Electric vehicle charging station incentives

The following concessions are available to a company developing electric vehicle charging stations with a capital investment of more than FJD 500,000:

- Subsidy of 5% of the total approved capital expenditure incurred, in addition to normal depreciation.
- Exemption from CIT for a period of seven years.
- Duty-free entry of certain capital equipment, plant, and machinery, upon receiving provisional approval from the Minister.

The recipients of provisional approval are required to complete the projects within two years from the date provisional approval is granted.

Filmmaking and audio-visual incentives

A tax exemption or reduced tax rate is available on the income of non-resident employees of an approved non-resident company engaged or intending to be engaged in making a film in Fiji.

A resident entity (excluding an entity holding a broadcast licence in television or radio in Fiji or with substantial shareholdings in the same) may deduct up to 150% of expenditure on audio-visual production in respect of income in the year of the expenditure. 'Audio-visual productions' include production for exhibition or sale of theatrical films, broadcast television, direct-to-video and video disk programme, audio recording, computer software, and interactive websites.

A tax exemption is available on the income derived by a taxpayer from the commercial exploitation of a copyright until the taxpayer has received from the commercial exploitation a return of up to 60% of the expenditure. The expenditure must be of capital nature and in relation to the audio-visual production costs in respect of a qualifying audio-visual production.

Tax concessions are also available for residents of areas declared as studio city zones by the appropriate government minister.

Tax Free Regions (TFRs)

The following concessions may be available to a newly incorporated entity engaged in trade, business, or manufacture in the TFRs:

- Exemption from CIT for a period of 5 to 20 consecutive fiscal years for a new activity established between 1 January 2009 to 31 December 2028, depending on the level of investment and the equity held by an iTaukei landowner.
- Duty-free entry of raw materials, machinery, and equipment (including parts and materials) required for the establishment of the business.

The areas declared TFRs are Vanua Levu, Rotuma, Kadavu, Lomaiviti, Lau, and the airport side of the Rewa Bridge, excluding the town of Nausori up to the Ba side of the Matawalu River (previously Korovou to Tavua).

CIT exemption of 5, 7, or 13 years (depending on the amount of capital investment) is available to a taxpayer engaged in any new activity established in the TFR from the airport side of the Rewa Bridge, excluding the town of Nausori up to the Ba side of the Matawalu River, subject to certain conditions.

Other tax incentives

An investment allowance of 55% is available for the construction or refurbishment and renovation of a vessel, in addition to normal depreciation, subject to certain conditions.

An approved mining company may, for a specified period, be exempt from CIT or taxed at a lower rate. The holder of a valid prospecting licence may write off approved expenditure on prospecting for minerals against income from all sources.

A 150% deduction is available for direct capital expenditure incurred by commercial banks in rural banking programmes.

Investors engaged in value adding processes in the food processing, agricultural processing, fisheries, or forestry business may be able to claim a 100% deduction with respect to amounts invested or re-invested (for expansion), provided that the businesses meet the 50% local content rule.

A CIT exemption may be available to a taxpayer engaged in the following commercial agricultural farming and agro-processing activities, subject to certain conditions:

- Any new activity approved between 1 January 2009 and 31 December 2028, for a period of 5 to 13 consecutive fiscal years, depending on the level of capital investment.

Income derived by a taxpayer from a new activity in processing agricultural commodities into bio-fuels established between 1 January 2009 and 31 December 2028 may be exempt from CIT for a period of 5 to 13 consecutive tax years (depending on the level of capital investment), under certain conditions.

An exemption from CIT for a period of five years may be available to a taxpayer engaging in renewable energy projects and power cogeneration.

Entities in the agriculture, fisheries, and tourism industries, with a maximum turnover threshold of FJD 500,000, may also be exempt from CIT.

A 150% deduction is available on expenses incurred in reorganising a company for the purpose of listing on the SPSE.

Any gain derived from the following sale of shares shall be exempt from CIT:

- For the purpose of listing on the SPSE, subject to certain conditions.
- By a resident of shares in an SPSE-listed company.

40% of capital expenditure of not less than FJD 50,000 incurred by any existing business located in Vanua Levu is allowed as a deduction for tax purposes, subject to certain conditions.

A 150% deduction is available on expenditure not exceeding FJD 250,000 incurred in marketing goods and services for export to any of the South Pacific countries, excluding Australia and New Zealand.

The income of a shipping company derived from servicing Rotuma and the Lau Group shall be exempt from CIT for a period of seven years, subject to certain conditions.

A 50% deduction is available on expenditure incurred for uniforms made in Fiji and supplied to an employee, provided that the cost is not recovered from the employees.

A 150% deduction is available for foreign companies for capital expenditure incurred for the relocation to Fiji of its regional or global headquarters, which provides management, technical, or other supporting services to its offices or associated companies, subject to certain conditions.

Foreign tax credit

A credit is allowed in Fiji for foreign tax paid on foreign income, limited to the lesser of the Fiji tax payable or the foreign tax paid on such income.

Withholding taxes

WHTs are levied as follows:

	WHT (%)				
Recipient	**Dividends**	**Interest**	**Royalties**	**Know-how, management fees**	**Professional fees**
Resident corporations	0	10 (1)	5 (2)	5 (2)	5 (2)
Resident individuals	0	10 (1)	5 (2)	5 (2)	5 (2)
Non-resident corporations:					
Non-treaty	0	10	15	15	15
Treaty:					
Australia	0	10	15	15	0/15 (3)
India	0	10	10	10	0/10 (3)
Japan	0	10	10	10	0/10 (3)
Korea, Republic of	0	10	10	10	0/10 (3)
Malaysia	0	10	15	15	0/15 (3)
New Zealand	0	10	15	15	0/15 (3)
Papua New Guinea	0	10	15	15	0/15 (3)
Qatar	0	0	5	5	0/5 (3)
Singapore	0	10	10	10	0/10 (3)
United Arab Emirates	0	0	10	10	0/10 (3)
United Kingdom	0	10	15	15	0/15 (3)

Notes

1. Applies to interest (over FJD 200) but is not applicable if income is exempt.
2. This WHT only applies where there is a formal written contract.
3. Depending on the provisions of the applicable double taxation agreement.

Tax administration

The Tax Administration Act (TAA) was promulgated with the stated intention of harmonising the administration of the various tax laws, including CIT and VAT. CGT, FBT, STT, and ECAL are also covered by the provisions of the TAA.

If a due date falls on a Saturday, Sunday, or holiday, the due date is the last working day before the due date.

Taxable period

Tax is assessed on income derived during the calendar year preceding the year of assessment. Returns are therefore generally accepted on a calendar-year basis, although approval is also given to use an alternative fiscal-year basis. For purposes of assessment of returns completed on a fiscal-year basis, the calendar year in which more than one-half of the fiscal year falls is deemed to be the calendar year in which the income is derived.

Tax returns

The Fiji tax system is not based on self-assessment. Returns of income contain information on the basis of which assessments are raised by the tax authorities.

The due date for lodgement of CIT returns is three months after the end of the income year. However, under the Tax Agent Lodgement Programme, an extension of time may be granted to lodge the CIT returns.

Payment of tax

Final payment of CIT (i.e. the balance of actual tax payable) is generally due by the tax return lodgement due date.

Advance tax payments are required to be made in three instalments, as follows:

- First advance: Due on the last day of the sixth month of the current fiscal year (33⅓% of the preceding income year's tax payable or estimated tax liability).
- Second advance: Due on the last day of the ninth month of the current fiscal year (33⅓% of the preceding income year's tax payable or estimated tax liability).
- Third advance: Due on the last day of the fiscal year (33⅓% of the preceding income year's tax payable or estimated tax liability).

The TAA provides for various ways to ensure the collection of taxes, including, but not limited to, the following:

- Departure prohibition order: A departure prohibition order may be used by the tax office to prevent taxpayers from leaving the country without settling outstanding taxes.
- Garnishee orders: The tax office may garnish bank accounts for outstanding taxes.
- Registration of charges on personal and real properties of the taxpayer.
- Distress and sale of personal property.

- Temporary closure of business.

Penalties

Administrative penalty provisions have been amended and increased under the TAA. Some of the penalties are as follows:

- Failure to register: Every person who fails to apply for registration as required pursuant to the Act commits an offence against the Act and will, on conviction, be liable to a fine not exceeding 50% of the tax payable where the delay does not exceed six months, or a fine not exceeding the tax payable where the delay exceeds six months.
- Late filing of a return: A registered person who fails to lodge a tax return is liable for a penalty of 20% of the tax payable in the case where tax is payable and a penalty of 5% of the tax payable for every month of default.
- Late payment of tax payable: Where any tax remains unpaid on the expiry of the due date, a penalty of 25% of the tax payable in respect of that taxable period will apply.
- Failure to comply with the late payment penalty: Every person who fails to comply with the late payment penalty is liable for penalty of 5% of the unpaid tax for each month of default.
- Failure to maintain proper records: A registered person who fails to keep, retain, or maintain account, documents, or records is liable for a penalty of 75% (knowingly or recklessly made) or 20% (in other cases).
- Insufficient payment of advance taxes: A taxpayer who makes advance payment of taxes less than the required amount per instalment is liable for a penalty of 40%.

Tax audit process

The FRCS undertakes ongoing compliance activities to ensure corporations are meeting their tax obligations. Compliance activities take various forms, including questionnaires, reviews of specific issues, and audits.

Statute of limitations

Generally, the tax authority may issue amended notices of assessment at any time. Previously, there was a six-year limitation except in certain cases (e.g. fraud).

Topics of focus for tax authorities

The FRCS has recently been focusing on transfer pricing issues, the implementation of PAYE tax as a final tax, FBT, WHT, and excise and fiscal duties.

Significant developments

There have been no significant corporate tax developments in Finland during the past year.

Taxes on corporate income

Finnish resident companies are subject to Finnish corporate income tax (CIT) on their worldwide income (i.e. unlimited tax liability). Also, Finnish permanent establishments (PEs) of non-resident companies are subject to Finnish CIT on their worldwide income attributable to the PE.

The CIT rate is 20%.

Public service broadcasting tax

Public service broadcasting tax (*Yleisradio* or YLE tax) for companies and organisations is based on the taxable income for a fiscal year. The tax amounts to 140 euros (EUR) per year if the taxable income of the organisation is at least EUR 50,000. For organisations with taxable income exceeding EUR 50,000, the tax is levied at EUR 140 plus 0.35% of the taxable income exceeding EUR 50,000. The maximum of the annual tax is EUR 3,000, which will be payable by organisations with taxable income of EUR 868,000 or more.

YLE tax is deductible in the taxation of income of a company.

Local income taxes

No municipal or local income taxes are levied in Finland on the income of a company.

Corporate residence

A company is deemed to be resident on the basis of incorporation. Consequently, a company is deemed to be resident in Finland if it is incorporated (registered) in Finland.

Permanent establishment (PE)

A PE is, in general, formed in line with the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Other taxes

Value-added tax (VAT)

The general VAT rate is 24%. A reduced rate of 14% is applied to food and animal feed. The reduced VAT rate of 14% also applies to restaurant and catering services. A reduced VAT rate of 10% is applied to certain goods and services (e.g. books, subscriptions of newspapers and magazines lasting one month or longer, accommodation, passenger transport).

A zero rate applies in certain instances (e.g. intra-Community supplies of goods and exports of goods). Additionally, certain services (e.g. financial services, insurance services, and certain educational services) are exempted from VAT.

Customs duties

Many goods imported into Finland from outside the European Union (EU) are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff and vary widely.

Excise duties

Product specific, EU harmonised excise duties are levied on tobacco products, liquid fuels, and alcohol, as well as electricity and certain other fuels. In addition to the harmonised excise duties, Finland levies national excise duties on soft drinks, beverage containers, oil waste on lubrication oils and other oil based lubrication preparations, oil transported through or imported into Finland, waste to landfill deposits, and tall oil, as well as electricity, coal, natural gas, and liquid fuels.

Real estate tax

Municipalities impose an annual real estate tax. The tax is levied on the taxable value of buildings and land. The municipal council determines the applicable tax rates, although the minimum and maximum tax rates are set by tax legislation (e.g. 0.93% to 2.00% for general real estate tax, 0.41% to 1.00% for permanent dwellings). The tax is deductible from taxable business income if the real estate is used for business purposes. The tax is deductible from taxable income of the so-called 'other-source income' if the real estate is used to acquire other taxable income than business income.

Transfer tax

A transfer tax of 4% of the sales price is payable on the transfer of real estate situated in Finland. The transfer of shares in Finnish companies (other than housing companies and real estate companies) and other domestic securities is subject to a transfer tax of 1.6%. The transfer of shares in Finnish housing companies and real estate companies is subject to a transfer tax of 2%.

A transfer tax of 2% of the sales price is payable on the transfer of shares in a foreign company whose activities consist mainly of owning or holding (directly or indirectly) real estates in Finland, provided that either the transferor or the transferee is a resident of Finland or, alternatively, a Finnish branch of a foreign credit institution, a Finnish branch of a foreign investment firm, or a Finnish branch of a foreign fund management company.

Generally, the transfer tax is payable by the transferee.

No transfer tax is payable on the transfer of securities that are subject to trading on a regulated market or multilateral trading facility in the European Economic Area (EEA). Similarly, no transfer tax is payable if both the seller and the transferee are non-residents. Transfer tax is, however, always payable on transfers between non-residents if the transferred shares are shares in a Finnish housing or real estate company.

Stamp tax

No stamp taxes are levied in Finland.

Payroll taxes

The employer has a liability to withhold income taxes on remuneration subject to tax in Finland, including cash remuneration and non-cash benefits based on their taxable value. The taxes can, however, be withheld only on cash compensation, and the maximum income tax withholding liability equals the amount of cash remuneration.

Social security contributions

According to the Finnish social security legislation, both Finnish and foreign employers have a liability to pay several social security payments in Finland in cases where an employee performs one's tasks partly or wholly in Finland. The liability concerns all employers, regardless of the form of the company and whether the foreign company has a PE in Finland. The percentage rates for the employer's (and employee's) social security contributions are revised on an annual basis.

Compulsory social security contributions payable by the employer in 2018, according to the paid salaries, are as follows:

- Employer's health insurance contribution: 0.86% (no cap).
- Employer's pension insurance contribution: 17.75% (on average, no cap).
- Employer's unemployment insurance contribution: 0.65% for the first EUR 2,083,500 of gross salaries and 2.6% for the portion of the gross salaries exceeding EUR 2,083,500 (no cap). Employer's unemployment insurance contribution applies to employees of age 17 to 64.
- Group life insurance premium: 0.07% (on average, no cap).
- Accident insurance premium: 0.8% (on average, no cap).

The rates for employer's health insurance contribution are applicable to salaries paid as of 1 January 2018. The employer's health insurance contribution is paid to the Finnish Tax Administration, and the other contributions are paid to the insurance providers. All of these contributions are tax deductible as salary cost.

Compulsory social security contributions payable by the employee in 2018 are as follows:

- Employee's pension insurance contribution: 6.35% for employees of age 17 to 52 or 63 and over, and 7.85% for employees of age 53 to 62 (no cap).
- Employee's unemployment insurance contribution: 1.90% (no cap).

The above-mentioned contributions are tax deductible for the employee. These contributions are withheld from the gross salary at the time of salary payment and remitted by the employer to the appropriate insurance provider together with the employer's pension and unemployment contributions.

- Employee's sickness insurance contribution: 1.53%, provided that the annual taxable income exceeds EUR 14,020 (otherwise 0.00%; no cap).

In 2018, the sickness insurance consists of two payments, a daily allowance contribution of 1.53% and a medicare contribution of 0.00%. From these two contributions, only the daily allowance contribution is tax deductible for the employee. Unlike other employee's social security contributions, the sickness insurance contribution is included in the withholding tax (WHT) rate of the employee's personal WHT card and, thus, withheld and remitted to the tax authorities together with the withheld income taxes and is finally settled in the final assessment.

If an employee is regarded as a foreign-posted employee and has an A1 certificate or a certificate of coverage from one's home country, neither the aforementioned employer's social security contributions nor the employee's social security charges are payable in Finland, with the possible exception of employee's sickness insurance premium in some cases.

Branch income

As a general rule, a branch is taxed like a corporation (tax rate 20%) on the profits attributable to it, provided the branch constitutes a PE in Finland. No tax is withheld on transfers of (taxed) profits to the head office.

Income determination

Companies and other legal entities may have income from three different sources: income from business activities, agricultural income, and personal-source income. The net taxable income is calculated separately for each source. The expenses of one source of income cannot be deducted from the taxable income of another source, and a loss from one source of income cannot offset taxable income from another source. All taxable income received by a company is taxed at the CIT rate of 20%, irrespective of the source to which it is attributable.

Income from business and professional activities falls into 'business source' income (taxed in accordance with the Business Income Tax Act or BITA), while income from non-business activity is 'personal income'. Typically, personal income is passive income derived, for example, from investments. As an example, rental income from real estate let to non-related companies is usually regarded as 'personal source' income. The same can apply to a dividend received from stock exchange quoted companies, where the recipient of the dividend is a passive holding company. Farming and forestry income are, as a main rule, treated as agricultural-source income.

In general, Finland has a very broad income concept, and taxable income includes all income derived from a company's activities, though there are some significant exceptions, including (among others):

- Capital contributions by shareholders.
- In most cases, dividends from unlisted companies (*see Dividend income below*).
- Liquidation gains and capital gains qualifying for the participation exemption (*see Capital gains below*).
- Proceeds from disposal of company's own shares.

- Merger gain.

There is no general distinction between capital gains and other income; capital gains of a company are taxed as part of its general income either in the 'business income' basket or the 'other income' basket. No rates other than the general CIT rate of 20% are applied to any part of taxable income of a company.

Taxable income of a company generally is computed on an accrual basis (i.e. income is taxable in the year it is earned). However, exemptions to this main rule do exist, including unrealised exchange gains and losses, which are taxable/deductible in the year of the rate change.

Inventory valuation

Inventories may be written down to the lower of direct first in first out (FIFO) cost, replacement cost, or net realisable value. Conformity between book and tax reporting is required.

Capital gains

Capital gains and losses are generally included in the taxable business income (i.e. sales proceeds are included in the taxable income, and the undepreciated balance of the asset sold is deducted in the sales year) and treated as ordinary income. However, the entire stock of machinery and equipment is treated as a single item, and the capital gain on machinery and equipment is entered as income indirectly by deducting the selling price from the remaining value of the stock of machinery and equipment.

Capital gains arising from the sale of shares are tax exempt via a participation exemption, under certain circumstances. Specifically, capital gains arising from the sale of shares are tax exempt if:

- the seller is not a company carrying out private equity activities (as defined by the BITA)
- the seller has owned continuously, for a period of at least one year, at least 10% of the share capital of the target company, and
- the shares are part of the seller's fixed assets and the shareholding is included in the seller's business income source for tax purposes.

For the participation exemption to apply, the target company cannot be a real estate company, a housing company, or a company the activities of which mainly include owning of real estates. The target company must also be a Finnish company, a company referred to in the European Commission (EC) Parent-Subsidiary Directive, or a company resident in a country with which Finland has concluded a tax treaty that applies to the target company's dividend distribution.

Note that a capital gain is taxable to the extent that the gain corresponds with a previous tax-deductible write-down or provision made in connection with the acquisition cost of shares, subsidies received for acquiring shares, or previous capital losses deducted for Finnish tax purposes from intra-group transfer of the shares.

Capital losses are non-deductible in situations where capital gains are exempt from tax.

Dividend income

Dividends received by a Finnish company are tax exempt in most cases.

However, dividends received by a Finnish company are fully taxable (100%) if:

- the dividend is received from a publicly quoted company, the receiving company is not a publicly quoted company, and the shareholding is less than 10% of the equity of the distributing company
- the dividend is distributed by a non-resident company that is not such as mentioned in the EC Parent-Subsidiary Directive or other company resident in an EU or EEA country that is not liable to pay at least 10% tax for its income, or
- the dividend is distributed by a company resident outside the European Union or European Economic Area.

Note that most of the Finnish tax treaties include provisions enabling tax-exempt dividends from the tax treaty country in case of at least a 10% shareholding.

Furthermore, dividends received are partly (75%) taxable if the dividend is received on shares belonging to 'investment assets' and the receiving company does not own at least 10% of the equity of the distributing company that is resident in another EU member state and covered by the EC Parent-Subsidiary Directive or the dividend is received on shares belonging to 'investment assets' and the distributing company is resident in Finland or an EEA country but not a company covered by the EC Parent-Subsidiary Directive (note that only financial, pension, and insurance institutions may have assets that are considered as 'investment assets').

Finland has implemented into domestic tax legislation the changes in the Parent-Subsidiary Directive (concerning mismatches in tax treatment of profit distribution to avoid situations of double non-taxation and general anti-abuse rules, directives 2014/86/EU and 2015/121/EU) by limiting Finnish companies' right to receive tax-exempt dividends. Due to these changes, dividends received by a Finnish company are always considered fully taxable in case:

- the dividend is tax deductible for the distributing company, or
- the dividend distribution relates to an arrangement or series of arrangements mainly aimed at achieving a tax benefit that is not meant to be the purpose of the dividend article and is not genuine, taking into account all the facts and circumstances related to the case (i.e. the arrangement or series of arrangements is not based on solid business reasons).

Stock dividends

Stock dividends (bonus shares) may be distributed to stockholders, which are corporations and other legal entities with some exceptions, free of tax on the shareholder (*see Dividend income above*).

Distributions from reserves for invested unrestricted equity

Distributions from reserves for invested unrestricted equity are, in general, deemed as dividends. However, distributions from non-listed companies can be deemed as capital gain if they are:

- a return of capital investment made by the same taxpayer
- distributed within ten years of the investment, and
- clarified by the taxpayer that the above-mentioned conditions are met.

Distributions cannot be deemed as a capital gain if the reserves for invested unrestricted equity have been formed in conjunction with company restructurings (merger and acquisition [M&A] processes).

Interest income

Interest income of a company is taxed as part of its general income, thus the regular CIT rate of 20% is applied.

Royalty income

Royalty income of a company is taxed as part of its general income, thus the regular CIT rate of 20% is applied.

Foreign income

A Finnish corporation is taxed on foreign dividends when the decision to distribute dividends is made and on foreign branch income and other foreign income (e.g. interest and royalties) as earned. The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties (*see the Tax credits and incentives section for more information*).

Deductions

As with taxable income, the concept of deductible costs is wide and covers, in general, all costs incurred in the pursuance of taxable income. Significant exceptions to this rule include (among others):

- Income taxes (*see below*), tax late payment interests, and punitive tax increases.
- Fines and other punitive payments.
- 50% of entertainment costs.
- Capital losses and liquidation losses if capital gains from the sale of shares of a target company would qualify for the participation exemption (*see Capital gains in the Income determination section*).
- Losses from the disposal of a company's own shares.
- Merger losses.
- Net interest expenses exceeding 25% of taxable profit as increased with interest expenses, depreciation, and received group contribution, and as decreased with given group contribution (EBITDA) (*see Thin capitalisation in the Group taxation section*).

As the accrual method is applied to the calculation of taxable income, expenses are usually deductible in the year they are realised (i.e. the year the obligation to pay has arisen).

Depreciation, amortisation, and depletion

The maximum annual rates of depreciation calculated on the remaining acquisition cost for tax purposes (declining-balance method) are 25% for machinery and equipment and from 4% to 20% for buildings and other constructions, depending on the type and estimated life of the asset. The remaining acquisition cost for tax purposes is defined as cost less accumulated tax depreciation and, in the case of machinery and equipment, proceeds on disposal of the assets. The straight-line method is applied to certain intangible assets and capitalised expenditures and to assets with long economic use, such as dams. Tax depreciation is limited to the cumulative charges made in the books.

Costs related to qualifying intangible property are usually amortisable over a period of ten years or a shorter period if the economic life is proven to be less than ten years.

The capital cost of mines, sandpits, quarries, and peat bogs is written off in proportion to the quantities extracted. Short-lived items (the economic life of which is three years or less) may be written off immediately.

Land is not a depreciable asset.

Goodwill

Acquired goodwill is amortisable for tax purposes over its economic life, up to a maximum of ten years.

Start-up expenses

Start-up expenses are generally deductible expenses when determining taxable income.

Interest expenses

As a general rule, interest expenses are fully deductible. However, deductibility of interest expenses for intra-group loans is restricted to 25% of fiscal EBITDA (*see Thin capitalisation in the Group taxation section*).

Bad debt

In general, bad debts incurred from sales receivables, etc. are tax deductible. The bad debts must also be deducted for accounting purposes.

Charitable contributions

Donations are deductible for CIT purposes in certain cases.

In order for a donation to be tax deductible, the amount of the donation should be at least:

- EUR 850, but not more than EUR 250,000, if made to an EEA member state or to a publicly financed university or other higher educational institution in the EEA to benefit the sciences, the arts, or the Finnish cultural heritage, or
- EUR 850, but not more than EUR 50,000, if made to an association, foundation, or other institution in the EEA nominated by the Tax Administration and to benefit the sciences, the arts, or the Finnish cultural heritage.

Donations of not more than EUR 850 (e.g. to charitable purposes) are, in general, tax deductible.

Taxes

No income taxes are deductible when determining taxable income. However, the real estate tax and YLE tax are deductible.

Education costs of employees

Employers are allowed to make an additional tax deduction for certain education costs of their employees. It is required that the employer has made a qualifying education plan and the education relates to the current or future tasks of the employee. The deduction entails both internal and external courses. The amount of the deduction is the average daily salary of all employees working for the employer multiplied by the amount of all qualifying educational days of all employees. This amount is subsequently divided by two. The maximum amount of qualifying education days is three days per employee within the fiscal year in question. The deduction has no tax consequences for the employees.

Net operating losses

Losses may be carried forward for ten subsequent years. However, the right to carry forward losses may be forfeited in certain instances, such as in cases where there is a direct or indirect change in the ownership of the company operating at a loss. However, a special permit can be applied in certain situations from the Finnish tax authorities to retain the tax losses despite the change in ownership. Loss carrybacks are not allowed.

Payments to foreign affiliates

A Finnish corporation may claim a deduction for royalties, service fees, and interest charges paid to foreign affiliates, provided the underlying transaction is beneficial to it and the amounts paid are at arm’s length.

Group taxation

Companies within a group are not consolidated for CIT purposes. However, via group contributions (i.e. lump sum payments of cash based on annual taxable profits), group companies may even out their taxable profits and losses, which leads effectively to the same result as consolidation would. A group contribution is a deductible cost for the granting company and taxable income for the receiving company, provided that all of the following are true:

- Both companies belong to a group where there is a direct or indirect common ownership of at least 90%, and the group structure has existed for the entire fiscal year.
- Both companies are Finnish resident for tax purposes.
- Both companies are limited liability companies or co-operatives with business activities (i.e. have a source of income from business activities, *see the Income determination section*) and are not financial, insurance, or pension institutions.
- The contribution is recorded in the annual statutory accounts of both companies involved and must affect their annual net income.
- The accounting period for both companies ends at the same date.
- The amount of contribution does not exceed the taxable business income of the granting company.
- The contribution is not considered a capital investment.

Based on case law, the ownership chain may also be traced via foreign entities, provided there is a tax treaty between Finland and the country wherein the ultimate parent for the group is resident.

Transfer pricing

All transactions between related parties must take place at arm's length. The requirement is imperative even in relation to purely domestic transactions. If the arm's-length requirement is not followed, income or deductions of a company may be adjusted for tax purposes, in addition to which a risk for substantial penalties exists.

The guidance provided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations is adopted as a significant source of interpretation in the application of the arm's-length principle. According to the Finnish Tax Administration's statement, the OECD's Base Erosion and Profit Shifting (BEPS) Reports are applied retrospectively.

A Finnish company is obligated to prepare transfer pricing documentation to support transactions between its non-Finnish related parties. Documentation is subject to statutory requirements regarding content, which vary depending on the volume of related-party transactions. As of 1 January 2017, the content requirement is in line with the three-tiered documentation model introduced in the updated OECD Transfer Pricing Guidelines. The documentation requirement concerns Finnish companies and Finnish PEs of foreign companies that are a part of a group that has more than 250 employees or a group that has a turnover of more than EUR 50 million and a balance sheet exceeding EUR 43 million.

These thresholds are calculated at the group level. Failure to present appropriate documentation within 60 days from the tax authorities' request may lead to a punitive tax increase. The documentation may be requested six months after financial year end at the earliest.

Country-by-country (CbC) reporting

The CbC reporting obligation applies to multinational groups with a consolidated turnover of at least EUR 750 million in the preceding fiscal year. The main rule is that an obligation to submit a CbC report to the Finnish tax authorities lays with the ultimate parent company if resident in Finland. However, if the ultimate parent company is not resident in Finland, the obligation lays with any other group company resident in Finland in case the foreign ultimate group company (i) is not obligated by CbC reporting requirements; (ii) is resident in a jurisdiction outside the European Union with which Finland has not concluded an agreement on exchange of information regarding CbC reports within due time; or (iii) is resident in a jurisdiction that has systematically neglected exchange of information and the Finnish tax authorities have reported this neglect.

This does not, however, apply to situations where the ultimate group company has appointed a group company resident within the European Union to submit the CbC report. Nor does it apply, under certain conditions, if the ultimate group company has appointed a group company resident outside the European Union. A notification of the company obligated to submit the CbC report shall be given to the Finnish tax authorities.

The CbC report shall contain the following country-specific data of the group companies and PEs:

- Revenues.
- Profit or loss before taxes.

- Income tax paid and accrued, as well as WHT.
- Bookkeeping value of equity.
- Accumulated earnings
- Number of employees.
- Tangible assets, other than cash or cash equivalents.

In addition, the CbC report should include information on the business of each group company (and PE), as well as information on data sources and currency used. The government's proposal text also suggests that other information that is considered relevant to facilitate an understanding of transfer pricing risks could be included in the CbC report.

Also, the CbC report can be provided in Finnish, Swedish, or English.

The CbC report shall be prepared for financial years starting on or after 1 January 2016, and it is due within 12 months after the end of the financial year concerned. A separate notification of the company obligated to submit the CbC report shall be made by the end of the fiscal year for which the report is provided.

Thin capitalisation

There are no thin capitalisation rules as such; interest limitation rules have been implemented instead. Deductibility of interest expenses for intra-group loans is restricted to 25% of fiscal EBITDA. Excess interest can be carried forward to future years. The limitation rules do not apply if (i) net annual interest expense (including both intra-group and third party interest) does not exceed EUR 500,000 or (ii) if the Finnish company's equity-to-gross-assets ratio is greater than or equal to the group-consolidated ratio. In addition, the amount of debt and rate of interest should be at arm's length. If not, a possibility for application of the general anti-avoidance provision may exist.

Controlled foreign companies (CFCs)

The CFC rules are applicable with respect to foreign entities in low tax jurisdictions controlled by Finnish residents. The undistributed profits of such foreign entities may be taxed as profit of the Finnish resident direct or indirect shareholders. The entity is deemed to be controlled by Finnish residents if at least 50% of the capital or total voting rights are directly or indirectly held by Finnish residents or if Finnish residents have the right to at least 50% of the profits of the entity. The taxable person in such a case is the Finnish resident shareholder who directly or indirectly owns at least 25% of the capital of the corporate body or has the right to at least 25% of the profits of the entity. A foreign entity is considered to be low taxed if the actual income tax burden of the foreign corporation in its country of residence is lower than three-fifths of the tax burden of a comparable Finnish corporation.

Foreign PEs of non-resident companies can be regarded as equal to foreign companies, provided that the PE's profits are not taxed in the head office state. Due to the transitional period, the PE provision is applicable to PEs of foreign entities only as of 1 January 2015.

Certain types of businesses are excluded from the scope of the CFC rules (e.g. income principally from industrial, manufacturing, or shipping activities, as well as sales or marketing activities related to such activities, if they are directed principally to the country of residence of the sales or marketing company). Also, companies resident in a country with which Finland has a double tax treaty (DTT) generally are outside the scope of the CFC rules if the company does not benefit from any special tax incentives in that treaty country. Tax treaty countries that are not covered by this rule are exhaustively mentioned in a specific 'black list' provided by the Ministry of Finance. These countries are Barbados, Bosnia-Herzegovina, Georgia, Kazakhstan, Macedonia, Malaysia, Moldova, Montenegro, Serbia, Singapore, Switzerland, Tajikistan, United Arab Emirates, Uruguay, and Uzbekistan.

In addition to these two mentioned exclusions, the Finnish CFC rules are not applicable in cases of genuine economical establishment in a foreign country, which is either an EU/EEA member state or a tax treaty state not on the 'black list'. The genuine economical establishment is evaluated in light of the requirements of the business in question and paying special attention to capable personnel and office space located in the low tax jurisdiction.

Tax credits and incentives

Foreign tax credit

The principal method of avoiding double taxation is the credit method, although the exemption method is still applied in a few older treaties. Foreign tax can be credited against taxes payable in Finland on the same income over the same period on a *pro-rata* basis. The credit is given for taxes paid to a foreign state and covered by the relevant DTT. The maximum credit is the lesser of either the amount of the foreign tax or an amount equal to the Finnish tax payable on the income from a foreign state. This maximum is calculated on a source-by-source basis. Unused credit of foreign tax paid may be carried forward for five years on an income basket basis.

Research and development (R&D) activities

R&D related costs may be deducted annually, or they can be capitalised.

Withholding taxes

Finnish corporations paying certain types of income are required to apply a 20% or 15% WHT on payments to foreign corporations and a 30% WHT on payments to non-resident individuals or other than corporate entities.

According to domestic legislation, interest paid to a non-resident is usually tax exempt in Finland.

No WHT is levied on dividend payments received by companies resident in the EU/EEA area, which would have been tax-free if paid to a Finnish corporate body, if the WHT cannot be fully credited in the company's country of residence.

Dividends paid to a company referred to in the EC Parent-Subsidiary Directive, owning at least 10% of the capital of the dividend distributing company, are also tax exempt.

The domestic WHT rate may be 15% (or lower under a relevant tax treaty) in cases where the shares of the distributing company belong to the investment assets of the non-resident beneficiary of dividends and if certain prerequisites are met.

See the table below for WHT rates on dividends and other payments from Finland to non-residents.

For countries not included in the table, the WHT rate is 20% (corporate entity) and 30% (individual or other than corporate entity).

Note that each tax treaty should be studied carefully because there are often exceptions to general rules.

	WHT (%)

Notes

* The recipient is a company whose share in the company making the payment is at least the percentage indicated in brackets.

1. Tax is not levied on literary, scientific, or artistic royalties (*for film royalties see text of treaty*).
2. If corporate entity, then:
   - no tax if these dividends were tax free under Business Tax Act and if the recipient does not receive a full credit for the Finnish tax in the country of residence, and
   - no tax on dividend paid to a company meant in the EU Parent-Subsidiary Directive owning at least 10% of the capital of the paying company.
3. The tax rate is 15% on films, tapes used in television or radio broadcasts, use of copyright of literary, artistic, or scientific works, or royalty paid for usufruct.
4. The tax rate is 10% on literary, scientific, artistic, and film royalties.
5. The tax rate for an individual is 30% if income is tax-exempt in the country of residence.
6. A lower tax in certain cases.
7. Foreign capital greater than 100,000 United States dollars (USD) when dividend becomes due and payable.
8. *See the treaty for additional requirements.*
9. The tax rate is 7% on industrial, scientific, and commercial royalties.
10. The tax agreement does not apply if the recipient is a special holding company.
11. The tax rate is 5% on royalties from films and tapes.
12. The tax rate is 5% on royalties paid for the use of industrial, commercial, or scientific equipment.
13. The tax rate is 15% if the payer is also an industrial enterprise.
14. The 10% is calculated on the total voting stock.
15. There is no tax on royalties between associated companies meant in EU Directive 2003/49/EC, 2013/13/EU.
16. The tax rate is 1% for finance lease of equipment and 5% for operating lease of equipment and computer software.
17. The tax rate is 5% for the use of secret process or for know-how; there is no tax for computer software or patent.
18. The tax rate is 10% on industrial royalty, 3% on royalties to news agency, and 5% on artistic royalty to the author or the author's *mortis causa* successor.
19. The tax rate is 2.5% on royalties paid for the use of industrial, commercial, or scientific equipment or computer software.
20. The tax rate is 5% on royalties paid for the use or the right to use of industrial, commercial, or scientific equipment or software.
21. The tax rate is 15% if the recipient is a company.
22. There is no tax on dividends to qualified parents-subsidiaries and pension funds.
23. There is no tax if the recipient proves that one has domicile (individual) or is incorporated in the United Arab Emirates.
24. If corporate entity tax is 15% or 20%.

Non-treaty areas include Andorra, Antigua and Barbuda, Bahama Islands, Bahrain, Belize, Cayman Islands, Channel Islands, Gibraltar, Grenada, Greenland, Hong Kong, the Spitsbergen, Jan Mayen, Liberia, Macao, Mauritius, Monaco, Panama, Samoa, San Marino, Vanuatu, and Virgin Islands.

Tax administration

Taxable period

The fiscal year is generally the calendar year. A company having an accounting period other than the calendar year is taxed for the accounting period or the accounting periods ending during the calendar year.

Tax returns

A company must file a CIT return within four months from the end of the month during which the accounting period ends. As a general rule, companies must file a CIT return electronically after 1 November 2017.

For potential tax refunds, taxpayers should submit their account number to the tax authorities electronically.

Payment of tax

Income taxes are levied as prepayments during the fiscal year. Advance tax payments for companies are collected in two or 12 instalments during the fiscal year. If the total amount to be paid is not more than EUR 2,000, the instalments are due in the third and the ninth month of the accounting period. If the total amount to be paid exceeds EUR 2,000, the instalments are due monthly (due date is the 23rd day of each month).

The process for advance tax amendments changed as of 1 November 2017. New rules apply to fiscal year 2017 in most cases. As of 1 November 2017, taxpayers may apply for amendments to advance taxes levied (increase, decrease, or abolishment) until tax assessment has been completed (within ten months from the end of the fiscal year). Application for amendments to advance taxes should be filed electronically.

Tax authorities may, without application, levy or increase advance taxes within two months from the end of the fiscal year. Decrease or abolishment of advance tax payments may be levied by the tax authorities (by or without taxpayer's application) until tax assessment has been completed.

Interest on late payment will be calculated starting from the first day of the second month after the fiscal year has ended until the due date of each for the following payments that are due on that day or after:

- advance tax payable
- outstanding tax (i.e. if the final tax exceeds advance taxes paid and thus additional payment will be levied by the tax authorities), and
- tax payable due to tax amendments.

The YLE tax is included in the advance tax payments.

Tax audit process

Tax audits are performed at irregular intervals by tax auditors, who are entitled to examine the accounts of a company and to request additional information necessary to the examination. Generally, the taxpayer receives an advance notice of an audit from the tax authorities.

Statute of limitations

The time to claim for reassessment of CIT has changed from fiscal year 2017.

From 2017 and onwards, the general time to claim for reassessment of CIT is three years starting from the subsequent year after the fiscal year (i.e. calendar year 2017 will be open for reassessment until 2020).

Prior to fiscal year 2017, the general time limit for statute of limitations was five years starting from the year after the tax assessment year (i.e. calendar year 2016 would have been open for reassessment until 2022).

In addition to the general three-year rule, the Finnish tax authorities may also rectify taxation after the three-year time limit in case certain criteria are met (in such cases, time limit would be extended to four or six years). In case of the taxpayer being accused for a crime, the appeal time is linked to the criminal justice process.

Appeal process

The appeal process has also changed from 1 January 2017 onwards. The primary appeal authority will always be the Tax Adjustment Board, regardless of the type of tax.

The taxpayer may appeal to the Tax Adjustment Board within the general three-year time limit.

After receiving a decision from the Tax Adjustment Board, it can be appealed within 60 days to the Administrative Court.

The possibility to appeal the Tax Adjustment Board's decision directly to the Supreme Administrative Court on prejudice grounds remains unchanged and it will cover all tax types.

Topics of focus for tax authorities

Current issues of special focus for tax audits are transfer pricing and PEs.

MyTax

MyTax is a system where taxpayers can, for example, request a prepayment or additional prepayment and file self-assessed tax returns (e.g. VAT or employer's contributions). In MyTax, taxpayers can also file CIT returns and make claims for adjustment.

Other issues

Company restructurings

In accordance with the EC Directive 2009/133/EC on mergers, divisions, partial divisions, transfers of assets, and exchanges of shares concerning companies of different EU member states, it is possible to carry out the said restructurings tax neutral if statutory conditions are met. In cross-border situations, both parties should be resident in the European Union. The principle of going concern is applied in taxation (i.e. the receiving company receives the assets with the values the transferring company had for those assets in its taxation).

EU state aid investigations

There are no current state aid investigations going on in Finland.

Notification duty for construction businesses

A monthly notification duty of the employee and contract information to the Tax Administration applies to construction work subscribers and the main contractor of a joint construction site.

Foreign Account Tax Compliance Act (FATCA)

On 5 March 2014, Finland signed an intergovernmental agreement (IGA) concerning FATCA with the United States. On the basis of the agreement, Finland agreed to bring into force legislation according to which Finnish financial institutions are required to carry out specific due diligence procedures in order to identify their customers subject to tax in the United States and to report information relating to these customers' income and wealth to the Finnish Tax Administration. The information to be reported includes, for example, interest income, income from dividends and derivatives, life insurance payments, and gross sales prices of shares and bonds. The Finnish Tax Administration shall forward the information to the US Internal Revenue Service (IRS).

The domestic law regarding the FATCA agreement was approved by the Finnish President on 20 February 2015. The financial sector began recognising their customers in accordance with FATCA as of 1 July 2014. The first FATCA reports (for year 2014) were required to be submitted to the Finnish Tax Administration by 30 April 2015.

The Finnish Tax Administration published tax technical guidance on the interpretation of the Finland-US FATCA IGA on 15 April 2015. The guidance in the circular can be used to interpret the FATCA-related customer due diligence and reporting obligations faced by Reporting Finnish Financial Institutions.

Common Reporting Standard (CRS)

On 29 October 2014, Finland signed an international agreement on automatic exchange of information, which requires Finland to apply the CRS for Automatic Information Exchange published by the OECD.

Finland has implemented the CRS into domestic law as of 15 April 2016. The amendment requires Finnish financial institutions (as defined in the CRS) to identify their financial account holders and to annually report to the Finnish Tax Administration certain income and asset information with respect to account holders that have been identified to be tax resident in the countries outside of Finland.

Finland has agreed to exchange information automatically in accordance with CRS for the first time in 2017 regarding certain financial information collected from the beginning of 2016.

Information exchange within the European Union

Starting from 2016, the amended EU Directive of Administrative Co-operation in Tax Matters (Council Directive 2014/107/EU, the so called 'DAC 2' or 'EU FATCA') was implemented into domestic legislation. Under DAC 2, EU member states have to require their financial institutions to implement reporting and due diligence rules that are fully consistent with those set out in the CRS.

Significant developments

New Double Tax Treaty (DTT) between Luxembourg and France

On 20 March 2018, the Luxembourg and French governments signed a new DTT, together with an accompanying Protocol.

The new DTT seeks to modernise the treaty as a whole; the current treaty between Luxembourg and France was signed as long ago as 1 April 1958. The new DTT is fully 'post-BEPS'. It implements the new approaches developed at the international level during the Organisation for Economic Co-operation and Development (OECD)/G20 base erosion and profit shifting (BEPS) project, and now reflected in the 2017 version of the OECD Model Tax Convention and in the Multilateral Convention to Implement Tax Treaty Related Measures, signed by both Luxembourg and France in June 2017.

More specifically, the DTT redefines what constitutes a permanent establishment (PE) for the purpose of the DTT, and introduces new rules for the taxation of cross-border payments such as dividends, interest, and royalties. The Protocol clarifies the situation of cross-border workers and grants limited access to the DTT to Undertakings for Collective Investments (UCIs).

Assuming that both the Luxembourg and French governments complete without any major delay the necessary processes for ratification of the new DTT, the provisions of the new DTT could be applicable in many situations from as soon as 1 January 2019.

Progressive reduction of the corporate income tax (CIT) rate (article 84 of the 2018 Act)

Pursuant to the action plan released by the French Prime Minister in September 2017, the French CIT rate cuts will apply over a five-year period as follows (for all companies with revenues exceeding 7.3 million euros [EUR]):

- For tax years beginning on or after 1 January 2018, the standard CIT rate for all companies is 28% on taxable income up to EUR 500,000, and 33.33% on taxable income exceeding that amount.
- For tax years beginning on or after 1 January 2019, the standard CIT rate for all companies will be 28% on taxable income up to EUR 500,000, and 31% on taxable income exceeding that amount.
- For tax years beginning on or after 1 January 2020, the standard CIT rate for all companies will be 28%.
- For tax years beginning on or after 1 January 2021, the standard CIT rate for all companies will be 26.5%.

- For tax years beginning on or after 1 January 2022, the standard CIT rate for all companies will be 25%.

Elimination of the 3% tax on dividend distributions (article 37 of the 2018 Act)

Pursuant to the French government commitment made in September 2017 and several recent court decisions, the 3% tax on distributions is repealed entirely for payments made on or after 1 January 2018.

Modification of the interest deductibility limitation ('Carrez') rule (article 38 of the 2018 Act)

The '*Carrez*' rule is anti-abuse legislation preventing interest deductions in France relating to French or foreign participations acquired by a French entity but effectively managed outside France. In other words, decision-making, control, and influence are not effectively exercised by the acquiring French entity itself or by a company established in France that, directly or indirectly, controls the acquiring company under the meaning of the French Commercial Code, or by a company established in France that is directly controlled by the same company as the acquiring company under the same meaning.

The 2018 Act relaxes this restriction so that it complies with European Union (EU) legislation with regard to a company established in France, but with its seat of management in another EU member state or in a European Economic Area (EEA) member state that has concluded a convention on administrative assistance on tax matters covering tax evasion and avoidance with France.

The new regime applies to tax years closed on or after 31 December 2017.

Transformation of the CICE tax credit into a decrease in employer's charges (article 86 of the 2018 Act)

The CICE ('*Crédit d'Impôt Compétitivité-Emploi*') tax credit is calculated as a percentage of wages paid during a calendar year to employees earning less than 2.5 times the French regulated minimum wage (SMIC).

For wages paid on or after 1 January 2018, the 2018 Act reduces the CICE tax credit rate from 7% to 6%.

For wages paid on or after 1 January 2019, the CICE tax credit is repealed and replaced by a permanent decrease in payroll charges paid by employers to finance the French social security system.

Calculation of the revenue generated by tax group members for CVAE tax rate purposes (article 15 of the 2018 Act)

The CVAE ('*Cotisation sur la Valeur Ajoutée des Entreprises*') is a tax based on the added value that a taxpayer produces, and it depends on its gross revenue.

The French Constitutional Court, on 19 May 2017, ruled that the method used to determine the CVAE tax rate applicable to a French tax consolidated group of companies was unconstitutional because it created an unjustified difference in treatment between entities that were part of a French tax consolidation and those that were not.

Pursuant to the 2018 Act, the CVAE tax rate applicable to a French group of companies complying with the conditions to set up a French tax group (i.e. 95% ownership) is now based on the consolidated gross revenue recognised by the group of companies for a given year, whether or not they are effectively part of a French tax group.

The new regime applies to the CVAE due in 2018.

Elimination of the 20% increased payroll tax rate (article 90 of the 2018 Act)

The payroll tax is due from French employers whose activity is not subject to value-added tax (VAT). It is assessed annually on gross wages and benefits in kind paid by the employer.

The standard rate of the payroll tax is 4.25%, but increased rates apply to gross individual wages that exceed certain thresholds. Those increased rates are:

- 8.5% for wages ranging from EUR 7,799 to EUR 15,572.
- 13.6% for wages ranging from EUR 15,572 to EUR 152,279.

As a result of Brexit and to increase hiring of foreign executives by cutting the related tax costs, the 2018 Act eliminates the 20% increased rate for wages exceeding EUR 152,279 paid on or after 1 January 2018.

Financial transaction tax (FTT) (article 39 of the 2018 Act)

The 2018 Act repeals the FTT provision that otherwise would have applied to intra-day trading for acquisitions made on or after 1 January 2018.

Therefore, the scope of the FTT remains the same and excludes intra-day trading transactions.

Modifications of the tax deferral regime applicable to French reorganisations (articles 23 and 15 of the 2017 Act)

The 2017 Act brings several amendments to the favourable tax regime set forth in Article 210 A *et seq.* of the French Tax Code (FTC):

- The European Union Court of Justice (ECJ), on 8 March 2017, held that the requirement to obtain a prior ruling to qualify for the French tax deferral regime applicable to mergers when a French entity is absorbed by a non-French entity did not comply with EU law.

  As a consequence, the 2017 Act repeals this requirement and introduces a new requirement to benefit from the tax deferral regime: The assets of the merged entity will have to be attached to a PE of the foreign receiving entity to be located in France.

- A specific filing is required now for absorptions benefiting non-French entities.
- Under a new anti-avoidance provision, mergers, spin-offs, and partial contributions of assets whose main purpose is tax fraud or tax evasion are excluded now from the tax deferral regime.
- Under the previous rule, partial contributions of assets forming an autonomous line of business benefited from the tax deferral merger regime only if the contributing

entity undertook to keep the shares received for a minimum period of three years. The 2017 Act eliminates this commitment.
- For a partial contribution of assets, attribution of shares to the shareholders of the contributing entity is now possible without any prior ruling as long as the following cumulative conditions are met:
  - The shares in the beneficiary company are attributed to the shareholders of the contributing company on a pro rata basis with respect to their shareholding in the latter, within one year of the contribution.
  - The initial contribution benefited from the favourable merger tax regime.
  - At least one complete line of business remains within the contributing company once the contribution is completed.
  - The shares that are attributed have been received in exchange for a contribution of assets constituting a 'complete line of business'.
- Some interim operations made by companies (e.g. a division or regrouping of shares) normally generate a taxable capital gain or loss unless the tax authorities have granted deferral of taxation on these transactions, subject to conditions. This deferral regime is now codified as part of the French tax law so that a tax deferral applies.

The above measures will apply to mergers, de-mergers, contribution of assets, and spin-off operations completed on or after 1 January 2018.

Restricted deduction of foreign withholding tax (WHT) (article 14 of the 2017 Act)

French companies receiving a foreign tax credit for a WHT that were in a loss position were not able to offset this credit against a profit. Consequently, the expense corresponding to the tax paid abroad was deducted for French tax purposes.

While the French tax authorities challenged this position, the French Administrative Supreme Court ('*Conseil d'Etat*') ruled that companies could take a deduction if such deduction was not expressly forbidden by a tax treaty.

According to the new rule, regardless of the tax treaty, foreign WHTs are no longer deductible.

However, absent a tax treaty entered into with the country applying a WHT, or if the tax was withheld in breach of the relevant treaty provisions, it remains deductible for French tax purposes.

Reduction of the late payment interest rate (article 55 of the 2017 Act)

The interest rate applicable to late tax payments previously was 0.40% per month late (4.80% per year).

The 2017 Act reduces this rate to 0.20% per month late (2.40% per year) for interest due from 1 January 2018 through 31 December 2020.

France aligned transfer pricing documentation requirements with OECD Action 13

Large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of EUR 400 million) are required to provide documentation containing general information regarding the relevant group of companies.

For financial years beginning on or after 1 January 2018, these French entities would have to present to the French tax authorities transfer pricing documentation that is largely inspired by the OECD's recommendations, now published as the new Chapter V of the OECD's Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations.

The new legislation aligns with the list of information recommended by the OECD for the master file and the local file, and the following informational elements will now be required by law to be included in French transfer pricing documentation reports (non-exhaustive list):

- The group's organisational chart.
- A description of the supply chain of the five main goods and services offered by the group as well as any other goods and services amounting to more than 5% of the group's turnover.
- The intangible assets.
- The inter-company financial activities of the group and its main sources of external financing.
- The group's financial and tax positions.
- A description of the significant intra-group transactions and the conditions under which they were entered into.
- A reconciliation of the financial data used for transfer pricing purposes and the French entity's statutory accounts.

The penalty regime has not been modified, and companies that do not meet their transfer pricing documentation obligations expose themselves to a penalty that is the greater of:

- A minimum of EUR 10,000 for each fiscal year concerned.
- 5% of the taxable profits deemed to have been transferred for each fiscal year.
- 0.5% of the amount that represents non-documented transactions.

Taxes on corporate income

France levies CIT at a standard rate of 33.33%.

Pursuant to the action plan released by the French Prime Minister in September 2017, the French CIT rate cuts will apply over a five-year period as follows (for all companies with revenues exceeding EUR 7.3 million):

- For tax years beginning on or after 1 January 2018, the standard CIT rate for all companies is 28% on taxable income up to EUR 500,000, and 33.33% on taxable income exceeding that amount.
- For tax years beginning on or after 1 January 2019, the standard CIT rate for all companies will be 28% on taxable income up to EUR 500,000, and 31% on taxable income exceeding that amount.
- For tax years beginning on or after 1 January 2020, the standard CIT rate for all companies will be 28%.
- For tax years beginning on or after 1 January 2021, the standard CIT rate for all companies will be 26.5%.
- For tax years beginning on or after 1 January 2022, the standard CIT rate for all companies will be 25%.

A resident company is subject to CIT in France on its French-source income. In that respect, income attributable to foreign business activity (if there is no treaty in force between France and the relevant foreign country) or to a foreign PE (if a tax treaty applies) is excluded from the French tax basis.

A non-resident company is subject to CIT in France on income attributable to French business activity or to a French PE, as well as on income from real estate located in France.

Social contribution tax

Concerning large-size companies, a social contribution tax amounting to 3.3% is assessed on the CIT amount from which a EUR 763,000 allowance is withdrawn.

In addition, the Finance Bill for 2016 implemented an additional contribution due by the companies that are liable to the social contribution tax and whose turnover of the preceding year is equal to or exceeds EUR 1 billion.

This additional contribution is levied at a rate of 0.04% and is assessed on the estimated turnover of the year.

An instalment that amounts to 90% of the additional contribution must be paid and declared, at the latest, by 15 December of each year.

The additional contribution balance is paid each year at the same time as the social contribution tax, meaning 15 May of the year following the one during which the tax is due. The additional contribution paid during a year is deducted from the amount of the social contribution tax for the following year.

3% additional contribution on dividend distributions

Pursuant to the French government commitment made in September 2017 and several recent court decisions, the 3% tax on distributions is repealed entirely for payments made on or after 1 January 2018.

Patent box regime

Under certain conditions, income derived from the sale or license of patents or patentable inventions is taxed at a reduced CIT levied at the rate of 15%.

Capital gains

A reduced tax rate of 15% applies to certain capital gains. *See Capital gains in the Income determination section for more information*.

Local income taxes

No income tax is levied on income at the regional or local level.

Corporate residence

France is defined as metropolitan France (excluding the overseas territories [TOM], but including the continental shelf), Corsica, and the overseas departments (DOM, i.e. French Guyana, Guadeloupe, Martinique, Reunion).

As a general rule, a resident company is a company that is incorporated under French commercial laws.

Permanent establishment (PE)

The notion of PE is not defined by the FTC and has been specified by a case law of the French Administrative Supreme Court. The notion of PE refers to an enterprise exploited in France that can be materialised in one of the three following situations:

- Business activity conducted through an establishment (i.e. a fixed business installation operating with some degree of autonomy [e.g. a branch, sales office]).
- Business conducted in France by a dependent agent.
- Existence of a complete commercial cycle in France.

A ruling application can be submitted to the French tax authorities to get confirmation as to whether the presence in France of a foreign corporation is a PE.

Other taxes

Turnover taxes

Turnover taxes are assessed on goods sold and services rendered in France, and operate as a VAT. The normal rate is 20%. Sales of certain kinds of medicines and transports of persons are taxable at a 10% reduced rate. Food products, subscription to gas and electricity (under certain circumstances), sales of books, and products and services provided to disabled persons are taxable at a 5% reduced rate. Other specific sales and services are taxable at a 2.1% reduced rate. Exports and certain specific services invoiced to non-French residents are zero-rated.

Business-to-business (B2B) suppliers of services are generally taxable at the location of the customer and not at the location of the supplier. For business-to-consumer (B2C) suppliers of services, the place of taxation is generally where the supplier is established.

Turnover taxation applies only to taxable persons, partly taxable persons, and non-taxable legal persons that are registered for turnover taxes.

Specific turnover taxation rules apply to leases of transportation equipment; cultural, arts, and sports services; electronic and telecommunication services; and transportations of goods.

Customs duties

Depending on their country of origin, goods may be subject to customs duties. The rules are aligned with the EU customs regulations.

Under certain circumstances, the payment of the duties can be deferred depending on the terms and conditions of the warehousing arrangements.

Excise taxes

Some specific goods are subject to excise duties, notably:

- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Oil and gas products.

Real estate tax

All properties located in France are subject to a 3% real estate tax. The tax is assessed annually on the fair market value of the real estate, in proportion to the direct or indirect interest held. All entities in the chain of ownership are jointly liable for the payment of the tax.

Automatic exemptions apply in three situations. First, to entities whose French real estate assets represent less than 50% of their total French assets. Second, to entities listed on a regulated market whose shares, units, or rights are significantly traded on a regular basis. Third, to entities having their registered office in France, in an EU member state, or in a country that has concluded a DTT with France providing for an administrative assistance or a non-discrimination clause, where:

- their direct or indirect interest in the French real estate is less than either EUR 100,000 or 5% of the fair market value of the French real estate
- they are pension funds or public charities recognised as fulfilling a national interest whose activities justify the need to own French real estate, or
- they are non-listed French real estate funds (*société de placement à prépondérance immobilière à capital variable* [SPPICAV] or *fonds de placement immobilier* [FPI]) or foreign funds subject to equivalent regulations.

Where an automatic exemption does not apply, a claim may be submitted for conditional exemption.

Territorial economic contribution

The territorial economic contribution (*Contribution Economique Territoriale* or CET) is comprised of two different taxes: the companies' land contribution (*Cotisation Foncière des Entreprises* or CFE) and the companies' added value contribution (*Cotisation sur la valeur ajoutée des entreprises* or CVAE). Although they have a similar scope, the taxes are subject to very different rules.

The CFE tax is based on the rental value of assets that are subject to the real estate tax, excluding movable goods and equipment. For industrial plants, the taxable base is reduced by 30%. There is a specific rental value for each town and an upgrading ratio is set forth at the national level each year.

The CVAE is based on a company's added value. Only taxpayers that are not exempt from the CFE and whose turnover is greater than EUR 152,500 are subject to CVAE. However, tax relief equal to the amount of the tax is provided for companies whose turnover is below EUR 500,000. The tax rate for companies whose turnover ranges from EUR 500,000 to EUR 50 million is assessed according to a progressive scale, which ranges from 0% to 1.5%.

There is an upper ceiling on the added value that applies to the CET. As a consequence, tax relief applies and is equal to the excess of the sum of CFE and CVAE over 3% of the added value of the company.

Registration duties

Registrations duties mentioned hereafter are imposed on the purchaser. However, the seller may be liable for these duties in case of non-settlement by the purchaser.

Transfer of goodwill

The transfer of goodwill is subject to a registration duty at a rate of 3% on the part of the transfer price amounting from EUR 23,000 to EUR 200,000 and at a rate of 5% on the part exceeding EUR 200,000.

Transfers of shares

The transfer of shares is subject to registration duty at a rate of 0.1% with no cap. The transfer of listed shares recorded by a deed is subject to registration duty at a rate of 0.1%.

Several exemptions are added to the list of the transactions that are not subject to transfer duties:

- Transactions subject to the FTT.
- Repurchase by companies of their own shares intended to be sold to the subscribers of a company employee saving plan, with some exceptions.
- Transactions between companies in the same group within the meaning of Article L233-3 of the French Commercial Code.
- Transfer of ownership resulting from a merger, a contribution, or a spin-off made under the provisions of Article 210 A and 210 B of the FTC and acquisition shares of a company by its employees.

Transfer of interest or quotas in legal entities whose capital is not divided into shares

The transfer of interests or quotas in legal entities whose capital is not divided into shares (e.g. *Société à responsabilité limitée* [SARLs] or *Société en nom collectif* [SNCs], which are a form of private limited liability corporate entity) is subject to a registration duty of 3%.

Transfer of shares in non-quoted real estate companies

The transfer of shares in non-quoted companies whose assets consist principally of immovable property is subject to a registration duty of 5%. In case of disposal of shares held in real estate companies, the taxable basis for transfer tax purposes is equal to the fair market value of the real estate assets or rights reduced by the debt contracted for the acquisition of such assets or rights. Other kinds of debts are not taken into account to compute the taxable basis of the transfer tax.

Transfer of real estate

The sale of land and buildings is subject to registration duty at a rate of 5.09% on the transfer price, including expenses.

Exit tax rules in case of transfer of French head office or establishment

In the case of a transfer of assets outside France as part of a transfer of a head office or an establishment, unrealised gains are immediately taxable. However, in the case of a transfer to an EU member state or, under certain conditions, to an EEA member state, taxpayers are able to either pay the full amount of tax immediately or pay it over five years in five equal instalments.

Payroll tax

Companies that are not liable for VAT on at least 90% of their annual turnover are subject to payroll tax (*taxe sur les salaries*) regarding salaries paid during the following calendar year. Companies below the 90% trigger are liable for the payroll tax on the complement of their VAT recovery ratio, called the counter VAT recovery ratio.

The standard rate of the payroll tax is 4.25%, but increased rates apply to gross individual wages that exceed certain thresholds. Those increased rates are:

- 8.5% for wages ranging from EUR 7,799 to EUR 15,572.
- 13.6% for wages ranging from EUR 15,572 to EUR 152,279.

As a result of Brexit and to increase hiring of foreign executives by cutting the related tax costs, the 2018 Act eliminates the 20% increased rate for wages exceeding EUR 152,279 paid on or after 1 January 2018.

French social security contributions

The French social security system is composed of various schemes providing a wide range of benefits. This system includes social security basic coverage, unemployment benefits, compulsory complementary retirement plans, complementary death/disability coverage, and complementary health coverage.

The contributions are shared between employer and employee; on average the employer's share of contributions represents 45% of the gross salary. For 2018, the employee's share of French social contributions represents approximately 20% to 23% of the remuneration. However, since the contributions are assessed using various ceilings, the average rate will decrease as the gross salary increases.

Employers' contributions made to additional medical coverage schemes (which are mandatory and collective) are taxable.

Generally, for any employee who carries out a salaried activity in France, the employer withholds the employer's and employee's share of French social security charges.

Systemic risk tax

A bank tax known as a systemic risk tax has been implemented to prevent excessive risk behaviour by banks. This tax is payable by certain financial institutions (including credit institutions).

It should be noted that 'fund' entities (e.g. hedge funds or securitisation vehicles) are outside the scope of the tax.

French banks are subject to the bank tax on their worldwide business activities. The equity requirements that are used as the taxable basis for the calculation of the bank tax are calculated on a consolidated basis. Therefore, institutions that fall within the scope of the tax and that belong to a consolidated group are not subject to the tax on an individual basis. Where they are not part of such a group, institutions pay a contribution calculated on their individual position. The taxable basis is made up of the minimum equity required of the institution, as set out by the Prudential Control Authority to meet reserve ratio requirements in accordance with Basel II standards and specified during the previous calendar year.

The rate of the bank tax amounts to 0.25% of the taxable basis, and any amounts paid in that respect will be deductible for CIT purposes.

A tax return must be filed by 30 June every year, and the tax due must be settled at the same time.

Subject to the principle of reciprocity, it should be noted that taxpayers for which the registered office or the group parent company is located in a country that has enforced a similar tax on systemic risk can benefit from a tax credit. This tax credit can be used to settle the tax due or can be reimbursed.

Amending Finance Bill for 2014 gradually reduces the tax rate before its complete abolition in 2019. In addition, a new tax (in order to finance the support fund for local authorities who contract 'toxic loans'), whose characteristics are similar to systemic risk tax, entered into effect as of 1 January 2015.

This tax is not deductible from CIT.

Financial transaction tax (FTT)

FTT applies to acquisitions for consideration of equity securities or similar securities in the meaning of the French Monetary and Financial Code issued by certain French-listed companies (i.e. financial instruments giving access to capital or to voting rights in the company and securities issued under foreign law representing French-eligible securities). FTT applies regardless of whether the transaction is executed inside or outside of France.

The tax is due by the investment service provider (ISP) that has executed the purchase order or, when there is no ISP, by the custodian, irrespective of its place of establishment.

In most cases, the central securities depositary will be in charge of centralising the collection of the tax, the reporting to the French tax authorities, and the payment of the tax to the French Treasury.

The tax is computed based on the acquisition price of the shares.

The 2017 Act increased the FTT rate from 0.2% to 0.3% for acquisitions made on or after 1 January 2017.

Branch income

Tax rates on branch profits are the same as on corporate profits. As a principle, branch profits are deemed to be distributed to the head office. WHT is levied on French branches of non-resident, non-EU corporations at the rate of 30%, or a reduced tax treaty rate (e.g. for the United States [US], 5%), on net profits. Refund (limited or full) of tax may be claimed to the extent that the taxable amount exceeds the dividend(s) actually distributed by the foreign corporation during the 12 months following the close of the fiscal year concerned, or to the extent the dividends are distributed to residents of France.

Profits realised in France by non-resident corporations whose head offices are located in an EU country are not subject to branch WHT, provided that certain conditions are met (e.g. effective head office in an EU country or non-resident corporation subject to corporate taxation).

Income determination

Inventory valuation

Inventories must be valued at the lower of cost or market. Cost must be determined in accordance with the first in first out (FIFO) or the average-cost method. The last in first out (LIFO) method is prohibited.

Capital gains

Capital gains generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%, regardless of the duration of ownership of the assets sold.

However, a reduced rate of 15% is applied to capital gains on the disposal of patents or patentable inventions, as well as on income from the licensing of patents or patentable inventions. Capital losses on the disposal of patents or patentable inventions (either short-term losses or long-terms losses) are tax deductible at the standard rate of 33.33%.

Gains on the sale of shares in subsidiaries held for at least two years benefit from significant relief (88% of such capital gains are excluded from CIT, with the remaining 12% portion being taxed at the standard 33.33% rate). Long-term capital losses cannot be offset against future long-term capital gains.

The long-term capital gain regime applies notably to capital gains from the disposition of shares benefiting from the parent-subsidiary regime only if the seller holds at least 5% of the voting rights in the entity whose shares are being disposed. This provision applies to tax years beginning on or after 1 January 2017.

The long-term capital gain regime also applies to capital gains from the disposition of shares in an entity located in a 'non-cooperative state or territory' (NCST), as long as the entity can demonstrate that its activities are real and it does not seek to locate profits in the NCST.

Capital gains and losses on shares sold to a related company

Capital gains derived from the disposal of shares held in subsidiaries for less than two years are immediately taxable at the common rate of CIT.

Capital losses derived from such disposal are not immediately deductible. In such a case, the loss will be deducted if, before a period of two years (as from the date of acquisition by the purchaser):

- the vendor stops being subject to CIT
- the shares are, after a restructuring of the transferee company, held by a company that is not related to the vendor, or
- the shares stop being held by the related company (notably further to a new sale).

If no event mentioned above arises within a period of two years starting from the acquisition by the vendor, the capital loss that has not been immediately deducted is treated in accordance with the long-term regime (i.e. the capital loss is therefore not deductible).

Otherwise, the vendor has to join to its corporate tax return a specific form mentioning capital losses that are not immediately deducted.

Capital gains of non-residents

As a general rule, non-resident companies are not taxable in France regarding capital gains derived from the disposal of French assets unless these are part of a PE.

There are two main exceptions to this principle:

- Capital gains derived from the disposal of real estate assets located in France or derived from the disposal of French real estate, non-listed companies are subject in France to WHT at a 33.33% rate.
- Capital gains derived from the disposal of shares held in a French company subject to CIT are subject in France to WHT at a 45% rate in the specific case where the seller has owned, at any point in time during the five years preceding the sale, at least 25% of the rights in the profits of the French company, unless provided otherwise by the DTT applicable, if any.

Note that in the specific case where the non-resident company is located in an NCST, all capital gains derived from the disposal of French assets are subject to WHT in France at a specific rate of 75%.

Dividend income

Dividends generally are taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

For information on the taxation of inter-company dividends, see Participation-exemption regime in the Group taxation section.

Interest income

Interest income generally is taxable as ordinary income and subject to CIT at the standard rate of 33.33%.

Royalty income

A reduced tax rate of 15% applies to capital gains on proceeds from the:

- licensing (or sublicensing) of patents or patentable inventions, and manufacturing processes associated with such patents or patentable inventions (including improvements made to such patents), held for at least two years, subject to certain conditions, and
- sale of patents or patentable inventions, and manufacturing processes associated with such patents or patentable inventions, held for at least two years, subject to certain conditions.

In other cases, royalties are subject to CIT at standard rate of 33.33% (plus additional social contribution).

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches and foreign PEs. Other foreign income is not taxable until actually repatriated to French-resident corporations. As a result, undistributed income of foreign subsidiaries is not taxable. The only exception to the territoriality principle is provided by Article 209 B of the FTC, known as the Controlled Foreign Company (CFC) rules (*see the Group taxation section for more information*).

Deductions

Depreciation

The depreciation of fixed assets has to be carried out component by component. The components of a fixed asset have to be depreciated separately according to their own lifetime.

Declining-balance depreciation is allowed for certain new and renovated assets whose useful life is in excess of three years.

For assets bought or manufactured between 4 December 2008 and 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.75, if the useful life of the asset is three or four years
- 2.25, if the useful life of the asset is five or six years, or
- 2.75, if the useful life of the asset is more than six years.

For assets bought or manufactured after 31 December 2009, the rate is computed by multiplying the rate of straight-line depreciation by:

- 1.25, if the useful life of the asset is three or four years
- 1.75, if the useful life of the asset is five or six years, or
- 2.25, if the useful life of the asset is more than six years.

A temporary investment incentive measure was introduced by the Finance Bill for 2016, enabling companies to claim an additional deduction equal to 40% of the asset investment, provided the investment meets the following three conditions:

- Conditions of the fiscal special depreciation regime (i.e. a new asset having a minimum useful life of three years).
- Belonging to some limited categories defined by the government (industrial assets, such as plant machinery and equipment, manufacturing equipment, and research operations fittings).
- Investments made between 15 April 2015 and 14 April 2016.

The Finance Bill for 2017 extended this incentive measure to companies that invest under the following three conditions:

- The investment has been firmly decided before 15 April 2017.
- The investing company has paid, before 15 April 2017, an instalment that amounts to at least 10% of the total investment cost.
- The final acquisition of the investment occurs within a two-year period following the date of beginning of the purchase order.

Goodwill

Under current French tax rules, goodwill (e.g. *clientele*, trademarks) cannot be amortised.

Start-up expenses

No specific rules apply regarding deduction of start-up expenses, except the qualified expenses incurred in establishing the company (so called '*frais d'établissement*'), which can be either deducted or depreciated over five years.

Research and development (R&D) and software expenses

Concerning R&D and software expenses, a business may elect to immediately deduct costs incurred in R&D of software or to amortise their cost on a straight-line basis over a maximum period of five years.

The cost of acquiring software may be written off on a straight-line basis over 12 months.

The cost of patents acquired can be amortised over a five-year period.

Interest expenses

In principle, interest expenses are tax deductible.

Restriction of interest deduction

A test is applicable to the existing rules governing interest deductions for financing by a party that is directly or indirectly related to a French borrower.

Interest deductions are allowed only if the French borrower demonstrates that the lender is, for the current financial year, subject to a CIT on the interest that equals 25% or more of the CIT that would be due under French tax rules. When the lender is domiciled or established outside of France, the CIT determined under French law equals the tax liability that the lender would have owed on the interest had it been resident or domiciled in France.

Taxpayers must provide documentation to support the CIT calculation if requested by the French tax authorities.

'Carrez' rule

The '*Carrez*' rule is anti-abuse legislation preventing interest deductions in France relating to French or foreign participations acquired by a French entity but effectively managed outside France. In other words, decision-making, control, and influence are not effectively exercised by the acquiring French entity itself or by a company established in France that, directly or indirectly, controls the acquiring company under the meaning of the French Commercial Code, or by a company established in France that is directly controlled by the same company as the acquiring company under the same meaning.

The 2018 Act relaxes this restriction so that it complies with EU legislation with regard to a company established in France, but with its seat of management in another EU member state or in an EEA member state that has concluded a convention on administrative assistance on tax matters covering tax evasion and avoidance with France.

The new regime applies to tax years closed on or after 31 December 2017.

Additional limit on interest deductions

25% of the net finance expenses of a company subject to French CIT is not deductible. This limit applies in addition to existing limits. In a tax group, this limit applies to the consolidated tax result of the group. This is a permanent disallowance, as there is no mechanism to carry the disallowed interest forward to subsequent fiscal years. 'Net finance expense' is defined as the total amount of finance expense incurred as consideration for financing granted to the company, reduced by the finance income received by the company in consideration for financing granted.

Rents incurred as part of a rental agreement between related parties or a financial lease agreement also are included in finance expenses after the deduction for depreciation of the lessor. However, rents paid in relation to real estate rental agreements between related parties should be excluded. This limit applies to both related and third party financing, regardless of the purpose of the financing.

This limit does not apply if a company's annual net finance expense is lower than EUR 3 million. In a tax group, this applies if the net finance expense of the group is lower than EUR 3 million. Groups need to consider the impact of this provision on how tax is shared among the members of the tax group in the tax sharing agreement.

In addition, in a tax consolidated group, this limit does not apply to the portion of net finance expense resulting from financing transactions between members of a French tax unity.

Thin capitalisation

Please see comments regarding thin capitalisation in the Group taxation section.

Bad debt

Bad debts that are definitively non-recoverable are treated, from a tax point of view, as losses.

Under certain conditions, a tax-deductible reserve can be established for debts whose collection is uncertain.

Charitable donations

Charitable donations made by companies to certain foundations or societies are deductible at up to 60% of their amount (limited to EUR 5,000 of the turnover before taxes).

Fines and penalties

As a general principle, fines and penalties are not tax deductible for CIT purposes.

Taxes

Most taxes, including unrecoverable turnover taxes, registration duties, and CET, are deductible. The major exceptions are CIT and tax penalties.

CIT losses

Carryforward of tax losses

Tax losses carried forward are available to offset the first EUR 1 million of taxable profits and 50% of taxable profits in excess of this.

The carryforward is conditional to certain limitations, namely that the entity continues the same business activities. The FTC provides criteria for measuring such a change of activity that jeopardises the right to carry forward net operating losses. Under certain circumstances, a ruling can be obtained from the French tax authorities to keep all or part of the net operating losses despite a business reorganisation.

Carryback of tax losses

Tax losses are available for carryback to the fiscal year immediately preceding that in which the losses arise and up to a maximum of EUR 1 million. Any unused surplus will be carried forward and used as set out above. In addition, the election to carry back tax losses must be filed prior to the deadline for submission of the tax return for the loss-making period.

Tax groups

The overall tax losses of a French tax group, as well as pre-election tax losses of the individual members of the group, will be attributed, whether carried forward or carried back, in the same manner and within the same limits as those set out above.

Payments to foreign-related parties

Payments to foreign affiliates are allowed, as long as they meet the arm's-length test. If they do not, Article 57 of the FTC provides that income directly or indirectly transferred to the foreign-related parties, through either the increase or the reduction of the purchase or sales price of goods and services, or through any other means, must be added back to taxable income. For the purpose of this provision, foreign-related parties are defined as a parent, subsidiaries, or sister companies.

Where the payments are made to companies located in a country with a privileged tax regime, the French taxpayer must prove, in addition, that the transaction is *bona fide* and that the amount due is not exaggerated (*see the Group taxation section for more information on countries with a privileged tax regime*).

Royalties

Article 11 of the Finance Act for 2012 restricts the conditions for deducting licensing royalties where the licensor and the licensee are related parties. A full deduction for the royalty expense may only be allowed if the licensee can demonstrate, and properly document, that:

- the use of the licence results in added value for the licensee over the entire licensing period, and
- such use is real (i.e. does not consist of an artificial scheme).

Group taxation

Tax consolidation regime

French corporations and their 95% owned domestic subsidiaries may elect to file one single tax return, thus allowing the offset of losses of one group corporation against the profits of a related corporation. CIT is then levied on the aggregate income after certain adjustments for intra-group provisions (e.g. debt waivers, dividend distributions) have been made.

When shares in a company that will be integrated into the group are acquired by a group company from individuals or legal entities that control this group, either directly or indirectly, a portion of the group's overall financial expense incurred by the members of the group is progressively added back to the group's taxable income on a straight-line basis over a nine-year period.

A French subsidiary can be included in a tax consolidated group even if its parent company is not located in France. However, at least 95% of the share capital of the foreign company must be held, directly or indirectly, by the French company that is head of the tax consolidated group. In addition, the foreign company must be subject to CIT, be located in the European Union or in a member state of the European Economic Area whose tax treaty with France includes a mutual administrative assistance clause to fight tax fraud and tax evasion, and hold 95% of the lower-tier subsidiary's shares.

Amending Finance Bill for 2014 adds the opportunity for the companies subject to CIT to adopt horizontal tax consolidation. The creation of a horizontal tax consolidation between French companies' subsidiaries of the same parent located in an EU member state, or Iceland, Norway, and Liechtenstein, and subject to a tax equivalent to CIT ('non-resident parent entity') is now permitted, allowing one of its subsidiaries (called 'parent company') to be solely liable for CIT. This regime applies, optionally, for fiscal years beginning on or after 1 January 2015.

A PE of a foreign company subject to French CIT can be a member of a French tax consolidated group if the shares of the foreign company are held by other French companies, which are members of the consolidated group.

Provisions on the tax neutrality of intra-group transaction flows (e.g. dividends, amortisation, waivers of debts, interest, and capital gains/losses on the sales of shares) have been modified to treat tax consolidated groups with an intermediate foreign company the same as other tax consolidated groups. Dividends distributed within a tax consolidated group under the parent-subsidiary regime are exempt up to 99%, and the remaining 1% may not be neutralised.

Allocation of the tax charge within a tax consolidated group

In an important decision dated 12 March 2010 ('Wolseley Centers France'), the French Supreme Court disagreed with the French tax authorities by ruling that the tax charge of the group can be freely allocated between members of the consolidated tax group.

Following this decision, group companies are free to enter into a tax consolidation agreement stating the conditions for the allocation of the group tax charge or, where applicable, the tax savings arising from the group arrangement.

The Supreme Court concludes that since the terms of an agreement to allow a re-allocation take into account the specific results of each of the group companies, the terms of this re-allocation cannot be regarded as an indirect subsidy. However, this allocation should neither undermine the corporate benefit of each group member nor the minority shareholders rights; otherwise, this will result in an abnormal act of management.

Underpriced sale of asset between two entities of a same tax consolidated group

In a decision dated 10 November 2010 ('Société Corbfi'), the French Supreme Court specified that an underpriced sale of an asset between two members of the same tax group must be neutralised at the group level only after the computation of the entities results on a standalone basis.

First, on a standalone basis, the seller has to add back the advantage given to the buyer (i.e. the difference between the fair market value and the amount paid) and the buyer adds back this advantage as if it was a dividend. Second, when reprocessing the different entities results, the advantage added back by the buyer has to be neutralised at the group level.

Participation-exemption regime

French parent companies (i.e. companies incorporated in France and holding qualifying shares that represent at least 5% of the issued capital of subsidiaries, French or foreign) have the option of excluding 95% of the subsidiaries' net dividends from CIT (5% of charges and expenses must be added back to the parent company's taxable results). The French parent-subsidiary regime extends to certain shares without voting rights. There is no formal commitment to have held the shares for at least two years, and companies can benefit from this regime from the acquisition date of the shares. However, the obligation remains to hold the shares over this two-year period. Certain shares of listed real estate companies are not eligible to the French parent-subsidiary regime.

The taxation of dividends received by a parent company from its subsidiary cannot be capped at the amount of the expenses actually incurred by the parent company. Thus, the tax liability will be equal to 5% of the dividends received, tax credits included.

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

In principle, the subsidiary's shares must be kept by the parent company for at least two years in order to benefit from the participation-exemption regime. However, some operations lead to a break of the two-year holding period. In that case, the exchanged shares are deemed withheld until the sale of the securities received in exchange.

The exchanged shares will be deemed kept for the application of the participation-exemption regime only if the gain or loss is not taken into account in the result of that exchange. If the gain or loss is included in the result, the dividends received may not benefit from the participation-exemption regime and will be taxed.

In addition to the above, the 2016 Act repealed the exclusion from the benefit of the parent-subsidiary regime for the dividends received on shares with no voting rights.

Accordingly, the parent-subsidiary regime applies to dividends received on shares with no voting rights, retroactive to 3 February 2016.

In case of tax consolidated group

There is a 99% exemption on dividends received by a member of a tax group from:

- another member of the same group or
- a company:
  - subject to a tax equivalent to French CIT in another member state, or in an EEA member state that has concluded an administrative assistance agreement with France to fight against tax fraud and tax evasion, and
  - that fulfils the conditions to participate in a French tax consolidated group if it is established in France (other than being subject to CIT in France).

All other qualifying dividends remain 95% exempt (e.g. dividends from French subsidiaries that are not part of a consolidated group, dividends received from a foreign subsidiary if the French parent is not a member of the French consolidated group).

Distribution followed by absorption or sale of subsidiary

The FTC prevents the possibility for a company to accumulate the exemption of dividends received from its subsidiaries (under the participation-exemption regime or the tax consolidation regime) and the deduction of a loss in value resulting from the dividends' distribution due to previous distributions at the time of the securities exchange or sale of shares.

Transfer pricing

Light but annual transfer pricing documentation is to be provided within six months from CIT filing, reporting all intra-group flows in excess of EUR 100,000 and any change in the transfer pricing policy compared to the previous period.

Upon tax audit, companies whose gross assets exceed EUR 400 million, have a turnover that exceeds a specific threshold (EUR 152.4 million or EUR 76.2 million, depending on the activity of the company), or that are part of a group that meet those criteria, and assuming they have management accounts or consolidated accounts, have to provide the French tax administration with analytical and consolidated accounts.

Identically, rulings granted by foreign tax authorities have to be part of the transfer pricing documentation.

It is not possible to defer the collection of CIT reassessed when a mutual agreement procedure is launched.

Transfer pricing documentation

Large corporations located in France (i.e. with annual turnover or amount of gross assets in excess of EUR 400 million) are required to provide documentation containing general information regarding the relevant group of companies, including main activities, operational and legal structures of the related companies, functions performed and risks borne, main intangible assets, and group transfer pricing policy, amongst others.

Advanced pricing agreements (APAs)

APAs are available for taxpayers only on the basis of international agreements entered into in accordance with Article 25 of the OECD Model Tax Convention. Currently, taxpayers are also allowed to enter into APAs with the French tax authorities on a unilateral basis. In practice, taxpayers are entitled to submit their transfer pricing policy to the French tax authorities. Agreement of the tax authorities to the APA precludes a later challenge as long as facts and circumstances described in the APA and actual ones are identical.

Light French transfer pricing annual reporting obligation

All French entities with turnover or gross assets on the balance sheet exceeding EUR 50 million, or with more than 50% direct or indirect shareholder or subsidiary interest meeting this threshold, are also subject to the light but annual French transfer pricing documentation requirements.

French companies subject to these transfer pricing obligations must file Form 2257 no later than six months after the deadline to file the annual CIT return with the tax authorities.

Form 2257 discloses general information related to the consolidated group (i.e. activities performed, group transfer pricing policy, country of location of intangibles, etc.). The form also includes specific information on the French entity (i.e. aggregated amounts of inter-company transactions exceeding EUR 100,000, main transfer pricing method used for each kind of transaction, etc.).

The 2016 Finance Act introduced two main changes:

- Electronic filing of Form 2257.
- If the relevant French entities are members of a French fiscal unity (consolidated group), Form 2257 must be filed by the head company of the French fiscal unity on behalf of the entire consolidated tax group.

Country-by-country (CbC) reporting

To align with recommendations of the OECD and the G20 BEPS Initiative (Action 13), France has introduced CbC reporting for multinational corporations, applicable to tax years beginning on or after 1 January 2016. The annual obligation requires multinational corporations to file with the French tax authorities anytime within the 12 months following their fiscal year-end a CbC report disclosing information regarding the name, activities, and profits of foreign entities in the same group.

Multinational corporations filed their first CbC report sometime in 2017. As an example, for fiscal years opened on 1 January 2017, the filing must be made no later than 31 December 2018.

French entities are subject to the CbC reporting requirement if they:

- establish consolidated accounts
- directly or indirectly hold or control one or several legal entities established abroad, or have foreign branches
- generate annual consolidated group revenue of at least EUR 750 million, and
- are not held by one or several legal entities established in France already subject to the French CbC reporting requirement, or by legal entities established abroad that are subject to similar CbC reporting requirements pursuant to foreign legislation.

The French government will publish a list of states or territories that have implemented a similar CbC reporting requirement, have concluded an automatic exchange of information agreement with France, and comply with this agreement.

An entity established in France is also subject to the French CbC reporting requirement when that French entity is held, directly or indirectly, by a legal entity established in a foreign state or territory that would have been subject to the CbC reporting requirement if established in France when:

- the French entity is designated by the consolidated group to perform the CbC reporting obligation for that group, and the French tax authorities have been informed of that designation, or
- the French entity is not able to demonstrate that any other entity of the group, either established in France or in a listed state or territory, has been designated to perform the CbC reporting for the group.

Failure to provide the French tax authorities with complete CbC reporting will result in a penalty of up to EUR 100,000.

Thin capitalisation

Under current rules, the tax deduction of interest paid by a French company to its foreign controlling shareholders is subject to the following three restrictions:

Interest rate limitation

Under the amended Article 212 of the FTC, tax deduction of interest paid to related parties is limited to the higher of (i) the average annual interest rate applied by credit institutions to companies for medium-term variable rate loans or (ii) the interest that the borrowing company could have obtained from independent banks under similar circumstances. This rate is 1.67% for financial years ending on 31 December 2017. Having passed this interest rate test, French-indebted companies have to pass a second test, the debt ratio.

Debt ratio

That part of interest paid to related parties that is deductible under the rate limitation test is disqualified if it exceeds all of the three following limitations during the same financial year:

- Interest relating to financing of any kind granted by related parties, within the limit of 1.5 times the net equity of the borrower.
- 25% of adjusted net income before tax (‘*résultat courant avant impôt*’, defined as the operating income, increased by certain items).
- Interest income received from related parties (i.e. there is no limitation on thin capitalisation grounds when the borrowing company is in a net lending position vis-a-vis related entities).

The portion of the interest that exceeds the three above limits is not deductible, except if it is lower than EUR 150,000.

Carryforward of excess interest

That part of the interest that is not deductible immediately by the borrowing company can be carried forward, without time limit, for relief in subsequent years, provided there is an excess capacity during such years. The amount in excess is, however, reduced by 5% each year, from the second financial year following the financial year in which the interest expense has been incurred.

Exceptions

The thin capitalisation rules do not apply to interest payable by banks and credit institutions, and also to certain specific situations, such as interest in connection with intra-group cash pools or with certain financial lease operations.

The thin capitalisation rules do not apply if the French-indebted company can demonstrate that the debt-to-equity ratio of the worldwide group to which it belongs exceeds its own debt-to-equity ratio.

Deductibility is also facilitated within a French tax consolidated group. The thin capitalisation rules apply to each company member of the group taken on a stand-alone basis. Any excess interest incurred by such company is, however, not carried forward by it. Instead, it is appropriated at the group level.

Extension of the thin capitalisation mechanism to loans granted by related parties

In the specific case where the repayment of a loan granted by a third party (including banks) is guaranteed by a related party or by a third party whose commitment is itself secured by a related one, then the proportion of interest that is payable on that part of the loan that is secured in this way is potentially subject to thin capitalisation rules.

The provisions will not apply where the loan:

- takes the form of a bond issued by way of a public offering or under equivalent foreign regulations, although this excludes private placements
- is guaranteed by a related party solely by way of a pledge of shares in the debtor, security over the debtor's receivables, or shares in a company directly or indirectly owning the debtor so long as the holder of such shares and the debtor are members of the same tax group; as a result, this exception will not apply where a foreign company grants a pledge of shares in its French subsidiary to guarantee the bank loan granted to it
- is obtained in the context of a refinancing to allow the debtor to complete the mandatory repayment of a pre-existing debt, which is required as a result of a direct or indirect takeover of the debtor (allowed up to the amount of the loan principal repaid and accrued interest to that date), or
- has been obtained prior to 1 January 2011 in connection with an acquisition of securities or the refinancing of such acquisition debt.

Controlled foreign companies (CFCs)

The CFC rules provide that:

- French corporations are required to include in their taxable income profits made by their more than 50% owned foreign subsidiaries and branches. The 50% holding is determined by direct and indirect control of shares and voting rights.
- The minimum holding threshold has to be reduced to 5% if over 50% of the share capital of the foreign entity is indirectly held through French or foreign companies controlled by the French parent company. However, if the shares in the foreign entity are listed on a regulated market, the French tax authorities will have to demonstrate that the French parent company, together with other entities holding shares in such foreign entity, is acting in concert.
- The CFC rules are only applicable if the foreign legal entity or PE in which the French company owns the requisite percentage of shares is in a country with a privileged tax regime. A privileged tax regime is defined by the FTC as a tax regime in which a foreign jurisdiction subjects taxable income of a foreign entity to at least 50% or lower of the income tax liability that would have been incurred in France, had the activity of the foreign entity been performed in France.
- Profits of the foreign entity that fall under the CFC rules are no longer taxed separately. They are now aggregated with the other taxable profits of the French parent company. Consequently, any tax losses incurred by the French parent company may be offset against the foreign entity's profits.
- The French parent company can avoid the application of the CFC rules if it demonstrates that the foreign entity carries an effective trading or manufacturing activity, conducted from its country of establishment or registered office. Furthermore, the CFC rules, in principle, are not applicable with respect of foreign branches or subsidiaries located in another EU country. However, this exception is not applicable if the French tax authorities can demonstrate that the foreign

entity located in another EU country constitutes an artificial arrangement, set up to circumvent French tax legislation. This concept is similar to the 'abuse of law' concept, although it does not have all the same characteristics.

Tax credits and incentives

Foreign tax credit

Under DTTs signed by France, several methods have been established to avoid double taxation. The main one is the traditional deduction of a tax credit from tax effectively paid. However, some treaties establish a tax exemption or the exclusive right to tax. Also, a tax-sparing clause is included in some treaties, which allows for the deduction of not only the tax actually paid but a higher amount of tax.

Tax credit to boost competitiveness and employment

To improve the competitiveness of the French economy and reduce employment costs, France has a tax credit that is available to French and foreign enterprises subject to CIT in France.

Partnerships will pass their tax credit through to their partners, provided the partners are subject to French tax.

There are no requirements regarding the nature of the activity carried out in France.

The tax credit is calculated as a percentage of the wages paid during the calendar year to employees receiving less than 2.5 times the French regulated minimum wage (SMIC).

The current gross monthly SMIC is EUR 1,498.47. For wages paid on or after 1 January 2018, the 2018 Act reduces the CICE tax credit rate from 7% to 6%.

For wages paid on or after 1 January 2019, the CICE tax credit is repealed and replaced by a permanent decrease in payroll charges paid by employers to finance the French social security system.

The tax credit can be offset against the CIT liability payable by the taxpayer with respect to the calendar year during which the wages are paid. Any excess credit can be carried forward and offset against the tax liability of the taxpayer during the next three years.

Credits unused after three years will be refunded to the taxpayer. The 'receivable' (unused credits) can be transferred or sold only to credit institutions. Finally, special provisions apply in the case of mergers and assimilated restructuring operations.

R&D tax credit

The R&D tax credit is determined on the basis of the eligible R&D expenses incurred during the calendar year.

Currently, the R&D credit equals 30% of the R&D eligible expenses incurred during the year, up to EUR 100 million in eligible R&D expenses, and 5% beyond this amount.

The FTC classifies eligible technical and scientific research operations in three areas: fundamental research, applied research, and experimental development.

The eligible expenditures include the following:

- Tax deductible depreciation expenses relating to fixed assets, created or acquired newly, assigned to eligible R&D works/projects, including patents acquired.
- Costs relating to staff qualifying as scientists and/or engineers (staff costs relating to 'young graduate doctors' are retained at up to 200% during the 24 months following their hiring by the company).
- Expenses resulting from outsourced R&D works/projects.
- Expenses incurred for patent registration and/or in connection with the defence of patents.
- Expenses relating to the monitoring of technical developments.
- Premiums paid in connection with insurance contracts relating to the legal defence of patents.

Salaries for research staff are fully taken into account. Operating costs are taken into account by retaining 50% of the R&D staff costs plus 75% of the depreciation on the assets allocated to the research.

Research expenditure sub-contracted to public research bodies, private research organisations approved by the minister with responsibility for research, or scientific/technical experts who have been approved under the same conditions are fully taken into account. The expenditure incurred must be for the purpose of carrying out genuine, clearly-specified R&D projects. If the company and the research body are unrelated, expenditure sub-contracted to public research bodies shall count for double of their amount.

Also, spending on outsourcing to private research organisations is included in the limit of three times the total amount of other research expenses qualifying for the tax credit.

The total amount of expenditure sub-contracted is capped at EUR 10 million (or EUR 12 million depending on the status of sub-contractors) in cases where sub-contractors are unrelated and to EUR 2 million in the contrary case.

The use of patented or patentable technologies in manufacturing

Companies that are involved in the manufacturing of products in France containing patented or patentable technologies, or companies that incorporate such technologies into goods that are manufactured in France, benefit from a reduced effective rate of tax.

In the case of a licensing arrangement between connected French companies, the licensor will benefit from a reduced 15% tax rate on royalty income, whereas the licensee company will benefit from a tax deduction at 33.33%.

In order for a licensee company to benefit from full deductibility for royalties paid, the rules require that the licensee company 'effectively exploits' the rights available to it.

Inbound investment incentives

No particular incentives are available to foreign investors in France. However, the government offers a comprehensive programme of tax incentives and development subsidies to encourage investment in underdeveloped areas.

Capital investment is encouraged through the declining-balance method of depreciation as well as through exceptional depreciation for certain capital expenditures.

Withholding taxes

Payments to resident corporations and individuals are not subject to WHT.

Payments to non-resident corporations and individuals are subject to WHT, as shown below.

In a decision given on 9 November 2015, the French Administrative Supreme Court ruled that a person who is exempt from tax in a contracting state by reason of one's status or activity cannot be considered liable to taxation and, consequently, is not a resident of the contracting state under the DTT if the treaty defines a 'resident' as a person who is liable to tax in a contracting state.

Explanation of columns

Column 2: Individuals and companies not qualifying as parents are subject to the WHT rates for dividends as indicated in this column.

Columns 3 and 4: Column 3 indicates the WHT rate for dividends paid to a foreign 'parent' company. To be considered as a parent company, the foreign company must hold a specified percentage of the French company's share capital or voting rights. These minimum percentages range from 0% to 50%, as indicated in Column 4, and certain other conditions must be met (*see each treaty*). If no percentage is indicated, either no minimum shareholding is required or the tax treaty does not reduce the WHT rate of 30%.

No WHT is levied on dividends paid by a French company to an EU parent or to a parent company of Iceland, Liechtenstein, or Norway that is subject to CIT, provided all the following conditions are met:

- The parent company has held a minimum percentage of the share capital of the distributing company, directly and continuously, for at least two years. As of 1 January 2009, the participation required is 10%.
- The parent company is the effective beneficiary of the dividends.
- The parent company has its effective seat of management in an EU state and is not deemed to be domiciled outside the European Union under an applicable tax treaty.
- The parent company is one of the legal forms enumerated by the relevant Directive.
- The parent company is subject to CIT in the member state where it has its effective seat of management.
- There is an anti-avoidance rule.

Column 5: The tax mechanism has been changed so as to exempt the interest from WHT in France except where the interest is paid to an entity established in a non-cooperative state or territory (WHT at a rate of 75% applicable). The payer can, however, be exempt if one proves that the main purpose and effect of such a payment is not to take advantage of locating the income in such a jurisdiction.

These provisions apply to income paid as of 1 March 2010. A special provision applies to loans entered into outside of France by French companies and some investments funds prior to this date. Interest paid on these loans and on related loans after 1 March 2010 will continue to be exempt.

Column 6: There is no requirement to withhold income tax on royalties paid to EU companies if all the following conditions are met:

- The taxpayer is a French-resident company or a French PE of a company resident in another EU member state.
- The recipient of the income is an EU-resident company.
- The taxpayer and the recipient are at least 25% associates, which means that either one directly holds 25% or more of the share capital or voting rights in the other, or a third party directly holds 25% or more of the capital or voting rights in them both.

Column 7: WHT is automatically imposed on after-tax profits of a PE unless certain conditions are met. The rate is 25% or the reduced tax treaty rate.

Notes

1. *See explanation of Columns 3 and 4.*
2. Exceptions where the dividends are excluded from the taxable income of the company that has received the dividends.
3. A rate of 15% is applicable for dividends distributed by certain companies.
4. The 1929-type Luxembourg holding companies are not entitled to any of the benefits of the France-Luxembourg tax treaty.
5. A 25% rate applies if dividends are not included in the income taxed to either corporate or income tax.
6. No WHT applies if dividends are taxable in Morocco.
7. The 5% rate applies to dividends when three conditions are fulfilled, as follows: (1) the effective recipient of the dividends must have invested at least EUR 76,224.51 in the company that pays these dividends; (2) the recipient must be a company liable for CIT; and (3) the latter company must be exempt from CIT. The rate is 10% when only condition (1) or conditions (2 and 3) are fulfilled. In all other cases, the rate is 15%.
8. An addendum signed on 22 July 1997 modifies the provisions of the French-Swiss tax treaty relating to dividends, interest, and royalties, and provides for the removal of the 5% WHT on profits realised by French PE of Swiss resident companies.
9. The rate indicated applies to Swiss resident companies controlled by Swiss residents.
10. The rate indicated applies to Swiss resident companies that are controlled by non-Swiss residents (non-UE) (Article 11.2.b ii) and meet the conditions of Article 14 of the tax treaty. In the case of column 3, the 15% rate applies to these companies, provided both the recipient and the distributing company are not quoted on a stock exchange. If these conditions are not met, the tax exemption applies.
11. The rate indicated applies to Swiss resident companies controlled by non-Swiss residents but not complying with Article 14 of the tax treaty.
12. The 5% rate applies to gross dividends if the effective recipient is a Ukrainian company that holds, directly or indirectly, at least 10% of the French company's capital. The rate is 0% if the participation exceeds 50% and EUR 762,245. It is 15% in all other cases.
13. Non-treaty recipients of royalties and management fees are subject to a 33.33% withholding rate. Where a treaty exists, management fees are exempt from WHT unless they are included in the definition of royalties subject to WHT.
14. In France, the WHT is levied on a provisional basis at 25% of the net profit. This amount is reduced to the extent it exceeds the dividends actually paid by the company during the previous 12 months, and the amount of dividends paid to residents of France. Consequently, if the foreign head office undertakes not to distribute dividends in a given year, the after-tax profits of its French branch are not subject to WHT, even when they are transferred abroad.
15. WHT on interest on loans with a contract is 0%, while withholding on other interest is in a range from 15% to 50%. For treaty rates, consult the individual entry in the table.
16. The WHT rate can be 60% for certain securities if the investor's identity is not disclosed.
17. The WHT is levied on the following amount: French net profit divided by the total foreign company net profit, multiplied by the amount of the distribution.
18. The rate of 10% is applicable on royalties for the use of literary, artistic, or scientific works, including films; 25% on royalties for the use of trademarks; and 15% otherwise.
19. No WHT is applicable on a royalty arising from the use of or the right to use literary, artistic, or scientific works (excluding film).
20. WHT is reduced to 6% for royalties paid for the lease of industrial, commercial, or scientific equipment.
21. A rate of 5% (Cyprus) and 10% (Israel) is applicable on royalties paid for the use or the right of the use of films.
22. Profits realised in France by foreign corporations whose head offices are located in a European country are not subject to WHT if certain conditions concerning the foreign corporation are met (effective head office in a European country; foreign corporation subject to corporate taxation).
23. No WHT is applicable on a royalty arising from the use or the right to use literary, artistic, or scientific works.

24. No WHT is levied on certain royalties paid in the field of audio visual techniques.
25. The rate of 15% is applicable on royalties paid for the use of industrial property and trademarks.
26. A rate of 33.33% is applicable on royalties paid for the use of or the right to use films.
27. The rate of 5% is applicable on royalties paid for the use of literary, artistic, or scientific works, excluding films.
28. The rate of 33.33% is applicable on royalties paid for the use of literary and artistic works, including films, and for information concerning commercial experience.
29. No WHT is levied on royalties paid for the use of or the right to use literary or artistic works, excluding films and recordings.
30. No WHT is levied on royalties paid for the use of or the right to use copyrights or films.
31. No WHT is levied on royalties paid for the use of or the right to use industrial, commercial, or scientific equipment.
32. The rate of 20% is applicable on royalties paid for the use of trademarks, 15% for the use of industrial property, and 5% for the use of literary, artistic, or scientific works.
33. The rate of 5% is applicable on royalties for the use of literary, artistic, or scientific works, not including films.
34. The rate of 5% is applicable on royalties for the use or the right to use industrial, commercial, or scientific equipment.
35. The reduced rate is applicable if the beneficial owner is a company (other than a partnership).
36. Voting shares solely.
37. French domestic law decreases the WHT rate from 30% to 21% concerning individuals who are resident in another EU member state, in Iceland, and in Norway.
38. *See explanation of Column 6.*

WHT on French-source dividends

The EU WHT exemption extends to dividends paid by foreign companies whose effective place of management is in an EEA member state that has concluded an administrative assistance agreement with France (including Iceland, Liechtenstein, and Norway).

Shares held in bare ownership are taken into account for the computation of the 10% percentage in the distributing entity's capital in order to benefit from the WHT exemption. The ownership percentage required to benefit from the WHT exemption may be reduced from 10% to 5% if the beneficial owner of the dividends (EU or EEA) cannot offset the French domestic WHT in its home country.

The WHT exemption also applies if dividends are paid to a parent company based in the European Union or in a third country that has concluded an administrative assistance agreement with France that is in a tax loss position and is declared bankrupt or is in a similar situation.

Dividends received by a French parent from qualifying holdings

Shares held in bare ownership are taken into account for the computation of the 5% percentage in the subsidiary's capital in order to benefit from the participation-exemption regime.

Participation exemption is available for distributions received from entities established in NCSTs, provided the parent company demonstrates that these operations are not designed for, or do not result in, locating profits in such NCST for tax fraud purposes.

There is an exclusion of certain dividend distributions (e.g. distributions made by *société d'investissement immobilière* côtée [SIIC], *société immobilières pour le commerce et l'industrie* [SICOMI], *société de placement à prépondérance immobilière à capital variable* [SPPICAV], etc.) from the participation-exemption regime.

Anti-avoidance rules applicable to Non-Cooperative States or Territories (NCSTs)

The French parent-subsidiary regime is not applicable to dividends paid from entities located in an NCST.

WHT on passive income is 75% for transactions with an NCST person or entity.

For French tax purposes, a state or territory is considered non-cooperative if it meets all of the following criteria:

- It is not a member of the European Community.
- It has been reviewed and monitored by the OECD Global Forum on Transparency and Exchange of Information.
- It has not concluded at least 12 administrative assistance agreements/treaties that allow a complete exchange of information for tax purposes.
- It has not concluded an administrative assistance agreement/treaty with France.

Payments (e.g. interests, royalties, payments for services) made to an NCST person or entity are, as a general rule, not tax deductible. In addition, it is not possible to offset WHT in France with any foreign WHT borne by the entity located in an NCST.

Moreover, concerning shareholders (individuals and companies) located in an NCST, a tax amounting to 75% is levied on capital gains derived from the disposal of shares in French companies, whatever the level of shareholding.

In 2018, the list of NCSTs includes Botswana, Nauru, Brunei, Niue, Guatemala, Panama, and Marshall Islands.

General Anti-Abuse Rule (GAAR)

A GAAR provided by the EU Directive is implemented in French law and applies to the:

- Parent-subsidiary regime.
- French WHT exemption.

The French GAAR provides that the benefit of these regimes cannot be claimed:

- if the distributions result from a scheme or series of schemes put in place to obtain, as a main objective or as one of the main objectives, a tax benefit that is contrary to the purpose of the parent-subsidiary regime, and
- that is not genuine based on the applicable facts and circumstances.

According to parliamentary works, this GAAR aims to exclude from the exemption holding companies with a sole purpose of holding shares.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies are allowed to have taxable periods longer than 12 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

Tax returns

Regarding fiscal years that end on 31 December, CIT returns are due by the end of April of the following year.

Accounting records to be provided in 'computerised format' in case of tax audit

Companies are required to keep their accounting records in computerised form and to provide them to the tax authorities in the same format. Such electronic files must be provided for fiscal year 2015 and following years when audited in fiscal year 2018.

Payment of tax

Payment of tax is made during the fiscal year by way of four instalments totalling 33.33% of the taxable income of the preceding year (i.e. by 15 March, 15 June, 15 September, and 15 December for fiscal years that end on 31 December). Regarding fiscal years that end on 31 December, final CIT payment is due on 15 April of the following year.

Currently, for companies that have gross income in excess of EUR 500 million, the last down-payment is assessed on the basis of the estimated taxable income of the present year (in case of significant increase of the taxable profits in comparison with the previous fiscal year). This leads to an anticipated payment of CIT.

For tax years beginning on or after 1 January 2017, companies with revenues exceeding EUR 250 million in the previous tax year must compute their fourth CIT instalment payment as follows:

Total of the four instalment payments	Conditions
80% of the CIT due on the projected profits	EUR 250 million ≤ Revenues ≤ EUR 1 billion
90% of the CIT due on projected profits	EUR 1 billion < Revenues ≤ EUR 5 billion
98% of the CIT due on projected profits	Revenues > EUR 5 billion

For example, the last instalment payment will be due on 15 December 2018 for tax years ending on 31 December 2018.

Interest and penalties

Regarding CIT, VAT, registration duties, and business tax:

- late payment is subject to late interest computed at a rate of 0.4% per month late (4.80% per year) (the 2017 Act reduces this rate to 0.20% per month late [2.40% per year] for interest due from 1 January 2018 through 31 December 2020) and to a 5% penalty, and
- late filing is subject to late interest computed at a rate of 0.4% per month late (4.80% per year) (the 2017 Act reduces this rate to 0.20% per month late [2.40% per year] for interest due from 1 January 2018 through 31 December 2020) and to a 10% penalty.

Moreover, a penalty of 40% applies in case of bad faith and is increased to 80% in case of fraud.

Tax audit process

The French tax authorities are responsible for verifying that taxpayers' obligations are correctly complied with and, if necessary, for making adjustments by issuing tax assessments.

Once an assessment is notified by the tax inspector and if the taxpayer disagrees with such an assessment, the taxpayer has 30 days to answer (with a possible 30 days extension upon request) and to provide comments to the French tax authorities.

Following an exchange of written correspondences between the tax inspector and the taxpayer (including hierarchical recourse), either party may submit any disagreement on a factual issue to the departmental or national tax commission. The decision of this commission is neither binding on the taxpayer nor on the French tax authorities.

In cases where the disagreement between the French tax authorities and the taxpayer still remains, the taxpayer can file a claim with the French civil courts or with the French administrative courts, depending on the type of tax that has been subject to assessment by the tax inspector.

Statute of limitation

Regarding CIT, the general statute of limitation expires at the end of the third year following the one that has triggered the tax liability.

Under certain circumstances, the statute of limitation can be extended (e.g. fraud, undisclosed/hidden activity); the statute of limitation can also be interrupted (e.g. notification of a notice of reassessment).

Topics of focus for tax authorities

Transfer pricing, business reorganisation, financing arrangements, and VAT are standard elements reviewed during tax audit.

The ruling system

To secure the tax status of a situation, foreign companies and individuals can request a private ruling from the French tax authorities as to whether their activities constitute a PE or fixed base.

The French tax authorities have to provide an answer within three months after the receipt of the request. In the absence of response from the French tax authorities within this period of time, the foreign company or individual will be deemed not to have a PE in France.

APAs are also provided by the French tax authorities for transfer pricing purposes (*see the Group taxation section for more information*) as well as for eligibility of R&D expenses to the R&D tax credit.

Other issues

France and the United States sign bilateral agreement on the implementation of the Foreign Account Tax Compliance Act (FATCA)

On 14 November 2013, France and the United States signed a bilateral intergovernmental agreement (IGA) intended to implement FATCA. FATCA was enacted by the United States in 2010 to combat offshore tax evasion by US persons. France, with the United Kingdom, Germany, Spain, and Italy, was an original member of the 'G5' countries that agreed with the United States to advance the principles of FATCA under the concept of bilateral IGAs in order to address many of the legal barriers faced by financial institutions in complying with FATCA.

The French government has committed to drafting local laws and regulations to implement FATCA among all financial institutions resident in France (including French branches of foreign companies). Broadly speaking, the banking, life insurance, and asset management industries will be most affected, but certain estate (patrimonial) vehicles, holding companies, as well as hedging, finance, and treasury centres of non-financial groups could also be impacted, depending on the nature of their activities.

As expected, the US-France IGA is based on the Model 1A version with an Annex II negotiated to include provisions specific to the local French market and that contains categories of French financial institutions qualifying for exempt beneficial owner or deemed-complaint status.

Compliance with FATCA's due diligence, reporting, and, in some cases, withholding requirements is necessary for foreign financial institutions (FFIs) to avoid suffering 30% withholding on certain US-source income and payments. The French IGA is intended to simplify the FATCA requirements for French financial institutions, but, in most cases, still requires significant efforts to maintain compliance.

The following are key points specific to the US-France IGA to consider:

- Inclusion of the 'most favoured nation' clause allowing adoption of certain provisions from other IGAs that may be more favourable to French financial institutions.
- Consistent with Notice 2013-43, the timetable for implementation of FATCA has been synchronised with the intended amendments to the US Treasury Regulations, starting with the entry into force of key provisions effective 1 July 2014.
- Annex II of the French IGA describes various classes of exempt beneficial owners and deemed-compliant financial institutions.
    - The deemed-compliant financial institutions described in Annex II are treated as Non-Reporting French Financial Institutions under the French IGA. In turn, these Non-Reporting French Financial Institutions are considered certified deemed-compliant FFIs under the US regulations and do not have to register to obtain a global intermediary identification number (GIIN).
    - Collective investment vehicles, including investment entities established in France that are regulated as collective investment vehicles, *sociétés de crédit foncier* and *sociétés de financement de l'habitat*, are Non-Reporting French Financial Institutions treated as deemed-compliant FFIs.
- The asset management industry should benefit from an exemption related to employee savings plans and a special status that is intended to reduce the FATCA

obligations of investment vehicles and management companies that can ensure the absence of US investors and non-participating financial institution customers.
- The agreement also provides specific provisions for certain French institutions and financial products, including:
  - Exemption for certain local banks with an almost exclusively local client base. This could be beneficial to French institutions following the mutual banking model.
  - Most regulated savings products (savings books and savings plans), which are excluded from the definition of a financial account and will not be treated as US Reportable Accounts, whereas the share savings plan (PEA) remains within the scope of FATCA.
  - Products dedicated to retirement planning (Article 39, Article 82 , Article 83, Madelin, Madelin agricole, Perp, Pere, and Prefon), which are excluded from the definition of financial accounts and will not be treated as US Reportable Accounts.
  - Pension funds will also benefit from a specific exemption.

French financial institutions, as well as non-financial organisations with financial institutions within their groups, should be taking steps based on the IGA (and in some cases US Treasury Regulations) to ensure they are prepared to comply. Unofficial draft guidelines have been prepared regarding the US-France IGA. This draft is not binding on French tax authorities. Official guidelines were published on 5 August 2015.

Significant developments

Further to the promulgation of the Financial Act for 2018, the following new tax measures have been introduced:

- Possibility to obtain tax benefits with regard to corporate income tax (CIT), value-added tax (VAT), and related withholding tax (WHT) during the stage of investment or construction, subject to the fulfilment of conditions, and for a period that does not exceed five years.
- The institution of thin capitalisation rules.
- The extension of the list of goods subject to excise duty, the reduction of the former excise duty's rates, and the institution of a specific tax based on quantities in addition to the 'ad valorem' rate.
- The institution of a monitoring fee for companies holding forestry, mining agricultural, or hydrocarbons' exploitation rights in the Gabonese Republic.
- The institution of a contribution to the African Union due on the products originating from states that are not members of the African Union that are imported in the customs territory for consumption.

Taxes on corporate income

Subject to the provisions of double tax treaties (DTTs), profits subject to CIT in Gabon are those obtained by companies exploited in Gabon or those relating to operations carried out in this country.

As the Uniform Act of the Organisation for the Harmonisation of Business Law in Africa (OHADA) relating to the law of companies and economic interest groups has introduced the simplified stock company (SAS) in the OHADA area, the General Tax Code has enlarged the application of the CIT to include the SAS. The Finance Act for 2018 has also enlarged the application of the CIT, on an optional manner, to companies of owners of ships or built and unbuilt properties, for the part of the shareholders indefinitely liable and whose identity is known by the Administration.

The CIT rate is fixed at 30%.

The CIT rate is 35% for companies operating in the oil and mining sectors and 25% for the following entities:

- Companies owning intellectual property (IP) shares.
- The Gabonese Development Bank.
- Authorised companies of property promotions.

- Public companies.
- Non-profit partnerships and collectives.
- Authorised companies of the tourism sector.

CIT is assessed on profits minus deductible expenses and charges. Profits are composed of all operations carried out in Gabon by companies during the period of taxation, including, notably, capital gains on fixed assets.

Non-resident companies shall be taxed via WHT at the rate of 20% for income raised in Gabon if they have no permanent establishment (PE) in Gabon.

In cases where non-resident companies have PE in Gabon, they shall be subject to CIT on the income raised in Gabon via the Gabonese PE.

Impôt Minimum Forfaitaire (IMF)

The IMF is a lower limit to the CIT and is calculated as 1% of the global turnover carried out during the fiscal year of taxation.

The turnover on which the IMF is calculated corresponds to all the revenues resulting from the operations carried out during the fiscal year, including the financial and exceptional profits.

Minimum de Perception (Minimum of Perception)

The Minimum of Perception is the ultimate lower limit to the CIT, as the amount of CIT paid by a taxpayer cannot be less than 1 million Central African CFA francs (XAF), even in the absence of profit.

New companies (as defined in Articles 194, and following, of the Gabonese Tax Code), without consideration of the sector of activity, are exempt from this minimum tax during the first two fiscal years of their existence.

Local income taxes

There are no local government taxes on income in Gabon.

Corporate residence

As a general rule, a resident company is a company that is incorporated under commercial laws in force in Gabon.

Permanent establishment (PE)

From a general treaty perspective, a PE designates a permanent business installation through which a company carries out the whole or part of its activity.

The expression ‘permanent establishment’ notably includes the following:

- Head office.
- Branch.
- Office.
- Plant.
- Workshop.
- Mine, oil or gas shaft, quarry, or other place of natural resources extraction.

- Building site or assembly line.

Other taxes

Value-added tax (VAT)

VAT is a cumulative tax levied on the sale of goods and the provision of services rendered or used in Gabon.

There are four rates of VAT:

- Standard rate: 18%, which applies to all transactions unless otherwise provided for by the law.
- Reduced rates:
  - 10%, which applies to manufacturing operations and sales of products mentioned in a limitative list provided by Article 221 of the Gabonese Tax Code, including mineral water, chicken, and sugar.
  - 5%, which applies to sales and services relating to cement.

- Zero-rate: 0%, which applies to exports and international transports.

Taxable persons are individuals or legal entities carrying out, usually or occasionally, in an independent manner, taxable operations in the scope of an economic activity and for an onerous consideration.

The aforesaid persons, subject to CIT or personal income tax (PIT), being registered or not, are liable to VAT should their turnover out of taxes reach XAF 60 million.

VAT on real estate

According to article 248 ter of the Gabonese Tax Code, operations in relation to the construction or sale of real estate, such as sales of lands to build on, delivery of new buildings, or self-delivery of some buildings, carried out by persons subject to VAT in the scope of their economic activities are subject to VAT on real estate.

The taxpayer of the VAT on real estate is the builder of the building.

The VAT is payable on the delivery date.

The deeds relating to the transfer of buildings subject to VAT on real estate are subject to registration formalities.

The VAT on real estate is calculated based on the sale price as determined by the parties or on the real value of the real estate in case it is superior.

The applicable rate is 18%.

Special Solidarity Contribution (SSC)

SSC is a tax levied on the sale of goods and the provision of services rendered or used in Gabon based on similar principles as VAT.

The SSC must be invoiced by the taxpayers (natural and legal persons) carrying out, on as usual or occasional basis, taxable transactions whose annual turnover, excluding taxes, is at least XAF 30 million.

The arrangements for the taxation of the said contribution are similar to those applicable to VAT.

This contribution aims to replace the contribution to Health Insurance (ROAM) that was formerly due by operators of the mobile telecommunication sector.

The SSC is calculated based on the amount invoiced, out of taxes.

The applicable rate is 1%.

Customs duties

Gabon is member of the Central African Economic and Monetary Community (CEMAC), a customs union that comprises countries from Central Africa.

Merchandise entering into the CEMAC customs territory is subject to importation duties registered into the Customs Tariff.

Four customs regimes are available in Gabon, notably one standard regime and three specific regimes (an exemption regime, a temporary admission regime, and a reduced tax regime).

Apart from customs duties, the importation of merchandise in Gabon is subject to the community tax of integration (CCI) at a rate of 0.4% and to the OHADA withholding (duty) at a rate of 0.05% of the customs value of the imported merchandise.

The Finance Act for 2018 has introduced, as of 1 January 2018, a contribution to the African Union (CAF) that is due on the importation within the custom territory of products originating from states that are not members of the African Union.

The CAF is paid at a single rate of 0.2% of the customs value of the products originating from states that are not members of the African Union.

Excise duty

Excise duty principally applies to luxury goods, such as alcoholic drinks, perfume and cosmetic products, caviar, salmon, cigars, and cigarettes.

The rates of the excise duty are between 5% and 25%.

The Financial Act for 2018 has extended the list of products subject to excise duties and has provided a decrease of the former excise duty rates.

The Finance Act for 2018 has also introduced, in addition to the ad valorem rate, a specific tax based on the quantities.

The excise duties are currently the following:

- Local and imported beers: 22% + XAF 80 per litre.
- Local and imported wines: 25% + XAF 80 per litre.
- Champagnes: 22% + XAF 200 per litre.
- Other beverages with more than 12° of alcohol: 22% + XAF 200 per litre.
- Soft drinks and other beverages with less than 12° of alcohol: 5%.
- Cigarettes, cigars, cigarillos, tobacco: 25% + XAF 300 per package produced or imported.

- Perfume and cosmetic products: 25%.
- Games of chance: 5% + XAF 100,000 per operated machine.
- Used vehicles: 25% + XAF 50,000 per sold vehicle aged 3 years at most and XAF 100,000 per sold vehicle aged more than 3 years.
- Caviar, foie gras, salmon: 25%.
- Mobile telecommunication activities (calls): 5%.

Tax on property

Tax on buildings (*Contributions Foncières des Propriétés Bâties* or CFPB) is levied annually at the rate of 15% of the rental value of the building after deduction of 25% for deterioration and maintenance. For properties booked into the assets of a company's balance sheet, the rental value of the premises is equal to 10% of the gross balance sheet value without being inferior to a tenth of the market value of the premises. However, in the hypothesis where the market value is unknown, only the gross balance sheet value has to be considered.

Tax on non-built property is levied annually at the rate of 25% of the taxable revenue corresponding to 4% to 5% of the rental value or 10% of the purchase value.

Transfer tax

The tax on funds transfer is due on remote transfer operations carried out in Gabon at destination of countries outside the Central Africa Monetary Union (UMAC) countries.

The tax is calculated on the amount of the funds to be transferred, except for related fees and commissions paid by the giver.

The rate of the transfer tax is 1.5%.

Stamp duty

A stamp duty is levied on all paperwork relating to civil and judicial actions and to documents that could be produced in court as evidence.

All signatories for mutually binding contracts, lenders and borrowers for loans, and ministerial officials who receive or modify deeds announcing unstamped deeds or books are jointly responsible for the payment of stamp duties and fines.

Business license tax

The business license tax applies to both individuals and entities, Gabonese and foreign, engaged in a profession, business, or industry in Gabon.

Business license tax corresponds to a professional tax borne annually. It is deductible from the taxable income for CIT purposes.

The rates of this tax vary according to the profession, business, and location within Gabon territory (this tax may vary between XAF 15,000 and XAF 540,000).

The head of the group of companies is exempted from the payment of the business license tax.

Franchise tax

The franchise tax is a fixed annual duty varying from XAF 10,000 to XAF 500,000, according to the size, nature, and location of the company. Each company that carries on a trade, business, or activity that is not expressly exempted is liable for franchise tax.

Activities that are expressly exempted from franchise tax are those carried out by companies of provident, craftsmen, teachers and professors, lyrical and dramatic artists, farmers, cattle-breeders, fishers, etc.

Registration duties

Registration duties in Gabon are fixed, proportional, or progressive, depending on the nature of the acts and transfers in question.

Payroll taxes

PIT and complementary tax on salary (TCS) are withheld monthly by the employer and paid to the Treasury before the 15th day of the following month.

Social security contributions

Employers must contribute to the social security system, which consists of the National Social Security Fund (CNSS) and the National Disease Insurance and Social Guarantee Fund (CNAMGS).

The taxable basis for social security contributions to the benefit of the CNSS is made up of gross salaries, including indemnities having the function of a salary and any benefits in kind. However, there is an annual ceiling of XAF 18 million (or XAF 1.5 million per month).

The taxable basis for social security contributions to the benefit of the CNAMGS is made up of gross salaries, including taxable indemnities, up to the limit of a monthly ceiling of XAF 2.5 million.

The social security contributions due by the employer for both funds are determined according to the following rates:

Contribution to CNSS	Rate (%)
Family allowances	8
Industrial accidents (work injuries)	3
Retirement pensions	5
Contribution to CNAMGS	**Rate (%)**
Health evacuation funds	0.6
Medication distribution	2
Hospitalisations	1.5
Total	**20.1**

Tax on insurance premiums

Insurance or annuity agreements made with insurance companies or any other Gabonese or foreign insurer are subject to an annual obligatory tax.

The tax is levied on the sums charged by the insurer and on any accessory payments made to this party by the insured party according to the following rates:

Nature of the policies	Rate (%)
Marine policies	5
Life policies	Exempt
Fire policies	30
Other (e.g. personal liability, transportation)	8
Reinsurance	Exempt

Branch income

Taxation of branch income is the same as for corporate income. However, a 20% WHT on profit is due at the time the profit is taken by the head office (located abroad) of the branch. This rate is reduced to 10% in case of the existence of a tax treaty.

Simplified tax regime for oil subcontractors

There is a simplified tax regime specific to the oil sector, which is a lump-sum tax regime granted for a biennial period. The request to benefit from such a tax regime is renewable for an additional period of two years, at least. Should the biennial period end after the first quarter of a considered year, the benefit from the simplified tax regime will apply until the end of the said year.

Features of this specific regime are as follows:

- The option for this regime is irrevocable for a period of two years, renewable once.
- The total duration of the benefit of such a regime can't exceed four years.
- The companies must perform their activities exclusively in the scope of oil operations.
- The option is granted by the Director of the General Tax Office to foreign companies.
- The subcontractor must have signed, with an oil company, a temporary agreement for the provisions of services to this company.
- The option is no longer granted to companies that have been in Gabon for more than nine years. The duration of nine years is calculated from the year during which the company started its activities in Gabon.
- The subcontractor must constitute a Gabonese branch office.

The rates for the 2017 and 2018 fiscal years are 35% for CIT and 20% for PIT of expatriate employees.

Specific regime for regional offices (quartiers généraux)

A regional office is a company or a branch that renders various administrative services, such as management or accounting, exclusively to other companies of the same group based in a given geographical area (usually a group of countries).

Taxation is based on the expenses of the regional office. A rate, between 5% and 12%, is applied to operating expenditures to determine the tax basis. The CIT rate is then applied to that basis.

Income determination

Inventory valuation

Stocks are estimated at cost price. If the market price is lower than the cost price, the company has to make provisions for depreciation of inventory.

Capital gains

Capital gains arising from the transfer of assets must be used for the calculation of taxable profits. However, the tax on capital gains can be deferred if a company reinvests an amount equal to the capital gain and the sale price of the transferred asset back into its fixed assets within three years.

Capital gains realised on the transfer of legal rights of persons or entities, whose asset is, in its majority, constituted of such rights or rights directly or indirectly owned in a company located in Gabon, are subject to CIT in Gabon.

Dividend income

The rate of transferable securities income tax (*Impôt sur le Revenu des Capitaux Mobiliers* or IRCM) is 20% on distributed dividends.

IRCM charged on the beneficiaries of the earnings is withheld at source by the distributing company. It is paid over to the Registration Officer within 30 days from the payment of the dividends.

Inter-company dividends

Inter-company dividends are taxed at a reduced rate in full discharge of the 20% WHT if paid and received by or from companies with their registered office in a CEMAC country, shares were allotted at the time of issue or kept for two years, and the Gabonese company owns more than 25% of the share capital of the subsidiary.

Interest income

Interest income paid to companies is subject to a 20% WHT in Gabon. When paid in respect of bonds of five years or more, it is subject to a 10% WHT.

Royalty income

Royalty income is subject to CIT at a rate of 30% (35% for companies operating in the oil and mining sectors).

Foreign income

Foreign interest, royalties, and dividends are included in taxable income, subject to international tax treaties. Note that tax treaties provide that certain/all types of income are not includable in Gabon taxable income. Gabon has tax treaties with Belgium, France, the other countries of CEMAC, and some countries that continue to apply the provisions of the African and Malagasy Common Organisation (OCAM) tax treaty.

The concept of deferred tax is not applicable in Gabon.

Deductions

Depreciation

The straight-line method and an accelerated depreciation method are permitted in Gabon. Tax and book conformity is obligatory (i.e. annual depreciation must be booked to preserve tax deductibility).

The main depreciation rates provided by the Gabonese Tax Code are the following:

Asset	Rate (%)
Buildings	5
Machinery, equipment	5 to 33.33
Office furniture	15
Office equipment	10
Vehicles	20 to 33.3
Computing equipment	25 to 100

Goodwill

There is no provision in the Gabonese Tax Code concerning the tax treatment of goodwill.

Start-up expenses

During the first five years of activity, a start-up can use an accelerated depreciation method on the acquired equipment goods under certain conditions and subject to specific provisions of the Gabonese Tax Code applicable to start-ups. Applicability of these provisions must be requested from the General Tax Manager prior to the incorporation of the company.

Interest expenses

Interest paid to shareholders with respect to the sums made available by them to the company is only deductible within the limit of those calculated on the intervention rate on invitation to tender (TIAO) of the Bank of the Central African States (BEAC) raised by 2%, provided that the share capital is fully paid up in case of incorporation of the company as well as in case of increase of the said share capital.

Concerning corporations or limited liability companies, the deduction is only allowed with regard to the sums made available by partners or shareholders assuming in right or in fact the management of the company, only for the part of these sums that does not exceed, for the whole partners and shareholders, one and a half of the share capital fully paid up.

Bad debt

Bad debt can be deducted from the result of the fiscal year during which the debt became completely unrecoverable, subject to the irrecoverable character of the compromised debt being justified due to the situation of the debtor.

Provisions

To be tax deductible, provisions must relate to existing liability or loss. General provisions are not deductible.

Expenditures on rent

The amount of the rentals granted to a company is allowed as a deductible expense under the condition that it does not exceed the average rentals applied for similar buildings and amenities.

However, an exception is provided with regard to the renting of premises by a partner owning at least 10% of the shares of the company.

Charitable contributions

Charitable contributions do not, in principle, constitute expenses deductible from the taxable result. However, contributions for charity can be deducted, provided that the donation is made to the profit of organisms of public interest located in Gabon and that the donation is justified.

The deduction is limited to 1/1,000 of the company's turnover for the considered fiscal year.

Fines and penalties

Fines and third-party taxes borne by companies are not tax deductible.

Social security contributions paid to foreign retirement funds

The deductibility of social security contributions paid by the employer to foreign retirement funds are only allowed when paid to the benefit of employees in secondment and within a limit of 15% of the gross salary paid to these employees.

Taxes

Only professional taxes for which the recovery proceeding has started in the current fiscal year and for which the company is effectively liable due to operations carried out in Gabon can be deducted.

Net operating losses

The Gabonese Tax Code does not provide the possibility to carry back losses. It does, however, provide for a five-year carryforward for net operating losses.

Regarding depreciation deferred in the accounts, they can be carried forward indefinitely.

Payments to foreign affiliates

Management fees paid to a foreign parent company are deductible if they meet all of the following conditions:

- They reflect real transactions.
- They do not present an abnormal characteristic.
- They are not exaggerated.

Management fees determined on a lump sum basis are not deductible.

Management fees exceeding 10% of the taxable profit before deduction of the said fees are not deductible.

Interest paid to shareholders is deductible only within the limit of the BEAC's normal rate for advances plus 2%, on the condition that the registered capital is entirely paid. The portion exceeding the ceiling is not deductible and is thus subject to taxation.

Concerning corporations or limited liability companies, the deduction is only allowed with regard to the sums made available by partners or shareholders assuming in right or in fact the management of the company, only for the part of these sums that does not exceed, for the whole partners and shareholders, one and a half of the share capital fully paid up.

Group taxation

Specific group tax regime

There is a specific tax regime derogatory to the common law tax regime that is applicable, under conditions, to groups of companies.

According to the provisions of Article 11 b. of the tax measures applying to groups of companies, groups of companies are those constituted by companies subject to CIT, or a foreign equivalent tax, united between them through direct or indirect capital links of at least 50% and that allow one of them or several companies, jointly, to control the others.

The control is defined as:

- either the direct or indirect holding of the majority of the vote in another company or
- the nomination, during two consecutive years, of the majority of the members of the board of directors of another company.

To be eligible for this specific tax regime, and without any prejudice of other activities performed to the profit of third parties, the head of the group of companies must perform to the profit of other companies of the group an activity relating exclusively to the following fields:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial corresponding to functions of management, coordination, and control of the group's companies.
- Research and development (R&D) to the sole profit of the group.
- Management of the intra-group finance.

Each company subject to CIT that is a member of the group and fulfils the conditions provided by the law will be subject to a separate taxation of its results according to the rules of common law and subject to amendments expressly provided by the law for the determination of the taxable result.

The express amendments provided in the scope of the specific tax regime applicable to groups of companies are the following:

Capital gains

Net capital gains are taxed at a reduced rate of 20% when they are realised in the scope of intra-group operations.

Expenses deductible from the taxable result subject to CIT

The following expenses are deductible within the group:

- Head office fees and management fees determined on a lump sum basis, according to the conditions of allocation of the expense between the companies' members of the group defined in a previous ruling with the tax authorities.
- The whole of the interests on partners' current accounts (i.e. on the sums put, by the partners, at the disposal of a company of the group) within the sole limit of the intervention rate TIAO of the BEAC (equivalent to 2.85%) raised by 2%.
- Rents of movables carried out within the group by the mother company or between companies of the same group.

20% WHT

Sums subject to CIT according to the provisions of Article 206 of the Gabonese Tax Code paid by a Gabonese debtor member of a group of companies to a foreign company member of the same group are exempted from the 20% WHT even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of residence of the beneficiary of the remunerations.

Transferable securities income tax (IRCM)

Companies of the group that benefit from transferable securities income originating from Gabon are exempted from IRCM when the said revenues are paid by a company member of the group.

In return, payments carried out by the head of the group of companies to the profit of its partners (individuals or legal entities) are subject to IRCM at a unique and at source rate of 10% (instead of 20%).

It is to be noted that the transferable securities incomes having their source abroad and which gave rise to taxation in their country of origin give the right in Gabon to a tax credit of the amount of the taxation that is deductible from the CIT of the fiscal year of perception of the incomes. The aforesaid tax credit applies even though no DTT aiming to avoid double taxation has been concluded between Gabon and the country of origin of the incomes.

VAT

The head of the group of companies is liable for VAT.

Members of a group of companies could, however, on option, consider the following provisions of services performed within the group as being out of the scope of application of VAT:

- Provisions of services of any kind, notably technical, accounting, financial, administrative, data processing, legal, human resources, and commercial.
- Fees relating to studies.
- Putting at disposal of personal.
- Management of finance.

The option for the subjection of the above-mentioned operations must be formulated by the concerned taxpayers on express request addressed to the General Tax Manager.

Registration duties

Deeds relating to incorporation, increase or reduction of share capital, breaking up with or without clearance, merger, scission, partial contribution of assets, and transfer of shares of a company member of a tax group, are subject to a fixed duty of XAF 50,000.

In the absence of a more favourable duty provided by the common law of registration, the changes of ownership and use that are not provided at Article 6 of the Gabonese Tax Code are subject to a proportional rate of 1% when carried out by members of the same tax group.

Requirements relating to declaratory obligations

The adherence to the group tax regime must be notified in writing by the head of the group of companies to the General Tax Manager accompanied by the list of the companies included in the tax perimeter of the group.

Each company remains liable for the periodical returns applicable to its activity.

For the purpose of calculation and verification of the returns, each tax return relating to the CIT of each company of the group will be gathered and filed at the same time by the head of the group of companies before the Tax Office.

Transfer pricing

The Gabonese Tax Code provides rules regarding transfer pricing issues.

According to these rules, any payment considered to be a result of mismanagement will be subject to the CIT rate at 30% (35% for companies operating in the oil and mining sectors) plus penalties.

Indeed, Article 12 of the Code provides that "By virtue of law or in fact, for companies which are dependent of companies or groups of companies located outside the CEMAC area, or for those which possess the control of companies located outside the CEMAC area, payments or expenses realised by any mean whatsoever or any kind of advantages or help granted to third parties without equivalent counterpart for the company, comparable to abnormal act of management, constitute transfer of profits subject to corporate income tax".

It is applicable for the following:

- Payments constituting an increase or decrease of purchases or sales.
- Payments of excessive royalties or royalties without compensation.
- Relinquishment of revenues (underestimated sale price, free of charge service provision, granting of a free loan or a loan with low interests).

The abnormal act of management is not limited to expenses; it also includes any form of advantages or allowances granted to third parties without any equivalent compensation for the company.

Article 13 of the Gabonese Tax Code provides that "The advantages or assistance granted by companies belonging to the same group can only be considered as resulting from a normal management if the company which grants these advantages or assistance demonstrates the existence of its own interest in acting as such. The general interest of the group is not sufficient to justify such practices”.

Further to the Financial Act for 2017 implementing the Organisation for Economic Co-operation and Development (OECD) regulation, a Master file containing information about the group structure and a Local file in relation to the structure, transfer pricing policy, and group transactions of the local entity must be provided to the tax authorities on a yearly basis, at the same time as the Annual Tax Return (DSF).

The Financial Act for 2017 has also introduced penalties, in case of failure to provide the Master and Local files, corresponding to 5% of the transactions realised with companies of the group with a minimum of XAF 65 million per year.

In addition, a Country-by-Country (CbC) report must be filed by the ultimate parent company of the group before the tax administration of which it depends.

Thin capitalisation

Thin capitalisation rules have been introduced by the Finance Act 2018.

When the company paying the interest is deemed to be thinly capitalised, only a portion of that interest may be deductible from the taxable result.
A company is deemed thinly capitalised when the amount of interests paid on inter-company loans exceeds, simultaneously, the three following limits during the same fiscal year:

- The product of interest payments on inter-company loans x ((1.5 x equity)/loans granted to group affiliates).
- Interests received by the company by affiliates.
- 25% of the profits before tax + interests paid + depreciation taking in consideration to be deducted from the considered tax profit + share of the rents of leasing taken into account for determining the transfer price of the property at the end of the contract.

In a thinly capitalised company, the fraction of interests exceeding the highest of the above-mentioned ratios would not be tax deductible in the course of the considered fiscal year.

Controlled foreign companies (CFCs)

There is no specific tax rule under Gabon legislation related to CFCs.

Tax credits and incentives

Foreign tax credit

DTTs include provisions relating to the attribution of foreign tax credits. Such tax credits aim to limit the double taxation of profits that are subject to taxation in both member states of the treaty.

Tax credits for job creation

There is a mechanism in place for granting corporate tax credits for any salaried appointments of Gabonese personnel.

This tax credit is equal to 20% of the gross salary paid to new employees and is subject to the creation of a minimum number of jobs, according to the size of the company as follows:

- Two jobs, for companies with less than 20 employees.
- Three jobs, for companies with 20 to 50 employees.
- Five jobs, for companies with more than 50 employees.

Note that the tax credit is granted only on newly created jobs since the preceding fiscal year. Contracts concluded with the employees must also be for an undetermined duration, and the new jobs must not result from the diminution of existing jobs.

Inbound investment incentives

Due to the provisions of the Investments Law, any private investment in Gabon can benefit from:

- A common law framework.
- Privileged frameworks.
- Specifically agreed frameworks.

Depending on the frameworks it is eligible for, a company can benefit from customs privileges and tax breaks.

Industrial companies already set up in Gabon and wishing to increase their production capacity can be admitted to a preferential tariff framework. This entails the application of a global reduced rate of 5% for duties and taxes paid on imports of equipment (excluding materials, furniture, and spare parts), provided that these correspond to an investment schedule and their value is in excess of XAF 100 million.

New industrial companies can also benefit from this framework, provided they are not subject to any of the other privileged frameworks outlined by current legislation.

The granting of this privileged tariff framework occurs on the basis of a decision by the Minister of Finances, following a proposal from the Director of Customs and Indirect Taxes.

Capital investment incentive

New companies are exempt from the IMF, the minimum taxation of CIT, during the first two years of operations.

Social housing incentive

There are some tax exemptions applicable exclusively to authorised companies during the performance of a social housing investment project.

Favourable measures are applicable with regards to the importations of materials, engines, and equipment destined to authorised companies. Indeed, such importations are exempt from customs duties. They can also be imported under the normal temporary admission.

The concerned companies may apply before the customs authorities in order to benefit from the above-mentioned regime.

The concerned companies are those authorised for the planning of urban lands intended for social habitat and the building of housings of a socio-economic nature and industrial units of manufacturing of materials and other inputs used for the building of social housings. The above-mentioned tax exemptions relate to CIT, VAT, and business license tax.

Tourism incentive

Companies having hotel activity in the tourism sector are exempted from CIT during the first three years of existence, provided that the amount of the investment equals or exceeds XAF 300 million. If not (i.e. investment of less than XAF 300 million), aforesaid authorised companies investing in the tourism sector can benefit, during a five-year period, from a 5% tax credit.

Withholding taxes

20% WHT

When they are paid by a debtor established in Gabon to individuals or companies subject to CIT or PIT that do not have a permanent professional base in Gabon, the following amounts are subject to a 20% WHT:

- All amounts paid pursuant to the practice of an 'independent profession' in Gabon.
- Payments received by inventors, payments relating to copyrights, and all payments relating to intellectual and commercial property as well as assimilated rights.
- All amounts paid for services materially rendered or effectively used in Gabon.
- Interest, arrears, and all others fixed-income investment-products pertaining to income declared as professional revenue of the beneficiary.

Net profits carried out by branches of foreign companies having their head offices abroad are also subject to a 20% WHT in Gabon before they are taken into account by the foreign companies.

The WHT of 20% may not apply in the context of the application of a DTT, as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	20	20	20
Treaty:			
Belgium (1)	18	15	10
Canada (1)	15	10	10
France (2)	15	10	10
Morocco (2)	15	10	10

Notes

1. If the beneficial owner of the dividends, interest, or royalties is a resident of the other contracting state.
2. If the person receiving the dividends, interest, or royalties is the beneficial owner.

Transferable securities income tax (IRCM)

IRCM is due at a 20% rate on revenues from stocks and shares paid to legal entities. It is due by beneficiaries of these revenues and must be withheld by the distributing company.

Tax administration

Taxable period

Companies are required by law to have a 31 December closing of any fiscal year.

Tax returns

Returns for the previous calendar year are to be filed before 30 April of each year.

Payment of tax

Tax is payable to the General Tax Office in two instalments on 30 November and 30 January. The balance of the tax due must be paid by 30 April. The first instalment must equal one-quarter of the tax assessed in the previous year and the second instalment must equal one-third of this tax.

Tax audit process

The rules concerning the tax audit procedure are provided by the Gabonese Tax Code.

There is no specific rule on the selection of companies to be subject to a tax audit. However, it has to be noted that, generally, the tax administration proceeds by sectors of activities.

The Tax Inspectors proceed to audits at the head office or at the place of the taxpayer's main establishment.

The main steps of the tax audit are the following:

- Notification of a tax audit by which the taxpayer is informed on the date of performance of the tax audit.
- Performance of the audit.
- Provisions of a notification of reassessment.
- Provision, by the taxpayer, of its answers to the notification of reassessment (to be provided within a delay of 20 days from the receipt of the notification).
- Reply of the tax administration to the answers of the taxpayer (to be provided within a delay of 60 days from the receipt of the above-mentioned answer from the taxpayer).
- Closing of the tax audit.

Statute of limitations

The tax administration can proceed to tax audit until the fourth year following the year for which the tax is due.

Topics of focus for tax authorities

The tax administration shall particularly focus on the following aspects:

- Compliance of deductibility of management fees.
- Compliance of deductibility of corporate expenses.
- Compliance of WHT on payments made to foreign services providers.
- Payment of VAT on behalf of third parties.

Other issues

Legal reserve

According to the provisions of the OHADA Uniform Act relating to commercial companies and economic interest groups, one-tenth of the year's profits, reduced, if applicable, by any previous losses, must be put into a reserve account named 'Legal Reserve'.

The endowment of this reserve ceases to be obligatory when its value reaches one-fifth (20%) of the company share capital.

Tax regime of merger and similar operations

There is a specific tax regime derogatory from the common law applicable to the following operations:

- Mergers.
- Scissions.
- Partial transfers of assets.
- Subsidiarisation.

This regime only applies to operations performed by companies liable to CIT.

The benefit of this specific tax regime is also subject to the fulfilment of conditions listed in the Finance Act for 2015.

This Finance Act also provides the provisions applicable to the above-mentioned operations regarding the following taxes:

- CIT.
- VAT.
- Registration duties.

Significant developments

There have been no significant corporate tax developments in Georgia during the past year.

Taxes on corporate income

Resident enterprises are subject to corporate income tax (CIT) on worldwide income.

Non-resident enterprises carrying out economic activities in Georgia through a permanent establishment (PE) are subject to CIT with respect to its Georgian-source income.

The CIT rate is a flat 15%.

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to withholding taxes (WHTs) (*see the Withholding taxes section for more information*).

New CIT system

From 1 January 2017, Georgia has switched to a new CIT system. The new system represents the adoption of the Estonian model of CIT to the Georgian tax system. As such, retained profits are no longer taxable until they are distributed. The new regime is not aimed to exempt the profits from taxation, but is designed to defer the taxation moment. Consequently, taxpayers no longer need to determine taxable gross income and allowable deductions in order to arrive at the taxable profits, but rather a standard CIT rate of 15% is applicable to the grossed-up value of the following transactions:

- Profit distribution.
- Costs incurred not related to economic activity.
- Free of charge distributions.
- Over limit representative expenses.

Note that commercial banks, credit unions, insurance companies, microfinance organisations, and pawn shops will be affected by the new CIT regime after 1 January 2019.

Distributed profit

Distributed profit encompasses distribution of profits by an enterprise to its partner as a dividend in a monetary or non-monetary form.

Distribution of dividends between Georgian legal entities and distribution of dividends received from a foreign enterprise (except for a person registered in a country with preferential tax treatment) are not subject to CIT.

Distributed profit of a PE of a non-resident enterprise shall be a deemed distribution of profits attributable to the PE for its activities. A PE shall be allotted a profit it might have gained as an independent enterprise conducting the same or similar activity and being in the same or similar conditions.

Costs incurred not related to economic activity

Costs not related to economic activity shall be:

- Non-documented expenses.
- Expenses, the purpose of which is not to gain profit, income, or compensation.
- The interest paid for a credit (loan) above the annual interest rate established by the Minister of Finance of Georgia (i.e. 24%).

Certain transaction are deemed as non-business expense, which, *inter alia*, include:

- Payments for acquisition of shares/interest of a non-resident enterprise or contributions made in the capital of a non-resident enterprise.
- Granting of a loan to a natural person or a non-resident.

Certain transaction with persons registered in the countries with preferential tax regimes are also subject to immediate taxation of CIT. Among them are:

- Provision of loans to such persons.
- Purchase of debt securities issued by such persons.
- Payment of contractual penalties and fines to such persons.
- Payment of advances to such persons.
- Acquisition of debt claim towards such persons.
- Loss derived as a result of transferring the right of claim to such entities.
- Loss incurred from waiving the claim receivable from such entities.

The main purpose of the listed taxable objects is to mitigate hidden distribution of profit without taxation. That said, the tax law requires taxation of such cash outflow, which may be embodied with profit distribution, though in turn it allows one to claim back the paid CIT when the cash is returned. Specifically, the Georgian tax code sets that companies have the right to credit the CIT paid previously in the following cases:

- When compensation is received as a result of supply of debt securities.
- When compensation is received from supply of shares or transfer of right of claim.
- When issued loan/paid advances is fully or partially returned (in proportion of returned amount).
- When goods/services are received in exchange for the paid advances.
- When security of issued loan from the third party is cancelled.

Free of charge delivery of goods/services and/or transfer of funds

Free of charge delivery of goods/services and transfer of funds will be subject to CIT. Additionally, shortage of inventory and/or fixed assets will be considered as free of charge supply at the moment of its revealing and will be taxed accordingly by CIT.

Representative expenses

Representative expenses exceeding the specific limit will be subject to CIT. The limit determined for these purposes is 1% of the company's total revenues derived or expenses incurred in the previous calendar year, whichever is greater.

Old CIT system

Commercial banks, credit unions, insurance companies, microfinance organisations, and pawn shops are continuing to operate under the old CIT system until 1 January 2019.

Under the old system, CIT in Georgia is applied to taxable profit at a rate of 15%. Taxable profit is defined as gross income minus deductible expenses.

Local income taxes

There are no regional or local income taxes imposed on the profit of legal entities.

Corporate residence

A resident enterprise is any legal entity that is established under the laws of Georgia or has its place of effective management in Georgia.

Permanent establishment (PE)

The domestic definition for a PE essentially adopts the definition for PE found in the Organisation for Economic Co-operation and Development (OECD) Model Tax Convention.

Local legislation provides the definition for economic activity to be any activity undertaken with the intent to gain profit, income, or compensation, regardless of the results of such activity, unless otherwise provided by the tax code.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 18% and applies to the sale of all goods and services supplied in Georgia carried out as an economic activity. Goods are considered to be supplied in Georgia if they are transferred in or their shipment originates in Georgia. Services generally are considered to be supplied in Georgia if they are performed in Georgia. However, special rules apply for services relating to immovable property and certain services provided to non-residents.

The export and re-export of goods is exempt from VAT with the right to credit input tax (formerly referred to as zero-rated). VAT-exempt supplies include financial services, goods and services required for oil and gas operations, and medical services.

Reverse-charge VAT applies to services provided to Georgian taxpayers by a non-resident entity.

A VAT payer is a person who is registered or required to be registered as a VAT payer. Any person whose annual taxable turnover exceeds 100,000 Georgian lari (GEL) in any continuous period up to 12 months or who produces or imports excisable goods must register as a VAT payer. In addition, an enterprise that expects to perform one-off taxable transaction of more than GEL 100,000 must also register as a VAT payer no later than the second day after effecting the transaction.

Generally, VAT is chargeable on the supply of goods and services. VAT is also applied on the advances received on goods and services to be supplied. When goods and services are supplied, VAT is charged on the value of provided goods and services reduced by advance payment.

Customs duties

Import tax is levied on goods that cross the economical borders of Georgia (except export). Depending on the types of products, general rates on imported goods are: 0%, 5%, and 12%. Imported cars are taxed at GEL 0.05 multiplied by the volume of the engine, plus 5% of import tax on each additional year of ownership.

Excise tax

Excise tax is levied on specified goods that are produced in Georgia or imported into Georgia. Excise tax generally is calculated with reference to the quantity of goods (e.g. volume, weight) or, in the case of automobiles, on the basis of the engine capacity and vehicle age. Excise tax rate varies from GEL 0.15 to GEL 400 for one unit.

Excise tax applies to the following goods:

- Alcoholic drinks (i.e. GEL 5 per litre of whiskey).
- Condensed natural gas, except for pipeline.
- Oil distillates.
- Goods produced from crude oil.
- Tobacco products.
- Automobiles.

The export of excisable goods is exempt from excise tax with the right to credit.

Apart from goods, mobile telecommunication services and termination service of international calls in mobile and fixed networks are also subject to excise tax in Georgia.

The applicable excise rate for mobile telecommunication services is 3%.

International calls termination is taxable based on the call duration with the following rates:

- Call termination within mobile network: GEL 0.15 per minute.
- Call termination within fixed network: GEL 0.08 per minute.

Property tax

Property tax is payable at the rate of 1% on the annual average residual value of fixed assets (except for land) and investment property on the balance sheet as well as on leased out property of Georgian entities or foreign entities with taxable property in Georgia. For immovable property acquired before 2005, the average residual value must be multiplied by a coefficient of between 1.5 and 3, depending on the acquisition date.

Land tax

The annual land tax rate for agricultural land varies according to the administrative unit and the land quality.

The base tax rate per 1 hectare of agricultural land varies from GEL 5 to GEL 100. The tax is further adjusted by a territorial coefficient of up to 150%, depending on the location.

The base tax rate payable on non-agricultural land is GEL 0.24 per square metre, which is further adjusted by a territorial coefficient not exceeding 150%.

Transfer taxes

There are no transfer taxes in Georgia.

Stamp taxes

There are no stamp taxes in Georgia.

Payroll taxes

Payroll tax in Georgia represents a normal personal income tax (PIT), which is withheld by an employer at the source of payment of salary to an employee at a 20% rate of gross payment.

Social security contributions

There are no social security contributions in Georgia.

Branch income

Branch income is taxed at the general rate of 15% upon its distribution. Distributed profit of a PE of a non-resident enterprise shall be a deemed distribution of profits attributable to the PE for its activities. A PE shall be allotted a profit it might have gained as an independent enterprise conducting the same or similar activity and being in the same or similar conditions.

Income determination

Under the new CIT system, the income is recognised as per International Financial Reporting Standards (IFRS).

Under the old CIT system, taxable income is determined as the difference between the gross income of a taxpayer and the relevant deductions granted under the Georgian tax code.

Inventory valuation

A taxpayer is required to record the value of goods produced or acquired as the outlays (except for depreciation charges) or the purchase price in tax accounting. Furthermore, the taxpayer shall include the storage and transportation expenses in the value of such goods.

A taxpayer is entitled to record the cost of inventory using the individual accounting method, the average weighted cost method, or first in first out (FIFO).

Capital gains

The Georgian tax code does not define any separate tax for capital gains. Capital gains are taxable as normal business income at the general CIT rate.

Dividend income

Dividends received by local legal entities (except for sole enterprises and entrepreneur partnerships) are not subject to taxation at source and shall not be included in gross income.

Dividends received by non-resident enterprises from resident enterprises are subject to WHT at source (*see the Withholding taxes section for more information*).

Interest income

Resident legal entities and PEs of non-residents that received interest income that was taxed at source in Georgia are entitled to a credit on tax paid to the state budget.

Interest income received from a licensed financial institution is not subject to WHT at source, and it should not be included in the gross income of a recipient unless the recipient is another licensed financial institution.

Rent/royalty income

Rent and royalty income received by resident companies and/or PEs of non-resident enterprises should be subject to CIT upon its distribution in the form of dividends if the taxpayer is under the new CIT system. Under the old CIT system, such income should be included in the taxable gross income of the enterprises.

Foreign income

Resident legal entities are subject to CIT on their worldwide income. Under the new CIT system, foreign income is subject to CIT at 15% upon its distribution in the form of dividends. Taxes withheld abroad can be offset against CIT charged on distribution of foreign income.

Deductions

The concept of deduction is no longer applicable for the companies and PEs operating under the new CIT system, since they follow IFRS.

Under the old CIT system, expenses connected with the receipt of income generally are deductible from income, provided sufficient primary documentation is available.

Note that the deduction rules provided below are applicable for taxpayers who continue operating under the old CIT system.

Depreciation

The declining-balance method of depreciation applies to fixed assets for tax purposes. The maximum rate of depreciation is 20% for most fixed assets, though buildings and construction are subject to depreciation at the rate of 5% (please contact us for additional information regarding other groups and rates).

A taxpayer is entitled to fully deduct costs of fixed assets (excluding those contributed to capital) in the year when the fixed assets are put into operation (a form of capital allowance). In case the taxpayer employs the right of full deduction in this manner, this method may not be changed for five years.

Amortisation of intangible assets

Intangible assets (e.g. goodwill) are amortisable in proportion with the period of beneficial use. However, intangible assets of value less than GEL 1,000 are fully deductible from gross income.

If the period of beneficial use of an intangible asset cannot be defined, it is amortisable at the rate of 15%.

Start-up expenses

Expenses incurred before registration of an entity as a taxpayer (e.g. public registry fee) are not deductible under Georgian tax legislation.

Interest expenses

Interest paid on loans is deductible within the limits established by the Finance Minister, unless it is paid on loans received from domestic licensed banks and microfinance organisations. The annual deductible interest rate limitation established by the Minister of Finance of Georgia for the year 2018 is 24%. No limits are established on loans received from domestic licensed banks and microfinance organisations.

Bad debt

A taxpayer is entitled to deduct bad debt only if all of the following conditions are met:

- The bad debt is related to the taxpayer's goods or services sold.
- Income receivable from the sale of goods or services was previously included in taxable gross income.
- The bad debt has been written off and recorded as such in the taxpayer's accounting records.
- Certain documents prescribed under the Georgian tax code are available confirming that the debt is irrecoverable.

Charitable contributions

Charitable contributions are deductible, up to 10% of taxable profit.

Fines and penalties

Fines and penalties paid to the state budget are not deductible.

Taxes

CIT is disallowed for deduction.

Other significant items

The following other expenses are not deductible:

- Expenses not related to the generation of income.
- Expenses related to the receipt of income exempted from CIT.

The deduction of certain expenses is subject to limitations, including:

- Representation expenses, up to 1% of gross income.

- Repair expenses, up to 5% of the book value of the relevant asset at the end of the year. Any excess must be capitalised and deducted through depreciation.

Net operating losses

Losses may be carried forward for five years but may not be carried back.

A taxpayer may elect to extend the carryforward period to ten years. However, this also results in the statute of limitations period being extended from six to 11 years.

International financial companies, free industrial zone (FIZ) enterprises, and Special Trading Companies are not entitled to carry forward losses.

An international financial company is a financial institution that, on behalf of the application of plenipotentiary representative, gets state registered, is granted as an ‘international financial company’, and is given a status confirming certificate. These are resident companies that, after application, were granted the status of international financial company.

An FIZ enterprise is an enterprise operating in the FIZ, which, for the purposes of tax exemption, is granted the status of an FIZ enterprise.

Payments to foreign affiliates

There is no special tax regime in Georgia for payments made to foreign affiliates; as such, general rules will apply. Payments may be classified as equity, financing, or service fee. Any such transaction will need to be at arm’s length in accordance with the Georgian transfer pricing rules.

Group taxation

Georgian law does not provide for taxation of groups.

Transfer pricing

The transfer pricing rules introduced in the tax code are broadly based on the OECD arm’s-length principle adopted in tax treaties and by most countries when they implement domestic transfer pricing rules.

The law recognises the five OECD transfer pricing methods for evaluating whether prices are at arm’s length:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Net profit margin method.
- Profit split method.

The tax code stipulates that in accordance with the Ministry of Finance (MoF) instructions, the tax authority may recalculate the taxes if they can prove that the prices applied by related parties to transactions differ from the market prices.

According to the instructions issued by the MoF, the methods for assessing the transfer pricing assessment rules have been explained, and the following procedures have been established:

- Determination of comparability of independent transactions.
- Transaction adjustment procedure.
- Information to be represented by the parties of the transaction to the tax authority.
- Documentation list.
- Sources of information on market prices.
- Price range application procedure.

The taxpayer becomes liable to present documentation to the tax authority in support of one's position in considering income received to be consistent with market principles within 30 days of the formal request of the Revenue Service. The report can be written in both Georgian and English but should be translated to Georgian in case it is requested by the Revenue Service. The companies also have an option to sign an Advance Pricing Agreement (APA) in which the transfer pricing methodology will be agreed for specific transactions with the tax authority, who will no longer have the right to charge fines/taxes on these transactions.

Under the new CIT system, transfer pricing adjustment is subject to immediate taxation.

The following general penalties, determined by tax legislation, apply for non-compliance with the arm's-length principle or failing to prepare or submit transfer pricing documentation:

- An understated tax liability (e.g. VAT, CIT) is subject to a penalty of 50% of the understated tax.
- Late payment of taxes is subject to interest at a rate of 0.05% per overdue day.
- Failing to submit a required document is generally subject to a penalty of GEL 400.

Thin capitalisation

No thin capitalisation rules are applicable in Georgia.

Controlled foreign companies (CFCs)

Georgia tax legislation does not provide CFC rules.

Tax credits and incentives

Foreign tax credit

Income tax or profit tax paid on income earned from outside Georgia may be credited against CIT payable in Georgia. The amount of credited taxes may not exceed the Georgian tax payable on the foreign income. The rule is also applicable under the new CIT system on CIT due from dividend distribution.

CIT exemptions

The following are exempt from CIT (the list is not exhaustive):

- Income of budgetary, international, and charitable organisations (including grants, membership fees, and donations), except for the profit from commercial activity.
- Profit received from financial services conducted by international financial companies.
- Gains on sales of securities issued by international financial companies.

Free industrial zone (FIZ)

The following rules apply for enterprises located in an FIZ:

- Income received by an FIZ enterprise from its permitted activities conducted in an FIZ is exempt from CIT.
- The importation of foreign goods into an FIZ is free of customs duties and VAT-exempt.
- Operations carried out in an FIZ are VAT-exempt without the right to credit.
- Property located in an FIZ is exempt from property tax.
- The PIT of employees is paid by those individuals through self-reporting.

An FIZ enterprise should pay tax at a rate of 4% on the market price of the goods supplied/received to/from a person registered under the Georgian law (excluding on the supplies to/from other FIZ enterprises).

Withholding taxes

Non-resident enterprises earning income from Georgian sources, other than through a PE, are subject to WHT at the following rates:

Income	WHT (%)
Dividends	5
Interest	5
Royalties	5
Oil and gas subcontractor income	4
International transportation/communication	10
Income from services rendered in Georgia	10
Other Georgian-source income	10
Insurance and re-insurance	0

Payments of interest, royalties, or other Georgian-source income to non-residents registered in so called 'black listed' countries are subject to WHT at a 15% rate.

The list of such countries is determined by the MoF of Georgia.

Double tax treaties (DTTs)

For those countries with which Georgia has entered into DTTs, the WHT rates are the following:

	WHT (%)		
Recipient	**Dividends**	**Interest (1)**	**Royalties**
Non-treaty (14)	5	5	5
Treaty:			
Armenia	5/10 (15)	10	5
Austria	0/5/10 (2)	0	0
Azerbaijan	10	10	10
Bahrain	0	0	0
Belarus	5/10 (15)	5	5
Belgium	5/15 (15)	10	5/10 (3)
Bulgaria	10	10	10

	WHT (%)		
Recipient	**Dividends**	**Interest (1)**	**Royalties**
China, People's Republic of	0/5/10 (2)	10	5
Croatia	5	5	5
Cyprus	0	0	0

Turkey	10	10	10
Turkmenistan	10	10	10
Ukraine	5/10 (15)	10	10
United Arab Emirates	0	0	0
United Kingdom	0/15 (7)	0	0
Uzbekistan	5/15 (15)	10	10

Notes

1. Some agreements provide a 0% rate on the interest paid by the government or any of its units or on the interest guaranteed by them; this table doesn't consider such provisions.
2. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million euros (EUR).
3. Royalty rate paid for the enterprise is 5%.
4. The 0% rate refers to the copyright of any literature, art, or scientific works (except software), and films and records; the 5% rate refers to lease of techniques.
5. The 0% rate applies to interest on bank loans and commercial credits.
6. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than EUR 3 million.
7. The 0% rate applies if the foreign company owns at least 50% of the Georgian company and has invested more than 2 million pound sterling (GBP).
8. The 0% rate applies if the foreign company owns at least 25% of the Georgian company in any continuous 12-month period prior to distribution of dividends.
9. The 0% rate applies if the foreign company controls at least 50% of the voting power in the Georgian company and has invested more than EUR 2 million.
10. The 0% rate applies for certain types of interest.
11. The 0% rate applies if the foreign company has invested in the Georgian company more than 3 million United States dollars (USD).
12. The 0% rate applies if the foreign company owns at least 10% of the Georgian company.
13. The 0% rate applies if the foreign company owns at least 10% of the capital or the voting power of the Georgian company.
14. Domestic WHT rates are applicable when a treaty provides a relief with more unfavourable rates.
15. Domestic WHT rate on dividends is 5%. A treaty provides a relief with the same or more unfavourable rate, thus the domestic rate is applicable.

Tax administration

The tax departments under the MoF are responsible for tax administrative matters in Georgia.

Taxable period

The tax year is the calendar year in Georgia.

Tax returns

The new CIT regime shifts from annual reporting to a monthly reporting practice.

CIT returns should be submitted on monthly basis before the 15th day following the month when the taxable transaction took place. As a result, the quarterly advance payment rule is abolished for companies subject to the new CIT system.

A CIT return should be submitted before 1 April of the year following the reporting period for companies under the old CIT system.

Payment of tax

CIT is due on a monthly basis before the 15th day following the month when the taxable transaction took place for companies working under the new CIT regime.

In case a transaction was taxed with CIT and then the amount (part of the amount) remitted on this transaction was returned back to the taxpayer, the latter may set off and recover a sum of the previously paid CIT in proportion of the returned amount. This, *inter alia*, relates to:

- If the participation in a foreign entity was disposed of or contribution into the capital of foreign entity was returned.
- When a loan granted was repaid.

Under the old CIT system, CIT is paid in advance in four equal instalments, before 15 May, 15 July, 15 September, and 15 December. The advance instalments are estimated according to the previous year's annual tax. A taxpayer with no prior-year CIT obligation is not required to make advance payments.

Final payment is due by 1 April of the year following the reporting period. Excess CIT payments may be offset against other tax liabilities.

Tax audit process

There are two types of tax audits: desk tax audit and field audit. The tax audit may be conducted based on the order of the Revenue Service of Georgia. The Revenue Service sends a notice to the taxpayer no less than ten working days before the commencement of the audit. The audit should commence no later than 30 days after receiving such notice by the taxpayer. Normally, the tax audit may last for three months, and may be extended to another two months with the approval of the head of the Revenue Service. The findings should be presented to the taxpayer in the form of a tax act.

Statute of limitations

The statute of limitations is three years in Georgia from 2017. For those taxpayers who decide to increase the loss carryforward to ten years, the statute of limitations is 11 years. The statute of limitations period was six years prior to 2015, five years in 2015, and four years in 2016.

Topics of focus for tax authorities

In recent periods, the tax authorities have become largely focused on transfer pricing issues during tax audits.

Other issues

International agreements

Georgia is a member of the North Atlantic Treaty Organization's (NATO's) Partnership for Peace Program and is actively working to join NATO and the European Union (EU). Georgia is also a member of the World Trade Organization (WTO), the United Nations (UN), the Organization for Security and Co-operation in Europe (OSCE), and the Union of Georgia, Ukraine, Uzbekistan, Azerbaijan, and Moldova (GUUAM), and an observer in the Council of Europe.

Georgia was formerly a member of the Commonwealth of Independent States (CIS). Because of the August 2008 conflict with Russia, Georgia formally notified the CIS on 18 August 2008 of its intention to withdraw from the organisation, and that withdrawal came into effect on 18 August 2009. However, Georgia's Ministry of Foreign Affairs has said it will uphold all trade and treaty agreements made between Georgia and fellow CIS countries.

Georgia has a free-trade regime with members of the CIS, including Armenia, Azerbaijan, Kazakhstan, Turkmenistan, Uzbekistan, Ukraine, and Turkey. This results in duty-free trade of goods and services.

On 18 December 2002, the GUUAM free-trade agreement was ratified by the Georgian Parliament, the goal of which is to create favourable trade conditions and to strengthen economic links among the member countries. The agreement to form a free-trade zone was reached at the GUUAM Presidents' Summit in July 2003 in Yalta. Uzbekistan has since left the free-trade zone.

In June 2014, the European Union and Georgia signed an unprecedented Association Agreement. This Agreement aims to deepen political and economic relations between Georgia and the European Union and to gradually integrate Georgia into the European Union.

In July 2015, an intergovernmental agreement (IGA) was signed by and between Georgia and the United States about tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). As a result, Georgia joined a list of countries that provide financial information to its partner country, the United States, for the deterrence of facts of tax evasion by its citizens.

Significant developments

As part of its implementation of the Organisation for Economic Co-operation and Development (OECD) recommendations developed in the Base Erosion and Profit Shifting (BEPS) Project in June 2017, Germany introduced a restriction on the deductibility of certain royalty payments to related parties to counter so-called harmful preferential tax regimes. The OECD allowed for a grandfathering of existing preferential tax regimes (e.g. certain patent boxes) (i.e. those not in line with the so-called Modified Nexus Approach defined as minimum standard in Action 5 of the BEPS Project) until June 2021. In Germany, however, the restriction on the deductibility of such payments to related parties shall apply from 1 January 2018 onwards.

In addition to the OECD proposals, Germany will also have to consider various standards set by the European Union (EU). The Anti-Tax Avoidance Directive (EU-ATAD) must be implemented into local law in the main by no later than 31 December 2018 and is to be generally applied from 1 January 2019 onwards. In May 2017, the Council of the European Union further adopted a directive amending the EU-ATAD (ATAD II). The member states must transpose ATAD II into local law by 31 December 2019 and apply it generally from 1 January 2020 onwards.

Furthermore, at the EU level, an extension of the EU Mutual Assistance Directive with reference to the exchange of information on cross-border tax planning schemes ('arrangements'), including the imposition of disclosure requirements on so-called intermediaries and taxpayers, was adopted in May 2018. The new rules must be implemented into domestic law by 31 December 2019 and will become applicable from 1 July 2020. It should be noted, however, that the disclosure rules also cover reportable cross-border arrangements, the first step of which is implemented between 25 June 2018 and 30 June 2020.

On 20 December 2017, the European Court of Justice (ECJ) decided that the German anti-treaty shopping rules, denying full or partial relief from withholding tax (WHT), as otherwise prescribed under a double tax treaty (DTT) or applicable EU directive, which were applicable until 2011, were neither compatible with the Parent-Subsidiary Directive nor with the freedom of establishment. Following the decision of the ECJ, an amendment of the anti-treaty shopping rules in their current form may be expected.

Taxes on corporate income

Germany taxes its corporate residents on their worldwide income. However, most DTTs exempt income attributable to a foreign permanent establishment (PE). Non-residents with PE or property income are taxed by assessment on German-source income; those earning royalties and dividends are taxed by withholding at source. Interest paid abroad is, in most cases, free of German tax altogether.

German business profits are subject to two taxes, corporation tax and trade tax.

Corporation tax (Körperschaftsteuer)

Corporation tax is levied at a uniform rate of 15% and is then subject to a surcharge of 5.5% (solidarity surcharge). This results in a total tax rate of 15.825%.

Trade tax (Gewerbesteuer)

The trade tax rate is a combination of a uniform tax rate of 3.5% (base rate) and a municipal tax rate (*Hebesatz*) depending on where the PEs of the business are located. Currently, municipalities with at least 80,000 inhabitants currently levy trade tax at a rate of between 12.6% (*Hebesatz* of 360%) and 20.3% (*Hebesatz* of 580%).

