.

Thin capitalisation

Interest payments on loans granted, or guaranteed, by a related party (a party that directly or indirectly owns at least 25% of the shares or voting rights in the taxpayer) are not tax deductible to the extent that the loan amount exceeds the thin capitalisation threshold specified in law. This does not apply to loan recipients who are banks or insurance companies.

Sister entities (i.e. entities with the same owner) also fall under the definition of the above-described rules.

Generally speaking, the thin capitalisation threshold is exceeded if the debt-to-equity ratio exceeds 4:1.

Controlled foreign companies (CFCs)

There are no specific provisions in Slovenia regarding CFCs; however, there are general anti-abuse provisions in place.

Tax credits and incentives

Foreign tax credit

Tax paid abroad can be credited against tax liability in Slovenia. The amount of tax that can be credited is the amount of final and actually paid tax. If there is a DTT made between countries in question, the amount of tax that can be credited is the amount calculated at the rate determined in the DTT. A taxpayer needs to provide proof of the amount of foreign tax, the basis for calculation of the tax, and the amount of the tax paid.

Investment allowances

A tax allowance for investment in equipment and intangible assets is available for investments made after 1 January 2008. The tax allowance is limited to 40% of the value of the assets (also intangibles) invested into.

Research and development (R&D) allowances

A 100% investment allowance is granted for investments in R&D within the tax period, regardless of the location of establishment of the company within Slovenia. Such an investment tax allowance may be obtained for expenditures on:

- internal R&D activities within the company and
- the purchase of R&D equipment from related or unrelated parties or from a private research institution.

Allowances for employing certain individuals

A taxpayer that employs trainees or students to undertake practical work may reduce its taxable profits by an additional 20% of the average monthly payment paid to such persons for every month the person carries out the work.

A taxpayer that employs disabled persons may decrease its taxable profits by an additional 50% of the salary paid to such persons (in addition to the deduction for their actual salary cost). A taxpayer that employs a severely disabled person or a person with a combination of total hearing loss and speech impairment may reduce its taxable base by an additional 70% of the salary paid to such a person (in addition to the deduction for their actual salary cost).

Tax relief for investments in the Pomurje region

Entities based in the Pomurje region of Slovenia may claim additional employment incentives and additional tax relief for investments. These extra benefits are available from 2010 to 2019. As a result, provided certain conditions are met, entities with their seat in Pomurje are entitled to a 70% tax allowance for investments in equipment and intangible assets as well as to certain employment allowances.

Tax relief for employment of hard-to-place workers

A taxpayer who employs a hard-to-place worker may be able to benefit from a tax allowance for both CIT and tax on activity. A hard-to-place worker is a person younger than 26 or older than 55 who has been registered as unemployed for at least six months and who has not been employed by the taxpayer or a related party in the past 24 months. The tax allowance equates to 45% of the salary paid to the person during the first 24 months of their employment, up to the amount of the tax base.

As of the beginning of 2016 and until the end of 2019, an additional tax relief is available for taxpayers employing a person older than 55 who has been registered as unemployed for at least six months prior to employment. A taxpayer will be exempt from paying all compulsory social security contributions (16.10%) for the first two years after employing such a person in case the employment contract is concluded during the above-mentioned period.

Withholding taxes

In Slovenia, tax must be calculated and withheld on the payments made by residents and non-residents on Slovenian-sourced income to recipients outside Slovenia.

Payments to which the WHT rules apply include payments for dividends, interest, copyrights, patents, licences, leases on real estate situated in Slovenia, services of performing artists, and services charged from low-tax jurisdictions.

Slovenia

The WHT rate is 15%.

If a DTT exists, the WHT rate may be reduced in line with the provisions of the treaty. Similarly for payments of interest, royalties, and dividends within Europe, the Interest and Royalties Directive and the Parent Subsidiary Directive, respectively, may also reduce this WHT rate to zero.

Furthermore, WHT is not deducted on dividends paid to a parent company in another EU member state if those dividends are subject to an exemption from tax in the hands of the recipient, provided certain conditions are met.

Subject to certain conditions, tax is not required to be withheld on interest on non-exchangeable debt securities issued outside Slovenia by a Slovenian tax resident corporation through a public placement on an international clearing system (i.e. Euroclear).

WHT is applicable only for explicitly determined types of services (i.e. consulting, marketing, staffing, administration, information, and legal services), provided they were made to countries with an average CIT rate not exceeding 12.5%, where such a country was also stated on a separate list published by the Ministry of Finance.