The basis for this tax is the adjusted profit for corporation tax purposes: in particular, 25% of all financing costs over 100,000 euros (EUR), including the implicit financing costs in leasing, rental, and royalty payments, are added back to taxable income.

If the basis for the two taxes is identical (unlikely in practice), the overall burden on corporate profits earned in Munich would be 33%. In Frankfurt, the burden would be 32%. In Berlin, it would be 30.2%.

Corporate residence

A corporation is resident in Germany for tax purposes if either its place of incorporation or its main place of management is in Germany. A corporation meeting neither of these criteria will be regarded as non-resident with tax obligations limited to its income from German sources. These include active business activities through a PE or the letting of property and equipment rental (leasing), as well as specific investment income and royalties. Income of the first three categories is generally taxed by assessment on the actual net earnings. That of the last two is usually taxed at source by withholding from the gross amount payable. Interest paid to a non-resident is generally tax-free (certain exceptions apply, e.g. in respect to interest on convertible or profit-sharing bonds).

Permanent establishment (PE)

Domestic law defines a PE as any fixed business facility serving the corporate purpose. A permanent representative is someone who 'habitually' deals on behalf of the principal acting on the principal's instructions. In its tax treaty PE definitions, Germany consistently follows the OECD model; consequently, purchasing activities, delivery stores, and independent agents acting in the ordinary course of their business are regularly excluded from the PE concept. Recent tax treaties generally reflect the Authorised OECD Approach to PE income, and Germany has also negotiated corresponding amendments to a number of older treaties. The Authorised OECD Approach has been adopted into domestic law and is generally followed in practice unless doing so would lead to double taxation from continued adherence to the old approach (of treating a PE as part of the same legal entity as its head office) in the other state.

Other taxes

Value-added tax (VAT)

Proceeds of sales and services effected in Germany are subject to VAT under the common system of the European Union at the standard rate of 19% (7% on certain items, such as food and books). The taxpayer generally is entitled to deduct the VAT charged on inputs from that payable on outputs.

VAT is administered by the tax office responsible for the corporation tax assessment of a company. It is based on preliminary VAT returns filed monthly or quarterly by the tenth day of the following month (monthly for new businesses or where the tax payable in the previous year was more than EUR 7,500) drawn up on the basis of the actual transactions during the filing period as shown in the books of account. A permanent filing extension of one month is available against an advance payment of one-eleventh of the total net tax due during the previous year. Otherwise, payment is due when the return is filed.

Legally, VAT is an annual tax. Each taxpayer must file an annual return for each calendar year, regardless of the actual accounting date for the business. If the annual return does not agree with the total of the monthly or quarterly returns, the tax office can be expected to ask for a detailed explanation.

Customs duties

Customs duties are levied under a common system on imports into the European Union. The rate is set at zero on most imports from EU candidate countries and on many imports from countries with which the European Union has an association agreement.

For manufactured products from other countries, the rates generally lie within the range of 0% to 14%. The basis is the import value of the goods and thus includes uplifts for royalty or other payments associated with their use but not apparent from the transit documents.

The European Commission (EC) also sets 'countervailing' duties from time to time on specific imports from specific countries in order to counter dumping attempts. The countervailing duty rate is set to fully absorb the dumping margin and is therefore usually much higher than 14%.

Excise taxes

Excise taxes on fuel, electric power, and some other products are not a compliance issue for businesses other than dealers in bonded goods, although they can be a significant additional cost factor for business users. These excise taxes also have an environmental element in as much as the rates are set to discourage excessive use of pollutants. However, an air passenger duty is the only tax on pollution as such. Energy producers (such as power stations) can claim a refund of the excise tax borne in the cost of the energy products used in the production process.

Property taxes

There are no taxes on wealth or capital employed. There is a minor local authority tax on property, but the effect of this is partly offset by an additional trade tax deduction.

Stamp taxes

The only significant German stamp tax is the real estate transfer tax (RETT) on the consideration on conveyances of German property. The rate varies by province; in 2018, the rate is 3.5% for property in Bavaria and Saxony; 4.5% in Hamburg; 5% in Baden-Württemberg, Bremen, Lower Saxony, Mecklenburg-Western Pomerania, Rhineland-Palatinate, and Saxony-Anhalt; 6% in Berlin and Hesse; and 6.5% in Brandenburg, North Rhine-Westphalia, Saarland, Schleswig-Holstein, and Thuringia.

This tax is also levied on indirect transfers from the acquisition of at least 95% of the shares in property-owning companies. This applies to shares of the shareholder throughout the corporate chain. A tightening of the rules for levying RETT in connection with a share transfer is currently being discussed (e.g. lowering the 95% threshold).

In general, RETT is calculated based on the value of the consideration. Where RETT is triggered due to a restructuring, unification of shares, change of partners in a partnership, or in cases where a consideration does not exist, the tax base is determined based on the valuation principles applied for inheritance tax purposes.

Under certain conditions, German RETT is not levied on direct or indirect transfers (without the payment of consideration) in the course of a corporate reorganisation under the laws of a member state of the European Economic Area (EEA), provided at least 95% of the ultimate interest in the property remains unchanged for five years before and after the transaction (group privilege).

In a decision of 30 May 2017, the Federal Fiscal Court referred a case to the ECJ and asked the ECJ for a preliminary ruling on the question as to whether the group privilege constitutes illegal state aid according to European State Aid Rules. Should the group privilege constitute illegal state aid according to Art. 107 para. 1 TFEU, the group privilege may no longer be applied until the European Commission decides upon its compatibility with the Internal Market.

Payroll taxes

Employers are required to pay employee remuneration under deduction of the income tax due. The amounts deducted are paid over to the tax office at regular, usually monthly, intervals. The actual deductions are calculated from the gross pay, taking the employee's marital, family, and other personal circumstances into account. The necessary personal details can be downloaded from a government database. For the employee, the payroll tax deduction is a prepayment on the income tax due after filing one's annual income tax return. As such, the payroll tax is a withholding tax and not a financial burden on the employer. However, employers are required to deduct the correct amounts and are thus exposed to the risk from a later tax audit assertion of under-deduction, especially as there are often legal or practical impediments to recovery from the employees after the event. The administrative effort involved is also far from insignificant.

Social security contributions

All employers are required to account for social security contributions on wages and salaries paid, up to set monthly limits. There are four separate types of insurance: for old-age pensions, unemployment benefits, health care, and invalidity care. Employees regularly earning more than EUR 59,400 in 2018 can opt out of the health and invalidity insurances if they take out appropriate coverage with a private insurance company. The pension and unemployment insurances are compulsory for all employees. The upper monthly salary limits are EUR 6,500 in 2018 (EUR 5,800 in the eastern part of Germany) for the pension and unemployment insurances and EUR 4,425 in 2018 for the health and invalidity insurances. Currently (2018), the rates are as follows:

- Pension insurance: 18.6%, of which the employee's share is one half.
- Unemployment insurance: 3.0%, of which the employee's share is one half.
- Health insurance: 14.6%, of which the employee's share is one half. The health funds have the power to levy a supplement.
- Invalidity insurance: 2.55%, (plus a surcharge of 0.25% in some cases) of which the employee's share is one half.

Branch income

Both corporation tax and trade tax are imposed on the taxable income of a foreign company's German branch. The rates are the same for branches as for resident German companies, although the WHT on dividend distributions by German companies is not deducted from profits transferred by a German branch to its foreign head office.

Income determination

The taxable income is generally determined on the basis of a tax balance sheet, which in turn is based on the statutory accounts according to German generally accepted accounting principles (GAAP). There are certain specific tax law and accounting adjustments to be made to the statutory accounts, and additional accounting options are available. If accounting options are exercised in the tax balance sheet that diverge from the financial statements according to German GAAP, a register must be kept of the resulting variances between the financial statements and the tax computation showing the basis on which each arose and its reversal. International Financial Reporting Standards (IFRS) financial statements are not accepted as a basis for computing taxable income.

Inventory valuation

Inventories normally are valued at the lower of actual cost, replacement cost, and net realisable value. However, any write-downs below actual cost must be made for specific reasons. If specific identification of the inventories is not possible, valuation at either standard or average cost is acceptable. The last in first out (LIFO) method is accepted as an option. First in first out (FIFO) is not accepted unless its assumption accords with the facts.

Long-term liabilities and accruals

Non-interest bearing liabilities with a remaining term of 12 months or more as at the balance sheet date, other than advance payments received, must be discounted at 5.5% per year. A similar provision applies to refurbishment (to restore an asset to its original condition) and other accruals that accumulate over time.

Capital gains

Generally, capital gains realised by a corporate entity from a disposal of business assets are treated as ordinary income. It is possible to postpone the taxation of part or all of the gain on real estate by offsetting the gain against the cost of a replacement property.

Capital gains from the sale of investments in other corporations are exempt from corporation and trade taxes. Corresponding losses are not deductible. However, 5% of the capital gains are added back to taxable income as non-deductible, directly-related expenses where the seller is resident or has a PE/representative in Germany.

Dividend income

Dividends received on significant holdings are exempt from corporation and trade taxes. Portfolio dividends are taxable. For corporation tax and trade tax purposes, different qualified portfolio holdings are applicable. With respect to corporation tax, a minimum shareholding of at least 10% is required and must be met at the beginning of the calendar year. For trade tax purposes, additional requirements need to be fulfilled (e.g. an active income criterion for certain foreign-source dividends) and different rules apply for German-source and foreign-source dividend income from shareholdings of at least 15% (or 10% insofar as the Parent/Subsidiary Directive is applicable).

For corporation tax purposes, 5% of the tax-free gross dividend is added back to taxable income as non-deductible business expenses. For dividends exempted for corporation as well as for trade tax purposes, the taxable amount of 5% of the dividends for corporation tax purposes is also taxable for trade tax purposes.

Note that, for example, banks do not enjoy this exemption on dividends from securities held for trading.

Stock dividends

In principle, a declaration of stock dividends (by converting reserves to capital stock) by a company will not lead to taxable income for the shareholder or to other tax effects. Subsequent capital reductions, however, will be treated as cash dividends in most circumstances. In general, there is no German tax reason for distributing a stock dividend as opposed to merely leaving accumulated profits on the books to be carried forward. The decision, therefore, depends upon the situation in the investor's home country.

Interest income

Interest received is taxed as part of a company's ordinary trading income. There is no exemption corresponding to the trade tax disallowance of 25% of the interest expense or to the general tax disallowance of net interest expense in excess of 30% of 'earnings before interest, tax, depreciation, and amortisation' (EBITDA) under the interest limitation rule (*see the Deductions section*). However, since the interest limitation is based on the net interest margin, a company can benefit from earning income as interest as opposed to an interest substitute.

Royalty income

Royalties received are taxed as part of a company's ordinary trading income. There is no special regime such as an IP Box or the like.

Foreign income

Foreign income, except dividends, received by a German corporation from foreign sources is included in taxable income for corporation tax unless a tax treaty provides for an exemption. Foreign PE income, in most cases, is exempt from corporation and trade taxes, while double taxation on most items of passive income (e.g. interest and royalties) is avoided by foreign tax credit or, at the taxpayer's option, by a deduction of the foreign taxes as an expense.

Irrespective of any tax treaty, income from a foreign branch or partnership is, in general, not charged to trade tax. However, with effect from the 2017 period of assessment, certain passive income arising to a foreign PE will be deemed to have been earned by a domestic PE for trade tax purposes.

The Foreign Tax Act provides for anti-avoidance (including controlled foreign company [CFC]) rules with respect to subsidiaries in certain lines of business subject to a low-tax regime. A low-tax regime is one in which the rate applicable to the income in question is less than 25%. Most forms of passive income fall under the CFC rules, which essentially attribute the income to the German shareholder as though it had been earned directly. Active business income is not generally caught where the business operates from properly established facilities.

Investment income held in an EU/EEA subsidiary is also exempt from attribution, provided the subsidiary is commercially active in its country of operation and maintains at least a minimum establishment.

Other provisions give the tax office the right to insist on full disclosure of all the facts and circumstances surrounding a transaction as a condition for the deduction of a business expense incurred within an essentially tax-free environment for the supplier. This rule operates independently of ownership or shareholding considerations.

Deductions

Depreciation and amortisation

Depreciation on movable fixed assets is calculated on the straight-line method over the asset's anticipated useful life. Depreciation takes the residual value of the asset into account only if it is material, with any gains on a sale being treated as normal business income.

Buildings are depreciated on a variety of straight-line or reducing-rate systems designed to reach a full write-down between 25 and 50 years, depending on the age of the building and on whether the taxpayer was its first owner.

In addition to normal depreciation, special depreciation is deductible for tax purposes in certain limited circumstances (e.g. small businesses, ancient monuments, buildings in designated renovated city zones).

Acquired intangibles are amortised straight-line over their estimated useful lives; goodwill is amortised over 15 years.

Start-up expenses

Start-up and formation expenses are deductible as incurred.

Interest limitation

Annual net interest expense (the excess of interest paid over that received) of group companies is only deductible at up to 30% of EBITDA for corporation and trade tax purposes. The 30% limitation applies to all interest, whether the debt is granted by a shareholder, related party, or a third party.

This limitation does not apply where the total net interest expense for the year is less than EUR 3 million or where the net amount paid to any one shareholder of more than 25% (or a related party) is no more than 10% of the total. However, this latter concession is dependent on the demonstration that the equity-to-gross assets ratio of the company is no more than two percentage points below that of the group as a whole. Unused EBITDA potential may be carried forward for up to five years to cover future excess interest cost. This carryforward is otherwise subject to the same principles as the loss carryforward, including curtailment on change of shareholder(s).

In a decision as of 14 October 2015, the Federal Fiscal Court held the interest limitation to be in breach of the constitution and has asked the Constitutional Court to give a definitive ruling. Since the Federal Fiscal Court is of the view that the provision is unconstitutional, it has suspended the proceedings in a pending case and submitted the question to the Constitutional Court. Only the Constitutional Court is authorised to decide if the regulation is unconstitutional and may thus no longer be applied.

It is emphasised that the interest limitation is additional to, and not a substitute for, the transfer pricing requirement that related-party finance be at arm's length.

Royalty limitation

Following (and beyond) the OECD recommendations on Action 5 of the BEPS Project, Germany has introduced a restriction on the deductibility of certain royalty payments to related parties applicable from 2018 onwards to counter so-called harmful preferential tax regimes. According to the royalty limitation rules, expenses arising after 31 December 2017 for the assignment of use or the right to use rights, in particular of copyrights and industrial property rights, in trade, technical, scientific and similar know-how, knowledge, and skills (e.g. plans, designs, processes), may not be a deductible business expense or may only be partially deductible.

The limitation will apply where:

- the recipient of the income from the assignment of rights is a related party, *vis-à-vis* the debtor
- the income in the hands of the (direct or indirect) recipient is subject to a special preferential regime, which does not correspond to the OECD Modified Nexus Approach, and
- the income received for the assignment of the rights is taxed at a rate less than 25% (low taxation) at the level of the (direct or indirect) recipient.

If the conditions of the provisions are met, the expenses in question will become proportionately non-deductible. The non-deductible portion of expenses is calculated as follows:

(25% - Income tax burden in %) / 25%

Bad debts

Bad debts incurred on trading with unrelated parties are deductible once it is apparent that they are irrecoverable and all attempts to pursue the debt have failed or been abandoned. Provision for future bad debts may be made; general provisions must reflect the past experience of the business; specific provisions require specific justification based on the actual circumstances. Expenses from the write-down of loans to shareholders of more than 25% or to their related parties may not be deducted from taxable income unless a third-party creditor would have granted the loan or allowed it to remain outstanding in otherwise similar circumstances.

Charitable contributions

Donations to recognised charities in cash or in kind are deductible up to the higher of 20% of otherwise net taxable income or 0.4% of the total of sales revenue and wages and salaries paid during the year. Donations to charities registered in other EU/EEA member states also qualify for deduction if the recipient charity meets the German requirements for recognition.

Fines and penalties

Fines and other penalty payments levied by a court, or other authority, with an intent to punish are not deductible. By contrast, those levied to confiscate ill-gotten gains, or to relieve damage to the victims or to the public good, are deductible. Penalty payments levied for attempted tax evasion are not deductible, but late payment surcharges are deductible if the tax itself is (e.g. VAT).

Taxes

All taxes borne are deductible except for corporation tax, trade tax, and the VAT on most non-deductible expenses.

Net operating losses

Net operating losses are carried forward without time limit. For corporation tax (but not trade tax), there is an optional carryback to the previous year of up to EUR 1 million.

The loss relief brought forward claimable in any one year is limited to EUR 1 million plus 60% of current income exceeding that amount. The remaining 40% of income over EUR 1 million is charged to trade and corporation taxes at current rates. This is referred to as ‘minimum taxation’.

The loss carryforward, as well as current losses of the ongoing fiscal year accrued up to the date of the harmful share transfer, is forfeited if a single (immediate or ultimate) shareholder acquires more than 50% of the issued capital (voting rights) within a five-year period. An acquisition of more than 25% and up to 50% leads to a corresponding reduction in the loss carryforward.

These forfeiture rules do not apply to share acquisitions as part of a group internal reorganisation without effect on the single ultimate shareholder, or inasmuch as the loss carryforward is covered by hidden reserves in the company’s assets that, on realisation, will lead to German taxation. This excludes the appreciation in value of shareholdings in other companies as well as business assets held in foreign PEs.

For harmful share transfers occurring after 31 December 2015, an application may be made under a new provision introduced in December 2016 to avoid a loss forfeiture. Relief may be available where the company has maintained exclusively the same business during a specified observation period and during this period no 'harmful event' has occurred. In this context, harmful events include, for example, the discontinuance of the business, the commencement of an additional business, and a change in activity/business sector. Where the conditions are fulfilled and the company has made the application, the total tax loss carryforward available at the end of the period of assessment, in which the harmful share transfer occurred, will be classified as so-called 'continuance-bound' loss carryforward (*Fortführungsgebundener Verlust*).

The occurrence of one of the harmful events as set out in the provision will result in the forfeiture of the continuance-bound loss carryforward last assessed as far as the continuance-bound tax loss carryforward is not matched by hidden reserves under the hidden reserve exception.

In a decision as of 29 March 2017, published on 12 May 2017, the German Federal Constitutional Court held that the German tax loss forfeiture rules violate the German Constitution to the extent they anticipate a partial forfeiture of a company's tax losses upon an acquisition of more than 25% but less than 50% of its shares. The decision directly affects only the period until the introduction of the application for a continuance-bound loss carryforward (i.e. share transfers up to 31 December 2015).

The German Federal Constitutional Court obligated the German legislature to amend the rules on a loss forfeiture in case of the acquisition of a qualified minority interest by 31 December 2018 at the latest with retroactive effect from 1 January 2008 to 31 December 2015, to ensure that they are consistent with the German Constitution.

There are further cases before the German Federal Constitutional Court on the question as to whether the full forfeiture of losses in the case of a harmful share transfer of more than 50% is unconstitutional and on other specific questions in connection with the minimum taxation rules.

Payments to foreign affiliates

A German corporation can claim a deduction for remuneration, such as interest charges (subject to the interest limitation), service fees, and royalties, paid to foreign affiliates, provided the amounts are at arm's length. Detailed provisions covering both form and substance define this. In particular, all services must be covered by prior written agreement, and it is also necessary to conclude agreements for the purchase and sale of goods in writing where this would be usual between third parties (e.g. for quantity rebates on sales). The substance tests must be satisfied, both as to value for money and as to business relevance. Thus, the manager of a German subsidiary must be able to show an adequate business benefit from a related-party transaction. These and all other aspects of inter-company (related-party) trading fall under strict and extensive documentation requirements, breach of which can lead to serious penalties.

Special features for trade tax

There are a number of differences between the income subject to trade tax and to corporation tax. The most significant is the trade tax disallowance of one-quarter of the interest costs, including interest implicit in leasing, rental, and royalty charges. Banks have an exemption from this interest disallowance.

Group taxation

If a parent holds more than 50% of the voting rights in a subsidiary having its place of management in Germany, the two may conclude a formal court-registered profit and loss pooling agreement, which must be concluded for a period of at least five years. If certain conditions are fulfilled, the ensuing relationship is referred to as an *Organschaft*. Effectively, the annual results of an *Organschaft* are pooled at the level of the parent. The tax group subsidiary itself is only subject to tax with respect to 20/17 of the compensation payments made to outside minority shareholders, if applicable. Profits and losses within a group can therefore be offset, but there is no provision for the elimination of intra-group profits from the total tax base. It should also be noted that negative income of the parent or of the subsidiary incurred within an *Organschaft* is excluded from offset in the same or another year if a foreign country takes it into account in the taxation of an *Organschaft* member, or of any other entity.

The main conditions for a tax group for corporate tax/trade tax purposes are:

- The subsidiary is financially integrated; in effect, the parent must have held the shares in the subsidiary without interruption from the beginning of its business year sufficient to give it a majority of the voting rights in the subsidiary.
- The parent of an *Organschaft* must be an individual, a trading partnership, or a non-tax exempt corporation, association, or estate.
- The investment in the subsidiary must, from a functional point of view, be attributable to a German branch of the parent, and the income of the branch must be subject to German tax and not be exempt under a DTT.
- The subsidiary must be a corporation having its place of management in Germany and its registered seat in an EU/EEA member state.
- The parent and the subsidiary must have concluded a qualifying profit and loss pooling agreement (PLPA) to run for at least five years and be consistently applied throughout the term of the agreement. Under the PLPA, the subsidiary surrenders its entire income to the parent. Conversely, the parent is obligated to compensate the losses incurred by the subsidiary throughout the term of the agreement.

Transfer pricing

Extensive rules on transfer pricing in respect of all transactions with foreign-related parties are in force. The basic principle is that all trading should be at arm's length, but the documentation requirements go far beyond the level of documentation normally found sufficient to demonstrate a conscientious approach to true third-party business. Failure to meet these rules exposes the company to serious risk of penalties as well as unfavourable estimates by the authorities, who have the right to exercise every possible leeway or margin to the taxpayer's disadvantage.

Germany has adjusted its transfer pricing documentation rules to meet the recommendations of the OECD BEPS Project. The taxpayer has to prepare documentation specific to the country and each business (local file) as well as a master file with information regarding the global business operations of the group. Furthermore, a so-called country-by-country reporting (CbCR) must be submitted.

Documentation (local file and master file) need not be set up already at the time of transaction or in the course of a tax return. However, in case of extraordinary business transactions (e.g. restructurings, cost sharing, other material long-term agreements), documentation needs to be prepared within six months after the end of the business year in which the business transaction occurred.

Usually, in preparation of a tax audit, the tax authorities request the relevant records/ documentation. Upon request of the tax auditor, the documents must be furnished within 60 days of the request or, in case of extraordinary business transactions, within 30 days.

The CbCR has to be submitted within one year after the end of the respective business year.

Thin capitalisation

There are no thin capitalisation rules as such; their substitute is the 'interest limitation' to, basically, 30% of EBITDA discussed in the *Deductions section*.

Controlled foreign companies (CFCs)

Pursuant to the German CFC taxation rules regulated in the Foreign Tax Act (FTA - *Außensteuergesetz*), certain low-taxed (less than 25%) income, referred to as passive income generated by a CFC, shall be subject to German tax at the level of the German shareholder, provided the CFC is deemed to be a so-called intermediate company (*Zwischengesellschaft*) and the German ownership criterion is fulfilled.

Passive income generated by a CFC that qualifies as an intermediate company will be attributed to the German shareholder regardless of whether it is actually distributed or not (CFC income). The CFC income is subject to German corporation tax and trade tax.

EU/EEA subsidiaries will not be qualified as an intermediate company if a so-called motive test is fulfilled (i.e. the German shareholders prove that the specific income is derived from a genuine economic activity of the non-resident company).

Tax credits and incentives

Germany does not offer tax incentives except in very limited circumstances, not usually of direct business relevance (e.g. special depreciation for buildings under a conservation order). Partly, this is a question of the state budget, and partly, it reflects the constitutional requirement for equal treatment of all taxpayers.

Other incentives

Local authorities may offer facilities on favourable terms, such as the provision of cheap land on industrial estates.

Foreign tax credit

If foreign-source income is not exempt from German taxation, a credit will be given for the foreign tax actually paid and not otherwise recoverable. However, the credit is limited to the corporation tax (including the solidarity surcharge) on the net income after deducting the related expense (a per-country limitation applies). Unused credit is lost, as there are no provisions for carryforward or for offset against other taxes, such as trade tax. There are still a few cases of fictitious foreign tax credits under tax treaties with developing countries (to protect the treaty partner's investment incentives), but German treaty policy is to abandon such provisions at the first opportunity.

Withholding taxes

Resident corporations paying certain types of income are required to withhold tax as shown in the following tables. There is also a solidarity surcharge of 5.5% on the tax due.

General

	WHT (%)		
Recipient of German-source income	**Dividends (1)**	**Interest (1)**	**Royalties**
Resident corporations and individuals	25	0/25 (2)	0
Non-resident corporations and individuals (1):			
EU corporations (4, 5)	0/25	0/25 (3)	0/15
Non-treaty corporations	25	0/25 (3)	15
Non-treaty individuals	25	0/25 (3)	15

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% plus solidarity surcharge, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax plus solidarity surcharge is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds and over-the-counter transactions is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity surcharge) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity surcharge) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. Where the EC Parent/Subsidiary Directive applies, dividends paid by a German company to a qualifying parent company resident in another EU member state are exempted from German WHT. The minimum shareholding is 10%, to be held continuously for at least one year.
5. The EC Interest and Royalties Directive exempts payments from WHT if made to an associated company in another EU member state. The association must be through a common shareholding of at least 25%.

Uzbekistan (5, 7)	5/15	5	3/5
Venezuela (5)	5/15	5	5
Vietnam (5)	5/10/15	10	10
Zambia	5/15	10	10
Zimbabwe (5)	10/20	10	7.5

Notes

1. Corporate recipients of dividend and interest income (interest on convertible and profit-sharing bonds) can apply for refund of the tax withheld over the corporation tax rate of 15% plus solidarity surcharge, regardless of any further relief available under a treaty.
2. Generally, only interest paid by banks to a resident is subject to a WHT. A 25% tax plus solidarity surcharge is also withheld from income on convertible or profit-sharing bonds.
3. Interest paid to non-residents other than on convertible or profit-sharing bonds and over-the-counter transactions is generally free of WHT. Tax on loans secured on German property is not imposed by withholding, but by assessment to corporation tax at 15% (plus solidarity surcharge) of the interest income net of attributable expenses. The tax authorities can order a WHT of 15.825% (including solidarity surcharge) if ultimate collection of the tax due is in doubt. Both forms of tax are reduced by treaty relief.
4. The lower rates on dividends apply under certain conditions (minimum shareholding, specific shareholders, in some cases minimum holding period).
5. The treaty does not limit the taxation of certain profit-based interest income, which is deducted by the debtor from their tax base; consequently, the domestic rate (plus solidarity surcharge) applies.
6. The USSR treaty continues in force with Moldova.
7. The applicable maximum WHT rate on royalties depends on the type of royalty granted (film and television royalties, trademarks, patents, franchises, etc.).
8. The lower rate on interest income applies under certain circumstances (e.g. for certain recipients, such as banks or pension funds, or for interest paid in connection with certain purchases on credit).
9. The Yugoslav treaty continues in force with Bosnia-Herzegovina, Kosovo, Montenegro, and Serbia.
10. The dividend exemption applies under certain conditions to corporate shareholders with at least 80% throughout the previous 12 months.

11. The Czechoslovak treaty continues to apply to the Czech Republic and to Slovakia. Interest on profit-sharing bonds is taxed as a dividend.

Treaties or protocols amending existing treaties are signed but awaiting ratification with Macedonia, Oman, and South Africa.

Tax administration

Taxable period

The tax year in Germany is the calendar year.

Tax returns

Returns are filed for each calendar year and reflect the financial statements for the business year ending in that calendar year. Assessments are issued once the tax office has reviewed the return.

In principle, returns are due by 31 May of the following year. However, there is a virtually automatic extension to 31 December for those filing with professional assistance. A further extension to 28/29 February is possible if justified under the circumstances. Known late-filers and those with a record of other irregularities can be asked to submit their returns before these extension dates, though not before 31 May. For tax periods starting after 31 December 2017, the regular deadline will be 31 July following the tax year-end. For tax returns prepared by a professional tax adviser, the deadline will be extended to the last day of February of the subsequent year.

Electronic returns

Monthly or quarterly returns for WHT from employee salaries, dividends, interest, royalties, and other payments, and for VAT must be submitted electronically. The same applies to the annual returns for corporation tax, trade tax, and VAT. There is also an electronic filing requirement for the financial statements supporting the return.

Payment of tax

Taxes are payable in quarterly instalments during the year, with a final settlement when the assessment is issued. The quarterly instalments are based on the estimated ultimate liability. Usually, this is the total tax due shown by the last assessment issued, as adjusted by any rate changes. The corporation tax instalments are due on the tenth day of March, June, September, and December. For trade tax, the due dates are the 15th day of February, May, August, and November. Failure to pay by the due date followed by a three day grace period leads to a penalty of 1% per month.

Corporation and trade tax assessments bear interest on the net amount payable after deduction of all credits and previous payments. The rate is 0.5% per month simple interest, and the period runs from 1 April of the second year following the year of assessment until the date set for payment. The start of the interest period is independent of the actual date of assessment. It thus runs in retrospect on assessments issued later, for example following a tax audit.

Rulings

Tax offices are able to issue binding rulings in respect of planned transactions, provided the taxpayer can show a particular interest in the tax consequences of the intended action. The fee varies between EUR 241 and EUR 109,736, depending upon the amount of tax involved (no fee is charged if the tax amount is less than EUR 10,000).

Advance pricing agreements (APAs)

A taxpayer can request the Central Tax Office to negotiate an APA on related-party transactions with a foreign tax authority on one's behalf. The vehicle is the mutual agreement procedure under the treaty, and the fee is a lump sum EUR 20,000 for each new agreement.

Tax audit process

Germany relies heavily on tax audits as a means of ensuring taxpayer discipline. Audits of small businesses are carried out at random, although those for larger operations and for the local subsidiaries of foreign groups tend to be regular. With some district variations, audits are usually conducted at four to five yearly intervals, though not always with equal intensity for the entire period since the auditors' previous visit.

Statute of limitations

The statutory limitation period for the issue or correction of assessments is four years from the end of the year in which the return was filed. If no return was filed, the period runs from the end of the third year following the end of the year of assessment. The four-year period is extended to five in cases of taxpayer negligence and to ten in the event of evasion.

The statutory limitation period for the collection of tax debts is five years from the end of the year in which payment became due.

Topics of focus for the tax authorities

Tax office reviews of tax returns prior to issuing the assessment notice and payment demand are often rather superficial. Audits, though, are intense, being field reviews on site often lasting for several weeks or even months. Companies with an international focus can expect significant audit emphasis on all aspects of their dealings with their foreign business partners. If the company is a member of an international group, its most important audit component will usually be its transfer pricing on its dealings with foreign-related parties and the relevant documentation. It is emphasised that these two topics are separate fields, as documentation deficiencies can lead to unfavourable estimates on the taxpayer, even if the taxpayer is able to justify the taxpayer's group-company pricing in terms of overall result.

Other issues

International exchange of information

In recent years, Germany has been vigorous in promoting the international exchange of tax information and has either agreed to obligations regarding the exchange of information in DTTs or concluded Tax Information Exchange Agreements (TIEAs) with countries with which it has not concluded a general DTT.

The Foreign Account Tax Compliance Act (FATCA) agreement of 31 May 2013 with the United States (US) on the automatic exchange between national tax authorities of bank account information on each other's residents has been in force since December 2013.

Moreover, Germany has signed and implemented into domestic law the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information as of 29 October 2014, which is based on the Convention on Mutual Assistance in Tax Matters (1988/2010), which itself was also signed and implemented into domestic law by Germany. The first exchange of information on financial accounts in tax matters based on the so-called common reporting standard (CRS) from Germany took place in September 2017.

Automatic exchange of information has further been pushed as part of the BEPS Project of the OECD. The Multilateral Competent Authority Agreement on the Automatic Exchange of Country-by-Country Reports as of 27 January 2016 was signed by Germany and implemented into domestic law in 2016. At the level of the EU, the Mutual Assistance Directive was extended with respect to the exchange of information regarding CbCR as well as advance cross-border tax rulings and APAs. Both amendments were implemented by Germany into domestic law in December 2016. The implementation of a further extension of the Mutual Assistance Directive to anti-money-laundering information is pending.

Furthermore, at the EU level, an extension of the EU Mutual Assistance Directive with reference to the exchange of information on cross-border tax planning schemes ('arrangements'), including the imposition of disclosure requirements on so-called intermediaries and taxpayers, was adopted in May 2018. The new rules will have to be implemented into domestic law by 31 December 2019 and shall be applicable from 1 July 2020. It should be noted that the disclosure rules also cover reportable cross-border arrangements where the first step is implemented between 25 June 2018 and 30 June 2020.

BEPS Project of the OECD

On the initiative of the G20 group of countries, the OECD developed a 15-point Action Plan to address BEPS by multinational companies. It aims to adjust local tax regimes and DTTs to keep pace with globalisation and technical developments.

Some jurisdictions and the European Union already started implementing parts of the actions into their local law. Moreover, in August 2016, the EU Anti-Tax Avoidance Directive (EU-ATAD) entered into force, which includes certain minimum standards to combat tax avoidance schemes and which must be primarily implemented into national law by 31 December 2018.

Germany has already transposed some of the measures developed by the OECD or provided for by the European Union into domestic law, in particular concerning the international exchange of information in tax matters. Further, Germany introduced a restriction on the deductibility of royalty payments to related parties in certain cross-border situations where a preferential tax regime is considered harmful, applicable from 2018 onwards.

In addition to the OECD proposals, Germany will also have to consider various standards as set forth by the European Union. The EU-ATAD must be implemented into local law in the main no later than 31 December 2018 and will generally be applied from 1 January 2019 onwards. In May 2017, the Council of the European Union further adopted a directive amending the EU-ATAD (ATAD II). The member states must transpose the ATAD II into local law by 31 December 2019 and apply it generally from 1 January 2020 onwards.

Together with numerous other countries, Germany signed the so-called 'Multilateral Instrument' (MLI) at an official signing ceremony on 7 June 2017. It is to be expected that Germany will conclude additional bilateral agreements with respect to each DTT; these amendments should both identify the articles to be amended and set their terms in order to implement the provisions of the MLI into domestic law to the extent they have been accepted by Germany.

Significant developments

Temporary tax amnesty regime ending 30 September 2018

On 29 December 2017, the Tax Amnesty Act (Act 955) received assent to grant amnesty to persons who have not complied with the tax laws at all or are in partial compliance with the tax laws.

The tax amnesty provides for the waiver of taxes, interest, and penalties to persons who will come forward to register with the Ghana Revenue Authority (GRA). Similarly, non-compliant registered taxpayers are eligible for a waiver of penalties and interest.

A person who qualifies for benefits under this amnesty is required to submit a written application and the tax returns required to be filed with the Commissioner-General (C-G) by 31 August 2018.

Introduction of an Africa Union Import Levy

The African Union Import Levy Act, 2017 (Act 952) was passed to impose a levy of 0.2% on the cost, insurance, and freight (CIF) value of eligible imports from Non-African Union Countries.

The GRA officially commenced the collection of the levy from 12 January 2018.

Enforcing the affixing of the excise tax stamp

Effective 2018, qualifying excisable products that are imported or locally manufactured are required to be affixed with GRA's specific tax stamps before they are delivered ex-factory, cleared from any port of entry, or sold at any commercial level.

This is in accordance with the provisions of the Excise Tax Stamp Act, 2013 (Act 873), and all importers and manufacturers of the affected products are required to register with the GRA.

Introduction of automatic exchange of financial account information

The Standard for Automatic Exchange of Financial Account Information Act, 2018 (Act 967) was passed to impose on financial institutions an obligation to report to the GRA information regarding certain financial accounts of an individual or entity and conduct due diligence with respect to those financial accounts.

With the presidential assent of the Act on 4 May 2018, the financial institutions are required to comply with requirements in the Act to enable Ghana to fulfil its international obligations to exchange financial account information from the year 2018.

Use of fiscal electronic device by value-added tax (VAT) registered persons

VAT-registered persons are to use a GRA-approved fiscal electronic device to issue a fiscal receipt to each customer. The fiscal receipt is to contain the information as specified in the Taxation (Use of Fiscal Electronic Device) Act, 2018 (Act 966). The VAT-registered person is also required to keep another fiscal electronic device as a back-up at a location on the premises of the person as determined by the C-G.

Amendments

One of the key targets of the government of Ghana is to shift the focus of economic management from taxation to production. In lieu of this, Parliament has passed into law the following amendments to provide additional incentives and increase compliance:

Direct taxes

- Providing accelerated depreciation over a period of two years on machinery and equipment imported in order to affix the excise tax stamp on excisable goods by an importer or manufacturer of excisable goods.
- Exemption from tax on income of privately-owned universities so long as they plough back all their profit into the business.
- Exemption from tax the income of an approved unit trust scheme, mutual fund, or real estate investment trust (REIT).
- Removal of the 5% tax on lottery winnings.
- Extension of the 5% National Fiscal Stabilisation Levy (NFSL) to the 2019 year of assessment.

Indirect taxes

- Amendment to the VAT (Exemption of Active Ingredients, Selected Inputs, and Selected Drugs or Pharmaceuticals) Regulations.
- Provision of letters of credit, bank guarantees, or insurance covered by an importer who intends to keep imported goods in a bonded warehouse.
- Introduction of a 7% VAT withholding on the taxable value of VAT-standard-rated supplies (subject to VAT of 17.5%) by appointed VAT-registered withholding agents.
- Extension of the 2% Special Import Levy to December 2019.

Initiatives

The 2018 budget also seeks to focus on granting concessions, widening the tax net, and improving tax compliance. As such, the following tax policies or initiatives have been proposed by the government to be undertaken during 2018:

Direct taxes

- Granting additional tax incentives to support agro-processing businesses under the Akufo-Addo Program for Economic Transformation (AAPET).
- Abolishing income tax on commissions to lotto agents to discourage illegal lottery activities.

- Inculcating the culture of filing income tax returns by linking access to government services to proof of filing of returns.
- Unifying pension schemes in line with the National Pensions Act to create some fiscal space for the government and streamline the pensions payment process.

Indirect taxes

- Abolishing duties on some agricultural produce processing equipment and machinery.

Tax administration

- Making Tax Clearance Certificates a requirement for significant private contracts to expand the tax net.
- Introducing the Voluntary Disclosure Procedures (VDP) regime to encourage voluntary compliance.
- Introducing Alternative Dispute Resolution (ADR) for timely resolution of tax disputes.

Taxes on corporate income

A resident person's worldwide income is assessed for tax. Income from business and investment (from both Ghanaian and foreign sources) is included in determining the resident person's assessable income.

The business and investment income of a non-resident person is included in the assessable income for a year of assessment if that income has a source in Ghana. Where a non-resident person has a Ghanaian permanent establishment (PE), any income connected with the PE is assessed to tax.

The general corporate income tax (CIT) rate is 25%.

Mining and upstream petroleum companies pay CIT at a rate of 35%, while companies principally engaged in the hotel industry pay a reduced rate of 22%.

The CIT rate for companies engaged in non-traditional exports is 8%, while banks lending to the agricultural and leasing sectors pay a CIT rate of 20% on income from those businesses.

National Fiscal Stabilisation Levy (NFSL)

The NFSL applies to specified companies and institutions to raise revenue for fiscal stabilisation of the economy. The NFSL is 5% on the profit (accounting profit) before tax on specified companies. The specified companies and institutions include:

- Banks (excluding rural and community banks).
- Non-bank financial institutions.
- Insurance companies.
- Telecommunications companies liable to collect and pay the communications service tax (CST) under the CST Act, 2008 (Act 754).
- Breweries.
- Inspection and valuation companies.
- Companies providing mining support services.
- Shipping lines, maritime and airport terminals.

The levy shall apply to the aforementioned industries irrespective of any existing exemption granted to an entity under any other laws in Ghana. The tax payable shall not be a deductible expense in arriving at the CIT liability of an entity, and the C-G shall issue an assessment to an entity for the amount of tax payable for the period.

NFSL is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December).

The NFSL was initially scheduled to end in December 2017. However, an Act of Parliament has extended the levy to 2019.

Local income taxes

Ghana has no local, state, or provincial government taxes on income. However, other local authority bodies (i.e. District Assembly/Municipal Authority) may also apply levies based on location of business properties.

Corporate residence

A company is resident if it is incorporated under the laws of Ghana or has its management and control exercised in Ghana at any time during a year of assessment.

Permanent establishment (PE)

The Income Tax Act, 2015 (Act 896) (ITA) recognises both Ghanaian PE and foreign PE.

A Ghanaian PE includes:

- a place in the country where a non-resident person carries on business or that is at the disposal of the person for that purpose
- a place in the country where a person has, is using, or is installing substantial equipment or substantial machinery
- a place in the country where a person is engaged in a construction, assembly, or installation project for 90 days or more, including a place where a person is conducting supervisory activities in relation to that project, or
- the provision of services in the country.

A foreign PE means a fixed place of business situated in a foreign country where the business is conducted continuously for at least six months, but excludes any place at which only activities of a preparatory or auxiliary nature are conducted.

Other taxes

Value-added tax (VAT)

Other than exempt goods and services, VAT and National Health Insurance Levy (NHIL) are charged on the following:

- Supply of goods and services made in Ghana.
- Importation of goods.

The standard VAT rate is 15% and the NHIL is 2.5%, except for supplies of a wholesaler or retailer of goods, which is a total flat rate of 3%.

VAT and NHIL are charged on the supply of goods and services where the supply is a taxable supply and made by a taxable person in the course of business.

Taxable persons or VAT-registered persons are to use a GRA-approved fiscal electronic device to issue a fiscal receipt to each customer. The fiscal receipt is to contain the information as specified in the Taxation (Use of Fiscal Electronic Device) Act, 2018 (Act 966).

VAT and NHIL are payable by the taxable person making the supply in the case of taxable supply and by the importer in the case of imported goods.

Most professional services are also subject to the same VAT and NHIL rates, including the following:

- Management services.
- Insurance brokerage and other services.
- Financial, tax, and economic consulting.
- Engineering and technical services.
- Accounting services.
- Courier services.
- Legal services.
- Provision of satellite television.
- Architectural services.
- Services rendered by surveyors.

Exports of goods and services are zero-rated. Unless specifically exempt, supplies of all goods and services are subject to VAT.

A person entitled to relief is required to pay the tax and apply for refund unless otherwise directed by the Minister responsible for finance.

The GRA's appointed VAT-registered withholding agents are expected to withhold 7% of the taxable value of goods and services when making payments for supplies subject to VAT at the standard rate of 17.5%.

Customs and excise duties

Customs and excise duties are imposed on the importation of goods at the port of entry and certain manufactured goods produced or imported into Ghana.

The following rates of excise duties apply on the ex-factory price:

Product	Rate (%)
Sachet water	0
Bottled water	17.5
Malt drink	2.5 to 17.5
Beer	10 to 47.5
Spirits	0 to 25
Cigars and cigarettes	175
Snuff and other tobacco products	175

The excise duty payable on malt drinks, beer, and stout, other than indigenous beer, is determined by the percentage of local raw materials used. Local raw materials do not include *water*.

In accordance with the Excise Tax Stamp Act, 2013 (Act 873), qualifying excisable products that are imported or locally manufactured are required to be affixed with tax stamps specified and supplied by the GRA before they are delivered ex-factory, cleared from any port of entry, or sold at any commercial level.

The affected products are:

- All cigarettes and other tobacco products.
- Alcoholic beverages whether bottled, canned, contained in kegs for sale, or packaged in any form.
- Non-alcoholic carbonated beverages whether bottled, canned, or packaged in any form.
- Bottled water.
- Any other excisable product prescribed by the Minister of Finance.

In addition, the Special Import Levy Act imposes a levy of 2% on the CIF value of certain imported goods.

The African Union Import Levy Act, 2017 (Act 952) also imposes a levy of 0.2% on the CIF value of eligible imports from Non-African Union Countries.

Property taxes

Property tax rates are payable by owners of immovable property to the local District Assembly/Municipal Authority. The rate of property tax differs depending on the location of the property.

Stamp taxes

Stamp duty is paid, at rates ranging between 0.25% to 1% and 0.05 Ghana cedi (GHS) to GHS 25, depending on the type of transaction and the instrument. A stamp duty of 0.5% applies on the initial stated capital and any subsequent increase in the stated capital.

The stamp duty is not a tax on transactions but on documents brought into being for the purposes of recording transactions. It is therefore a tax on documents or specific instruments that have legal effect, such as the following:

- Insurance policies.
- Awards of cost in matters of dispute.
- Conveyances or transfers on the sale of any property.
- Appointment letters of new trustees.
- Natural resource leases or licences (e.g. mining, timber).
- Agreements or memoranda of agreement.
- Bills of exchange (e.g. issue of cheques).
- Bills of lading.

Payroll taxes

Employers are required to withhold tax (pay-as-you-earn or PAYE) on employees' salaries and other emoluments, including benefits in kind, on a monthly basis at the graduated rates, with the highest rate at 25%. Employers are to remit the withheld taxes to the GRA by the 15th day of the subsequent month.

Failure to withhold the tax and remit to the GRA on the due date attracts an interest penalty of 125% of the statutory rate, compounded monthly and applied to the amount outstanding at the start of the period.

Employers are also required to file annual returns of employees by 31 March of the year following the year to which the returns relate.

Social security contributions

The social security contribution scheme is structured into three tiers, with the first two requiring mandatory contributions and the last one being voluntary. The employee is required to contribute 5.5% with the employer contributing 13%. Of the total contribution of 18.5%, 13.5% is contributed to the first tier and 5% to the second tier schemes.

Communications service tax (CST)

CST of 6% is levied on charges payable by both individual and corporate users of electronic communication services (ECS) provided by service providers other than private electronic communication services. The levy is also applicable to any form of recharge and is payable once a person makes a payment for ECS regardless of whether or not that person is authorised or permitted to provide ECS under the Electronic Communication Act (Act 755). Note that the definition of electronic communication includes interconnection.

Local business permits

Business ‘permits’ are payable annually to local District Assemblies or Municipal Authorities. The amount is dependent on the physical location where the business activity is conducted. It is therefore possible that if a taxpayer operates from two business locations in different regions, such permits would be paid to two different local authorities.

Branch income

The CIT rate on branch profits is the same as that on corporate profits.

However, a non-resident person that conducts activities in Ghana through a branch pays tax at 8% on earned repatriated profits, payable within 30 days. The portion of net profit of the resident person that corresponds to interest of the non-resident shareholders is treated as repatriated profits. The repatriated profit is also treated as a dividend distributed in accordance with the respective shares of the non-resident person.

Income determination

Inventory valuation

Section 11 of the ITA provides general guidance on the principles of stock (inventory) valuation for income tax purposes. A person making a determination of the cost of trading stock is required to use the absorption cost method. The owner of a trading stock or other fungible assets may determine the cost of that asset by using the first in first out (FIFO) method or the average cost method. The closing value of inventory is valued for tax purposes at the lower of cost or market value.

Capital gains

Capital gains are included as part of business income and taxed at the applicable CIT rate.

Dividend income

A dividend paid to a resident company by another resident company is exempt from tax where the company receiving the dividend controls, directly or indirectly, 25% or more of the voting power in the company paying the dividend.

Stock dividends

The issue of stock dividends is permitted under Section 74 (1) of the Ghana Companies Code 1963, Act 179. It is, however, subject to income tax at the dividend withholding tax (WHT) rate of 8%.

Interest income

Interest received by a resident company from another resident company is subject to WHT at a rate of 8%.

However, WHT does not apply to interest received by a resident financial institution.

Royalty income

Royalty income received by a company is included in the investment income and taxed at the applicable corporate tax rate with a general rate of 25%.

Mineral royalties

The mineral royalty rate is 5% of the total revenue earned from minerals (excluding petroleum and water) obtained from mining operations by a holder of a mining lease, restricted mining lease, or small-scale mining licence.

Exempt income

Specific exemptions from tax include the following:

- Income of a local authority.
- Income of a statutory or registered building society where only individuals are eligible to be members and the organisation does not engage in political party activities.
- Non-business income of a charitable organisation.
- Pensions.
- Income of organisations formed for the purpose of promoting social or sporting amenities.
- Income of a registered trade union.
- Gain or profit from the business of operating ships or aircraft by non-resident persons if an equivalent exemption is granted by the person's country of residence to persons resident in Ghana.
- Retirement contributions received by a retirement fund.
- Gains from the realisation of Ghana Stock Exchange (GSE) listed securities and Securities and Exchange Commission (SEC) approved securities.

- Income of an approved unit trust scheme, mutual fund, or REIT.
- Income of privately-owned universities when they plough back all their profit into the business.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income is taxed together with other income derived in Ghana, and double taxation is avoided through treaties or foreign tax credits. No special rules exist for taxing undistributed income of foreign subsidiaries.

Deductions

Depreciation and depletion

Depreciation of depreciable assets in the accounts of a business is not an allowable deduction in computing taxable profits. It is instead replaced by capital allowances at prescribed statutory rates, as follows:

Class	Assets	Rate
1	Assets pooled (allowance calculated on a reducing-balance basis). Mainly computers and data handling equipment together with peripheral devices.	40%
2	Assets pooled (allowance calculated on a reducing-balance basis). Mainly automobiles, buses, mini buses, construction and earth-moving equipment, trailers and trailer-mounted containers, plant and machinery used in manufacturing.	30%
3	Assets pooled (allowance calculated on a reducing-balance basis). Mainly railroad cars, locomotives and equipment, vessels and similar water transportation equipment, aircraft, public utility plant and equipment, office equipment and fixtures, and any other depreciable asset not elsewhere classified.	20%
4	Buildings, structures, and similar works of a permanent nature (allowance calculated using the straight-line method).	10%
5	Intangible assets.	Useful life
	Mining and petroleum expenditure (allowance calculated using the straight-line method).	20%
	Machinery and equipment imported in order to affix the excise tax stamp on excisable goods by an importer or manufacturer of excisable goods (allowance calculated using the straight-line method).	50%

Allowances are granted only on the following conditions:

- The taxpayer must own the asset.
- Capital expenditure must be incurred.
- The asset must be used in the trade.
- The asset must be in use up to the end of the basis period.
- Capital allowances are granted for every year in which the asset is in use. Balancing allowances and charges are made, as the case may be, on disposal of the asset.

For intangibles, such as goodwill, patents, trademarks, and copyrights, the law allows for capital allowance deduction over the useful life of the asset.

Start-up expenses and pre-operating costs

Although the tax law does not specifically mention start-up expenses or pre-operating costs, generally a deduction is allowed for start-up and pre-operating costs incurred by a business, provided such expenses are wholly, exclusively, and necessarily incurred in the production of income of the taxpayer.

Interest expenses

Interest incurred on loans used to generate the income of a business is ordinarily deductible. Restrictions apply on interest payments on related loans. *See Thin capitalisation in the Group taxation section*.

Financial costs

Deductions for financial costs other than interest are limited to the sum of:

- financial gains derived by the person that are to be included in calculating the income of the person from the investment or business for the year of assessment, and
- 50% of the chargeable income of the person for the year from the business or investment calculated without including financial gains derived by the person or financial costs incurred by the person.

Bad debts

A deduction is allowed for bad debts incurred in the normal course of business, other than advances made on capital accounts. A bad debt is allowed as a deduction if the C-G is satisfied that the taxpayer has taken all reasonable steps to pursue payment and the person reasonably believes payment will not be made.

Any amounts recovered in respect of a bad debt previously written off should be included in income and subject to tax accordingly.

An existing debt that becomes a bad debt after a 50% or more change in underlying ownership is not allowed as a bad debt deduction after the change in ownership has taken place.

Charitable contributions

The following contributions/donations are allowable as deductions in ascertaining the taxable income of a person:

- Contributions made to a charitable institution or fund approved by the government.
- Payments towards a scholarship scheme approved by the government for a technical, professional, or other course of study.
- Donations made for the purpose of any rural or urban area and approved by the government.
- Donations for the purpose of sports development approved by the government.
- Donations to the government for worthwhile government causes approved by the C-G.

Fines and penalties

Fines and penalties arising as a result of non-compliance with the provisions of the tax law are generally not allowable deductions.

Taxes

Any income taxes, profit taxes, or other similar taxes are not deductible in determining taxable income.

Other significant items

No other special deductions are allowed. Principal non-deductible expenses include the following:

- Domestic or private expenses, including cost of travel between residence and place of business or employment.
- Any disbursement or expense not being wholly and exclusively paid or expended for the purpose of acquiring income.
- Capital withdrawn or any sum employed or intended to be employed as capital.
- Capital employed in improvement.
- Any sum recoverable under an insurance contract of indemnity.
- Rent of or any expense in connection with premises or a part of premises not occupied or used for the purpose of producing business income.
- Any payment to a savings or other society or fund unless specifically allowed by the C-G.

Net operating losses

Tax losses can be carried forward for all sectors and deducted from assessable income for the three years immediately following the year in which the loss was incurred. Specified priority sectors can carry forward their tax losses for up to five years.

Carryback of losses is permitted for persons deriving income relating to a long-term contract (except where there is a more than 50% change in underlying ownership within a period of three years).

A long-term contract of a business includes a contract for manufacture, installation, or construction that is not completed within the company’s accounting year in which it is commenced.

Payments to foreign affiliates

The Transfer Pricing Regulations 2012, (LI 2188) require that payments or transactions between persons in a controlled relationship are conducted at arm’s length. A transaction is conducted at arm’s length between persons in a controlled relationship if the terms of the transaction do not differ from the terms of a comparable transaction between independent persons. The C-G may disregard or disallow transactions if they are deemed to be fictitious or do not have a substantial economic effect and the form does not reflect its substance.

Group taxation

No form of combined reporting of results of operations by a group or affiliates is permitted.

Transfer pricing

The Transfer Pricing Regulations follow the internationally accepted guidelines published by the Organisation for Economic Co-operation and Development (OECD), only with a much broader perspective on the nature of entities and transactions.

The Regulations cover transactions between related parties, including PEs and employees, and also prescribe the transfer pricing methods and documentation that entities are required to maintain and retain.

The Regulations also require entities with related-party transactions to file a return on an annual basis.

Thin capitalisation

Interest expenses and foreign exchange currency losses incurred on related-party debt by an entity (other than a financial institution) in which 50% or more of the underlying ownership or control is held by an exempt person, either alone or together with an associate, are not allowed as a deduction in arriving at the chargeable income of the entity if the entity is thinly capitalised. An entity controlled by an exempt person is deemed to be thinly capitalised if its debt-to-equity ratio exceeds the ratio 3:1.

Thin capitalisation provisions do not apply to resident financial institutions.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in the tax laws of Ghana.

Tax credits and incentives

Foreign tax credit

A resident is entitled to a credit in respect to any foreign income tax paid, to the extent to which the tax paid is in respect of the resident's foreign taxable income. The foreign tax credit available on a specific income type should not exceed the average rate of Ghanaian income tax of the resident for a year.

Inward investment

Under the Ghana Investments Promotion Centre Act, 2013 (Act 865), various incentives are available to encourage strategic or major investments in the country, particularly in the areas of agriculture; manufacturing industries engaged in export trade or using predominantly local raw materials or producing agricultural equipment, etc.; construction and building industries; mining; and tourism.

Incentives generally include exemption from customs import duties on plant and machinery; reduced CIT rates; more favourable investment and capital allowances on plant and machinery; reduction in the actual CIT payable, where appropriate; retention of foreign exchange earnings, where necessary; guaranteed free transfer of dividends or net profits, foreign capital, loan servicing, and fees and charges in respect of technology transfer; and guarantees against expropriation by the government.

Capital investments

Venture capital tax incentives include the following:

- Relief from stamp duty in each year on subscriptions for new equity shares in venture capital funds.
- Interest and dividends from investment in a venture capital company are subject to tax at 1% for the first ten years of assessment.
- Chargeable income is subject to tax at 1% for the first ten years of assessment.
- Carryforward of losses for five years after the year of disposal.

- Carryforward of losses from disposal of investment in a venture capital subsidiary for five years after the ten years of assessment.

Free zone developers/enterprises

Companies registered to operate as free zone developers/enterprises do not pay CIT for the first ten years of operation. After the ten year corporate tax holiday has expired, the CIT rate on export outside the domestic market is 15% while income earned from sales in the domestic market is taxed at 25%.

Construction of residential premises

The income of a certified company from a low cost housing business is subject to tax at 1% for a period of five years of assessment.

Withholding taxes

Income	WHT rate (%)	Final tax
Resident persons:		
Interest (excluding individuals and resident financial institutions)	8	No
Dividend	8	Yes
Rent (on residential properties as investment income)	8	Yes
Rent (on commercial properties as investment income)	15	Yes
Royalties and natural resource payments	15	No
Fees to lecturers, invigilators, examiners, part-time teachers, and endorsement fees	10	Yes
Commissions to insurance agents and sales persons	10	No
Fees, emoluments, and other benefits to a resident director, manager, or board member of a body of persons	20	No
Commissions to lotto agents	10	No
Supply of goods exceeding GHS 2,000	3	No
Supply of works exceeding GHS 2,000	5	No
Supply of services exceeding GHS 2,000 (payments to persons other than individuals)	7.5	No
Payment to individuals for provision of services	7.5	No
Payment to petroleum subcontractors	7.5	No
Payment for unprocessed precious minerals	3	No
Non-resident persons:		
Dividend	8	Yes
Royalties, natural resources payments, and rents	15	Yes
Management, consulting, and technical service fees, and endorsement fees	20	Yes
Repatriated branch after tax profits	8	Yes
Interest income	8	Yes
Short-term insurance premium	5	Yes
Income from telecommunication, shipping, and air transport	15	Yes
Payment to petroleum subcontractors	15	Yes

Double tax treaties (DTTs)

Ghana has DTTs with the following countries for the relief from double taxation on income arising in Ghana:

Recipient	Dividends (%) (1)	Interest (%)	Royalties (%)	Technical or management service fees (%)
Belgium	5/15	10	10	10
Czech Republic (4)	6/6	10	8	8
Denmark	5/15	8	8	8
France	7.5/15	10	10	10
Germany	5/15	10	8	8
Ireland (4)	7	7	8	10
Italy	5/15	10	10	10
Mauritius (4)	7	7	8	10
Morocco (4)	5/10	10	10	10
Netherlands (3)	5/10	8	8	8
Singapore (4)	7/7	7	7	10
South Africa	5/15	5/10 (2)	10	10
Switzerland (3)	5/15	10	8	8
United Kingdom	7.5/15	12.5	12.5	10

Notes

1. The lower rate applies where the recipient holds at least 10% of the shares. The higher rate applies in any other case.
2. 5% for non-resident banks. 10% in any other case.
3. The DTT between Ghana and the Netherlands, which has been in force since 2009, has been amended. The agreement adds a new article on entitlement to benefits, replaces the article on assistance in tax collection, and amends the articles on exchange of information and territorial extension.

   The DTT between Ghana and Switzerland has been amended to include procedures for information requests.

4. The Parliament of Ghana is yet to ratify the DTTs with the Czech Republic, Ireland, Mauritius, Morocco, and Singapore.

The government of Ghana is pursuing DTTs with various countries, including Sweden, Syria, the United Arab Emirates, and the United States.

Tax administration

Taxable period

The tax year runs from 1 January to 31 December. Companies with financial periods other than the calendar year are taxed on their financial period ending during the calendar year.

Tax returns

Companies are expected to submit a tax return not later than four months after the end of the financial year. They may file an application for extension of filing time for not more than two months.

Payment of tax

CIT is due for payment at the same time as the due date for filing the return. The tax is payable in four equal instalments at the end of each quarter (i.e. March, June, September, and December) in each year of assessment, but such payments are not deemed to be the actual tax payable.

At the end of the year, all taxpayers are required to file final tax returns and pay any tax outstanding. The final return and tax are due within four months after the financial year-end.

There are also instances where the C-G may issue an additional assessment after conduct of an audit. Where such assessment is served, the tax is payable within 30 days after service of the notice. At the discretion of the C-G, the time for payment may be extended.

Penalties

Where tax is not paid by the due date, a penalty is calculated at 125% of the statutory rate, compounded monthly, and applied to the amount outstanding at the start of the period.

Tax audit process

The GRA assesses taxpayers on a regular basis. The ITA gives powers to persons authorised by the C-G to gain full and unlimited access to the taxpayers' premises, records, and electronic information. Industries such as mining, upstream oil and gas, and financial institutions are more likely to be selected for a tax audit. Also, request for a tax refund is also likely to lead to a tax audit. The GRA usually gives notice of its intention to perform a tax audit and, after performance, prepares a report on its findings, which is then shared with the taxpayer.

Statute of limitations

The Revenue Administration Act, 2016 (Act 915) (RAA) requires all taxable persons to maintain records of all receipts and payments, revenue and expenditure, and all assets and liabilities for a period of not less than six years. This is in conjunction with the fact that the Statute of Limitation bars actions to recover tax after 12 years.

Automatic exchange of financial account information

The Standard for Automatic Exchange of Financial Account Information Act, 2018 (Act 967) imposes on financial institutions an obligation to report to the GRA information regarding certain financial accounts of an individual or entity and conduct due diligence with respect those financial accounts.

The reporting financial institution is required to submit an annual report no later than six months following the end of the calendar year to which the report relates.

Topics of focus for tax authorities

Topics of focus for the tax authorities include:

- Tax refunds.
- CST.
- Transfer pricing sensitisation of taxpayers.
- NFSL.

Other issues

Local Content and Local Participation Regulations

The Minerals and Mining General Regulations 2012 (LI 2173) applicable to mining entities obligate mining contractors and subcontractors to conform to the requirements for recruitment of expatriates, train Ghanaians, and give preference to local products and services in their operations.

The Petroleum (Local Content and Local Participation) Regulations, 2013 (LI 2204) aim at providing a transparent monitoring system to meet the objectives of the government's Local Content Policy. Further, the Regulations are expected to help facilitate job creation through the use of local expertise for goods and services, business, and financing in the petroleum industry value chain.

The Energy Commission (Local Content and Local Participation) (Electricity Supply Industry) Regulations, 2017 (LI 2354) compels businesses operating in the electricity supply industry (including renewable energy) to comply with the defined percentages of Ghanaian equity ownership, utilisation of local human and material resources, and services in their businesses.

Ring fencing for mining and petroleum entities

In determining the chargeable income for a basis period, mining companies are not able to deduct expenses incurred in one mining area against revenue from another mining area.

Similarly, companies engaged in petroleum operations are required to treat the activities of a petroleum right as an independent activity separately from other rights.

Tax Amnesty

With the enactment of the Tax Amnesty Act (Act 955), the government promises to forgive persons who will come forward to register with the GRA their taxes, interest, and penalties for all years up to and including 2017 years of assessment. Such a person must register with the GRA on or before 30 September 2018.

Similarly, existing taxpayers who partially fulfilled their tax obligations once they pay all outstanding taxes will be eligible for a waiver of penalties and interest. The taxpayer must submit the tax returns on or before 30 September 2018 and pay all assessed and outstanding taxes.

A person who qualifies for benefits under this amnesty is required to apply and file the mandatory tax returns to the C-G by 31 August 2018. The amnesty does not cover taxes or sanctions the GRA is already considering.

Significant developments

The Gibraltar Budget

In his budget speech on 26 June 2017, the Chief Minister announced no changes relevant to corporate income tax (CIT).

Taxes on corporate income

Companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The standard CIT rate is 10%, with utility and energy providers and companies that abuse a dominant position paying a higher rate of 20%. For telecommunications companies, the 10% rate will apply to the gains and profits arising from their non-telecommunications business and activities.

Corporate residence

A company will be considered resident in Gibraltar if the management and control of its business is exercised from Gibraltar or from outside Gibraltar by persons who are ordinarily tax resident in Gibraltar.

The location of central management and control will be established under legal principles laid down in the United Kingdom (UK) and is the place of the highest form of control and direction over a company's affairs, as opposed to decisions on the day-to-day running of the business.

Permanent establishment (PE)

Gibraltar has not entered into any double tax treaties (DTTs); consequently, there are no provisions on PE from a general treaty perspective. Nevertheless, the Gibraltar Tax Commissioner accepts the definition of PE set out in Article 5 of the Organisation for Economic Co-operation and Development (OECD) Model Convention.

Under the Gibraltar Companies Act 2014 (CA 2014), foreign companies that establish a place of business in Gibraltar or have a branch in Gibraltar must register with the Registrar one month after commencing business in Gibraltar. Under the CA 2014, the definition of a company includes a foreign company registered in Gibraltar. The profits or gains of a foreign company registered in Gibraltar shall be assessable on the accounting period beginning whenever that company is first registered in Gibraltar.

Other taxes

Value-added tax (VAT)

There is no VAT in Gibraltar.

Import duties

Goods imported into Gibraltar are subject to import duty at varying rates. The most noticeable exceptions are fuel, tobacco, and alcohol, which are subject to a fixed amount of duty regardless of the value, and motor vehicles, which attract duty at various rates of between 2% and 35% of the value, depending on the type and size of engine and whether it is a private or dealer importation.

Excise taxes

There is no provision for excise taxes in Gibraltar.

Property tax

A general business property rate is levied annually on all businesses in Gibraltar. The amount varies depending on the property and is subject to an annual review.

Stamp duty

Stamp duty is payable on the transfer or sale of any Gibraltar real estate or shares in a company owning Gibraltar real estate (on an amount based on the market value of said real estate) at the following rates:

- 200,000 British pounds (GBP) or less: 0%.
- Between GBP 200,001 and GBP 350,000: 2% on the first GBP 250,000 and 5.5% on the balance.
- Over GBP 350,000: 3% on the first GBP 350,000 and 3.5% on the balance.

Stamp duty is also payable on mortgages secured on Gibraltar real estate at the rate of 0.13% for mortgages less than GBP 200,000 and 0.20% for mortgages over GBP 200,000.

Payroll taxes

Collection of employee taxes is initially effected under a pay-as-you-earn (PAYE) system. Employers are required to operate the system without exception, keep appropriate records, and complete the necessary filings.

The PAYE regulations require each employee to obtain from the Commissioner of Income Tax a PAYE allowances certificate, which allocates a code to the employee. The employer is required to use tax tables issued by the Income Tax Office to calculate and deduct tax from emoluments in accordance with the employee's applicable code. The employer is then obligated to pay over to the Commissioner any tax so deducted by the 15th day of the following month.

An employer must also account for social insurance payments in a similar manner, deducting and paying over the employee tax as well as accounting for employer's social insurance (*see below*).

Social insurance contributions

Social insurance contributions are payable by every employer in respect of every employee.

Employer contributions are 20% of gross earnings, subject to a minimum of GBP 16.50 per week (GBP 71.50 per month) and a maximum of GBP 36.50 per week (GBP 158.17 per month).

Gaming tax

Gaming tax is levied at 1% of the gaming income. The tax paid is subject to a minimum of GBP 85,000 and maximum of GBP 425,000.

Capital duty

Capital duty of GBP 10 is payable on the initial authorisation of share capital or any subsequent increase thereto.

Branch income

The basis for taxation of branches of foreign enterprises is the same as for corporations.

Allowable head office charges or expenses incurred by a Gibraltar branch for the common purpose of the company and its branches, or for the purpose of the head office or another branch exclusively, are limited to 5% of turnover of the Gibraltar branch (*see Payments to foreign affiliates in the Deductions section*).

Income determination

Generally, companies are subject to Gibraltar taxation on income accrued in and derived from Gibraltar.

The 'accrued in and derived from' principle is defined by reference to the location of the activities that give rise to the profits.

Should the activity of a business be a licensable activity under Gibraltar law, the profits from this activity will be deemed to arise in Gibraltar. Furthermore, the profits of a business that can lawfully be transacted in Gibraltar, through a branch or any form of PE, by virtue of the fact that it is licensed in another jurisdiction that enjoys passporting rights into Gibraltar and which would otherwise require such licence and regulation in Gibraltar shall be deemed to arise in Gibraltar.

In the case of royalty income and inter-company interest income, both revenue streams are deemed to accrue in and derive from Gibraltar where the entity in receipt of the income is a Gibraltar-registered company.

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base-stock or the last in first out (LIFO) method.

Capital gains

Capital gains are not subject to tax in Gibraltar.

Dividend income

There is no charge to tax on the receipt by a Gibraltar company of dividends from any other company.

Interest income

Companies with a banking or money lending licence and earning interest as a trading receipt will have that interest treated as income chargeable to tax.

Interest received or receivable by a Gibraltar company arising from an inter-company loan will be chargeable to tax at the standard CIT rate. Where the interest received or receivable is less than GBP 100,000 *per annum*, the interest is exempt from any charge to taxation.

All other interest received or receivable is not taxable in Gibraltar.

Royalty income

Income from royalties received or receivable by a Gibraltar company is taxable at the standard CIT rate.

Foreign income

Foreign income is not normally taxed in Gibraltar. Exceptions to this rule are interest income and royalty income (*see above*).

Deductions

For the purpose of ascertaining assessable income, all expenses wholly and exclusively incurred in the production of income shall be deducted.

Capital allowances

The first GBP 30,000 of qualifying expenditure on plant and machinery (including fixtures and fittings) and the first GBP 50,000 of qualifying expenditure on computer equipment is fully deductible in the first year as a 'first year allowance'.

Thereafter, qualifying assets are pooled and are subject to an annual capital, or wear and tear, allowance. Allowances are available for plant and machinery (including fixtures and fittings), computer equipment, and motor vehicles at the rate of 15% (20% for companies that are obligated to pay the higher CIT rate, *see the Taxes on corporate income section*) and are calculated on a reducing-balance basis.

Capital allowances for industrial buildings are deductible at the rate of 4% *per annum* on a straight-line basis.

Goodwill

Amortisation of goodwill is not a deductible expense.

Start-up expenses

Expenditure incurred with a view to carrying on a trade is treated as incurred on the first day on which the trade is carried on for the purposes of computing the profits or gains of the trade.

Interest expenses

Full deduction is available in respect of interest expenses, subject to anti-avoidance rules (*see the Group taxation section for more information*).

Bad debt

Only specific bad debts or specific bad debt provisions are deductible to the extent that they are respectively estimated to be bad during the said period, notwithstanding that such bad debts were payable prior to the commencement of the period. General doubtful debt provisions are not an allowable expense.

Charitable contributions

A charitable donation is not considered as having been wholly and exclusively expended for the purposes of the production of the income of the trade and is therefore not allowable as a deduction for tax purposes.

Fines and penalties

Fines and penalties, including those resulting from late payment of taxation or from failure to make the necessary tax submissions, are deemed to be a tax and are therefore not a deductible expense.

Taxes

No deduction is allowed for any tax charges under the Income Tax Act.

Other significant items

Additionally, no deduction is allowed in respect of the following:

- Domestic or private expenses.
- Expenses not incurred wholly and exclusively in the generation of income.
- Any expenses of a capital nature.
- Any sum recoverable under an insurance contract or contract of indemnity.
- Property expenses not incurred for the purposes of producing income.
- Depreciation of assets (although capital allowances are available, *see above*).
- Employee remuneration not accompanied by a certified statement of name, address, and amount of remuneration (in respect of Gibraltar employment only).
- Certain business entertainment expenditure falling within guidelines published by the Commissioner.
- Interest paid to a non-Gibraltar resident that is more than a reasonable commercial rate.

In the case of a company that has income, some of which is chargeable to tax and some of which is not, the deductions allowed shall be apportioned on a pro-rata basis between the chargeable and non-chargeable income.

Net operating losses

A trading loss incurred in an accounting period may be offset against trading income arising in the same period or subsequent period, provided that within a period of three years there has not been both a change in the ownership of the company and a major change in the nature or conduct of the trade.

There is no provision for the carrying back of losses.

Payments to foreign affiliates

In the case of branches, the amount of general head office expenses incurred that is deductible is limited to 5% of its turnover.

The Income Tax Act includes anti-avoidance provisions. These provisions state that if the amount charged for goods or services by a connected person is not at arm's length, then the expenses that are allowed are subject to the lower of:

- the expense
- 5% of the gross turnover of the company, or
- 75% of the pre-expense net profit of the company.

Group taxation

Companies are assessed on an individual basis, and trading losses of group members may not be offset against profits of other members of the group.

The Income Tax Act contains a generic anti-avoidance clause that allows the Commissioner to disregard an arrangement that the Commissioner believes is fictitious or artificial. In addition, it includes the following specific anti-avoidance measures.

Where a taxpayer seeks to reduce their liability to tax by creating an artificial split between activities in Gibraltar and outside of Gibraltar, the Commissioner shall use anti-avoidance provisions to defeat such an attempt.

Transfer pricing

The amount of interest payments to connected persons that are in excess of that payable at arm's length will be deemed to be a dividend. Where the amount charged for goods and services by connected persons is not at arm's length, this will be disallowed as a taxable expense. Any expenses allowed will be subject to the lesser of (i) the expense, (ii) 5% of the gross turnover of the company, and (iii) 75% of the pre-expense profit of the company.

Country-by-country (CbC) reporting

Under the CbC reporting regime, a Gibraltar tax resident company that is the ultimate parent entity or surrogate parent of a multinational enterprise group with consolidated revenue of at least 750 million euros (EUR) is required, for fiscal years commencing on or after 1 January 2016, to file, within 12 months of the end of the fiscal year, a CbC report containing information on its group entities and jurisdictions in which the group operates.

A Gibraltar constituent entity of a multinational enterprise group with consolidated revenue of at least EUR 750 million is required in cases where it is not obligated to file a CbC report to notify the Gibraltar tax authorities of the identity and jurisdiction of tax residence of the entity in the group that is required to report.

Thin capitalisation

Interest paid on a loan to related parties that are not companies (or loans where security is provided by related parties) where the ratio of the value of the loan capital to the equity of the company exceeds 5:1 will be considered as dividend payments and thus not deductible for tax purposes. This provision is not applicable to Gibraltar banks or money lenders.

Back-to-back loans

Since interest income is not taxable on back-to-back loans, the interest expense is not deductible.

Dual employment

Income from dual employment contracts is taxed in Gibraltar if both employers are connected persons.

Transfer of assets abroad

Where assets are transferred abroad with the purpose of avoiding tax and the taxpayer has the power to enjoy these assets either now or in the future, then any income or benefits received from these assets will be deemed to be income chargeable to tax.

Controlled foreign companies (CFCs)

There are no CFC rules in Gibraltar. However, under the general anti-avoidance rules, the Commissioner may disregard any CFC or transaction with such a CFC where the Commissioner believes that it is fictitious or artificial.

Tax credits and incentives

Foreign tax credit

Relief is available in Gibraltar in respect of foreign tax paid. This applies to any person who has paid or is liable to pay tax under the Income Tax Act in respect of profits or gains derived from sources within Gibraltar or within any other jurisdiction who can prove to the satisfaction of the Commissioner of Income Tax that one has paid or is liable to pay income tax in the other jurisdiction in respect of the same profits or gains.

The relief available in respect to those profits or gains shall be of an amount equal to the lesser of the two following amounts:

- The taxation under the Income Tax Act in respect of the said profits or gains.
- The income tax in the other country, territory, or jurisdiction in respect of that income.

Development aid

In order to encourage private development in Gibraltar, promoters and developers of approved projects are offered certain incentives, such as tax relief, import duty relief, and rates relief.

In order to qualify for the above reliefs, the project needs to be a new project that is for the economic benefit of Gibraltar and the aim of which is:

- to create a tangible immovable asset in Gibraltar that will remain in existence after the applicant has ceased to derive the benefits under the licence
- to provide more than two additional units of housing accommodation in Gibraltar
- to contribute materially to the development of the tourism industry in Gibraltar
- to afford any new employment opportunities or career prospects in Gibraltar, or
- to materially improve the economic or financial infrastructure of Gibraltar.

The project needs to be completed within a specified time (dependent on the type of project) following the issue of the licence, and the applicant must not expend less than the prescribed amount for the project.

Applications for development aid must be made to the Minister for Trade.

Deduction of approved expenditure on premises

For taxpayers with an interest in a building situated in Gibraltar, an allowance is available for approved expenditure on the painting, decorating, repair, or enhancement of the frontage of that building.

The approved amount will be available as a deduction against the taxpayer's income. This deduction is in addition to any deduction, relief, or allowance given in accordance with any other provision of the Income Tax Act in respect of the same expenditure.

The claim for the deduction must be made within two years after the end of the year of assessment with respect to which the deduction is claimed.

Property investment incentive

Owners of property constructed in Gibraltar during the period from 1 July 2016 to 31 December 2018 that is rented for residential purposes will receive a tax credit equal to the tax payable on the profits earned on the first 24 months of rent occurring in the first five years after the completion of construction of that property.

Commercial property rate incentives

There are early payment discounts available on property rates, depending on the business conducted from the premises.

Green incentives

A one-off tax deduction is available against assessable income (with the percentage to be verified and subject to the discretion of the Commissioner of Income Tax) on the investment made by an individual, company, or business that makes a significant improvement to the Energy Performance Certificate (EPC) rating of their premises.

Training costs

Training costs borne by an entity for employees studying for a qualification are allowed as an expense against the profits of a business at the rate of 150%. It needs to be shown that the costs are relevant to the work, either current or planned, carried out by an employee for their employer.

Small business and start-up incentives

All newly established businesses in Gibraltar are able to claim 100% of their eligible capital allowances in the first year of trade.

Businesses with ten employees or less will receive a credit of GBP 100 per employee in respect of social insurance contributions. For new businesses in the first year of operation, the credit is extended to 20 employees.

A tax credit equal to the lower of 200% or GBP 5,000 of architectural fees and fees charged by the government in respect of successful planning applications is available in the first three years of operation.

New businesses set-up in Gibraltar between 5 July 2016 and 30 June 2017 are eligible for a tax credit equal to the tax due, up to a maximum of GBP 50,000 *per annum,* over each of the first three financial years of trading. This incentive is subject to the following conditions:

- It must be a new business set-up in Gibraltar and not the transfer of a business already existing in Gibraltar.
- The business must employ at least five people.
- The business must be a company or limited partnership but not an individual trading in its own name.
- The tax credit does not carry forward from one year to the next. Consequently, if the company does not make a profit and is not able to use the credit, it will be lost.

Withholding taxes

There are no withholding taxes (WHTs) in Gibraltar, except in the following cases:

- Payments to subcontractors in the construction industry. Unless the subcontractor is in possession of an exemption certificate, tax is withheld at the rate of 25% of the amount that relates to the labour and profit element of the contract.
- Payments to employees under the PAYE system. Under the PAYE regulations, employers are obligated to deduct an amount of tax in accordance with the employee's tax code.

Tax administration

Taxable period

The taxable period is the accounting period of the company, which begins on the later of the beginning of the accounting period and the date when the company first receives a source of taxable income and ends on the earlier of the end of the accounting period, 12 months from the beginning of the accounting period, or the date on which trade ceased.

Tax returns

Companies with income subject to tax in Gibraltar are required to file a return and calculate their tax liability for the year. The return, together with the estimated liability, needs to be accompanied by payment of the tax due nine months after the date of the company's financial year end.

Companies with assessable income of more than GBP 1.25 million are required to file audited accounts together with the tax return.

Where companies have assessable income of less than GBP 1.25 million, the accounts can be accompanied by an Independent Accountant's Report.

Companies with no assessable income are still required to file tax returns. The accounts to be filed depend on the size of the company as determined by the CA 2014. Full audited accounts are required except where the company qualifies as 'small', which would mean satisfying two of the following criteria for two consecutive years:

- Net turnover of less than GBP 10.2 million.
- Total assets of less than GBP 5.1 million.
- Average employees of less than 50.

Where the company is 'small' and has no assessable income, only an abridged balance sheet needs to be filed.

Payment of tax

Companies are required to make payments on account of future liabilities on 28 February and 30 September in each calendar year. Each payment should be equal to 50% of the tax payable for the relevant accounting period. The relevant accounting period is a prior accounting period whose tax payable date (i.e. nine months after the date of the company's financial year end) precedes the first payment on account date for the accounting period in question. The relevant table in Schedule 10 of the Income Tax Act can be used to determine the correct relevant accounting period for the purposes of calculating the payments on account.

The balance of tax due (i.e. the actual liability less payments on account) is payable on the date of filing of the return.

Penalties and fines

The following penalties and fines are applicable:

- For the late payment of tax, there is a penalty of 10% of the amount of tax due on the day immediately after such payment was due. If unpaid within 90 days, a further amount of 20% of the tax due and the surcharge mentioned that remains unpaid shall become immediately due and payable. A surcharge imposed shall be deemed to be part of the taxation payable.
- Failure to file a return by the due date will result in a penalty of GBP 50, with a further penalty of GBP 300 if the return is not submitted within three months after the due date. If the failure to file continues beyond six months, an additional penalty of GBP 500 is payable.
- Failure to respond to a notice or request to submit information or documentation will result in a fine of GBP 200 on the day the failure occurs and a further penalty of GBP 1,000 if the failure to comply continues one month after the applicable day for delivery of the accounts as referred to in the notice. Failure to comply beyond a three month period, if convicted, can result in imprisonment.
- For fraudulently, recklessly, or negligently delivering to the Commissioner an incorrect return, accounts, or information, there is a fine of up to 150% of the difference between the actual tax due and the tax due as per the original declaration. The amount of the penalty will depend on:
  - the amount of the tax lost and/or delayed
  - the gravity of the offence (i.e. if deliberate or an honest mistake), and
  - the level of cooperation in the investigation.

- The Commissioner of Income Tax may publish details of a person who has failed to pay tax due under the Income Tax Act or under the PAYE regulations in the Gibraltar Gazette if:
  - the Commissioner has notified the person of the Commissioner's intention to do so 30 days prior to the publication
  - the person has failed to pay tax due to an amount of GBP 5,000, and
  - the tax due to be collected or paid has not been collected or paid for a period of at least three months after the due date.
- Failure to notify the Commissioner of an arrangement, the main benefit of which is to avoid the payment of tax, will result in a fine of GBP 200 on the day the failure occurs and a further penalty of GBP 1,000 if the failure to comply continues one month after the applicable day for providing the information.

Tax audit process

The Gibraltar tax system is based on self-assessment. However, the Income Tax Office has powers to make an enquiry into the tax return of a company within a period of 12 months from the date when the return is due to be filed or, if filed later than the deadline, 12 months from the date it was filed. If the Commissioner of Income Tax believes a return to be fraudulent, the above time limits will not apply.

A taxpayer may appeal against a disputed assessment by notice in writing addressed to the Commissioner within 28 days of the date of service of the notice of the assessment.

Statute of limitations

The Commissioner has up to six years following the date of assessment to revise any incorrect assessments. There is no limit where the incorrect assessment is as a result of fraud, wilful default, or neglect.

Topics of focus for tax authorities

There are currently no particular topics of focus for the tax authorities.

Other issues

Intergovernmental agreements (IGAs)

Gibraltar has entered into Model 1 IGA reciprocal agreements with both the United States (US) and United Kingdom. The Gibraltar/UK agreement was signed 21 November 2013 and the Gibraltar/US agreement was signed 8 May 2014. Legislation in the form of regulations have been passed.

Information will be exchanged by the Competent Authorities nine months after the year-end. The first due date for exchange by the Competent Authorities was 30 September 2016 for the years ended 31 December 2015 and 2014 for UK reportable accounts and was 30 September 2015 for the year ended 31 December 2014 for US reportable accounts. The reporting deadline for reportable accounts is 31 July.

The Gibraltar government has committed to be an early adopter of the OECD Common Reporting Standard (CRS). The legislation was enacted on 22 December 2016. The first date that information was exchanged by the Competent Authorities was 30 September 2017 for the period ended 31 December 2016. The reporting deadline for reportable accounts is 31 July.

Gibraltar

On 25 May 2017, the Gibraltar government published an amendment to the Income Tax Act 2010. The amendment, which entered into operation on 5 June 2017, introduces the Country-by-Country Reporting Regime into Gibraltar as part of Article 13 of the OECD Base Erosion and Profit Shifting (BEPS) Action Plan.

Under this regime, where a Gibraltar tax resident company is the ultimate parent entity of a multinational enterprise (MNE) group with consolidated revenue of at least EUR 750 million, it will be obligated, for fiscal years commencing on or after 1 January 2016, to file, within 12 months of the end of the fiscal year, a CbC report containing the following information with regards to each jurisdiction in which the group operates:

- Revenue.
- Profit or loss before tax.
- Income tax paid.
- Income tax accrued.
- Stated capital.
- Accumulated earnings.
- Number of employees.
- Tangible assets other than cash or cash equivalents.

The report also requires identification of each constituent entity of the group, setting out for each entity the jurisdiction of tax residence (where different also the country of registration) as well as the nature of the main business activity.

The regulations also impose a requirement for a Gibraltar constituent entity to report in cases where it is not the ultimate parent entity, these are either where (i) the ultimate parent entity is not required to provide a report in its jurisdiction of residence, (ii) the jurisdiction of residence of the ultimate parent entity does not have a qualifying competent authority agreement with Gibraltar at the date the report is required, or (iii) there has been a systematic failure by the jurisdiction of tax residence of the ultimate parent entity and the Commissioner has notified the Gibraltar constituent entity that the failure has occurred. In these cases, the first reporting period is for fiscal years commencing on or after 1 January 2017.

There are notification requirements in the regulations. A Gibraltar constituent entity must notify the Commissioner if it is an ultimate parent entity, a surrogate parent entity, or in cases where it will be filing a CbC report because there has been a systematic failure by the jurisdiction of tax residence of the ultimate parent entity and the Commissioner has notified the Gibraltar constituent entity of this. A notification must also be made by a Gibraltar constituent entity who does not fall into the above mentioned categories. This type of notification must provide the identity and the jurisdiction of tax residence of the constituent entity required to file the CbC report on behalf of its MNE group. These notifications must be made in writing no later than nine months after the year-end of the Gibraltar constituent entity.

Gibraltar has also signed Tax Information Exchange Agreements (TIEAs) with 27 jurisdictions, 26 of which have entered into force.

Significant developments

By virtue of Law 4472/2017, published on 19 May 2017, any business income realised by legal persons/legal entities as of 1 January 2019 shall be taxed at a rate of 26%, with the exemption of credit institutions, for which the currently applicable rate of 29% shall continue to be applicable. The reduction of the corporate income tax (CIT) rate from 29% to 26% shall be applicable on the condition that there is no divergence from the medium-term budgetary objectives set in the Economic Adjustment Program following an assessment of the International Monetary Fund and the European Commission in collaboration with the European Central Bank, the European Stability Mechanism, and the Greek authorities.

Law 4472/2017 also provides for the following amendments, which will be applicable as of 1 January 2020.

The progressive tax scale for employment income/pensions will be amended as follows:

Taxable income (EUR*)	Tax rate (%)
0 to 20,000	20
20,001 to 30,000	29
30,001 to 40,000	37
Greater than 40,000	45

* euros

The progressive tax scale for the solidarity contribution will be amended as follows:

Taxable income (EUR)	Tax rate (%)
0 to 30,000	0
30,001 to 40,000	2
40,001 to 65,000	5
65,001 to 220,000	9
Greater than 220,000	10

Taxes on corporate income

Resident corporations are taxed on their worldwide income. Non-resident corporations are taxed in Greece on any Greek-source income they derive.

The CIT rate of legal entities is 29%.

By virtue of Law 4472/2017, published on 19 May 2017, any business income realised by legal persons/legal entities as of 1 January 2019 shall be taxed at a rate of 26%, with the exemption of credit institutions, for which the currently applicable rate of 29% shall continue to be applicable. The reduction of the CIT rate from 29% to 26% shall be applicable on the condition that there is no divergence from the medium-term budgetary objectives set in the Economic Adjustment Program following an assessment of the International Monetary Fund and the European Commission in collaboration with the European Central Bank, the European Stability Mechanism, and the Greek authorities.

Shipping companies

The Greek tonnage tax regime model intends to tax shipping activity and applies to Greek or foreign ship-owning companies with vessels flying a Greek flag and foreign ship-owning companies with vessels flying a foreign flag that maintain a ship management company in Greece that is exclusively engaged in ship management activities. The Greek tonnage tax regime applies to vessels of 'A' and 'B' category that are either flying a Greek or foreign flag. In the case of vessels flying a foreign flag, the foreign ship-owning company should maintain a ship management office in Greece. Category 'A' vessels include cargo vessels, tankers, steel hull vessels for dry or liquid cargo that fly to/between foreign ports, passenger vessels, drilling platforms, etc. Category 'B' vessels include small boats and any other motor vessels not listed under category 'A'.

Based on Law 4336/2015, the tonnage tax levied on certain categories of vessels flying a Greek flag (i.e. professional vessels, leisure yachts, ferries, etc.) has been expanded to vessels flying flags of the European Union (EU) or EU area member states, with exhaustion of the income tax liability of the ship owners on income earned from the related activity.

Said provision aligns the regime applying to said category of vessels following the European Commission's accusation of discriminatory treatment of foreign-flag vessels compared to Greek-flag ones.

The gross tonnage is calculated by multiplying coefficient rates by each scale of gross registered tonnage. This taxable tonnage is then multiplied by an age-corrected rate.

Various exemptions/reductions of the tonnage tax apply, such as:

- Vessels built in shipyards in Greece, under a Greek flag, are exempt from tax for the first six years.
- 50% reduction for vessels operating regular routes between Greek/foreign ports or solely between foreign ports.

The tonnage tax exhausts the tax liability of the owner, and, if the owner is a company, this extends to its shareholders. Tonnage tax also exhausts the tax liability in relation to operating profits and capital gains arising out of the sale of the vessel flying the Greek flag. Tonnage tax also exhausts the tax liability of the foreign ship-owning company flying a vessel under a foreign flag managed by a ship management company in Greece, as well as of the shareholders thereof. No CIT or dividend withholding tax (WHT) is levied on shipping profits.

This tax burdens the ship owners or ship-owning companies, while the ship management companies are jointly and severally liable for the payment thereof.

An obligation of the liable parties for submitting before the Ministry of Mercantile Marine an annual statement indicating the name, flag, total tonnage, and age of the vessel under the foreign flag is established.

For calculating the tonnage tax (tax rates and tax brackets, criteria) and the special tax return and payment of tax, the provisions on the tonnage tax payable for Greek-flagged vessels apply in analogy. A credit for the tonnage tax paid abroad is provided.

Annual contribution imposed on foreign ship management companies

An annual contribution (referring only to fiscal years 2016 through 2019) is imposed on offices or branches of foreign enterprises that have been established in Greece by virtue of Article 25 of Law 27/1975 and that are engaged in the chartering, insurance, average (damage) settlements, purchase, chartering or shipbuilding brokerage, or chartering of insurance of ships under Greek or foreign flag of total tonnage over 500 shipping tons, as well as the representation of ship owner companies or undertakings, whose object is identical to the above-mentioned activities.

Greek and foreign companies of Law 27/1975 that are engaged in the management of vessels flying a Greek or foreign flag (that are subject to tonnage tax), as well as in other activities approved by the license of operation, are exempt. Passenger coastal ships or merchant vessels that perform internal routes are exempt.

This contribution is imposed on the total amount of imported foreign exchange, calculated on a minimum 50,000 United States dollars (USD), and, for the years 2016 through 2019, the tax scale is as follows:

Bracket of annual total foreign exchange (USD)	Rate (%)	Tax per bracket (USD)	Total foreign exchange (USD)	Total tax (USD)
200,000	7	14,000	200,000	14,000
200,000	6	12,000	400,000	26,000
Excess amount	5			

A special tax return for calculating the contribution on the basis of the imported foreign exchange of the previous year should be filed within March of each year. Upon filing of said tax return, one-quarter of the annual contribution is payable. The remaining contribution is paid in three instalments (June, September, and December).

The distribution of profits by a foreign ship-owning company maintaining an office or branch in Greece by virtue of Article 25 of Law 27/1975 that is exclusively engaged in the chartering, insurance, brokerage, etc. of vessels to Greek individual tax residents is subject to tax at a rate of 10%.

This tax applies to dividends paid or credited and shall be rendered to the Greek state by the beneficiary of the dividend.

The 10% tax also applies to cases of distributions of profits by the above-mentioned companies in the form of extraordinary fees and percentages (bonus) to Board of Directors (BoD) members, directors, and officials, in addition to the regular remuneration, exhausting the tax liability of the beneficiaries for said income.

The Greek tonnage tax system is under investigation by the European Committee as to its compliance with the EU State Aid rules. Based on the preliminary findings of the European Committee, certain amendments may be required in order for the Greek tonnage tax regime to comply with the EU State Aid rules.

Local income taxes

No municipal or local taxes on income are paid at a local level.

Corporate residence

A legal entity or other entity is considered as tax resident in Greece if one of the following conditions is met:

- It has been incorporated or established according to the Greek legislation.
- It has its registered seat in Greece.
- The place of effective management is located in Greece.

The determination by the tax authorities that the effective management of a legal entity is exercised in Greece is made on the basis of the actual facts and circumstances of each case and by taking into account mainly the place of exercising the day-to-day management, the place of making strategic decisions, the place where the annual general meeting of shareholders or partners is held, the place where the books and records are kept, the place where the meeting of the members of the BoD or other executive management board takes place, and the residence of the members of the BoD or other executive management board. The residence of the majority of the shareholders or partners may also be taken into consideration.

For determining a legal entity as being tax resident in Greece, the exercise of effective management in Greece for any period during the tax year is sufficient.

Companies that are established and operate according to Law 27/1975 ‘on the taxation of vessels [etc.]’ and L.D. 2687/1954 ‘on the investment and protection of foreign capital’ are explicitly excluded from the application of these provisions on tax residence.

Permanent establishment (PE)

The definition of a PE of foreign legal entities in Greece is similar to the one included in the Organisation for Economic Co-operation and Development (OECD) Model Convention on the Double Tax Treaties (DTTs) for the Avoidance of Double Taxation; however, where a DTT applies, its provision will override the domestic definition.

The term ‘permanent establishment’ includes especially:

- A place of management.
- A branch.
- An office.
- A factory.
- A workshop.
- A mine, an oil or gas well, a quarry, or any other place of extraction of natural resources.

In order for a construction site in Greece to constitute a PE, a time period of at least three months is required, instead of the time period of 12 months provided in the OECD Model Convention.

A distinction applies between the cases of maintaining a PE through a dependent agent and not maintaining a PE when performing activities through an independent agent (e.g. broker, general commission agent).

Other taxes

Value-added tax (VAT)

The standard VAT rate is 24% (applicable, *inter alia*, to all standard and processed foods, transportation services, food services, repair services, medical and dental services, and entertainment tickets [excluding theatre tickets]).

A reduced VAT rate of 13% applies, *inter alia*, to fresh food, to care of children, the elderly, and the disabled, and to accommodation in hotels or similar establishments (including holiday accommodation and letting of places in camping or caravan sites). A super reduced rate of 6% for medicines of CN3003 and 3004, and vaccines of CN3002 intended for human consumption, is applicable. The aforementioned rate is also applicable for children's books, colouring and drawing books, newspapers, magazines, and theatre tickets.

Supplies of goods and services to individuals and legal entities subject to VAT and established in EU countries (intra-Community supplies) are exempt from VAT (zero rated). Exports of goods and certain services to non-EU countries are also exempt (zero rated).

With the following exceptions, real estate leases are generally exempt from VAT. Lease contracts for shopping centres and logistics centres may be subject to VAT on the condition that the taxable person opts for the submission to taxation of the leasing right. Additionally, a right to elect to subject leases of property used for the exercise of professional activities, either independently or as part of mixed contracts, to VAT applies.

By virtue of Article 74 of L. 4509/2017, an extension of the reduced VAT regime (30% reduction) until 30 June 2018 was granted for the following islands of the Aegean Sea:

- Chios
- Kos
- Leros
- Samos

Moreover, by virtue of Law 4334/2015, for transactions exceeding EUR 3,000 between entrepreneurs that are obligatorily settled through the use of a professional bank account or bank cheque and for transactions exceeding EUR 1,500 between entrepreneurs and individuals that are obligatorily settled through the use of a credit or debit card or e-banking or bank deposit or a bank cheque, the intermediary bank is obligated to withhold the relevant VAT amount corresponding to the total amount of the transactions and to pay said VAT directly to the Greek state within five days from said payment, by issuing the respective certificate on the collected amount of VAT to VATable persons. Banks should not charge any fee or other charges for the implementation of the above-mentioned services. The above provision is known as the 'VAT split payment' provision.

By this provision, an obligation to immediate payment of the VAT due is imposed by the separation/split of the transaction value from the corresponding VAT due and the block of the VAT amount until its payment to the Greek state ('split payment' system).

The recipient of the invoice or the retail receipt must pay the transaction through the use of a bank payment instrument, separating/splitting the VATable value from the corresponding VAT, so that the credit institution may transfer the VAT due automatically to a blocked bank account.

The procedure of application of said provision and any other issue relating to the payment and refund of VAT will be regulated by a decision to be issued by the Independent Authority for Public Revenue. However, up to date, no such Decision has been issued, and the provision remains, in practice, inactive. Moreover, by virtue of L. 4446/2016, the quantitative threshold of annual turnover up to which taxable persons may pay the VAT to the state upon settlement of the invoices (special regime of Article 39 (b) of the Greek VAT Code) was increased from EUR 500,000 to EUR 2 million.

Moreover, by virtue of Article 67 of L. 4484/2017, Article 39 (a) of the Greek VAT Code (L. 2859/2000) was amended as regards the goods and services that are subject to the domestic reverse-charge mechanism.

Based on the new provision, the domestic supply by a taxable person to another one of mobile telephones, being devices, game consoles, tablet personal computers (PCs), and laptops, are subject to the reverse-charge mechanism.

The above amendment constitutes an incorporation of the relevant provisions of Article 199a of EU VAT Directive (2006/112/EC) into the Greek legislation.

Further clarifications have been granted through Circular 1150/2017.

The above provisions are applicable as of 1 August 2017.

Customs duties

Many goods imported into Greece from outside the European Union are subject to customs duties. The rates of duty are provided by the EU's Common Customs Tariff.

Excise taxes

Excise taxes are imposed on energy and electricity products (e.g. petrol, natural gas, electricity), manufactured tobacco, alcoholic products, and coffee. The tax rates vary depending on the category of products.

Uniform Tax on the Ownership of Real Estate Property (ENFIA)

The ownership of real estate property/property rights in Greece is subject to the ENFIA, which consists of a principal tax imposed on each real estate property and a supplementary tax imposed on the total value of the property rights on real estate property of the taxpayer subject to tax.

More specifically, said tax is not imposed on the objective value of real estate property, but is determined on the basis of various factors, according to the final registration of the property at the land registry or ownership title.

The principal tax on buildings is calculated by multiplying the square metres of the building by the principal tax ranging from EUR 2 to EUR 13 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The principal tax on land is calculated by multiplying the square metres of the land by the principal tax ranging from EUR 0.0037 to EUR 11.25 per square metre and other coefficients affecting the value of the property (e.g. location, use).

The supplementary tax is imposed on the total value of the rights to property at a rate of 5.5‰. Self-used real estate is taxed at the reduced rate of 1‰.

Real estate transfer tax

Each transfer of real estate, which is not subject to VAT, is subject to real estate transfer tax. The real estate transfer tax is imposed at a rate of 3% on the taxable value of the property.

Stamp taxes

Rentals of non-residential properties are subject to 3.6% stamp duty (with the exception of shopping centres and logistics centres subject to VAT).

In general, loans and interest may be subject to a 2.4% stamp duty. However, there are a number of exemptions, the main one covering bank loans and bond issues.

Other stamp duties may apply in certain limited cases.

Contribution tax on capital accumulation following incorporation

A 1% tax contribution is imposed on capital accumulation (share capital increase) by:

- business companies and joint ventures
- associations of all degrees and any other form of company, legal entity, or union of persons or society aiming to make profits, and
- branches of foreign companies (unless of EU origin).

For Greek *Société Anonyme* (SA) companies, an additional 0.1% duty is payable on capital to the competition committee.

The capital concentration tax is no longer imposed upon the incorporation/establishment of legal entities.

Payroll taxes

Employers are liable to submit payroll withholding taxes on monthly salary payments (following the grossing-up to the yearly salary) at the following tax scale:

Taxable income (EUR)	Tax rate (%)
Less than 20,000	22
20,001 to 30,000	29
30,001 to 40,000	37

Taxable income (EUR)	Tax rate (%)
Greater than 40,000	45

Reductions may apply depending on the amount of the annual taxable income received by individual taxpayers and by the number of the dependent children the individual taxpayer has.

As of 1 January 2020, the aforementioned progressive tax scale will be amended as follows:

Taxable income (EUR)	Tax rate (%)
Less than 20,000	20
20,001 to 30,000	29
30,001 to 40,000	37
Greater than 40,000	45

Additionally, based on Law 4387/2016, the special solidarity contribution has been incorporated into the Income Tax Code (ITC), and its extraordinary character has been abolished. Moreover, the employers shall submit withholding of the special solidarity contribution on salary payment, based on the following progressive rate:

Taxable income (EUR)	Tax rate (%)
0 to 12,000	0
12,001 to 20,000	2.2
20,001 to 30,000	5.0
30,001 to 40,000	6.5
40,001 to 65,000	7.5
65,001 to 220,000	9.0
Greater than 220,000	10.0

As of 1 January 2020, the above-mentioned progressive scale will be amended as follows:

Taxable income (EUR)	Tax rate (%)
0 to 30,000	0
30,001 to 40,000	2
40,001 to 65,000	5
65,001 to 220,000	9
Greater than 220,000	10

Benefits in kind are, in principle, subject to payroll taxes. However, to the extent that it is difficult to proceed to an evaluation of such benefits at the time of their granting, no employment withholdings should be effected thereon, but their value (assuming such benefits are taxable) shall be added to the employment income of the beneficiaries and be taxed upon the clearance of the annual income tax return filed by the employees.

Social security contributions

Social security contributions are due on salary and benefits in cash or in kind granted by an employer to its employees, with the exception of specifically enumerated extraordinary benefits of social character (e.g. marriage gifts, birth gifts). The imposition of social security contributions depends on the social security fund in which the employee is registered.

For the primary social security fund (IKA-ETAM), social security contributions are withheld at 16% at the level of the employee and contributed at 25.06% at the level of the employer. The monthly social security contribution cap for the IKA is currently set at EUR 5,860.80.

Following a major reform on the social security legislation, the Unified Social Security Body (EFKA) automatically integrates all the main social security funds.

Branch income

Profits of branches of foreign companies are subject to CIT.

Income determination

Inventory valuation

Inventories are stated at the lower of cost or market (replacement value). The Greek tax system recognises various valuation methods, such as first in first out (FIFO), last in first out (LIFO), weighted average, etc.

Capital gains

In general, capital gains are included in the taxable profits of Greek companies.

The income derived from the goodwill arising upon the transfer of Greek government bonds or Greek treasury bills that are acquired by legal entities that do not qualify as Greek tax residents and do not maintain a PE in Greece is tax exempt.

Capital gains tax on sale of listed shares

Capital gains derived from the sale of listed and non-listed shares are considered business income taxable at the standard CIT rate.

Capital gains derived from the sale of listed and non-listed shares by foreign legal entities that are tax resident abroad shall be taxable in Greece only if they maintain a PE in Greece.

The sale of listed shares is also subject to a transaction duty at a rate of 0.2%.

Dividend income

Dividend income is generally taxable. For subsidiaries established in third countries, any dividend WHT that may have been paid is credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

However, a tax exemption of intra-group dividends received by Greek tax resident legal entities or PEs of foreign legal entities in Greece applies, provided that:

- the legal entity distributing the profits is included in the forms enumerated in Annex I, Part A of Directive 2011/96/EE, as in force

- the legal entity distributing the profits is tax resident in an EU member state and is not considered as tax resident in a third country in application of the provisions of a DTT concluded with such third country
- the legal entity distributing the profits is subject to one of the taxes listed in Annex I, Part II of Directive 2011/96/EE or any other tax substituting one of those taxes
- the recipient taxpayer holds at least a minimum participation of 10% of the value or the quantity of the share or principal capital or voting rights of the distributing legal entity
- the minimum participation percentage is held for at least 24 months (although the exemption may be provided prior to the completion of 24 months secured by a guarantee), and
- the respective dividends have not been deducted at the level of the entity distributing the dividends.

In case of further distribution of the reserve formed by tax-exempt dividends received from Greek or foreign subsidiaries established in an EU member state, said amount shall not be included in the taxable income of the legal entity proceeding to said distribution, but may be subject to dividend WHT.

Based on the general anti-abuse rule introduced, the tax exemption in the case of collection and payment of dividends is alleviated in case it is considered that a 'non-genuine arrangement' exists (i.e. an arrangement that has not been put into place for valid commercial reasons reflecting the economic reality).

Should the aforementioned tax exemption of intra-group dividends not apply, any underlying CIT and dividend WHT that may have been paid by a Greek or foreign subsidiary established in an EU member state are credited against the Greek CIT payable (up to the amount of tax that would arise in Greece).

Stock dividends

Stock dividends are treated as cash dividends for CIT purposes.

Interest income

Interest income is generally taxable.

Partnership income

Both general partnerships (*Omorrythmi Etairia* or OE) and limited partnerships (*Eterrorythmi Etairia* or EE) are not tax transparent. They are subject to tax based on general rules (i.e. at a CIT rate of 29% plus a 15% WHT on distributions). Business income generated by partnerships that maintain single entry accounting books is taxed at a unified tax rate of 29%. In addition, any subsequent distribution of profits is not subject to dividend taxation.

Rents/royalties income

Income derived from rents and royalties is taxed as ordinary income.

Foreign income

Resident corporations are taxed on their worldwide income. Foreign income received by a domestic corporation is taxed together with other income. If related income tax is paid or withheld abroad, a tax credit is generally available up to the amount of the applicable Greek income tax.

Losses from foreign sources may not be set off against profits generated in Greece. Exceptionally, losses from EU and European Economic Area (EEA) member states may be set off with profits arising in those EU or EEA member states, provided that they are not exempt on the basis of the DTT concluded and applied by Greece.

Deductions

Depreciation

Mandatory depreciation on a fixed annual basis applies by using fixed depreciation rates stipulated in the law. The transfer of depreciated amounts between fiscal years is not permitted.

The rates of depreciation are determined on the basis of the following table:

Category of assets of the enterprise	Rate of depreciation per tax year (%)
Buildings, installations, facilities, industrial and special installations, non-building facilities, warehouses, and stations, including their annexes (and special loading and unloading vehicles)	4
Plots of land used for mining and quarries, unless used for ancillary mining activities	5
Public means of transportation, including airplanes, trains, vessels, and ships	5
Machinery and equipment (aside from personal computers and software)	10
Means of transportation of individuals	16
Means of transportation of goods ('internal transports of goods')	12
Intangible assets, royalties, and expenses of multiannual depreciation	10
Personal computer equipment, principal and ancillary and software	20
Other fixed assets of the enterprise	10
Equipment and instruments used for the purposes of performing scientific and technological research	40

Specifically for intangible assets and royalties, the rate may be adapted on the basis of the lifetime of the right.

An option for the lessee to depreciate a leased asset is provided in cases where there is a financial leasing agreement, provided that specific conditions are met. A financial leasing agreement is defined as any oral or written agreement by which the lessor (owner) is obligated, in return for a rent, to provide to the lessee (user) the use of an asset, provided that one or more of the following criteria are met:

- The ownership of the asset is passed on to the lessee following the end of the lease agreement.
- The lease agreement includes a term of preferential offer for the purchase of the equipment at a price below market value.
- The period of the lease covers at least a percentage of 90% of the financial life of the assets as it derives from the above-mentioned table, even in cases where the ownership title is not transferred after the end of the lease agreement.
- At the time of concluding the lease agreement, the present value of the rents amounts to at least 90% of the market value of the asset that is leased.
- The assets that are leased are of such special nature that only the lessee may use them without proceeding to important modifications.

Goodwill

There are some court cases that support the deductibility of goodwill as a start-up expense, but the specifics of each case must be carefully considered.

Organisational and start-up expenses

Based on the provisions of Law 4308/2014 (Greek Accounting Standards), any amount of start-up expenses shall be, under conditions, tax deductible within the year that they have been incurred, to the extent that they do not fall within a category of assets (including tangibles and intangibles).

Any expenses incurred for the acquisition of an asset that are directly related to the latter asset and are necessary for its use are included in the acquisition cost of said asset (e.g. concerning real estate property the real estate transfer tax, notary fees, registration fees, etc.).

Interest expenses

Interest deductibility restrictions apply.

Non-deductible expenses include interest expenses on loans undertaken by the enterprise from third parties, to the extent that they exceed the interest that would arise if the interest rate was equal to the interest rate of loans on open deposit/withdrawal accounts provided to non-financial enterprises, as indicated in a Statistical Bulletin of the Central Bank of Greece at the prior time period closest to the date such loan was undertaken.

The above interest deductibility restrictions do not apply to inter-bank loans, bonds, and inter-company loans issued by SAs.

Bad debt

The amounts of bad debt provisions and the write-off thereof are deductible, as follows:

- For uncollected due debt up to the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision at a percentage of 100% of the said claim.
- For uncollected due debt exceeding the amount of EUR 1,000 for a time period exceeding 12 months, the taxpayer may form a provision according to the following table:

Duration of late payment (in months)	Provision (%)
Greater than 12	50
Greater than 18	75
Greater than 24	100

The condition for the deduction of the provision for the aforementioned two cases is that all appropriate actions have been taken to ensure the right of collecting the said claim.

The formation of provisions of bad debt is prohibited in the following cases:

- For due debt of shareholders or partners of the enterprise with a minimum participation percentage of 10% and the subsidiary companies of the enterprise with a minimum participation percentage of 10%, unless the claim of such debt is pending before court or court of arbitration, or if the debtor has filed an application for bankruptcy or for a procedure of rationalisation or an enforcement procedure has commenced against the debtor.
- For due debt that are covered by insurance or any guarantee or other contractual or *in rem* security or for debts of the state or local authorities or for those that have been provided by a guarantee of those bodies.

It is provided that a claim may be written off, provided that the following conditions are cumulatively met:

- An amount corresponding to the debt has been previously recorded as income.
- It has been previously written off from the books of the taxpayer.
- All legal actions for the collection of the debt have been exhausted.

Banks may deduct provisions of bad debt at a percentage of 1% on the amount of the annual average of real grants, as indicated by their monthly accounting statements. Aside from the aforementioned deductibility percentage, banks may deduct from their income additional special provisions regarding their clients, for which the settlement of interest has ceased. Moreover, specific provisions on leasing and factoring companies are included.

Charitable contributions

The tax deductibility of donations is not expressly regulated in the respective Greek tax legislation (in contrast to the previously applicable Greek ITC providing for the tax deductibility of specifically enumerated donations, up to a certain amount). Thus, the deductibility of charitable contributions shall be examined in light of the generally applicable deductibility criteria, focusing on the productivity of such expenses on a case-by-case basis.

Fines and penalties

Fees from activities constituting a criminal offence, fees from penal clauses, fines, and penalties are not recognised as deductible expenses.

Taxes

Taxes, other than income tax, extraordinary contributions, and VAT corresponding to non-deductible expenses that are not deductible as input VAT, are recognised as deductible expenses.

Other significant items

A general rule on the deductibility of all real and evidenced business expenses realised for the benefit or in the frame of the usual transactions of the company, the value of which is not deemed as higher or lower than the market value, and duly registered in accordance with the rules of recording of transactions is established, with the exception of the restrictively enumerated expenses that are not deductible.

The non-deductible expenses include:

- Some cases of loan interest (*see Interest expenses above*).

- Every kind of expense concerning the acquisition of goods or receipt of services of a value exceeding EUR 500, provided that the partial or total payment was not made through a means of bank payment.
- Unpaid insurance contributions.
- Provisions, with the exception of the explicitly regulated bad debt provisions (*see Bad debt above*).
- Fees and penalties, including additional payments.
- Provision or receipt of services in cash or in kind that constitute a criminal offence.
- The income tax, including the freelancers' duty and extraordinary contributions, as well as the VAT corresponding to non-deductible expenses, provided that it is not deductible as input VAT.
- Deemed income in case of self-use of property, to the extent that the latter exceeds a percentage of 3% of the objective value of the property.
- Expenses for the organisation and conducting of informative conferences and meetings concerning the hospitality (meals and stay) of clients or employees if exceeding the amount of EUR 300 per participant and to the extent that the total annual expense exceeds a percentage of 0.5% of the annual gross income of the enterprise.
- Entertainment expenses, with the exception of such expenses realised by taxpayers having as a main object the provision of entertainment services.
- Private consumer expenses.
- Total of expenses that are paid to tax residents in non-cooperative states or states with a preferential tax regime, unless the taxpayer proves that these expenses refer to real and usual transactions that do not have as their objective the transfer of profits or income or capital with the purpose of tax avoidance or evasion.
- Expenses relating to tax-exempt dividends.

Net operating and capital losses

Losses can be carried forward five years. Carrybacks are not permitted.

Pursuant to a rule on the abuse of provisions on the transfer and setoff of losses, in cases where the direct or indirect ownership or voting rights of an enterprise are changed at a percentage exceeding 33% during a tax year, the carryforward of tax losses ceases to apply unless the taxpayer can prove that the change in ownership occurred for commercial or business purposes.

Payments to foreign affiliates

Royalties, interest, and service fees paid to foreign affiliates are deductible expenses under certain requirements and conditions.

Special restrictions on transactions with non-cooperative states and states with preferential tax treatment

Greek tax law has established rules in relation to non-cooperating states and states with preferential tax treatment.

Non-cooperating states are defined as states that are not EU member states and have not concluded agreements of administrative assistance in the tax sector with Greece or with, at least, 12 other states. Non-cooperative states are enumerated in a Ministerial Decision to be issued annually.

Pursuant to the Ministerial Decision, the non-cooperating states for 2017 are specified as follows:

- Andorra
- Antigua and Barbuda
- the Bahamas
- Bahrain
- Brunei
- the Cook Islands
- Dominica
- former Yugoslav Republic of Macedonia (FYROM)
- Grenada
- Guatemala (until 30 September 2017)
- Hong Kong
- Lebanon (until 31 August 2017)
- Liberia
- Malaysia (until 30 April 2017)
- Marshall Islands
- Monaco (until 31 March 2017)
- Panama
- Philippines
- St. Lucia (until 28 February 2017)
- US Virgin Islands
- Vanuatu

A legal entity, irrespective of its legal form, is considered located in a preferential tax regime, even if its residence of registered office is located in an EU member state, in cases where it is not subject to taxation in this state or is *de facto* not subject to taxation, or is subject to tax on income or capital at an amount that is equal to or lower than 50% of the tax that would have been due, in accordance with Greek tax legislation, if such entity were resident or were maintaining a PE in Greece.

Pursuant to a Circular issued in November 2017, the states with preferential tax treatment for 2017 are specified as follows:

- Albania
- Andorra
- Anguilla
- the Bahamas
- Bahrain
- Belize
- Bermuda
- Bonair
- Bosnia and Herzegovina
- British Virgin Islands
- Bulgaria
- Cayman islands
- Cyprus
- Former Yugoslav Republic of Macedonia (FYROM)
- Gibraltar
- Guernsey
- Hashemite Kingdom of Jordan
- Hungary *
- Ireland
- Isle of Man
- Jersey
- Liechtenstein
- Macau
- Marshall Islands
- Monaco
- Montenegro
- Montserrat
- Nauru
- Oman
- Paraguay
- Qatar
- Republic of Maldives
- Republic of Moldova
- San Marino
- Saudi Arabia
- Seychelles
- Sri Lanka
- St. Eustatius
- Turks and Caicos
- United Arab Emirates
- Vanuatu

* To be noted that Hungary is considered a state with a preferential tax regime only for 2017.

Group taxation

Group taxation is not permitted in Greece.

Transfer pricing

Related entities are obligated to document the prices of their intra-group transactions.

An exemption from maintaining a transfer pricing documentation file is provided if:

- the above transactions or transfer of operations amount to up to EUR 100,000 annually and the total turnover of the liable party does not exceed EUR 5 million annually, or
- the above transactions or transfer of operations amount to up to EUR 200,000 annually and the total turnover of the liable party exceeds EUR 5 million annually.

The transfer pricing documentation file is accompanied by the 'Summarized Table of Transfer Pricing Information', which is submitted electronically to the tax administration within the deadline for the submission of the annual income tax return.

The transfer pricing documentation file is kept at the registered seat of the liable party for the whole time period that the books and records are required to be kept, and should be provided to the tax administration within 30 days from the receipt of the relevant request.

The obligation of updating the respective transfer pricing file is provided in case of a change of market circumstances that affect the data included therein. The update is made in the tax year in which the change takes place.

The option of obtaining an Advance Pricing Arrangement (APA) of the methodology of specific future intra-group transactions with related parties is integrated in the Code of Tax Procedures. The object of the APA constitutes the total of the criteria used for the determination of the prices of intra-group transactions during a specific time period, which include mainly the transfer pricing methodology used, comparable or reference data, and the respective adjustments, as well as the critical assumptions on future developments. The object of the APA may constitute every other specialised matter concerning the pricing of transactions with related parties.

The validity of the APA decision cannot exceed four years, and it cannot enter into force retroactively (i.e. the tax year that has lapsed at the time the application for the APA has been submitted). The issuance of the APA decision does not impede the subsequent application of a mutual settlement procedure according to the applicable DTT.

The APA decision may be renewed, revoked, or cancelled by a decision of the tax administration, provided that the legal conditions are met.

The delayed submission of the Summary Information Table of transfer pricing information file incurs a penalty calculated at a percentage 1/1,000 of intra-group transactions (not below EUR 500 and not exceeding EUR 2,000).

The penalty for inaccurate submission of the Summary Information Table of transfer pricing information is calculated at a percentage 1/1,000 of the intra-group transactions (not below EUR 500 and not exceeding EUR 2,000), to the extent that the inaccuracy is higher than 10% of the transactions.

The penalty for the non-submission of the Summary Information Table of transfer pricing information is calculated at a percentage 1/1,000 of the intra-group transactions (not below EUR 2,500 and not exceeding EUR 10,000).

The penalty for the non-submission of the transfer pricing documentation file (imposed upon the expiration of the one-month deadline) is calculated at EUR 20,000 (after the 90th day or the non-submission in general).

A repetition within five years of the first infringement incurs double the initial penalty, whereas a second repetition within five years from the first infringement incurs quadruple the initial penalty.

Country-by-country (CbC) reporting regime

On 28 July 2017, the Greek Parliament ratified Law 4484/2017, providing for new transfer pricing documentation requirements. The new law supplements the EU Council Directive 2016/881 on mandatory automatic exchange of information in the field of taxation that was initially incorporated in Greek legislation by Laws 4170/2013 and 4474/2017. The new requirements largely follow the guidance on CbC reporting provided under Action 13 of the OECD's Base Erosion and Profit Shifting (BEPS) initiatives. In order to enable the Greek tax authorities to analyse potential transfer pricing risks, said requirements provide for the preparation and filing of a CbC report.

The Greek CbC reporting obligations require Greek ultimate parent entities controlling a multinational group of entities (MNEs) with annual total consolidated group revenues exceeding EUR 750 million to file CBC reports with the Greek tax authorities. In exceptional cases, Greek entities belonging to MNEs without a Greek resident ultimate parent company may also be obligated to file a CbC report. The new provisions also provide for notification requirements regarding the entity liable to file the CbC report.

The new requirements are applicable to fiscal years starting on or after 1 January 2016. A penalty regime is provided in case of a delayed filing, inaccurate filing, or non-filing of the CbC report.

Thin capitalisation

The thin capitalisation rules are determined in connection to the taxable profits before interest, tax, depreciation, and amortisation (EBITDA). More specifically, interest expenses are not deductible to the extent that the surplus of interest expenses compared to interest income exceeds a percentage of 30% of EBITDA.

The aforementioned limit does not refer to net interest expenses that do not exceed the amount of EUR 3 million.

Any excess amount of non-deductible interest expenses may be carried forward indefinitely to future years and will be deductible in future years to the extent that these future years indicate an uncovered EBITDA amount.

The aforementioned rules do not apply to credit institutions, leasing companies, and factoring companies that are licensed by the Bank of Greece or respective regulatory authorities of other EU member states.

Controlled foreign companies (CFCs)

The taxable income of a taxpayer with tax residence in Greece shall be increased by the undistributed income of a legal person or legal entity with tax residence in another country, under the following conditions:

- The taxpayer, alone or together with affiliated persons, directly or indirectly owns shares, voting rights, or equity in excess of 50% or is entitled to receive more than 50% of the profits of that legal person or legal entity.

- The above legal person or legal entity is subject to taxation in a non-cooperative state or in a country with a preferential tax regime (*see the lists in the Deductions section*).
- More than 30% of the net income before taxes earned by a legal person or legal entity falls into at least one of the categories of income derived either from interest, dividends, royalties, income from immovable property, or income from insurance, banking, or other financial activities.
- It is not a company whose principal class of shares is subject to trading on a regulated market.

The above do not apply to legal persons or legal entities with tax residence in the European Union or residence in a country that is an EEA member unless the establishment or the financial activity of such legal entity constitutes a fictitious situation with the view to avoid taxation.

Tax credits and incentives

Foreign tax credit

Tax paid abroad for income taxable in Greece is credited but is limited to the amount of Greek tax due.

Deferred taxation

The concept of deferred taxation applies on the basis of the International Financial Reporting Standards (IFRS) to entities supervised by the Bank of Greece (namely banks and leasing companies, as well as factoring companies). In this respect, said entities may convert tax assets into tax credits in return for shares issued to the Greek state. Specific rules and conditions apply.

Incentives for the maintenance of workplaces

Legal entities that suffer a reduction of turnover for two consecutive accounting periods without reducing their workforce can enjoy a reduction of the tax rate by three percentage units. However, a revocation of the granted benefit and imposition of further tax in case of reduction of personnel or increase of the turnover within the three-year period is provided.

Other tax incentives

On 16 June 2016, Law 4399/2016 'Statutory framework for the establishment of Private Investments Aid Schemes for the regional and economic development of the country - Establishment of Development Council and other provisions' has been ratified by the Greek Parliament. The new Law provides a general framework, which is expected to be specified for each aid scheme through ministerial decisions to be issued. In essence, the provisions of the new Law will start to apply following the issuance of the relevant ministerial decisions. Up to date, the Ministry of Development has issued the required ministerial decisions for four (out of eight in total) aid schemes.

Under the new Incentive Law, an explicit reference to the provisions of the General Block Exemption Regulation (GBER) of the European Commission (651/17.07.2014, Law 187/1/26.06.2014) is being made for first time.

The new Law is structured into two sections: (i) the General Section, which includes the main regulations and restrictions of the GBER and refers to all aid schemes, and (ii) the Special Section, which describes the specific aid schemes, to which the provisions of the General Part and of the GBER are applied.

In comparison to other types of aid, the new Incentive Law focuses mainly on the tax incentives.

A threshold is being provided for the types of aid available to individuals' investment projects, as well as to companies and groups of companies, in order to achieve dispersion of the beneficiaries of state aid.

Special categories of aid are being determined, either (i) on the basis of the performance of the companies (extroversion, mergers, employment increase, sectors, high added value), or (ii) on territorial basis (highland, border areas and areas with increased migration burden, industrial areas, innovations zones). Companies that fall under the special categories may be reinforced through capital aids, in case the latter are not provided, or by additional capital aids, in case the latter are provided.

General Section

The General Section regulates the beneficiaries of the aids, the terms and prerequisites for participation, the covered investment projects, the eligible expenses, the types of aids, the procedure regarding the filing of applications and evaluation of investments projects, as well as the issues regarding the implementation and completion of investments projects.

Beneficiaries of the aid schemes are any individual companies, commercial companies, cooperatives, social cooperative companies of Law 4019/2011, groups of producers, agricultural partnerships of Law 4015/2011, companies under formation or under merger, on the condition that they have been incorporated or merged before the commencement of the project, and joint ventures, provided that they have been registered with General Commercial Registry (GEMI).

As regards the terms and prerequisites for participation, it is provided that the compulsory nature of own-participation is abolished. The participation of the beneficiary in the cost of the investment project can take place either through own equity or through external financing. The main prerequisite is that 25% of the total investment cost does not contain state aid, support, or subsidy.

The minimum investment amount ranges from EUR 50,000 (for social cooperative companies) to EUR 500,000 (for large companies).

The investment projects that fall under the aid schemes should have the character of initial investment (buildings, machinery, intangible) and meet certain conditions (indicatively, creation of new plants, extension of existing plants' capacity, etc.).

The investment projects that are covered by the new Law relate, in principal, to all economic sectors, subject to certain exceptions (sector of steel, coal, synthetic fibres, shipbuilding, etc.). Under conditions, the covered investment projects could also relate to:

- Production or co-production and distribution of heat from renewable energy sources and production of electricity by small hydroelectric projects.
- Tourism.

- Processing and marketing of agricultural products, fisheries, and aquaculture products.
- Logistics services.

In respect of the eligible expenses, these are divided into: (i) eligible expenses of regional state aid nature based on the Regional State Aid Map (capital expenditure in tangible and intangible assets, employment cost of new employees) and (ii) eligible expenses of non-regional state aid, which aim to broaden and enrich the investment options towards new qualitative directions. The maximum amounts and percentages of regional state aids and non-regional state aids are also being determined. Based on the general framework, the maximum amounts and percentages of each individual aid scheme are being specified, in accordance with the provisions of the Special Section of the new Law.

Further, with regard to the types of aid, the following types are provided:

- Tax exemption (exemption from the payment of CIT on profits, before taxes, generated from the total business activity of the company, following the deduction of the CIT that corresponds to the profits distributed to the company's shareholders).
- Subsidy of funds in order to cover part of the eligible expenses of the investment project.
- Subsidy of leasing for the acquisition of new machinery and other equipment (which cannot exceed the period of seven years).
- Subsidy of employment cost.
- Fixed CIT rate for a period of 12 years from the completion of the investment project, exclusively for investment projects of major size.
- Funding of corporate risk through Funds of Funds.

All types of aids can be provided either separately or in combination thereof and are all taken into account for the determination of the total aid amount of each investment project. The subsidy of funds and the leasing subsidy are not granted to companies that did not generate any profits in any of the seven tax years prior to the year in which the relevant application was filed. The types of aid are granted (and, respectively, the benefit starts to apply), following a relevant certification, either in lump sum (following the issuance of the decision certifying the completion and the commencement of the productive operation of the project) or gradually (according to the specific requirements per each type of aid granted).

Moreover, as regards the support and implementation of the new Law (filing of applications, documentation file, evaluation, etc.), all procedural issues will be carried out through the State Aid Information System of the Ministry of Finance, Development, and Tourism. The evaluation process includes the stage of completion and legality control and the evaluation stage and is carried out either through the method of comparative evaluation or through the method of direct evaluation. Investment projects that fall under the aid schemes are audited at any time and at any stage of implementation of the investment project or at any stage of fulfilling their long-term liabilities.

It is also provided that the investment project is completed following the commencement of the productive operation of the investment and in any case within the period prescribed in the relevant ministerial decision, which may not exceed three years from the date of issuance of that decision. An extension for two years is also provided, under certain conditions

Special Section

Aid schemes

In the Special Section of the new Incentive Law, the following aid schemes and the relevant aid granted per scheme are being prescribed:

Aid scheme	Types of aid granted
Machinery equipment	Tax exemption.
General entrepreneurship	Tax exemption, subsidy of leasing, and subsidy of employment cost.
New independent small and medium enterprises (SMEs)	Tax exemption, subsidy of funds, subsidy of leasing, and subsidy of employment cost.
Innovative character aid for SMEs	
Clusters	
Integrated regional and sector projects	
Intermediary funding organisations (Funds of Funds)	
Major investments	Public funding to private investors through: (i) equity or 'virtual' equity investment or sponsorship, or (ii) loans for funding of corporate risk directly or indirectly to eligible companies.
	• Fixed CIT rate for 12 years from the completion of the investment project, until the exhaustion of the aid and up to the amount of EUR 10 million. • Alternatively, tax exemption at a percentage of 10% of the eligible investment cost and up to the amount of EUR 5 million. • Possibility to make use of the 'fast track' procedure.

The beneficiaries, the eligible expenses, the type of aids, the percentage of aids, the implementation procedure, as well as the evaluation and audit process are being specifically prescribed per each separate scheme of aid.

The maximum annual amount of state aid budget per each scheme of aid is set at EUR 150 million, for which no prior notification is required and which is deemed compatible with the internal market, in accordance with the provisions of GBER.

Finally, it is noted that, up to date, the Ministry of Development has issued the required Ministerial Decisions for four (out of eight) aid schemes, while the Ministerial Decisions for the following aid schemes are still pending to be issued: innovative character aid for SMEs, clusters, integrated regional and sector projects, and intermediary funding organisations (Funds of Funds).

The procedure for the submission of applications through the State Aid Information System started on 19 October 2016. Depending on the aid scheme, different deadlines apply for the submission of applications from the interested enterprises.

Withholding taxes

WHT rates are as follows:

Type of income	WHT rate (%)
Dividends	15

Type of income	WHT rate (%)
Interest	15
Royalties and other payments	20
Fees for technical projects, management fees, and consultancy and other related services	20
By exception, fees received by contractors of every kind of technical projects and lessors of public, municipal, association, or port proceeds	3% on the value of the project under construction or lease payment

Legal entities tax resident in Greece are not subject to WHT in relation to royalties, fees received for the provision of consultancy and other related services, and management fees, unless provided to general government bodies.

Legal entities that are not tax resident in Greece and do not maintain a PE in Greece are not subject to Greek WHT in relation to technical services, consultancy services, or other related services and management fees.

By virtue of the provisions of the Ministerial Circular 1007/2017, it is clarified that the fees for technical services, management fees, fees for consulting services, and the remuneration for similar services received by an EU legal entity through its PE in Greece are not subject to WHT.

The above exemption does not include the fees received by EU legal entities from the services provided to the general government bodies, as well as the fees for technical services received by the EU legal entities.

Conversely, non-EU foreign legal entities that maintain a PE in Greece are subject to Greek WHT in relation to the provision of the aforementioned services.

Legal entities that are tax resident in Greece or foreign legal entities that maintain a PE in Greece are not subject to WHT in relation to royalty payments.

The exemption from the obligation of WHT for payments of dividends, interest, and royalties by a Greek subsidiary to its parent company includes payments of dividends, interest, and royalties to Greek parent companies.

For the exemption from dividend WHT, the following conditions apply:

- The receiving legal entity should own shares, parts, or a participation of at least 10%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the distributing taxpayer.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
  - included in the forms enumerated in Annex I Part A of Directive 2011/96/EU, as in force
  - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
  - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2011/96/EU, or to any other tax that may in the future replace one of those taxes.

A general anti-abuse rule is applicable by virtue of which the tax exemption in case of collection and payment of dividends is alleviated in case it is considered that a 'non-genuine arrangement' exists. A 'non-genuine arrangement' is an arrangement that has not been put into place for valid commercial reasons reflecting the economic reality.

For the exemption from WHT for interest and royalty payments, the following conditions apply:

- The receiving legal entity should directly own shares, parts, or a participation of at least 25%, on the basis of the value or number, in the share capital, right to profits, or voting rights of the paying taxpayer; the paying taxpayer directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity; or a third legal entity directly owns shares, parts, or a participation of at least 25% in the share capital of the receiving entity and the paying legal entity.
- The minimum holding percentage of shares or parts or participations should be held for at least 24 months (subject to providing a bank guarantee, in which case the exemption may apply prior to completing the 24-month holding period).
- The receiving legal entity should be:
  - included in the forms enumerated in Annex I Part A of Directive 2003/49/EU, as in force
  - tax resident in an EU member state according to the legislation of such state and not be considered as tax resident in a third country in application of the terms of the DTT concluded with such third country, and
  - subject, without the option or exemption, to one of the taxes mentioned in Annex I Part B of Directive 2003/49/EU, or to any other tax that may in the future replace one of those taxes.

Payments of interest of bank loans, including default interest, as well as interest of intra-bank deposits, are exempt from WHT.

Interest received from Greek government bonds and treasury bills by legal entities that are not tax resident in Greece and that do not maintain a PE in Greece are not subject to WHT.

The following table provides a summary of the WHTs applicable under the respective DTTs entered into by Greece:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**

Notes

1. The non-resident legal person, legal entity, or individual pursuing business activity may elect to be taxed on income from royalties and fees for technical services, administration fees, and fees for consulting or similar services in accordance with the rules applicable to tax residents who receive such fees and then credit the WHT against the income tax due.
2. The rate of 5% applies in case the beneficiary is a company (excluding a partnership) and directly holds at least 25% of the capital of the paying company.
3. It should be taken into account that such rates are based on the DTT applicable as of 1 January 2011, whilst other rates have been applicable in the past.
4. The rate of 5% will apply if the beneficial owner is a company that directly holds at least 25% of the voting power of the company paying the dividends.
5. The rate of 5% is applicable only for the right to use cinematograph films.
6. Rate of 5% applies to loans not incorporated into negotiable instruments and granted by banks.
7. A rate of 5% is applicable to shareholders of 25% and above.
8. The rate of 5% applies if the royalties consist of payments of any kind received as a consideration for the use of or the right to use any copyright of literary, artistic, or scientific work, including cinematograph films.
9. Exemption (‘0’ rate) applies to payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for television or radio broadcasting.
10. Interest (on bonds, securities, notes, debentures, or on any other form of indebtedness) received from sources within Greece by a resident or corporation of the United States (US) not engaged in trade or business in Greece through a PE therein, shall be exempt from Greek tax but only to the extent that such interest does not exceed 9% *per annum*; but such exemption shall not apply to such interest paid by a Greek corporation to a US corporation controlling, directly or indirectly, more than 50% of the entire voting power in the paying corporation.
11. The 5% rate is applicable if the royalties consist of payments of any kind received as a consideration for the use of industrial, commercial, or scientific equipment, and the 10% rate is applicable for all the other cases.
12. The 8% rate is applicable when the beneficiary of the interests is a bank or a financial institution, 10% rate is applicable for all the other cases.
13. Exemption (‘0’ rate) applies to copyright royalties and other like payments in respect of the production or reproduction of any cultural or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on films or videotapes or other means of reproduction for use in connection with television broadcasting).

In general, it should be noted that certain DTTs may include specific clauses in specific cases that are not all captured in the table; therefore, a careful review of each DTT is highly advisable.

Tax administration

Taxable period

The taxable period is the calendar year, which may end either on 30 June (for legal persons or legal entities keeping double entry books) or 31 December. The taxable year should not, in any case, exceed 12 months.

The exceptional case of closing the accounting period, for income tax purposes, at a date other than the 31 December or 30 June is limited only to Greek legal entities/other entities that are directly or indirectly owned at a percentage exceeding 50% by foreign legal entities/other entities.

Tax returns

CIT returns of Greek SAs, limited liability companies (LLCs), and branches of foreign companies are filed on a special form by the last day of the sixth month following the end of the tax year.

Tax returns are required to be submitted electronically.

The CIT return constitutes the basis for the direct assessment of tax, which arises without a further action by the tax administration, simultaneously with the submission of the tax return by the taxpayer.

The taxpayer also has the right to amend the tax return by paying the respective difference in tax or by establishing one's rights for a refund of tax paid in excess according to the amended tax return.

Moreover, the taxpayer may request the issuance of a corrective tax assessment act in case of filing an amending tax return for which an administrative assessment tax act has been issued, and the tax administration is obligated to issue such corrective tax assessment if the amending tax return is accepted.

Payment of tax

100% prepayment of the current year's CIT, less tax withheld at source, based on the tax return is paid in eight equal monthly instalments, the first of which should be paid upon filing.

CIT and tax prepayment based on the tax return are paid in eight equal monthly instalments, the first of which should be paid upon filing of the CIT return (i.e. until the last day of the sixth month following the end of the tax year) and the remaining seven until the last day of the seventh month of the filing of the CIT return, which, however, may not extend beyond the same tax year.

For newly established companies, the prepayment is reduced to 50% for the first three years of operations.

Tax audit process

Tax audit procedures

The tax audit commences with the issuance of an audit order for open tax years, usually not more than five. The order concerns the audit of all tax issues (CIT, VAT, WHT, capital gain tax, etc.). The duration of the audit may vary from a few weeks to a few months, in certain cases.

The tax administration performs a tax audit from its offices on the basis of the financial statements, tax returns, and other documents that are submitted by the taxpayer, as well as the documents and information in its possession.

The performance of a complete on-site tax audit must be notified to the taxpayer by a previous written notification. A complete on-site tax audit is performed without prior notification in cases where indications of tax avoidance exist.

The tax administration may have access to the books and records and to other documents of the taxpayers, as well as to the receipt of copies thereof. The tax administration has the same rights with regard to books and records that are kept electronically. It is noted that the legal entity subject to keeping books and records must maintain these books and records for at least five years.

An extension of the on-site tax audit may be granted once for six months, as well as for another six months in extraordinary cases.

The right for a new audit of a tax period already audited is provided only in case new data arises that affects the calculation of the tax liability. 'New data' is defined as all data that could not have been known to the tax administration upon the commencement of the original tax audit.

The election of the cases subject to audit will be made on the basis of risk analysis criteria. Exceptionally, cases may be elected on the basis of other criteria, according to a decision of the General Secretary of Public Revenue. It should be noted that, based on the recently enacted Law 4389/2016, the General Secretarial for Public Revenue is abolished and a new Independent Public Revenue Authority is formed aiming to the determination, the assessment, and the collection of tax, customs, and others public revenues.

The tax administration may use the following audit techniques for the indirect determination of the taxable basis:

- The proportionality principle.
- The analysis of the liquidity of the taxpayer.
- The net position of the relation between the sales price to the total turnover.
- The amount of bank deposits and expenses in cash.

The procedure of notification of the taxpayer of the results of the tax audit is provided. More specifically, a temporary corrective assessment of tax is issued in case a differentiation of tax arises on the basis of the tax returns of the taxpayer and the results of the audit.

Following the submission of such decisions and within 20 days from the receipt of the notification thereof, the taxpayer may submit its views in writing, whilst after that point a final corrective assessment of tax sheet is issued, which is notified to the taxpayer, within a month from the end of the deadline for submitting the taxpayer's views in writing.

Audit Centre for Taxpayers with Great Wealth

The special audit authority 'Audit Centre for Taxpayers with Great Wealth', competent for the whole Greek territory, performs provisional, temporary, and ordinary tax audits, as well as the audit of real estate property and of the annual expenses of individuals. The audit of foreign real estate companies not disclosing their ultimate beneficiary individuals and of Greek real estate companies in which a foreign legal entity participates without disclosing the ultimate beneficiary individuals are also assigned to the Audit Centre for Taxpayers with Great Wealth. Moreover, the Audit Centre for Taxpayers with Great Wealth is also competent for the certification and enforced collection of revenue of taxpayers with great wealth.

Audit Centre for Large Enterprises

The 'Audit Centre for Large Enterprises' is responsible for the performance of ordinary audits of taxpayers with annual gross income exceeding EUR 25 million for the fiscal year closing within 2009, of affiliated enterprises drafting consolidated financial statements irrespective of their gross income on the condition that the gross income of at least one of the affiliated enterprises exceeds EUR 25 million for the fiscal year closing within 2009, and unaudited cases prior to any business restructuring effected until 2011, irrespective of the gross revenues and the competent tax authority responsible for the taxation of their income, on the condition that the company or any of the companies resulting from the business restructuring falls within the ambit of the Audit Centre for Large Enterprises. The Audit Centre for Large Enterprises is also competent for the enforced collection of revenue of large enterprises located in the whole Greek territory.

Following the audit and the notification of tax audit findings, the company may in turn:

- File a mandatory administrative recourse within the framework of the special administrative procedure (out-of-court settlement procedure) before the Directorate for Dispute Resolution with the claim of reviewing any act of the tax authorities (including the tax assessment act), in case the content of the tax assessment act is questioned within a deadline of 30 days for Greek tax residents and 60 days for foreign tax residents from the notification of the act or the realisation of the failure. The direct filing of a recourse before the competent administrative courts against acts of the tax administration is inadmissible.
- Take the case to court (filing of a recourse) against the explicit/tacit negative reply of the Dispute Resolution Directorate. For tax/customs cases exceeding EUR 150,000, the competent court is the Court of Appeal (of first and last instance, which could normally issue a decision within six to 12 months; said timeframe may be longer, taking up to one to two years in case the competent court is the Court of First Instance [i.e. for disputes of an amount less than EUR 150,000]). The Supreme Administrative Court may take up to three to four years.
- Criminal sanctions are also imposed on the company's legal representative under certain conditions.

Moreover, based on the provisions of Law 4438/2016, which was enacted on 28 November 2016, a Mutual Agreement Procedure is introduced in the Code of Tax Procedures, designated to cover the cases of elimination of double taxation in connection with the adjustment of transfers of profits between associated enterprises. Based on these provisions, the taxpayer may file a claim for the initiation of a Mutual Agreement Procedure by application of the Double Tax Conventions as well as the European Convention on the elimination of double taxation in connection with the adjustment of transfers of profits between associated undertakings. The details of application of this new procedure are determined by virtue of a Ministerial Circular issued by the Independent Authority for Public Revenue.

The Ministerial Circular issued by the Independent Authority for Public Revenue provides guidelines as regards the procedure for claiming the initiation of a Mutual Agreement Procedure, the content, the competent authorities for examining the relevant claims, the process for achievement of a Mutual Agreement, the notification of the outcome of the Mutual Agreement Procedure to the taxpayer, and the procedure for accepting such Agreement, as well as any relevant issue with respect to the above.

Tax auditors' practice

In the past, complexity of the Greek tax legislation and the vagueness of its requirements enabled the tax auditors to dispute either the company's results reflected in its accounting records or to disallow expenses. This is true in all tax audits and, in spite of companies' endeavours to comply with the tax requirements, tax audits have always resulted in assessment of additional taxes and penalties.

The amount of additional taxes depends mainly on the following:

- Company's vulnerability because of nature of business and transactions.

- Taxes already paid on the basis of the company's income tax returns.
- Profits declared by competitors.
- Weaknesses and shortcomings that the tax auditors might reveal if a full audit is carried out.

In respect of deductible expenses, the legislation prescribes, among other requirements, that such expenses must be realised for the benefit of the company or in its ordinary course of normal business activity to represent, a valid transaction at a value that is not over or under the market value based on the data available by the tax administration, properly recorded in the company's books in the respective period to which they relate, and can be evidenced by appropriate documentation, without defining what a business expense is. Consequently, the tax auditors dispute the deductibility of various items arguing that, in their opinion, they are not contributing to the company's business income.

Greek SAs and LLCs whose annual financial statements are subject to a statutory audit by individual Certified Auditors and audit firms may optionally obtain an 'annual tax certificate' from their certified auditors upon the completion of a tax audit conducted, confirming compliance with Greek tax legislation. The tax audit is conducted on specific tax areas as defined by a special audit program issued by the Ministry of Finance in cooperation with the Committee of Accounting Standardization and Auditing (ELTE). The audit program is updated annually and is in accordance with the provisions of International Standard on Non-Audit Assurance Engagements 3000.

Statute of limitations

The tax administration may issue an administrative, estimated, or corrective tax assessment within five years from the end of the year in which the deadline for filing the respective tax return lapsed.

This five-year prescription period may be extended for one year if:

- the taxpayer files an initial or amending tax return within the fifth year of the prescription period
- an application for the granting of information from a foreign state has been filed and commences from the date of the receipt of the respective information by the tax authority, or
- a mandatory administrative recourse has been filed and commences from the issuance of a decision that is not subject to recourse.

Exceptionally, for cases of tax avoidance, the tax administration has the right to issue an administrative, estimated, or corrective tax assessment within 20 years from the end of the year in which the deadline for filing the respective tax return lapsed.

In case of a corrective tax assessment resulting in an amendment of the tax assessment act for a year for which the prescription period of the state's right to audit has lapsed, the adaptation is made to the last year for which said right has not been prescribed.

Other issues

Intergovernmental agreements (IGAs) and cooperation

Greece and the United States have reached an agreement in substance and Greece has consented to disclose this status on the US Foreign Account Tax Compliance Act

(FATCA) arrangements with effect from 30 November 2014. The IGA was ratified by L. 4493/2017, which was published in the government gazette in October 2017.

Common Reporting Standard (CRS) regime

By virtue of L. 4378/2017 and L. 4474/2017, Greece proceeded on 30 September 2017 to the exchange of information on accounts held by financial institutions. The exchange of information will take place in September of each respective year, and the deadline for the submission of the information to the tax authorities by the financial institutions is set in May of each year.

Base erosion and profit shifting (BEPS)

Greece adheres, in general, to the BEPS guidelines.

Measures that have been adopted and that are in the spirit of the BEPS guidelines include the CFC legislation and General Anti-Avoidance Rule (GAAR) applicable.

Choice of business entity

The main differences between a subsidiary (i.e. *Société Anonyme* [SA] or limited liability company [LLC]) and a branch of a company, from a corporate establishment perspective, are the following:

- A subsidiary is a separate legal entity from its parent company, whereas a branch does not form a separate legal entity, does not have its own shareholders, and, consequently, the funds needed for its operation are transferred from the overseas parent company.
- The parent company of a branch must be either the equivalent of a Greek SA or an LLC, whereas there is no such restriction for subsidiaries.
- The day-to-day management of a branch is exercised by the legal representative, a person appointed by the parent company, whereas an SA is represented by its BoD and an LLC is administered and directed by the administrator(s).
- No minimum capital is required for the establishment of a branch or LLC; nevertheless, the share capital of the parent company should be, in principle, at least EUR 24,000 if the parent company has the legal form of an SA. However, from a practical perspective, the competent Greek General Commercial Registry might accept the establishment of a branch of an EU based SA, even if the share capital of the parent company is less than EUR 24,000.
- An SA appears to be a more popular type of company than a branch and an LLC. In particular, certain investors still tend to opt for the establishment of an SA company, particularly if they would like to participate in public tenders, etc.

The main legal differences between an SA and an LLC in Greece from a company law/establishment perspective are the following:

- An SA is managed by a BoD consisting of at least three members, whereas an LLC can be managed by only one individual, the administrator (legal entities are permitted to be appointed as BoD members or administrators). Both BoD members and administrators have to acquire a Greek tax registration number and a Greek residence permit (if applicable) prior to the establishment of the relevant companies. It should also be noted that the acquisition of a residence permit for non-EU citizens is a time consuming procedure.
- The shareholders of an SA are not required to be registered with the Greek tax authorities (however, if the said shareholders are also BoD members, they are

required to be registered with the competent Greek tax authorities), whereas the partners of an LLC have to be registered with the Greek tax authorities.
- Establishment/incorporation of an SA is performed through the so-called One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations, certificates, etc.) required for establishment process should be produced and submitted to the Notary Public by the founders of the SA, as said persons are defined in the Articles of Association (AoA) of the SA under establishment, or their representatives appointed by virtue of an (duly legalised as to the signature of the founders) authorisation. After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek SA, including the granting of the Greek tax registration number. Depending on the particular activity of the SA under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required.
- Establishment/incorporation of an LLC is performed through the One Stop Shop Authority (i.e. Notary Public). Any appropriate documents (applications, declarations certificates, etc.) required for the establishment process should be produced and submitted to the Notary Public by the founders of the LLC, or their representatives appointed by virtue of written authorisation (duly legalised as to the signature of the founders). After the submission of the necessary documentation to the competent One Stop Shop Authority, the said authority accomplishes all the necessary steps for the establishment of the Greek LLC, including the granting of the Greek tax registration number. Depending on the particular activity of the Greek LLC under establishment, the satisfaction of particular regulatory requirements, such as the acquisition of certain licences, might be required. SA and LLC companies are supervised by the Greek Ministry of Development (joint supervision by the General Commercial Registry and the competent Prefecture of the registered seat of the SA), which necessitates certain filings to be performed (e.g. minutes of BoD, general announcements, financial statements).

The 'Private Company' (PC)

- The PC constitutes a legal entity and is commercial in nature, even if its object is not *per se* commercial. The capital of the PC can be freely determined by the partners and can amount to zero, whilst its partners participate in the PC by means of capital, non-capital, and guarantee contributions.
- The PC is not entitled to acquire, either directly or indirectly, its own capital parts.
- The PC has its registered seat in the municipality referred to in its AoA, while the transfer of the registered seat of the PC in another country of the European Economic Area does not necessarily result in the dissolution of the PC, provided that the recipient country recognises the transfer and the continuity of legal personality. The PC is not obligated to have its actual seat in Greece, whilst the PC is capable of establishing various types of secondary establishments either in Greece or abroad.
- The term of the PC is definite; if not otherwise stipulated in the AoA of the PC, the PC has a term of 12 years following its establishment.
- The PC is administered and represented by one or more administrators.
- The administrator represents the PC and conducts in its name all actions pertaining to the administration of the PC, the management of its assets, and, in general, the pursuit of its objects.
- The establishment of the PC is effected by means of its registration with the Greek General Commercial Registry (GEMI).
- The PC is dissolved: (i) at any time following a resolution of the partners, (ii) when its definite term has expired, unless the term of the PC is extended by virtue of a

resolution of the partners, (iii) if the PC defaults, and (iv) in all other circumstances contemplated by the law or the AoA.

Significant developments

The Greenlandic Parliament has implemented the Danish Companies Act with effect from 1 January 2018. The implementation of the Danish Companies Act has implied that the Greenlandic Business Register (GER) has been dissolved and that all companies registered in GER are automatically transferred to the Danish Business Register (CVR). It is intended that Greenlandic entities will receive a CVR no. identical to its previous GER no. In the event that a Greenlandic entity's GER no. already exists as a Danish entity's CVR no., the Greenlandic entity will be granted a new CVR no. Further, the implementation of the Danish Companies Act provides new possibilities of establishing a company in Greenland through the digital platform *Virk.dk* and digital solutions regarding changes to existing companies. Therefore, any registrations and changes to existing Greenlandic entities must from now on be performed via *Virk.dk*.

Taxes on corporate income

Greenlandic companies are taxable to Greenland on their worldwide income, except for income from real estate outside of Greenland, which is exempt. Non-resident companies are liable to tax in Greenland on business profits derived through a permanent establishment (PE) in Greenland. Further, non-resident companies are tax liable in Greenland for business profits derived in relation to the exploration for or exploitation of oil, gas, and minerals, regardless of the existence of a PE. Very few double tax treaties (DTTs) offer relief since Greenland only has full-fledged DTTs covering corporate tax with Denmark, the Faroe Islands, Iceland, and Norway.

The corporate tax rate is 30% for both Greenlandic and foreign companies. On top of the corporate tax, there is a 'surcharge' of 6% of the corporate tax payable; consequently, the effective corporate tax rate is 31.8%. Oil and mineral licence holders are exempt from the 6% surcharge according to current practice.

There are no industry-specific or special-tax regimes in Greenland. However, it is determined in all oil exploration licences that oil licensees pay a so-called 'surplus royalty' on top of the corporate tax.

Oil companies

All companies with mineral exploration licences (current and future) are required to pay a government royalty as a condition for grant of a production licence. The royalty terms form part of the licence conditions and vary with the age of the licence.

On licences issued prior to 2014, oil companies pay a 'surplus royalty' of 7.5%, 17.5%, and 30%, which should be paid when the internal rate of return exceeds, respectively, 21.75%, 29.25%, and 36.75% plus the official Danish discount rate, and pay ('carry') the state-owned oil company's 12.5% share of the costs (8% for licences in the 'open door area'). Newer licences apply a gross royalty of 2.5% and a surplus royalty of 7.5%, 17.5%, and 30%, which should be paid when the accumulated turnover exceeds 35%, 45%, and 55%, respectively. Further, the state participation is reduced to 6.25% (carried).

Nonetheless, the model licence terms for upcoming rounds in Baffin Bay contain surplus royalty levels of 7.5%, 10%, and 12.5% at 35%, 45%, and 55% internal rates of return, respectively. In other words, royalty levels are likely to differ between licences and should therefore be scrutinised.

Mining companies

The standard licence terms for mining licences also include provisions on royalties. The standard term gross royalties are 5.5% on gemstones, 5% on uranium and Rare Earth Elements (REE), and 2.5% on all other minerals (excluding oil & gas). Paid or due corporate taxes and dividend withholding taxes (WHTs) may generally be deducted in the calculation of royalties due, except for uranium licences and gemstone licences. For gemstone licences, there is an additional 'surplus royalty' imputed on gross profits exceeding 40%. Detailed provisions apply.

The concrete licence terms should always be consulted rather than the standard licence terms.

Hydroelectric energy

There has been a minor amendment that authorises that companies with a public licence to produce hydroelectric energy may be tax exempt to the extent this follows from the relevant licence. The purpose of this is to allow for replacement of corporate taxes with other payments stipulated by a licence grant, such as turnover based royalties or other forms of payment. This system duplicates the system already in place for licences under the Natural Resources Act (*råstofloven*), which comprises the exploitation of oil, gas, and minerals.

Local income taxes

There are no municipal or local corporate income taxes or similar charges in Greenland; however, WHT rates differ by municipality (*see the Withholding taxes section*).

Corporate residence

A corporation is resident in Greenland for tax purposes if it is registered in the Danish Companies Register with its principal seat of business in Greenland or if it has its effective seat of management in Greenland. The effective seat of management is typically the place where the management decisions concerning the company's day-to-day operations are made.

Permanent establishment (PE)

Non-resident companies are liable to tax in Greenland on business profits derived through a PE in Greenland. Generally, Greenland may be assumed to rely on the principles of the Organisation for Economic Co-operation and Development (OECD) model tax treaty in the determination of whether a PE exists. There is virtually no published practice on the issue. Apart from income from a PE, foreign companies are tax liable on income in connection with the exploration and exploitation of oil, gas, and minerals, regardless of whether a PE exists. This includes all activity ultimately serving the extractive industries, including all kinds of subcontractors and service providers to the industry.

Other taxes

Value-added tax (VAT)

There is no VAT in Greenland.

Import duties

There are no general import duties on operating equipment in Greenland. However, if present in Greenland for more than an eight-month period, operating equipment has to be declared to the Greenlandic tax authorities for statistical purposes. There are import duties on some assets, such as cars, etc.

There are also import duties on alcohol, cigarettes, food products, etc. The fares vary depending on the exact goods in question.

Excise duties

There are Greenlandic excise duties on fishing of some fish species, alcohol produced in Greenland, lottery and gambling activities, motor vehicles, and various other excise taxes. The duties depend on the exact circumstances.

Property taxes

There are no property taxes in Greenland.

Stamp taxes

Stamp tax is payable on a few documents, such as a deed of transfer of real estate and ships (1.5% of the transfer sum), including on transfer of shares in companies that own ships.

Capital gains taxes

There are capital gains taxes on receivables, equity instruments, real estate, financial contracts (derivatives), and depreciable assets, including oil, gas, and mineral licences. The tax rate is identical to the general corporate tax rate, effectively 31.8% (30% for oil, gas, and mineral licence holders).

Losses on financial instruments may only be deducted from gains on financial assets.

Payroll taxes

Other than social security contributions (*see below*), no additional payroll taxes are applicable in Greenland.

Social security contributions

Employers are obligated to pay 0.9% of all paid wages and salaries as social security contributions.

All Danish, Greenlandic, and Faroese employers are subject to Danish social security payments (ATP). This applies to both foreign and Danish employees. However, foreign employees are exempt unless they are working in Greenland for more than six months.

Foreign employers are exempt from ATP unless they employ Danish employees who are not residents in Greenland.

Branch income

Greenlandic PEs of foreign companies, and taxable income connected to oil, gas, and mineral activities, are taxed under the same rules and rates as Greenlandic resident companies. There is no branch profits remittance tax or other similar tax on branch profits. As a branch is considered to be the same legal entity as the headquarters, interest paid from the branch to the headquarters is not tax deductible.

Unusually, if one foreign company has more than one location or PE in Greenland, these are treated as separate taxable entities with no possibility of consolidation.

Income determination

Taxable income is generally calculated as income determined for accounting purposes, which is adjusted and modified for several items as prescribed by the tax laws. One typical timing difference is depreciation.

Inventory valuation

There are no formal rules about inventory valuation in Greenland. Generally, inventory is valued at acquisition cost according to a first in first out (FIFO) principle.

Capital gains

Capital gains are subject to capital gains taxes. *See Capital gains taxes in the Other taxes section for more information*.

Dividend income

Income from dividends is generally included in taxable income. There is no relief, such as participation exemption or the like, meaning that any form of Greenlandic holding structure is generally inefficient. Dividends from foreign companies, however, are tax free, provided that the recipient holds at least 25% of the shares in the distributing company for at least one year.

Interest income

Interest income is generally included in taxable income.

Rental income

Rental income is generally taxable in Greenland; however, rental income from real estate located outside of Greenland is not taxable.

Royalty income

Royalty income is taxable in Greenland.

Partnership income

Partnership income is treated similarly to other income. Partnerships are generally fiscally transparent.

Unrealised gains/losses

Unrealised gains/losses are not taxable in Greenland. Greenland does not use a mark-to-market principle on capital gains.

Stock transactions

Gains and losses on equity transactions are taxable.

Foreign currency exchange gains/losses

Foreign exchange gains/losses are taxable in Greenland if realised; however, only foreign exchange gains/losses on receivables are taxable, not on debentures.

Foreign income

Greenlandic companies are taxable to Greenland on their worldwide income, except for certain income relative to foreign real estate; consequently, income from foreign PEs is taxable to Greenland.

The income of a foreign subsidiary may be taxed in the hands of its Greenlandic parent company if the subsidiary constitutes a controlled foreign company (CFC). *See Controlled foreign companies (CFCs) in the Group taxation section for more information*.

Deductions

The general deduction scheme is fairly standard, although the Greenlandic Tax Agency seems to have a restrictive view of the kinds of expenses that are deductible. One very unusual feature is that dividends paid are deductible for the distributing company.

Depreciation and amortisation

Tax depreciation is not required to be in coherence with book depreciation.

Operating assets can be depreciated by 30% a year on a declining-balance basis, ships and aeroplanes can be depreciated by 10% on a straight-line basis, and buildings and installations can be depreciated by 5% on a straight-line basis. Oil and mineral licences can be depreciated over ten years (oil) and four years (minerals) on a straight-line basis. If the lifetime of the licence is shorter than ten or four years, the licences are depreciated over the lifetime of the licence on a straight-line basis.

Depreciation allowances that are recaptured as part of a capital gain on the sale of an asset are generally fully taxable.

Unusually, companies are allowed a depreciation relief corresponding to gains on divested depreciable assets; however, this rule may not reduce the company's income to less than zero (or less than the balance of depreciable assets in the case of operating assets).

Goodwill
Goodwill can be depreciated as an operating asset (i.e. by 30% on a declining-balance basis).

Start-up expenses
No specific rules in Greenlandic tax law govern the treatment of start-up expenses. Instead, these expenses are treated according to general tax law.

Interest expenses
Interest expenses are generally deductible under Greenlandic tax law. However, there are some limitations (*see Thin capitalisation in the Group taxation section*).

Bad debt
Companies can deduct losses on bad debt for Greenlandic tax purposes only to the extent the losses are realised. Note that there is a high threshold for when a loss is deemed to be realised.

An exception to this rule is that financial institutions shall deduct provisions for bad debt and guarantee liabilities in accordance with the accounting rules applicable to them. The same applies to mortgage institutions, but only if they are domiciled in Greenland.

Charitable contributions
Contributions to charity are not deductible for Greenlandic tax purposes.

Pension expenses
Pension expenses are deductible as operating expenses.

Payments to directors
Payments to directors are deductible as operating expenses.

Research and development (R&D) expenses
R&D expenses may be deductible or not, depending on whether they are deemed operating expenses or capital expenses.

Bribes, kickbacks, and illegal payments
There is no published practice on the deductibility of bribes, kickbacks, return commissions, and the like. In Danish and Greenlandic practice, illegal payments are generally not deductible. Since 2008, any bribery payments, whether in or outside Greenland and whether towards a national or international authority, have been a criminal offence. Consequently, it may reasonably be inferred that no such payments are deductible.

Fines and penalties
Fines and penalties are not deductible for Greenlandic tax purposes.

Taxes
Income taxes are, in general, not deductible for corporate tax purposes. Excise duties are deductible.

Other significant items

A highly unusual item is that dividends distributed are deductible in the hands of the distributing company. If a decision to distribute is made before the deadline for filing the income tax return (1 May) on the basis of the preceding year's profits, the deduction may be carried back into the preceding year.

Net operating losses

Tax losses can be carried forward for up to five years. However, oil and mineral licence holders can carry losses forward indefinitely.

Tax losses may not be carried back and utilised in previous income years.

Tax losses are forfeited at 'significant' change of ownership or, unusually, activity of the company. Dispensation is available. 'Significant' is interpreted as 30% of ownership rights.

Payments to foreign affiliates

A Greenlandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction but is subject to thin capitalisation (*see Thin capitalisation in the Group taxation section*).

Group taxation

Joint taxation is not possible in Greenland.

Transfer pricing

Greenlandic transfer pricing rules apply to transactions between related parties (e.g. intra-group transactions). The rules apply when a company or person directly or indirectly owns more than 50% of the share capital or 50% of the voting rights in another company.

Companies are obligated to disclose in the annual tax return certain information regarding type and volume of intra-group transactions. There is currently no practice regarding requirements for transfer pricing documentation.

Thin capitalisation

Greenland limits interest deductions according to the thin capitalisation rule. This rule works to disallow gross interest costs and capital losses on related-party debt to the extent the overall debt-to-equity ratio exceeds 2:1. Related-party debt is defined so as to include external bank debt if group member companies or shareholders have provided guarantees to the bank. This rule does not apply if the controlled debt is less than 5 million Danish kroner (DKK).

Controlled foreign companies (CFCs)

According to the Greenlandic CFC rules, a Greenlandic company has to include in its taxable income the CFC income of a foreign subsidiary if all of the following criteria are met:

- The Greenlandic company, alone or together with other group companies, individual owners, and/or their next of kin, controls the foreign company.
- During the income year, the subsidiary's financial assets, on average, make up more than 10% of the subsidiary's total assets.
- The foreign company is taxed 'substantially lower' than under Greenlandic taxation.

There is no black or white list that exempts subsidiaries resident in certain countries.

CFC income is defined in some detail and includes a broad spectrum of passive and financial income.

Tax credits and incentives

There are no tax credits or tax incentives in Greenland in general. However, current oil licence holders do, in their surplus royalty basis, qualify for an extra deduction in their capital and operating expenditure of 21.75%, 29.25%, and 36.75%, respectively, plus the Danish discount rate, provided that the surplus royalty basis never has been positive. This is akin to the so-called 'uplift' known to other oil tax regimes.

Newer licences are subject to different royalty regimes, including different 'uplift' regimes. *Please refer to Oil companies in the Taxes on corporate income section*.

It is also possible for mineral licence holders to get a tax holiday from the corporate tax. However, this is only possible if the corporate tax is replaced entirely by other forms of fiscal levies or duties that provide the Greenlandic government with at least the same income as the corporate tax would have done.

Foreign tax credit

According to Greenlandic tax law, relief is generally available to credit foreign tax paid on non-Greenlandic source profits against the Greenlandic tax on the same profits. If relief is offered by treaty, the level of relief is capped at the level offered by the treaty. There are only treaty provisions to this effect with Canada, Denmark, the Faroe Islands, Iceland, and Norway.

Withholding taxes

Greenland has the following WHTs:

- Dividends: 36% to 44%, depending on the local municipality (may be reduced by treaty). It should be noted that paid dividends are deductible in the corporate tax base.
- Interest: There is no WHT on interest.
- Royalties: 30% (may be reduced due to treaty reduction).

Treaty rates are as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Denmark	35	0	10
Faroe Islands	No relief (36% to 44%)	0	25
Iceland	35	0	15

Recipient	WHT (%) Dividends	Interest	Royalties
Norway	35	0	10

Limited international general anti-abuse

Greenland has introduced a limited international general anti-abuse rule whereby a taxpayer will not be granted the advantages of a DTT if it is reasonable to conclude, in light of all relevant circumstances, that granting this advantage is one of the principal aims of the arrangement or transaction, unless it is satisfied that granting the advantage in the concrete circumstances is in accordance with the content and purpose of the provision in question.

Tax administration

Taxable period

The taxable period is the calendar year. Permission can be granted to use a 12-month period other than the calendar year, provided that the period starts on the first day of a calendar month.

Tax returns

Tax returns are completed on the basis of audited financial accounts with adjustments for tax. Tax returns should be filed no later than four months following the end of the income year, meaning 1 May for companies using the calendar year as the income year. However, if the company submits tax returns via the official web portal for tax return submissions, the deadline is 15 June.

The tax system, in practice, is based on self-assessment. Tax assessments are made by the tax authorities on the basis of the tax return.

Payment of tax

The corporate tax is due for payment by 20 November of the following year. Greenland does not have an on account tax system, so there are no advantages in paying the tax prior to this date.

Penalties

A tax surcharge of DKK 200 per day (maximum DKK 5,000) is levied for late submission of the tax return.

Tax audit process

Tax audit is a rather informal procedure, whereby questions for clarification and/or documentation may be asked by the Greenlandic Tax Agency. There are few rules governing audit other than statutory limitation rules.

Statute of limitations

The general statute of limitations is 31 October in the fifth calendar year after that of the end of the relevant income year.

Topics of focus for tax authorities

There does not seem, presently, to be particular focus areas of the Greenlandic Tax Agency, and none have been publically announced.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

In relation to the US FATCA, a Model 1 Intergovernmental Agreement (IGA) is treated as ‘in effect’ by the US Treasury as of 29 June 2014. The United States and Greenland have reached an agreement in substance, and Greenland has consented to disclose this status. In accordance with this status, the text of such IGA has not been released, and financial institutions in Greenland are allowed to register on the FATCA registration website consistent with the treatment of having an IGA in effect, provided that the jurisdiction continues to demonstrate firm resolve to sign the IGA as soon as possible.

Significant developments

There have been no significant corporate tax developments in Guatemala during the past year.

Taxes on corporate income

The tax system of Guatemala is a unitary system, whereby income of all kinds, other than capital gains, is lumped together and subject to a single tax. The components of gross income subject to tax are usually business income, interest, dividends, rent, salaries, and services. Companies are subject to income tax only on their Guatemala-source income. Dividends and other income payable abroad are taxed separately by way of withholding taxes (WHTs).

For income tax purposes, there are two main systems that taxpayers may subscribe to: the system on earnings from lucrative activities and the simplified optional system on income from lucrative activities. The taxpayer chooses what system the company is registered for. Once a system is chosen, it cannot be modified until the next tax period. The request for the modification must be requested before the tax authorities at least one month prior to the new tax period.

These systems are explained below.

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, the tax is determined and paid at the end of each quarter, without prejudicing the end-of-period final tax liquidation. The tax rate is 25% on net income.

This system allows taxpayers to deduct costs and expenses incurred during the period, according to requirements established by law.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, the tax is payable under flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date. The tax rate is 5% on gross income that ranges from 0.01 Guatemalan quetzales (GTQ) to GTQ 30,000 and 7% on the excess.

Local income taxes

There are no specific state or provincial government taxes on income other than the two systems previously described.

Corporate residence

The place of incorporation determines corporate residence. Entities incorporated under Guatemalan laws are required to have their fiscal and corporate residence in Guatemalan territory.

Permanent establishment (PE)

PE includes activities conducted in the country in a continuous manner, either in a fixed business place or facilities conducting work of any kind, except for insurance and refinancing activities, brokers, independent agents, etc. acting in the normal turn of events.

Other taxes

Value-added tax (VAT)

A 12% VAT is levied on the sale or transfer of merchandise and on non-personal services rendered or effected in Guatemala. The tax is payable to the government by way of the invoice method, whereby the tax charged to the customers is offset by the VAT paid over purchases, and the government collects the net resulting amount. The issuance and circulation of credit titles is VAT-exempt.

Sale of goods

The taxable amount on the sale of goods includes the sales price, less any discounts provided under sound commercial practices, plus other charges shown on the invoice.

Services

The taxable amount of services includes the price of the service, less any discounts provided under sound commercial practices, plus financial charges and products used to render the services.

Imports and leases

The tax base for imports is the value declared for import duties computation purposes.

The tax base for leases of movable or immovable property is the value of the lease.

Exempted sales and services

The following items are exempt from VAT:

- Importations made by:
  - cooperatives legally constituted as registered on imported machinery, equipment, and other goods relating to the activity or service of the cooperative
  - individuals and juridical entities under temporary importation regulations, and
  - diplomatic and consular missions accredited before the Guatemalan government.
- Banking institution services and their agents.

- The issuance, circulation, and transfer of credit bonds, value bonds, and stocks of any kind.
- Interest accrued by credit bonds and other obligations issued by mercantile partnerships, negotiated through an authorised stock exchange.
- Exports of goods and services.
- Contributions and donations to educational, cultural, assistance, or security service partnerships, constituted as not-for-profit entities.

VAT return

The amount payable to the *Superintendencia de Administración Tributaria* (SAT), Guatemala's tax authority, is the difference between the debits and credits accrued during the tax period (one month) and is paid monthly by filing a tax return in the calendar month following the end of each tax period.

Refunds of VAT

The VAT credit can be claimed on monthly, quarterly, or semiannual tax periods. The refund of VAT credit corresponds to exporter taxpayers who cannot offset the VAT credit with VAT debits.

In addition, the VAT credit can be claimed by those taxpayers who have a high percentage of sales to entities exempt from VAT.

Import duties

The Customs Duties on Imports (DAI) are contained in the Central American Tariff System (SAC), which contains the tax rates applicable to goods imported into the Guatemalan Territory, ranging from 0% to 20%.

The import duties apply to the customs value declared by the importer.

Excise taxes

Excise taxes are applicable to specific activities, such as fuel distribution tax, alcohol and beverages distribution tax, and tobacco distribution tax.

Fuel distribution tax

Product	GTQ per gallon
Premium fuel	4.7
Regular fuel	4.6
Aviation fuel	4.7
Diesel/gal oil	1.3
Kerosene (DPK)	0.5
Avjet turbo fuel	0.5
Naphtha	0.5
Petroleum liquid gas	0.5

Alcohol and beverages distribution tax

Product	Rate (%)
Beers	6.0
Other fermented cereal drinks	6.0
Wines	7.5
Sparkling wines	7.5

Product	Rate (%)
Vermouth wines	7.5
Ciders	7.5
Distilled alcoholic beverages	8.5
Alcoholic mixed beverages	7.5
Fermented drinks	7.5

Tobacco distribution tax

Tobacco distribution tax is 100% of the factory selling price of a 10-pack package.

Real estate taxes

Real estate taxes are assessed annually at GTQ 2 per thousand on declared property values from GTQ 2,000 to GTQ 20,000, at GTQ 6 per thousand on values from GTQ 20,000 to GTQ 70,000, and at GTQ 9 per thousand on values in excess of GTQ 70,000 (e.g. property valued at GTQ 1 million will pay real estate taxes of GTQ 9,000).

Transfer of property

VAT is payable on the first sale of real estate, and subsequent sales are taxed under the stamp tax regime.

Stamp taxes

Other than sales invoices, contracts, and documents subject to VAT, and other minor exemptions, a stamp tax must be paid on all documents covering commercial and legal transactions (e.g. collection of dividends), either by preparing the document on *papel sellado*, which is special stamped paper, or by affixing stamps on the documents. This tax is also assessed on documents issued abroad, other than drafts or promissory notes and commercial invoices from foreign suppliers. Letters of credit and acceptances involving international transfers of funds are generally exempt from stamp taxes.

The normal tax rate is 3% and is calculated on the face value of the documents or on the gross value of the related transaction.

The stamp tax on dividend payments or credits has been repealed, and a 5% income tax should be paid on dividend payments or credits in account equity.

Solidarity tax (Impuesto de Solidaridad or ISO)

The ISO tax rate of 1% is assessed on the net assets of a corporation, or on the gross income of a corporation, whichever is higher, and there is no limit on the amount to be paid. Tax paid may be credited against the corporation's income tax. If the ISO exceeds the income tax, no reimbursement is possible.

The tax is to be paid quarterly on the basis of the corporation's opening balance sheet for each fiscal period.

Payroll taxes

There are no payroll taxes other than social security contributions (*see below*).

Social security contributions

Corporations contribute 12.67% of their monthly payroll and employees contribute 4.83% of their monthly salary to social security.

Branch income

In Guatemala, branches are taxed as any other legal entity. There are no specific taxes for branches.

Income determination

Inventory valuation

For tax purposes, taxpayers are authorised to use any of the following methods for valuing stocks (i.e. inventory), provided they technically fit the taxpayers' business and are consistently applied:

- Cost of production.
- First in first out (FIFO).
- Weighted average.
- Historical price of assets.
- Estimated cost at a fixed price (additional for livestock activities).

Capital gains

The regime of capital income, capital gains, and capital losses is established with the following tax rates:

- Real estate equity income: 10%.
- Income from trading movables: 10%.
- Capital gains and losses: 10%.
- Incomes from lotteries and raffles: 10%.

Capital losses can be netted only against capital gains, up to a maximum of two years.

Dividend income

Dividends earnings and profits are subject to a 5% income tax.

Interest income

All interest income is subject to a 10% income tax.

Royalty income

Royalties are taxed at a 15% WHT rate.

Foreign income

Foreign-source income received by a domestic corporation is non-taxable under Guatemalan income tax law, provided that it does not relate to a service or activity rendered in Guatemalan territory.

Deductions

Taxpayers under the system on earnings from lucrative activities may deduct costs and expenses from gross income, including the following.

Depreciation

Depreciation is calculated annually using the straight-line method. The tax authority may authorise a different method on request of the taxpayer. The annual maximum rates allowed as deductible expenses are the following:

Asset	Rate (%)
Building and improvements	5
Machinery and equipment	20
Furniture and fixtures	20
Vehicles	20
Tools	25
Tree and vegetable species	15
Computer equipment	33.33
Any other depreciable asset	10

Intangible assets

Intangible assets (e.g. goodwill, trademarks, manufacturing processes, patents, software, know-how) may be deductible under the straight-line method of amortisation over a period that depends on the conditions of the acquisition or creation of the intangible asset concerned, and cannot be less than five years. Goodwill actually paid can be amortised over a period of a minimum of ten years.

Start-up expenses

Start-up expenses are deductible.

Interest expense

The deduction of interest expense may not exceed the result of multiplying the interest rate by three times the average net total assets reported by the taxpayer in the corresponding annual tax return.

Uncollectible accounts

Uncollectible accounts arising in normal business operations can be deducted individually or, alternatively, via an allowance for doubtful accounts, which shall not exceed 3% of the debit balances of accounts and notes receivable.

Charitable contributions

Duly proven donations made to the government, the municipalities, and their agencies, as well as to duly authorised not-for-profit welfare, social service, and scientific associations and foundations, universities, political parties, and guild entities, are deductible. The maximum deductible amount for income tax purposes of each period shall not exceed 5% of the donor's net income, up to a maximum of GTQ 500,000 per year.

Employee pension/retirement funds

The deduction of provisions to establish or increase employee pension and retirement funds or reserves is allowed, provided the government approves the related plans.

Severance compensation payments

Severance compensation payments are allowed as deductible expenses as well as limited allocations (not to exceed 8.33% of total annual salaries and wages) to a reserve for severance compensation. Provisions pertaining to actual liability for severance compensation per year are also allowed, provided the related plans, based on collective bargaining agreements, are approved by the employer and employees.

Fines and penalties

Charges, penalties, and interest charged by any government institutions are not deductible.

Taxes

All taxes are deductible, except income tax and VAT when these are not considered as a cost.

Net operating losses

Operating losses may not be carried forward for deduction from otherwise taxable profits. Guatemalan laws also do not permit carryback of losses.

Payments to foreign affiliates

Deduction for royalties will be allowed, up to 5% of gross income. The deductible expenses for technical services rendered from abroad shall not exceed 5% of gross income.

Expenses incurred abroad by non-residents in connection with income earned from Guatemalan sources cannot be deducted for income tax purposes by merely having the supporting receipts, as the regulations to the law do not permit such a deduction for these purposes, unless these expenses are related with the Guatemalan company operations and these expenses are needed for generating taxable income.

Group taxation

There is no consolidation for tax purposes, as each group entity is treated as an independent taxpayer that shall file its own tax returns.

Transfer pricing

All companies that have any transaction with a related party abroad should have a transfer pricing study.

From a Guatemalan transfer pricing perspective, the scope of application of the rules of valuation of transactions between related parties reaches any operation that has been carried out between a person living in Guatemala with a resident abroad.

Local legislation allows the selection of traditional methods and profit-based methods consistent with the Organisation for Economic Co-operation and Development (OECD) guidelines as well as a sixth method applicable to imports and exports.

Advance pricing agreements (APAs) are permitted, and it is also stated that the tax authority can reclassify activities according to its true nature in accordance with Tax Code statements.

Thin capitalisation

Thin capitalisation applies regarding deductible expenses for interest paid. The deductible amount for such costs may not exceed the value of multiplying the annual maximum simple interest rate determined by the Guatemalan Monetary Board for tax purposes by three times the amount of average total net assets submitted by the taxpayer in the annual income tax return.

Average total net assets is defined as the sum of total net assets of the previous year and total net assets at the end of the year in force (both values must correspond to the amounts filed in the annual income tax return of each period of final settlement) divided by two. Total net assets are defined by law to correspond to the book value of all goods that are actually the property of the taxpayer.

Controlled foreign companies (CFCs)

Guatemala does not have any provisions regulating CFCs.

Tax credits and incentives

Foreign tax credit

Guatemala has no provisions or agreements signed to avoid international double taxation, and no foreign tax credit is allowed.

Drawback industries (maquila)

The Law of Promotion and Development of Exports Activities and Drawback Industries is known in Guatemala as *maquila*. This law seeks to promote, encourage, and develop the manufacture of products within areas controlled by the Customs Authority for export to countries outside the Central American region, as well as to regulate exporting and drawback activities.

The exporter may apply for authorisation to operate under any of the following three systems provided by the law:

- Export under a temporary admission system.
- Export under the reimbursement of duties system.
- Export under the total added national component system.

Tax incentives and benefits of the law include the following:

- Exemption of taxes, import duties, and other charges on imports of machinery and equipment, including VAT.
- Discontinuance of VAT payments on temporary raw material imports.
- Exemption of income tax for ten years on profits obtained under this law.

Withholding taxes

The following WHT rates apply on payments to non-resident corporations or individuals:

Payment	WHT (%)
Dividends, international freight, telecommunications (1)	5
Interest (2)	10
Royalties; salaries; commissions; professional fees; professional, technical, economic, or financial assessment	15

Payment	WHT (%)
Other	25

Notes

1. For international news transmission supplied from abroad to local entities, the rate is 3%.
2. Interests will not be taxed (i.e. no withholding applies) when:
   - These interests are paid to a multilateral entity.
   - These interests are paid from a Guatemalan banking or financial entity to a similar entity abroad.

Non-residents can operate in Guatemala with or without PE; accordingly, income tax treatment depends of the circumstance as follows:

- Non-residents with PE will be subject to income tax, choosing one of the two methods of payment established for residents.
- Non-residents without PE will be subject to WHT, applying specific rates according to the nature of the services rendered.

Tax treaties

Guatemala has no tax treaties in force.

Tax administration

Taxable period

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, the annual final tax liquidation period begins on 1 January and ends on 31 December of each year.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, taxes are paid on a monthly basis.

Tax returns

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, returns are due after the end of the fiscal period (31 December) but no later than 31 March of each year.

The income tax return shall be accompanied by the documents required by the regulations, which might include a:

- balance sheet
- statement of results of operations
- statement of cash flows, and
- statement of cost of production.

Documents must be duly certified by a professional or an independent accounting firm. The financial statements that accompany the return shall agree with both those recorded in the financial statements ledger and those destined for publication.

Both the income tax return and exhibits thereto shall be signed by the taxpayers, their agent, or their legal representative or by any other responsible persons so determined by this law and the Tax Code.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, there is an obligation to file an annual informative tax return, which is due on 31 March of each year.

Payment of tax

System on earnings from lucrative activities

Under the system on earnings from lucrative activities, taxpayers are required to prepay their estimated annual income tax liability in quarterly instalments. The balance is due upon filing the return.

Taxpayers may choose one of the following procedures for computing estimated quarterly tax liability:

- Tax on income shown by partial closure of accounts or computation of presumed liquidation of operations at the end of each quarter.
- Tax on 5% of overall gross income earned during the corresponding quarter of the preceding year (5% of the 30% income tax rate equals 1.5%).
- Tax equivalent to one-fourth of the tax paid for the immediately preceding tax year.

Simplified optional system on income from lucrative activities

Under the simplified optional system on income from lucrative activities, tax is payable via flat tax withholdings (the tax is to be retained by either the customer or the recipient of services) or by direct remittances to the tax office made monthly within the first ten working days of the month following the invoice date.

Taxes on income are governed by the income tax law, *Ley de Actualización Tributaria*, and its related regulations. Administration of the law is vested with the SAT.

Taxpayers registered before the tax administration under this system will settle and pay the tax through the withholding system. Persons or entities obligated to withhold are those taxpayers who pay or credit into account for the acquisition of goods and services to the taxpayers registered under this system.

Tax audit process

The tax authorities can request specific information at any moment. If necessary, a tax audit can be carried out. The tax authorities must formally notify the taxpayer of any specific adjustments, and the taxpayer has 30 working days to file a response. After filing the response, the taxpayer will again be notified by the tax authorities if the adjustments are confirmed or overturned.

Statute of limitations

The right of the tax administration to checks, adjustments, corrections, or determinations of tax liabilities; settle and enforce interest and penalties; and enforce payment of taxpayers must be brought within four years. In the same period, taxpayers must exercise their right of recourse for overpaid or unduly charged taxes, interest, penalties, and fines.

Topics of focus for tax authorities

The tax authorities normally focus on the following:

- Deductible expenses.
- VAT credits.
- WHT.
- Capital gains.

Other issues

Accurate and current information regarding taxation in Guatemala is often difficult to obtain as the country lacks reporting services such as those available in other countries. It is also difficult to determine how the tax laws will be applied in practice in complex situations. The laws and regulations are limited and ordinarily cover only the most common situations. The system of legal precedent resulting from court decisions is narrowly used, and each issue is resolved by reference to the respective codes. Guatemala has shown little interest in tax planning, but it is possible to have informal consultations with the tax authorities and to obtain authoritative rulings in many cases. Discrepancies between government and management criteria are commonly brought to judgment by the Constitutional Court, whose binding sentences generally abrogate the laws in dispute.

Significant developments

There has been an extension of the 10% income tax rates to include regulated investment management services to individual clients from 1 January 2018. This does not include regulated investment management services provided in connection with collective investment schemes.

Taxes on corporate income

Resident corporations are liable to tax on their worldwide income. Non-resident corporations are subject to Guernsey tax on their Guernsey-source income.

Companies pay income tax at the current standard rate of 0% on taxable income.

Income derived from a banking business, insurance business, custody services business, licensed fund administration business, and regulated investment management services to individual clients (excluding collective investment schemes) is taxable at 10%.

'Banking business' is broadly defined as income that arises as a result of the provision of credit facilities by any type of company and the utilisation of customer deposits. Income derived from licensed fiduciaries (with regulated activities), licensed insurers (in respect of domestic business), licensed insurance intermediaries, and licensed insurance managers is also taxable at 10%.

Income derived from the exploitation of property located in Guernsey or received by a publicly regulated utility company is subject to tax at a higher rate of 20%. In addition, income from retail businesses carried on in Guernsey where taxable profits exceed 500,000 British pounds sterling (GBP) and income derived from the importation and/or supply of hydrocarbon oil and gas are also taxed at 20%.

Exempt companies

Some collective investment schemes (CISs) and unit trusts may qualify for exempt status, which will place them completely outside the Guernsey tax regime. In addition, anybody that forms part of, or contributes to, the overall structure of a CIS may claim exempt company status. This removes doubt in relation to the entities that are involved in the management or support of a CIS qualifying for exempt status. For each year for which exempt status is sought, a charge of GBP 1,200 is levied.

One of the following conditions, among others, must be met for the company to be considered exempt:

- The company is beneficially owned outside of Guernsey.
- No Guernsey-resident individual or company has a beneficial interest in the company (with the exception of shareholders, loan creditors, or nominees/trustees).

Loans to participators

If a company makes loans with preferential terms to an individual or entity connected with the company, this will be deemed to be income in the hands of the debtor, and the creditor company will be required to account for, withhold, and pay the tax. Certain exemptions apply.

Local income taxes

Guernsey does not operate any local government taxes.

Corporate residence

All Guernsey-registered companies are regarded as tax resident on the island unless granted exempt company status. In addition, a company will be treated as a resident in Guernsey (regardless of where it is incorporated) if shareholder control is exercised by persons resident on the island.

Permanent establishment (PE)

The Income Tax (Guernsey) Law, 1975 defines PE as including:

- a branch
- a factory, shop, workshop, quarry, or building site, or
- a place of management.

Note that the fact that a body's directors regularly meet at a particular place does not, in itself, make that place a PE of that body.

Other taxes

Value-added tax (VAT)

Guernsey does not operate a VAT or goods and service tax (GST).

Customs and excise duties

In accordance with the European Community (EC) Customs Code and the Implementing Regulation, Customs Import Duty is liable on all goods arriving in the Customs territory of the Community. The rates of duty are set by the European Community and are the same in all countries of the European Community.

The rates vary according to the commodity. Some may be as high as 22%, while, for other goods, the rate may be free.

The Channel Islands are not within the fiscal territory of the European Union (EU), and, as such, the Community Regulations that concern excise duties do not apply. Excise duty is classed as an internal tax.

The rates are reviewed annually by the States of Guernsey and set at budget time, which is usually in November. These cover Guernsey and Alderney, while Sark has its own rates set by the Chief Pleas.

An additional 15% rate of duty is applicable on some goods originating in the United States (US).

Property taxes

Income from Guernsey land and buildings is subject to Guernsey income tax at 20%. No other property taxes apply.

Transfer taxes

Guernsey does not levy transfer taxes.

In respect of the introduction of a Share Transfer Duty regime in Guernsey, which taxes sales of interests in entities that own either commercial or domestic real property in Guernsey at the same rate as applied under the Document Duty Law for standard conveyances, the Committee has continued to consult with the Guernsey Bar Council and other interested parties on the draft legislation and is intending to submit a Policy Letter for consideration shortly.

Stamp taxes

Guernsey does not levy any stamp duties.

Payroll taxes

The Employee Tax Instalment (ETI) Scheme is a scheme whereby the employer deducts income tax from its employees and pays this over to the Guernsey Income Tax Office.

The ETI Scheme applies to all employees. For the purposes of the ETI scheme, an employee is an individual holding or exercising an office or employment, including a company director, part-time workers, casual workers, and sub-contractors.

The ETI Scheme operates on a quarterly basis. Throughout each quarter, the employer should deduct tax from their employees on each payday. Details of the gross weekly or monthly wage and deductions made must be recorded and returned with the relevant remittance by the 15th day of the month following the end of the relevant quarter (e.g. tax deducted during the first quarter needs to be submitted by 15 April).

Social security contributions

An employer, for the purposes of Social Insurance, is anyone who has employees. An employee is anyone who is gainfully occupied in employment under a contract of service in Guernsey or Alderney.

In general, contributions are required from both employer and employee in respect of any employed person who is over school-leaving age and under 65. Employer social security contributions are levied on the gross employment income of the employee at 6.6%.

Employer social security contributions for 2018 are calculated on a monthly lower earnings limit of GBP 598, which is the level of earnings at which an employer becomes liable for the payment of contributions. The upper limit for 2018, which is the highest level of earnings on which contributions are calculated, is GBP 11,908 per month.

Branch income

Branch income is taxed in the same manner as companies, at the appropriate rate according to the activity being undertaken.

No further tax is withheld on the transfer of profits abroad to group companies, provided no Guernsey-resident individual has an interest in the company.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. Use of last in first out (LIFO) is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Guernsey.

Dividend income

All dividends paid by a standard tax-paying company (0%) are deemed to have been paid from income arising after 31 December 2007 (i.e. after the introduction of the zero/ten tax regime), unless the company elects to have them treated otherwise.

Stock dividends

Stock dividends may be treated as income.

Interest income

Interest income received by a standard tax-paying company is taxable at 0%.

Please refer to the Taxes on corporate income section for further information on companies liable to tax at the company intermediate rate (10%).

Royalty income

Royalty income is treated as income for corporate income tax purposes. Any royalty income received by a standard-tax paying company is taxable at 0%.

Foreign income

Resident corporations are liable to tax on their worldwide income. Income tax is levied on foreign branch income when earned, and on investment income from foreign dividends, interest, rents, and royalties. Double taxation is mitigated either through unilateral relief (by giving credit for foreign taxation of up to three-quarters of the effective Guernsey rate) or by treaty relief.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for the purpose of trade.

Depreciation

Annual allowances are granted for income tax purposes in respect of the following:

Assets	Basis	Rate (%)
Buildings:		
Stone, brick, concrete, or other substantial structures	Reducing-balance	1.25
Buildings of a less substantial construction	Reducing-balance	5
Farm Buildings	Straight-line	5 or 10 (depending on material utilised)
Motor vehicles, buses, lorries, and motorcycles	Reducing-balance	25
Computer hardware	Straight-line	20
Machinery and plant	Reducing-balance	20
Glasshouses:		
Expenditure in respect of initial allowance*	Straight-line	10
Other expenditure	Straight-line	5

* Section 123 (3) of the Law defines expenditure and circumstances on which initial allowances can be claimed in respect of glasshouses.

Goodwill

The amortisation of goodwill is not a deductible expense in Guernsey.

Start-up expenses

Pre-trading expenditure incurred within the 12 months prior to the commencement of trade, which would have been allowable had it occurred on the first day of trading, may be allowed as a deduction in computing the profits of the first accounting period.

Interest expenses

Interest is a deductible expense where it is incurred wholly and exclusively for the purposes of trade.

Bad debt

Bad and doubtful debts discovered in the accounting period to have become bad or irrecoverable may be deducted from taxable profits, but the deduction may not exceed the amount written off as such in the books of the business.

Charitable contributions

Charitable donations by companies are not deductible for Guernsey income tax purposes.

Fines and penalties

Fines or penalties incurred are not deductible for Guernsey income tax purposes.

Taxes

Income tax paid is not deductible in computing taxable income.

Net operating losses

Losses from one class of income may be used to offset the profits from another class of income if both classes are subject to tax at the same rate. Unrelieved trading losses may be carried forward to offset future trading income.

Upon cessation of trade, operating losses arising from balancing allowances may be carried back to the previous two years of charge to be relieved against past trading profits.

Payments to foreign affiliates

Guernsey-source royalties and long-term interest are subject to taxation at source. Relief is obtained by the retention of the tax deducted. Short-term interest, unless owed to an authorised bank, is not deductible, unless the advance in respect of which it is paid is used wholly and exclusively for the purposes of trade. Other fees must be paid on an arm's-length basis.

Group taxation

Group loss relief may be claimed when both companies are members of the same group and the companies are either carrying on business in Guernsey through a PE or incorporated in Guernsey. Loss relief is available only against income taxed at the same rate.

A claim for group loss relief must be made by the claimant company within two years after the end of the calendar year in which the relevant accounting period ended, and the claim must be accompanied by a declaration by the surrendering company that it consents to the surrender.

Transfer pricing

Guernsey does not currently have specific transfer pricing legislation in place. However, the general anti-avoidance provisions do apply.

Country-by-country reporting (CbCR)

Guernsey has formally committed to the Organisation for Economic Co-operation and Development (OECD) model of CbCR and has already put in place the relevant implementing regulations for entities with accounting periods commencing on or after 1 January 2016. In addition, Guernsey has signed up to the Multilateral Competent Authority Agreement (MCAA) to assist with the sharing of relevant information in relation to CbCR, as well as broadly adopting the OECD's CbCR implementation package, to facilitate its implementation of this base erosion and profit shifting (BEPS) minimum standard.

Multinationals having global revenues of 750 million euros (EUR) or more are required to file annual reports to tax authorities at three levels. The first element (which taxpayers are generally required to provide for fiscal 2016) is a 'country-by-country report' that gives a detailed picture of business results for each country where the business operates (including things like number of employees, revenues, pre-tax profit, and taxes paid). Companies will also need to give an overall picture of their global business, aggregating data from all of the countries where one operates. In addition, companies will be required to report separately to each country where they operate with business and tax information about the local entities and operations in that country.

The disclosure of this business information will be accessible, through automatic information exchanges, to tax authorities wherever they have a presence (subject to certain conditions). Groups will need to consider how to explain their operational purpose of business arrangements, which may include tax advantages.

The deadline for submission of the CbCR report to the Guernsey tax authority is within 12 months of the end of the accounting period to which it relates.

Where there is no reporting obligation, there is a requirement to notify the Director of Guernsey Income Tax of the name of the entity that is undertaking the reporting and to provide certain other information. An entity must notify the Director by 30 November in the year following the last day of the accounting period if it is a constituent entity.

Thin capitalisation

Guernsey does not currently have specific thin capitalisation legislation in place. However, the general anti-avoidance provisions do apply.

Controlled foreign companies (CFCs)

Guernsey does not currently have specific anti-avoidance legislation in relation to CFCs. However, the general anti-avoidance provisions do apply.

Tax credits and incentives

In view of the low rate of tax, no special incentives are available to local businesses in Guernsey.

Foreign tax credit

Guernsey has signed full double taxation treaties (DTTs) with Cyprus, Hong Kong, Isle of Man, Jersey, Liechtenstein, Luxembourg, Malta, Mauritius, Monaco, Qatar, Seychelles, Singapore, and the United Kingdom (UK) and tax information exchange agreements (TIEAs) with 60 jurisdictions.

If no bilateral agreement exists, relief available to Guernsey-resident companies is the lesser of the other territory's effective rate or three quarters of the Guernsey effective rate.

Withholding taxes

Companies paying dividends to Guernsey resident individuals are required to deduct or account for the difference between the tax incurred by the company and the shareholder's individual tax rate (20%) on actual distributions.

A company is required to withhold tax when it is acting as an agent and making payments to a non-resident liable to Guernsey tax.

Guernsey does not levy any other forms of withholding tax (WHT).

Double taxation treaties (DTTs)

The table below sets out the rates of WHT applicable to the most common payments of dividends and interest under Guernsey domestic law where such a liability arises and the reduced rates that may be available under an applicable DTT. Please refer to specific treaties to ensure the values are up to date.

Guernsey, Channel Islands

Recipient	WHT (%) Dividends	Interest
Resident corporations	0 (1)	0/10 (1)
Resident individuals	20 (2)	0 (3)
Non-resident corporations and individuals:		
Non-treaty	0	0
Treaty (4):		
Cyprus	0	0
Hong Kong	0	0
Isle of Man	0	0
Jersey	0	0
Liechtenstein	0	0
Luxembourg	0/5/15 (5)	0
Malta	0	0
Mauritius	0	0
Monaco	0	0
Qatar	0	0
Seychelles	0	0
Singapore	0	0
United Kingdom	N/A (6)	N/A (6)

Notes

1. Resident corporations receiving dividends and interest are not subject to any WHT.
2. For resident individuals, if the income has been taxed on the paying company at 0%, a 20% deduction should be made. If the income has been taxed on the paying company at 10%, 10% WHT should be applied. If the income has been taxed on the paying company at 20%, there should be no deduction at source.
3. Resident individuals are paid interest gross, without any WHT; however, individuals are required to file an annual tax return and pay 20% income tax on any interest received.
4. Where a reduced rate of withholding is allowed by any treaty, whether on dividends or interest, it is usual for this reduced rate to be stated not to apply to amounts that are in excess of a normal commercial rate of interest, or where the dividend or interest is effectively connected to a PE in Guernsey of the recipient; such general limitations are not specifically indicated in the table. Moreover, note the general requirement for dividends and/or interest to be beneficially owned by the recipient in order to access benefits under a treaty.
5. Dividends paid by a company that is a resident of Guernsey to a resident of Luxembourg may be taxed in Luxembourg. However, such dividends may also be taxed in Guernsey, and if the beneficial owner of the dividends is a resident of Luxembourg, the tax charged may not exceed 5% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends or 15% of the gross amount of the dividends in all other cases.
6. The Explanatory Note to the Guernsey-United Kingdom DTT specifically excludes dividends and interest from the scope of the DTT.

Tax administration

Taxable period

The tax year runs from 1 January to 31 December, although companies can adopt a year-end of their choice.

Tax returns

It is compulsory for all Guernsey companies to file their tax returns online.

Companies are required to file their income tax return on 30 November following the calendar year in which the accounting period ends. Should a company meet the conditions below, a simplified return may be filed without either a computation or financial statements.

In order to qualify for a simplified return, a company must have none of the following:

- Guernsey employees (other than directors).
- Guernsey-resident individual beneficial owners.
- Income from utilities (e.g. Guernsey water or electricity companies).
- Income from Guernsey properties.
- Income from a banking business.
- Income from domestic insurance business.
- Income from a licensed fund administration business providing administration services to unconnected third parties.
- Income from the provision of custody services.
- Income from the provision of regulated investment management services to individual clients.
- Income from the importation/supply of hydrocarbon oil and gas.
- Income from a retail business where the profits are above GBP 500,000.
- Loans to Guernsey participators.
- Distributions made to Guernsey-resident individuals.

Should a company have Guernsey-resident individual beneficial members and/or make loans to participators, it will be required to submit quarterly returns accounting for distributions and loans advanced.

Payment of tax

In Guernsey, tax is payable in two instalments, on 30 June and 31 December in the year of charge (calendar year). If liabilities have not been determined, this may necessitate initially raising estimated assessments based on prior year figures and raising a final assessment when the figures are agreed. Once the Income Tax Office has received the company's income tax return, they will issue an assessment detailing the final balancing income tax payment due. This amount will be due to be paid within 30 days of the issuing of the final assessment.

Tax audit process

The Income Tax Office will assess each company tax return as and when it is received, and the turnaround time from submission of a return to the issue of a final assessment varies dependent upon the workloads of the Income Tax Office but is generally dealt with in around three months.

Statute of limitations

The Director can raise an assessment in respect of any income that has not been assessed at any time no later than six years after the end of the year of charge in which the income arose.

Topics of focus for tax authorities

There are no current areas that the Guernsey Income Tax Office is particularly focusing on in regards to corporate taxpayer compliance.

Other issues

US-Guernsey intergovernmental agreement (IGA)

On 13 December 2013, Guernsey signed an IGA regarding the implementation of Foreign Account Tax Compliance Act (FATCA). The IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.

UK-Guernsey IGA

On 22 October 2013, Guernsey signed a FATCA-style IGA with the United Kingdom (UK-Guernsey IGA) under which mandatory disclosure requirements may be imposed in respect of 'Investors in the Fund' who are UK resident or who are non-UK entities controlled by one or more UK resident individuals, unless a relevant exemption applies. The UK-Guernsey IGA has been ratified by Guernsey's Parliament and is embodied in The Income Tax (Approved International Agreements) (Implementation) (United Kingdom and United States of America) Regulations 2014. Its operative provisions came into force from 30 June 2014.

Common Reporting Standard (CRS)

Guernsey adopted global CRS on Automatic Exchange of Information on 1 January 2016. The first reporting took place in 2017.

Significant developments

On 27 November 2017, the Minister of Finance presented the National Budget 2018. The following measures were proposed and will come into effect after the relevant Enactment has been passed:

- A reduction in the Tributor's Tax from 20% to 10%.
- Replacement of the current 2% of the gross proceeds regime with a sliding scale percentage that is based on the price of gold.
- Removal of the value-added tax (VAT) on the provision of all educational services.
- Full deduction for employers and businesses of capital costs and expenses related to provisions of day care services to employees and the construction of handicap facilities.
- Tax amnesty.
- Filing of corporate tax returns without audited financial statements.
- Exemption from VAT on supply of logs and rough lumber to the sawmilling industry.
- Reduction in the rates of excise tax on the importation of overland transportation used for tourism purposes in Regions 1, 7, 8, and 9.
- Removal of VAT on vehicles that are less than four-years old, which are used to transport more than 21 persons.
- Removal of excise tax flat rate of 6,900 United States dollars (USD) and replacement with a VAT of 14% on vehicles four-years old and older that carry between 22 and 29 passengers.
- Exemption of excise tax on vehicles principally designed to accommodate liquefied petroleum gas (LPG) with an engine capacity not exceeding 2000 cc and not exceeding four years of age from the date of manufacture to the date of importation.
- Exemption of machinery and equipment from the payment of customs duties to set up 75 refilling stations for such vehicles, as determined by the Commissioner General.

Taxes on corporate income

Resident companies are liable to tax on their worldwide income. Non-resident companies that carry on a trade or business in Guyana are subject to tax on the income that is derived from Guyana.

The current rates of corporate tax are as follows:

Type of company	Corporate tax rate (%)
Telephone companies	45
Commercial companies *	40
Other companies (non-commercial)	27.5

Guyana

Type of company	Corporate tax rate (%)
Both non-commercial and commercial	27.5/40

* A commercial company means any company carrying out commercial activities solely. Where dual activities are carried out by a company, the portion of the activity relative to commercial activities shall be so deemed. 'Commercial activity' means an activity carried out by a company trading in goods not manufactured by it and includes an activity of a commission agency, a telecommunications company, a body corporate licensed to carry on banking business in Guyana, and an insurance company carrying on in Guyana insurance business, other than long-term insurance, as defined in section 2 of the Insurance Act.

Minimum Corporation Tax (MCT)

Commercial companies (other than insurance companies) are subject to tax at the rate of 40% of chargeable profits or 2% MCT of turnover, whichever is higher. Any excess MCT over tax at the normal rate is carried forward for setoff against corporate tax payable in subsequent years, provided that in no year is the tax payable reduced to less than 2% of turnover.

Local income taxes

There are no additional income taxes imposed on companies.

Corporate residence

Corporate residence is determined by reference to the location of the central management and control of the business of a company. There are no specific provisions within the law, and, as such, common law principles established by the courts are generally applied in determining residence. The place of incorporation is regarded as merely one of the factors to be taken into account in determining where central management and control are located.

Permanent establishment (PE)

There are no specific provisions in the legislation dealing with PE, so common law principles are applied.

Other taxes

Value-added tax (VAT)

VAT is charged at the rates of 14% or 0% on the taxable supply of goods and services within Guyana by a registered person.

Zero-rated supplies include goods for export and international travel. Exempt supplies include educational services, residential rent, and financial services.

Customs duties

Customs duty is paid on all goods imported into Guyana. The rates of duty vary between 5% and 150%, depending on the classification of the item in question. Rates of duty are highest on 'luxury items', which include perfumes.

Excise taxes

Excise tax is imposed on specific imported or home-produced products. These products include alcoholic beverages, tobacco products, petroleum products, and motor vehicles.

Property taxes

Property tax is an annual tax charged on the net property of a person at the end of each year. 'Property' for the purpose of this tax refers to movable or immovable rights of any kind and effects of any kind. Net property is the amount by which the total value of the property exceeds the total value of all debt owned by the person at that time.

The tax is payable on 30 April at the following rates:

Net property of a company (GYD*)	Property tax rate (%)
On the first 1.5 million	0
On every dollar of the next 5 million	½
On every dollar of the remainder	¾

* Guyanese dollars (GYD)

Stamp taxes

Stamp duty is levied at various rates on several instruments, including affidavits, statutory declarations, deeds of conveyance, mortgages, share transfers, awards of arbitrator, powers of attorney, agreements, bills of exchange, receipts, and policies of insurance.

Capital gains taxes

Capital gains tax is imposed at the rate of 20% on the net chargeable gains derived from the disposal of capital assets. Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax.

Payroll taxes

Employers are required to deduct and remit pay-as-you-earn (PAYE) to the tax authority by the 14th day of the month following that in which the employment income was paid. The rate of tax is 28% for persons earning less than GYD 180,000 per month and 40% for persons earning in excess of GYD 180,000 per month.

Employment income includes salaries, wages, overtime pay, leave pay, sick bonus, stipends, commissions, compensation for termination of service, and the estimated value of any accommodation provided.

Social security contributions

As an employer, a company is also required to deduct and remit social security contributions on behalf of employees. Social security contributions are due on monthly earnings of employees up to GYD 240,000 and weekly earnings up to GYD 50,385. The rates of contribution are 8.4% for employers and 5.6% for employees.

Branch income

A branch is subject to tax in Guyana on all income directly or indirectly accruing in or derived from its operations in Guyana. The tax rates applicable on branch profits are the same as on corporate profits. In addition, branch profits, after deduction of corporate tax and reinvestments, are subject to withholding tax (WHT) at the rate of

20%. The position noted may be varied by the provisions of any applicable double tax treaties (DTTs).

Income determination

Inventory valuation

Inventory is valued at the lower of cost and net realisable value. Cost is generally determined using the average cost method for accounting and tax purposes, but the first in first out (FIFO) method is also acceptable.

Capital gains

Gains derived from the disposal of an asset within 12 months of its acquisition are treated as ordinary income and subject to corporate tax at the applicable rates. Gains derived from the disposal of assets held for more than 25 years are exempt from tax. Otherwise, gains are subject to capital gains tax. *See Capital gains taxes in the Other taxes section for more information*.

Dividend income

Corporate tax is payable on dividends received by resident companies from non-resident companies. However, dividends paid by resident companies to other resident companies are exempt from tax.

Interest income

Interest income is taxed at the applicable rate of corporate tax.

Royalty income

Royalty income is taxed at the applicable rate of corporate tax.

Foreign income

Income earned by a non-resident company in Guyana is subject to tax in the year the income was earned. There is no deferral regime in Guyana.

Deductions

All revenue expenses wholly and exclusively incurred in the production of income are generally deductible.

Depreciation

Tax depreciation rates (wear and tear allowances) apply to the following classes of assets, as follows:

Class of assets	Depreciation rate (%)
Aircraft	33 ⅓
Boats	10
Buildings (housing and industrial)	5
Furniture and fittings	10
Motor vehicles	20
Office equipment, including computers and computer software	50
Other	15

Class of assets	Depreciation rate (%)
Plant and machinery	20

Buildings that house machinery are depreciated using the straight-line method. Other assets may be depreciated using the declining-balance or straight-line methods.

Goodwill

Goodwill expense is generally not allowable in arriving at chargeable income.

Start-up expenses

No specific rules exist in respect of start-up expenses, but such expenses are generally not deductible.

Interest expenses

Interest expense incurred in the production of income is deductible. There is no restriction to the deductibility of this expense.

Bad debt

A bad debt is deductible where it has been incurred in the trade in which the company is engaged and has been respectively estimated to the satisfaction of the tax authority to have become bad in the year of income when the claim is made.

Charitable contributions

Charitable donations are not deductible unless they are made under a deed of covenant.

Fines and penalties

Fines and penalties are not generally deductible.

Taxes

Taxes are not generally deductible in arriving at taxable profit.

Net operating losses

Companies may carry forward losses for an unlimited number of years, but the losses may not reduce the taxable income in any year by more than 50%. Loss carrybacks are not permitted.

Payments to foreign affiliates

A corporation engaged in business in Guyana may claim a deduction for royalties and interest charges paid to foreign affiliates, provided the appropriate WHT is deducted and properly accounted for. Deductions for administrative, technical, professional, or other management services fees paid to a non-resident company or branch, referred to as 'head office expenses', are restricted to 1% of the annual turnover.

Group taxation

There is no provision under the legislation for group taxation in Guyana. All companies are taxed separately.

Transfer pricing

There is no transfer pricing legislation or rules in Guyana, although the issue has been discussed and is expected to be more formally considered in the future. However, the current Act contains a general anti-avoidance provision, and the tax authority monitors multinationals to ensure that their transactions are conducted at arm's length and in conformance with the applicable tax legislation.

Thin capitalisation

There are no thin capitalisation rules in Guyana.

Controlled foreign companies (CFCs)

CFCs are not covered under Guyana tax laws.

Tax credits and incentives

Various tax incentives are available, depending on the nature of the industry that the companies are engaged in, including the following:

- Customs duty and VAT exemption on most plant, machinery, and equipment.
- Customs duty and VAT exemption on raw materials and packaging materials used in the production of goods by manufacturers and small businesses.
- Unlimited carryover of losses from previous years.
- Accelerated depreciation on plant and equipment.
- Full and unrestricted repatriation of capital, profits, and dividends.
- Tax deduction for scientific research expenses.
- Initial and annual allowances.
- Tax holidays.

Tax holidays are granted in respect of pioneering activities, that is, to companies whose trade or business are wholly of a developmental and risk-bearing nature and likely to be instrumental to the development of the resources of and beneficial to Guyana.

This does not include trade or business carried on by a gold or diamond mining company or a company carrying on petroleum operations.

Tax holidays are granted for a period of up to ten years.

Foreign tax credit

Foreign tax relief is available under DTTs with Canada, the United Kingdom, and Caribbean Common Market (CARICOM) countries.

Unilateral relief is also available for foreign taxes paid in non-treaty countries with tax systems and legislation similar to those in Guyana. For British Commonwealth countries, the relief is 50% of the relief that would be available if the foreign country were a treaty country. For other countries, the relief is 25% of such available relief. The available relief is the lower of the tax rate in Guyana and the tax rate in the other country.

Withholding taxes

WHT is chargeable on gross payments to non-residents and must be remitted to the tax authority within 30 days of making the payment. In cases where the treaty rate is higher than the statutory rate, the lower statutory rate applies. The rates of WHT for various payments are shown in the table below.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	20	20	20
Treaty:			
Canada	15	15	10
United Kingdom	10	15	10
CARICOM	0	15	15

Tax administration

Taxable period

The tax year is the calendar year. Tax is assessed during a tax year on income earned during the year of assessment, which is generally the calendar year preceding the tax year. Companies with an accounting year other than a calendar year may, however, be allowed to account for taxes by adopting their accounting year as their income year.

Tax returns

Tax returns must be filed by 30 April of the tax year.

Payment of tax

Corporate tax is payable in advance quarterly instalments on the preceding year's tax liability. Advance tax payments are due on 15 March, 15 June, 15 September, and 15 December of the calendar year prior to the tax year. However, the Commissioner of Inland Revenue may require the company to calculate the payments based on estimated income for the current year.

Any balance of tax due must be paid by 30 April of the tax year.

Penalties

Failure to file a tax return and pay the balance due by 30 April of the tax year incurs a further charge of 10% on the outstanding tax. A flat fee of GYD 50,000 will be applied to each loss/deficit return submitted after the prescribed time.

Tax audit process

Companies are generally selected at random for audits, and the frequency is usually every three years. Companies are generally required to provide financial information and supporting documentation to the tax personnel.

The tax authority is the Guyana Revenue Authority.

Statute of limitations

A company carrying on business in Guyana is required to keep proper accounts and records and is required to retain these accounts for a period of at least eight years after the completion of the transactions, acts, or operations to which they relate.

The Commissioner is empowered to raise an assessment for tax or additional tax within seven years after the expiration of the year of assessment.

Topics of focus for tax authorities

The following issues are currently being focused on by the tax authorities:

- Tax evasion and corruption.
- Strengthening tax administration.
- Creation of tax policies and forecasting analysis capability.
- Business registrations and compliance.

Other issues

Intergovernmental agreements (IGAs)

Guyana has entered into the following IGAs:

- United States (US) Foreign Account Tax Compliance Act (FATCA).
- Income Tax (Exchange of Information) (United States of American) Order.

Foreign investment restrictions

There are no restrictions on the repatriation of capital and investment income, and residents and non-residents have unlimited access to foreign exchange markets and to repatriate funds.

Exchange controls

There are no exchange control rules in place in Guyana.

Choice of business entity

Businesses operating in Guyana may establish a local company or register an external company. Additionally, companies may operate through a joint venture.

Significant developments

Since 1 January 2017, Decree No. 170-2016 reforms the tax code, establishing new tax dispositions, including the taxpayers' obligations and rights.

Effective 2 March 2017, the tax authority agreement No. 005-2017 establishes the tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Effective 31 December 2017, all taxpayers are obligated to comply with the new Invoice, Other Fiscal Documentation, and Printers Registry Regime (*Regimen de Facturación, Otros Documentos Fiscales y Registro Fiscal de Imprenta*).

Effective 20 April 2018, the Law on the regulation of public finances, control of exonerations, and anti-evasion measures was reformed, derogating the payment of the 1.5% minimum tax, establishing that in 2018 the payments will be 0.75% of the revenues ranging from 300 million Honduran lempiras (HNL) to HNL 600 million and 1% for those that exceed HNL 600 million.

Taxes on corporate income

Honduran resident companies are taxed on territorial income. Non-resident companies are subject to corporate income tax (CIT) only on income derived from Honduran sources.

The CIT rate for a resident company is 25% of its net taxable income.

Non-resident companies providing sea, land, and aerial transport services are subject to 3% income tax on the annual gross income from Honduran sources in cases where the tax calculation resulting from the application of the CIT rate is less, based on the taxable base established by the corresponding regulation.

Minimum tax

Domiciled companies that have obtained gross income equal to or greater than HNL 300 million for the 2018 fiscal year will not be subject to the payment of 1.5% minimum tax. The domiciled companies with revenues ranging from HNL 300 million to HNL 600 million will instead be subject to payment of 0.75% minimum tax, and those that exceed HNL 600 million will be subject to payment of 1% minimum tax.

Solidarity Contribution

The Solidarity Contribution is a non-deductible surcharge levied on all companies on taxable income over HNL 1 million. The Solidarity Contribution tax rate is 5%.

Income tax anti-evasion measures

A law created in response to tax evasion and fraud establishes payment of an income tax of 1% on gross income equal to or greater than HNL 100 million for all taxpayers who report losses for two years in a row or two out of five. The 1% tax paid will be considered as a credit in the resulting income tax, surtax, or net asset payable in the annual returns. There are some exemptions to the rule.

Municipal income taxes

Industry, commerce, and services tax

Companies doing business in Honduras are levied the following municipal tax on annual gross income:

From (HNL)	To (HNL)	Range (HNL)	Tax per ´000
0	500,000	500,000	0.3
500,001	10,000,000	9,500,000	0.4
10,000,001	20,000,000	10,000,000	0.3
20,000,001	30,000,000	10,000,000	0.2
30,000,001	And over		0.15

Corporate residence

The place of incorporation is regarded by Honduran authorities as the corporate residence. Non-resident companies are companies incorporated/registered outside of Honduras.

Permanent establishment (PE)

There is a provision in the transfer pricing rules that provides the following definition of PE:

"Permanent establishment is a fixed place of business where a natural or juridical person resident or domiciled in another state performs part or all of its activities in Honduras. Likewise, a foreign resident will be considered to have a permanent establishment in Honduras when it acts in the national territory through an independent agent that is not acting under the regular framework of its activity."

There are some exceptions to the rule.

There is no treaty definition of PE since, at the present time, Honduras is not a signatory of any double taxation treaty (DTT) with another jurisdiction in the world.

Other taxes

Sales tax

Sales tax is charged on all sale and purchase transactions of goods and services made in Honduran territory.

The general sales tax rate is 15%. It applies to most goods and services, with the exception of machinery and equipment, basic grains, pharmaceutical products, raw materials for the production of non-taxable goods, petroleum products, school supplies, and insecticides, among others.

The import and sale of beer, other alcoholic beverages, cigarettes, and other tobacco products are subject to 18% sales tax.

There is a 15% sales tax applicable to some PCS, cellular, internet broadband, cable TV, and energy services, depending on the amount of consumption billed by the supplier.

There is an 18% sales tax levied on first class and business class air tickets.

Customs duties

The duty assessed by the Honduran government at the time of customs clearance ranges between 0% and 15% for most items.

Honduras is a member of the Central American Common Market (CACM), which also includes Costa Rica, El Salvador, Guatemala, and Nicaragua. Honduras' rates on most goods from outside CACM are currently within the 0% to 15% range. Under the Dominican Republic-Central America Free Trade Agreement (CAFTA-DR) with the United States (US), about 80% of US industrial and commercial goods can enter the region duty-free, with the remaining tariffs to be phased out over ten years. Nearly all textile and apparel goods that meet the Agreement's rules of origin are duty-free and quota-free, promoting opportunities for US and regional fibre, yarn, fabric, and apparel manufacturing (the Agreement's tariff treatment for textile and apparel goods was made retroactive to 1 January 2004).

It is necessary to first obtain the appropriate Harmonized System (HS) classification number for determining when a particular product can enter the CAFTA-DR region duty-free. With this number, it is then possible to check the country and product-specific tariff elimination schedule.

Ad valorem import taxes can be as high as 20%. In addition, imports are subject to the sales tax of 15% or 18% that applies to the sum of the cost, insurance, and freight (CIF) value, the *ad valorem* duty, and the customs fees.

Excise taxes

There is an excise tax levied on the production and importation of cigarettes, sodas, beer, and alcoholic beverages.

Cigarettes are levied at HNL 433.12 per thousand units.

Excise tax on sodas, beer, and alcoholic beverages are levied according to the following table:

Description	Tax rate per litre (HNL)
Soda/other prepared drink	0.72
Beer	5.10
Wine	6.40
Brandy, cognac, vermouth	34.55
Whisky	34.55

Description	Tax rate per litre (HNL)
Rum 40°	21.04
Rum 38°	19.99
Rum 36°	18.93
Gin, vodka, tequila, liquor, creams, prepared beverages	34.55
Aguardiente 45°	15.04
Aguardiente 40°	12.37
Aguardiente 38°	10.35
Aguardiente 30°	7.42

Net assets tax

The net assets tax is an annual 1% tax on the net asset value of the company. It applies to the gross value of assets less reserve for accounts payable and any accumulated depreciation allowed under the income tax law and other deductions allowed by law. The law also allows a special deduction of HNL 3 million.

The net assets tax is in lieu of CIT when CIT is less than the amount due for net asset tax. Resident companies during their preoperative period (i.e. the period in which the company started operations but has not issued its first invoice) and companies operating in free trade zones (FTZs), among others, are exempt from the net assets tax.

Non-resident companies are not liable for the net assets tax.

Transfer taxes

Transfer taxes are levied on real estate transactions at HNL 1.5 per every HNL 1,000.

Stamp taxes

There are no provisions for stamp taxes in Honduras.

Capital gains tax

In general, a 10% tax is applied on capital gains, regardless of the person's residence status. Under the Zolitur law territory, a special regime, the tax rate is a 4% flat tax on capital gains.

The payment of capital gains tax must be made within ten business days after the agreed amount of the transaction has been determined.

In instances where a transaction is subject to the capital gains tax and a non-resident is involved, the buyer has an obligation to withhold 4% of the transaction amount as an advance payment to this tax and must pay it to the government within ten business days of the date of the transaction.

The government offices make a corresponding 10% withholding tax (WHT) on capital gains on payments made due to purchase and sale transactions of goods, indemnifications, purchase of rights, and securities.

Payroll taxes and contributions

Payroll taxes and contributions are paid by employers at the following rates:

- Social security tax contributions are assessed as follows:

    - Sickness and maternity: 2.5% for employees on income, up to a maximum monthly ceiling of HNL 7,717.50 on income.
    - Invalidity, old age, and death: 2.5% for employees on income, up to a maximum monthly ceiling of HNL 8,882.30 on income.
    - Professional risk: 0.2% for employees on income, up to a maximum monthly ceiling of HNL 7,717.50 on income.
- Institute of Professional Education (*Instituto Nacional de Formación Profesional* or INFOP): 1% over the accrued amount.
- Housing fund (*'Régimen de Aportaciones Privadas' or RAP/'Fondo Social para la Vivienda'* or FOSOVI): 1.5% on the excess of the employee's income of HNL 8,882.30. Note that this contribution is optional.

Special temporary contributions

For the term of five years starting 1 January 2014:

- Under the Special Temporary Security Contribution on Financial Transactions (*Contribución Especial por Transacciones Financieras Proseguridad Poblicional*), financial transactions are subject to a contribution of HNL 2.00 per thousand or fraction of a thousand, with some exceptions.
- Companies providing mobile communication services will pay a special temporary contribution of 1% on gross monthly income.
- Under the special temporary contribution for the protection of the environment from the mining sector, there is a 2% contribution on the freight on board (FOB) value of the exports.
- The special temporary contribution from the food and beverages business under special tax regimes is 0.5% on gross monthly income.
- The cooperatives special contribution is 3.6% on annual net surplus.

Municipal taxes

Companies doing business in Honduras are also subject to the rules and regulations of the respective municipalities. Taxes and obligations are ruled by the *'Plan de Arbitrios'*. Some of these tax obligations include the following:

- Industry, commerce, and service tax, which is based on gross income per year (*see the Taxes on corporate income section*).
- Public services fee, which is paid for services such as waste management.
- Real estate tax, which is a tax on urban and rural real estate.
- Sign tax, which is a tax on public advertising.

Branch income

Branch income is subject to income tax on income generated from a Honduran source at the rates applicable for corporate income.

Income determination

Income is computed in accordance with generally accepted accounting and commercial principles, subject to certain adjustments required by the tax law.

Inventory valuation

Inventories are generally valued using the first in first out (FIFO), last in first out (LIFO), and weighted-average cost methods.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information*.

Dividend income

The income from dividends is considered 'other income', thus non-taxable under the general income tax rates. There is a 10% WHT rate applicable on the dividends paid to non-residents.

In the first quarter of 2015, the government abolished the double taxation on dividends. Any dividends or distribution of profits that were subject to the corresponding 10% dividend WHT will not be taxed again in case of redistribution.

Stock dividends

Stock dividends are also not taxable.

Interest income

Honduran Bank interests are subject to a 10% WHT at the moment the interest is given, when the sum is over HNL 50,000. Interests from abroad are considered as other income. For income tax reconciliation, interest income is considered non-taxable when subject to the 10% WHT.

Royalty income

Royalties are taxed in the same manner as general income if the recipient is a local company or branch. If the recipient is a non-resident, then the application of a WHT will apply.

Foreign income

Deferral and anti-deferral of foreign income are not regulated in Honduras.

Deductions

The net taxable income of an enterprise is determined by deducting all the ordinary and necessary expenses incurred in the generation of income, including amortisation and depreciation; municipal taxes; donations made in favour of the state, the central district, the municipalities, and legally recognised educational institutions, charities, and sporting facilities; mandatory employer-employee contributions to the social security system; and 'reasonable' charges for royalties and management services.

In general, all expenses incurred in the generation of taxable income are considered as deductible for income tax purposes. However, there are some 'non-deductible' expenses, even if incurred in the generation of income (e.g. interest paid to owners or shareholders, capital losses).

Depreciation

Depreciation may be computed using the straight-line method. Companies may also obtain authorisation from the tax authorities to use other depreciation methods. However, after a company selects a depreciation method, it must apply the method consistently thereafter. The following are the applicable straight-line method rates for some common assets.

Asset	Rate (%)
Buildings	2.5 to 10
Plant and machinery	10
Vehicles	10 to 33
Furniture and office equipment	10
Tools	25

Goodwill

Goodwill can be amortised over a period of five years.

Start-up expenses

Organisation or reorganisation expenses are deductible for the total amount as long as they do not exceed 10% of the initial capital stock. These expenses can be amortised over five years.

Interest expenses

Interest expenses are deductible as long as they are incurred in order to generate income. Interest paid to stockholders, owners, or their spouses is not deductible.

Bad debt

Taxpayers can record a bad debt provision of 1% of the total credit sales, which will not exceed 10% of the accounts receivable balance.

Charitable contributions

Contributions to organisations legally recognised by the government are deductible.

Capital losses

Capital losses are not deductible to determine the net taxable income. Capital losses can only be netted against capital gains, which are subject to a tax rate of 10% (*see Capital gains tax in the Other taxes section*).

Contingent liabilities

Provisions for contingent liabilities, such as severance pay, are not deductible for tax purposes; actual payments during the fiscal period, for those liabilities, are considered to be deductible expenses.

Fines and penalties

Fines and penalties are not deductible.

Taxes

With the exception of the Solidarity Contribution, net asset taxes, CIT, and sales tax (i.e. if sales tax paid is used as a credit to net the sales tax payable to the government), taxes and contributions paid to district or municipalities are deductible expenses when determining taxable income.

Net operating losses

Companies engaged in agriculture, manufacturing, mining, and tourism may carry forward losses for three years. However, certain restrictions apply. Losses may not be carried back.

Payments to foreign affiliates

Payments to foreign affiliates are deductible as long as the service is effectively received.

Group taxation

No provisions exist for group taxation in Honduras.

Transfer pricing

Transfer Pricing Law was issued by the Honduras National Congress through Decree 232-2011 on 10 December 2011 to regulate every commercial and financial transaction performed between related parties. Transfer Pricing Regulations were later issued by Agreement 027-2015 on 18 September 2015 establishing and expanding the procedures for the application of transfer pricing legislation in Honduras.

The scope of application of this law reaches any operation that is performed between natural or legal persons domiciled or resident in Honduras with related natural or legal persons non-resident or non-domiciled and those under a special regime who enjoy fiscal benefits.

The Honduras tax authority allows taxpayers the request of an Advance Price Agreement (APA) to establish the values for the commercial or financial transactions performed with related parties prior the implementation of such transactions and for a specific time.

Related parties

For tax effects, it is considered that two or more natural or legal persons, domiciled or not, are related parties when:

- An individual, entity, or corporation participates, directly or indirectly, in the direction, control, or capital of the other.
- Same individuals, entities, or corporations participate, directly or indirectly, in the direction, control, or capital of one of them.
- They constitute a decision unit.
- They conduct direct or indirect commercial or financial transactions, indirect being those transactions that aim to reduce the income tax base, amongst Honduras resident or domiciled individuals or entities located within another jurisdiction qualified as a tax haven.
- They have the same counsellors or administrators.

When participation is defined in terms of capital or control over voting rights, a direct or indirect participation of more than 50% will be required in either case.

Comparability analysis

Comparability, for transfer pricing matters, is known as the analysis of two or more assets (tangible or intangible), services, or similar companies with the purpose of revealing their correlation and likeness and, in this manner, to be able to determine if it is possible to calculate or adjust the material differences that affect their price.

Among the comparability items we should take into account are included the following:

- Features of the good or service.
- Operations or activities carried out, assets used, and risks undertaken.
- Contractual terms.
- Economic or market circumstances economics.
- Business strategies.

Selection and hierarchy of the methods to apply the arm's-length principle

According to Decree 232-2011 and the Organisation for Economic Co-operation and Development (OECD) Guidelines, to determine if the operations are in accordance with the arm's-length principle, any of the following methods should be applied:

Transactional methods

- Comparable Uncontrolled Price Method (CUP).
- Resale Price Method (RPM).
- Cost Plus Method ('Cost Plus').

Based on income

- Profit Split Method (PSM).
- Transactional Net Margin Method (TNMM).

Honduras Transfer Pricing Legislation considers the application of a sixth method for goods traded on transparent international markets. Taxpayers may apply methods other than the above-mentioned methods, provided it can be demonstrated that it cannot apply any of the above methods in a reasonable and reliable way to determine the conditions of the free and full arm's-length principle.

Range of prices on arm's length

From the application of any transfer pricing method, one may obtain a range of prices whenever there exists two or more comparable transactions. These methods will be adjusted through the application of statistic methods, among them can be included the use of the interquartile range. Other statistic methods may be used in the frame of an amicable proceeding.

Taxpayer's obligations

Income taxpayers that are related parties and perform commercial and financial transactions among them have the obligation to:

- Determine for tax purposes their income, costs, and deductions with the application of prices and profit margins that would be implemented in comparable commercial and financial transactions with third parties.
- Notify to the tax authority the selected method to determine the commercial and financial transactions value in arm's-length conditions.

- File a transfer pricing return before the tax authority with sufficient analysis to assess the transactions performed with related parties.

Thin capitalisation

At the present time, there are no provisions for thin capitalisation in Honduras.

Controlled foreign companies (CFCs)

At the present time, there are no provisions in the Honduras legislation for CFCs.

Tax credits and incentives

Companies operating under a special tax regime are exempted from CIT, sales tax, customs duties, and some municipal taxes. These special tax regimes are the following:

- FTZs.
- Industrial processing zone (*Zona Industrial de Procesamiento* or ZIP).
- Temporary import regime (*Régimen de Importación Temporal* or RIT).
- Tourism incentive law.
- Law promoting the generation of electric energy with renewable resources (*Ley de Promoción a la Generación de Energía Eléctrica con Recursos Renovables*), which provides tax exemptions for ten years for projects generating 50MW and over.
- In the regulations for the FTZs there is a consideration for international service companies (e.g. business processing operations [BPOs], call centres and contact centres, shared service centres) that will have the same tax exoneration provided by this regime.
- The Call Centre and BPO Promotion Law, which provides a tax holiday on import of tools, parts, accessories, furniture and office equipment, and all goods involved with the company's active business as well as an income tax holiday on revenue from all the business activities carried out within the FTZs.

Companies must comply with some governmental requirements to operate under one of the above-mentioned special regimes.

Companies under special tax regimes are allowed to sell their partial or total production in the local market; income from local sales will be subject to the regular corporate tax regulations.

The Organic Work Regions and Economic Development Law (*Ley Orgánica de las Zonas de Empleo y Desarrollo Económico*) allows the beneficiaries of this law to use reduced rates for income tax, sales tax, property tax, real estate tax, and flat tax.

There is a reform to the tariff and customs legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid tariff and customs tax exonerations decrees that continue to have the corresponding benefits (*contact your local PwC practice for more information*).

There is also a reform to the income tax legislation that grants tax exonerations in general; the government established in the Decree No. 278-2013 a list of the valid income tax exonerations decrees that continue to have the corresponding benefits (*contact your local PwC practice for more information*).

Effective 1 January 2014, the term of tax exoneration is limited to 12 years to those companies under special tax regimes with no specific term for their tax benefits specified in their corresponding resolution issued by the government.

Effective 5 June 2014, the Law for the Promotion and Protection of Investment (*Ley para la Promoción y Protección de las Inversiones*) was amended, establishing a 15-year term for tax stability agreements, except for Public and Private Alliances projects. At the same time, it repeals the special income tax discounts granted by this law.

Drawback industries

Special benefits exist for industries that import semi-manufactured materials for assembly in Honduras and export finished products. Benefits consist of duty-free imports of raw materials for subsequent export as manufactured products. Machinery for these industries may also be imported duty-free.

Foreign tax credit

There are no provisions for foreign tax credits in Honduras.

Withholding taxes

WHT for residents

Distribution or payment of dividends or any other form of distribution of retained earnings or reserves to resident or domiciled individuals and/or legal entities is taxed via WHT at 10%.

The tax authority is empowered to withhold 3% on CIF from import operations for commercial purposes as an advance payment to income tax to those companies or individuals not duly registered with the tax authority, not complying with CIT filing, or in liquid arrears for any tax administered by the *Servicio de Administracion de Rentas (SAR*). There are some exceptions to the rule.

WHT for non-residents

For non-residents in Honduras, any income derived from Honduran sources is taxable under the following table of the Income Tax Law:

Income source	WHT (%)
Real estate and movable property rent, except dividends and interest	25
Royalties from mining operations and other natural resources	25
Salaries paid for services and other remuneration for rendering of services within national territory or abroad	25
Profit transfers from branch office to head office	10
Dividends	10
Royalties	25
Interest paid on commercial operations, bonds, securities or negotiable instruments, and other types of obligations	10
Income from operation of airplanes, ships, and vehicles	10
Income from operation of telecommunication companies	10
Insurance premiums	10
Income obtained from public shows	25
Films and video tapes for cinemas, TV, video clubs, and cable TV	25
Any other income not mentioned previously	10

Tax treaties

Honduras has not signed any tax treaties with foreign jurisdictions.

Tax administration

The SAR is the tax authority in Honduras and is responsible for the administration of the tax system. Taxpayers may request approval from the SAR regarding direct or indirect taxes (e.g. accelerated depreciation methods on new assets acquired by corporations with monetary activities requiring constant technological update, higher installed production capacity and productive re-conversion processes in order to maintain and strengthen their competitive advantage).

Taxable period

The statutory tax year runs from 1 January through to 31 December. However, taxpayers may apply to use a special tax year by requesting an authorisation from the SAR.

Tax returns

Companies must file a CIT return on 30 April every year.

Payment of tax

Mandatory advance tax payments are payable each quarter, based on the income tax paid for the preceding tax year. Final tax is due with the CIT return on 30 April every year.

Tax audit process

The audit cycle can begin after (i) the date the tax return should have been filed or (ii) sometime after the taxpayer made a request before the tax authority (e.g. tax credit, loss carryforward).

Statute of limitations

The statute of limitation for legal actions is applicable for taxpayers, in order to challenge and request payment, and for the fiscal authority, to review, notify, and request payment. Such limitation is established according to the following terms:

- Four years for those conducting operations in the customs regime and five years for registered taxpayers.
- Ten years for those who have the obligation to be registered and currently are not.
- Seven year in other cases.

Limitation of actions and powers of the fiscal authority will be interrupted according to the following:

- Determination of the tax by the fiscal authority counted from the day following notification of resolution.
- Notification of the judicial action for collection, counted from the day following the notification.
- Notification of the resolution in which the fiscal authority confirms assessment, interests, penalties, or fines in liquid payable amounts, counted from the day following the resolution's notification.

- Legal appeal filed by the taxpayer, counted from the day following the filing of the appeal.
- Express acknowledgement from the debtor, counted from the day following the acknowledgement.
- Payment plan agreement granted to taxpayers according to law, counted from the day following the formal agreement.
- Exercise of the appropriate legal actions, counted from the day following their initiation.

Relapse in the lack of complete or partial payment from the taxpayer, as established in the Tax Code, will be considered as criminal tax fraud.

Limitation of the taxpayer to request credit will be interrupted according to the following:

- Legal appeal filed by the taxpayer.
- The lawsuit presentation before the judicial authorities.

Topics of focus for tax authorities

The tax authority is currently focused on the adoption of the fiscal and customs tax regularisation and amnesty (*Amnistía y Regularización Tributaria y Aduanera*) by the taxpayers. Under this amnesty benefit, taxpayers pay the tax and customs debt without interest, fines, or surcharges, whether or not they have payment plans with the tax authorities.

Other issues

US Foreign Account Tax Compliance Act (FATCA)

The government of Honduras signed the intergovernmental agreement (IGA) regarding FATCA with the government of the United States, formalising the exchange of information for tax purposes on American and Honduran citizens and/or companies.

Significant developments

New legislation enacted

The following pieces of legislation were enacted in the past 12 months:

- Two-tier profits tax rates: Inland Revenue (Amendment) (No.3) Ordinance 2018, which implements the two-tier profits tax rates in Hong Kong, was gazetted on 29 March 2018. Effective from the year of assessment 2018/19, the first 2 million Hong Kong dollars (HKD) of assessable profits of corporations and unincorporated businesses will generally be taxed at 8.25% and 7.5%, respectively. The remaining assessable profits will be subject to the normal tax rate at 16.5% and 15% for corporations and unincorporated business, respectively. As an anti-avoidance measure, a group of 'connected entities' can only nominate one entity within the group to enjoy the reduced tax rate for a given year of assessment.
- Concessionary tax regime for aircraft leasing and management operations: Inland Revenue (Amendment) (No. 3) Ordinance 2017 was enacted on 7 July 2017. The Ordinance introduced, among others, a concessionary tax regime for the aircraft financing and leasing businesses in Hong Kong by (i) offering a concessionary profits tax rate of 8.25% for the assessable profits derived from qualifying aircraft leasing activities and qualifying aircraft leasing management activities carried out in Hong Kong and (ii) deeming the taxable net lease payments derived by a qualifying aircraft lessor from leasing of aircraft to an aircraft operator as 20% of the gross lease payments less deductible expenses, excluding tax depreciation allowance, when certain specified conditions are met. The concessionary tax regime applies to sums received or accrued on or after 1 April 2017.
- Increase in stamp duty on certain transactions: Stamp Duty (Amendment) Ordinance 2018 was gazetted on 19 January 2018. It increases the stamp duty rate on transfer of Hong Kong residential properties to a flat rate of 15%, with certain exemptions. One common exemption is the acquisition of residential property by a Hong Kong permanent resident who does not own any residential property at the time of acquisition. In this case, the applicable stamp duty ranges from a fixed amount of HKD 100 (for property consideration of up to HKD 2 million) to 4.25% of the consideration (for property consideration exceeding HKD 20 million). The 15% flat rate applies retrospectively from 5 November 2016, unless specifically exempted or provided otherwise.
- Close the loophole in stamp duty: Stamp Duty (Amendment) (No. 2) Ordinance 2018 was gazetted on 20 April 2018. It tightens the situation where the 15% flat rate is not applicable. Pursuant to the Ordinance, unless specifically exempted or otherwise provided, any instrument executed on or after 12 April 2017 for acquisition of more than one residential property under that instrument will be subject to stamp duty at a flat rate of 15%, even if the acquirer is a Hong Kong

permanent resident who does not own any residential property in Hong Kong at the time of acquiring the multiple residential properties.

Taxes on corporate income

Hong Kong adopts a territorial basis of taxation. Profits tax is payable by every person (defined to include corporation, partnership, and sole proprietorship) carrying on a trade, profession, or business in Hong Kong on profits arising in or derived from Hong Kong from that trade, profession, or business. However, capital gains and receipts that are capital in nature are not subject to tax. Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to tax in Hong Kong. The tax residence of a person is generally irrelevant for profits tax purposes. The tax treatments of public and private companies are the same.

Certain income that would not otherwise be subject to Hong Kong profits tax is deemed to arise in or be derived from Hong Kong from a trade, profession, or business carried on in Hong Kong and thus becomes taxable in Hong Kong. This includes royalties received by a non-resident for the use of or right to use a patent, design, trademark, copyright material, secret process or formula, or other property of a similar nature in Hong Kong, or for the use of such intellectual properties outside Hong Kong, but the royalties paid can be claimed as a deduction by a person for profits tax purposes.

Effective from the year of assessment 2018/19, a two-tiered profits tax rate is introduced in Hong Kong. The following table shows the applicable tax rates for companies and unincorporated businesses:

Rates of tax	Where the two-tiered rate applies * (%)	Where the two-tiered rate does not apply (%)
Companies:		
First HKD 2 million	8.25	16.50
On the remainder	16.50	
Unincorporated businesses:		
First HKD 2 million	7.50	15.00
On the remainder	15.00	

* As an anti-avoidance measure, a ‘group of connected entities’ can only nominate one entity within the group to enjoy the two-tiered tax rate for a given year of assessment.

There are special rules for determining the tax liabilities of certain industries, such as shipping, air services, and financial services. There is also a special tax framework for Islamic bonds (i.e. *sukuk*) that provides for the same tax treatments for *sukuk* vis-à-vis their conventional counterparts.

Incomes from certain qualifying debt instruments (QDIs) are either tax exempt or subject to a concessionary tax rate (i.e. 50% of the regular profits tax rate). However, there is a specific anti-avoidance provision under which the concessionary tax rate/ tax exemption does not apply to incomes derived from QDIs by a person who is an associate of the issuer of the QDIs.

Offshore investment funds (i.e. funds with central management and control outside Hong Kong) having fund managers and investment advisors with full discretion for making investment decisions in Hong Kong can be exempt from Hong Kong profits tax on profits derived in Hong Kong, provided the specified conditions are met. The offshore funds tax exemption covers different types of offshore funds (e.g. hedge funds and private equity funds), but the qualifying conditions are different for different types of funds. There are also specific anti-avoidance provisions in the Inland Revenue Ordinance (IRO) deeming certain resident persons to be subject to profits tax on their share of the non-resident person's tax-exempt profits.

Profits derived from the business of reinsurance of offshore risks and qualifying offshore captive insurance business are subject to profits tax at a concessionary tax rate (i.e. 50% of the regular profits tax rate).

Qualifying profits derived by a qualifying corporate treasury centre are subject to profits tax at a concessionary tax rate (i.e. 50% of the regular profits tax rate) under specified conditions.

Effective from 1 April 2017, qualifying profits derived from qualifying aircraft leasing activities and qualifying aircraft leasing management activities carried out in Hong Kong are subject to profits tax at a concessionary tax rate (i.e. 50% of the regular profits tax rate) under specified conditions. In addition, the taxable net lease payments derived by a qualifying aircraft lessor from leasing of aircraft to an aircraft operator will be deemed as 20% of the gross lease payments less deductible expenses, excluding tax depreciation allowance.

Corporate residence

In general, for Hong Kong profits tax purposes, corporate residency is not important in determining taxability of an entity. The decisive factors for taxability are (i) whether a corporation is carrying on a trade, profession, or business in Hong Kong, and (ii) whether the profits are arising in or derived from Hong Kong.

However, where it is necessary to determine the corporate residence, such as for the purpose of a comprehensive double tax agreement (CDTA), companies incorporated in Hong Kong and companies that are normally managed or controlled/centrally managed and controlled (depending on the provisions of the relevant CDTA) in Hong Kong are generally considered as a Hong Kong tax resident.

Permanent establishment (PE)

For Hong Kong profits tax purposes, whether a foreign corporation is carrying on a trade, profession, or business in Hong Kong and the source of profits, rather than whether there is a PE in Hong Kong, are the decisive factors in determining taxability. The existence of a PE is generally irrelevant for Hong Kong profits tax purposes except in the situation where a CDTA of Hong Kong is applicable.

Other taxes

Value-added tax (VAT)

Hong Kong does not have a VAT, goods and services tax, or sales tax.

Customs duties

There is no tariff on general imports in Hong Kong.

Excise tax

Duties are levied on limited categories of dutiable commodities (i.e. tobacco, liquor, methyl alcohol, and hydrocarbons), regardless of whether they are imported or locally manufactured.

Property tax

Property tax is charged annually to the owner of any land or buildings (except government and consular properties) in Hong Kong at the standard rate of 15% on the net assessable value of such land or buildings. Net assessable value of a property is the consideration payable to the owner for the right to use the land or buildings less rates paid by the owner and a 20% notional allowance.

Rental income derived by a company from a Hong Kong property is subject to profits tax. The company that is subject to profits tax may apply for an exemption from property tax in respect of the property. If no exemption is applied, the property tax paid can be used to offset against the profits tax payable by the company.

Stamp duty

Stamp duty is charged on transfer of Hong Kong stock by way of sale and purchase at 0.2% of the consideration (or the market value if it is higher) per transaction. Hong Kong stock is defined as stock the transfer of which must be registered in Hong Kong.

For conveyance on sale of immovable property in Hong Kong, the stamp duty payable depends on the type of property transferred (i.e. residential property vs. non-residential property) and the property consideration. Currently, stamp duty on transfer of properties is charged as follows:

1. Transfer of residential property: A flat rate of 15%, with certain exemptions. One common exemption is acquisition of a single residential property by a Hong Kong permanent resident who does not own any other residential property in Hong Kong at the time of acquisition (*see 2 below*).
2. Acquisition of a single residential property by a Hong Kong permanent resident who does not own any other residential property in Hong Kong at the time of acquisition and some other specified circumstances: Scale 2 rates ranging from HKD 100 (for property consideration of up to HKD 2 million) to 4.25% (for property consideration exceeding HKD 20 million).
3. Transfer of non-residential property: Scale 1 rates ranging from 1.5% (for property consideration of up to HKD 2 million) to 8.5% (for property consideration exceeding HKD 20 million).

The stamp duty payable is computed by applying the relevant rate to the consideration or market value of the property (whichever is higher). When Scale 1 or Scale 2 rates are applicable, marginal relief is available for transfer where the consideration is marginally above the lower bound of each rate band.

For lease of immovable property in Hong Kong, stamp duty is calculated at a specified rate of the annual rental that varies with the term of the lease. Currently, the applicable rate ranges from 0.25% (for lease period of not more than one year) to 1% (for lease period of more than three years).

Exemption is available for certain transactions, such as transfer of shares between associated corporate bodies, transfer of shares or units of exchange traded funds listed in Hong Kong, and certain stock borrowing and lending transactions, provided that the specified conditions for exemption (if any) are satisfied.

Special Stamp Duty (SSD)

There is an SSD on resale of residential property within 36 months from the date of acquisition. The SSD is imposed on top of the stamp duty payable on conveyance on sale or agreement for sale of residential property, with a few exemptions. The SSD payable will be calculated based on the stated consideration or the market value (whichever is higher) of the resold property at the regressive rates indicated below.

- 20% for residential properties held for six months or less.
- 15% for residential properties held for more than six months but for 12 months or less.
- 10% for residential properties held for more than 12 months but for 36 months or less.

Buyer's Stamp Duty (BSD)

A BSD is payable on acquisition of Hong Kong residential properties by any person (including Hong Kong and foreign companies) other than a Hong Kong permanent resident. The BSD is charged at a flat rate of 15% on the stated consideration or the market value of the property acquired, whichever is higher. The BSD is imposed on top of the stamp duty and the SSD (if applicable), with exemptions in certain situations.

Business registration fees

Every person who carries on a business in Hong Kong is required to apply for business registration with a fee within one month from the date of commencement of the business. The business registration certificate has to be renewed either on an annual basis or every three years with a payment of a business registration (renewal) fee. Special registration and licence fees are applicable to banks and deposit-taking companies.

Capital duty

There is currently no capital duty in Hong Kong.

Government rates and rent

Rates are an indirect tax levied on properties in Hong Kong. Rates are charged at 5% of the rateable value, which is the estimated annual rental value of a property at the designated valuation reference date of 1 October.

Privately owned land in Hong Kong is normally held by way of a government lease under which rent is payable to the Hong Kong Special Administrative Region (SAR) Government in return for the right to hold and occupy the land for the term (i.e. the duration) specified in the lease document. Currently, government rent is calculated at 3% of the rateable value of the property and is adjusted in step with any subsequent changes in the rateable value.

Payroll taxes

In Hong Kong, there are no payroll taxes other than the Mandatory Provident Fund (MPF) contribution (*see below*).

Mandatory Provident Fund (MPF) contribution

Under the MPF scheme, an employer is required to make a mandatory contribution for an employee in the amount equal to 5% of the monthly income of that employee. The maximum level of income for contribution purpose is HKD 30,000 per month. An employer may make voluntary contributions in addition to the mandatory contribution required.

Branch income

The tax rate for branches is the same as that for corporations. The Hong Kong profit of a foreign corporation with a branch in Hong Kong is determined according to the accounts maintained for the Hong Kong operation (or business). If the Hong Kong accounts do not disclose the true profits arising in or derived from Hong Kong attributable to the Hong Kong operation, the Hong Kong profit of the branch for profits tax purposes will be computed according to the ratio of turnover in Hong Kong to total turnover (or the proportion of Hong Kong assets over total assets) on the worldwide profits. Alternatively, the Hong Kong Inland Revenue Department (HKIRD) tax assessor may estimate the profits of the Hong Kong branch. In certain situations, the profits of the Hong Kong branch can be estimated based on a fair percentage of the turnover in Hong Kong.

Income determination

Inventory valuation

Inventory may be stated at the lower of cost or market value. Last in first out (LIFO) may not be used for tax purposes. First in first out (FIFO) must be consistently applied.

The prevailing accounting standards require financial assets and liabilities held for trading purpose (e.g. shares and securities held as trading stock) to be carried at market value, with fluctuations in values of such assets and liabilities taken to the profit and loss accounts, irrespective of whether the profits or losses are realised. Following the court decision in the *Nice Cheer* case, the increases (unrealised gains) in the market values of trading securities are not taxable while the decreases (unrealised losses) may be deductible when they are recorded in the financial statements.

There are special tax provisions for valuation upon cessation of a business under which inventory is valued at market value, unless it is sold to a person carrying on business in Hong Kong, who may deduct a corresponding amount as the cost of the inventory in computing the assessable profits.

Capital gains

Gains from realisation of capital assets or receipts that are capital in nature are not taxed.

Dividend income

Dividends from local companies chargeable to tax are exempt, whereas dividends from overseas companies are generally offshore in nature and not subject to Hong Kong profits tax. Hong Kong corporations may declare bonus issues (i.e. stock dividends), which are not taxable in the hands of the recipients.

Interest income

Hong Kong sourced interest income received by or accrued to a corporation carrying on a trade or business in Hong Kong is subject to profits tax. Exemption is provided to interest income derived from any deposit placed in Hong Kong with a financial institution, unless the deposit secures a borrowing where the interest expense is deductible. This exemption, however, does not apply to interest accruing to a financial institution.

Interest accruing to a bank or financial institution will be deemed to be sourced and taxable in Hong Kong if the interest arises through or from the carrying on of business in Hong Kong by the bank or financial institution.

Interest income arising through or from the carrying on of an intra-group financing business in Hong Kong by a corporation (other than a financial institution) will be deemed to be sourced and taxable in Hong Kong.

Royalties

Royalties paid or accrued to a non-resident for the use of or right to use in Hong Kong or outside Hong Kong (if the royalties are deductible in ascertaining the assessable profits of a person for Hong Kong profits tax purposes) a trademark, patent, design, copyright material, secret process, or other property of a similar nature, or for the use in Hong Kong of cinema or television tape or any sound recording, are deemed to be taxable in Hong Kong.

A total of 30% of the sum receivable is deemed to constitute profits subject to tax in normal situations. Where such royalties are received by or accrued to an associated corporation, however, 100% of the sum is deemed to constitute profits under certain circumstances.

Partnership income

Partnership business is taxed as a single entity, although an individual partner can use its share of losses incurred by a partnership to offset against the assessable profits of its other business. In general, there is no special registration requirement other than business registration for a partnership. The assessable profits of a partnership are basically determined in the same way as those of a corporation, with certain special rules (e.g. salaries or other remunerations paid to a partner or a partner's spouse are not deductible).

Unrealised exchange gains/losses

In general, unrealised exchange gains/losses are taxable/deductible if they are recognised in the profit and loss accounts in accordance with Generally Accepted Accounting Principles (GAAP), provided that they are revenue in nature and with a Hong Kong source. The nature and source of exchange gains/losses are determined by the nature and source of the underlying transactions. Exchange gains/losses arising from ordinary business transactions (e.g. trade receivables or payables) are taxable/deductible whereas exchange gains/losses arising from capital transactions (e.g. sale of capital assets) are non-taxable/non-deductible.

Foreign income

Hong Kong resident corporations are not taxed on their worldwide income. Foreign-sourced income, whether or not remitted to Hong Kong, is not taxed. As such, there is no specific tax provision dealing with deferral or non-remittance of foreign earnings. Nor does Hong Kong have any controlled foreign company (CFC) legislation.

Deductions

Expenses that are incurred for producing profits chargeable to tax and that are not capital in nature are generally tax deductible. In addition, special tax relief is available for certain capital expenditure. There are special rules for deduction of certain expenses (e.g. interest expenses).

Accounting treatments are usually followed in determining the assessable profits, except when there is an explicit rule in the IRO. Accrued expenses recognised in the profit and loss accounts in accordance with GAAP are usually deductible if they are incurred for producing profits chargeable/subject to Hong Kong profits tax and are not capital in nature.

Expense items for which a tax adjustment is necessary in determining the amount of taxable profits from the accounting profits include: tax depreciation allowance vs. accounting depreciation, expenses that are capital in nature, general provisions that are non-deductible, and non-deductible interest expenses on borrowings used to finance non-income producing assets.

Set out below are the Hong Kong profits tax treatments of some common expense items.

Tax depreciation of fixed assets

Tax depreciation allowances/deductions are available for capital expenditure incurred on the construction of buildings or structures and in the provision of machinery and plant for trade or business purposes, as follows:

- Industrial buildings and structures: An initial allowance of 20%, in addition to an annual allowance of 4%, of the cost of construction or cost of purchase from a developer is granted for an industrial building or structure occupied for the purpose of a qualifying trade. Provision is made for balancing allowance or charge in the year of assessment in which the building is disposed of to adjust the written-down value of the building to the disposal price. Balancing charges are restricted to the total of initial and annual allowances previously given.
- Commercial buildings and structures: An annual allowance of 4% of the capital expenditure incurred on the construction is applicable. A balancing allowance or charge applies upon disposal. Balancing charges are restricted to the total annual allowances previously given.
- Plant and machinery: An initial allowance of 60% of the capital expenditure on plant and machinery is given for the year of assessment during the basis period in which the expenditure is incurred. An annual allowance is also given for depreciation at three prescribed rates on the reducing value of each of the three depreciation rate 'pools'. The three prescribed rates are 10%, 20%, and 30%, and the reducing value of each of the three depreciation rate pools is original cost less initial and annual allowances and sales proceeds. Provision is made for balancing charges when plant and machinery within one of the three depreciation rate pools is sold or disposed of and the reducing value of that pool is less than the sale price, which is capped at the original amount incurred in the pool. In addition, balancing allowances or charges may be applicable upon cessation of business. Otherwise,

sales proceeds are deducted in calculating the reducing value on which the annual allowance is calculated.

Book depreciation is adjusted for tax purposes in accordance with the above depreciation allowances granted under the IRO.

Goodwill

Cost of acquisition of goodwill/amortisation of goodwill is not deductible as it is capital in nature.

Organisational and start-up expenses

In general, company formation/start-up expenses that are incurred before the commencement of a trade, profession, or business and that are for the establishment of the overall income producing structure are capital in nature and not tax deductible.

Research & development (R&D)

There is a specific provision allowing the deduction of expenditure incurred on R&D (including payments made to an approved research institute and in-house expenditure), provided that certain specified conditions are met.

Interest expenses

There is no thin capitalisation rule in Hong Kong. However, except in some specified circumstances (e.g. interest expenses paid to an overseas associated corporation by a corporation carrying on an intra-group financing business in Hong Kong where certain conditions are met), interest expenses paid to an overseas recipient (whether a related or unrelated party) are generally not deductible if the overseas recipient is not subject to Hong Kong profits tax on the interest income. In addition, deduction of interest expense is subject to stringent and complicated rules that are designed to guard against loan arrangements with an intention to avoid Hong Kong profits taxes.

Bad debts

A bad or doubtful debt incurred in any trade, business, or profession, proved to the satisfaction of the HKIRD to have become bad during the basis period for a year of assessment, is deductible. The deduction is limited to debts that were included as a trading receipt in ascertaining the taxpayer's assessable profits or debts in respect of money lent in the ordinary course of a money-lending business in Hong Kong.

If any bad or doubtful debt that has previously been allowed as a deduction is ultimately recovered, it will be treated as taxable profits of the basis period in which it is recovered.

Charitable contributions

A deduction is allowed for cash donations to approved charities made in the basis period for a year of assessment if the aggregate of such donations is not less than HKD 100. The deduction is limited to 35% of the assessable profits of the year of assessment.

Pension expenses

A deduction is allowed for regular/ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme made by an employer in respect of an employee to the extent that the contributions do not exceed 15% of the employee's total emoluments for the period to which the contributions relate.

Special payments, other than the ordinary contributions to a mandatory provident fund scheme or recognised occupational retirement scheme, are capital in nature but can be deducted evenly over a five-year period under a specific provision of the IRO.

There are also specific rules for deduction of provisions for contributions to a mandatory provident fund scheme or recognised occupational retirement scheme.

Payments for directors

Director fees or other remunerations paid by a corporation to its directors are generally deductible under the normal deduction rule. Nevertheless, no deduction is allowed on salaries or other remunerations paid to a sole proprietor or any partners or partners' spouses of a partnership business.

Contingent liabilities

Generally speaking, general provisions for expenses are not deductible, whereas specific provisions are deductible if the HKIRD is satisfied that the amount has been incurred (i.e. the taxpayer has a legal/contractual obligation to pay such amount in the future) and that the provision represents a reasonably accurate estimate of the future liability.

Special deductions

There are special deduction rules for expenditures incurred:

- for refurbishment of a building or structure, other than a domestic building or structure
- on environmental protection installation and machinery
- on environment-friendly vehicles
- on machinery or plant used specifically and directly for any manufacturing process, computer hardware (other than that which is an integral part of machinery or plant), computer software, and computer systems (collectively known as prescribed fixed assets)
- for registering trademarks, designs, or patents used in the production of taxable profits, and
- on the purchase of patent/know-how rights and specified intellectual property (IP) rights (i.e. copyrights, registered trademarks, or registered designs), provided certain specified conditions are met.

Fines and penalties

Fines and penalties are generally not deductible, as the HKIRD does not consider them to be expenses incurred for producing profits chargeable/subject to tax.

Taxes

Taxes paid on corporate profits are generally not deductible for the purpose of calculating the assessable profits. However, the HKIRD generally accepts that a foreign tax that is an expense that must be borne regardless of whether or not a profit is derived (e.g. a foreign withholding tax [WHT] levied on the gross amount of interest or royalties received), as opposed to a charge on the profits themselves, is deductible under the general deduction provision. Where interest income or gains from the sale of a certificate of deposit or bill of exchange are deemed to be subject to profits tax, a deduction is allowed for foreign taxes of substantially the same nature of Hong Kong profits tax paid in respect of the same income, provided that the taxpayer is not eligible for double taxation relief under a CDTA.

Net operating and capital losses

Net operating losses incurred in an accounting year can be carried forward indefinitely to offset future profits of the business. A corporation carrying on more than one business may have losses in one business offset profits of the others, with any balance being carried forward. Net operating losses cannot be carried backward.

Capital losses are not tax deductible.

Payments to foreign affiliates

Royalties and service fees paid/payable by a Hong Kong corporation to foreign affiliates are deductible, provided they are incurred for the production of profits chargeable/subject to tax. There is no special restriction on the deductibility of these payments.

In general, interest payable by a Hong Kong corporation to a foreign affiliate is not deductible if the recipient is not chargeable/subject to Hong Kong profits tax on the interest income received (except where either the payer or the recipient is a financial institution as defined in the tax law). Interest expenses on money borrowed from a non-Hong Kong associated corporation by a corporation in the ordinary course of its intra-group financing business carried on in Hong Kong are deductible, provided that certain specified conditions are met.

Group taxation

Hong Kong does not have a consolidated or group taxation regime.

Transfer pricing

Currently, there is no specific and comprehensive transfer pricing legislation in Hong Kong. While a few existing provisions in the IRO may be employed by the tax authority to tackle non-arm's-length transactions, such provisions are primarily aimed at transactions with closely connected non-residents or tax avoidance transactions rather than specific legislation on transfer pricing.

There are two Departmental Interpretation and Practice Notes (DIPNs) issued by the HKIRD to address the transfer pricing issues in Hong Kong. DIPN 45 focuses on the administrative/procedural issues involved in providing double tax relief in a treaty context, such as when such relief is available and what are the procedures for claiming such relief. DIPN 46 outlines the HKIRD's view on the legislative framework for transfer pricing in Hong Kong (including the statutory provisions in the IRO and the articles in a CDTA that are relevant to transfer pricing) and provides guidance on numerous transfer pricing related issues, such as the application of the arm's-length principle and the acceptable transfer pricing methodologies, which are largely in line with the Organisation for Economic Co-operation and Development (OECD) transfer pricing guidelines. The DIPN also spells out the documentation that taxpayers should consider retaining to support their transfer pricing arrangements and explains the interaction between the transfer pricing and sourcing rules in Hong Kong.

In general, the HKIRD currently adopts the arm's-length principle and will seek to apply the OECD transfer pricing guidelines except where they are incompatible with the express provisions in the IRO. Transfer pricing rules will be implemented by the Hong Kong SAR Government through the enactment of Inland Revenue (Amendment) (No. 6) Bill 2017, which was gazetted on 29 December 2017. The proposed transfer pricing rules follow the OECD guidelines and adopt the arm's-length principle. Domestic transactions without any Hong Kong tax advantage are excluded from the application of the transfer pricing rules. The Bill also introduces rules for transfer pricing documentation and advance pricing arrangement (APA) application. Once enacted, the transfer pricing rules and the APA statutory regime, as provided in the Bill, will have retrospective effect from 1 April 2018.

An APA programme is available in Hong Kong. The objectives of the APA programme are to help taxpayers obtain tax certainty on their complex or significant transfer pricing arrangements and reduce the risk of double taxation arising from related-party transactions. Resident enterprises or non-resident enterprises with a PE in Hong Kong may apply for an APA in respect of their transactions with associated enterprises under a CDTA, provided that certain conditions (including the threshold for an APA application) are met.

Currently, the HKIRD is primarily focused on bilateral APA or multilateral APA applications in respect of cross-border, related-party transactions involving countries that are CDTA partners with Hong Kong.

DIPN 48, issued by the IRD, provides guidance on various aspects of the APA regime, such as the timeframe and threshold for an APA application, the various stages involved in the APA process, an audit involving years covered by a concluded APA, and possible rollback of the transfer pricing methodology agreed under an APA to prior years. The appendices of the DIPN include various sample documents for use in an APA application.

Country-by-country (CbC) reporting regime

To implement the minimum standard under Action 13 of the OECD's Base Erosion and Profit Shifting (BEPS) Action Plan, the Hong Kong SAR Government has proposed to introduce CbC report filing requirements in Hong Kong in the Inland Revenue (Amendment) (No. 6) Bill 2017, gazetted on 29 December 2017. The Bill seeks to, among others, introduce a transfer pricing regulatory regime and mandatory three-tiered transfer pricing documentation requirement (including CbC report) in Hong Kong. The Bill has not yet been enacted into law as of the end of May 2018.

Key features of the proposed CbC reporting regime are summarised as follows:

- The Hong Kong ultimate parent entity of a multinational enterprise group with annual consolidated group revenues of 750 million euros (EUR) (i.e. about HKD 6.8 billion) or above (i.e. a reportable group) will be required to file a CbC return in Hong Kong.
- A Hong Kong entity of a reportable group that is not the group's ultimate parent entity will also be required to file a CbC return in Hong Kong if the ultimate parent entity is not required to file a CbC report in its own jurisdiction of tax residence or if Hong Kong is not able to obtain the CbC report from that jurisdiction.
- The CbC report filing requirement will apply retrospectively to accounting periods beginning on or after 1 January 2018.

- Generally speaking, the deadline for filing a CbC return is within 12 months after the end of the accounting period to which the return relates. Where surrogate parent filing applies and a later deadline for filing CbC reports is prescribed in the laws or regulations of the jurisdiction of tax residence of the surrogate parent entity, the later deadline will be taken as the filing deadline in relation to the CbC return concerned.

Thin capitalisation

Hong Kong does not have thin capitalisation rules. *For restrictions on deduction of interest expenses, see Interest expenses in the Deductions section*.

Controlled foreign companies (CFCs)

Hong Kong does not have a CFC regime.

Tax credits and incentives

Foreign tax credits

Foreign tax credits are available if foreign taxes are payable/paid on income derived from a jurisdiction that has entered into a CDTA with Hong Kong and the same income is subject to tax in Hong Kong. *See the Withholding taxes section for a list of jurisdictions that have entered into a CDTA with Hong Kong*.

Foreign investment incentives

Hong Kong does not have any specific incentives for foreign investment, except that offshore funds may be exempt from profits tax under certain circumstances.

Other tax incentives

Please refer to the Taxes on corporate income *section for other tax incentives that can be enjoyed by both foreign and Hong Kong companies*.

Withholding taxes

There is no WHT on dividends and interest. Royalties received by non-residents (*see Royalties in the Income determination section*) are subject to a WHT (*see the applicable WHT rates for corporations below*).

Resident consignees are required to furnish quarterly returns to the HKIRD showing the gross proceeds from sales on behalf of their non-resident consignors and to pay to the Commissioner of Inland Revenue (CIR) a sum equal to 0.5% of such proceeds. The HKIRD normally accepts this as satisfying the Hong Kong tax obligations of the non-resident.

Hong Kong has so far entered into 40 treaties with different jurisdictions. The following table shows the applicable WHT rates for payments made from Hong Kong payers to non-treaty and treaty country corporate recipients. The rates shown in the table are the lower of the domestic and treaty rates. For WHT rates on payments received by Hong Kong recipients from treaty country payers, please refer to the summaries of the respective treaty countries.

Hong Kong

Notes

1. Hong Kong does not impose WHT on dividends and interest currently. However, the treaties provide for a maximum WHT rate on dividends and interest should Hong Kong impose such WHT in the future. Some of the treaties also provide for a reduced WHT rate on dividends and interest if conditions specified in the treaties are met.
2. With the introduction of two-tier profits tax rates, there are two possible sets of domestic WHT rates on royalties paid to non-resident corporations:

i. If the two-tier tax rates apply, the WHT rates are 2.475% for the first HKD 2 million of assessable profits and 4.95% for the remaining amount.
ii. If the two-tier tax rates do not apply, the WHT rate for the whole amount of assessable profits is 4.95%.

The 2.475% and 4.95% rates are determined by applying the relevant two-tier rates, which are 8.25% and 16.5%, respectively, on the deemed assessable profits of the royalties. In the normal situation, the deemed assessable profits are 30% of the royalties received by or accrued to a non-resident corporation. Hence, the effective WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two-tier rates are not applicable).

In the situation where a person carrying on a trade or business in Hong Kong has, at any time, wholly or partly owned the IP in respect of which the royalties are paid and the non-resident corporation is an associate of the Hong Kong payer, the deemed assessable profits are 100% of the royalties received by or accrued to a non-resident corporation. Hence, the applicable WHT rates are 8.25% for the first HKD 2 million of assessable profits and 16.5% for the remaining amount if the two-tier rates are applicable.

3. The domestic WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable), capped at 3% according to the treaty.
4. For payments for the use of, or the right to use, aircraft, the effective WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 3% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable). For other cases, the effective WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable).
5. Since a rate specified in the treaty is higher than the domestic WHT rates, the effective WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable).
6. The domestic WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable), capped at 4% according to the treaty.
7. The 0% rate applies to payments for the use of, or the right to use, industrial, commercial, or scientific equipment or for information concerning industrial, commercial, or scientific experience. For other cases, the WHT rate ranges from 2.475% (when the assessable profits are HKD 2 million or less and the two-tier rates are applicable) to 4.95% (applies to the assessable profits in excess of HKD 2 million when the two-tier rates are applicable or when the two tier-rates are not applicable), capped at 3% according to the treaty.
8. Not yet ratified.

Tax administration

Taxable period

A year of assessment (or tax year) begins on 1 April of a year and ends on 31 March of the following year. The period that is used to compute the taxable profits for a year of assessment is called the basis period, which is normally the financial year ended in the year of assessment.

Tax returns

Tax returns are issued on the first working day of April each year. The filing deadline is usually within a month from the date of issue. However, corporations whose financial year ended after 30 November and are represented by a tax representative are normally granted with an extension for filing their returns. The exact filing due date depends on the accounting year-end date of the taxpayer.

The basis of assessment is the accounting profits of the financial year ending within the year of assessment, with appropriate adjustments for tax purposes. A tax return is usually filed together with a tax computation showing the tax adjustments to the accounting profits in arriving at the taxable profits or allowable tax losses for a given year of assessment.

Corporate taxpayers are also required to attach their audited accounts as supporting documents when filing a profits tax return, unless they qualify as a small corporation as defined by the HKIRD (i.e. mainly those with gross income for a basis period of not exceeding HKD 2 million plus a few other conditions). Small corporations are not required to attach supporting documents with their profits tax returns but are still required to keep those documents and submit them upon request. A branch of a foreign corporation doing business in Hong Kong is required to file a profits tax return annually, and the HKIRD may require audited accounts of the foreign corporation to support the Hong Kong branch's profits tax return.

Notice of assessment will be issued after the tax return has been examined by the HKIRD. Taxpayers may be subject to post-assessment investigation or field audit under the computerised random selection procedures of the HKIRD at a later date.

Payment of tax

Tax is usually payable in two instalments. The dates of payment of tax, which generally fall between November of the year in which the return is issued and April of the following year, are determined by the CIR and specified in an assessment notice. A system of provisional tax payments applies whereby estimated tax payments are made during the current year. The provisional profits tax payable is normally estimated based on the previous year's profits tax liability. The provisional profits tax already paid is credited against the final profits tax assessed for a year of assessment, which is determined after filing of the return.

Taking a company with an accounting year end date of 31 December as an example, the final tax payment for the company for a given tax year is usually due in November of the year in which the return is issued, whereas the provisional tax payments (to be paid in two instalments) are usually due in November of the current year and January of the next year.

Tax audit process

There is no specific tax audit cycle in Hong Kong. Tax audit targets are selected with reference to certain criteria determined by the HKIRD.

Statute of limitations

An additional assessment may be made by an HKIRD tax assessor if a taxpayer chargeable to tax has not been assessed to tax or has been assessed at less than the proper amount. The assessment must be made within the relevant year of assessment or within six years after the end of that year of assessment. The time limit for making additional assessments is extended when a taxpayer either has not been assessed, or is under-assessed, due to fraud or wilful evasion. In that case, an additional assessment may be made up to ten years after the end of the relevant assessment year.

A statement of loss is not an assessment, and the above six-year time limit does not apply to issue or revision of a statement of loss. A tax loss year remains technically open until the sixth year after the first year in which the taxpayer has an assessable profit after utilising all the tax losses brought forward.

Topics of focus for tax authorities

Profits tax issues that are often subject to close scrutiny of the tax authority include offshore claim of profits, capital claims of income, transactions with related parties and closely connected non-residents, and deductibility of expenses (e.g. interest expenses, share-based payments, intra-group management/service fees).

General anti-avoidance rules (GAARs)

The IRO includes a GAAR (i.e. section 61A) allowing the HKIRD to disregard a transaction or counteract the tax benefit conferred by a transaction if the sole or dominant purpose of entering into such a transaction is to obtain a tax benefit. Whether the sole or dominant purpose of entering into a transaction is for obtaining a tax benefit will be assessed according to a set of factors stipulated in section 61A. Another GAAR in the IRO is section 61, which empowers the HKIRD to disregard a transaction that reduces or would reduce the amount of tax payable by any person if that transaction is considered artificial or fictitious. Although both GAARs could be used, in practice, section 61A is more often invoked by the HKIRD in tackling tax avoidance schemes.

Specific anti-avoidance provision for related-party transactions

In addition to the general anti-avoidance provisions described above, there is a specific anti-avoidance provision dealing with transactions with closely connected non-residents. Under the specific provision, if a resident person carries on a business with a closely connected non-resident person such that no profits or less than the ordinary profits are derived by the resident person in the course of such business, the non-resident person can be assessable and chargeable to tax in respect of profits derived from such business in the name of the resident person.

Other issues

Base Erosion and Profit Shifting (BEPS)

The Inland Revenue (Amendment) (No. 6) Bill 2017 was gazetted on 29 December 2017. The Bill seeks to, among others, (i) introduce a transfer pricing regulatory regime and a mandatory three-tiered transfer pricing documentation requirement in Hong Kong, (ii) implement a statutory APA regime, and (iii) remove the ring-fencing features in certain concessionary tax regimes in Hong Kong. The Bill was introduced into the Legislative Council for scrutiny in January 2018 and has not yet been passed as of May 2018.

Multilateral Instrument (MLI)

Hong Kong, as represented by mainland China, was one of the signatories to the MLI. In implementing the MLI, Hong Kong has taken a pragmatic approach by (i) opting in the provisions of the MLI that represent the BEPS minimum standards (e.g. the principal purpose test for preventing treaty abuse and the requirement for allowing a minimum three-year period for a person to prevent its case for Mutual Agreement Procedure) and (ii) opting out of the other provisions that are not mandatory, for instance, those provisions addressing hybrid mismatches and artificial avoidance of PE.

Hong Kong is currently going through the necessary domestic legislative process to implement the MLI as domestic legislation, and the MLI is not yet effective for Hong Kong.

Automatic exchange of financial account information (AEOI) / Common Reporting Standard (CRS) regime

The Inland Revenue (Amendment) (No. 3) Ordinance 2016, which commenced operation on 30 June 2016, put in place a legislative framework for Hong Kong to implement the AEOI/CRS regime. Reportable financial institutions are required to identify the reportable financial accounts held by tax residents of reportable jurisdictions or held by passive non-financial entities whose controlling persons are tax residents of reportable jurisdictions in accordance with the specified due diligence procedures, collect the required information of those reportable accounts, and furnish such information to the HKIRD. Such information will be exchanged on an annual basis. Hong Kong will only conduct AEOI with a reportable jurisdiction when an arrangement is in place with the reportable jurisdiction concerned to provide the basis for exchange. There are currently 75 reportable jurisdictions. As of May 2018, Hong Kong has signed bilateral Competent Authority Agreements for AEOI with 15 jurisdictions.

Tax information exchange agreements (TIEAs)

Currently, Hong Kong has entered into seven TIEAs with different jurisdictions as shown in the following table.

- Denmark
- Faroes
- Greenland
- Iceland
- Norway
- Sweden
- United States

All of the above TIEAs are ratified and effective.

In addition to the signing of the HK-US TIEA, Hong Kong signed a Model 2 intergovernmental agreement (IGA) with the United States in November 2014 to facilitate financial institutions in Hong Kong to comply with the Foreign Account Tax Compliance Act (FATCA).

Foreign investment restrictions

In general, Hong Kong does not impose restriction to foreign investors to make investments in Hong Kong, and wholly foreign owned companies are allowed. The only exception is the restriction on foreign ownership of Hong Kong's licensed television/ sound broadcasters, of which the collective foreign ownership ceiling is 49% of the voting power. In addition, an approval from the Broadcasting Authority must be obtained for holding, acquisition, or exercise of voting control by a foreign investor of more than 2% of a licensee.

Exchange controls

Hong Kong does not have any foreign exchange control. There is no restriction on entry or repatriation of capital or remittance of profits from investments. Funds can be freely remitted to persons outside Hong Kong by various means (e.g. dividends, interest, royalties, service fees, branch profits).

Choice of business entity

The principal forms through which a business can be conducted in Hong Kong are as follows:

- Company incorporated in Hong Kong (either private or public via listing on the Stock Exchange of Hong Kong).
- Branch of a foreign company.
- Representative or liaison office of a foreign company.
- Joint venture (can be set up either as a company or partnership).
- Partnership.
- Sole proprietorship.

Of the above, privately incorporated companies and branches of foreign companies are most commonly used by foreign investors, as limited liability is usually desirable.

Intellectual property (IP) regulations

The Intellectual Property Department is responsible for monitoring the IP regime and ensuring the protection and enforcement of IP rights in Hong Kong. The Department is also responsible for investigating complaints against infringements and has extensive powers of search and seizure. Registration and protection of patents, copyrights, trademarks, and registered designs are each governed by a separate ordinance.

Merger and acquisition (M&A) activities

There are no specific restrictions on M&A activities in Hong Kong. The following tax considerations are relevant in the M&A context:

- Dividends or other forms of distribution of profits (e.g. distribution of branch profits to the head office) are generally not taxable.
- Capital gains arising from an M&A transaction are not taxable in the hands of the transferor, whereas amortisation of the goodwill in the transferee's accounts is not tax deductible due to its capital nature.
- Gains derived from transfer of revenue items (e.g. trade receivables) in an asset deal will be subject to profits tax.
- For a share deal, stamp duty is payable on the transfer of Hong Kong shares at 0.2%, unless an exemption applies; for an asset deal, stamp duty is payable on conveyance of immovable property in Hong Kong at various rates up to 15%, depending on the type of immovable property transferred and the date of the transfer (*see Stamp duty in the Other taxes section*).
- There is no special tax concession/incentive relating to M&A transactions.
- Tax losses in the acquired company can generally be carried forward indefinitely to set off against future assessable profits. However, there are specific anti-avoidance provisions in the IRO that prevent the transfer of shares of a company with accumulated tax losses to owners of a profitable company for the sole or dominant purpose of utilising the tax losses (i.e. offsetting the tax losses against the profits generated from other trade, profession, or business of the transferee).
- Pending the enactment of specific tax legislation dealing with corporate amalgamation, the HKIRD has issued some guidance on the profits tax treatment of various issues arising from corporate amalgamation on its website. In addition to the utilisation of tax losses, the guidance also covers issues such as the profits tax treatment of fixed assets and trading stocks transferred, and the profits tax return filing positions of the amalgamating and the amalgamated companies in the year of amalgamation, etc.

Significant developments

As of 1 January 2018, the following significant changes were introduced to the Hungarian tax system. The changes are mainly related to CIT, personal income taxes (PITs) and related contributions, and indirect taxes.

Corporate income tax (CIT)

- The formal and content requirements as included in Base Erosion and Profit Shifting (BEPS) Action 13 were implemented in Hungary in Decree No. 32/2017 of the Ministry for National Economy, which has replaced, as of 1 January 2018, the Decree No. 22/2009 of the Ministry of Finance, the former decree governing the details of the transfer pricing documentation requirements.
- International Financial Reporting Standards (IFRS) has been adopted in Hungary. For many companies, the mandatory adoption is postponed from 2017 to 2018.

Local business tax (LBT)

When deducting the cost of goods sold and the value of intermediated services from their net sales revenue, companies that qualify as related parties under the Corporate Tax Act are only required to determine their local tax base from consolidated data if the related-party relationship was formed after 1 October 2016 as a result of a demerger.

Value-added tax (VAT)

Extending the scope of the reduced VAT rate

From 1 January 2018, the VAT rate on internet access services and on fish for consumption purposes is reduced from 18% to 5% and from 27% to 5%, respectively. Furthermore, the VAT rate on the edible by-products and meat offal of domestic swine is also reduced to 5%.

The catering sector is also benefited from VAT rate cuts because from 1 January 2018 the VAT rate on meals provided and certain non-alcoholic beverages prepared locally in bars and restaurants is reduced from 18% to 5%.

Online data supply

As of 1 July 2018, taxpayers will be required to report to the Hungarian tax authority certain data regarding business-to-business (B2B) invoices that are issued by invoicing software and have a VAT content of at least 100,000 Hungarian forint (HUF). Such reports will have to be made electronically, through an online connection, using a specific XML format.

Customs duties

As of 1 January 2018, Act CLII of 2017 on Implementing the Union Customs Law entered into force replacing the previous customs legislation and incorporating procedural rules and setting electronic methods of contact as a general way to maintain relation with the customs authority.

Excise duties

As of 1 January 2018, the tax and customs authority sends a draft tax return to the taxpayer by the 10th day of the month following the reference month with the data and information underlying the tax declaration. Taxpayers have five days to take corrective action from the time of receipt.

Environmental protection product fee

The fee for electrical and electronic products became unified as of 1 January 2018: HUF 57 per kilogram (instead of HUF 57 to 304 per kilogram depending on the product type).

The range of electrical and electronic products subject to the product fee was modified.

As of 1 January 2018, the category of commercial packaging material (packaging of drinks) no longer exists. Metal packaging of drinks became part of the general packaging material category but with a higher fee rate than for other metal packaging.

Preferential tax rates were introduced relating to hybrid and electronic cars.

Special tax of financial institutions

Decreasing tax rates and a new tax base have been implemented in connection with the special tax of financial institutions.

Social tax

As of 1 January 2018, the employer social charge rate has been additionally reduced from 22% to 19.5%. Consequently, the employers' payroll expenses have been reduced by 2% (2.5/123.5). Also, the rate of healthcare tax has been reduced from 22% to 19.5% as of 2018 in line with the reduction of the employer social charge rate. As a result, public dues payable for business meals, corporate events, and certain fringe benefits have been reduced from 43.66% to 40.71% in total.

Taxes on corporate income

Resident taxpayers are subject to all-inclusive or unlimited CIT liability. Non-residents are subject to CIT on their income from their Hungarian branch's business activities.

The CIT rate is 9% of a positive CIT base.

Minimum tax base

If a company's CIT base or the pre-tax profit, whichever is higher, is less than 2% of its total revenues reduced by the income of its foreign permanent establishments (PEs) (i.e. the 'minimum tax base'), the company can choose to file a declaration and pay CIT according to the general provisions or to pay CIT on its minimum tax base.

Real estate holding companies

The owner of a real estate holding company is subject to Hungarian CIT in the case of alienation or withdrawal of its shares in the real estate holding company.

The tax base of the owner of a real estate holding company in cases of share transfers and share capital decreases is the positive amount of the consideration minus the acquisition price of the shares less the costs of acquisition and of administration. The tax rate is 9%.

A company and its related parties are defined as real estate holding companies if at least 75% of the book value of their assets is domestic real estate and if they have a foreign shareholder that is not resident in a country that has a double tax treaty (DTT) with Hungary or the treaty allows such capital gains (from land/real property-rich shares) to be taxed in Hungary.

Please note that the definition of the payer for CIT purposes is very different from the definition used for stamp duty purposes.

As an amendment as of 1 January 2018, regulated real estate holding companies can opt to keep their accounts, and report their annual statements, in accordance with IFRS.

Energy suppliers' income tax

Mines, energy producers, and energy distribution system operators are subject to energy suppliers' income tax. The scope of the definition of 'energy suppliers' also includes universal suppliers and authorised distributors of electricity and natural gas.

The base of energy suppliers' income tax is similar to the CIT base, however, with less adjustments applicable to the accounting profits. The tax rate is 31%.

If the energy supplier entity possesses a development tax incentive or a tax incentive in relation to investments aimed at increasing energy efficiency (*see the Tax credits and incentives section*), then it is possible to claim this tax incentive for up to 50% of energy suppliers' income tax liability as well. Additionally, the settled amount of mining royalty can be claimed for up to HUF 1.5 billion from energy suppliers' income tax liability.

As of 30 June 2017, a new extra deduction is available in connection with the installing and maintenance of electric vehicle charging stations, unless the taxpayer has already opted for a CIT base deduction with respect to the investment.

From an accounting point of view, energy suppliers' income tax falls under the same treatment as CIT (so it is a non-deductible item for CIT purposes as well). DTTs also are covering this levy.

Advertisement tax

Advertisement tax applies to certain advertising services, including advertising services made available over the internet. The tax applies in respect of advertisements that are published in Hungarian, or where the advertisement is not published in Hungarian but is available on a website/webpage that is mainly in Hungarian.

In the case of primary taxpayers (*see below*), the tax base is based on total trading revenue. Till an amending act in June 2017, the advertising tax rate was 0% of the tax base up to HUF 100 million, and 5.3% above HUF 100 million. The amending act set a unified tax rate of 0% in the period from 1 January 2017 to 30 June 2017; however, from 1 July 2017, it is increased to 7.5%, while the tax base up to HUF 100 million, under certain conditions, is tax free. Furthermore, the amending act stipulates that taxes declared and paid by the taxpayers for tax years ended before 30 June 2017 are considered overpayments defined by the Act on the Rules of Taxation; consequently, the taxpayers can request a claim on refund, also defined in the Act on the Rules of Taxation, from 1 July 2017.

The amending act discontinues the tax liability on self-promotion as, consequently, after the law came into force, advertisement tax liability arises only for publishing as business activity.

Primary and secondary taxpayers

The company providing the advertising service is the primary taxpayer, and the rate above applies to the company's sales that are within the scope of the tax. The tax is not a withholding tax (WHT), and the customer is not obligated to withhold tax on payments made to the advertising service provider.

The person/company that orders and pays for the advertisement is considered to be the secondary taxpayer. Secondary tax obligation does not arise if:

- the secondary taxpayers are in possession of a declaration from the primary taxpayers stating that they are the primary taxpayers and that they will fulfil their obligations under the regulation
- the primary taxpayers apply for a registration to the database of the Hungarian tax authority, stating that they are primary taxpayers and that they fulfil their obligations on time or they do not have advertisement tax payment obligation in the tax year because they will not exceed the HUF 100 million threshold, or
- the secondary taxpayers notify the tax authority with the name of the primary taxpayer and the value of the services and they are able to prove that they requested the declaration but have not received it.

Otherwise, the secondary taxpayer is subject to a tax equivalent to 5% of the value of the advertising fee (provided that the secondary taxpayer spends at least HUF 2.5 million in a month for advertisement services). In addition, such advertisement expense would not be a deductible CIT expense for the secondary taxpayer when filing its CIT return (in cases when such annual spending exceeds HUF 30 million).

The amended legislation makes it clear that for online advertisements, the person or organisation that has right of disposal over the advertising space qualifies as the publisher of the advertisement (i.e. the subject of the advertising tax). In addition, the obligation to determine the advertising tax base from the consolidated data of related companies no longer applies.

Furthermore, if a publisher of advertisements fails to comply with its obligation to make a declaration to the advertiser in relation to advertising tax, it must, on request, fulfil that obligation to the national tax authority. Failure to comply with such a request will attract a default fine of HUF 500,000. Repeated failure to comply in respect of the same advertiser will be subject to a further default fine of HUF 10 million, and any further instance of non-compliance will be subject to a fine equalling triple the amount of the previous fine. Failure to comply with the registration obligation will incur fines (in the amount of HUF 1 billion) according to the same regime. Further, in the case of failure to file a return on advertisement taxes, the tax authority will levy a deemed tax of HUF 3 billion, which the taxpayer concerned may challenge by submitting contrary evidence within a statutory deadline of 30 days.

Local business tax (LBT)

All municipalities are entitled to levy LBT. LBT is deductible for Hungarian CIT purposes and is not normally treated as 'income tax' in the application of the tax treaties.

The LBT base is the total trading revenue reduced by the cost of goods sold, subcontractors' work, the costs of materials, mediated services, and research and development (R&D) costs. These items are deductible under a decreasing scale at taxpayers with larger turnover (with the effect that lower margin businesses may have higher effective LBT rates). In order to prevent tax avoidance, the taxable base is calculated on a consolidated basis for affiliated entities that have a gross margin at less than 50% in Hungary in case the related-party relationship was formed as a result of a division carried out after the date 1 October 2016.

As LBT is payable in each municipality where the taxpayer is active, there are detailed rules to allocate the taxable base among these locations and a separate PE definition is applicable for LBT purposes. The allocation is based on a formula (formulary apportionment) based on tangible asset and payroll cost figures.

As of 1 January 2018, PE for LBT purposes shall also include solar power plants, in accordance with the rules set out by the municipality on which the solar power plant is located.

General service fees, depreciation, and labour costs are typically not deductible for LBT purposes. Interest and dividend income and the LBT base of a foreign PE of a Hungarian company are exempt from LBT. Royalty exemptions, on the other hand, have been significantly narrowed down in line with the Organisation for Economic Co-operation and Development (OECD) nexus approach (from mid-2016, with an applicable grandfathering period).

The amended rules allow credit institutions and financial enterprises that have opted for gross settlement when determining their net revenue to deduct from their LBT base the amount of purchased receivables accounted against expenditure on other financial services. The selected option can be applied retroactively to the LBT bases of tax years beginning in 2015 and 2016.

Furthermore, amendments have reduced the gap between the rules on adjustments to the LBT base (royalty, R&D) and the corporate tax base. As a result, effective from 1 July 2016, the definition of royalty was made narrower.

In addition, only amounts deducted from the corporate tax base may also be deducted from the LBT base as direct cost of basic research, applied research, and experimental development. As for the definition of royalty, a transitional provision permits application of the previous rules until the tax year ending on or before 30 June 2021.

The LBT rate may differ from municipality to municipality but is capped at 2% by law.

As of 1 January 2018, sport organisations (as per the definition laid down in Act I of 2004 on Sport) are not liable to pay LBT after their total trading revenue deriving from the sale of admission tickets or season passes, display of advertisements, permanent transfer or temporary lease of player contracts, providing services to sponsors, income from media rights, and other utilisation of their sports venues in accordance with the Act on Sport.

Furthermore, as of 20 June 2017, if the tax rate determined by the local government was set at a specific tax rate (for a minimum of two years), it cannot be increased to the detriment of the taxpayer during the first two calendar years of said period.

Prepayment option of LBT

As of 20 June 2017, taxpayers have the option to make prepayments in order to comply with LBT liability that will accrue in the future. At the time of prepayment, a separate tax return shall be filed accordingly.

Innovation contribution

Companies defined as such in the Accounting Act, except for small and medium-sized enterprises (SMEs) and branches, are also subject to innovation contribution. The tax base of the innovation contribution is the same as the LBT base. The tax rate is 0.3%. As this tax is payable to the central budget, there are no formulary apportionment rules.

Corporate residence

Corporations are residents for CIT purposes if they are incorporated in Hungary, although foreign corporations may also be deemed to be Hungarian residents for CIT purposes if their place of effective management is in Hungary. Tax residents also include the Hungarian trust asset (*see Hungarian trust in the Other issues section for further information*).

Foreign entities may carry out business through resident corporations or through branch offices (PEs for tax purposes). Commercial representative offices may be opened for auxiliary activities that do not create a taxable presence.

Permanent establishment (PE)

Hungary treats PEs as ‘distinct and separate enterprises’, and profit is attributed to a PE based on the principles set out in the OECD guidelines.

In the CIT Act, a PE is defined as fixed business premises (machinery or equipment) through which the entrepreneurial activity of an enterprise is partly or wholly carried on, regardless of the title of the taxpayer to those premises. A PE may consist of any of the following: a place of management; offices, including representative offices registered in Hungary; factories and workshops; and mines, crude oil or natural gas wells, quarries, or other places from which natural resources are extracted.

Construction sites (including assembly) and related supervisory activities constitute a PE if they last, in the aggregate, for at least three months in a calendar year. All activities carried out at the same construction site qualify together as a single PE, regardless of whether they are based on separate contracts or were ordered by different persons. Construction sites are defined as sites that represent a unit for economic, business, and geographical purposes.

PEs are also created by the direct utilisation of natural resources by a foreign person. A foreign person (except from real estate funds established in a European Economic Area [EEA] member state and not being subject to any tax that may be substituted for CIT) is deemed to have a PE in Hungary if it utilises natural resources or immovable property for consideration, including the alienation or capital contribution of any rights related to the immovable property or natural resources.

A non-resident enterprise is considered to have a PE with respect to activities undertaken on its behalf by another person if its agent is authorised to conclude contracts in Hungary on behalf of the non-resident entity and the agent regularly exercises this right or maintains a stock of goods and products from which it regularly makes deliveries in the name of the non-resident entity.

The insurance of risks occurring in Hungary and insured on behalf of the non-resident person by another person constitutes a PE of the foreign insurer, except for reinsurance activities.

Furthermore, as mentioned above, a foreign taxpayer must also be treated as having a PE if it has a Hungarian branch.

The definition of a PE does not include the following:

- Establishments used solely for the purpose of storing and presenting the goods or products of a non-resident person.
- The stockpiling of goods and products of a non-resident person solely for the purpose of storing, presenting, or processing by another person.
- Establishments used for collecting information, or purchasing goods and products, exclusively for the non-resident person.
- Establishments used for other activities of a preparatory or auxiliary nature.
- Activities of independent agents, provided they are acting in their ordinary course of business.

Note that a different definition of a PE is applicable for LBTs, and no definition is available for special taxes.

Other taxes

Value-added tax (VAT)

VAT is payable on sales of goods and the supply of services. VAT is also payable on the importation of goods, on the intra-Community acquisitions of goods, and on the purchase of certain services provided to Hungarian taxable persons by foreign taxable persons.

VAT rates

The general VAT rate is 27%.

A reduced VAT rate of 18% is applicable for some products (e.g. milk, certain dairy products, products made from cereals, flour, and starch). The 18% VAT rate is also applicable to commercial accommodation services and to services that grant admission to musical and dancing events.

A reduced VAT rate of 5% is available for new residential property, certain pharmaceutical products, audio books, printed books, newspapers, district heating services, certain live performance activities, certain products of the animal sector (e.g. live and processed large animals, such as pig, sheep, goats, cattle, poultry, eggs), fresh milk, internet access services, local dining services (i.e. meals and non-alcoholic beverages prepared locally in bars and restaurants), fish for consumption purposes, and the edible by-products and meat offal of domestic swine.

Exempted, out of scope transactions

Certain services are exempt from VAT, including, but not limited to, medical, cultural, sporting, and educational services provided as public services. VAT exemption is also available for financial and insurance services. The intra-Community supplies of goods, services, and exports are also treated as exempt transactions.

Generally, the supply of a building or parts of a building, the land on which it stands, and the rental of real estate are VAT exempted. An option is available to apply VAT on the supply or rental of this real estate. VAT exemption cannot be applied to the supply of building plots.

There are some special transactions that may be out of scope of the Hungarian VAT, provided that special conditions are met. These include the acquisition of any contributions in kind, the acquisition of any assets by way of succession, and the transfer of business as a going concern.

Reverse-charge mechanism

A domestic reverse charge applies between Hungarian taxable persons for the following activities:

- Services related to immovable property (e.g. construction, maintenance).
- Sales of certain steel products.
- Sales of waste materials.
- Sales of carbon quotas.
- Sales of real estate and land if the application of VAT was chosen.
- Sales of certain agricultural products (e.g. maize, wheat, barley, rye).
- Leasing staff or making available personnel and the use of student-work placement offices.

VAT recovery

VAT deduction is available only for the business-related element of purchases that were made partially for non-business purposes.

If a taxpayer has a negative VAT balance in a VAT period, the amount can be recovered, provided that the VAT balance reaches or exceeds an absolute value of HUF 1 million for monthly filers, HUF 250,000 for quarterly filers, or HUF 50,000 for annual filers.

As a general rule, the deadline for remitting VAT reclaims is 75 days, irrespective of the amount concerned. However, if all incoming invoices, regarding which the VAT was deducted in the VAT return, are settled (paid fully to the suppliers) until the due date of the related VAT return, a 45-day deadline can be applied. The preferential deadline is applicable for taxpayers qualified as a 'reliable taxpayer' by the Hungarian tax authority.

Directive for refunds of foreign taxable persons

Taxable persons with their establishment in a European Union (EU) country, other than Hungary, or in Switzerland, Lichtenstein, or Norway, can recover local VAT. The refund applications have to be submitted electronically. Reclaim requests should be submitted to the tax authority of the country where the EU-registered taxable person is established.

Reporting obligations

All types of intra-Community transactions have to be reported in the periodic Intra-Community List in Hungary.

Taxpayers registered in Hungary have to submit domestic recapitulative statements about those transactions where the VAT amount reaches or exceeds HUF 1 million together with the basic data of the related business partner. In respect of the incoming invoices, those cases also have to be considered and included where the sum of the VAT on all transactions carried out by the same partner in a given VAT period reaches or exceeds HUF 1 million. Taxpayers liable to file the statement may opt to report their transactions even below this threshold to the tax authority. If a domestic recapitulative statement has to be prepared (i.e. there are transactions with a VAT amount higher than the referred threshold), the VAT return can only be submitted in electronic form.

As of 1 July 2018, taxpayers will be required to report to the Hungarian tax authority certain data regarding B2B invoices that are issued by invoicing software and have a VAT content of at least HUF 100,000. Such reports will have to be made electronically, through an online connection, using a specific XML file format.

This online reporting obligation will have an impact to the aforementioned domestic recapitulative statement because as of 1 July 2018 the domestic recapitulative statement will have to be submitted only regarding incoming B2B invoices that have a VAT content of at least HUF 100,000.

An Electronic Road Freight Control System (EKAER) number needs to be requested from the tax authority for specific road shipments. The taxpayers who do not fulfil this reporting obligation can face serious consequences (e.g. the tax authority is entitled to levy a default penalty of up to 40% of the value of goods transported, and also to seize the goods).

Group taxation for VAT

The VAT Act allows all companies that have established business presences in Hungary and qualify as related enterprises to form a VAT group. The essence of a VAT group is that its members act under a single VAT number in their transactions (i.e. they issue invoices under a shared VAT number and submit a single, joint tax return) and the supplies of products and services between the members do not qualify as business transactions from a VAT perspective.

Customs duties

Hungarian customs legislation and policies have been fully harmonised with EU legislation.

As of 1 January 2018, the EU customs legislation comprises the following main regulations:

- Regulation (EU) No 952/2013 of the European Parliament and of the Council laying down the Union Customs Code.
- Commission Delegated Regulation (EU) 2015/2446 supplementing Regulation (EU) No 952/2013 of the European Parliament and of the Council as regards detailed rules concerning certain provisions of the Union Customs Code.
- Commission Implementing Regulation (EU) 2015/2447 laying down detailed rules for implementing certain provisions of Regulation (EU) No 952/2013 of the European Parliament and of the Council laying down the Union Customs Code.
- Commission Delegated Regulation (EU) 2016/341 supplementing Regulation (EU) No 952/2013 of the European Parliament and of the Council as regards transitional rules for certain provisions of the Union Customs Code where the relevant electronic systems are not yet operational and amending Delegated Regulation (EU) 2015/2446.
- Council Regulation 1186/2009/EEC setting up a Community system of reliefs from customs duty.
- Council Regulation 2658/87/EEC on the tariff and statistical nomenclature and on the Common Customs Tariff.

New national customs regulation entered into force as of 1 January 2018 (Act CLII 2017 on Implementing the Union Customs Law). Some of the main changes compared to the previous legislation are as follows:

- Procedural regulation became an integral part of the national customs law.
- The procedure of customs audit (e.g. right to comment on the customs authority's assessment) changed.
- By the main rule, information (such as declarations, applications, or decisions) will be provided and exchanged electronically between the customs authority and economic operators.

As a general rule, non-compliance resulting in a customs shortfall attracts a customs penalty of 50% of the customs duty deficit.

Excise duties

The following goods are subject to excise duty:

- Mineral oils.
- Alcohol and alcoholic beverages. Any product with an alcohol content of 1.2% or more by volume qualifies as an alcohol product.
- Beers.
- Still wines.
- Sparkling wines.
- Other still fermented beverages.
- Other sparkling fermented beverages.
- Intermediate alcoholic products.
- Tobacco products.
- Energy products (electricity, natural gas, and coal).

As of 1 January 2018, the excise duty rates are as follows:

- Mineral oils: HUF 110,350 to HUF 129,200 per thousand litres or HUF 4,655 to HUF 116,000 per thousand kilograms, depending on the world market price of crude oil and on the type of mineral oil.
- Electricity: HUF 310.5 Ft/MWh.

- Coal: HUF 2,516/1,000 per kilogram.
- Natural gas: HUF 0.3038/kWh or HUF 28/nm3 depending on usage.
- Alcohol products: HUF 333,385 per hectolitre of pure alcohol. Special rules are applicable to spirits manufactured in private distilleries and contract distillation.
- Beer: HUF 1,620 per alcohol degree and per hectolitre, HUF 810 per alcohol degree and per hectolitre for beer produced in a micro-brewery.
- Still wines: HUF 0 per hectolitre.
- Sparkling wines: HUF 16,460 per hectolitre.
- Other still fermented beverages: HUF 9,870 per hectolitre for other fermented beverages, HUF 0 per hectolitre for still wine of an actual alcoholic strength by volume not exceeding 8.5% volume mixed with carbonated water without added flavouring, where the ratio of still wine exceeds 50%.
- Other sparkling fermented beverages: HUF 16,460 per hectolitre.
- Intermediate alcoholic products: HUF 25,520 per hectolitre.
- Cigarettes: HUF 16,200 per thousand cigarettes plus 25% of the retail sale price, but a minimum of HUF 29,200 per thousand cigarettes. The tax base per cigarette also depends on the length of the cigarette (without filter). It is double if the length of the cigarette is 8 cm to 11 cm, triple if the length is 11 cm to 14 cm, and so on.
- Cigars and cigarillos: 14% of the retail price, but a minimum of HUF 4,180 per thousand cigars or cigarillos.
- Fine-cut and other tobacco: HUF 17,300 per kilogram.
- Refill liquid: HUF 55 per millilitre.
- Other consumables that contain tobacco or are consumed with tobacco: HUF 10 per each tobacco containing product or products consumed along with tobacco products for single use, HUF 70 for liquid per millilitre.

The Customs Body of the National Tax and Customs Authority is responsible for excise duty (and municipal tax authorities for the excise duty of private distillers). The European Union's excise duty and energy tax rules apply in Hungary.

Property and land taxes

Hungarian municipalities have the right to levy property tax and land tax at their own discretion until the below caps are reached.

Property tax

The owner of a building is subject to property tax liability annually on the first day of the calendar year.

As of 1 January 2018, advertising media deployed on any real estate property located in the area of jurisdiction of any municipal government shall also be subject to property tax.

The local government can determine the tax base in either of the following ways:

- The net floor space of the building expressed in square metres, with a maximum tax rate of HUF 1,100 per square metre.
- The adjusted market value of the building, with a maximum tax rate of 3.6% of the adjusted market value.
- In case of advertising media placements (*see above*), the tax base shall be calculated based on their net surface area, with an annual maximum tax rate of HUF 12,000 per square metre.

Land tax

The owner of land is subject to land tax liability annually on the first day of the calendar year. Undeveloped plots of land situated within the area of jurisdiction of a local government, including peripheries, are subject to this tax. The local government can determine the tax base in either of the following ways:

- The actual area of the plot expressed in square metres, with a maximum tax rate of HUF 200 per square metre.
- The adjusted market value of the plot, with a maximum tax rate of 3% of the adjusted market value.

Stamp duties

The most common types of stamp duty are gift duty and duty on transfers of property for consideration. Stamp duty is levied on movable and immovable property and property rights if they were acquired in Hungary, unless an international agreement rules otherwise.

Gift duty

Gift duty arises on the date when a contract concerning a gift is concluded.

Transfers of movable property, immovable property, and property rights without consideration are subject to gift duty. In these cases, however, gift duty is only incurred if the transaction was formally documented; except for movable property with a market value of more than HUF 150,000, where gift duty must be paid in any event.

The base of gift duty is the net value of the gift, which is the market value minus any liabilities related to the gift. The general duty rates vary, depending on the type of property: 9% on residential property and 18% on other assets. In general, the transaction shall be reported to the state tax authority within 30 days.

Transfers of movable assets without consideration and acquisitions of claims without consideration, including waivers of claims and assumptions of debts, are exempt from gift duty, provided that the recipient is a company. However, this exemption only applies if in the country where the non-resident beneficiary is based, both the rate of the tax corresponding to the corporate tax and the rate of the tax on the sale of the shareholding are no less than 9%. The same conditions apply to the exemption of preferential exchange of shareholdings, preferential asset transfer, and transfer of assets between related parties.

Duty on transfer of property for consideration

The obligation to pay duty on the transfer of movable and immovable property for consideration arises on the date when the contract is concluded.

Transfer of real estate, property rights, and the transfer of companies that own domestic real estate are subject to stamp duty. In this latter case, stamp duty only applies for acquisitions of direct or indirect participations (stocks, shares, co-operative shares, investor shares, converted investor shares) of at least 75% in a company that owns domestic real estate. For stamp duty purposes, a company that owns domestic real estate is a company (i) in which the book value of the domestic real estate represents at least 75% of the assets or (ii) that holds at least 75% of the shares of another company in which the book value of the domestic real estate represents at least 75% of the assets. Note that for classification purposes, liquid assets, receivables, prepaid expenses, and accrued income have to be disregarded when determining the 75% ratio. The stamp duty for the transfer of real estate and the transfer of companies that own domestic real estate is 4% up to HUF 1 billion and 2% of the amount exceeding HUF 1 billion, up to a maximum of HUF 200 million per real estate. In the case of real estate agents, the preferential 2% property transfer duty can only be applicable if they agree to resell the real estate to a buyer or lessee within two years. Otherwise, the duty is 3%. There is a relieved 2% rate applicable for real estate investment funds and to real estate investment trusts (REITs) as well.

There are special rules for real estate trading companies and financial leasing service providers. Under certain circumstances, exemptions are available more generally.

Stamp duties are also levied on certain court procedures (e.g. Court of Registration) and on submissions to certain authorities (e.g. appeals to the tax authority). Stamp duty is, for instance, levied in an amount of:

- HUF 100,000 on the registration of a private stock company
- Free of charge on the registration of a limited liability company
- HUF 600,000 on the registration of a European company
- HUF 100,000 on the registration of any other entity with legal personality (except from European companies)
- HUF 50,000 on the registration of a branch office, and
- HUF 50,000 on the registration of a representative office.

Registration tax

Registration tax is charged on passenger cars, motor homes, and motorcycles before they can be registered and put into service in Hungary. The registration tax is also payable by fleet operators. The duty is payable with the first domestic registration, import, intra-Community purchase, or in the case of a conversion.

The registration tax rate is applied as follows:

- Passenger cars: HUF 45,000 to HUF 4.8 million, depending on the technical features of vehicles (cc, engine type) and environmental classification.
- Hybrid cars: HUF 76,000.
- Purely electrical vehicles, plug-in hybrid electrical vehicles, increased range plug-in hybrid electrical vehicles, and zero-emission vehicles: HUF 0.
- Motorcycles: HUF 20,000 to HUF 230,000, depending on technical features of the motorcycles (cc).

The registration tax is levied by the Customs Body of the National Tax and Customs Authority.

Employment-related tax and social security contributions (social tax) payable by employers

The social tax base is the gross income paid to the employee. The tax rate is 19.5% as of 1 January 2018.

The rate of training fund contribution on employment income is 1.5%. The tax base is the gross income paid to the employee.

Mining royalty

Mineral resources and geothermal energy, at the places where they are found in nature, are state property and subject to concession.

The mining company must pay a mining royalty, based on the quantity of the mineral resources extracted under authority permit.

Public health product tax

The first domestic distributor of certain products, as well as the acquirer of goods that are brought from abroad and used for the domestic manufacture of own products that will be sold in Hungary, are liable to pay a product tax. The duty rates are as follows:

- Beverages (depending on sugar content and tariff number): HUF 7 per litre (HUF 200 per litre for syrups and concentrates).
- Energy drink (depending on tariff number, methyl-xanthine, and taurine content): HUF 40 or HUF 250 per litre.
- Cocoa powder with added sugar (depending on tariff number, sugar, and cocoa content): HUF 70 per kilogram.
- Other pre-packed product with added sugar (depending on tariff number, sugar, honey, and cocoa content): HUF 130 per kilogram.
- Salty snacks (depending on tariff number and salt content): HUF 250 per kilogram.
- Seasonings (depending on tariff number and salt content): HUF 250 per kilogram.
- Flavoured beer and alcoholic beverages (depending on tariff number and sugar or sweetener content): HUF 20 per litre.
- Fruit jam (depending on tariff number and sugar content): HUF 500 per kilogram.
- Alcoholic drinks (depending on tariff number and herb content): HUF 20 to HUF 900 per litre.

Taxpayers are allowed to deduct up to 10% of their tax liability to finance 'health promotion programmes'.

Environmental protection product fee

The following products are subject to the environmental protection product fee: other crude oil products, tyres, packaging materials, batteries, commercial printing paper, other plastic products, other chemical products (soaps, detergents, cosmetics), printing or copy paper for office use, and electrical and electronic products (based on customs tariff numbers applicable on 1 January 2010).

The following entities are liable to pay the product fee:

- The first domestic distributor or user for own purposes.
- In the case of domestically manufactured other crude oil products, the first buyer from the first domestic distributor or user for own purposes.
- In the case of toll manufacturing, the party that orders the toll manufacturing.

Product fee rates from 1 January 2018 are as follows:

- Tyres: HUF 57 per kilogram.
- Packaging materials: HUF 19 to HUF 1,900 per kilogram.
- Other crude oil products: HUF 114 per kilogram.
- Batteries: HUF 57 per kilogram.
- Paper-based advertisement materials: HUF 85 per kilogram.

- Electrical and electronic products: HUF 57 per kilogram.
- Printing or copy paper for office use: HUF 19 per kilogram.
- Other plastic products: HUF 1,900 per kilogram.
- Other chemical products: HUF 11 to HUF 57 per kilogram.

The Tax Body of the National Tax and Customs Authority controls the payment and reporting of the product fee and carries out product fee inspections. The product fee is self-assessed. The product fee returns must be submitted quarterly to the tax authority via its electronic system. An advancement payment is payable for the fourth quarter.

The product fee penalty is generally 100% of the product fee shortfall in cases of non-payment or underpayment.

Environmental load charges

Environmental pollution charges were introduced to protect the natural environment, to reduce its impairment, to encourage the users of the environment to engage in activities aimed at the preservation of the natural environment, and to provide funding from the central budget for environmental protection and nature preservation.

Emitting entities liable to pay charges include those who operate point-source emitters subject to registration, pursue activities subject to a water right permit, or who do not use available public drainage systems and dispose of their sewage under a water right permit or a permit from the local water management authorities.

Qualifying materials include sulphur dioxide, nitrogen oxides, mercury, phosphorous, cyanides, and others.

The load charge is calculated on the basis of the quantity of emitted materials multiplied by the fee rate (and, in certain cases, by vulnerability and sludge disposal factors, taking into account average concentration). Basically, the amount of the fee payable depends on the hazard level of the emitted material (e.g. HUF 50 per kilogram for sulphur-dioxide).

Food chain supervision fee

The purpose of the food chain supervision fee is to raise revenue for the operation of a regulatory body tasked with the official supervision of the food chain.

The supervision fee is payable by the following natural persons, legal persons, or unincorporated organisations:

- Persons who place animals on the market that are kept for food production, breeding, or experimental purposes.
- Persons who place food or fodder crops, seeds, plant products, and planting material on the market.
- Registered or authorised food businesses.
- Registered or authorised feed businesses.
- Persons who manufacture or place on the market veterinary medicines or veterinary medicinal products.
- Persons who manufacture or place on the market ‘EEC fertiliser’ or other products subject to authorisation.
- Persons involved in the handling, use, further processing, and transport of animal by-products or placing derived products on the market.

- Businesses engaged in the transport of live animals.
- Persons operating facilities for the cleaning and disinfection of vehicles used for transport of live animals, isolation facilities for receiving animals from different stocks, livestock loading ramps, assembly centres, trading sites, feeding and watering stations, rest stations, and livestock fairs.
- Persons manufacturing and storing plant propagation material.
- Persons operating a registered or authorised laboratory.
- Persons placing devices on the market that are used for marking animals.

As of 16 June 2017, any person who is not established in Hungary, but nevertheless engaged in the pursuit of the activities defined by the Food Chain Act, has a FELIR identifier, and is registered by the state tax authority as a taxpayer liable for payment of VAT, is liable to declare and pay the supervision fee.

As the main rule, the annual supervision fee is 0.1% of the total trading revenue (excluding excise duty and public health product tax) derived in the preceding year from these activities.

The taxpayers concerned have to comply with their reporting obligation by 31 May. The annual supervision fee is payable in two equal instalments: the first instalment by 31 July, and the second by 31 January.

Telecommunication tax

The telecommunication tax applies to telecommunications service providers. The telecommunication tax rate is HUF 2 per minute for calls made and HUF 2 per message sent for private individuals, and HUF 3 per minute for calls made and HUF 3 per message sent for parties other than private individuals. The monthly ceiling is HUF 700 per number for private individuals and HUF 5,000 per number for entities other than private individuals.

Tax on financial transactions

The scope of the tax on financial transactions includes payment service providers with a registered address or branch office in Hungary, credit institutions entitled to provide foreign currency services, special services intermediaries entitled to provide intermediated foreign currency services, and financial institutions that engage in the granting and negotiation of credit and cash loans but to not qualify as payment service providers.

The financial transaction tax applies to the following payment services:

- Bank transfers.
- Direct debits.
- Postal cash payments.
- Cash payments from payment accounts (including cash withdrawals using a credit card).
- Cash transfers.
- Bank card payments.
- Letters of credit.
- Cashing cheques.
- Foreign currency exchanges.
- Debt repayments.
- Commissions and banking fees.

- Other transactions in which the amount of the transaction is deducted from the payment account credit balance.

If certain conditions are fulfilled, no tax will be payable for transactions such as:

- Technical transfers between accounts held at the same bank.
- For investment services, transfers between the payment account and the client account if the investment service provider is a related party of the financial service provider.
- Payments from limited purpose accounts (long-term investment accounts, voluntary pension accounts, subsidised accounts for minors [START account], and custodial accounts).
- Cash pool related payment transactions within the same financial service provider.
- Transactions between financial service providers (including, among others, financial institutions, investment companies, etc.).
- Payment transactions from social security and family allowance administrative accounts.
- Unapproved (or approved but incorrectly made) payment transactions and their corrections.

In general, the tax base is the amount of the transaction (debit amount, amount paid, amount of currency sold, etc.). In most cases, the tax rate is 0.3% of the transaction but the amount payable may not be more than HUF 6,000 per transaction. This cap is not applicable to transactions in which the duty is payable by the State Treasury or Magyar Posta Zrt, or in case of cash withdrawal. In the case of (card) payment transactions initiated by the payer through the payee, a flat-rate tax of HUF 800 per year is payable. Also, if such payment includes transactions executed with the use of a contactless payment feature, the duty payable is reduced to HUF 500 per year.

Special tax of financial institutions

In Hungary, there is a special tax levied of financial institutions. The tax base of financial institutions is the amended balance sheet total figure calculated from the financial statements of the second tax year preceding the current tax year. In 2017 and 2018, the tax rate is 0.21% of the tax base exceeding HUF 50 billion. Below HUF 50 billion, the tax rate is 0.15%. Financial institutions are also subject to 30% tax on their profit before taxation; however, this tax liability is creditable against the special tax of financial institutions calculated on the balance sheet totals.

Insurance premium tax

Insurance premium tax is applicable on voluntary vehicle liability insurance policies (CASCO) and on property and casualty insurance policies in Hungary.

The insurance tax should be paid by the insurance companies after the gross insurance premium received on insurance policies insuring risks located in Hungary. Insurance companies subject to the tax include:

- insurance companies headquartered in Hungary
- foreign insurance companies' Hungarian branches, or
- insurance companies providing cross-border insurance services if these entities, which are headquartered abroad, render taxable insurance services in Hungary.

The above-mentioned entities should apply two different tax rates. For voluntary vehicle liability insurance policies, the rate of the tax is 15%; for property and casualty insurance, the rate is 10%.

We note that this tax should be paid neither after the mandatory vehicle liability insurance, nor after life and health insurance.

Accident tax

The base of the accident tax is the yearly fee of compulsory motor vehicle liability insurance. The tax rate is 30%, but the maximum rate shall not be more than HUF 83/day/vehicle.

Branch income

Foreign companies may establish branch offices in Hungary. A branch office is an organisational unit of a foreign company without legal personality, vested with financial autonomy, and registered in the Hungarian companies register as a branch office of the foreign company. The provisions of the Hungarian Accounting Act apply to branch offices, which must prepare reports using double-entry bookkeeping. Statutory audits are obligatory, except for the branches of corporations whose registered office address is in the European Union.

A branch office is regarded as established when it has been entered into the companies register. A branch office may start operating once the application for registering the branch office has been submitted to the Court of Registration, provided that it indicates ‘under registration’ on its corporate correspondence. Until a branch has been registered, it cannot carry out any activities that are subject to official permission. A branch office is considered dissolved upon its removal from the companies register.

Branch offices are treated as PEs for taxation purposes. They have to determine their tax base according to the general rules applicable to Hungarian companies. The profit for the year (calculated on the basis of the Hungarian accounting system and adjusted by specific provisions of the Corporate Tax and Dividend Tax Act or CDTA) is subject to CIT of 9%. The definition of PE is similar to that in the tax treaties but somewhat broader. For treaty countries, the respective treaty definition applies.

A foreign company’s CIT base is determined for all its domestic PEs (except for branches) collectively and for its branches separately. A branch should account for costs and revenues as if it were independent from its foreign parent company.

For a Hungarian PE, earnings before taxes are reduced by cumulated administrative costs incurred proportionately at the headquarters and any of its PEs, with the maximum proportion defined as the revenues of the PE compared to all revenues of the foreign company.

However, if there is a treaty between Hungary and the other country, the provisions of the treaty have priority over domestic law. Consequently, the provisions of the treaty have to be followed in the first instance, and all costs related to the activity of the branch have to be allocated to the branch, without the above restrictions in domestic law, and all profit realised with respect to the branch must also be allocated to the branch. The allocation method must be consistent from year to year, unless there is a good reason for changing it.

The foreign parent must continuously provide the assets and funds required for the operation of the branch office and the settlement of its liabilities. The employees of a branch office are in a legal relationship with the foreign company, and the foreign parent exercises employer's rights. A branch is considered to be related to its parent company/headquarters. Consequently, the prices used in inter-company transactions have to be at arm's length, and the transfer pricing documentation requirements have to be taken into consideration.

Income determination

The CIT base should be calculated by modifying the accounting pre-tax profit by adjustments and deductions as provided by the CDTA.

Inventory valuation

Inventories are generally valued at their historical cost unless their fair market value is significantly lower than their book value, in which case the fair market value should be recorded. In most cases, the cost is determined on the basis of first in first out (FIFO) or average cost.

Capital gains

Capital gains (losses) are treated as ordinary income (losses) for tax purposes. The gain on the sale of depreciable assets equals the sales revenue reduced by the tax value of the asset for CIT purposes.

If a participation is registered within 75 days, or an intangible asset is registered within 60 days, of acquisition and held continuously for at least one year, capital gains from the sale or contribution in kind of the participation, or the intangible asset, are exempt from CIT in general. Prior to an amendment as of 1 January 2018, there used to be an additional requirement concerning the minimum share of the given capital (at least 10% or above).

Stock transactions

Shareholders of a real estate holding company are also subject to CIT on their income from the alienation of the shares in the real estate holding company. Transfers of direct or indirect participations in companies that own real estate may be subject to CIT in certain cases where the shareholder is a foreign resident.

Dividend income

Except in the case of controlled foreign companies (CFCs) (*see the Group taxation section*), dividends received and accounted for as income in the given tax year are tax-free.

Interest income

No specific provision exists in Hungary for interest income; consequently, interest income is taxable for CIT purposes.

Intellectual property (IP) related income

The IP regime has recently changed in Hungary. In the transition period, both the old and new regime may be applicable, as follows:

- The old regime is applicable to IP acquired or produced till 1 January 2016.

- The new regime is applicable to IP acquired or produced after 30 June 2016.
- In the case of IP acquired or produced between 1 January 2016 and 30 June 2016, special rules apply.
- The old IP regime cannot be used after 30 June 2021.

Under the old IP regime, royalty includes gross income derived from (i) the licensing of the use or exploitation of patents, industrial design, and know-how; (ii) the right of use of trademarks, trade names, and business secrets; (iii) permission to use copyrights and similar rights attached to protected work; and (iv) transfers of the property described above (except for trademarks, trade names, and business secrets).

Under the new IP regime, royalty includes the profit (net income) gained through (i) the licensing of the use or exploitation of patents, utility models, plant variety rights, supplementary protection certificates, patented topography of micro-electronic semiconductors or a copyrighted software, or from registration as an orphan medicinal product (together referred to as 'exclusive rights'); (ii) the sale of exclusive rights, or from their de-recognition as non-monetary, in-kind contribution; and (iii) the supply of goods and services connected to the value of exclusive rights.

Royalty income

50% of the net income (gross income in case of the old regime) arising from royalty is exempt from tax, but up to 50% of the profit before tax. Based on the new regime, further limitations apply (Nexus approach) to the IP asset related tax incentives if the IP asset is acquired from a related party or R&D services to produce the IP asset are rendered by a related party.

IP reserves

Gain on sale of a non-reported IP asset that is transferred to tied-up reserves and used within five years (three years in the case of the old regime) for the acquisition of another IP asset generating royalty income is exempt from tax.

Reported IP

Gain on sale of a reported IP asset is exempt from tax. *The details of the exemption are described under Capital gains above*.

Development reserve

50% of pre-tax profit may be assigned as development reserve. The maximum value of the reserve is HUF 500 million annually. In general, the period within which the development tax reserve can be released, consistently with the cost of investment, is four years. This amount is basically available as a lump-sum tax depreciation for the relevant asset prior to the asset being acquired.

Unrealised exchange gains/losses

Hungarian taxpayers are able to use foreign currency for bookkeeping purposes. In case gains or losses are hitting the P/L though, those are tax effective. Note that there is a tax deferral available for unrealised exchange gains/losses.

Foreign income

Taxpayers resident in Hungary and foreign entrepreneurs (i.e. PEs) must calculate their CIT base exclusive of any income that is subject to taxation abroad if so prescribed by an international treaty. In any other case, a foreign tax credit is available for income taxes paid abroad (*see Foreign tax credit in the Tax credits and incentives section for more information*).

In Hungary, there are no provisions under which income earned abroad may be tax deferred.

Deductions

In general, costs and expenses incurred in relation to the taxpayer's income-generating business activity are deductible for CIT purposes.

Accrued expenses are recognised for taxation purposes in the tax year they affect.

Depreciation and amortisation

Accounting depreciation that is accounted as expenditure, and thus included in the accounting profit, should be added to the CIT base. Tax depreciation calculated according to the CDTA reduces the tax base, even if the tax depreciation is higher than the accounting depreciation. The tax depreciation of tangible assets should be calculated using the straight-line method on the basis of the historical value from the time when the asset was first used for business purposes.

Examples of tax depreciation rates include the following:

Assets	Depreciation rate (%)
Computers and other high-tech machinery	33 or 50
Vehicles	20
Other tangible assets	14.5
Buildings (long-life structure)	2
Rented buildings	5

Assets newly acquired since 2003 can be depreciated at 50% annually; these instruments include, among other items, machinery and IP.

Generally, there is no prescribed amortisation rate for intangibles; the historical value, the residual value, and the useful life should be considered. However, goodwill can be amortised at an annual rate of 10%, provided that the business of the taxable person is in line with its intended purpose and that amortisation of goodwill can also be recognised for accounting purposes. Additionally, extraordinary amortisation might also be recognised for CIT purposes.

In the case of transformations, specific amortisation rules apply.

Organisational and start-up expenses

Companies are not obligated to capitalise the costs of formation/reorganisation. The capitalisation of these costs is at the company's discretion, but the company should comply with its accounting policy. Furthermore, only the direct costs of formation/reorganisation that are not classified as investments or renovations and are likely to be recovered ultimately can be capitalised.

Interest expenses

Interest expenses are generally deductible if the following conditions are met:

- Interest incurs in relation to the company's profit generating activity.
- Thin capitalisation rules are fulfilled (*see Thin capitalisation in the Group taxation section*).
- Interest is not paid to a CFC.
- Interest is in line with the transfer pricing principles (in a related-party setting).

Bad debt

Under the Accounting Act, bad debts are only deductible for CIT purposes if they are supported by legally valid third-party documents stating that the receivable cannot be collected. Expenses claimed that cannot be enforced in court and expired claims are not deductible for CIT purposes.

In addition to the above, 20% of eligible bad debts are deductible from the CIT base if the debt was not settled within 365 days from the due date.

Charitable contributions

Grants made or assets that are transferred without consideration, as well as liabilities assumed or services provided free of charge, will qualify as business expenses if the taxpayer has a declaration from the recipient stating that the recipient's profit will not be negative without the income received.

Grants will always qualify as non-business expenses if they are provided to a foreign person or foreign resident company.

In the case of film and sports (football, basketball, handball, ice hockey, water polo, and volleyball) sponsorship grants, the amount of support is deductible both from the CIT base (as an expense) and from the CIT amount, provided that an official sponsorship certificate is available.

Tax base allowance regarding R&D

A tax base allowance is only applicable for R&D activities if the taxpayer carries out basic research, applied research, or experimental research activities within its own scope of activities.

'R&D activities carried out within the taxpayer's operations' shall mean R&D activities carried out:

- using the taxpayer's own assets and employees, at the taxpayer's risk and benefit
- R&D activities carried out by the taxpayer's employees using the taxpayer's own assets on behalf of others, or
- (joint) R&D activities carried out under an R&D agreement (e.g. cost sharing agreement).

The direct cost of the R&D activity or the amount of depreciation on the research activity (if the cost of R&D activity is capitalised) is deductible when calculating the pre-tax profit. Additionally, an extra deduction is granted from the tax bases in the form of a downward tax base adjustment.

300% of the direct costs of research activity (up to a maximum of HUF 50 million) are deductible from the tax base if the research activity is carried out jointly with a higher education institution, the Hungarian Academy of Sciences, or a research institute established by them.

The same deductibility rule is applicable if a cooperation agreement is concluded with a research institution operating either as a central budgetary organ or as a majority state-owned business organisation.

Taxpayers may also deduct from their CIT base the direct costs of R&D activity carried out with own assets and employees of their related parties if, based on the choice and the declaration of the related party, the deduction was not utilised by the related parties and the R&D also serves the business of the taxpayer who utilises the deduction.

As of June 2016, entities with a negative tax base may claim 4.5% of tax base deductions applied on account of R&D activities as a social tax allowance, subject to meeting the following criteria: deriving at least 40% of total revenues from R&D activities, maintaining at least one trainee position, and having no decrease exceeding 10% in the average statistical headcount of R&D personnel in the tax year. If applied, 50% of the above tax base deduction will be regarded as a loss carryforward already used.

Employee benefit expenses

Employee benefits and the fringe benefit tax payable on them are tax-deductible.

From 2017, the CIT base may be reduced, up to the amount of the pre-tax profit, by the aggregate of the investment cost and the increment of cost of accommodation facilities for workers, as defined by the Act on Personal Income Tax, rather than the costs and expenditures recognised in the tax year in which the relevant construction or renovation project is completed. The CIT base may also be reduced by the rent of property rented for the purpose of providing accommodation facilities for workers.

As of 1 January 2018, the sum shown as the cost of a building of long-life structure, built for providing rental units to their workers and directly serving the said activities, or shown as any increment to that cost, in the tax year when the investment or renovation was completed can also be deducted from the pre-tax profit.

Bribes, ‘kickbacks’, other illegal payments

Bribes, ‘kickbacks’, and illegal payments are not recognised as business costs for CIT purposes and are non-deductible from the tax base.

Fines and penalties

Fines and penalties are not deductible for CIT purposes.

Taxes

Taxes are usually deductible for CIT purposes, except for CIT, recoverable VAT, and the income tax of energy suppliers and public utility service providers.

Net operating losses

Losses can be carried forward according to the following:

Year the tax loss was generated	Period of utilisation
Prior to the tax year starting in 2015	Until the tax year including 31 December 2025
During the tax years starting after 2015	During the following five tax years

In the case of acquisition or legal transformation, the company's tax losses carried forward cannot be utilised if:

- the majority of the company's shares are directly/indirectly acquired by an independent entity (an entity who was not one of the company's owners in the preceding two financial years)
- the activity of the company changes significantly in the two years following the transformation, or
- the successor company does not generate any revenue from at least one activity of the predecessor.

Losses carried forward may only be used to offset up to 50% of the tax base calculated without losses carried forward. However, losses carried forward and acquired by the successor company in the course of corporate transformation may be written off in a tax year only in proportion to the ratio of the sales or other revenues gained in the tax year in respect of the continued business activity and the average sales or other revenues gained by the predecessor company in the last three tax years preceding the transformation.

Note that earlier tax losses must be used first (FIFO principle), and the losses of predecessors are also deductible from the successor company's CIT base if the aforementioned conditions are met.

Losses cannot be carried back (except for agricultural companies, who may account for deferred losses by self-revision or by correcting the amount of tax paid in the previous two tax years).

See Tax base allowance regarding R&D above for a new rule in relation to entities with a negative tax base effective as of June 2016.

Payments to foreign affiliates

There is no general restriction on the deductibility of a consideration due to a foreign entity, provided the payment is a justifiable business cost. General anti-avoidance provisions (abuse of law, substance-over-form) may also result in non-deductibility. If the parties are considered to be related parties under the definition of the CDTA, the Hungarian tax office is entitled to adjust the Hungarian party's tax base to reflect the market price (arm's-length price) if the parties did not make the adjustment themselves.

Considerations due for services are only deductible if the actual performance of the services is supported and the Hungarian taxpayer can prove that it benefits from the service.

Thin capitalisation rules may apply to interest on any non-banking debt in excess of three times the equity (*see Thin capitalisation in the Group taxation section*).

The consideration paid to a CFC is not deductible for CIT purposes unless the taxpayer is able to prove and keeps documentation that it serves the purposes of business operations. *For further details on the CFC rules, see the Group taxation section.*

Group taxation

Group taxation is not available for CIT purposes in Hungary. However, in the case of certain taxes (e.g. LBTs), an aggregated tax base has to be determined for related parties if certain conditions are met.

See Value-added tax (VAT) in the Other taxes section for a description of group taxation for VAT purposes.

Transfer pricing

If parties qualify as related parties (as defined in the Hungarian CDTA) and the price applied differs from the arm's-length price, the CIT base must/may be modified by a transfer pricing adjustment. In addition, the foreign PEs of a Hungarian company and the Hungarian head office also qualify as related entities and are subject to transfer pricing regulations.

Taxpayers are obligated to prepare transfer pricing documentation for every transaction between related parties (including in-kind contributions), subject to certain exemptions.

Transfer pricing documentation is not required to be prepared:

- For transactions between a resident taxpayer's PE and a related company if the resident taxpayer under the provisions of an international treaty adjusts the corporate tax base ensuring that it does not include the foreign taxable income.
- For transactions covered by an advanced pricing agreement (APA) issued by the state tax authority.
- If the consideration due for goods or services supplied by a third party is recharged in full to a related party.
- In the case of cash transferred without consideration.
- If the value of the transaction does not exceed HUF 50 million during the tax year.
- In the case of individuals, small or micro enterprises, transactions conducted on the stock exchange, or at an officially set price.

Taxpayers are allowed to prepare consolidated transfer pricing documentation if the consolidation does not jeopardise comparability, and the contracts:

- have the same subject matter and all their terms and conditions are identical and laid down in advance
- closely relate to each other, or
- in the case of consolidation, taxpayers are obligated to include arguments for the consolidation (i.e. why the taxpayer believes that criteria of consolidation are met).

When determining transfer prices applied between related companies, taxpayers are allowed to apply traditional transaction methods or transactional profit methods. If the above methods are not applicable, companies may use any other method.

According to Decree No. 22/2009 of the Ministry of Finance, taxpayers are allowed to prepare two types of documentation: standalone or centralised transfer pricing documentation. These rules apply to the years from financial year (FY) 2010 to FY 2017.

According to Decree No. 22/2009 of the Ministry of Finance, standalone documentation must include the following:

- Functional and risk analysis.
- Industry and company analyses.
- Economic analysis (including financial analysis, benchmarking analysis, and the process of selecting the most appropriate transfer pricing method).

According to Decree No. 22/2009 of the Ministry of Finance, centralised transfer pricing documentation must consist of two main parts:

- The core documentation, which includes the standard data for each company within the group that is resident in any EU member state.
- Country-specific documentation, which describes the agreements between the taxpayer and its related parties.

Taxpayers are required to indicate in their CIT returns if they prepare centralised documentation.

The formal and content requirements as included in Base Erosion and Profit Shifting (BEPS) Action 13 were implemented in Hungary in Decree No. 32/2017 of the Ministry for National Economy, which has replaced, as of 1 January 2018, the Decree No. 22/2009 of the Ministry of Finance, the former decree governing the details of the transfer pricing documentation requirements.

According to Decree No. 32/2017 of the Ministry for National Economy, taxpayers have to prepare a Master File and a Local File as transfer pricing documentation. The new rules have to be applied in the documentation to be prepared for FY 2018 first. At the taxpayer's discretion, the new rules may also be applied to transfer pricing documentation relating to tax liabilities for FY 2017, provided that the due date of the documentation is not earlier than the date on which the Decree enters into force.

According to Decree No. 32/2017 of the Ministry for National Economy, the Local File must include the following:

- Functional and risk analysis.
- Industry and company analysis.
- Economic analysis (including financial analysis, benchmarking analysis, and the process of selecting the most appropriate transfer pricing method).
- Copies of APAs and advance tax rulings issued by foreign tax authorities that concern the local company's documented transactions.

According to Decree No. 32/2017 of the Ministry for National Economy, the Master File must include the following:

- The organisational structure and the presentation of the group (including the supply chain, inter-company agreements, functional and risk analysis, and business reorganisation, if any).
- Information about the intangible assets, the financial transactions, the financial performance, and the taxation of the group.
- A list of APAs and advance tax rulings issued by tax authorities.

In addition to the above, taxpayers are allowed to prepare a so-called simplified documentation for certain low-value adding services if criteria set in the Hungarian legislation are met. Both Decree No. 22/2009 of the Ministry of Finance and Decree No.

32/2017 of the Ministry for National Economy allow the preparation of the simplified documentation.

As per the CDTA, taxpayers are required to apply the interquartile range when determining and presenting the arm's-length nature of the transfer prices of their inter-company transactions if they meet all the specified conditions, as defined in Decree No. 22/2009 of the Ministry of Finance and Decree No. 32/2017 of the Ministry for National Economy.

According to Decree No. 22/2009 of the Ministry of Finance, the conditions are the following:

- the arm's-length price is determined by applying a transfer pricing method other than comparable uncontrolled price (CUP) method
- the arm's-length price or range is determined based on information from databases that are publicly accessible or verifiable by the tax authority, and
- the comparability analysis covers the data of at least ten comparable companies for at least three financial years or the sample range exceeds 15%.

According to Decree No. 32/2017 of the Ministry for National Economy, the conditions are the following:

- the arm's-length price or range is determined based on information from databases that are publicly accessible or verifiable by the tax authority, and
- the comparability analysis covers the data of at least ten comparable companies for at least three financial years or at least 30 observations are taken into account or the sample range exceeds 15%.

The transfer pricing documentation does not have to be submitted to the tax authority, but has to be available no later than the filing date of the CIT return in any given year; otherwise, a default penalty may be assessed in an amount up to HUF 2 million for missing or incomplete documentation for each year. In the case of a repeat offence, it is up to HUF 4 million for each missing or incomplete documentation. For the repeated offence of the same documentation, the penalty may go up to four times of the penalty levied for the first time.

Country-by-country (CbC) reporting

In addition to the above, Hungary has implemented CbC reporting legislation. The new statutory obligation pertains to Hungarian resident companies that were, in the fiscal year preceding the reporting fiscal year, members of a multinational company group with a total annual consolidated group revenue exceeding 750 million euros (EUR) (or an amount in HUF approximately equivalent to the same, calculated according to the monthly average Hungarian Central Bank exchange rate for January 2015).

Under the general rule, a Hungarian resident ultimate parent entity must file a CbC report with the Hungarian tax authority within 12 months of the last day of its reporting fiscal year. The ultimate parent entity must also notify the tax authority about the last day of the fiscal year and that it is a reporting entity (i.e. an entity required to file a CbC report).

Hungarian resident entities that do not qualify as reporting entities are obligated to notify the tax authority about the name and tax residence of the reporting entity.

The first CbC reports and notifications must have been filed for the fiscal year commencing on or after 1 January 2016 within 12 months of the last day of that fiscal year. As a general rule, however, in future fiscal years notifications must be made no later than the last day of the reporting fiscal year. Any change in the information reported must be reported within 30 days of such change occurring. The CbC reports and notifications must be submitted electronically.

Failing to submit reports or notifications, late submission, or providing incorrect, false, or incomplete information may be subject to a default fine of up to HUF 20 million.

Thin capitalisation

As a general thin capitalisation rule, interest payable is not a fully deductible expense for CIT purposes if the amount of a company's outstanding liabilities owed to non-financial institutions exceeds three times the value of the equity.

Debt means the average daily balance of outstanding loans, outstanding debt securities offered privately, bills payable (with the exception of bills payable to suppliers), and any other liability shown in the balance sheet that entails the payment of interest from the taxpayer's profit. Debt includes non-interest bearing loans as well. Debt also includes third-party loans (unless provided by a bank).

Equity means the average daily balance of registered capital, capital reserve, accumulated profit reserve, and tied-up reserve. This means that revaluation reserves and current year profit and loss have to be disregarded when computing the equity for Hungarian thin capitalisation purposes.

Hungarian intra-group financing companies are exempted from the thin capitalisation calculation.

Controlled foreign companies (CFCs)

As of 18 January 2017, the definition of a CFC has been changed in line with the Council Directive laying down rules against tax avoidance practices that directly affect the functioning of the internal market (ATAD). In accordance with the new definition, a foreign person shall qualify as a CFC in case the taxpayer:

- controls more than half of its voting rights or its subscribed capital, directly or indirectly, or is entitled to more than half of its after-tax profit, and
- the effective corporate tax paid abroad amounts to less than half of the corporate tax the person would have been liable to pay under the presumption it was established in Hungary (essentially lower than 4.5%).

A foreign person is not deemed a CFC if there is real economic substance (i.e. adequate personnel, equipment, assets, and location to effectively carry out business activities) attributable to that person.

As a general rule, companies that have PEs with a low effective tax rate, and companies that have direct or indirect subsidiaries subject to a low effective tax rate, can expect adverse tax consequences. Nevertheless, the wording of the legislation is open to different interpretations; so further clarification is recommended. There are anti-deferral rules also inspired by the ATAD directive applying on certain passive income items of the CFC with credit given for the taxes paid by the CFC.

Tax credits and incentives

Foreign tax credit

Unilateral foreign tax credit is available for income taxes paid abroad, up to the Hungarian tax payable on the creditable income (at a maximum of 90% of income tax paid abroad).

The foreign income has to be classified by country of origin and revenue type. The deducted tax may not exceed the lesser of either the applicable foreign tax or the applicable tax based on the taxation treaty between Hungary and the given country.