Treaties in force

Treaties not yet in force (3)

Recipient	WHT (%)		
	Dividends (1)	Interest (2)	Royalties
Egypt	8/13	13	15
Morocco	7/10	10	10

Notes

1. Under certain treaties, the WHT rate depends on whether, and to what extent, the recipient participates in the capital of the distributor. Generally, if the recipient holds a participation of more than 25% in the distributing company, the dividends are subject to a lower 5% WHT rate. The higher WHT rate is, however, normally due when the participation is less than 25%.
2. Some DTTs include specific provisions whereby interest payments are subject to a 0% WHT rate if certain conditions are met.
3. Ratified international treaties that are not yet in force and are not used in Slovenia.
4. 5% rate if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 10% rate if the beneficial owner is a company that

directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits which by virtue of the law of the state in which the payer is a resident are exempt from company tax or subject to company tax at a rate that is lower than the normal rate in that state; 15% rate applicable in all other cases.

5. 5% rate applicable to the gross amount of: (i) royalties paid for the use of, or the right to use, any copyright of literary, artistic, or scientific work (but not including cinematograph films) and (ii) royalties paid for the use of, or the right to use, industrial, commercial, or scientific equipment, 10% rate applicable in all other cases.
6. 5% rate applicable to royalties for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films or films or tapes used for radio or television broadcasting; 10% rate applicable to royalties for the use of, or the right to use, any patent, trade mark, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
7. 10% rate applicable to royalties for the use of, or the right to use, any copyright of literary or artistic work including motion pictures, live broadcasting, film, tape, or other means of the use or reproduction in connection with radio and television broadcasting, and for the use of, or the right to use industrial, commercial, or scientific equipment; 15% rate applicable to royalties in all other cases.
8. 5% rate applicable to copyright, as defined by the Copyright and Related Rights Act; 10% rate applicable to other property rights.
9. 10% rate applicable to the gross amount of interest if received by a financial institution (including an insurance company); 15% rate applicable to the gross amount of interest in all other situations.

Tax administration

Taxable period

The tax period should be the calendar year. However, a tax period may differ from the calendar year but may not exceed a period of 12 months. In this case, the tax authorities must be informed about the chosen tax period, and the taxable entity will not be allowed to change its tax period for the following three years.

Tax returns

A tax return must be submitted to the tax authorities by the end of the third month following the end of the tax year.

Payment of tax

CIT is paid in advance in monthly instalments (if the amount of prepayment exceeds EUR 400 per month) or in quarterly instalments (if the amount of prepayment is less than EUR 400 per month) determined on the basis of the previous year's assessment.

The final CIT payment must be made within 30 days of the tax return submission.

Tax audit process

Slovene legislation does not define an audit cycle. However, we understand that the Slovene tax administration has its own criteria for how to determine audit targets, which is in accordance with their annual tax plan.

Statute of limitations

Under Slovene legislation, a tax inspection may be initiated within five years from the date when a tax return was due for submission to the tax authorities. However, the five-year period runs following each interrupting act (generally, certain actions by the Tax Office or the taxpayer within the tax period may be considered as interrupting acts), but may not surpass a maximum of ten years counting from the date when the tax return is due. A concluded tax inspection will foreclose any further tax authorities' inspection only for the period and the items that were subject of the concluded tax inspection. Any issue not examined remains open for a future tax inspection. The right of the tax authorities to assess and collect tax permanently expires after ten years counted from the date when the tax return is due.

Topics of focus for tax authorities

Recently, we have noticed that tax authorities focus on appropriateness of transfer pricing for multinational companies.

Fiscal verification of invoices

According to the Act on Fiscal Verification of Invoices, all legal and natural persons that perform cash transactions and are obligated to keep books and records must use certified tax registers. No exceptions are envisaged, so electronic confirmation of invoices applies to anyone that is obligated to use receipts in accordance with the VAT Act. Certified cash registers are connected to the central information system of the financial authority via the Internet, so processed invoices are verified and saved in real time.

Other issues

State aid

Slovene law does not regulate state aid specifically; however, as the EU Treaty, relevant EU Regulations and Directives, and EU Court case law are of direct application in Slovenia, Slovene courts follow the same policy as reflected in the noted documents and case law. Thus, state aid in Slovenia is defined as an advantage in any form whatsoever conferred on a selective basis to undertakings by national public authorities and causing distortion of the competition.