If there is no taxation treaty, 90% of the tax payable abroad is credited against the tax liability, up to a hypothetical tax liability calculated by using the average Hungarian tax rate. Ordinary tax credit is applicable if so described by a tax treaty. The average tax rate is the CIT rate, reduced by the applicable tax allowances, divided by the tax base. Indirect costs should be allocated in proportion to the revenue of the branch office to the total revenue of the whole company.

Development tax incentive

Each development tax incentive may be claimed for a 13-year period (beginning on the completion of the development) on the CIT returns over a maximum period of 16 years from the original application for the incentive. For development incentives that have been submitted to the Ministry for National Economy prior to 1 January 2017, the utilisation period is 10 years from the completion of the investment and 14 years from the application. In any given tax year, the tax incentive is available for up to 80% of the tax payable but is limited, in total, to the state aid intensity ceiling.

Claiming the tax relief is subject to a government decree, based on authorisation by the European Commission, if the total amount of state aid required for the investment project exceeds the amount that can be provided at the same municipality for an investment project with eligible expenses exceeding EUR 100 million. If the investment is below this threshold, taxpayers only need to notify the Ministry for National Economy before starting the investment. However, the beneficiary will also have to obtain prior consent of the European Commission if it has closed down the same or a similar activity in the European Economic Area in the two years preceding the aid application or intends to close down the same or a similar activity elsewhere in the European Economic Area in the two years after the completion of the investment.

Tax incentives are available for investments if:

- the net present value of the investment is at least HUF 3 billion, or
- the net present value of the investment is at least HUF 1 billion in certain designated areas and provided that in the four years following the year in which the tax incentive is first used against the tax base:
  - the annual average number of employees has increased by at least 50 compared with either the year before the investment was made or the average number of employees for the three years preceding the investment (by 25 in certain designated areas), or

- the annual wage costs have increased by 300 times the minimum wage effective on the first day of the tax year (by a multiple of 150 in certain designated areas) compared with either the annual wage costs of the year before the investment was commenced or the average annual wage cost for the three years preceding the investment.

Further incentives may be granted, provided certain criteria are met, to companies that invest:

- at least HUF 100 million in equipment for zoogenic food production
- at least HUF 100 million in environmental protection projects (including energy efficiency)
- at least HUF 100 million in the production of films and videos
- at least HUF 100 million in basic research, applied research, and experimental development projects
- at least HUF 100 million in projects financed by an issue of stock market-quoted shares if (i) the project is started before the last day of the third calendar year following the date of issue, (ii) the total nominal value of the shares issued by the fifth year following the start of the project continuously reaches 50% of the value of the registered shares, (iii) the total issue price reaches 50% of the eligible costs, and (iv) at the date of the application for the incentive the company has at least 25 shareholders or at least 25% of the issued shares are owned by shareholders where each of them does not have more than 5% of the issued shares' nominal value
- at least HUF 500 million in projects initiated by SMEs, or
- at least HUF 100 million in projects implemented and operated in a free entrepreneurship zone.

As of 24 November 2017, development tax incentives may be also applicable to investments carried out in certain designated areas of:

- at least HUF 6 billion at net present value, or
- at least HUF 3 billion at net present value aimed at creating new employment opportunities if the investment project results in the diversification of existing establishments into new products or new process innovations.

Tax incentives may also be granted for projects that create new jobs. The restrictions prescribed in the CDTA regarding the headcount of staff and the percentage of new entrants to the labour market that may be claimed for such investments have been abolished, although the conditions prescribed in the relevant decree must still be met.

In addition, the law stipulates that a taxpayer will be required to submit the details of the investment in their tax returns submitted for the tax year in which the investment is put into operation, including, in particular, the date of completion and the eligible expenses actually incurred at present value.

Regional aid map of Hungary

Large enterprises based in Budapest are not eligible for tax incentives, while those in Pest County are only able to claim tax incentives for projects aimed at starting a new economic activity in certain assisted areas (available tax incentive is 20% or 35%).

Aid intensity is 25% in the Western Transdanubia region and 35% in the Central Transdanubia region. In the Northern Hungary, Northern Great Plain, Southern Great Plain, and Southern Transdanubia regions, the maximum aid intensity is 50%.

Free entrepreneurship zone

The free entrepreneurship zone contains over 1,000 settlements in the unprivileged areas of Hungary designated by the government and coordinated by the regional business development agency that is comprised of individual regions, separated by public administration, borders, and topographical lot numbers, that are treated jointly for regional development purposes.

In accordance with the latest amendment to the Government Decree on the establishment of free entrepreneurship zones, the list of eligible areas has been broadened to include over 1,200 settlements. The amendment sets out an extended period of applicability until 31 December 2020.

Tax Credit for Growth (TCG)

The rules of the TCG entitle the taxpayer to pay the tax on that part of pre-tax profit that exceeds the quintuple of the pre-tax profit of the preceding year (tax falling on the credit for growth) in the following two fiscal years instead of paying it in the current year.

As a consequence, the TCG is, in practice, a deferral of the tax payment liability. The applicant is eligible for payment of the tax according to the TCG rules if: (i) it became subject to CIT at least in the year three years before the current year; (ii) during this period it did not participate in any transformation, merger, or demerger; and (iii) it reports this choice to the tax authority by the deadline of the CIT top-up. Companies that choose to take advantage of the TCG are already entitled to waive payment of the tax falling on the credit for growth at the CIT top-up of the current year. A preferential rule is attached to the TCG: the amount of the tax falling on the credit for growth not yet due can be reduced if the taxpayer engages in fixed asset investment or increases its employee headcount in the two fiscal years following the choice.

As of 19 July 2017, taxpayers utilising the TCG shall pay interest starting from the day that follows the due date determined based on the standard payment deadline for the TCG. The interest shall be calculated at a rate of 1/365 of the Central Bank base rate in effect on the given day for each calendar day, determined in accordance with the rules applicable to self-audit surcharges.

Tax credits on investments to comply with energy efficiency targets

A CIT incentive on investment projects aimed at increasing energy efficiency has been introduced in January 2017; however, the applicable rules were clarified in a Government Decree No. 176/2017 published on 4 July 2017.

As a particular feature, the tax incentive does not have a territorial restriction, and investment projects carried out even in the capital may be eligible, given all other conditions are fulfilled. The tax incentive may be applied to up to 70% of the calculated CIT liability.

Projects become eligible for the incentive given their initial energy-efficiency goals are met according to a certificate issued by energy auditors or auditing organisations listed by the Hungarian Energy and Public Utility Authority subsequent to the installation of the investment. Moreover, prior to commencing the project, a preliminary audit has to be carried out (also by an organisation described above) reflecting the rate of possible energy savings on the planned investment.

The rate of energy savings is to be measured considering the baseline regulations, or, in exceptional cases, against the energy consumption of a similar asset with the lowest energy efficiency (and attainable savings via installing the former) currently available on the market.

The tax incentive is applicable up to 30% of eligible costs (but not more that the HUF equivalent of EUR 15 million at present value), which can be increased by 20% for small enterprises, and 10% for medium-sized enterprises. The tax incentive can be used, at the earliest, in the tax year in which the investment became operational and in the subsequent five tax years.

Tax holidays

Tax holidays may be granted in relation to film and theatre subsidies, developments, and SMEs.

Other tax incentives

Film, performing arts, and spectator sports incentives

In Hungary, companies are encouraged to subsidise film production, performing arts, and spectator sports through the high rate of tax savings available. As sponsors, companies are able to achieve tax savings of up to 104.75% of the financial support they provide for film makers, performing artists, or sport clubs. Also, the option of allocating some of the payable CIT to support sports and culture is available. These two regimes are not applicable in parallel within the same tax year.

The total amount of donations for performing arts (including supplementary donations and donations in the frame of disposition of tax) shall not exceed 80% of the annual revenue of the association realised from sale of tickets in the European Economic Area in the prior year and it cannot exceed HUF 1.5 billion.

From 2017, the period for applying the tax incentive for providing financial support to film productions, performing arts organisations, and sports organisations for popular team sports is extended to include the eighth calendar year (previously it was the sixth tax year) following the year in which the support was provided.

Rules for applying sports incentives have been amended as of 1 July 2017. The list of eligible sports, defined as spectator sports, now comprises football, handball, basketball, water polo, ice hockey, and, as a new addition, volleyball.

Tax incentive for SMEs

A tax incentive is available for SMEs (basically, those with a maximum of 250 employees; annual net revenue of a maximum of EUR 50 million; or a maximum annual balance sheet total of EUR 43 million). SMEs that take a loan from a financial institution for the acquisition or production of tangible assets may deduct the total amount of the interest paid on the loan from their tax due without any cap. However, taxpayers engaged in certain business sectors cannot use this tax incentive (e.g. transportation, agricultural activity).

In order to be eligible for the above tax incentives, the wages and salaries need to be kept at a certain required level, according to relevant regulations.

Tax incentive for business start-ups

From 2017, pre-tax profits may be decreased by three times the cost of shareholdings acquired in start-up companies. The tax incentive can be used in four equal instalments, in the tax year of acquisition and in the three subsequent tax years, but only up to HUF 20 million per tax year.

The definition of start-up companies has been slightly amended as of 30 June 2017. A start-up company shall mean a legal person registered according to the Government Decree on the Registration of Start-up Companies, and, additionally, the average statistical number of employees in the start-up company is two or more in the tax years when claiming the allowance. Having an R&D fellow as at least one of the two employees is not a requirement any more pursuant to the amendment of 30 June 2017.

Withholding taxes

Under the domestic rules, there is no WHT on dividends, interest, or royalties paid to non-individuals.

Tax administration

As a significant development in the area of tax administration in Hungary, a new Act on Rules of Taxation has been introduced with an effective date of 1 January 2018 (new ART). Along with its modified content and structure, the governing rules for tax procedures and tax audits have been set out in a separate new act, the Act on Tax Administration Procedure.

The primary goal of the above revamp is a change in the overall perspective of the tax authority, an aim to create a regulatory environment that is brief, transparent, and easy to follow for taxpayers. In addition, the new Act aims to strengthen the service provider nature of the tax authority. Note that to a large extent this major change is a reshuffle of the rules among different pieces of legislations in order to achieve a more coherent and transparent situation.

Taxable period

CIT must be calculated by reference to the accounting year, which is either the calendar year or, for group companies, the group's accounting year.

Tax returns

Returns must be lodged by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). The tax payable is determined by self-assessment.

Tax returns may be submitted either electronically or in paper format. However, those who are legally obligated to submit monthly tax and contribution returns (e.g. employers and payers) may only submit tax returns electronically.

From 1 January 2017, entities subject to LBT may file their tax returns with the competent local municipality through the national tax authority. The national tax authority will forward tax returns to the competent local tax authorities in an electronic format only.

Payment of tax

CIT instalments must generally be reported and paid quarterly or monthly (above HUF 5 million tax payable). The final payment is due by the last day of the fifth month following the last day of the accounting year (31 May for a calendar year taxpayer). In the case of taxpayers with total trading revenues of over HUF 100 million, 100% of the expected final payment is due by the 20th day of the last month of the accounting year (top-up obligation). However, a late payment penalty is only levied if the company fails to pay at least 90% of the expected final payment by the above deadline. The late payment penalty is 20% of the difference between the tax advances paid (including the top-up payment) and 90% of the actual CIT liability.

Tax audit process

Generally, the tax authority selects the taxpayers subject to tax audit based on certain criteria, which are communicated to the public, and an elaborate risk assessment model. Tax audits can vary in the following ways: the tax authority can (i) re-audit tax returns, (ii) monitor the redemption of government guarantees, (iii) audit the fulfilment of certain tax obligations, (iv) gather data and information, (v) monitor compliance with duty payment obligations, or (vi) re-audit previously audited tax periods.

In accordance with the new ART, the rules for tax audits have been simplified. Instead of the previously existing seven different types, there are two types defined in the Act (note that as part of the reshuffle, four out of the five disappearing types are, in fact, remaining, but in other legislations).

During a compliance audit, the tax authority may inspect whether the taxpayer complied with its individual administrative tax obligations prescribed by relevant legislation, and, in addition, may gather data and may inspect the authenticity of economic events concerned.

When carrying out a tax audit, the tax authority inspects whether the taxpayer's tax assessment and the taxpayer's obligation to file tax returns have been fulfilled.

A tax audit period can cover any years that are not lapsed (five years after the last day of the calendar year in which the taxes should have been declared or reported, or paid in the absence of a tax return or declaration) or not closed by a re-audit of tax returns. The tax audit starts when a company receives the notice of audit and finishes when that company receives the report containing the tax authority's findings.

The deadline for the completion of the tax audit has also been re-codified. According to the general rule, a tax audit is to be completed within 30-120 days, although in special cases (e.g. related tax audit, request for assistance from foreign tax authorities) can be extended three times by 90 days.

In order to avoid audits lasting for several years, tax audit deadlines cannot be suspended in special cases either (*see above*), and the audit shall not exceed 365 days regardless of any ongoing related tax audit or outstanding input from foreign authorities.

Once the tax authority has completed the audit process, it issues its minutes. The minutes detail all the findings of facts of the audit and serves as the background of the tax assessment, and the basis on which the tax authority will pass its first-instance resolution. Upon receipt of the minutes, the taxpayer has the opportunity to submit its remarks to the minutes and raise any disagreement with the findings of the audit.

As one of the most important amendments as of 1 January 2018, the rules for the taxpayer to dispose new evidence during tax proceedings have been significantly modified. Upon the receipt of the minutes, the taxpayer is able to submit its remarks to the minutes and present evidence supporting its case within a 30-day deadline (increased from 15 days). In the course of subsequent proceedings (e.g. if a taxpayer submits an appeal regarding the first-instance resolution), taxpayers will not be able to allege any new facts or present any new proof that the taxpayer was already aware of but did not disclose upon the request of the tax authority in its remarks to the minutes.

In case of a dispute, the tax assessment of the tax authority may be appealed and challenged before the second-instance tax authority, which has the right to annul the first-instance resolution and decide on the merits of the case, or to instruct the first-instance tax authority to carry out a new audit if the facts and circumstances have not been appropriately and fully developed.

The decision of the second-instance tax authority is final and binding. Following the receipt of this decision, the company may litigate the case before the courts in Hungary. The court may uphold, amend, or annul the Resolution of Second Instance and, if it is necessary, may order a new process in relation to the tax audit.

The superior tax authority or the minister in charge of taxation (minister appointed for the supervision of the tax authority, i.e. Minister of Ministry for National Economy in Hungary) may take supervisory regulatory action on request by the taxpayer. The superior tax authority or the minister can also amend or annul the unlawful resolution, and, if it is necessary, a new procedure can be ordered. The deadline to initiate a supervisory measure has been set at one year following the final decision.

Statute of limitations

In general, the statute of limitations is five years from the end of the calendar year in which the tax return should be filed. Certain self-corrections interrupt the term of limitation.

Topics of focus for tax authorities

The tax authority will take more stringent measures against ‘aggressive tax planning’ (tax planning that takes advantage of unintended administrative or legal loopholes) using its international experience and cooperation agreements.

Generally, the following categories of taxpayers may expect to be scheduled for tax audits:

- Taxpayers that have significant tax deductions, tax allowances, and subsidies related to investments in relation to royalty.
- Taxpayers that deduct R&D expenses.
- Large taxpayers’ transfer pricing documentations.
- Taxpayers whose main activity is selling used cars.
- Taxpayers that provide accommodation or real estate services.
- Taxpayers that provide training services.

The tax authority will also pay more attention to the actual content of transactions conducted between related parties and to the methods companies use to determine the arm's-length price.

Special taxpayer categories

From 2016, the total tax difference charged to taxpayers classified as 'reliable' has to be reduced by the total tax difference credited to these taxpayers during the current year and the preceding five years. 'Reliable' taxpayers receive benefits, while 'risky' taxpayers fall under stricter rules.

The criteria for classifying taxpayers as reliable or high-risk has changed, along with the related legal consequences.

Reliable taxpayer

The tax authority classifies a taxpayer as 'reliable' if all criteria defined are met, including:

- at least three years of continuous operation (or being VAT-registered)
- no more than HUF 500,000 net tax debt
- not being classified as a risky taxpayer, and
- the balance of the taxpayer's total tax liability is positive.

Further conditions are that in the year in question and in the preceding five years:

- the tax difference on the taxpayer's expense should not be more than 3% of the total calculated tax liability of the year in question
- the taxpayer is not under foreclosure procedure
- the taxpayer is not under bankruptcy or under liquidation procedure, forced cancellation, or enhanced regulatory supervision by the tax authority, and
- the taxpayer's tax number is not under suspension or cancellation procedure.

Furthermore, the taxpayer cannot be classified as reliable if the sum of the default penalties in the previous two years before the year in question is more than 1% of the total calculated tax liability of the year in question.

Risky taxpayer

The tax authority classifies as 'risky' those taxpayers that are not under liquidation or forced cancellation, but are publicly listed due to a high tax deficit, tax debt, or employing an unreported workforce, or if the tax authority has had to apply business closure measures against the taxpayer repeatedly within a year, or the taxpayer's seat is located at a premise of seat service. The classification of a risky taxpayer lasts for one year, but will be cancelled in the subsequent quarter if the taxpayer settles its tax deficit or the tax debt and the related penalty and default.

Other rules

In line with the renewed profile of the tax authority as a service provider, start-up companies will be eligible for assistance as a part of a six-month mentoring period. The exact rules are currently in the development phase, but currently comprises lectures and personal consulting sessions offered to new businesses.

Other issues

Principal forms of doing business

- Branch.
- Partnership.
- Limited liability company.
- Private company limited by shares.
- Public company limited by shares.

Mergers and acquisitions (M&A) from a business and tax perspective

Mergers in Hungary are tax-free transformations if they qualify under the definition of preferential transformation. Preferential transformation means that a company, without going into liquidation, transfers all its assets and liabilities to another company in exchange for the issue to its shareholders of securities representing the capital of that other company and cash payment up to 10% of the total nominal value of the shares acquired in connection with the transformation, merger, division, or, where the shares have no nominal value, the percentage they represent in the subscribed capital.

In a preferential transformation, the predecessor company does not have to amend its tax base by the difference between the adjusted book value and the book value. The adjusted book value means the historical value of assets less any depreciation deducted from the tax base plus the readjusted amount of extraordinary depreciation. Furthermore, for shareholders, the income accounted in excess of the historical value of the shares they acquire in the preferential transformation is also not taxable for CIT purposes for as long as the shareholder holds its participation.

In any other case, if two companies merge, the difference between the market value and the book value of the assets and liabilities is taxable for the successor company. Furthermore, the predecessor company may decrease its tax base by the amount of the difference between the adjusted book value of its assets and their book value if the adjusted book value is the higher of the two. The company will increase its tax base if the book value is higher than the adjusted book value.

International Financial Reporting Standards (IFRS) adoption

Companies defined in Section 4 of Decision no. 1606/2002/EC (mainly companies listed on the stock exchange) have to prepare their consolidated annual reports according to IFRS. However, non-listed subsidiaries of EU-listed entities are exempt from the preparation of IFRS consolidated financial statements.

In Hungary, IFRS will be adopted in a multi-stage procedure. From 1 January 2018, the transition to stand-alone IFRS reports will be obligatory for credit institutions, financial enterprises, and listed companies. From 1 January 2018, the adoption of IFRS is also mandatory for cooperative credit institutions and other credit institutions taking part in the integration of cooperative credit institutions and smaller credit institutions. The companies applying IFRS for stand-alone purposes will have to base their tax liability calculations (e.g. CIT, LBT, and energy suppliers' income tax) on IFRS as well. Companies that prepare IFRS reports at the head office level and/or companies that are subject to mandatory audit in Hungary are also able to opt to use stand-alone IFRS books in Hungary.

Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)

Hungary and the United States signed an intergovernmental agreement (IGA) on 4 February 2014 in order to implement the US FATCA. The Hungarian IGA is based on the 'Model 1 A' Agreement, which means a reciprocal information exchange between the Hungarian tax authority and the US Internal Revenue Service (IRS). As part of the negotiations regarding the IGA, Hungary can include further entities and accounts into Annex II of the Agreement with exempted or deemed-compliant status compared to the originally issued Model Agreement. Changes to the local legislation for FATCA and IGA purposes have successfully been adopted by the Hungarian Parliament.

Hungary has reporting obligation by the end of September each year. The first information exchange between the Hungarian tax authority and the US IRS was in September 2015.

Common Reporting Standard (CRS) agreement within the OECD

The CRS, developed in response to the G20 request and approved by the OECD Council on 15 July 2014, calls on jurisdictions to obtain information from their financial institutions and automatically exchange that information with other jurisdictions on an annual basis. It sets out the financial account information to be exchanged, the financial institutions required to report, the different types of accounts and taxpayers covered, as well as common due diligence procedures to be followed by financial institutions.

Hungary has reporting obligation by the end of September each year. The first information exchange between the Hungarian tax authority and the US IRS took place in September 2017.

Hungarian trust

Under a Hungarian trust contract, the settlor entrusts the trustee to manage (in its own name but for the benefit for the beneficiary) the assets, rights, and receivables (trust asset) transformed thereto by the settlor. A trust contract cannot have a term longer than 50 years.

The trustee can be either a natural person or a legal entity, and its private fortune is handled separately from the trust asset/fortune. The trustee is liable for the tax administration (tax number, tax returns, etc.) and the bookkeeping of the trust. The Hungarian National Bank keeps an authentic registry of the Hungarian trustees.

The trust asset is subject to Hungarian CIT and LBT and is considered to be tax resident under domestic law (thus, may have access to treaty benefits).

The Hungarian trust is a good business opportunity for companies since it may be inserted into a structure tax neutrally.

Significant developments

Capital gains tax

The capital gains tax rate was raised from 20% to 22% on 1 January 2018.

Tax administration

On 1 January 2018, the Internal Revenue Directorate took over the responsibility as an appeal authority on tax residency from the Finance Ministry.

Multilateral Instrument

On 7 July 2017, the Icelandic Finance Minister signed the Multilateral Instrument Treaty as a part of the base erosion and profit shifting (BEPS) programme.

Thin capitalisation rules

As of 1 January 2019, the interest deduction limitation rules will also apply when lender has full and unlimited tax liability in Iceland.

Double tax treaties (DTTs)

A DTT between Iceland and Austria entered into force 1 March 2017.

Pension contributions

The minimum pension contribution by employers is 10% as of today but rises to 11.5% on 1 July 2018.

Taxes on corporate income

Resident corporations pay tax on their worldwide income less operating expenses. Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income.

Corporate income tax (CIT) for limited liability companies (LLCs) and limited partnership companies is assessed at a rate of 20%. CIT for other types of legal entities (e.g. partnerships) is assessed at a rate of 37.6%.

Non-resident corporations receiving payments for services or business operations carried out in Iceland, as well as corporations operating a permanent establishment (PE) in Iceland or receiving a profit from such establishments, are subject to CIT for their Icelandic income at the same rate as applies to resident corporations.

Corporate residence

In general, all corporations incorporated and registered in Iceland are considered to be tax residents in Iceland. The same applies to corporations that have their home address in Iceland according to their articles of association or if the management of the company is carried out in Iceland.

Foreign corporations are regarded as Icelandic tax residents if the effective management is carried out in Iceland.

The Internal Revenue Directorate can decide with a ruling whether a corporation's residence is in Iceland. The ruling can be appealed to a court of law.

Permanent establishment (PE)

The definition of a 'permanent establishment' is in order with the Organisation for Economic Co-operation and Development (OECD) definition of a PE in Article 5. The main difference is that a building site or construction or installation project constitutes a PE only if it lasts more than six months, not 12 months as in the OECD Model Treaty. Another difference is that if a foreign company owns servers or similar computer systems to support the business's primary field of business, that in itself does not constitute a PE if used in relation to data storage and gathering.

Other taxes

Value-added tax (VAT)

VAT is a consumption tax levied on all stages of domestic business transactions. VAT is levied on all goods and services, as well as on the imports of goods and services, unless specific exemptions apply.

VAT rates

The general VAT rate is 24%.

The following goods and services are subject to a reduced VAT rate of 11%:

- Rental of hotel and guest rooms and other accommodation.
- Transportation of passengers, such as for whale watching, horseback riding, and snowmobile tours.
- The services of travel agencies and tour operators for services used in Iceland.
- Admission fees to spas, saunas, sanatoriums, and health facilities.
- Subscription to radio and television.
- Newspapers, periodicals, and magazines.
- Books, both Icelandic and translated, musical notation as well as their audio recordings. Same applies to compact discs and other similar media as well as electronic media.
- Geothermal hot water, electricity, and fuel oils used for heating houses and swimming pools.
- Food and other consumables for people as detailed in an addendum to the VAT Act.
- Access to roads and other transport-related constructions.
- Compact discs, records, audio cassettes, and other equivalent mediums for music only and not videos. Same applies to electronically published music without video.
- Condoms, reusable cloth diapers, and diapers inserts.

- Admission fees to baths, saunas, and spa areas that are not subject to exemption due to sporting activities.
- Guiding services.

Certain services and goods are zero-rated, which means that there is, in fact, no VAT charge. Zero-rated VAT mainly applies to exported goods and services provided abroad.

VAT entities

Businesses engaged in the trade of taxable goods and services for business purposes must register and collect VAT.

Services exempt from VAT

The VAT Act details certain services that are exempt from the tax, such as healthcare services, social services, the operation of schools, various education services, cultural activities, athletic activities, public transportation, postal services, sale of real estate (not including the rental of hotel and guest accommodation), rental of car parking lot, insurance activities, services of financial banks (as well as securities trading), lotteries and betting pools, artistic activities, funeral services, and all services of ministers of the church.

Those selling taxable goods and services totalling less than 2 million Icelandic króna (ISK) per 12-month period are also exempt from collecting and remitting VAT.

Agent for non-resident parties

Non-residents who are engaged in taxable transactions in Iceland but are neither domiciled nor have permanent residence in Iceland must appoint a VAT agent with residence in Iceland to report on their behalf. Both parties are liable for the VAT payments (responsible for ensuring remittance of VAT). If a non-resident does not appoint a VAT agent, the purchaser of the services/goods is responsible for paying the VAT (reverse charge).

If the non-resident is only providing e-services, one can apply for an Icelandic ID number to report/pay the VAT oneself (i.e. without a VAT agent).

VAT accounting periods and due dates

VAT is generally filed and paid on a bimonthly basis. The due date for payment of VAT is one month and five days after the end of the settlement period. For example, the due date for the January and February payments is 5 April.

If the VAT is not paid on the due date, a 1% penalty charge is added for every day up to a total of 10%. Late penalty interests also apply as of one month after the due date.

A special fee for late filing, ISK 5,000, applies if the tax authorities have estimated the VAT due to non-filing.

VAT reimbursement

Foreign enterprises, which are neither residents of Iceland nor have a PE, may obtain reimbursement of VAT paid on goods and taxable services that have been purchased or imported for the commercial purposes of such enterprises in Iceland.

Such reimbursement can be effected to foreign enterprises that would be subject to registration in Iceland according to Article 5 and Article 6 of the VAT Act if the enterprises in question were engaged in such business in Iceland. This means that such enterprises as travel agencies, insurance companies, banks, and other financial institutions cannot obtain such reimbursement.

Another prerequisite is that the enterprise shall neither have sold goods nor taxable services in Iceland during the period to which the application refers.

Parties domiciled abroad can get partial VAT reimbursement on goods they have bought in Iceland if they take them abroad with them within three months from the date of purchase. They then must provide the goods, along with any necessary documents, to the appropriate reimbursement company or to the customs authorities on the date of departure, and the purchase price must amount to at least ISK 6,000.

Customs duties

The Directorate of Customs controls import, transit, and export and also collects duties, taxes, and various state revenue. The general rule is that import duties (customs, excise duties, VAT, and various other charges) are to be paid on imported goods unless otherwise stated in the law. For import of some products, other conditions, such as an import licence, may need to be submitted.

Iceland, Liechtenstein, Norway, and Switzerland are members of the European Free Trade Association (EFTA). The EFTA Convention established a free trade area among its member states. In addition, the EFTA states have jointly concluded free trade agreements with a number of countries in Central and Eastern Europe as well as in the Mediterranean region, Mexico, and Singapore. Also, the EFTA states entered into the Agreement on the European Economic Area (EEA) in 1992. The current contracting parties are, in addition to the three EFTA states, the European Community (EC) and the 25 EC member states. Iceland also has a bilateral agreement with its two neighbouring countries, Greenland and Faeroe Islands.

Excise tax

There is no excise tax in Iceland.

Property taxes

A municipal property tax is applied annually on the assessed value of real estate in Iceland.

Stamp taxes

Stamp duty is levied on documents regarding change of ownership of real estate and land and ships registered in Iceland. However, stamp duty is not applicable when the change of ownership is related to a merger or division of a company.

The stamp duty rate is 0.8% and 1.6%, depending on whether the rightful owner is an individual or a legal entity.

When issuing deeds and purchase agreements of real estate and land, the stamp duty is levied on the officially registered value of the real estate and land. The same applies to the deeds and purchase agreements of ships.

All other documents bear no stamp duty.

Turnover taxes

There was an agricultural charge of 1.2% of agricultural turnover, but it was abolished as of tax assessment 2017 (i.e. for turnover in 2016).

Payroll taxes

There are no payroll taxes applicable other than those that apply for social security contributions, pension contributions, and rehabilitation fund (*see below*).

Social security contributions

Employers are responsible for social security contribution. The general rate is 6.85%. An additional social security contribution for fishermen is 0.65%. The social security contribution for taxpayers who have submitted the A1 form is 0.425%.

Pension contributions

The minimum contribution by employers into their employees' pension fund is 10% of each employee's salary until 30 June 2018. The contribution increases to 11.5% on 1 July 2018. An employer's additional contribution into private pension funds is 2% against a maximum 4% contribution from the employee.

Rehabilitation fund

Employers must pay 0.1% of all salaries to VIRK, The Icelandic Rehabilitation Fund.

Taxes on natural resources

Excise duties on fuel

An excise duty for liquid fossil fuels is paid to the treasury. In this context, liquid fossil fuels are oils and petrol.

The duty is levied as ISK per litre, as follows:

Excise duty	ISK per litre for the year 2017	ISK per litre for the year 2018
General excise duty on petrol	26.80	27.35
Specific excise duty on petrol	43.25	44.10
Excise duty on oils	60.10	61.30

Tax on electricity/hot water

A special tax is collected from parties selling electricity and/or hot water at the last stage of trading (i.e. sales to users). Parties are exempted from the tax if the sale amount is less than ISK 500,000 per year.

Carbohydrate tax

Carbohydrate tax is paid on liquid fossil fuel (i.e. gas and diesel oil, petrol, aviation fuel, and petroleum gas). Corporations licensed for carbohydrate research, and/or processing, as well as anyone who directly or indirectly participates in the processing or distribution of carbohydrates, must pay a processing tax, which is independent of processing performance, and a carbohydrate tax on profits.

The tax is levied as ISK per litre or kg, as follows:

Carbohydrate tax	ISK per litre or kg for the year 2017	ISK per litre or kg for the year 2018
Gas and diesel oil	6.30/litre	9.45/litre
Petrol	5.50/litre	8.25/litre
Fuel oil	7.75/kg	11.65/kg
Petroleum gas	6.90/kg	10.35/kg

Bank taxes

Financial services permitted to operate as banks and savings banks are subject to 0.376% tax on total debt exceeding ISK 50 billion at year-end.

Financial Activities Tax (FAT)

A 5.5% tax is levied on all salary payments made by financial institutions, including insurance companies. The tax is collected monthly.

Additional FAT

An additional 6% is levied and collected on total salary payments in excess of ISK 1 billion. This tax is paid by the same entities that are subject to the general FAT.

Accommodation tax

Those who sell accommodation that is subject to VAT are liable to collect and return a tax of ISK 300 for each sold night. The tax increased from ISK 100 to ISK 300 on 1 September 2017.

National Broadcasting Fee

There is a National Broadcasting Fee of ISK 17,100 per year. The fee shall be paid by all taxable individuals from the age of 16 to 70 years old. Additionally, all domestic parties are required to pay the tax.

Branch income

A branch is treated as an extension of a trading activity of the overseas parent company incorporated in another jurisdiction and is not a separate legal entity.

Due to the fact that a branch acts in the name of the overseas parent company, a branch's income is taxable in accordance with the parent company (i.e. if the parent company is an LLC, the branch is subject to a CIT rate of 20%; otherwise, it is subject to tax at 37.6%).

Tax treaties may allow Icelandic CIT as a credit against foreign income tax imposed on the parent company.

There is no branch profits remittance tax on the repatriation of profits to the parent company.

Income determination

Inventory valuation

The valuation method of raw materials and finished goods is on a first in first out (FIFO) basis or via the average cost method. When computing the value of produced goods, both direct and indirect production cost must be taken into account. For tax purposes, inventories can be further written down at a rate of 5% of calculated value.

Last in first out (LIFO) is not permitted.

Capital gains

Capital gains are treated as taxable income in the year that transfer of ownership occurs and, as such, taxed as part of the general corporate income. Capital gains are generally not subject to withholding tax (WHT). There are rules that allow full deduction of net capital gains from the sale of shares, so, in general, corporations are not subject to taxation on capital gains from sale of shares.

Dividend income

Dividend income is treated as taxable income and taxed as a part of corporate income. There are extensive rules that allow full deduction of the dividend, so, in general, corporations are not subject to taxation on dividends. Dividends are subject to WHT (currently 22%), which is a temporary payment towards the final tax assessment.

Interest income

Interest income derived from bank deposits, mutual and investment funds, bonds, or other financial deeds; any kind of exchange rate profit; and any other income from monetary assets are subject to 22% tax.

Interest income of foreign parties is subject to 12% WHT in Iceland.

Royalty income

Royalties paid to residents are taxed at the standard CIT rate. Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

Profit from derivatives

Profits from derivatives are treated as profits/losses from sales and are subject to 22% tax. Losses from derivatives can be used against profits from derivatives within the calendar year.

Foreign income

Income earned abroad is generally taxed as a part of corporate income since a resident company is subject to CIT on its worldwide income.

Controlled foreign company (CFC) rules stipulate that profits of companies in low-tax jurisdictions must pay income tax of such a profit in direct proportion to shares, regardless of distribution. A low-tax jurisdiction is defined as a jurisdiction where the CIT rate is less than two-thirds of Iceland's CIT rate (i.e. 13.3%, being two-thirds of 20%). *See Controlled foreign companies (CFCs) in the Group taxation section for more information*.

Double taxation of foreign income is avoided either through tax treaties or domestic tax provisions.

Deductions

Deductible operating expenses are comprised of all the expenses and costs needed to provide, insure, and maintain income (e.g. interest expense, employee expense, travel expense, insurance expense).

Depreciation

Assets	Depreciation rate (%)
Ships, ship equipment, and personal vehicles	10 to 20*
Aircraft and accessories	10 to 20*
Heavy machinery, industrial machinery, and equipment	10 to 30*
Rigs, pipeline systems, and more for the use of research and production of hydrocarbons	10 to 30*
Office equipment	20 to 35
Machinery, equipment, and vehicles that are not covered in the above categories	20 to 35
Residential, commercial, and office accommodation	1 to 3
Factory buildings, garages, warehouses, etc.	3 to 6
Greenhouses, piers, and lots connected to these assets	6 to 8
Boreholes, powerlines, and temporary work camps	7.5 to 10
Purchased proprietary rights for ideas and trademarks, such as copyrights, publishing rights, information rights, patents, and logos	15 to 20
Purchased goodwill	10 to 20

* The depreciation base for these assets is their purchase value less earlier depreciations (book value).

The method used to calculate depreciation is the straight-line method.

Goodwill

Purchased goodwill can be written down at 10% to 20% per year.

Start-up expenses

Purchased fishing rights (quotas) cannot be depreciated.

Start-up costs for agricultural production rights can be depreciated without revaluation over five consecutive years. The following assets can be depreciated in full in the year they are initiated or paid with steady payments over five years:

- Start-up costs, such as enterprise registration and obtaining operation licences.
- Cost of research, developments, marketing, and obtaining patents and trademarks. If the use of individual assets does not fall into the same depreciation category, the depreciation base will be dependent on how much of it is used, so that if an asset is used for three-quarters or more for the same operation, the whole asset will have the same depreciation percentage.

Interest expenses

Interest expenses are deductible, provided that the loan was taken for business purposes. It shall be kept in mind that interest limitation rules apply between related parties if certain conditions are fulfilled. *See Thin capitalisation in the Group taxation section for more information.*

Bad debt

As a general rule, 5% of bad debt can be written off. Certain conditions must be met in order to write off a higher percentage of bad debts.

Charitable contributions

Charitable contributions at up to 0.75% of total income are deductible.

Pension expenses

Payments to obligatory pension funds for employees at a minimum of 10% of wages (or according to the minimum contribution in a collective agreement) are deductible.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Taxes levied on business profit are not considered to be deductible; consequently, CIT is not deductible. However, social security contributions and other labour taxes are deductible.

Net operating losses

Operating losses may be deducted from income from business and independent economic activity. Tax losses can be carried forward for ten years and utilised over ten years from the year that the loss was incurred.

No carryback of losses is allowed.

Payments to foreign affiliates

An Icelandic corporation can claim a deduction for royalties, management fees, and similar payments made to foreign affiliates, provided that such amounts are made on an arm's-length basis and reflect services received. Interest at normal commercial rates paid to foreign affiliates generally will be allowed as a deduction on the condition that the loan terms are comparable to those that would have been agreed upon by unrelated parties.

Group taxation

Companies may opt for consolidated taxation if a company owns at least a 90% share in another company. Consolidated taxation means, among other things, that losses of one company can be offset against profits of other companies. Consolidated taxation cannot be extended to non-resident companies or PEs of foreign companies.

Transfer pricing

When pricing or terms of business or financial arrangements between related parties are different from what might be expected to be in similar transactions between unrelated parties, tax authorities have the power to evaluate what the correct pricing should be and reassess taxes of the party in question. This applies to the general purchase and sale of goods and services, tangible and intangible assets, and any financial instruments. Tax authorities can reassess taxes for up to six years prior to the year in which the reassessment takes place.

Legal entities are considered related when they are part of a group, when they are under the direct and/or indirect majority ownership or management control of two or more legal entities within the group, when majority ownership of one legal entity over another is present in a direct or indirect manner, or when they are entities directly or indirectly majority owned or under the administrative control of individuals who have family ties (e.g. individuals in a marriage or registered partnership, siblings and persons related to each other in a direct line).

If a legal entity's operating revenues in one fiscal year, or total assets at the beginning or at the end of the fiscal year, exceeds ISK 1 billion, it is bound to documentation duties from the next fiscal year regarding transactions with related legal entities abroad. The legal entity in question must then record information about the nature and extent of transactions with the related legal entity and information on what the price is based on.

The legal entity is obligated to keep data regarding transactions with related legal entities for seven years. If the tax authorities request access to documentation, the legal entity has 45 days to respond.

In addition to specific rules regarding transfer pricing in domestic law, it should be noted that there are also certain provisions in domestic law that contain the so-called 'arm's-length principle', which states that when a deal or transaction between the parties significantly differs from the norm in such transactions, the tax base can be determined and reassessed according to what the tax authorities consider to be normal in such circumstances.

Country-by-country (CbC) reporting regime

If applicable, CbC reports have to be filed no less than 12 months after the end of the company's fiscal year.

Thin capitalisation

Thin capitalisation rules are included in the Income Tax Act. The rules limit interest deduction to 30% of earnings before interest, taxes, depreciation, and amortisation (EBITDA).

The rules do not apply if:

- interest payments to companies within arms' length are under ISK 100 million
- the lender is a resident of Iceland
- it is demonstrated that the equity ratio does not deviate more than 2% from the equity ratio of the group, or
- the taxpayer is a financial institution or insurance company or a company owned by such parties and conducts similar operations.

Controlled foreign companies (CFCs)

Any individual who either directly or indirectly owns a share in any kind of a company, fund, or organisation domiciled in a low-tax jurisdiction must pay income tax on the profit of such corporations in direct proportion to one's own share, regardless of distribution.

The same applies to taxpayers chairing companies, funds, organisations, or associations in a low-tax jurisdiction from which they receive direct or indirect benefits. In order for the above to apply, the foreign party must be domiciled in the low-tax jurisdiction, half the ownership of the foreign party must be directly or indirectly in the hands of Icelandic taxpayers, or they must have effective management and executive control within the income year.

CFC regulations do not apply if a fund or an organisation is protected by a DTT between Iceland and the low-tax country or if such entities are registered in another EEA member country where they have legitimate business operations and the countries have assigned a DTT between them.

Tax credits and incentives

Foreign tax credit

The Income Tax Act offers a foreign tax credit to mitigate the potential for double taxation. The credit applies only to taxes of a nature similar to the tax being reduced by the credit (i.e. taxes based on income). This credit is limited to the amount of tax attributable to foreign-source income.

Temporary reimbursements in respect of filmmaking in Iceland

On account of Act No. 43/1999 on Temporary Reimbursement in Respect of Filmmaking in Iceland, it is possible to have 25% of production expenses incurred in the production of films or television material in Iceland reimbursed. When more than 80% of the total production cost of a motion picture or television programme is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Production costs refer to all costs incurred in Iceland deductible from the revenues of enterprises pursuant to the provisions of the Income Tax Act. Payments pertaining to employees and contractors are only to be included in production costs if they are verifiably taxable in Iceland.

Application for reimbursement of production costs shall be submitted to a committee of reimbursements in respect of filmmaking. The application, with supporting documentation, shall be submitted before production commences in Iceland.

Act No. 43/1999 on Temporary Reimbursements in Respect of Filmmaking in Iceland expires at year-end 2021. All projects approved by that date will be reimbursed in accordance with the law.

Temporary reimbursements in respect of music recording in Iceland

On account of Act No. 110/2016 on Temporary Reimbursement of Recorded Music, it is possible to have 25% of cost incurred reimbursed when recording music in Iceland that has been released and made accessible to the general public. When more than 80% of the total recording cost is incurred in Iceland, the reimbursement shall be calculated from the total production cost incurred within the EEA. Reimbursable cost refers to all costs that may be used for calculating the refund amount, cf. Article 6 of Act No. 110/2016.

Application for reimbursement of production costs shall be submitted to the Ministry. The application, with supporting documentation, shall be submitted lo later than six months after the latest audio file for which a refund is applied for.

Act No. 110/2016 on Temporary Reimbursements of Recorded Music expires at year-end 2022. All applications received by the Ministry prior to that time shall be processed.

Support for innovation enterprises

Innovative companies are entitled to a special deduction from CIT amounting to 20% of expenses incurred on the projects, provided certain conditions are met.

The maximum amount on which the deduction is calculated within each company shall not exceed ISK 300 million for each operating year. In the case of purchased research and development (R&D) services, maximum expenses shall not exceed ISK 450 million.

Act. No. 152/2009 on support for innovation enterprises expires at year-end 2019. All support approved by that date will remain valid.

Act on incentives for initial investments in Iceland

Incentives are offered to companies that are investing in commercial operations in Iceland. The investment projects need to meet requirements, such as being beneficial for the Icelandic economy and society, in terms of job creation, rural development, exports, and tax revenues and knowledge.

Approved investment projects will receive benefits in return, including derogations from taxes and charges. In addition, authorisation to fix the rate of income tax, in line with the current rate of income tax, for ten years can be granted, as well as exemption from customs and excise duties on importation or domestic purchase of construction materials, machinery, and equipment for the building and operation of the investment project.

Act. No. 41/2015 on incentives for initial investments in Iceland expires at the end of June 2020. Incentives granted prior to that time shall remain in force for the period according to the agreement in question.

Withholding taxes

Dividends paid to a resident company are subject to 22% WHT. Dividends paid to a non-resident company are subject to 20% WHT. The final taxation of dividends paid to a company within the EEA is nil, as WHT will be reimbursed in the year following payment upon filing a tax return.

Interest paid to a resident company is subject to 22% WHT, and interest paid to a non-resident company is subject to 12% WHT.

Gross royalties paid to a non-resident are taxable at the standard 20% CIT rate and subject to withholding.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-resident corporations	20	12	20
Non-resident individuals	22	12	36.94 to 46.24

Notes

1. The lower rate applies to corporate shareholders with a minimum ownership of 10%.
2. The lower rate applies to corporate shareholders with a minimum ownership of 25%.
3. The lower rate applies to copyright royalties (except films, etc.) and royalties for computer software or patent, or for information concerning industrial, commercial, or scientific experience (except information provided in connection with a rental or franchise agreement).
4. The lower rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
5. The lower rate applies to the right to use computer software or patent concerning industrial, commercial, or scientific experience.
6. The lower rate applies to corporate shareholders with a minimum ownership of 10%, and which has been held for a period of at least 12 months preceding the date the dividends were declared.
7. The lower rate applies to Russian corporate shareholders with a minimum ownership of 25% of capital in the Icelandic company and the foreign capital invested exceeds 100,000 United States dollars (USD).
8. The higher rate applies to royalties for the use of trademarks, know-how in relation to a trademark, and films, etc.
9. The higher rate applies to royalties for the use of or the right to use any patent, trademark, design or model, plan, secret formula, or process.

Tax administration

Taxable period

The tax year is the calendar year. However, in certain circumstances and upon application, the Internal Revenue Directorate can allow a different fiscal year from the calendar year.

Tax returns

At the beginning of every year, the Internal Revenue Directorate determines the time limit for taxpayers to submit their tax returns and supporting documentation. The deadline for receipt of tax returns from corporations is generally 31 May each year. This deadline is extended upon application. Those who have their tax returns prepared by professional services can generally have the deadline extended until 10 September each year.

The final assessment must be completed no later than ten months after the end of the income year. Tax assessments for corporations will be available at the end of October.

Payment of tax

Advance tax payments are due on the first day of every month, except January and October. Corporations pay income tax in advance, which is in turn deducted from the final tax assessment in October each year. The advance tax is collected in the months of February to September and amounts to 8.5% of the income tax on each due date. In total, the advance tax payments amount to 68% of the income tax. Any deficit remaining when final tax is assessed must be paid in equal instalments by 1 November and 1 December.

Income tax payments on dividends and interest income are due every quarter. Due dates are 20 January, 20 April, 20 July, and 20 October, and the final deadline for payment is 15 days later.

Tax audit process

The Icelandic tax authorities select returns for examination using a variety of methods. Some returns are selected based on electronic selection; some are selected based on a formal supervisory plan. A tax audit can also be traced to information obtained by the tax authorities through efforts to identify participants of tax avoidance transactions.

The examination generally takes place by formal, written communication. The rules of the procedure are very strict, and the process can take from a few weeks to a year/ years.

Appeal rights involve two administrative levels and also two judiciary levels.

Statute of limitations

Tax authorities in Iceland have the right to reassess tax returns for CIT six years prior to the year of the assessment (i.e. the statutory period of limitation is six years). The statutory period only reaches a maximum of two years in time if tax returns have been filled out properly and all necessary information presented for tax authorities to establish a correct assessment. This means that in the year 2018, tax authorities can, in theory, reassess the company´s tax back to income year 2012.

However, the limitation has been prolonged to ten years in case of income and assets in low-tax jurisdictions.

Topics of focus for tax authorities

The topic of focus for tax authorities in Iceland is tax avoidance in general. It has been stated that they will increasingly focus on issues related to transfer pricing.

Other issues

Foreign currency financial statements/Accounting in foreign currencies

Companies can apply to the Registry of Annual Accounts for an authorisation to keep their books and prepare their annual accounts in a foreign currency. An application must be filed no later than two months before the beginning of the company's fiscal year. The authorisation is valid for five years, and the Registry of Annual Accounts is responsible for ensuring that the authorised companies continue to fulfil one or more of the following necessary conditions:

- The company's main business operations take place abroad or the company is a part of a foreign company group.
- The company owns foreign subsidiaries or shares in foreign companies, and its main business transactions are with those companies.
- The company's main place of business is Iceland, while a considerable number of their transactions are in foreign currencies.
- A considerable portion of the company's investments and related debts are in foreign currencies.
- The functional currency is registered at the Central Bank of Iceland or the company's commercial bank.

If the company deems that it no longer fulfils the conditions, it must notify the Registry of Annual Accounts. The Registry can postpone its decision of the authorisation's discontinuance for two fiscal years if the situation that is causing the fact that the company does not continue to fulfil the necessary conditions is deemed to be temporary.

The average exchange rate for the fiscal year must be used when converting income and expenses, depreciations included, into Icelandic króna. The exchange rate at the end of the fiscal year must be used when converting assets, debts, and capital. Exchange rate differences that may arise do not affect income on profit and loss accounts.

Rules of Foreign Exchange

In 2008, the Central Bank of Iceland issued rules on foreign exchange in order to restrict or temporarily prevent certain types of cross-border capital movements or foreign exchange transactions related thereto, which, according to the Central Bank of Iceland, can cause serious and considerable instabilities in exchange rates and financial matters. These rules were later added to Act No. 87/1992 on Foreign Exchange.

The Act on Foreign Exchange defines capital movements as:

- The issue, sale, or purchase of shares, debt instruments, drafts, unit shares in mutual funds, and other long-term and short-term securities.
- Deposits in and withdrawals from accounts with depository institutions.
- Lending, borrowing, and the issue of securities not related to international transactions with goods and services.
- The import and export of share certificates and domestic and foreign currencies.
- Forward contracts, options, currency and interest-rate swaps, and other related foreign exchange transactions in which the Icelandic króna is one of the denominated currencies.
- Presents, grants, or other transactions equivalent to the ones detailed above.

With new rules, which entered into effect on 14 March 2017, the restrictions on foreign exchange transactions and cross-border movement of domestic and foreign currency have largely been lifted. Restrictions on the following will remain in place, however: (i) derivatives trading for purposes other than hedging, (ii) foreign exchange transactions carried out between residents and non-residents without the intermediation of a financial undertaking, and (iii) in certain instances, foreign-denominated lending by residents to non-residents.

Cross-border mergers

Rules regarding taxation in relation to cross-border divisions and cross-border mergers between Icelandic LLCs and LLCs from EEA and EFTA countries are now in the Icelandic Tax Act. Tax will be levied on uncapitalised profit, which can be postponed for five years.

Base Erosion and Profit Shifting (BEPS)

The Icelandic government participated in full in formulating and approving the G20/OECD BEPS Action Plan.

The government has implemented Action 4 on interest limitation, Action 7 on definition of permanent establishment, and Action 13 on transfer pricing documentation and CbC reporting. Additionally, Iceland participated in the creation of the multilateral instrument (MLI) as represented in Action 15, and the MLI was been signed by the Icelandic government on 7 June 2017.

Although Iceland is not a European Union (EU) member state, it is a member of the European Economic Area, so its legislation must comply with EEA rules and avoid infringement of the four freedom principles as provided in the EEA Agreement.

Common Reporting Standard (CRS)

Icelandic authorities have implemented the CRS in its domestic legislation. The Standard is in accordance to The Standard for Automatic Exchange of Financial Account Information as developed by the G20/OECD in the year 2014.

Significant developments

Expanded scope of ‘dependent agent’

The Finance Act, 2018 has expanded the scope of ‘dependent agent’. In line with Base Erosion and Profit Shifting (BEPS) Action Plans 7 and 1, the term ‘dependent agent’ will now include persons who play a principal role in conclusion of contracts leading to the conclusion of contracts.

Concept of ‘significant economic presence’ introduced

The Finance Act, 2018 has introduced the concept of ‘significant economic presence’ in domestic tax law. By virtue of this, the income of non-residents is deemed to accrue or arise in India if they have a significant economic presence in India.

The term ‘significant economic presence’ has been defined to include: (i) transactions carried out by a non-resident in India, including provision of download of data or software in India, if the aggregate payment arising from such transactions exceeds such amount as may be prescribed later, and (ii) systematic and continuous soliciting of business activities or engaging in interaction with such number of users as may be prescribed in India through digital means.

Further, such transactions or activities shall constitute significant economic presence in India whether or not (i) the agreement is entered into in India, (ii) the non-resident has a residence or place of business in India, or (iii) services are rendered in India.

Though the above amendments are applicable from tax year 2018/19, the same would be in force post amendments made to Indian tax treaties on implementation of the Multilateral Instrument (MLI).

Income computation and disclosure standards (ICDS)

For the purposes of computation of income chargeable to income tax under the head ‘profits and gains of business or profession’ or ‘income from other sources’, ICDS were introduced by the government of India. There has been debate on applicability of these standards. The government of India, through the Finance Act, 2018, in order to bring certainty in the light of debate, has amended the provisions of the tax laws and made certain retrospective amendments.

Taxes on corporate income

A resident company is taxed on its worldwide income. A non-resident company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India.

The corporate income tax (CIT) rate applicable to an Indian company and a foreign company for the tax year 2018/19 is as follows:

	Rate of CIT (%)					
	Turnover not greater than INR 2.5 billion in tax year 2016/17		Other domestic companies		Foreign companies	
Income *	**Basic**	**Effective****	**Basic**	**Effective****	**Basic**	**Effective ****
Less than 10 million Indian rupees (INR)	25	26.00	30	31.20	40	41.60
More than INR 10 million but less than INR 100 million	25	27.82	30	33.38	40	42.43
More than INR 100 million	25	29.12	30	34.94	40	43.68

* Surcharge is payable only where total taxable income exceeds INR 10 million.

** Effective tax rates include surcharge and health and education cess.

Minimum alternative tax (MAT)

Companies are liable to pay MAT on their adjusted book profits (other than income from life insurance business) where the tax liability under the normal provisions (excluding surcharge and health and education cess) of the Income Tax Act, 1961 ('the Act') for the tax year is not more than 18.5% (excluding surcharge and health and education cess) of such book profits. MAT credit is the amount paid over and above the normal tax liability, which can be carried forward and can be utilised for 15 years. However, MAT credit to the extent of difference between the foreign tax credits allowed against MAT over such credit allowable against the tax under the other provisions of the Act shall not be eligible to be carried forward.

Further, due to implementation of Indian Accounting Standards (Ind AS) by the government, which are converged with the International Financial Reporting Standards (IFRS), the government amended the MAT provisions of the Act, so as to provide the framework for the computation of book profit for the purpose of levying MAT in the case of companies required to comply with Ind AS in the year of adoption and thereafter. This framework was specified on the basis of the recommendations of the MAT Ind AS Committee constituted for this purpose.

MAT provisions are not applicable to foreign companies that do not have a permanent establishment (PE) in India. However, the Finance Act, 2018 has provided that MAT provisions shall not apply to foreign companies where their total income is solely derived from shipping business, exploration of mineral oils, business of aircraft, or civil construction in turnkey projects, and income thereon is offered to tax as per specific provisions provided under the Act.

Capital gains from transfer of securities, interest, royalties, and fees for technical services accruing or arising to a foreign company (which has a PE in India) have been excluded from chargeability of MAT if tax payable on such income is less than 18.5% (exclusive of surcharge, education cess, etc.). Further, expenditure, if any, debited to the profit and loss account corresponding to such income shall be added back to the book profit for the purpose of computation of MAT.

Income *	Rate of MAT (%)			
	Indian company		Foreign company (other than exempted)	
	Basic **	Including surcharge and health and education cess (effective tax rate)	Basic	Including surcharge and health and education cess (effective tax rate)
Less than INR 10 million	18.5	19.240	18.5	19.240
More than INR 10 million but less than INR 100 million	18.5	20.586	18.5	19.240
More than INR 100 million	18.5	21.548	18.5	20.202

* Surcharge is payable only where total taxable income exceeds INR 10 million.

** Basic rate of MAT is 9% in case of a company located in an International Financial Services Centre and deriving income solely in convertible foreign exchange.

Sick companies (i.e. companies whose losses have wiped out their net worth and that are doubtful of being revived and nursed back to profitability) are not subject to MAT.

A Special Economic Zone (SEZ) developer and a unit in an SEZ are also liable to pay MAT.

Tonnage tax scheme

The tonnage tax scheme, a presumptive tax provision, can be chosen by a non-resident company that has a place of effective management (PoEM) in India, owns at least one qualifying ship, and whose main objective is to carry on the business of operating 'qualifying ships'. The tonnage tax scheme is in place of CIT and is levied on the basis of tonnage of vessels owned, operated, or chartered by it instead of on net income generated by commercial operations. Under a presumptive tax system, taxpayers can opt to be taxed at a pre-designated tax rate on its revenues.

Under this scheme, deemed income shall be assessed at 7.5% of the amount paid or payable (whether in or out of India) for carriage of passengers, livestock, mail, or goods shipped from any port in India, and the amount received or deemed to be received in India on account of carriage of passengers, livestock, mail, or goods shipped to any port outside India shall be treated as profits and gains of business.

Treaty rates will apply to non-resident shipping companies if they are lower than the rates under the tonnage tax scheme.

A government company, or a public company formed and registered in India with the main object of operating ships, is eligible for a deduction not exceeding the lower of 50% of its profits and the sum transferred to a special reserve to be utilised in accordance with the provisions of the Act.

Local income taxes

There are no local, state, or provincial taxes on income in India at present.

Corporate residence

A company is treated as a resident of India in any previous year if:

- it is an Indian company, or
- its PoEM in that year is in India (*see below*).

A partnership firm, a limited liability partnership (LLP), and other non-individual entities are treated as resident in India if any portion of their control and management is in India. They are non-resident if their control and management is situated wholly outside India.

Place of effective management (PoEM)

Presently, a foreign company is considered resident in India if the control and management of its affairs is situated wholly in India.

To bring to tax those companies that are incorporated outside India but controlled from India, the condition of PoEM has been introduced. PoEM is an internationally recognised concept accepted by the Organisation for Economic Co-operation and Development (OECD).

A foreign company will be regarded as a resident in India if its PoEM is in India in that year. Since residency is determined for each year, PoEM is also required to be determined on a year-to-year basis. The concept of PoEM is one of substance over form. The term PoEM has been explained to mean a place where key management and commercial decisions that are necessary for the conduct of the business of an entity as a whole are, in substance, made. To provide clarity and address certain concerns with regard to implementation of determination of residency of a foreign company on the basis of PoEM, the Central Board of Direct Taxes (CBDT) has issued a circular laying down guidelines. The guidelines laid down the concept of determination of PoEM based on bifurcation of companies engaged in active business outside India and other companies. The circulars clarify that the PoEM provisions shall not apply to a foreign company having turnover or gross receipts of INR 500 million or less in a tax year.

Permanent establishment (PE)

A PE is defined in India as a fixed place of business through which the business of an enterprise is wholly or partly carried on.

Business connection

The Finance Act, 2018 has modified the scope of ‘business connection’ to align with the modified PE Rule as per the MLI.

‘Business connection’ includes business activities carried on by a non-resident through dependent agents. The scope of business connection under the Act is similar to the provisions relating to Dependent Agent Permanent Establishment (DAPE) in India’s Double Taxation Avoidance Agreements (DTAAs). The amendment provides that business connection shall also include any business activities carried through a person who, acting on behalf of the non-resident, habitually concludes contracts or habitually plays the principal role leading to conclusion of contracts by the non-resident. It further states that the contracts should be:

- in the name of the non-resident

- for the transfer of the ownership of, or for the granting of the right to use, property owned by that non-resident or that the non-resident has the right to use, or
- for the provision of services by that non-resident.

Further, as per the provisions of the Act, 'significant economic presence' would also constitute a business connection in India.

'Significant economic presence' means:

- any transaction in respect of any goods, services, or property carried out by a non-resident in India, including provision of download of data or software in India if the aggregate of payments arising from such transaction or transactions during the previous year exceeds the amount as may be prescribed, or
- systematic and continuous soliciting of its business activities or engaging in interaction with such number of users as may be prescribed in India through digital means.

However, only so much of income as is attributable to such transactions or activities shall be deemed to accrue or arise in India. It is also proposed that the transactions or activities shall constitute significant economic presence in India whether or not the non-resident has a residence or place of business in India or renders services in India.

Other taxes

Goods and services tax (GST)

The government of India took a landmark step and implemented the GST with effect from 1 July 2017. GST is an indirect tax, which is a transaction-based taxation regime.

For smooth GST implementation, the government has formed a GST Council. The Council consists of the State Finance Ministers representing their states. The GST Council provides recommendations to the government on various aspects of GST law, such as rate revisions and amendments in GST rules, etc.

Prior to GST, there were multiple indirect taxes leviable on various transactions at each stage separately by the Union Government and the states at varying rates. Such taxes included excise duty, service tax, value added tax (VAT)/central sales tax (CST), entertainment tax, luxury tax, lottery taxes, state cesses and surcharges, etc. All such taxes (except customs duty) have been subsumed under GST, and there is one single tax applicable on supply of goods and services. However, there are a few products that continue to be outside the ambit of GST, like petrol, diesel, aviation turbine fuel (ATF), natural gas, and crude oil.

GST regime

GST is a comprehensive 'consumption tax' levied on the supply of all goods and services. Indian GST is a dual model:

- Central GST (CGST), levied by the Central Government.
- State GST (SGST)/Union Territory GST (UTGST), levied by the State Government/ Union Territories.

In case of intra-state supply of goods and services, CGST+SGST/UTGST would become applicable, and in case of inter-state supply of goods and services, Integrated

GST (IGST) would become applicable. IGST is a sum of CGST and SGST/UTGST. The rate of GST varies from 5% to 28% depending upon the category of goods and services, the general rate of tax being 18%. Additionally, some categories of goods/services, like vehicles, aerated beverages, etc., notified by the government are subject to Compensation Cess under GST.

The threshold limit for the purpose of obtaining GST registration is INR 2 million aggregate turnover in a tax year (INR 1 million for some special category states, like the North Eastern states). For the purpose of the threshold, aggregate turnover shall be computed on an all India basis. For some specific categories of supplies and suppliers, the registration requirement is mandatory.

Similar to previous VAT laws, there is a concept of composition scheme under GST for small traders. Small traders having turnover of INR 10 million have an option to avail a composition scheme. Under the said scheme, GST at a lower rate (1% of the taxable turnover for manufacturers/traders and 5% in case of restaurants) would apply. The concept of composition scheme is not applicable for services, except restaurant services.

Import of goods and services

The import of goods under the GST regime will be subject to IGST and Compensation Cess (if applicable), along with Basic Custom Duty (BCD) and Social Welfare Surcharge (at 10% levied on the BCD). BCD and Social Welfare Surcharge paid at the time of imports are not available as credit under GST; consequently, they will always be a cost to the importer.

Similar to erstwhile service tax laws, on import of service, service recipient would be liable to pay IGST under reverse charge. Also, there are specified categories of goods and services notified by the government on which GST needs to be paid by the recipient under reverse charge.

Zero-rated supplies/Export of goods and services

Export of goods and services are zero rated under GST. Exporters can claim refund of input tax credit of inputs/input services used in export of goods/services, subject to fulfilment of prescribed conditions. Per GST laws, exporters will be provided provisional refund within seven days from the date of acknowledgement.

For claiming the zero rate on exports, there is a requirement to file a bond/Letter of Undertaking (LUT) to the jurisdictional tax authorities. Alternatively, the exporter can pay tax on output and claim refund of the same.

Also, the supplies to an SEZ for authorised operations have been made zero rated under GST. Unlike the erstwhile indirect tax regime, which involved a lot of paperwork for claiming export refund claims, a simplified online process for claiming refund of exports has been specified under GST. However, presently along with online refund application, documents need to be filed manually to claim refund claim.

To facilitate trade for small exporters, the concept of 'merchant exporter' has been introduced under GST. Accordingly, the merchant exporters will now have to pay nominal GST of 0.1% for procuring goods from domestic suppliers for export, subject to conditions specified in the notification.

Input tax credit

Per input tax credit provisions stipulated under GST law, a registered taxable person is eligible to claim input credit of such goods and services that are used or intended to be used in the course or furtherance of business. However, there is a specified list of goods and services mentioned below where credit will not be available under GST:

- Personal use of goods and services procured.
- Goods and services being used for effecting exempt supplies.
- Supply of the following goods and services:
  - Motor vehicles (credit available in certain cases where used for transportation business).
  - Food and beverages, outdoor catering, beauty treatment, health services, cosmetic and plastic surgery, except where such inward supply of goods or services of a particular category is used by a registered taxable person for making an outward taxable supply of the same category of goods or services.
  - Membership of a club, health, and fitness centre.
  - Rent-a-cab, life insurance, health insurance, except where the government notifies the services that are obligatory for an employer to provide to its employees under any law for the time being in force.
  - Travel benefits extended to employees on vacation, such as leave or home travel concession.
  - Works contract services when supplied for construction of immovable property, other than plant and machinery, except where it is an input service for further supply of works contract service.
  - Goods or services received by a taxable person for construction of an immovable property on one's own account, other than plant and machinery, even when used in the course or furtherance of business to the extend capitalised.
  - Goods lost, stolen, destroyed, written off, or disposed of by way of gift or free samples.

Under GST, taxpayers are allowed to take credit of taxes paid on inputs (input tax credit) and utilise the same for payment of output tax liability. However, no input tax credit on account of CGST can be utilised towards payment of SGST/UTGST and vice versa. The credit of IGST is permitted to be utilised for payment of IGST, CGST, and SGST/UTGST in that order. Also, it is pertinent to note that the credit pool is state-specific (i.e. IGST, CGST, and SGST of one state cannot be used to offset output of IGST, CGST, and SGST liability of another state).

Compliances

There are three monthly returns for a normal taxpayer under GST *viz.* GSTR 1 for output (to be filed by the tenth day of the succeeding month), GSTR 2 for input tax credit (by the 15th day of the succeeding month), and GSTR 3 a monthly tax return (by the 20th day of the succeeding month), and one annual return (by 31 December of the succeeding tax year). The government has also issued a requirement to file monthly GSTR 3B (to be filed by the 20th day of the succeeding month), and such monthly return needs to be filed till December 2018.

Further, filing of GSTR 2 and 3 continues to be suspended. Recently, in a GST Council meeting, a new return design has been proposed. The highlights of the new design structure has been mentioned in the ensuing paragraphs.

Latest update

Recently, in the 27th GST Council meeting, the GST Council has approved the revised design of GST returns. The GST Council has also decided to make GSTN a 100% government-owned company by buying out the shares. The major decisions taken by the GST Council are mentioned below:

- All taxpayers shall file one simplified monthly return with due dates being staggered based on the taxpayer's turnover.
- Composition dealers and dealers having nil transaction will have facility to file returns on a quarterly basis.
- On the matching principle of GST, the supplier will continue to be required to upload the invoices in the system. For all business-to-business (B2B) supplies, the Harmonised System of Nomenclature (HSN) at the four-digit level will need to be used. The invoices can be uploaded any time. The system will automatically calculate tax liability, based on the details of invoices.
- The input tax credit will also be calculated automatically by the system based on invoices uploaded by suppliers, and the buyer will not be required to upload any invoices for claiming credits.
- To incentivise digital payment, 2% concession in the GST rate on business-to-consumer (B2C) supplies is proposed if payment is made through cheque or digital mode, subject to a ceiling of INR 100 per transaction.

Customs duty

Customs duty is levied by the Central Government on goods imported into, and exported from, India. The rate of customs duty applicable to a product imported or exported depends upon its classification under the Customs Tariff Act, 1975. With regard to exports from India, customs duty is levied only on a very limited list of goods.

The Customs Tariff is aligned with the internationally recognised HSN provided by the World Customs Organisation (WCO).

Customs duty is levied on the transaction value of the imported or exported goods. According to section 14 of the Customs Act, 1962 (CA), the concept of transaction value is the sole basis for valuation for the purpose of import and export of goods. While the general principles adopted for valuation of goods in India are in conformity with the World Trade Organisation (WTO) agreement on customs valuation, the Central Government has framed independent Customs Valuation Rules that apply to the export and import of goods.

The customs duty applicable to any product is composed of a number of components, which are as follows:

- The import of goods under the GST regime will be subject to IGST and Compensation Cess (if applicable)
- BCD is the basic component of customs duty levied at the effective rate under the First Schedule to the Customs Tariff Act (CTA) and applied to the landed value of the goods (i.e. the cost, insurance, and freight [CIF] value of the goods). The peak rate of BCD is 10%.
- BCD and Social Welfare Surcharge (at 10% levied on the BCD). BCD and Social Welfare Surcharge paid at the time of imports are not available as credit under GST; consequently, they will always be a cost to the importer.

The duty incidence arising on account of the IGST may be set off or refunded, subject to prescribed conditions. Where goods are imported, the Indian supplier may take credit of the IGST paid at the time of import for offset against the output IGST, CGST, and SGST liability. Also, the Central Government provides exemption from payment of BCD and IGST on import of certain specified goods, subject to fulfilment of prescribed conditions. For example, goods imported for petroleum operations are exempt from BCD.

Recently, during April 2018, the Central Board of Indirect Taxes and Customs (CBIC) notified the Pre-Consultation Regulations under customs law. Under the said regulations, before issuance of notice, importer will be informed in writing along with grounds for the intention of issuing the notice. The importer, within 15 days, is expected to respond in writing, including the option to be heard in person. In absence of response within the time period specified, the officer will proceed with issuance of notice.

E-way bills

The e-way bill is an electronic bill that will be required for the movement of goods in case the value of the consignment is above INR 50,000. The movement of goods may be (i) in relation to supply, (ii) for reasons other than supply, or (iii) due to inward supply from unregistered persons.

The bill can be generated from the GSTN portal, and every GST-registered taxpayer is required to comply with the requirement to issue an e-way bill.

Recently, with effect from 1 April 2018, the Central Government has notified the requirement to generate an e-way bill for inter-state goods movement. For intra-state goods movement, the government has provided that the e-way bill system will be introduced with effect from a date to be announced in a phased manner, but not later than 1 June 2018.

However, majority states like Maharashtra, Assam, Madhya Pradesh, and Himachal Pradesh, etc. have already started issuing notifications for issuance of an e-way bill for intra-state goods movement.

Advance rulings for customs and GST

To enable foreign investors to ascertain their indirect tax liabilities arising from proposed business ventures in India, the Central Government has constituted the Authority for Advance Rulings (AAR) as a high-level, quasi-judicial body. The functions of the AAR consist of giving advance rulings on a specific set of facts relating to specified matters under customs and GST.

Advance rulings may be sought by any resident/non-resident investor entering into a joint venture in India in collaboration with another non-resident or resident of India, or by a resident setting up a joint venture in India in collaboration with a non-resident. Through the Finance Act, 2005, this facility has also been made available to existing joint ventures in India. The Central Government is also empowered to include any other class or category of persons as eligible for the benefit of an advance ruling. Under the customs law, the Central Government has allowed a ‘resident public limited company’ to be eligible for an advance ruling. Under the erstwhile excise and service tax regime, advance rulings could be given only on a proposed transaction, whereas under GST, advance rulings can be obtained on a proposed transaction as well as a transaction being undertaken by the appellant.

In terms of GST provisions, the following matters/questions specified can be sought before the AAR:

- Classification of any goods or services, or both.
- Applicability of a notification issued under the provisions of the CGST Act.
- Determination of time and value of supply of goods or services, or both.
- Admissibility of input tax credit of tax paid or deemed to have been paid.
- Determination of the liability to pay tax on any goods or services, or both.
- Whether applicant is required to be registered.
- Whether any particular thing done by the applicant with respect to any goods or services, or both, amounts to or results in a supply of goods or services, or both, within the meaning of that term.

The comprehensive provision for advance rulings is provided under GST to ensure that disputes are minimal. Timelines are also given within which the ruling is to be given by the concerned authority. The aim is to provide certainty to the taxpayer with respect to one's obligations under the GST Act and an expeditious ruling, so that the relationship between the taxpayer and administration is smooth and transparent and avoids unnecessary litigation.

Property taxes

Property tax is levied by the governing authority of the jurisdiction in which the property is located. The rate of tax levied varies from city to city in India, and is generally related to the prevailing market prices for property in each locality.

Stamp duties

Stamp duty is a government tax that is levied on all legal property transactions. Stamp duty is a tax that is paid as evidence for any purchase or sale of a property between two or more parties. Stamp papers, which are bought either in the name of the buyer or seller, are valid for six months, provided the stamp duty is paid without any delay. No document that has not been duly stamped can be introduced as evidence in any court proceedings. Stamp duty is charged at both central and state levels. State level stamp duties vary from state to state, and on the document type. Stamp duty should be paid in full without any delay, failing which, a penalty is levied. Stamp duty has to be paid prior to execution (signature by an individual's party) of a given document, the next day, or on the day of document execution. Stamp duty is paid by a buyer in most cases. However, both the seller and the buyer have to bear the burden of stamp duty for property exchange cases. Stamp duty rates differ in various states across the country, as stamp duty in India is a state subject. However, the Central Government fixes the stamp duty rates of specific instruments.

Dividend distribution tax (DDT)

Indian companies distributing or declaring dividends are liable to pay DDT at 15% (*plus* surcharge [12%] and health and education cess [4%]). This rate is required to be grossed up; consequently, the effective rate of DDT is 20.56%. This tax is payable on declaration, distribution, or payment, whichever is earlier, and it is in addition to the CIT payable on business profits.

Further, the Finance Act, 2018 has introduced the levy of DDT on companies (not being a company in which the public are substantially interested) for making payment of:

- any sum by way of advance or loan to a shareholder who is the beneficial owner of shares holding not less than 10% of the voting power
- any sum by way of advance or loan to any concern in which such shareholder is a member or a partner and in which one has a substantial interest, or
- any sum by any such company on behalf, or for the individual benefit, of any such shareholder.

In those cases, the advance or loan or the sum of money will be treated as deemed dividend and on which 30% DDT (without gross up) shall be payable. The effective tax rate, including surcharge at 12% and health and education cess at 4%, is 34.944%.

Dividend income on which DDT is paid by the Indian company is exempt from tax in the hands of the recipient. However, non-corporate resident taxpayers earning more than INR 1 million of dividend are to pay tax at 10% (*plus* applicable surcharge and education cess) on the dividend income earned over and above INR 1 million in addition to the DDT paid by the company. However, the 'dividend income' in this paragraph does not include the 'deemed dividend income' as mentioned in the preceding paragraph.

A holding company does not have to pay DDT on dividends paid to its shareholders to the extent that it has received dividends from its Indian or foreign subsidiary company on which DDT has been paid by the respective subsidiary, subject to fulfilment of certain conditions.

Further, no tax will be chargeable/payable by a company located in an International Financial Service Centre, deriving income solely in convertible foreign exchange on profits distributed from the total profits, for any tax year on any amount declared, distributed, or paid by such company, by way of dividends (whether interim or otherwise) on or after 1 April 2017 out of its current income, either in the hands of the company or person receiving such dividend.

Securities transaction tax (STT)

STT is applicable to transactions involving the purchase/sale of equity shares, derivatives, units of equity-oriented funds through a recognised stock exchange, or the purchase/sale of a unit of an equity-oriented fund to any mutual fund. The STT leviable in respect of such transactions varies for each kind of instrument, whether delivery based or non-delivery based. Rate of STT varies from 0.001% to 0.125%, depending upon the nature of securities. However, securities transacted by any person on a recognised stock exchange located in an International Financial Services Centre where the consideration for such transaction is paid or payable in foreign currency are not subject to STT.

Payroll taxes and social security payments

Contributions representing 8.33% of the employees' pay needs to be remitted by the employer to the Employees' Pension Fund in respect of all Indian nationals working in an establishment covered under the Employees' Provident Fund and Miscellaneous Provisions Act, 1952, within 15 days of the close of every month. A 'foreign worker' holding a passport of a country with which India has signed a social security agreement is required to contribute to the social security system 12% of one's salary. A similar

12% of salary is contributed by resident employees' for the Employees' Provident Fund and Employees' Pension Fund. However, foreign workers can detach themselves from the scheme under a special provision on obtaining a 'detachment/coverage certificate' issued by an appropriate social security institution indicating the period of employment in India being less than the maximum period of detachment agreed in the agreement.

Branch income

Branches of foreign companies are taxed on income that is received in India, or which accrues or arises in India, at the rates applicable to foreign companies. There is no withholding tax (WHT) on remittance of profits by the branch to its head office.

Income determination

Income computation and disclosure standards (ICDS)

The CBDT has notified ten ICDS to be followed by all taxpayers that follow the mercantile system of accounting for the purpose of computation of income chargeable to income tax under the head 'profits and gains of business or profession' or 'income from other sources' and not for the purpose of maintenance of books of accounts. In case of conflict between the provisions of the Indian Income Tax Act and the ICDS, the provisions of the Act shall prevail to that extent. These standards have been implemented from tax year 2016/17.

The list of certain important points on implementation of ICDS is given below:

- Inventory has to be valued at lower of cost or net realisable value. Further, cost of inventory is to include taxes paid, irrespective of recoverable or not.
- Interest on compensation or enhanced compensation is to be offered to tax in the year of receipt.
- Any subsidy or grant received from the government, which is not adjusted to cost of asset, shall be offered to tax in year of receipt of such subsidy/grant even if the conditions attached to it are not yet fulfilled.
- Marked-to-market loss computed in accordance with ICDS shall only be allowed.
- Gain/loss on account of foreign currency fluctuation for monetary and non-monetary items shall be computed and allowed as per provisions of ICDS.
- Profits from construction contracts and/or service contracts shall be calculated based on the percentage of completion method. For service contracts with less than a 90-days period, the project completion method can be used. Further, for service contracts with indeterminate number of acts over a specific period of time, the straight-line method can be used. Retention money shall be included while computing contract revenue.
- It may be noted that ICDS does not recognise the concept of materiality and the concept of prudence.

Inventory valuation

Inventories are generally valued at cost or net realisable value, whichever is lower. Generally, there is conformity between book and tax reporting. The first in first out (FIFO) and weighted average cost methods are acceptable, provided that they are consistently applied.

Capital gains

Capital gains refer to the gains made on the transfer of a capital asset. Transfer includes sale, exchange, relinquishment, or extinguishment of rights in an asset. Capital assets are either short-term capital assets or long-term capital assets. Long-term capital gains are eligible for a concessional rate of tax and indexation of cost of purchase and cost of improvement (*discussed below*).

Short-term capital assets are capital assets held for a period of not more than 36 months. In case of listed shares, listed securities, or units of specified mutual funds or zero-coupon bonds, the short-term holding period is not more than 12 months, and in case of unlisted shares is not more than 24 months. Capital assets that do not qualify as short-term capital assets are considered as long-term capital assets.

Normally, long-term capital gains are determined after increasing the cost by a prescribed multiplier that varies with the period of holding, to adjust for inflation. In case of non-residents, capital gains on transfer of shares or debentures in Indian companies are computed in the foreign currency in which the shares or debentures were acquired, and the capital gains are then reconverted into Indian currency to compute the tax liability thereon.

Capital gains are taxed as follows:

- Long-term capital gains on the transfer of equity shares in a company acquired on or after 1 October 2004 shall be exempted only if STT was paid at the time of acquisition. This exemption stands withdrawn from 1 April 2018. Post such withdrawal, the long-term capital gains exceeding INR 100,000 will be taxed at the rate of 10% (plus surcharge and health and education cess). The said amendment will be applicable to units of equity oriented funds as well. The benefit of adjustment of cost of inflation index will not be available. In addition, the benefit of computation of long-term capital gains in foreign currency in the case of a non-resident will not be allowed.
- Other long-term capital gains are subject to taxation at 20% (plus the surcharge and health and education cess). However, long-term capital gains arising from the transfer of listed securities, units, or zero-coupon bonds on which STT is not paid are taxed at 10% (without adjusting the cost for inflation) or at 20% (after adjusting the cost for inflation), whichever is more beneficial to the taxpayer. These rates exclude surcharge and health and education cess.
- Long-term capital gains arising to a non-resident (not being a company) or a foreign company from transfer of unlisted securities, shares, debentures, etc. are taxable at 10% (plus surcharge and health and education cess) without any indexation benefit.
- Short-term capital gains on the transfer of listed shares in a company or units of an equity-oriented fund that are subject to STT are taxed at 15% (plus surcharge and health and education cess).
- Other short-term capital gains are subject to taxation at the normal rates.
- In the case of certain overseas financial organisations (e.g. off-shore funds and foreign institutional investors), long-term capital gains arising on the transfer of units purchased in foreign currency are taxable at 10% (plus surcharge and health and education cess) on the gross amount.
- Transfer of rupee-denominated bonds (issued by an Indian company outside India) held by a non-resident to another non-resident will be exempt from long-term capital gains. Further, the benefit of excluding the forex appreciation of rupee-denominated bonds in the capital gains computation at the time of redemption will

also be extended to secondary holders of such bonds. This is effective from tax year 2018/19 onwards.
- The indexation benefit is available on cost of acquisition and cost of improvement for assets classified as long-term while computing capital gains. The taxpayer shall have the option to consider the fair market value of the asset on 1 April 2001 as the cost of acquisition where date of acquisition is before 1 April 2001. This is effective from the tax year 2018/19.

The rules of carryforward and set off of loss for capital gains are as follows:

- Capital losses arising from the transfer of a short-term capital asset can be set off against capital gains arising from any other asset in the same tax year.
- Capital losses arising from the transfer of a long-term capital asset can be set off only against capital gains arising from the transfer of any other long-term capital asset.
- Capital losses that cannot be set off in the tax year in which they are incurred can be carried forward and set off against future capital gains at any time within a period of eight years after the year of loss.
- When depreciable assets forming part of a block of assets for tax purposes are transferred, as a result of which the value of the block becomes negative, or all the assets forming part of the block cease to exist, the difference between the transfer price and the value of the block is treated as short-term capital gain or loss.

Taxability of shares issued at a price less than fair market value of shares

Where a closely held unlisted company receives any consideration from a resident towards issue of shares that exceeds the face value of such shares, the aggregate consideration received for such shares as exceeds the fair market value will be deemed to be the income of the recipient-company. The 'fair market value' is computed according to the formulas per the prescribed mechanism. Further, the said provision has been amended and, accordingly, the scope has been widened. From tax year 2018/19, entities are liable to pay taxes on the following receipt that they have received without consideration or for a consideration that is less than the fair market value:

- Any sum of money.
- Any immovable property being land or building, or both.
- Any property, other than immovable property, being shares and securities, jewellery, archaeological collections, drawings, paintings, sculptures, any work of art, and bullion.

Taxability of transfer of property for nil or inadequate consideration

Where a person is in receipt of the following property for nil consideration or for an inadequate consideration, then the difference between the fair value of the property and the consideration paid shall be considered as deemed income in the hands of recipient of the property:

- Any sum of money.
- Any immovable property being land or building, or both.
- Any property, other than immovable property, being shares and securities, jewellery, archaeological collections, drawings, paintings, sculptures, any work of art, and bullion.

In a case where the difference between the fair value of property and consideration paid does not exceed INR 50,000, the same shall be ignored from this taxation. However, the Finance Act, 2018 has liberalised the limit of INR 50,000 in case of immovable property. It is now provided that no adjustments shall be made in a cases where the variation between stamp duty value and the sale consideration is not more than 5% of the sale consideration.

Dividend income

Dividend income received from Indian companies is not taxable in the hands of all shareholders. This applies to resident as well as non-resident shareholders. However, tax is payable at the rate of 10% on income earned by way of dividend in excess of INR 1 million by a taxpayer resident in India other than domestic companies and certain funds, trusts, and institutions. This tax is in addition to the tax payable by a company on dividend distribution.

Income received by overseas financial organisations (offshore funds) from units of specified mutual funds, or from the Unit Trust of India, that are purchased in foreign currency is taxable at 10% on the gross amount of income. Any income distributed by a mutual fund being an equity-oriented fund, the mutual fund shall be liable to pay additional income tax at 10% on the income so distributed. Dividends received from a foreign subsidiary company in which the Indian company holds 26% or more in the nominal value of the equity share capital, then the applicable tax rate would be 15% of the gross amount of the dividend.

Income received from units of specified mutual funds is not taxable in the hands of the recipient. The distributing mutual fund is liable to pay a distribution tax of 25% or 30% (plus surcharge and health and education cess at applicable rates). The above tax is not chargeable in respect of income distributed by an equity-oriented fund in respect of distribution under such scheme.

Stock dividends (bonus shares) distributed are not taxed at the time of receipt in the hands of the recipient shareholders, but capital gains provisions are applicable to the sale of these stock dividends.

Buyback of shares

An additional tax is payable on transactions involving buyback of shares by unlisted companies from its shareholders. A tax at 20% is payable by the company on the difference of consideration paid on buyback and the issue price of shares. The CBDT has prescribed the methodology for determination of amount received for issue of shares under 12 different situations, being a subject matter of tax on buyback. The buyback consideration received will be tax exempt in the hands of the receiver. No tax credit will be allowed in case of such taxes paid either to the company or to the shareholder.

Interest income

Interest income received by an Indian company is taxable at normal CIT rates. Interest income received by a foreign company is taxed at a concessional rate of withholding at 5%/20%, subject to conditions.

Royalty income

The domestic tax law defines the term ‘royalty’ to include consideration from the transfer of all or any rights (including the granting of a licence), imparting of any information, or use or right to use of any right in respect of a patent, invention, model, design, secret formula or process, trademark, or similar property. The definition also includes imparting of any information concerning technical, industrial, commercial, or scientific knowledge, experience, or skill; use or right to use any industrial, commercial, or scientific equipment; the transfer of all or any rights (including the granting of a licence) in respect of any copyright, literary, artistic, or scientific work, including films or video tapes for use in connection with television, or tapes for use in connection with radio broadcasting, but not including consideration for the sale, distribution, or exhibition of cinematographic films; or rendering of any services in connection thereto.

Royalty income received by a non-resident taxpayer is taxed at 10%, 15%, or 20% (subject to treaty benefits and furnishing of prescribed documentation). Surcharge and health and education cess as applicable will be levied in addition to the basic tax rates mentioned above. However, surcharge and health and education cess would not apply on the tax rate specified in the tax treaties.

Partnership/LLP income

A partnership firm and an LLP are taxed as separate legal entities. The share of income of partners from a partnership firm or an LLP is exempt from tax. Partnerships and LLPs are taxed at 31.2% (inclusive of surcharge and health and education cess) if the income is less than INR 10 million and 34.944% (inclusive of surcharge and health and education cess) if the income exceeds INR 10 million.

The interest payment to partners on capital or current account is allowed as tax-deductible expenditure. However, the maximum interest rate allowable for tax purposes is 12% *per annum*. A working partner can be paid salary, bonus, commission, or remuneration. The maximum permissible deduction in respect of remuneration payable collectively to all working partners is based on the book profit of the firm, at slab rates for different levels of book profit.

Unrealised exchange gains/losses

Principles for classification of foreign exchange gains or losses (post amendments made by the Finance Act, 2018) are as follows:

- Unrealised foreign exchange profit/loss is considered to be of a capital nature if a foreign currency loan is taken for a capital asset or fixed asset purchased outside India.
- Any other unrealised foreign exchange profit/loss (not covered above) is considered as revenue in nature.

Foreign income

An Indian company is taxed on its worldwide income. A foreign company is taxed only on income that is received in India, or that accrues or arises, or is deemed to accrue or arise, in India. This income is subject to any favourable tax treaty provisions. According to the current tax law, payments for allowing/transferring the right to use software, customised data, or transmission of any signal by satellite, cable, optic fibre, or similar technology are taxable as royalty income deemed to accrue or arise in India, whether or not the location of such right or property is in India. The CBDT has notified the rules for granting foreign tax credit to resident taxpayers in respect of taxes paid in overseas countries. The rules lay down broad principles and conditions for computation and claim of foreign tax credit, respectively. In cases where the taxpayer has not been given credit of certain taxes paid outside India since the tax was under dispute, the taxpayer can approach the tax officer within six months from the end of the month in which the dispute was settled with prescribed documents. The tax officer has been empowered to pass an order granting consequential relief. This has been made effective from tax year 2018/19 onwards.

Double taxation of foreign income for residents is avoided through treaties that generally provide for the deduction of the lower of foreign tax or Indian tax on the doubly taxed income from tax payable in India. Similar relief is allowed unilaterally where no treaty exists, in which case a resident would be taxed under the Indian tax law but would be allowed a deduction from the Indian income tax payable of a sum being the lower of the Indian tax rate on the doubly taxed income or the rate of tax prevailing in the other country in which income is already taxed.

Deductions

Expenses that are revenue in nature are, by and large, allowed as a deduction to businesses and professionals if they are:

- incurred wholly and exclusively for the purpose of the business or profession
- not in the nature of a personal expense, and
- not in the nature of a capital expense.

Depreciation

Depreciable assets are grouped in blocks, and each block is eligible for depreciation at a prescribed rate. The CBDT has issued a notification clarifying that with effect from 1 April 2017 the block of assets that are entitled to more than 40% depreciation shall now be restricted to 40%. Hence, the depreciation available in case of different block of assets ranges from 0% to 40% as summarised below:

Block	Rate (%)
Residential building	5
Office building	10
Furniture and fittings	10
Plant and machinery	15 to 40
Computers	40
Intangible assets	25

Where the asset is used for less than 180 days in a tax year, the depreciation is restricted to 50% of the prescribed rate. If money receivable on the transfer of a depreciable asset exceeds the opening written-down value plus cost of acquisitions of assets falling within the block concerned, the excess is taxed as a short-term capital gain at the same tax rate as that applicable to business income.

Additional depreciation of 20% is allowed on the cost of new plant and machinery (other than ships or aircraft) acquired and installed to companies engaged in the business of manufacture of articles or things. This benefit is extended to power generating, transmission, or distributing business. Also, the benefit of initial depreciation to companies engaged in transmission of power is available. Power-generating or power-distributing companies have the option to either apply the reducing-balance method provided under the normal schedule or to charge depreciation on a straight-line basis. The straight-line rates are aligned with power companies' book depreciation rates.

Know-how, patents, licences, franchises, and similar intangible assets can form part of a block of depreciable assets, provided they are owned and put to use in the course of their business and are eligible for depreciation at the prescribed rate, which is 25%.

Additional depreciation of 35% (as against the current rate of 20%) has been made available on new plant and machinery acquired and installed between 1 April 2015 and 31 March 2020, in the year of installation in the states of Andhra Pradesh, Bihar, Telangana, and West Bengal. In line with the existing provisions, such incentive is not available to specified assets (e.g. office appliances, computer software).

Tax depreciation is not required to conform to book depreciation. However, an Accounting Standard mandates companies to reconcile both and provide for deferred tax assets, liabilities, expenses, and incomes.

Investment allowance

An investment allowance benefit is allowed for companies engaged in the business of manufacture of articles or things. Taxpayers who have acquired and installed new plant and machinery (other than a ship or aircraft) on or after 1 April 2015 but before 1 April 2020 in the states of Andhra Pradesh, Bihar, Telengana, and West Bengal can avail of an allowance of 15% of the actual cost of investment made in plant and machinery. Further, the acquisition of the plant and machinery can be made in any tax year.

In case installation of the new asset is in a year other than the year of acquisition, then the investment allowance shall be allowed in the year in which the new asset is actually installed. The assets have to be held for more than five years, and, if the asset is sold before this period, the investment benefit claimed will be reversed in the year of sale.

Investment in new plant and machinery will not include assets like plant or machinery used earlier in or outside India, any plant or machinery installed in any office premises or in residential accommodation (or guest house), any office appliances (including computers or computer software), vehicle, ship, or aircraft, the cost of which has been allowed as a deduction under any other provision.

Goodwill

Goodwill and commercial brand equity that are acquired in the course of amalgamation are intangible assets entitled to depreciation. The amalgamated/demerged company and the resulting company shall not be entitled to claim deduction for depreciation exceeding the amount calculated in any previous year. The deduction shall be apportioned between the amalgamating/demerging company and the amalgamated/demerged company in the ratio of the number of days for which the assets were used by them during any tax year. However, the issue of whether goodwill is eligible for tax depreciation or not is the subject of litigation, and there are divergent views of courts on this.

Start-up expenses

Certain expenses are incurred by taxpayers either before the start-up of a business or after start-up of a business, in connection with extension of the industrial undertaking, or in connection with setting-up a new unit. One-fifth of such expenditure is allowed as a deduction each year, over a period of five years.

Tax framework for start-ups in India

With a view to providing an impetus to start-ups and to facilitate their growth in the initial phase of their business, a deduction of 100% of the profits and gains derived by an eligible start-up from a business involving innovation development, improvement of products, processes, or services, or a scalable business model with a high potential of employment generation or wealth creation will be available.

The benefit of 100% deduction of the profits derived from such business shall be available for a period of three consecutive years out of seven years beginning from the year the start-up is incorporated.

Eligible start-up companies can carry forward losses and set off against income of the previous year only if all the shareholders holding shares in the prior year in which such loss was incurred continued to hold those shares in the year of the set off as well. Further, only the losses incurred during the period of seven years beginning from the year in which such company was incorporated may be used for set off.

'Eligible start-up' means a company or an LLP engaged in the business mentioned above and which fulfils the following conditions, namely:

- it is incorporated on or after 1 April 2016 but before 1 April 2021
- the total turnover of its business does not exceed INR 250 million in any tax year(s) prior to which the deduction was claimed, and
- it holds a certificate of eligible business from the Inter-Ministerial Board of Certification as notified in the Official Gazette by the Central Government.

Reduced rate of tax for newly set-up companies

To provide relief to newly set-up Indian companies, a beneficial CIT rate of 25% (plus applicable surcharge and health and education cess) has been announced with effect from tax year 2016/17. This beneficial rate is at the option of the company and is applicable on satisfaction of the following conditions, cumulatively:

i. The company is registered and set up on or after 1 March 2016.
ii. The company is engaged in any business other than the business of manufacture or production of any article or thing and research or distribution of such article or thing manufactured or produced.
iii. The company has not claimed a benefit for establishing its unit in an SEZ, benefit of accelerated depreciation, or benefit of additional depreciation, investment allowances, expenditure on scientific research, and any deduction in respect of certain income.
iv. The company has not claimed set off of loss carried forward from any earlier years following the tax years, provided such loss is attributable to the deductions referred to in (iii) above.
v. The option of seeking the benefit of a reduced CIT rate of 25% is furnished in the prescribed manner before the due date of furnishing of income.

For companies other than Indian companies, the rate of CIT (plus applicable surcharge and education cess) shall remain unchanged.

Interest expenses

Any interest paid by a taxpayer on capital borrowed for the purposes of the taxpayer's business or profession is tax-deductible without any limit. However, if such interest is paid to certain related persons, then the interest expense will be restricted to 30% of earnings before interest, taxes, depreciation, and amortisation (EBITDA). Excess interest expenditure disallowed in that year can be carried forward for eight years and would be available for set-off. If the capital is borrowed for acquiring a capital asset, then interest liability pertaining to the period until the time the asset is put to use cannot be allowed as a tax-deductible expense and will have to be added to the cost of such asset. *See Expenses allowable on actual payment basis below*.

There are some specific guidelines for interest deduction being prescribed in ICDS.

Bad debts

The amount of any bad debt, or part thereof, that has been written off as irrecoverable in the accounts of the taxpayer for the year is allowed as a tax-deductible write-off. If any part of the sum written off is subsequently recovered, the recovered sum is taxable in the year of recovery.

Charitable contributions

Any charitable contribution made by a company to any charity is allowed as a tax-deductible expense, subject to certain conditions. The tax deductibility ranges from 50% to 100% of the charitable contribution, depending upon the nature of charity.

Expenditure incurred on corporate social responsibility (CSR) activities

Expenditure incurred by a taxpayer on CSR activities mandated under the Companies Act, 2013 is not allowed as a deduction for tax purposes under the Income Tax Act. However, if contributions are made to any charitable institutions, then deduction may be claimed from the total income, subject to conditions. *See charitable contributions above.*

Expenses allowable on actual payment basis

Certain expenses, such as, but not limited to, employees' provident fund dues (i.e. retirement benefit funds), bonus to employees, and interest payable to financial institutions and banks, are allowed as tax-deductible expenses only on actual payment. Tax disallowances are attracted if certain payments are delayed beyond their due dates under the respective laws.

Bribes, kickbacks, illegal payments

Expenditure incurred by a taxpayer that is illegal is deemed not to have been incurred for the purposes of the business or profession, and no deduction of such expenditure will be allowed.

Fines and penalties

Under the tax law, there are various procedural compliances (*viz.*, audit of books of accounts, submission of tax returns, disclosure of particulars of income, etc.) that need to be complied with by taxpayers by the respective due dates prescribed therein. Non-compliance/delayed compliances of these procedures attract interest and penal consequences. There are prosecution provisions as well for certain offences. Penalties and fines paid for infraction of, or non-compliance with, any law are not deductible as business expenditure. Prosecution proceedings are criminal proceedings, and, in such proceedings, courts presume a culpable mental state on the taxpayer's part. The burden of proving beyond all reasonable doubt (and not merely by preponderance of probability) the absence of such a state is on the taxpayer. Prosecution shall lie against companies that fail to file their return, whether or not tax is payable.

Further, a penalty of INR 10,000 on specified persons (i.e. accountants, registered valuers, or merchant valuers) for furnishing incorrect information in any report or certificate furnished by them under any provision of the Act or the Rules. The aforesaid penalty will not be imposable if there is reasonable cause for failure. Further, a new provision has been included to levy a penalty of INR 5,000 where the taxpayer has filed one's return of income after the due date but on or before the 31st day of December of the tax year and INR 10,000 where the taxpayer has filed one's return of income after the 31st day of December or has not filed one's return of income. Failure to furnish statement of financial transaction or reportable account within the prescribed time is liable to pay a penalty of INR 500 for each day of continuing default. Further, INR 1,000 shall be charged for each day of continuing default in case of failure to furnish statement of financial transaction or reportable account within the period specified in the notice issued by the revenue authority.

Taxes

All taxes (tax, duty, cess, or fees by whatever name called) relating to business (other than income tax) incurred during the tax year are usually deductible only in the year of payment.

Net operating losses

Losses can be carried forward and set off against income from subsequent year(s) for periods set out in the following table:

Types of losses	Time limit
Unabsorbed depreciation	Perpetually
Business losses (other than speculation business losses)	8 years
Speculation business losses	4 years
Capital losses	8 years

There are no provisions in India for carrying losses back to earlier years.

Payments to foreign affiliates

Indian companies can claim deduction for payments on account of royalties, and for interest and fees for technical or management service provided by foreign affiliates, as long as they are not capital in nature. Such payments are deductible in the year the requisite WHT is paid into the government treasury.

Group taxation

Group taxation is not permitted under the Indian tax law.

Transfer pricing

Transfer pricing on international transactions

The Indian transfer pricing regulations (ITPR) stipulate that income arising from 'international transactions' between 'associated enterprises' should be computed having regard to the 'arm's-length price'. Furthermore, any allowance for expenses or interest arising from any international transaction is also to be determined having regard to the arm's-length price. The expressions 'international transactions' and 'associated enterprises' have been defined in the ITPR.

The ITPR also contain the concept of 'deemed international transaction' whereby a transaction between an enterprise and a third party (whether based in India or overseas) would be subjected to transfer pricing regulations in case there exists a prior agreement in relation to such a transaction between the third party and the associated enterprise of the transacting enterprise or if the terms of such a transaction are determined in substance between the third party and the associated enterprise of the transacting enterprise.

The ITPR also define a certain class of transactions undertaken by a taxpayer with its domestic related parties and whose aggregate value exceeds INR 200 million as specified domestic transactions to which the transfer pricing provisions apply.

Initially, the ITPR prescribed five methods for computation of arm's-length price. These are broadly in line with OECD Guidelines. A sixth method, termed as the 'other method', was notified in 2012. Taxpayers are required to adopt the most appropriate method for determining the arm's-length price.

Taxpayers are also required to maintain a comprehensive set of prescribed information and documents relating to international transactions and specified domestic transactions that are undertaken between associated enterprises, on an annual basis, within the prescribed timelines (due date of filing the income tax return). Taxpayers being a constituent entity of an international group shall also keep and maintain such information and documents (essentially master file and country-by-country [CbC] report) in respect of the international group. Further, taxpayers are required to obtain an Accountant's Report from an independent accountant certifying the nature and amount of international transactions. The certificate needs to be filed along with the income tax return. The burden of proving the arm's-length character of the transaction is primarily on the taxpayer.

The taxpayer is required to comply with the above requirements on an annual basis.

The ITPR adopt an arithmetic mean of comparable prices as the arm's-length price, with a flexibility of deviation from the percentage that is notified by the Central Government as +/- 1% for wholesalers and +/- 3% for others. The CBDT has also prescribed rules for use of range for determining arm's-length price, which is discussed subsequently. Where the transfer pricing officer is of the opinion that the arm's-length price was not applied, the officer may re-compute the taxable income after giving the taxpayer an opportunity to be heard. Stringent penalties are prescribed in cases of failure to comply with the provisions of the ITPR.

Notified Jurisdictional Area (NJA)

The Indian government is empowered to declare a country/territory with which there does not exist an effective mechanism for exchange of information as an NJA.

Any transaction between a taxpayer and a person located in an NJA or a transaction entered into by a taxpayer wherein one of the parties is located in an NJA will be covered under the ITPR. However, the benefit of the +/- 3% range and the option to be covered under the Safe Harbour Rules would not be available in this case.

Safe Harbour Rules

Safe Harbour Rules were notified in 2013. These rules prescribe who the eligible taxpayers are, which are the eligible international transactions, the target operating margin, procedural aspects, timeline for audit, etc. Thereafter, these Safe Harbour Rules were also extended to certain domestic transactions.

The Safe Harbour Rules were initially applicable for a maximum of five tax years beginning with tax year 2013/14.

Thereafter, in June 2017, the CBDT made amendments to the Safe Harbour Rules reducing the target operating margins for most of the eligible international transactions. Further, the revised Safe Harbour Rules introduced receipt of low value-adding intra-group services to the list of eligible transactions subject to certain thresholds. Also, there were certain modifications made to the definitions of certain terms *vis-à-vis* in the original Safe Harbour Rules. The revised Safe Harbour Rules are applicable for a maximum of three tax years beginning with tax year 2017/18 with the taxpayers having an option to apply the original Safe Harbour Rules or the revised Safe Harbour Rules for the tax year 2017/18, whichever is more beneficial.

Where a taxpayer has opted to be covered under the Safe Harbour Rules and the transfer price declared has been accepted by the tax authorities, then such a taxpayer cannot invoke proceedings under a Mutual Agreement Procedure (MAP).

Advance pricing agreements (APAs)

An APA is an arrangement between the taxpayer and the tax authorities covering transactions, with a view to pre-empt potential transfer pricing disputes. The CBDT has notified detailed rules providing the procedures and necessary forms for application/administration of APAs.

The rules provide for constitution of an APA team, which shall consist of an income tax authority and experts from economics, statistics, law, and other necessary fields. APAs can be applied to existing, as well as proposed, transactions.

The rules have provided for both unilateral and bilateral/multilateral APAs. In cases where a bilateral APA negotiated between competent authorities is not acceptable to the taxpayer, the taxpayer may, at its option, continue with the process of entering into a unilateral APA without benefit of an MAP.

The salient features of the procedure laid down for APAs are application for APA, withdrawal of APA, defective application, procedure, compliances post-APA, cancellations of APA, and revisions and renewal of APA.

The legislation has provisions of roll-back of APAs for four years prior to the first year covered under the APA.

Rules prescribing the use of 'range' and multiple year data

The CBDT has notified the rules prescribing the scheme for the usage of the 'range' concept and multiple year financial data for determining the arm's-length price. These rules are applicable to international transactions and specified domestic transactions.

The rules envisage the applicability of the 'range' concept and multiple year data only where the arm's-length price determination is done using either the transactional net margin method, resale price method, cost plus method, or comparable uncontrolled price method. Furthermore, the rules in connection with the applicability of the 'range' concept, *inter alia*, prescribe the adequate number of external comparables and the methodology for computing the upper and lower percentile. In case the number of external comparables identified is not adequate, the 'range' concept will not apply and the concept of arithmetic mean will continue to apply.

The multiple year data can only be used if the most appropriate method selected of benchmarking purposes is either transactional net margin method, resale price method, or cost plus method. Further, multiple year data entails use of data for the year under consideration (current year) and data for up to two preceding tax years. Data for the current year is compulsorily to be considered. If the data for the current year is available and is not comparable on account of either qualitative or quantile reasons, the comparable cannot be considered.

Master file and country-by-country (CbC) reporting documentation as per BEPS

The government has introduced three-layered transfer pricing documentation requirements in line with the international standard as per the BEPS Action Plan 13. Taxpayers are required to prepare a master file, local file, and CbC report from tax year 2016/17. The CBDT has notified the final rules for maintaining and furnishing of transfer pricing documentation in the master file and CbC report.

As per the rules, the master file shall be applicable to every Indian taxpayer (called as a constituent entity or CE) part of an international group (whether inbound or outbound) having an annual consolidated turnover of over INR 5 billion in the preceding accounting year of the parent company and meeting certain other thresholds of the quantum of aggregate value of international transactions. Again, the Indian taxpayer must furnish the master file with the prescribed authority (Director General of Income Tax [Risk Assessment]). For Indian subsidiaries with parent companies resident outside India, the master file must be furnished even if it is filed by the parent entity in its home country or by a designated entity in its home country. The documentation prescribed by the rules in respect of the master file is largely in line with OECD's final BEPS Action Plan 13 report; however, there are certain additional information requirements, like the description of the functions, assets, and risks (FAR) analysis of all CEs within the group that contribute at least 10% of revenues or assets or profits of the group; detailed description of the financial arrangements of the group, including the names and address of the top ten unrelated lenders; and a list of all entities of the international group engaged in development and management of intangible property, along with their addresses.

The CbC report is applicable only for taxpayers having an annual consolidated group turnover of over INR 55 billion in the preceding accounting year of the parent company. A parent entity of an outbound international group or an alternate reporting entity of an inbound international group, resident in India, must file the CbC report with the prescribed authority. For Indian subsidiaries with parent companies resident outside India, the CbC report must ordinarily be filed by the parent entity in its home country or by an alternate reporting entity/a designated entity in its home country. The Indian tax authorities will access the CbC report through mutual exchange of information agreements with such country, failing which the Indian subsidiary will be required to furnish the report. However, if the parent entity is not obligated to file the CbC report in its home country or if there is no mutual exchange of information agreement signed between India and the parent entity's country or territory, then the Indian subsidiary will be required to furnish the report.

In case there are multiple entities of the same international group resident in India, one of the entities will have to be identified as the designated entity for filing the master file as well as for other communication in respect of the master file and the CbC report. Further, the rules have prescribed various forms for intimations to be filed with the prescribed authority and filing of the master file and CbC report with the prescribed authority at various dates. The due date for filing the master file and CbC report is the specified due date for filing the annual tax returns. In case of CbC report, every parent entity or the alternate reporting entity resident in India will have to file the report within a period of 12 months from the end of the said reporting accounting year. No specific timelines have been prescribed for filing of the CbC report by Indian subsidiaries with parent companies resident outside India.

Significant penalty provisions will apply for non-compliance and furnishing inaccurate information.

Restrictions on interest deduction

The BEPS Action Plan 4 recommends alternate approaches for countries to limit tax base erosion through interest deductions and other financial payments. Provisions have been introduced in the Income Tax Act, 1961, which seek to limit the interest deduction of Indian companies or PEs of foreign companies in India. Taxpayers engaged in banking or insurance business are specifically excluded.

The provision will apply to interest or similar expenses paid (including those paid on existing debt) to (i) overseas associated enterprises or (ii) third-party lenders for whom the underlying debt is backed by an implicit or explicit guarantee or equivalent deposit from overseas associated enterprises.

Any interest paid for the year under consideration in excess of 30% of the EBITDA of the taxpayer will be treated as excess interest. Excess interest disallowed in a year will be eligible for carry forward up to eight consecutive years, subject to the above limits. The provision will, however, not apply to interest paid or payable up to INR 10 million.

The proposed provisions that limit the interest deductions have largely adopted the 'Fixed Ratio Rule' proposed as a best practice approach under BEPS Action Plan 4, however, with some differences. It is relevant to note that the provisions do not correspondingly limit the WHT liability or taxability of the non-resident associated enterprise on the interest income. The provisions apply from tax year 2017/18 onwards.

Secondary adjustment

To align the ITPR with the OECD Guidelines and international practices, provisions have been introduced in the ITPR for a secondary adjustment. The secondary adjustment is an adjustment in the books of account of the taxpayer and its associated enterprise to reflect that the actual allocation of profits between the Indian taxpayer and its associated enterprise are consistent with the transfer price determined as a result of primary adjustment. This is intended to remove the imbalance between the cash account and actual profit of the Indian taxpayer.

The secondary adjustment is required only where a primary adjustment to the transfer price occurs in one of the following circumstances:

- Where adjustment has been made on one's own by the taxpayer in one's income tax return.
- Adjustment made by the Assessing Officer has been accepted by the taxpayer.
- Arising due to the APA signed.
- Application of Safe Harbour Rules.
- Settlement arrived at under the MAP route.

However, an exception has been made according to which such secondary adjustments shall not be carried out by the taxpayer if the amount of the primary adjustment made in the case of a taxpayer does not exceed INR 10 million.

According to this provision, excess money arising from primary transfer pricing adjustments not repatriated into India within the prescribed time limit will be deemed as an advance made by the Indian taxpayer to its associated enterprise. Time limits have been prescribed having regard to the circumstance leading to the primary transfer pricing adjustment. The effect of the advance is given by way of an imputation of interest on such advance. The imputed *per annum* interest on such advance will be computed at the one year marginal cost of fund lending rate of the State Bank of India as on 1 April of the relevant previous year plus a spread of 325 basis points in cases where the international transaction in denominated in Indian rupees. In cases where the international transaction is denominated in foreign currency, the interest will be computed at six month London Interbank Offered Rate (LIBOR) as of 30 September of the relevant previous year plus a spread of 300 basis points. This interest will be imputed till such time as the excess money arising due to primary transfer pricing adjustments is repatriated into India.

The provisions relating to secondary transfer pricing adjustment are generally applicable for primary transfer pricing adjustments made from tax year 2016/17 onwards.

Thin capitalisation

No prescribed debt-to-equity ratios or thin capitalisation rules exist under Indian taxation law. However, interest paid to related parties at rates or on terms that are considered unreasonably high are disallowable by the tax officer.

Controlled foreign companies (CFCs)

India currently has no CFC rules, so there will be no Indian tax on foreign profits that remain unremitted from offshore subsidiaries.

Tax credits and incentives

Tax incentive provisions normally have conditions applicable for the period within which the preferred activity should be undertaken and the period for which the tax incentive is available. It may also be necessary to fulfil certain other conditions, such as 'forming' of a 'new' undertaking.

Real Estate Investment Trusts (REITs)/Infrastructure Investment Trusts (InvITs)

The Securities and Exchange Board of India (SEBI) has enacted regulations relating to two categories of investment vehicles, namely REITs and InvITs.

Pass-through status is provided to REITs in respect of income earned from renting, leasing, or letting out any real estate asset owned directly by the REITs. Thus, rental income is exempt in the hands of REITs. On distribution of rental income, REITs are not required to withhold taxes. Tax is not required to be withheld by tenants on payment of rent to the REITs.

The interest paid by special purpose vehicles (SPVs) to business trusts (BTs) is taxable at the investor level (as against the BT itself) when the BT distributes such amounts. Interest income to non-resident investors is taxable at a lower rate of 5% (plus applicable surcharge and cess), whereas residents are taxable at the applicable tax rates.

Dividends distributed by SPVs to the BTs are exempt from levy of DDT in the hands of the SPV. Such dividends are also exempt in the hands of BTs and investors if 100% of the equity shares of the SPV are held by BTs, except in case of shares mandatorily held by another entity as per law, and the dividends are distributed out of profits made after the acquisition of the SPV by BTs. Capital gains (e.g. on sale of shares of SPVs) are taxable in the hands of BTs at the applicable capital gains tax treaty rates. Any other income (including rental income) is taxable at the maximum marginal rate. Onward distributions of such income are exempt in the hands of the investors.

Transfer of units of BTs through stock exchanges are liable to STT, and gains earned by investors on such sale of units are exempt from tax if the units qualify as long-term capital assets. A lower rate of 15% (plus applicable surcharge and cess) is applicable to short-term capital assets. Taxability of capital gains arising to sponsors on exchange of shares in SPVs with units of BTs is deferred to the time of disposal of such units by the sponsor. The applicability of MAT on gains arising from the swap of shares of the SPV for units of BT is deferred to the stage when the units are transferred by the BT. No capital gains tax exemption is available on the swap of other assets with units of BTs.

Tax incentives for undertakings other than infrastructure development undertakings

If certain conditions are met, a tax holiday is permitted on the profits earned by an undertaking engaged in any of the following:

- Integrated business of handling, storage, and transportation of food grains.
- Commercial production or refining of mineral oils.
- Processing, preservation, and packaging of fruits or vegetables.
- Operating and maintaining a hospital in a rural area.

The tax holiday periods range from five to ten years, and the percentage of the rebate is 30%, 50%, or 100% in initial years and 30% in the later years. The number of years constituting ‘initial’ and ‘later’ years varies from sector to sector.

A relaxation of 100% shall be provided under certain conditions to avail of profit-linked deduction in the business of developing qualifying affordable housing projects. The conditions are as follows:

- Size of residential until will be measured as 'carpeted area' and not a 'built-up area'.
- Completion of project for claiming deduction will be increased from three years to five years from receipt of approval.
- Size restriction of 30 square metres for residential units shall apply only to metro cities (i.e. municipal limits of Chennai, Delhi, Kolkata, and Mumbai).

Tax incentives for infrastructure development undertakings

Enterprises engaged in the business of power generation, transmission, or distribution; developing or operating and maintaining a notified infrastructure facility, industrial park, or SEZ; substantially renovating and modernising the existing network of transmission or distribution lines (between specified periods); or laying and operating a cross-country natural gas distribution network are eligible for a tax exemption of 100% of profits for any ten consecutive years falling within the first 15 years of operation (first 20 years in the case of infrastructure projects, except for ports, airports, inland waterways, water supply projects, and navigational channels to the sea).

An investment-linked deduction will be available to Indian companies or their consortium engaged in the business of developing or operating and maintaining of a new infrastructure facility. The taxpayers should have entered into an agreement with the Central or State Government or local authorities in respect of such activities relating to specified infrastructure facilities.

Since now there are investment-linked deductions, the profit-linked deduction available for infrastructure facilities have a sunset clause of 31 March 2017 for commencement of the operations. Thereafter, deduction of 100% of capital expenditure incurred on setting up of the said infrastructure facility is available with effect from 1 April 2017. Investment-linked deductions in respect of specified capital expenditure shall not be allowed if incurred for the purpose of acquisition of asset for payment (individual or aggregate) exceeding INR 10,000 per day unless such payment was made:

- by an account payee cheque/draft, or
- through electronic clearing system through a bank account.

'Infrastructure facility' means roads, including toll roads, bridges, rail systems, highway projects, water supply projects, water treatment systems, irrigation projects, sanitation and sewerage systems or solid waste management systems, ports, airports, inland waterways, inland ports, or navigational channels to the sea.

Tax incentives for exports

Export profit from a new undertaking, satisfying prescribed conditions and set up in an SEZ, is eligible for tax exemption of 100% for the first five years, from the year in which manufacturing commences, followed by a partial tax exemption of 50% for the next five years. A further tax exemption of 50% of the export profit for five years is also available after that, subject to an equal amount of profit being retained and transferred to a special reserve in the books of account. The said exemption is available on commencement of eligible business between 1 April 2006 and 31 March 2021.

Tax incentives for units in the North Eastern Region of India

Measures are in place to facilitate the development of the North Eastern Region of India and of the state of Sikkim. Undertakings located in these states that (i) begin to manufacture or produce any eligible article, (ii) undertake substantial expansion, or

(iii) commence an eligible business between 1 April 2007 and 1 April 2017 are eligible for a 100% deduction of profits for ten consecutive years.

A list of eligible businesses has been provided by the Indian government. The eligible businesses include hotels (not below two-star category), adventure and leisure sports including ropeways, the provision of medical and health services in nursing homes with a minimum capacity of 25 beds, operating a vocational training institute for hotel management, catering and food crafts, entrepreneurship development, nursing and para-medical training, civil aviation related training, fashion design and industrial training, running an information technology-related training centre, manufacturing of information technology hardware, and bio-technology. Businesses other than the above-listed eligible businesses are not entitled to claim the tax holiday.

Tax incentives for certain income relating to offshore banking units and International Financial Services Centres

A scheduled bank, or any bank incorporated by or under the laws of a country outside India, that has an offshore banking unit in an SEZ or an International Financial Services Centre with a specified income that is subject to prescribed conditions is eligible for a tax exemption of 100% of the specified income for five consecutive years beginning from the year in which the permission under the Indian Banking Regulation Act, 1949 was obtained and of 50% of the specified income for five consecutive years.

To encourage the location of offshore fund managers in India, a specific regime has been laid down. In the case of an eligible investment fund, fund management activity carried out through an eligible fund manager acting on behalf of such fund will not constitute a business connection in India. An eligible investment fund will not be treated as resident in India merely because the eligible fund manager undertakes fund management activities in India. Offshore funds and fund managers are required to satisfy certain conditions to be eligible for the regime. The conditions are not applicable to funds set up by the government of a foreign state or the Central Bank of a foreign state, a sovereign fund, or such other funds as may be notified by the government of India and subject to fulfilment of conditions as may be specified. Further, the special regime shall be applied in accordance with guidelines and in such manner as the administrative board may prescribe.

However, in order to minimise economic distortions and curb erosion of the tax base, the long-term capital gains on sale of equity shares undertaken on a recognised stock exchange located in any International Financial Services Centre and where the consideration for such transfer is received or receivable in foreign currency will not be taxable. Further, the requirement of payment of STT at the time of transfer of long-term capital asset shall not apply. *See the description of Capital gains in the Income determination section.*

Tax incentive for hiring new workmen

With a view to encouraging generation of employment, the benefit of deduction on hiring of new workmen has been extended to all taxpayers who are subjected to tax audit, instead of the earlier provision, which was applicable only to manufacturing units. Further, to enable smaller units to claim this deduction, the benefit has been extended to units employing 50 regular workmen.

To increase employment generation incentive to taxpayers across all sectors (who are subject to tax audit), where emoluments paid to an employee are less than or equal to

INR 25,000 per month, the taxpayer will be eligible for deduction of 30% of additional wages paid to new regular workmen in a factory for a period of three years wherein the workmen are employed for not less than 240 days in a year (150 days in case of apparel, footwear, and leather industry). The benefits of this incentive would also be available in the first year of business, on emoluments paid to all employees. From the tax year 2018/19 (i.e. from 1 April 2018), the deduction shall be allowed in the succeeding tax year if an employee is employed for a period less than the minimum period (i.e. 150 days or 240 days) in the tax year and continues to remain employed for the minimum period in the succeeding tax year.

However, no deduction shall be allowed in respect of cost incurred on employees for whom the government has paid the entire contribution under the Employees' Pension Scheme, and for employees who do not participate in a recognised provident fund.

Amortisation of cost of spectrum fee for Telecom operators

Amortisation of capital expenditure incurred and actually paid by the taxpayer for acquiring the right to use spectrum for telecommunication services, in equal instalments over the period of useful life of the spectrum licence, is permitted.

Patent Box Regime

In order to encourage companies to locate high-value jobs associated with the development, manufacture, and exploitation of patents in India, the government has introduced a concessional taxation regime for income from patents. Accordingly, income by way of royalty in respect of a patent developed and registered in India earned by an eligible taxpayer shall be subject to tax at the rate of 10% (plus surcharge and cess) on a gross basis.

An eligible taxpayer means a person resident in India, who is the true and first inventor of the invention, and whose name is entered on the patent register as the patentee.

Tax incentive of capital expenditure on certain specified businesses

Deduction of capital expenditure is allowed at 100% in the year when the commercial operations begin in respect of the following specified businesses:

- Setting up and operating cold chain facilities.
- Setting up and operating warehousing facilities for storage of agriculture produce.
- Setting up and operating an inland container depot, freight station, or warehousing facility for storage of sugar, beekeeping, and honey and beeswax production.
- Laying and operating a cross-country natural gas or crude or petroleum oil pipeline network for distribution, including storage facilities being an integral part of such a network.
- Building and operating a hotel of two-star or above category in India.
- Building and operating a hospital with at least 100 beds.
- Developing and building a housing project under a scheme for slum redevelopment or rehabilitation framed by the government.
- Developing and building specified housing projects under an affordable scheme of the central/state government.
- Investing in a new plant or newly installed capacity in an existing plant for production of fertiliser.
- Developing, or operating and maintaining, or developing, operating and maintaining any infrastructure facility.

The following characteristics and conditions may be noted:

- Any sum received or receivable in cash or in kind on transfer, etc. of the capital asset shall be considered as business income if expenditure on such an asset has been allowed as a deduction under this section.
- Any loss computed in respect of the above specified businesses shall be allowed to be offset or carried forward and offset only against the profits and gains of specified businesses.
- The specified business should:
  - not be set up by splitting up or reconstruction of a business already in existence
  - not be set up by transfer of used machinery or plant exceeding 20% of the total value of the machinery or plant used in such business, and
  - have been approved by the prescribed authority (i.e. the government).

Besides the above, capital expenditure incurred on acquisition of asset (individual or aggregate) exceeding INR 10,000 per day shall be ignored for the purposes of computing the actual cost unless such payment was made:

- by an account payee bank cheque/draft, or
- through the electronic clearing system through a bank account.

Research and development (R&D) expenditure

A weighted deduction of 150% of expenditure is available in respect of expenditure incurred on scientific research in an in-house R&D facility approved by the prescribed authority for companies engaged in specified businesses and in research associations, universities, etc., respectively. Such weighted deduction will be restricted to 100% of the expenditure from tax year 2019/20 onwards.

A payment made to an approved research association undertaking research in the social sciences or in statistical research, or to an Indian company to be used by it for scientific research, is eligible for a deduction of 100% of the payment made.

Contributions made to any National Laboratory, approved scientific research associations, universities, and the Indian Institute of Technology are eligible for a weighted deduction of 150% of the contributions made up to 31 March 2021. Thereafter, the deduction will be restricted to 100% of the contribution.

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Withholding taxes

There is an obligation on the payer (either resident or non-resident) of income to withhold tax when certain specified payments are credited and/or paid. Some of the expenses that require tax withholding are as follows.

Payments to resident companies

Nature of payment	Payment threshold for WHT (INR) (1)	WHT rate (%)
Specified type of interest	None	10 (3)
Non-specified type of interest	5,000 (2)	10

Nature of payment	Payment threshold for WHT (INR) (1)	WHT rate (%)
Professional or technical service	30,000	10
Commission and brokerage	5,000	5
Rent of plant, machinery, or equipment	180,000	2
Rent of land, building, or furniture	180,000	10
Contractual payment (except for individual/HUF)	30,000 (single payment) 100,000 (aggregate payment)	2
Contractual payment to individual/HUF	30,000 (single payment) 100,000 (aggregate payment)	1
Royalty or fees for technical services	30,000	10
Deemed dividend	2,500	10

Notes

1. Payments have different threshold limits. The payer is only required to withhold tax if the total payment within a tax year to a single person (except where specified otherwise) is above the limits specified above.
2. The threshold limit for WHT for non-specified type of interest is INR 5,000, except in the case of interest received from a bank, co-operative society, or deposit with post office, for which it is INR 10,000.
3. 2% in case the company is engaged in business of operation of call centres.

If the Permanent Account Number (PAN) of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Income Tax Act, the rates in force, or the rate of 20%, whichever is higher.

The definition of 'royalty' also includes consideration for use of, or right to use, computer software. Transfer of all or any rights in respect of any right, property, or information includes transfer of all or any right to use computer software (including granting of a licence), irrespective of the medium through which such a right is transferred and irrespective of whether any right or property is located in India. Hence, while applying WHT on such payments in the nature of royalty, one needs to consider the definition of royalty as amended by the Budget 2012 with retrospective effect from 1 June 1976.

Payment to non-resident companies

Nature of payment	WHT rate (%)
Interest on foreign currency (subject to conditions)	5
Interest on money borrowed in foreign currency under a loan agreement or by way of long-term infrastructure bonds (or rupee denominated bonds)	5
Interest on investment in long-term infrastructure bonds issued by Indian company (rupee denominated bonds or government security)	5
Non-specified type of interest	20
Royalty and technical fees	10
Long-term capital gains other than equity shares of a company or units of an equity-oriented fund/business trust on which STT is paid	20
Long-term capital gains on equity shares of a company or units of an equity-oriented fund/business trust on which STT is paid	10
Income by way of winning from horse races	30
Other income	40

Notes

- Percentage to be increased by a surcharge and health and education cess to compute the effective rate of tax withholding.

- Income from units of specified mutual funds is exempt from tax in the hands of the unit-holders.
- Dividends received from Indian companies are tax-free in the hands of the shareholder.
- Short-term capital gains on transfer of shares of a company or units of an equity-oriented fund would be taxable at 15% if they have been subjected to STT.
- There is no threshold for payment to non-resident companies up to which no tax is required to be withheld.
- If the PAN of the deductee is not quoted, the rate of WHT will be the rate specified in relevant provisions of the Act, the rates in force, or the rate of 20%, whichever is higher. The government has notified rules that do not mandate quoting of PAN, subject to certain conditions.
- The payer is obligated to report specific information in the prescribed form (whether or not such payment is chargeable to tax).

Equalisation levy

Action Plan 1 (Digital Economy) of the OECD's BEPS project discussed several options to tackle direct tax challenges in the digital environment. Taking cues from this, an equalisation levy is available, the summary of which is as follows:

- Rate of levy: 6% of the amount of consideration for specified service.
- Meaning of 'specified service': Online advertisement, any provision for digital advertising space, or any other facility or service for the purpose of online advertisement, which includes any other service as may be notified by the Central Government in this regard.
- On whom: Non-resident receiving consideration for specified services from:
  - a person resident in India and carrying on business or profession, or
  - a non-resident having a PE in India.
- Exemption from income tax: The income arising to the non-resident from the specified service and chargeable to an equalisation levy will be exempt from income tax.
- Due date for deposit: 7th day of the following month.
- Non-applicability in specified cases: Equalisation levy will not be charged in the following cases:
  - the non-resident providing specified service has a PE in India and the specified service is effectively connected with the PE
  - the aggregate consideration received or receivable in the previous year by the non-resident does not exceed INR 100,000, or
  - the payment for the specified service by the Indian resident or PE is not for conducting business or a profession in India.

Treaty rates

Some tax treaties provide for lower WHT rates from certain types of income, as follows:

	WHT (%)			
Recipient	**Dividend (1)**	**Interest**	**Royalty (12)**	**Fee for technical services (12)**
Non-treaty	10	20	10	10
Treaty: (8)				
Albania	10	10	10	10
Armenia	10	10	10	10
Australia	15	15	10 (2)/15	10 (2)/15
Austria	10	10	10	10
Bangladesh	10 (3)/15	10	10	N/A (5)
Belarus	10 (9)/15	10	15	15
Belgium	15	10 (11)/15	10	10
Bhutan	10	10	10	10

	WHT (%)			
Recipient	Dividend (1)	Interest	Royalty (12)	Fee for technical services (12)
Botswana	7.5 (9)/10	10	10	10
Brazil	15	15	25 (15)/15	15

Notes

1. The treaty tax rates on dividends are not relevant since, under the current Indian tax legislation, most dividend income from Indian companies that is subject to DDT is exempt from income tax in the hands of the recipient.
2. 10% for the use or right to use any industrial, commercial, or scientific equipment; 15% in other cases.
3. If at least 10% of capital is owned by the beneficial owner (company) of the company paying the dividend or interest.

4. If at least 20% of capital is owned by the beneficial owner (company) of the company paying dividend or interest.
5. In absence of specific provision, it may be treated as business profits or independent personal services under respective treaties, whichever is applicable.
6. The 'most favoured nation' clause is applicable. The protocol to the treaty limits the scope and rate of taxation to that specified in similar articles in treaties signed by India with an OECD-member country or another country.
7. If royalty relates to copyrights of literary, artistic, or scientific work.
8. India has signed a comprehensive tax treaty with Hong Kong Special Administrative Region (HKSAR) of China but the same is yet to be notified.
9. If at least 25% of capital is owned by the beneficial owner (company) of the company paying the dividend.
10. If at least 25% of capital is owned by the company during at least six months before date of payment.
11. If paid on a loan granted by a bank/financial institution.
12. The tax rate for royalties and fees for technical services, under the domestic tax laws, is 10%. This rate is to be increased by a surcharge at 2.5% on the income tax and education cess at 2% and secondary and higher secondary education cess at 1% on the income tax including surcharge. As a consequence, the effective tax rate is 10.558%. This rate applies for payments made under an agreement entered into on or after 1 June 2005. Accordingly, a tax resident can either use the treaty rate or domestic tax rate, whichever is more beneficial.
13. If interest is received by a financial institution.
14. Taxable in the country of source as per domestic tax rates.
15. If royalty payments arise from the use or right to use trademarks.
16. Tax treaties of certain countries do not have a separate clause specifying the WHT rate for fees for technical services and fees for included services.
17. 5% if the beneficial owner is a company holding at least 10% of share capital; 15% in other cases.
18. 15% of gross amount of dividend in case such dividend is paid out of income derived from immovable property and such income is exempt from tax; 10% in all other cases.
19. 10% if such interest is paid on a loan granted by a bank carrying on a bona fide banking business or by a similar financial institution (including an insurance company).
20. 10% if payments of any kind received as consideration for the use of, or the right to use, any industrial, commercial, or scientific equipment and fee for included services that are ancillary and subsidiary to the enjoyment of the property for which payment is received.

List of limited agreements between India and other countries

A list of the countries with which India has entered into limited agreements for double taxation relief with respect to income of airlines/merchant shipping, is given here.

- Afghanistan
- Ethiopia
- Iran
- Lebanon
- Maldives
- Pakistan
- People's Democratic Republic of Yemen
- Yemen Arab Republic

Tax information exchange agreements (TIEAs) between India and other countries

A list of the countries with which India has entered into TIEAs for effective exchange of information relating to tax matters is given below. In addition, several of the comprehensive treaties signed by India have an information exchange clause that has the same effect as signing of a TIEA. These are not listed here.

- Argentina
- Bahamas
- Bahrain
- Belize
- Bermuda
- British Virgin Islands
- Cayman Islands
- Gibraltar
- Guernsey
- Isle of Man
- Jersey
- Principality of Liechtenstein
- Principality of Monaco
- Liberia
- Macau, China
- Maldives
- Saint Kitts and Nevis
- San Marino
- Seychelles

Tax administration

Taxable period

In India, the tax year begins on 1 April and ends on 31 March.

Tax returns

Accounts for tax purposes must be made up to 31 March. For persons having business/professional income, the income tax return is required to be filed electronically on or before 30 September of the succeeding tax year. In case the transfer pricing provisions are applicable, the due date for filing of the tax return is on or before 30 November.

In case a taxpayer desires to revise its filed return of income, it would be eligible to do so only up to 31 March of the year following the tax year or before the completion of assessment, whichever is earlier.

Further, in order to claim the tax incentives/deductions, the taxpayers have to furnish their tax returns on or before the due date specified for filing the tax returns.

Quarterly WHT returns

Quarterly statements of taxes withheld are required to be filed electronically with the tax authorities on or before 31 July, 31 October, and 31 January for the first three quarters of the tax year and on or before 31 May following the last quarter of the tax year.

Obligation to submit tax return for assets located outside India

A resident taxpayer having any asset (including financial interest in any entity) located outside India or signing authority in any account located outside India is mandatorily required to furnish a tax return.

In cases where taxpayers have assets outside India, the extant time limits of four and six years for reopening tax assessments (where income has escaped assessment) has been increased to 16 years. In cases where a person is treated as an agent of a non-resident, the time limit for issuing reassessment notice has been extended from two years to six years.

Payment of tax

Tax is payable in advance (if tax payable for the year exceeds INR 10,000) in specified instalments for every quarter on or before 15 June, 15 September, and 15 December for the first three quarters of the tax year and on or before 15 March for the last quarter of the tax year. Any balance of tax due on the basis of the return must be paid on a self-assessment basis before the return is filed. A tax return will be treated as defective if the tax liability along with interest is not paid on or before the date of submission of the tax return. Interest levied for default in payment of advance tax is computed beginning from the first day of the year following the tax year to the date of the assessment order.

Tax audit process

Audit for income tax purposes

Persons carrying on business are required to get their books of account audited for income tax purposes if the business turnover exceeds INR 10 million. For individuals opting for the presumptive taxation scheme, one shall not be required to get one's accounts audited if the total turnover or gross receipts of the relevant previous year does not exceed INR 20 million. This will be effective from tax year 2017/18 onwards. For persons carrying on a profession, crossing the turnover threshold of INR 5 million would attract the requirement to have its books of accounts audited from 1 April 2017. The penalty for non-compliance with this audit requirement is INR 0.15 million, subject to 1% of total turnover/gross receipts.

Special audit

Tax authorities, at any stage of proceedings, having regard to nature, complexity, and volume of accounts or doubts on correctness of accounts or other reasons, may, after taking necessary approval of the Chief Commissioner, direct a taxpayer to get its accounts audited and to furnish the report.

Statute of limitations

The statute of limitations under the Act in the case of submission of returns is one year from the end of the relevant tax year, and for assessment of returns filed is 33 months (45 months in case transfer pricing provisions are applicable) from the end of the relevant tax year for which the return is filed. The statute of limitations for reassessment ranges from five years to 17 years from the end of the relevant tax year.

E-assessment

With a view to roll out e-assessment across the country so as to impart greater transparency and accountability, the Central Government has been empowered to notify a new scheme for scrutiny assessments to achieve the desired purpose. This would enable the assessment to be carried out without any personal interface between the taxpayer and the revenue authorities.

General Anti Avoidance Rule (GAAR)

GAAR provisions have been introduced in the Finance Act, 2017 and are applicable from 1 April 2017. These provisions empower the tax department to declare an 'arrangement', or any part or step thereof, entered into by a taxpayer with the main purpose of obtaining tax benefit to be an 'Impermissible Avoidance Agreement' (IAA), the consequence of which would be denial of tax benefit under the Act or under the applicable tax treaty.

For GAAR provisions, an IAA means the main purpose of which is to obtain a tax benefit, and it:

- creates rights and obligations not at arm's length
- results in abuse/misuse of provisions of this Act (directly/indirectly)
- lacks/is deemed to lack commercial substance, or
- is carried out in a manner that is not ordinarily employed for *bona fide* purposes.

The following are consequences if an arrangement is regarded as an IAA:

- Disregard/re-characterise the arrangement.
- Disregard corporate structure.
- Deny treaty benefit.
- Reassign place of residence/situs of assets or transactions.
- Reallocate income, expenses, relief etc.
- Re-characterise equity-debt, income-expense, relief, etc.

Other issues

Mergers and acquisitions

The expression 'merger' has not been defined in the Income Tax Act but has been covered as part of the definition of the term 'amalgamation'. Amalgamation is defined as a merger of one or more companies with another, or the merger of two or more companies to form a new company, in such a way that all the assets and liabilities of the amalgamating company or companies become the assets and liabilities of the amalgamated company, are held by the amalgamated company for a minimum period of five years, and shareholders holding not less than 75% in value of the shares in the amalgamating company or companies become shareholders of the amalgamated company. In case of demerger, the cost of acquisition and period of holding of the assets related to the demerged company shall be available to the resulting company.

Capital gains

No capital gains tax is levied on the transfer of capital assets by an amalgamating company to the amalgamated company, provided the amalgamated company is an Indian company. Similar is the position in case of a demerger by a demerged company to a resulting company.

In cases where shares of an Indian company are transferred by a foreign company or a demerged foreign company to another foreign company or resulting foreign company, there is no tax payable, provided it satisfies certain specified conditions. Furthermore, the shareholder of the amalgamating company or demerged company is not liable to pay capital gains tax on the exchange of shares with that of the amalgamating company or the resulting company under the scheme of amalgamation.

Conversion of a bond or debenture of a company into equity shares is specifically exempt from capital gains tax. Furthermore, conversion of preference shares to equity shares will now be exempt from capital gains tax. The cost of acquisition and period of holding of the preference shares will be considered while determining the cost of acquisition and period of holding of equity shares acquired on such conversion. This is effective from tax year 2018/19 onwards.

Carryforward of accumulated losses of amalgamating company

The losses and unabsorbed deprecation of the amalgamating company are deemed to be those of the amalgamated company in the year in which the amalgamation takes place, provided it satisfies certain specified conditions.

In the case of amalgamation of a company owning an industrial undertaking, the amalgamated company shall achieve the level of production of at least 50% of the installed capacity of the undertaking before the end of four years from the date of amalgamation and continue to maintain the minimum level of production till the end of five years from the date of amalgamation. If these conditions are violated, the benefit claimed will be taxed in the hands of the amalgamated company in the year of default.

In case of demerger of a company, the accumulated losses or unabsorbed depreciation of the demerged company directly relatable to the undertaking or the division transferred is allowed to be carried forward and offset in the hands of the resulting company.

Amalgamations and demergers normally attract stamp duty at varying rates. Such rates are derived from the laws of the state involved. High court(s), stock exchange, and other regulatory clearances are required for amalgamations or demergers.

Inter-governmental agreements (IGAs)

The Indian government has signed an IGA with the United States (US) to implement the Foreign Account Tax Compliance Act (FATCA) in India. According to the IGA, foreign financial institutions (FFIs) in India are required to report tax information about US account holders to the Indian government, which will, in turn, relay the information about Indian account holders to the US Internal Revenue Service (IRS). Furthermore, the US IRS will provide similar information about Indian citizens having any accounts or assets in the United States. This automatic exchange of information began from 30 September 2015. Subsequent to the signing of the IGA, the Indian government enacted rules relating to FATCA reporting in India.

Significant developments

Indonesia has legalised Law No.9 Year 2017 to allow financial information access by the Director General of Tax (DGT) from financial institutions for tax purposes. This also marks Indonesia's readiness to implement Automatic Exchange of Financial Account Information (AEoI) in September 2018.

In keeping with Indonesia's commitment to implement Base Erosion and Profit Shifting (BEPS) Action 13, Indonesian parent entities or Indonesian subsidiaries of multinational enterprises that meets certain conditions are required to prepare and file Country-by-Country (CbC) Report to the DGT starting with the 2016 tax year.

In addition, the Parliament and government are currently organising an overall tax reform, including the revision of General Tax Provisions and Procedures (*Ketentuan Umum dan Tata Cara Perpajakan* or KUP) Law. To date, the draft bill of KUP Law has entered into the Parliament, and preliminary discussions have already begun.

Separately, the government also has a vision to establish Indonesia as a country with proven digital capacity in Southeast Asia's largest economy by 2020. Therefore, the government has highlighted the need for a road map for the development of national e-commerce and regulations related to e-commerce, including tax incentives to support the development of digital small, micro, and medium enterprises.

Noting the increase of large-scale projects in Indonesia, the government has updated tax holiday incentives to be more simple and attractive for investors. The government also plans to provide tax incentives for companies conducting research and development (R&D), as well as vocational training, activities.

Taxes on corporate income

Resident corporations are taxed based on worldwide income. A foreign company carrying out business activities through a permanent establishment (PE) in Indonesia will generally be required to assume the same tax obligations as a resident taxpayer.

Taxable business profits are calculated on the basis of normal accounting principles as modified by certain tax adjustments. Generally, a deduction is allowed for all expenditures incurred to obtain, collect, and maintain taxable business profits. A timing difference may arise if an expenditure recorded as an expense for accounting cannot be immediately claimed as a deduction for tax (*see the Deductions section*).

Resident taxpayers and Indonesian PEs of foreign companies have to settle their tax liabilities either by direct payments, third party withholdings, or a combination of both.

Indonesia

Foreign companies without a PE in Indonesia have to settle their tax liabilities for their Indonesian-sourced income through withholding of the tax by the Indonesian party paying the income.

Corporate income tax (CIT) rates

A flat CIT rate of 25% applies to net taxable income.

Public company discount

Public companies that satisfy a minimum listing requirement of 40% and certain other conditions are entitled to a tax discount of 5% off the standard rate, providing an effective tax rate of 20%.

Small company discount

Small enterprises (i.e. corporate taxpayers with an annual turnover of not more than 50 billion rupiah [IDR]) are entitled to a 50% tax discount of the standard rate, which is imposed proportionally on taxable income on the part of gross turnover up to IDR 4.8 billion. Certain enterprises with gross turnover of not more than IDR 4.8 billion are subject to final income tax at 1% of turnover.

Final income tax

Certain types of income are subject to a final income tax at a specified percentage of the gross amount of income, without regard to any attributable expenses.

Income	Tax rate (%)
Rental of land and/or building	10
Proceeds from transfers of land and building rights	2.5 (1)
Fees for construction work performance	2/3/4
Fees for construction work planning	4/6
Fees for construction work supervision	4/6
Interest on time or saving deposits and on Bank of Indonesia Certificates (SBIs), other than that payable to banks operating in Indonesia and to government-approved pension funds	20 (2)
Interest on bonds, other than that payable to banks operating in Indonesia and government-approved pension funds	15 (3)
Proceeds from sale of shares on Indonesian stock exchanges. To use this rate, founder shareholders must pay tax at 0.5% of the market price of their shares upon listing; otherwise, gains on subsequent sales are taxed under normal rules	0.1
Income from lottery prizes	25
Certain income received by individuals and corporates (except PEs) with gross turnover of not more than IDR 4.8 billion in one fiscal year	1 (4)

Notes

1. Proceeds from the transfer of real estate assets to a Real Estate Investment Fund (*Kontrak Investasi Kolektif - Dana Investasi Real Estate* or KIK-DIRE) is subject to a 0.5% tax rate.
2. Different rates apply on interest received from time deposits sourced from export proceeds *(Devisa Hasil Ekspor*).
3. If the recipient is a mutual fund registered with the Financial Services Authority (*Otoritas Jasa Keuangan* or OJK), the tax rate is 5% until 2020 and 10% thereafter. If the recipient is a non-resident taxpayer, the tax rate is 20% or a lower rate in accordance with the relevant tax treaty.
4. Taxpayers must calculate, pay, and report the tax due to the Indonesian Tax Office (ITO) by themselves.

Resident companies, PEs, representatives of foreign companies, organisations, and appointed individuals are required to withhold the above final tax from the gross payments to resident taxpayers and PEs.

Special industries and activities

Companies engaged in upstream oil and gas and geothermal industries typically have to calculate CIT in accordance with their production sharing contracts (PSCs). Certain companies engaged in metal, mineral, and coal mining are governed by a contract of work (CoW) for the income tax calculation. Different provisions may apply to them, pertaining to CIT rates, deductible expenses, and how to calculate taxable income.

Note that such contractual-based concessions are no longer available to new mining projects since the enactment of the Mining Law in 2009. The Mining Law stipulates that general prevailing tax laws/regulations apply to mining projects; consequently, any tax facilities should be provided accordingly, except as otherwise stated in a particular mining licence.

Local income taxes

There are no provincial or local taxes on income in Indonesia. *For a list of other local taxes, see Regional taxes in the Other taxes section*.

Corporate residence

A company is treated as a resident of Indonesia for tax purposes by virtue of having its establishment or its place of management in Indonesia.

Permanent establishment (PE)

Under the Income Tax Law, a non-resident company may be treated as having a taxable presence if it runs a business or conducts activities in Indonesia, which can be in the form of:

- a place of management
- a branch of the company
- a representative office
- an office building
- a factory
- a workshop
- a warehouse
- a room for promotion and selling
- a mining and extraction of natural resources
- a mining working area for oil and natural gas
- a fishery, animal husbandry, agriculture, plantation, or forestry location
- a project of construction, installation, or assembly
- the furnishing of services in whatever form by employees or other person, insofar conducted not more than 60 days within a 12-month period
- a person or corporation acting as a dependent agent
- an agent or employee of an insurance company that is not established and domiciled in Indonesia that receives insurance premiums or insures risk in Indonesia, and
- the computers, electronic agent, or automated equipment owned, leased, or used by an electronic transactions provider to conduct business via the internet.

Where the non-resident company is resident in a country that has a tax treaty with Indonesia, the rules on a PE creation may be changed; usually there is a longer 'time test' for certain activities performed in Indonesia.

Other taxes

Value-added tax (VAT)

With a few exceptions, VAT is applicable on deliveries (sales) of goods and services within Indonesia at a rate of 10%. VAT on export of goods is zero-rated, while the import of goods is subject to VAT at a rate of 10%. Zero-rated VAT is also applicable on exported services, but subject to a Ministry of Finance (MoF) limitation. Currently, only certain exported services, including toll manufacturing services, are subject to the 0% VAT rate. Services performed within the Customs Area for customers outside of the Customs Area are considered as locally delivered and are therefore subject to the regular VAT rate of 10%. Inbound use or consumption of foreign services or intangible goods, with a few exceptions, is also subject to a self-assessed VAT at a rate of 10%.

The VAT law allows the government to change the VAT rate within the range of 5% to 15%. However, since the enactment of the VAT law in 1984, the government has never changed the VAT rate.

In general, VAT collection is based on the accrual principle, whereby VAT must be collected at the time of delivery of taxable goods or services. The term delivery, in this case, is defined as the time when risk and ownership of goods have been transferred or when income from a service delivery can be reliably estimated or measured. In the accrual system, income or receivables are acknowledged when a transaction takes place, regardless of whether the transaction has been paid for or not. The recognition of revenue or receivables is indicated by the issue of a commercial invoice, which is a source document for this recognition and a basis for recording it.

VAT filing is done on a monthly basis, with payment and filing being due no later than the last day of the month following the taxable delivery.

Luxury-goods sales tax (LST)

In addition to VAT, some goods (e.g. certain household appliances, sport equipment, motor vehicles, luxury residences) are subject to LST upon import or delivery by the manufacturer to another party at rates currently ranging from 10% to 125%.

Import duty

Import duty is payable at rates from 0% to 150% on the customs value of imported goods. Customs value is calculated on the cost, insurance, and freight (CIF) level.

Group	Good	Rate (%)
Automobiles	Passenger and commercial	5 to 50
Automobile components	Incompletely knocked down	0 to 7.5
	Part by part	0 to 10
Vessels	Ships, boats, and floating structures	0 to 5
Aircraft	Balloons, helicopters, aeroplanes, parachutes, and aircraft launching gear	0
Electronic goods	Camera, refrigerator, cellular phone, and others	0 to 15
Textile, textile products, and accessories	Bags, footwear, harnesses, apparels, clothing accessories, etc.	5 to 35
Beverages, ethyl alcohol, and alcoholic drinks	Ethyl alcohol, juice, beer, wine, spirits, and other beverages	5 to 150, or IDR 14,000/litre
Essential oils and resinoids	Odoriferous substances	5 to 150
Agricultural products	Animal and vegetable products	0 to 30

Group	Good	Rate (%)
Furniture	Bedding, mattresses, lamp and lighting fittings, and others	5 to 20
Toys	Toys, games and sport requisites, parts and accessories thereof	5 to 20
Plastic	Plastics and articles thereof	0 to 25
Rubber	Rubber and articles thereof	0 to 15
Wood	Wood and articles thereof	0 to 25
Steel	Steel and articles thereof	0 to 20
Others	Chemicals, pharmaceutical products, works of art, arms and ammunition, musical instruments, and others	0 to 40

As a commitment to liberalising trade, the Indonesian government is progressively lowering import duty rates on most products. Higher duty rates remain to protect certain industries and goods regarded as sensitive for security or social and cultural reasons.

Duty relief/exemption/deferral

The Indonesian government offers duty relief, duty exemption, and duty deferral concessions to foreign and domestic investors in order to promote the development of local and export industries. These concessions usually combine with other tax facilities, such as VAT and income tax. Such concessions include the *Badan Koordinasi Penanaman Modal* (BKPM) Masterlist, Bonded Zone, Bonded Warehouse, import duty exemption and drawback for exports, Free Trade Zone (FTZ), Association of Southeast Asian Nations (ASEAN) duty rates, Free Trade Area (FTA) agreement duty rates with several countries, Indonesia-Japan Economic Partnership Agreement (IJEPA), MITA (main partners) lanes, and Authorised Economic Operator.

Land and buildings tax

Land and buildings tax (*Pajak Bumi dan Bangunan* or PBB) is a part of regional taxes, which are governed under Regional Taxes and Retribution (*Pajak Daerah dan Retribusi Daerah* or PDRD) Law in which each regional government has to issue a regulation (*Peraturan Daerah* or PERDA) to regulate PBB in its territory.

The scope of PBB under PDRD Law covers all land and buildings except for the following industries, which are governed by separate regulations:

- Forestry.
- Plantation.
- Mineral and coal mining.
- Oil, gas, and geothermal mining.
- Other industries located in national waters outside the territory of the regional area.

Under PDRD Law, the PBB rate is maximum 0.3% and the tax due is calculated by applying the tax rate on the sale value of the tax object (*Nilai Jual Objek Pajak* or NJOP) deducted by non-taxable NJOP. The non-taxable NJOP is set at a minimum of IDR 10 million. Any changes are to be made by issuing a PERDA.

Tax on land and buildings transfer

A transfer of land and buildings will cause income tax on the deemed gain on the transfer/sale to be charged to the transferor/seller. The tax is set at 2.5% of the gross transfer value or the government-determined value, whichever is greater (*see Final income tax in the Taxes on corporate income section*).

Duty on the acquisition of land and building rights

In a land and building transfer, the acquirer is liable for duty on the acquisition of land and building rights (*Bea Pengalihan Hak atas Tanah dan Bangunan* or BPHTB) at a maximum of 5% of the greater of the transaction value or the government-determined value. Similar to PBB, BPHTB has been made a part of regional taxes.

Stamp duty

Stamp duty is nominal and payable as a fixed amount of either IDR 6,000 or IDR 3,000 on certain documents.

Payroll taxes

There are no additional payroll taxes applicable other than those for social security contributions (*see below*) and employee income tax withheld by employer on the salary payment.

Social security contributions

Employers are responsible for ascertaining that their employees are covered by the workers social security program managed by *Badan Penyelenggara Jaminan Sosial* (BPJS), which provides working accidents protection, death insurance, old age savings, health care, and pension. The program calls for premium contributions from both the employers and the employees. Employees' contributions are collected through payroll deductions. The premium contributions borne by employers are calculated as a percentage of regular salaries/wages, ranging from 0.24% to 4%.

The scheme applies to all employees, including expatriates who have been working in Indonesia for more than six months.

Regional taxes

A corporate taxpayer may be liable for a number of regional taxes and retributions. The rates range from 1.5% to 35% of a wide number of reference values determined by the relevant regional governments. The following are regional taxes, other than PBB and BPHTB, that may apply:

- Motor vehicle tax.
- Motor vehicle ownership transfer fee.
- Motor vehicle fuel tax.
- Surface water tax.
- Cigarette tax.
- Hotel tax.
- Restaurant tax.
- Entertainment tax.
- Advertisement tax.
- Road illumination tax.
- Non-metal and rock minerals tax.
- Parking tax.
- Ground water tax.
- Swallow-nest tax.

Branch income

Branch profits are subject to the ordinary CIT rate of 25%. The after-tax profits are subject to a withholding tax (WHT) (i.e. branch profits tax or BPT) at 20%, regardless of whether the profits are remitted to the home country. However, a concessional WHT rate may be applicable where a tax treaty is in force (*see the Withholding taxes section for more information*). The BPT may be exempt if the profits are entirely reinvested in Indonesia (*see the Tax credits and incentives section for more information*).

Income determination

Inventory valuation

Inventories must be measured at cost by using either the average or first in first out (FIFO) method. Once a costing method is adopted, it must be applied consistently.

Capital gains

Capital gains are generally assessable together with ordinary income and subject to tax at the standard CIT rate. However, gains from the transfer of land and buildings are not subject to regular CIT, but rather are subject to final income tax at a rate of 2.5% of the transaction value or the government-determined value, whichever is higher.

The proceeds from sales of shares listed on the Indonesian stock exchange are not subject to normal CIT. Instead, the proceeds are subject only to a final WHT of 0.1% of the gross sales consideration. An additional tax of 0.5% applies to the share value of founder shares at the time an initial public offering takes place, irrespective of whether the shares are held or sold. Shareholders may elect not to pay this tax, in which case the actual gain will be subject to normal tax at the time the shares are sold.

Dividend income

In principle, dividend income received by a resident taxpayer from a limited liability company (generally referred to as a *Perseroan Terbatas* or PT) is taxable as ordinary income for the taxpayer receiving the dividend. However, if the dividend recipient is a PT with a minimum shareholding of 25% in the company paying the dividend and the dividend is paid out of retained earnings, it is exempt from CIT.

Where the recipient is not resident in Indonesia, a WHT rate of 20% applies, subject to variation by tax treaties (*see the Withholding taxes section for more information*).

The same rules apply to stock dividends (bonus shares), including dividends paid out of share premium (*agio*).

Interest income

Interest income on time or saving deposits and on Bank of Indonesia Certificates (SBIs) received by a resident company or a PE is taxed at a final tax rate of 20%.

Royalty income

Income from royalty is subject to tax and will be taxed by a WHT mechanism. The WHT rate on royalty is 15% of the gross amount for resident taxpayers and 20% of the gross amount for non-resident taxpayers or the reduced rate set out in a tax treaty. The domestic WHT on this royalty can be used as a tax credit against the normal income tax of 25% for corporate taxpayers and/or 30% (max) for individual taxpayers.

Exchange gains and losses

Gains and losses arising from currency fluctuations are generally recognised on an accrual basis in accordance with the prevailing Indonesian Accounting Standards, which resemble International Accounting Standards in most respects.

Foreign income

Foreign branch income of an Indonesian company must be accounted for as Indonesian taxable income under the controlled foreign companies (CFCs) regulation. Profits of a CFCs are subject to deemed dividend rules in Indonesia. A CFC is a foreign entity that is at least 50% owned by an Indonesian taxpayer or at least 50% collectively owned by Indonesian taxpayers. The scope of CFC income also covers income from indirectly owned CFCs with a minimum of 50% ownership by another CFC, collective ownership by an Indonesian taxpayer's CFC, or collective ownership by a number of CFCs (including under the same or different Indonesian taxpayers).

The ownership threshold that is used to determine the CFC status is the ownership percentage at the end of the Indonesian taxpayer's fiscal year, which is based on either the percentage of paid-up capital or the percentage of paid-up capital with voting rights. The only situation in which the rules do not apply is when the CFC's shares are listed on a recognised stock exchange.

Deductions

In general, expenses incurred in the ordinary course of business (to obtain, collect, and maintain taxable income) are deductible, subject to the requirements for documentary support.

Note that expenses relating to gross income subject to final income tax are not deductible for CIT purposes.

Depreciation, amortisation, and depletion

Depreciable/amortisable assets include both tangible and intangible property or costs, including the cost of extending building use rights, rights for business use, rights for use, and goodwill, with a useful life of more than one year, except land that is owned and used in business. Depreciation and amortisation may be calculated under the straight-line method or the declining-balance method on an individual asset basis. Once a method is chosen, it should be applied consistently. In calculating depreciation, depreciable assets are divided into the following classes:

	Depreciation/amortisation rate (%)	
Class	**Straight-line method**	**Declining-balance method**
Property:		
Useful life of 4 years	25	50
Useful life of 8 years	12.5	25
Useful life of 16 years	6.25	12.5
Useful life of 20 years	5	10
Buildings:		
Permanent	5	-
Non-permanent	10	-

Special rules apply for assets used in certain business fields and/or certain areas. Tax depreciation need not conform to book depreciation.

The costs incurred for acquiring rights, with a beneficial life of more than one year, for mining, oil, and natural gas concessions; forest concessions; and other rights to exploit natural resources should be amortised by the production-unit method. Except for the right to acquire oil and natural gas concessions, the depletion rate used should not exceed 20% *per annum*.

Organisational and start-up expenses

The costs of incorporation and expansion of the capital of an enterprise are claimed in full in the year in which the expenditure is incurred or are amortised using either the declining-balance or straight-line method at the above rates.

Costs incurred before the commencement of commercial operations with a useful life of longer than one year are capitalised and amortised according to the above rates.

Interest expense

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes.

Interest on loans relating to time deposits (which income is subject to a final tax) is not deductible.

Interest on loans used to buy shares where dividends to be received are not subject to income tax is also not deductible.

A debt-to-equity ratio of 4:1 is generally applicable, which means that the amount of debt allowable in order to obtain full deductibility of the financing cost is limited to four times the equity amount. Exemption applies to certain taxpayers.

Bad debts

Uncollectible debts are deductible for tax purposes, with the following conditions:

- The creditor has recognised the amount of uncollectible receivables as expenses in the commercial income statement.
- The taxpayer must submit a list of uncollectible account receivables to the Directorate General of Tax.
- A legal case to enforce collection has been brought to a District Court or government agency that handles state receivables, there is a written agreement on cancellation of receivables/debt release and discharge between the concerned creditor and debtor, it has been publicised in a general or a special publication, or the debtor has otherwise acknowledged that one's debts have been cancelled.

Charitable contributions

Donations for national disasters, education facilities, sport development, and social infrastructures, with certain conditions, may be deductible in the fiscal year when the donations are provided.

Benefits in kind

Most benefits received in kind by employees, such as free housing, are not tax-deductible to the entity providing the benefit. Free motor vehicle and telephone expenses, including depreciation, are tax-deductible but only for 50% of the total expenses incurred. Expenses for meals and transportation made available to all staff are tax-deductible. Apart from these, certain benefits in kind (e.g. housing provided in remote areas as designated by the MoF, Integrated Economic Development Zones as designated by Presidential Decree) can also be claimed as tax-deductible expenses.

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Land and buildings tax and regional taxes may be deducted from taxable income. With several exceptions, input VAT is also deductible against taxable income as long as it is not claimed as a credit against output VAT.

Net operating losses

Losses may be carried forward for a maximum period of five years. Carrying back of losses is not permitted. Offsetting losses within a corporate group is not permitted.

Payments to foreign affiliates

WHT is applied as a final tax on the recipient for payments of royalties, interest, and service fees to foreign non-resident companies. Excessive and non-arm's-length payments to related parties are disallowed as deductions. The tax law denies deductions for all payments from a branch to its head office for royalties, interest, and services provided by the head office (exceptions apply for loans between bank branches and their head offices).

Group taxation

Consolidated returns are not allowed in Indonesia.

Transfer pricing

Transactions between related parties must be consistent with the arm's-length principle. If the arm's-length principle is not followed, the DGT is authorised to recalculate the taxable income or deductible costs arising from such transactions applying the arm's-length principle.

Under the General Tax Provisions and Procedures (*Ketentuan Umum dan Tata Cara Perpajakan* or KUP) Law, the government requires specific transfer pricing documentation to prove the arm's-length nature of related-party transactions.

The MoF issued a regulation, dated 30 December 2016, regarding transfer pricing documentation, which requires taxpayers under certain criteria to prepare transfer pricing documentation, namely the Master File, Local File, and Country-by-Country (CbC) Report.

Detailed transfer pricing disclosures are required in the CIT return, which include the following:

- The nature and value of transactions with related parties.
- The transfer pricing methods applied to those transactions and the rationale for selecting the methods.

- Whether the company has prepared transfer pricing documentation.

Transfer pricing disputes may be resolved through the domestic objection and appeal process, or, where the dispute involves a transaction with a related party in a country that is one of Indonesia's tax treaty partners, the parties may request double tax relief under the Mutual Agreement Procedures (MAP) article of the relevant tax treaty. There is a restriction that an MAP application cannot be lodged when the Tax Court has declared an end to the court hearing process, and an existing MAP will cease when the Tax Court announces its decision. If a party is not satisfied with the Tax Court decision, a judicial review by the Supreme Court is allowed.

The tax law authorises the DGT to enter into Advance Pricing Agreements (APAs) with taxpayers and/or another tax country's tax authority only on the future application of the arm's-length principle to transactions between related parties; consequently, taxpayers should not expect an APA to be 'rolled-back' to address any transfer pricing matters in open years in relation to the same/similar transactions. Once agreed, an APA will typically be valid for a maximum of three tax years after the tax year in which the APA is agreed or four years if the process involves cooperation with foreign tax authorities that escalate an APA application to be an MAP in order to settle any ongoing double taxation in accordance with a relevant tax treaty.

Increase in transfer pricing focused investigations

The number of tax audits with transfer pricing as the key focus area has continued to increase following the issuance of regulations relating to transfer pricing. The DGT has issued detailed guidelines that, broadly stated, typically follow Organisation for Economic Co-operation and Development (OECD) principles. Transactions under particularly close scrutiny include payments of royalties and technical or management services fees, inter-company services, royalty and financing transactions, and exports to related parties.

Where a taxpayer has no documentation available to substantiate these transactions, there is a high risk that deductions for the payments will be denied in full. In this regard, the 30-day time limit within which a taxpayer must produce any documentation requested by the ITO during an audit is being strictly enforced. Any documentation provided after the 30-day time limit is being disregarded by the ITO in its decision making process.

Transfer pricing specific audits are regularly conducted by the ITO, with the high priority targets generally identified based on:

- profit performance of the company (companies that have incurred consistent losses will be the highest priority, but there is also a risk of being selected for companies with profits below industry norms) and
- materiality of the company's related-party transactions.

The ITO has issued questionnaires to several taxpayers who are not under an audit that focus primarily on transfer pricing issues. It is possible that the information gathered by the ITO from these questionnaires will lead to follow-up investigations or audits in some cases.

The DGT has also reinforced tax audit procedures for taxpayers with related-party transactions. This regulation provides more clarity and is more relevant with the current transfer pricing issues in practice (e.g. the use of the median point as the basis of correction, mandatory use of the comparable uncontrolled price [CUP] method for interest, the use of multiple year data for comparables). Comprehensive forms required to be completed by the taxpayers during a tax audit are also provided in the regulation.

Thin capitalisation

The MoF is authorised to make a determination on an appropriate ratio of debt to equity. The general ratio of 4:1 is applicable for group companies, except for exempted taxpayers.

Controlled foreign companies (CFCs)

See Foreign income in the Income determination section for a description of the CFC regime.

Tax credits and incentives

Foreign tax credit

Tax paid or payable in foreign countries upon income from abroad received or obtained by a resident taxpayer may be credited against tax payable in Indonesia in the same fiscal year.

The amount of tax credit is the same amount as income tax paid or payable abroad, but shall not exceed tax payable calculated according to the Indonesian tax law.

Revaluation of fixed assets

Certain taxpayers may apply for fixed asset revaluation for tax purposes with approval from the DGT. The excess of the fair market value over the tax book value of the revalued assets is subject to final income tax at a rate of 10%.

Income tax concessions

Tax holiday

The MoF may provide a tax holiday of 100% of the CIT due for 5 to 20 years from the start of commercial production, depending on the investment amount. After the end of the tax holiday, the companies will receive a 50% CIT reduction for two years.

This facility is provided to new investments in pioneer industries that have a wide range of connections, provide additional value and high externalities, introduce new technologies, and have strategic value for the national economy. Currently, this facility is available for the following business sectors:

- Integrated upstream basic metal.
- Integrated oil and gas refinery.
- Integrated petrochemicals from oil, gas, or coal.
- Integrated inorganic basic chemicals.
- Integrated organic basic chemicals from agriculture, plantation, or forestry products.
- Integrated pharmaceutical raw materials.
- Semi-conductor and other main components of computers that are integrated with computer manufacturing.
- Main components of communication equipment that are integrated with smartphone manufacturing.

- Main components of health equipment that are integrated with irradiation, electro medical, or electrotherapy manufacturing.
- Main components of industrial machinery that are integrated with machinery manufacturing.
- Main components of machinery that are integrated with motor vehicles manufacturing.
- Robotics components that are integrated with the manufacturing industry.
- Main components of vessels that are integrated with vessel manufacturing.
- Main components of aircraft that are integrated with aircraft manufacturing.
- Main components of trains that are integrated with train manufacturing.
- Power plant machinery.
- Economic infrastructure.

An application must be submitted to the Investment Coordinating Board (*Badan Koordinasi Penanaman Modal* or BKPM) Chairman prior to the start of commercial production. A proposal for the MoF's approval will be made by the BKPM Chairman after carrying out review on the applicant. Under the latest regulation, the proposal can be submitted to the MoF until 3 April 2023.

Inbound investment incentives

The MoF may provide the following tax concessions to PT companies following their investment in certain designated business areas or in certain designated regions:

- A reduction in net income of up to 30% of the amount invested, prorated at 5% for six years of the commercial production, provided that the assets invested are not transferred out within six years.
- Accelerated depreciation and/or amortisation deductions.
- Extension of tax losses carryforward for up to ten years.
- A reduction of the WHT rate on dividends paid to non-residents to 10% (or lower if treaty relief is available).

The applicant must meet one of the following high-level criteria to be eligible for the above tax facilities:

- High investment value or for export purposes.
- High absorption of manpower.
- High local content.

Recommendation from the BKPM Chairman must first be obtained, together with the application for investment approval, before MoF approval for the tax facilities can be sought.

Special Economic Zones (Kawasan Ekonomi Khusus or KEKs)

Taxpayers conducting business in KEKs may enjoy tax facilities. The business should cover the main activities determined for each KEK. The designation of an area as a KEK is set out in a specific government regulation.

CIT reduction facility may be granted for new taxpayers with new capital invested in the production chain of main activities in a KEK, as described below:

Investment plan (IDR, in billions)	Reduction period (in years)	CIT reduction
Less than 500	5 to 15	MoF discretion

Investment plan (IDR, in billions)	Reduction period (in years)	CIT reduction
500 up to 1,000	5 to 15	20% to 100%
More than 1,000	10 to 25	20% to 100%

Taxpayers being rejected for the CIT reduction facility and taxpayers carrying out other activities in a KEK may apply for similar inbound investment incentives under the income tax concessions.

On top of the above income tax facilities, taxpayers in a KEK are also entitled to the following tax facilities:

- Non-collection of VAT and LST on importation of certain goods.
- Non-collection of Article 22 Income Tax on importation of certain goods.
- Postponement of import duty on capital goods and equipment, and goods and materials for processing.
- Exemption of excise on importation of goods to be used to produce non-excisable goods.
- Non-collection of VAT and LST on the domestic purchases of certain goods.

Integrated Economic Development Zones (Kawasan Pengembangan Ekonomi Terpadu or KAPETs)

Companies conducting business in KAPET may enjoy tax facilities. The designation of an area as a KAPET is set out in a specific Presidential Decree.

An Entrepreneur in Bonded Zone (*Pengusaha di Kawasan Berikat* or PDKB) in a KAPET may be granted tax facilities in the form of:

- Income tax facilities similar to inbound investment incentives under the income tax concessions.
- Non-collection of VAT and LST on importation of certain goods.
- Exemption of Article 22 Income Tax on importation of certain goods.
- Postponement of import duty on capital goods and equipment, and goods and materials for processing.
- Non-collection of VAT and LST on the domestic purchases of certain goods.

Bonded Stockpiling Area

Bonded Stockpiling Area (*Tempat Penimbunan Berikat*) currently consists of:

- Bonded Zones.
- Bonded Warehouse.
- Bonded Exhibition Place.
- Duty Free Shop.
- Bonded Auction Place.
- Bonded Recycled Area.
- Bonded Logistic Centre.

We will only highlight three prominent areas in the below sections.

The tax facilities in these areas are as follows:

- Non-collection of VAT and LST on importation of certain goods.
- Non-collection of Article 22 Income Tax on importation of certain goods.

- Postponement of import duty on certain goods.
- Exemption of excise on importation of certain goods.
- Non-collection of VAT and LST on the domestic purchases of certain goods.

Bonded Zones

The Bonded Zones (*Kawasan Berikat*) facility is provided to companies producing finished goods that are mainly for export, with the domestic sales quota of 50% of the previous year export realisation value and/or sales value to other Bonded Zones/FTZs/KEKs. The import duty, VAT, LST, and Article 22 Income Tax are also exempted for importation of machinery.

Bonded Warehouse

The Bonded Warehouse (*Gudang Berikat*) facility is intended to store imported goods that can be processed with one or more activities within one year.

Bonded Logistic Centre

The Bonded Logistic Centre (*Pusat Logistik Berikat*) facility is similar to the Bonded Warehouse facility; however, it is intended to store both imported goods from outside the Customs Area and/or goods from other places within the Indonesia Customs Area that can be processed with one or more simple activities within three years.

Free Trade Zones (FTZs)

Goods entered into and goods delivered amongst companies inside an FTZ (*Kawasan Perdagangan Bebas*) may enjoy tax facility.