Multilateral Convention (MLI)

With the ratification of the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (MLI) in mid-March 2018, certain provisions of DTTs that Slovenia has in place will be affected. More specifically, from 1 July 2018 onwards, the MLI shall generally apply to DTTs that Slovenia has in place with Austria, Isle of Man, Jersey, and Poland. In addition to the minimum standards on treaty abuse (Articles 6 and 7 of MLI), Slovenia shall also adopt changes to dividend transfer transactions, threshold for PE, arbitration, etc.

Base erosion and profit shifting (BEPS)

The transfer pricing landscape of Slovenia remains relatively unchanged, but is nonetheless dependent on the updated or added guidance published by the OECD as a result of the BEPS action plan. It can be anticipated that the changes due to the BEPS project will also have an appropriate impact on the transfer pricing environment, legislation, and practices in Slovenia.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 2 June 2014, the Republic of Slovenia concluded an Agreement to Improve International Tax Compliance and to implement FATCA (the Agreement) with the United States that entered into force on 1 July 2014, which further defines the obligations of Slovenian financial institutions and the Financial Administration of the Republic of Slovenia related to FATCA implementation. The Agreement supplements the existing rules on cooperation between the Republic of Slovenia and the United

States in the field of avoidance of double taxation and exchange of information and will contribute to the reduction of administrative burden to Slovenian financial institutions.

The conclusion of the Agreement, which is based on the Model 1 Intergovernmental Agreement (IGA), ensures the implementation of FATCA provisions on the basis of reporting and exchange of information in accordance with the convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and capital. According to the Agreement, Slovenian financial institutions are required to report information as determined in the Agreement to the Financial Administration of the Republic of Slovenia, which reports the information to the US Internal Revenue Service (IRS). Reciprocally, Slovenia is receiving information from the US IRS about the funds of Slovenian taxpayers in the United States.

Significant developments

- From 1 April 2018, the value-added tax (VAT) rate increased from 14% to 15% (the VAT rate was last increased in the early 1990s).
- It has been proposed that regulations prescribing foreign electronic services subject to VAT be broadened to include cloud computing and other online services.
- The Carbon Tax Bill is expected to be enacted before the end of 2018, bringing the Carbon Tax into effect from 1 January 2019.
- The introduction of National Health Insurance, in terms of which universal health coverage will be provided with all individuals contributing to a national health fund based on their ability to afford the contributions, is currently under debate (it appears that the introduction of National Health Insurance has been accepted, and it is merely the mechanisms in terms of which it will be implemented that are under debate).

Taxes on corporate income

A South African (SA)-resident company is subject to corporate income tax (CIT) on its worldwide income, irrespective of source. Non-residents are taxable on SA-source income.

In South Africa, the CIT rate applicable for corporate income of both resident and non-resident companies for tax years ending between 1 April 2018 and 31 March 2019 is a flat 28%.

Small business corporations (i.e. companies with only natural persons as members/owners and with gross income of not more than 20 million South African rand [ZAR]) are taxed at the following rates:

- 0% on the first ZAR 78,150 of taxable income.
- 7% on taxable income above ZAR 78,150 but not exceeding ZAR 365,000.
- 21% on taxable income above ZAR 365,000 but not exceeding ZAR 550,000.
- 28% on taxable income exceeding ZAR 550,000.

Special CIT rates apply in certain industries, such as mining and long-term insurance (*see below*).

Alternative turnover-based tax for very small companies

To reduce the compliance costs for very small companies, a turnover-based presumptive tax is available. Companies with a turnover of less than ZAR 1 million per year can elect to pay this tax instead of normal CIT, at a rate ranging from 0% to 3%, depending on the level of turnover.

Dividends tax

Dividends tax is imposed at 20% on dividends declared and paid by all resident companies as well as by non-resident companies in respect of shares listed on a South African exchange (i.e. generally the Johannesburg Stock Exchange [JSE]).

Dividends are tax exempt if the beneficial owner of the dividend is an SA-resident company, SA-retirement fund, or other prescribed exempt person.

The tax must be withheld by the company that pays the taxable dividend or, where the dividend is paid by a ‘regulated intermediary’, by the regulated intermediary (generally, this applies to listed shares). In the case of *in specie* dividends (i.e. dividends paid ’in kind’, or dividends other than dividends paid in cash), the company declaring the *in specie* dividend is liable for the dividends tax (and not the beneficial owner of the dividend).