Taxpayers in FTZs are entitled to the following tax facilities:

- Exemption of VAT and LST on importation of certain goods.
- Non-collection of Article 22 Income Tax on importation of certain goods.
- Exemption of import duty on certain goods.
- Exemption of excise on importation of certain goods.
- Non-collection of VAT and LST on the domestic purchases of certain goods.
- Transactions of intangible goods and taxable services are exempted from VAT, except for those delivered to other Indonesia Customs Area and Bonded Stockpiling Area or Special Economic Zones companies.

Industrial Zones (Kawasan Industri or KIs)

The determination and licensing of a KI is as granted by the government. The applicable tax facilities depend on the classification of the Industrial Development Area (IDA) (*Wilayah Pengembangan Industri* or WPI) of the KI, namely:

- Advance IDA (WPI *Maju* or WPIM).
- Developing IDA (WPI *Berkembang* or WPIB).
- Potential I IDA (WPI *Potensial I* or WPIP I).
- Potential II IDA (WPI *Potensial II* or WPIP II).

Below are the available tax facilities for each type of WPI:

Tax and customs facility	WPIM*	WPIB	WPIP I	WPIP II
CIT reduction of 10% to 100% of the CIT due for 5 to 15 years from the start of commercial production	Yes	–	–	Yes

Tax and customs facility	WPIM*	WPIB	WPIP I	WPIP II
Income tax facilities similar to inbound investment incentives under the income tax concessions	Yes	Yes	Yes	–
VAT exemption on the imports/purchase of machines and equipment (excluding spare parts) that are directly used to produce VATable goods	Yes	Yes	Yes	Yes
Import duty exemption on the imports of machines or materials that are used to produce goods/services**	Yes	Yes	Yes	Yes

Notes

* WPIM may choose to apply income tax facility in the form of CIT reduction or inbound investment incentives.

** The applicable period of import duty exemption varies depending on the KI classification and the business cycle of the respective taxpayer (e.g. construction or developing stage).

Reinvestment of branch profits

PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from BPT on these profits. The reinvestment should be one of the following forms:

- As a founder or a participant founder in a newly established Indonesian company through capital participation.
- As a shareholder of an established Indonesian company through capital participation.
- Acquisition of a fixed asset used by the PE to conduct its business or activities in Indonesia.
- Investment in the form of an intangible asset used by the PE to conduct its business or activities in Indonesia.

Shares in a newly established company shall not be transferred until, at a minimum, two years from the date that the company commences commercial production. With regard to the investment in an established Indonesian company, acquisition of a fixed asset, or investment of an intangible asset, the investment shall not be transferred until, at a minimum, three years after the investment.

Other incentives

Income earned by venture capital companies in the form of profit sharing from their investments in Indonesia is exempt from tax, provided that the following conditions are met:

- Entities are small or medium-scale businesses in one of the sectors designated by the Indonesian government.
- Investments are not listed on the Indonesian stock exchange.

Withholding taxes

Indonesian income tax is collected mainly through a system of WHTs. Where a particular income item is subject to WHT, the payer is generally held responsible for withholding or collecting the tax. These WHTs are commonly referred to using the relevant article of the Income Tax (*Pajak Penghasilan* or PPh) Law, as follows.

Article 23/26 Income Tax (PPh 23/26)

PPh 23/26 is levied on a variety of payments to corporations and individuals, resident and non-resident, at the following rates:

	WHT (%)				
	Dividends				
Recipient	Portfolio	Substantial holdings	Interest	Royalties	Branch profits (8)
Resident corporations	15	0	15	15	N/A
Resident individuals	10	10	15	15	N/A

Vietnam	15	15	0/15 (6a)	15	10
Zimbabwe (1, 5)	20	10	0/10 (6a)	15	10

Domestic Article 23 WHT is also payable at the rate of 2% for most types of services where the recipient of the payment is an Indonesian resident.

Notes

1. Service fees, including for technical, management, and consulting services, rendered in Indonesia are subject to WHT at rates of 5% for Switzerland; 7.5% for Germany; 10% for India, Luxembourg, Papua New Guinea, Venezuela, and Zimbabwe; and 15% for Pakistan.
2. VAT is reciprocally exempted from the income earned on the operation of ships or aircraft in international lanes.

3. The treaty is silent concerning BPT rate. The ITO interprets this to mean that the tax rate under Indonesian Tax Law (20%) should apply.
4. Labuan offshore companies (under the Labuan Offshore Business Activity Tax Act 1990) are not entitled to the tax treaty benefits.
5. A protocol amending the tax treaty has been signed, pending the ratification of the protocol and the exchange of ratification documents.
6. Interest:
   a. Exempt if paid to the government.
   b. Exempt if paid to a bank but linked to a government loan agreement or paid to specific financial institutions/banks.
7. Royalties:
   a. The use of, or the right to use, any copyright, patent, design or model, plan, secret formula or process, trademark, or other like property or right.
   b. The use of, or the right to use, any industrial, commercial, or scientific equipment.
   c. The supply of scientific, technical, industrial, or commercial knowledge or information.
   d. The use of, or the right to use, any copyright of literary, artistic, or scientific work, including cinematography films and films or tapes for television or radio broadcasting.
8. PEs that reinvest their after-tax profits in Indonesia within the same year or no later than the following year are exempt from BPT on these profits (*see the Tax credits and incentives section*).

The issue of beneficial ownership has come under tax office scrutiny. For treaty WHT rates to apply to passive income such as interests, dividends, and royalties, the recipient of such income must be the beneficial owner. The recipient must also provide a Certificate of Domicile (CoD) in the form required by the ITO and certified by their home country tax authority that the recipient is a tax resident of that country. The CoD in the form prepared by the other country's tax authority may only be used in limited circumstances. Further, the CoD form also requires a number of declarations to be made by the recipient that acknowledges that the use of the treaty jurisdiction was not merely for obtaining the benefit of the treaty. These declarations place onerous obligations on both the Indonesian payer and the recipient entity. Without a certified CoD, a WHT at a rate of 20% will apply. These aspects need to be considered when paying income of this nature.

Article 22 Income Tax (PPh 22)

PPh 22 is typically applicable to the following:

Event		Tax rate (%)	Tax base
1	The import of:		Import value (i.e. CIF value plus duties payable)
	a. Certain end customer goods	10	
	b. End customer goods other than (a)	7.5	
	c. Goods other than (a) and (b) using an Importer Identification Number (*Angka Pengenal Impor* or API):		
	i. Soybeans, wheat, and flour wheat	0.5	
	ii. Other than (i)	2.5	
	d. Goods other than (a) and (b) without an API	7.5	
2	The auctioned imported goods	7.5	Auction prices
3	The sale of goods to the government requiring payment from the State Treasury and Proxy of Budget User (*Kuasa Pengguna Anggaran* or KPA) (1)	1.5	Selling prices
4	The sale of goods to State-Owned Enterprises (*Badan Usaha Milik Negara* or BUMN) and some of their subsidiaries (1, 3)	1.5	Selling prices
5	The purchase of oil fuel by gas stations from Pertamina and its subsidiaries (2)	0.25	Selling prices
6	The purchase of oil fuel by gas stations from parties other than Pertamina and its subsidiaries (2)	0.3	Selling prices
7	The purchase of oil fuel by parties other than gas stations (2)	0.3	Selling prices
8	The purchase of gas fuel (2)	0.3	Selling prices

Event		Tax rate (%)	Tax base
9	The purchase of lubricants	0.3	Selling prices
10	The purchase of cement by local distributors	0.25	Selling prices
11	The purchase of paper products by local distributors	0.1	Selling prices
12	The purchase of steel products by local distributors	0.3	Selling prices
13	The purchase of automotive products by local distributors	0.45	Selling prices
14	The purchase of pharmaceutical products by local distributors	0.3	Selling prices
15	The purchase of motor vehicles from Sole Agents (*Agen Tunggal Pemegang Merek* or ATPM), Agents (*Agen Pemegang Merek* or APM), and general importers (4)	0.45	Selling prices
16	The sale of forestry, plantation, agriculture, cattle breeding, and fishery products to manufacturers or exporters (1)	0.25	Selling prices
17	The export of coal, metal, and non-metal minerals by exporters other than those engaged in a mining cooperation agreement or a contract of work with the government	1.5	Export value
18	The sale of coal, metal, and non-metal minerals by companies or individuals holding a mining license (*Izin Usaha Pertambangan* or IUP) (1)	1.5	Selling prices
19	The purchase of gold bars (5)	0.45	Selling prices
20	The purchase of very luxurious goods	5	Selling prices

Notes

1. In events (3), (4), (16), and (18), the PPh 22 collectors must withhold PPh 22 from the amount payable to a particular vendor, except payments for the purchase/use of:
   - oil fuel, gas fuel, lubricants, postal products
   - water and electricity
   - oil or gas (including upstream by products) from a contractor of a PSC, the contractor's head office, or the contractor's trading arms, and
   - geothermal or electricity from a contractor of a Joint Operation Contract.

   There is also an exemption for the purchase of goods with a value of up to IDR 2 million, IDR 10 million, and IDR 20 million for events (3), (4), and (16) respectively. In the other events, the importer or the buyer of the designated goods must pay PPh 22 in addition to the amounts payable for the goods imported or purchased.

2. The withheld PPh 22 constitutes a pre-payment of corporate/individual income tax liabilities, except for the purchase of oil and gas fuel by distributors/agents, which is categorised as final tax.
3. Exception applies on the sale of forestry, plantation, agriculture, cattle breeding, and fishery products since it is already subject to PPh 22 in event (16).
4. Exception applies on the purchase of very luxurious motor vehicles since it is already subject to PPh 22 in event (20).
5. Exemption applies on the sale to Bank Indonesia.

The tax does not apply, either automatically or with an Exemption Certificate issued by the DGT, on the following types of events:

- Import/purchase of goods not subject to income tax.
- Import of goods exempted from import duties and/or VAT, subject to 0% import duty, or where VAT is not collected.
- Goods that have been temporarily imported (i.e. goods for re-export).
- Goods for re-importing (i.e. exported and re-imported in the same quality or to be repaired/tested).
- Import of gold bars for the production of jewellery for re-export.
- Purchase of goods related to the use of government school operations subsidy (*Bantuan Operasional Sekolah* or BOS) fund.

- The purchase of grain or rice by the State Treasury, KPA, and the Bureau of Logistics (*Badan Urusan Logistik or* BULOG).
- The purchase of necessary food products by BULOG or appointed BUMN.

Taxpayers without a Tax Identification Number will be subject to a surcharge of 100% in addition to the standard tax rate.

Tax administration

Payments of tax and tax returns filing

Tax liabilities for a particular period or year must typically be paid to the State Treasury through a designated tax-payment bank (*bank persepsi*) and then accounted for at the DGT office through the filing of the relevant tax returns. The tax payments and tax return filing for a particular tax must be undertaken monthly or annually, depending upon the tax obligation in question. These payments and filing obligations can also be conducted electronically. Tax payments should generally be conducted electronically.

Corporate tax liabilities may be settled either by direct payments, third party withholdings, or a combination of both. Monthly tax instalments constitute the first part of tax payments to be made by taxpayers as a prepayment of their current year CIT liability. A monthly tax instalment is generally calculated using the most recent CIT return. The tax withheld by third parties on certain income or tax to be paid in advance on certain transactions (i.e. imports) also constitute prepayments for the current year corporate tax liability of the income recipient or the party conducting the import. If the total amounts of tax paid in advance through the year are less than the total CIT due, the company concerned has to settle the shortfall before filing its CIT return. Returns for transaction taxes, such as WHT, must be filed on a monthly basis.

A summary of these tax obligations is as follows:

Monthly tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
Article 21/26 (Payroll) WHT	The 10th day of the following month	The 20th day of the following month
Article 23/26 Income Tax	The 10th day of the following month	The 20th day of the following month
Article 25 Income Tax Instalment	The 15th day of the following month	The 20th day of the following month
Article 22 Income Tax on imports/payments to Tax Collectors	The 10th day of the following month	The 20th day of the following month
Article 4(2) Final Income Tax	The 10th day of the following month	The 20th day of the following month
VAT and LST	Prior to the tax return filing deadline	The end of the following month

Annual tax obligations

Type of tax	Tax payment deadline	Tax return filing deadline
CIT	The end of the fourth month after the book year-end before filing the tax return	The end of the fourth month after the book year-end
PBB	Six months after the receipt of a Tax Due Notification Letter from the ITO	N/A

Penalties

Late payments of the above taxes incur interest penalties at 2% per month, with a maximum of 48%. Part of a month, for example a single day, is considered a full month.

Late filing of a tax return or failure to file a tax return incurs an administrative penalty at the following amounts:

Type of tax return	IDR
VAT return	500,000
Other monthly tax returns	100,000
CIT return	1,000,000

Tax assessments

Indonesia uses a self-assessment system under which taxpayers are trusted to calculate, pay, and report their own taxes in accordance with prevailing tax laws and regulations. However, the DGT may issue tax assessment letters to a particular taxpayer if it finds that, based on a tax audit or on other information, the taxpayer has not fully paid all tax liabilities. A tax assessment letter may also be issued by the DGT to a taxpayer who ignores a warning letter to file a tax return within a specified period. Failure to maintain books in accordance with the prescribed standards is another condition that may lead the DGT to issue an official tax assessment.

Tax audit process

The tax audit of a company may cover only a particular tax or all taxes for a particular tax period (a tax month) or tax year. It may be conducted at the company's premises, at the DGT offices, or at both.

Conditions triggering a tax audit

A tax refund request will always trigger a tax audit. Due to the requirement for the DGT to decide on a refund request within 12 months, a tax audit will typically begin from a few weeks to several months from the refund request date. A corporate tax refund request will normally trigger a complete tax audit covering all taxes. A refund request of any other tax will normally trigger a tax audit covering only one particular tax. The DGT will likely broaden the tax audit scope to include other taxes.

Other events that may trigger a tax audit include the following:

- A tax return in an overpayment position (not necessarily accompanied by a refund request).
- An annual income tax return presenting/claiming a tax loss.
- The taxpayer has changed its fiscal year or bookkeeping method or performed fixed assets revaluation.
- A tax return not filed within the prescribed time or filed after the deadline stated in a warning letter, which has been selected to be audited based on a risk analysis.
- A tax return meeting certain (undisclosed) DGT criteria.

Statute of limitations

The DGT can issue an underpaid tax assessment letter within five years after the incurrence of a tax liability, the end of a tax period (month), or the end of (part of) a tax year.

Topics of focus for tax authorities

Indonesia is largely a self-assessment tax environment, and enforcement remains a priority of the tax authorities. The DGT continues its efforts in improving compliance by targeting tax audits on transfer pricing and certain industries (particularly those in the oil and gas and coal mining industry).

On the other hand, the DGT has also made some efforts to collect more information from various sources and is issuing several incentives to increase tax compliance as well as boosting national tax revenue (i.e. incentives for the payment of tax in arrears and the sunset policy that eliminates or reduces administrative sanctions in certain cases).

Other issues

Business combinations and splits

Transfers of assets in business mergers, consolidations, or business splits must generally be dealt with at market value. Gains resulting from this kind of restructuring are assessable, while losses are generally claimable as a deduction from income. However, a tax-neutral merger or consolidation, under which assets are transferred at book value, can be conducted but is subject to the approval of the DGT. To obtain this approval, the merger or consolidation plan in question must pass a business-purpose test. Tax-driven arrangements are prohibited, and tax losses from the combining companies may not be passed to the surviving company.

Subject to a similar, specific DGT approval, the same concession is also available for business splits that constitute part of an initial public offering (IPO) plan. In this case, within one year of the DGT's approval being given, the company concerned must have made an effective declaration regarding registration for an IPO with the OJK. In the event of complications beyond the company's control, the period may be extended by the DGT for up to four years.

Tax information exchange agreements (TIEAs)

Indonesia has TIEAs with the following jurisdictions:

- Bahamas (2)
- Bermuda (1)
- Guernsey
- Isle of Man
- Jersey
- San Marino (1)

Notes

1. Ratified but not yet effective, pending the exchange of ratification documents.
2. The TIEA has been signed, pending the ratification of the TIEA and the exchange of ratification documents.

Mutual Administrative Assistance in Tax Matters

Indonesia signed the Convention on Mutual Administrative Assistance in Tax Matters on 3 November 2011 and ratified it on 17 October 2014. Indonesia also signed a Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information on 4 June 2015 and is committed to apply this using the Common Reporting Standard (CRS) issued by the OECD.

Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS)

Indonesia signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) on 7 June 2017, and it provided a list of reservations and notifications on the same date, which are still subject to ratification. In this provisional provision, Indonesia has put 33 tax treaties to be covered by the Convention.

US Foreign Account Tax Compliance Act (FATCA)

Indonesia has principally agreed to sign the InterGovernmental Agreement (IGA) 1 for FATCA compliance purposes.

Significant developments

There have been no significant corporate tax developments in Iraq during the past year.

Taxes on corporate income

All income derived from Iraq is subject to tax in Iraq, regardless of the residence of the recipient.

The effective corporate income tax (CIT) system presented in Iraq for juristic persons (except partnerships) is based on a statutory CIT rate of 15% at all income levels, with no progressive tax rate scale.

Moreover, the General Commission for Taxes (GCT) adopts the deemed approach by applying a certain rate on the total reported revenue. Note that the GCT applies the highest of the deemed tax on the reported revenue or the 15% (35% for oil and gas industry, *see below*) of the reported profit/taxable profit.

Foreign oil company income tax

The income realised in Iraq from contracts concluded with foreign oil companies, their branches or offices, and subcontractors working in Iraq in the oil and gas production sector and related industries is taxed at a rate of 35%.

Local income taxes

To the best of our knowledge, there are no local, state, or provincial taxes on income in Iraq.

Corporate residence

One of the key issues in determining when a company becomes taxable in Iraq is whether the foreign company is considered to be doing business 'in Iraq' or 'with Iraq'. In 2009, with Instructions No. 2/2008, and its amendment instruction #1 of 2014, the Iraqi tax administration provided a clearer distinction between business 'in Iraq' and business 'with Iraq'.

Once the determination has been made that the company is trading 'in Iraq', the company should register with the GCT. A company that is registered with the GCT will be subject to CIT and will be required to file a CIT return.

Permanent establishment (PE)

It is important to note that the current Iraq income tax law does not clearly define a PE; consequently, it is important to monitor commercial activity being performed in the country to ensure compliance with the registration requirements and tax law. The company should consult with their internal tax department and external advisers if they have signed a contract to provide any type of services inside Iraq to determine if the company should have a legal registration and begin to file CIT returns.

Other taxes

Sales tax

A sales tax of 300% is imposed on alcohol and tobacco (cigarettes), 15% on travel tickets, 15% on cars, and 20% on mobile recharge cards and internet. This is in addition to services rendered by deluxe and first class restaurants and hotels, which are subject to a 10% sales tax.

Customs duties

The customs duty rates are specified in the customs tariff and the agriculture agenda that are annexed to the Customs Duty Law.

Excise taxes

There is no tax provision in the Iraqi tax law addressing excise taxes.

Property taxes

A basic tax of 10% is assessed on the annual revenue for all real estate and is collected from the real estate owner or the long-term lessee (five years). In cases where the owner or long-term lessee cannot be located, the person occupying the real estate will be assessed. Note that the annual revenue for each real estate is discounted by 10% for expenses and maintenance before assessing the tax on that real estate.

Transfer taxes

There are no restrictions or taxes on transferring funds into or out of Iraq.

Stamp duty

Contracts are subject to stamp fees at rates that range between 0.1% and 3% of the contract value.

Payroll taxes

The payroll tax system in Iraq is similar to a pay-as-you-earn (PAYE) system, whereby the employer is obligated to withhold tax from salaries and wages paid to its employees and remit same to the tax authorities. Failure to do so will result in the employer being subject to penalties and late payment interest.

Social security contributions

With respect to contribution to the social security fund in Iraq, employers are divided into a number of categories, which is the driver for determining the contribution percentage. Employers that are categorised as prime contribute at the upper rate (25% from the employer and 5% from the employee), whereas other categories contribute at the lower rate (12% from the employer and 5% from the employee).

Determining to which category the employer relates is subject to the social security department discretion. The criteria for this determination is not crystallised in the law; however, in practice, the social security authorities make their determination based on the business sector the employer is involved in (e.g. those in the oil and gas related industries are expected to attract the upper rate).

Branch income

The tax treatment for a branch is similar to a local Iraqi corporation. In general, CIT is imposed on corporate entities and foreign branches with respect to taxable profit from all sources arising or deemed to arise in Iraq. However, certain limitations apply to head office expenses.

Income determination

A corporation has to determine its profit/loss according to its income statement for a tax period as established under the Unified Accounting System (Iraqi Generally Accepted Accounting Principles [GAAP]). However, to reach the taxable income, positive or negative adjustments have to be made to the profit/loss as determined according to GAAP.

Inventory valuation

There is no tax provision in the Iraqi tax law addressing inventory valuation.

Capital gains

Capital gains on sales of depreciable assets are taxed at the normal CIT rate. To the best of our knowledge and legal practice, gains derived from the sale of shares and bonds not in the course of a trading activity may be exempted from tax. Capital gains derived from the sale of shares and bonds in the course of a trading activity are taxable at the normal CIT rate.

Dividend income

Under the tax law, dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Interest income

Interest income deemed to arise in Iraq is taxed at the normal CIT rate.

Rent/royalty income

Rent and royalty income deemed to arise in Iraq are taxed at the normal CIT rate.

Foreign income

There is no tax provision in the Iraqi tax law addressing foreign income. However, as per the Iraqi tax law, tax shall be imposed on the income of an Iraqi resident that arises inside or outside Iraq (i.e. worldwide), regardless of place of receipt.

Deductions

In general, all expenses incurred by the taxpayer in order to produce income during the year are deducted from income, provided that such expenses are confirmed by acceptable documents, with some exceptions.

Depreciation

The Iraqi Depreciation Committee sets the maximum depreciation rates for various types of fixed assets (please contact us for additional information regarding the specific rates). If the rates used for accounting purposes are greater than the prescribed rates, the excess is disallowed.

The depreciation method is either a straight-line method or declining-balance method.

Goodwill

Iraqi tax law does not contain a provision that covers the deductibility of goodwill.

Start-up expenses

Iraqi tax law does not contain a provision that covers the deductibility of start-up expenses. However, as per Iraqi GAAP, such cost will be capitalised and amortised once the operation is started.

Interest expenses

Iraqi tax law does not contain a provision that covers the deductibility of interest expenses.

Bad debt

Bad debt is deductible if it was included in earlier income and there is proof of the unsuccessful steps to collect it.

Charitable contributions

Charitable contributions to the Government and Socialist Sector departments and to scientific, cultural, educational, charitable, and spiritual organisations, which are legally recognised (provided that the Minister of Finance has issued a list containing the names of these organisations), are deductible.

Bribes and illegal payments

Bribes and illegal payments are not allowed or deductible.

Fines and penalties

Broadly speaking, fines and penalties are not deductible items.

Taxes

Broadly speaking, taxes are not deductible items.

Net operating losses

Under the tax law, losses of a taxpayer from some sources of income arising in Iraq, substantiated by legally accepted documents, are generally deducted from profits arising from other sources.

Losses that can be settled in this manner shall be carried forward and deducted from the income of the taxpayer over five consecutive years, provided that losses may not offset more than half of the taxable income of each of the five years and the loss is from the same source of income from which it has arisen.

Losses cannot be carried back.

Payments to foreign affiliates

Iraqi tax law does not contain a provision that covers the deductibility of payments to foreign affiliates.

Group taxation

Iraqi tax law does not contain any provisions for filing consolidated returns or for relieving losses within a group of companies.

Transfer pricing

The precise meaning of transfer pricing under the effective Iraqi tax system is rather unclear from a tax and legal perspective.

We note that while having no specific transfer pricing legislation, Iraq does have a 'third party' arm's-length provision contained within its tax legislation; whereby, if a non-resident taxpayer is engaged in business with a resident and it appears to the tax authority that due to the connection existing between the resident and the non-resident, and the substantial control of one over the other, that the business relationship is arranged in a manner that leaves no profits to the resident, or the profits left are much less than what is normally earned, the tax shall be assessed on the actual profits of the non-resident and charged to the resident as if the resident is the business agent for the non-resident.

Thin capitalisation

Iraqi tax law does not contain a provision that covers thin capitalisation.

Controlled foreign companies (CFCs)

Iraqi tax law does not contain any provisions for CFCs.

Tax credits and incentives

In accordance with the Iraqi Investment Law, approved industrial projects are given certain custom duty and tax incentives; however, oil and gas is not one of the sectors that is normally granted investment promotion exemptions incentives.

The tax incentives may include corporate tax, individual tax, and others; however, the tax incentives vary from one project to another.

The Board of Investment Promotion has the authority to add any sector or specific project to the list of sectors or projects that benefit from the investment promotion law incentives.

Foreign tax credit

Income tax paid to a foreign country on income earned in that country may be credited against tax paid to Iraq. The amount of the credit may not exceed the amount of tax assessed in Iraq.

Withholding taxes

Under the tax law, the amount due from any residing taxpayers to a non-resident, whether the payment is made in cash or credited to the account, is subject to withholding tax (WHT) at the rate of 15% if such amounts are related to interest on debentures, mortgages, loans, deposits and advances, as well as annual allowances, pension salaries, or other yearly payments. Dividends are not subject to WHT since dividends paid out of profits that have been subject to tax are not taxed again in the hands of the shareholder.

Additionally, industries/activities (non-upstream) contracted with oil and gas companies are subject to WHT on all payments at a rate of 3.3% or 7%.

Tax administration

Taxable period

The taxable year in Iraq is the calendar year.

Tax returns

The statutory time line for filing tax returns is before the first day of June of the year of assessment. If the self-assessment of tax is not accepted by the tax authorities, tax is assessed on the income of the taxpayer based on the information available to the tax authorities.

Failure to file a tax return may lead to an estimate of income and assessment of tax by the tax authorities; however, such an assessment does not relieve the taxpayer from responsibility for non-submission of the return within the statutory timeline stipulated by law.

Payment of taxes

Payment of the tax liability has to occur within 21 days from the assessment date by the tax authority. There is no requirement of quarterly payments during the taxable year.

Tax audit process

Tax inspection is mandatory in Iraq, as the tax authority will scrutinise the financial statements of the taxpayer to determine the tax liability and, accordingly, issue a tax clearance.

Statute of limitations

The statute of limitations is five years. However, the tax authority has the right to go back beyond five years in certain instances.

Topics of focus for tax authority

Obtaining a tax clearance from a tax audit/inspection is becoming increasingly important for importation and government bidding purposes, as well as for other areas that affect the continuation of operations.

Iraqi GAAP

The Iraqi tax law requires all taxpayers to maintain books and records in accordance with Iraq's local unified accounting system (Iraqi GAAP).

These books shall constitute tax books/accounts. This accounting treatment will determine when income is accrued and costs are incurred for computing taxable profits.

Significant developments

Stamp duty

The 2017 Finance Act provided for the stamp duty rate on transfers of non-residential property, including commercial/industrial/farming land and buildings, but also business assets, such as goodwill, debtors, and contracts, to increase from 2% to 6%. The new higher rate only applies to contracts entered into on or after 11 October 2017. To avail of the old 2% rate for transfers of commercial/industrial/farming land and buildings, contracts entered into before 11 October 2017 must have been completed before 1 January 2018.

The 2017 Finance Act introduced changes to associated companies relief. Where a transferor is liquidated, the transfer will not be treated as being in connection with an arrangement for the two companies to cease association, subject to certain conditions.

Intellectual property (IP) regime

Tax amortisation/capital allowances on capital expenditure incurred on qualifying IP on or after 11 October 2017 are available for offset against income generated from exploiting the qualifying IP assets, up to a maximum deduction of 80% of the relevant IP profits of a company in a year. In the case of a company carrying on an IP trade, the remaining 20% is taxable at the 12.5% corporation tax rate.

However, any IP amortisation that is not claimed in a year (i.e. an excess amortisation charge over the 80% qualifying profits in a year) can be carried forward for offset against the relevant trading IP profits of a company in future years.

Sugar tax

The Finance Act 2017 provided for the introduction of a tax on sugar-sweetened drinks. A tax rate of 20 cent per litre applies where the sugar content is five or more grams of sugar per 100ml and 30 cent per litre for drinks with eight or more grams of sugar per 100ml. The tax is effective from 1 April 2018.

Multilateral Instrument

The Finance Act 2017 provided the first step towards Ireland's ratification of the Multilateral Instrument. It is envisaged that Ireland will ratify the instrument in full later this year in order for the instrument to take effect from 1 January 2019.

Taxes on corporate income

Corporation tax is chargeable as follows on income and capital gains:

Ireland

Standard rate on income ('trading rate')	Higher rate on income ('passive rate')	Capital gains rate
12.5%	25%	33%

Resident companies are taxable in Ireland on their worldwide profits (including gains). Non-resident companies are subject to Irish corporation tax only on the trading profits of an Irish branch or agency and to Irish income tax (generally by way of withholding) on certain Irish-source income.

Non-trading (passive) income includes dividends from companies resident outside Ireland (with some exceptions), interest, rents, and royalties. Legislation provides that certain dividend income (e.g. income from foreign trades) is taxed at 12.5% (*see the Income determination section*). The higher rate (i.e. 25%) also applies to income from a business carried on wholly outside Ireland and to income from land dealing, mining, and petroleum extraction operations.

An additional 'profit resource rent' tax applies to certain petroleum activities. Depending on the profit yield of a site, the tax rate applicable can range from 25% to 40%.

Close companies (*see the Income determination section*) may be subject to additional corporate taxes on undistributed investment income (including Irish dividends) and on undistributed income from professional services. Examples of professional services include professions such as solicitor, accountant, doctor, and engineer.

Local income taxes

Ireland does not levy local or regional taxes on income.

Corporate residence

In an effort to further enhance Ireland's tax regime's transparency, Finance Act 2014 announced changes to Ireland's corporate tax residence rules. Broader corporate tax residence reform was introduced from 1 January 2015 to ensure that Irish incorporated companies can only be considered non-Irish resident under the terms of a double tax treaty (DTT). These provisions are effective from 1 January 2015 for newly incorporated companies. In order to give certainty to companies with existing Irish operations (i.e. incorporated prior to 1 January 2015), the changes include a transition period to the end of 2020. While current Irish companies should not need to take immediate action, in the transitional period to 31 December 2020, all groups with Irish operations need to carefully monitor the corporate tax residence position of Irish incorporated, non-resident companies that do not satisfy the sole exception contained within the Finance Act 2014 provisions. This includes, for example, considering the impact of any proposed merger and acquisition (M&A) transactions involving both change in ownership and business changes/integration measures.

For companies incorporated before 1 January 2015, a company incorporated in Ireland or that has its place of central management and control in Ireland will be regarded as resident in Ireland for the purposes of corporation tax and capital gains tax. However, the link between incorporation and residency does not apply if (i) an Irish incorporated company is considered non-Irish tax resident under the terms of a DTT ('treaty exemption') or (ii) where the incorporated company or a related company carries on a trade in Ireland and either the company is ultimately controlled by a tax resident of a European Union (EU) member state or a country with which Ireland has a DTT, or the company or related company are quoted companies ('trading exemption'). Where the conditions of the trading exemption are met, the company's location of tax residence is determined by the jurisdiction where the company has its place of central management and control. However, the trading exemption does not apply if an Irish incorporated company's place of management and control is in a jurisdiction that only applies an incorporation test for determining residency (and the company would thus not be regarded as tax-resident in any jurisdiction).

Permanent establishment (PE)

Non-resident companies are subject to Irish corporation tax only on the trading profits attributable to an Irish branch or agency, plus Irish income tax (generally by way of withholding, though this is not the case with Irish-source rental profits) on certain Irish-source income.

Subject to the terms of the relevant DTT, a non-resident company will have a PE in Ireland if:

- it has a fixed place of business in Ireland through which the business of the company is wholly or partly carried on, or
- an agent acting on behalf of the company has and habitually exercises authority to do business on behalf of the company in Ireland.

A fixed place of business includes (but is not limited to) a place of management; a branch; an office; a factory; a workshop; an installation or structure for the exploration of natural resources; a mine, oil or gas well, quarry, or other place of extraction of natural resources; or a building, construction, or installation project. A company is not, however, regarded as having an Irish PE if the activities for which the fixed place of business is maintained or which the agent carries on are only of a preparatory or auxiliary nature (also defined in the statute).

Other taxes

Value-added tax (VAT)

VAT is charged at 23% on the supply of most goods and services in the course or furtherance of business.

There are currently two main reduced rates of VAT. A 13.5% rate applies, *inter alia*, to most building services, labour intensive services, domestic fuel, and power. In addition, a reduced 9% VAT rate is applicable to certain supplies in the tourism sector. These include restaurant and catering services, hotel and holiday accommodation, and various entertainment services (e.g. admissions to cinemas, theatres, museums, sporting facilities).

Exports, most basic food items, oral medicines, books, and children's clothing and footwear are zero-rated.

Some supplies are exempt from VAT. The main exempt categories are most banking services, insurance services, medical services, passenger transport, education and training, and letting of immovable goods (although an 'option to tax' may be possible in certain circumstances).

Zero rating is preferable to exemption because most VAT costs incurred in making a zero-rated supply can be recovered, while those incurred in making an exempt supply generally cannot.

If a business is fully engaged in a VATable business (irrespective of the rate), it will be entitled to reclaim VAT incurred, subject to the normal rules of deductibility. Businesses engaged in exempt supplies will not be in a position to reclaim VAT; consequently, it will be a real cost. Any business engaged in both VATable and exempt supplies will be required to apportion the VAT incurred appropriately.

Customs duties

Goods imported into Ireland from countries outside the European Union are liable to customs duty at the appropriate rates specified in the EU's Combined Nomenclature (CN) Tariff. These rates vary from 0% to 14% for industrial goods, with much higher rates applicable to agricultural products. Imports may qualify for a partial or full reduction in rates in specific circumstances.

The three main elements ('customs duty drivers') that determine the duty liability arising on goods imported into the European Union from a non-EU country are (i) the product's commodity code (Tariff Classification), (ii) its customs valuation, and (iii) its origin. Each of these elements will need to be considered when determining the customs duty cost at import.

There are special customs procedures that allow for the import of goods into the European Union from non-EU countries with full or partial relief from customs duty or under a suspension of customs duty. Examples of these are Customs Warehousing, Inward Processing Relief, Processing under Customs Controls, and Outward Processing Relief. There are different conditions attached to each customs special procedure, and an analysis of the trade footprint of the importer of the goods will need to be considered in order to determine whether or not they may avail of one of these reliefs. These procedures are important and are in place with the intention of stimulating economic activity within the European Union.

It should be noted that no customs duties arise on goods 'imported' from other EU member states, provided they originate in the European Union or have been customs cleared in another member state of the European Union.

Excise duties

Excise duties are charged on mineral oils (including petrol and diesel), alcohol products (including spirits, beer, wine, cider, and perry), and tobacco products where they are consumed in Ireland. Reduced rates of excise duty may apply when setting up a microbrewery in Ireland (depending on production quantities).

In addition, a diesel rebate scheme applies in Ireland. It provides hauliers or coach/bus owners with an opportunity to claim a partial refund of excise duty paid on fuel used in specifically designated vehicles for the purposes of transporting goods or passengers.

Excise duties are not charged on the export or sale of excisable goods to other EU countries, but special control arrangements apply to the intra-EU movement of such goods.

In addition, Ireland applies excise duties to electricity, betting, and the first registration of vehicles in the state (the latter is known as VRT). The VRT regime for motor vehicles is based on a CO2 emissions rating system and charged on the 'open market selling price' of the vehicle. Specific reductions in VRT apply to electric and hybrid vehicles, subject to certain conditions being met. In addition, there are reliefs available for cars imported temporarily by non-residents, or imported on transfer of residence to Ireland (such VRT reliefs require prior approval from the Customs authorities).

Stamp duty

Stamp duty is a tax on instruments. It is payable on transfers of land and on other assets where legal title cannot be passed by delivery. It is chargeable on instruments of transfer executed in Ireland and on instruments, wherever executed, that relate to Irish property or relate to matters to be done in Ireland. Stamp duty on the transfer of assets between associated companies may be fully relieved from stamp duty, provided the following key conditions are met:

- The companies have a 90% relationship (that is, one company is, directly or indirectly, the beneficial owner of at least 90% of the ordinary share capital of the other and is entitled to at least 90% of the profits available for distribution and at least 90% of the assets in the case of a winding-up of the other company, or a third company has these rights, directly or indirectly, in respect of both companies).
- This relationship is maintained for a period of at least two years after the transfer of the assets (to avoid the relief being clawed back).

There is an exemption for transfers of IP, and the categories of IP qualifying for this exemption are the exact same as those for which IP capital allowances are available (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Stamp duty is payable based on the higher of the consideration paid for the transfer or the market value of the assets transferring. Rates of 1% to 2% apply for transfers of residential property, 6% for transfers of non-residential property (commercial/industrial land and buildings, but also business assets, such as goodwill, debtors, contracts, etc.), and 1% on transfers of shares.

The 2017 Finance Act introduced changes to associated companies relief (Section 79, Stamp Duties Consolidations Act, 1999). Where a transferor is liquidated, the transfer won't be treated as being in connection with an arrangement for the two companies to cease association. Furthermore, the transferor and transferee won't be regarded as ceasing to be associated for the purposes of the clawback provision. This only applies provided:

- the transferred property remains with the transferee for at least two years
- there is no change to the beneficial ownership of the transferee for at least two years
- the liquidation is for *bona fide* commercial reasons, and
- it is not part of a scheme or arrangement for the avoidance of tax.

Capital duty on share capital

Ireland does not levy capital duty on share capital of companies.

Capital taxes

Ireland does not levy tax on the net worth of companies.

Payroll taxes

The 'pay-as-you-earn' system (PAYE system) places an obligation on employers to make deductions at source of income tax, universal social charge (USC), and pay-related social insurance (PRSI) from payments made to employees and an obligation to remit such deductions to the Irish tax authorities.

Pay-related social insurance (PRSI)

Employed persons are compulsorily insured under a state-administered scheme of PRSI. Contributions are made by both the employer and the employee. The employer is responsible for making PRSI contributions up to a rate of 10.75%, and these are an allowable deduction for corporation tax purposes.

Levies on insurance policies

A levy of 3% of gross premiums received by insurers applies in respect of non-life insurance policies relating to risks located in Ireland. This levy is payable four times *per annum*, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

A levy of 1% of gross premiums received by insurers applies in relation to certain classes of life insurance policies relating to risks located in Ireland. This levy is payable four times *per annum*, within 25 days of the end of each quarter (i.e. within 25 days from quarters ending 31 March, 30 June, 30 September, and 31 December).

An additional contribution of 2% to the Insurance Compensation Fund applies to premiums received in relation to non-life insurance policies. Similar to the 3% non-life insurance levy, the contribution applies where premiums are received in respect of risks located in Ireland. The contribution is also payable four times *per annum* in conjunction with the non-life insurance levy on premiums.

Reinsurance business is excluded from the levy.

There is also a stamp duty liability of 1 euro (EUR) on each non-life insurance policy where the risk is located in Ireland.

Certain voluntary health insurance policies are subject to fixed levies, up to EUR 350 per policy.

Environmental taxes

In Ireland, a levy of 22 cents per bag is imposed upon consumers provided with a plastic bag when purchasing goods in supermarkets and other retail outlets. Under the applicable legislation, retailers are obligated to collect 22 cents in respect of every plastic bag or bag containing plastic, regardless of size, unless specifically exempted, that is provided to customers and remit all plastic bag levies collected to Irish Revenue. As a result of the levy, most non-supermarket retailers provide paper carrier bags, and many retailers provide 'bags for life', which are made from non-plastic material and, therefore, not subject to the environmental levy.

Carbon tax

A carbon tax is levied on mineral oils (e.g. auto fuels, kerosene) that are supplied in Ireland. The rates of carbon tax on oil and gas broadly equate to EUR 20 per tonne of CO_2 emitted. Relief applies where mineral oils are supplied to an Emissions Trading Scheme (ETS) installation or for electricity generation. Pure biofuels are exempt from carbon tax. There is full relief for the biofuel component of the fuel. Where biofuel has been mixed or blended with any other mineral oil, the relief from carbon taxes shall apply to the biofuel content of the mixture or blend, regardless of the percentage.

A carbon tax is also levied on natural gas and solid fuel where supplied for combustion. Again, reliefs apply where these fuels are supplied to ETS installations or used in electricity generation, chemical reduction, or in the electrolytical or metallurgical processes.

Sugar tax

The Finance Act 2017 provided for the introduction of a tax on sugar-sweetened drinks. A tax rate of 20 cent per litre applies where the sugar content is five or more grams of sugar per 100ml and 30 cent per litre for drinks with eight or more grams of sugar per 100ml. The tax is effective from 1 April 2018.

Local taxes

Local taxes, known as 'rates', are not based on income but rather are levied on the occupiers of business property by reference to a deemed rental value of the property concerned. The level of rates levied can depend on the region in which the property is located. Rates are an allowable deduction for corporation tax purposes.

Local authorities are also empowered to levy charges on all occupiers for specific services (e.g. water supply). These charges are also deductible for corporation tax purposes.

Branch income

Irish branches of foreign companies are liable to corporation tax at the rates that apply to Irish resident companies. No tax is withheld on repatriation of branch profits to the head office.

Income determination

Irish trading profits are computed in accordance with Irish Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS), subject to any adjustment required by law. Prior-year adjustments may arise on the first-time adoption of IFRS, which may result in double counting of income or expenses or of income falling out of the charge to tax. Generally speaking, in order to avoid such an outcome, transitional adjustments exist whereby amounts of income or expenses that could be double-counted or that would fall out of the charge to tax are identified and the amounts concerned are taxed or deducted as appropriate over a five-year period.

Inventory valuation

Each item of inventory is valued for tax purposes at cost or market value, whichever is lower, and this will normally accord with the accounting treatment. The method used in arriving at cost or market value of inventory generally must be consistent and must not be in conflict with tax law. The first in first out (FIFO) method is an acceptable method of calculation for tax purposes. The base-stock method has been held to be an inappropriate method for tax purposes, as has the last in first out (LIFO) method.

Capital gains

Companies are subject to capital gains tax in respect of gains arising on the disposal of capital assets. The taxable gain is arrived at by deducting from the sales proceeds the cost incurred on acquiring the asset (as indexed to reflect inflation only up to 31 December 2002). The resulting gain is taxable at 33%. In cases of disposals of interests in offshore funds and foreign life assurance policies, indexation relief does not apply; while a tax rate of 33% applies to non-corporate shareholders in respect of funds and policies located in EU/European Economic Area (EEA)/DTT countries, and a rate of 33% or 40% applies to funds or policies located in all other jurisdictions. A reduced rate of 25% exit tax applies to Irish corporate shareholders investing in Irish funds. Special rules apply to gains (and losses) from the disposal of development land in Ireland.

Companies that are tax resident in Ireland (i.e. are managed and controlled in Ireland or incorporated in Ireland and not qualifying for exclusion from Irish residence by virtue of being resident in a DTT territory) are taxable on worldwide gains. Non-resident companies are subject to capital gains tax on capital gains arising on the disposal of Irish land, buildings, mineral rights, and exploration rights on the Irish continental shelf, together with shares in unquoted (unlisted) companies, whose value substantially (greater than 50%) is derived from these assets. Non-resident companies are also subject to capital gains tax from the realisation of assets used for the purposes of a business carried on in Ireland.

Losses arising on the disposal of capital assets may be offset against capital gains in the accounting period or carried forward for offset against future capital gains. No carryback of capital losses is permitted. There is no facility to offset capital losses against business income or to surrender capital losses within a tax group.

Irish capital gains tax legislation facilitates corporate reorganisations on a tax-free basis in situations where there is a share-for-share exchange. Assets can be transferred within certain company groups without capital gains tax applying (*see the Group taxation section for further information*).

Participation exemption from capital gains

A participation exemption is available to Irish resident companies on the disposal of a shareholding interest if:

- a minimum of 5% of the shares (including the right to profits and assets on winding up) is directly or indirectly held for a continuous 12-month period
- the shares have been held for a period of 12 months within which the date of the disposal falls or for a period of 12 months ending in the 24 months preceding the date of disposal
- the company whose shares are sold is resident in an EU member state (including Ireland) or in a country with which Ireland has a DTT at the time of the disposal (this includes tax treaties that have been signed but not yet ratified), and
- a trading condition is met at the time of the disposal whereby either: (i) the business of the company whose shares are disposed of consists wholly or mainly of the carrying on of one or more trades or (ii) taken together, the businesses of the Irish holding company and all companies in which it has a direct or indirect 5% or more ownership interest consist wholly or mainly of the carrying on of one or more trades.

If the Irish holding company is unable to meet the minimum holding requirement but is a member of a group (that is, a parent company and its 51% worldwide subsidiaries), the gain arising on the disposal should still be exempt if the holding requirement can be met by including holdings of other members of the group. Thus, the Irish company may be exempt from capital gains tax on a disposal of shares even if it does not directly hold a significant shareholding. The exemption also applies to a disposal of assets related to shares, such as options and convertible debt. However, it does not apply to a sale of either shares or related assets that derive the greater part of their value (more than 50%) from Irish real property, minerals, mining rights, and exploration and exploitation rights in a designated area. Shares deriving their value from non-Irish real property, minerals, and mining rights qualify for exemption if the other conditions are met.

Capital losses arising on the disposal of a shareholding where a gain on disposal would be exempt under the participation exemption are not deductible.

Capital gains tax entrepreneur relief

Capital gains tax entrepreneur relief allows for a reduction in the capital gains rate to 10% on the disposal of chargeable business assets from 1 January 2017, up to a lifetime limit of EUR 1 million. This allows entrepreneurs to free up more capital for reinvestment and builds on Ireland's focus to drive investment in new businesses.

Dividend income

Dividends from Irish resident companies are exempt from corporation tax. Dividends paid out of the trading profits of a company resident in an EU member state or a country with which Ireland has a DTT (or a country with which Ireland has ratified the Convention on Mutual Assistance in Tax Matters) may be taxed at the 12.5% rate, provided a claim is made. The 12.5% corporation tax rate applies to the same type of dividends received from companies resident in non-treaty countries, provided the company paying the dividend is a listed company or is part of a 75% listed group the principal class of the shares of which are substantially and regularly traded on the Irish Stock Exchange, a recognised Stock Exchange in an EU member state or a country with which Ireland has a DTT, or on such other Stock Exchange as is approved by the Minister for Finance for the purposes of this relief from double taxation.

As outlined above, the 12.5% corporation tax rate is also applicable to foreign dividends paid out of trading profits of a company resident in a country that has ratified the Convention on Mutual Assistance in Tax Matters.

Foreign dividends received by an Irish company where it holds 5% or less of the share capital and voting rights in that foreign company are exempt from corporation tax where the Irish company would otherwise be taxed on this dividend income as trading income.

Dividends from Irish resident companies are not liable to further tax, other than a surcharge on close company recipients where the dividend is not redistributed. Broadly speaking, a close company is a company that is under the control of five or fewer 'participators'. Participators can include individual shareholders, corporate shareholders, loan creditors, any person with a right to receive distributions from the company, etc. Where not less than 35% of the shares of a company (including the voting power) are listed, a company will not be regarded as a close company.

A close company surcharge of 20% is payable on certain non-trading income (e.g. rental income, certain dividend income, interest income) if it is not distributed to shareholders within 18 months of the accounting period in which the income was earned. A close company making a distribution and the close company receiving a distribution have the option, jointly, to elect to have the dividend disregarded for surcharge purposes. This can give close companies the option of moving 'trading income' up to a holding company without incurring a surcharge. Generally speaking, close companies avoid the surcharge through the payment of dividends within the prescribed period. Capital gains accruing to a non-resident company that would be close if it were resident can be attributed to Irish resident participators in certain instances.

Stock dividends

Stock dividends taken in lieu of cash are taxed on the shareholder based on an amount equivalent to the amount that would have been received if the option to take stock dividends had not been exercised. If the recipient is an Irish resident company and it receives the stock dividend from a quoted (listed) Irish company, then there will be no tax. For a quoted (listed) company paying the stock dividend, dividend withholding tax (WHT) with the appropriate exemptions and exclusions applies. Other stock dividends (bonus issues) are generally non-taxable.

Interest income

Interest income earned by Irish companies is generally taxable at the rate of tax for passive income of 25% (interest may be regarded as a trading receipt for certain financial trader companies). It is possible to offset current-year trading losses against passive interest income arising in the same year on a 'value basis'. It is not possible to offset prior-year trading losses against current-year interest income unless that interest constitutes a trading receipt of the particular company.

Royalty income

Royalty income earned by Irish companies is generally taxable at the rate of tax for passive income of 25%. However, where an Irish company is considered to be carrying on an IP trade, that company's royalty and other similar income may be subjected to Irish tax at the corporation tax trading rate of 12.5%. Similarly to passive interest income, it is possible to offset current-year trading losses against passive royalty income arising in the same year on a 'value basis'. It is not possible to offset prior-year trading losses against current-year royalty income unless that royalty constitutes a trading receipt of the particular company.

Emissions allowances

Irish legislation defines the tax treatment of emission allowances under the EU Emissions Trading Scheme. The legislation distinguishes between allowances acquired free of charge from the Environment Protection Agency (EPA) under the EU Scheme and those that are purchased.

Emission allowances acquired free of charge from the EPA may not be subjected to taxation. Allowances that are purchased may be treated as trading assets, subject to corporation tax treatment.

Foreign income

Resident companies are liable to Irish tax on worldwide income. Accordingly, in the case of an Irish resident company, foreign income and capital gains are, broadly speaking, subject to corporation tax in full. This applies to income of a foreign branch of an Irish company as well as to dividend income arising abroad.

In general, income of foreign subsidiaries of Irish companies is not taxed until remitted to Ireland, although there are special rules that seek to tax certain undistributed capital gains of non-resident close companies.

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland (*see Foreign tax credit in the Tax credits and incentives section*).

Deductions

In general, expenses incurred wholly and exclusively for the purposes of the trade are tax-deductible.

General accruals and provisions are not tax-deductible.

Capital items expensed to a company's profit and loss account are also not tax-deductible. However, depending on the nature of the capital item, they may qualify for tax depreciation (*see below*).

Depreciation

Book depreciation is not deductible for tax purposes (except in the case of certain IP assets). Instead, tax depreciation (known as capital allowances) is permitted on a straight-line basis in respect of expenditure incurred on assets that have been put into use by the company. The following rates are applicable:

Asset type	Tax depreciation rate (%)
Plant and machinery	12.5
Industrial buildings used for manufacturing	4.0
Motor vehicles	12.5
IP assets	Book depreciation or 7.0

The allowances are calculated on the cost after deduction of grants, except for plant and machinery used in the course of the manufacture of processed food for human consumption. In this case, the allowances are calculated on the gross cost. Allowances on cars are restricted to a capital cost of EUR 24,000 and may be restricted further (to 50% or zero), depending on the level of carbon emissions of the vehicle.

Accelerated capital allowances

A 100% first-year capital allowance is available in respect of expenditures incurred on certain approved energy-efficient equipment up to 31 December 2020.

Leasing

Ireland operates an eight-year tax depreciation life on most assets. A beneficial tax treatment applies to finance leases and operating leases of certain assets. For short life assets (i.e. those with a life of less than eight years), Ireland allows such lessors to follow the accounting treatment of the transaction that provides a faster write-off of the capital cost of an asset rather than relying on tax depreciation over eight years. This effectively allows the lessors to write-off their capital for tax purposes in line with the economic recovery on the asset.

Goodwill

The amortisation of goodwill is generally not allowable as a deduction. However, a tax deduction may be available for capital expenditure on the acquisition of certain goodwill (*see Intellectual property [IP] regime in the Tax credits and incentives section*).

Start-up expenses

A deduction may be allowed in respect of pre-trading expenses that are incurred for the purposes of a trade and within three years of the commencement of the trade. Such expenses may be offset against the income of that same trade.

Interest expenses

A deduction for interest is allowed only to the extent that borrowings are used for the purpose of a trade or acquisition of certain non-trading assets.

Research and development (R&D) expenses

Expenditure on scientific R&D and payments for the acquisition of know-how in general are allowable deductions, as are the costs of obtaining or extending patents and obtaining and renewing trademarks.

Bad debts

A deduction is available for bad debts written off in the accounts of a company as irrecoverable. Specific bad debt provisions may also be deductible once they satisfy Irish GAAP or IFRS accounting standards. The creation of a general bad debt provision is not a deductible expense.

Charitable contributions

Companies are entitled to a deduction, as a trading expense, for qualifying donations to approved charities, educational institutions, schools, churches, research foundations, sports bodies, and other approved organisations that satisfy certain conditions. To qualify for a tax deduction, the donation(s) to an organisation in a 12-month accounting period must amount to at least EUR 250.

Meals and entertainment

Costs incurred for third-party entertainment are not tax-deductible. Entertainment includes the provision of accommodation, food, drink, and any other form of hospitality, including the provision of gifts. Expenditure on *bona fide* staff entertainment is allowable as a deduction, provided its provision is not incidental to the provision of entertainment to third parties. Certain promotional costs are tax-deductible if they are incurred wholly and exclusively for the purposes of the trade.

Pension expenses

Contributions to certain employee pension schemes and the cost of setting up such schemes are deductible. Pension contributions are allowable as a deduction for employers in the year in which they are paid.

Fines and penalties

Fines and penalties imposed for breaking the law, civil penalties, interest, and late filing surcharges imposed by the Revenue Commissioners are generally not deductible.

Taxes

Taxes that are deductible in computing profits for corporation tax include VAT not recovered, the employer's share of PRSI contributions, and local taxes (i.e. rates levied on commercial property and local authority charges).

Net operating losses

Losses are computed for tax purposes in the same way as business profits. Trading losses can be offset against other income of any nature, either in the current or preceding accounting period (of equal length). The amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief. Any excess losses can be carried forward indefinitely against future trading income. Certain changes in ownership may prevent the carryforward of losses to future periods. Terminal losses that arise within 12 months of the date a company ceases to trade may be carried back three years.

Payments to foreign affiliates

Generally, deductions can be claimed for royalties, management service charges, and most interest charges paid to foreign affiliates, provided the amounts do not exceed what would be paid to unrelated entities. Depending on the circumstances, certain elections may be required. Ireland does not have any thin capitalisation rules.

Group taxation

The concept of 'fiscal unity' or consolidated group tax does not exist in Ireland. However, trading losses as computed for tax purposes may be offset on a current-period basis against taxable profits of another group company. As with loss relief in a single company, the amount of losses required to shelter the income is dependent on the tax rate that would have been applied to the income in the absence of the loss relief.

A group consists of a parent company and all of its 75% subsidiaries, with all group members being tax resident in Ireland, in another EU member state, in an EEA state with which Ireland has a DTT, or in another country with which Ireland has a DTT. It is also possible to trace through companies quoted on certain recognised stock exchanges (or 75% subsidiaries of companies so quoted). Non-Irish members may only surrender losses from activities that would, if profitable, be subject to Irish tax.

Both the claimant company and the surrendering company must be within the charge to Irish corporation tax. To form a group for corporation tax purposes, both the claimant company and the surrendering company must be resident in an EU country or an EEA country with which Ireland has a DTT ('EEA treaty country'). In addition, one company must be a 75% subsidiary of the other company, or both companies must be 75% subsidiaries of a third company. The 75% group relationship can be traced through companies resident in a 'relevant territory' being the EU, an EEA treaty country, or another country with whom Ireland has a DTT. In addition, in determining whether one company is a 75% subsidiary of another company for the purpose of the group relief provisions, the other company must either be resident in a 'relevant territory' or quoted on a recognised stock exchange.

Capital losses cannot be surrendered within a group.

Relief from capital gains tax is available on intra-group transfers of capital assets. Where a capital asset is transferred from a resident company to another resident company in a 75% group, no capital gains tax charge arises. A group, for capital gains tax purposes, consists of a principal company and its 75% subsidiary companies. A 75% subsidiary is defined by reference to the beneficial ownership of ordinary share capital, owned either directly or indirectly. A capital gains tax group can include companies resident in an EU member state or an EEA DTT country for the purpose of analysing the beneficial ownership of a company.

It also is possible for an Irish resident company and an Irish branch of an EEA company in the same group to transfer capital assets without crystallising a capital gains charge, provided the asset transferred remains within the scope of the charge to Irish capital gains tax.

Subsequent to an intra-group transfer, a charge to capital gains tax will arise when either:

- the asset is sold outside the group, in which case the tax is calculated by reference to the original cost and acquisition date of the asset when first acquired within the group, or
- a company owns an asset that was transferred by a group company and subsequently leaves the group within a ten-year period of the intra-group transfer. The gain on this intra-group transfer crystallises and becomes payable at this point.

Cash pooling and treasury activities

Ireland is a popular location for cash pooling and treasury activities, with a large number of multinationals centralising intra-group treasury activities to avail of the low corporation tax rate of 12.5%. To further enhance the attractiveness of Ireland as a treasury location, Irish tax legislation contains specific provisions to facilitate cash-pooling activities and ensure favourable tax treatment of 'short' interest for tax purposes. Under a typical cash-pool arrangement, interest payments by the Irish cash-pool leader typically would constitute 'short' interest for tax purposes because of the overnight/short-term nature of these arrangements.

Short interest is generally regarded as interest on a loan/deposit where the term is less than a year. Essentially, the Irish company will be entitled to a tax deduction for the interest payable to any group company resident outside the European Union in a non-treaty country, provided the recipient country taxes foreign interest income at a rate equal to or greater than the Irish corporation tax rate of 12.5%. If the recipient country taxes foreign interest at a rate of less than 12.5%, then relief will be given in Ireland at that effective tax rate. If the recipient country exempts foreign interest, then no interest relief will be available in Ireland. It should be noted that this will affect not only cash-pooling operations but all forms of short-term lending (i.e. less than one year). A tax deduction for interest payable to a group company resident in the European Union or in a country with which Ireland has a DTT is also available, regardless of the rate at which the foreign country subjects that interest to tax.

Transfer pricing

Transfer pricing rules have been in place in Ireland since 2011. The legislation endorses the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations and adopts the arm's-length principle. The regime applies to domestic as well as international related-party arrangements.

The transfer pricing regulations only apply to related-party dealings entered into by a taxpayer engaged in a trade that is within the charge to tax under Case I or Case II of Schedule D (typically income and profits subject to tax at the 12.5% standard rate).

Therefore, income that is characterised as 'passive income' subject to tax at a rate of 25% falls outside the scope of the transfer pricing legislation. Passive income for the purposes of these rules may include interest, royalties, dividends, and rents from property where the income arising is not derived from an active trade. For example, interest income arising to a bank will clearly constitute income from an active trade. Consequently, any interest arising to a bank from a related-party arrangement will fall within the scope of the transfer pricing rules.

The rules confer a power on the Irish tax authorities to re-compute the taxable profit or loss of a taxpayer where income has been understated or where expenditure has been overstated as a result of certain non-arm's-length arrangements. The adjustment will be made to the Irish taxable profits to reflect the arrangement had it been entered into by independent parties dealing at arm's length.

The legislation also places an obligation on a taxpayer to provide documentation 'as may reasonably be required' to support the arm's-length nature of the related-party arrangements and that documentation will need to be prepared 'on a timely basis'. Guidance notes issued by the Irish tax authorities on transfer pricing documentation support the legislative basis and indicate that a company is required to have transfer pricing documentation available for inspection if requested by the Irish tax authorities. Notably, the guidance notes state that 'it is best practice that the documentation is prepared at the time the terms of the transaction are agreed'. Additionally, the guidance notes state that in order 'for a company to be in a position to make a correct and complete tax return, appropriate transfer pricing documentation should exist at the time the tax return is filed'. It is worth noting that the taxpayer can maintain documentation in the form 'of its choosing'. Additionally, where documentation exists in another territory that supports the Irish arrangement, this will also be sufficient from an Irish transfer pricing perspective, provided that the documentation is in English. The Irish tax authorities have also confirmed that they will accept documentation that has been prepared in accordance with either the OECD Transfer Pricing Guidelines or the code of conduct adopted by the EU Council under the title 'EU Transfer Pricing Documentation'.

Note that arrangements entered into between related parties prior to 1 July 2010 are 'grandfathered' and thereby excluded from the scope of the transfer pricing rules. There is also an exemption from the rules for small and medium-sized enterprises. Broadly speaking, small and medium-sized enterprises include enterprises employing less than 250 people and that have either a turnover of less than EUR 50 million or assets of less than EUR 43 million.

In 2015, a dedicated transfer pricing audit team was formed within the Large Cases Division of the Irish tax authorities and has begun to initiate specific transfer pricing audits to monitor compliance with Irish transfer pricing rules.

Advance Pricing Agreement (APA) program

Ireland has a bilateral APA program that applies to transfer pricing issues (including the attribution of profits to a PE). The program does not cover cases involving the determination of the existence of a PE.

APAs will be granted for a fixed period of time, typically between three and five years, and a roll-back provision can be invoked in certain cases.

Country-by-Country (CbC) reporting

CbC reporting is applicable for Irish-parented multinational enterprises (Irish MNEs). Irish MNEs with consolidated annualised group revenue of EUR 750 million or more are required to comply with the requirements. Irish MNEs must file a CbC report annually to include specific financial data covering income, taxes, and other key measures of economic activity for each territory in which they operate.

In certain circumstances, Irish subsidiaries of foreign headquartered MNEs may also be required to file an 'equivalent' CbC report in Ireland.

Thin capitalisation

Ireland does not have any thin capitalisation rules.

Controlled foreign companies (CFCs)

Ireland does not have CFC rules.

Tax credits and incentives

The main tax incentives in Ireland are:

- 12.5% corporation tax rate on active business income.
- A 25% credit on qualifying R&D expenditures; total effective tax deduction of 37.5%.
- Ability to exploit IP at favourable tax rates.
- Accelerated tax depreciation allowances for approved energy efficient equipment.
- Ability to carry out investment management activities for non-Irish investment funds without creating a taxable presence in Ireland for such funds.
- An effective legal, regulatory, and tax framework to allow for the efficient redomiciliation of investment funds from traditional offshore centres to Ireland.

R&D credit

A tax credit of 25% applies to the full amount of R&D expenditure incurred by a company. This credit is in addition to the normal 12.5% revenue deduction available for the R&D expenditure thereby resulting in an effective corporation tax benefit of 37.5%.

A separate R&D tax credit is available in respect of expenditure incurred on the construction or refurbishment of a qualifying R&D building. In order to qualify, 35% of the building must be used for qualifying R&D activities, and this threshold is measured over a four-year period. This is of particular assistance where R&D is carried on in a manufacturing environment. The credit available is equal to 25% of the expenditure incurred on the construction or refurbishment of a qualifying building, and the qualifying amount is restricted according to the R&D use. A full volume basis applies to the R&D tax credit for expenditure incurred on qualifying R&D buildings.

The R&D tax credit is available for offset against the current year corporation tax liability of the company in the first instance. Any excess can be carried back for offset against the prior-year corporation tax liability to generate a tax refund, and any further excess can be monetised over a three-year cycle. The amount that can be monetised is limited to the greater of the corporation tax payable by the company in the preceding ten years (subject to an adjustment dependent upon previous claims) or the payroll tax liabilities of the company for both the period in which the R&D expenditure is incurred and the prior year (subject to an adjustment dependent upon previous claims).

In addition, companies may account for the R&D tax credit through their profit and loss account or income statement in arriving at the pre-tax profit or loss. This immediately impacts the unit cost of R&D, which is the key measurement used by multinational corporations when considering the locations of R&D projects. Companies that are in receipt of an R&D tax credit have the option, in certain instances, to reward key employees through an alternative use of that credit. In effect, the company may surrender a portion of their R&D credit (that could otherwise have been used to reduce corporation tax) to 'key employees' to reduce their effective rate of tax to 23% (the average effective rate of tax for such employees would typically be in excess of 40% in the absence of such R&D tax credit). In order to qualify as a 'key employee', the individual must perform 50% or more of their employment duties on qualifying R&D activities.

The R&D regime caters for pre-trading expenditure incurred on qualifying R&D activities. Where a company incurs R&D expenditure but has not yet commenced to trade, an R&D claim in this regard must be made within 12 months from the end of the accounting period in which the company first commences to trade.

Sub-contracted R&D costs of up to the 15% of qualifying in-house R&D expenditure incurred by a company or EUR 100,000 (whichever is greater) can qualify for the R&D tax credit.

Payments to third level institutions of up to 5% of qualifying in-house R&D expenditure incurred by a company or EUR 100,000 (whichever is greater) can qualify for the R&D tax credit.

It should be noted that expenditure incurred on the acquisition of intangible assets that qualify for capital allowances under the IP regime and expenditure incurred in registering/applying for legal protection for intangible assets that are developed as a result of R&D activities do not qualify for the R&D credit.

Intellectual property (IP) regime

Legislation provides for a tax deduction for capital expenditure incurred by a company, which is carrying on a trade, on the acquisition of qualifying IP assets. The definition of IP assets is widely drafted and includes the acquisition of, or the licence to use, the following:

- Patents and registered designs.
- Trademarks and brand names.
- Know-how (broadly in line with the OECD model tax treaty definition of know-how).
- Domain names, copyrights, service marks, and publishing titles.
- Authorisation to sell medicines, a product of any design, formula, process, or invention (and rights derived from research into same).

- Applications for legal protection (e.g. applications for the grant or registration of brands, trademarks, patents, copyright, etc.).
- Expenditure on computer software acquired for commercial exploitation.
- Customer lists acquired, other than 'directly or indirectly in connection with the transfer of a business as a going concern'.
- Goodwill, to the extent that it relates directly to the assets outlined above.

Capital allowances will be available at the same rate as the depreciation/amortisation charge for financial accounting purposes. Alternatively, the company may elect to claim allowances over a period of 15 years.

A shorter write-off period of eight years has also been retained for acquired software rights under the existing capital allowances regime where the rights are not acquired for commercial exploitation (i.e. were acquired for end use by the company).

Capital allowances on capital expenditure incurred on qualifying IP on or after 11 October 2017 are available for offset against income generated from exploiting qualifying IP assets, up to a maximum deduction of 80% of the relevant IP profits. The remaining 20% is taxable at the 12.5% corporation tax rate on the basis that the company is carrying on a trade.

However, any IP amortisation that is not claimed in a year (i.e. an excess amortisation charge over the 80% qualifying profits in a year) can be carried forward for offset against the relevant trading IP profits of a company in future years.

Knowledge Development Box

The Knowledge Development Box provides a 6.25% rate of corporation tax to apply to certain profits arising from qualifying assets that are the result of qualifying R&D carried out by the company qualifying for the relief. This is the first Knowledge Development Box in the world to be compliant with the new standards of the OECD's 'modified nexus' approach.

Exemption for new start-up companies

A corporation tax holiday applies to certain start-up companies that commence to trade between 2009 and 2018. The relief applies for three years where the total amount of corporation tax payable does not exceed EUR 40,000 in each year. Marginal relief is available where corporation tax payable is between EUR 40,000 and EUR 60,000. The relief available is linked to the amount of employer's PRSI paid by a company in an accounting period as it is intended to provide relief at companies generating employment.

The exemption also allows unused relief arising in the first three years of trading (due to insufficiency of profits) to be carried forward for use in subsequent years.

Section 110 company

Ireland has a favourable tax regime for entities known as 'Section 110' companies. A Section 110 company is an Irish resident special purpose company that holds and/or manages 'qualifying assets' and satisfies a number of conditions. A Section 110 company can provide an onshore investment platform, which should be eligible to access Ireland's DTT network where the Irish company is the beneficial owner of the income flow. The Section 110 regime has been in existence almost 25 years and, with appropriate structuring, can provide for an effective corporation tax rate of close to

0%. The regime is widely used by international banks, asset managers, hedge funds, private equity firms, and investment funds in the context of securitisations, investment platforms, collateralised debt obligations (CDOs), collateralised loan obligations (CLOs), acquisition of distressed loan portfolios, big ticket leasing, and capital markets bond issuances.

Section 110 companies are permitted to invest in financial assets, commodities, and plant and machinery. The term 'financial asset' is widely defined and includes both mainstream financial assets, such as shares, loans, leases, lease portfolios, bonds, debt, and derivatives, as well as assets such as greenhouse gas emissions allowances and carbon offsets.

In addition, the inclusion of plant and machinery as 'qualifying assets' within the Section 110 regime has increased the attractiveness of Ireland as the preferred destination for aircraft financing and leasing activities.

With effect from 6 September 2016, an amendment has been made to Irish tax legislation with the effect of restricting the use of profit participating loans where they are used to finance the business of Section 110 companies related to Irish property transactions. No other category of Section 110 business is impacted by these changes.

Transactions of Section 110 companies unrelated to Irish property transactions are not affected by this amendment.

Broadly, the business of a Section 110 company that is impacted by the amendment, referred to as 'specified property business', is that part of the Section 110 company's activity that involves the holding, managing, or both the holding and managing of so-called 'specified mortgages', being any financial asset deriving its value, or the greater part of its value, from land in the state. This part of the Section 110 company's business is to be treated as a separate business from any other business the company may carry on and, with certain exceptions, no interest above an arm's-length rate will be deductible in computing the taxable profits of that part of the business. The profit so calculated for this part of the business will be taxable at the 25% rate of corporation tax.

Certain exceptions are made so that interest on profit participating loans used in a Section 110 company's specified property business will continue to be fully deductible where the interest is paid to (i) a company subject to corporation tax on the interest, (ii) certain approved funds, and (iii) a person resident in another EU or EEA country where a range of conditions are met.

Grants

Cash grants may be available for capital expenditures on machinery and equipment and industrial premises, training of employees, creation of employment, rent subsidies, R&D, manufacturing and exporting products, providing services to customers overseas, etc. The level of grant aid depends on a number of factors and is specific to each project. Rates depend on the location of the new industry.

Foreign tax credit

Foreign taxes borne by an Irish resident company (or Irish branch of an EEA resident company), whether imposed directly or by way of withholding, may be creditable in Ireland. The calculation of the credit depends on the nature of the income item, but for income sources other than dividends and some related-party interest, the credit is limited to the Irish tax referable to the particular item of income. A system of onshore pooling of excess foreign tax credits applies to dividends from 5% or greater corporate shareholdings, and excess credits in the dividend pool can be carried forward indefinitely. A similar pooling system applies to some related-party interest and also to foreign branch income.

An Irish resident company with a branch or branches outside Ireland is generally taxable in Ireland on the foreign branch profits with a credit for foreign taxes paid on those profits. A unilateral form of credit relief for foreign taxes paid by foreign branches operating in countries with which Ireland does not have a tax treaty is also available. To the extent that there were foreign taxes on branch profits that were not utilised in the relevant period (that is, where credit for foreign tax exceeds the Irish tax payable), these unused credits can be carried forward indefinitely and credited against corporation tax on foreign branch profits in future accounting periods.

A form of pooling of tax deductions in relation to foreign tax on royalties may be applicable where the royalty income is taken into account in computing the trading income of a trade carried on by the company.

An additional tax credit is available on certain dividends received by an Irish Holdco from an EU/EEA subsidiary that is subject to either the 12.5% or 25% rate of Irish tax.

The additional tax credit will provide for a credit up to the amount of Irish tax in instances where the Irish nominal rate is lower than nominal rate of tax on the underlying profits in the country where the profits are sourced.

Withholding taxes

Irish resident companies are required to withhold tax on certain types of payments as set out below (*see sub-sections below for WHT exemptions and table at end of this section for WHT rate reductions*).

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Patents, royalties**
Resident companies	0	20	20
Resident individuals	20	20	20
Non-resident companies and individuals	20	20	20

Dividend WHT

Dividend WHT applies at 20% to dividends and other distributions. However, an exemption may be available where the recipient of the dividend is either an Irish company or a non-Irish company eligible for the Parent-Subsidiary Directive (which in Ireland requires a 5% or greater shareholding).

Exemptions from dividend WHT also are available where the recipient of the distribution falls into one of the categories listed below and provided an appropriate declaration is made to the company paying the distribution in advance of the distribution. In a move to significantly ease the administrative burden in applying for exemption for dividend WHT, this declaration is now self-assessed and valid for up to six years.

- Irish tax resident companies (a declaration is not required for Irish tax resident companies that hold a 51% or greater shareholding of the company).
- Non-resident companies that are resident in a country with which Ireland has a tax treaty or in another EU member state, where the company is not controlled by Irish residents.
- Non-resident companies that ultimately are controlled by residents of a tax treaty country or another EU member state.
- Non-resident companies whose principal class of shares is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minster for Finance (or if recipient of the dividend is a 75% subsidiary of such a listed company).
- Non-resident companies that are wholly owned by two or more companies the principal class of shares of each of which is traded on a recognised stock exchange in a treaty country or another EU member state or on any other stock exchange approved by the Minister for Finance.
- Individuals who are resident in a tax treaty country or in another EU member state.
- Certain pension funds, retirement funds, sports bodies, collective investment funds, and employee share ownership trusts.

Companies that make a dividend distribution are required, within 14 days of the end of the month in which the distribution is made, to make a return to the tax authorities containing details of the recipient of the dividend, the reason for any exemption from dividend WHT, and to pay over any tax withheld.

Interest WHT

Financial institutions operating in Ireland are obligated to withhold tax (deposit interest retention tax or DIRT) out of interest paid or credited on deposit accounts in the beneficial ownership of resident companies, unless the financial institution is authorised to pay the interest gross. The rate is 41%. There is no DIRT on interest paid to non-residents where a written declaration of non-residence is completed. Certain annual interest payments are subject to WHT at 20%. Interest payments made by companies to companies resident in other EU member states or in treaty countries are generally not subject to WHT. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies.

Royalties WHT

Royalties, other than patent royalties, are not generally subject to WHT under domestic law. Patent royalty payments and certain other annual payments are subject to WHT at 20%. Lower WHT rates may be accessed under treaties, subject to certain documentation and reporting requirements. The EU Interest and Royalties Directive may also provide an exemption from WHT for payments between associated companies. Associated companies, for the purpose of this directive, are companies where one can directly control at least 25% of the voting power of the other or at least 25% of the voting power of both companies is directly controlled by a third company. In all cases, all companies must be resident in a member state of the European Union.

WHT on capital gains

Where any of the following assets is disposed of, the person by whom or through whom the consideration is paid (i.e. the purchaser) must deduct capital gains WHT at 15% from the payment:

1. Land or minerals in Ireland or exploration rights in the Irish continental shelf.

2. Unquoted (unlisted) shares deriving their value or the greater part of their value (more than 50%) from assets described in (1).
3. Unquoted (unlisted) shares issued in exchange for shares deriving their value or the greater part of their value from assets as described in (1).
4. Goodwill of a trade carried on in Ireland.

The requirement to withhold tax does not apply where the consideration does not exceed EUR 500,000 or where the person disposing of the asset produces a certificate from the Revenue Commissioners authorising payment in full. A clearance certificate may be obtained by making application on Form CG50 to the Revenue Commissioners supported by a copy of the agreement or contract for sale. The certificate may be obtained on the grounds that the vendor is Irish resident, no capital gains tax is due in respect of the disposal, or the capital gains tax has been paid. WHT is creditable against the capital gains tax liability of the vendor, and any excess is refundable.

To avoid the requirement to withhold, clearance must be obtained before the consideration is paid. There is no exemption from the withholding procedure where the asset is held as trading stock or where the transaction is intra-group and a capital gains tax liability does not arise. Failure to obtain the certificate will lead to the purchaser being assessed to capital gains tax for an amount of 15% of the consideration.

Professional services withholding tax (PSWT)

Individual income tax at the standard rate (currently 20%) is deducted from payments for professional services by government departments, state bodies, and local authorities. Credit is granted for any PSWT withheld against the corporation tax (or income tax for an individual) liability of the accounting period in which tax is withheld.

Relevant contracts tax (RCT)

RCT is a WHT that applies in the construction, forestry, and meat-processing industries in Ireland. It applies where a 'principal contractor' engages a sub-contractor under a 'relevant contract' to carry out 'relevant operations'. Compliant taxpayers can obtain Irish Revenue clearance for zero WHT.

The RCT system applies if the 'relevant operations' are carried out in Ireland, to include Irish territorial waters and any area over which Ireland has exploration and exploitation rights. Therefore, it is irrelevant whether or not the parties to the contract are resident in Ireland, the parties are liable to tax in Ireland, the contract is executed outside Ireland, or whether payments under the contract are made outside Ireland.

It is important to note that principal contractors who are liable to RCT may not necessarily operate in the above industries. In the case of construction, in particular, relevant contracts may be entered into by a variety of entity types. For example, companies involved in electricity generation, oil and gas exploration, and telecommunications undertakings are all classed as principal contractors. Relevant operations are also broadly defined. Examples are repairs to buildings and structures; ground works; installation, alteration, and repairs to various systems in buildings (e.g. electrical, ventilation, water supply, telecommunications, burglar and fire protection systems); mining; exploration works; and also certain haulage contracts.

Where RCT applies, the principal contractor must notify the contract and all payments under the contract to Revenue on the eRCT system in advance of payment being made. Once the principal notifies Revenue that they intend on making a payment to the sub-contractor, Revenue will then revert on a real-time basis and issue a Deduction Authorisation to the principal advising of the rate of RCT to be withheld from the gross payment. The current rates of RCT are 20% and 35% and depend on the Irish tax compliance position of the sub-contractor. The 20% rate will apply to sub-contractors who are registered with Revenue and have a good tax compliance record. The 35% rate will apply where the sub-contractor is not registered for tax in Ireland or has an inadequate tax compliance record. The sub-contractor is entitled to credit for, or offset of, the RCT withheld by the principal and paid to Revenue.

If, however, the sub-contractor has applied for and received zero rate authorisation from Revenue, then 0% RCT rate applies and the sub-contractor can receive payment gross without deduction of RCT. If a principal does not notify payments to Revenue in advance of making payment to the sub-contractor, then penalties will apply. It should be noted that the cost of non-compliance with RCT procedures are severe, therefore it is important that RCT is considered before undertaking any construction related activity, in addition to meat-processing and forestry activity.

Financial Institutions Levy

The Financial Institutions Levy was introduced for a three-year period with the express purpose of enabling the financial services sector to contribute to economic recovery.

Finance Act 2016 extended the annual levy being imposed on certain financial institutions by a period of five years. The annual levy was due to expire at the end of 2016 but will now run until 2021. Prior to Finance Act 2016, the levy amounted to 35% of DIRT paid by the relevant financial institution based on the 2011 base year.

Under Finance Act 2016, the levy has been extended for a period of five years from 2017 to 2021 and is charged at a higher rate of 59% on the DIRT paid in respect of the new base years enacted under the legislation. The base year for 2017/18 is 2015, with 2017 being the base year for the levies due in 2019/20, and the base year for the tax due in 2021 being 2019.

WHT rate reductions and exemptions

Exemptions and rate reductions apply under domestic law and under tax treaties. Where an exemption from WHT is not available (*please see sections above for domestic law exemptions*), a reduced rate of WHT may apply under an applicable tax treaty. The table below sets out the reduced rates of WHT that may be available to payments from Ireland of dividends, interest, and royalties under an applicable tax treaty.

	WHT (%)		
Recipient	**Dividends (1)**	**Interest**	**Patents, royalties (3, 4)**

Zambia	0	0	0

Irish tax legislation allows for favourable treatment in situations where a DTT has been signed but not yet ratified.

Notes

1. Domestic legislation may also provide an exemption from the dividend WHT, subject to providing the necessary documentary evidence of qualification. An exemption may also be available under the EU Parent-Subsidiary Directive.
2. The EU Interest and Royalties Directive may provide an exemption from WHT for payments between associated companies.
3. In general, royalties WHT applies only in the case of patent royalties.
4. Under domestic legislation, WHT will not apply if the loans or advances are for a period of less than one year or if the interest is paid in the course of a trade or business to a company resident in an EU or treaty country and that country imposes a tax that generally applies to foreign interest receivable.
5. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT rate must be verified from an analysis of the relevant tax treaty.

Negotiations with Azerbaijan, Ghana, Oman, Turkmenistan, and Uruguay have concluded, and the new agreements are expected to be signed shortly.

Ireland is currently negotiating treaties with the following countries:

- Argentina.
- Jordan.
- Taiwan.
- Tunisia.

Tax administration

Taxable period

The tax accounting period normally coincides with a company's financial accounting period, except where the latter period exceeds 12 months.

Tax returns

Corporation tax returns must be submitted within nine months (and no later than the 23rd day of the ninth month) after the end of the tax accounting period in order to avoid a surcharge (maximum of EUR 63,485) or a restriction of 50% of losses claimed (maximum of EUR 158,715).

Payment of tax

Corporation tax payment dates are different for 'large' and 'small' companies. A small company is one whose corporation tax liability in the preceding period was less than EUR 200,000. Interest on late payments or underpayments is applied at approximately 8% per year.

Large companies

For large companies, the first instalment of preliminary tax totalling 45% of the expected final tax liability, or 50% of the prior period liability, is due six months from the start of the tax accounting period (but no later than the 23rd day of the month).

The second instalment of preliminary tax is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month). This payment must bring the total paid up to 90% of the estimated liability for the period.

The balance of tax is due when the corporation tax return for the period is filed (that is, within nine months of the end of the tax accounting period, but no later than the 23rd day of the month in which that period of nine months ends).

Small companies

Small companies are only required to pay one instalment of preliminary tax. This is due 31 days before the end of the tax accounting period (but no later than the 23rd day of the month).

The company can choose to pay an amount of preliminary tax equal to 100% of the corporation tax liability for its immediately preceding period or 90% of the estimated liability for the current period. As is the case for large companies, the final instalment is due when the corporation tax return is filed.

Tax audit process

A system of self-assessment and Irish Revenue audits is in operation in Ireland.

Statute of limitations

Irish Revenue may undertake an audit of a company's tax return within a period of four years from the end of the accounting period in which the return is submitted.

Topics of focus for tax authorities

In Irish Revenue's Annual Report 2015, a continued priority is to maintain the high levels of voluntary compliance in Ireland aided by an increased focus on non-compliance. The Irish authorities aim to do so by using emerging data sources to risk-assess cases and target new forms of non-compliance and aggressive avoidance.

Another of Irish Revenue's key aims is to make it easier and less costly for voluntary compliance through further use of digital channels and a range of initiatives to lessen the administrative burden for taxpayers.

Internationally, Irish Revenue have committed to further tax transparency and the exchange of information between authorities. Revenue also emphasis a continued focus on transfer pricing issues both at an EU and global level.

General Anti-Avoidance Legislation

The general anti-avoidance provisions are designed to counteract transactions that lack commercial reality and are put in place with a view to reducing or avoiding a charge to taxation.

The impact of the general anti-avoidance rule is that where a person enters into a transaction and it would be reasonable to consider that the transaction is a 'tax avoidance transaction', Irish Revenue may, at any time, deny or withdraw the tax advantage. In order to deny or withdraw that tax advantage, Irish Revenue may:

- make or amend an assessment
- allow or disallow in whole or in part any credit, deduction, or other amount that is relevant in computing tax payable
- allocate or deny in whole or in part any credit, deduction, loss, abatement, relief, allowance, exemption, income, or other amount, or
- recharacterise, for tax purposes, the nature of any payment or other amount.

The assessment made by Irish Revenue will stand unless the taxpayer successfully appeals it to the Appeals Commissioners/Courts.

Mandatory disclosure

In a move to promote transparency between taxpayers, practitioners, and tax authorities, provisions relating to the disclosure of tax schemes are applicable. These require promoters of such schemes to provide information to the tax authorities within a specified time of having made the scheme available. A transaction that comes within the new law and must therefore be reported to Revenue is not necessarily a tax avoidance transaction for the purposes of existing legislation. The rules are wide reaching and essentially cover all tax heads, including corporation tax, income tax, capital gains tax, stamp duty, VAT, customs duties, and excise duties.

Co-operative Compliance Framework (CCF)

In 2017, the Irish tax authority relaunched the CCF. The Irish authority has invited large businesses to partake in the CCF, which is seen as best practice internationally. The aim of these measures is to continue to strengthen Ireland's position as one of the top countries in the world for ease of doing business by promoting useful collaborative relationships between taxpayers and the Irish tax authority.

Other issues

Asset management

Irish tax legislation contains provisions aimed at promoting Ireland as a leading location for the management of both Undertakings for Collective Investment in Transferable Securities (UCITS) and alternative investment funds (AIFs). The UCITS Directives have brought about fundamental changes to both the management and structuring of UCITS. One of the key reforms introduced permits UCITS management companies located in one EU jurisdiction to manage UCITS domiciled in another EU jurisdiction. One of the areas of concern is whether the activities of the management company could bring a foreign UCITS within the charge to tax in the management company's home jurisdiction (e.g. by creating a branch or agency or causing the fund to be regarded as tax resident there). Irish legislation provides that an Irish management company managing a non-Irish UCITS or AIF will not be regarded as a branch or agency of the non-Irish UCITS or AIF and will not bring the profits of the foreign UCITS or AIF within the charge to Irish tax or treat the foreign UCITS or AIF as an Irish regulated fund.

Following the United States (US) and OECD review of offshore domiciles, which has resulted in increased regulation and tax obligations, many fund managers are considering possible alternative onshore jurisdictions for their investment fund products. Because of the international reputation of its asset management industry and the favourable fund tax regime, Ireland is seeing a significant trend in investment managers moving their investment platforms to Ireland from the traditional offshore jurisdictions. Company law changes also allow corporate funds to migrate to Ireland through a re-domiciliation process, whereby the fund would benefit from its continued existence, including the ability to retain the fund's performance track record post migration and avoid potential adverse tax consequences and costs that typically arise from a merger of an offshore fund with a new onshore fund. The Irish Central Bank has a coordinated authorisation process to facilitate speed to market, which, at present, is a key advantage in comparison to delays being experienced in other EU domiciles.

International funds sector

Recent Irish legislation has introduced a number of provisions designed to support and enhance the international funds sector in Ireland, as set out in further detail below:

Funds re-domiciling to Ireland

Where the Central Bank has authorised an investment fund that has re-domiciled to Ireland from certain offshore centres (*discussed above*), a declaration can be made by the fund stating that the unitholders are non-Irish resident unitholders, to ensure that no Irish tax charge arises in respect of such non-residents, thereby clarifying the tax exemption applying to payments made by Irish funds to non-resident investors. To the extent that there are any Irish resident unitholders, these need to be identified in the declaration and tax accounted for, where appropriate, on any payments made to such unitholders.

Cross-border fund mergers involving Irish funds

Mergers (both inbound and outbound) involving an Irish fund with a fund located in a member state of the European Union, European Economic Area, or an OECD country with which Ireland has entered into a DTT will not give rise to a charge to tax in respect of Irish resident investors. Effectively, the charge to tax is deferred until the ultimate disposal of the replacement units. The calculation of any future gain on such units is calculated by reference to the cost of the original units.

No charge to Irish tax should arise on the transfer of units in the formation of certain master/feeder structures.

A number of significant stamp duty exemptions are also available for collective investment vehicles.

Real Estate Investment Trusts (REITs)

The Irish REIT was introduced in 2013, with the objective of providing access to the property market for smaller investors and to facilitate capital injections into the Irish property market. The first REIT listing on the Irish Stock Exchange took place on 18 July 2013. There are currently three REITs in Ireland, with further REITs expected to be launched.

The REIT must be incorporated and resident in Ireland and listed in an EU jurisdiction.

REITs are exempt from tax on rental income and capital gains accruing on the disposal of assets if certain conditions are met, notably the requirement to distribute at least 85% of property income annually and that at least 75% of the aggregate income of the REIT must derive from carrying on property rental business.

There is no exemption from VAT, property rates, employment taxes, or stamp duty. Stamp duty, which is currently at a rate of 2% (1% for certain residential property), should apply to properties acquired. The REIT is subject to corporation tax on all other income and gains under the usual taxation rules.

There are also requirements regarding the number of investors, properties held, and the financing arrangements that may impact the tax position of the REIT.

Distributions made by the REIT out of rental income and gains are subject to 20% WHT, with exemption/reduced rates available for eligible investors. Distributions out of taxed income are treated as ordinary dividends.

The introduction of the Irish Collective Asset-management Vehicle (ICAV)

The Irish funds industry continues to work with the Irish government to explore new products that could enhance the competitiveness of Ireland's fund offering on the global stage.

In this regard, the ICAV Act 2015 was signed into law on 4 March 2015.

Previously, investment funds in Ireland structured as companies were incorporated as public limited companies ('plc') under the Irish Companies Acts. The ICAV is specifically designed for investment funds and is not subject to the legislation governing other types of companies, thereby removing the need to comply with certain requirements under the Companies Acts. The legislation also increases the range of structures open to investment managers and promoters establishing funds in Ireland.

One of the main advantages of the ICAV is the ability of this structure to 'check-the-box' (an election to be regarded as tax transparent) for US tax purposes, whereas an Irish plc cannot avail of this election. This is seen as a very positive development in the funds industry, particularly in the context of investment funds seeking to re-domicile from traditional tax haven jurisdictions to a regulated jurisdiction like Ireland.

An ICAV may be established as an umbrella structure with a number of sub-funds and share classes. Where an umbrella structure is created, each sub-fund will have segregated liability and also have the flexibility to prepare separate financial statements on a sub-fund basis. The ICAV also qualifies for the tax exemptions that apply to Irish regulated funds.

Irish Real Estate Funds (IREFs)

With the publication of Finance Act 2016 comes the introduction of a new fund category called an Irish Real Estate Fund.

Under the new legislation, a fund is an IREF where 25% or more of the market value of the assets is derived, directly or indirectly, from Irish property or one of the main purposes of the fund is to acquire Irish property.

Where a fund is categorised as an IREF, 20% WHT must be operated by the fund on distributions of income. Gains derived from the disposal of property held for at least five years are specifically excluded from the scope of the WHT, unless the fund is a personal portfolio IREF (PPIREF). No tax applies in respect of gains on redemption of units in the IREF except where those gains are derived from undistributed income, real estate disposed of within five years of acquisition, or, in the case of a PPIREF, any disposal of Irish real estate.

Broadly, PPIREFs are funds where a unit holder or a person connected with the unit holder has the ability to influence the selection of some or all of the IREF assets.

There are a number of points to emphasise:

- UCITS are specifically excluded from the new rules.
- The vast majority of Irish Qualifying Investor Alternative Investment Funds (QIAIFs) are not significantly invested in Irish property and will be unaffected by the new rules.
- There are significant categories of exempt investors who will not be subject to WHT, and these are currently listed as:
  - Irish and equivalent EU or EEA pension schemes, Personal Retirement Savings Accounts, and EU cross-border schemes holding the IREF directly or indirectly
  - other Irish regulated funds or equivalent funds authorised by a member state of the EU or the EEA
  - Irish life assurance funds and equivalent overseas life assurance funds, and
  - Section 110 companies, credit unions, and charities.

Refunds of WHT are possible where persons who are exempt from WHT hold their units through intermediary vehicles that do not, in themselves, qualify for WHT exemptions.

Where a unitholder holds less than 10% in an IREF and they are treaty entitled, they can make treaty reclaims. Distributions from an IREF to a unitholder with a 10% interest or more in the fund will be designated as income from Irish immovable property and treaty refunds should not be available.

Relief has been provided to enable a reorganisation where an IREF transfers certain assets to companies within the charge to Irish corporate tax or reorganises the IREF into a REIT.

Taxable Irish investors in real estate will continue as before to be taxed under normal rules on distributions of income and gains on redemption of Irish land.

These changes will require very careful consideration. Please get in touch with your usual PwC contact to talk through the fuller implications of the proposed changes.

Investment limited partnership

Irish tax legislation confirms the tax transparency of investment funds structured as investment limited partnerships under the Investment Limited Partnership Act 1994. Prior to Finance Act 2013, such funds were regarded as opaque under Irish tax legislation. There is also an ongoing review of the Irish limited partnership legislation with a view to providing legal and practical enhancements to the limited partnership regime to cater for the increased popularity of Ireland as a platform for private equity investment.

Islamic finance

Irish tax law facilitates most Islamic finance transactions, including *ijara* (leasing), *takaful* (insurance), *re-takaful* (reinsurance), *murabaha* and diminishing *musharaka* (credit arrangements), *mudaraba* and *wakala* (deposit arrangements), and *sukuk*. While there is no specific reference in the legislation to Islamic Finance, rather the reference is to Specified Financial Transactions, overall, the premise of the legislation in Ireland is to ensure that Islamic finance transactions are treated in the same manner as conventional financing transactions.

This legislation also facilitates the taxation (and tax impact) of UCITS management companies. The UCITS structure is one of the most commonly used structures for many different types of Islamic funds, such as retail Islamic equity funds, Shariah-compliant money market funds, Shariah-compliant exchange traded funds (ETFs), etc.

Islamic insurance

The Irish Revenue has provided guidance in respect of the Irish tax treatment of general *takaful* (non-life), *re-takaful* (reinsurance), and family (life) *takaful* arrangements. Legislative changes are not currently required to facilitate Islamic insurance in Ireland.

Choice of legal entity

Foreign investors tend to operate either through an Irish legal entity or as a branch of a foreign entity. Both are equally valid means of doing business in Ireland, and the choice will normally depend on the commercial fact pattern and individual circumstances of the investor parent company.

Foreign Account Tax Compliance Act (FATCA) intergovernmental agreement (IGA)

In December 2012, Ireland signed an intergovernmental agreement with the United States (the US-Ireland IGA), for which enabling provisions were enacted into Irish tax legislation in Finance Act 2013.

The Financial Accounts Reporting (United States of America) Regulations 2014 ('the Regulations'), together with the provisions of Section 891E Taxes Consolidation Act 1997, give effect to FATCA in Ireland from 1 July 2014. Further guidance is provided in the Irish Guidance Notes issued by Irish Revenue. The due date for reporting accounts is 30 June. The first reporting cycle was completed in 2015 in respect of the period ending 31 December 2014, and reporting is required to be performed by Irish financial institutions annually thereafter.

The IGA changes the way in which FATCA affects Irish financial institutions. Its effect is to give Irish laws and regulations precedence in governing FATCA compliance for Irish entities, and it provides that reporting will be carried out to the Irish Revenue

Commissioners, rather than to the US Internal Revenue Service (IRS). The reporting requirements will apply to all Irish financial institutions, as defined, regardless of whether the entity has US account holders or US assets.

US-Ireland IGA

The US-Ireland IGA defined the types of Irish financial institutions that are in scope for FATCA as:

- a custodial institution
- a depository institution
- an investment entity, or
- a specified insurance company.

Specific definitions are attached to each type of entity above.

For the asset management industry, the IGA covers investment funds, their administrators and investment managers, as well as other parties involved in the running of the fund. The Irish regulations clarify that the fund is the party with primary responsibility for complying with the relevant obligations, but that certain due diligence and reporting responsibilities can be delegated to a third party, such as the fund administrator, at the fund's discretion.

The US-Ireland IGA also defines the types of institutions that are either exempt from the scope of FATCA or that can qualify as 'Deemed-Compliant Financial Institutions'. Entities qualifying under the 'Deemed Compliant' status will benefit from a reduced compliance burden under FATCA. Such entities include non-profit organisations, financial institutions with a local client base, and certain collective investment vehicles. Collective investment vehicles may qualify under the 'Deemed Compliant' status where all of the interests in the vehicle are held by or through one or more financial institutions that are not non-participating financial institutions.

IGA benefits

Under the IGA, reporting Irish financial institutions must report account holder information annually to Irish Revenue Commissioners (by 30 June each year in respect of the previous calendar year). The Irish Revenue Commissioners will then collate and exchange this information with the IRS.

Under the US-Ireland IGA, reporting Irish financial institutions are considered to be compliant with local regulations, and, as a result, those entities should not suffer 30% FATCA WHT on US-source income or gross proceeds. Similarly, reporting Irish financial institutions should generally not be obligated to operate 30% FATCA WHT on such payments made to recalcitrant account holders or investors, provided the requirements of the IGA are met.

This is a very positive feature of the US-Ireland IGA, and means that the task of developing complex WHT systems to identify and withhold on payments to certain account holders is avoided in most cases.

IGA requirements

Some of the key requirements of reporting Irish financial institutions under the US-Ireland IGA include the following:

- Register as a reporting Irish financial institution and receive a Global Intermediary Identification Number (GIIN).
- Apply due diligence procedures to identify and report certain information on US Reportable accounts (as defined) and accounts held by non-participating financial institutions.
- Update account on-boarding procedures with effect from 1 July 2014 to identify whether the account holder is considered a US person (individual accounts) and classify and document the account into different categories of account holder (entity accounts).
- Annually report certain details on US reportable accounts.

Reporting

The Guidance Notes include a useful timetable demonstrating the phased in approach to Reporting over the first three years. They also contain a link to the IRS Schema and provide details on the transmission of the report to Revenue via Revenue's Online Service (ROS). Reporting can be done in US dollars or in the functional currency of the financial account. Nil reporting is required where a financial institution has no reportable accounts.

In the case of minor errors discovered by the IRS, the IRS will contact Revenue directly, who will liaise with the financial institution to resolve the issue.

Common Reporting Standard (CRS)

The CRS framework was first released by the OECD in February 2014 as a result of significant political will demonstrated by the G20 members. To date, more than 100 jurisdictions have publically committed to implementation, many of which are early adopter countries, including Ireland. For early adopters, CRS went live on 1 January 2016.

On 21 July 2014, the Standard for Automatic Exchange of Financial Account Information in Tax Matters (the Standard) was published, involving the use of two main elements, the Competent Authority Agreement (CAA) and the CRS. The goal of the Standard is to provide for the annual automatic exchange between governments of financial account information reported to them by local financial institutions relating to account holders who are tax resident in other participating countries.

The OECD leveraged FATCA to design the CAA and CRS, and, as such, the Standard is broadly similar to the FATCA requirements, albeit with numerous alterations. It will result in a significantly higher number of reportable persons due to the increased instances of potentially in-scope accounts and the inclusion of multiple jurisdictions to which accounts must be reported.

Requirements for financial institutions under CRS

A determination is required to be made with regard to whether an entity falls within the definition of a financial institution for CRS purposes. The definition of a financial institution is similar to FATCA, albeit wider in scope. If an entity is regarded as a financial institution and it is located in a participating jurisdiction, CRS requires it to identify account holders who are tax resident in other participating jurisdictions and report their information on an annual basis to their local tax authority, for onward exchange to the tax authority in which the account holder is resident. CRS therefore has a much larger scope than FATCA. In particular, CRS will require substantially increased reporting on a greater number of customers compared with FATCA, which focuses solely on US ‘specified persons’. Irish Revenue has adopted the ‘wider approach’ with regard to CRS, which means that Irish financial institutions need to report all account holders to Irish Revenue (apart from Irish and US account holders) who will then review this information and pass account information to tax authorities in participating jurisdictions to the extent there are reportable accounts that are resident in that participating jurisdiction.

When opening new financial accounts, financial institutions are required to obtain a CRS self-certification from account holders for all new accounts opened on or after 1 January 2016. There are two types of self-certification forms, individual and entity. If an entity self-certification form is to be completed, then, in the case of passive non-financial entities (Passive NFEs), an individual self-certification must also be completed (along with the controlling persons section) for each of the entity’s controlling persons.

Self-certifications must be reviewed for reasonableness against other information known about the account holder. As a result, the collection and validation of self-certifications must be an integral part of the anti-money laundering/know your customer (AML/KYC) process.

CRS requires separate due diligence review and timelines for pre-existing and new accounts, and for individuals and entities similar to FATCA. The first CRS reporting to the relevant tax authorities by financial institutions was in June 2017 (in respect of 2016).

In-scope financial institutions are obligated to register as a reporting entity for automatic exchange of information (AEOI) purposes for both FATCA and CRS. *Further details can be found at www.revenue.ie/en/business/aeoi/.*

Multilateral Instrument

The Finance Act 2017 provided the first step towards Ireland’s ratification of the Multilateral Instrument. It is envisaged that Ireland will ratify the instrument in full later this year in order for the instrument to take effect from 1 January 2019.

Significant developments

Tax treaties

As of 1 May 2018, the Isle of Man had entered into ten comprehensive double tax agreements (DTAs), 13 limited scope DTAs, and 39 tax information exchange agreements (TIEAs) based on the Organisation for Economic Co-operation and Development (OECD) models. The Isle of Man also has a DTA with the United Kingdom (UK) that predates the OECD model.

Payments to participators relating to sales of goodwill or unquoted shares

With effect from 20 February 2018, the repayment by a company of a participator loan (essentially a shareholder loan) will be treated as a distribution of profits if the loan was created by the sale to the company by the participator of goodwill or unquoted shares in the period from 6 April 2011 to 20 February 2018. The profit distribution will be taxed on an Isle of Man resident participator to the extent of the company's undistributed profits.

If a participator creates a loan from the sale of goodwill or unquoted shares on or after 20 February 2018, the value of the sale is immediately treated as a dividend paid to the participator up to the value of undistributed profits in the year of sale. Future loan repayments are treated as exhausting the reserves first, and are taxable on the participator accordingly.

Taxes on corporate income

Companies resident in the Isle of Man are taxed on their worldwide income and are required to file an annual income tax return reporting worldwide taxable profits calculated in line with local legislation and practice.

A non-resident company incorporated outside the Isle of Man but having a place of business or a permanent establishment (PE) on the Isle of Man will be taxed on the profit attributable to the Isle of Man establishment.

There are three rates of corporate income tax (CIT).

The 10% rate applies to income from:

- a banking business carried on in the Isle of Man on the basis of a deposit taking licence issued by the Isle of Man Financial Supervision Commission, and

- retail activities (i.e. the sale of goods to consumers through retail premises) carried on in the Isle of Man, but only if that income exceeds 500,000 Isle of Man pounds (IMP) in the year.

The 20% rate applies to income derived from real estate situated in the Isle of Man.

The 0% rate applies to all other income.

Where an election is made, certain companies subject to Manx income tax at the standard 0% rate can elect to pay tax at the 10% rate.

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates. Both resident and non-resident companies are taxed on their income at the same rates.

Unilateral relief from double taxation in respect of foreign-source income is given by way of tax credit.

Local income taxes

There are no profit based taxes levied by local government in the Isle of Man. However, commercial business rates are payable. Premises are assessed and given a 'rateable value' that forms the basis of the annual rates charge levied.

Corporate residence

A company incorporated in the Isle of Man is automatically resident for tax purposes and must therefore file an annual income tax return, whether it pays tax at 0%, 10%, 20%, or a combination of these rates.

A company that is incorporated elsewhere will be considered resident in the Isle of Man if it is 'managed and controlled' in the Isle of Man, and will be taxed on its worldwide income accordingly. 'Managed and controlled' is generally interpreted as being the place where the board of directors meets, although this is not always conclusive.

In cases where a company is resident in a country with which the Isle of Man has a tax treaty, then a tie-breaker may operate to determine residence.

Note that a company that is incorporated in the Isle of Man will not be resident if it can prove to the satisfaction of the Assessor that:

- its business is centrally managed and controlled in another country
- it is resident for tax purposes under the other country's law
- either it is resident for tax purposes in the other country under a DTA in which a tie-breaker clause applies or the highest rate at which any company may be charged to tax on any part of its profits in that other country is 20% or higher, and
- there is a *bona fide* commercial reason for its residence status in the other country, which is not motivated by a desire to reduce Isle of Man tax.

Permanent establishment (PE)

A place of business includes a PE, such as a branch office or shop, factory, workshop, or mine. The definition of a PE is not set out in statute, and, in cases where the company is resident in a country with which the Isle of Man has a DTA, the terms of the agreement will determine the company's residence.

Other taxes

Value-added tax (VAT)

VAT is a transaction-based tax applied on the domestic supply of most goods and services and is currently charged at a standard rate of 20%. VAT is designed to be a tax borne by the final consumer, and there is a mechanism for businesses to recover VAT incurred in a supply chain, subject to meeting certain conditions.

For VAT purposes, the Isle of Man forms a single territory with the United Kingdom, and the VAT rules are broadly identical. This means that VAT is charged on supplies between Isle of Man and UK businesses as if they were domestic supplies. The Isle of Man has its own tax authority for VAT and other indirect taxes, which works in conjunction with the UK tax authorities.

Some supplies are charged at 0%, including food, books and publications, and public transport, and there is also a 5% rate applied to domestic property repairs, amongst other things. Finally, some supplies are exempt from VAT, including insurance and financial services, betting and gaming, education, and healthcare.

Customs and excise duties

In addition to VAT, the Isle of Man forms a common jurisdiction for customs and excise duties with the United Kingdom, and, again, the rules are broadly identical. Customs duties are levied on most goods imported from outside the European Union (EU) into the Isle of Man, and there are various rates of duty that apply. Excise duties apply to such things as alcohol, tobacco, and fuels, and there are various rates of duty that apply. There is also a levy on commercial passenger flights known as Air Passenger Duty.

Property taxes

There are no property-related taxes for companies other than (i) income tax payable at a rate of 20% on their profits from the rental or development of land or property situated in the Isle of Man and (ii) business rates *as detailed under Local income taxes in the Taxes on corporate income section*.

Transfer taxes

There are no capital transfer taxes in the Isle of Man.

Stamp taxes

There is no stamp duty payable in the Isle of Man.

Betting duty

There are no other transaction taxes in the Isle of Man other than betting duty on gaming transactions, which is levied at differing rates of up to 15%, depending on the nature of the gaming transaction and whether it is online or land-based.

Payroll taxes

Employers in the Isle of Man are responsible for deducting tax from an employee's remuneration under the Income Tax Instalment Payments (ITIP) scheme. An employer is any person, which includes any individual, company, partnership, or public body, that engages or hires the services of someone and, in return, pays a wage or fixed payment.

The scheme covers everyone who receives remuneration and includes employees, office holders (e.g. directors), and pensioners. Any remuneration is subject to ITIP, and tax should be deducted in accordance with the individual's tax code.

For the purposes of ITIP, 'remuneration' means any payment of salary, wages, fees, commission, pensions, or annuities and some termination payments.

National Insurance contributions

In addition to deducting 'National Insurance' contributions from their employees' earnings, employers in the Isle of Man are required to make a 'secondary' National Insurance contribution in respect of each of their employees, depending on the individual's circumstances.

The standard rate of secondary contribution is 12.8% on earnings over IMP 118 per week, but reduced rates apply in certain circumstances where the employee is a member of a pension scheme.

Branch income

The income of branches is taxed in the same way as other corporate income in the Isle of Man. Foreign companies with branches in the Isle of Man will be taxed at the appropriate rate on the profits attributable to the Isle of Man branch.

Income determination

The general rules for the calculation of taxable income are the same whether a company is liable to tax at 0%, 10%, 20%, or a combination of these rates.

Inventory valuation

Inventories are generally stated at the lower of cost or market value. Any method of valuation that accords with sound commercial principles is acceptable for tax purposes, provided it is adopted consistently at the beginning and end of the accounting period and does not conflict with tax law. In practice, inventories are normally valued for tax purposes at the lower of cost or net realisable value. A first in first out (FIFO) basis of determining cost where items cannot be identified is acceptable, but not the base stock method or the last in first out (LIFO) method.

In general, the book and tax methods of inventory valuation must conform.

Capital gains

There is no capital gains tax in the Isle of Man.

Dividend income

Dividends are taxed at the standard rate of 0%. Dividends received from Isle of Man companies do not suffer withholding tax (WHT).

Banking income

Licensed banks are taxed at 10% on income from deposit taking, any related activities, and interest earned from the investment of regulatory reserves only.

Income earned on capital and reserves in excess of the regulatory capital, group funded lending, fiduciary deposits, assurance, insurance, custody, trust, and corporate services is not classified as banking business and is taxed at the 0% rate.

General expenses are allocated against 0% and 10% income streams on a *pro rata* basis.

The 20% rate applies to income earned by banks from real estate situated in the Isle of Man.

Royalty income

Royalties are taxed at the standard rate of 0%.

Rental income

Companies with profits arising on rental income in respect of land or property situated in the Isle of Man are charged to income tax at a rate of 20%. This rate applies whether or not the company is resident in the Isle of Man.

Foreign income

Resident corporations are liable to tax on their worldwide income (albeit the relevant rate of tax is often 0%).

Deductions

Relief is given in calculating the taxable profit of a company if the expense is incurred in the normal course of the business and is incurred wholly and exclusively for business purposes. However, certain expenses that are deducted in the computation of profits are not allowable for tax purposes. These include depreciation, unpaid but accrued pension and bonus payments, certain lease payments, and customer entertainment costs.

Depreciation

Depreciation charged in accounts in not allowable for tax purposes. Instead, relief for depreciation is given using 'capital allowances' based on a reducing-balance method. Plant and machinery, tourist premises, industrial buildings, commercial buildings within a designated area, fish processing buildings, and agricultural buildings and works have an initial allowance of 100%. There are restrictions on allowances for expensive motorcars.

Isle of Man government grants are not taken into account in determining the amount of expenditure on which allowances may be given.

Tax depreciation is not required to conform to book depreciation.

Upon disposal, allowances will be reclaimed on the sale proceeds, restricted to cost.

Goodwill

No relief is given against trading profits for the purchase of goodwill.

Start-up expenses

Start-up expenses incurred in the three years prior to the commencement of trading, which would have been deductible as a trading expense if incurred after the commencement of trading, are treated as a loss arising in the year trading commenced, and relief for these losses can be claimed, subject to the normal loss-relief rules.

Interest expenses

Interest paid to lenders subject to Isle of Man tax is allowable in full. Interest paid to lenders not subject to Isle of Man taxation is allowable if it is incurred in the normal course of the business and is wholly and exclusively for business purposes. Only interest charged at a reasonable commercial rate will be allowed as a deduction.

Bad debt

Relief against trading profits is only available in respect of specific bad debts. General provisions are not allowable.

Charitable contributions

Broadly, trading companies are able to claim a deduction for donations made to charities, subject to a maximum of IMP 15,000 or 1% of their taxable income, whichever is greater.

Fines and penalties

No relief is available for any payments made in respect of fines or penalties, whether related to income tax compliance or otherwise.

Taxes

Business rates, *as detailed under Local income taxes in the Taxes on corporate income section,* are deductible when calculating net taxable profit.

Net operating losses

Losses can be carried forward indefinitely against future profits from the same trade.

Trading losses incurred may be carried back against preceding year profits. There are additional rules that apply in the opening years of trade. Terminal losses in the last year of trade can be carried back against profits for the previous three years.

Payments to foreign affiliates

There is no formal transfer pricing regime in the Isle of Man, and payments made to foreign affiliates, such as royalties, management charges, and service fees, are deductible under normal principles. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction.

For details of WHTs, please see the Withholding taxes section.

Group taxation

Trading losses and excess capital allowances may be surrendered (subject to certain restrictions) between 75% affiliates resident in the Isle of Man. Similar concessions are available to members of a consortium, but only a fraction of the loss or excess may be set-off, that fraction being equal to the members' share in the consortium in the relevant year of assessment.

Transfer pricing

There is no formal transfer pricing regime in the Isle of Man. If, however, the Assessor of Income Tax is of the opinion that the main purpose, or one of the main purposes, of any transaction is the avoidance or reduction of tax liability, assessments may be made to counteract that avoidance or reduction of tax liability.

Country-by-Country Reporting (CbCR)

The Isle of Man has implemented legislation to enact CbCR. CbCR is one of four minimum standards under the OECD Base Erosion and Profit Shifting (BEPS) project that aims to improve transparency between multinational businesses and tax authorities, and to help identify aggressive tax avoidance. The Isle of Man CbCR Regulations set out matters including the definition of certain terms, filing and notification obligations, and the format for CbCR.

Under CbCR, multinational enterprise groups (MNE groups) with consolidated group revenue of 750 million euros (EUR) or more are required to report specified data on their international operations to their tax authority annually. That tax authority will in turn automatically exchange CbCR information to jurisdictions in which the MNE group operates and has an appropriate international agreement to exchange such information. In the Isle of Man, the first reporting fiscal year is that beginning on or after 1 January 2017. A reporting entity may voluntarily submit a CbCR report to the Assessor for fiscal years beginning on or after 1 January 2016.

Thin capitalisation

There is no specific thin capitalisation rule in the Isle of Man.

Controlled foreign companies (CFCs)

There is no CFC regime in the Isle of Man.

Tax credits and incentives

Land Development Tax Holiday

The Isle of Man 2016 budget introduced a Land Development Tax Holiday, which means, where certain conditions are met, a company can apply for exemption from income tax for up to five years on 'relevant' profits. These include:

- Profits on new commercial developments or improvements to existing commercial developments.
- Rental income received on a new commercial development or improvement to an existing commercial development.

However, both of the above must provide 'additional productive employment' in the Island.

Residential property is excluded as is any business that is beneficially owned by a tax-capped individual. The tax holiday applies to income that commenced after 16 February 2016. It begins on the first date income is earned from the development and will continue for a period of up to five years.

Foreign tax credit

Foreign tax paid in respect of profits that are subject to tax at a rate above 0% in the Isle of Man will be offset against the liability arising in accordance with any relevant tax treaty in place.

Withholding taxes

WHT should be deducted from certain payments made to non-residents by Isle of Man resident companies as follows:

- Rent from Manx land and property: 20% if paid to either a company or to an individual.
- Dividends: WHT is not required.
- Loan interest and royalties: WHT is generally not required, but there are certain exceptions that may apply.
- Other: The Assessor of Income Tax in the Isle of Man has the power to require WHT, at a rate determined by the Assessor (typically 20%), on payments of taxable income made to a non-resident (e.g. payments made to non-resident sub-contractors).

Tax administration

Taxable period

An accounting period for tax filing purposes can be no more than 12 months.

Tax returns

All companies are required to submit income tax returns on an accounting-period basis, whether they are liable to tax at 0%, 10%, 20%, or a combination of these rates. The tax return is due for submission one year and one day following the end of an accounting period. Where the financial statements cover more than 12 months, two (or more) returns may be required.

Companies are required to file their income tax returns online.

Fixed rate penalties apply if returns are filed late. The Assessor of Income Tax also has the powers to raise a default assessment where a tax return has not been filed.

Payment of tax

Payment of tax is due within one year and one day of an accounting period end. Interest is charged on tax paid late.

Tax audit process

There is no formal regular tax audit process in the Isle of Man. The Assessor of Income Tax can make an enquiry into a return within the time limits set out below.

Statute of limitations

Generally, the Assessor of Income Tax may make an enquiry into a tax return no later than 12 months from the date that the tax return is delivered to the Assessor.

If, however, the Assessor discovers that income tax has not been assessed that should have been assessed, the Assessor is able to make an assessment of that tax within a period of four years from the end of the relevant accounting period.

The Assessor also has powers to require the production of documents.

Topics of focus for tax authorities

The Isle of Man government is focussed on delivering openness and transparency across all areas of Isle of Man taxation. The government and the tax authorities work closely with international bodies such as the EU Code of Conduct group and the EU's Economic and Financial Affairs Council to ensure that the Island is fully compliant with international standards in areas such as tax transparency and exchange of information. The Island is already recognised on the OECD White List as being in the top tier of countries for transparency and information exchange.

The Isle of Man is focussed on reducing the avoidance of income tax and national insurance contributions of individuals using personal service companies and introduced legislation, which entered into effect on 6 April 2014, to tackle this issue.

There is also more focus on the taxation of dividends paid to shareholders, particularly in relation to whether a payment is a *bona fide* dividend or disguised remuneration.

Other issues

Tax treaties

As of 1 May 2018, the Isle of Man had entered into ten comprehensive DTAs, 13 limited scope DTAs, and 39 TIEAs based on the OECD models. The Isle of Man also has a DTA with the United Kingdom that predates the OECD model.

Information has been exchanged with the United States with effect from 30 June 2015 under an agreement to improve international tax compliance and to implement the Foreign Account Tax Compliance Act (FATCA).

The UK and Isle of Man governments have been exchanging additional information with effect from 30 June 2016 under an agreement extending the automatic disclosure of tax information. The agreement is modelled on the requirements of FATCA.

The Isle of Man has also committed to adopt the Common Reporting Standard (CRS), the new global standard for tax information agreements.

Choice of business entity

There are several different entities through which businesses may operate in the Isle of Man. These include companies, limited liability companies, partnerships, limited partnerships, and protected cell companies.

Significant developments

The corporate tax rate has been reduced from 24% in 2017 to 23% in 2018.

Taxes on corporate income

Israel-incorporated companies and foreign companies that have a branch presence in Israel are both subject to Israeli corporate tax. An Israeli-resident entity is subject to Israeli corporate tax on worldwide income while a non-resident entity is subject to Israeli corporate tax only on income accrued or derived in Israel. Income sourcing rules determine when income is to be considered from an Israeli source.

The corporate tax rate is 23% in 2018 (24% in 2017).

Business operations qualifying under the Encouragement of Capital Investments Law are entitled to reduced rates of tax depending upon their location and other conditions (*see the Tax credits and incentives section*).

Closely held personal service companies

A tax provision effectively lifts the corporate tax veil of a personal service company that meets the tax law definition of a 'minority company' that provides services to another company (the 'other company'). A 'minority company' is generally defined as a company that is directly or indirectly held or controlled by no more than five individuals (taking into account certain relatives). This provision is generally intended for situations when an individual in the minority company ('individual') is providing officer or management type services to the other company. In such a case, the income shall not be taxed to the minority company but, rather, shall be taxed to the individual as employment income, business income, or other income, depending upon the circumstances. The employment income classification shall apply if 70% or more of the total income or taxable income of the minority company in the tax year is sourced from the services performed by the individual or the individual's relatives during a period of at least 30 months during a four-year period or if the individual's services performed for the other company are of the type that is performed in an employer-employee relationship.

Local income taxes

Israel does not impose district or local taxes on corporate income.

Corporate residence

The following are considered to be resident in Israel:

- A company incorporated in Israel.
- A company whose business is managed and controlled from Israel.

In the absence of a definition of the term 'management and control' either in Israeli legislation or a direct discussion of this term by the Israeli courts, it may be difficult to determine whether a company that is incorporated outside of Israel shall be viewed as managed and controlled from Israel. This is a complex subject that needs to be addressed on a case-by-case basis. When an entity is both an Israeli tax resident and a resident of a foreign jurisdiction that is party to an income tax treaty with Israel, most treaties provide a tiebreaker test in the determination of an entity's tax residency.

Permanent establishment (PE)

Foreign resident entities might be exempt from corporate tax to the extent that its activities do not constitute a PE under the tax treaty applicable between Israel and the foreign resident's country of residency.

Whether a non-resident has a taxable presence under Israeli domestic tax law is far less clear than the definition of PE under a relevant tax treaty. There is no detailed legislation or Israeli court decisions that directly address this issue. In general, where there is no tax treaty protection, a non-resident is subject to tax on income accrued or derived in Israel, which is a taxation threshold lower than the PE criterion.

Other taxes

Value-added tax (VAT)

The current rate of VAT is 17%.

Exports of goods and certain services and various other transactions are zero-rated, and certain transactions are exempt. Banks and other financial institutions pay VAT-equivalent taxes at the rate of 17% based on their total payroll and on profits. Not-for-profit organisations pay VAT-equivalent tax (wage tax) at the rate of 7.5% of their total payroll.

Customs duties

Customs duty is imposed on certain products imported into Israel. The rates of duty depend upon their classification according to the Harmonised Customs Tariff and the country of origin. Israel has concluded free-trade agreements with the United States (US), Canada, Mexico, the European Union (EU), and the European Free Trade Association (EFTA).

Excise taxes

Israel imposes excise taxes on a variety of goods (e.g. gasoline and diesel fuel used for transportation, tobacco, alcohol). The excise taxes are levied item-by-item, and the rates vary.

Municipal tax

Municipal tax is levied annually on buildings by local municipalities based on the size, location, and purpose of the property.

Property taxes

Property taxes are generally imposed on the occupier of commercial and residential real property. Unoccupied property is generally taxed on the property's owner. The tax is imposed at the municipality level.

Real estate capital gains

Capital gains on real estate are subject to the Land Appreciation Tax Law. The law relates to any real estate in Israel, including houses, buildings, and anything permanently fixed to land; real estate rights; and leases for 25 years or more. Tax calculations closely follow the calculation of corporate tax on capital gains (*see Capital gains in the Income determination section*).

The tax rate on the real gain is the applicable corporate tax rate (23% in 2018 and 24% in 2017).

A special tax rate may apply with respect to real estate acquired prior to 1960.

Transfer tax

The purchaser of real estate is generally subject to acquisition tax at rates up to a maximum of 10% (the highest rate applies when the purchase price exceeds approximately 17 million Israeli shekels [ILS]).

Stamp taxes

There are no stamp taxes imposed in Israel.

Payroll taxes

There are no payroll taxes other than employer's national insurance contributions (*see below*).

Employer's national insurance contributions

Employers are obligated to pay national insurance contributions based on a percentage of each employee's income on a monthly basis. Employers are responsible for withholding employees' contributions from wages and remitting these together with the employer's own contributions. The employer's contribution rates (current as of January 2018) for Israeli-resident employees are 3.45%, up to monthly income of ILS 5,944, and 7.5% on the difference between ILS 5,944 and the maximum monthly income of ILS 43,370.

For non-resident employees, the employer rates are significantly lower and are 0.49%, up to monthly income of ILS 5,944, and 2.55% on the difference between ILS 5,944 and the maximum monthly income of ILS 43,370. The minimal national insurance payments for non-resident employees do not provide any retirement benefit for the non-resident but generally provides a certain element of work accident coverage.

When an irregular salary payment in excess of one quarter of the usual salary is made, special provisions apply to the computation of social charges by which the application of this payment is equally attributed to the current month and to the past 11 months.

Israel has social security totalisation agreements with 14 countries that may allow for an exemption from Israeli national insurance throughout the employment period of the employee in Israel.

Branch income

A branch is liable for tax at the standard corporate rate on Israel-source income. No tax is withheld on transfers of profits to the foreign head office unless the branch is an AE (*see the Tax credits and incentives section*).

Income determination

In general, the annual results (i.e. the excess of income over expenses or *vice versa*) of an Israeli company or branch, as detailed in the taxpayer's financial statements, form the basis for computing the taxable income of the business.

The base amount is then adjusted pursuant to the provisions of the tax law to arrive at 'taxable income'.

Inventory valuation

Inventories are generally valued at the lower of cost or market value (i.e. net realisable value). Conformity is required between book and tax reporting of inventory. The first in first out (FIFO) or weighted-average basis of valuation is acceptable; the last in first out (LIFO) method is not accepted.

Capital gains

Capital gains tax is generally payable on capital gains by residents of Israel on the sale of assets (irrespective of the location of the assets) and by non-residents on the sale of the following:

- Assets located in Israel.
- Assets located abroad that are essentially a direct or indirect right to an asset or to inventory, or that are an indirect right to a real estate right or to an asset in a real estate association, located in Israel. Taxation applies only in respect of that part of the consideration that stems from the above property located in Israel.
- Assets that are a share or the right to a share in an Israeli entity.
- Assets that are a right in a foreign resident entity that is essentially a direct or indirect right to property located in Israel. Taxation applies only with respect to that part of the consideration that stems from the property located in Israel.

The cashless transfer of rights and assets arising from certain mergers, spin-offs, and asset transfers may be exempt from tax upon meeting various requirements.

Determination of the capital gain

Corporate tax on capital gains is imposed on the disposal of fixed and intangible assets where the disposal price is in excess of the depreciated cost.

Computation of real gain and inflationary components

For tax purposes, the capital gain is generally calculated in local currency, and there are provisions for segregating the taxable gain into its real and inflationary components.

The inflationary amount is the original cost of the asset, less depreciation (where applicable), multiplied by the percentage increase in the Israeli consumer price index (CPI) from the date of acquisition of the asset to the date of its sale. The inflationary amount component is exempt to the extent it accrued after 1 January 1994 and is generally subject to tax at the rate of 10% if it accrued before that date.

The real gain component, if any, is taxed at the rates set out further below.

A non-resident that invests in capital assets with foreign currency may elect to calculate the inflationary amount in that foreign currency. Under this option, in the event of a sale of shares in an Israeli company, the inflationary amount attributable to exchange differences on the investment is always exempt from Israeli tax.

Sale of assets (including publicly and non-publicly traded shares)

The real gain is generally subject to tax at the corporate tax rate applicable in the year of the gain (23% in 2018 and 24% in 2017). Special exemptions may apply for non-residents (*see further below*).

Special rule for retained profits upon sale of shares

Special provisions apply to part of the real gain that is attributed to the seller's share of retained profits in the case of a sale of (i) non-traded shares that were acquired prior to 1 January 2003 or (ii) publicly traded shares where the seller was a 10% or more shareholder.

In the case of a disposal by corporations of (i) non-traded shares and (ii) traded shares when the seller generally directly or indirectly holds at least 10% of the sold Israeli company during the 12-month period preceding the sale, special provisions apply to such part of the real gain that is attributed to the seller's share of retained profits. The share of retained profits is the amount of gain equal to the proportional part of the retained profits of the company that the seller of the shares would have rights to by virtue of those shares. Detailed rules apply in determining this profit component.

Generally, the seller's proportionate part of the company's retained profits is taxed as if this amount had been received as dividends immediately before the sale (i.e. at a tax rate of 0% in the case of an Israeli-resident corporate shareholder or at a tax rate of 30% when the seller is a non-Israeli resident corporate shareholder that generally holds 10% or more in the rights of the Israeli company [it is unclear if this 30% rate may be reduced by an applicable tax treaty]). The part of the retained profits that is attributed to the period ending on 31 December 2002 is subject to tax at the rate of 10%.

Special exemptions for non-residents

Publicly traded Israeli shares

Non-residents corporations not having a PE in Israel are exempt from tax on capital gains from the sale of shares of an Israeli company traded on the Israeli stock exchange or on a foreign stock exchange. Certain exceptions apply.

Where the shares were purchased by the non-resident prior to being publicly traded, *subject to the availability of exemptions detailed below*, capital gains tax might apply for the portion of the gain that was generated up to the day of the share's public listing but not to exceed the capital gain actually arising upon the sale of the share and provided that the value on the day of public listing was more than their value on the date of purchase and that the proceeds upon sale exceeded the value on the date of purchase.

Non-publicly traded shares

For purchases after 1 January 2009, an exemption exists under domestic law for non-residents, regardless of their percentage holding in an Israeli company, from gains derived from the sale of securities not traded on a stock exchange, provided the following conditions are met:

- The investment is not in a company in which, on the date of its purchase and in the two preceding years, the main value of the assets held by the company, directly or indirectly, were sourced from an interest in (i) real estate or in a real estate association (as defined in the Income Tax Ordinance [ITO]); (ii) the use in real estate or any asset attached to land; (iii) exploitation of natural resources in Israel; or (iv) produce from land in Israel.
- The capital gains were not derived by the seller's PE in Israel.
- The shares were not purchased from a relative (as defined in the ITO) or by means of a tax-free reorganisation.

A non-resident company shall not be eligible for this exemption if Israeli residents are controlling shareholders or benefit or are entitled to 25% or more of the income or profits of the non-resident company, either directly or indirectly.

For shares purchased between 1 July 2005 and 1 January 2009, more restrictive conditions apply in order to be eligible for the exemption. Detailed rules apply.

Treaty exemption

Non-residents may qualify for a tax treaty capital gain exemption, depending upon the particular circumstances and the provisions of the applicable tax treaty (e.g. in some tax treaties, no capital gains exemption is allowed where the holding in the sold Israeli company exceeds a certain percentage).

When assets are attributable to an Israeli PE or are real estate rights (including rights in a real estate association), a treaty exemption will generally not be available.

The Israel Tax Authority (ITA) is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes.

Capital losses

Capital losses may offset all capital gains (including gains from Israeli or foreign securities) and gains from the sale of property (whether Israeli or foreign source).

Where the capital loss is from a non-Israeli asset (including when carried forward into future years), the loss must first be offset against foreign-source capital gains.

Capital losses derived from the sale of securities may also be offset against interest and dividend income generated from the sold security and also against interest and dividend income received from other securities (where the income was not subject to tax of more than 25%).

Capital losses from the sale of shares are generally reduced by any dividends received by the selling corporation during the 24 months preceding the sale, unless tax on the dividends of at least 15% was paid.

Capital losses can generally be carried forward indefinitely and set-off only against capital gains.

Exit tax

When an Israeli tax resident, including a company, ceases to be an Israeli resident for tax purposes, its assets are deemed to have been sold one day before it ceased being an Israeli resident. Although exit tax is primarily applicable to individuals, this might also apply to corporations incorporated outside of Israel whose management and control is transferred from Israel to another jurisdiction at a particular time.

Any gain attributable to the deemed sale of assets may be paid on the day the residency ceased or it may be postponed until the date the assets are actually realised. When the tax event is deferred to the sale date of the assets, the amount of the Israeli capital gain portion is determined by taking the real capital gain at the time of realisation, multiplied by the period of ownership from the day on which it acquired the asset until the day it ceased being an Israeli resident, divided by the entire period from the day of the asset's acquisition until the day of realisation. The Minister of Finance is authorised to prescribe provisions for the implementation of the exit tax, including provisions for the prevention of double taxation and the submission of tax reports, but no provisions have yet been issued.

Dividend income

Received by an Israeli-resident company

Dividends received by an Israeli-resident company from another Israeli-resident company that originate from income accrued or derived in Israel are exempt from corporate tax, except for dividends paid from income of an AE (*see the Tax credits and incentives section*). This affords the opportunity to transfer after tax profits within an Israeli group of companies for further investment.

Dividends received by an Israeli-resident company from a non-resident company, as well as dividends received from an Israeli company that arise from foreign-source income of the distributing company, are generally taxable for the receiving company at the rate of 23%. Under certain circumstances, the receiving company may elect to be taxed on such dividends at the corporate tax rate, in which case it will also be entitled to a foreign tax credit with respect to corporate taxes paid by the company distributing the dividend (i.e. an 'underlying' tax credit).

Received by a non-resident shareholder

Dividends received by a non-resident shareholder from an Israeli company are generally subject to tax at the rate of 25% (30% if paid to a 10% or more shareholder), subject to a reduced rate of tax under an applicable tax treaty.

Several of Israel's tax treaties have very beneficial withholding tax (WHT) rates for dividends being paid from Israel. The ITA is very sensitive to treaty shopping, and it will be necessary to demonstrate to the ITA that the foreign holding entity has business substance in its country of residence that will support its residency for treaty purposes and that the structuring of the holding through that entity was not implemented for tax treaty benefit purposes. Furthermore, many of the treaties contain a beneficial ownership clause as a condition to enjoying the treaty WHT rates.

Interest income

Received by an Israeli-resident company

Interest income received by an Israeli-resident company is subject to the regular corporate tax rate (23% in 2018 and 24% in 2017).

Received by a non-resident

Interest income received by a non-resident company is generally subject to tax at the rate of 23% or subject to a reduced rate of tax under an applicable tax treaty.

Interest received by a non-resident from deposits of foreign currency with an Israeli bank is exempt from tax, subject to certain conditions.

Rent/royalties income

Rent and royalty income, less allowable deductions for tax purposes, is subject to tax at the regular corporate tax rate (23% in 2018 and 24% in 2017).

Partnership income

From an Israeli tax perspective, a partnership is, in principle, a fiscally transparent vehicle. Accordingly, Israeli tax law does not tax partnerships as such; however, generally, each partner is taxed in respect of its share of the partnership income, with the taxable income allocated to a corporate partner taxed at the regular corporate tax rate. Consequently, the actual distribution of partnership income to a partner is a non-taxable event.

Foreign income

An Israeli-resident company is liable for tax on its worldwide income. Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable double taxation treaty (DTT) (*see the Tax credits and incentives section*).

Under the controlled foreign company (CFC) regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of the undistributed profits of certain Israeli-controlled, non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). *See Controlled foreign companies (CFCs) in the Group taxation section for more information*.

Deductions

Costs incurred by a branch or a company are deductible as a business expense for tax purposes where they are incurred 'wholly and exclusively in the production of income'. The amount of the deduction may be limited or disallowed further to other ITO provisions and income tax regulations.

Depreciation

The ITO and tax regulations prescribe standard annual rates of tax depreciation for assets serving in the production of taxable income. Depreciation is generally on a straight-line basis for industrial and other enterprises based on the specific asset types as set out in the tax regulations.

Accelerated rates of depreciation may be available in regard to certain activities (such as industrial) where there is unusual wear and tear due to additional shifts of equipment use. Detailed rules apply.

Depreciation is not permitted on land.

Goodwill

In general, under Israeli tax regulations, goodwill purchased may be amortisable by the purchaser over a ten-year period (10% annually).

Organisational and start-up expenses

Organisational and start-up expenses are generally not immediately deductible but, rather, are to be capitalised for tax purposes.

Interest expenses

Interest expenses incurred in the production of taxable income are generally deductible. Since there are no thin capitalisation rules in Israel, there are no specific debt-to-equity ratio requirements and there is no limit to the amount of debt that may be used in establishing a branch or local company operation in Israel. Interest and linkage payments arising from late tax payments are generally not deductible for tax purposes. Interest charges between related parties must be set based on transfer pricing principles. Detailed rules apply.

Bad debt

Provisions for bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Charitable contributions do not constitute a regular business expense. However, a tax credit may be available (*see Tax credit for donations in the Tax credits and incentives section*).

Research and development (R&D) costs

Special tax relief is provided under the ITO for R&D costs incurred (*see the Tax credits and incentives section*).

Pension expense

Pension fund contributions made to recognised funds are generally deductible for the employer, provided, *inter alia*, the contributions do not exceed a prescribed level and are effected on a regular basis.

Directors' fees

Payments for commercially justifiable director fees should generally be deductible.

Accrued expenses

Payments are generally deductible on an accrual basis for commercially justifiable expenses representing arm's-length consideration. However, when payments made to foreign residents attract WHT, the deduction will generally be allowed, provided the payment is effected within the tax year. Alternatively, such payments may be deductible in a tax year if the applicable WHT is deducted within three months after the tax year-end and remitted to the tax authorities within seven days of the deduction, together with index linkage differences and interest accrued since the year-end.

However, accrued expenses for severance pay, vacation pay, recreation pay, holiday allowances, and sick pay are not deductible, even if there is an obligation to make these payments. They are only deductible in the year in which they are actually paid to the beneficiary or to a recognised fund.

Contingent liabilities

Based on Israeli court decisions, contingent liabilities may be deductible for tax purposes upon satisfying the following criterion: (i) according to accepted accounting principles, the taxpayer must include in its balance sheet a suitable provision for the potential liability; otherwise, its income will be considered to have been incorrectly reported; (ii) the circumstances of the case and the technical means according to accepted accounting practice must be provided, enabling a determination of the amount of the liability; and (iii) there is a high probability that the potential debt with respect to which the provision was made will become an absolute debt.

Excess (disallowed) expenses

Israeli tax law disallows the partial deduction of certain employee-related expenses incurred by a company doing business in Israel. These include so-called 'excess expenses'. Examples of these are (i) payments for business, travel, and meals that exceed allowable deductions; (ii) expenses incurred in respect of a benefit granted by an employer to its employees but that cannot be attributed to a particular employee; and (iii) certain vehicle maintenance expenses (all expenses relating to a company-owned vehicle that was also designated for use of an employee are generally tax deductible as the employee is taxed in this regard upon an imputed amount).

A company is obligated to pay a monthly advance on excess expenses in the amount of 45% of the excess expense. The amount paid as an advance in respect of excess expenses is deemed a payment on account of the regular tax advances and payments that the company must pay for corporate tax and is offset against them, but it is not refundable (i.e. when a taxpayer's tax liability in a given year is lower than the excess expense advances paid, the unutilised amount shall be carried forward to future tax years). Detailed rules apply.

Fines and penalties

Payment of fines and penalties are generally not deductible.

Taxes

Municipality taxes incurred in the production of taxable income are generally deductible.

Net operating losses

Business losses can be offset against income from any source in the same year. Loss carrybacks are not allowed. Losses may be carried forward and set-off without time limit against income from any trade or business or capital gains arising in the business, but not against income from any other source.

Payments to foreign affiliates

Payments of interest, royalties, and management fees to foreign affiliates are deductible if based on normal commercial terms and practices and evidenced by an inter-company agreement and transfer pricing documentation. Where such payments attract WHT, the deduction will only be allowed where such tax has been withheld and paid in accordance with certain requirements. All cross-border payments to foreign affiliates for goods and services have to comply with arm's-length pricing standards (*see Transfer pricing in the Group taxation section*).

Group taxation

As a general rule, a parent company and its subsidiaries may not submit consolidated tax returns. Only groups of industrial companies in the same line of business, as well as parent companies that control industrial companies in the same line of business and have at least 80% of their assets invested in industrial companies, are eligible to file consolidated tax returns.

Transfer pricing

The ITO and its accompanying regulations contain elaborate transfer pricing provisions, including the arm's-length principle, that apply to any international transaction in which there is a special relationship between the parties to the transaction and for which a price was settled on for property, a right, a service, or credit. In general, the regulations are based upon internationally recognised transfer pricing principles (i.e. US tax regulations or Organisation for Economic Co-operation and Development [OECD] rules). These regulations generally require the taxpayer to support the pricing of international transactions with a transfer pricing study, inter-company agreements, and other documentation. In accordance to Israeli High Court Rulings, the terms of transaction conducted between related parties should be set in written contracts.

Since transfer pricing is a subject that receives considerable attention from the ITA in its examination of related inter-company transactions, transfer pricing principles and documentation requirements should be carefully adhered to.

A taxpayer is required to include in its annual corporate tax return a special form entitled 'Declaration of International Transactions' providing details for every cross-border transaction conducted with related parties. The taxpayer must sign the form, which includes a declaration that the transactions with related parties abroad were in accordance with the arm's-length principle, as defined in the Israeli transfer pricing regulations promulgated under the ITO. As a result of this form and declaration, the importance of appropriate transfer pricing documentation has increased.

Thin capitalisation

Israel has no statutory or regulatory provisions or other rules concerning thin capitalisation for tax purposes as exist in certain other jurisdictions. Since there are no thin capitalisation rules and Israel has no specific debt-to-equity ratio requirements, a company may be financed with minimum capital, and there is no limit to the amount of debt that may be used. Transfer pricing principles shall generally apply with regards to interest charges.

Controlled foreign companies (CFCs)

Under the CFC regime in Israeli tax law, an Israeli company or individual may be taxed on a proportion of certain undistributed profits of certain Israeli-controlled, non-resident companies in which the Israeli shareholder has a controlling interest (10% or more of any of the CFC's 'means of control'). A CFC is a company to which a number of cumulative conditions apply, including that most of its income or profits in the tax year were derived from passive sources (e.g. capital gains, interest, rental, dividend, royalties) and such passive income has been subject to an effective tax rate that does not exceed 15%.

Tax credits and incentives

Foreign tax credit

Double taxation is avoided by way of a foreign tax credit mechanism that also applies unilaterally in the absence of an applicable DTT. The foreign tax credit is limited to the Israeli corporate tax payable with respect to the same income. Foreign-sourced income is divided into 'baskets' (i.e. categories) on the basis of the income source (e.g. dividends, business income), and a particular credit limitation applies to each basket. Excess uncredited foreign income can be carried forward for the subsequent five tax years.

Preferred Enterprise (PFE) regime

PFE status, which provides for cash and tax benefits, may be granted under the Law of Encouragement of Capital Investments ('the Law') to enterprises that meet relevant criteria. In general, the Law provides that projects are considered 'preferred' if the enterprise will contribute to the development of the productive capacity of the economy, absorption of immigrants, creation of employment opportunities, or improvement in the balance of payments.

Eligible income (qualifying PFE income)

In order to qualify as a PFE, a company must generate 'industrial income', which is defined in Section 51 of the Law as income that was produced or arose in the course of the enterprise's ordinary activity from one or more of the below types of income:

i. Income from the sale of products manufactured in that factory.
ii. Income from the sales of products that are semiconductors produced in another factory, which is not owned by a relative of the owner of the factory, according to know-how developed by the factory.
iii. Income from granting permission to use know-how or computer software developed by the enterprise, as well as income from royalties received for the said use that the Director of the Department of Industrial Research and Development approved is connected to the productive activities of the enterprise in Israel.
iv. Income from services connected to sales as stated in (i) and (ii) above, and also from services connected to the right to use know-how or computer software or to the royalties stated in (iii).
v. Income from industrial R&D for a foreign resident, provided there has been given an approval from the Director of the Department of Industrial Research and Development.

Marketing and economic qualifying factors

In order to qualify for grants or tax benefits under the Law, the Law requires that the enterprise meets one of the following conditions each year:

- Its main activity is bio-technology or nano-technology (an approval in this regard should be received from the Director of the Department of Industrial Research and Development prior to approval of the PFE).
- Its revenue during the tax year from sales in a specific country or separate customs duties territory does not exceed 75% from its total revenue for that tax year.
- 25% or more of its revenue during the tax year is derived from sales in a specific country or in a separate customs duty territory that has a population of at least 12 million.

Corporate tax rates

The PFE corporate tax rate is 7.5% for operations in 'development area A' and 16% for operations outside development area A.

R&D centres will not be entitled to any reduced corporate tax rate if the direct or indirect controlling shareholders or the direct or indirect beneficiaries (entitled to 25% or more of the income or profits of the R&D centre) are Israeli residents.

Dividend WHT rate

The WHT rate applicable to dividends from PFE profits is 20%, which may be reduced under certain tax treaties.

Special Preferred Enterprise (SPFE) regime

Key eligibility conditions

The SPFE regime is intended for very large companies with material investments in productive assets, R&D, or in providing new employment opportunities. A company must demonstrate that it will greatly contribute to the Israeli economy to qualify for the SPFE regime.

To qualify, an Israeli company must meet certain conditions, such as having SPFE annual revenue greater than or equal to ILS 1 billion and being part of a group of companies that generates annual revenues greater than or equal to ILS 10 billion in the same industrial sector in which the Israeli company operates.

Corporate tax rates

The SPFE corporate tax rate is 5% for operations in development area A and 8% for operations outside of development area A for ten years. After ten years, the PFE tax rates shall apply unless the company has a new investment program that requalifies the company again for SPFE status.

Dividend WHT rate

The WHT rate applicable to dividends from SPFE profits continues to be 20%, which may be reduced under certain tax treaties. A 5% WHT rate applies to dividends paid to a foreign parent company from SPFE profits. This reduced rate is effective until 31 December 2019.

Preferred Technology Enterprise (PTE) regime

Key eligibility conditions

To be eligible for the PTE regime, a company must engage in the technology sector and qualify as a PFE. Further, the company must be part of a group of companies with aggregate annual revenues less than ILS 10 billion and meet one of the following two tests:

- The company's average R&D expenses in the three years prior to the current tax year must be greater than or equal to 7% of its total revenues or exceed ILS 75 million per year. The company also must satisfy one of the following conditions:
  - At least 20% of company's employees are R&D staff or the company has at least 200 R&D employees.
  - A venture capital fund has invested at least ILS 8 million in the company.
  - During the three years prior to the current tax year, the company grew its revenue each year by an average of 25% in relation to the preceding tax year and the revenue was at least ILS 10 million in each year.
  - During the three years prior to the current tax year, the company increased its number of employees each year by an average of 25% in relation to the preceding tax year and the company had at least 50 employees in each tax year.
- The company obtained an approval from the National Authority for Technological Innovation (formerly known as the Office of the Chief Scientist).

Clarifications may be required for interpretation of the above conditions.

Corporate tax rates

Under the PTE regime, reduced corporate tax rates of 7.5% for operations in development area A or 12% for operations outside of development area A shall apply. These corporate tax rates shall apply only with respect to the portion of intellectual property (IP) developed in Israel, based on forthcoming rules.

Capital gain on sale of IP

Companies that sell IP to a related foreign company will qualify for a reduced 12% capital gains tax rate, provided that the company acquired the IP from a foreign company after 1 January 2017 for at least ILS 200 million, subject to the approval of the National Authority for Technological Innovation.

Dividend WHT rate

A reduced 4% WHT rate may apply to dividends paid to a foreign parent company holding at least 90% of the shares of the distributing company.

For other dividend distributions, the WHT rate shall be 20%, which may be reduced under certain tax treaties.

Special Preferred Technology Enterprise (SPTE) regime

Key eligibility conditions

To be eligible for the SPTE regime, a company must meet the eligibility conditions of a PTE above and be part of a group of companies with aggregate annual revenues of at least ILS 10 billion.

Corporate tax rates

Under the SPTE regime, a reduced corporate tax rate of 6% shall apply for a period of at least ten years, subject to detailed qualifying rules. The reduced tax rate shall apply only with respect to the portion of IP developed in Israel, under forthcoming rules.

Capital gain on sale of IP

Companies that sell IP to a related foreign company will qualify for a reduced 6% capital gains tax rate, provided that the company developed or acquired the IP from a foreign company after 1 January 2017, subject to the approval of the National Authority for Technological Innovation.

Dividend WHT rate

The dividend WHT rates are the same as under the PTE regime, *discussed above*.

Approved Enterprise (AE) and Benefitted Enterprise (BE) regimes (for companies established prior to 2011)

The AE and BE regimes were tax incentive programs granted to operations qualifying under the Law prior to the Law's amendments in 2005 and 2011. As some companies may still be operating under these prior regimes, we set out below certain key tax highlights.

Reduced tax rates

In addition to financial incentives for the establishment or expansion of an AE/BE, various tax incentives apply when a new AE/BE or expansion thereof is operational.

The reduced tax rates generally apply for a seven-year benefit period (or a ten-year period in certain cases of local companies established in development area A or in the case of a foreign investor company, *see below*), commencing with the year in which the AE/BE first generated taxable income.

Generally, this seven or ten-year period of benefits is limited to 12 years from the year of implementation. For AE plans governed prior to the 2005 amendment to the Law, the period of benefits cannot extend beyond 12 years from the year the enterprise commenced its operations or beyond 14 years from the year in which approval of status as an AE was granted, whichever is earlier.

Locally owned companies

Income derived by a company from an AE/BE during the maximum seven-year period of benefits is generally subject to corporate tax at a rate of 25%.

A WHT rate of 15% (subject to a possible reduction under a tax treaty) applies to dividends paid from profits of an AE/BE earned during the benefits period if distributed either during the benefits period or during the subsequent 12 years.

Foreign investors' companies (FICs)

A company that qualifies as an FIC is entitled to enhanced tax benefits on AE/BE income. In general, an FIC is a company having more than 25% of its share capital (in terms of rights to shares, profits, voting, and the appointment of directors) and its combined share capital and investor loan capital owned by foreign residents. To qualify for FIC status, a foreign investor must make an investment in the company of at least ILS 5 million.

An FIC benefits from reduced corporate tax on the profits of an AE/BE for a period of ten years (instead of seven years) commencing with the first year in which taxable income is generated. The total period of benefits is restricted as discussed above. The reduced corporate tax rate depends on the level of foreign ownership as shown below:

Percentage of foreign ownership	Corporate tax rate (%)
Over 25% but less than 49%	25
49% or more but less than 74%	20
74% or more but less than 90%	15
90% or more	10

Dividends paid by an FIC out of the profits of its AE/BE are subject to tax in the hands of the recipient at the rate of 15% (subject to a reduced tax rate under an applicable tax treaty), without limitation as to their distribution date, provided the dividends are distributed out of AE/BE profits derived during the benefits period.

Alternative system of tax benefits (tax holiday)

Companies with new or expanding AEs/BEs were entitled to elect to forego all government cash grants and receive, instead, a total exemption (i.e. tax holiday) from corporate tax on undistributed profits of the AE/BE for ten years in development area A, for six years in development area B, and for two years in development area C. The area of incentive is the area in which the company's facilities are located.

The tax holiday provides an Israeli tax exemption so long as the AE/BE profits generated in the exemption period are retained within the company. Should a subsequent distribution of such profits occur, corporate tax and dividend WHT is imposed on the income distributed, at the rates which would have been applicable if the tax holiday had not been elected (i.e. 25% or at a lower rate if the company is an FIC with a foreign ownership percentage of 49% or more during those years).

Under certain anti-avoidance provisions applicable to tax holidays, amounts directly or indirectly paid or credited by an AE to a relative, a major shareholder, or to a related entity controlled by either a relative or a major shareholder may be treated as a deemed taxable distribution of profits by the AE.

Ireland track and strategic investment track

For companies having an AE/BE in development area A that seeks to distribute dividends while maintaining a low company and dividend tax burden, there was an 'Ireland track' under which the aggregate Israeli corporate and dividend WHT for a foreign resident shareholder is 15% and for an Israeli resident shareholder is 24.8%. This track is in contrast to the standard alternative benefit track discussed above, which provides a tax holiday, provided that profits remain undistributed.

Furthermore, a 'strategic investment track' allowed for an exemption during the benefit period from corporate tax and dividend WHT for a company having (depending on its location within area A of the country) very significant investment and revenue levels. This means that during the benefits period, a company eligible for benefits from income accrued under this track will have no tax liability whatsoever for its productive activity arising from such investment and for the distribution of profits. Detailed rules apply to these tracks.

Research and development (R&D) incentives

Deduction of R&D costs

Under special relief provided under the ITO, which was enacted for the purpose of encouraging taxpayers to invest in R&D activities, R&D costs can generally be deductible for tax purposes even when they represent capital costs.

The ITO provision generally distinguishes between two types of investors in R&D projects:

- The R&D project is conducted or sponsored by the owner of an enterprise in the fields of industry, agriculture, transportation, and energy, and it is intended to develop this enterprise.
- The R&D costs are borne by a taxpayer that is not the owner of an enterprise in the above mentioned fields or the taxpayer participates in R&D costs of another developer in consideration for a reasonable return, when such R&D projects also enjoy government grants.

In regard to the first group of taxpayers, the R&D expenses shall be deducted in the tax year incurred when such expense has been approved as an R&D expense by the relevant government department (the approval in regard to industrial related projects is generally granted by the National Authority for Technological Innovation [previously called the Office of the Chief Scientist]). When such approval is not obtained, the expense shall be deducted over three tax years.

The R&D expenses incurred by the second group of taxpayers shall generally be deducted over two tax years. The deductible expenses allowed to a participant in R&D costs of another developer generally may not exceed 40% of the taxable income of the investor in the year in which the expenses had been incurred.

Amortisation of acquisition amount

A special law that encourages investment in Israeli high-tech industry provides different tracks that allow for amortisation of the acquisition amount further to detailed rules (the Angel's Law).

The Angel's Law currently contains three tracks.

Under Track One, for acquisitions between 1 January 2011 and 31 December 2019, an Israeli tax resident company that acquires a controlling interest in a private Israeli company that meets certain R&D activity levels shall be entitled to amortise its acquisition amount (i.e. consideration paid for shares less the purchased company's positive equity capital if any) from its taxable income equally over five years beginning with the tax year following the acquisition. Entitlement to this deduction is subject to the fulfilment of detailed qualifying conditions, which include, *inter alia,* that both companies have AE/BE/PFE plans in the year of acquisition, meet certain R&D investment levels, employ a certain prescribed percentage of employees having academic degrees in certain qualifying fields, and for the first three years of the amortisation period the R&D expenses of the acquired company are incurred for its own company or that of the purchasing company and at least 75% of such expenses are incurred in Israel. Detailed rules apply.

Track Two applies to single investors that invest in seed companies, and applies to investments between 1 January 2011 and 31 December 2019.

Track Three applies to single investors that invest in early stage companies, and applies to investments between 1 January 2016 and 31 December 2019.

Under Tracks Two and Three, individual investors who invest in high-tech Israeli companies (which meet the definition of 'qualifying investment') will be entitled to deduct their investments, over three years up to ILS 5 million in each company, as an expense against their total taxable income. This allows early recognition of the investment as a current expense (instead of recognising it on the date of realisation of the shares of the investee company). The most significant advantage inherent in the Angel's Law is the investor's ability to offset its investment against income at higher tax rates, such as employment income. The qualifying conditions differ for Tracks Two and Three. Detailed rules apply.

Tax credit for donations

A tax credit is granted in respect of donations to approved state and charitable institutions aggregating at least ILS 180 (for 2018) in a tax year. The donor is allowed a tax credit equal to the amount of the contribution times the corporate tax rate applicable during the year, provided the amount eligible for the credit does not exceed the lower of the following: (i) 30% of the corporation's taxable income in that year or (ii) ILS 9,211,000 (in 2018). The above figures are adjusted each year according to the CPI. Excess unused tax credits may be carried forward for three years, subject to detailed rules.

Incentive to promote foreign investment in Israeli corporate bonds

In order to promote foreign investment in the Israeli corporate bonds market, there is an exemption from tax with respect to interest income received by foreign investors on their commercial investments in Israeli corporate bonds traded on the Tel Aviv stock exchange (TASE). The exemption is not granted to a foreign investor that has a PE in Israel or is related to, or holds 10% more of the means of control in, the investee company. In addition, in order for the exemption to apply to a foreign investor that has 'special relations' with the investee company, regularly sells products to or provides services to the investee company, or is employed by the investee company, the investor must prove that the interest rate on the corporate bond was determined in good faith.

Withholding taxes

Under Israeli domestic tax law, WHT on payments of Israeli-source income is generally deducted at the corporate tax rate from all income remittances abroad, unless a tax certificate is obtained from the ITA authorising withholding-exempt remittances or a reduced rate of tax pursuant to an applicable tax treaty.

Set out below is a listing of WHT rates for dividends, interest, and royalties under domestic tax law and pursuant to tax treaties in force. Detailed rules apply under certain tax treaties for eligibility to the treaty-reduced rates (e.g. beneficial ownership, having no PE in Israel). The applicable tax treaty should be consulted to determine the relevant WHT rate and to examine detailed conditions that may apply for the specific circumstance.

Recipient	WHT (%) Dividends	Interest *	Royalties
Resident corporations	0/23 (1)	23	30
Resident individuals	25/30 (1, 2)	25 (32)	30

Notes

* Some Israeli tax treaties provide for an exemption from WHT on interest involving governmental and quasi-governmental parties. Such exemptions are not separately indicated in the table above.

1. Dividends between Israeli resident companies are generally exempt from Israeli tax. Dividends paid from a foreign resident company received via an Israeli payer (e.g. bank) are subject to WHT at the rate of 24% when paid to an Israeli resident company and at the rate of 25% when paid to an individual.
2. 30% rate applies in the case of a 'substantial shareholder', which is, in general, a shareholder that holds 10% or more of the rights of the company (detailed rules apply).
3. 10% where beneficial owner directly holds at least 25% of the capital of the company paying the dividends.
4. At a rate that is 50% of the rate that would have been imposed but for this provision but not to exceed 12.5% and not less than 7.5%. A 10% rate applies where paid from profits generated by an enterprise entitled to special tax rates under the Encouragement of Investment Law.
5. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate applies in all other cases.
6. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the capital of the company paying the dividends; 15% rate in all other cases.
7. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 5% rate in all other cases.
8. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
9. If the beneficial owner is a company (other than a partnership) that directly controls at least 10% of the voting power in the company paying the dividends, the rate is 5%, but increased to 10% if the dividends are paid out of profits which, by virtue of provisions in Israeli law for the Encouragement of Investment in Israel, are subject to a tax rate lower than the standard rate levied on the profits of a company resident in Israel; 15% rate in all other cases.
10. 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
11. At the domestic Israeli tax rate.
12. 5% if the recipient directly holds at least 10% of the capital of the company paying the dividends.
13. 10% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
14. 15% if the beneficial owner is a company (other than a partnership) that directly or indirectly holds at least 10% of the voting power of the company paying the dividends.
15. 5% if the beneficial owner is a company that owns at least 25% of the voting shares of the company paying the dividends during the period of six months immediately before the end of the accounting period for which the distribution of profits takes place.
16. 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that holds 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are

subject to tax at a rate that is lower than the normal rate of the corporation tax; 15% rate in all other cases.

17. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where the dividends are paid out of profits that by virtue of provisions in the Israeli Law of Encouragement of Investments in Israel are exempt from tax or subject to tax at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
18. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
19. 5% if the beneficial owner is a company that directly or indirectly holds at least 10% of the capital of the company paying the dividends.
20. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends.
21. With respect to dividends paid to a company that directly holds at least 25% of the capital of the company paying the dividends: (i) 10% where the dividends are paid out of profits that, by virtue of provisions in Israeli law for the encouragement of investment in Israel, are exempted from tax or subject to tax at a rate that is lower than the standard rate levied on the profits of a company resident in Israel; (ii) 5% where paid out of regularly taxed profits. A 15% rate applies in all other cases.
22. 10% if the beneficial owner is a company (excluding partnership) that directly holds at least 10% of the capital of the paying company.
23. 5% if the recipient directly holds at least 15% of the capital of the company paying dividends.
24. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 25% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
25. 5% if the beneficial owner directly holds at least 10% of the capital of the company paying the dividends.
26. 5% if the recipient directly or indirectly holds at least 10% of the capital of the company paying the dividends.
27. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% of the gross amount of the dividends if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends and the dividends are paid out of profits that, by virtue of law of the state in which the payer is a resident, are exempt from corporate tax or subject to corporate tax at a rate that is lower than the normal rate in that state; 15% of the gross amount of the dividends in all other cases.
28. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends; 10% rate if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% rate in all other cases.
29. 10% if the recipient holds at least 25% of the capital of the company paying the dividends.
30. 5% if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; 10% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends where that latter company is a resident of Israel and the dividends are paid out of profits that are subject to tax in Israel at a rate that is lower than the normal rate of Israeli corporate tax; 15% in all other cases.
31. 12.5% but only if (i) during the part of the paying corporation's taxable year that precedes the date of payment of the dividend and during the whole of its prior taxable year (if any), at least 10% of the outstanding shares of the voting stock of the paying corporation was owned by the recipient corporation, and (ii) not more than 25% of the gross income of the paying corporation for such prior taxable year (if any) consists of interest or dividends (other than interest derived from the conduct of a banking, insurance, or financing business and dividends or interest received from subsidiary corporations, 50% or more of the outstanding shares of the voting stock of which is owned by the paying corporation at the time such dividends or interest is received). A 15% rate applies for payments from income derived during any period for which the paying corporation is entitled to the reduced tax rate applicable to an AE under Israel's Encouragement of Capital Investments Law (1959). A 25% rate applies in all other cases.
32. WHT is generally at a rate of 15% if the loan/interest is not linked to any index. Interest paid on a bond to a shareholder who holds less than 10% of the rights of the company is generally taxed at a rate of 35%. A WHT rate of 47% applies in the case of a substantial shareholder (in general, a shareholder that holds 10% or more of rights of the company). An additional tax at a rate of 3% applies on an individual's income if their income from all sources in a tax year exceeds ILS 640,000 (in 2017). Detailed rules apply.
33. 5% for interest in connection with the sale on credit of any industrial, commercial, or scientific equipment or on any loan of whatever kind granted by a bank.
34. 5% for interest in the case of a bank or other financial institution.

35. 7% for interest received by any bank or financial institution.
36. 5% for interest paid on a loan granted by a bank.
37. 5% for interest paid on any loan of whatever kind granted by a bank.
38. 5% where in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank loans made by banks; 10% in all other cases. An election can be made to be taxed on the net amount of the interest as if such interest were business profits.
39. 5% for interest paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
40. 7.5% for interest if received by any bank or financial institution.
41. 5% where paid on any loan of whatever kind granted by a bank.
42. 10% where paid to a bank or a financial institution.
43. 5% where paid in connection with the sale on credit of any industrial, commercial, or scientific equipment, or sale on credit of any merchandise by one enterprise to another enterprise, or on any loan of whatever kind granted by a bank.
44. 2% applies to government debt or government-assisted debt; 5% rate applies when paid to a financial institution; 10% rate applies in all other cases.
45. 5% in connection with the sale on credit of any industrial, commercial, or scientific equipment, or in connection with the sale on credit of any merchandise by one enterprise to another enterprise, or on any loan granted by a financial institution.
46. 7% for interest paid on any loan of whatever kind granted by a bank.
47. 10% for interest received by any financial institution (including an insurance company).
48. 10% for interest derived from a loan of whatever kind granted by a bank, savings institution, or insurance company or the like. 17.5% rate for other interest. An election may be made to be taxed on interest income as if that income were industrial and commercial profits.
49. 0% if the beneficial owner is a company (other than a partnership) that holds at least 10% of the capital of the company paying the dividends.
50. 5% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films) or for the use of, or the right to use, industrial, commercial, or scientific equipment or road-transport vehicles.
51. 0% for copyright royalties for literary, dramatic, musical, artistic, or scientific work (excluding in respect of films for cinema or television).
52. 15% for trademark royalties.
53. The rate is 50% of the rate that would have been imposed but for the treaty provision but not to exceed 12.5% and not to be less than 7.5%.
54. A new tax convention between Canada and the State of Israel is effective as of 1 January 2017 (in force since 21 December 2016). The new tax convention replaces the convention signed on 21 July 1975. Under the new tax convention, the following rates apply:

    - Dividends: The rate is 5% of the gross amount of dividends if the beneficial owner of the dividends is a company (other than a partnership) that directly holds at least 25% of the capital of the company paying the dividends; in all other cases, the rate is 15% of the gross amount of the dividends.
    - Interest: The rate is 5% of the gross amount of interest if the beneficial owner of the interest is a financial institution and is dealing at arm's length with the payer; in all other cases, the rate is 10% of the gross amount of the interest.
    - Royalties: The rate is 10% of the gross amount of the royalties; 0% for copyright royalties for and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (excluding royalties in respect of motion picture films and royalties in respect of works on film, videotape, or other means of reproduction for use in connection with television broadcasting); and 0% for royalties for the use of, or the right to use, computer software or any patent or for information concerning industrial, commercial, or scientific experience (but not including any such royalty provided in connection with a rental or franchise agreement).

55. For industrial, commercial, and scientific equipment royalties, the 10% rate applies to the adjusted amount of the royalties (70% of the gross amount of the royalties).
56. 0% for copyright royalties for literary, artistic or scientific work (excluding cinematograph films).
57. A new tax treaty between Israel and Germany is effective as of 1 January 2017 (in force since 9 May 2016). The new tax treaty replaces the treaty signed on 9 July 1962. Under the new tax treaty, the following rates apply:

    - Dividends will be taxable at a maximum rate of 5% if the beneficial owner is a company that directly holds at least 10% of the capital of the payer company; a 10% rate will apply in all other cases.
    - Interest will be taxable at a maximum rate of 5% and will be exempt in certain circumstances.
    - Royalties will be taxable only in the beneficial owner's state of residence.

58. 0% for copyright royalties for literary, artistic, or scientific work (excluding cinematograph films or tapes for television or broadcasting).
59. 2% for industrial, commercial, and scientific equipment royalties.
60. 5% for industrial, commercial, and scientific equipment royalties.
61. 10% for royalties for cinematograph films and films or video-tapes for radio or television broadcasting.

62. 5% for industrial, commercial, or scientific equipment royalties.
63. For royalties in respect of cinematograph or television films, the WHT rate shall not exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
64. 5% for royalties for copyrights of literary, dramatic, musical, artistic work, or for the use of, or the right to use, industrial, commercial, or scientific equipment.
65. The definition of royalties does not include any royalty or other amount paid in respect of (i) the operation of a mine or quarry or of any other extraction of natural resources or (ii) in respect of cinematograph including television films.
66. 5% for royalties for literary, artistic, or scientific work, excluding cinematograph films or films or tapes used for radio, or television broadcasting.
67. For royalties in respect of cinematograph or television films, tax may be imposed in Israel, but not to exceed tax at the rate applicable to companies on 15% of the gross amount of the royalty.
68. 10% for copyright or film royalties.
69. 5% of the gross amount of the royalties where such royalties consist of payments of any kind received as a consideration for the use or the right to use any copyright of literary, artistic, or scientific work (excluding cinematograph films).
70. 5% for royalties for any patent, design or model, plan, secret formula, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience; 7.5% for technical fees; 15% for all other royalties.
71. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends or where paid to certain qualifying pension funds.
72. 0% if to a pension fund or if paid on publicly traded corporate bonds or in respect of a loan, debt-claim, or credit guaranteed or insured by an institution for insurance or financing of international trade transactions that is wholly owned by Israel.
73. 0% if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividends where such holding is being possessed for an uninterrupted period of no less than one year and the dividends are declared within that period; or if the beneficial owner is the other contracting state or a central bank of that other state, or any other national agency or any other agency (including a financial institution) owned or controlled by the government of that other state; or where paid to certain qualifying pension funds. 10% in all other cases.
74. A resident of a contracting state may elect, in lieu of the tax that would be imposed, to make an election to be taxed on the interest income as if that income were business profits.
75. 0% if the beneficial owner is a company that directly holds at least 10% of the capital of the company paying the dividends; 15% in all other cases.
76. 5% if the beneficial owner is a pension fund; 20% if the distributing company is a real estate investment company and the beneficial owner owns less than 10% of the capital of the company paying the dividends; 15% for all other dividends.
77. 0% if to a pension fund or if paid on publicly traded corporate bonds or if the company paying the funds or the beneficial owner is one of the contracting states or one of their central banks, political subdivisions, or local authorities.
78. An Income Tax Convention and Final Protocol between Israel and Macedonia was signed on 9 December 2015, and is still pending. Once ratified, the following WHT rates in relation to dividends shall apply: 5% of the gross amount of the dividends if the beneficial owner of the dividends is a company (other than a partnership or a real estate investment company) that directly holds at least 25% of the capital of the company paying the dividends; and 15% of the gross amount of the dividends in all other cases.
79. 5% paid for any patent, design or model, plan, secret formula or process, or for the use of, or the right to use, industrial, commercial, or scientific equipment or for information (know-how) concerning industrial, commercial, or scientific experience.

Tax administration

Taxable period

The tax year is generally the calendar year. Certain entities may apply to have their tax year-end on different dates, specifically mutual funds, government companies, quoted companies, and subsidiaries of foreign publicly listed companies.

Tax returns

The Israeli system is based on a combined form of assessment and self-assessment.

The statutory filing date is five months following the end of the tax year, which for a calendar year taxpayer would be 31 May. It is possible, however, to secure extensions of the filing date.

Payment of tax

Generally, 12 monthly advance payments are levied at a fixed ratio of the company's turnover. Alternatively, a company may be required to make ten monthly payments beginning in the second month of its tax year, each payment being a fixed percentage of the previous year's tax assessment.

Penalties

Penalties are imposed on overdue advance payments and on delays in the submission of tax returns. For any tax due for a certain year that has not been paid by the end of that tax year, the taxpayer shall be charged interest at a rate of 4% and linkage differentials for the period from the end of the tax year until the date of payment. If the balance due is paid by the end of the first month following the end of the tax year, the taxpayer should receive a full exemption from any interest and linkage differentials.

When the ITA determines that a taxpayer has a tax deficiency exceeding 50% of the total tax due and the taxpayer has not proven to the satisfaction of the ITA that it was not negligent in its tax reports filed (or where there was a failure to file reports), a penalty equal to 15% of the tax deficiency shall be imposed.

A penalty equal to 30% of the tax deficiency may be imposed when an additional tax liability exceeding ILS 500,000 is issued by the ITA further to a tax assessment and the tax deficiency is more than 50% of the total tax due (additional conditions apply).

Tax audit process

A tax return, once filed, constitutes a self-assessment that remains open to review by the ITA generally for four years from the end of the tax year in which the tax return is filed. If no return is filed and a tax officer believes a taxpayer owes tax, the tax officer may issue a 'best judgement' assessment without time limit.

An assessment issued by an Assessing Officer may be challenged by the taxpayer in writing within 30 days stating in the objection the reasons why the assessment is not correct. A different Assessing Officer will then review the facts of the case. If following the filing of the objection the taxpayer reaches an agreement with the Assessing Officer, the tax assessment shall be amended and a notice of tax served on the taxpayer. If no agreement is reached, the Assessing Officer may determine the tax by issuing a Written Order, which may confirm, increase, or reduce the original tax assessment. If following the conclusion of the statute of limitation period or within one year after the appeal was submitted, whichever is later, no agreement is reached and no Written Order was issued, then the taxpayer's objection shall be deemed to have been accepted.

An appeal of a Written Order may be made by the taxpayer directly to the Israeli district courts. There is no special tax court system in Israel. A decision of the district court may be appealed to the Supreme Court as a court of civil appeals.

Detailed rules apply to the procedural appeal process.

Topics of focus for tax authorities

Some key tax issues that the ITA has focused on recently include:

- Transfer pricing.
- Treaty shopping to reduce WHT and capital gains tax.

- WHT on payments to overseas service providers and for payments in regard to software.

Other issues

Choice of business entities

Investments and business operations in Israel may be structured in a variety of ways. The following are the common types of business entities in Israel: (i) Israeli public or private company; (ii) foreign company in Israel (i.e. a branch); (iii) Israeli general or limited partnership; (iv) foreign general or limited partnership; (v) other entities such as cooperative societies; and (vi) other arrangements (e.g. contractual joint ventures).

Mergers and acquisitions

Israeli tax law allows for non-taxable reorganisations in situations in which the ownership and business enterprise of the original parties is continued after the reorganisation takes place, allowing for the deferral of the tax liability until the shares or assets transferred in such reorganisations are actually sold. Different qualifying requirements and conditions apply (e.g. obtaining a ruling from the ITA in certain cases), depending upon the tax residency of the parties and the type of transfer.

US Foreign Account Tax Compliance Act (FATCA) in Israel

A Model Reciprocal Intergovernmental Agreement (IGA) was signed by Israel and the United States on 30 June 2014 and was ratified on 12 July 2016. The IGA took effect on 4 August 2017, once the Ministry of Finance published the relevant tax code regulations.

The IGA provides clarity around the implementation of FATCA for the financial institutions and investment entities resident in Israel.

The ITA released FATCA Guidance in May 2017.

Common Reporting Standard (CRS) in Israel

Israel has committed to CRS implementation and to undertaking the first exchange of information in 2018. The FATCA law that was passed by the Knesset (Israeli Parliament) on 12 July 2016 also serves as the primary legislation for purposes of the CRS.

The secondary legislation (relevant tax code regulations) has been discussed in the Knesset but has not yet been approved.

Significant developments

The major recent changes in the Italian tax rules that occurred in the last 12 months are the following:

- Introduction of the so-called 'web tax' as of 2019.
- New 2018 tax deadlines.
- Extension of super and hyper tax depreciation.
- Changes to allowance for corporate equity (ACE).
- Tax credit for advertising campaigns and for training expenses.
- Value-added tax (VAT) changes.

Please note that Italy tax updates are generally expected to occur between November and December in connection with the finance bill and approval of related laws.

Introduction of the so-called 'web tax' as of 2019

The 2018 finance bill introduced the so-called 'web tax' on digital services applicable as of 1 January 2019. Under this new Law, corporations will apply a tax at the rate of 3% on the value of digital services, net of VAT.

New 2018 deadlines

Some tax deadlines are changed. In detail:

- VAT return is filed by 30 April.
- The communication of data of invoices issued and received regarding the second quarter of fiscal year (FY) 2018 is extended to 30 September 2018.
- For calendar year 2017, returns for corporate income tax (*imposta sul reddito delle società* or IRES), regional production tax (*imposta regionale sulle attività produttive* or IRAP), and withholding tax (WHT) are due by 31 October 2018.

Corporations having their tax period different from the calendar year are still filing the IRES returns within ninth months following the financial year-end.

Extension of super and hyper tax depreciation

For new investments in tangible and intangible assets, the additional IRES depreciation has been extended to those carried out in 2018. In particular:

- As for the so-called 'super depreciation', the purchase cost of a tangible asset is now increased by 30%, bringing its taxable basis to 130%.
- As for the so-called 'hyper depreciation', the purchase cost of hi-tech, cloud, ultra-broad band, industrial robotics, digital manufacturing, IT security, etc. investment is still increased by 150%, bringing the IRES base of the asset to 250%.

Specific supporting documentation is required to benefit from these provisions.

Changes to allowance for corporate equity (ACE)

The rate applicable to ACE deduction for FY 2018 and onwards is 1.5% (previously, for FY 2017, the rate was 1.6%).

Tax credit for advertising campaigns and for training expenses

A tax credit is granted for investments in advertising means, such as daily press, magazines, local television, or radio. The tax credit is defined on the increased investment in advertising compared to the previous fiscal year.

Costs of employees involved in training activities to acquire knowledge in the technologies related to the so-called 'Industry 4.0' plan are eligible for a tax credit of 40%.

VAT changes

Relevant changes have been introduced on different matters, such as electronic invoicing obligations, broader application of the split payment, reduction of timeline to deduct input VAT, and postponement of the VAT rates increase.

Taxes on corporate income

Applicable rates

Italian corporate entities are subject to a corporate income tax, known as *imposta sul reddito sulle società* or IRES, and to a regional production tax, known as *imposta regionale sulle attività produttive* or IRAP.

The standard rates are as follows:

- 24% for IRES.
- 3.9% for IRAP.

Up to FY 2016, the IRES rate was 27.5%. Specific rules apply for bank and financial entities.

Different IRAP rates are applicable for certain entities (i.e. banks and financial entities, insurance corporations, entities with a determined governmental exclusive right to provide services).

Regions have the power to slightly increase or decrease IRAP rates.

General rules

IRES

The IRES taxable base is determined according to the worldwide taxation principle, which states that, regardless of the location/jurisdiction where the income is produced, to the extent that the income is legally attributable to an Italian resident entity, the income is taxed in Italy. IRES is charged on the total net income reported in the financial statements of the company as adjusted for specific tax rules. Non-resident companies are taxed only on Italian-source income.

IRAP

There are different methods of computation for the IRAP taxable base, depending on the nature of the business carried out by the taxpayer. Provisions for liabilities and risks, as well as extraordinary items, cannot be taken into account when determining the IRAP taxable base.

For sales and manufacturing companies, the IRAP taxable base is broadly represented by the company's gross margin in its financial statements. In addition to the non-deductible items mentioned above, interest income and expense and provisions for bad debts are excluded for the purposes of the IRAP taxable base.

For banks, the IRAP taxable base is broadly defined as follows:

- Intermediation margin reduced by 50% of dividends.
- 90% of amortisation costs relating to fixed tangible and intangible assets.
- 90% of other administrative expenses.
- Net value of adjustments and reassessments for bad debts.

Special rules apply to financial institutions, other than banks.

IRAP is levied on a regional basis, and regions are allowed to increase or decrease the standard IRAP rate up to 0.92%. Companies with facilities in different regions must allocate their overall taxable base to the different regions on the basis of the employment costs of personnel located at the various sites. Facilities become relevant to the calculation of IRAP if they have been established for more than three months. Italian companies with permanent establishments (PEs) abroad, as well as shipping companies qualifying for the tonnage tax regime (*see Tonnage tax below*), are not subject to IRAP on the income earned through these PEs.

The deduction of labour costs for IRAP purposes depends on the type of hiring contract. In particular:

- Full deduction for costs related to employees hired with an open-ended contract.
- Deduction limited to contributions for compulsory insurance against accidents (i.e. *Istituto Nazionale Infortuni sul Lavoro* or INAIL) for temporary employees.

Moreover, for the companies that have no employees, a tax credit equal to 10% of IRAP is recognised to be used to offset other tax liabilities.

Substitutive tax on reorganisations (mergers, de-mergers, contributions in kind)

Corporate restructurings, such as mergers, de-mergers, and contributions in kind, are, in principle, tax neutral even if, for financial accounting purposes, the transaction results in the recognition of higher values of the assets or of goodwill. Companies may elect to obtain partial or full recognition for tax purposes of the step-up in the financial accounting values of assets or of the goodwill arising from the corporate restructurings, provided they pay a substitutive tax.

The substitutive tax is calculated on the step-up in tax basis and is based on progressive rates of 12% to 16%. The first 5 million euros (EUR) is taxed at 12%, the tranche above EUR 5 million but less than EUR 10 million is taxed at 14%, and the amount in excess of EUR 10 million is taxed at 16%. The substitutive tax may also be paid in three annual instalments of 30% in the year of election, 40% in year two, and 30% in year three plus interest at the rate of 2.5% per year on the deferred amounts. The substitutive tax is not deductible for the purposes of IRES or IRAP.

In addition, stepped-up values of goodwill and trademarks acquired from the reorganisation transactions carried out since 1 January 2016 may be depreciated for tax purposes over five tax years (previous to 2016, up to ten years) instead of the normally allowed 18 years by paying a substitutive tax of 16%. The higher tax depreciation arising from this election is effective from the tax period subsequent to the one in which the substitutive tax is paid. For example, if a merger transaction occurred in year one and the substitutive tax was paid in year two, the increased tax depreciation would begin in year three.

Tonnage tax

Italian tax resident shipping companies, as well as non-resident shipping companies operating in Italy through a PE, can qualify for and then elect to be subject to the Italian tonnage tax regime. The regime basically allows for the determination of presumptive income based on the net tonnage of the qualifying ships apportioned to the effective shipping days (tonnage income). The tonnage income is subject to IRES only.

To qualify for the tonnage tax, ships must: (i) have a net tonnage of more than 100 net tons (NT); (ii) be used for goods transportation, passenger transportation, salvage, towing, and other services; and (iii) operate in international shipping as defined by the rules disciplining Italian International Registry. Ships chartered out on a bare boat charter are excluded. Chartered ships with crew are included in the tonnage tax regime if their global net tonnage is less than 50% of the total net tonnage.

Tonnage income is calculated on the basis of the ship's net tonnage. The daily income is determined according to the following rate system:

Ship's net tonnage (NT)	Daily income in EUR per NT
0 to 1,000	0.0090
1,001 to 10,000	0.0070
10,001 to 25,000	0.0040
above 25,001	0.0020

No deductions are allowed from tonnage tax income.

Income and expenses from the following activities are all deemed to be covered by the tonnage income determined as previously discussed:

- Transport of goods.
- Transport of passengers.
- Salvage and towing.
- Other services that need to be performed on the high seas.
- Charges related to the above-mentioned activities (e.g. administrative and commercial expenses, insurances fees).
- Other operations performed in close connection with the transportation operations (e.g. loading and unloading).
- Other minor activities.

Capital gains or losses arising from the transfer of ships that have been acquired by a company while under the tonnage tax regime are also deemed to be included in tonnage tax income. Conversely, for capital gains arising from the transfer of a ship acquired prior to election for the tonnage tax regime, the difference between the sale price and the net tax cost as of the last tax period prior to the election for the tonnage tax regime is subject to the ordinary tax regime. Tax losses, in this latter case, are tax deductible.

An election for the tonnage tax regime should be made for all of a company's or group's qualifying vessels. So called 'cherry picking' is not allowed. Election for the tonnage tax regime is on a voluntary basis, but, once elected, it remains in effect for ten years. The election is silently renewed at the end of the ten-year period.

Corporate residence

Companies having their legal or administrative headquarters or their principal business activity within the Italian territory are considered to be resident companies and are taxable in Italy on their worldwide income.

A foreign company holding one or more Italian subsidiaries is deemed to be resident in Italy for tax purposes if at least one of the following conditions exists:

- The foreign company is, either directly or indirectly, held by Italian tax resident persons.
- The board of directors of the foreign company is made up mainly of Italian resident individuals.

Non-resident companies are subject to IRES and IRAP only on their Italian-source income. Specifically, Italian non-resident companies having a PE in Italy are subject to IRES and IRAP with respect to the taxable income generated from the PE in Italy.

Permanent establishment (PE)

The domestic definition of PE is substantially aligned with the Organisation for Economic Co-operation and Development (OECD) model.

Corporate residence of a trust

Trusts are considered as persons subject to corporate taxation.

Residence is defined on the basis of the location of the place of management and of the main object of the trust. In the first instance, trusts that operate through an appropriate structure are deemed to be tax resident in Italy if the said structure is located in Italy. In the absence of any such structure, trusts managed by a trustee will be deemed as tax resident in Italy if the trustee is tax resident in Italy. In addition, trusts that have the largest part of their assets located in Italy are deemed a tax resident in Italy.

Note that there are anti-avoidance rules for Italian non-resident trusts, setting out the specific conditions on which these trusts can become Italian tax resident.

Other taxes

Value-added tax (VAT)

Italian VAT (*Imposta sul Valore Aggiunto*) applies to the supply of goods and services carried out in Italy by entrepreneurs, professionals, or artists and on importations carried out by anyone. Intra-Community acquisitions are also subject to VAT under certain situations.

The Italian standard VAT rate is 22%. Reduced rates are provided for specifically listed supplies of goods and services, such as:

- 4% for listed food, drinks, and agricultural products, and e-books/e-periodicals that meet certain requirements.
- 5% for certain health services, for the sale of food herbs, and for certain transport services on seas, lakes, and rivers.
- 10% for electric power supplies for listed uses and listed drugs.

Intra-Community supplies and exports are exempt from VAT under certain conditions.

Specific supplies of goods and services expressly listed in the law are exempt from VAT (e.g. hospital and medical care, education, insurance services, specific financial services, supply, leasing of particular immovable property). Other specifically listed transactions are also out of the VAT application scope (e.g. transfer of money, transfer of going concern).

Input VAT on purchases of goods and services related to business activity generally is allowed for recovery. Special limitations apply in relation to specific items (e.g. cars, entertainment expenses) and to companies carrying out both taxable transactions and transactions exempt from VAT with no right to deduct.

The filing deadline for the annual VAT return is 30 April of the following year.

2019 new VAT fulfilments

Starting from 1 January 2019, taxable persons resident or established in Italy will be required to submit to the Italian tax authorities the data related to the supply of goods and services provided/received to/from parties not VAT established or VAT registered in Italy.

From the same date, the communication of the invoices issued and received (so-called '*Spesometro*') will be repealed.

2019 new electronic invoicing obligations

Starting from 1 January 2019, a mandatory electronic invoicing obligation will be in place for the supplies of goods or services carried out between persons that are resident, established, or VAT-registered in Italy.

Electronic invoices should be:

- converted into .XML format, in accordance with technical specifications referred to format currently used to send electronic invoices towards the public administration
- signed with a qualified or digital signature, and
- sent to the counterpart through the SDI (*Sistema di Interscambio*).

Electronic invoicing is also mandatory for business-to-consumer (B2C) transactions, in which case the supplier has the obligation to issue an invoice, with certain different specifications.

For the transmission of electronic invoices, the taxpayers, upon agreements between the parties, can rely on qualified intermediaries. However, the supplier will still be responsible for the issuance of the invoice in front of the tax authorities.

The electronic invoicing obligation will be brought forward to the invoices issued from 1 July 2018 for the services rendered by subcontractors, in the supply chain of companies, as part of a contract for works or services entered into with a public administration and in the case of or the supply of gasoline or diesel oil intended for use as motor fuel (the so-called 'fuel card' in paper format will be repealed).

Reduction of timeline in order to deduct input VAT

A reduction of the time frame for the exercise of the right to deduct VAT has been introduced from 2017.

The right to deduct input VAT may be exercised at the latest with the VAT return related to the year in which the right arises and under the conditions existing at the time of such a right has arisen.

The tax authorities have provided important guidance regarding the above. *Inter alia*, the time from which the deadline for VAT deduction begins to run is set when the following conditions jointly happen:

- the tax point occurred, and
- a valid invoice is received by the taxpayer.

In practice, a taxpayer that purchased and paid for a service in December 2017 and receives the invoice (dated December 2017) in January 2018 can exercise the right of deduction only from the VAT settlement related to January 2018 and by 30 April 2019 (i.e. deadline for submission of the relevant VAT return). However, VAT deduction must be exercised under the conditions existing at the time of the tax point (i.e. 2017).

Conversely, in case the invoice is received in December 2017, it will be possible to register it by 30 April 2018, but it will be necessary to use a special sectional of the VAT purchase ledger related to 2017; as such, the purchase will be included in the annual VAT return of the same fiscal year.

Previously, the right to deduct could be exercised, at the latest, with the VAT return related to the second year following the one in which the right to deduct had arisen.

European VAT group

From 1 January 2019, the European VAT group rules will be applicable, provided the option for it is elected by 30 September 2018.

In the main, according to the above-mentioned rules, in the case of election of the VAT group:

- transactions between taxable persons participating in the VAT group are considered as not relevant for VAT purposes (apart from certain exemptions), and

- the VAT group operates as a single VATable person towards those not participating in the group itself.

There are certain conditions to be met in order to be entitled for the election.

Certain implementing decrees establishing the operating rules have yet to be published.

The current VAT group settlement regime, which consists of settlement of VAT debits and credits among taxable persons meeting certain requirements in terms of chain of controls, will remain in place.

Postponement of the increase in the VAT rates

The above-mentioned rates are increased failing the achievement of the budget targets. In particular:

The 10% VAT rate will be increased:

- by 1.5% points from 1 January 2019 (i.e. from 10% to 11.5%), and
- by an additional 1.5% points from 1 January 2020 (i.e. from 11.5% to 13%).

The 22% VAT rate will be increased:

- by 2.2% points from 1 January 2019 (i.e. from 22% to 24.2%)
- by an additional 0.7% points (i.e. 24.9%) with effect from 1 January 2020, and
- by an additional 0.1% points (i.e. 25%) with effect from 1 January 2021.

Reporting obligations

VATable persons have to submit to the tax authorities, on a quarterly basis, the communications of:

- periodic VAT balances, and
- a detailed list of the data of the invoices issued and received.

The communications of periodic VAT balances require one to submit electronically to the tax authorities, on a quarterly basis, the summary of VAT balances accounting data (also in case the entity results in a credit position). The deadlines for each quarter are 31 May, 16 September, 30 November, and the last day of February of the following year (in case the deadline is Saturday/Sunday/bank holiday, it is postponed to the first working day that follows).

The communications of the data of the invoices issued and received require one to submit electronically to the tax authorities, on a quarterly basis, the data of all the invoices issued during the relevant quarter and of all the invoices received and registered in the VAT ledgers, including customs bills of import, as well as the related credit notes (for FY 2018, by option, the communications of data of invoices issued and received for Q1 and Q2 are due by 30 September and Q3 and Q4 are due by the end of February of the following year).

Service supply rules

Generic services supplied by a taxable person to another taxable person (business-to-business or B2B) are in the scope of the Italian VAT if the services are supplied to Italian taxable persons or to PEs of an Italian non-resident entity.

The specific rules are as follows:

- For services related to immovable property, reference must be made to the place in which the immovable property is located.
- For the transportation of passengers, the place in which the transportation takes place must be identified, including the proportion of the distance covered.
- For catering and restaurant services, the place in which the activity will be physically carried out must be identified.
- For short-term hiring, leasing, and similar means of obtaining transport services, the place in which the vehicle is used must be identified (use and enjoyment rule has been implemented on these services).

The general rule for services supplied by a taxable person to a non-taxable person (B2C) identifies the place of taxation with the country of residence of the supplier.

Several rules, in addition to the B2B general rules, exist for the following:

- Brokerage services.
- Goods transport services.
- Services related to movable goods and ancillary activities related to transports.
- Long-term hiring/leasing of means of transport services.
- Electronic services supplied by extra-European Union (EU) suppliers.
- Telecommunications and television/radio broadcast services.

In addition, special rules are provided for certain services rendered to final customers established outside the European Union.

In relation to the VAT treatment of cultural, artistic, sporting, scientific, educational, recreational, and similar services, VAT is due in the country where the activities were physically carried out for B2C activities and VAT is due in the country of the recipient for B2B activities other than admission. For B2B services in respect of admission, the place of supply is where the events take place.

Time of supply for certain services

Time of supply is the time of completion in case of:

- supply of services falling under the general rule (i.e. generic supply of services) rendered by EU and non-EU taxable persons to taxable persons established in Italy, and
- supply of services falling under the general rule rendered by taxable persons established in Italy to EU and non-EU taxable persons.

In case of periodic or continuous supply of services, the time of supply is the date of maturity of the consideration.

Moreover, the above supplies of services, if performed/received by taxable persons established in Italy continuously over a period longer than one year and if no payments are carried out, even partially, in the same period, shall be considered carried out at the end of each calendar year up to completion of the same supplies.

Reverse-charge mechanism

According to the reverse-charge mechanism, the obligations related to supply of goods and provision of services carried out in Italy by non-resident taxable persons towards taxable persons established in Italy are fulfilled by the latter. The recipient of goods and/or services has to integrate the invoice received by the EU supplier or has to issue a self-invoice in case of a non-EU supplier and record it in the VAT sales register and VAT purchase register within a defined timeline.

Reverse-charge mechanism also applies to certain domestic supplies between Italian taxable persons (e.g. cleaning, demolition, equipment installation, and completion services related to the buildings).

VAT credit offset with other taxes

To offset a VAT credit against other taxes for an amount higher than EUR 5,000, it is necessary to wait until the 16th day of the month following the filing of the yearly VAT return on which the credit is shown.

Furthermore, in order to avoid abuse, taxpayers intending to offset a VAT credit for an amount higher than EUR 5,000 are required to ask their tax advisors or auditors to affix their signature to the VAT return, which is known as the 'conformity mark' (i.e. *visto di conformità*).

Registration tax

Specific deeds and contracts must be filed with the local registration tax office either upon signature or if specific circumstances occur, and the relevant tax must be paid.

Depending on the nature of the contract and on the assets that are the object of the contract, as well as on the form of the contract, registration tax is levied as a fixed amount or as a percentage of the value of the goods and/or rights that are the object of the contract. As a general rule, no proportional registration tax is due in the case of transactions subject to VAT.

VAT and registration tax on lease of immovable properties

Leases of residential and commercial buildings, or portions thereof, generally are exempt from VAT with no right to deduction and subject to the registration tax at a 2% or 1% rate.

Different VAT rates, VAT treatment, and registration tax treatment apply depending on the type of buildings the lease refers to (e.g. residential, commercial buildings) and the supplier (e.g. individual, constructions companies, taxable persons other than construction companies).

Specific rules apply in case of financial leases of residential and commercial buildings from a registration tax perspective.

Customs duties

At the moment of the importation of goods into the EU territory, customs duties are applied. The amount of customs duties to pay depends on the value and nature of the goods imported. In particular, for each kind of good, the Common Customs Tariff provides a tax rate to be applied to the value or number of the goods imported.

The correct classification of the goods is one of the most important issues to consider when an economic operator introduces goods in Italy. A wrong classification can give rise to the application of higher customs duties, and the operator could face a tax burden not due, or to the application of lower customs duties, and this situation could lead to a tax assessment by the Italian Customs Authority.

The value of the goods is represented by the transaction value, hence, the price actually paid or payable for the goods when sold for exportation to the customs territory of the EU, provided that:

- there are no restrictions as to the disposal or use of the goods by the buyer
- the sale or price is not subject to some condition or consideration for which a value cannot be determined with respect to the goods being valued
- part of the profits of any subsequent resale, disposal, or use of the goods by the buyer will not be accrued, directly or indirectly, to the seller, and
- the buyer and seller are not related, or, where the buyer and seller are related, that the transaction value is acceptable for customs purposes.

In determining whether the transaction value is acceptable, the fact that the buyer and the seller are related is not, in itself, sufficient for considering the transaction value as not acceptable. Where necessary, the circumstances surrounding the sale are examined, and the transaction value is accepted if the relationship did not influence the price.

The price actually paid or payable is the total transaction amount paid for the imported goods and includes all payments made as a condition of sale of the imported goods by the buyer to the seller or by the buyer to a third party to satisfy an obligation of the seller.

In determining the customs value, the following items shall be added to the price, to the extent that they are incurred by the buyer and are not included in the price (list not exhaustive):

- Commissions and brokerage.
- Royalties and licence fees related to the goods under assessment.
- The cost of transport and insurance of the imported goods.

At the same time, provided that they are shown separately from the price actually paid or payable, the following items shall not be included in the customs value (list not exhaustive):

- Charges for the transport of goods after their arrival at the place of introduction into the customs territory of the European Union.
- Charges for construction, erection, assembly, maintenance, or technical assistance, undertaken after importation of imported goods such as industrial plant, machinery, or equipment.
- Buying commissions.

A reduced or zero rate of duty at importation can be applied when the goods imported have a preferential origin. The preferential origin depends on the existence of commercial agreements between the European Union and other non-EU states or by facilities provided by the European Union to non-EU states unilaterally.

The application of a reduced or zero rate of duty can even depend on the existence of preferential tariff treatment or on the existence of a particular exemption provided by law for some kind of goods.

Any person may appoint a representative in one's dealings with the Customs Authority to perform the activities and formalities laid down by customs rules. Such representation may be direct, in which case the representative shall act in the name and on behalf of another person, or indirect, in which case the representatives shall act in one's own name but on behalf of another person.

For direct representation, a forwarding agent, holder of a particular licence, must be appointed.

The representative must be established within the European Union.

Excise duties

The following goods are subject to excise duties:

- Energetic products (e.g. petrol, gas oil, natural gas, coal).
- Alcohol and alcoholic drinks (e.g. wine, beer, ethylic alcohol).
- Processed tobaccos (e.g. cigars, cigarettes, tobacco).
- Electric power.

The subjection of a product to excise duties has to be verified on the basis of its customs combined nomenclature code.

The tax liability, depending on the products, arises:

- at the moment of importation or production (and the excise duties must be paid at the moment in which they are released for consumption in Italy)
- when the excisable goods are used for heating or as fuel, and
- when the excisable goods are released for consumption or used for own use.

As a general rule (with exception of natural gas and coal, coke, and lignite), with reference to excise goods released for consumption during a month, the payment of the relative excise duties has to be made by the 16th day of the following month.

With reference to excise goods imported, customs rules are applied as far as the procedure and terms of payment are concerned.

The production, processing, and holding of 'excise goods', except from natural gas, coal, coke, lignite, and electric power, are subject to a suspensive regime performed through a fiscal warehouse.

In order to manage a fiscal warehouse, it is necessary to acquire a licence issued by the Italian Customs Authority, and there are specific obligations for the owner of a fiscal warehouse (e.g. provide for a particular guarantee, keep a particular accounting system for the goods stored, be subject to controls performed by Italian Customs Authority, where requested).

The Italian legislation provides for many exemptions with regards to the use of 'excise goods'.

Furthermore, under certain circumstances, a tax refund is granted to the operator who released for consumption if, afterwards, the products are not consumed in Italy.

Stamp duty taxes

Stamp duty taxes (*Imposta di Bollo*) apply on a certain list of deeds or documents provided for by the relevant law provision (e.g. checks, bills of exchange, statements of account, certificates, books of account, deeds of transfer of quotas, and, in some cases, invoices).

According to the kind of deed, stamp duty tax is due at the moment of the deeds' origin or in case of use (e.g. if the deed is filed to the Italian Registration Office). Moreover, it can be a fixed amount or as an amount proportional to the value of the deed or document.

Stamp duty tax can be paid:

- ordinarily, through a physical stamp attached on the document, or
- virtually, through electronic means (in this case, a specific authorisation from the Italian tax authorities and a specific process procedure are needed).

Stamp duty tax is usually alternative to VAT; however, in case of considerations partially subject to VAT and partially not subject to VAT, the invoice is subject to stamp duty tax if the total amount of the considerations not subject to VAT exceeds EUR 77.47. Moreover, some transactions are stamp duty tax exempted (e.g. inter-Community supply of goods). For transactions that are exempted from VAT (with restriction on VAT credit) and for transactions out of scope of VAT, exceeding EUR 77.47, an amount of EUR 2 is due as stamp duty tax for each issued invoice.

Unified municipal tax (Imposta Unica Comunale or IUC)

The IUC is composed of the following different taxes:

- *Imposta Municipale Unica* (IMU): Real estate tax levied on the ownership of immovable properties (buildings, rural land, farmlands), except for immovable properties owned as primary private properties. The standard tax rate is 0.76%. Depending on the municipality and status of the taxpayer, the tax rate can be increased or decreased. The taxable base is generally determined on the basis of the so called 'cadastral value' (i.e. capitalisation of the deemed standard income that is expected to be derived from the real estate).
- *Tributo per i Servizi Indivisibili* (TASI): A service tax due by real estate owners and by tenants, except for immovable properties aimed as private properties (different from immovable properties falling under the cadastral category A/1, A/8, and A/9). The amount due by the tenant can range according to the Regulation stated by the municipality.
- *Tassa sui rifiuti* (TARI): A waste tax levied on the owner or the user of immovable properties.

Financial Transaction Tax (FTT)

Italian FTT applies to (i) cash equities, (ii) derivatives, and (iii) high-frequency trading transactions.

Cash equities FTT applies to the purchase of shares and other equity instruments issued by Italian companies, as well as securities (wherever issued) tracking those Italian shares (e.g. ADRs). The taxable base is the net daily balance of transactions on the same financial instruments by the same person on the same settlement date. The rate is 0.2% on OTC trades or 0.1% on trades executed in a regulated market (or multilateral trading facility).

Derivatives FTT applies to any derivative contract or securitised derivative, whose underlying value is directly or indirectly tied to Italian shares. The taxable base is the notional amount of the derivative (no netting applies), and it is subject to a special tax scale, on both the purchase and the sale legs; the amount is reduced to 1/5 for transactions executed on regulated markets and multilateral trading facilities.

High-frequency trading FTT applies to transactions on shares (wherever issued) and share-based derivatives (wherever the underlying share is issued) in the Italian financial markets; trades amended or cancelled within half a second are subject to a 0.02% rate, to the extent they exceed 60% of overall trades.

Web tax

As of FY 2019, corporations will apply a tax at the rate of 3% on the value of digital services, net of VAT.

The web tax will be applicable only in case the number of 'digital services' will exceed 3,000 units per year (digital services includes services rendered by means of internet or an electronic network, characterised by a high level of automatisation, with minimal human intervention and that could not be provided without the support of information technology).

The buyer (WHT agent) will settle the tax with a specific form (so-called F24 form) by the 16th day of the month following the payment of the digital service.

The web tax will also be due in case the digital service will be rendered by non-Italian resident entities, even without a PE in Italy.

The web tax will be not creditable against other Italian taxes.

A Regulation is expected to be issued to define related terms and conditions.

Social security contributions

The Italian employer, in order to pay social security contributions for employees, must register with the Italian Social Security Administration (*Instituto Nazionale Previdenza Sociale* or INPS).

The total social security rate is around 40% of the employee's gross compensation (the rate depends on the work-activity performed by the company, the number of employees of the company, and the employee's position), and is shared as follows:

- Employer's charge is around 30%.
- Employee's charge is around 10%.

Branch income

The tax regime for PEs is the same as for corporate Italian entities (e.g. joint-stock companies). Accordingly, a PE is subject to IRES as well as IRAP. Both taxes are determined on the basis of a specific statutory account prepared according to the accounting principles applying to resident enterprises with similar business activity carried out by the PE.

Transfer pricing principles apply to 'transactions' between the head office and its Italian PE. A PE is considered a functionally separate entity, independent from its headquarters, and a PE's profits and 'free capital' are attributed to it on the basis of OECD principles.

Income determination

IRES income determination

Specific rules have been released for entities adopting Italian Generally Accepted Accounting Principles (GAAP) rather than International Financial Reporting Standards (IFRS) for Italian statutory financial reporting purposes. These provisions are aimed to align the taxable basis determination rules with the statutory financial reporting (so-called principle of derivation of the corporate income taxable basis from the statutory financial statements).

Therefore, the taxable basis is influenced by the qualification criteria, time-based recognition, and classification in the financial statements provided by the related accounting standards.

The already issued provisions for International Accounting Standards (IAS)/IFRS entities also apply to Italian GAAP adopters, if compatible.

There are also measures aimed to coordinating different items of the tax code in the light of new evaluation and representation criteria introduced by the accounting reform.

IRAP income determination

For IRAP purposes, relevant income and expense are those reported in the statutory financial statements. Positive and negative items resulting from transfer of business concern are out of the scope of the taxable basis.

Inventory valuation

Italian tax law allows the application of all the most commonly used inventory valuation methods: last in first out (LIFO), first in first out (FIFO), average cost. For IRES only, the reference prices used to calculate the written down value of the inventory items cannot be lower than their market prices during the final month of the tax period.

Companies operating in the oil and gas sector are required to adopt either average cost or FIFO for tax purposes.

Capital gains

Capital gains are taxable in the tax period in which they are realised, as follows:

- Fixed assets: The gain realised on the sale of fixed assets is taxable for both IRES and IRAP purposes. Additionally, for IRES purposes, tax on capital gains can be spread

over a maximum of five years. This treatment is allowed if the company owned the fixed assets for not less than three years.
- Financial investments: A specific participation exemption regime (PEX) is applicable. Under this regime, capital gains realised by Italian companies on sales of shareholdings are 95% exempt from IRES.

PEX applies if all of the following conditions are met:

- The shareholding was held uninterruptedly for at least 12 months prior to the sale.
- The investment was classified under financial fixed assets in the financial statements relating to the first tax period of uninterrupted ownership.
- The subsidiary is actually carrying on a commercial activity (e.g. investments in companies mainly performing management of their own real estate are not entitled to PEX benefits).
- The majority of the subsidiary's income is not generated in a tax haven country or one with a privileged tax regime.

The third and fourth conditions must be met both at the time of the sale of the investment and in the three preceding years. If these conditions are not met, the capital gain realised by the company is ordinarily taxed. Capital losses arising from the sale or write-down of shareholdings meeting PEX conditions are basically not tax deductible. Likewise, the capital losses realised on sales of non-PEX investments are tax deductible. Specific exemptions are provided for those entities adopting IFRS for Italian statutory accounts reporting purposes.

Specific anti-dividend washing rules provide that where capital losses arise from the disposal of shareholdings that are not eligible for PEX, such losses are deductible only for the part exceeding the tax exempt amount of dividends (*see Dividend income discussion below*) received from the shares in question in the 36 months prior to the disposal.

Capital gains on financial investments generally are excluded from the IRAP taxable base.

Dividend income

Dividends received by Italian resident companies from Italian companies or from companies resident in countries other than tax havens (i.e. not included in the 'black list') are excluded from the IRES taxable base for 95% of their amount. Conversely, no exemption applies to dividends paid by entities that are resident in tax haven jurisdictions (unless those dividends derive from profits that were already taxed under the Italian controlled foreign company [CFC] rules). There are specific rules for entities adopting IFRS for Italian statutory financial reporting purposes. For such entities, dividends from investments in shares and other financial instruments held for trading are fully taxable.

Dividends generally are excluded from the IRAP taxable base.

Interest income

Interest income is generally part of the taxable base.

Waiver of credits

A specific regime is applicable regarding the waiver of credits (e.g. financial and/or commercial) towards the company by its shareholder. In particular, the part that exceeds the tax value of the credit is considered taxable income. Furthermore, the shareholder is required to provide a statement to the company pointing out the tax value of the credit. Without such statement, the company will have to tax the full amount of the waiver of the credit.

Foreign income

An Italian resident corporation is taxable on all income whether produced in Italy or abroad. Profits earned by subsidiaries that are resident or located in countries or territories other than tax havens are taxed only on distribution of the relevant profits. Double taxation is, in principle, avoided by means of foreign tax credits.

An optional branch exemption regime is available, which allows Italian companies to exempt from Italian taxation branch income and losses arising outside Italy, instead of the normal regime, which provides for taxation of worldwide income with foreign tax credit relief. This option affects all foreign PEs of the Italian company and is irrevocable. It must be exercised at the time the branch is incorporated and takes effect from that fiscal year.

Shell companies

Resident companies and PEs of non-resident companies can be qualified as non-operating entities if, alternatively, one of the following conditions is met:

- The entity is in a tax loss position for five consecutive tax periods.
- The average revenues recorded in the current fiscal year and in the prior four years are lower than the amount resulting by applying certain 'deemed return' percentages to the average balance sheet value of specific assets in the current fiscal year and the four previous years.

  The main assets to be taken into consideration are shares and shareholdings, financial receivables, owned or leased real estate, and owned or leased tangible and intangible assets. The value of any assets acquired or sold during the fiscal year must be adjusted according to the ownership period.

These conditions must be checked every year. Therefore, it is possible for an entity to be 'non-operative' in one year and operative in the following year.

The shell company is assessed as having a minimum taxable income for both IRES and IRAP purposes.

For IRES purposes, the taxable income of a non-operative entity is determined as the sum of such values emerging from the application of specific percentages to the book values of the above-mentioned assets.

The current IRES standard rate for entities qualified as shell companies is 34.5% (24% plus surtax of 10.5%).

Tax losses generated in a tax period when the company was deemed to be non-operating cannot be carried forward.

For IRAP purposes, non-deductible items have to be added back to the deemed minimum IRES income as outlined above.

These rules are not applicable in the first year of a company's incorporation. Exemptions from these rules can be achieved:

- by means of an advance ruling from the Italian tax authorities aimed at assessing the specific circumstances that caused the company not to earn the minimum amount of income or
- by specific objective situations provided for by Italian law (e.g. company directly or indirectly held by listed companies).

Shell companies are also subject to limitations in their ability to recover VAT credits.

Deductions

The principles outlined in the section on Income determination also apply for deductible costs.

Depreciation and amortisation

All fixed assets that are used in the business of the company, except land, are depreciable for tax purposes (for both IRES and IRAP).

For IRES, the maximum depreciation rates for fixed tangible assets are set forth in a Ministerial Decree. Such depreciation rates are different depending on the type of asset and on the economic sector in which the company operates. In the event that financial accounting depreciation exceeds the amounts allowed for tax purposes, temporary differences arise. Tax depreciation of fixed tangible assets is allowed from the tax period in which the asset is first used. In the first tax depreciation period, the depreciation rate cannot exceed one-half of the normal rates.

An additional IRES depreciation is granted for new investments in fixed tangible assets carried out in FY 2018. In particular, the relating cost is increased by 30%, bringing the taxable basis of the asset to 130%. The eligible assets are those having a tax amortisation rate higher than 6.5%. Previously, from 15 October 2016 to 31 December 2017, the cost for new investments was notionally increased by 40%.

For new investments carried out in FY 2018 in hi-tech, cloud, ultra-broad band, industrial robotics, digital manufacturing, IT security, etc., a notional increase of the purchase cost of 150% has been confirmed for tax depreciation, bringing the IRES basis of the assets to 250%. Previously, the period to take advantage of this benefit was from 15 October 2016 to 31 December 2017.

The above benefit applies to eligible investments also made by 30 June 2019, provided that, by 31 December 2018, the following conditions are met:

- the purchase order has been accepted by the seller, and
- at least 20% of the purchase cost has been paid.

The recapture of the benefits applies in case the asset is sold and failing specific conditions.

A notional increase of 40% of the purchase cost of intangible assets (e.g. software, systems, platforms and applications connected to hi-tech investments, etc.) is also possible. The benefit applies to software, IT systems and integration systems, platforms and applications, etc.

As for leasing contracts, the benefit is addressed only to the lessee and not to the lessor. Capital goods acquired with operational lease contracts or rental contracts are excluded from the benefit.

Land is not a depreciable asset. Amortisation of goodwill derived from an asset deal and amortisation of trademarks are deductible for an amount not exceeding 1/18 of the cost in any year.

Patents, know-how, and other intellectual property (IP) may be amortised over a two-year period.

Concession rights may be depreciated with reference to the utilisation period as determined either by law or in the relevant agreement.

For IRAP purposes only, depreciation and amortisation (other than as related to goodwill and trademarks) are deductible in accordance with the amounts reported in the financial statements, regardless of the limits outlined above.

Finance leasing

Leasing expenses booked in the profit and loss statement pursuant to Italian GAAP are fully deductible from the IRES taxable base if the relevant agreement has a minimum duration period. In particular, if the agreement was executed as of 1 January 2014, the duration required is the following:

- For fixed tangible assets, at least half of the depreciation period as set forth in the above Ministerial Decree.
- For real estate, at least 12 years.

Longer minimum duration periods are provided for financial leasing agreements executed before 1 January 2014.

Interest expense

Generally, interest expense is fully tax deductible up to the amount of interest income. Thereafter, excess interest expense is deductible at up to 30% of the gross operating margin (interest deduction capacity) as reported in the financial statements. Gross operating margin is defined as the difference between operating revenues and expenses excluding depreciation of tangible and intangible assets and charges for leased assets as stated in the profit and loss account for the year.

Net interest expense in excess of the yearly limitation is carried forward indefinitely. Hence, net interest expense not deducted in previous years can be deducted in any future fiscal year as long as total interest in that year does not exceed 30% of gross operating margin. If net interest expense is lower than the annual limit (i.e. 30% of gross operating margin), this difference can be carried over to increase the company's interest deduction capacity in future years.

The dividends received from foreign subsidiaries are excluded in the computation of the earnings before interest, tax, depreciation, and amortisation (EBITDA) used to determine the interest expense deductibility limit (prior to FY 2017, these dividends were included).

Where an election is made for the domestic tax consolidation regime (*as discussed in the Group taxation section*), the net interest expense limitation applies to the consolidated tax group. As a consequence, if a company participating in a tax group has an excess interest deduction capacity, this excess may be used against the interest deduction deficit in another company belonging to the same tax consolidation group. Under specific conditions, non-resident subsidiaries can also be 'virtually' included in the tax consolidation for the sole purpose of transferring their excess capacity over 30% of gross operating margin in order to increase the overall interest deduction capacity of the Italian group.

The above-mentioned rules are not applicable for financial institutions, such as banks and insurance companies, where the deductibility of interest expense (for both IRES and IRAP purposes) is limited to a fixed amount of 96% of the interest expense shown in the income statement of these entities. Starting from FY 2017, holdings and banks are allowed to fully deduct interests.

The tax authorities have provided some general guidelines regarding leveraged buyout (LBO) operations. The latter shall be considered legitimate, and interests arising from related acquisition financing shall be considered, in principle, deductible within the ordinary limits (30% of EBITDA, transfer pricing rules, etc.).

Allowance for Corporate Equity (ACE)

The ACE is a deduction that corresponds to the net increase in the equity employed in the entity, multiplied by a rate yearly determined by the Ministry of Finance. This rate is equal to 1.5% for FY 2018 and onwards (1.6% for FY 2017).

The relevant increase is determined by the equity contributions and by the retained earnings (except profits allocated to a non-disposable reserve) less the following items:

- Reductions of the net equity with assignment to shareholders, including, in particular, dividend distribution.
- Investments in controlled companies.
- Certain intra-group business acquisitions.

If the allowance for a year is higher than the net IRES taxable base, the difference will be carried forward to the next periods.

To calculate the equity increase, the reference equity is disclosed in the financial statements for the fiscal year current as at 31 December 2010, net of the profits for the same year.

Bad debts

Yearly provision for bad debts not guaranteed by third parties and relating to sales of goods and services is tax deductible at up to 0.5% of the receivables gross value. Deduction shall no longer be permitted when the total amount of the bad debts reserve exceeds 5% of the above-mentioned gross value of the receivables as of the end of the fiscal year.

Regardless of the above, losses on bad debts shall be deductible if supported by precise and objective elements or, in any case, if the debtor is subject to bankruptcy proceedings, including foreign ones.

A loss on a bad debt can be deducted for IRES purposes when the following conditions jointly apply:

- The term for payment has elapsed by six months.
- The receivable has a determined threshold. In particular, the item is up to EUR 2,500 for small companies and up to EUR 5,000 for big corporations (with turnover over EUR 100 million).

The loss is tax deductible, regardless of the amount, when the collection right is prescribed.

Further changes are intended to make certain the identification for the year attributable to the deductibility of the loss. Specifically, the deduction of the loss is allowed in the period charged to the balance sheet, even if that offsetting is performed in a tax year following the year in which there are the precise and objective elements, or the debtor is considered subject to bankruptcy proceedings.

Moreover, losses are tax deductible in case of derecognition of bad debts applied in compliance with accounting standards (both Italian GAAP and IFRS), always provided the inherence test is met.

Charitable contributions

Deduction of charitable contributions is allowed. The amounts allowed for deductions depend on the specific features of the recipient entity, and specific limitations are set by the law.

Entertainment expenses

For IRES purposes, expenses for gifts and entertainment that meet the requirements (both qualitative and quantitative) contained in the specific Ministerial Decree are fully deductible in the tax period in which they are incurred. Entertainment expenses that do not meet these requirements cannot be deducted.

Expenses related to gifts with a value of EUR 50 or less are entirely deductible.

Travel expenses

For IRES purposes, the deduction for travel expenses incurred within the municipality is limited to 75% of the amount incurred. However, the VAT related to such costs is fully recoverable.

Car costs

The IRES deductibility of expenses related to cars used by companies is as follows:

- 20% for cars that are not assigned to employees or are granted to employees solely for business use.
- 70% for cars granted to employees for both business and private purposes.

Car costs may be entirely deducted if (i) automobiles are absolutely necessary for the company's business or (ii) automobiles are an essential element in the company's activity (i.e. vehicles owned by a car rental company).

Telephone expenses

For IRES purposes, up to 80% of the total expenses related to both mobile and landline telephones are deductible.

Fines and penalties

Fines and penalties are generally not considered inherent costs and are, consequently, not deductible for tax purposes.

Taxes

The following IRAP items are deductible in determining the IRES taxable base:

- 10% of IRAP paid during the year.
- An amount determined on the IRAP paid on the cost of employees, net of the relevant deductions.

IMU is deductible for IRES purposes at up to 20% of the amount paid in the fiscal year, whereas no deduction is allowed for IRAP purposes.

Purchases from suppliers resident in tax haven jurisdictions

Expenses incurred for goods and services bought from entities resident in 'tax haven' jurisdictions are fully tax deductible.

Net operating losses

Tax losses can be carried forward for IRES purposes and used to offset income in the following tax periods without any time limitation.

Tax losses can only be offset with taxable income for an amount not exceeding 80% of the taxable income. Thus, corporations are required to pay IRES on at least 20% of taxable income.

Note that losses arising in the first three years of activity can be offset with 100% of taxable income.

For IRAP purposes, tax losses may not be carried forward.

Specific (tax anti-avoidance) rules limit the carryforward of tax losses in the event of:

- change of control and
- an effective change of the main activity (performed by the company carrying forward the losses).

The aforementioned changes must occur together in order for the limitations to be applicable. The change of the main activity is relevant for these purposes if it takes place in the tax period in which the change of control occurs or in the two subsequent or preceding periods.

Specific anti-abuse provisions are also applicable to net operating losses in cases of merger or de-merger.

In Italy, tax losses may not be carried back.

Payments to foreign affiliates

Transactions with foreign affiliated companies should be at 'fair market value' and, generally, as defined by OECD Guidelines. *See Transfer pricing in the Group taxation section for more information*.

Group taxation

Domestic tax consolidation

Companies belonging to the same group can elect domestic tax consolidation. This regime allows the determination of a single IRES taxable base comprised of the taxable income and losses of each of the participating entities. The tax consolidation does not operate for IRAP purposes.

Where an overall tax loss position arises, this can be carried forward and used against future consolidated taxable income. Conversely, tax losses arising in fiscal years preceding the domestic tax consolidation election can be carried forward and used only by the company to which these losses belong.

The taxable basis determined by each company participating in the tax consolidation arrangement is included in its entirety. No apportionment is made in relation to the percentage of control.

In order to validly elect the Italian domestic tax consolidation regime, the following conditions must be met:

- The consolidating entity must be an Italian tax resident company, and it must hold, directly or indirectly, more than the 50% of the share capital of the consolidated entities (so called 'legal control').
- This control must be in place from the beginning of the tax period for which the tax consolidation is applied for.
- All of the companies participating in the group must have the same year-end.

The consolidation arrangement operates on an elective basis. Taxpayers may select whether to be included or not, and it is not necessary for all the Italian group/sub-group companies to jointly elect for the tax consolidation.

Once the election is made, it cannot be revoked for three fiscal years.

The election is also allowed to Italian 'sister' companies or PEs in Italy of foreign companies resident in EU/European Economic Area (EEA) countries with which Italy has entered into an agreement that ensures an effective exchange of information. The Italian entity should be designated to exercise the option, acting as consolidating entity.

The election is silently renewed at the end of the three-year period.

Worldwide tax consolidation group

A worldwide tax consolidation group is available, allowing the consolidation of foreign subsidiaries.

In addition to the requirements set out for the domestic tax group system, the following conditions apply:

- The ultimate parent company must be either owned by individuals who are tax residents of Italy or listed on the Italian Stock Exchange.
- The option must be exercised for all foreign companies (under the 'all in, all out' principle).

Income for each company is apportioned in the tax consolidation based on the actual percentage of control exercised by the ultimate parent company that is an Italian tax resident.

A number of additional requirements need to be fulfilled in order for a worldwide tax consolidation to be operative, including a mandatory audit of the financial statements of all the foreign subsidiaries.

Once the election is made, it cannot be rescinded for five fiscal years. The option is silently renewed at the end of the related period.

Transfer pricing

Income derived from operations with non-resident corporations that directly or indirectly control the Italian entity, are controlled by the Italian entity, or are controlled by the same corporation controlling the Italian entity have to be valued on the basis of the arm's-length nature of the goods transferred, services rendered, and services and good received if an increase in taxable income is derived there from. Possible reductions in taxable income as a result of the arm's-length principle are allowed:

- on the basis of mutual agreement procedures or the EU Arbitration Convention
- on the conclusion of tax audits performed under international cooperation procedures, where the results are agreed by the tax authorities involved, or
- through a specific application filed by an Italian taxpayer where a final adjustment has been made in a country that has a double tax treaty (DTT) in place with Italy that allows an acceptable level of information exchange. Currently, a specific regulation is awaited, setting out the way in which this procedure will operate.

Statutory rules on transfer pricing are set out in the Italian Income Tax Code (TUIR), which has been recently amended, making specific reference to the arm's-length principle. Before this amendment, the Italian Transfer Pricing Law used the concept of 'normal value' (*valore normale*) as the basis for pricing inter-company transactions. This concept was similar to the OECD arm's-length principle, although not precisely the same and potentially open to various interpretations. The new definition formally endorses the OECD standard by providing that inter-company transactions are determined based on the 'conditions and prices that would have been agreed in comparable circumstances between independent parties acting at arm's length'.

Penalty protection regime with transfer pricing documentation support

Transfer pricing rules provide for a penalty protection regime in case of transfer pricing audit, provided that the taxpayer has prepared proper documentation detailing the compliance of inter-company transaction to the arm's-length principle.

The Regulation applies to transactions incurred between Italian entities and non-resident entities belonging to the same group (transfer pricing rule are not applicable to domestic transactions). No specific methods have been introduced to test the arm's-length nature of transactions; reference is made to the OECD Guidelines. An exception exists for corporations involved in on-line advertising and related ancillary activities that are required not to use cost-based indicators for transfer pricing purposes, unless an advance pricing agreement (APA) has been defined with the tax authorities on this.

On the base of the transfer pricing Regulation, taxpayers can obtain penalty protection if they provide the Italian tax authorities with:

- Documentation to support the inter-company transactions drawn up in the specific format detailed in a Regulation issued by the Italian tax authorities and drawn up in Italian. The tax authority confirmed that information in annexes (inter-company contracts and transactions diagram) can be in English.
- Notification that documentation has been prepared and available by checking the specific box in the annual corporate income tax return.

The information required is based on the EU Code of Conduct for Transfer Pricing documentation.

Based on the group structure, a Master File and/or Country File have to be prepared.

Italian-based groups and Italian sub-groups owning non-Italian subsidiaries must produce both a Master File and a Country File. Italian subsidiaries of multinational groups need to produce a Country File only.

The sub-group provisions are onerous, especially so where they relate to branches. Where a foreign entity has an Italian branch but the company itself is also a holding company, a Master File is required for the foreign entity's subgroup, even if there is no holding directly attributed to the branch.

Sub-holding companies based in Italy with at least one non-Italian subsidiary, which need to produce a Master File, may instead produce the Master File for the entire group in English. If it does not contain all the information in the Italian Regulation, they will need to supplement it.

Documentation must be signed by the legal representative of the company and provided to the authority upon request within ten days. Also, an electronic copy must be provided upon request.

Transfer pricing documentation must be prepared each year and on a company-by-company basis. Small and medium companies (defined as those with an annual turnover of less than EUR 50 million) can update the economic analysis only every three years, provided that no significant change in the business occurred. Otherwise, it is necessary to update the economic analysis each year. All the other sections of the report have to be updated each year, even for small and medium companies.

Relief from penalties is granted on the additional IRAP applicable to transfer pricing adjustments to taxpayers who have prepared transfer pricing documentation in line with Italian Regulation.

International ruling procedures are available, to agree transfer pricing methodology with the tax authorities.

The agreement executed between the tax authorities and the taxpayer is binding for the fiscal year during which the agreement is executed and for the following four fiscal years and can then subsequently be renewed. From 2015, rollback provisions are available, making it possible to extend the agreement to cover the period between filing the application and signature of the agreement or as agreed by the competent authorities for bilateral or multilateral APAs.

Country-by-country (CbC) reporting

CbC reporting has been introduced in Italy for multinational enterprise (MNE) groups with consolidated group revenues of at least EUR 750 million. With this report, any MNE group shall disclose annually and for each tax jurisdiction in which it conducts business the information set out therein.

The template of the CbC report includes:

- aggregate tax jurisdiction-wide information relating to the global allocation of the income, the taxes paid, and certain indicators of the location of economic activity among tax jurisdictions in which the MNE group operates (Table 1)
- a listing of all the relevant entities for which financial information is reported, including their jurisdiction of tax residence and incorporation (if different) and their main business activity (Table 2), and
- additional information that may be useful to understand the mandatory information provided in the CbC report (Table 3).

The group entity responsible for the submission of the CbC report is the ultimate parent entity. However, where some conditions are met, the report shall be submitted by the entities resident in Italy for tax purposes.

Penalties are levied in case of missed or untrue communication (penalties can range from EUR 10,000 to EUR 50,000).

The CbC report shall be filed within 12 months of the last day of the reporting fiscal year of the MNE group. Moreover, the deadline for the notification of the CbC status to the Italian tax authorities is within the deadline for the submission of the income tax return.

Thin capitalisation

Italy no longer has thin capitalisation rules *per se*. Instead, net interest expense is deductible only up to an amount equal to 30% of gross operating margin (*see Interest expense in the Deductions section for more information*).

Controlled foreign companies (CFCs)

An Italian company that controls, either directly or indirectly, a foreign enterprise, company, or other entity is required to consolidate the taxable income arising in proportion to the percentage of shareholding held, irrespective of whether the profits have been distributed or not.

Income from CFCs is taxed separately from the other taxable income of the business at the standard IRES rate (i.e. other tax losses cannot be used to offset CFC income). Foreign taxes paid by the CFCs are recoverable by way of a corresponding tax credit.

Dividends received by an Italian shareholder from a CFC are excluded from taxable income up to the amount of the taxable income attributed under the above CFC provisions. The excess of any dividends over income already included through the CFC regime is fully taxable in the hands of the shareholder.

Exemption from CFC rules can be achieved by means of an advance ruling from the Italian tax authorities.

The CFC rules are also applied to controlled companies that are located in a jurisdiction in which:

- The nominal tax rate is less than 50% of the nominal tax rate in Italy.
- They are subject to special tax regimes.

Tax credits and incentives

Different incentives have been established to attract new industry to southern Italy and certain depressed mountain areas in central and northern Italy.

The possibility of taking advantage of these rules, however, depends on the taxpayer fulfilling specific conditions and on the actual availability of financial resources by the Italian state. These financial resources generally are set in the annual financial bill.

Tax credit on training expenses for Industry 4.0 plan

A tax credit is granted that is equal to 40% of the expenses relating to costs of employees for the period in which they are employed in training activities and is recognised up to a maximum annual amount of EUR 300,000 for each taxpayer.

The tax credit can be offset in the F24 form starting from the following tax year in which the costs are incurred (therefore, for the expenses incurred in 2018, the credit may be used from 2019).

In order to be eligible for the tax credit, the costs must be certified by the statutory auditor or a professional listed in the register of statutory auditors, even for those companies without audited financial statements.

This certification must be attached to the financial statements.

A regulation will be enacted providing guidelines for the application of the tax credit.

Advertising campaign tax credit

This is a tax credit in favour of taxpayers who increase their investments in advertising means, such as daily press, magazines, local television, or radio.

The tax credit is calculated on the incremental investment in advertisements compared to the previous fiscal year; for example, between 24 June 2017 and 31 December 2017, compared to the same period of 2016.

The incremental investment has to be greater than or equal to 1%. The tax credit amounts to 75% of incremental investments and up to 90% for small, medium, and innovative start-ups.

As of FY 2018, the eligible investments include on-line press, daily press, and magazines.

A regulation is still to be issued providing guidelines for the application of the tax credit.

Patent box regime

Italian resident companies and PEs of non-resident entities that carry out research and development (R&D) activity, either directly or by outsourcing it to universities or other research institutes or equivalent institutes, may elect to apply the Italian patent box regime. The regime exempts a portion of the income derived from the exploitation, either directly or by licensing, of 'qualifying intangible assets'.

The general exemption is 50%.

The regime can be applicable to PEs only if the non-resident entity resides in a country with which Italy has concluded a tax treaty and that allows adequate exchange of information.

The election is effective for five years and cannot be revoked during that period. Qualifying intangible assets include patents; know-how, such as industrial, commercial, or scientific information, formulas, and processes that are eligible for legal protection; and trademarks.

Taxpayers must request a specific ruling from the Italian tax authorities to benefit from the regime when the qualifying intangible is either used directly by the company or licensed to a related party.

Foreign tax credit

Where foreign-source income definitively is taxed abroad, a tax credit can be claimed for use against a company's IRES liability. The amount of the tax credit that can be claimed is the lower of the foreign tax incurred and the proportion of the IRES liability related to the foreign-source income. For partially exempt income (e.g. dividends), the foreign tax credit is reduced in proportion to the amount of the income taxable in Italy.

If an Italian company receives foreign income from more than one country, this limitation is applied separately to each country.

Foreign taxes borne by the foreign PE of an Italian resident company are allowed to be offset against the overall consolidated tax liability (IRES).

Any excess of foreign tax credit over the maximum amount allowed for recovery in the same tax period can be carried back or carried forward for eight years and recovered if specific conditions are met (e.g. same source country of the income, occurring because of an excess of the IRES liability related to the foreign-source income).

Withholding taxes

A 26% base standard WHT rate applies on the yields on loans and securities (bonds, shares, etc.) paid by Italian resident entities to both Italian and non-Italian resident investors.

The standard WHT rate, however, may be reduced under the applicable DTTs, EU Directives, or other special domestic tax regimes (such WHT exemptions and reductions are only granted to the beneficial owner of the income).

Interest on government bonds is subject to a 12.5% domestic WHT.

WHT chart

Domestic corporations paying certain types of income are required to withhold as shown on the following chart. The numbers in parentheses refer to the notes below.

	WHT (%)

Notes

1. The actual applicable rate depends on the nature of the recipient. Applicable rates are as follows: 0% applies on loan agreements and ordinary notes when the recipient is a corporation; 26% rate in all other cases.
2. For resident individuals, generally a 26% WHT applies, but there is a grandfathering regime for dividends received by 'qualified' shareholders (i.e. holding more than 20% of voting rights or 25% of the share capital, 2% or 5% in case of listed companies). The rate applicable to 'non-qualified shareholders' is always 26%. Non-residents are always subject to a 26% WHT, irrespective of whether or not they are 'qualified'.
3. The domestic rate applies on 75% of the gross amount of the royalty paid; however, treaty ceilings apply on the gross amount of the royalty paid.
4. Pursuant to the EU Directives and provided that the requirements set forth therein are met, payments of dividends, interest, and royalties made by an Italian company to an EU resident group company can be WHT exempt. Specifically for the dividends, the minimum shareholding requirement (to benefit from this exemption) is currently equal to 10%; for interest and royalties, it is 25% of voting rights; a one-year minimum holding period applies for both.
5. Should the full WHT exemption not apply, 1.2% applies on dividends paid to EU and EEA tax resident corporations.
6. Pursuant to the Swiss EU tax agreement and provided that the requirements contained therein are met, payments of dividends, interest, and royalties made by an Italian company to a Swiss tax resident group company can be WHT exempt.
7. Non-resident persons have the right to obtain reimbursement for up to 11/26 of the withholding effected, upon proof of the actual taxation of the dividends in the foreign country where the recipient is a resident.
8. Provided that all conditions are met, domestic tax legislation is applicable if more favourable for the taxpayer. In a number of circumstances, tax treaties may provide for particular tax rates mainly dependent on the nature of the instruments and on the profile of the recipients/payers. In such cases, the applicable WHT rate must be verified from an analysis of the relevant tax treaty.

Tax administration

Taxable period

The ordinary taxable period is equal to 12 months. Conformity with the calendar year is not requested. In particular cases, the duration of the taxable period can be different from 12 months (e.g. newly established companies may be allowed to have taxable periods of up to 18 months; companies that are involved in extraordinary transactions [merger, de-mergers, etc.], as well as companies that are liquidated, may have taxable periods shorter than 12 months).

Tax returns

IRES and IRAP returns must be filed by the end of the ninth month following the tax year-end.

Please note that, following a formal postponement, the filing of FY 2017 IRES and IRAP returns is shifted to 31 October 2018 (for corporations with calendar year only).

The ordinary filing deadline for the WHT agent return is 31 October of the following year.

Payment of taxes

For IRES and IRAP purposes, the tax law provides for both advance payments and settlement payments. As a general rule, the advance payments are equal to the net tax liability for the previous tax period and are due during the tax period to which they refer. The advance payments due are equal to 100%.

Advance payments are split into two instalments:

- 40% by the end of the sixth month following the tax year-end.
- 60% by the end of the 11th month following the tax year-end.

Settlement payments are due by the end of the sixth month following the tax year-end to which they refer (previously by the 16th day of the sixth month following the tax year-end).

Tax payments should be performed through a specific form to be electronically filed to the tax authorities (i.e. F24 form).

Offsetting of taxes

Payables and receivables (not claimed for refund) resulting from a return regarding different taxes are allowed for off-setting within a yearly limit of EUR 700,000.

Furthermore, in order to offset tax credits exceeding EUR 5,000, a so-called 'conformity mark' affixed by a qualified professional on the related return is required. In addition, there is an obligation to channel the filing of the F24 form through the tax authorities system (so-called '*Entratel*') in case of offsetting tax liabilities with other tax credits.

No offsetting is allowed in case of unpaid taxes resulting from an official payment notice and exceeding EUR 1,500.

Administrative penalties

Failure to file a tax return results in a penalty ranging from 120% to 240% of the taxes due. Minimum penalties (ranging from EUR 250 to EUR 1,000) are applicable if no tax liability emerged in the return.

A tax return showing either a taxable income lower than the one assessed or a tax credit higher than those owed to the taxpayer (i.e. an untrue tax return) results in a penalty ranging from 90% to 180% of the higher taxes ultimately due.

Omitted and/or late payments of taxes, of whichever kind and nature, result in a penalty equal to 30% of the unpaid/late paid tax. However, in cases where the delay is within 15 days, the penalty is equal to 1% per day; if the delay is between 15 and 90 days, the penalty is equal to 15%.

Special rules apply where similar violations are repeated over various years.

Self-disclosure of tax law breaches are allowed on payment of the higher taxes and of reduced administrative penalties. The reduced penalties are always computed on the floor of the applicable range of penalties. The starting of an audit does not prevent the possibility to amend tax returns or to carry out late tax payments.

The actual reduction of penalties depends on the time elapsed between the occurrence of the breach and the self-disclosure itself (i.e. different interim thresholds apply). The penalty is reduced from 1/30 (lower floor), if the correction is done within 14 days (for an omitted/lower tax payment only), up to 1/5 (upper floor) if the correction is carried out during a tax authorities audit or after the issue of a tax audit report (*i.e. processo verbale di constatazione*).

In any case, the possibility to apply the self-disclosure is prevented after the issuance of final notice of tax assessment (*i.e. avviso di accertamento*) or tax redetermination (*i.e. avviso di irregolarità*).

Statistical based assessment procedure (so-called 'Studi di settore')

The Italian Tax law provides for special tax control procedures for those enterprises whose total turnover does not exceed EUR 7.5 million. The controls, so-called *'Studi di Settore'*, are based on standardised economic models of the different business fields and are aimed at assessing whether or not a specific subject's taxable income is in line with its own standard model (on statistical basis).

A higher possibility of undergoing tax audit should be considered for entities not meeting the expected profitability and/or turnover resulting from these automated controls.

Starting from FY 2018, this type of assessment is going to be repealed and replaced by a system of indexes to identify and reward reliable taxpayers. Operating instructions will be provided by the tax authorities.

Tax ruling

The tax ruling is an instance where the taxpayer directed a behaviour for tax purposes to the tax authority before implementing it; its scope is to seek clarification on the interpretation of a rule objectively uncertain, related to state taxes, to be applied to concrete and personal cases.

The procedure can also be started by non-resident taxpayers, by WHT agents, and by persons in charge of fulfilling the tax payments.

The tax authorities must admit to the procedure within 30 days from the receipt of the instance; however, tacit acceptance from the tax authorities applies. The procedure that involves a contradictory procedure between the tax authorities and the taxpayer ends within 180 days from the receipt of the instance.

The content of the instance could be on the transfer pricing, the application of rules to attribute profits and losses to a PE, the tax treatment of dividend, interest, royalties, or other incomes, etc.

In particular, a 'ruling on new investments' has been introduced for those enterprises that intend to make new investments in Italy for a value above EUR 30 million, disclosing tax treatment of the investment and all related extraordinary transactions. The tax authorities will be bound not to issue any deed inconsistent with the answers given.

The tax authorities' answer must be notified within 120 days. The deadline can be extended for an additional 90 days if the tax authorities asks for new additional information.

Tax audit process

For larger companies having a yearly turnover exceeding specific thresholds (that are in the process of being progressively decreased to EUR 100 million), administrative checks on tax returns may be carried out within the year following that in which the tax return has been filed.

Tax audit can take place at the taxpayer's premises as well as in the tax authorities' offices. The statute of limitations provides that tax auditors can stay at a taxpayer's premises for not longer than 60 working days (30 days ordinary term plus 30 days of extension). At the end of this period, the audit must come to an end. Tax auditors must take note of the observations and requests made by the taxpayer. At the end of their audit, the tax auditors must draw up a tax audit report whereby the outcome of the audit activity must be detailed and the findings (if any) must be illustrated and motivated. A copy of the report has to be filed with the tax office.

The tax office receiving the tax audit report examines the findings reported by the tax auditors and starts the assessment procedure, which may lead to the issuing of a tax assessment notice bearing the request for payment of higher taxes and/or penalties.

Tax controversy and dispute resolutions

Should the taxpayer accept all of the challenges raised by the tax authorities, it may take advantage of the application of reduced penalties. The reduced penalties may range from 1/6 to 1/3 of the minimum applicable penalties, depending on the status of the controversy.

In case the taxpayer decides not to accept the challenges by the tax authorities, a settlement procedure can be initiated. The favourable outcome of the settlement procedure brings forth (in addition to the agreed-upon reduction of challenged taxes) the reduction of penalties: ordinarily down to 1/3 of the minimum applicable penalties.

In case no settlement is either achieved or requested for, the taxpayer may start a tax dispute before the Court. The judicial proceedings are structured in three tiers:

- Provincial Tax Commission, in first instance.
- Regional Tax Commission, in second instance.
- Supreme Court of Cassation.

Statute of limitations

From the fiscal year in progress as at 31 December 2016, the Italian tax authorities are entitled to make an assessment in relation to corporate taxes (IRES and IRAP), VAT, and WHT returns up to:

- the end of the fifth calendar year following the year in which the tax return was filed (previously up to the end of the fourth calendar year), or
- the end of the seventh calendar year following the year in which the tax return would have been filed, for an omitted return (previously up to the end of the fifth calendar year).

Previous rules were applicable until FY 2015.

The possibility to file an integrative tax return in favour of taxpayers within the deadlines of tax assessment has been introduced (e.g. FY 2017 tax return is amendable in favour of the taxpayer until FY 2023).

Topics of focus for tax authorities

Extraordinary transactions (such as mergers, de-mergers, etc.) continue to be a topic of focus for tax authorities due to the potential applicability of tax anti-abuse rules.

As a response to recent cases of carousel-frauds on VAT, cross-border transactions are being more heavily scrutinised.

Over the last few years, we experienced an increasing focus by the tax authorities on transfer pricing and PE-related issues.

The beneficial ownership condition is very carefully scrutinised in case of payments where a nil or reduced WHT is applied based on EU Directive or applicable DTT, in particular when the ultimate owner of the group is non-EU.

Cooperative compliance programme

A regime aimed at setting a cooperative compliance programme for Large Business Taxpayers is available.

The regime falls within similar frameworks adopted by other foreign tax administrations, consistent with OECD recommendations.

The regime of cooperative performance represents for taxpayers the opportunity to start a new relationship with the tax authorities based on forms of communication and strengthened cooperation.

Taxpayers who have a turnover of EUR 10 billion are able to join the regime and required to adopt a Tax Control Framework.

The subjects involved in the regime will have benefits in terms of constant and continuous dialogue with the tax authority, reduction of penalties, and elimination of guarantees required for refund.

Other issues

Adoption of IFRS and taxation

Italian tax law provides for two basic principles and some specific rules for taxation of a company adopting IAS/IFRS in the statutory financial statements:

- Derivation principle ('*Principio della Derivazione*'): The taxable base of companies is determined starting from the net income arising from the profit and loss, increased or decreased by items directly booked to equity pursuant to the application of IAS/IFRS. To such income, the general tax adjustments set forth by the Corporate Income Tax Law apply. In this respect, as exception to the general tax criteria, the accrual principle, and the qualification and classification criteria stated by the IFRS are relevant for the calculation of the taxable base.
- Neutrality principle ('*Principio della Neutralità*'): Such principle aims to neutralise the effects deriving from the movement to IAS/IFRS (First Time Adoption or FTA). Conversely, such principle does not grant an equal treatment for companies adopting IAS/IFRS or not (in fact, specific rules are applicable only to IAS/IFRS adopters, e.g. taxation of dividend on held-for-trading securities, derivatives).

The following specific rules applicable to IAS adopters must be considered:

- Adjustments or recognitions of transactions made in equity and/or in the 'other comprehensive income (OCI)' are relevant for tax purposes, to the extent that such items are in compliance with general tax principles.
- For equity instruments, the legal classification is prevailing over the accounting one (debt vs. equity classification).
- Under certain conditions, unrealised profits and losses recognised in the profit and loss become taxable and deductible (e.g. fair value on securities other than shareholdings and on derivatives transactions).
- The tax treatment of transactions between IFRS adopters and non-IFRS adopters is based on the accounting principle adopted by each company (e.g. financial leasing transaction).
- Depreciation and amortisation are permitted within the rates provided by the tax rules and limited to the amount booked in the profit and loss statement. In this respect, the abolition of the imperative systematic depreciation of the goodwill and its substitution by the goodwill's review for impairment does not affect the tax deduction of the goodwill amortisation that should be made solely for tax purposes.
- Negative components booked in the income statement as expenses for personnel settled with equity instrument under IFRS 2 are, in principle, deductible for IRES purposes (stock options).
- In order to identify financial instruments with hedging purposes, IFRS adopters are allowed to give relevance to the classification made in the financial statement. In particular, financial instruments designated in the financial statement as hedging instruments in compliance with IFRS principles are considered also as hedging

instruments for fiscal purposes (hedging accounting approach including the fair value option [FVO]).

- Given the possibility, under the IAS 39 accounting principle, to reclassify financial securities in a different portfolio from that of the initial booking, the value at which the security is booked in the new portfolio is tax relevant.

Foreign Account Tax Compliance Act (FATCA) and Common Reporting Standard (CRS)

The FATCA aims to detect and discourage offshore tax evasion by United States (US) citizens or residents for tax purposes in the United States who hold financial assets through foreign financial institutions (FFIs), generally banks, custodial institutions, certain investment entities, and life insurance companies.

In order to simplify the obligations imposed on FFIs, the US Treasury and various foreign governments have entered into intergovernmental agreements (IGAs).

Italy and the United States signed an IGA (Model 1) in order to implement FATCA. The IGA was ratified by the Italian Parliament in 2015.

For countries that have signed a Model 1 IGA, the United States has granted a number of important simplifications, such as the possibility for FFIs to use information collected for anti-money laundering (AML) purposes and for FATCA customer identification and the suspension of most of the penalties (e.g. account closure) for those account holders who refuse to provide the information required for their correct identification (i.e. recalcitrant).

FATCA obligates Italian financial institutions to identify (starting from 1 July 2014) and classify account holders in order to report certain financial information (e.g. name, address, taxpayer identification number [TIN], account balance) related to US persons to the Italian Revenue Agency (i.e. *Agenzia delle Entrate*). The Italian tax authority will then exchange such information with the US Internal Revenue Service (IRS) by the end of September of each year.

The IGA ratification Law also includes provisions regarding on-boarding and due diligence requirements for CRS purposes. Starting from 1 January 2016, Italian financial institutions are required to identify and report non-resident (non-US) account holders, as provided by the CRS developed by the OECD.

Significant developments

The FY18 Financial Law has enforced base erosion and profit shifting (BEPS) provisions with regard to country-by-country (CbC) reporting obligations for large multinational companies with operations in Ivory Coast (Côte d'Ivoire), and major changes have been enforced with regard to deduction of interest on related-party loans.

Taxes on corporate income

Taxable corporate income in Côte d'Ivoire is based on worldwide income for resident companies (*for exceptions, see Foreign income in the Income determination section*).

Tax on industrial and commercial profits in Côte d'Ivoire is levied at 25%, subject to a minimum tax. The rate is 30% for companies in the telecommunication, information technology, and communication sectors.

Non-resident entities are subject to withholding tax (WHT) at 20%, subject to existing double tax treaties (DTTs), on their Côte d'Ivoire source income when they do not have a permanent establishment (PE). Non-residents with a PE are taxed in the same way as a resident.

Minimum tax

The minimum tax is based on total turnover and is calculated at the rate of 0.5%, with a minimum tax of 3 million *Communauté financière d'Afrique* (Financial Community of Africa or CFA) francs (XOF) and a maximum tax of XOF 35 million.

Local income taxes

The income tax is levied at the national level. There is no local income tax.

Corporate residence

In Côte d'Ivoire, companies are considered resident in tax jurisdictions where they have a registered fixed establishment (e.g. subsidiaries, branches, representative offices).

Permanent establishment (PE)

A non-resident is considered as having a PE in Côte d'Ivoire when its activities involve a comprehensive commercial cycle in Côte d'Ivoire or when it operates through a dependent agent in Côte d'Ivoire.

According to DTTs, a non-resident is considered as having a PE in Côte d'Ivoire when it has a registered establishment, including a subsidiary, a branch, a representative office, a mine or an oil well, a building site, a manufacture plant, or a trading establishment. Sometimes, a time threshold of six months is considered.

Other taxes

Value-added tax (VAT)

VAT is a non-cumulative tax levied on the sale of goods and services at the rate of 18%. Subject to certain restrictions, VAT is recoverable.

The rate is reduced to 9% for milk, pasta products that contain 100% durum wheat semolina, and equipment designed for the production of solar energy.

Customs duties

Customs duties rates range from 0% to 35%, depending on the classification of the imported goods according to the customs tariff.

Upon import, goods are also subject to the statistical duty (1%), to community levy (0.5%), and to VAT (18%).

Special taxes, depending on the nature of the imported goods, may apply, such as excise duties.

Statistical duty

The statistical duty is levied together with the customs duties during the customs clearance procedures of imported goods.

The rate of the statistical duty is 1% on the cost, insurance, and freight (CIF) value of the imported goods.

Community levy

The community levy is due together with the customs duties during the customs clearance procedures of imported goods.

The rate of the Economic Community of West African States (ECOWAS) community levy is 0.5% on the CIF value of the imported goods.

Products imported from outside the West African Economic and Monetary Union (WAEMU) remain subject to the community levy at 0.8% for five years from January 2015.

The community levy does not apply to goods imported from member countries of the WAEMU, which includes Côte d'Ivoire, Senegal, Burkina Faso, Mali, Benin, Togo, Niger, and Bissau Guinea.

African Union import duty

A duty called the African Union import tax applies on imports of items outside the African Union at the rate of 0.2%.

Excise duties

Excise duties apply on cigarette imports, alcoholic or non-alcoholic beverages, and oil products.

Real estate tax

A real estate tax is imposed at the following rates:

- 1.5% for undeveloped lands.
- 4% on land revenue.
- 11% on developed land or 15% when the built property is used by the company itself. The rate is reduced to 4% for unoccupied buildings.

Transfer taxes

In the case of the transfer of property through a direct sale, taxes are assessed at the following rates:

- 10% for lease transfers.
- 4% for sales of real estates.
- 10% for sales of businesses.

For mortgages, the rate is 5% for the financial lessor at the acquisition of the good and 1% for acquisition of the immovable property by the lessee from the exercise of the option.

Stamp duty

A direct tax is paid for any document subject to a registration procedure, for an acknowledgement of a cash payment, and for bills of exchange.

Payroll taxes

Taxes are levied at the rates of 2.8% for local employees and 12% for expatriate employees on the total taxable remuneration, including salaries, benefits, and benefits in kind.

Social security contributions

Employers must contribute to the social security system (CNPS) at the following rates:

Contribution	Contribution rate (%)	Monthly ceiling (XOF)
Family allowance	5.75	70,000
Work injury	2.0 to 5.0	70,000
Retirement pension	7.7	1,647,315*

* Note that even though the retirement contribution ceiling (XOF 1,647,315) is calculated on the basis of 45 times the minimum wage, this amount has not been updated since the minimum wage increased from XOF 36,607 to XOF 60,000.

Special tax for equipment

A special tax is paid by all taxpayers for the purpose of the equipment of the government. The tax is calculated on 0.1% of total turnover and is paid monthly. This tax is scheduled to end on 31 December 2019.

Ivory Coast (Côte d'Ivoire)

Business franchise tax

The business franchise tax includes a turnover tax and a proportional tax. The turnover tax is calculated on turnover at the rate of 0.5%, with a minimum tax of XOF 300,000 and a maximum tax of XOF 3 million. The proportional tax rate is 18.5% and is based on the rental value of the professional office location (based on general office rents).

Tax on banking operations

A cumulative tax of 10% is levied on bank services rendered. Tax on banking operations charged by banks to companies is fully deductible from output VAT.

Registration taxes

Registration of capital contributions is taxed, whether the capital contribution or increase in capital is made in cash or in kind. The rate is 0.3% for contributions exceeding XOF 10 million to XOF 5 billion and 0.1% for contributions over XOF 5 billion, with a minimum tax of XOF 18,000. Increases in capital by incorporation of reserves are taxed at 6%.

In the event of a capital increase through a merger, the increase in the share capital of the acquiring company is taxed at half of the rates above.

The transfer of shares held in a company located in Côte d'Ivoire is liable to a 1% registration duty on the sale price or market value of the shares when the transfer does not trigger the disappearance of the company or the creation a new legal entity.

Tax on insurance premiums

Insurance premiums are subject to tax as follows:

Policy type	Tax rate (%)
Marine policies	7.0
Life policies	Exempted when contract's duration is more than three years
Fire policies	25.0
Health policies	8.0
Export credit insurance	0.1
Other (e.g. personal liability, transportation)	14.5

Premiums paid under commercial shipping insurance policies for maritime risks are exempt. The tax may be paid by the insurance company, its agent, or the subscriber in cases where the subscriber had to pay the premium to a foreign insurance company.

Tax on telecommunication companies

A specific tax of 5% is applicable on the turnover of mobile telecommunication, information technology, and communication companies.

Companies renting passive infrastructures and telecom towers to telecom companies are not within the scope of this tax.

Companies operating in the telecommunication, information technology, and communication sector must also invest 20% of the amount of dividends transferred abroad in bonds of the public Treasury or any borrowing instrument issued by the government of Côte d'Ivoire.

Tax on telecommunication services

A special tax of 3% is applicable on telecommunication services provided to the public. The tax is invoiced and collected by companies operating mobile or land telecommunication and internet services in Côte d'Ivoire.

Surtax on rent

A special tax of 20% is applicable to the amount of rent on accommodation or professional premises that exceeds the two-month guarantee and one-month upfront payment at the beginning of the lease.

Branch income

The tax rate for branch income is the same as that for corporate income. After-tax branch earnings are subject to a 15% tax (*Impôt sur le revenu des valeurs mobilières* or IRVM) calculated on 50% of the taxable profit. This is analogous to the WHT on dividends.

Income determination

Inventory valuation

Inventory is generally stated at the lower of cost or market value. Last in first out (LIFO) and first in first out (FIFO) methods are permitted. Book and tax conformity is required.

Capital gains

Capital gains are normally taxed at full corporate rates. However, the tax on capital gains, exclusive of recaptured depreciation, can be deferred if the gain is reinvested within three years.

Dividend income

Dividends are brought into taxable income at 50% of the net amount earned by the company (after 15% WHT).

The exemption is increased to 95% for dividends received from a subsidiary if a parent company domiciled in Côte d'Ivoire owns 10% of the subsidiary.

Stock dividends

Stock dividends are unusual, but in the event they are declared, they are not taxable to the recipient.

Interest income

Interest from loans is brought into taxable income at 50% of the net amount earned by the company (after 18% WHT).

Royalty income

Royalty income received by a local taxpayer is included in its annual revenue and subject to corporate income tax (CIT).

Royalty income paid by a local taxpayer to a non-resident is subject to a 20% WHT, subject to the existence of a DTT between Côte d'Ivoire and the country of the effective recipient of the royalties.

Most DTTs will provide a reduced rate of 10% or 5% for WHT on royalties.

Royalties are defined by tax treaties.

In the absence of a DTT, the 20% WHT applies to all services payments to non-residents, including royalties.

Foreign income

Resident corporations are taxed on their worldwide income, except for profits derived from business conducted through a PE outside Côte d'Ivoire. Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed.

Interest and dividends from foreign sources are entitled to certain deductions to alleviate instances of double taxation. Subject to provisions of tax treaties, no deductions or tax credits are allowed for revenue from royalties and services.

Deductions

Depreciation and depletion

Depreciation is generally computed on a straight-line basis over the useful life of the asset (e.g. 20 years for buildings, 3 years for automobiles). Accelerated depreciation is sometimes permitted for machinery. The following depreciation rates are generally accepted for tax purposes:

Assets	Depreciation rate (%)
Buildings	5
Machinery, equipment (rate depending on equipment)	8/10/20
Office furniture	10
Office equipment	20
Vehicles	33.3
Computing equipment	20 to 50

A time coefficient is applied to the rate of depreciation to obtain the declining balance. Depreciation rates may be amended, but only after agreement with the tax authorities.

New plants and equipment may be depreciated at twice the normal rate in the first year of use, provided they are depreciated over at least six years. Under certain circumstances, buildings used for staff housing may be depreciated at 40% of cost in the first year. Annual depreciation must be booked to preserve tax deductibility. The whole or any part of the annual charge can then be deferred in annual accounts for fiscal years showing a tax loss. Recaptured depreciation is taxed at full rates. Tax and book conformity is obligatory.

Depletion allowances, as such, do not exist, but tax incentives are available for exploration to replace depleted natural reserves.

Goodwill

Goodwill (capital gain) deriving from the transfer of assets is included in taxable profit. The gain may be exempt from the income tax basis if the taxpayer commits to reinvest the purchase price of the transferred assets plus the goodwill in the three following years.

If the reinvestment is not completed in the three years, the gain will be subject to income taxation.

Start-up expenses

Start-up expenses (e.g. legal fees, registration duties on share capital subscription, the costs of any registration procedure, advertisement expenses) have to be amortised over a period from two to five years.

Interest expenses

Interest paid to shareholders may be deducted. The deduction is limited to the interest on a loan where the amount of the loan does not exceed the company's share capital (except for local holding companies).

The maximum interest rate allowed is related to the *Banque Central des Etats de l'Afrique de l'Ouest* (BCEAO) rate plus two points.

The reimbursement of the loan must take place in the five years following the loan.

Total interest must not exceed 30% of the company's pre-tax book income before interest, depreciation, and reserve.

The company's share capital must be paid out entirely.

Bad debt

Provisions for bad debts are deductible, provided that a minimum set of collection procedures have been engaged.

Bad debts are deductible for income tax purposes unless the debt results from abnormal business decisions.

Charitable contributions

Charitable contributions to recognised sport and health associations are deductible.

Charitable contributions to individuals or non-recognised beneficiaries are not tax deductible.

Fines and penalties

Fines borne by corporations are not tax deductible.

Taxes

Regular taxes paid by corporations are deductible for income tax purposes.

Third party taxes (such as WHT on non-resident service providers) borne by corporations are not tax deductible.

Other significant items

In respect to legal reserves, 10% of net profit must be transferred to a reserve for legal fees until the reserve equals 5% of the paid-up share capital.

To be tax deductible, provisions must relate to existing liability or loss. General reserves are not deductible.

Net operating losses

Losses may be carried forward for five years.

Losses derived from depreciation can be carried forward indefinitely.

Losses cannot be carried back.

Payments to foreign affiliates

Reasonable royalties, interest, and management and service fees paid to foreign parent companies are tax deductible. However, the deductions should not exceed 5% of the turnover and 20% of the overhead. Otherwise, the portion exceeding the ceiling is not tax deductible. The onus is on the taxpayer to prove that expenses are justified and reflect real transactions.

Where payments are made to a beneficiary located in a non-cooperative country or a tax haven country, deduction of sums paid is capped at 50% of their amounts. Non-cooperative and tax haven countries are those recorded on the Organisation for Economic Co-operation and Development (OECD) black list. The excessive portion is added back to the CIT basis.

Deduction of expenses from group transactions is subject to the filing of transfer pricing documentation.

CbC reporting is applicable when the group consolidated turnover threshold is met (i.e. XOF 491.97 billion).

Group taxation

Group taxation is not permitted in Côte d'Ivoire.

Transfer pricing

Profits directly or indirectly transferred to related non-resident companies are disallowed from the income tax basis.

The tax administration may inquire on transfer pricing when local subsidiaries having most of their transactions with non-resident group companies record losses.

A transfer pricing report on group transactions must be filed together with annual financial statements.

Country-by-country (CbC) reporting

A CbC report must be filed when group consolidated turnover of XOF 491.97 billion is met.

Thin capitalisation

The deduction of the interest of loans granted on top of the share capital by related parties is subject to restrictions (*see Interest expenses in the Deductions section*).

When, because of losses, the equity of the company is less than 50% of the share capital, the company must be recapitalised in the two following years, unless the company is dissolved.

Controlled foreign companies (CFCs)

There are no CFC rules in Côte d'Ivoire.

Tax credits and incentives

Foreign tax credit

Since income derived from business conducted outside Côte d'Ivoire is not taxable, no tax credit is allowed.

Investment zones

The aim of the Investment Code is to:

- help create companies in other regions than the economic capital city (Abidjan)
- help the employment of nationals
- help companies doing business in a sustainable manner
- develop the regions of the country, and
- favour the existence of local small and medium-sized enterprises (SME).

The Investment Code regimes involve the creation of three zones (A, B, and C), depending on the location of the company:

- Zone A covers Abidjan District.
- Zone B covers any town in Côte d'Ivoire with more than 60,000 inhabitants.
- Zone C covers any town in Côte d'Ivoire with less than 60,000 inhabitants.

The duration for the granted tax benefit is:

- 5 years for Zone A.
- 8 years for Zone B.
- 15 years for Zone C.

The Investment Code includes two specific tax incentive regimes: the Investment Declaration Regime and the Investment Approval Regime. Both regimes apply to all economic activities, excluding finance and banking, non-industrial buildings builders, and commerce activities. However, investment related to the creation or the development of important shopping centres could qualify for the exemptions if certain conditions are met.

The Investment Declaration Regime has no minimum investment threshold, but has special requirements related to the activities of the company.

For the Investment Approval Regime, the minimum investment cost is XOF 200 million (VAT and working capital exclusive).

The benefit from the Investment Code is granted by the Centre for the Promotion of Investments (named CEPICI), after an application is filed by the requestor.

During the investment period, the beneficiary enjoys the following:

- Reduction of 50% of the customs duties on the equipment and materials included on the filed list together with the first spare parts when the investment is less than XOF 1 billion.
- Reduction of 40% of the customs duties on the equipment and materials included on the filed list together with the first spare parts when the investment is more than XOF 1 billion.
- Exemption from VAT on purchase of equipment, materials, and first spare parts.

After the completion of the investment, the beneficiary enjoys the following exemptions during a period that depends on the zone the company is located in:

- Exemption from CIT.
- Exemption from business franchise tax.
- Exemption from real estate tax (only for Zone C in the Investment Declaration Regime).
- Exemption from registration taxes on share increases (only for Zone C in the Investment Declaration Regime).
- Reduction of the payroll taxes due on employee's wages. The reduction is 80% for Zone B and 90% for Zone C in the Investment Declaration Regime and 50% for Zone A, 80% for Zone B, and 90% for Zone C in the Investment Approval Regime.

These incentives may not be combined with sector-specific investment programs, such as those for mining and hydrocarbons.

Capital investment incentives

With prior approval of the tax authorities and varying with geographical location, 35% to 40% of the total investment in fixed assets related to commercial, industrial, or agricultural activity may be deducted from taxable income. The deduction is limited to 50% of taxable profits. The balance of deduction of the first year may be carried forward over the three following years.

Export incentives

No VAT is levied on export sales.

Export incentives for the mining industry

During the exploration phase, investments may be exempt from payroll tax; VAT on goods and services; additional tax (on the sale of goods) on imports and purchases; all import taxes and duties, including VAT on materials, machines, and equipment used in research activities; registration duties applicable to in-kind or cash share-capital contributions; real estate tax; CIT; and minimum tax.

In the exploration phase, mining subcontractors can benefit from the same import VAT and customs exemptions granted to mining title holders.

During the production phase, mining activities may have a five-year exemption from CIT and relief from all import duties, including VAT on recovered investments required for exploitation, special equipment tax, business franchise tax, etc. In addition, they may be granted temporary admission of machines and equipment that facilitate research and exploitation. Mining subcontractors are exempt from customs duties, including VAT on importing of liquid or gas fuels, lubricants, and chemical or organic products intended for the treatment of minerals, for the whole duration of the mine.

A tax on profit is levied as soon as investment funds are recovered. Mining enterprises may not combine these incentives with those of the Investment Code.

Export incentives for petroleum service contractors

A special and optional tax treatment applies to petroleum service contractors that meet established criteria. CIT, distribution (i.e. dividend) tax, payroll tax, income tax on salaries, and the tax on insurance premiums are calculated on the turnover of the contractor. The total taxes represent 5.786% of turnover. Standard rates apply for business franchise tax and social security contributions for local personnel. The exemption from customs duties and VAT for oil companies is extended to petroleum service contractors.

Withholding taxes

WHTs are levied as follows:

- *Impôt sur le revenu des valeurs mobilières* (IRVM): 15% on dividends and directors' fees.
- *Impôt sur le revenue des créances* (IRC): 18% on interest payments, reduced to 13.5% (individuals) and 16.5% (businesses) on bank deposit interest. The revenue realised by individuals on Treasury Bonds is subject to 10% tax on terms of up to 12 months and to 5% tax when ranging from three years to five years. Foreign banks are subject to 18% tax on loan interest or 9% on equipment loans with minimum three-year terms.
- *Impôt sur les benefices non commerciaux* (BNC): 25% of 80% of revenues on royalties, licence fees, and management and service fees paid by Ivorian companies to foreign companies (effective rate: 20% of net amount paid). *See Treaty rates below for reduced rates on royalties and management fees*.
- Interest on certificates of deposit (*bons de caisse*): 25%.

WHT on public contracts for services

Any payment made by government bodies or public institutions to non-resident persons or companies for a contract for goods or services is subject to a 20% WHT, subject to DTTs (*see Impôt sur les benefices non commerciaux above*).

Resident persons or companies are not subject to this WHT, except for individual service (or goods) providers registered under the standard tax regime for small companies (*see below*).

WHT on small-size businesses

A 5% WHT is applicable on the remunerations paid to individual service providers registered under the standard tax regime for small companies.

A 10% WHT is applicable on payments made by government bodies or public institutions for a contract for services (or goods).

WHT on writers’ revenue

A 7.5% WHT applies to occasional revenue paid to individuals or companies as royalties on books, scientific studies, and artistic productions.

Treaty rates

The Ivorian DTT Network:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	15	18	20
Treaty:			
Belgium	15	16	10
Canada	15	15	10
France	15	15	10
Germany	15	15	10
Italy	15	15	10
Morocco	10	10	10
Norway	15	16	10
Portugal	10	10	5
Switzerland	15	15	10
United Kingdom (1)	15	15	10
WAEMU (2)	10	15	15

Notes

1. Management fees (‘*honoraires de gestion*’) attract the 10% WHT in the United Kingdom (UK) DTT.
2. The West African Economic and Monetary Union (WAEMU) states are: Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal, and Togo.

Tax administration

Taxable period

Companies are required by law to have a 31 December fiscal year-end.

Tax returns

The deadline for filing is 30 June for companies subject to audit requirements and 30 May for other entities.

Taxpayers with a turnover between XOF 5 million and XOF 50 million are taxed under the ’synthetic’ tax regime and are required to produce electronic and paper financial statements.

The simplified real taxation scheme (*Réel simplifié d’imposition*) applies to taxpayers with turnover ranging from XOF 50 million to XOF 150 million. Under the simplified real taxation scheme, annual financial statements have a lighter presentation.

The ‘real’ taxation scheme applies to taxpayers with a turnover above XOF 150 million. Companies under the real taxation scheme are allowed to submit tax returns electronically and perform tax payments via wire transfer.

Financial statements are filed annually, according to local generally accepted accounting principles (GAAP).

Payment of tax

Payment of CIT is made in three instalments in April, June, and September following the end of the fiscal year, depending on the sector of activity and taxpayer’s office, as follows:

- Medium and large-size companies tax office:
    - 10 April, 10 June, and 10 September for industrial, oil and gas, and mining companies.
    - 15 April, 15 June, and 15 September for commercial companies.
    - 20 April, 20 June, and 20 September for service providers.
- Companies with other tax offices:
    - 15 April, 15 June, and 15 September.

Tax audit process

Many types of tax audits are available to the tax administration, which may request any accounting-related document for the purpose of tax audit.

The most common is the general tax audit of the taxpayer’s situation, which covers the statute of limitation period. It is carried out with a notice at least five days before the beginning of the audit. The audit is carried out on the premises of the taxpayer for a maximum of six months (with a possibility to extend for a period of three additional months), and a primary tax assessment is issued.

The taxpayer then has 30 days to agree or challenge the assessment, and the definitive assessment is issued within a maximum of three months following the primary tax assessment notification date.

The definitive tax assessment has to be issued within a maximum of two months for taxpayers with annual turnover up to XOF 500 million.

The tax administration is entitled to release tax assessments electronically.

Further challenge of the definitive assessment is possible before the head of the tax administration and the court.

Statute of limitations

The statute of limitations covers the current year and the three prior years.

Topics of focus for tax authorities

The tax administration generally focuses on compliance with the CIT filing deadline and on the payment of the instalments.

For consistency of the tax returns, the tax administration focuses on the filing of the additional records (Annual Financial Statements, Etat 301: Annual Salary Statement, Etat 302: Annual Fees Statement), records of the provisions, tax losses, and amortisations carried forward.

During tax audits, the focus is on transactions with non-resident related parties.

Significant developments

New income tax treaties

In January 2018, Jamaica signed an income tax treaty in Kingston with Italy. This is the first tax treaty between the two countries. This follows the ratification by Mexico of its income tax treaty with Jamaica in December 2017. Both treaties are now in force.

These two treaties brings to 14 the number of bilateral double taxation treaties (DTTs) that have been entered into by Jamaica to date in addition to the multilateral Caribbean Community (CARICOM) tax treaty, which covers a further ten Caribbean jurisdictions within the CARICOM Community.

Organisation for Economic Co-operation and Development (OECD) Multilateral Tax Convention

In January 2018, Jamaica signed the OECD Base Erosion and Profit Shifting (BEPS) Multilateral Convention. Upon signature, Tax Administration Jamaica (TAJ) also filed Jamaica's list of notifications and reservations in relation to the Multilateral Instrument (MLI). The next step will be for Jamaica to ratify this multilateral treaty and lodge instruments of ratification with the OECD. This is expected to take place later this year.

The OECD has been spearheading the implementation of an inclusive framework by over 100 OECD and non-OECD jurisdictions to tackle BEPS tax avoidance strategies.

Tax provisions for share buy-backs

The Companies Act provides various mechanisms whereby a company may either redeem or purchase its own shares subject to meeting the various conditions and requirements stipulated. Notwithstanding this, there were no complementary provisions in Jamaican tax law, and this adversely impacted the capacity of companies to implement such transactions without triggering onerous tax liabilities.

Recognising the merits of facilitating companies in undertaking share redemptions and buy-backs, the government recently amended the relevant tax laws to accommodate the redemption or purchase by a company of its own shares that are listed on a recognised stock exchange without triggering adverse tax consequences.

Introduction of Special Economic Zone (SEZ) regulations

The Special Economic Zones Act, 2016 provides for the development, regulation, construction, supervision, management, and control of SEZs in Jamaica. The Regulations to support the SEZ regime were passed in 2017.

Taxes on corporate income

A resident corporation is taxable on its worldwide income. Non-resident companies are subject to tax on Jamaican-sourced income. Tax is imposed on certain sources of income, such as interest, dividends, royalties, and fees, by way of withholding at a rate of 33⅓% for non-resident corporations. Lower rates of withholding are possible, provided that the recipient is resident in a country that has concluded a DTT with Jamaica.

The current rates of corporate income tax (CIT) are as follows:

Classification	Definition	CIT rate (%)
Regulated company	A company that is regulated by the Bank of Jamaica (other than building societies), the Financial Services Commission (other than life assurance companies), the Office of Utilities Regulation, or the ministry with responsibility for finance.	33⅓
Building society	An entity similar to a savings and loan association.	30
Life assurance companies		25
Unregulated company	A company (that is not a regulated company) registered and operating within Jamaica.	25

The income of certain organisations is specifically exempt from income tax. These include pension and superannuation funds and charitable organisations that are approved by the Commissioner General, TAJ.

Local income taxes

Income tax is imposed at the national level. Income tax is not separately imposed at the local level.

Corporate residence

A corporation, wherever incorporated, is resident in Jamaica if the central management and control of its business is exercised in Jamaica. Normally, this is the case if meetings of directors and shareholders are held in Jamaica and major policy decisions of the corporation are made in Jamaica.

Permanent establishment (PE)

The definition of a PE in domestic law is similar in a number of respects to those contained in DTTs and is defined as a fixed place of business through which the business of a business organisation is carried on. Where a DTT applies, then the treaty definition of a PE will prevail.

Other taxes

General consumption tax (GCT)

GCT is a value-added tax (VAT) imposed on the supply of goods or services within Jamaica (above a minimum turnover threshold) and on the import of goods or services to Jamaica. The standard rate is currently 16.5%. Higher or lower rates of GCT are applicable to certain goods and services; for example, the provision of telephone services (including phone cards) and handsets is subject to GCT at the rate of 25%, while the tax is imposed on hotels and other businesses in the tourism sector at an effective rate of approximately 10%. Operators within the tourism industry who were granted approval under legacy tourism incentives and who have not elected to move to the current regime cannot benefit from the 10% tourism GCT rate.

Subject to certain exceptions, an additional 5% advance GCT is levied on the commercial importation of goods by a GCT-registered taxpayer.

Where services are imported from a supplier who is not resident in Jamaica, the recipient of those services is deemed to be liable to account for GCT on the services. The recipient may be able to claim a credit for GCT incurred on imported services in certain circumstances; in particular, there are specific conditions where such services are received from overseas connected parties.

The list of items exempt from GCT includes a range of basic food items, prescription drugs, certain medical supplies, as well as certain construction, transportation, and financial and insurance services. Zero-rated goods and services include certain agricultural and fisheries inputs, exported goods and services, and purchases by diplomatic and international organisations and foreign governments.

A GCT group accounting mechanism is available, whereby two or more affiliated entities may be approved by the Commissioner General, TAJ to be treated as a single taxpayer for GCT purposes.

Customs duties and related imposts

Customs duty is levied on the customs value of goods imported, which is determined in accordance with the World Trade Organization (WTO) rules on customs valuation.

The rates are specified by a prescribed Customs Tariff, having regard (where appropriate) to the Common External Tariff agreed between CARICOM member states.

In addition to normal customs duties, an environmental protection levy (EPL) and a standards compliance fee (SCF) are imposed at the rate of 0.5% and 0.3%, respectively, of the customs value of goods imported. The EPL is also imposed on 75% of the sales value of locally manufactured goods with an input tax credit available for any EPL paid in respect of imported productive inputs. Customs administration fees (CAF) are charged based on the service(s) provided by Jamaica Customs. Other import levies apply in certain instances, such as additional stamp duty (ASD) on certain goods.

Special consumption tax (SCT)

SCT is imposed at various rates on the importation or local manufacture of 'prescribed goods' (i.e. certain petroleum products, ethanol, alcoholic drinks, tobacco, and motor vehicles).

Property tax

All land in Jamaica is valued for property tax purposes on the 'site value' or 'unimproved value' (as reflected on the 2013 Property Valuation Roll). Property tax is levied by reference to various value bands at a scale of rates ranging from 0.50% to 0.90%.

Transfer tax

A transfer tax of 5% is applicable on the consideration payable (or market value in certain instances) on the transfer of land, buildings, securities, and shares (provided that a refund is available where the transfer tax charged exceeds 37.5% of the capital gain made). Transactions on the Jamaica Stock Exchange (JSE) are exempt from transfer tax, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE.

Stamp duty

Stamp duty is imposed on a wide variety of legal instruments. The rate of stamp duty depends on the legal instrument involved. Stamp duty is imposed, for example, on the conveyance on sale of real estate and certain other assets at 4%, while transfers of shares in Jamaican companies attract a rate of 1%. Transfers of shares on the JSE are exempt from stamp duty, as are the transfer of registered corporate bonds, whether or not the company is listed on the JSE. Stamp duty is also imposed at an ad valorem rate on the creation or increase of a mortgage.

Payroll taxes

Payroll taxes are imposed at the national level on emoluments paid by employers to their employees, including (subject to certain conditions) expatriates who undertake work in Jamaica. The taxes comprise Pay-As-You-Earn (PAYE) Income Tax, Education Tax, and contributions to the National Housing Trust (NHT), the National Insurance Scheme (NIS), and the Human Employment and Resource Training (HEART) Trust.

Employers are obligated to deduct and remit payroll taxes within 14 days after the end of the month in which the emoluments are paid. Employers and employees contribute at the following rates:

Payroll tax	Basis	Employee rate (%)	Employer rate (%)
PAYE Income Tax	Taxable emoluments up to 6 million Jamaican dollars (JMD) *per annum* less the annual tax-free threshold	25.00	N/A
	Taxable emoluments in excess of JMD 6 million *per annum*	30.00	N/A
Education Tax	Taxable emoluments	2.25	3.50
NHT contributions	Gross emoluments	2.00	3.00
NIS contributions	Gross emoluments up to a maximum of JMD 1.5 million *per annum*	2.50	2.50
HEART contributions	Gross emoluments	N/A	3.00

Minimum business tax (MBT)

An MBT of JMD 60,000 *per annum* is levied on all corporate bodies incorporated or registered under the Companies Act, the Building Societies Act, the Friendly Societies Act, or the Industrial & Provident Societies Act, as well as on individuals carrying on a trade, profession, or business whose chargeable income (less emoluments and an amount equivalent to the annual tax-free threshold) exceeds JMD 3 million *per annum*.

The MBT is payable in two tranches and is creditable against the taxpayer's income tax liability for the year of assessment.

In the case of an individual taxpayer, any MBT paid in excess of income tax liability for the year of assessment may be refunded or carried forward. Companies, however, are not entitled to a refund or carryforward of excess MBT.

Asset tax

An *ad valorem* asset tax at the rate of 0.25% is imposed on the 'taxable value' of the assets of deposit-taking institutions regulated by the Bank of Jamaica, as well as securities dealers, life assurance companies, and property and casualty insurance companies regulated by the Financial Services Commission. The taxable value of assets is broadly determined as the value of assets on the balance sheet with adjustments for certain items specific to each type of institution.

For other entities, asset tax is imposed at a fixed rate ranging from JMD 5,000 to JMD 200,000, depending on the aggregate value of the entity's assets, and is payable on or before 15 March annually.

Contractors levy

Payments to contractors (including sub-contractors) in respect of construction, haulage, and tillage operations are liable to a withholding of a contractors levy of 2% of the gross amount paid. This must be remitted to TAJ within 14 days of the end of the month in which the payment is made. The levy paid is allowable as a credit against the income tax liability of the contractor in the year of assessment in which the levy is deducted. To the extent that there is any excess, it is not refundable.

Guest accommodation room tax (GART)

GART is levied at a specific rate on hotels and other tourist accommodation facilities based on room occupancy. GART is tiered depending on the number of rooms at the hotel or other tourism accommodation facility.

Telephone call tax

Tax is imposed on telephone calls, including inbound calls terminating on fixed or mobile networks.

Branch income

Branch income is taxed at the same rate as that of local corporations and on a similar basis. The transfer of profits to its overseas head office is subject to a withholding tax (WHT) of 33⅓% or at a lower treaty rate, where applicable.

A branch operation, irrespective of the nature of its business activities, is subject to Jamaican income tax on income derived by the branch from the island and elsewhere. In computing the income for tax purposes, expenses incurred wholly and exclusively for the purpose of the branch's trade are deductible, including a reasonable proportion of head office expenses.

Transactions between the branch, its head office, and affiliates should be at arm's-length values.

Income determination

Inventory valuation

Inventories are valued at the lower of cost or market value. The Commissioner General, TAJ has made no pronouncement, but last in first out (LIFO) is not generally permitted.

Any method of valuation that accords with standard accounting practice is acceptable for tax purposes, provided it is consistently applied at the beginning and end of the accounting period and it is not in contravention of the Income Tax Act.

Capital gains

There is no tax on capital gains. There is, however, a transfer tax on the market value of certain assets transferred and stamp duty payable on the transfer/disposal of shares or real property. *See the Other taxes section for more information*.

Dividend income

Ordinary dividends paid by Jamaican tax resident companies to Jamaican tax resident shareholders are liable to tax at the rate of 15%. The tax is to be deducted on payment by the distributing company and represents the final tax on such dividends. The Income Tax Act provides relief from taxation for dividends received by Jamaican tax resident corporate shareholders where they hold at least 25% of the voting rights of the distributing company (referred to as 'group relief').

Additionally, the dividend income on which tax is payable may not be offset by tax losses, and expenses incurred to earn the dividend are not deductible in arriving at chargeable income, with the exception of expenses incurred in respect of specified dividend income. Specified dividend income refers to the dividend income of companies that are subject to tax and are regulated by the Bank of Jamaica or the Financial Services Commission and whose dominant trade or business is comprised of making investments in loans, securities, and other financial assets. However, this exception does not apply to dividends enjoying group relief.

Preference dividends that qualify as tax deductible expenses of the paying company (*see below*) continue to be liable to tax at a rate of 25%/30% where the recipient is an individual and at the applicable CIT rate where paid to a company. Dividends paid to non-resident shareholders are subject to income tax thereon at the default rate of 33⅓% in the case of a company and 25% in the case of an individual (subject to any treaty protection or incentive relief available).

Subject to certain conditions being met, a company may claim an income tax deduction in respect of preference dividends paid during the year of assessment. However, to the extent that these preference dividends do not qualify for this income tax deduction, they will be treated on a similar basis as ordinary dividends.

Stock dividends

Stocks issued by way of the capitalisation of retained earnings (referred to as 'bonus issues') do not create a taxable distribution in the hands of the shareholders.

Interest income

Interest income is included in chargeable income and is subject to tax when received. Where interest is paid by a prescribed person, tax is deducted at source at the rate of 25% (*see the Withholding taxes section for more information*). The interest payable on certain securities issued by the government of Jamaica (primarily to non-residents) has been designated as being exempt from tax.

Royalty income

Royalty income is included in chargeable income.

Foreign income

Resident corporations are taxable in Jamaica on their worldwide gains or profits. This includes the income of a foreign branch of a Jamaican company, as well as dividends arising abroad. Non-resident corporations are generally taxable on Jamaican-sourced income.

Tax deferral is not permitted in Jamaica.

Deductions

Expenses are deductible to the extent that they were incurred wholly and exclusively to earn the income and are claimed in the year in which they were incurred.

Depreciation

Tax depreciation (referred to in Jamaica as 'capital allowances') is generally computed at prescribed rates annually on a straight-line basis. In the year of expenditure, initial allowances are also available at rates ranging from 20% to 25% on certain buildings and plant/machinery. Capital allowances are also available for capital expenditure on a wide list of intellectual property (IP) rights as well as pure or applied science and research and development (R&D) costs.

Generally, capital gains on depreciable property are not taxed. However, a recharge limited to the extent of the capital allowances allowed (or balancing charge) is taxable. Tax depreciation may not conform to book depreciation.

Goodwill

The amortisation or write-off of goodwill is not an allowable deduction.

Start-up expenses

The costs of incorporation and other expenses incurred in connection with establishing a business are not deductible against income.

Interest expenses

A deduction is available for interest that is paid on capital employed in acquiring income. Additionally, where interest is paid to a non-resident, tax must be withheld where required and remitted to the tax authorities in order to secure a deduction.

Bad debts

A deduction is available in respect of specific debts that become bad during the year of assessment.

Charitable contributions

Approved donations (not exceeding 5% of taxable income) to registered charitable organisations and certain educational institutions are deductible.

Foreign exchange gains/losses

Foreign exchange gains and losses arising from trading are included in or deducted from chargeable income when realised. Foreign exchange gains and losses arising on capital assets are not taxable or allowable for tax purposes; however, where they pertain to fixed assets, on realisation, they may become part of the underlying acquisition cost and tax depreciation computed thereon.

Fines and penalties

Fines, penalties, and interest arising from tax arrears are not deductible.

Taxes

Taxes on income are not deductible. Additionally, GCT, contractors' levy, transfer tax and stamp duty incurred on capital assets, input tax credits for GCT purposes, MBT, as well as the asset tax, are generally disregarded for income tax purposes. Other taxes, such as property tax, payroll taxes, and other business taxes, are deductible, to the extent that they were incurred to earn the income.

Net operating losses

Subject to certain exceptions for newly established and micro businesses, any claim for deduction of tax losses incurred in a prior year will be capped at 50% of the taxpayer's chargeable income (before deduction of tax losses carried forward) of the year in which the claim is being made. Tax losses are not available for carryback. Certain anti-avoidance provisions restrict the 'purchase' of accumulated tax losses.

Payments to foreign affiliates

Royalties, management and other service fees, rentals, and interest charges paid to foreign affiliates are deductible to the extent that these payments are made at arm's-length rates. WHT should be paid in respect of such services, normally at 33⅓% where payment is to a company and 25% in the case of individuals, unless a lower rate is provided for under a DTT. Furthermore, interest paid to non-residents is not deductible until the WHT is remitted.

Group taxation

Group taxation is generally not permitted in Jamaica, with the exception of a mechanism to permit group filing of returns for GCT purposes.

Transfer pricing

Jamaica has implemented a transfer pricing regime consistent with the OECD's guidelines on transfer pricing for multinationals in an effort to protect its tax base and address issues of tax avoidance, particularly in relation to cross-border transactions. Detailed transfer pricing rules seek to ensure that taxpayers compute their taxable income using a deemed arms-length consideration (determined in accordance with prescribed methodologies) for all transactions between connected parties (where different to the actual consideration involved).

All taxpayers who engage in such transactions are required to disclose information pertaining to the identity of connected persons, particulars, and pricing arrangements of such transactions primarily through the annual income tax return and to retain this documentation in support of the income tax return. Business entities with gross annual revenues of JMD 500 million or more are required to comply with extensive OECD standard transfer pricing documentation requirements.

The rules also empower the tax authorities to deem an unconnected person located in a low-tax jurisdiction to be a connected person under certain circumstances.

Thin capitalisation

There are no provisions for thin capitalisation in the tax laws of Jamaica. It has been proposed, however, that such provisions should be introduced in the future.

Controlled foreign companies (CFCs)

There is no CFC regime in Jamaica.

Tax credits and incentives

Jamaica grants relief from taxation to persons who have been approved under the following incentive legislation:

- The Special Economic Zones (SEZ) Act.
- The Urban Renewal (Tax Relief) Act.
- The Income Tax Act (Junior Stock Market Companies).
- The Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act.
- The Bauxite and Alumina Industries (Encouragement) Act.
- The Charitable Organizations (Tax Harmonization) (Miscellaneous Provisions) Act.

Special Economic Zones (SEZ)

The Special Economic Zones (SEZ) Act was passed in January 2016 and repealed the Jamaica Export Free Zones Act. It has established a regime to support the designation, promotion, development, operation, and management of SEZs.

A person may be declared to be a 'developer' or 'occupant' under the SEZ Act. Tax incentives that are available to a developer or occupant under the SEZ Act include relief from asset tax and a reduced rate of income tax, property tax, transfer tax, GCT, and customs duty. However, these incentives are not available to developers or occupants who are eligible for relief under a number of other enactments.

A number of industries/business activities are specifically prohibited in the SEZ, including (but not limited to) mining or quarrying for natural resources, services pertaining to tourism, telecommunications, public utilities, financial services, construction, real estate, and property management.

The Urban Renewal (Tax Relief) Act

The Urban Renewal (Tax Relief) Act provides tax incentives to persons approved under the Act in connection with undertaking programmes of development in areas designated as special development areas, with a view to improving or restoring them. The tax incentive provides certain tax benefits, including relief from income tax on rental income and interest earned by an investor in an Urban Renewal Bond. There is also exemption from stamp duty and transfer tax on the transfers of property.

A tax credit based on expenditure incurred on capital improvement works in a designated special development area is also available. In addition, lessees of the improved properties, who satisfy certain criteria, are able to claim a tax deduction of double the rental paid.

The Income Tax Act (Junior Stock Market Companies)

Subject to certain conditions being met, a company listed on the Junior Market of the JSE is eligible for full exemption from income tax on their profits in the first five years from the date of admission to the Junior Market, with a 50% exemption from income tax on their profits in next following five years.

Employment tax credit (ETC)

The ETC is comprised of a non-refundable tax credit that is available to employers in computing their income tax liability. A number of taxpayers are ineligible to claim this tax credit.

The ETC is computed by reference to payroll taxes (excluding PAYE income tax) filed and remitted by their due date by the employer, subject to an overall cap. With a headline income tax rate of 25%, the ETC therefore provides tax-compliant employers with an opportunity to reduce the effective income tax rate on their trading profits to as low as 17.5%.

Where a company makes a distribution (dividends and certain other benefits to shareholders), the credit is clawed back by TAJ to the extent of 10% of the distribution, less the tax payable by the recipient of the distribution (i.e. the ETC clawback only applies where tax imposed on the recipient of the distribution is less than 10%). The credit clawed back must be repaid to TAJ within 14 days of the end of the month in which the distribution is made.

Incentives for large-scale projects/pioneer industries

The Income Tax Relief (Large-Scale Projects & Pioneer Industries) Act is designed to encourage innovation and high-value investments. It provides a mechanism through which additional income tax incentives can be offered in circumstances where the Minister of Finance designates (subject to affirmative resolution in Parliament) a project as an approved large-scale project or an economic activity as an approved pioneer industry.

Participants in either a designated large-scale project or a pioneer industry may subsequently be approved by Ministerial Order, which will stipulate the extent of relief granted. The income tax relieved under all orders issued pursuant to this mechanism in any year will be capped at 0.25% of the country’s gross domestic product (GDP) for the previous financial year.

Productive inputs relief (PIR)

There is relief from customs duty and additional stamp duty on the importation of certain ‘productive inputs’ that are directly used in the ‘production of primary products’ or the ‘manufacture of goods’. In addition to the manufacturing and agricultural sectors, relief is also granted on certain products imported for use in the tourism, creative arts, and healthcare industries.

The relief is subject to the proviso that imported items are not available in adequate supplies from a local manufacturer or from a manufacturer within the CARICOM Common Market area or are not otherwise prohibited from benefitting from this relief.

Bauxite and Alumina Industries (Encouragement) Act

A person engaged in winning bauxite and producing alumina in Jamaica may be approved as a recognised bauxite producer or a recognised alumina producer (or both) and obtain the following tax reliefs:

- Relief from customs duty, additional stamp duty, and GCT in respect of the importation of plant, machinery, trucks and other vehicles, and other specified material and equipment that are necessary for the winning, treatment, and transportation in Jamaica and shipping of bauxite and alumina.
- Relief from customs duty or other similar impost on the importation of certain petroleum fuels and oils (excluding petrol) during the concession period.

Tax incentives for charitable organisations

The Charities Act provides a mechanism for registered charitable organisations to obtain exemption from income tax, customs duty, GCT, property tax, stamp duty, and transfer tax.

Non-resident deposits

Non-residents who place deposits with Jamaican banks can earn interest free of Jamaican tax in certain circumstances. The deposits may be designated in foreign currency or Jamaican dollars.

Employee Share Ownership Plan (ESOP)

Certain tax benefits accrue to employees and employers in respect of contributions to an approved ESOP as well as the allocation of shares from such plans.

Foreign tax credit

The avoidance of double taxation is achieved by means of foreign tax credits available under most tax treaties or by means of exemption in the case of the CARICOM treaty. Under the provisions of the Income Tax Act, a foreign tax credit is also available to companies in Jamaica that have paid or are liable to Commonwealth Income Tax. Where recourse cannot be had through either of these methods, by convention, in practice, partial relief by way of expense deduction is granted against income for the foreign tax.

Withholding taxes

WHT is required to be deducted from chargeable payments made to non-residents and remitted to TAJ (along with the applicable return) within 14 days of the end of the month in which the payment is made in order to avoid the imposition of interest and penalties.

Subject to securing approval from TAJ (where appropriate), the following rates of WHT apply to the categories of payments highlighted (this is not an exhaustive list):

	WHT (%) (4)				
	Dividends				
Recipient	Portfolio	Substantial holdings (5)	Interest	Royalties	Management fees
Resident corporations	15 (1)	0 (1)	25 (3)	0	0

	WHT (%) (4)				
	Dividends				
Recipient	Portfolio	Substantial holdings (5)	Interest	Royalties	Management fees
Resident individuals	15 (2)	15 (2)	25 (3)	0	0
Non-treaty:					
Non-resident corporations	33⅓	33⅓	33⅓	33⅓	33⅓
Non-resident individuals	25	25	25	25	25
Treaty:					
Canada	15	22.5	15	10	12.5
CARICOM countries (6)	0	0	15	15	15
China, People's Republic of	5	5	7.5	10	0 (4)/33⅓
Denmark	15	10	12.5	10	10
France	15	10	10	10	10
Germany	15	22.5	12.5 (7)	10	10
Israel	22.5	15	15	10	33⅓
Mexico (8)	10	5	10	10	10
Norway	15	15	12.5	10	10
Spain	10	5	10	10	0 (9)/10
Sweden	22.5	10	12.5	10	10
Switzerland	15	10	10 (7)	10	0 (9)/10
United Kingdom	15	22.5	12.5	10	12.5
United States	15	10	12.5	10	0 (4)/33⅓

Notes

1. Substantial holdings refer to resident companies that hold 25% or more of the voting rights of the paying Jamaican resident company.
2. Tax is withheld at the rate of 15% where a dividend is paid by a company resident in Jamaica to a resident individual shareholder, regardless of shareholding.
3. Tax is deducted from interest paid to Jamaican residents if payment is made by a prescribed person.
4. Provided the income is not effectively connected with a PE in Jamaica.
5. Applies only to companies owning a substantial holding (percentage ownership as prescribed by the treaty).
6. Rates apply only to residents of member states that have ratified the tax treaty.
7. Rate reduced further if received by a bank recognised as a banking institution under the laws of that state.
8. Comes into effect for WHT from 1 January 2019.
9. Provided the services are rendered outside of Jamaica or if in Jamaica (within a prescribed period).

WHT is also imposed at the rate of 15% on insurance premiums paid by Jamaican residents to non-residents (subject to certain exceptions and protection under a tax treaty). WHT of 3% is imposed on payments in respect of 'specified services' purchased locally (above a *de minimis* amount of JMD 50,000 per invoice).

WHT withheld should be available for offset against the payee's income tax liability on the filing of returns.

Tax administration

Jamaica has established the following departments to handle tax administration:

- Tax Administration Jamaica (TAJ) operates as a revenue authority (reporting to the Ministry of Finance) whose functions include compliance and tax collection, administrative and legal support, audit and assessment of income tax, general consumption tax, stamp duty, and transfer tax. The Commissioner General, TAJ has responsibility for the direction, supervision, and administration of TAJ and is supported in undertaking this role by several Deputy Commissioner Generals.
- The Revenue Appeals Division of the Ministry of Finance processes appeals to decisions made by TAJ.
- The Jamaica Customs Agency has the powers of an executive agency and has responsibility for administering taxes at the ports of entry as well as trade facilitation.

There is also a Financial Investigations Division in the Ministry of Finance, which investigates customs breaches and fraudulent acts in respect of tax legislation.

Taxable period

A corporation is subject to tax on its income for a calendar year. However, where the Commissioner General, TAJ is satisfied that a corporation normally prepares financial statements to a date other than 31 December, the company may be permitted to use the profits of its own financial year rather than the calendar year as the basis of assessment. The basis period should not exceed 12 months; however, a company wishing to file its income tax return for a period exceeding this period must obtain the approval of TAJ.

Tax returns

Income tax returns are due for filing by 15 March in the year following the year of assessment and are based on a system of self-assessment of the tax payable.

Payment of tax

Tax is payable in quarterly instalments on the 15th day of March, June, September, and December of each tax year. Quarterly instalments are based on an estimate of the year's liability or the actual tax payable for the previous year. The balance of income tax payable for a taxation year, after deduction of the instalments of estimated tax, is due on 15 March of the following year. Interest is charged on unpaid tax at a rate of 16.62% *per annum* while the amount remains unpaid. A penalty of up to 50% may also be imposed if TAJ issues an assessment.

TAJ has implemented an electronic tax system that taxpayers are required to use to file various tax returns and remit taxes online.

Tax assessments and audits

The Commissioner General, TAJ is empowered to conduct audits on selected tax returns or to assess a taxpayer for additional tax at any time prior to the expiration of the statute of limitation, which is six years, except in certain cases. Tax audits can be carried out whether or not notices of assessment have been issued. Tax assessments may be raised where the Commissioner General, TAJ is of the opinion that a taxpayer has been assessed for less tax than the taxpayer ought to have been charged, or where the taxpayer failed to file a tax return.

Topics of focus for tax authorities

The Jamaican revenue authorities have indicated that their focus is centred around improving tax collections, enhancing voluntary compliance, increasing audit coverage, and improving the ease with which taxpayers conduct business.

In recent times, TAJ has conducted comprehensive audits that cover multiple tax types. However, it continues to focus its compliance strategies on large taxpayers and has strengthened the resources of the Large Taxpayer Office to facilitate this.

TAJ has also turned its attention to administering the transfer pricing regime implemented in 2015.

Other issues

Intergovernmental agreements (IGAs)

The government of Jamaica has entered into an agreement (Model 1) with the government of the Unites States (US) to improve international tax compliance and to implement the US Foreign Account Tax Compliance Act (FATCA). The agreement seeks to provide an effective mechanism for the automatic exchange of information for tax purposes and addresses the burden of domestic reporting and the legal impediments that Jamaican financial institutions may face in complying with FATCA.

The Income Tax Act has been amended to incorporate the measures that are required by FATCA.

OECD Multilateral Tax Convention

In January 2018, Jamaica signed the OECD BEPS Multilateral Convention. Upon signature, TAJ also filed Jamaica's list of notifications and reservations in relation to the Multilateral Instrument (MLI). The next step will be for Jamaica to ratify this multilateral treaty and lodge instruments of ratification with the OECD. This is expected to take place by the third quarter of 2018.

The OECD has been spearheading the implementation of an inclusive framework by over 100 OECD and non-OECD jurisdictions to tackle BEPS tax avoidance strategies.

Significant developments

2018 Tax Reform

On 28 March 2018, the 2018 Tax Reform Act was approved by the Diet, and, on 31 March 2018, the 2018 Tax Reform Act, the Enforcement Orders, and Regulations were promulgated, which are effective for corporate tax years ending on or after 1 April 2018, in principle. The 2018 Tax Reform Act provides for tax measures to help improve corporate productivity by 'Internet of Things' (IoT) investment and increase salary income to revitalise the economy.

Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) (MLI)

On 18 May 2018, the MLI was approved by the Diet. Although Japan has not yet deposited the ratification instruments to the Organisation for Economic Co-operation and Development (OECD), it is expected that Japan will deposit them by the end of September 2018 to enable the MLI (for Japan) to enter into force on 1 January 2018.

Consumption tax

Due to a tax amendment, the consumption tax increase that was originally scheduled to rise to 10% on 1 April 2017 was delayed to 1 October 2019; however, concessions have been introduced with lower rates for selected goods to lessen the burden for the lower income tax brackets. To cope with the multiple consumption tax rates, an invoicing method will be introduced, although not until 1 April 2023, with transitional measures in place for the three-year and six months interim.

Taxes on corporate income

A domestic corporation in Japan is taxed on its worldwide income, including foreign branch income, while 95% of dividends received by a company from a foreign company in which it has held at least 25% (or could be lower under relevant tax treaties) of the outstanding shares for a continuous period of six months or more can be excluded from the company's taxable income. *See the description of Dividend income in the Income determination section for more information*.

A foreign corporation is taxed only on its Japan-source income.

Corporation tax

The corporation tax rates are provided in the table below (effective from fiscal years beginning on or after 1 April 2016 and 1 April 2018).

	Corporation tax rate (%)	
Company size and income	**1 April 2016**	**1 April 2018**
Paid-in capital of over 100 million Japanese yen (JPY)	23.4	23.2
Paid-in capital of JPY 100 million or less, except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more:		
First JPY 8 million *per annum*	15.0	15.0
Over JPY 8 million *per annum*	23.4	23.2

National local corporate tax

As of 1 April 2018, corporate taxpayers are obligated to file and pay the national local corporate tax at a fixed rate of 10.3% of their corporate tax liabilities. Previously, the national local corporate tax rate was 4.4%.

Standard enterprise tax (and local corporate special tax)

Enterprise tax is imposed on a corporation's income allocated to each prefecture. This allocation is generally made on the basis of the number of employees and number of offices in each location. The local corporate special tax, which is a rate multiplied by the income portion of enterprise tax, will be abolished from tax years beginning on or after 1 October 2019 and replaced by enterprise tax (including a size-based tax regime).

The standard rates of enterprise tax, including local corporate special tax, are shown below.

Taxable base	Enterprise tax (%)	Local corporate special tax
First JPY 4 million *per annum*	3.4	43.2% of the current enterprise tax
Next JPY 4 million *per annum*	5.1	
Over JPY 8 million *per annum*	6.7	

If the paid-in capital of a corporation is JPY 10 million or more and the corporation has places of business in more than two prefectures, the graduated rates above are not applicable.

For utilities and insurance companies, the standard tax rate is shown as follows:

Taxable base	Enterprise tax (%)	Local corporate special tax
Net revenue (net utility charges or net insurance premiums)	0.9	43.2% of the current enterprise tax

Size-based enterprise tax (and local corporate special tax)

Instead of the above general enterprise tax, a 'size-based' enterprise tax (*Gaikei Hyojun Kazei*) is applied to a company whose paid-in capital is more than JPY 100 million as of the year-end.

Factors such as the size of a corporation's personnel costs and its capital (the amount of paid-in capital) will determine the additional amount of tax payable. The existing profit-based enterprise tax will also continue to apply at the tax rates indicated below. Therefore, a loss company in Japan may be required to pay tax based on value-added activities and the corporation's paid-in capital.

The applicable standard rates are as follows:

	Size-based enterprise tax (%)	
Taxable base	**2015 Tax Reform**	**2016 Tax Reform and further amendments per the amendment bill**
Fiscal year beginning	1 April 2015	1 October 2019
Value added base	0.72	1.2
Capital base	0.3	0.5
Income base *		
First JPY 4 million	3.1 (1.6)	1.9 (0.3)
Next JPY 4 million	4.6 (2.3)	2.7 (0.5)
Over JPY 8 million	6.0 (3.1)	3.6 (0.7)
Local corporate special tax (the rate is multiplied by the income base of size-based enterprise tax), which is collected as national tax by filing corporate tax returns	93.5	414.2 **

* The rate shown for the income base is the total income-based tax including (i) the portion collected as part of the national tax return and (ii) the portion included as part of the enterprise tax return. The portion in parentheses of the income base column shows the amount collected as an enterprise local tax (the difference is collected as a national tax). The above rate changes for income base may not affect taxpayers who have elected consolidated taxation since consolidation is not applicable for local tax purposes.

** The local corporate special tax will be abolished from 1 October 2019 and replaced with an increase to the enterprise tax rate.

Inhabitant's tax

Inhabitant's tax is imposed on a corporation's income allocated to each prefecture and city (municipal borough). The allocation is generally made on the basis of the number of employees, in the same way as enterprise tax.

The standard tax rate is 3.2% as prefectural tax and 9.7% as municipal tax. However, the tax rate is increased to 4.2% for prefectural tax and 12.1% for municipal tax, depending upon the determination of each local government. From fiscal years beginning on or after 1 October 2019, the rate is increased as follows:

	Current		Expected from 1 October 2019	
Inhabitant's tax	**Standard rate (%)**	**Maximum rate (%)**	**Standard rate (%)**	**Maximum rate (%)**
Prefectural tax portion	3.2	4.2	1.0	2.0
Municipal tax rate	9.7	12.1	6.0	8.4
Local corporate tax rate	4.4		10.3	

In addition to the above, inhabitant's tax is imposed on a *per capita* basis, in the range from JPY 70,000 (in cases where the amount of paid-in capital is JPY 10 million or less and the number of employees in each prefecture and city is 50 or less) to JPY 3.8

million (in cases where the amount of paid-in capital is over JPY 5 billion and the number of employees in each prefecture and city is over 50). The inhabitant's tax amount is determined by the local government by the factors of paid-in capital and the number of employees.

Effective tax rate

The total corporate income tax burden (i.e. effective tax rate) varies depending upon the size of a company's paid-in capital. Since enterprise tax is deductible, the effective tax rate is less than the total of the statutory rates of corporation tax, inhabitant's tax, and enterprise tax.

The following is the summary of the effective applicable tax rates in the case of small and medium enterprises (SMEs) and large corporations operating in Tokyo (taking no thought of an additional-value-based tax and capital-based tax out of the enterprise tax above):

	Effective corporation tax rate (%)	
Tax year	**SMEs**	**Large corporations**
Beginning on or after 1 April 2016	34.81	30.86
Beginning on or after 1 April 2018	34.60	30.62

Corporate residence

Domestic and foreign corporation

A company that has its head office in Japan is a domestic corporation. The nationality of its shareholders or place of central management is not relevant.

A corporation other than a domestic corporation is regarded as a foreign corporation.

Permanent establishment (PE)

Under domestic tax law, the scope of Japan-source income in respect of which a foreign corporation is taxable depends upon the type of taxable presence that it has in Japan. Pursuant to the amendments of Article 5 of the OECD Model Tax Treaty (OECD MTC) in November 2017 and the signing of the MLI on 7 June 2017 by the Japanese government, articles related to the PE were revised by the 2018 Tax Reform. The articles of the Corporate Tax Law (CTL) and CTL Enforcement Ordinance (CTLEO) were revised to agree with the updated Article 5 of the OECD MTC. The revised definition of PE will apply to the tax years beginning on or after 1 January 2019. After the amendment, the types of taxable presence that a foreign corporation may have in Japan include the following:

- Branch, factory, other fixed places in which business is conducted in Japan, mine, quarry, building for rent, etc., but exclude a specified place used only for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise and any other activity of a preparatory or auxiliary character (Direct PE).
- Construction, installation, assembly project, or supervisory services related thereto for a period of greater than one year, but exclude a specified place used only for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise and any other activity of a preparatory or auxiliary character (Construction PE).

- A person other than an agent of an independent status (i.e. Agent PE) acting in a contracting state on behalf of an enterprise and has, and habitually exercises, in a contracting state, an authority to conclude contracts, in doing so, habitually concludes contracts, or habitually plays the principal role leading to the conclusion of contracts that are routinely concluded without material modification by the enterprise, and these contracts are:
  - in the name of the enterprise
  - for the transfer of the ownership of, or for the granting of the right to use, property owned by that enterprise or that the enterprise has the right to use, or
  - for the provision of services by that enterprise.

  In the above case, the enterprise shall be deemed to have a PE in that state in respect of any activities that person undertakes for the enterprise, unless the activities of such person are limited to preparatory or auxiliary character.

  If a person acts exclusively or almost exclusively on behalf of one or more enterprises to which it is closely related, that person shall not be considered to be an independent agent.

As a matter of law, the articles of Japan's tax treaties have precedence over domestic tax law. By the amendments of the definition of PE under the domestic law, there may be some difference in the scope of PE from that of the existing tax treaties. Under the circumstances, the articles of the relevant tax treaties will override the above articles. Once a PE has been established for a foreign corporation under domestic law, all Japan-source income is taxable to the PE to the extent it is 'attributable to' the PE.

Other taxes

Consumption tax

Consumption tax (value-added tax or VAT) is levied when a business enterprise transfers goods, provides services, or imports goods into Japan. The applicable rate is 8%. As of 1 October 2019, the rate will increase to 10%. Exports and certain services to non-residents are taxed at a zero rate. Specified transactions, such as sales or lease of land, sales of securities, and provision of public services, are not subject to taxation.

Consumption tax paid by the business enterprise attributable to taxable revenue shall be creditable/refundable by filing the consumption tax return to the extent that such transaction is recorded in the accounting book and relevant invoices are kept.

In response to the increase in consumption tax rate to 10% from 1 October 2019, lower consumption tax rates on certain goods will be introduced. Also, in response to the multiple tax rates, an invoice system will be introduced from 1 April 2023. In the three-year and six months transitional period to the introduction of an invoice system, several measures will be implemented.

The lower consumption tax rate of 8% will still apply to food (excluding when purchased in restaurants) along with newspaper subscriptions where there is at least an issue twice per week. Until the invoice system is introduced, the credit for consumption taxes paid will follow the current method for tracking, where the lower tax rate on applicable items should be indicated in the invoice. With the increased administration cost of tracking the different rates, the simplified method of determining consumption taxes paid will be allowed.

After the new invoice system is introduced, qualified invoices issued by the registered businesses should be maintained for claiming credits of consumption taxes paid. Businesses (other than exempt entities) will need to file an application with their tax office to become qualified for issuing qualified invoices indicating details such as the business registration number, the applicable tax rate, etc.

Note that consumption tax is also imposed on the cross-border provision of digital services (e.g. e-books, music, and advertising) by foreign service providers. In this respect, a reverse-charge mechanism is applicable for business-to-business (B2B) transactions, and foreign service providers may need to register for consumption tax purposes with regard to business-to-consumer (B2C) transactions.

Also, Japanese sponsors are subject to a reverse-change system for sports or music/art attractions in Japan provided by foreign entertainment providers.

Customs duty

A customs duty is levied on imported goods based on the custom tariff table.

Excise taxes

Excise taxes were abolished by introduction of consumption tax.

Fixed assets tax

The annual fixed assets tax is levied by the local tax authorities on real property and depreciable fixed assets used for business purposes. Real property is taxed at 1.7% (standard rate including city planning tax) of the value appraised by the local tax authorities. The depreciable fixed assets tax is assessed at 1.4% of cost after statutory depreciation.

Stamp duty

A stamp duty is levied on certain documents prepared in Japan. The tax amount is generally determined based on the amount stated in the document.

Registration and licence tax

Registration and licence tax is levied where certain property is registered, at a rate from 0.1% to 2% of the taxable basis or at a fixed amount. The taxable basis depends upon the property being registered (e.g. the amount of paid-in capital registered by a company or the value of real estate as assessed by local tax authorities).

Payroll taxes

In general, the employer has an obligation to withhold payroll taxes monthly, and for annual year-end adjustment.

Labour and social insurance paid by employer

There are four types of insurance systems in Japan that enterprises employing workers that meet certain conditions must enrol in. Workers' accident compensation insurance is borne entirely by the employer. Employment insurance, health insurance/nursing care insurance, and employees' pension insurance is born by both the employer and employee.

The employer is generally liable to pay a share of the following contributions on salary or bonus, including fringe benefits, to be paid in Japan. The employer's share consists of the following contributions:

Contribution	Standard premiums on monthly salary	Standard premiums on bonus
Health insurance for the Metropolis of Tokyo (each prefecture has its own health insurance rate, and rates are slightly higher for individuals between the ages of 40 and 65)	5.735% (on a maximum of JPY 1,390,000 of wages per month)	5.735% (on an annual cap of JPY 5.73 million of irregular annual total payments)
Welfare pension, plus child allowance (1)	9.15% (on a maximum of JPY 620,000 of wages per month)	9.15% (on a maximum of JPY 1.5 million of irregular payments per month)
Employment insurance	0.90%	0.90%
Total (2)	14.921%	14.921%

Notes

1. The rate of 9.15% for welfare pension will be applied from September 2017. Premiums on child allowance will be imposed separately at 0.29%.
2. In addition, workers' accident compensation insurance will be imposed. The rate varies depending on the type of business.

Family corporation tax

If an individual shareholder together with family members own, either directly or indirectly, more than 50% of the total issued shares or voting rights of a Japanese corporation, the corporation is treated as a family corporation (with the exception of corporations with paid-in capital of JPY 100 million or less) and is subject to the family corporation tax in addition to corporation tax.

A family corporation is liable for an additional tax at the rates shown below on its undistributed current earnings in excess of specified limits.

Taxable undistributed current earnings	Family corporation tax rate (%)
First JPY 30 million *per annum*	10
Next JPY 70 million *per annum*	15
Over JPY 100 million *per annum*	20

Business premises tax

Business premises tax is levied and designated by each city in Japan, such as Tokyo, Osaka, Nagoya, Fukuoka, and other cities with a population of more than 300,000. A company that uses business premises in excess of 1,000 square metres and/or has more than 100 employees in a designated city is responsible to pay this tax based on the usage of the business (JPY 600 per square metre) and gross payroll (0.25% of gross payroll).

Branch income

Branch profits are taxed in the same manner as corporate profits. However, the family corporation tax does not apply to a branch of a foreign corporation. In addition, no withholding tax (WHT) is imposed on the repatriation of branch profits to the home office.

Income determination

The taxable income of a corporation is the aggregate income from all sources. There is no specific requirement to differentiate between the types of income. In principle, accounting for tax purposes follows Generally Accepted Accounting Principles (GAAP) in Japan, and income of a corporation is determined on an accrual basis.

Inventory valuation

Inventory cost should be determined by applying one of the following methods accepted for corporate tax purposes: actual individual cost, first in first out (FIFO), weighted average, moving average, most recent retail, selling price reduction, and lower of cost or market.

Capital gains

Capital gains and losses are classified as ordinary income and losses, respectively.

Under certain circumstances (e.g. qualified reinvestment, exchange property), taxes generally levied on capital gains may be deferred (i.e. provided rollover relief) as long as certain requirements are met. A special relief is available in the case of expropriation of real property by either the national or local government.

The recognition of capital gains or losses from the transfer of certain assets between group companies are to be deferred until the asset is transferred to another group company or a non-group company.

Dividend income

The threshold ownership percentage for corporate dividend exclusion is illustrated in the following table.

The holding period of six months or more until the fiscal year-end for which the dividend will be paid is required to apply the dividend income exclusion for the ownership of more than 1/3 to 100%. The dividend income exclusion for an 'other domestic corporation' and 'portfolio investment' is allowed by reference to the ownership percentage as of the fiscal year-end for which the dividend will be paid.

Type of investment	Ownership %	Exclusion %
Wholly owned domestic subsidiary	100%	100%
Affiliated domestic corporation	More than 1/3	100% less allocable interest (1)
Other domestic corporation	More than 5% but less than 1/3	50%
Portfolio investment	Less than 5%	20% (2)
Exchange trust fund (ETF)		20% (treated as a portfolio investment)
Other investment trusts		0%

Notes

1. Under certain simplified calculations to determine allocable interest, the 'base period' is the fiscal years beginning between 1 April 2015 and 31 March 2017.
2. For dividends from portfolio investments received by insurance companies, the exclusion percentage will be 40%.

95% of dividends received by a company from a foreign company in which it has held at least 25% of the outstanding shares for a continuous period of six months or more, ending on the date on which the dividend is declared, can be excluded from the company's taxable income.

If the foreign company is resident in a country with which Japan has concluded a tax treaty for the avoidance of double taxation, and such treaty provides for the allowance of an indirect foreign tax credit for taxes paid by the foreign company on the profits out of which the dividend is paid where the company holds a certain percentage of the foreign company's outstanding shares (e.g. 10% based on the tax treaty between the United States [US] and Japan), that percentage will apply for the purpose of determining the availability of the above exemption to the extent that it is lower than 25%.

The BEPS Action Plan 2 proposed that measures be taken to neutralise the tax effects of so-called 'hybrid mismatch' arrangements where, because of differences in the treatment of certain payments between jurisdictions, an item of income is not taxed in either the payer or the payee country because the payment is deductible in the payer country but not taxable in the recipient country. Thus, the recommendation in the BEPS Action Plan is to modify local tax law in order for the recipient country to tax the receipt.

Before the 2015 amendment, any dividends received by a Japanese corporation from a foreign affiliate was 95% exempt from taxation in Japan regardless of the tax treatment in the payer country. This position was clarified in question and answer (Q&A) guidance issued by the National Tax Agency. Based upon the recommendation of the BEPS Action Plan 2, the 2015 Tax Reform Act excludes such types of dividends from the dividend exclusion regime. As a result, any dividends paid to Japanese corporate taxpayers under so-called 'mandatorily redeemable preferred shares' (MRPS) issued by Australian affiliates or by Brazilian affiliates where the dividends are paid in a manner similar to interest and deductible for Brazilian tax purposes will no longer be excluded from taxation in Japan.

To the extent any portion of the dividend is deductible for foreign tax purposes, the general principle is that all of the dividend should be taxable in Japan. However, if a portion of the dividend is not tax deductible in the foreign jurisdiction, dividend exclusion will be allowed only if the taxpayer discloses all of the appropriate information regarding the portion of the dividend that is not deductible in the foreign jurisdiction and backup details for the calculation in a timely filed tax return and maintains the relevant documents for inspection by the tax authorities.

Any foreign tax imposed on the taxable dividend in Japan will be eligible for foreign tax credit relief.

The new rules apply for any dividends received by a Japanese corporate taxpayer whose fiscal year began on or after 1 April 2016. However, if the Japanese corporate taxpayer owned the stock of the foreign affiliate as of 1 April 2016, dividends received for years beginning between 1 April 2016 and 31 March 2018 are subject to the old rules (i.e. still eligible for exclusion).

The WHT for dividends is applicable at a rate of 15% national tax and 5% local tax or 20% (national tax) depending on the type of stock from which the dividends were received, and a tax credit may also be available for such WHT. The WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

Interest income

Interest received is included in taxable income. If interest is subject to the foreign WHT, a foreign tax credit may be available for such WHT. The WHT for interest is applicable at a rate of 15% national tax and 5% local tax for interest paid to a non-resident. As with dividend income, the WHT (national tax) is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037. Note that under the 2013 Tax Reform, only national tax will be withheld at source for interest income received on or after 1 January 2016 by a corporate recipient.

Royalty income

Royalty received is included in taxable income. If royalty is subject to the foreign WHT, a foreign tax credit may be available for such WHT. The WHT is applicable at a rate of 20% national tax for royalty paid to a non-resident.

Foreign income

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly. *See Foreign tax credit in the Tax credits and incentives section for more information*.

Undistributed profits of a foreign subsidiary (i.e. controlled foreign company [CFC]) to which an applicable tax rate is 30% (in case of a shell company) or 20% are included in the Japanese parent company's taxable income under certain conditions. *See Anti-tax haven (CFC) rules in the Group taxation section for more information*.

Deductions

Depreciation and amortisation

Depreciation is deductible in the calculation of taxable income for corporation tax purposes. Depreciable assets include tangible property (e.g. buildings, attachments to buildings, structures, machinery and equipment). Certain intangible assets are also eligible for amortisation (e.g. goodwill, patents, trademarks).

With regard to depreciation methods, a taxpayer may adopt one of the allowable methods for each of the type of depreciable property, except for buildings and structures and attachments to buildings. For selected structural improvements acquired on or after 1 April 2016, only the straight-line method will be permitted (i.e. the declining-balance accelerated depreciation method will no longer be allowed). Tangible property is generally depreciated using either the straight-line method or the declining-balance method. Intangible property is generally amortised under the straight-line method.

Useful lives for assets are set forth on the table in detail. For reference, the following is the brief table of useful lives for typical assets.

Types of assets	Useful lives (years)
Concrete buildings	21 to 50 (depending on uses)
Metal building	12 to 38 (depending on uses)
Electrical facilities and lighting	15
Heating and air conditioning	15
Motor vehicles	3 to 6 (depending on uses)
Personal computers	4
Digital telephone equipment	6
Machinery and equipment	3 to 22 (depending on uses)
Patents	8
Software	3 or 5 (depending on uses)

Start-up expenses

Start-up expenses, such as corporation organisation costs and opening costs (i.e. costs to begin business after the corporation is established), are treated as deferred assets and allowed to be amortised on a voluntary basis.

Interest expenses

Interest expenses on borrowing are deductible in the calculation of taxable income in principle. However, the interest payment to related parties in the corporate group may be disallowed to be deducted to some extent in certain cases. *See 'Thin capitalisation' and 'Interest expense deduction limitation' in the Group taxation section*.

Reserves

Reserves recorded in the books of accounts, except for reserves for doubtful receivables and return of goods not sold, are not deductible for corporate tax purposes.

Reserve for doubtful receivables

A reserve for doubtful receivables is available to SMEs, banks, insurance companies, and other similar financial corporations.

The deductibility of a reserve for doubtful receivables is limited by the following two components: (i) an estimate of irrecoverable amounts from a debtor and (ii) a calculation of the limit in the aggregate based on either the actual historical bad debt percentage or statutory percentage (reduced for large corporations), excluding the irrecoverable amount of receivable in (i) above.

Reserve for return of goods not sold

A deductible reserve for return of goods not sold is available to corporations such as publishers, wholesalers of books, and others, provided that the corporation sells the merchandise under an unconditional repurchase agreement.

Charitable contributions

Except for certain designated donations, the tax deduction for charitable contributions is limited to certain amounts, as follows:

Donation	Deduction limit
General donation	((0.25% of capital plus capital surplus) + (2.5% of income)) x 1/4

Donation	Deduction limit
Donation made to designated public purpose companies	((0.375% of capital plus capital surplus) + (6.25% of income)) x 1/2

Donations subject to this limitation include economic benefits considered to be given as a subsidy. Donations to foreign affiliates are not fully deductible.

In cases where a donation occurs between group companies (as defined), there will be no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee).

Directors' remuneration

The remuneration paid to directors is deductible only in the following four cases:

- Fixed monthly payments.
- Fixed payments (either cash amount or the number of shares or stock options) in accordance with an advance notice to the tax office.
- Performance bonuses, either in the form of cash, stocks, or stock options, paid in proportion to the company's earnings to directors who engage in the operation of the company's business, to the extent that certain requirements are met.
- Retirement compensation (where the amount is calculated by the service period but not on a performance basis).

If the amount of remuneration is deemed unreasonable by the tax authority, only the reasonable amount is deductible for tax purposes.

Entertainment expenses

In principle, entertainment expenses are not deductible for tax purposes. However, an SME, defined as a company with paid-in capital of JPY 100 million or less (except for a company wholly owned by a company that has paid-in capital of JPY 500 million or more after the group taxation regime is effective) may take a tax deduction up to the smaller of the actual disbursement for the entertainment expense or JPY 8 million. With regard to expenses for eating and drinking, a company may deduct such expenses as far as the expense does not exceed JPY 5,000 per person (excluding expenditures for internal purposes) for tax purposes.

Corporations are able to deduct 50% of the entertainment expenses for food and drink (excluding entertainment for internal purposes).

The above treatment is applicable to the fiscal years beginning before 31 March 2018.

Fines and penalties

Fines and penalties are not deductible.

Taxes

Enterprise tax and business premises tax are deductible in the calculation of the taxable income for corporation tax purposes on a cash basis. However, corporation tax and inhabitant's tax are not deductible. Fixed assets tax and other taxes are deductible, when assessed. Foreign income taxes also may be deductible if the Japanese corporation does not elect to claim a foreign tax credit.

Net operating losses

For corporation tax and enterprise tax purposes (indirectly for inhabitant's tax purposes), a tax loss can be carried forward to offset future income in the case that a taxpayer files a 'blue form' tax return (*see Tax returns in the Tax administration section*) or if the tax loss is incurred as a result of certain disaster events.

Based on the 2016 Tax Reform Act, changes in the limitation for the net operating loss deduction will be implemented over three years. Thereafter, the limitation will be reduced to 50%, although the limitation carryover period will be extended from the current nine years to ten years for losses incurred on or after years beginning on or after 1 April 2018. SMEs are not subject to the loss deduction limitation.

	Fiscal year 2015 (1)	Fiscal year 2016	Fiscal year 2017	Fiscal year 2018
Limitation ratio for large corporations	65%	60%	55%	50% (2)
Carryover period for loss utilisation as well as assessment by tax authorities and request for downward adjustment by taxpayer (assuming loss period financial documentation is maintained)	9 years	9 years	9 years	10 years (2)

Notes

1. For fiscal years beginning on or after 1 April 2015 and before 1 April 2016 in which the taxpayer claims a net operating loss deduction.
2. Applicable to tax losses incurred in fiscal years beginning on or after 1 April 2018.

Certain newly established corporations and companies coming out of a rehabilitation process will not be subject to the loss limitation rules for a certain period.

Type of corporation applicable	Years in which full deduction is allowable	Years where regular limitation applies even if full deduction otherwise allowable
Newly established corporations (1) and corporations coming out of the rehabilitation process (2)	Seven years from establishment of the corporation or seven years from the decision of the court to exit the rehabilitation process.	For years ending on or after (i) a company is listed on a stock exchange, or (ii) the company is deemed to be rehabilitated.

Notes

1. SMEs, 100% subsidiary of larger corporations, or 100% parent corporation after share transfer are excluded.
2. SMEs are excluded.

Where there is a change in ownership of a corporation followed by certain events, such as the cessation of business or a significant change in its business within a five-year period following a business acquisition, the utilisation of its tax loss is restricted.

Carryback of tax losses is generally available for one year for national corporation tax purposes. This carryback rule was suspended until the fiscal year ending 31 March 2018 (except in specified circumstances, e.g. year of liquidation).

No carryback of losses is allowed for enterprise tax and inhabitant's tax.

Payments to foreign affiliates

In order to support a deduction in Japan for expenses incurred by a foreign affiliate and charged to a Japanese corporation, in general, it should be demonstrated that the service arrangement between the foreign affiliate and the Japanese corporation satisfies arm's-length criteria for purposes of Japan's transfer pricing laws and regulations.

Generally, fees that are paid by a Japanese subsidiary to a foreign affiliate should be deductible for Japanese tax purposes if the following conditions are met:

- The services should have the same character as services that take place between non-related companies or such services are essential to Japan's activities.
- There is a written service agreement.
- The services were requested by the Japanese corporation.
- The rendering of services is documented with evidence (e.g. requests for services from the Japanese subsidiary, regular invoices sent by the foreign affiliate).
- The service charges are reasonable.

Group taxation

Consolidated tax regime

Under the consolidated tax regime, a consolidated group can report and pay national corporate income tax on a consolidated basis. A consolidated group may be formed by a Japanese parent company and its 100% owned (directly or indirectly) Japanese subsidiaries. The taxpayer may file an application to elect a consolidated group filing for tax purposes, but the election must include all of the parent's eligible subsidiaries. Once the election is made, the consolidated filing, in principle, cannot be revoked unless there is a specific event, such as an ownership change, that causes the qualifying conditions of a consolidated filing to fail or an application to discontinue the consolidated group has been approved by the Commissioner of the National Tax Agency (NTA).

The taxable income of the consolidated group is computed on a consolidated basis by aggregating the taxable income or losses of each member of the consolidated group followed by the consolidation adjustments. Profits from intra-group transactions, except for transfer of certain assets as defined, should be included in the aggregate taxable income. Gains or losses from the intra-group transfer of certain assets are deferred.

Pre-consolidation tax losses of a subsidiary can be carried forward into a consolidated tax group if certain conditions are met, but may only be offset against taxable income of the subsidiary for the calculation of consolidation income.

The consolidated national corporate income tax liability is determined by applying the corporate income tax rate to the consolidated taxable income and adjusted for consolidated tax credits. The total tax liabilities are allocated back to each member company. The parent company files the consolidated return and pays the national corporate income tax for the group; however, each member company remains jointly and severally liable for the consolidated group's total national corporate income tax liability.

Local corporate income taxes levied on member companies are paid on a separate company basis, but the amount of local tax payable may be affected because of the consolidated filing.

Group taxation regime

A group taxation regime is applicable to domestic companies that are wholly owned by a domestic company, foreign company, or individual ('group companies'). Unlike the consolidated tax regime, the group taxation regime automatically applies to group companies.

The key points of this regime are summarised as follows:

- The recognition of capital gains or losses from the transfer of certain assets (including the transfer of assets as a result of a non-qualified or taxable merger) between group companies is deferred until the asset is transferred to another group company or a non-group company. The scope of assets is the same as that under the tax consolidation system (i.e. fixed assets, land, securities, monetary receivables, and deferred expenses [excluding securities for trading purposes and assets with a book value of less than JPY 10 million]).
- Where a donation occurs between group companies, there are no tax implications for either the donor or donee (i.e. no deduction for the donor and no taxation for the donee). Note that this treatment is not applied to a group company owned by an individual. This is consistent with the treatment of a donation between members of a consolidated tax group.
- A dividend received from a group company can be fully excluded from taxable income without any reduction for allocable interest expense. This is consistent with the treatment of dividends between members of a consolidated tax group.

A group company that would otherwise qualify as an SME on a stand-alone basis is not eligible for SME benefits (e.g. reduced corporate tax rate, preferable allowable ratios for deductible portion of bad debt provisions, partial deductibility of entertainment expenses, carryback of tax losses) if the SME is owned by a parent company or two or more parent companies of the group that has paid-in capital of JPY 500 million or more.

Where a corporation that is a member of a 100% group is in the process of liquidation and is expected to be dissolved, any loss from the impairment or devaluation of the shares of the liquidating corporation cannot be recognised by the parent company as a tax deductible expense.

Transfer pricing

If a corporation that is subject to corporation tax sells property to or buys property from a foreign-related person, or provides services or conducts other transactions with a foreign-related person, and consideration is received or paid by the corporation, the transaction is required to be carried out at an arm's-length price for corporation tax purposes.

A foreign-related person is a foreign corporation that maintains certain special relationships with the subject corporation, such as parent-subsidiary, brother-sister, or substantial control relationship.

The arm's-length price for the sale or purchase of inventory may be determined using one of the following methods:

- Comparable uncontrolled price method.
- Resale price method.
- Cost plus method.
- Berry Ratio method.
- Other method (i.e. profit split method and transactional net margin method [TNMM]).

The 'most appropriate method' should be applied in order to calculate the arm's-length price.

An advanced pricing agreement (APA) system is available to confirm the arm's-length pricing system proposed by a taxpayer. In general, corporations entering into an APA are advised to file a request for mutual agreement procedures (MAP) in order to obtain the agreement of the competent authorities of each country.

In October 2015, the OECD released the final BEPS reporting package with Action 13 relating to transfer pricing and related documentation. Taking into consideration the compliance costs for taxpayers along with increased transparency, the 2016 Japan Tax Reform Act requires the following documentation in order to adhere with the BEPS project:

Document	Required information	Submission deadline	Applicability
Country-by-Country (CbC) Report	Country revenue, pre-tax income, taxes payable, etc.	Must be e-filed within one year of the last fiscal day of the ultimate parent	Applicable for fiscal year of the ultimate parent entity beginning on or after 1 April 2016
Master File	Group company structure, business outline, financial conditions, etc.	Must be e-filed within one year of the last fiscal day of the ultimate parent	Applicable for fiscal year of the ultimate parent entity beginning on or after 1 April 2016
Local File	Transfer pricing documentation	By due date of tax return, to retain for seven years	Applicable for corporate tax in fiscal years beginning on or after 1 April 2017

Thin capitalisation

Interest paid on debt to controlling foreign shareholders is disallowed to the extent the average balance of debt on which that interest is paid is more than three times the equity of controlling foreign shareholders.

Interest expense deduction limitation

The deductible portion of a corporation's net interest expense to a related party is restricted to 50% of the adjusted income. The net interest is calculated as interest expense to related parties less corresponding interest income. The adjusted income is defined as taxable income, adding back interest expense, depreciation expense, and exempted dividend income but excluding extraordinary income or loss.

Anti-tax haven (controlled foreign company or CFC) rules

Undistributed profits of a foreign subsidiary (i.e. CFC, which is defined as a foreign related corporation by [i] equity ownership test [owned more than 50% by Japanese corporations or residents] or [ii] de facto control test) to which an applicable tax rate is 30% (in case of a shell company) or 20% are included in the Japanese parent company's taxable income under certain conditions.

In the 2017 Tax Reform, major changes were made considering the BEPS recommendations to shift to a more of an income-based approach (although elements of the entity approach remain). After the amendments, income earned by a CFC is 'aggregated' (i.e. included within Japanese taxable income) in three different ways:

- Entity-based aggregation where all of the income of a CFC is taxable to a Japanese shareholder if (i) the main business of the foreign-controlled subsidiary is not 'active' (as defined) and (ii) the foreign tax rate is lower than a 20% 'trigger' rate.
- Entity-based aggregation where all of the income of a CFC is taxable to a Japanese shareholder if (i) the CFC fails certain 'substance' and 'administration and control' tests and is thereby treated as a 'paper company' or 'cash box company', and (ii) the foreign tax rate is lower than a 30% 'trigger' rate.
- Income-based aggregation where, even if the above entity-based aggregation rules do not create income inclusion on an entity basis, the relevant income of a CFC is taxable to a Japanese shareholder if (i) income of the CFC includes certain 'passive' categories of income and (ii) the foreign tax rate is lower than a 20% 'trigger' rate.

A Japanese corporation owning a 10% or more direct or indirect interest in a CFC is required to include its pro-rata share of the taxable retained earnings of the CFC in its gross income under certain circumstances.

A dividend paid by a CFC is not deductible when calculating its undistributed income.

The new rules apply for fiscal years of foreign subsidiaries starting on or after 1 April 2018.

Tax credits and incentives

Foreign tax credit

A Japanese corporation is subject to Japanese corporate income taxes on its worldwide income. However, to avoid double taxation of foreign-source income, Japanese corporations are allowed to claim a tax credit against corporation and inhabitant's taxes for foreign income taxes paid directly.

Creditable foreign taxes are defined as taxes that (i) are incurred directly by the taxpayer; (ii) are levied by foreign governments and local authorities in accordance with local tax laws; (iii) are levied on corporate income; and (iv) have the same characteristics as Japanese income tax, corporation tax, and local income-based taxes. A tax for which a refund can be claimed optionally by the taxpayer after the tax payment, or a tax whose payment grace period can be decided by the taxpayer, is not regarded as a foreign tax.

In order to prevent the credit from reducing corporation tax on Japan-source income, certain limitations are set on the amount of foreign taxes that can actually be credited. The ceiling is currently 35% for the foreign taxes paid.

A foreign tax credit is not applicable for enterprise tax purposes, although foreign branch income attributable to a business executed outside Japan is exempt from enterprise tax.

Generally speaking, the foreign tax credit system does not apply to the extent the dividend income from the foreign subsidiary is subject to the dividend exemption system.

Foreign corporations with a PE in Japan should note that when a foreign corporation's PE in Japan is subject to taxation in Japan as well as in jurisdictions other than its country of residence, double taxation may arise. To alleviate an unfair tax burden, a foreign tax credit regime is also applicable to PEs in Japan similar to that which applies to Japanese corporations. However, foreign tax (including WHT) paid in the enterprise's country of residency would not, in principle, be creditable under consequential changes to the foreign tax credit regime.

Tax credit for research and development (R&D) cost

Pursuant to the 2015 Tax Reform, the R&D tax credit system was amended whereby the credit limit was increased and the 'Open Innovation' type R&D credit was expanded. The 2017 Tax Reform was built on these changes as follows:

- The credit rates will increase in line with an increase of R&D expenditures.
- R&D expenditures to develop certain kinds of new service-type businesses will be brought within the scope of the R&D tax credit in order to support the development of new business opportunities from the 'Internet of Things' (IoT), 'Big Data', artificial intelligence (AI), etc.
- Conditions for claiming the 'Open Innovation' type of R&D credit will be relaxed.

The amendments apply for tax years beginning on or after 1 April 2017.

Salary increase tax credits

Under the 2018 Tax Act, the salary increase tax credits are amended for large corporations so that only those corporations increasing domestic investment would be eligible for the credits. The salary increase tax credits will be available for corporations filing 'blue form' tax returns that meet the conditions described below. The revised salary increase tax credit rules will be applicable for fiscal years beginning on or after 1 April 2018 until 31 March 2021.

		Before the amendments	After the amendments
Conditions	1	(Increased salary payment / Salary payment to employees in base year) ≥ 5%	Abolished
	2	Salary payment in the current fiscal year ≥ Salary payment in the preceding fiscal year	Salary payment in the current fiscal year ≥ Salary payment in the preceding fiscal year
	3	(Average salary payment in the current fiscal year – Average salary payment in the preceding fiscal year) / Average salary payment in the preceding fiscal year ≥ 2%	(Average salary payment in the current fiscal year – Average salary payment in the preceding fiscal year) / Average salary payment in the preceding fiscal year ≥ 3%
	4	N/A	Domestic capital expenditure ≥ 90% x Total depreciation
Tax credit		10% of the increased salary payment + 2% of the salary payment made in the preceding year	15% of increased salary payment (20% if training costs have increased by 20% or more)
Limitation on tax credit		Up to 10% of the corporate tax liability	Up to 20% of the corporate tax liability

Internet of Things (IoT) investment tax incentive

A tax incentive (either accelerated depreciation or tax credit) for costs related to the development of certain data gathering and analytic information systems under the Special Measures Act for the Improvement of Productivity (Productivity Act) is available to companies that file blue form tax returns and have obtained approval of an 'innovative data utilization plan'. Companies will be eligible for either accelerated depreciation (30%) or tax credit (3% or 5%) if they have acquired software as well as machinery or equipment worth JPY 50 million or more pursuant to the approved plan. The IoT investment tax incentive will be applicable from the effective date of the Productivity Act (6 June 2018) until 31 March 2021.

The amount of tax credit available will be higher for companies that satisfy a 'salary increase condition' (i.e. the average salary for employees of the company is increased for the year by more than 3%).

Special tax treatment for investment in certain equipment

SMEs filing 'blue form' tax returns may elect, under certain conditions, to claim accelerated depreciation of 100% of the base acquisition cost or a special tax credit equivalent to 10% of the base acquisition cost on designated equipment to the extent that it is acquired between 1 April 2014 and 31 March 2019. The maximum tax credit is limited to 20% of the taxpayers' corporate tax liability.

The 'Incentive for New Investment into Production Facilities' is applicable to any industry that invests in new production facilities (30% special depreciation or 3% tax credit on acquisition cost, up to 20% of corporate tax liability, etc., and subject to certain conditions). In addition, an investment incentive applies to SMEs that invest in equipment and furnishings pursuant to certain facility remodelling (30% special depreciation or 7% tax credit on acquisition cost, up to 20% of corporate tax liability [one-year carryforward of any excess], and subject to certain conditions). The SME tax incentive is granted to an SME engaged in the distribution, retailing, service, and/or agriculture business. This incentive is effective for tax years beginning on or after 1 April 2013 through 31 March 2019.

Incentive for venture capital investment

To assist venture capital investment, certain procedures to accredit venture capital partnerships were legislated in the Industrial Competitiveness Enhancement Law. Investment tax incentives were also introduced to allow corporate investors the ability to take a loss from a venture capital investment on an accelerated basis compared to current rules. A qualified investor is allowed to deduct a tax reserve for the investment loss at up to 50% of the book value of the investment. This incentive is effective for investors into a qualified partnership designated on or before 31 March 2019.

Incentives for the revitalisation of local 'hubs'

A taxpayer is eligible for certain tax incentives if it relates to or expands certain kinds of operations in local areas (generally other than Tokyo, Osaka, or Nagoya). Details as to the kinds of operations eligible will be included in a future Revised Regional Revitalization Law.

Any qualifying investments have the following depreciation incentives with respect to investments in buildings:

Depreciation incentives	Investment pursuant to an approved relocation plan	Investment pursuant to expanding an existing operation
Type of depreciation (if plan is approved prior to 31 March 2020 and asset is acquired within two years of approval).	Additional first year depreciation of 25% of the acquisition cost (depreciation is accelerated).	Additional first year depreciation of 15% of the acquisition cost (depreciation is accelerated).

Alternatively, a taxpayer may choose to take a tax credit rather than accelerated depreciation, as follows:

Tax credits	Investment pursuant to an approved relocation plan	Investment pursuant to expanding an existing operation
Tax credits (if plan is approved prior to 31 March 2020 and asset is acquired within two years of approval)	Acquisition costs x 7%	Acquisition costs x 4%

Minimum investment is JPY 20 million for large corporations and JPY 10 million for SMEs.

Alternate to the investment incentive above, an employment-related tax credit is allowed for increased employment in a local hub if hired within two years of the plan approval. The credit shall be JPY 500,000 times the number of increased employees at a maximum (if certain conditions are not met, the credit becomes JPY 200,000 per employee).

In either tax incentive, the amount of the above tax credits can only offset up to 20% of a corporation's tax liability.

Local government contributions

As part of the Regional Revitalization Act, 'blue form' corporate tax filers who make donations to approved regional donation plans up until 31 March 2020 will be able to claim a tax credit against corporate, enterprise, and inhabitant's taxes in addition to taking a deduction from the corporate tax. This is known as the corporate hometown tax, or *furusato nozei* system.

National strategic zones

For a 'blue form' filing corporation with an approved plan for qualified investment in a National Strategic Special Area up until 31 March 2020, a deduction of 20% of income is available for five years from the date of establishment.

Withholding taxes

Tax treaty network

As of 1 June 2018, Japan has entered into 70 tax treaties with 123 countries and/or regions. Companies making certain payments are required to withhold income taxes using the following rates.

	WHT (%)			
	Dividends			
Recipient	Portfolio (3)	Substantial holdings (1)	Interest	Royalties (2)

Notes

1. The tax treaty rates apply only to corporate shareholders. The applicable treaty should be checked for conditions required to claim the reduced rate. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
2. The applicable treaty should be reviewed because certain tax treaties exclude film royalties and/or gain from copyright transfer from taxable income. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
3. 15% for publicly traded shares (for non-resident individual, only applicable to minority interest [less than 3% ownership]) and investment trusts. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
4. Interest on bank deposits and/or certain designated financial instruments is subject to a 15% national WHT and 5% local inhabitants WHT (20% combined). Taxation of such interest is fully realised by tax withholding, so resident individuals are not required to aggregate such interest income with other income. Interest on loans made by resident individuals is not subject to WHT; instead, it is taxed in the

aggregate with other income. Such WHT is subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.