Exemptions from dividends tax and treaty-imposed reduced rates only apply if the beneficial owner of the dividend has made a prescribed declaration and undertaking to the paying company or regulated intermediary.

CIT for mining companies

Special rates of normal tax, based on a standard formula, are prescribed for companies mining for gold. Companies mining for other minerals are subject to the same 28% rate of normal tax that applies to ordinary companies.

CIT for long-term insurance companies

Life insurance companies are required to follow the ‘five-funds approach’, with policies divided into five funds, depending on the nature of the beneficiary. Each fund is then allocated assets according to the risk carried by the fund. Each of the five funds is treated as a separate taxpayer and taxed at the rate applicable to that type of fund. These rates are 30% for individual policyholder funds, 0% for untaxed policyholder funds, and 28% for company policyholder funds, risk policy funds, and corporate funds (a corporate fund being the company itself).

Local income taxes

No local government taxes on income apply to either SA-resident or non-resident companies.

Corporate residence

A company is resident in South Africa if it is incorporated, established, or formed in South Africa or has its place of effective management in South Africa. However, a company that is deemed to be exclusively resident in another country in terms of a double taxation agreement (DTA) is excluded from SA residency.

In terms of an Interpretation Note issued by the South African Revenue Service (SARS), the place of effective management is regarded as the place where key management and commercial decisions that are necessary for the conduct of its business as a whole are, in substance, made. This approach is consistent with internationally accepted principles.

Permanent establishment (PE)

South Africa does not, as a general rule, tax non-residents on the basis of having a PE in South Africa. Rather, non-residents are subject to income tax in South Africa on income derived from a South African source. The primary exception to this rule is in relation to capital gains, where non-residents are subject to tax on assets attributable to a PE in South Africa. A PE is defined with reference to the definition thereof in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Other taxes

Value-added tax (VAT)

VAT is an indirect tax that is largely directed at the domestic consumption of goods and services and at goods imported into South Africa. The tax is designed to be paid mainly by the ultimate consumer or purchaser in South Africa. It is levied at two rates, namely a standard rate and a zero rate (0%).

With effect from 1 April 2018, the standard rate of VAT is 15% (prior to that date, the standard rate was 14%).

Very few business transactions carried out in South Africa are not subject to VAT. The tax is collected by businesses that are registered with the SARS as 'vendors' on all taxable supplies throughout the production and distribution chain. Sales or supplies by non-vendors are not subject to VAT.

VAT registration and administration

All suppliers of goods and services having an annual turnover exceeding ZAR 1 million are required to register as VAT vendors and to charge output VAT. Other vendors may elect to register as VAT vendors, provided their annual turnover exceeds ZAR 50,000. Two exceptions apply. Firstly, non-resident suppliers of electronic services are required to register once aggregate supplies of ZAR 50,000 have been made. Secondly, persons likely to make taxable supplies only after a period of time may register if the activities are of a nature set out in regulations. If they do not register, they are prohibited from charging VAT on goods or services they supply and claiming an input tax (rebate of VAT paid) on goods and services that they acquire.

Under the VAT system, vendors normally pay VAT on expenses (input tax) and charge VAT on supplies made (output tax). This mechanism, therefore, ensures that only the so-called 'added-value' is taxed. Due to VAT being a self-assessment system, the output tax collected may be reduced by input tax paid. Thereafter, the net amount is payable to, or refundable by, the SARS. The self-assessment returns are due regularly within prescribed periods (tax periods).

Taxable supplies

Standard-rated and zero-rated supplies are known as taxable supplies. Other supplies are known as exempt and non-supplies.

South Africa

Goods and services

For a liability for VAT to exist, there must be a supply or importation of goods or services. Goods are corporeal movable things, fixed property, and real rights in such things and property. The meaning of 'services' is very broad and includes the granting, assignment, cession, or surrender of any right or the making available of any facility or advantage.

Electronic services

Non-resident suppliers of electronic services are required to register for VAT on the payments basis and account for VAT on supplies of electronic services to SA residents.

Imports

Services imported by a vendor and utilised or consumed by the vendor for the making of taxable supplies are not subject to VAT. In addition, the VAT Act has a schedule that lists goods that are exempt from VAT on importation, whether by a vendor or an unregistered person.