5. Dividends, interest, and royalties earned by non-resident individuals and/or foreign corporations are subject to a 20% national WHT under Japanese domestic tax laws in principle. An exceptional rate of 15% is applied to interest on bank deposits and certain designated financial instruments. Interest on loans, however, is taxed at a 20% rate. A special exemption from WHT applies to certain long-term corporate bonds issued to non-residents in foreign countries. Note that WHT may be subject to the income surtax of 2.1%, which is levied for the income earned for the period from 1 January 2013 through 31 December 2037.
6. Tax treaties with many countries provide reduced tax rates, as indicated. Some treaties, however, provide higher tax rates (e.g. Brazil, Thailand) or do not provide rates (e.g. Egypt, New Zealand). In these instances, rates specified under Japanese domestic tax laws apply. Each treaty should be consulted to see if a reduced rate for dividends (in the case of substantial holdings) is applicable.
7. The tax treaty was concluded mainly for the purpose of information exchange.
8. The tax treaty with Brazil provides a 25% tax rate for certain royalties (trademark). However, the WHT rate cannot exceed 20.42% (including the income surtax of 2.1%) on any royalties to be received by a non-resident taxpayer of Japan under Japanese income tax law. Film royalties are taxed at 15%. Any other royalties are taxed at 12.5%.
9. The treaty with the former Czechoslovakia is applied to the Czech Republic and the Slovak Republic. It stipulates that cultural royalties are tax exempt.
10. In the tax treaty, no rate on interest is specified, therefore Japanese domestic rate is applied. Film royalties are taxed at 20%, and other royalties are taxed at 15%.
11. Cultural royalties are tax exempt.
12. The rate of 10% for royalties includes consideration for technical services.
13. The rate for royalties is reduced from 10% to 5% by Protocol.
14. Dividends received from subsidiaries, by parent companies that have met certain conditions, are exempt from WHT. Interest received by government and other specific entities is exempt. Interest received by banks, financial institutions, or paid as a consequence of sale on credit of any equipment is subject to 10% WHT. Any other interest is taxed at 15%.
15. Dividends received from subsidiaries for which the parent company has 50% or more shareholding are tax exempt. Interest received by government and other specific entities, or paid as a consequence of sale on credit of any equipment, merchandise, or service, is tax exempt.
16. A 5% rate is applied to a company that has 50% or more shares with direct voting rights, and a rate of 7.5% is applied to a company that has 25% or more shares with direct voting rights.
17. Film royalties are taxed at 15%. Any other royalties are taxed at 10%.
18. Cultural royalties are taxed at 10%.
19. Royalties paid for the use of certain equipment are taxed at 5%.
20. Interest paid to financial institutions is tax exempt, as well as film and copyright royalties. Patent royalties are subject to a 10% rate.
21. If certain conditions for beneficial owners are met, dividends are taxable only in the contracting state of which the beneficial owner is a resident.
22. Dividends paid by a corporation that is engaged in industrial undertakings are taxed at 15%. Interest paid to financial institutions is taxed at 10%.
23. Interest paid to financial institutions is taxed at 10%.
24. The treaty with the former USSR is applied to Armenia, Azerbaijan, Belarus, Georgia, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. It stipulates that cultural royalties are tax exempt.
25. The new treaty was signed but has not yet become effective.
26. The treaty will apply with respect to taxes levied on the basis of a taxable year for taxes for any taxable years beginning on or after 1 January 2018 and with respect to taxes not levied on the basis of a taxable year for taxes levied on or after 1 January 2018.
27. Exempted when paid and beneficially owned by enterprises, etc; 10% for others.
28. Exempted when paid by a company of Japan, holding at least 10% of voting power for six months, or beneficially owned by pension funds; 15% for others.
29. Exempted when received by governments, etc.; 10% for others.
30. Exempted when paid by a company of Japan, holding at least 15% (direct or indirect) or 25% (direct) shares for six months; 5% for holding at least 10% (direct or indirect) shares for six months.
31. Exempted when holding at least 25% for 18 months; 5% when holding at least 10% for six months; 15% for others.
32. Exempted when holding at least 25% of voting shares for six months or beneficially owned by pension funds; 5% when holding at least 10% of voting shares for six months; 15% for others.
33. Exempted when received by governments, etc.; 10% for others.
34. Exempted when received by governments, etc.; 5% when received by banks; 10% for others.
35. Exempted when received by governments, financial institutions, etc.; 10% for others.
36. Exempted when received by governments or central bank, 10% for others.
37. Exempted when received by governments, etc.; 5% for others.
38. Exempted when received by governments, etc., 10% for others.
39. Exempted when received by beneficially owned by pension funds; 5% when holding at least 15% of voting power for 365 days; 15% when shares deriving at least 50% of their value from immovable property; 10% for others.
40. Exempted when holding more than 50% of voting shares for 12 months or beneficially owned by pension funds; 5% when holding at least 10% of voting shares; 10% for others.

41. Exempted when received by governments or financial institutions; 10% for others.

Tax administration

Taxable period

The tax year is the corporation's annual accounting period specified in its articles of incorporation. A Japan branch of a foreign corporation must use the same accounting period that is adopted by the corporation in its home country.

Tax returns

Corporate income tax returns (i.e. the national corporation tax return, enterprise tax return, and local inhabitants' tax return) are self-assessment tax returns.

If a corporation meets certain conditions, such as keeping certain accounting books, and makes an application for it in advance, it is allowed to file a 'blue form' tax return. A 'blue form' filing corporation may benefit from loss carryforward and other benefits.

A corporation (including a branch) is required to file the final tax return within two months after the end of its annual accounting period. If a corporation cannot file the final return because of specific reasons, the due date of the final return may be extended by up to four months (a corporation should be a company subject to the statutory financial audit as required in the corporate law) with the tax authority's approval.

Payment of tax

Income taxes payable on the final corporate income tax return should be paid on or before the filing due date of the final tax returns (usually two months after the end of the corporation's accounting period). If an extension of time for filing is granted, the taxes may be paid on or before the extended due date with interest accrued at a rate of 1.8% (for the year 2018) *per annum* for the period from the day following the original due date (i.e. two months after the end of an accounting period) to the date of the actual payment.

Provisional tax payments are required for a corporation that has a fiscal period longer than six months. Provisional taxes generally are computed as one-half of the tax liabilities for the previous year, but they may be reduced by the filing of interim tax returns that reflect semi-annual results of the operations. The provisional tax payment is required to be made within two months after the end of the sixth month of the corporation's accounting period.

Penalties

If the tax return is filed late, a late filing penalty is imposed at 15% to 20% of the tax balance due. In the case that a corporation voluntarily files the tax return after the due date, this penalty may be reduced to 5%. The rate is increased to 15% (for non-filing) and 10% (for amendment filing) once the tax audit notice is received.

An under-payment penalty is imposed at 10% to 15% of additional tax due. In the case that a corporation amends a tax return and tax liabilities voluntarily after the due date, this penalty may not be levied.

In addition, interest for the late payment of tax is levied at 2.6% *per annum* for the first two months and increases to 8.9% *per annum* thereafter (for the year 2018).

Consolidated taxation

The parent company will file the consolidated tax return and pay national corporate income tax for the group. The consolidated tax return and payment due dates are the same as previously discussed; however, the due date of the final return may be extended for two months.

For local corporate income taxes, each member of the consolidated group must separately file the returns and pay the taxes.

Tax audit process

Generally speaking, corporate tax audit is performed in cycles of three to five years' duration. However, this period may be shortened in the case that some significant tax matters were pointed out in the prior audit and so on. If taxpayers request a downward correction, a tax audit will be performed to make sure of it.

With regard to tax audit procedures, tax laws have not clarified them thus far. Prior to conducting a tax audit, in principle, tax agents are required to notify taxpayers, and, upon completion of tax audits, tax agents are required to provide to taxpayers a brief written summary of their findings, etc.

Once an audit is complete, the basic principle is that a second audit is not allowed. However, if newly acquired information is obtained by the tax authorities that lead them to conclude that the reported taxable income should have been different, then the tax authorities can conduct another audit of the taxpayer. This limitation on the ability of the tax authorities to conduct a second audit only applies if the first audit was conducted on-site. If a 'desk audit' is only conducted, where the tax authorities do not conduct the audit on-site, no limitation applies.

Statute of limitations

The statute of limitations to request a downward correction of prior year tax liabilities is five years (six years for transfer pricing) from when the original tax return was filed.

The statute of limitations with regard to upward corrections by the tax authorities is also five years (six years for transfer pricing).

Topics of focus for tax authorities

Tax authorities are often focusing on cross-border, inter-company transactions (i.e. transfer pricing or donation issues), PE, and significant group restructuring, among other issues. Any developments in discussion on the G20/OECD BEPS project will also be of great interest for Japanese authorities.

Other issues

Requirement for banks to collect and remit information regarding bank accounts owned by non-residents

A tax reporting system is applicable under which individuals are required to report information to the relevant branch of the financial institution, which will, in turn, submit such information to the tax authorities in Japan.

The person who contracts with the financial institution for a deposit to a bank account in Japan on or after 1 January 2017 is required to report the relevant information to the bank, including (i) name, (ii) address, (iii) date of birth, and (iv) resident country. If the resident country is outside Japan, the individual is required to report the taxpayer identification number in the taxpayer's resident country. The financial institution is required to report the individual information collected as well as details regarding the account (balances, transactions, etc.) as of 31 December by the following 30 April.

Corporate tax measures for reorganisations

Corporate spin-offs

Corporate demerger

Before the 2017 Tax Reform, a corporate demerger by a corporation with many shareholders where the shares in the new company are given to the shareholders does not qualify as a tax qualified demerger. These rules are relaxed under the 2017 Tax Reform Act whereby a spin-off of a specific business by a corporation without a controlling shareholder becomes tax qualified under certain conditions.

Distribution in kind

Before the 2017 Tax Reform, a distribution in kind by a corporation with many shareholders is not tax qualified. Under the 2017 Tax Reform Act, a spin-off conducted as a distribution in kind of shares in a 100% subsidiary becomes tax qualified under certain conditions.

Minority shareholder squeeze-outs

Under the 2017 Tax Reform Act, creating a 100% subsidiary through a squeeze out process using shares with compulsory acquisition rights, share consolidation, and a request to sell back shares, is considered a type of corporate reorganisation. As part of bringing such squeeze outs within the corporate reorganisation framework, special measures will be introduced, including mark-to-market rules and the special rules on consolidated taxation.

In a merger or share-for-share transfer, if the merging corporation or the 100% parent corporation owns 2/3 or more of the merged corporation or the 100% subsidiary, consideration other than shares can be provided to minority shareholders without disqualifying the corporate reorganisation.

Significant developments

With effect from 1 January 2018, the definition of a financial services company has been extended, and large corporate retailers have been brought into scope of the standard 20% income tax rate. *For more details, please refer to the Taxes on corporate income section.*

Taxes on corporate income

Resident companies are generally taxed on their worldwide income. A permanent establishment (PE), e.g. a branch of a company, is taxed on profits attributable to the PE. Non-resident companies are taxable on Jersey real estate income.

Companies pay income tax at a rate of 0%, 10%, or 20% on taxable income. The general rate applicable is 0%; the 10% and 20% rates apply to certain companies/ income streams as explained in this section. The tax rate applies to the company as a whole, the only exception being Jersey-source real property income, which is taxed at 20% regardless of the classification of the real property holding company.

Certain Collective Investment Funds and Securitisation Vehicles can elect to be exempt from tax on income, other than income from Jersey land or property, for an annual fee of 500 British pounds sterling (GBP).

The 20% tax rate applies to Jersey-based utility companies, such as telephone, gas, and electricity companies. Additionally, income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities) is subject to tax at 20%. Companies involved in oil importation and supply are also taxed at 20%.

The 10% rate applies to financial services companies. A company is defined as a financial services company if:

- it is registered under the 1998 financial services law to carry out investment business, trust company business, or fund services business as an administrator or custodian in relation to an unclassified or an unregulated fund
- it is registered under the 1991 banking business law, or
- it holds a permit under the collective investment funds law of 1988 as an administrator or custodian.

As of 1 January 2018, the definition of a financial services company is extended to include:

- Companies registered under the Financial Services (Jersey) Law 1998 to carry out general insurance mediation business.
- Companies registered with the Jersey Financial Services Commission as a registrar.
- Companies holding permits under the Insurance Business (Jersey) Law 1996.
- 'Finance companies', i.e. companies trading in the provision of credit/finance to customers. Finance companies excludes inter-group finance companies.

Large corporate retailers have been brought into scope of the standard 20% income tax rate with effect from 1 January 2018. A 'large corporate retailer' is a company that meets the following tests:

- 60% of its trading turnover is from retail sales to customers in Jersey, and
- retail sales to customers in Jersey are equal to or greater than GBP 2 million *per annum*.

'Retail sales' will not include wholesale supplies or the provision of services.

Where the taxable profits of a 'large corporate retailer' are less than GBP 500,000 *per annum*, the company is subject to tax at 0% on all of its profits.

Where the taxable profits of a 'large corporate retailer' are GBP 750,000 or more *per annum*, the company is subject to tax at 20% on all of its profits.

Where the taxable profits of a 'large corporate retailer' are more than GBP 500,000 but less than GBP 750,000 *per annum*, a tapering provision will apply. The effect of the tapering provision for 'large corporate retailers' with taxable profits of between GBP 500,000 and GBP 750,000 *per annum* is to reduce the effective rate of tax on a sliding scale from 0% up to 20%.

The 0% rate applies to all entities that are not exempt, financial services entities, large corporate retailers, or utility companies, including fund managers who do not hold any of the permits mentioned above.

Local income taxes

There are no parish or local government taxes on income.

Corporate residence

A company is regarded as tax resident in Jersey if it is incorporated in Jersey or if it has its place of central management and control in Jersey. However, a Jersey incorporated company that is managed and controlled elsewhere will not be regarded as a Jersey resident, provided certain conditions are satisfied.

Permanent establishment (PE)

Under domestic legislation, a PE, in relation to a company, includes a branch of the company, a factory, shop, workshop, quarry, or a building site, and a place of management of the company; however, the fact that the directors of a company regularly meet in Jersey shall not, of itself, make their meeting place a PE.

For a definition of PE contained in Jersey's double tax agreements (DTAs), the relevant clause and agreement should be reviewed. In general, it may include a branch, management, or other fixed place of business, but not an agency, unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts or has a stock of merchandise from which the agent regularly fills orders.

Other taxes

Goods and services tax (GST)

The standard rate of GST is 5%.

Companies with taxable supplies of more than GBP 300,000 *per annum* are required to register for GST.

International service entity (ISE) status

To address the difficulty of irrecoverable input tax in the financial services sector, and to mitigate the administrative cost of GST for exporters in general, Jersey has introduced the concept of an ISE. Where an entity qualifies for this status:

- it will not be required to register for GST
- services to it will be zero-rated (i.e. treated as an export) where the supply exceeds GBP 1,000, and
- input tax on purchases of less than GBP 1,000 may be reclaimed.

ISE status is automatically available to a wide variety of service providers and administered entities based in Jersey, upon application and payment of the relevant fee, including licensed banks, licensed trust service providers, licensed fund administrators, fund managers, and managed managers.

Other entities not automatically eligible under one of the categories above, including companies, partnerships, trusts, unrecognised funds, and special purpose vehicles, may still obtain ISE status if they fulfil certain criteria.

The ISE may, at the election of the company, be included on a list maintained by the Comptroller of Taxes. The list will refer either to the entity itself or (e.g. for administered entities) a class of entities as submitted by the administrator.

Customs duties

A common customs tariff is applicable on all goods imported from outside the European Union (EU). The amount is dependent on what the goods are and where they are imported from.

Excise taxes

An excise duty tax is payable on imported items, such as alcohol, tobacco, and fuel, at varying rates.

Property taxes

There are no property taxes in Jersey apart from income tax on Jersey-source property income, stamp duty on Jersey real estate, and rates levied by each parish.

Stamp duty

Stamp duty is payable on the purchase or transfer of Jersey real estate, with rates ranging from 0% to 8%. Mortgages secured by a charge over Jersey real estate are subject to stamp duty at rates of up to 0.5% of the amount borrowed. No stamp duty is payable on the transfer of shares.

Land transaction tax

A land transaction tax applies when shares in companies are transferred and the ownership of which confers a right of occupation of residential real estate in Jersey. The amount of land transaction tax payable is equal to the stamp duty that would have been suffered if the real estate were held directly.

Payroll taxes

Employers are required to deduct tax from salaries paid to employees and remit this to the tax authority to settle the employees' tax liability. Under the Income Tax Instalment System (ITIS), the tax authority issues each employee with an effective rate notice to pass to their employer indicating the deduction rate. If no such notice is provided, the default rate of deduction applied is 20%.

Social security contributions

Employers are responsible for paying employer social security contributions at a rate of 6.5% on each employee's gross earnings, up to the monthly standard earnings limit of GBP 4,290 for 2018 (annual limit GBP 51,480). Employer social security contributions of 2% apply to employees' earnings above the standard earnings limit, up to an upper earnings limit (GBP 14,188 monthly/GBP 170,256 annually).

A long-term care fund has been set up to help those who need long-term care.

Income taxpayers pay into this fund with a long-term care contribution. Those not liable for income tax do not have to pay the contribution.

The maximum long-term care contribution rate was 1% in 2017 and is 1% in 2018 of total income (taking into account allowances and reliefs), but it's likely that one's rate will be less than the maximum.

Long-term care contributions are capped at 1% of the upper earnings limit for 2018 (GBP 1,702.56).

Branch income

Branch income is taxed at the rate applicable to the company. No further tax is withheld on the transfer of profits abroad.

Income determination

Inventory valuation

Inventory is valued at the lower of historical cost or net realisable value. The last in first out (LIFO) method is not permitted. Generally, there are no material differences between accounts prepared on a normal accounting basis and those prepared on a tax basis.

Capital gains

Capital gains are not subject to tax in Jersey.

Dividend income

Any dividends received will be dealt with under the Income Tax Law, as amended.

Under the current rules, a financial services company receiving a dividend from which tax has been deducted by another Jersey company is entitled to a tax credit. The calculation of the tax credit available to a financial services company under these circumstances has been amended so as to limit the credit to the lower of the tax deducted from the dividend or the gross dividend at the rate of 10%.

Where a Jersey company is in receipt of a dividend that is paid out of capital profits from a non-resident company, it will be exempt from tax.

Stock dividends

Stock dividends are not taxed as income.

Interest income

Interest income forms part of taxable income and is taxed at the rate applicable to the company.

Royalty income

Royalty income forms part of taxable income and is taxed at the rate applicable to the company.

Rental income

Income from Jersey real estate, including rental income, property development profits, and income from exploiting Jersey land (e.g. quarrying activities), is subject to tax at 20%.

Foreign income

Income tax is levied on foreign branch income when earned and on foreign dividends, interest, rents, and royalties. Double taxation is mitigated by either the granting of unilateral relief to the extent of taxing foreign income net of foreign taxes or by treaty relief, which gives credit for foreign tax. Concessional credit relief might be granted in certain limited circumstances upon application.

Jersey currently has DTAs with Australia, Cyprus, Denmark, Estonia, Faroes, Finland, France, Germany, Greenland, Guernsey, Hong Kong, Iceland, Isle of Man, Luxembourg, Malta, New Zealand, Norway, Poland, Qatar, Rwanda, Seychelles, Singapore, Sweden, the United Arab Emirates, and the United Kingdom. The scope varies from agreement to agreement, but most are of limited scope.

Deductions

Normally, business deductions are allowed if they are incurred wholly and exclusively for trade purposes.

Depreciation and depletion

Capital allowances are available using the diminishing-balance method on machinery and equipment, including vehicles, at a rate of 25%. For this purpose, all such assets are pooled, and the allowance is calculated by reference to the value of the pool.

On disposal of an asset, the lower of cost and sale proceeds of the asset is deducted from the pool. A balancing charge is levied if the proceeds exceed the balance of the pool.

Motor vehicles over a certain value and greenhouses are subject to special rules and are not pooled with other assets.

By concession, an alternative is to claim the full cost of replacement in the year of replacement.

Capital allowances are not applicable to buildings or the depletion of natural resources.

Goodwill

Goodwill expenditure is non-deductible for Jersey income tax purposes.

Start-up expenses

Once a company has commenced its trade, start-up expenditure will be deductible for tax purposes if it is not capital in nature and has been incurred wholly and exclusively for trade purposes.

Interest expenses

Interest expense will be deductible if it is incurred for the purposes of a trade or is paid in connection with a loan taken out for a qualifying purpose. Interest relief may be restricted if the interest exceeds the amount that could reasonably be expected to be charged on a commercial basis.

Bad debts

Trading bad debts are normally deductible for Jersey income tax purposes unless they relate to a general provision.

Charitable contributions

Charitable contributions are generally non-deductible for tax purposes, unless the contribution itself provides a benefit to the trade (i.e. marketing).

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

Local income tax paid is not deductible in computing taxable income. ISE fees paid are a tax-deductible expense.

Net operating losses

No distinction is drawn between different types of income or losses arising from different trades or sources, apart from Jersey property income, which is separately streamed.

Unrelieved losses may be carried forward and used to offset profits in future accounting periods. Alternatively, losses can be group relieved to group companies in the same income tax rate band.

There are only very limited circumstances where a company can obtain relief for carrying back losses.

Where a company has sustained a loss, this loss can be carried forward indefinitely and can be set off against future profits in respect of the same trade.

Payments to foreign affiliates

There are no withholding taxes (WHTs) on patent royalties paid by Jersey companies to non-residents.

Group taxation

Group taxation is not permitted in Jersey. However, there are provisions for group relief between group companies subject to the same rate of tax. It is not possible to relieve losses between two companies taxed at different rates. It is not possible for group companies to relieve losses from Jersey property rental income. Also, it is only possible to relieve losses from Jersey property development profits and from quarrying activities against profits arising from the same activities.

Transfer pricing

There are no specific rules in relation to transfer pricing in Jersey. There is, however, a general anti-avoidance provision in Jersey tax law. It may be applied by the Comptroller of Taxes if a transaction or a combination or series of transactions is entered into for the avoidance or reduction of Jersey income tax. In addition, interest relief may be restricted where the interest incurred exceeds the amount that could reasonably be expected to be charged on a commercial basis.

Country-by-country (CbC) reporting regime

Jersey has formally committed to the Organisation for Economic Co-operation and Development (OECD) model of CbC reporting and has already put in place the relevant implementing regulations for entities with accounting periods commencing on or after 1 January 2016. In addition, Jersey has signed up to the Multilateral Competent Authority Agreement (MCAA) to assist with the sharing of relevant information in relation to CbC reporting, as well as broadly adopting the OECD's CbC reporting implementation package, to facilitate its implementation of this base erosion and profit shifting (BEPS) minimum standard.

Multinationals having global revenues of 750 million euros (EUR) or more are required to file annual reports to tax authorities at three levels. The first element (which taxpayers are generally required to provide for fiscal 2016) is a 'country-by-country report' that gives a detailed picture of business results for each country where the business operates (including things like number of employees, revenues, pre-tax profit, and taxes paid). Companies will also need to give an overall picture of their global business, aggregating data from all of the countries where one operates. In addition, companies will be required to report separately to each country where they operate with business and tax information about the local entities and operations in that country.

The disclosure of this business information will be accessible, through automatic information exchanges, to tax authorities wherever they have a presence (subject to certain conditions). Groups will need to consider how to explain their operational purpose of business arrangements, which may include tax advantages.

The deadline for submission of the CbC report to the Jersey tax authority is within 12 months of the end of the accounting period to which it relates.

Where there is no reporting obligation, there is a requirement to notify the Comptroller of Taxes of the name of the entity that is undertaking the reporting and to provide certain other information. An entity must notify the Comptroller by the last day of relevant accounting period if it is a constituent entity.

Thin capitalisation

There are no specific rules in relation to thin capitalisation in Jersey.

Controlled foreign companies (CFCs)

Jersey has no CFC legislation.

Tax credits and incentives

There are generally no special incentives for locally owned businesses in view of the low rate of tax.

Foreign tax credit

There is no local foreign tax credit regime in Jersey. DTAs need to be considered as appropriate. Unilateral relief may be available under very limited specific circumstances.

Withholding taxes

There are no WHTs on dividends, interest, or royalties paid by Jersey companies to non-residents.

Tax administration

Taxable period

The tax year is the calendar year. Companies are assessed on income earned in respect of the financial year that ends within the applicable calendar year of assessment.

Tax returns

The system relies on the filing of a return of information with the Jersey tax authority, which then raises an assessment (in the case of companies taxed at 10% or 20% on all or part of their income). Companies taxed at 0% are required to submit a tax return but are not required to submit accounts and tax computations.

There is a filing deadline for the corporate return of 6pm on 31 December following the year of assessment and a late filing penalty of GBP 250.

Payment of tax

For companies, tax is payable in arrears during the calendar year following the year of assessment.

Under the law, tax is due the day after the assessment is made. In practice, an estimated assessment is made by the tax office in February/March, which is then appealed based on information at that time. A payment is suggested based on the appeal with the company making a top up payment (if necessary) prior to the surcharge deadline (the Friday after the first Monday each December in the year following the year of assessment) or once a final computation has been produced and submitted.

Tax paid after a prescribed date (usually the first Friday in the December following the year of assessment) incurs a 10% surcharge.

Tax audit process

There is no formal tax audit process in Jersey.

Statute of limitations

There is no statutory limitation date, as such. If the Comptroller discovers profits have not been fully assessed, the Comptroller can issue an amended/additional assessment at any time not later than five years after the expiration of the year of assessment. If the error involves fraud, wilful default, or neglect, then the assessment can be revised at any time.

Topics of focus for tax authorities

The Jersey Taxes Office expects to bring in a new penalty regime during 2018. The date is yet to be confirmed.

Other issues

Intergovernmental agreements (IGAs)

On 13 December 2013, the Jersey authorities signed an IGA with the United States to facilitate tax reporting under the Foreign Account Tax Compliance Act (FATCA) regime. The Jersey authorities also signed a similar IGA with the United Kingdom on 22 October 2013. The IGA with the United Kingdom is sometimes known as UK FATCA. This is because the information exchanged under the UK IGA is similar to that exchanged with the United States under FATCA. It's sometimes also referred to as CDOT (crown dependencies and overseas territories).

The overall aim of the UK IGA is to improve tax compliance through the automatic exchange of information.

Jersey has also committed to the early adoption of the global Common Reporting Standard (CRS) on Automatic Exchange of Information with effect from 1 January 2016, with first reporting of reportable financial accounts having taken place in 2017. The CRS replaced UK FATCA from 1 January 2016.

Tax information exchange agreements (TIEAs)

The Jersey tax authorities are committed to being tax transparent, with an increased emphasis on agreeing to further DTAs and TIEAs. Jersey has signed TIEAs with 38 countries and is negotiating DTAs with several other jurisdictions (*see Foreign income in the Income determination section for a description of DTAs that have been signed*).

Significant developments

Online portal

The tax authority has announced the following:

- As of July 2017 and going forward, they will not be accepting checks nor cash payments for any due tax payment above 5,000 Jordanian dinars (JOD). Instead, the payment shall be done through the online payment portal (E-Fawateercom), which can be accessed through the internet banking service provided by local banks in Jordan. This threshold is reduced to JOD 3,000 as of 2018 and will be reduced to JOD 1,000 as of 2019.
- The tax authority asked all taxpayers to provide their bank account details in order to transfer any payments that are due to the taxpayers through a bank transfer.
- As of 2018, all sales tax and income tax returns will only be accepted using the online portal.

The Social Security Corporation announced in December 2017 that as of 2018 all related forms will only be accepted using the online portal. Furthermore, the Corporation has announced that the all contributions payments will be accepted using an online payment system (E-Fawateercom) only.

Sales tax

The Prime Ministry has published new schedules for the applicable sales tax law with regard to the items that are not subject to the general sales tax rate of 16%, exempt, or out of the sales tax.
The applicable rates are now 16%, 10%, 4%, and 0%. The new rate is 10%.

This decision became effective starting from 17 January 2018.

Taxes on corporate income

The corporate tax rates in Jordan are applied based on the industry/business activities from which the taxpayer generates income. According to the income tax law, the corporate tax rates are as follows:

- 35% for banks.
- 24% for telecommunication, insurance and reinsurance, financial intermediation companies (including exchange and finance leasing companies), companies that generate and distribute electricity, and companies that undertake mining raw material activities.

- 14% for the industrial sector.
- 20% for other companies.

Jordanian resident corporations are not subject to income tax on their worldwide income unless that income is raised from sources that originate and relate to Jordanian deposits and funds. For foreign branches of Jordanian resident corporations, all of the branch net income is taxed at a fixed rate of 10%.

Non-resident corporations are taxed through withholding tax (WHT) (*see the Withholding taxes section*).

Local income taxes

There are no governorate or local income taxes in Jordan.

Corporate residence

An entity will be deemed to be resident in Jordan if it has been established and registered in accordance with the provisions of the Jordanian legislation in force and (i) has an office or branch practicing management and supervision of its work in Jordan, (ii) whose management head office or actual office is located in Jordan, or (iii) which the government or any official or public institutions own more than 50% of its capital.

Permanent establishment (PE)

There are no clear provisions in the Jordan income tax law to define PE.

Other taxes

Sales tax

A general sales tax similar in operation to a value-added tax (VAT) is imposed at the rate of 16% on the following transactions:

- Sales of goods or services, or both.
- Importing any service or goods from outside Jordan or from the free zone areas and markets inside Jordan.

Special tax rates are applied on certain items (*see Excise tax below*).

A zero rate is applied to the export sales of goods and services outside Jordan, to the free zone areas and markets, to the Aqaba Special Economic Zone (ASEZ), and to development areas.

Goods exempt from sales tax include bread, water packed in less than 5 litres, tea, sugar, gold, money, and electricity.

Services exempt from sales tax include the following:

- Air transport.
- Education.
- Disposal of sewage and waste.
- Public health and similar activities.
- Activities of religious organisations.

- Activities of social organisations.

Customs duties

Certain goods imported to Jordan are subject to customs duties. Customs duties vary depending on the type and the origin of imported goods, as prescribed by the Customs Tariff. The Customs Tariff is based on the Harmonised Commodity Description and Coding System (HS Nomenclature).

Excise tax

Excise tax is the special sales tax that is imposed on certain goods and services, including cement, tobacco products, wines, spirits, cars, beer, fuel, and lubricants.

Property taxes

There is a property tax in Jordan that is paid annually, and the tax rate is determined by the municipality depending on the location and size of the property and, in case of buildings, depending on annual rental value.

Transfer property taxes

Transfer of property is subject to tax at a rate of 9% (registration fee at a rate of 5% and sale of property tax at a rate of 4%).

Stamp duty

Generally, an *ad valorem* stamp duty of 0.3% or 0.6% is levied.

Payroll tax

As per the income tax law, the payroll tax rates are imposed at progressive rates ranging from 7% to 20%.

Social security tax

Social security tax is imposed on the employer and the employee at rates of 14.25% and 7.5%, respectively, on the monthly salaries and certain allowances. The employer should report and withhold these contributions on a monthly basis.

Branch income

Operating branches of non-resident companies registered in Jordan are taxed based on their activities/business being carried out in Jordan at the prevailing corporate tax rates. Non-operating branches (regional or representative offices) of non-resident companies registered in Jordan are generally prohibited from carrying on any commercial activity in Jordan.

Income determination

Any income incurred in or from Jordan, regardless of the place of payment, shall be subject to tax. This includes, but is not limited to, income from:

- Professional services or activities.
- Interest, commissions, discounts, currency differences, deposit profits, and profits from banks and other legal resident persons.
- Royalties.

- Selling goods produced in Jordan, whether sold in Jordan or exported.
- Selling or leasing of movable properties located in Jordan.
- Leasing immovable properties located in Jordan and the income from key money.
- Selling or leasing intangible assets in Jordan, including goodwill.
- Insurance premiums due according to insurance and re-insurance agreements for risk in Jordan.
- All forms of telecommunication services, including international telecommunications.
- Transportation between Jordan and any foreign country.
- Re-export.
- Service compensation gained by a non-resident person from Jordan for a service provided to any person if the activity or the work related to this compensation was carried out or the output of this service was used in Jordan.
- Prizes and lottery if exceeds JOD 1,000, whether paid in cash or in kind.
- Any contract in Jordan, such as construction contracting, commercial agencies profits, and any other similar entities, whether their source is inside or outside Jordan.
- Any other source, which has not been exempted according to the provisions of the law.

The following shall be exempted from tax:

- The King's allocations.
- Income of public and official institutions and municipalities, excluding its income from any investment activities or annual surplus that the Council of Ministers decides, upon the recommendation of the Minister, to be subject to tax.
- Income generated by non-operating foreign companies, such as the regional office and the representative office, and which is received for its business abroad.
- Income of charity *awqaf* (public endowment) and income from the Orphans Development Fund.
- Income of unions, professional commissions, cooperation societies, and other societies legally registered and licensed from non-profit activities.
- Income of any religious, charity, cultural, educational, sports, or health institutions with a public character, not aiming to achieve profit.
- Income of exempted registered companies according to the companies' law, which is incurred from activities undertaken outside Jordan, except income derived from income sources subject to tax according to the provision of the law.
- Profits from stocks and dividends distributed by a resident to another resident, except profits of mutual investment funds incurred for banks, financial companies, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and juristic persons who undertake financial lease activities.
- Capital gains incurred inside Jordan, other than profits from assets subject to depreciation.
- Income derived from inside Jordan from trading in dividends and stocks, bonds, equity loan, treasury bonds, mutual investment funds, currencies, commodities in addition to futures and options contracts related to any of them, except that incurred by banks, financial companies, financial intermediation, main telecommunication companies, companies who undertake mining raw materials activities, and insurance and reinsurance companies, and legal persons who undertake financial lease activities.

- Income derived by non-Jordanian resident investors from sources outside Jordan that are initiated from their investments of their foreign capital, returns, profits, and proceeds from their investments' liquidation, returns, or selling of their projects, shares, or stocks after transferring them outside Jordan in accordance to the enacted Investment Law or any other law that will replace it.
- Compensation paid by insurance entities, other than what is paid as reimbursement for the loss of income from business activity or employment.
- Any income generated by banks and financial companies not operating in Jordan from banks operating in Jordan, such as deposit interest, commissions, and deposit profits from investment in interest-free banks and financial companies.
- Profits gained by re-insurance companies from insurance contracts concluded with insurance companies operating in Jordan.
- Income covered by double taxation agreements (DTAs) concluded by the government, to the extent of that which is covered under these agreements.
- The income of public or private pension funds and savings funds and any other funds approved by the Minister shall not be subject to tax if this income is derived from the employees' and employers' contributions.
- Certain types of local origin goods and services' exports outside Jordan may be totally or partially exempted from tax as set forth in regulations issued for this purpose.

Inventory valuation

Inventory is generally valued in accordance to the International Financial Reporting Standards (IFRS) accounting framework.

Capital gains

Capital gains are not taxable in Jordan, except for capital gains that are generated from depreciable assets and goodwill.

Dividend income

Dividend income received from a resident juristic person is not taxable in Jordan. However, dividend income received from a non-resident juristic person is subject to income tax.

Foreign income

Jordanian resident corporations are not subjected to income tax on their foreign income, except for foreign branches of Jordanian resident corporations, whereby, as per the income tax law, all of the branch net income is taxed at a fixed rate of 10%.

Deductions

Depreciation and amortisation

Depreciation and amortisation of fixed assets are determined using the straight-line method, provided that the provisions, procedures, and rates shall be defined by the depreciation regime issued for this purpose.

Goodwill

Purchased goodwill can be amortised using the straight-line method, provided that the provisions, procedures, and rates shall be defined by a regulation issued for this purpose.

Start-up expenses

There is no clear provision in the Jordan income tax law to define the treatment of start-up expenses; however, these expenses can be accepted at the establishment year.

Interest expenses

All interest charges are deductible for all taxpayers.

Bad debt

Bad debts are deductible under certain conditions.

Charitable contributions

A person may deduct any amount paid during the tax period as a donation to any of the governmental departments, public or official institutions, or municipalities from the gross income in the period in which the payment occurred.

Any person may deduct subscriptions and donations paid in Jordan without any personal benefit for religious, charitable, humanitarian, scientific, environmental, cultural, sport, and professional purposes if the Council of Ministers approves its character. The deductible amount according to the provisions of this paragraph shall not exceed 25% of the taxable income after deducting what is provided for in the first paragraph above and before making this deduction.

Fines and penalties

Fines and penalties are not acceptable expenses for income tax purposes.

Taxes

Taxes and fees paid on taxable activities are deductible.

Foreign income tax paid for income earned from sources outside Jordan that was subject to tax under the provisions of the tax law is deductible.

Other significant items

Approved expenses, including the following, are deductible:

- Insurance premiums.
- Amounts paid as civil compensation under contracts concluded by the taxpayer for the purpose of carrying out taxable activities.
- Amounts paid by the employer for employees to the Social Security Corporation.
- Hospitality and travel expenses incurred by the taxpayer.
- Expenditures for employees' medical treatment, meals during duty, travel, transport, and life insurance against work injuries or death.
- Marketing, scientific research, development, and training expenses.
- Expenses of prior tax periods that were neither defined nor final.

Net operating losses

Assessed losses incurred after 1 January 2015 may be carried forward up to five years. As for the assessed losses incurred before 1 January 2015, such losses may be carried forward indefinitely, taking into consideration that these losses should be used first. The carryback of losses is not permitted.

Payments to foreign affiliates

A resident generally may claim a deduction for royalties, management service fees, and interest charges paid to foreign affiliates, taking into account the transfer pricing regime and the applicable WHT.

Group taxation

Group taxation is not permitted in Jordan.

Transfer pricing

Any disposition transaction that is not based on arm's length, is with parties that have mutual interests, and leads to a decrease in the taxable income is ignored, and the real profits are estimated according to the regular market value of the transactions.

Any illusionary or fake disposition transactions are ignored, and the tax due is estimated as if there were no transactions.

Thin capitalisation

There is no thin capitalisation rule in Jordan. All interest charges are deductible for all taxpayers.

Controlled foreign companies (CFCs)

In the Jordanian tax laws, there is no definition of a CFC.

Tax credits and incentives

Jordan has had tax reductions for selective sectors categorised by development zones or free zone areas. Generally, these have required pre-approval.

Foreign tax credit

Foreign tax credit treatment is not available in Jordan.

Withholding taxes

Dividends paid

Dividends are not taxable in Jordan.

Non-resident WHT

With respect to services performed by a non-resident juristic or natural person, under the income tax law, "Amounts received or earned by the non-resident person from the Kingdom, which are derived from services provided to any person if the work or service related has been performed in the Kingdom or if the outcome of such services has been used in the Kingdom as well, is subject to tax in Jordan".

The WHT rate on services performed by a non-resident juristic or natural person is 10% of the payment. The same rate applies to royalty payments to non-residents.

Resident WHT

The following services are subject to resident WHT of 5% if provided by resident natural persons or civil companies: services provided by resident doctors, lawyers, engineers, auditors, experts, consultants, commissioners for taxpayers, insurance and reinsurance agents and brokers, arbitrators, customs brokers, commission brokers and agents, financial intermediaries, and commission shipping agents.

Income from interest, deposits, commissions, and profits of deposits participating in banks and financial company investments that do not take interest and paid by banks and financial companies in Jordan to any person is subject to WHT at the rate of 5%, provided these withheld amounts shall be considered final tax for the non-resident legal person and the physical person. However, interest, profits of deposits, and commissions incurred for banks to other banks and due to any other bodies or entities defined by the executive instructions are exempt for this WHT.

Tax treaties

Jordan has entered into income tax treaties with Algeria, Azerbaijan, Bahrain, Bulgaria, Canada, Croatia, the Czech Republic, Egypt, France, India, Indonesia, Iran, Iraq, Italy, Saudi Arabia, South Korea, Kuwait, Lebanon, Libya, Malaysia, Malta, Morocco, the Netherlands, Pakistan, Palestine, Poland, Qatar, Romania, Sudan, Syria, Tunisia, Turkey, Ukraine, United Arab Emirates, the United Kingdom, Uzbekistan, and Yemen.

Jordan has transportation agreements with many countries and is negotiating treaties with more countries.

Tax administration

Taxable period

A taxpayer's due tax shall be computed on a calendar-year basis.

A taxpayer who closes one's accounts on a date other than the end of the calendar year may calculate the due tax according to the fiscal year, provided that prior approval shall be obtained from the General Director of the income tax department.

A taxpayer who commences activity within the first half of the calendar year shall compute the due tax for the period from the establishment date until the end of the calendar year.

A taxpayer who commences activity within the second half of the calendar year may compute the due tax for the period from the establishment date until the end of the next calendar year.

Tax returns

Taxpayers are obligated to file tax returns before the end of the fourth month following the end of the tax period, including details related to income, expenses, exemptions, and tax due. Tax returns are submitted through the tax authority's online portal.

Payment of tax

The tax balance is due before the end of the fourth month following the end of the tax period.

A taxpayer who is carrying out business activities and has gross income in the previous tax period exceeding JOD 1 million from these activities is required to remit two advance payments on the accrued income tax from these activities using the rates determined for each tax period mentioned in the following schedule. The advance payments are calculated according to the income tax in the financial statements presented to the income tax department for the concerned period. In the absence of the financial statements for this period, the income tax included in the immediate preceding tax declaration will be used to calculate the advance payments.

Tax period	Rate on accrued income tax (%)
2015 and following years	40

The first advance payment is due within a period not exceeding 30 days from the last day of the first half of that income tax period.

The second advance payment is due within a period not exceeding 30 days from the last day of the second half of that income tax period.

Fines and penalties

Failure to pay tax on the assigned dates according to the provisions of the tax law will result in a delay fine at a rate of 0.4% of the value of the tax due or any deductible amounts for each full or partial week of delay.

Tax audit process

The tax audit is likely to take place within one year from the date of filing the return.

Statute of limitations

The tax auditor may not audit a tax return after four years from the date of filing the return.

Topics of focus for tax authorities

Tax authorities tend to focus on WHTs, imported goods or services, and related-party transactions.

Significant developments

The Kazakhstan government adopted a new Tax Code on 25 December 2017. The new Tax Code has introduced a number of new regulations, where most provisions took effect from January 2018 and the rest will become effective within two years. The new Tax Code envisages new provisions including:

- Introduction of the principle of 'good faith' generally applicable during examination of a complaint against a notification on the result of a tax audit (e.g. there should be no fines and penalties if taxpayers fulfilled their tax liabilities based on personalised written clarifications issued by the tax authorities, and which are subsequently recalled, recognised to be incorrect, or replaced). Also, according to this principle, all unclearly prescribed provisions of the tax law should be interpreted in favour of the taxpayers during tax audit result examinations.
- Implementation of a so-called 'horizontal' monitoring starting from 2019 aimed at minimising tax risks and reducing the number of tax audits for taxpayers.
- Reduction of statute of limitation term from five to three years, from 2020 (excluding for subsurface users and large taxpayers subject to monitoring).

Other changes effective in 2018 are as follows:

- Introduction of 3-tier transfer pricing reporting requirements in Kazakhstan Transfer Pricing law (i.e. Country-by-country [CbC] report, Local file, and Master file documentation) as part of the Organisation for Economic Co-operation and Development's (OECD's) base erosion and profit shifting (BEPS)-related recommendations.
- Adoption of the new Kazakhstan Customs Code and Customs Code of the Eurasian Economic Union (EAEU).
- Adoption of the Code on Subsoil and Subsurface Use, which will be effective from June 2018.

Taxes on corporate income

The tax rate for corporations is 20% and is assessed for a calendar year. All Kazakhstan legal entities and branches of foreign legal entities are subject to corporate income tax (CIT). Taxable income is determined as the taxpayer's aggregate annual income less allowable deductions.

Resident companies are taxable in Kazakhstan on their worldwide profits, while non-resident companies operating through a permanent establishment (PE) in Kazakhstan are subject to Kazakhstan CIT only on the profits attributable to that PE.

Non-residents without a PE in Kazakhstan that receive income from sources in Kazakhstan are generally subject to income tax withheld at source of payment on Kazakhstan-sourced income (*please see the Withholding taxes section for more information*).

Reduced CIT rates

A reduced CIT rate of 6% applies to the qualified agricultural income of legal entities producing agricultural products.

In addition, taxpayers operating in special economic zones (SEZs) may enjoy full exemption from CIT if certain statutory requirements established for such benefits are met (*see the Tax credits and incentives section for more information*).

Excess profit tax (EPT)

EPT rates are progressive and range from 10% to 60%. The tax base is comprised of the portion of net income of subsurface users exceeding 25% of deductions for EPT purposes. Subsurface users may include asset acquisition costs, capital costs, and losses (with certain limitations) in immediate deductions.

Starting from 2018, EPT is abolished for subsurface users engaging in extraction of solid minerals. At that, corresponding subsurface use contracts should not envisage extraction of other groups of mineral resources.

In addition, the Tax Code introduced an alternative tax that can substitute for several types of taxes for subsurface users (*see below*).

Alternative tax

The new Tax Code introduced an alternative tax that replaces EPT, mineral extraction tax (MET), and compensation of historical costs and may be applied at the discretion of a taxpayer.

The alternative tax is applicable to subsurface use contracts on production and/or combined exploration and production of oil and gas products, the place of which should be:

- on a continental shelf, and
- at deeply folded oilfields locating not higher than 4,500 metres and with lowest point of bedding at 5,000 metres or lower.

Generally, the calculation of the tax base, the tax period, and the deadlines are similar to the existing CIT framework, except for some specifics (e.g. foreign exchange impact should be disregarded, interest expenses are not allowed for deduction). The tax rate is progressive (from 0% to 30%) and depends on the world price fluctuations of crude oil.

Local income taxes

There are no regional or local income taxes in Kazakhstan.

Corporate residence

Generally, Kazakhstan incorporated companies or other legal entities that have their place of effective management located in Kazakhstan are treated as Kazakhstan tax residents.

Permanent establishment (PE)

Non-resident legal entities having business activities in Kazakhstan may create a PE in the following cases:

- 'Fixed place PE': A non-resident enterprise carries on business activities in Kazakhstan through a fixed place, including, but not limited to, through a place of management.
- 'Services PE': A non-resident enterprise renders services in Kazakhstan through employees or other personnel engaged by the non-resident for such purposes, provided that these activities continue for more than 183 days within any consecutive 12-month period for the same or connected projects.
- 'Construction PE': A construction site, for instance, a shop or an assembly facility, performance of projecting work form a PE, notwithstanding the timing of performing such operations.
- 'Agency PE': A non-resident enterprise carries on business activities in Kazakhstan through a dependent agent. A dependent agent is an individual or a legal entity that meets all of the following criteria simultaneously:
  - Has the contractual authority to represent the non-resident's interests in Kazakhstan and makes use of this authority by acting and signing (negotiating) contracts on behalf of the non-resident (i.e. conclusion of a contract for provision of services or playing a principal role in concluding of such contract or having the ownership right [right to use] for property belonging to the non-resident).
  - The business is carried on outside the activity of either a customs broker or a professional participant of the securities market or other brokerage type of business (except for activity of an insurance broker).
  - Carries on activities that are not limited to those of a preparatory and auxiliary nature.

Other taxes

Value-added tax (VAT)

The current VAT rate is 12%. This tax is applicable to the sales value of goods, works, and services, as well as to imports. Exports of goods and international transportation services are taxed at 0% VAT. There is a list of goods, works, and services exempt from VAT (e.g. financial services provided by financial institutions, financial leasing services, notary and advocacy services, operations with financial securities and investment gold, loan transactions).

Since 11 January 2016, taxpayers have been liable for issuance of electronic invoices ('e-invoicing') on certain goods listed by the government, which was the measure specifically taken by the government following Kazakhstan's accession to the World Trade Organization (WTO), as well as lowering of customs duties on approximately 1,500 products. E-invoicing is obligatory for large taxpayers from January 2018 and will be obligatory for all categories of taxpayers from 2019.

The new Tax Code introduced VAT control accounts (analogue of Azerbaijan VAT deposit account) as an alternative option of VAT refund from the state (which is still applicable, subject to certain criteria). This measure is aimed at tracing VAT payments between suppliers and customers and remittance of VAT to the state. Taxpayers may opt for using VAT control accounts on a voluntary basis.

The obligatory VAT registration threshold in 2018 is retained at 30,000 Monthly Calculation Indices (MCI; currently, 1 MCI = 2,405 Kazakhstan tenge [KZT]).

The VAT reporting period is a calendar quarter.

Customs duties

The new Kazakhstan Customs Code and the Customs Code of the Eurasian Economic Union implemented a number of progressive provisions intended for simplification of customs procedures, integration of information technology (IT) initiatives, and reduction of 'red tape' issues in customs control procedures from January 2018.

In April 2018, full-scale electronic declaration was launched for all customs procedures through Information System 'Astana - 1'.

The Customs Code of the Eurasian Economic Union conceptually changed the definition of a 'customs declarant', which may significantly impact business models of supply chains and logistics.

Finally, the new provisions allow an entity that is qualified as an 'authorised economic operator' to apply simplified customs procedures.

Kazakhstan is a WTO member.

Customs duties apply to goods imported to the Customs Union countries from third countries. Customs duties rates are established either based on a percentage (in general, ranging between 0% and 30%; higher rates exist for certain goods) of the customs value of goods or in absolute terms in Euros (EUR) or US dollars.

Goods of the Customs Union countries should be generally exempt from Kazakhstan customs duties.

In addition to membership in the Customs Union, Kazakhstan concluded a number of bilateral and multilateral Free Trade Agreements with the Commonwealth of Independent States (CIS), which provide for exemption of goods circulated between the CIS member states from customs duties, provided certain conditions are met.

The ATA Carnet temporary import system is launched in Kazakhstan. This system allows the duty-free temporary import and export of goods for specific purposes.

Customs fees

A customs processing fee is assessed at KZT 25,000 for the main page of a customs declaration plus KZT 11,000 for each supplemental page.

Excise taxes

Excise taxes apply to the sale and import of crude oil, gas condensate, petrol/gasoline (excluding aviation fuel), diesel fuel, spirits and alcoholic beverages, beer, tobacco, and passenger cars.

Type of excisable good	Excise tax rate
Crude oil, gas condensate, petrol/gasoline, diesel	KZT 0 to 11,000 per tonne
Alcoholic beverages and beer, tobacco	KZT 0 to 7,500 per item of measure (kilos, litres, or units)
Passenger cars	KZT 100 per each cm^3 of engine capacity

Property tax

Property tax is assessed annually at a general rate of 1.5% of the average net book value of immovable property.

Property tax objects now include buildings and constructions in actual use, even if not registered with the justice authorities.

Land tax

Entities and individuals that own land plots (or land share in cases of commonly shared ownership of land plots) must pay land tax annually. Land tax rates vary based on the purpose for which the land is used, as well as the size and quality of the land.

Transfer taxes

There are no transfer taxes in Kazakhstan.

Stamp taxes

There are no stamp taxes in Kazakhstan.

Payroll taxes

Employment income (salary, compensation, etc.) is subject to withholding individual income tax paid at source. Tax paid at source should be calculated, withheld, and remitted by the Kazakhstan company acting as a tax agent at the rate of 10%.

Social tax

Employers must pay social tax at the rate of 9.5% of gross remuneration (salaries and certain benefits provided) of all employees (local and expatriate).

Obligatory social insurance contributions

Obligatory social insurance contributions are payable by employers at the rate of 3.5% to the State Fund of Social Insurance. Obligatory social insurance contributions are capped at 3.5% of the minimum monthly wage (approximately 3 United States dollars [USD]) per month, and are deductible from social tax. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory social insurance.

Obligatory pension contributions

Obligatory pension contributions are withheld at a rate of 10% out of employees' gross income and paid to the State Pension Centre of Pension Payments. The gross income subject to obligatory pension contributions is capped at 75 times the minimum monthly wage (approximately USD 6,428) per employee per month. Only Kazakhstan citizens and foreigners holding a residence permit in Kazakhstan are subject to obligatory pension contributions.

Obligatory social medical insurance contributions

Obligatory social medical insurance contributions should be made by employers at own cost based on the following rates:

- From 1 January 2018: 1.5% of employees' salary.
- From 1 January 2020: 2% of employees' salary.
- From 1 January 2022: 3% of employees' salary.

Starting from 2019, obligatory social medical insurance contributions should also be withheld from employees' gross income and paid by employers at the following rates:

- From 1 January 2019: 1% of employees' salary.
- From 1 January 2020: 2% of employees' salary.

Vehicle tax

Vehicle tax rates are based on MCI and determined in accordance with the type of vehicle, engine volume, operation period of vehicles (aircraft only), and other factors.

Mineral extraction tax (MET)

MET applies to the monetary value of extracted volume of crude oil, gas condensate, natural gas, minerals, and groundwater.

MET is calculated based on the value of the extracted content, which is computed by applying average global prices to the extracted volume (adjusted for content). The determination of average global prices is based on the list of publications that are considered as official sources for computation of MET (Platts Crude Oil Marketwire and Crude Argus).

Currently, MET rates for crude oil and gas condensate range from 5% to 18%, depending on the accumulated production volume for the calendar year. For hydrocarbons, rates can be reduced by 50% if they are supplied to domestic refineries on the basis of a sale/purchase agreement or tolling agreement.

The MET rate for natural gas is set at 10%. For domestic sales of natural gas, MET rates range from 0.5% to 1.5%.

MET rates for minerals that have undergone initial processing (except for widespread minerals) and for coal vary between 0% and 18.5%.

Branch income

Net income of a non-resident legal entity's PE, after CIT at 20%, is subject to a branch profits tax at a rate of 15%, which may be reduced under an applicable double tax treaty (DTT). As such, the effective tax rate for income of a non-resident legal entity's PE equals 32% if there is no reduction under a DTT.

Income determination

Kazakhstan legal entities are taxable on aggregate annual income earned worldwide. Non-resident legal entities, carrying out business activities through a PE in Kazakhstan, are taxable on income attributed to the activities of that PE. All taxpayers must apply the accrual method for recognition of income.

Inventory valuation

For tax purposes, inventory is valued in accordance with International Financial Reporting Standards (IFRS) and Kazakhstan financial accounting legislation. As such, permitted inventory valuation methods include first in first out (FIFO), weighted average, and specific identification methods.

Capital gains

Capital gains are subject to ordinary CIT rates. An exemption is available for capital gains realised from the sale of shares and participation interests in Kazakhstan for legal entities or consortiums that are not engaged in subsurface activities and are held for more than three years.

From January 2018, capital gains from sale of shares/participation interest in subsurface users may be exempt from taxation in Kazakhstan if such subsurface users are engaged in further processing activities, under specific conditions.

Dividend income

Dividend income of a Kazakhstan resident company on inbound dividends is exempt from Kazakhstan taxation. Dividends from a Kazakhstan resident company to another Kazakhstan resident company are exempt from taxation, except for dividends paid by certain types of taxpayers.

Interest income

Interest income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Royalty income

Royalty income should be included in the aggregate annual income of a taxpayer and taxed at the 20% CIT rate.

Foreign exchange gain

Foreign exchange gain should be determined in accordance with IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange gain over foreign exchange loss should be included in the aggregate annual income of a taxpayer.

Foreign income

Foreign income is subject to ordinary CIT.

There are no provisions for tax deferrals in Kazakhstan.

For additional information, please refer to Controlled foreign companies (CFCs) in the Group taxation section.

Deductions

Allowable deductions generally include expenses associated with activities designed to generate income, unless specifically restricted for deduction by the tax legislation. All expenses require supporting documentation.

Recognition of expenses is performed in accordance with IFRS and Kazakhstan accounting and financial reporting legislation, unless otherwise stated in new Tax Code. If recognition of expenses as per IFRS differs from the new Tax Code, the latter should prevail.

Depreciation and depletion

Tax depreciation is calculated using the declining-balance method at depreciation rates ranging from 10% to 40%, applied to the balances of four basic categories of assets:

- Buildings and facilities (except for oil and gas wells and transmission facilities): 10%.
- Machinery and equipment (except for machines and equipment for oil and gas production, computers, and equipment for information processing): 25%.
- Computers and equipment for information processing: 40%.
- Fixed assets not included in other groups, including oil and gas wells, transmission equipment, oil and gas machinery and equipment: 15%.

Goodwill

There are no special provisions in the Kazakhstan Tax Code with respect to deductibility of goodwill expenses.

In general, assets not subject to amortisation per financial accounting are not regarded as fixed assets and are not subject to deduction.

Start-up expenses

The Kazakhstan Tax Code does not specifically address deductibility of start-up expenses, but, generally, expenses incurred in relation to business activities and aimed at earning revenue occurring at start-up should be deductible.

Interest expenses

Interest payable to unrelated third parties is deducted in full, except for interest payable to banks and micro-financial institutions, which are deducted within the amounts of actually paid interest. *For information about taxation of interest paid to related parties, please refer to Thin capitalisation in the Group taxation section.*

Bad debt

Receivables that were not paid within three years are to be recognised as bad debt expenses. Such expenses can be deducted in full by a taxpayer, provided that (i) these receivables are reflected in books of the taxpayer and (ii) proper supporting documents are in place.

Charitable contributions

Charitable contributions are entitled to decrease the taxable base but are capped at 4% of a company's annual taxable income (the rate for the large taxpayers subject to monitoring is 3%).

Foreign exchange loss

Foreign exchange loss should be determined in accordance with IFRS and Kazakhstan financial accounting legislation. The excess of foreign exchange loss over foreign exchange gain is allowed for deduction.

Fines and penalties

Generally, deductions are available for forfeits, fines, and penalties that are not payable to the state budget.

Taxes

Taxes remitted to the state budget of Kazakhstan are deductible within accrued amounts, except for the following:

- Taxes excluded prior to calculation of aggregate annual income.
- Income taxes paid in Kazakhstan and other countries.
- Taxes paid in 'black-listed' jurisdictions.
- EPT.
- Alternative tax.

Net operating losses

Net operating losses may be carried forward for up to ten years. Loss carryback is not permitted under the Kazakhstan tax legislation.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for CIT purposes if the payments are intended to generate income, supported by documentation, and comply with the Kazakhstan transfer pricing law.

Group taxation

Kazakhstan tax law does not permit group taxation.

Transfer pricing

Under the Kazakhstan transfer pricing law, both customs and tax authorities have the right to monitor and adjust prices used in cross-border and certain domestic transactions when prices are perceived to deviate from market prices, even if such transactions are with unrelated parties. If the authorities adjust prices, the re-assessed liability will include taxes, duties, penalty interest, and fines to the state budget.

Transfer pricing rules impact the following transactions:

- International commercial transactions.
- Domestic transactions that directly relate to international commercial operations where:
  - the sale relates to a subsurface use contract
  - either party to the transaction has tax preferences, or
  - one of the parties has losses for two years prior the year of the transaction.

Country-by-country (CbC) reporting

From 2018, the Transfer Pricing law introduces a 3-tiered approach to transfer pricing documentation for multinational enterprise (MNE) groups conducting business in Kazakhstan to file a CbC report retrospectively from January 2016, and a Master file and a Local file from January 2019, with the Kazakhstan tax authorities.

Before filing required documentation, MNE groups are liable to submit a notification about being a member of an MNE group not later than September 2018.

Non-compliance with the above requirements will lead to penalties.

Thin capitalisation

Deduction of interest paid to related parties, to unrelated parties under related parties warranties, or to parties registered in countries with privileged taxation depends on the borrower's capital structure; deductible interest will be limited with reference to an 'acceptable' proportion of debt-to-equity (7:1 for financial institutions, 4:1 for all other entities). The list of jurisdictions with privileged taxation, the so called 'black list' established by the government, includes 57 jurisdictions (*see the Group taxation section of Kazakhstan's Corporate tax summary at www.pwc.com/taxsummaries for a current list*).

Controlled foreign companies (CFCs)

The new Tax Code significantly revised the CFC rules. Currently, a CFC is deemed to be an entity that meets both of the following conditions:

- 25% or more of a non-resident's shares belong directly, indirectly, or constructively to a Kazakhstan entity, or the entity is connected with the resident by means of control, and
- the effective income tax rate of the non-resident is less than 10% or the non-resident is registered in a 'black-listed' jurisdiction (*see above*).

The consolidated profit of the CFC (and PE of the CFC) should be included in the taxable income of the Kazakhstan entity and subject to CIT on the portion of undistributed profits from the non-resident company.

In addition, the new Tax Code provides for elimination of double taxation of the CFC's financial profit (subject to certain criteria).

Tax credits and incentives

Foreign tax credit

In general, the Kazakhstan Tax Code allows taxpayers to credit the foreign income taxes paid against the income taxes payable in Kazakhstan, provided the documents confirming the payment of such taxes are available. However, a tax credit may not be granted in certain cases (e.g. for taxes paid in countries with privileged taxation).

Investment incentives

Investment incentives are available to certain Kazakhstan legal entities that fit certain criteria and possess objects (e.g. certain fixed assets) for which investment incentives may be applied. Generally, the investment incentives allow companies to fully deduct, for CIT purposes, the cost of the investment objects and the cost associated with their reconstruction and modernisation either at once or within the first three years of their use.

Based on the Entrepreneurial Code, incentives are granted under an investment contract between the government and companies with focus on priority sectors of the economy, as determined by the government. A qualifying investment project is granted with (i) exemption from customs duties and import VAT exemptions, with some limitations, and (ii) state in-kind grants. Priority investment projects, alongside the above mentioned benefits, get (iii) tax incentives and (iv) investment subsidies. Special investment projects in the form of investment preferences are granted with (v) exemption from custom duties and (vi) tax incentives.

Special economic zones (SEZs)

Currently, the following SEZs have been established in Kazakhstan:

- 'Astana, the New City' in Astana (the expiry date is in 2027).
- 'Aktau Sea Port' in Aktau (the expiry date is on 1 January 2028).
- 'Ontustik' in Sairam district of South-Kazakhstan region (the expiry date is on 1 July 2030).
- 'National Industrial Petrochemical Park' in Atyrau region (the expiry date is on 31 December 2032).
- 'Park of Innovative Technologies' (the expiry date is 1 January 2028).
- 'Saryarka' in Karaganda region (the expiry date is 1 December 2036).
- 'Horgos - the eastern gates' in Almaty region (the expiry date is 2035).
- 'Pavlodar' in Pavlodar (the expiry date is 1 December 2036).
- 'Chemical Park Taraz' in Taraz (the expiry date is 1 January 2037).
- 'International Center for Cross-Border Cooperation Horgos' in Almaty region (the expiry date is 1 January 2041).

In order to enjoy the incentives available in SEZs, a legal entity must meet the following requirements:

- It must be registered by the tax authorities in the territories of SEZs.
- It has no structural subdivisions beyond the boundaries of the territories of the SEZs.
- It must perform activities qualified for priority types of activities within the territory of an SEZ (activities performed by a participant of the SEZ 'Park of Innovation Technologies' may be performed on an extraterritorial basis).

The general incentives available for legal entities in SEZs are:

- CIT: 100% reduction (subject to certain conditions).
- VAT: 0% rate (for goods fully consumed during performance of activities corresponding to purposes of creation of the SEZ and included in the list of goods established by the government of Kazakhstan).
- Land tax and payment for the use of land plots: 0% rate.
- Property tax: 0% rate.
- Social tax: 100% reduction (subject to certain conditions for 'Park of Innovative Technologies').

Astana International Financial Centre (AIFC)

The AIFC aims to create favourable conditions for investment and finance and to develop the securities market, ensuring its integration with international capital markets. The AIFC also intends to develop insurance, banking, and Islamic finance markets in Kazakhstan. The AIFC seeks to become a financial hub for the Central Asian region, member states of the Eurasian Economic Union (EAEU), the Caucasus, Western China, the Middle East, Mongolia, and Europe.

The AIFC provides a special legal regime based on the principles of English law, independent financial regulation in accordance with international standards, tax preferences for a period of 50 years, simplified visa and labour conditions, and has English as an official language. Judges of AIFC`s Court have exclusive jurisdiction over disputes between the AIFC's participants.

Withholding taxes

Generally, Kazakhstan-sourced income of non-residents is subject to withholding tax (WHT) at the rates shown in the table below.

WHT on certain types of activities

Income of non-residents from provision of services in Kazakhstan is subject to WHT at 20%, including certain types of services (management, financial, consulting, engineering, marketing, auditing, and legal) that are deemed as Kazakhstan-sourced income disregarding the place of their actual performance.

WHT on dividends

A non-resident legal entity is exempt from WHT on dividends if the following are met simultaneously:

- dividends are not paid to the entities registered in the 'black-listed' jurisdictions
- the holding period of shares or participation interest is greater than three years (this should include the holding period by a previous holder if such shares/participation interest were received as a result of reorganisation of a previous holder)
- the entity paying the dividends is not a subsurface user, and
- 50% or more of the value of the entity paying the dividends is not derived from property of a subsurface user.

At that, dividend income of a non-resident paid by a subsurface user should qualify for WHT exemption (provided all the above conditions are met) if such subsurface user is engaged in further processing activities, under specific conditions.

WHT on capital gains

A non-resident legal entity is exempt from WHT on capital gains if the following are met simultaneously:

- capital gains are not paid to the entities registered in the 'black-listed' jurisdictions
- the holding period of shares or participation interest is greater than three years (this should include the holding period by a previous holder if such shares/participation interest were received as a result of reorganisation of a previous holder)
- the entity from which the shares/participation interest are disposed is not a subsurface user, and
- 50% or more of the value of the entity from which the shares/participation interest are disposed is not derived from property of a subsurface user.

At that, capital gains of a non-resident that directly or indirectly disposes of shares/ participation interest of a Kazakhstan subsurface user should qualify for WHT exemption (provided all above conditions are met) if such subsurface user is engaged in further processing activities, under specific conditions.

Types of income at source of payment	WHT rate (%)
Dividends, capital gains, interest, royalties	15
Any income of a 'black-listed' entity	20
Insurance premiums under risk insurance agreements	15
Income from international transportation services; insurance premiums under risk reinsurance agreements	5
Other income	20

Benefits paid by a company to a shareholder, founder, participant, or related party, falling under the definition of constructive dividends, are taxed at a rate of 15%.

The rate of WHT may be reduced under an applicable DTT, provided that the following conditions are met simultaneously:

- Existence of bilateral DTT ratified by both parties.
- The non-resident does not create a PE in Kazakhstan.
- The non-resident timely provides to a Kazakhstan tax agent the qualifying tax residency certificate.
- The non-resident should be a beneficial owner in respect of income earned from Kazakhstan sources.

A list of bilateral DTTs concluded and ratified by Kazakhstan is shown below:

WHT rates between Kazakhstan and treaty countries as of 1 January 2018

	WHT (%)

Notes

1. 5% if the beneficial owner is a company owning, directly (or indirectly in case of Canada and the United Kingdom), at least 10% of the voting power of the company paying the dividends.
2. 5% (10% in the cases of Moldova and Serbia) if the beneficial owner is a company that directly holds at least 25% of the capital of the paying company.
3. 10% if the beneficial owner is a company directly or indirectly holding at least 20% of the capital of the paying company.
4. 5% if the beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of paying company.
5. 5% if the recipient is a company (other than a partnership) that directly owns not less than 20% of the capital of paying company.

6. 10% if the actual owner is a legal entity that owns not less than 30% of the authorised capital of the legal entity paying the dividends.
7. 10% if the beneficial owner is a company that directly holds at least 30% of the capital of the company paying the dividends.
8. 0% if dividends are paid in consideration of an investment of at least USD 50 million in the paying company.
9. 0% if the company receiving the dividends directly or indirectly holds at least 50% of the capital of the paying company and has made an investment in the company paying the dividends of at least USD 1 million, which investment is guaranteed in full or insured in full by the government of the first contracting state, the central bank of that state, or any agency or instrumentality (including a financial institution) owned or controlled by that government, and has been approved by the government of the other contracting state.
10. 5% (or 12.5% in case of Pakistan) if the beneficial owner is a company that directly owns (or indirectly in case of the Netherlands and Pakistan) at least 10% of the capital of paying company.
11. 5% if the beneficial owner is a company directly or indirectly owning, for the period of six months ending on the date on which entitlement to the dividends is determined, at least 10% of the voting power of the company paying the dividends.
12. 5% if the beneficial owner is a company (other than a partnership) that directly owns not less than 15% of the capital of the paying company.
13. 5% if the beneficial owner is a company that directly owns at least 70% of the voting power of the paying company.
14. 0% if the beneficial owner is the government of the other contracting state or any governmental institution or any economic unit established by governmental or similar bodies; 5% if the beneficial owner is a company that directly holds at least 5% of the capital of the company paying the dividends; additionally, 5% if the beneficial owner of dividends is an individual person.
15. 0% if the beneficial owner is the government of the other contracting state or any governmental institution or any economic unit established by governmental or similar bodies.
16. 0% applies to the credit sale of industrial, commercial, or scientific equipment, and the credit sale of merchandise by one enterprise to another enterprise.

Tax administration

Taxable period

The tax year in Kazakhstan is the calendar year.

Tax returns

Annual CIT declarations are due by 31 March of the year following the tax year-end. However, a taxpayer may take a 30 calendar-day extension of the deadline upon request.

Certain taxpayers are required to submit their estimated calculations of monthly advance payments of CIT.

The deadline for the majority of other tax returns is the 15th calendar day of the second month following the reporting period (usually the calendar quarter). However, a taxpayer may take a 15 calendar-day extension of the deadline upon request.

Payment of tax

CIT advance payments are due every 25th day of the month. Taxpayers with aggregate annual income during the tax period preceding the previous tax period of less than 325,000 times the MCI established for the relevant financial year (approximately USD 2.37 million) are exempt from the obligation to calculate and pay CIT advance payments. Payment of any outstanding CIT liabilities is required within ten calendar days following the submission of the annual CIT declaration (i.e. 10 April).

Most other taxes are payable by the 25th day of the second month following the end of reporting period (calendar quarter).

Fines and interest penalties

Late payment interest is reduced from 2.5 to 1.25 times the refinancing rate set by the National Bank per day of delay.

The National Bank refinancing rate is set at 9.5% *per annum*.

Substantial fines are imposed for understatement of tax liabilities. Generally, the fines amount to 50% of the understated tax, with lower rates for small and medium-sized businesses.

For advance CIT payments, an administrative fine of 20% applies for understated advance tax payments as compared to the finally declared CIT, provided the understated amount is greater than 20% of the final declared amount.

If a taxpayer is deemed to have concealed taxable income, a fine of up to 200% of the concealed amount may be assessed. Small and medium-sized businesses have lower rates.

Tax audit process

Kazakhstan tax authorities have the right to conduct regular tax audits (at least once a year). There are two types of audits, selective and unplanned.

The tax authorities choose taxpayers for selective audits based on special risk assessment criteria. Information about misstatements in tax returns or any other discrepancy may trigger an unplanned tax audit.

In 2019, taxpayers (tax agents) will be categorised by their activity as low, medium, or high risk, represented respectively with green, yellow, or red colour.

With respect to violations identified as a result of tax audit, the Tax Code introduced the following risk classification violations, for which various methods for elimination are provided:

- For high risk: Notification of the elimination of violations.
- For medium risk: Notification of violations.

The level of tax control for low-risk taxpayers is minimised.

Statute of limitations

The statute of limitations for tax purposes in Kazakhstan is five years; it may be extended up to seven years in the part relating to transfer pricing matters. For taxpayers operating under subsurface use contracts, the tax authorities maintain the right to assess or revise the assessed amount of EPT and other taxes and obligatory payments to the state budget, where a methodology of calculation uses one of the following indices: internal rate of return (IRR) or internal revenue rate or R-factor (earning yield), during the effective period of a subsurface use contract and five years after the end of the effective period of the subsurface use contract.

Starting from 1 January 2020, the statute of limitation period for tax liabilities will be:

- Five years for subsurface users and taxpayers subject to horizontal monitoring.
- Three years for other business entities.

Topics of focus for tax authorities

Tax audits may be comprehensive or thematic. Comprehensive tax audits cover all applicable taxes, while thematic tax audits may cover only some specific tax liabilities. As a rule, the Kazakhstan tax authorities are form, rather than substance, driven during tax audits.

Other issues

Accounting system

Kazakhstan legal entities should maintain accounts and produce financial statements in accordance with IFRS or national accounting standards (depending on the size of the company and other factors). In most cases, tax treatment follows the accounting treatment.

United States (US) Foreign Account Tax Compliance Act (FATCA)

On 11 September 2017, Kazakhstan and the United States signed an intergovernmental agreement (IGA) under Model I to improve international tax compliance with respect to the US FATCA, which will enable the automatic exchange of financial information on each country's resident taxpayers to support tax enforcement efforts.

The IGA will be in force after the parties notify each other in writing that all necessary internal procedures have been completed.

Multilateral Convention on Mutual Administrative Assistance in Tax Matters (Strasbourg Convention)

Kazakhstan is a signatory of the Strasbourg Convention (ratified in December 2014) for administrative co-operation with other states in the assessment and collection of taxes with a view to combating tax avoidance and evasion.

Kazakhstan did not join multilateral competent authority agreements on automatic exchange of information under the Strasbourg Convention.

The Organisation for Economic Co-operation and Development (OECD) Base Erosion and Profit Shifting (BEPS) project

Kazakhstan joined the Inclusive Framework on BEPS in January 2017. By joining the framework, Kazakhstan pledged to adopt and promote the implementation of the four minimum standards designed by the OECD in the BEPS project. In 2018, Kazakhstan is planning to sign the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS and the Common Reporting Standards (CRS) approved by OECD Council.

Significant developments

Tax amnesty on foreign income

The Finance Act, 2016 (which was assented to law on 13 September 2016) introduced a provision effective 1 January 2017 in the Tax Procedures Act (TPA) that will grant a tax amnesty to taxpayers who received untaxed Kenya-sourced income or assets, which are now located outside Kenya.

The Commissioner will refrain from assessing or recovering taxes, penalties, and interest in respect of any year of income ending on or before 31 December 2016 and from following up on the sources of income under the amnesty where:

- the income has been declared for the 2016 tax year by a person earning taxable income in Kenya, and
- the returns or accounts for the 2016 tax year are submitted on or before 30 June 2018.

The amnesty shall not apply:

- to income earned in Kenya where the person earning the income has already been assessed to tax in Kenya, and
- where a person making an application for the amnesty is under a tax audit or investigation by the Commissioner.

Under the Finance Act, 2017 (assented into law on 21 June 2017), the amnesty deadline was extended from 31 December 2017 to 30 June 2018. Further, on 17 July 2017, the Kenya Revenue Authority (KRA) issued revised guidelines on the amnesty (which are dated 10 July 2017). The original guidelines were published by the KRA on 8 March 2017.

The Finance Act, 2017 and the revised guidelines have clarified that for taxpayers to be eligible for the amnesty, declared funds will need to be transferred back to Kenya. Where no funds have been transferred within the period of the amnesty (period up to 30 June 2018), there shall be a five-year period (i.e. up to 30 June 2023) for the remittance, but a penalty of 10% shall be levied on the remittance. Funds have been defined as 'cash declared in the returns or accounts for purposes of transfer back into the country'.

The guidelines provide that an application for the tax amnesty should be made by filing an Amnesty Return on i-Tax, making full and accurate disclosure of assets and income, including confirmation of the actual cost or best estimate of the market value of all assets. The return shall take the format of Form A/37B as set out on i-Tax. The Amnesty Return can be accessed by logging onto your individual i-Tax account and downloading the return. An acknowledgement notice will be issued upon submission of the return declaration and thereafter a certificate will be issued upon approval of the application, where all the requirements are met.

The guidelines do not stipulate any preclusions for taxpayers to transfer the funds repatriated to Kenya under the amnesty back to the foreign country thereafter.

Proposed tax reforms

The government of Kenya's strategy on tax and revenue reforms aims to significantly grow revenue in the 2017/18 fiscal year. To this end, several tax policies and revenue administration reforms have been put in place to enhance taxpayer education, make greater use of technology, and implement a simplified tax regime for the informal sector.

Specific changes introduced

Incentives for businesses operating in special economic zones (SEZs)

The Finance Act, 2017 has introduced a 100% investment deduction for capital expenditure on buildings and machinery. For SEZs located outside Nairobi and Mombasa, an investment deduction equal to 150% is applicable on capital expenditure on buildings and machinery.

The Finance Act, 2017 has exempted withholding tax (WHT) on dividends payable to non-residents by SEZ enterprises, developers, and operators.

Further, a WHT rate of 5% is now applicable on management fees, professional fees, training fees, and royalties payable by SEZ enterprises, developers, and operators to a non-resident person.

Interest payments payable by SEZ enterprises, developers, and operators to a non-resident person have also been incentivised under Finance Act, 2017 and shall now attract WHT at the rate of 5%.

Taxes on corporate income

Resident companies are taxable in Kenya on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are also taxed on income derived from business activities outside of Kenya.

Non-resident companies are subject to Kenya corporate income tax (CIT) only on the trading profits attributable to a Kenyan permanent establishment (PE).

The rate of CIT for resident companies, including subsidiary companies of foreign parent companies, is 30%. The CIT rate for branches of foreign companies and PEs is 37.5%.

Special rates

There are special rates for certain resident and non-resident companies as set out below.

Entity	CIT rate (%)
Export processing zone (EPZ) enterprises:	
First ten years	0
Next ten years	25
Thereafter	30
Registered unit trusts/Collective investment schemes	Exempt (subject to conditions)
Newly publicly listed companies:	
20% of shares listed: first three years after listing	27
30% of shares listed: first five years after listing	25
40% of shares listed: first five years after listing	20
Companies listed on securities exchange	25 (first five years)
SEZ enterprises, developers, and operators	10 (first ten years); 15 (succeeding ten years)
Local motor vehicle assembly companies	15 (first five years); 15 (succeeding five years, subject to conditions)
Rates on gross income of non-residents derived from Kenya:	
Transmission of messages	5
Ownership or operation of ships and aircraft	2.5

Local income taxes

There are no county or provincial taxes on income, as all taxes are collected by the national government. However, county governments are empowered by the Constitution to impose property and entertainment taxes at the county level.

Corporate residence

Kenya-incorporated companies are treated as Kenyan-tax resident. Additionally, companies incorporated overseas are also treated as Kenya resident if their 'management and control is exercised in Kenya in a particular year of income under consideration'. A company may also be declared a tax resident in Kenya pursuant to a declaration in a legal notice by the Cabinet Secretary for the National Treasury.

Permanent establishment (PE)

A business carried on in Kenya through a fixed place of business gives rise to a PE, as does a building site, or a construction or assembly project, that has existed for six months or more.

The definition of a PE has been extended to include a dependent agent that habitually concludes contracts on behalf of others. This definition is closer to that contained in the Organisation for Economic Co-operation and Development (OECD) Model Convention on Double Tax Treaties (DTTs).

Note that the definition of a PE may be modified by a DTT.

Other taxes

Value-added tax (VAT)

VAT is levied under the VAT Act, 2013. VAT is a tax on value addition and is accounted for using an input-output mechanism. There are four types of supplies that attract different VAT rates: 16% for taxable supplies, 0% for zero-rated supplies, exempt supplies, and out of scope supplies.

VAT registration is required for persons making taxable supplies over 5 million Kenya shillings (KES) in a 12-month period. In determining the threshold, it excludes the:

- sale of capital assets
- sale of a person's enterprise, or
- cessation of business permanently.

A person making taxable supplies below the registration threshold may voluntarily apply to the Commissioner and register for VAT.

Input tax on a taxable supply or import may be deducted from the tax payable by a registered person on supplies made by one in a tax period to the extent that the supply or importation was acquired to make taxable supplies. Input tax is allowable for deduction within six months after the end of the tax period in which the supply or importation occurred.

Changes introduced by the Finance Act, 2017

The Finance Act, 2017 (the Act) has effected numerous changes, focusing primarily on zero rating as the core VAT incentive and targeted at economically significant sectors of the economy, to assist with their development. The prominent VAT changes are outlined below:

- In a bid to stimulate local manufacturers and the agricultural sector, the Act has zero-rated agricultural pest control products and all inputs and raw materials, whether produced locally or imported, supplied to manufacturers of agricultural pest control products. This exemption will allow local manufacturers to be more competitive and also promote the agricultural sector by reducing the cost of production.
- The Act has exempted from VAT the supply of locally assembled tourist vehicles. This is a positive move towards promoting local assemblers as well as the tourism sector.
- The Act has exempted from VAT asset transfers and other transactions related to the transfer of assets into Real Estates Investment Trusts (REITs) and Asset Backed Securities (ABSs). This exemption will reduce the overall cost of setting up REITs and ABSs.
- VAT exemption for Sharia-compliant finance products. The Act has harmonised the VAT incentives offered across the financial services industry by providing for similar VAT treatment of Islamic finance products as with conventional finance products.
- The Act has zero-rated taxable goods supplied to marine fisheries and fish processors. This is aimed at reviving the fisheries sector and ensuring increased utilisation of marine resources as part of the economic growth agenda.
- Milk and cream, not concentrated nor containing added sugar or other sweetening matter, are now zero-rated by the Act.
- The Act has zero-rated food commodities, such as cassava flour, maize (corn) flour, wheat or meslin flour, and ordinary bread.

Value Added Tax Regulations, 2017

The Value Added Tax Regulations, 2017 (the Regulations) have been published by the Cabinet Secretary for the National Treasury more than three years since the enactment of the Value Added Tax Act, 2013 (VAT Act) in September 2013. Taxpayers have been relying on outdated Value Added Tax Regulations, 1994. The Regulations, which took effect from 4 April 2017, are subsidiary legislation meant to facilitate the efficient implementation of the principal legislation, the VAT Act.

The most notable amendment in the Regulations are procedures relating to the exportation of goods and services. Regulation 13 stipulates that:

- Goods are exported from Kenya when they are entered for export under the EAC Customs Management Act and delivered to a recipient outside Kenya.
- Services are exported from Kenya if they are provided to a recipient outside Kenya for use, consumption, or enjoyment outside Kenya; however, export of services does not include the following:
  - Taxable services consumed on exportation of goods unless the services are in relation to transportation of goods that terminates outside Kenya.
  - Taxable services provided in Kenya but paid for by a person who is not a resident in Kenya.

The documentation required as a proof of exportation of goods and services include:

- A copy of the invoice to the recipient.
- Proof of payment for the exported goods or services.
- For goods, a bill of lading, road manifest or airway bill, the export or transfer entry certified at the port of exit.
- For excisable goods, documents as per the Excise Duty Act, 2015.
- For services, other documents to prove that services were consumed outside Kenya.

Where the Commissioner has reasonable grounds to believe that the goods were not exported, the Commissioner may require evidence from a competent authority outside Kenya confirming that the goods were duly landed and entered for home consumption at a place outside Kenya.

It is important to note that the VAT Act defines services exported outside Kenya to be services provided for use or consumption outside Kenya.

While Regulation 13 requires an invoice showing the recipient of services to be a person outside Kenya as proof of exportation of services, the Regulation, on the other hand, excludes from the scope of exported services those services paid for by 'a person who is not resident in Kenya'.

The Regulation has not addressed the issue of how to determine the place of use, consumption, or enjoyment; the Regulation has rather introduced location of recipient of the services and the location from where payment for services is made as additional tests for determination of export of service. This appears to be a shift from the 'destination principle' enshrined in the VAT Act.

Import (customs) duty

Import duty is levied under the East African Community (EAC) Customs Management Act. Imported goods are generally subject to import duty at varied rates, including 0% for raw materials and capital goods (also exempt from VAT), 10% for intermediate goods, and 25% for finished goods. However, a different rate of duty can be prescribed by the Council of Ministers of the EAC partner states. Enterprises established in an EPZ are exempt from customs duty on machinery and inputs for products manufactured for export while licensed oil and gas contractors with a Production Sharing Contract

(PSC) with the government of Kenya are exempt from customs duty on importation of machinery, spares, and inputs used in exploration activities, excluding motor vehicles.

In addition, enterprises that are established under the SEZs enjoy import duty exemption. Where raw materials that are not subject to 0% import duty are used to manufacture goods for use locally within the EAC and for export outside the EAC, one may apply for remission under the EAC duty remission scheme. This is subject to a requirement for proof of export, and one may be required to execute a bond/bank guarantee. Further, assemblers of motor vehicles and motor cycles, among others, enjoy import duty remission under the scheme.

Additionally, there is a list of other items and persons that are exempted from import duties under the Act.

Changes introduced by the EAC Gazette Notices

The EAC Gazette Notice in June 2017 that introduced budgetary changes for all EAC partner states brought with it a number of changes, including a decrease in the import duty rates for worn clothing and other worn articles from 35% or 0.40 United States dollars (USD)/kg to 35% or USD 0.20/kg, whichever is higher; rice in the husk, husked brown rice, semi milled or wholly milled rice, and broken rice from 75% or USD 345/MT to 35% or USD 200/MT, whichever is higher; and poly vinyl alcohol (form of plastic used in various industries other than beverage) from 10% to 0%, among others. This has the effect of incentivising some key sectors of the economy and addressing a shortage of some commodities in the local market.

On the other hand, the import duty rate increased for various products, including the following: structures of iron and steel from 25% to 25% or USD 250/MT, whichever is higher; liquid petroleum gas (LPG) cylinders from 0% to 25%; road tractors for semi-trailers (tractor heads that pull semi-trailers) from 10% to 25%; and paper and paperboard products from 10% to 25%. The overall effect of these changes is to boost the local industries by protecting them from cheap imports.

The Gazette also granted remission of duty on some items for further manufacturing in Kenya, including wheat grain, with the applicable rate being 10% instead of 35%. A full duty remission on raw sugar for manufacture of sugar for industrial use has been granted on condition that if the finished product is sold within the EAC, then such goods shall attract duties, levies, and other charges provided in the EAC Common External Tariff (EACCET). Other products to be imported at 0% duty rate include inputs for ship assembly, inputs for assemblers of equipment specifically designed for the use by disabled, blind, and physically handicapped persons, raw materials and equipment to be used in the manufacture of textiles and footwear, iron and steel products of HS.7228.20.00 imported for the manufacturer of automobile bolts, nuts, and leaf springs, and inputs for the manufacture of filters. In addition, various assemblers of motor cycles (24 motor cycle assemblers) have been authorised to import specific quantities of completely knocked down (CKD) kits for manufacture of motor cycles at a duty rate of 10% for 12 months under the duty remission scheme.

The Gazette also amended the Fifth Schedule of the EAC Customs Management Act (EACCMA) by removing electrical energy saving bulbs for lighting (compact fluorescent bulbs) from the exemption schedule. Separately, machinery and inputs imported for use in the distribution of oil, gas, and geothermal have been included in the exemption schedule. The exemption was previously restricted to machinery or inputs used in oil, gas, and geothermal exploration and development only and not the machinery or input used for the distribution of these products.

Following the review and modification of the Harmonised Commodity Description and Coding System (HS Code) Version 2012 by the World Customs Organisation (WCO), the Council has reviewed the EACCET into a 2017 version in line with the modified WCO HS Code. This move ensures that the EACCET is up-to-date with regards to global advancement in technology and innovation

In addition to the above WCO HS Code update, in the EAC, the HS Code is usually updated every five years to include new products introduced in international trade that are not accommodated by the existing tariff codes, remove products that are no longer traded, and to take into account the concerns and feedback from international trade players. In this regard, the EACCET has released the new CET 2017.

Excise duty

Excise duty is imposed on the local manufacture or the importation of certain commodities and services. Excisable commodities include items such as bottled water, soft drinks, cigarettes, alcohol, fuels, and motor vehicles. Excisable services include mobile cellular phone services, fees charged for money transfer services, and other fees charged by financial institutions.

Below are the different categories of excisable products and their corresponding rates of excise duty. These include the changes introduced by the Finance Act, 2017.

Category	Goods description	Excise duty rates
Spirits	Spirits of undenatured ethyl alcohol; spirits liqueurs, and other spirituous beverages of alcoholic strength exceeding 10%	KES 200 per litre
Other alcoholic beverages	Wines	KES 150 per litre
	Beer, cider, perry, mead, opaque beer, and mixtures of fermented beverages with non-alcoholic beverages and spirituous beverages of alcoholic strength not exceeding 10%	KES 100 per litre
	Powdered beer	KES 100 per kg
Tobacco and tobacco products	Cigarettes with filters (hinge lid and soft cap)	KES 2,500 per mille
	Cigarettes without filters (plain cigarettes)	KES 1,800 per mille
	Cigars, cheroots, cigarillos, containing tobacco or tobacco substitutes	KES 10,000 per kg
	Electronic cigarettes	KES 3,000 per unit
	Cartridge for use in electronic cigarettes	KES 2,000 per unit
	Other manufactured tobacco and manufactured tobacco substitutes; homogeneous and reconstituted tobacco; tobacco extracts and essences	KES 7,000 per kg
Soft drinks	Fruit juices and vegetable juices	KES 10 per litre
	Water and other non-alcoholic beverages, not including fruit or vegetable juices	KES 5 per litre
Other excisable products	Plastic shopping bags	KES 120 per kg
	Food supplements	10%
	Motor vehicles of tariff heading 87.02, 87.03, and 87.04	20%
	Motor cycles of tariff heading 87.11 (excluding motor cycle ambulances and locally assembled motor cycles)	KES 10,000 per unit

Category	Goods description	Excise duty rates
Excisable services	Mobile cellular phone services and other wireless telephone services	10%
	Money transfer services	10%
	Financial services by financial institutions	10%

Finance Act, 2017 provisions

Inflationary adjustment

Effective 1 January 2018, the Finance Act provides for an inflationary adjustment to the rates of excise duty every two years instead of the provision for an annual adjustment as was provided for in the Excise Duty Act, 2015. This is a welcome move specifically for business planning purposes.

Relief for paint and resin manufacturers

Paint and resin manufacturers who use illuminating kerosene to manufacture paint and resin are now required to be registered with the KRA in order to be entitled to a refund of the excise duty already paid for this purpose.

Other changes

The following are the other changes introduced by the Finance Act:

- The excise duty rate for spirits and other spirituous beverages of alcoholic strength exceeding 10% has increased from KES 175 to KES 200 per litre.
- There has been an introduction of a two tier excise duty structure for cigarettes from the current single rate of KES 2,500 per mille. Cigarettes without filters are now chargeable to excise duty at the rate of KES 1,800 per mille while cigarettes with filters are chargeable at KES 2,500 per mille.
- Powdered beer has been defined to mean any powder, crystals, or any other dry substance that, after being mixed with water or any other non-alcoholic beverages, ferments to or otherwise becomes an alcoholic beverage.

Excisable goods supplied to St. Johns Ambulance for official use in the provision of relief supplies in Kenya have been exempted from excise duty. This is in addition to the goods already exempted under Part A of the Second Schedule to the Excise Duty Act, 2015.

Excise Duty Regulations

The Cabinet Secretary for the National Treasury also published regulations for the administration of the provisions of the Excise Duty Act, 2015. The introduction of The Excise Duty (Remission of Excise Duty) Regulations, 2017 has revoked the Customs and Excise (Remission of Excise Duty) Regulations, 2013. These Regulations empower the Cabinet Secretary to grant remission of excise duty with respect to beer made from sorghum, millet, or cassava, or any other agricultural produce grown in Kenya. The remission granted is 80% of the excise duty due and does not apply in respect of beer made from barley.

In addition, the coming into force of The Excise Duty (Excisable Goods Management System) Regulations, 2017, which has also revoked the Customs and Excise (Excisable Goods Management System) Regulations, 2013, requires all classes of excisable goods to be affixed with excise stamps, with the exception of motor vehicles. These regulations specify different stamp prices for different classes of excisable goods ranging from KES 0.6 to KES 2.8 per stamp.

Further, these regulations prescribe a robust system that addresses the loopholes in the entire supply chain from production of excisable goods to retail; including a requirement for retailers of excisable goods to ensure compliance with excise stamp requirements before they stock these products in their premises. These measures are likely to boost revenues for the exchequer while at the same time creating an even ground for the manufacturers and importers of excisable goods by reducing incidences of non-complying excisable goods.

Stamp duty

Stamp duty is payable on transfer of properties, leases, and securities. The Finance Act, 2017 has, however, introduced a provision exempting stamp duty on the transfer of title relating to *Sukuk* arrangements.

For other properties, other rates of stamp duty apply as specified in the Schedule to the Stamp Duty Act. The rates of stamp duty are shown below:

Activity	Stamp duty rate
Transfer of immovable property:	
Urban	4%
Rural	2%
Creation or increase of share capital	1%
Registration of a company (nominal share capital)	0%
Transfer of unquoted shares or marketable securities	1%
Transfer of quoted shares of marketable securities	Exempt
Registration of a debenture or mortgage:	
Collateral security	0.05%
Supplemental security	KES 20 per counter part
Lease:	
Period of three years and under	1% of annual rent
Period over three years	2% of annual rent

Tax on capital gains (CGT)

After being suspended for 30 years, the Finance Act, 2014 reintroduced CGT on transfer of property situated in Kenya. Therefore, gains derived on the sale or transfer of property by an individual or company carried out on or after 1 January 2015 are subject to a final tax at the rate of 5%. The definition of 'property' is widely drawn and includes securities in Kenyan resident private companies (though a specific exemption from CGT exists for securities listed in Kenya).

The High Court recently ruled that Paragraph 11A of the Eighth Schedule of the Income Tax Act cannot impose an obligation on a taxpayer to pay CGT on or before presenting a transfer instrument for registration as opposed to upon registration of the transfer instrument. The KRA has appealed the Court's ruling, but no final decision is available at this date.

Compensating tax

Where a company pays dividends out of profits that have not been subject to CIT, the company will be liable to pay a compensating tax. The compensating tax rate is 42.8%.

The aim of this tax is to ensure that all dividends are paid out of profits that have suffered CIT.

Turnover tax for small business taxpayers

A resident taxpayer whose annual gross turnover does not exceed KES 5 million will be taxed at the rate of 3% per quarter of one's turnover. In such a case, the taxpayer will not be required to register for VAT. Turnover tax does not apply to rental income, management or professional fees, training fees, income subject to WHT as a final tax, and income of incorporated companies. Loss making businesses are allowed to make an election to be exempted from turnover tax. A written application for exemption has to be made to the Commissioner, and there is a procedure to be followed.

Payroll taxes

Payroll taxes are administered through the pay-as-you-earn (PAYE) mechanism of deducting income tax from employment income (salaries, wages, bonuses, commissions, etc.). PAYE also applies to taxable non-cash benefits.

It is the employers' obligation to deduct and account for payroll taxes on a monthly basis.

The PAYE deducted thereof should be paid to the KRA by the 9th day of the following month.

The employer should submit a monthly PAYE return (can be filed online using the KRA's electronic platform, i-Tax). This return, known as form P10, declares the PAYE for a specific month.

The tax tables applicable to individuals are provided in the Taxes on personal income section of Kenya's Individual tax summary at www.pwc.com/taxsummaries.

Employers' National Social Security Fund (NSSF) contributions

Employers and employees are obligated to contribute monthly to the NSSF a standard contribution of KES 200 each. However, the new NSSF Act provides for a higher contribution rate of 6% of pensionable earnings with matching contribution from the employer. The implementation of the new Act awaits conclusion of a pending court case.

National Hospital Insurance Fund (NHIF) contributions

An employer has an obligation to deduct and remit NHIF contributions on a monthly basis.

NHIF is payable by the employee at graduated bands, up to a maximum of KES 1,700 per month. The maximum contribution is reached at a salary level of KES 100,000 per month. There is no corresponding employer contribution.

Business permit

Every person who carries on a business in Kenya is required to apply for a business permit from the relevant local authority. The business permit is usually based on the size of one's business and is renewable on an annual basis.

Tourism levy

The tourism levy is payable to the Tourism Fund by establishments dealing in tourism activities and services as listed in the Tourism Act at a rate of 2% of turnover.

National industrial training levy

All employers are required to pay to the Directorate of Industrial Training a monthly levy of KES 50 per employee. The only exemption is for employers remitting the tourism levy.

Railway development levy (RDL)

The RDL is payable on all imports into the country at 1.5% of the customs value of the goods. This was implemented to provide funds for the construction of a standard gauge railway track.

National construction levy

The National Construction Authority introduced a construction levy for all construction works that commenced after 6 June 2014. The levy is payable at the rate of up to 0.5% of the contract value of any construction project whose construction value exceeds KES 5 million. The levy is in relation to all construction projects relating to buildings, roads, water works, electrical works, and other works that require the service of a contractor.

Advance tax on motor vehicles

Advance tax is payable at varying annual rates depending on the motor vehicles and is creditable against any CIT payable for the year.

Fringe benefit tax (FBT)

The FBT is payable by an employer on interest-free or low-interest loans granted to employees, company directors, and their relatives. FBT is due, whether the employer is exempted from tax or not, at the resident CIT rate of 30%. The benefit is the difference between actual interest charged and the interest computed using the Commissioner's prescribed rate published quarterly. The directors and employees are not personally taxed on the benefit.

Betting, lottery, and gaming taxes

The Finance Act, 2017 has increased the amount of betting, lottery, and gaming taxes with effect from 1 January 2018 as follows:

Tax type	Current rate/Tax base	New rate/Tax base
Betting tax	7.5% of gaming revenue	35% of gaming revenue
Lottery tax	5% of lottery turnover	35% of lottery turnover
Gaming tax	12% of gaming revenue	35% of gaming revenue
Prize competition tax	15% of total gross turnover	35% of total gross turnover

Local government rent and rates

Rent and rates are levied annually on properties in Kenya, and the rateable value that is payable to the county government shall vary in each county based on various forms of ratings, such as area rate, agricultural rental value, or site value.

Branch income

The profit of a PE is taxed at the branch income tax rate of 37.5%, but there is no further taxation on the distribution of branch profits. There are certain restrictions with respect to the tax deductibility of certain costs, such as royalties, interest, and management fees, paid to the head office. However, these payments are also not subject to WHT.

Income determination

Inventory valuation

Inventory is stated at the lower of cost or net realisable value, with the exception of biological assets, whose value is prescribed by the Commissioner.

Capital gains

Tax on capital gains (CGT) has been reintroduced. *See Tax on capital gains (CGT) in the Other taxes section for more information*.

Dividend income

Kenya-source dividends are taxable income in Kenya unless the recipient is a Kenya resident company holding 12.5% or more of voting power of the company paying the dividend. However, for companies holding less than 12.5% of the votes, and other resident taxpayers, the 5% WHT is the final tax. Dividends paid to non-residents and any overseas holding company attract 10% WHT.

Dividends issued in a ratio not proportionate to shareholding of the existing equity are considered as taxable dividends to the extent of the disproportionate increase in the value of the ownership of the company.

Interest income

Interest income is generally included in the determination of taxable income unless expressly exempted for income tax.

Royalty income

Royalty income is subject to CIT at 30%. Given that royalties attract WHT, the WHT credit can be used to offset against the tax liability arising from the royalty income.

Foreign income

In Kenya, companies are taxed on income accrued or derived from Kenya. Resident companies with business activities outside Kenya are taxed on worldwide profits.

Deductions

The general principle in Kenya is that, unless expressly provided otherwise, expenses are tax deductible if they are incurred wholly and exclusively to generate taxable income.

Depreciation and depletion

No deduction is allowed for accounting depreciation or impairment. However, capital allowances are permitted at varying rates (on a straight-line basis) for certain assets used for business purposes, including buildings and machinery used in manufacturing, industrial buildings and hotels, machinery and plant, agricultural works, and mining.

Capital deductions	Rate (%)
Investment deduction:	
Qualifying investment exceeding KES 200 million (outside Nairobi or the municipalities of Mombasa or Kisumu)	150
Other qualifying investment	100
Industrial building allowance: *	
Certified education buildings (straight-line)	50
Qualifying rental residential or commercial building allowance (straight-line)	25
Other qualifying buildings (including hotels, straight-line)	1
Wear and tear allowance:	
Plant and machinery (reducing-balance):	
Class 1	37.5
Class 2	30
Class 3	25
Class 4	12.5
Telecommunication equipment (straight-line)	20
Other allowances:	
Computer software (straight-line)	20
Capital expenditure under a concessionaire arrangement	Equal proportions over the period of the concession
Mining specified minerals:	
Year one	40
Year two through seven	10
Farm works (straight-line)	100

* Different percentages apply for previous years.

Goodwill

Cost acquisition of goodwill and amortisation of goodwill are not deductible since they are capital in nature.

Start-up expenses

There is a specific provision allowing the deduction of certain start-up expenses, provided that the required conditions have been met.

Interest expenses

A deduction for interest is allowed only to the extent that the borrowings are used for the purpose of trade. Where a non-resident person controls a company alone or with four or fewer other persons, interest restriction or 'thin capitalisation' rules apply (*see Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible in the year in which it is evident that the debt has become irrecoverable. Detailed rules apply for making this determination.

Charitable contributions

Donations to qualifying charities and for certain public works are deductible, subject to certain conditions.

With effect from 3 April 2017, the Finance Act, 2017 provides that expenditure incurred by a taxpayer on donations for the alleviation of distress during national disaster as declared by the President will be deductible expenses for the taxpayer when determining taxable income. Deductible donations will be those made to:

- the Kenya Red Cross
- county governments, or
- any other institution responsible for the management of national disasters to alleviate the effects of a national disaster declared by the President.

Fines and penalties

Generally, fines and penalties are not deductible as they are not considered to be expenses incurred for producing profits chargeable to tax.

Taxes

Kenyan income taxes are not deductible while computing income tax of a person. However, foreign income taxes incurred are generally deductible as an expense if tax credit relief is not available under a DTT.

Net operating losses

Losses calculated under the tax rules may be carried forward against income from the same source for a maximum of ten years, including the year in which the losses arise. Losses cannot be carried back, except for petroleum companies, where losses can be carried back indefinitely.

Payments to foreign affiliates

Transfer pricing rules based on OECD principles apply to transactions with foreign affiliates (both companies and branches/PEs). Additionally, there are restrictions on the deductibility of expenses incurred outside of Kenya by non-residents with a Kenyan PE.

Group taxation

Each company in a group is taxed as a separate entity in Kenya.

Transfer pricing

A company that has related-party transactions is required to ensure such transactions are at arm's length. The company is therefore required to prepare a transfer pricing policy to justify the pricing arrangements. The Commissioner is allowed to specify conditions and procedures on the application of the methods for determining the arm's-length price and to adjust the prices if they do not conform to the arm's-length principle. The policy should be prepared and submitted to the KRA upon request.

Thin capitalisation

In Kenya, a company is thinly capitalised if all of the following occur:

- The company is controlled by a non-resident person alone or together with four or fewer persons.
- The company is not a bank or financial institution.
- The highest amount of all loans held by the company at any time exceeds the sum of three times the revenue reserves (including accumulated losses) and the issued and paid up share capital of all classes of shares of the company.

A company that is thinly capitalised cannot claim a deduction on the interest expense incurred by the company on loans in excess of three times the sum of revenue reserves and issued and paid up capital of all classes of shares of the company. The company also cannot claim a deduction for any foreign exchange loss realised by the company with respect to any loans from its shareholders in the period that the company remains thinly capitalised.

For companies in the extractive sector, the debt-to-equity ratio is 2:1.

Deemed interest

The Kenyan tax legislation gives the Commissioner for Domestic Taxes the discretion to 'deem interest' on interest-free borrowings received by foreign-controlled entities in Kenya. The 'deemed interest' is based on the Commissioner's prescribed rates.

This means that WHT is due on the 'deemed interest' as if this was an actual finance charge. The WHT rate on payments of interest to non-residents is currently 15% (in the absence of a DTT).

Controlled foreign companies (CFCs)

Kenya has no specialised rules regarding CFCs.

However, there are restrictions on the deductibility of interest and foreign exchange losses of companies that are foreign controlled and thinly capitalised.

Tax credits and incentives

Foreign tax credit

There is no tax credit for foreign tax paid on business income except as provided for by a DTT (if applicable) between Kenya and the other country. However, foreign tax paid can be deducted as an expense.

Investment deduction

Qualifying investments exceeding KES 200 million incurred outside Nairobi or the municipalities of Mombasa or Kisumu are allowed an investment deduction of 150%. All other qualifying investments are allowed a 100% investment deduction in the year the asset is put into use.

Export processing zone (EPZ)

Companies located in an approved EPZ, principally to export goods, are taxed at a 0% CIT rate for ten years from its commencement and at a rate of 25% for the next ten years.

Special economic zones (SEZs)

Companies registered under the SEZ Act benefit from a reduced CIT rate of 10% in their first ten years of operation. The CIT rate in the succeeding ten years is then 15%.

The Finance Act, 2017 has introduced the following additional tax incentives to SEZ enterprises, developers, and operators with effect from 1 January 2018:

- Dividends payable to non-residents by SEZ enterprises, developers, and operators are exempt from WHT.
- Management fees, professional fees, training fees, and royalties payable by SEZ enterprises, developers, and operators to a non-resident person shall be subject to WHT at the rate of 5% (down from 20%).
- Interest payments payable by SEZ enterprises, developers, and operators to a non-resident person shall be subject to WHT at the rate of 5% (down from 15%).
- 100% investment deduction allowance for capital expenditure on buildings and machinery by an SEZ enterprise.
- 150% investment deduction allowance for capital expenditure on buildings and machinery by an SEZ enterprise located outside Nairobi and Mombasa counties.
- Supply of taxable goods and services to SEZ enterprises, developers, and operators licensed under the SEZ Act, 2015 are VAT exempt.

It should be noted that the 100% investment deduction is granted to the SEZ enterprise and not the SEZ developer who may have incurred considerable costs in putting up the buildings in the SEZ site.

The reduced CIT rate (of 10% for the first ten years of operation and 15% for the next ten years) for SEZ enterprises, developers, and operators has also been clarified to be applicable whether the SEZ enterprise sells its products to markets within or outside Kenya.

The Miscellaneous Fees and Levies Act, 2016 has also been amended to provide that export levy on the goods listed in the Schedule to that Act shall not apply to exports to SEZs. Goods destined for SEZs shall also be exempt from payment of import declaration fees (IDFs).

Listed companies

Companies listed on the Nairobi Securities Exchange are entitled to reduced rates of income tax for a period depending on the percentage of share capital listed (*see the Taxes on corporate income section for the rates*).

Withholding taxes

WHT is levied at varying rates (3% to 30%) on a range of payments to residents and non-residents. Resident WHT is either a final tax or creditable against CIT. Non-resident WHT is a final tax.

Payments	Resident WHT rate (%)	Non-resident WHT rate (%)
Dividend > 12.5% voting power	Exempt	10
Dividend < 12.5% voting power	5	10
Interest:		
Bearer instruments	25	25

Payments	Resident WHT rate (%)	Non-resident WHT rate (%)
Government bearer bonds (maturity ≥ 2 years)	15	15
Bearer bonds (maturity ≥ 10 years)	10	N/A
Other	15	15
Qualifying interest:		
Housing bonds	10	N/A
Bearer instruments	20	N/A
Other	15	N/A
Royalty	5	20
Winnings from gaming and betting (1)	Varied	Varied
Management or professional fees	5	20
Consultancy fees - Citizen of EAC member states	5	15
Training (including incidental costs)	5	20
Rent/leasing:		
Immovable property	N/A	30
Others (other than immovable)	N/A	15
Pension/retirement annuity	Varied (2)	5
Contractual fees	3	20
Sale of property or shares in oil, mining, or mineral prospecting companies	10	20

Notes

1. The taxation of the betting, lottery, and gaming sector has undergone significant change in Finance Act, 2017. *See the Other taxes section.*
2. This will vary depending on the payments paid out.

Oil and gas sector WHT rates

WHT rates applicable on payments to non-residents in the oil and gas sector are shown in the table below:

Payments	Non-resident (oil and gas) WHT rate (%)
Dividends	10
Interest	15
Natural resource income	20
Management or professional fees	12.5

Double tax treaties (DTTs)

Lower rates may apply to non-residents where there is a DTT in force. The table below shows the maximum rates of tax that recipients in those countries with a DTT with Kenya can be charged on dividends, interest, royalties, and management and professional fees. The table only includes agreements that are currently in force.

	WHT (%)		
Recipient	Dividends	Interest	Royalties and management/ professional fees
Canada	15	15	15
Denmark	20	20 (1)	20
France	10	12	10 (5)
Germany	15	15 (1)	15

	WHT (%)		
Recipient	Dividends	Interest	Royalties and management/ professional fees
India	10 (4)	10 (4)	10 (4)
Iran	5	10	10
Norway	15	20 (1)	20
South Africa	10	10	10 (5)
South Korea	10 (6)	12	10
Sweden	15	15	20
United Arab Emirates	5	10	10
United Kingdom	15	15 (1)	15 (2)
Zambia	0 (3)	0 (3)	0 (3, 5)

Notes

1. Interest paid by the government and the Central Bank of Kenya is tax-exempt.
2. The rate is 12.5% for management and professional fees.
3. No Kenya tax is due if subject to tax in Zambia.
4. These rates are effective from 1 January 2018.
5. Management and professional fees subject to normal WHT rates.
6. 8% if the beneficiary holds at least 25% of the capital of the company paying the dividends.

Where the treaty rate is higher than the non-treaty rate, the lower rate applies.

Treaties awaiting conclusion and/or ratification: Italy, Kuwait, Mauritius, Netherlands, Qatar, Seychelles, Singapore, and Thailand.

Tax administration

Taxable period

A company has discretion to determine its financial year-end, provided it is a 12-month period. However, any changes in this must be approved by the Commissioner of the KRA.

Tax returns

Resident companies and PEs of non-resident companies must file a self-assessment tax return annually. The return is accompanied by a tax computation and financial statements, amongst other schedules. The return is due within six months following a company's financial year-end.

Payment of tax

Instalment tax payments must be made quarterly during the year based on the lower of 110% of the previous year's liability or an estimate of the current year's liability. Agricultural companies are required to pay estimated tax in two instalments of 75% and 25% during the year. Any balance of tax at the end of the year must be paid within four months of the financial year-end.

Payment of agency taxes

The tax withheld from payments must be paid by the 20th day of the month following the month in which the deduction is made.

Penalties for non-compliance

If a self-assessment tax return is not submitted by the due date, a penalty of 5% on the unpaid tax for the year may be imposed, subject to a minimum of KES 20,000. Failure or late submission of an EPZ company return will be subject to a penalty of KES 2,000 per day for as long as the failure continues.

A penalty of 20% and interest at 1% per month are imposed on underestimation and late payment of instalment tax and any balance of tax. Interest is charged only on the principal tax due, capped at the amount of the principal tax due.

Failure to make a deduction or to remit the WHT deducted attracts a penalty equal to 10% of the amount of tax involved (subject to a maximum of KES 1 million) and accrues interest at 1% per month.

Tax Procedures Act (TPA)

The TPA, which entered into force on 19 January 2016, aims to provide uniform procedures for consistency and efficiency in the administration of tax laws, facilitate tax compliance by taxpayers, and promote the effective and efficient collection of tax.

The TPA also harmonises and consolidates tax procedural rules. For example, the TPA provides that a taxpayer should keep records for five years. Previously, the different tax laws, such as the VAT Act 2013, Income Tax Act, and Excise Act, prescribed different timeframes that records should be kept by a taxpayer. Given that it is a relatively new piece of tax legislation, there are some inconsistencies when you mirror the TPA and other tax legislation, though we expect these inconsistencies to be addressed with time.

The Tax Appeal Tribunal Act

The Tax Appeal Tribunal Act, which entered into operation on 1 April 2015, establishes one tribunal that will hear appeals for all tax areas. Previously, income tax matters would be heard by the Local Committee whereas VAT matters would be heard by the Tax Tribunal.

Tax audit process

There is no prescribed audit process, as an audit can be triggered by various factors as determined by the KRA. Generally, tax audits should be carried out after every two to four years. The audit or inspection will commence with a request from the KRA for the taxpayer to make available any such records or information as may be required.

Statute of limitations

The tax authorities must commence an audit before the expiry of seven years after the end of a year of income. The KRA may go back past seven years where fraud is suspected. There is no time limit for completing tax audits. However, they are normally completed within a reasonable time, especially if there are no major disputes.

Topics of focus for tax authorities

- Implementation of an aggressive stop filer and nil filer programme to reverse the trend towards non-filing and non-payment.
- Linking of the counties' databases with KRA systems to facilitate identification of potential tax defaulters from the payers of the various license fees/levies and suppliers of goods and services.

- To detect fraudulent behaviour and potential tax evasion by using risk-based approaches and by providing analytic capability and intelligence information to users for better decision making and revenue growth.

Significant developments

The main focus of the 2018 Corporate Income Tax Law (CITL) reform is to encourage job creation by reforming the existing tax credits for corporate investment to create jobs and additional incentives to stimulate youth employment. Another focus is placed on strengthening the collection of income tax on high-income earners by expanding tax revenue sources through raising the CIT rate for taxable income over 300 billion Korean won (KRW). In addition, the reform proposals include significant changes that would affect cross-border transactions of multinational companies. In the government's commitment to implement the Organisation for Economic Co-operation and Development's (OECD's) recommendations under the base erosion and profit shifting (BEPS) project, the proposals contain new rules to restrict the deduction for hybrid financial instruments and interest expense deductions.

Taxes on corporate income

Resident corporations are taxed on their worldwide income, whereas non-resident corporations with a permanent establishment (PE) in Korea are taxed only to the extent of their Korean-source income. Non-resident corporations without a PE in Korea are generally taxed through a withholding tax (WHT) on each separate item of Korean-source income (*see the Withholding taxes section*).

The following tax table summarises the CIT rates applicable for the fiscal year starting on or after 1 January 2018:

Tax base (KRW million)		Tax rate *	
Over (column 1)	Less than	Tax on column 1 (KRW) *	Marginal tax rate (%)
0	200	0	10
200	20,000	20	20
20,000	300,000	3,980	22
300,000		65,580	25

* Before applying the local income tax.

Additional tax on corporate income

The tax reform has provided that the 10% additional tax provision introduced in 2015 to facilitate the use of corporate retained earnings to fund facility investment, payroll increase, and dividend payment, which was supposed to be terminated by the end of December 2017, has been extended for three additional years until the end of December 2020 and raised tax rates to 20%. The additional tax shall apply to companies whose net assets exceed KRW 50 billion (excluding small and medium-sized enterprises [SMEs]) and companies belonging to business groups subject to restrictions on cross-shareholdings under the Act on Monopoly Regulation and Fair Trade.

Companies should elect one of the following methods in computing the additional tax:

- ([adjusted taxable income for the year x 65%] - the total amount of facility investment, wage increases, and mutual cooperation payments) x 20%, or
- ([adjusted taxable income for the year x 15%] - the total amount of wage increases and mutual cooperation payments) x 20%.

Agriculture and fishery surtax

When a corporate taxpayer claims certain tax credits or exemptions under the Special Tax Treatment Control Law (STTCL), a 20% agriculture and fishery surtax is levied on the reduced CIT liability.

Minimum tax

Corporate taxpayers are liable for the minimum tax, which is defined as the greater of 10% (if the tax base is KRW 10 billion or less, 12% on the tax base exceeding KRW 10 billion but not more than KRW 100 billion, 17% on the tax base exceeding KRW 100 billion) of the taxable income before certain tax deductions and credits pursuant to the STTCL or the actual CIT liability after various deductions and credits.

For SMEs, the minimum tax is the greater of 7% of taxable income before certain tax deductions and credits or actual CIT liability after the deductions and credits. For middle market companies that exceed the size of SMEs (so-called 'medium-scale companies'), an 8% minimum tax rate is applicable for the first three years, starting from the year when the size exceeds an SME for the first time, and a 9% rate is applicable for the next two years.

Local income tax

The local income tax is a separate income tax that has its own tax base, tax exemption and credits, and tax rates. The local income tax rates for corporations are 1% on the first KRW 200 million, 2% for the tax base between KRW 200 million and KRW 20 billion, 2.2% for the tax base between KRW 20 billion and KRW 300 billion, and 2.5% for the excess.

Corporate residence

A corporation having its head office or principal office in Korea is a resident corporation. A corporation with a place of effective management in Korea is also treated as a resident corporation.

Permanent establishment (PE)

A non-resident corporation is generally deemed to have a tax presence (i.e. PE) in Korea in the following cases, among others:

- It has any fixed place of business in Korea, where the business of the entity is wholly or partly carried on.
- It is represented by a dependent agent in Korea, who has the authority to conclude contracts on its behalf and who has repeatedly exercised that authority.

- Its employee(s) provides services in Korea for more than six months within 12 consecutive months.
- Its employee(s) continuously or repeatedly renders similar services in Korea for two or more years, even if each service visit is for less than six months within 12 consecutive months.

Exceptions to a PE in Korea for a non-resident corporation include fixed places of business used only for purchasing or storage of goods, advertising, publicity, collecting or furnishing of information, or other activities that are preparatory or auxiliary in nature.

Other taxes

Value-added tax (VAT)

VAT is levied at a rate of 10% on the supply of goods and services, except zero-rated VAT on certain supply of goods and services (e.g. goods for exportation, certain eligible services rendered to non-residents earning foreign currency, international transportation service by ships and aircraft) and exemption on certain goods and services (e.g. basic life necessities and services, such as unprocessed foodstuffs and agricultural products; medical and health services; finance and insurance services; duty-exempt goods).

Electronic VAT invoicing is a compulsory requirement. If a taxpayer fails to issue the electronic VAT invoice or report electronically to tax authorities, the relevant penalties shall be imposed.

Customs duties

Customs duties are generally assessed on imported goods. 'Importation' refers to the delivery of goods into Korea (in case of goods passing through a bonded area, delivery of such goods into Korea from such a bonded area) to be consumed or to be used in Korea.

Property tax

An annual property tax ranging from 0.07% to 5% is charged on the statutory value of land, buildings, houses, vessels, and aircraft. Five times the property tax rate is applied to factories that are newly constructed or expanded in a designated metropolitan area for the first five years.

Securities transaction tax

Securities transaction tax (at the rate of 0.5% for unlisted shares or interest) is imposed on the transfer of shares or interest, but the government is authorised to adjust the tax rate in certain circumstances. The flexible tax rate prescribed by the Presidential Decree is 0.3% (including 0.15% of agriculture and fishery surtax) for shares traded on the Korea Stock Exchange and 0.3% for shares traded on the Korean Securities Dealers Automated Quotations (KOSDAQ) or the Korea New Exchange (KONEX).

Acquisition tax

Acquisition tax is charged on the price of real estate, motor vehicles, construction equipment, golf membership, boats, etc. The acquisition tax rate varies depending on the type of assets subject to the tax, ranging from 2% to 7%. A weighted rate is charged on acquisitions in a designated metropolitan area or on acquisition of luxury items, such as villas, golf courses, and yachts.

Stamp tax

Stamp tax is levied on a person who prepares a document certifying establishment, transfer, or change of rights to property in Korea. The stamp tax ranges from KRW 50 to KRW 350,000, depending on the type of taxable document. The electronic stamp system has been implemented to make it mandatory to use stamps bought online rather than paper stamps bought in banks or post offices.

Registration tax

Registration tax ranging from 0.02% to 5% is charged upon the act of registering the creation, alteration, or lapse of property rights or other titles and incorporation with the concerned authorities. Registration tax upon the registration of title or right and incorporation for corporations located in a designated metropolitan area may be subject to three times the normal rate of 0.4%.

Gift tax

Gift tax is imposed on a person who acquires any property or value increase by gift. If CIT or individual income tax is imposed on the gifted property, however, the gift tax shall not be imposed. Gift tax ranges from 10% on not more than KRW 100 million in tax base to the top marginal tax rate of 50%.

Inheritance tax

Inheritance tax is imposed upon a person or a company that acquires property through inheritance or bequest. However, an inheritor that is a for-profit company shall be exempt from the inheritance tax. Inheritance tax rates are the same as those for gift tax.

Payroll taxes

Employers are required to withhold income taxes at source on a monthly basis, finalise their employees' tax liability, and file the final tax settlement receipt with the tax authorities no later than the tenth day of March of the following year.

Social security contributions

There are four types of social security contributions in Korea, namely national pension, national health insurance, employment insurance, and worker's accident compensation insurance. Employers and employees are almost equally required to bear a total amount of 8.5% of salaries for the first three types of social security taxes (i.e. national pension, national health insurance, and employment insurance), while the worker's accident compensation insurance is borne by employers only, which varies by industry, ranging from 0.85% (banking, insurance) to 28.25% (coal mining) of salaries.

Branch income

In general, a branch office of a foreign corporation is taxed in the same manner as resident companies.

Remittance of retained earnings from a Korean branch to its head office is subject to reporting to a designated foreign exchange bank in Korea under the Foreign Exchange Transaction Act.

If the tax treaty between Korea and the country in which a foreign corporation is residing allows the imposition of a branch profits tax, the tax is imposed on the adjusted taxable income of the Korean branch.

Where applicable, the branch profits tax is levied in addition to the regular CIT, which is imposed at the rate of 20% (or at a reduced rate as provided in a treaty) of the adjusted taxable income of the Korean branch.

Income determination

Gross income consists of gains, profits, income from trade and commerce, dealings in property, rents, royalties, and income derived from any transactions carried on for gain or profit.

Inventory valuation

Inventories generally are stated at either the lower of cost or market (LCM) or cost method. Any one of LCM and six cost methods, including specific identification, first in first out (FIFO), last in first out (LIFO), weighted-average, moving-average, and retail method, can be elected for tax purposes. The method elected should be applied consistently each year unless an application for change has been submitted before three months from the year-end. Different valuation methods may be used for different categories (i.e. manufactured goods and merchandised goods, semi-finished goods and goods in process, raw materials, supplies in stock) and different business places.

For inventory costing under Korean International Financial Reporting Standards (K-IFRS), LIFO is not an acceptable accounting method. Consequently, in a year when a taxpayer first adopts K-IFRS and duly reports the change of inventory valuation method from LIFO to one of the other costing methods (e.g. FIFO, weighted average), the taxpayer is allowed to exclude the inventory valuation gain arising from the change and include it in its taxable income over the next five-year period using a straight-line method.

Stock valuation

The valuation of securities or bonds shall be made using the cost method. For the cost method, the weighted-average cost method or moving-average cost method shall be applied for the purpose of valuation of securities, and the specific-identification method may be used for valuation of bonds.

Capital gains

Generally, capital gains are taxed at the same CIT rate as ordinary taxable income. For the purposes of taxation, gross income does not include income derived from gains from capital transactions, such as capital surplus, gains on reduction of paid-in capital, etc. However, gains from treasury stock transactions are taxed, and losses are deductible from taxable income.

Note that capital gains from the disposal of non-business purpose land or houses may be subject to additional capital gains tax at the rate of 10% (40% in the case of non-registered land or houses) in addition to the normal CIT.

Dividend income

All distributions to shareholders are taxed as dividend income, whether paid in cash or in stock.

However, a qualified domestic holding company that owns more than 80% (40% in case of listed subsidiary) share ownership in its domestic subsidiary will receive a 100% deduction for dividends, while an 80% deduction is allowed for share ownership of 80% (40% in case of listed subsidiary) or less. A domestic corporation other than a qualified holding company will also receive a 100% deduction for share ownership of 100%, 50% for more than 50% (30% in case of listed subsidiary) share ownership, and 30% for share ownership of 50% (30% in case of listed subsidiary) or less.

Interest income

Except for certain cases, all interest income must be included in taxable income. Generally, interest income is included in taxable income as it is received.

Rental income

Income from the leasing of property shall be included in taxable income. In cases where a company is subject to an estimated tax by the tax authority due to the absence of books of accounts, the deemed rental income as calculated at a term deposit interest rate on the lease deposit received by the company will be included in taxable income.

Royalty income

Royalties are considered to be taxable income when earned.

Gains and losses on foreign currency translation

Companies are allowed to recognise unrealised gains and losses on foreign currency translation of their monetary assets and liabilities in a foreign currency. This recognition is also allowed with respect to currency forward transactions and swaps to hedge foreign exchange risks of such assets and liabilities. In this regard, a taxpayer can choose whether to recognise unrealised gains and losses or not for tax purposes. Once elected, the same method must be consistently used.

Foreign income

Resident corporations are taxed on their worldwide income. A Korean company is taxed on its foreign-source income as earned at normal CIT rates. To avoid double taxation, taxes imposed by foreign governments on the foreign-source income recognised by a resident company are allowed as a credit against CIT or as deductible expenses in computing the taxable income.

Generally, income of foreign subsidiaries incorporated outside Korea is not included in the taxable income of a resident company until the declaration of dividends from the foreign subsidiaries. Therefore, the Korean tax impact may be delayed through deferring the declaration of dividends unless the controlled foreign corporate (CFC) rule under the Law for Coordination of International Tax Affairs (LCITA) is applied.

The CFC rule provides that the undistributed earnings of a resident company's foreign subsidiary located in a low-tax jurisdiction (where the effective tax rate on the income before tax for the past three years averages 15% or less) are taxed as deemed dividends to the resident company that has direct and indirect interest of 10% or more in such subsidiary. The CFC rule does not apply in cases where a foreign subsidiary has fixed facilities (e.g. office, factory) in a low-tax jurisdiction for the conduct of business, it manages or controls the business by itself, and the business is mainly performed in the jurisdiction. Even in this case, however, where passive income (e.g. income from investment in securities or lending loans) is more than 50% of gross income, the CFC rule shall be applicable. Furthermore, in cases where the passive income is between 50% and 5% of the foreign subsidiary's gross income, the CFC rule will apply in a limited manner (i.e. a CFC's undistributed earnings will be included in taxable income of the CFC's domestic related parties in proportion of such passive income to its gross income). However, dividends will be excluded in calculating the amount of passive income if they are derived from shares issued by the company that is 10% or more owned by a CFC.

If dividends from a qualifying subsidiary are included in taxable income of a resident company, the foreign tax paid by a qualifying subsidiary on the subsidiary's taxable income is eligible for a foreign tax credit in the hands of the resident company regardless of whether there are tax treaties with the relevant foreign countries. For this purpose, a qualifying subsidiary refers to the company in which a resident corporation owns 25% or more of its shares for the period of six consecutive months or more prior to the date of dividend declaration. Unused foreign tax credits can be carried forward for five years.

Deductions

In general, expenses incurred in the ordinary course of business are deductible, subject to the requirements for documentary support.

A corporation's disbursements of more than KRW 30,000 for goods or services provided are required to be supported by qualifying evidences, such as credit card sales vouchers, cash receipts, tax invoices, and those vouchers and invoices stored in the company's enterprise resource planning (ERP) system. The corporation is required to maintain these documents for five years. If the corporation fails to maintain proper evidences, a 2% penalty shall be levied on the amount of disbursement.

Accrued expenses are not deductible until the expenses are fixed or determined.

Depreciation and amortisation

Depreciation of all property, plant, and equipment (PP&E), which includes buildings, machinery, and vehicles, used to generate income is allowed as a deduction for CIT. Generally, interest on debt acquired to purchase, manufacture, or construct PP&E must be capitalised until the PP&E is operational. This does not apply to the interest associated with the expansion or improvement of existing PP&E. A detailed list of fixed assets, gross values (including capitalised interest), the useful lives of the assets, and the current year's depreciation charge must be submitted to the tax authorities when filing the annual CIT return.

The tax law allows the following methods for calculating depreciation:

- Straight-line or declining-balance method for tangible fixed assets, other than plant and buildings.
- Straight-line method for plant, buildings, and intangible assets.
- Service-output or straight-line method for mining rights.

- Service-output, declining-balance, or straight-line method for tangible fixed assets used in mining.

In determining depreciation using a straight-line method, salvage value of the assets is regarded as zero. However, where the declining-balance method is used, 5% salvage value is required. Changes in the depreciation method must be approved by the tax authorities in advance, and such approval may only be obtained in exceptional cases (i.e. merger between two corporations having different depreciation methods). Although the tax law specifies the standard useful lives for each type of assets, the useful life of a fixed asset can be increased or decreased by 25% of the standard useful life at the taxpayer's election. The elected depreciation method and useful life should be consistently applied. Also, a taxpayer can apply for a change to the useful life within 50% of the standard useful life, which requires an approval from tax authorities.

The standard useful life and the scope of elective useful life for assets are provided in the following tables:

Tangible fixed assets	Standard useful life (years)	Scope of elective useful life (years)
Vehicles (excluding those used for transportation businesses and leasing service of machinery, equipment, and consumer goods), tools, equipment, and fixtures	5	4 to 6
Ships and aircraft (excluding those used for fishery, transportation, and leasing service of machinery, equipment, and consumer goods)	12	9 to 15
All buildings and constructions of brick structure, block structure, concrete structure, mud structure, mud wall structure, wooden structure, wooden frame mortar structure, and other structures	20	15 to 25
All the buildings and constructions of steel-frame/iron bar concrete structures, stone structures, brick/stone structures, steel-frame structures	40	30 to 50

Note that machinery and equipment used for specific industries shall be subject to different useful lives from four years (e.g. bag manufacturing) to 20 years (e.g. water supply service).

Intangible fixed assets	Useful life (years)
Goodwill, design rights, utility model rights, trademarks	5
Patents	7
Fishery rights, extraction rights under the law of development of mineral resources at the sea bottom (may elect activity method), right of management for toll roads, water rights, right of use for electricity and gas service facilities, right of use for tap water facilities for industrial use, right of use for general tap water facilities, right of use for heating facilities	10
Mining rights (may elect activity method), right of use for exclusive telegraph and telephone facilities, right of use for exclusive sidetracks, right of management for sewage disposal, right of management for tap water facilities	20
Right of use for dams	50

Note that for used fixed assets (including assets acquired through mergers or spin-offs) that have been used for more than half of their standard useful lives, a new useful life may be filed with the tax authorities of between 50% of the standard useful life and the standard useful life.

According to the CITL, depreciation is allowed for tax deduction only when expensed for book purposes. However, in order to alleviate any dramatic increase in tax burden due to decreased depreciation expenses through the adoption of K-IFRS, additional expense deduction may be allowed through tax adjustment. For tax purposes, depreciable assets acquired on or before 2013 may be depreciated at the rate equivalent to the average of three years before the adoption of K-IFRS. Depreciable assets acquired after 2014 may be depreciated using the tax useful lives only if they are the same type of existing assets used for the same business line and the calculation method of deduction is regulated.

Deduction of company car expenses

For company cars provided to officers or employees (whether owned or leased), the amended CITL includes requirements for a company to have appropriate operation records or sufficient evidence to claim the deduction. The depreciation of a company car is limited to KRW 8 million annually for CIT purpose. In addition, the deduction of company car expenses, including depreciation, shall be disallowed for the portion of private use.

Goodwill

Amortisable goodwill for tax purposes is defined as ‘value transferred with consideration, apart from transferred assets included in business transfer, valuated by taking into account business premium factors of the transferor such as permission/licence, legal privileges, geographical advantages, business secrets, credit, reputation, transaction partners, etc.’. Goodwill shall be amortised over five years using the straight-line method for tax purposes.

Start-up expenses

Start-up expenses, such as incorporation expenses, founders’ salary, and registration fees and taxes, are deductible if the expenses are recorded per the articles of incorporation and are actually paid.

Interest expenses

Interest incurred in the ordinary course of business is deductible as long as the related loan is used for business purposes. There are, however, a number of exceptions to the general rule, as follows:

- If borrowings from a foreign shareholder, or from a third party under a payment guarantee by the foreign shareholder, exceed two times the equity of the relevant foreign shareholder, the paid interest and discount fee as to the relevant excessive portion will be disallowed and further treated as a dividend payment.
- Debenture for which the creditor is unknown.
- Bonds and securities on which recipient of interest is unknown.
- Construction loans and loans for the purchase of land and fixed assets up to the date on which the assets are acquired or completed must be capitalised as a part of the cost of the asset and depreciated over the life of the asset. Interest after the date of completion or acquisition is deductible as incurred.
- Interest on loans related to non-business purpose assets or funds loaned to related parties.
- Interest expense paid to an overseas related company that exceeds 30% of taxable income before depreciation and interest of the domestic company.

Contingent liabilities

In general, contingent liabilities are not deductible, except for reserves under the following items, which are counted as losses within the tax limit:

- Reserves for bad debts.
- Liability reserves and emergency reserves prescribed in the Insurance Business Law.
- Reserves for non-profit organisations.
- Reserves for the write-off of a compensation claim set aside by trust guarantee funds in each business year.

The amounts enumerated below are also counted as losses in calculating income for the business year:

- The amount of gains from insurance claims used to acquire the same kinds of fixed assets as the lost fixed assets, or to improve the damaged fixed assets within two years after the first day of the business year following the business year in which the gains fall.
- The amount of a beneficiary's share of construction costs received by a domestic corporation engaged in the electricity or gas business, etc. used for the acquisition of fixed assets.
- The amount of the national treasury subsidies actually used for acquisition or improvement of fixed assets for business.

Bad debt

For companies that are not financial institutions, a doubtful accounts reserve is allowed as a deduction for tax purposes at the greater of 1% on the tax book value of the receivables at a year-end or actual bad debt ratio (deductible bad debts in a current year divided by the preceding year's tax book value of receivables). Bad debts are allowed as a deduction when certain legal proceedings are satisfied or the statute of limitations has lapsed.

Charitable contributions

Donations to public interest entities, such as government authorities and social welfare organisations, as well as donations for academic research, technical development, etc., are classified as *Bub-jung* donations. *Bub-jung* donations are tax-deductible at up to 50% of the total taxable income for the concerned fiscal year after deduction of net operating loss (NOL). *Ji-jung* donations to public entities prescribed by the CITL are also tax-deductible at up to 10% of the total taxable income for the fiscal year after the deduction of deductible *Bub-jung* donations and NOL.

The amount in excess of such limit may be carried over for five years. Donations other than the statutory donations above will not be deductible for tax purposes.

Employee remuneration

There is no statutory limit for employee remuneration as long as it is reasonable, which includes salaries, wages, stipends, bonuses, retirement payments, pensions, and meal and housing allowances, as well as all other kinds of subsidies, payments, and compensation. Remuneration of foreign employees is determined according to their engagement contracts.

Pension expense

Employers hiring one or more employees are required to set aside severance pay or retirement pensions for their employees. Defined contribution (DC) and defined benefits (DB) are the two available schemes for the retirement pension system. Under the DC scheme, the premiums paid by the employer are deductible upon payment, while deductions for the reserve under the DB scheme are subject to a limit.

Payment for directors

Bonuses paid to directors in excess of the amount determined in the articles of incorporation or at a shareholders' meeting, etc. are not deductible. Also, severance benefits paid to directors in excess of the amount prescribed in the tax law are not deductible.

Entertainment expenses

Entertainment expenses of more than KRW 10,000 on an event basis must be supported by corporate credit card vouchers, cash receipts, or tax invoices in order to be deductible. In addition, the entertainment expenses in excess of the tax limit are not deductible.

The deductible limit for entertainment expenses in a business year is computed as:

- an amount calculated by multiplying KRW 12 million (KRW 18 million [temporarily increased to KRW 24 million for the tax years beginning on or after 1 January 2015 and ending on 31 December 2018] for an SME) by the number of months in the respective business year divided by 12, plus
- an amount calculated by multiplying the amount of gross receipts for a business year by the rates listed in the following table (in the case of receipts from transactions between related parties, 10% of the amount calculated by multiplying the receipts by the following rates shall be applied).

Amount of gross receipts (KRW)	Rate
10 billion or less	0.2%
Over 10 billion up to 50 billion	KRW 20 million + 0.1% of the excess over KRW 10 billion
Greater than 50 billion	KRW 60 million + 0.03% of the excess over KRW 50 billion

Insurance premiums

Insurance premiums paid to an insurance company are deductible if the business enterprise is the listed beneficiary. Insurance premiums for which the beneficiary is the employee are also deductible; however, they are treated as salaries for the employees and are subject to WHT on earned income (this excludes the severance insurance premium or social security taxes that are borne by employers).

Fines and penalties

Fines, penalties, and interest on underpayment of taxes are not deductible.

Taxes

Income taxes are generally not deductible in determining income subject to CIT.

Net operating losses (NOLs)

In general, an NOL carryover is allowed for ten years. The amended CITL restricts a company from deducting the NOL in excess of 70% (60% for the fiscal year beginning 1 January 2019 and thereafter) of the taxable income of fiscal year starting 1 January 2018 and ending 31 December 2018. The CITL maintains the current restriction on a foreign corporation from deducting the NOL in excess of 80% of the taxable income. However, SMEs and certain qualifying companies under recovery process, etc., which will be exempt from this rule, are allowed to deduct the NOL without limitation.

Generally, loss carrybacks are not allowed. However, SMEs can carry back an NOL for one year.

Payments to foreign affiliates

With sufficient supporting documentation and under the arm's-length principle, interest, royalty, and management service fees paid to foreign affiliates are deductible for CIT purposes.

Under the LCITA, the following conditions must be met in order for a management service fee charged by a foreign related party to a domestic company to be deductible:

- The services must be provided based on an agreement entered into by the service provider prior to the service transaction.
- The provision of the service can be verified by a schedule of services, description of services, description of the company providing services and its employees, detailed explanation of expenses incurred, and other supporting documentation.
- A company must be able to anticipate the company's additional profit or reduced expense through the services provided by a foreign affiliate.
- Payment for the provided services should be consistent with arm's-length standards.

Group taxation

The consolidated corporate tax filing system can be adopted for a domestic corporation in cases where two or more wholly-owned subsidiaries exist. A taxpayer may elect the consolidated filing scheme upon approval from the tax authorities, but it cannot be revoked for at least five years after the election of the consolidated tax filing.

Transfer pricing

The LCITA authorises the tax authorities to adjust the transfer price based on an arm's-length price and to determine or recalculate the taxable income of a domestic company (including PE of a foreign company) when the transfer price for the transaction between the domestic company and its foreign related party is either below or above an arm's-length price.

The LCITA lists the following methods for determining an arm's-length price: the comparable uncontrolled price (CUP) method, the resale price method, the cost-plus method, the profit-split method, the transactional net margin method, and other reasonable methods. Other reasonable methods can be used only if it is unfeasible to apply one of the aforementioned methods.

The method used and the reason for adopting that particular one for an arm's-length price determination must be disclosed to the tax authorities by a taxpayer in a report submitted along with the taxpayer's annual tax return.

Transfer pricing documentation requirement

In line with the OECD BEPS Action 13, the LCITA includes a reporting requirement for multinational companies in Korea to submit a consolidated report (including local file and master file) on their cross-border, related-party transactions, affecting not only Korean corporations but also foreign corporations having a PE in Korea that meet all of the following conditions: (i) annual gross sales of an individual entity exceeding KRW 100 billion and (ii) international related-party transactions exceeding KRW 50 billion per year. Required information to be submitted for reporting includes organisation, business, intangible assets, related-party transactions, etc. relating to the group and the local entity. Failure to comply with the reporting requirement will result in a penalty.

The amended Law for the LCITA introduces the requirement to submit country-by-country (CbC) reporting following the implementation of the new transfer pricing rules requiring multinationals in Korea to submit local files and master files on their cross-border transactions. The CbC report must be filed within 12 months after the end of the ultimate parents' income tax year. This rule is applicable to the required information for fiscal years starting on or after 1 January 2017.

Thin capitalisation

In cases where a Korean company borrows from its foreign-controlling shareholder and the debt-to-equity ratio exceeds 2:1, a portion of interest payable on the excess borrowing is characterised as dividends subject to Korean WHT (reduced rate if a tax treaty applies) while being treated as non-deductible in computing taxable income.

In line with the OECD's recommendation on the limitation of interest expense deductions (BEPS Action 4), the new rule shall restrict interest deduction on top of the existing thin capitalisation rule. Deduction of net interest (i.e. the amount of interest expense paid to overseas related parties minus the interest income received from overseas related parties) claimed by a domestic company for international transactions will be limited to 30% of the adjusted taxable income (i.e. taxable income before depreciation and net interest expenses) of the domestic company. This will be implemented from the fiscal year beginning on or after 1 January 2019.

Controlled foreign corporations (CFCs)

Under the Korean CFC rule, when a Korean national directly or indirectly owns at least 10% in a foreign corporation and the foreign company's average effective income tax rate for the three most recent consecutive years is 15% or less, the undistributed earnings of the CFC shall be deemed to be paid as a dividend to the Korean national and subject to tax in Korea.

For more information on the CFC rule, see Foreign income in the Income determination section.

Deduction limit on hybrid financial instruments

In a commitment to implement the hybrid mismatch rules recommended by the OECD (BEPS Action 2), a new rule shall limit expense deductions for hybrid mismatch arrangements. Hybrid financial instruments include financial instruments that have debt or equity positions at the same time but are treated as a debt in one country but treated as an equity in the other country (e.g. participating bonds). In principle, expense deduction will be denied for the amount of payment that is not taxed in a counterpart jurisdiction. This rule will apply for the fiscal year beginning on or after 1 January 2018.

Related-party transactions

Under the provision of the CITL, the tax authorities may recalculate the corporation's taxable income when CIT is unreasonably reduced due to transactions with related parties. Generally, if the discrepancy between the transaction price and fair market value exceeds 5% of the fair market value or KRW 300 million, the transaction will be subject to this provision.

Tax credits and incentives

Foreign tax credit

Taxes imposed by foreign governments on income recognised by a resident taxpayer are allowed as a credit within the limit against the income taxes to be paid in Korea, or as deductible expenses in computing the taxable income. The excess foreign tax credit can be carried forward five years.

Indirect foreign tax credit is also available for a Korean parent company in cases where the dividends from a foreign subsidiary are included in the taxable income of the Korean parent company. The conditions on indirect tax credit exclude the overseas grandson subsidiary and raise the shareholding ratio from 10% or more to 25% or more.

Special tax deductions for SMEs

A special deduction on corporate taxes is available for SMEs when they are engaged in a qualified business. The tax deduction ratio ranges from 5% to 30%, depending on corporate location, size, business types, etc., with a cap of KRW 100 million. This incentive is applied to taxable income arising in the tax years that end before 31 December 2020.

Investment incentives

Tax credits are generally available for qualified investment in facilities for productivity enhancement, safety, job-creating investments, etc.

Tax credit for investment in facilities for productivity enhancement

If a resident makes an investment in facilities or equipment to increase productivity by no later than the end of December 2019, then 1% (3% for medium-scale companies and 7% for SMEs) of such investment amount shall be deducted from CIT. The unused tax credit can be carried forward to the next five years.

Tax credit for investment in facilities for safety

If a resident or a domestic corporation makes an investment in a facility (excluding any investment in used assets) for safety that is considered necessary for industrial purposes no later than the end of December 2019, then an amount of 1% (3% for medium-scale companies and 7% for SMEs) of such investment shall be deducted from CIT. The unused tax credit can be carried forward to the next five years.

Tax credit for investment for commercialisation of new growth-engine and core technologies

The amended tax law has introduced a new tax credit in respect of investment in facilities designed to promote the commercialisation of new growth-engine or core technology (e.g. facilities for the manufacturing of new drugs for which patents are obtained by a company based on clinical trials). The tax credit rate is 10% of the amount of investment for SMEs, while the rates are adjusted to 7% for medium-scale companies and 5% for large corporations. This tax credit is applied to investment made until the end of December 2018.

Tax credit for job creation

The STTCL has introduced an employment-promoting tax incentive in respect of new employment depending on the number of increased employees, with certain limits if a company is engaged in businesses except for those that fall under the category of consumption-oriented services (e.g. entertainment and beverage service). This incentive is based on the scheme of having redesigned those tax credits for job-creating investment and to support youth job creation. The amount of tax credit varies: up to KRW 11 million per new employee for SMEs, up to KRW 7 million for medium-scale companies, and up to KRW 3 million for large companies. The proposed change will be temporarily available for two years (one year for large companies) from the year beginning on or after 1 January 2018. The unused tax credit can be carried forward to the next five years.

Tax credit for increase in corporate payroll

The tax law applies tax credits (5% for large companies, 10% for medium-scale companies, and 20% for SMEs) on the incremental amount in average corporate payroll over a certain base level calculated in a prescribed manner by taking into account either the average corporate payroll over the previous three years or the average payroll increase among the SMEs in Korea. This is conditional on there being no decline in the number of full-time employees from the previous year. The tax credit, which was supposed to terminate by the end of December 2017, has been extended three additional years until the end of December 2020. The unused tax credit can be carried forward to the next five years.

Tax credit for re-hiring retired female employees of SMEs

The tax law allows a tax credit to promote the re-employment of female employees of SMEs who retired for pregnancy, childbirth, or care and other personal reasons as prescribed in the Presidential Decree. The tax credit is designed to allow SMEs to subtract the amount, as much as 30% of labour costs of SMEs (15% for a medium-scale companies) paid per re-hired female employee, from their corporation tax payable for the period of two years following the month of re-employment if prescribed conditions are met. The tax credit, which was supposed to terminate by the end of December 2017, has been extended to apply if a company executes an employment contract until the end of December 2020. The unused credit can be carried forward to the next five years.

Research and development (R&D) tax incentives

The STTCL provides various tax incentives to stimulate R&D activities. These include a tax credit for research and manpower development expenses, a tax credit for technology transfer, and tax credits for merger or acquisition of a technology innovative SME.

Tax credit for development of research and manpower

Companies presently claim a tax credit in relation to qualifying R&D expenditure to the extent of either (i) 0% to 2% (8% for medium-scale companies, 25% for SMEs) of the current R&D expenses or (ii) 25% (40% for medium-scale companies, 50% for SMEs) of the incremental portion of the current R&D expenses over the previous year. The incremental method can be applied only when the R&D expenses for the prior year exceed the average R&D expenses for the previous four years. However, for the R&D expenditures in qualified new growth engine and core technology areas designated in the presidential decree, the preferred credit rates are applied 20% to 40%, depending on the type of company. The unused credit can be carried forward to the next five years.

Tax credit for technology transfer among SMEs (Korean patent box regime)

Tax credit and reductions have been introduced to facilitate the transfer of technology between companies so as to enhance technical competencies and the recovery of funds invested in technology more efficiently. CIT on income derived by SMEs and specified medium-scale companies from the transfer of patents, etc. to a Korean national is reduced by 50%. The tax law grants a 25% tax credit for income derived by SMEs and medium-scale companies from the leasing of patents or utility model rights where the company has first filed a registration of such rights. The tax credit is 5% (10% for SMEs) of the amount paid to acquire patents, etc. (ceiling at 10% of CIT). This temporary credit is applicable to transfers, purchases, or leases taking place until the end of December 2018. The unused credit can be carried forward to the next five years.

Tax credit for merger or acquisition of a technology innovative SME

In cases where a domestic company merges with a technology innovative SME in a qualified manner, the merger company shall be permitted to take a 10% tax credit with respect to the payment made in such a merger, up to the value of the acquired technology. This 10% tax credit will also be available for a company that acquires shares in a technology innovative SME in a qualified manner no later than the end of December 2018. In this case, if any of requirements for a qualified manner fails to be met, the amount of tax credited will be collected. The unused credit can be carried forward to the next five years.

Tax credit for investment in facilities for technology and human resources development

A corporation purchasing facilities no later than 31 December 2018 prescribed in the Presidential Decree with the purpose of R&D and job training is eligible for a tax credit of up to 1% (3% for medium-scale companies, 6% for SMEs) of such investment. The unused tax credit can be carried forward five years.

Energy/environmental incentives

Tax credit for investment in energy-saving facilities

If a resident makes an investment (excluding any investment in used goods) no later than 31 December 2018 in energy-saving facilities, 1% (3% for medium-scale companies, 6% for SMEs) of such investment shall be deducted from CIT. The unused tax credit can be carried forward five years.

Tax credit for investment in facilities for environmental protection

If a resident makes an investment (excluding any investment in used goods) in any facility for the purpose of environmental conservation no later than 31 December 2018, then 3% (5% for medium-scale companies, 10% for SMEs) of the investment amount shall be deducted from CIT. The unused tax credit can be carried forward five years.

Inbound investment incentives

The Korean government provides various incentives and benefits for inducing foreign investment under the Foreign Investment Promotion Law.

Among others, foreign-invested companies that engage in certain qualified high-technology businesses can apply for 100% exemption from CIT for five years, beginning from the first year of profitable operations (from the fifth year, if not profitable until then) and a 50% reduction for the following two years in proportion to the foreign shareholding ratio. An exemption from WHT on dividends, which was available for foreign investors in the same manner as above during the same grace period, is no longer granted for tax exemption applications filed on or after 1 January 2014. However, the WHT exemption on dividends already approved will not be affected by the tax law change. In addition, the taxpayer can apply for 100% exemption from acquisition tax and property tax on assets acquired for their exempt business for five years after the business commencement date and 50% reduction for the following two years. For local tax exemption, some local governments grant longer exemption periods (up to 15 years) and higher exemption ratios in accordance with their local ordinances. Qualified foreign investment also can be eligible for exemption from customs duties, VAT, and individual consumption tax on imported capital goods.

In addition, foreign investors satisfying specified criteria are provided with tax incentives and other benefits for investment in specially designated areas, including foreign investment zones (FIZs), free economic zones (FEZs), free trade zones (FTZs), and strategic industrial complexes exclusively developed for foreign invested companies. The tax incentives for qualifying foreign investors in individual type FIZs and FEZs and certain strategic industrial complexes that are approved by the related committee under laws governing the operation of the zones are similar to those of the above foreign invested high-tech companies. Qualifying investors in complex type FIZs, FEZs, FTZs, and strategic industrial complexes may receive the 100% exemption from corporate or individual income tax as well as local taxes for the first three years and 50% reduction for the next two years. They also receive exemption from customs duties on imported goods.

The amended tax law has reformed the scope of businesses eligible for foreign investment tax incentives to be aligned with those that qualify for the foregoing R&D tax credit. This change is applied to foreign investment for which tax incentive is applied on or after 7 February 2017.

To receive tax incentives for inbound investment, an application for tax incentives, together with supporting documents, should be filed with the tax authorities by the end of the fiscal year that the business commencement date belongs to. In addition, foreign investment made via specific countries is excluded from the exemption from corporate or individual income tax and local taxes for inbound investment. They include those countries with which Korea has not entered into income tax treaties (including tax information exchange agreements [TIEAs] and investment promotion and protection agreements), such as Botswana, Republic of Cyprus, Dominican Republic, Guatemala, Lebanon, Nauru, Niue, Seychelles, and Trinidad and Tobago.

Foreign direct investment (FDI) incentive limitations

The FDI credit limits incentives granted to qualified FDIs. The ceiling has been set to encompass both investment amount and job-creation. In terms of investment amount, the level of incentives for FDI is allowed up to 50% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (40% ceiling for companies enjoying a five-year incentive period). In terms of job-creation, the level of incentives for FDI is allowed up to 50% of the aggregated FDI amount for companies benefiting from a seven-year incentive period (40% for companies enjoying a five-year incentive period) based on the number of employees.

Companies that have enjoyed tax benefits based on job-creation will be subject to tax assessment in cases where there is a net decrease in employment within the subsequent two years in comparison to the year that the relevant tax credit was obtained.

Withholding taxes

Foreign corporations with income derived from sources in Korea are subject to CIT on such income. If the foreign corporation has no 'domestic place of business' in Korea, it will be subject to tax on its Korean-source income on a withholding basis in accordance with the tax laws and the relevant tax treaty, if applicable. Any Korean-source income attributable to a domestic fixed place of business of a foreign corporation will be subject to Korean CIT.

For residents of countries having a tax treaty with Korea, reduced WHT rates may apply. An application form must be submitted to the withholding agents in order to apply the treaty rate. If a beneficiary cannot be identified in the application form, the withholding agents should withhold the tax at the non-treaty rate.

For dividends, interest, and royalties, the WHT rates are limited as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Resident corporations (1)	0	14/25	0
Resident individuals (1)	14	14/25/30	0

Notes

1. Dividends and interest paid to resident individuals by corporations generally are subject to a 14% WHT rate. In addition to this, there is a resident surtax of 10% on the CIT liability.
2. In addition to the indicated tax rate, a resident surtax is charged at a rate of 10% of the respective tax rate.
3. Lower rate applies in case of equity ownership of 10% or more.
4. 10% rate applies to royalties paid for the use of or the right associated with industrial activities.
5. 10% rate applies if the loan period extends to seven years or more, the recipient is a financial institution, and the loan is used for certain designated purposes.
6. 25% rate applies to royalties associated with the use of trademarks or trademark rights.
7. 5% rate applies in case of equity ownership of 15% or more.
8. Lower rate applies in case of equity ownership of 25% or more.
9. 10% rate applies if the term of loans exceeds three years.
10. 10% rate applies when a recipient of interest income is a bank and income is connected with a loan with a term in excess of seven years.
11. Lower rate applies in case of equity ownership of 20% or more.
12. 5% rate applies if a recipient holds 10% or more ownership in a paying corporation but, even in case of 10% or more ownership, 10% rate applies if the dividends are paid out of profits subject to tax at a

lower rate than the normal corporate tax rate of a country where a payer resides. In other cases, 15% rate applies.
13. 7.5% rate applies when a recipient of interest income is a bank or a financial institution.
14. 2% rate applies to royalties paid for use of or the right to use industrial, commercial, or scientific equipment.
15. 10% rate applies if it is for the use of or the right to use industrial, commercial, and scientific equipment or information.
16. 15% rate applies if royalties are for use of or the right to use cinematography films or tapes for radio or television broadcasting or any copyright of literary or artistic work.
17. 0% rate applies in case of equity ownership of 10% or more.
18. 5% rate applies if a recipient is a bank.
19. 5% rate applies to royalties for use of copyrighted literature and music.
20. 10% rate applies if the term of the loans exceeds seven years.
21. Lower rate applies if it is for the use of or the right to use a patent, trademark, design, or secret formula, or industrial, commercial, and scientific equipment or information.
22. 10% rate applies in cases of equity ownership of 25% or more, or dividend paid by a resident company engaged in a preferred pioneer area and registered with the Board of Investment.
23. 10% rate applies in cases where the interest is paid in respect of public offering of bonds, debentures, or similar obligations or interest paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentive laws.
24. 10% rate applies in case of royalties paid by a company that is a resident of the Philippines, registered with the Board of Investment, and engaged in preferred pioneer areas of investment under the investment incentives laws.
25. 5% rate applies if a recipient holds 30% or more of equity interest in the amount of at least 100,000 United States dollars (USD).
26. 10% rate applies if a beneficial owner of the income is a financial institution (including insurance company) or resident of Thailand who is paid with respect to indebtedness arising as a consequence of a sale on credit by a resident of Thailand of any equipment, merchandise, or services, except where the sale was between persons not dealing with each other at arm's length.
27. 10% rate applies if the term of the loan exceeds two years.
28. 10% rate applies to royalties for use of copyrighted literature, music, films, and television or radio broadcasts. Otherwise, 15% rate applies.
29. 10% rate applies if equity ownership is 10% or more and not more than 25% of the gross income of a paying corporation for a preceding tax year consists of interest or dividends.
30. 10% rate applies when a recipient of interest income is a bank or an insurance company.
31. 5% rate applies when a recipient holds 25% or more of equity interest, and 10%, when a recipient holds 10% or more of equity interest. In other cases, 15% rate applies.
32. 5% rate applies to royalties paid for the use of or the right associated with industrial, commercial, or scientific equipment.
33. 0% rate applies to royalties paid for the use of academic rights.
34. 5% rate applies to royalties paid for the use of or the right associated with any copyright of literary, artistic, or scientific work, including software, and motion pictures and works on film, tape, or other means of reproduction for use in connection with radio or television broadcasting. 10% rate applies to royalties paid for the use of or the right to use a patent, trademark, design or model, plan, secret formula, or process. 15% rate applies to royalties paid for the use of or the right to use industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience.
35. 14% rate applies if interest arises from bonds issued by a Korean company or government bodies.
36. 0% rate applies if a recipient of interest income is government, central bank, etc.
37. 5% rate applies to royalties paid for the use of industrial, commercial, or scientific equipment.
38. Fees arising from rental of industrial, commercial, scientific equipment, etc. are classified as rental income subject to 2% WHT.
39. 10% rate applies to royalties paid for technical support.

If a foreign company is located in a foreign jurisdiction designated as a tax haven by the Minister of Strategy & Finance, any Korean-source income of such foreign company will be subject to the domestic withholding rate of 20% regardless of whether or not the foreign company is resident of a treaty country. Currently, only Labuan is designated as such a jurisdiction. The foreign company may claim a refund of any excess WHT paid within three years if it proves to the Korean Tax Office that it is entitled to the reduced treaty rates as the substantive and beneficial owner of the income. Alternatively, a foreign company may attempt to seek a pre-approval in order to have the treaty benefits apply upfront by making an application to the Commissioner of Taxation.

Tax administration

Taxable period

In Korea, the taxable year is on a fiscal-year basis as elected by the taxpayer. However, it cannot exceed 12 months.

Tax returns

A corporation must file an interim tax return with due payment for the first six months of the fiscal year, and the filing/payment must be made within two months after the end of the interim six-month period.

A corporation must file an annual tax return with due payment for the fiscal year, and the filing/payment must be made within three months (four months for the consolidated tax return) from the end of the fiscal year. In case the external audit is not completed and the financial statements are not fixed, a corporation can request for extension of tax filing by one month with delinquent interest of 1.8% *per annum*.

Payment of tax

Where the tax amount to be paid by a resident corporation is in excess of KRW 10 million, part of the tax amount to be paid may be paid in instalments within one month of the date of the expiration of the payment period (two months for SMEs).

Where the tax amount to be paid is KRW 20 million or less, the excess of KRW 10 million may be paid in instalments; and where the tax amount to be paid exceeds KRW 20 million, 50% or less of the tax amount may be paid in instalments.

Functional currency

In instances where the taxpayer adopts to use a foreign currency as its functional currency, there are three ways to calculate the CIT base: (i) calculate the tax base using the financial statements in functional currency and translate it into Korean won; (ii) prepare the financial statements in Korean won and calculate the tax base; or (iii) translate the financial statements into Korean won and calculate the tax base. Once elected, the same method must be consistently used.

Tax audit process

For large companies whose sales revenue exceeds KRW 300 billion, a tax audit will be conducted every five years. Other companies are selected by certain standards, which were announced by the National Tax Service (NTS). An official notification of an intended tax audit must be made 15 days prior to the audit.

Statute of limitations

The statute of limitations is generally five years from the statutory filing due date of the annual CIT return. However, the statute of limitations is extended further in the following cases:

- Seven years if a taxpayer does not file its tax base by the statutory due date.
- Ten years if a taxpayer evades taxes by fraud or unjustifiable means.
- 15 years for fraud or unjustifiable means involving cross-border transactions. For this purpose, a ‘cross-border’ transaction means when a party or parties to the transaction include(s) non-resident(s) or foreign corporation(s) (excluding domestic business places of non-resident(s) or foreign corporation(s)).

Period of extinctive prescription for collection of national taxes

The period of extinctive prescription for collection of national taxes is five years (ten years for national tax payable worth KRW 500 million or more) from the date on which the government's right to collect a national tax becomes exercisable. Along with the five-year extinction prescription period of national tax collection, the extinction prescription period of tax refund request of taxpayers is extended to five years, which was previously three years from the tax return filing due date, effective for tax refund requests made on or after 1 January 2015.

Topics of focus for tax authorities

The recent topics of focus for tax authorities are as follows:

- Implementation of new tax information reporting systems as planned in the BEPS project.
- Increased tax audit on tax avoidance through internal transactions or gifts among group companies and major shareholders.
- Increased scrutiny over the prevention of offshore tax evasion through a cross-border tax information exchange program.
- Selection of tax audit targets through a sophisticated analysing and verification system and expansion of the number of corporate taxpayers subject to the regular five-year period audit cycle.
- New provision in the National Tax Basic Law to add accounting credibility to the existing tax audit selection criteria. Accounting credibility includes auditor's opinion, hours spent for external audit, etc.
- Increased application of forensic and electronic audit schemes and use of big data analysis to examine potential tax avoidance.

Additionally, the tax policy that the newly elected president has pledged during his campaign should be noted. To finance spending on expanded social welfare investment, the taxation systems on corporate taxpayers and high income earners are expected to be reinforced.

Other issues

Exchange controls

Most transactions involving foreign exchange generally do not require approval or reporting under the Foreign Exchange Transaction Act (FETA), with a few exceptions as prescribed by the FETA. Receipt of foreign exchange from outside Korea is freely permitted, and payments to foreign companies are not regulated. Most restrictions on Korean companies' foreign currency transactions with foreigners have been removed. However, the government continues to monitor certain flows of foreign currency in an attempt to minimise incoming speculative currency and outgoing capital flight.

Advance reporting is required for most capital transactions. For example, foreign currency loans obtained by a Korean resident or loans provided by a Korean resident to an overseas resident should be reported in advance. Foreign currency deposits should also be reported in advance. The agency to which the reporting should be made again differs based on materiality of the transaction amount or transaction type.

In addition, reporting in advance to the appropriate agency is required for the netting of receivables and payables with a foreign resident, third party payments where a payment is made to a foreign resident other than the transaction counterpart, and cross calculation, which is similar to netting, but the concerned company opens a bank account in which the offsetting takes place for future receivables and payables.

Ever since Korea's currency crisis, most restrictions on short-term as well as mid and long-term borrowings from overseas by corporations have been removed. Most foreign currency loans are allowed and are subject to reporting to a foreign exchange bank. There are no specific regulations, except the reporting requirements, on borrowings from overseas by foreign investment companies in Korea.

Automatic exchange of tax information

The Korea-United States (US) agreement on Automatic Exchange of Tax Information was ratified by the National Assembly on 7 September 2016. Based on the agreement, the tax authorities of both countries collect financial information on financial accounts held by individuals and entities and exchange this information. Korea-based financial institutions conduct their Foreign Account Tax Compliance Act (FATCA) due diligence procedures and report information on certain financial accounts held by US individuals and entities to the NTS, and then, the NTS will report this information to the US Internal Revenue Service (IRS). The type of information generally includes the name, address, tax identification number, account number, account balance as of the end of a relevant reporting period, and gross amount of income (such as interest and dividends).

Starting from 2017, Korea has exchanged with 53 countries, including the United Kingdom, Cayman Islands, British Virgin Islands, etc., certain information on financial accounts and income according to the Multilateral Competent Authority Agreements (MCAA). From 2018, Korea has exchanged such information with more countries because additional countries, including Switzerland, Singapore, etc., signed the MCAA. The NTS should be motivated to actively mobilise its infrastructure to exchange offshore financial and non-financial tax information for the purpose of pursuing taxpayers suspected of being engaged in offshore tax avoidance and conducting tax audits of such tax avoidance.

Choice of business entity

The following types of commercial entities are permitted in Korea:

- Corporation (*Hoesa*): There are five classes of corporation, outlined as follows:
  - Limited corporation:
    - *Jusik Hoesa* (JH): A corporation incorporated by one or more promoters, with each shareholder's liability limited to the amount of contributed capital. This type of entity is the most commonly used in Korea.
    - *Yuhan Hoesa* (YH): A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's contribution to the corporation.
    - *Yuhan Chegim Hoesa*: A corporation incorporated by one or more members, with each member's liability limited to the amount of that member's capital contribution. With significantly fewer restrictions for establishment and operation, *Yuhan Chegim Hoesa* provides more flexibility and self-control than YH.
  - Unlimited corporation:

    - *Hapmyong Hoesa*: A corporation incorporated jointly by more than two members who are responsible for corporate obligations if the assets of the corporation are insufficient to fully satisfy those obligations.
    - *Hapja Hoesa*: A corporation composed of one or more partners who have unlimited liability and one or more partners with limited liability.
- Partnership: *Hapja Johap* is a legal form of partnership allowed under the Commercial Code.
- Joint venture: A joint venture is generally established as a domestically incorporated corporation whose shareholders have limited liability regarding the obligations of the corporation under the Commercial Code.
- Branch: A foreign corporation can perform its business operation in Korea by setting up a taxable presence in the form of a branch office. The branch office can be classified as a corporation and be taxable under the CITL if one of the following conditions is met; otherwise, the foreign entity shall be classified as an individual and be subject to the Individual Income Tax Law:
    - The foreign entity is a corporation under the laws of one's home country.
    - The foreign entity is composed of only limited liability members.
    - The foreign entity has an independent ownership of assets or separate right of lawsuit from its members.
    - An entity similar to the foreign entity is classified as a corporation under Korean law.
- Liaison office: A foreign corporation can establish a liaison office, which is not allowed to execute income-generating business activities in Korea.
- Sole proprietorship: Sole proprietorships are not a legal form of entity in Korea.

Guidance on taxation of an off-shore partnership

Under the CITL, a foreign corporation is defined as a corporation that has a head office or principal office in a foreign country (only if the foreign corporation shall not have the place of effective management in Korea).

Based on the nature of business, an off-shore partnership would be categorised as a foreign corporation if one of the following conditions is met:

- Has a legal personality.
- Only comprised of partners with limited liability.
- Has the legal rights and liabilities that are distinct from its members, including taking possession of assets or having the legal capacity to be a party against a law suit.
- The same or the most similar kind of domestic business entity constitutes a corporation under Korean laws.

Off-shore partnerships with a legal personality like corporate entities prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*), limited corporations (*Yuhan Hoesa, Yuhan Chegim Hoesa*), and unlimited corporations (*Hapmyong Hoesa, Hapja Hoesa*), are treated as foreign corporations for Korean CIT purposes. Also, off-shore partnerships having the nature of limited corporations prescribed in the Korean Commercial Act, such as stock corporations (*Chusik Hoesa*) and limited corporations (*Yuhan Hoesa, Yuhan Chegim Hoesa*), are treated as foreign corporations.

Significant developments

In July 2017, Kosovo introduced transfer pricing rules, which are applicable from fiscal year 2017.

These rules apply to Kosovo corporate income taxpayers that have entered into controlled transactions with related parties established in foreign tax jurisdictions.

The transfer pricing rules generally follow the Organisation for Economic Co-operation and Development (OECD) Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, whereas documentation requirements are as per the European Union (EU) Code of Conduct on Transfer Pricing Documentation for Associated Enterprises in the European Union (2006/C 176/01).

Recognised transfer pricing methods include the comparable uncontrolled price (CUP) method, resale price (RP) method, cost plus (C+) method, transactional net margin (TNM) method, and profit split (PS) method. A simplified approach is applicable for low value-adding intra-group services.

Taxpayers with controlled transactions exceeding 300,000 euros (EUR) in a calendar year are required to:

- prepare transfer pricing documentation as per the EU Code of Conduct on Transfer Pricing Documentation for Associated Enterprises in the European Union (2006/C176/01), and
- submit an Annual Controlled Transactions Notice by 31 March of the following year, along with statutory financial statements and a corporate income tax (CIT) declaration.

Taxpayers with controlled transactions of EUR 300,000 or less in a calendar year are required to prepare documentation, but are not required to submit an Annual Controlled Transactions Notice.

Taxes on corporate income

The tax system of the Republic of Kosovo consists of tax treaties, tax laws, administrative instructions, regulations, individual and public rulings, decisions, and other official documents pertaining to the application of the CIT provisions.

The CIT system in Kosovo is based on the principle of worldwide taxation.

Taxpayers subject to CIT are the following:

- Corporations and other legal persons.
- Business organisations operating with public/state-owned assets.
- Non-resident persons with a permanent establishment (PE) in Kosovo.

Resident taxpayers are generally subject to tax on foreign and Kosovo-source income, whereas non-resident taxpayers are generally subject to tax only on their Kosovo-source income.

The CIT rate is 10%.

A special corporate tax rate of 5% is applicable for insurance companies, which is levied on total gross premiums accrued during the year and is paid on a quarterly basis.

Taxpayers whose gross annual income does not exceed EUR 50,000 are not subject to CIT but have to file quarterly payments of tax on gross receipts, as follows:

- 3% of gross income received from trade, transport, agricultural, or similar activities (subject to a minimum payment of EUR 37.50).
- 9% of gross income for the quarter from services, professional, vocational, entertainment, or similar activities (subject to a minimum payment of EUR 37.50).
- 10% of gross rent income for the quarter.

Corporate residence

Based on Kosovo legislation, a legal entity is considered to be resident in Kosovo if it has its head office or its place of effective management in Kosovo.

Permanent establishment (PE)

A PE includes any place of management, branch, office, factory, workshop, mine, oil or gas source, quarry, or other place of exploitation of natural resources.

A PE is deemed to have been created by any building site, construction, assembling or installation project, or supervisory activity in connection therewith, but only if such site, project, or activity lasts longer than 183 days within any 12-month period.

Similarly, furnishing consultancy services for a period of 90 days or more by a non-resident person triggers a PE, as well as owning immovable property by a non-resident.

For countries with which Kosovo has double tax treaties (DTTs), PE rules are as per the relevant provisions in such treaties. *See the Withholding taxes section for a list of countries with which Kosovo has a DTT*.

Other taxes

Value-added tax (VAT)

The VAT law and system in Kosovo is based on the EU Directive for VAT (Directive 2006/112/EC and its subsequent amendments). VAT legislation is regulated by Law No.05/L-037 ‘On Value Added Tax’ and the corresponding sub-legal acts.

Registration for VAT

All taxable persons who import/export and taxable persons whose turnover is above EUR 30,000 within a calendar year are required to register for VAT.

Where turnover is less than the threshold, voluntary registration for VAT is possible.

VAT registration for foreign entities or persons not established in Kosovo should be completed from the beginning of their economic activity in Kosovo, regardless of the threshold. Nonetheless, this is not required of persons who make supplies for which the place of supply is considered to be Kosovo and the recipient is liable for the payment of VAT.