Zero-rated supplies

The VAT Act contains a list of the supplies of goods or services that are taxed at the zero rate. Most of the items refer to exports and international transport, but other specified goods utilised for farming purposes, the sale of an enterprise as a going concern, certain basic foodstuffs, fuel subject to the fuel levy, and deemed supplies by welfare organisations are also zero-rated.

A zero-rated supply made by a vendor is subject to VAT but at a rate of 0%. Under a zero-rated supply, a vendor does not charge VAT on the consideration for the supply and obtains a refund or credit for the VAT paid on taxable supplies utilised in the making of the zero-rated supplies.

Exempt supplies

In addition to zero-rated supplies, the VAT Act contains a list of the supplies of goods or services that are exempt from VAT. While all fee-based financial services are subject to VAT, interest charged is exempt. Other exempt supplies include residential rentals, non-international passenger transport by road or rail, and educational services.

In the case of an exempt supply made by a vendor, the vendor does not charge VAT on the supply and is not entitled to a deduction or credit for the VAT paid on goods and services supplied for the making of the exempt supply. Accordingly, vendors treat the VAT paid by them, and for which they do not obtain a deduction or credit, as another cost and recover it in the consideration they charge for the making of the exempt supply.

Customs duties

Customs duties are charged on importation of goods into South Africa at rates ranging between 3% and 45%. In addition, import duties may also include anti-dumping and countervailing duties of up to 150%. No customs duties are charged on trade between South Africa and Botswana, Lesotho, Namibia, and Swaziland, as these five countries constitute the Southern African Customs Union.

Excise duties

Excise duty is levied on certain locally manufactured goods as well as their imported equivalents. A specific duty at a pre-determined amount is levied on tobacco and liquor, and an *ad valorem* duty (calculated as a percentage of price) on certain luxury goods and automobiles. Relief from excise duty is available for exported products and for certain products produced in the course of specified farming, forestry, and (limited) manufacturing activities.

Property taxes

Local municipalities levy rates on land. These rates are based on a percentage of the municipal valuation of land and improvements and vary from municipality to municipality. Generally, a higher rate is levied on properties zoned for business use.

Transfer duty

Transfer duty levied on the sale of immovable property is payable by the person acquiring the property within six months from the date of acquisition at the following rates:

Purchase price (ZAR)	Transfer duty rate
Not exceeding 900,000	0%
900,001 to 1,250,000	3% on value above 900,000
1,250,001 to 1,750,000	10,500 plus 6% on value above 1,250,000
1,750,001 to 2,250,000	40,500 plus 8% on value above 1,750,000
2,250,001 to 10,000,000	80,500 plus 11% on value above 2,250,000
Exceeding 10,000,000	933,000 plus 13% on value above 10,000,000

Transfers of immovable property subject to VAT are exempt from transfer duty.

Securities transfer tax (STT)

STT is levied at a rate of 0.25% of the taxable amount in respect of the transfer of a security. The taxable amount is usually the consideration for which the security is purchased or the market value of the security if the consideration declared is less than the market value or if no consideration was paid. STT is payable by the company that issued the securities in question. However, the company can recover the tax from the person acquiring the shares. Slightly different rules apply in the case of listed securities.

Payroll taxes

Employers are liable to withhold pay-as-you-earn (PAYE) on behalf of their employees. PAYE is payable to SARS on a monthly basis, calculated on the remuneration paid to an employee. The rates vary depending on the employee's remuneration.

Skills Development Levy (SDL)

SDL is a compulsory levy to fund education and training. It is payable by an employer and cannot be deducted from the remuneration payable to an employee. Small employers with an annual payroll of less than ZAR 500,000 are exempt from the levy. SDL is levied at the rate of 1% of payroll. It is payable monthly, together with income tax that the employer has withheld on its employees' salaries.

Unemployment Insurance Fund (UIF) contributions

Employers are required to contribute on behalf of their employees on a personalised basis to the UIF. The rate of contributions is 1% of gross remuneration payable to an employee, with a monthly cap of ZAR 148.72 per employee. Another 1%, subject to the same cap, is payable by the employee and withheld by the employer.

Compensation for Occupational Injuries and Diseases Act (COIDA) fund

Employers are liable for making annual contributions to the COIDA fund. COIDA contributions are a payroll cost that cannot be deducted from the employee's salary, with a maximum salary cap per employee of ZAR 430,044 *per annum*. The rates vary depending on the employer's industry.

Donations tax

Disposals of assets below an adequate consideration are a deemed donations and subject to donations tax. Donations tax is payable by resident companies at a rate of 20% of the value of property donated to the extent that this value does not exceed ZAR 30 million, and at a rate of 25% of the value of property disposed of that exceeds ZAR 30 million. An annual exemption of ZAR 10,000 is available for companies.

Public companies, comprised of mostly listed companies, are exempt from donations tax. An exemption is also available for donations made to certain charities and other non-profit organisations.

Vehicle emissions tax

An environmental levy is levied on new passenger motor vehicles at a rate of ZAR 110 per gram of CO2 produced per kilometre over the first 120g of CO2 per kilometre, and at a rate of ZAR 150 per gram of CO2 produced per kilometre over the first 175g of CO2 per kilometre (in the case of double cab passenger vehicles).

Fuel levy

A fuel levy is included in the price of petroleum fuel sold. The general fuel levy for 2018/19 is 337 cents per litre of petrol and 322 cents per litre of diesel. A refund of the diesel fuel levy may be claimed in certain industries, such as agriculture, fishing, and mining.

Electricity levy

To support energy efficiency, the government has implemented a levy on electricity generated from non-renewable sources at 3.5 cents per kWh. The levy is paid at source by the electricity producer and recovered in the price to the consumer.

Tyre levy

A tyre levy is applicable at a rate of ZAR 2.30/kg.

Sugar tax

A tax on sugar-sweetened beverages, in the form of the Health Promotion Levy on Sugary Beverages, was introduced on 1 April 2018. The base on which the levy is applied is the sugar content of the beverage. The rate of the levy is 2.1 cents per gram for sugar content in excess of 4g/100ml. For powder and liquid concentrates, sugar content is calculated on the total volume of the prepared beverage.

Air passenger tax

Passengers departing on international flights must pay air passenger tax at the rate of ZAR 100 on flights to Botswana, Lesotho, Namibia, and Swaziland, and ZAR 190 on other flights. The tax is added to the price of the ticket.

Branch income

SA branches of foreign companies are not considered to be separate legal entities for tax purposes, and no tax is withheld on transfers of profits to the head office. Branches of foreign companies are taxed at a rate of 28% and are not liable for dividends tax or any branch profits repatriation tax.

Note that a branch must register as a taxpayer and submit tax returns. Separate financial statements must be drawn up for the SA branch. For all practical purposes, the SARS will treat the branch as a separate entity. For example, inter-branch cost recoveries levied by the head office incurred in the production of SA income normally will be allowed as a deduction by the branch, although this treatment is not extended to interest on inter-branch loans.

In terms of DTAs, the taxation of branches is limited to cases where the branch constitutes a PE.

Income determination

Inventory valuation

Inventories generally are stated at the lower of cost or net realisable value. Write-downs of inventory for slow-moving and obsolete items must be justified, and a general policy on a percentage basis is not permitted. Last in first out (LIFO) is not accepted for tax purposes.

Capital gains

Although the capital gains tax forms part of income tax, the two taxes are not fully integrated. While gains realised by companies are taxed at the normal CIT rate, only 80% of gains are included in taxable income, making the effective capital gain tax rate for companies 22.4%.

Dividend income

Dividends are generally taxed in the hands of the beneficial owner at a rate of 20% (*see Dividends tax in the Taxes on corporate income section*). Dividends tax is withheld by the company declaring the dividend on behalf of the shareholder receiving it. *In specie* dividends are subject to tax in the hands of the company and not the beneficial owner.

Foreign dividends received by or accrued to an SA-resident taxpayer are included in income based on a formula and taxed at the normal CIT rate, which results in an effective tax rate of 20%. Qualifying foreign dividends are also generally not subject to tax where they are received by resident shareholders holding in excess of 10% of the equity shares and voting rights of the company declaring the dividend. Dividends received by residents holding less than 10% of such shares will generally be taxable in South Africa, subject to a tax credit for foreign taxes payable by the recipient shareholder.

Stock dividends
Stock dividends (capitalisation issues of shares) are not subject to CIT or dividends tax.

Interest income
Interest income of resident companies is taxed at the normal CIT rate.

Interest received by a non-resident company is only subject to CIT if the debt claim in respect of which it is paid is effectively connected with a PE of that non-resident company in South Africa during the tax year, and where that non-resident company is registered as a taxpayer in South Africa.

A 15% withholding tax (WHT) applies to interest paid on certain debt instruments to non-resident companies and where the interest is not subject to CIT.

Royalty income