Object of taxation

VAT is levied on:

- supplies of goods or services with place of supply in Kosovo, and
- importation of goods.

VAT rates

The standard VAT rate is 18%.

A reduced rate of 8% applies to the following supplies:

- Supply of water, except bottled water.
- Supply of electricity, including transmission and distribution services, with central heating, waste collection, and other waste treatment.
- Grains, such as barley, corn, maize varieties, oats, rye, rice, and wheat.
- Products made from grain for human consumption, such as flour, pasta, bread, and similar products.
- Cooking oils made from grains or oilseeds for use in cooking for human consumption.
- Dairy and dairy products intended for human consumption.
- Salt used for human consumption.
- Eggs for consumption.
- Textbooks and serial publications.
- Supply, including lending, of books from libraries, including brochures, leaflets and similar printed materials, children's picture books, drawing and colouring books, music printed texts or manuscripts, maps, and hydro graphic charts, and similar.
- Information technology (IT) equipment.
- Supply of medicines, pharmaceutical products, instruments, and medical and surgical devices.
- Medical equipment, ambulances, aids, and other medical devices to facilitate or treat inability for exclusive use by the disabled, including the repair of such goods and supply of children's vehicle seats.

Chargeability of VAT

VAT generally becomes chargeable when the goods or services are supplied. Specific rules apply in cases where supply of goods or services occurs over a period of time, where successive payments are made, and in case of long-term contracts.

VAT becomes chargeable whichever of the following conditions is fulfilled first: payment is made, invoice is issued, or the supply of goods/services is carried out.

VAT refunds

Taxable entities have the right to carry forward to following tax periods the VAT credit or to claim VAT refund if the following conditions are met:

- The taxable person is in VAT credit position for three consecutive months.
- At the end of the third month the amount of VAT credit exceeds EUR 3,000.
- All VAT and other tax returns for all past tax periods have been submitted.

While taxable persons that have exports may claim VAT refund on a monthly basis after each tax period if the following conditions are met:

- The amount of VAT credit exceeds EUR 3,000 at the end of the tax period.
- The taxable person complies with all applicable customs and VAT provisions.
- All VAT and other tax returns for all past tax periods have been submitted.

The Tax Administration of Kosovo (TAK) shall review the VAT refund claim request within a maximum of 30 days.

Invoicing

Invoices for supplies subject to VAT must always be issued by the 15th day of the month following that in which the chargeable event occurs, at the latest.

Place of supply of goods/services

Place of supply of goods or services is determined in line with the provisions set out in EU Directive 2006/112/EC on the Common System of Value Added Tax.

In respect of goods, special rules apply to establish the place of supply of goods with and without transport, on board ships, aircraft, or trains, and supply of natural gas and electricity through distribution systems.

In respect of services, there are two main rules: general and particular. The general rule defines the place of supply of services to a taxable person, which is where that person has established one's business. Particular rules apply to specific services related to immovable property, passenger transport, restaurant and catering services, short-term rent of transportation equipment, and cultural, artistic, or similar events.

For the supply of services to a non-taxable person, the general rule is that the place of supply is the place where the supplier has established one's business. The particular rules for supplies to non-taxable persons apply to specific services as outlined above.

The place of supply of the following services to a non-taxable person established outside of Kosovo is the place where that person is established: transfers of copyrights, patents and similar rights; advertising services; consultancy, engineering, accounting, legal, and data processing services; banking, financial, and insurance transactions; supply of staff; hiring of movable tangible property (except transport); provision of access and transport or transmission through to natural gas and electricity distribution systems; telecommunication, radio, and television broadcasting services; and electronically supplied services.

Reverse-charge mechanism

Reverse charge is applied on supplies of goods and/or services that are supplied from a taxable person not established in Kosovo.

When the recipient of such services/goods is registered for VAT in Kosovo, the place of supply of such services/goods is considered to be Kosovo, and the recipient will be liable for paying the VAT.

In cases where the recipient is not registered for VAT in Kosovo, the supplier is liable to pay VAT and is obligated to register for VAT in Kosovo via a tax representative.

A special reverse-charge scheme is applicable for the supply of construction and construction-related works, as well as supplies where personnel is engaged in construction activities.

Similar to the regular reverse-charge mechanism, the person liable to pay the VAT on the supply is the recipient of the construction services.

VAT exemptions

VAT exemptions without the right to deduction are applicable to activities in the public interest, welfare, education, culture, sports and religious activities, media, and public transportation. Other activities exempt from VAT include financial services, health and life insurance, lottery, land, housing for residential purposes, etc.

VAT exemptions with the right to deduction include exports, international transport, intermediary services, and special customs arrangements.

Importing of production lines and machinery for use in the production process, raw material used in the production process, as well as IT equipment, newspapers, and periodic publications, and equipment required for electronic and printed media benefit from VAT exemption (with crediting rights) on importation.

Supplying goods and services that are co-financed by donations from foreign governments and the Kosovo government and destined for projects with the public as the beneficiary are exempt from VAT (with deduction rights) if such exemption is foreseen between the parties and the participation from the Kosovo government is not more than 20%.

The right to deduct VAT

The right to deduct input VAT arises at the time when VAT becomes chargeable and such VAT is related to goods or services obtained for business purposes.

Input VAT is non-deductible for several goods/services, including the purchase of yachts, boats, private aircraft, cars, and motorcycles intended for recreation and used for non-business purposes, as well as representation costs related to entertainment during business or social contacts. A taxable person can, however, deduct input VAT on advertising expenses, meals, and transportation for personnel.

For cars used for both business and personal purposes, only 50% of input VAT can be deducted. The use of immovable property in the same manner allows VAT deductibility only up to the proportion of the property’s use for business purposes.

In case purchased goods and services are used to make both taxable and exempt supplies, VAT shall be deducted proportionally to the transactions for which VAT is deductible.

VAT compliance

Monthly submission of VAT returns to the TAK and monthly payment of VAT are due by the 20th day of the month following the end of each tax period.

In addition, VAT records have to be kept for six years after the end of the tax period to which they relate.

Customs import duties

The rate of customs import duty is zero on goods that originate in the territory of a country that is a party to the Central European Free Trade Agreement (CEFTA), and for some goods imported from the European Union as per the provisions of the Stabilization and Association Agreement.

Most rates of import duty on goods that originate outside of the CEFTA are 10% *ad valorem* (10% of the price paid or payable for the imported goods); however, some imported goods are exempt from the payment of the 10% import duty. The Integrated Tariff Code of Kosovo (TARIK) provides detailed information on import duty rates, VAT rates, and excise tax rates (if any), as well as any required certificates or licences that pertain to all imported goods.

Excise taxes

Excise tax is levied as a percentage of the value of the goods or represents a fixed amount per specified quantity. Excise tax in Kosovo is applicable on certain goods like beer, wines, alcohol, liquors, and other alcoholic beverages, cigarettes, other tobacco products, cars, petrol, diesel, etc.

For applicable excise taxes on these items, please see: *http://www.kuvendikosoves.org/common/docs/ligjet/2010-220-eng.pdf*

Property taxes

The property tax payable depends on the type of use of the property, on the area the property is located, and on the market value of the property. Property taxes are levied and collected at the municipal level.

Property tax rates also vary for each municipality. For the capital city of Pristina, the following rates are applicable based on the category of the real estate and activity undertaken:

- Residential: 0.15%.
- Commercial: 0.17%.
- Social/cultural/institutional: 0.17%.
- Services: 0.17%.
- Transportation: 0.17%.
- Industrial: 0.17%.
- Processing: 0.15%.
- Recreational: 0.15%.
- Uncategorised/unrecognised: 0.15%.
- Abandoned: 0.15%.
- Habitable: 0.15%.
- Agricultural: 0%.
- Unfinished: 0%.
- Garage: 0%.

- Other exempt: 0%.

The valuation of the property for property tax purposes (calculated in EUR/m2) depends on the location and type of property.

Transfer taxes

Transfer of immovable property is subject to a property transaction fee levied at the municipal level at EUR 150 per unit. One unit equals 100m² of residential/commercial building or 1 hectare of land.

Stamp taxes

There are no stamp taxes in Kosovo.

Payroll taxes

Entities are required to withhold personal income tax (PIT) from the gross salaries of their employees. Progressive tax rates ranging from 0 to 10% are applied to gross income.

Social security contributions

Both employer and employee are subject to compulsory pension contributions in Kosovo. The total compulsory contribution is 10%, where 5% represents the employee's share (withheld from gross wages) and 5% the employer's share.

Employers and employees may contribute additional pension contribution up to 30% (15% + 15%).

The compulsory pension contributions are deductible for CIT purposes of the employer, whereas voluntary contributions and those exceeding 15% of the annual salary are not deductible.

Other local taxes

Taxes are collected by the municipalities and vary on the activity and location of the business. Such taxes include vehicle tax, property tax, ecological tax, and advertising tax.

Branch income

Branch income in Kosovo is subject to the same taxes as all other forms of legal entities.

Income determination

Inventory valuation

In order to determine the cost of goods sold, the taxpayer must use one of the inventory methods prescribed by the Kosovo Accounting Standards, which permit the use of first in first out (FIFO) and average cost, but prohibit last in first out (LIFO).

Capital gains

Capital gains and losses are realised through the sale or other disposal of capital assets, including real estate and securities. Capital gains and losses are recognised as business income and business losses, respectively, and the latter can be carried forward for up to six successive tax periods. Capital gains are taxed at the standard CIT rate of 10% (i.e. are taxed at the same rate).

Dividend income

Dividends received by residents and non-residents are exempt from any form of taxation.

Interest income

Interest income is taxed at the CIT rate of 10%.

Rental income

Rental income is taxed at the CIT rate of 10%.

Royalty income

Royalty income is taxed at the CIT rate of 10%.

Partnership income

The partnership is not taxed itself; however, the members of the partnership are taxed separately at the standard CIT rate of 10% depending on their share in the partnership.

Foreign currency exchange gains/losses

Foreign currency exchange gains are subject to tax as capital gains.

Foreign income

Kosovo resident corporations are taxed on their worldwide income. If a DTT is in force, double taxation is avoided either through an exemption or by granting a tax credit up to the amount of the applicable Kosovo CIT rate.

Kosovo legislation does not contain any provisions under which income earned abroad may be tax deferred.

Deductions

Expenses paid or incurred in relation to business activities are deductible for CIT purposes.

Business representation expenses with elements of entertainment cannot exceed 1% of annual gross income. Bad debt expenses are allowable under certain conditions. Business travel expenses are allowable if documented properly.

Expenses that are subject to withholding tax (WHT) on rent (such as payments for lease) are only CIT deductible if the corresponding WHT is paid by 31 March of the period following that in which they were incurred, at the latest.

Depreciation and amortisation

Depreciation expenses are calculated via the straight-line method, depending on the category of asset concerned. For buildings, the rate is 5%; for vehicles, furniture, and equipment, the rate is 20%; and for plant and machinery, the rate is 10%.

Amortisation expenses are allowed in accordance with the useful life of the intangible asset, but, at most, 20 years if not specified.

Goodwill

No specific tax provisions cover the treatment of goodwill.

Start-up expenses

Only expenses incurred in the current tax period reported can be deducted.

Interest expenses

Interest expenses are deductible, provided that such expenses have been paid or incurred in relation to business activities and any WHT due has been paid on or before 31 March of the year following that in which interest expense arose.

Bad debt

A bad debt shall be considered an expense if it meets all of the following conditions:

- The amount that corresponds to the debt has previously been included in income.
- The debt is written off in the taxpayer's books as worthless for accounting purposes.
- There is no dispute of the legal validity of the debt.
- At least six months of the debt term have been exceeded.
- There is adequate evidence of substantial attempts made by the taxpayer to collect the debt (i.e. including final decision of a competent court certifying that the debt is uncollectible).
- Payment has not been received in whole or in part and has been declared as uncollectable thus initiating procedures with judicial bodies.
- For the amount up to EUR 500 treated as a bad debt, there shall not be required the initiation of procedures at judicial bodies.
- Uncollected amount shall not be considered as bad debt if:
  - transactions with the same debtor have been repeated after the announcement of bad debt, excluding public services
  - bad debt is between the related parties
  - there is no sufficient evidence that there were substantial attempts made to collect debt, including any applicable action to maximise the debt collection, or
  - the obligation for payment is 24 months overdue.

Charitable contributions

Contributions made by a taxpayer in the form of donations or sponsorship for humanitarian, health, education, religious, scientific, cultural, environmental protection, and sports in accordance with the CIT law are considered as contributions given for public interest and are allowed as a deduction up to a maximum of 10% of taxable income, computed before these contributions are deducted.

An additional 10% deduction may be applicable if prescribed so by other laws pertaining to sponsorships of certain activities.

A taxpayer who claims a deduction in respect of charitable contributions made during the tax period shall furnish receipts signed and stamped by the beneficiaries of the charitable contributions, confirming the purpose of those donations, the amounts of the donations, and the times when the donations were made.

A charitable contribution deduction can only be claimed by a taxpayer who pays tax on an accrual or real income basis.

Pension expenses
Pension contributions are deductible up to the limit of 15% of gross salary.

Bribes, kickbacks, and illegal payments
Bribes, kickbacks, and illegal payments are non-deductible for tax purposes.

Fines and penalties
Fines and other tax-related sanctions are non-deductible expenses.

Taxes
Income taxes, VAT, and excise duties are non-deductible expenses.

Other significant items
Provision expenses are only allowable for banks as per the rules prescribed by the Central Bank of Kosovo.

Net operating losses
Tax losses can be carried forward for up to six consecutive tax years. However, restrictions may apply in cases of change of business or change of ownership; if the business changes its type of business organisation or has an ownership change of more than 50%, the tax loss is not allowed to be carried forward.

Carryback loss provisions are not allowable.

Payments to foreign affiliates
Payments to foreign affiliates are subject to WHT at 5% if they represent services provided with physical presence in Kosovo by the affiliate, unless tax relief is requested in accordance with the local legislation or any DTT in place. These payments are tax deductible if they are properly documented and incurred for business purposes only.

Payments to foreign affiliates made for the purpose of transferring profits may be subject to revaluation by the tax authorities. Any transactions/payments made to foreign affiliates shall be performed on an arm’s-length basis.

Group taxation

There are no group taxation rules applicable in Kosovo.

Transfer pricing regime
In July 2017, Kosovo introduced transfer pricing rules, which are applicable from fiscal year 2017.

These rules apply to Kosovo CIT payers that have entered into controlled transactions with related parties established in foreign tax jurisdictions.

The transfer pricing rules generally follow the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, whereas documentation requirements are as per the EU Code of Conduct on Transfer Pricing Documentation for Associated Enterprises in the European Union (2006/C 176/01).

Recognised transfer pricing methods include the comparable uncontrolled price (CUP) method, resale price (RP) method, cost plus (C+) method, transactional net margin (TNM) method, and profit split (PS) method. A simplified approach is applicable for low value-adding intra-group services.

Taxpayers with controlled transactions exceeding EUR 300,000 in a calendar year are required to:

- prepare transfer pricing documentation as per the EU Code of Conduct on Transfer Pricing Documentation for Associated Enterprises in the European Union (2006/C 176/01), and
- submit an Annual Controlled Transactions Notice by 31 March of the following year, along with statutory financial statements and CIT declaration.

Taxpayers with controlled transactions of EUR 300,000 or less in a calendar year are required to prepare documentation, but are not required to submit an Annual Controlled Transactions Notice.

Thin capitalisation rules

There are no thin capitalisation rules applicable in Kosovo.

Controlled foreign companies (CFCs)

There is no CFC regime in Kosovo.

Tax credits and incentives

Taxpayers that purchase new heavy machinery categorised under the 10% depreciation rate group enjoy an additional one-time 10% deduction for CIT purposes.

Wages of persons with disabilities are exempt from employment taxes.

Foreign tax credit

Taxpayers who receive income from sources outside Kosovo and pay tax on such income in other countries are allowed the right to a tax credit for the amount of the tax paid abroad or up to the applicable Kosovo income tax rate, whichever is lower. Foreign tax credits can be claimed even if there is no DTT between Kosovo and the respective country where such income arose, subject to proper documentation.

Withholding taxes

Resident taxpayers paying rent, interest, royalties, and non-resident services shall withhold tax at the time of payment and shall transfer the amount of the tax withheld not later than the 15th day of the month following the tax period.

Taxpayers shall withhold tax at the time of payment or credit. A WHT obligation applies only when the underlying amount (e.g. rent, interest) is actually paid, not when it accrues.

WHT rates are provided below:

- Interest and royalties: 10%.
- Rent: 9%.
- Services provided from non-residents: 5%.
- Payments to non-business natural persons, farmers, recycled materials collectors, etc.: 3%.

For payments made to recipients in countries with which Kosovo has a DTT, the rates of WHT may be eliminated/reduced under the terms of the treaty.

There is no WHT on dividends, as dividends received by residents and non-residents are exempt from taxation in Kosovo.

Double tax treaties (DTTs)

Currently, Kosovo has DTTs in place with the following countries:

	WHT (%)	
Recipient	**Interest**	**Royalties**
Non-treaty	10	10
Treaty:		
Albania	10	10
Belgium	10 (1)	10
Croatia	5	5
Finland	0 (2)	10
Germany	0 (2)	10
Hungary	0 (2)	0 (2)
Macedonia	10	10
Netherlands	0 (2)	10
Slovenia	5	5
Turkey	10	10
United Arab Emirates	5	0 (2)
United Kingdom	0 (2)	0 (2)

Notes

1. As per the DTT, it is not to exceed 15%, but the non-treaty domestic rate is 10%.
2. Only taxable in the state of residence.

Tax administration

Taxable period

The taxation period for which the CIT is assessed is the calendar year.

Tax returns

CIT returns are filed annually, and the deadline to submit the annual return is 31 March of the following year.

Payment of tax

Taxpayers with income from economic activities exceeding EUR 50,000 per year are obligated to make quarterly advance payments (15 April, 15 July, 15 October, and 15

January) that amount to ¼ of 110% of the total tax liability for the previous tax period. If it is the taxpayer's first year of business and/or a tax loss was incurred in the previous year, quarterly advance payments are made on the principle of estimation of that year's CIT liability.

Final CIT payment is due with the return on 31 March.

Tax audit process

The Kosovo tax system is based on self-assessment. Tax audits include all types of taxes that the business is subject to. If any discrepancies result from the tax audit, the tax authorities issue an audit report and re-assessment notices, which the taxpayer can appeal to the Appeals Department within the tax authority.

A taxpayer may submit an amended tax declaration if one subsequently discovers an error in a tax declaration that has already been submitted. The deadline for submitting an amended declaration is six years after the due date of the declaration being amended.

Statute of limitations

The statute of limitations in general circumstances is six years.

Topics of focus for tax authorities

During a tax audit, the main focus of the tax authorities is on areas relating to CIT expense deductibility, VAT crediting rights, WHT compliance, etc.

Other issues

Choice of business entity

Business entities that may be registered with the Business Registration Agency in Kosovo are the following:

- Personal business enterprise.
- General partnership.
- Limited partnership.
- Limited liability company.
- Joint stock company.

Apart from the above forms of establishment, foreign business organisations may also carry out economic activity in Kosovo through a branch office, upon registration with the Business Registration Agency in Kosovo.

Adoption of International Financial Reporting Standards (IFRS)

IFRS is adopted and recognised under Law No.04/L-014 on Accounting, Financial Reporting and Audit.

Intergovernmental agreements (IGAs)

Kosovo is a member of the Central European Free Trade Area (CEFTA).

The Stabilization and Association Agreement aimed at liberalizing trade with the European Union entered into force in April 2016.

On 26 February 2015, the Government of the United States of America and the Government of the Republic of Kosovo signed an IGA entitled, 'Agreement between the Government of the United States of America and the Government of the Republic of Kosovo to Improve International Tax Compliance and to Implement FATCA [Foreign Account Tax Compliance Act]'. The IGA requires, in particular, the exchange of certain information with respect to US reportable accounts on an automatic basis.

Tax information exchange agreements (TIEAs)

Specific TIEAs have not been signed with any country, except for standard information exchange provisions within existing DTTs.

Significant developments

There have been no significant corporate tax developments in Kuwait during the past year.

Taxes on corporate income

Kuwait does not impose corporate income tax (CIT) on companies wholly owned by the nationals of Kuwait or other Gulf Cooperation Council (GCC) countries (Bahrain, Oman, Qatar, Saudi Arabia, and the United Arab Emirates). However, GCC companies with foreign ownership are subject to taxation to the extent of the foreign ownership. CIT is imposed only on the profits and capital gains of foreign 'corporate bodies' conducting business or trade in Kuwait, directly or through an agent.

Income earned from activities in Kuwait shall be considered subject to tax in Kuwait on the basis that it is Kuwait-sourced income. In cases where a contract involves the performance of work both inside and outside Kuwait, the entire revenue from the contract must be reported for tax in Kuwait, including the work carried out outside Kuwait. *Please refer to the Income determination section for more information on income that is subject to tax in Kuwait*.

The current CIT rate in Kuwait is a flat rate of 15%.

Foreign companies carrying on trade or business in the offshore area of the partitioned neutral zone under the control and administration of Saudi Arabia are only subject to tax in Kuwait on 50% of their taxable profit under the law.

Please see the Withholding taxes section for the description of the 5% tax retention requirement.

Zakat

Zakat is imposed on all publicly traded and closed Kuwaiti shareholding companies at a rate of 1% of the companies' net profits.

Contribution to the Kuwait Foundation for the Advancement of Sciences (KFAS)

All Kuwaiti shareholding companies are required to pay 1% of their net profits as per their financial statements, after transfer to the statutory reserve and the offset of losses carried forward, to the KFAS, which supports scientific progress.

Corporate residence

A company is resident in Kuwait for CIT purposes if it earns income from Kuwait, directly or indirectly. Given that CIT in Kuwait does not apply to Kuwaiti entities, only foreign entities earning income from Kuwait would be subject to tax. In addition, any foreign corporate body that is a shareholder in a Kuwaiti limited liability company would be subject to tax to the extent of the foreign ownership (*see the Taxes on corporate income section*). For the purpose of the CIT law, GCC entities wholly owned by GCC residents are treated in the same manner as Kuwaiti business entities.

Permanent establishment (PE)

A place of business or the presence of company employees/representatives in Kuwait, even if for short-term visits, can trigger a PE in Kuwait. If the company is proven to have a PE in Kuwait, the Kuwait Tax Authority can subject to tax either the profit attributable to the PE or the full value of the contract, including the value of work performed outside Kuwait. The interpretation and application of the tax law by the Kuwait Tax Authority is usually inconsistent with international standards, and is subject to the widest possible interpretation in order to tax all income from Kuwait.

Other taxes

Value-added tax (VAT)

The GCC states (including Kuwait) executed the GCC VAT framework agreement in February 2017. The signing of the treaty paves the way for the introduction of VAT with effect from 1 January 2018 in the GCC. However, the GCC countries could implement VAT in either 2018 or 2019 as per the terms of the treaty. In Kuwait, the GCC framework agreement is currently under discussion in the Parliament while the draft Law is under preparation by the government.

Customs tariffs

The GCC states have approved a unified customs tariff of 5% on cost, insurance, and freight (CIF) invoice price, subject to certain exceptions. A higher tariff is imposed on imports of tobacco and its derivatives, among other products.

Excise taxes

There are no excise taxes in Kuwait.

Property taxes

There are no property taxes in Kuwait.

Transfer taxes

There are no transfer taxes (e.g. stamp duty, real estate) in Kuwait.

Payroll taxes

There are no payroll taxes applicable in Kuwait, other than those for social security contributions (*see below*).

Social security contributions

For Kuwaiti employees, contributions are payable monthly by both the employer and employee under the Social Security Law. The employer's contribution is 11.5% and the employee's is 8% of monthly salary, up to a ceiling of 2,750 Kuwaiti dinars (KWD) per month. Benefits provided include pensions on retirement and allowances for disability, sickness, and death.

In addition to the above contributions, the employee must contribute 2.5% of their monthly salary, up to a ceiling of KWD 1,500 per month, under the Social Security Law.

There are no social security obligations for expatriate workers. However, for foreign employees, it is generally necessary to make terminal indemnity payments calculated at 15 days' pay-per-year for the first three years of service and 2/3 month's pay-per-year thereafter.

National Labour Support Tax (NLST)

The purpose of the NLST law is to encourage the national labour force to work in the private sector by closing the gap in salaries and benefits between public and private sectors.

As per the law, Kuwaiti companies listed in the Kuwait Stock Exchange (KSE) are required to pay an employment tax of 2.5% of the company's net annual profits.

Branch income

The tax rate on branch profits is the same as on corporate profits, a 15% flat tax rate.

Income determination

Income tax is imposed on the profit of a business in Kuwait as calculated by the normal commercial criteria, using generally accepted accounting principles (GAAP), including the accrual basis. Note that provisions, as opposed to accruals, are not deductible for tax purposes. In addition, for contract accounting, revenue is recognised by applying the percentage of completion method.

Article 2 of the Executive Bylaws to the Kuwait Tax Law provides that income earned from the following activities in Kuwait shall be considered subject to tax in Kuwait:

- Any activities or business carried out either entirely or partially in Kuwait, whether the contract has been signed inside or outside Kuwait, as well as any income resulting from the supply or sale of goods, or from providing services.
- The amounts collected from the sale, rent, or granting of a franchise to utilise any trademark, design, patent, copyright, or other moral rights, or those related to intellectual property (IP) rights for the use of rights to publish literary, arts, or scientific works of any form.
- Commission earned or resulting from agreements of representation or commercial mediation, whether such commission is in cash or in kind.
- Having a permanent office in Kuwait where the sale and purchase contracts are signed and/or where business activities are performed.
- Profits resulting from the following:
  - Any industrial or commercial activity in Kuwait.
  - Disposal of assets, either through the sale of the asset, part of the asset, the transfer of the asset's ownership to others, or any other form of disposal,

including the disposal of shares in a company whose assets mainly consist of immovable capital existing in Kuwait.
- Granting loans in Kuwait.
- Purchase and sale of property, goods, or related rights in Kuwait, whether such rights are related to monetary assets or moral rights, such as mortgage and franchise rights.
- Lease of property used in Kuwait.
- Providing services, including profits from management, technical, and consultancy services.
- Carrying out trading activities in the KSE, whether directly or through portfolios or investment funds.

Inventory valuation

Inventory is normally valued at the lower of cost or net realisable value, on a first in first out (FIFO) or average basis.

Capital gains

Capital gains on the sale of assets and shares by foreign shareholders are treated as normal business profits and are subject to tax at a 15% rate. The tax law provides for a tax exemption for profits generated from dealing in securities on the KSE, whether directly or through investment portfolios.

Dividend income

Dividends declared by companies listed on the KSE after 10 November 2015 are exempt from tax in Kuwait.

Interest income

In principle, tax is levied on the foreign company's share of the profits (whether or not distributed by the Kuwaiti company) plus any amounts receivable for any other income in Kuwait (e.g. interest, royalties, technical services, management fees). However, the Kuwait tax law will still subject the interest received from a Kuwaiti source to tax in Kuwait, whether this interest is the only source of income for the foreign entity in Kuwait or the foreign entity has more sources of income in Kuwait other than the interest income.

Royalty income

Royalty income earned from "the sale, lease, grant of franchise to use or utilise any trademark, design, patent, intellectual property, or copyright in Kuwait" is taxable in Kuwait. Kuwait tax law imposes a deemed profit of 98.5% on royalties earned from Kuwait (1.5% being an allowance for head office overhead), on which the prevailing flat corporate tax rate of 15% is applied.

Foreign currency exchange rates and related profits and losses

The tax treatment for realised and unrealised losses and gains related to foreign currency transactions are as follows:

- Unrealised foreign exchange gains are required to be reported in the tax declaration. However, unrealised gains may be excluded from taxable income for calculating the tax due for the fiscal year.
- Realised foreign exchange gains are taxable in Kuwait and are therefore added to calculate taxable profits.

- Unrealised losses are not considered as tax deductible costs and are therefore excluded for calculating taxable profits.
- Realised losses may be claimed as tax deductible costs, provided such losses are supported by adequate supporting information and documents.

Exempt income

The following sources of income are exempt from tax in Kuwait:

- Profit from the sale of goods to a buyer in Kuwait, where the supplier is not involved in any operations in Kuwait.
- Profits of a corporate body generated from dealing in or disposing of securities listed on the KSE, whether such activities are carried out directly or through investment portfolios or funds.

Foreign income

The Kuwait tax law does not clearly provide for the tax treatment of foreign income. Such income is currently treated on a case-by-case basis.

Deductions

For expenses to be deductible, they must be incurred in the generation of income in Kuwait. Such expenses must be supported by adequate documentary evidence.

Depreciation

Depreciation is taken on a straight-line basis at specified rates. However, within 90 days prior to submission of the tax declaration, the taxpayer may request that the tax department calculate the depreciation using a different method than the straight-line method. The tax department shall accept this request if it is based on a reasonable basis in accordance with the tax accounting principles and rules.

The principal depreciation rates are specified in the law, as follows:

Type of fixed asset	Depreciation rate (%)
Buildings	4
Pre-fabricated buildings, furniture, and office equipment	15
Electronics and electrical equipment	15
Transportation and freight vehicles (trucks)	15
Tools and equipment	20
Cars and buses	20
Drilling equipment	25
Software	25
Computer equipment and accessories	33.3

Goodwill

In accordance with Executive Rule No. 30, amortisation of incorporated body goodwill is not allowed as a tax deductible expense.

Start-up expenses

Expenses incurred prior to signing of the contract are not allowed as tax deductible costs.

Interest expenses

Interest expenses are deductible if they are related to operations in Kuwait and are paid to a local bank.

Bad debt

Bad debt is deductible if it is related to operations in Kuwait and a final decision by the court is available.

Charitable contributions

Grants, donations, and subsidies paid to licensed Kuwaiti public or private agencies are deductible.

Fines and penalties

Fines and penalties are not tax deductible.

Taxes

Taxes and fees, except income tax, are deductible in Kuwait.

Subcontract costs

A subcontractor is any third party, provider, or beneficiary that in any way executes a portion of the contract or any phase thereof.

As per Executive Rule No. 28, subcontract costs are deductible if the following conditions are met:

- The work performed by the subcontractor is related to the main contract.
- The cost of the subcontractor's work does not exceed the revenue for such work.
- The necessary documents (e.g. the contract, invoices, settlement documents) are available.
- In the event that the incorporated body implementing the contract sells or assigns it to the subcontractor or any other party, official written approval from the contracting body is provided.
- In the event that the subcontractor sells or assigns the contract to another subcontractor, official written approval from the contracting body and the incorporated body implementing the contract is provided.

During inspection, the tax department shall disallow the amounts paid to subcontractors if the incorporated body does not notify the tax department of the subcontractors or does not withhold 5% of the contract value signed with the subcontractor as income tax retention.

Net operating losses

As per the amended tax law, losses may be carried forward for a maximum of three years, provided that the following situations do not arise in the fiscal period following the period in which the loss was recorded:

- The tax declaration does not include any revenue from the business activities of the taxpayer in Kuwait.
- Change in the legal structure of the taxpayer.
- Merger of the taxpayer with another entity.
- Liquidation or ceasing of the activities of the taxpayer in Kuwait.

Please note that losses cannot be carried back under the Kuwait tax law.

Head office expenses/payments to foreign affiliates

The deduction of head office expenses (the overhead or the indirect expenses) is limited to 1.5% of the company's Kuwait revenue after deducting the subcontractors' shares (if any).

The direct costs allocated by the head office (e.g. supply of goods, design and consultancy costs) are regulated as follows.

For costs of supply from outside Kuwait:

Supply from	Maximum allowable costs as a percentage of revenue
Head office	85%
Affiliated companies	90%
Third parties	95%

For design costs incurred outside Kuwait:

Work conducted by	Maximum allowable costs as a percentage of revenue
Head office	75%
Affiliated companies	80%
Third parties	85%

For consultancy costs incurred outside Kuwait:

Work conducted by	Maximum allowable costs as a percentage of revenue
Head office	70%
Affiliated companies	75%
Third parties	80%

In case there is no separate revenue for consultancy, design, or supply work, although the nature of the contract requires the existence of such work, the following formula shall be applied:

Consultancy, design, or supply revenue = (consultancy, design, or supply costs / total direct costs) x contract revenue

Group taxation

If a foreign company conducts more than one business activity in Kuwait, one tax declaration aggregating the income from all activities is required to be submitted in Kuwait. In addition, in case two affiliates are involved in similar lines of business or work on the same project, their taxable results may be aggregated for the assessment of tax by the Department of Inspection and Tax Claims (DIT), a department of the Kuwait Tax Authority.

Transfer pricing

There is no Transfer Pricing Law in Kuwait. However, Executive Rule No. 49 to the Kuwait Tax Law states that inter-company transactions should be comparable to transactions among companies that are not legally or financially associated. It also states that the Kuwait Tax Authority is entitled to inspect such transactions to ensure that they are made on an arm's-length basis and not made for obtaining illegal tax privileges.

Thin capitalisation

Executive Rule No. 38 deals with the tax treatment of interest and letters of credit. Through this rule, the DIT will accept the interest paid by a company, provided it is fully supported, paid to a financial institution, and related to the Kuwait operations. However, the tax law provides the DIT with the right to determine the proper tax treatment on a case-by-case basis (if required).

Controlled foreign companies (CFCs)

There are no CFC rules in Kuwait.

Tax credits and incentives

Leasing and Investment Companies Law No. 12 of 1998

Leasing and Investment Companies Law No. 12 of 1998 allows the formation of investment and leasing companies having their principal place of business in Kuwait, with Kuwaiti or foreign shareholders. The law grants a five-year tax holiday to non-Kuwaiti founders and shareholders of such companies, beginning on the date of establishment of the companies.

Foreign Direct Investment Law No. 116 of 2013 (FDI Law)

The FDI Law provides foreign companies with several incentives, including:

- Expedited process by introducing a one-stop-shop authority, the Kuwait Direct Investment Promotion Authority (KDIPA), that is responsible for evaluating and granting the licence and approval for foreign companies operating in Kuwait (compared to the old committee and Council of Ministers).
- Added flexibility of allowing foreign companies the possibility of establishing and operating through a 100% foreign-owned 'branch' or 'representative office' in Kuwait.
- Allowable tax credit for a certain number of years.
- Total or partial exemption from customs duties on imports.
- Recruitment of required foreign labour.

The incentives granted to foreign investors in Kuwait under the FDI Law are applicable to activities in certain economic sectors and subject to the fulfilment of certain requirements including:

- The transfer of advanced technology to Kuwait.
- Stimulation of the local market through engagement of local suppliers for operational purchases.
- Creation of job opportunities for Kuwaiti nationals.

Kuwait Free Trade Zone (KFTZ)

Businesses set up in the KFTZ for carrying on specified operations are exempt from taxes on operations conducted in the zone. Foreign entities can own 100% of such businesses. Currently, the government of Kuwait has stopped issuing KFTZ licences.

Circular No. 50 of 2002

As per Circular No. 50 of 2002 issued by the DIT regarding treatment of tax-exempted companies under the tax law, other special laws, and/or tax treaties, exempted companies shall comply with submitting a tax declaration, the inspection process, and the assessment procedures like other companies in order to be eligible for exemption.

Build, operate, and transfer (BOT)

Kuwait has begun to use the BOT method in respect of some large infrastructure projects. Tax and tariff concessions may be built into a BOT contract.

Foreign tax credit

Foreign taxes paid in a country with which Kuwait has a treaty for avoidance of double taxation may be eligible for credit, up to the maximum of the Kuwaiti tax that would have been payable on such income.

Withholding taxes

Kuwaiti tax law does not impose withholding tax (WHT). However, all public bodies and private entities are required to retain 5% from the contract, agreement, or transaction value or from each payment made to any incorporated body until presentation of a tax clearance certificate, by the recipient of such payment from the Ministry of Finance (MoF), confirming that the respective company has settled all of its tax liabilities in Kuwait. The final payment should not be less than 5% of the total contract value.

Tax treaties

Kuwait has entered into tax treaties with several countries for the avoidance of double taxation. Treaties with several other countries are at various stages of negotiation or ratification.

The interpretation of tax treaties by the Kuwait Tax Authority is not always consistent or in line with the interpretation generally considered appropriate by the taxpayers and usually does not follow the OECD's guidance or the international standards for the interpretation of tax treaties. As a result, disputes on the interpretation of various clauses in tax treaties between taxpayers and the DIT are common. Disputes with the DIT regarding tax treaties normally arise with respect to the following topics:

- Existence of a PE.
- Income attributable to a PE.
- Tax deductibility of costs incurred outside Kuwait.

The domestic tax law in Kuwait does not provide for WHTs. The WHT rates listed in the table are for illustrative purposes only.

	WHT (%)

Notes

1. The rate is 0% for amounts paid to a company of which the government owns at least 20% of the equity.
2. The rate is 0% for interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for the interest paid to entities in which the government owns a specified percentage of the equity and for interest paid on loans guaranteed by the government.
3. The rate is 0% for dividends and interest paid to the government of the other contracting state. Under the Ethiopia treaty, the rate is also 0% for dividends paid to entities in which the government owns a specified percentage of the equity.
4. The rate is 10% for dividends paid to the government of Kuwait or any of the institutions or any intergovernmental entities. The rate is 15% for other dividends.
5. The 5% rate applies if the recipient of the dividends owns, directly or indirectly, at least 10% of the payer. The 15% rate applies to other dividends.
6. The rate is 0% for amounts paid to the government or governmental institution of the other contracting state. The 5% rate applies to other dividends.
7. The rate is 0% for amounts paid to the government of the other contracting state and to entities of which the government owns at least 51% of the paid-up capital.
8. For dividends and interest, the rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is a resident of the other contracting state and is controlled by, or at least 49% of the capital is owned, directly or indirectly, by, the government or a governmental institution. A 0% rate also applies to interest arising on loans guaranteed by the government of the other contracting state or by a governmental institution or other governmental entity of the other contracting state.
9. A 0% rate applies if the beneficial owner of the dividends is a company that holds directly at least 10% of the capital of the company paying the dividends.
10. The rate is 0% if the payments are made to the government or a governmental institution of the other contracting state, or to a company that is resident of the other contracting state and is controlled by, or at least 25% of the capital is owned, directly or indirectly, by, the government or a governmental institution of the contracting state. The 5% rate applies to other dividends.
11. The rate is 0% if the beneficial owner of the interest is a resident in the other contracting state and the loan is secured or financed, directly or indirectly, by a financial entity or other local body wholly owned by the government of the other contracting state.
12. The 5% rate applies if the recipient of the dividends owns, directly or indirectly, at least 25% of the payer. The 10% rate applies to other dividends.
13. Except in the case of dividends paid by a non-resident-owned investment corporation that is a resident of Canada, the rate is 5% if the beneficial owner of the dividends is a company that owns 10% or more of the issued and outstanding voting or 25% or more of the value of all of the issued and outstanding shares. The 15% rate applies to other dividends.
14. Dividends or interest paid by a company that is resident of a contracting state is not taxable in that contracting state if the beneficial owner of the dividends or interest is the government or governmental institution of the other contracting state.

15. The rate is 0% if the dividend is paid to the other contracting state or any government or governmental institution therein. The 5% rate applies if the dividend is paid to a company that directly holds at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
16. The rate is 5% if the dividend is paid to (i) a government or governmental institution of the other contracting state or (ii) a company that directly or indirectly controls at least 15% of the capital of the company paying the dividends and its participation in that company exceeds 200,000 US dollars (USD). The 10% rate applies to other dividends.
17. The 0% rate applies if (i) the dividend is paid to a company that holds at least 25% of the capital of the company paying the dividends or (ii) the beneficial owner of the dividend is the other contracting state or any governmental institution. The 5% rate applies if the dividend is paid to a pension fund or other similar institutions. The 15% rate applies to other dividends.
18. The 0% rate applies if the dividend is paid to a company that has invested more than USD 3 million in the capital of the company paying the dividends. The 5% rate applies to other dividends.
19. The 0% rate applies if the dividend or interest is paid to the government or any governmental institution of the other contracting state. The 5% rate applies to all other dividends and interest.
20. The 5% rate applies if the dividend is paid to a company that owns at least 10% of the voting shares of the company paying the dividends. The 10% rate applies to other dividends.
21. The 0% rate applies if the interest is paid (i) to the government or governmental institution of the other contracting state or (ii) to a resident of that other contracting state with respect to debt-claims guaranteed, insured, or indirectly financed by the government or governmental institution of that other contracting state. The 10% rate applies to other interest.
22. The 10% rate applies where the royalties arise from the use of, or the right to use, any patent, trademark, design or model, plan, secret formula or process, or any copyright of scientific work, or for the use of, or the right to use, industrial, commercial, or scientific equipment, or for information concerning industrial, commercial, or scientific experience. The 15% rate applies where the royalties arise from the use of, or the right to use, cinematograph films, tapes for radio or television broadcasting, or any copyright of literary or artistic work.
23. The 2.5% rate applies if the dividend is paid to the government of the other contracting state. The 5% rate applies if the dividend is paid to a company that holds at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
24. The 10% rate applies if the dividend is paid to a company that holds at least 10% of the capital of the company paying the dividends. The 15% rate applies to other dividends.
25. The 5% rate applies if the dividend is paid to (i) a company that directly holds at least 10% of the capital of the company paying the dividends or (ii) a resident of the other contracting state. The 10% rate applies to other dividends.
26. The 0% rate applies where the company receiving the dividends is a resident of the other contracting state that directly holds at least 10% of the capital of the company paying the dividends. The 5% rate applies to other dividends.
27. The 5% rate applies where the dividend is paid to a government or governmental institution of the contracting state. The 10% rate applies to other dividends and interest. The 0% rate applies to interest paid to a government or governmental institution or to loans given to such institutions.
28. The 5% rate applies where the dividend is paid to a company that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
29. The 5% rate applies where the dividend is paid to a company that directly holds at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
30. The 10% rate applies where the dividend is paid to the government or any governmental institution in the other contracting state. The 15% rate applies to other dividends.
31. The 5% rate applies if the dividend is paid to a company that directly holds at least 25% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
32. The 0% rate applies where the dividend is paid to the government or any governmental institution of that contracting state. The 5% rate applies where the beneficial owner of the dividend is a company that directly or indirectly controls at least 10% of the capital of the company paying the dividends. The 10% rate applies to other dividends.
33. The 0% rate applies where dividends are paid by a company that is a resident of Belgium to (i) the government of Kuwait or any governmental institution established in Kuwait or (ii) a company that is a resident of Kuwait in whose capital the government of Kuwait directly or indirectly owns at least 25%.
34. The 0% rate applies to (i) interest paid to a government or any governmental institution of contracting state or (ii) interest arising from loan or credit made by a governmental institution for financing exports. The 10% rate applies to other interest.
35. The 0% rate applies where the dividend or interest is paid to the central bank, government, or any governmental institution. The 5% rate applies to other dividends and interest.
36. The 0% rate applies where interest is paid to the central bank, government, or any governmental institution. The 5% rate applies to other interest.
37. The 0% rate applies if the dividend is paid to (i) a company that directly holds at least 10% of the capital of the company paying the dividends or (ii) a government or any governmental institution. The 5% rate applies to other dividends.
38. The 0% rate applies where the interest is paid to a bank, government, or any governmental institution. The 5% rate applies to other interest.
39. The rate of 5% applies if the beneficial owner of the interest carries on business in the other contracting state through a PE and the debt on which the interest is paid is connected to such PE.
40. The 0% rate applies where the dividend is paid to the government or any governmental institution of that contracting state. The 5% rate applies to other dividends.

41. The 0% rate applies where interest is paid to the central bank or government of a contracting state. The 2% rate applies to other interest.
42. The 0% rate applies where interest is paid to the government or any governmental institution of a contracting state.
43. The 0% rate applies where the dividend or interest is paid to the government or any governmental institution of a contracting state. The 5% rate applies to other interest and dividends.
44. The 0% rate applies where interest is paid to the government or any governmental institution of a contracting state. The 10% rate applies to interest paid to financial institutions. The 15% rate applies to all other interest.
45. The 4.9% rate applies in case of interest paid to banks, and 10% in other cases.

Kuwait is awaiting conclusion or ratification of treaties with Algeria, Bangladesh, Benin, Bosnia and Herzegovina, Guyana, Kenya, Lithuania, Luxembourg, Nigeria, Senegal, and Seychelles.

Tax administration

Taxable period

Tax is imposed on profits arising in a taxable period, which is defined as the accounting period of the taxpayer and further assumed to be one calendar year. The first taxable period can, however, be a minimum of six months and a maximum of 18 months. The DIT may also agree to a written request from the taxpayer to change the year-end to a date other than 31 December.

Tax returns

The taxpayer must submit a tax return, based on the taxpayer's books of account, within three months and 15 days from the end of the taxable period. Taxpayers can, in certain cases, request an extension of up to 60 days to file the tax return. If such an extension is granted, no tax payment is necessary until the tax declaration is filed, and payment must then be in one lump sum.

The taxpayer must maintain certain accounting records in Kuwait, which are subject to inspection by the tax department's officials after submission of the tax declaration. Accounting records can be in English and may be in a computerised system used to prepare financial statements if the system includes the required records and the tax department is previously informed.

The tax return should be supported by the following:

- Audited balance sheet and profit-and-loss account for the period.
- Detailed list of fixed assets (e.g. additions, disposals).
- List of inventory (e.g. quantities and values).
- List of subcontractors and the latest payments to them.
- Copies of current contracts and a statement of income and expenditure for each.
- Trial balance, forming the basis of the accounts.
- Last payment certificate from the client.
- Insurance companies must attach to the Public Budget and the tax declaration a detailed statement with the reinsured documents and the related terms and conditions.

As a general rule, an assessment is finalised only after inspection of the client's records by the tax department. As indicated above, proper documentation must be maintained to support expenditures and to avoid disallowances at the time of tax inspection. If support is considered inadequate, the assessment is apt to be made on the basis of deemed profitability. This is computed as a percentage of turnover and is fixed arbitrarily, depending on the nature of the taxpayer's business.

Payment of tax

Tax is payable in four equal instalments on the 15th day of the fourth, sixth, ninth, and 12th months following the end of the tax period. If an extension is granted by the DIT, all of the tax is payable upon the expiration date of the extension. Failure to file or pay the tax on time attracts a penalty of 1% of the tax liability for every 30 days of delay or part thereof.

Objection process

If a company disagrees with an assessment issued by the DIT, the company should submit an objection within 60 days from the date of the assessment. The DIT is required to resolve the objection within 90 days of the filing of the objection, after which a revised tax assessment is issued by the DIT. Upon issuance of a revised tax assessment, any additional tax is payable within 30 days. If the DIT issues no response within 90 days of filing the objection, this implies that the taxpayer's objection has been rejected.

Appeals process

In case the objection is rejected or the taxpayer is still not satisfied with the revised tax assessment, the company may contest the matter further with the Tax Appeals Committee (TAC) by submitting a letter of appeal within 30 days from the date of the objection response or 30 days from the expiry of the 90 days following submission of an objection if no response is provided by the DIT.

The matter is then resolved through appeal hearings, and a final revised assessment is issued based on the decision of the TAC. Tax payable per the revised assessment must then be settled within 30 days from the date of issuance of the revised assessment. Failure to do so results in a delay penalty of 1% of the amount of the tax due per the final assessment for each period of 30 days or part thereof of the delay.

Statute of limitations

The statute of limitations period is five years. Moreover, under Article No. 441 of the Kuwait Civil Law, any claims for taxes due to Kuwait or applications for tax refunds may not be made after the lapse of five years from the date on which the taxpayer is notified that tax or a refund is due.

Topics of focus for tax authorities

The DIT has implemented an active approach to ensure the compliance of local companies with the tax retention mechanism in order to ensure that foreign entities earning income from Kuwait are subject to tax on such income. The DIT's attention is often directed to local companies having franchise operations and agreements with foreign franchisors in Kuwait. In some cases, the DIT has asked the Kuwaiti companies to settle the 5% retention where the franchisors have failed to comply with the tax law requirements.

Other issues

United States (US) Foreign Account Tax Compliance Act (FATCA)

The state of Kuwait has signed an Intergovernmental Agreement (IGA) with the United States, dated 29 April 2015, in light of FATCA. In this regard, Ministerial Order Number 48 of 2015 (MO No. 48) was issued on 3 September 2015, setting a compliance framework for the financial institutions operating in Kuwait.

Financial institutions (FIs) operating in Kuwait have a series of compliance requirements to adhere to within the deadlines provided by MO No. 48. FIs were primarily required to register with the US Internal Revenue Service (IRS), appoint the Responsible Officer, and implement the compliance requirements by 31 December 2015.

FIs in Kuwait are expected to report on an annual basis on or before 30 September of each year; the report is to include the Specified US Persons identified for each period ending 31 December (i.e. nine months from the year-end). It has been the practice of the MoF to request the reports by 30 August to ensure all financial institutions are reporting prior to the deadline specified by the IRS.

The Common Reporting Standard (CRS)

Kuwait committed to the CRS on 19 August 2016 by signing the Multilateral Competent Authority Agreement (MCAA), with a plan to commence the first reporting period in 2018.

On 12 July 2017, MO No. 36 of 2017 was published in the Official Gazette, which confirmed Kuwait's commitment to implement the CRS. On 20 August 2017, MO No. 46 of 2017 was issued, whereby specific deadlines for reporting, due diligence, and update of on-boarding procedures were published. Moreover, as specified by the MO, the FIs are required to hire an auditor to provide an opinion on the process and reporting undertaken by the FI to meet the requirements of the CRS. As per MO No. 36 of 2017, the first report by FIs is expected on or before 31 May 2018. The cut-off date for pre-existing accounts is 31 March 2017 and for new customer accounts on or after 1 April 2017. That said, as of March 2018, the MCAA is yet to be approved by the Kuwaiti Parliament.

Significant developments

In 2018, the rates of excise tax for tobacco goods increased to 460 Kyrgyzstani som (KGS) per 1 kg, and for cigars to KGS 115 per 1 unit. Note that the excise tax rate for cigarettes and cigarillos increased in 2018 to KGS 1,250 and KGS 920 per 1,000 units, respectively.

Consideration of the new Tax Code is postponed indefinitely.

Taxes on corporate income

Pursuant to the Tax Code, resident entities are subject to a corporate income tax, called the 'profit tax', on their aggregate annual income earned worldwide. Non-resident legal entities carrying out business activities through a permanent establishment (PE) in Kyrgyzstan are subject to profit tax on the income attributed to the activities of that PE.

Profit tax is calculated at a rate of 10% of aggregate annual income less allowed deductions.

Gold industry profit tax

The profit tax rate for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold is set at 0%.

Additionally, there is a tax ('income tax') specifically for taxpayers extracting and selling gold ore, gold concentrate, gold alloy, and refined gold.

Income tax is calculated at a varying rate of 1% to 20% (depending on the world price of a troy ounce of gold) of revenues from selling gold alloy and refined gold or of the value of gold in the gold-bearing ore and gold concentrate calculated on the basis of world prices.

Local income taxes

There are no provincial or local income taxes in Kyrgyzstan.

Corporate residence

There is no concept of corporate residence in the Kyrgyzstan tax legislation.

Kyrgyzstan

Legal entities formed under the Kyrgyz law should be taxed in Kyrgyzstan on their worldwide income, whereas foreign legal entities should be taxed only in relation to Kyrgyzstan-sourced income.

Permanent establishment (PE)

Under Kyrgyzstan tax legislation, a PE is a permanent place of business through which a non-resident carries out business operations, including activities performed through an authorised person. A PE includes the following:

- Any place of management, department, office, factory, workshop, mining, oil and gas wells, land, construction site, or project.
- Any services rendered by non-residents by hiring personnel working in the territory of Kyrgyzstan for a duration of more than 183 calendar days within any consecutive 12-month period.

A PE is not created in Kyrgyzstan if a non-resident is limited to the following activities in Kyrgyzstan:

- Use of warehouses or buildings exclusively for storage or demonstration activities.
- Use of a fixed place of business exclusively for preparatory purposes.
- Performance of activities in Kyrgyzstan through an agent in cases where such agent usually performs such activities in the ordinary course of business.

Creation of a PE may be connected with the establishment of a branch or subsidiary. Both branches and subsidiaries are considered appropriate business vehicles for foreign investors, and the choice between them is determined by the business the investor is engaged in, along with various other factors.

Other taxes

Value-added tax (VAT)

As part of the gradual incorporation of Kyrgyzstan into the Eurasian Economic Union (EAEU) and the harmonisation of tax legislation between the member countries, the VAT part of the Tax Code has been amended.

In Kyrgyzstan, VAT is assessed on taxable supply and taxable imports. Input VAT assessed on purchases used for business purposes is generally offset against output VAT on taxable supplies. The VAT rate is 12%. Certain supplies are eligible for zero-rate VAT; there are also VAT-exempt turnovers (*see below*).

All taxpayers registered for VAT purposes are required to charge VAT on their taxable supply and to calculate and report their VAT liabilities. The threshold for obligatory registration as a VAT payer has been increased to KGS 8 million. Even if an entity is not required to register for VAT purposes, it may still do so voluntarily by submitting an application to the appropriate tax committee.

Place of supply of goods

Goods and services are subject to VAT if they are deemed to be supplied in Kyrgyzstan under the place of supply rules. According to these rules, transactions are deemed to be made at the place where transport of the goods begins if the goods are transported by the supplier and at the place where the goods are transferred to the customer in all other cases. The rules regarding services are more complicated. Services that are not specifically mentioned are deemed to be supplied at the place where the service provider has established a place of business. Certain other services are deemed to be supplied at the place of the purchaser.

Import of goods

Generally, imports of goods are subject to VAT.

Non-deductible input VAT

The input VAT is not allowed for offset if it is subject to payment in connection with the receipt of goods, works, or services not related to entrepreneurial activity, or if it relates to inputs for VAT-exempt supplies.

Zero-rated supplies

Certain supplies are zero-rated for VAT purposes. These include exports (except for certain limited types of export), international transportation, and services connected with the service of transit air flights related to international transportation. Supply of goods, works, or services for official use of diplomatic and consular representations is taxable, but may be refunded, provided that certain conditions are met.

Exempt supplies

Certain supplies are VAT-exempt, including supplies and exports of gold and silver alloy and refined gold and silver; supplies of pharmaceuticals; land plots; supplies and import of jet fuel consumed by international air carrier operators; residual buildings and construction; insurance, pension, and financial services; and export of works and services. When a taxpayer generates both taxable and exempt supplies, input VAT proportional to the ratio of the exempt supply to the total supply is disallowed for offset.

VAT incentives

Certain imports are VAT-exempt, including imports of technological equipment, if used for one's own production purposes. A preferential offset method of VAT settlement in respect of certain fixed assets imported to Kyrgyzstan is also available.

Reverse-charge VAT

The current Tax Code does not have any provisions on reverse-charge VAT.

VAT liability calculation and VAT offset carryforward

In general, the VAT liability of a taxpayer is calculated as output VAT (i.e. VAT charged by a taxpayer) less input VAT (i.e. VAT paid by a taxpayer to its suppliers) in a reporting period. The excess of input VAT over output VAT may generally be carried forward against future VAT liabilities.

VAT compliance

The tax period for VAT is a calendar month. The submission of the VAT declaration is due by the 25th day of the month following the reporting period (except for major taxpayers, for which it is due by the end of the month following the reporting period). Payment of the VAT liability is due by the 25th day of the month following the reporting period.

Sales tax

Sales tax is assessed on Kyrgyz legal entities or foreign entities operating through a PE in Kyrgyzstan for any sales of goods or rendering of services. The sales tax mechanism differs from VAT, i.e. sales tax is levied for whole sales turnover and does not take into account the purchases (input turnover).

Sales tax rates are as follows:

- In case of sale of goods, works, or services that are VATable and VAT exempt that are paid for in cash:
  - Trading activities: 1%.
  - Other activities: 2%.
- In case of sale of goods, works, or services that are VATable and VAT exempt that are paid for via non-cash settlement: 0%.
- In case of sale of goods, works, or services not outlined above:
  - Trading activities: 2%.
  - Other activities: 3%.
- 2% for banks.
- 5% for mobile communication activities.

The Kyrgyzstan Tax Code further defines 'trading activities' as activities on sale of goods purchased for re-sale purposes.

The tax period of sales tax is a calendar month. Taxpayers have to submit tax returns and make payments of sales tax at the place of tax registration by the 21st day of the month following the reporting month.

Customs duties and regimes

According to the Customs Code, the customs value of goods imported to the customs territory of Kyrgyzstan is determined by applying the following methods:

- Transaction value of imported goods.
- Transaction value of identical goods.
- Transaction value of similar goods.
- Deductive method.
- Computed method.
- Provisional method.

Based on the Kyrgyzstan customs legislation, the rates of customs duties may be:

- *Ad valorem* - charged in percentage to customs value of the taxable goods.
- Specific - charged within established size for unit of the taxable goods.
- Combined - including both above mentioned types.

The rates in percentage range from 0% to 65%.

Import restrictions

Generally, all entities or persons have equal rights to import and export or transfer goods into the Kyrgyzstan territory, including when carrying out foreign trade activity, except in special cases as stipulated by legislation and international treaties.

Import of certain goods (e.g. weapons, nuclear materials) is subject to licensing.

Temporary import relief

There is a temporary import regime under which foreign goods are used in Kyrgyzstan with full or partial conditional exemption from the payment of customs duties and taxes and without application of non-tariff regulatory measures. The term of the 'temporary import' customs regime may not exceed two years.

Customs duties incentives

Certain items are exempt from customs payments, including:

- Transportation vehicles used in the international conveyance of passengers and goods and items of material and technical supply in transit.
- Goods imported in the customs territory or imported from the customs territory for official and personal use by official state representatives of foreign states.

Kyrgyzstan provides preferential rates or exemptions on the importation (and export) of certain goods, including goods originating from the states that form free trade zones or a customs union with Kyrgyzstan and goods originating from developing countries, included on a special list provided by the government.

Documentation and procedures

Kyrgyzstan pays close attention to formalities/documentation, so it is necessary to furnish the customs authorities with a set of required documents. For import, such documents usually include cargo customs declaration, invoices, contracts, etc.

Warehousing and storage

There is a bonded warehouse customs regime in Kyrgyzstan. Under this regime, imports entering into Kyrgyzstan may be stored in special facilities or special areas that have the status of a customs warehouse under the customs legislation of Kyrgyzstan. This regime implies exemption from customs duties and taxes.

Generally, most goods (unless otherwise specifically provided for) can be placed under the bonded warehouse customs regime. The period for storage of goods at a bonded warehouse is determined by the person placing the goods into the customs warehouse but cannot exceed three years from the date when the goods were placed under the bonded warehouse customs regime.

Re-exports

The re-export regime is similar to that used in international practice. It is defined as a customs regime under which goods previously imported into Kyrgyzstan are exported without payment or with a refund of the paid amounts of import customs duties and taxes and without applying the non-tariff regulatory measures with respect to the goods in compliance with Kyrgyz legislation.

There are certain conditions under which goods can be re-exported. Customs duties and taxes are not charged for goods declared as goods intended for re-export. However, if the goods do not meet the re-export criteria, customs duties and taxes are paid in the amount that would be payable if the goods, at their importation, were declared for release for free circulation, as well as interest on them paid at the National Bank rates, as if deferment was provided with respect to the amounts at placement of the goods under the customs regime of re-export.

Excise tax

Certain goods manufactured in Kyrgyzstan or imported to Kyrgyzstan are subject to excise tax. These include certain alcohol and alcoholic drinks, fortified drinks, beer, tobacco goods, platinum, and oil products.

The rates of excise tax are adopted annually by the Kyrgyzstan government and range from KGS 30 for 1 litre of beer (pre-packaged and not packaged) to KGS 5,000 for 1 ton of fuel. In 2018, the rates of excise tax for tobacco goods increased to KGS 460 per 1 kg, and for cigars to KGS 115 per 1 unit. Note that the excise tax rate for cigarettes and cigarillos increased in 2018 to KGS 1,250 and KGS 920 per 1,000 units, respectively.

Stamp taxes

There are no stamp taxes in Kyrgyzstan.

Subsurface use taxes

The subsurface use taxes consist of separate bonus and royalty taxes on subsurface users, both Kyrgyz legal entities and branches of foreign legal entities. Under Kyrgyz legislation, subsurface users are legal entities and individuals who perform exploration and/or extraction of mineral resources.

The government, depending on the type of mineral resources, establishes the bonus rates.

The royalty rates are estimated either as a percentage of sales turnover (1% to 12%) or in absolute terms in Kyrgyzstani som, depending on the type of mineral resources.

Payroll taxes

The employer is obligated to withhold and transfer to the budget the income tax from its employees' gross remuneration less allowable deductions. The income tax rate is 10%.

Social contributions

The social security system in Kyrgyzstan is comprised of the Pension Fund, Obligatory Medical Insurance Fund, and Employees Recovery Fund. The employer pays social contributions at 17.25% of employees' gross remuneration from its own funds.

The employer is also required to withhold social contributions at 10% out of the salary that is payable by the employees to the Pension Fund and State Saving Fund.

Local taxes

There are two local taxes in Kyrgyzstan, property tax and land tax.

Property tax

Property tax is a local tax payable quarterly by legal entities owning transport vehicles and immovable property in Kyrgyzstan, including apartment houses, apartments, boarding houses, holiday inns, sanatoria, resorts, production, administrative, industrial, and other buildings or facilities. Certain real estate may not be subject to this tax according to special lists approved by the government.

In respect of immovable property, the tax rate is established by the city or local authorities at a rate not to exceed 0.8% of the taxable base, except for apartment houses and apartments designated solely for residence, for which the rate may not exceed 0.35% of the taxable base. For transport vehicles, the tax is computed in Kyrgyzstani som, depending on engine volume and year of production.

Land tax

Land tax is paid quarterly by legal entities on the area of owned land. The basic rates are provided in the Tax Code, depending on the location and purposes of the land. The basic rates may range from KGS 0.9 to KGS 2.9 per square metre.

Branch income

Branch income is subject to the profit tax. There is no special branch profits tax in addition to profit tax.

Income determination

Aggregate annual income is comprised of all types of income, including, but not limited to, the following, in addition to gross revenue from the sale of goods, works, or services:

- Dividends.
- Interest income (except for income already subject to withholding tax [WHT]).
- Royalties.
- Assets received free of charge.
- Rental income.
- Income from the reduction of liabilities.
- Foreign exchange gain.
- Write-off liability.

The Tax Code envisages some profit tax privileges aimed at developing certain areas of the business economy. Currently, these include privileges/preferences for:

- Charity organisations.
- Associations of invalids of I and II groups (i.e. persons with disability with different levels of physical disability); associations of blind and deaf persons.
- Agricultural organisations.
- Institutions of criminal-executive systems of Kyrgyzstan.
- Growing of berries, fruits, and vegetables.
- Credit unions.
- Companies that have been involved in the food industry for less than three years and included in the Kyrgyzstan government’s list of exempt companies.
- Leasing companies (from 2017).
- Pre-school education organisations.
- Private medicine institutions focused on cardiac surgery.

Non-taxable revenues include, *inter alia*, the following:

- Property received as a charter capital contribution and income from realisation of shares of organisations.
- Property donated to special organisations using such property for development purposes under the government’s social culture plan. Despite being designated as

property used for social culture purposes, such property may still be used for other purposes (i.e. citizen defence projects, mining equipment, water intakes, heat networks, roads, stations).

Inventory valuation

There are no special provisions on inventory valuation in the Kyrgyzstan Tax Code. Inventory valuation is conducted in accordance with the International Financial Reporting Standards (IFRS).

Capital gains

Capital gains are subject to the ordinary profit tax rate. There is an exemption available for capital gains from selling shares that occur on the date of a given sale in the official lists of the stock exchange in the top two categories of listing.

Dividend income

Dividends from participation in Kyrgyz legal entities are exempt from profit tax. All other dividends are subject to the ordinary profit tax rate.

Interest income

Interest income should be included into the aggregate annual income and taxed at the standard profit tax rate, provided the tax has not already been withheld at the source of payment in Kyrgyzstan at the 10% rate.

Royalty income

Royalty income should be included into the aggregate annual income and taxed at the standard profit tax rate.

Partnership income

Simple partnerships are not taxpayers in their own right, and income and expenses flow through to the partners for tax reporting purposes. Kyrgyzstan limited liability partnerships are taxed as corporations.

Foreign income

Generally, Kyrgyz legal entities are taxable on income earned worldwide. Foreign income is subject to the ordinary profit tax rate.

There are no tax deferral provisions in Kyrgyzstan tax legislation.

Deductions

Depreciation

The Tax Code establishes a deduction for depreciation based on the declining-balance method. Depreciable fixed assets are divided into several groups, for which maximum depreciation rates range from 10% to 50%.

Group	Assets	Maximum rate of depreciation (%)
I	Cars, automobile and tractor equipment for use on roads, special instruments, sundries, and accessories; computers, telephone sets, peripherals, and equipment for data processing	30

Group	Assets	Maximum rate of depreciation (%)
II	Automotive transport rolling stock: trucks, buses, special automobiles, and trailers; construction equipment; machines and equipment for all sectors of industry, including the foundry; smith-pressing equipment; electronic and simple equipment, agricultural machines. Office furniture, intangible assets	25
III	Depreciable fixed assets not listed in other groups and expenses equated to them	20
IV	Railroad, sea, and river transport vehicles, power machines, and equipment: thermal-engineering equipment, turbine equipment, electric motors and diesel-generators, electricity transmission and communication facilities, pipelines	10
V	Buildings and constructions	10
VI	Taxpayer's costs of geological preparation of deposit reserves, design and engineering-research works, and obtaining the licence for the use of deposits, as well as mining-capital and mining pre-works aimed at further extraction of minerals, as well as the fixed assets of the mining and/or mining-processing enterprises put into operation and actually used in deposit exploration	50

Certain expenses are deductible within specified limits, including expenses on repairs, expenses on procuring and producing capital production assets, and certain other expenses.

Goodwill

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for goodwill for profit tax purposes.

Start-up expenses

Kyrgyzstan domestic tax legislation does not stipulate the allowance of a deduction for start-up expenses for profit tax purposes.

Interest expenses

Deductions for interest actually paid on debts, where the loan proceeds were used to fund expenses incurred for the taxpayer's business activity, are allowed within limitations provided in the Tax Code, depending on methodology and nature of the debt. For example, interest on loans connected with the purchase of depreciable assets is not deducted, but increases their value.

Bad debt

Bad debt amounts are deductible in Kyrgyzstan. The Tax Code defines a 'bad debt' as the amount the taxpayer is unable to fully receive as a result of the termination of an obligation by the court, bankruptcy, liquidation, or death of the debtor, or expiry of the limitation period provided by the civil legislation of Kyrgyzstan.

Charitable contributions

Deductions for donations of assets to charity and budget organisations are limited to 10% of taxable income.

Fines and penalties

Fines and interest penalties paid to the state budget are not deductible.

Taxes

The following taxes may be deducted:

- Land tax.
- Property tax.
- VAT not allowed for offset.
- Subsurface use taxes.

Other significant items

Generally, other expenses related to the earning of aggregate annual income are considered deductible for profit tax purposes, including:

- Business trip expenses that were actually incurred and supported by appropriate documentation (*per diems* during business trips are deductible only within the established statutory limits).
- Commissions on payroll expenses for labour.
- Material and social benefits provided to employees.
- Representational expenses connected with earning income (transportation, hotel, and translator services).
- Training and retraining of employees.
- Scientific development and exploration works (deductions are relevant for fixed assets).
- Any other costs related to earning income, which can be supported by appropriate documentation in terms of their nature and amount (e.g. invoices, payment orders, receipts).

The other categories of expenses that are not deductible include, *inter alia*:

- Capital expenses and expenses connected with the purchase, production, and installation of equipment.
- Any expenses incurred on behalf of any other third persons, except in cases where documentation proves business needs for such expenses.
- Pricing losses caused by rates, understated below-market prices, and price incentives.
- Expenses connected with purchases of services in entertainment, vacations, and leisure.

Net operating losses

Net operating losses can be carried forward for up to five years. There are no provisions in Kyrgyz legislation allowing carryback of losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible for profit tax purposes if they are aimed at earning income and supported by documentation.

Group taxation

Group taxation is not permitted in Kyrgyzstan.

Transfer pricing

While there is no special law on transfer pricing in Kyrgyzstan, rules on transfer pricing are found in the Tax Code. The general transfer pricing provisions set in the Tax Code do not follow Organisation for Economic Co-operation and Development (OECD) guidelines (thus, no advance pricing agreement [APA] mechanism is provided). According to the Kyrgyz transfer pricing regulations, the tax authorities are empowered to determine the value of the following transactions:

- Transfers between related parties.
- Barter transactions.
- Cross-border transactions.

Provisions to the transfer pricing regulations were also developed granting the tax authorities the right to carry out transfer pricing controls on operations with goods for which the minimum target price has been established.

Thin capitalisation

There are no thin capitalisation limitations under the Kyrgyzstan Tax Code.

Controlled foreign companies (CFCs)

There are no provisions for CFCs in Kyrgyzstan.

Tax credits and incentives

Foreign tax credits

There is no possibility to offset the amount of tax paid outside Kyrgyzstan against the Kyrgyz tax if there is no double taxation treaty (DTT) with the country.

Investment incentives

Kyrgyzstan has an article in the Tax Code regarding the specifics of profit taxation on earnings from large investments. Based on the article, profit earned by a local company from own-produced or re-processed goods in Kyrgyzstan using only new equipment (not used or bought before 1 May 2015) is subject to 0% profit tax if the taxpayer has:

- annual turnover exceeding KGS 170 million
- monthly profit tax exceeding KGS 150,000, or
- charter capital of the local company exceeding KGS 10 million.

Please note that companies in the tobacco, mining, alcohol, retailing, and information technology (IT) sectors are not able to apply such incentives to their profit.

Moreover, dividends of a foreign company that engaged in large investment projects in Kyrgyzstan, not related to PE activities in Kyrgyzstan, received as part of the profit with 0% profit tax are subject to 0% WHT.

Special economic zones

There are four special economic zones in Kyrgyzstan: Naryn, Karakol, Bishkek, and Maimak. The special economic zones generally provide for a tax-neutral regime, exemption from customs duties, and a liberal currency control regime. However, there is a special fee for incentives, which varies from 0.1% to 2% of sales (depending on the region).

Park of Innovative Technologies

Activities of residents of the Park of Innovative Technologies are exempt from profits tax, sales tax, and VAT, providing they meet requirements of the Tax Code of Kyrgyzstan. The tax rate for employees of residents of the Park of Innovative Technologies and individual entrepreneurs is 5%.

Withholding taxes

Income of a non-resident deemed as income from sources in Kyrgyzstan that is not connected with a PE is subject to taxation at source of payment, without applying deductions, at the following rates:

- Dividends and interest: 10%.
- Insurance premiums received under risk insurance or re-insurance agreements: 5%.
- Authors fees and royalties: 10%.
- Income from telecommunication or freight services in international communication and transportation between Kyrgyzstan and other countries: 5%.
- Other services and activities: 10%.

WHT applies to Kyrgyzstan-source income regardless of whether the payment is made within or outside of Kyrgyzstan.

The application of DTTs often effectively provides a reduction of WHT rates or an income tax exemption. Note that the application of treaty privileges is not necessarily automatic, and taxpayers may need to comply with certain administrative procedures to secure relief.

Double taxation treaty (DTT) relief

Kyrgyzstan has enforced DTTs with 27 countries and 3 DTTs that are pending. In cases when certain DTTs envisage the tax rates applying for taxation of dividends, interest, or royalties that exceed the rates envisaged by the Kyrgyzstan domestic tax legislation, we believe that such income is subject to taxation at the rate envisaged by the above-mentioned tax legislation. Information outlined in the below table is provided for application by business entities. The below table does not represent tax provisions provided by respective DTTs for government-owned legal entities, governmental institutions, or governmental organisations (central/national banks).

Notes

1. Where the following condition is met:
   a. Beneficial owner is a company (other than a partnership) that directly holds at least 25% of the capital of the paying company.
   b. Beneficial owner is a company that directly holds at least 20% of the capital of the paying company.
   c. Beneficial owner is a company (other than a partnership) that directly holds at least 20% of the capital of the paying company.
   d. Beneficial owner is a company (other than a partnership) that owns not less than 10% of the capital of the paying company.
   e. Beneficial owner is a company that owns not less than 50% of the capital of the paying company.
   f. Beneficial owner is a company that directly or indirectly holds at least 25% of the capital of the paying company.
2. Where the following condition is met:
   a. Interest is paid in respect to credit sales of industrial, commercial, or scientific equipment, goods and merchandise, or sale of goods by an enterprise to another enterprise, given that the interest is beneficially owned by a resident of the another contracting state.
   b. Recipient is a bank or any financial institute, and interest is paid in respect to provision of a loan to another bank or financial institute.
   c. Interest applied to income deemed as income from debt-claim. The term ‘income from debt-claim’ means income from debt-claims of every kind, whether or not secured by mortgage and whether or not carrying a right to participate in the debtor’s profits, and, in particular, income from government securities and income from bonds or debentures, including premiums and prizes attaching to such securities, bonds, or debentures. Penalty charges for late payment should not be considered as income from debt-claims for the purpose of corresponding DTT.
   d. Interest is paid in respect of indebtedness arising as a consequence of the sale on credit of any equipment, merchandise, or services.
3. Where the following condition is met:
   a. Copyright royalties and other like payments in respect of the production or reproduction of any literary, dramatic, musical, or artistic work (but not including royalties in respect of motion picture films nor royalties in respect of works on film or videotape or other means of reproduction for use in connection with television broadcasting).
   b. (i) the payer and the beneficial owner of the royalties are not associated persons within the meaning of subparagraphs 1 (a) or 1 (b) of Article 9 (‘associated enterprises’) of corresponding DTT (*for more details, please see corresponding DTT*); (ii) royalties are paid for the use of, or the right to use, application software or any patent or for information concerning industrial, commercial, or scientific experience (but not including any such information provided in connection with a rental or franchise agreement).

c. Royalties are paid for the use of, or a right to use, industrial, commercial, or scientific equipment.

Tax administration

Taxable period

The taxable period for profit tax is one calendar year.

Tax returns

The Tax Code stipulates that the Aggregate Annual Income Tax Declaration must be filed with the tax authorities by 1 March of the year following the reporting year.

Tax authorities may grant an extension for filing a tax return for up to one month upon application by the taxpayer. Such extension does not relieve or prolong the taxpayer's obligation to pay the tax in a timely manner.

Payment of tax

Tax payments should be made as follows:

- Advance payments on profit tax: Taxpayers (except for zero-rated taxpayers and taxpayers exempt from profit tax) should file tax reporting and pay to budget a preliminary amount of profit tax on a quarterly basis (from the second quarter). The reporting period for the preliminary amount of the profit tax is established as the first quarter, first half year, and first nine months of the current fiscal period. The advance profit tax amount for the reporting period shall be determined in the amount of 10% of the profit calculated for the reporting period according to the rules established by Kyrgyz legislation on accounting. The advance profit tax amount payable to the budget for the reporting period shall be defined as the positive difference between the advance profit tax calculated for the reporting period and advance profit tax calculated for the previous reporting period.
- Final payments on profit tax: 1 March of the year following the reporting year.
- Tax withheld at the source of payment by a tax agent: By the 20th day of the month following the month when income was recognised.

Tax audit process

The State Tax Committee of the Ministry of Finance of Kyrgyzstan and its local tax authorities are the only state authorities that have the right to perform tax audits. The Kyrgyzstan tax service consists of relevant subdivisions of the revenue committee of the Ministry of Finance of Kyrgyzstan and its local authorities.

A tax audit is performed based on a written notification from the Head of the State Tax Inspectorate, which specifies the name of the company to audit, the scope of the audit, and the terms of the audit. Tax audits may be performed not more than once a year by one of the tax authorities (district, city, region, or the state tax authorities) and should not last more than 30 days (50 days for large level taxpayers). If necessary, however, a tax audit may be extended for ten additional days with written approval from the State Tax Inspectorate.

Statute of limitations

The period of limitation for tax liability is six years.

Topics of focus for tax authorities

Generally, the Kyrgyz tax authorities focus on the support for profit tax deductions, correctness of tax calculations, and WHT issues during the tax audits. Recently, we have also observed a rising interest from the tax authorities in transfer pricing issues as well as sales tax and VAT on telecommunication companies.

Significant developments

There have been no significant corporate tax developments in Lao People's Democratic Republic (PDR) during the past year.

Taxes on corporate income

Profits tax (PT)

All companies (including all forms of legal entities) that are registered under Lao PDR law are subject to PT on their worldwide income. Companies formed under foreign law, operating a business in Lao PDR, and conducting business in Lao PDR are subject to tax on their income derived in Lao PDR.

The standard rate of PT for companies in Lao PDR is 24% of net profit after adjustments for non-deductible expenses and others according to Lao Tax Law No. 70/NA, dated 15 December 2015. The 24% rate applies to both domestic and foreign investors.

Tax holidays and reduced PT rates are applicable to companies whose investment activities qualify as promoted investment activities (*see the Tax credits and incentives section for more information*) or large investments in mining and hydro power project (tax incentive is dependent on negotiation).

Lump-sum tax

The lump-sum tax is imposed on small and medium business operators that are not registered in the value-added tax (VAT) system and companies that did not prepare Lao accounting books. The lump-sum tax is paid in lieu of the PT, based on an agreement with the tax office; consequently, the lump-sum tax is regarded as a tax within the PT category.

Local income taxes

There are no provincial or local income taxes in Lao PDR.

Corporate residence

There is no definition of residence or permanent establishment (PE) provided in the amended Lao Tax Law No. 70/NA, dated 15 December 2015 (effective 24 May 2016), as well as the latest VAT Law, dated 23 July 2014 (effective 3 July 2015).

According to the double tax treaties (DTTs) of Lao PDR, 'permanent establishment' means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

It is understood that the reason for having no PE definition in the law is because there is foreign withholding tax (FWHT) levied on foreign entities conducting their business activities in Lao PDR. *For more information about the FWHT, please see the Withholding taxes section*.

Currently, the government is reassessing tax privileges and DTTs that they have offered to some businesses/signed with some countries in the past, and they have planned to cancel some; however, this is not yet final.

Other taxes

Value-added tax (VAT)

The standard VAT rate is 10%.

VAT is imposed on the final consumer of goods and services. Domestic goods and services used for production, trading, and consumption in Lao PDR, goods imported into Lao PDR, and services rendered by foreigners to Lao PDR customers are subject to VAT.

Certain goods and services are exempt from VAT. Exempted items include unprocessed agricultural products, seeds, fertilisers, textbooks, education services, medical services, certain bank services, and financial institution services.

Exported goods are zero-rated, except export of natural resources that aren't finished goods, which are subject to 10% VAT. The conventional credit method is used to calculate the VAT payable (i.e. output VAT less input VAT). Excess input VAT can be carried forward for six months (extendable) relating to goods and services. Excess input VAT arising from the capital expenditures that are regarded as fixed assets can be claimed until it is fully utilised. Input VAT for exports is refundable.

There is no concept of export services in the VAT Law. It appears that all services from all sources are subject to VAT.

Business operators engaged in production or trading of taxable goods and services must register in the VAT system if their annual revenue is 400 million Lao kip (LAK) or more. Companies below this threshold may voluntarily register. Only registered VAT payers may claim VAT refunds.

One unique feature of Lao PDR VAT is that VAT is imposed on the services rendered by overseas service providers to domestic service users (withholding VAT). Domestic service users have an obligation to withhold VAT on top of the service fees paid to overseas service providers. The rate of withholding VAT is 10%.

Import duties

All goods imported into Lao PDR are subject to import duty. Exemptions are available to enterprises operating promoted investment activities (*see the Tax credits and incentives section for more information*).

Lao PDR has adopted the General Agreement on Tariffs and Trade (GATT) valuation principles.

Duty rates are based on the Association of Southeast Asian Nations (ASEAN) harmonised tariff nomenclature for imports from ASEAN member countries (ASEAN Trade in Goods Agreement [ATIGA]).

Lao PDR has also signed free trade agreements (FTAs) with ASEAN dialogue countries: Australia and New Zealand (under their Closer Economic Relations FTA), China, India, Japan, and Korea; otherwise, normal rates are applied. Duty rates range between 0% and 40%, depending on whether the goods are ASEAN or other source.

Excise taxes

Excise tax is levied on consumers of certain imported goods, domestic produced goods, and services within the territory of Lao PDR. The rates range from 5% to 90%. Importers file and pay excise tax at the time of filing at the customs declarations at the customs checkpoints. Domestic producers and service suppliers shall file their monthly excise tax returns no later than the 15th day of the following month.

Property taxes

The land tax is based on both the location and the size of the land and is levied at annual rates per square metre. Land tax is payable in the first quarter of the relevant calendar year.

Transfer taxes

There are no transfer taxes in Lao PDR.

Stamp taxes

The stamp taxes in Lao PDR range from LAK 2,000 to LAK 20,000, depending on the types of documents.

Payroll taxes

Income from salaries and wages, including extra allowances, over-time work, position allowances, career allowances, annual bonuses, meeting allowances for members of the executive board of the companies, and other benefits received in cash and in kind, is subject to income tax withholding by employers at the progressive rates ranging from 0% to 24%. Personal income tax (PIT) is calculated based on gross revenue, as mentioned above, on a monthly basis, and is not recalculated again on an annual basis.

Social Security Scheme contributions

An enterprise with ten or more employees must register itself and its employees in the Social Security Scheme and make contribution to the scheme. Both the enterprise and its employees are obligated to contribute to the Social Security Scheme a combined 11.5% of the employees' basic salaries or wages. The enterprise contributes 6%, and each employee contributes 5.5%.

According to Notification No. 0824/NSSFO of Ministry of Labour and Social Welfare, the basic amount for Social Security Scheme calculation is LAK 4.5 million.

The Social Security Scheme contribution shall be paid by 15th day of the following month.

Administrative fees

Under the Tax Law, government sectors can collect fees for issuing fiscal licences, business licences, permits, visas, advertisement boards, broadcasting rights, and other services. The charges and service fees are set periodically by Presidential Decree.

Branch income

Branches of foreign companies are taxable on their income from carrying on business in Lao PDR. However, not all foreign companies can establish a branch in Lao PDR. Branches are applicable only to industries such as banking, financial institutions, aviation, and consulting.

Income determination

The PT calculation is based on an entity's actual accounting profits, prepared in accordance with the Lao Accounting Manual, as adjusted for tax purposes. The Lao PDR tax regulations are silent on the treatment of a large number of items. Generally, in such cases, the tax treatment will follow the accounting treatment. Some of the more common differences are depreciation, entertainment expenses, and the non-deductibility of reserves and provisions (until actually paid). In addition, there is a limitation on some expenses, such as travel expenses and charitable contributions.

Inventory valuation

Inventory valuation for tax purposes follows the method used for accounting purposes in Lao PDR. All allowances are non-deductible expenses.

Capital gains

There is no separate tax on capital gains in Lao PDR. However, profits from the sale of shares are subject to tax at the following rates based on the Law on Tax No. 70/NA, dated 15 December 2015:

- In case there is evidence of a cost certificate: 10% of the gain.
- In case there is no evidence of a cost certificate: 2% of the value of the selling price.

There is no tax for the gain on sale of investments in listed companies in Lao PDR.

The buyer of shares, except for purchase/sale of shares of a company listed in the stock market, is required to withhold and remit the tax.

The rate of income tax on sales or transfers of real property are as follows based on Law on Tax No. 70/NA, dated 15 December 2015:

- In case there is evidence of the cost of trading or transfer certificate: 5% of the gain.
- In case there is no evidence of the cost of trading or transfer certificate: 2% of the selling price.

Dividend income

Dividends received from another Lao PDR company or a foreign company are taxed at a flat rate of 10%, except for dividend income of listed companies in Lao PDR.

Interest income

Interest income is taxable in Lao PDR, except for interest income derived from loans lent by commercial banks and interest income derived from money deposited with commercial banks. The rate of income tax on interest income is 10%.

Rental/royalties income

Rental income and royalties income are taxable in Lao PDR. The rate of income tax on rental income is 10%, and the rate of income tax on royalties income is 5%.

Unrealised exchange gains/losses

Unrealised exchange gains are not taxable and losses are not deductible in Lao PDR.

Foreign income

There is no controlled foreign company (CFC) or similar regime in Lao PDR. Profits of a foreign subsidiary are taxable when remitted as dividends.

Deductions

Accrued expenses are deductible in Lao PDR. Reserves and provisions are not deductible until actually settled.

Depreciation

Depreciation rates prescribed under the Lao Tax Law No. 70/NA, dated 15 December 2015, may differ from financial accounting. Depreciation is on a straight-line basis over prescribed useful lives, as follows:

Assets	Years
Buildings used for industrial purposes:	
With useful life of 20 years or less	20
With useful life over 20 years	50
Buildings used for commercial and residential purposes:	
Permanent structures	20
Semi-permanent structures	10
Machinery, equipment, vehicles	5
Software	2
Land and water transport vehicles	5
Ships, cruises, ferries, and other similar boats	10
Office equipment	5
Passenger aeroplane and cargo	Depending on flight hour

Goodwill

There is no specific guidance on the deductibility of goodwill or amortisation in Lao PDR.

Start-up expenses

Start-up expenses are amortisable over two years in Lao PDR.

Interest expenses

Interest is deductible on an accrual basis following the accounting treatment. All interest payments must be supported by documents showing that the payments are commercially reasonable. Interest paid to a shareholder is not deductible.

Bad debt

Bad debt reserves are not deductible in Lao PDR. However, a deduction is allowed if a certain procedure has been followed, one still cannot recover the debt, and the debt is ultimately written off.

Charitable contributions

Charitable contributions in Lao PDR are limited to 0.30% of total annual business turnover.

Travel expenses

Travel expenses for administrative activities are limited to 0.60% of total annual business turnover.

Reception and telephone expense

Reception and telephone costs are each limited to 0.40% of total annual business turnover.

Entertainment expenses

Entertainment expenses are non-deductible in Lao PDR.

Advertisements

Advertisement costs are limited to 0.50% of total annual business turnover.

Pension expenses

Pension expenses are deductible when paid in Lao PDR.

Bribes, kickbacks, and illegal payments

Bribes, kickbacks, and illegal payments are not deductible in Lao PDR.

Fines and penalties

Fines and penalties are not deductible in Lao PDR.

Taxes

PT and input VAT paid when purchasing fixed assets are not deductible for PT calculation purposes.

Net operating and capital losses

Tax losses can be carried forward for three years, but no carryback is allowed. A change in control will not impact a company's loss carryforward. Capital losses are treated as ordinary losses.

Payments to foreign affiliates

Payments to foreign affiliates are deductible if in the ordinary course of business.

Group taxation

Consolidation or grouping is not permitted, and each entity must file on a separate basis in Lao PDR.

Transfer pricing

There are no specific transfer pricing rules in Lao PDR. However, inter-company transactions should be at arm's length.

Thin capitalisation

The ratio of debt to capital must not exceed 70% of the total capital for concession investment activities. There are no thin capitalisation rules for general investment activities in Lao PDR.

Controlled foreign companies (CFCs)

There is no CFC or similar regime in Lao PDR.

Tax credits and incentives

Foreign tax credit

There is no foreign tax credit regime in the Law on Tax. However, certain tax treaties entered into by Lao PDR do have provisions for either deductibility of foreign tax or a credit.

PT incentives

PT incentives are provided under the Law on Investment Promotion 2016. This law divides investment areas into three zones, namely Zone 1, Zone 2, and Zone 3. The PT exemptions are as follows:

Zone	Areas	PT exempted (years)	Additional PT exempted (years)
1	Poor zone, remote zone with socio-economic infrastructure unfavourable to investment.	10	5*
2	Zone with socio-economic infrastructure favourable to investment.	4	3*
3	Special economic zone.	Shall comply with the specific regulation.	

* Note: If invest in the activities set out in item 2, 3, 5, and 6 of Article 9 of the Law on Investment Promotion, as follows:

- Item 2: Clean, toxic-free agriculture, planting seed production, animal breeding, industrial plantation, forestry development, protection of environment and bio diversity, activities promoting rural development and poverty reduction.
- Item 3: Environmental friendly agricultural processing industry, national traditional and unique handicraft processing industry.
- Item 5: Educations, sports, human resources development and labour skill development, vocational training institutions or centres, production of educational and sports equipment.
- Item 6: Construction of modern hospitals, pharmaceutical and medical equipment factory, production and treatment by traditional medicine.

PT exemption starts from the date of the investing enterprise generating business revenues. After finishing the period of PT exemption as mentioned above, the enterprise shall pay PT in accordance to the Law on Tax.

Concession business shall comply with relevant laws or according to the concession agreement.

Incentives related to customs duty and other taxes

In addition to the incentives related to PT, investors shall also be entitled to the following customs duty and other tax incentives:

- Exemption from PT in the accounting year after the incentives for PT exemption for a business that spends its net profit to expand its business.
- Import of materials, equipment, which may not be supplied or produced in Lao PDR, to form the fixed assets, and machinery and vehicles directly used for production will receive customs duty exemption and pay VAT at the rate of 0%. Importation of all types of fuel, gas, lubricant, administrative vehicles, and other materials shall comply with the relevant laws and regulations.
- Import of raw materials, equipment, and spare parts to be used in the production for export shall be exempted from customs duty at the time of import and granted the custom duty exemption at the time of export and pay VAT at the rate of 0%. Use of domestic raw materials that are not natural resources for producing finished and semi-finished products at the time of export shall pay VAT at the rate of 0%.
- Investors can transfer the annual losses to the next following year to be deducted from profit within the period of three years; however, the losses shall be audited and certified by the tax officer. After this period, the remaining loss is not allowed to be deducted from profit anymore.
- In the case of the Special and Specific Economic Zones, the incentives related to customs duties and other taxes shall comply with the Decrees on the establishment and management of each zone.

Specific promotion incentives

Investment in hospitals, kindergartens, academic schools, vocational schools, colleges, universities, research centres, and some activities related to public utilities shall obtain an exemption of rental or land concession as follows:

- Zone 1: Exemption of rental or land concession for a maximum of 15 years.
- Zone 2: Exemption of rental or land concession for a maximum of 8 years.
- Zone 3: Shall comply with the specific regulation.

Withholding taxes

WHT is applied to various types of payments made to domestic and foreign recipients.

Payment	WHT rate (%)
Dividend	10
Interest from lending activities (non-bank), commission, and guarantee fees	10
Profit from sale of shares	2 to 10
Income from business activities of the State Organizations, Lao Front for National Construction, Mass Organization, and Civil Society	10
Prizes and lottery prizes with the value of LAK 5 million and above	10
Intellectual property (IP) royalty	5
Sale or transfer of real property	2 to 5

Lao PDR has DTTs with the following countries, and WHT rates under the treaties are as follows:

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Belarus (not in force) (1)	5/10 (2)	8	5
Brunei	-	-	-
China	5	5	5
Kuwait (not in force)	-	-	-
Luxembourg	5/15 (3)	10	5
Malaysia	5	10	10
Myanmar	-	-	-
North Korea	5	10	5
Russia	10	10	0
Singapore	5/8 (4)	5	5
South Korea	-	-	-
Thailand	10	10	5
Vietnam	10	10	5

Notes

1. Not effective. Requested for ratification.
2. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 10% of the gross amount of the dividends in all other cases.
3. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 15% of the gross amount of the dividends in all other cases.
4. 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the capital of the company paying the dividend; 8% of the gross amount of the dividends in all other cases.

Foreign withholding tax (FWHT)

An FWHT applies where a registered entity in Lao PDR contracts with a foreign supplier of goods and services (i.e. regardless of whether the services are provided in Lao PDR or outside Lao PDR) not registered in Lao PDR. The FWHT comprises both a PT and VAT (i.e. service only) element and is the final tax on the foreign supplier. The FWHT withholding and filing obligation rests with the Lao PDR customer, and it is applied before payment to the foreign supplier.

For foreign suppliers, PT must be withheld at a deemed percentage of taxable turnover. The deemed rates are determined according to the nature of the contract or activity.

Activity	**Deemed profit margin (% of business revenue)**	**Deemed PT rate (%)**
Commerce	5	1.2
Production	3	0.72
Services:		
Transportation goods and services	5	1.2
Building service - repair	10	2.4
Exploration - mineral	20	4.8
Excavation - trees	5	1.2
Exploration - embankments	15	3.6

Activity	Deemed profit margin (% of business revenue)	Deemed PT rate (%)
Entertainment services	25	6.0
Consulting services	10	2.4
Broker and developer	20	4.8
Other services	10	2.4

The above rates are under Article 33 of the Law on Tax No. 70/NA, dated 15 December 2015.

These PT rates are then added to the VAT at 10% to determine the total FWHT. For example, a foreign service charge of LAK 1,000 would result in LAK 48 of withholding PT and add on of LAK 100 of VAT for a total FWHT of LAK 148. Payments to foreign suppliers for services rendered are subject to both PT WHT and VAT WHT, while payments for foreign suppliers of goods are only subject to PT WHT since VAT is paid before the goods enter Lao PDR.

Tax administration

Taxable period

PT is determined on a calendar-year basis.

Tax returns

According to the Lao Tax Law No. 70/NA, dated 15 December 2015, the annual tax return is due by 10 January of the subsequent year. Submission of the final tax return will be followed by an audit by the Tax Department.

Payment of tax

PT is payable quarterly in advance, with a final payment after year-end. The first three payments must be paid by 10 April, 10 July, and 10 October of the current tax year. The final payment is due with the submission of the final tax return by 10 January of the subsequent year. The quarterly payments are either based on the actual or prior year's PT (or expected tax for the current year). Any excess PT payment can be carried forward to the subsequent year.

Tax audit process

According to the Enterprise Law 2013, the audit of a large company, who has assets of more than LAK 50 billion, is mentioned. However, in practice, the tax authorities will access the company after the annual tax filing and issue a certificate to the company after they complete their audit process. Most large companies are audited annually in Lao PDR.

Statute of limitations

The statute of limitations is generally three years in Lao PDR.

Topics of focus for tax authorities

There are no areas of special focus in tax examinations in Lao PDR.

Significant developments

Tax reform

Corporate income tax (CIT)

Due to the CIT reform, the approach to calculating CIT has changed fundamentally in 2018. Under the new model, taxation of corporate profits is postponed until those profits are distributed as dividends or deemed to be distributed. The main highlights are the following:

- 20% CIT on payment of dividends to individuals and entities.
- 0% CIT on retained earnings.
- 20% CIT on entertainment and non-business expenses and other deemed profit distributions.
- Tax losses do not accrue/are not available.
- No capital allowances for investment in non-current assets.
- CIT should be paid and reported for each tax period by the 20th day of the next month. Monthly filings are not required if there is no taxable item.

Availability of existing tax relief/tax attributes

Large investment relief (LIR) and reliefs for special economic zone (SEZ) and free port companies may still be claimed by reducing CIT on declared dividends.

Profits accumulated before 2018 can be utilised by declaring dividends free of CIT indefinitely.

Accrued tax losses can be offset by reducing CIT on declared dividends for five years (with several limitations).

Micro-business tax (MBT)

The tax reform has changed certain MBT criteria and administration procedures for MBT payers. The main highlights are as follows:

- The standard rate of 15% on revenue continues.
- The revenue cap is lowered to 40,000 euros (EUR) a year.
- A person can be employed only in one MBT payer.

Transfer pricing rules - draft

Proposed changes are to bring Latvian transfer pricing requirements into line with:

- the Organisation for Economic Co-operation and Development (OECD) guidelines for preparing transfer pricing documentation, and
- the new CIT Act adopted as part of Latvia's tax reform.

The changes introduce the master file and the local file.

As a result, the transfer pricing requirements face a number of changes, of which the following are key:

- a modified range of taxpayers governed by the requirements for preparing mandatory transfer pricing documentation
- a substantially increased amount of information to be disclosed
- an obligation to file annual transfer pricing documentation with the State Revenue Service (SRS) if certain criteria are met, and
- requirements for preparing and filing mandatory transfer pricing documentation.

Taxes on corporate income

Under the new CIT model, all undistributed corporate profits are exempt. This exemption covers both active (e.g. trading) and passive (e.g. dividends, interest, royalties) types of income. It also covers capital gains arising on the sale of all types of assets, including shares and securities, except for the sale of immovable property by non-residents. This tax regime is available to Latvian-resident companies and non-resident companies' permanent establishments (PEs) registered in Latvia.

The taxation of corporate profits is postponed until those profits are distributed as dividends or deemed to be distributed.

Profit distributions:

- Dividends (including interim dividends).
- Payments equal to dividends (i.e. profit share-outs by [a] cooperative societies, [b] sole traders, [c] partnerships, and [d] PEs).
- Deemed dividends (i.e. part of earnings being added to share capital).

Deemed distributions:

- Non-business expenses.
- Bad debts.
- Excess interest payments.
- Loans to related parties (with several exclusions).
- Transfer pricing adjustments.
- Surplus assets on liquidation.
- Benefits a non-resident gives to employees of its PE.

For non-business expenses, a non-taxable cap on representation expenses and staff sustainability expenses is calculated as 5% of the company's total gross wages for the past year.

For bad debts, there is no CIT to pay on the allowance if the debt is recovered within 36 months. An exemption is also available if several conditions of the CIT Act are satisfied.

For excess interest payments, only one method will apply up to EUR 3 million, (i.e. a debt-equity ratio of 4:1). A second method (30% of earnings before interest, taxes, depreciation, and amortisation [EBITDA]) will come into play if interest payments exceed EUR 3 million.

Lending to related parties will be considered a profit distribution, except for the parent's loans to a subsidiary; short-term loans for up to 12 months; a loan not exceeding one received from an unrelated party or not exceeding a certain level of registered share capital; or if the lender has no retained earnings at year-start.

The definition of 'related party' has been extended to include Latvian companies with at least 20% shareholders.

Distributed profits are generally subject to a 20% CIT at 20/80 of the net profit distribution.

From a Latvian perspective, this tax is considered a CIT, not a withholding tax (WHT), so the rate is not affected by an applicable double tax treaty (DTT).

In Latvia, resident companies are taxed on profits distributed from their worldwide income, while PEs of non-residents are taxed only on profits distributed from Latvian-source income. Other Latvian-source income derived by non-residents may be subject to a final WHT or CIT by way of assessment.

Micro-business tax (MBT)

The Micro-business Tax Act permits existing and newly-formed businesses to acquire micro-business status and register for MBT if they meet the following criteria:

- Their shareholders are individuals.
- Their revenue does not exceed EUR 40,000 in a calendar year.
- The number of employees does not exceed five at any time.
- One person is employed in one MBT payer only.
- Members of the board are employees of the MBT payer.
- Remuneration of each employee does not exceed EUR 720 a month.

The standard rate is based on a micro-business's revenue of up to EUR 40,000 and covers payroll taxes, business risk duties, and CIT.

Revenue of up to EUR 40,000 is subject to a 15% MBT.

The standard rate may be increased in the following cases:

- If the quarterly headcount exceeds five, then 2% per extra employee will be added to the standard rate.
- If a person is employed in more than one MBT payer, then 2% per extra employee will be added to the standard rate.
- If revenue exceeds EUR 40,000 in a calendar year, the excess will attract a 20% MBT.
- If an employee's net income exceeds EUR 720 a month, the excess will also attract a 20% MBT.

There is no extra rate if the MBT payer has reported a steady revenue growth in the financial statements over the last two tax years, capped at 30% a year. Similar rules apply to a micro-business`s headcount growth, capped at one to two employees a year.

If a micro-business has reported no revenue or if its MBT charge for the tax period (calendar year) does not exceed EUR 50, the MBT payer has to pay a charge of EUR 50 within 15 days after the date of filing the tax return for the fourth quarter of the tax year.

Corporate residence

A company is considered resident in Latvia if it is or should have been incorporated in Latvia.

Permanent establishment (PE)

Under the Latvian Taxes and Duties Act, a non-resident has a PE in Latvia if all three of the following conditions are met simultaneously:

- The non-resident uses a fixed place for activities in Latvia.
- That place is used permanently or has been established for permanent use.
- The place is used for the conduct of commercial activities.

A non-resident is also considered to have a PE in Latvia if one performs at least one of the following activities in Latvia:

- Uses a construction site or performs construction or installation work, or carries out supervisory or consulting activities related to such site or work.
- Uses equipment or installations, drilling platforms, and special ships intended for the research or extraction of natural resources, or carries out related supervisory or consulting work.
- Within a time period, which together exceeds 30 days in any six-month period, provides services, including consulting, management, and technical services, utilising one's employees or associated personnel.
- Uses the activity of an individual, entity, or other person for the benefit of one's commercial activities, with that person being authorised to enter into contracts on behalf of the foreign entity and exercising such authority regularly (more than once in a tax period).

PE risk for entities located in treaty countries should be tested in accordance with the relevant DTT.

Other taxes

Value-added tax (VAT)

The following VAT rates apply in Latvia:

Description of goods	VAT (%)
The standard rate on supplies of goods and services, commodity imports, services rendered by non-residents and treated as supplied in Latvia, and intra-Community acquisitions of goods.	21
A reduced rate on specified fruits, berries, and vegetables, medicines, medical devices, specialised baby food, domestic public transport services, household heating charges, firewood and wooden heating material for households, textbooks, original literature publications, accommodation services, newspapers, and other periodicals, except electronically supplied media information.	12
Exemption with credit on intra-Community supplies of goods to taxable persons registered for VAT in other member states.	0
Exemption with credit on commodity exports and supplier goods not released for free circulation in the European Union (EU), supplies of goods and services to diplomats, and supplies of goods and services financed by foreign aid.	0

A number of services are exempt, including education, financial, medical, and insurance services; nursery fees; and the sale of used real estate, including land (except for building land, which is taxable).

Customs duty

Customs duty is levied on goods imported into Latvia. The rate of customs duty is generally between 0% and 20% of the value of imported goods, depending on their type and origin. Exports are generally exempt.

Excise

Excise is levied on specified categories of goods, mostly as a fixed amount per unit. Excise applies to the following goods, whether made in Latvia or imported:

Product	Excise amount
Oil and oil products	Up to EUR 594 per 1,000 litres, depending on the type of the product.
Alcohol	EUR 64 to EUR 1,400 per 100 litres, depending on the type of alcohol.
Beer	EUR 4.50 for each percent of absolute alcohol, but not less than EUR 8.20 per 100 litres of beer.
Tobacco products	EUR 73 per 1,000 cigars or cigarillos.
	EUR 67 per 1,000 cigarettes less than 80 mm in length plus 25% of the maximum retail selling price, but not less than EUR 99 per 1,000 cigarettes.
	EUR 134 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes between 80mm and 110mm in length, but not less than EUR 198 per 1,000 cigarettes.
	EUR 201 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes between 111mm and 140mm in length, but not less than EUR 297 per 1,000 cigarettes.
	EUR 268 per 1,000 cigarettes plus 25% of the maximum retail selling price for cigarettes exceeding 140mm in length, but not less than EUR 396 per 1,000 cigarettes.
	EUR 62 per 1,000 grams of fine-cut smoking tobacco intended for the rolling of cigarettes.
	EUR 62 for other smoking tobacco.
E-liquid	EUR 0.01 per 1 ml liquid plus EUR 0.005 per 1 ml nicotine.
Certain soft drinks	EUR 7.40 per 100 litres.
Natural gas	EUR 1.65 per 1 MWh for use as heating fuel.
	EUR 9.64 per 1 MWh for use as fuel.

Real estate tax (RET)

RET is payable annually on:

- Business properties, such as land and buildings used for economic activities, as well as engineering structures, such as motorways, streets, roads, parking places, bridges, elevated highways, tunnels, pipelines, communication lines, and power lines.
- Buildings that form part of a private dwelling house development (also if owned by a company but not used for living purposes).

Municipalities may determine a rate between 0.2% and 3%. A rate above 1.5% may be applied to buildings that are not maintained according to maintenance requirements.

If a municipality does not announce rates by 1 November before the tax period, then statutory rates will apply.

Statutory RET rates are as follows:

- The standard rate of 1.5% on the cadastral value of land, buildings, and engineering structures.
- A progressive rate on dwelling houses, their parts, and any parts of a non-residential building that are functionally used for living and not used in trade or business:
  - 0.2% of cadastral values up to EUR 56,915.
  - 0.4% of cadastral values between EUR 56,915 and EUR 106,715.
  - 0.6% of cadastral values exceeding EUR 106,715.
- Up to 3% on uncultivated land capable of agricultural use, unless it is up to one hectare in area or subject to statutory restrictions on agricultural activity. By law, uncultivated land capable of agricultural use is agricultural land that is not used for making or growing agricultural products (including harvesting, grazing, and keeping animals for agricultural purposes) or is not kept in a good agricultural and environmental condition. Municipalities may also determine an extra rate of 1.5% on uncultivated land, and so the total rate on such land may reach 4.5%.

A 3% RET applies on buildings under construction if the permitted construction period has expired. The tax is applicable until the building is accepted for use. The rate will be charged on the cadastral value of the related land or on the cadastral value of the building, whichever is higher.

Residential property owned by companies is eligible for reduced rates (0.2% to 0.6%), but only where such property is rented out and tenancy rights properly entered on the Land Register of Latvia.

Stamp duty

Stamp duties are levied on certain legal and other kinds of services, such as court trials, company formation and registration, licences for certain types of business activity, provision of information, notary services, operation of bills of exchange, and registration of real estate at the Land Registry (e.g. if real estate is sold, stamp duty is 2% of the deal value or the cadastral value, whichever is higher, capped at EUR 42,686.15 per property).

Stamp duty is not payable if re-registration of real estate at the Land Registry is necessary because of a reorganisation. Stamp duty payable to re-register title to immovable property in the case of a contribution in kind to a company's capital is 1%.

Payroll taxes

The employer is responsible for withholding personal income tax (PIT) at a rate of 20% on income up to EUR 20,004, at 23% income between EUR 20,004 and EUR 55,000, and at 31.4% on income over EUR 55,000.

National social insurance contributions (NSIC)

The employee's part of NSIC, at a rate of 11%, is deducted from gross employment income. The employer's part of NSIC, at a rate of 24.09%, is calculated on top of gross employment income. NSIC is payable on annual income up to EUR 55,000. A solidarity tax applies to annual income over EUR 55,000 at the same rates as NSIC.

Natural resource tax

Any natural resources acquired as a result of economic activities (e.g. surface and underground water, dolomite, quartz sand), the collection of edible park snails, taking advantage of useful features of the bowels of the earth by pumping natural gas or greenhouse gases into geological structures, pollution (waste, emissions, and pollutants), products harmful to the environment (e.g. lubricating oil, electric batteries, oil filters, tyres), electrical and electronic equipment and appliances, radioactive substances, packaging, disposable tableware, means of transport, the volume of emitted greenhouse gasses that is not included in the number of emission quotas surrendered, coal, coke, and lignite are subject to a natural resource tax in Latvia. The rates are specific for each product and are based on weight, volume, or the amount of the product.

The taxpayer may reduce one's tax liability by taking part in recycling programmes for packaging, products harmful to the environment, electrical and electronic equipment and appliances, and means of transport. Taxpayers do not have an obligation to recycle themselves to be entitled to relief; instead, they can conclude an agreement with a recycler.

On some of the products, the taxpayer must also pay disposal tax at varying rates.

Vehicle taxes

There are three vehicle taxes in Latvia, a vehicle usage tax, a light corporate vehicle tax, and a foreign-registered vehicle tax. The first is payable on the use of all vehicles (except tractors, car trailers not exceeding 3,500 kg, trams, trolleybuses, off-road vehicles, snowmobiles, mopeds, and bicycles). The second is payable on light vehicles held or owned by a company. The third is for M1 and N1 category vehicles registered abroad.

Vehicle usage tax

Vehicle usage tax is payable annually on the use of vehicles, and it must be fully paid before the state technical inspection.

The amount of vehicle usage tax depends on the classification of vehicles according to their features under statutory provisions. The tax charge depends on various criteria, such as date of first registration, gross weight, engine volume, maximum engine power, carbon dioxide (CO_2) emissions per kilometre, etc.

Light corporate vehicle tax (LCVT)

LCVT is paid on vehicles owned or held (e.g. rented) by a person engaged in economic activity, which are registered for the first time after 1 January 2005 and have details of engine volume on their registration certificate. There is a fixed rate of LCVT calculated according to the engine volume. The fixed monthly rates of LCTV are as follows:

- EUR 29 up to 2,000 cc.
- EUR 46 between 2,001 cc and 2,500 cc.
- EUR 62 over 2,500 cc.

LCTV on a vehicle in which, according to its construction, power from an electrical energy/power storage device (e.g. battery, capacitor, flywheel, generator) inside the vehicle is used as its only mechanical propulsion power, will be EUR 10 a month.

LCTV on vehicles not mentioned in the above criteria will be EUR 46 a month.

Foreign-registered vehicle tax

Foreign-registered vehicle tax is paid on the use of foreign-registered M1 and N1 category vehicles in Latvia. The tax is payable by the driver: EUR 10 per day, EUR 250 per month, EUR 600 per six months, and EUR 1,000 per year.

Lottery and gambling tax

A lottery and gambling tax is levied on licensed organisers of games or lotteries. Licence fees range from EUR 2,000 to EUR 427,000. Game organisers, gambling places, and gambling machines are subject to gambling tax. The rates depend on the number and type of gambling machines or percentage of income for several gambling types.

Electricity tax

Electricity tax is levied on electricity supplied to final consumers or consumed by suppliers. The rate is EUR 1.01 per MWh. Exemptions are available to producers of electricity and for electricity used by domestic public transport and households.

Local duties

Certain activities are subject to local duties (e.g. construction permits).

Branch income

As a general rule, branches and resident companies are taxed alike, with certain adjustments for payments to the head office.

Income determination

Distributable profits are measured according to financial statements drawn up in accordance with Latvian Generally Accepted Accounting Principles (GAAP) or International Accounting Standards (IAS)/International Financial Reporting Standards (IFRS), and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation/capital allowances, tax loss carryforward/carryback).

The CIT liability associated with the distribution of dividends is recorded as an expense at the time the dividends are declared, regardless of when the profits were generated or distributed.

Dividends paid by Latvian companies are generally subject to a 20% CIT at the level of the distributing company.

Certain domestic and foreign taxes can also be credited against the 20% CIT charge under domestic law or DTTs.

Deemed dividends

Deemed dividends are a part of share capital increase from retained earnings arising from 2018 onwards. They become subject to CIT once that part of share capital is reduced and distributed to the shareholders.

Capital gains

A gain arising on the disposal of a capital asset (except real estate sold by non-residents) is treated as ordinary income and is subject to a 20% CIT only if profit is distributed.

If a taxpayer has received income from the sale of direct participation shares one has held for at least 36 months, then it is possible to reduce the dividends included in the tax base by the amount of income received from the sale of shares.

If a non-resident sells real estate (or shares in a real estate company) located in Latvia, the sale will be subject to a 3% tax on gross proceeds. Residents of an EU/European Economic Area (EEA) member state or a country that has an effective DTT with Latvia may pay a 20% tax on the resulting capital gains instead.

Dividend income

Dividends received from any foreign or Latvian company may be excluded from the CIT base, except for dividends from companies registered in blacklisted tax havens (a list of tax havens is provided in the *Withholding taxes section*) or if the structure may be considered artificial.

Interest income

Interest income is treated as ordinary income and is subject to a 20% CIT only if profit is distributed.

Royalty income

Royalty income is treated as ordinary income and is subject to a 20% CIT only if profit is distributed.

Foreign income

Resident companies are taxed on their worldwide income. Any foreign tax paid on income included in the tax base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad. Any unused tax credit may be carried forward.

Deductions

Depreciation and amortisation

Distributable profits are measured according to financial statements drawn up in accordance with Latvian GAAP or IAS/IFRS, and there are no adjustments to accounting profits for tax purposes (e.g. tax depreciation/capital allowances, tax loss carryforward/carryback).

Start-up expenses

There is no specific treatment for start-up expenses.

Input VAT on goods or services acquired before VAT registration is recoverable if those items are to be used for taxable suppliers.

Non-business expenses

Non-business expenses include costs that are not directly related to commercial activities; all expenses incurred for the leisure and recreation of owners and employees; entertainment trips taken by owners and employees in company vehicles; any benefits, gifts, credits, and loans turned into gifts to owners and employees; and any other disbursements in cash or in kind to owners or employees that are not part of remuneration or that are not related to the taxpayer's commercial activities, etc.

Non-business expenses are considered a deemed profit distribution, and CIT is payable on these expenses monthly. Accountants often recognise expenses without supporting documents as non-business expenses (e.g. representation expenses or fuel costs not accompanied by appropriate documentation).

Representation expenses and staff sustainability expenses

Representation expenses, by definition, are expenses a taxpayer incurs to build one's prestige, entertain one's customers and suppliers, and provide meals, as well as amounts spent on low-value items intended to make the taxpayer popular.

A new concept of 'staff sustainability' events has been introduced from 2018. These are expenses a taxpayer incurs to motivate one's staff, build teams, or maintain social infrastructure.

Representation expenses and staff sustainability expenses are capped at 5% of gross wages for the past year. There is no taxable item until the cap is reached, but afterwards CIT is payable monthly.

To apply the exempt 5% limit, the company should keep a separate record and accurately describe representation expenses and staff sustainability expenses in its accounting policy, as well as provide supporting documents.

Fines and penalties

Any fines, contractual penalties, and statutory interest on arrears (including an increase in principal debt) that are disproportionate to the deal value or are made to a related party or one that is registered in a tax haven are considered non-business expenses and subject to CIT 20/80.

Interest expenses

Excess interest payments are considered a deemed profit distribution and subject to 20% CIT. *For further details, see Thin capitalisation in the Group taxation section*.

Bad debts

A bad debt that remains unrecovered within 36 months after a provision was made for it should be added to the tax base, unless the exemption criteria are met. An internal checklist can be drawn up for claiming an exemption. It is also important to ensure that accounting records are transparent, including a separate record of bad debts incurred before 2018 and an accurate record of new bad debts arising after 2017. This will allow the company to select information about the age of a provision from its accounting records and to consider claiming an exemption in the case of writing off that provision.

Lending to related parties

From 1 January 2018, lending to related parties is treated as a profit distribution subject to a 20% CIT. This rule has been adopted as an anti-avoidance measure to prevent taxpayers who want to pay a dividend from making a loan instead, which is essentially a hidden dividend.

The law lays down criteria for loans that are not treated as a profit distribution, such as a short-term loan maturing in up to 12 months or one that does not exceed the amount borrowed from an unrelated party. It is therefore necessary to revise the conditions for cash movements between related companies and define internal criteria for recording related-party loans by keeping a separate record of loans that are deemed distributions and on which CIT has been paid.

When repaying a loan that was included in the tax base for a past tax period, any repaid amount of the loan can be deducted from the tax base for the current tax period.

Donations

Donations exceeding the statutory criteria are taxable. Donations paid to charitable institutions, non-profit making foundations, churches, monasteries, and various other welfare institutions may qualify for tax relief if certain criteria are met (*see the Tax credits and incentives section*).

Luxury vehicles

All costs associated with luxury vehicles (i.e. light passenger cars worth more than EUR 50,000, excluding VAT) are considered non-business expenses and subject to a 20% CIT. These rules do not, however, apply to special purpose vehicles (such as emergency vehicles and special passenger vehicles).

Provisions

Under the new CIT model, any movement of provisions in accounting records after 2017 will no longer affect the tax base.

Special clauses of the transition rules should be followed in order to write off any provisions on the balance sheet as at 31 December 2017 that have been added to taxable income in past tax periods.

Any provisions on the balance sheet as at 31 December 2017 to be reduced after 2017 can be deducted from the tax base and attract a coefficient of 0.75, subject to the following conditions:

- The provisions were included in the tax base in the period they were recognised.
- They are recorded separately from other provisions after 2017.

If provisions recognised in the financial year 2017 exceed provisions recognised in the financial year 2016, then additional restrictions apply:

- Any reduction in these provisions attracting a coefficient of 0.75 can be deducted only from dividends or deemed dividends included in the tax base.
- These provisions should be recorded separately from other provisions after 2017.

Accordingly, the transition rules do not restrict the period for reducing the tax base, but they do restrict the tax base a company can reduce, in certain cases, to dividends paid. The administrative burden will also increase considerably, given the transitional obligation to separately record provisions recognised before 2018 and after 2017, as well as provisions recognised in the financial year 2017.

Net operating losses

There is no such concept as a tax loss under the new CIT model, and utilising tax losses is subject to a five-year restriction. A company can utilise 15% of its loss, capped at 50% of the CIT charge on dividends. Thus, losses brought forward can be utilised only if the company distributes profits arising after 2017. Given this restriction, the company should assess whether it will be able to distribute new profits over the next five years and then make necessary adjustments to its shareholders' equity.

Payments to foreign affiliates

Any payments to foreign affiliates that are not arm's length may be considered a profit distribution and subject to a 20% CIT.

Companies registered in tax havens are also considered affiliates. Such payments may be subject to WHT (*see the Withholding taxes section*).

Group taxation

Group consolidation is not permitted for tax purposes.

Transfer pricing

The rules governing the application of the CIT Act states that the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations may be used for Latvian transfer pricing purposes.

Latvian law requires that related-party transactions be arm's length. In other words, the conditions made or imposed between two related enterprises in their commercial or financial relations must not differ from those that would be agreed between independent enterprises engaging in similar transactions under similar circumstances.

A tax audit may examine and adjust the price of a transaction in the following circumstances:

- A transaction between related parties.
- Barters and set offs.
- A price deviation exceeding 20% of prices the taxpayer has applied to similar goods or services over a short period.
- Exports and imports.

The arm's-length requirement primarily applies to transactions between two or more related companies. Latvian legislation also requires that a taxpayer should adjust one's taxable income for the difference between the price applied in a transaction and its arm's-length price if the transaction involves:

- individuals related to the company
- related foreign companies
- companies exempt from CIT or enjoying CIT relief under other Latvian laws
- a Latvian-related company with which it forms a single tax group, or

- a company located in a jurisdiction with a more favourable tax regime.

This provision may apply to any transaction, including purchases and sales of fixed assets and goods, supplies of services, loans and borrowings, and intellectual property (IP). It is possible to use corresponding adjustments and adjust taxable income if a related party has made adjustments to its income according to transfer pricing rules. This is possible only if the related party is registered in the European Union or a country that has an effective DTT with Latvia and if documentary evidence from the foreign tax authority is received.

Latvian taxpayers who enter into transactions with any of the parties listed above and whose annual revenue exceeds EUR 1,430,000 and related-party transactions reach or exceed EUR 14,300 are required to prepare transfer pricing documentation for transactions exceeding the statutory limits.

Within one month after receiving a request from the SRS, the taxpayer must submit full transfer pricing documentation containing the following information:

- Industry analysis giving a general overview of the industry in which the taxpayer operates.
- Company analysis.
- Functional analysis giving information on the related parties' functions, risks, and assets.
- Economic analysis, including:
  - a description of how the transfer pricing method was selected and
  - a benchmarking study.

While the full transfer pricing documentation requirement applies to entities exceeding the statutory limits on revenue and annual related-party transactions, other entities will still be required to prove that their transfer pricing is arm's length. Normally, the SRS expects taxpayers to be able to demonstrate which transfer pricing method is used and how it is applied (i.e. a benchmarking study of third-party comparables showing that the prices applied by the taxpayer fall within the arm's-length range).

Latvian taxpayers can apply to the SRS for an Advance Pricing Arrangement (APA). The APA is an administrative instrument issued by the SRS to address a taxpayer's request for establishing transfer pricing conditions and methodology in one's related-party transactions for a maximum period of three years.

This option is available to companies whose annual transactions with foreign related parties are expected to exceed EUR 1,430,000.

An APA application fee of EUR 7,114 is payable to the SRS as follows:

- 20% on submitting the application to the SRS.
- 80% after the SRS issues an official decision to initiate an APA with the taxpayer.

If the SRS refuses to initiate an APA with the taxpayer, the SRS reserves the right not to refund the 20% down payment.

Country-by-country (CbC) reporting

In 2017, the Latvian Parliament approved a law that introduced a CbC reporting obligation for multinational enterprises with consolidated revenue of over EUR 750 million. The first reporting period was set for 2016, with the exception that subsidiaries operating in Latvia are obligated to submit the report for 2017 for the first time in case the parent company does not comply with the reporting obligation for 2016.

Latvian tax residents who are members of large multinational groups and are not the reporting entity of the CbC report need to notify the Latvian tax authorities about the group's reporting entity. Once the notification has been submitted, there is no need to provide the information on an annual basis, unless the reporting entity changes.

The deadline for the CbC report is on 31 December following the reporting period, at the latest.

Thin capitalisation

Thin capitalisation rules apply to interest payments exceeding a specified amount.

Only one method is available for interest payments of up to EUR 3 million: a debt-to-equity ratio of 4:1 (interest in proportion to the excess of the average liability over an amount equal to four times shareholders' equity at the beginning of the tax year less any revaluation reserve).

A second method (30% of EBITDA) is available for interest payments exceeding EUR 3 million.

The higher amount of interest that exceeds these calculations should be added to the tax base.

The following interest payments are exempt from thin capitalisation rules:

- Interest paid on borrowings from credit institutions resident in Latvia, EEA member states, or countries that have an effective DTT with Latvia.
- Interest paid to the Latvian Treasury, Finance Development Institution, Nordic Investment Bank, European Bank for Reconstruction and Development, European Investment Bank, European Council Development Bank, or the World Bank Group.
- Interest paid on Latvian or EEA debt securities in public trading.
- Interest expenses directly or indirectly paid to government finance, foreign trade, or guarantee organisations in a country that have an effective DTT with Latvia.

Controlled foreign companies (CFCs)

There is no CFC regime in Latvia for taxation of companies' substantial participation. A CFC regime does apply to individual shareholders; *for more information, please see Latvia's Individual tax summary at www.pwc.com/taxsummaries*.

Tax credits and incentives

Foreign tax credit

Any foreign tax paid on income included in the tax base is allowed as a credit against the CIT charged for the year. However, the credit must not exceed the Latvian tax attributable to the income taxed abroad and must be confirmed by the foreign tax authority. Any unused tax credit may be carried forward.

Donations to public benefit organisations

Donation relief is available on donations to Latvian public benefit organisations or their equivalents in an EU/EEA member state or a country that has an effective DTT with Latvia. The donor can take relief on one's total donations by using one of the following three methods:

1. Exclude donations from the tax base at up to 5% of profit after taxes for the past year.
2. Exclude donations from the tax base at up to 2% of total gross wages on which NSIC were paid in the past year.
3. Reduce the CIT charge on dividends by 75% of the donated amount, capped at 20% of the CIT charge on dividends.

Donations to public benefit organisations are not considered non-business expenses if the company has chosen method 1 or 2 and does not exceed its limits.

Large investment relief (LIR)

No new LIRs will be granted after 2017. According to transition rules, LIR may still be claimed by reducing CIT on declared dividends for LIR applications filed before 2018.

Free ports and special economic zones (SEZs)

Companies operating in a free port or SEZ are entitled to CIT and RET relief. These areas include the free ports of Ventspils and Riga and the SEZs of Rezekne, Latgale, and Liepaja.

Qualifying companies may claim CIT relief of up to 80% of the CIT charged on dividends. Companies may also claim 80% WHT relief on payments made to non-resident companies.

RET relief amounts to 80%, and the municipality could waive the remaining 20% up to 2016. Consequently, qualifying companies that fulfilled certain criteria could bring their RET liability to zero.

Under the new amendments, a municipality that issues binding rules will have the power to reduce the percentage amount of an RET rebate to 10% of the tax charge (without applying any other rebates). Taking this new option will prevent the municipality from taking the old option of increasing the rebate by 20%.

Municipalities are to publish their binding rules for the coming tax year by 1 November. Thus, each free port and SEZ municipality will be able to decide about an RET rebate to apply in the coming year according to its budgetary projections.

Total CIT and RET relief a company can claim depends on the amount of qualifying investment it has made in the free port or SEZ area. Depending on the size of the company, the total available tax relief ranges from 50% to 70% of the amount invested.

Deferred tax

The new CIT rules have cancelled all temporary differences between the financial accounting basis and tax basis of assets and liabilities from 1 January 2018. With temporary differences between the values of assets and liabilities in financial accounting and for tax purposes ceasing to exist from that date, no deferred tax asset will be realised or deferred tax liability settled after 2017. As a result, generally deferred tax assets or liabilities will no longer be recognised on the balance sheet as at 31 December 2017.

Tax incentive for deductibility of research and development (R&D) costs

After the new CIT rules were introduced on 1 January 2018, the tax incentive for deductibility of R&D costs was cancelled.

Withholding taxes

The following types of payments to non-residents, and in certain cases under Latvian transfer pricing rules to related Latvian companies using CIT reliefs, are subject to WHT.

Management fees

Management and consulting fees are subject to a 20% WHT. The term 'management and consulting' means activities a non-resident carries out directly or through outsourced personnel to ensure the management of a Latvian company or to provide necessary advice.

A Latvian company can rely on a DTT to reduce the rate of WHT to zero for management fees if the non-resident does not create a PE. To this end, the Latvian company must obtain a valid residence certificate for each type of payment to each recipient before filing the annual CIT return. A valid residence certificate is one approved by the foreign tax authority and the SRS.

Disposal of real estate

A 3% WHT applies to proceeds from real estate disposals. This also applies to income arising on the disposal of shares or other participation in a Latvian or foreign-registered company or other entity if real estate in Latvia made up more than 50% of the asset value of that company, whether directly or indirectly through shareholdings in one or more other entities established in Latvia or abroad, in the period of disposal or the previous period.

Dividends

Dividends paid to residents of tax havens are subject to a 20% WHT.

Interest and royalties

Interest and royalty payments attract WHT only if made to companies in tax havens. A 20% rate applies on all interest and royalty payments to tax havens.

Option for EU/DTT country residents

In the case of management fees and real estate disposal, EU/DTT country residents may choose between a WHT charge on total fees or a 20% tax on profit, provided the non-resident can present proof of expense. The Latvian company must first withhold the applicable tax, and the non-resident may later recover tax in excess of 20% charged on profit (income less expenses) by submitting a separate tax return.

Reporting payments to non-residents

Companies are required to notify the SRS of all amounts paid to non-residents on transactions made on or after 1 January 2017, regardless of whether the payment was subject to WHT. This is in line with the requirements of Council Directive 2011/16/EU on administrative cooperation in the field of taxation, which provides for automatic exchange of information on non-residents' revenues.

Summary of WHT rates

Please see the following table for WHT rates applicable to the payments described above:

	WHT (%)				
Recipient	**Dividends (1)**	**Interest (1)**	**Royalties (1)**	**Management fees (3)**	**Disposal of real estate**
Non-resident companies and related Latvian companies using certain CIT reliefs	0	0	0	20	3
Companies in tax havens (2)	20	20	20	20	20

Notes

1. No WHT, except tax-haven companies.
2. 20% WHT applies to all payments to companies located in tax havens. Goods/securities acquired at market prices are exempt.
3. Payments to residents of DTT countries are not subject to WHT, provided the non-resident does not have a PE in Latvia and a residence certificate is available.

Tax havens

The list of tax havens is provided by Cabinet Regulation No. 655 of 7 November 2017, which lists 25 tax havens in total. However, a country is no longer considered a tax haven from the year a DTT begins to apply to that country or from the date the country is covered by a tax information exchange agreement (TIEA), unless those agreements provide otherwise.

With many of the blacklisted countries having signed the OECD's Multilateral Convention on Mutual Administrative Assistance in Tax Matters, which entered into force in Latvia on 1 November 2014, the list of tax havens has been significantly reduced.

Below is an updated list of countries and territories that are considered tax havens:

- Antigua and Barbuda
- Bahamas
- Bahrain
- Brunei Darussalam
- Dominica
- Djibouti
- Ecuador
- Grenada
- Guam (US)
- Jamaica
- Jordan
- Kenya
- Liberia
- Macao (China)
- Maldives
- New Caledonia (France)
- São Tomé and Principe
- Saint-Pierre and Miquelon (France)
- Saint Helena (UK)
- Tahiti (French Polynesia)
- Tonga
- US Virgin Islands
- Vanuatu
- Venezuela
- Island of Zanzibar (Tanzania)

Tax administration

Taxable period

The taxable period is one month. If a taxpayer is allowed to book supporting documents quarterly, then the tax period is a quarter.

Tax returns

Items subject to CIT should be included in the tax return for the tax period in which costs were incurred. If a tax base arises, a tax return should be filed each month on or before the 20th day of the following tax period. If a tax return is not filed with the SRS, this will mean that no tax liability arose in that month. The tax base can be adjusted for non-business expenses only in the month they were incurred. Accordingly, if an adjustment is still needed, a late fee will be charged.

It is mandatory for taxpayers to file a tax return for the last month of the financial year.

Under the transition rules, the first single tax return prepared according to the new CIT model can cover an extended tax period running from January to June 2018. The taxpayer should file the return by 20 July 2018 and pay the tax due.

The transition rules govern cases where a taxpayer's financial year is different from a calendar year. In that case, the taxpayer should prepare interim financial statements and the CIT return.

Payment of tax

If a tax base arises, the tax charge should be paid each month on or before the 20th day of the following tax period.

Tax audit process

A tax audit begins with an audit note for open tax years (up to three years after a tax payment was due, and, from 2013 onwards, up to five years if transfer prices are audited). An audit may last a few weeks or a few months, but not exceeding 90 days. It can be extended to 150 days if information is requested from a foreign tax authority. If a simultaneous tax audit with a foreign tax authority is initiated, then such extension is not limited.

The SRS should inform the taxpayer of a tax audit no later than ten working days before the start of the audit with notification about documents the SRS would like to see.

During a tax audit, the auditors will notify the taxpayer about any irregularities in the calculation of tax payments and any fines that could be levied. Before issuing the tax audit decision, the auditors will invite the taxpayer to final negotiations to discuss the tax audit results.

Following the tax audit and notification of its findings, the company may take the following steps:

- Negotiate with the SRS to reduce the tax burden and achieve an 'out-of-court settlement'. The out-of-court settlement makes it possible to reduce fines by up to 100% and late charges by up to 85%, but not the additional tax assessment. Entering

into such a settlement presupposes that the company accepts the audit findings for the audited years.
- Appeal the decision to the Director General of the SRS.
- After receiving the decision of the Director General, the taxpayer may take the case to court. An advance payment of the additional tax liability and late charges is required. The first decision normally takes up to two years and another two years until a decision by the Court of Appeal and the Supreme Court is issued.

Statute of limitations

The SRS may collect any unpaid taxes within three years after tax payment was due. Transfer prices may be examined for five years.

Topics of focus for tax authorities

The SRS tends to scrutinise:

- Transfer pricing, non-arm's-length lending, and other arrangements with related parties.
- Non-business, marketing, and representation expenses.
- Payments to and from non-resident companies, including tax haven companies.
- Obligation to register a PE in Latvia.
- Unpaid payroll taxes or hidden employment.
- Recoverability of input VAT.

Other issues

Implementation of base erosion and profit shifting (BEPS) provisions

Following the OECD initiative, Council Directive (EU) 2016/881 amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation was introduced on 25 May 2016. Under the directive, Latvia is a part of the mandatory automatic exchange of information (AEOI) mechanism in the field of taxation and has implemented the CbC report by adopting the Cabinet of Ministers' Regulation No. 397 of 4 July 2017.

Latvia has transposed the OECD Common Reporting Standard (CRS) as well as Council Directive 2014/107/EU amending Directive 2011/16/EU as regards mandatory automatic exchange of information in the field of taxation, into domestic law. Latvian financial institutions covered by the CRS must report certain income and asset information on certain non-resident account holders to the Latvian tax authorities.

EU state aid investigations

Latvian law provides the necessary references to EC Regulation No. 651/2014, which ensures that the EU funding intensity complies with EU rules for state aid. Currently, there are no investigations on the part of the European Commission with regard to Latvian tax law.

Double tax treaties (DTTs) and intergovernmental agreements (IGAs)

Latvia has effective DTTs with 61 countries and continues developing its tax treaty network. Latvia has signed the OECD's Multilateral Convention on Mutual Administrative Assistance in Tax Matters.

Latvia

Latvia has also signed an IGA with the United States (US) government to implement the tax reporting and withholding procedures associated with the Foreign Account Tax Compliance Act (FATCA). On 2 April 2014, the US Treasury announced that the IGA was 'in effect' and, on 27 June 2014, the US Treasury and Latvia signed and released the IGA.

Significant developments

A new Law no. 64, dated 20 October 2017, (published in the Official Gazette on 26 October 2017) introduced new tax measures and amended several tax articles to fund the increase of the minimum wages and the cost of living for the public sector. The corporate income tax (CIT) rate increased to 17% and value-added tax (VAT) rate increased to 11%.

The Ministry of Finance (MoF) issued the 2018 Budget Law no.79, dated 18 April 2018 (published in the Official Gazette no.158, dated 19 April 2018). It does not include any changes in the CIT and VAT rates.

The major tax amendments and exemptions are incorporated in the appropriate summary sections.

Taxes on corporate income

Under the income tax law in Lebanon, tax is levied based on income type. Accordingly, the income tax law divides income into the following three categories:

- Chapter I: Profits from industrial, commercial, and non-commercial professions.
- Chapter II: Salaries and wages and pension salaries.
- Chapter III: Revenues from moveable capital (Chapter III mainly covers all types of dividend income, board member appropriations from profits, and interest income, including interest on bonds and treasury bills).

The income tax law does not provide for a single tax on income. Accordingly, where a taxpayer has income from different sources, each type of income is taxed according to the tax chapter it falls under. The applicable rates are as follows:

- CIT: 17% (15% applicable for the period starting 1 January 2017 till 26 October 2017 inclusive, while 17% starting 27 October 2017).
- Capital gains on disposal of fixed assets: 15% (10% applicable for the period starting 1 January 2017 till 26 October 2017 inclusive, while 15% starting 27 October 2017).
- Dividend distribution withholding tax (WHT): 10%.
- Non-resident WHT: 7.5% for services and 2.25% for other than services.
- Payroll tax: From 2% to 20%.
- WHT on interest income: 7% (5% applicable for the period starting 1 January 2017 till 26 October 2017 inclusive, while 7% starting 27 October 2017).

Not all businesses are taxed in the same manner. Depending on the relative size and structure of a business, the tax method applied is assessed depending on real (or actual) profits or deemed profits.

Real profit method

In Lebanon, tax is charged on the total income or profits derived in Lebanon. Based on the income tax law and the principle of territoriality, the main premise for considering a profit to have been realised in Lebanon is if it was generated through an effort or activity exerted in Lebanon.

The tax base (the determination of profits) and the tax rates differ between resident and non-resident taxpayers.

For resident corporate entities, CIT is computed at 17% based on the taxpayer's accounting profits after adjustments resulting from tax rules through the schedule of accounting-to-tax calculation.

The use of the real profit method is mandatory for the following:

- Corporations (SAL).
- Limited liability companies (SARL).
- Companies of individuals.
- Branches of foreign companies.
- All entities employing more than four employees or importing goods.

Small entities may choose voluntarily to be subject to the real profit method; however, once they choose the real profit method, they cannot revert back to the deemed profit method.

Concerning tax on non-residents, WHT applies at 2.25% on payments for goods and 7.5% on payments for services.

Deemed profit method

A deemed profit method is imposed on insurance and savings institutions, taxable transport companies, oil refineries, and public work contractors.

Taxation is based on deemed profits and is levied at a flat rate of 17%.

The rate of deemed profit for public work contractors, as approved by the MoF, is currently set at either 10% or 15% of total amounts collected per year, based on the type of activity performed by the contractor.

For insurance companies, the deemed profit rate ranges between 5% and 10%, depending on each insurance activity.

Local income taxes

There are no governorate or local government taxes on income in Lebanon.

Corporate residence

Tax is levied on all corporeal/natural and incorporeal/artificial persons, resident in Lebanon or outside, on all profits that they generate in Lebanon. The main premise for considering profits to have been realised in Lebanon is when such profits have occurred from an effort exerted in Lebanon, irrespective of the identity of the taxpayer or place of residency.

Tax is levied on profits generated by two categories of taxpayers: resident taxpayers and non-resident taxpayers.

Resident taxpayers

The Lebanese Parliament legislated a new Law no. 60, dated 3 November 2016, relating to the amendment of Law no. 44, Tax Residency in Lebanon, including that any company is considered tax resident in Lebanon if it has:

- been established according to the Lebanese laws
- been registered according to the Lebanese laws, or
- a place of business in Lebanon.

Non-resident taxpayers

Non-resident taxpayers can consist of persons residing in Lebanon and persons residing outside Lebanon. A corporeal person residing in Lebanon is subject to the non-resident WHT (*see the Withholding taxes section for more information*) if neither of the following two terms are satisfied:

- Practise a certain trade in a normal and repetitive manner in Lebanon, irrespective of whether or not they have a known registered place of business.
- Have a known registered place of business in Lebanon.

A person residing outside Lebanon is subject to the non-resident WHT on the amounts, revenues, profits, or proceeds obtained from Lebanon as a result of undertaking an activity in whole or in part on Lebanese territory or as a result of exploiting rights in Lebanon.

Permanent establishment (PE)

There are no clear provisions in the Lebanese income tax law to define PE.

Other taxes

Value-added tax (VAT)

The standard VAT rate in Lebanon increased from 10% to 11% effective 1 January 2018. Unless specifically exempt, VAT is levied on all commercial transactions undertaken by business entities. Export of goods and services and export-related services, international transport, and some of the intermediate operations are zero-rated. Banking, financial services, and insurance operations are exempt from VAT.

Note that the recharge of expenses from an entity in Lebanon to another entity abroad is subject to VAT at 11% instead of 10% effective 1 January 2018.

The threshold for mandatory registration is a turnover that exceeds 100 million Lebanese pounds (LBP) in four consecutive quarters.

Customs duties

Modern, simple, and efficient assessment means are adopted by the customs authorities (e.g. electronic declarations, declaration in advance, applying international procedures in clearing the goods, selective inspection, auditing the goods after their release, and adopting the unique declaration).

Customs rates are imposed and modified according to decisions from the Lebanese customs authorities. These decisions are adopted based on the need of the Lebanese markets of some goods and the will to protect national production sectors.

Safeguard measures are provided for in relation to imported goods. The purpose behind such measures is to protect the domestic production sectors when an increase of imports is witnessed when compared to the same period during the previous year.

The rates are determined based on a specific schedule created in conformity with the Harmonised System of Nomenclature. This conformity with the unified system allows Lebanon to represent an 'importer friendly' environment for importers.

The normal rates are applied where there is no preferential agreement. When the origin of the good or part of the good is from a country with which Lebanon has a preferential customs treatment, preferential rates apply.

Customs rates in Lebanon are either determined in percentage or paid as a lump sum per unit of imported products.

Excise taxes

Excise taxes are mainly applicable in Lebanon on certain beverages and spirits, tobacco products, gasoline, and vehicles.

Built property tax (BPT)

The BPT is an annual progressive tax, ranging between 4% and 14%, on built property.

Stamp duty

Two kinds of stamp duties are levied. A proportionate stamp duty of 0.4% effective 26 October 2017 is levied on all deeds and contracts (written or implied) that mention specific payments or other sums of money. A fixed stamp duty ranging between a minimum of LBP 250 and a maximum of LBP 2 million is applicable on documents in accordance with schedules appended to the stamp duty law.

Capital gains tax

Under local legislation, companies are permitted to revalue their fixed assets every five years. Capital gains recognised from such a revaluation, as well as any profits that may be realised from the disposal of fixed assets, are subject to a capital gains tax of 10%.

Income from disposal of shares realised by a company is subject to 15% capital gains tax.

Income from disposal of fixed assets realised by a company is subject to 15% capital gains tax when the shares are classified as financial assets on the company's balance sheet.

Income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 17% CIT.

Registration taxes

The estimated cost of establishing a company in Lebanon is around 7,500 United States dollars (USD). This includes lawyer's fees and registration fees. The registration fees will increase if the company is established with capital exceeding the minimum requirement. However, the registration fees should not normally exceed 1% of the value of capital.

For branch offices and representative offices, establishment costs are lower and may be estimated at USD 5,000.

When transferring ownership of real estate, registration fees of approximately 6% are applicable.

Lump-sum licence fee

Decision no. 993/1, dated 21 November 2016, relating to imposing an annual lump-sum licence fee was introduced. With some exceptions for certain types of companies (holdings and offshore companies, institutions exempt from tax as per Article 5 of the income tax law), the annual lump-sum licence fee for joint stock companies is LBP 2 million, for limited liability companies is LBP 750,000, for establishments assessed based on real profit is LBP 550,000, and for taxpayers assessed on assumed profits is LBP 50,000. The above-mentioned licence fees apply to local head offices, branches, outlets, and to any place in which the taxpayer carries on its activity or receives customers. For income tax purposes, the lump-sum licence fee is considered as a non-deductible expense. This Decision became effective on 1 January 2018.

Payroll taxes

Employers are responsible for withholding and declaring payroll taxes on behalf of their employees. Payroll tax is levied at progressive rates of 2% to 20%.

Social security contributions

Social security contributions are the following:

- Borne by the employer: 8% for the maternity and sickness benefit schemes, on a maximum of LBP 2.5 million per month, and 6% for the family benefit schemes, on a maximum of LBP 1.5 million per month, in addition to 8.5% of total annual earnings for the end of service indemnity, with no ceiling.
- Borne by the employee: 3% for the medical scheme, on a maximum of LBP 2.5 million per month.

Branch income

Net income derived from a branch's operations in Lebanon is subject to Lebanese CIT, levied under the real profit method at a rate of 17%. Taxable profits of foreign branch offices are deemed to be distributed on a yearly basis and are subject to a dividend distribution tax at the rate of 10%.

Representative offices

Representative offices do not pay CIT as long as they do not carry out commercial activities. Representative offices are required to submit annual tax declarations along with detailed company information that includes employee information, a balance sheet, an income statement, a non-resident tax schedule, and a schedule of payments to professionals. The declaration, with all relevant documentation, should be submitted as one single set. All the information included should be based on accounting records. The deadline for submitting the declaration depends on the legal form of the parent company (i.e. before 1 June of the following year for SAL or SARL companies and before 1 May of the following year for others).

Income determination

Inventory valuation

For tax purposes, inventory is valued using the weighted average cost method.

Capital gains

Capital gains are not generally subject to CIT, but may be subject to capital gains tax. *See Capital gains tax in the Other taxes section for more information*.

Note that income from disposal of shares realised by a company whose main activity is the acquisition of investments is subject to 15% CIT.

Dividend income

Dividends received as a result of a taxable person's activity are deemed trading income and are subject to 17% CIT. Dividends received as passive income are subject to 10% tax in Lebanon. However, dividends received from Lebanese entities are exempt from CIT, as the dividend tax is withheld at source, but are not exempt from further tax upon distribution from the recipient entity.

Stock dividends

The Lebanese law is silent on the tax implications of stock dividends. However, when share capital is increased by reducing retained earnings, no tax is applicable.

Interest income

Interest earned by corporations is now considered as a tax deductible expense starting 27 October 2017. No more relief is given on the WHT suffered on bank accounts, treasury bills, and bonds. The interest earned prior to 26 October 2017 is added to the taxable income.

Rental income

Rental income should be deducted from the accounting result to reach the taxable result. Moreover, expenses related to property that is rented out should be added back to the accounting result to reach the taxable result.

A BPT is paid on rental income at progressive rates ranging between 4% and 14%.

Royalties income

Royalties received by a holding company from Lebanese companies for patents and the like are taxed at a rate of 10%. Royalties received by holding companies from abroad are exempt from tax.

Royalties received by other than holding companies are taxed as ordinary income at 17%.

Unrealised exchange gains/losses

Unrealised exchange gains and losses are not treated differently from any other gain or loss for tax purposes (i.e. unrealised exchange gains are subject to CIT at 17% and unrealised exchange losses are deductible for CIT purposes).

Foreign income

Resident corporations are not taxed on foreign-source income derived from activities carried out abroad through foreign branches.

Deductions

Depreciation

Depreciation of property, plant, and equipment (at rates fixed by ministerial decree) is deductible. The depreciation method to be used is the straight-line method. If a depreciation rate that is higher than the low rate is adopted, the MoF should be notified. The allowable depreciation rates are as follows:

Assets	Low rate (%)	High rate (%)
Buildings (commercial, touristic, and services)	2	5
Buildings (industrial and artisanal)	3	10
Buildings and constructions (commercial or industrial)	6	20
Freehold improvements and decorations	6	25
Technical installations and industrial equipment	8	25
Computer hardware and software	20	50
Vehicles (cars)	10	25
Vehicles (transport of goods/buses)	6	20
Sea transport	5	10
Air transport	20	25
Office equipment and furniture	8	25
Glassware and silverware (hotels, restaurants, etc.)	Inventory at year-end	Inventory at year-end
Gas cylinders	8	20

Goodwill

Under Lebanese tax rules, goodwill cannot be amortised.

Organisation and start-up expenses

Organisation and start-up expenses are amortised over three to five years for tax purposes.

Interest expenses

Interest on business loans is deductible, under certain conditions. Interest paid on the taxpayer's capital is not deductible.

Bad debt

Bad debts are deductible if all means for collection of the debt have been exhausted.

Provisions for bad debts are deductible if a debtor has been declared bankrupt. Surplus provisions are added to profits.

Charitable contributions

Charitable contributions are deductible if made to approved charitable, social, cultural, or sporting institutions, within certain limits.

Gifts

Gifts given by the company in cash are non-deductible.

Gifts given by the company in-kind to customers when the amount of each gift exceeds LBP 1 million per person per year and when the total amount of gifts in-kind exceeds 1% of the turnover are non-deductible.

Fines and penalties

Fines and penalties are not deductible in Lebanon.

Taxes

Taxes and duties incurred in the course of business (except CIT) are deductible.

Taxes due to foreign governments on income earned in Lebanon are non-deductible.

Exceptional taxes and fines are non-deductible.

Other significant items

Other deductible expenses include:

- Cost of goods sold.
- Cost of services rendered.
- Rent of business premises or, if the premises are owned by the taxpayer, their depreciation.
- Salaries, wages, and other employee benefits, including end-of-service indemnities.
- General business expenses, including insurance premiums.
- Reserves for severance payments, pensions, and disability payments. Surplus provisions are added to profits.
- Advertising and publicity expenses, within certain limits.
- Travel, telephone, and vehicle expenses, within certain limits.
- Entertainment expenses that are properly supported.
- Board remuneration against services performed.
- Accrued expenses as long as their occurrence is certain.
- Employees' life insurance premiums are deductible as long as they are included in the employees' benefits subject to payroll tax.

Other non-deductible expenses include:

- With the exception of normal maintenance expenses, costs that increase the value of the property, plant, or equipment (such costs should be capitalised and depreciated in accordance with the fiscal depreciation rates).
- Losses or share-in-costs resulting from enterprises, offices, and branches situated outside Lebanon.
- Representation allowances in excess of 10% of an employee's basic salary, as well as unjustifiable and unreasonable salaries.
- Personal expenses, such as payments deducted by an employer or partner for the management of the business and for certain business expenses incurred by the employer or partner.
- Appropriations made to board members that do not comprise remuneration for work done.
- Provisions, other than those specifically allowed by law. Examples of non-deductible provisions include provisions for bad debts, provisions for slow moving items, and provisions for bonuses, contingencies, and charges.

Net operating and capital losses

Tax losses may be carried forward for up to three years after the year in which they were originally incurred. The carryback of losses is not available.

Capital losses may be used to offset taxable profits of the current year but may not be carried forward.

Payments to foreign affiliates

Payments to foreign affiliates are generally subject to WHT.

Based on guidance issued by the MoF, recharges from the head office located abroad (including advertising) are deductible up to a certain limit, calculated as follows:

(Assets of the branch in Lebanon / Consolidated assets) x Central administrative expenses

However, a ceiling of 3% of the branch's revenues is applied.

Group taxation

There is no group taxation in Lebanon.

Transfer pricing

In Lebanon, there are no clear and detailed transfer pricing or general anti-avoidance rules. However, even in the absence of clear transfer pricing rules, exchanges or transactions made between related parties should be done on an arm's-length basis.

The tax administration has the right to reassess related-party transactions and adjust their value in order to reflect the taxable amount related to the period under study.

Thin capitalisation

In Lebanon, there are no clear or detailed thin capitalisation rules.

Controlled foreign companies (CFCs)

There are no CFC rules in Lebanon.

Tax credits and incentives

Foreign tax credit

There are no specific regulations concerning foreign tax credit in Lebanon.

Holding companies

Lebanese holding companies are exempt from CIT and from WHT on dividends. However, they are subject to a tax on their paid-up capital and reserves. In any given tax year, total tax payments on paid-up capital and reserves are capped at LBP 5 million.

Interest, management fees, and royalties received by holding companies from abroad are exempt from tax in Lebanon.

Holding companies are subject to a 10% tax on interest received from loans granted for a period of less than three years to companies operating in Lebanon. Management fees received by the holding company from companies operating in Lebanon are subject to a 5% tax. Capital gains on financial assets in Lebanese companies held for less than two years are subject to a 10% tax. Royalties received from Lebanese companies for patents and the like are taxed at a rate of 10%.

Offshore companies

Offshore companies are exempt from CIT and from the WHT on dividends, and are instead subject to a lump-sum annual tax of LBP 1 million. Contracts related to offshore activities outside Lebanon are exempt from Lebanese stamp duty.

Offshore companies are required to be registered as SAL companies and, with a few exceptions, are subject to the same regulations as a SAL company. The business objectives of an offshore company are limited.

Permanent exemptions from CIT

Companies and organisations that are granted an indefinite exemption from CIT include the following:

- Educational institutions.
- Hospitals, orphanages, asylums, and other shelters that admit patients free of charge.
- Shipping, sea, and air transport associations (subject to certain restrictions).
- Farmers, provided they do not display farm produce and cattle outlets or sell products and meat after conversion tax.
- Syndicates and other types of professional associations.
- Miscellaneous non-profit organisations and co-operatives.
- Holding companies and offshore companies.
- Public sector bodies that do not compete with private institutions.

Reinvestment incentives

Industrial companies using operating profit to finance certain capital investments are exempt from up to 50% of their CIT liabilities for a period of up to four years, provided that such exemptions do not exceed the original investments made. In areas designated 'development zones', 75% of a company's tax liabilities may be exempt.

In order to take advantage of this regulation, investments should consist of capital expenditures designed to increase a company's manufacturing capacity or of investments in housing facilities for the company's staff and other employees.

Withholding taxes

WHT on interest

The income, revenues, and interest earned from accounts opened at Lebanese banks and from treasury bonds are subject to a 7% WHT that is non-refundable and cannot be carried forward. The tax on interest is now considered a tax deductible expense starting 27 October 2017.

WHT on dividends

Tax is withheld from dividends paid to resident and non-resident shareholders/ partners at a rate of 10%.

Movable capital WHT

A 10% WHT is levied on income derived from movable capital generated in Lebanon. Taxable income is comprised of the following:

- Distributed dividends, interest, and income from shares.
- Directors' and shareholders' fees.
- Distribution of reserves or profits.
- Interest from loans to corporations.

Non-resident WHT

Revenues earned by non-residents in Lebanon are subject to an effective WHT of 2.25% on revenue from the sale of materials and equipment, and 7.5% on the revenue in the case of sale of services.

Double tax treaties (DTTs)

DTTs provide the following WHT benefits. Note that treaty rates do not override lower non-treaty rates. Treaty members may take advantage of the non-treaty rates.

	WHT (%)		
Recipient	**Dividends**	**Interest**	**Royalties**
Non-treaty	10	10	7.5
Treaty:			
Algeria	15	10	10
Armenia	5/10 (1)	8	5
Bahrain	0 (2)	0 (2)	0 (2)
Belarus	7.5	5	5
Bulgaria	5	7	5
Cyprus	5	5	0 (2)

Lebanon

Recipient	WHT (%) Dividends	Interest	Royalties

Notes

1. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 25% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
2. Dividends, interest, or royalties arising in a contracting state and paid to a resident of the other contracting state shall be taxable only in that other state.
3. Shall not exceed:
   - 5% of the gross amount of royalties paid for the use of, or the right to use, any industrial, commercial, or scientific equipment.
   - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting any software, patent, trademark, design or model, plan, secret formula or process, or for information concerning industrial, commercial, or scientific experience.
4. Where the dividends are paid by a company that is:
   - A resident of Lebanon to a resident of Malta who is the beneficial owner thereof, the Lebanese tax so charged shall not exceed 5% of the gross amount of the dividends.
   - A resident of Malta to a resident of Lebanon who is the beneficial owner thereof, the Malta tax on the gross amount of the dividends shall not exceed that chargeable on the profits out of which the dividends are paid.
5. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.
6. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
   - 10% of the gross amount of the dividends in all other cases.

7. Shall not exceed:
   - 10% of the gross amount of royalties paid for the use of or the right to use, any copyright of literary, artistic, or scientific work, including cinematograph films and films or tapes for radio or television broadcasting.
   - 5% of the gross amount of royalties paid in other cases.
8. Shall not exceed:
   - 10% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 15% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.
9. Shall not exceed:
   - 5% of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) that directly holds at least 20% of the equity capital of the company paying the dividends.
   - 15% of the gross amount of the dividends in all other cases.
10. Shall not exceed:
    - 5% of the gross amount of the dividends if the beneficial owner is a company that has owned at least 10% of the capital of the company paying the dividends for a period of at least 12 months preceding the date the dividends were declared.
    - 15% of the gross amount of the dividends in all other cases.

Tax administration

Taxable period

Lebanon's fiscal year runs from January to December and is based on the Gregorian calendar. With the special approval of the local tax authorities, companies may, however, use their own accounting year.

Tax returns

Taxes on business income in any given year are based on the profits of the previous financial year.

Tax returns by artificial persons (entities) must be filed by 31 March of the year following the year of income. Tax returns by capital companies must be filed by 31 May of the year following the year of income.

Submission deadlines of annual declarations for institutions that are exempt from income tax (other than companies) are as follows:

- Before 1 February for institutions adopting the cash basis of accounting.
- Before 1 April for institutions adopting the accrual basis of accounting and for representative offices that represent non-corporate entities.
- Before 1 June for representative offices that represent corporations.

If taxpayers fail to submit a tax return, realisation penalties will be due.

Payment of tax

The same deadlines for tax returns apply for tax payments.

If taxpayers fail to make payment, late payment penalties will be due.

Tax audit process

The most common ways for the tax authorities to select companies for tax audits are the size of the company, the type of business, and certain risk assessment measures.

Tax audits typically cover a single type of tax.

In a typical situation, a tax audit is likely to take less than one year from first information request to substantive resolution.

Statute of limitations

The tax administration has four years to collect its rights. The period is calculated from the end of the year that follows the current business year.

The taxable person may request the refund of excess tax within four years starting from the end of the year where the refund right was created.

The tax administration can exceed the statute of limitations in cases where a profit or revenue has been proven by a court order, arbitration, or inheritance clearance. The extension is limited till the end of the calendar year following the end of the year in which the tax administration was notified of such event.

Under the statute of limitations, a company should keep its accounting books and documentation for ten years.

Topics of focus for tax authorities

Lately, several topics have been of interest to the tax authorities in Lebanon, including transfer pricing, payments of royalties and management fees to non-resident parties, provisions, and employee compensation.

Other issues

Foreign ownership of real estate restrictions

The following restrictions apply to foreign ownership of real estate:

- Up to 3,000 square metres does not require Council of Ministers approval.
- Exploitation and normal lease right extending for a period of more than ten years cannot be attained without obtaining approval.
- Real estate owned by foreigners, for which approval has been obtained, cannot exceed, over all of the Lebanese territory, 3% of the total area of Lebanon. In each province, the total area owned should not exceed 3% of its area. With respect to Beirut, the total area owned should not exceed 10% of its area.
- The approval is nullified if not acted upon during a period of one year.
- When approval is granted, the building on the real estate should be constructed within a period of five years (renewable once by the Council of Ministers).

Choice of business entity

Lebanon's commercial law provides for a range of business entities available to both local and foreign investors. These consist of the following:

- Sole proprietorships.
- General partnerships.
- Limited partnerships.
- Joint-stock companies (SAL).
- Limited liability companies (SARL).
- Holding companies.
- Offshore companies.
- Representative offices and branches of foreign companies.

Legal structures commonly used by foreigners in conducting business in Lebanon are SALs, SARLs, and branch offices.

Joint-stock companies (Société anonyme libanaise or SAL)

Lebanese joint-stock companies are permitted to engage in all kinds of business activity. Shareholders of a SAL have no liability beyond their actual capital subscriptions.

With a small number of exceptions (such as real estate companies and banks), there are no limits on the amount of capital that can be held by foreign investors.

The management of a SAL is entrusted to a board of directors with a minimum of three and a maximum of 12 members. The majority of board members must be Lebanese, but the chairman may be a foreign national.

Certain types of businesses, such as banks and insurance companies, are required to incorporate as joint-stock companies.

The minimum capital is LBP 30 million, and the applicable CIT rate is 17%, in addition to a WHT on dividends of 10%.

Limited liability companies (Société à responsabilité limitée or SARL)

Members of a limited liability company are partners, and the company's capital is divided into parts rather than shares. Partners are liable only to the extent of their parts, and individual partners' claims on the company's capital are fixed in the partnership deed.

All partners may be foreigners, with the exception of companies seeking to engage in commercial representation.

Limited liability companies may not be active in certain sectors of the economy, such as in insurance, banking, fund management, or air transportation.

The transfer of parts in a limited liability company is subject to the consent of partners representing at least three-quarters of the capital. Existing partners enjoy priority in the purchase of parts offered for transfer.

A limited liability company is managed by one or several directors (managers) who may or may not be selected from among the partners.

The minimum capital is LBP 5 million, and the applicable CIT rate is 17%, in addition to a WHT on dividends of 10%.

Intellectual property (IP)

The law in Lebanon does not contain a clear definition of author's rights. It protects all products of the human intellect whether written, pictorial, sculptural, scriptural, or oral, regardless of its value, importance, destination, or form of expression.

The law provides patent protection for inventions and plant varieties and a *sui generis* protection for layout designs of integrated circuits. Furthermore, the law provides protection for undisclosed information. According to an assessment conducted by the World Intellectual Property Organization (WIPO) in July 2002, the Patent law is in complete conformity with the WTO's Agreement on Trade-Related Aspects of

Intellectual Property Rights (TRIPS). It was also pointed out that the provisions of the Plant Varieties exceed the minimum requirements of the TRIPS Agreement.

The law does not explicitly protect notorious trademarks and geographical indications. However, those are provided protection via Lebanon's membership to the Paris Convention. Moreover, geographical indications are provided protection under the provisions of the Law on Customs, the Law on Fraud Control, and the Criminal Law.

The copyright protection originally available to literary and artistic works is now extended to computer software, video films, and all kind of audio-visual works. The law provides stiffer penalties for offenders and better compensation to the persons whose rights have been infringed. The manner in which the copyright is breached has also been extended.

Exchange of information agreements

The Lebanese Parliament legislated a new Law no. 55, dated 27 October 2016, relating to the implementation and execution of exchange of information agreements used for tax purposes. Under Law no. 55, exchange can occur under several scenarios. Exchange of Information on Request (EIOR) or Automatic Exchange of Information (AEOI) based on the Common Reporting Standard (CRS) or in the context of signed DTTs. This legislation authorised the Finance Minister of Lebanon on behalf of the Lebanese government to sign the Multilateral Convention on Mutual Assistance in Tax Matters (MAC) and the Multilateral Competent Authority Agreement (MCAA) on Automatic Exchange on Financial Account Information related to the commitment to the implementation of CRS. Under the EIOR approach and upon receiving a request to share information, the Lebanese Competent Authority will assist the requesting country based on the agreement signed. It has the right to request additional information before sharing the information or reject the request in case it conflicts with the signed agreement. Failure to abide by this legislation will result in penalties ranging from LBP 100 million to LBP 200 million. These penalties are in addition to penalties set by the related regulatory authorities. It is worth noting that information exchanged under the AEOI and EIOR, each under the related agreement or this legislation, will be treated as confidential/secret as per Article no. 25 of the Tax Procedure Law.

On 12 May 2017, the MAC and the MCAA were officially signed by the Lebanese authorities. On 7 July 2017, the CRS guidance notes were issued in the Official Gazette under Decree No. 1022. On 25 October 2017, under Circular No. 3222/LMD/2017, the Insurance Control Commission (ICC) issued the CRS guidance notes to help the insurance companies implement the CRS requirements.

Significant developments

Since 2011, there have been no significant corporate tax developments.

Taxes on corporate income

For any Libyan registered entity, income arising both in Libya and abroad (i.e. worldwide) is assessable for corporate income tax (CIT) purposes in Libya.

CIT is imposed annually on the same basis for Libyan controlled corporate entities, foreign controlled corporate entities, and branches of foreign companies.

CIT is levied on taxable profits at a flat rate of 20%.

Jehad Tax

There is a flat rate of Jehad Tax assessed at 4% on taxable corporate profits.

Local income taxes

Libya has no provincial income tax laws.

Corporate residence

Corporate residence is not specifically dealt with under the tax laws of Libya. The tax authorities will seek to assess any income derived from services provided in Libya.

Permanent establishment (PE)

Double tax treaties (DTTs) that have been signed introduce the concept of PE. However, general law requires that any foreign entity seeking to provide services in Libya should obtain a business licence, which necessitates it registering as a legal entity. Historically, unregistered foreign entities have provided services in Libya, but this is not in line with the law.

Other taxes

Value-added tax (VAT)

There is no VAT in Libya.

Customs duties

Customs duties were abolished in 2005, except for tobacco and tobacco products.

A service fee of 5% on the value on most imports also exists. There are various exemptions to this service fee, specifically under Investment Law and within the oil sector.

Other dues and taxes on importation are estimated at 0.5%. Initially, a temporary import licence is issued for six months that can be extended to a maximum of three years. A guarantee or a deposit can be provided by the importer to the Customs Department.

Excise taxes

Libya has no excise taxes.

Property taxes

Libya has no specific property taxes.

Transfer taxes

Libya has no transfer taxes.

Stamp duty

Stamp Duty Law levies a schedule of duties and rates on various documents and transactions. The most relevant to corporate entities is Schedule 28, which prescribes the rate of duties on contracts for the provision of services or supply. The duty on main contracts is 1% and on subcontracts is 0.1%. Note that there is a duty of 0.5% on all payments to the Tax Department as well.

Payroll taxes

An employer is responsible for collecting taxes and contributions for the state. When an entity is audited by the tax authorities, the assessment is effectively on the employer for failing in its statutory obligation to collect those taxes and contributions. Note that individuals are not required to file annual statements of income.

Social security contributions (INAS)

Social security contributions are payable by all persons working in Libya, including expatriates.

Social security contributions are computed on gross income, and current rates are as follows:

Gross income	Foreign branch (%)	Libyan entity (%)
Employee's contribution	3.75	3.75
Employer's contribution	11.25	10.50
Contribution from public treasury	-	0.75
Total	15.00	15.00

Social security is withheld by the employer and payable monthly, within ten days after the month end. For social security purposes, a late payment fine of 5% *per annum* is assessed on the amount due.

Branch income

Tax rates on branch profits are the same as on corporate profits. However, the Income Tax Law allows the Tax Department to assess income tax on branches of foreign companies as a percentage of turnover via the 'deemed profit' basis of assessment. Tax is therefore payable even where tax losses are declared.

The level of deemed profit applied to turnover varies according to the branch's type of business activity. This ranges from 10% to 15% for civil works and contracting (turnkey projects), 15% to 25% for oil service, and between 25% and 40% in the case of design/consulting engineers. A deemed profit of between 5% and 7% is also assessed on supply. The deemed profit percentage applied to any year will be higher than the profit percentage declared in the annual tax return since the deemed profit basis is applied during the course of a tax audit and is effectively a revenue generating exercise for the tax authorities. Historically, tax audits have not resulted in credits or reimbursements.

Income determination

No specific rules apply on income determination for the following categories:

- Interest income.
- Partnership income.
- Rent/royalties income.
- Foreign income.

The Income Tax Law allows entities to account on an accrual basis or on a cash basis.

Inventory valuation

The Commercial Code allows inventory to be valued at the lower of cost and net realisable value.

Capital gains

Any chargeable gains on the sale of capital assets are taxed as ordinary income. For entities assessed on a deemed profit basis, capital gains should be added to the deemed taxable income.

Dividend income

Historically, dividend income has not been subject to any additional taxes.

Inter-company dividends

Libyan taxation laws do not contain any special provisions regarding inter-company dividends.

Stock dividends

Stock dividends are not specifically dealt with in Libyan taxation laws. The current practice is for dividend distributions not to be taxed.

Deductions

Taxable income is determined after deducting all expenditure and costs incurred in the realisation of the gross income (*for more details on the deemed profit basis of assessment on branches of foreign companies, see the Branch income section*).

For any entity (not a foreign branch) seeking to be assessed on an add-back basis, it should ensure, in accordance with Stamp Duty Law, that the majority of its costs can be supported by tax-registered documents (i.e. declared payrolls and registered contracts and invoices).

Depreciation

Depreciation should be calculated in accordance with the Executive Regulations of the law.

Assets	Depreciation rate (%)
Buildings:	
Building in which machines are fixed	4
Building without fixed machines	2
Moveable buildings	10
Means of transport:	
Passenger	20
Cargo and freight:	
Less than 3 tons	15
Over 3 tons	10
Ships	5
Fishing boats	5
Aeroplanes	8
Furniture:	
Office, ship, and domestic furniture	15
Hotel, restaurant, cafes, and hospital furniture	20
Work camps outside of cities	20
Food utensils and furnishings for restaurants, hotels, and the like	25
Machines:	
Office machines	15
Electric generators	20
Computers and accessories	25
Software	50
Other machines	15

Goodwill

Purchased goodwill can be amortised on a straight-line basis over five years.

Organisation and start-up expenditure

Organisational and start-up expenditure can be capitalised and amortised over five years on a straight-line basis.

Interest expenses

No specific rules apply for the deduction of interest expenses.

Bad debt

Bad debts are only recognised to the extent that they have been recognised as such legally.

Charitable contributions

Donations to charities recognised by the state are permitted at up to 2% of net income.

Fines and penalties

No specific rules apply for the deduction of fines and penalties.

Taxes

No specific rules apply for the deduction of taxes.

Net operating losses

Losses may be carried forward and deducted from future profits, for up to five years. The Income Tax Law has no provision for the carryback of losses.

Payments to foreign affiliates

No specific rules apply for the deduction of payments to foreign affiliates.

Group taxation

There is no recognition of a group for taxation purposes.

Transfer pricing

No transfer pricing rules exist in the general law.

Thin capitalisation

No thin capitalisation rules exist in the general law.

Controlled foreign companies (CFCs)

No rules on CFCs exist.

Tax credits and incentives

Foreign tax credit

Under general tax law, no provision exists for allowing the deduction of foreign tax credits.

CIT exemption

Exemptions to CIT exist, most notably, under the Investment Law. General projects registered under the Investment Law are permitted a five-year CIT holiday with a possibility to extend for a further three years.

Exemptions also exist for strategic infrastructure projects. Such exemptions must be awarded by the legislative body, either by ratifying the relevant contract, which includes a tax exemption clause, or by the issuance of a separate law.

Customs and stamp duties exemption

The Investment Law also provides exemptions for customs duties and stamp duty. The exemptions that exist are bestowed on subcontractors to the relevant projects.

The Petroleum Law provides exemption to customs duties on oilfield-specific equipment and materials, which is also provided to oil service companies.

Withholding taxes

Libyan law has no withholding taxes (WHTs). Generally, for unregistered foreign entities seeking to register a contract with the tax authorities, CIT will be assessed (and must be settled) on a deemed profit basis at the time of registration. It may be possible to negotiate a WHT in preference to the aforementioned general procedure for a significant contract where there is greater uncertainty as to the estimated contract value.

Tax administration

Taxable period

The tax year is generally a calendar year, although assessments can be made on the basis of a company's own year-end, provided permission is granted in advance from the Tax Department and the company then adheres consistently to the same date.

Tax returns

All corporate entities must make an annual filing within four months of its year-end or within one month of its audit report, whichever is earlier.

Payment of tax

CIT is payable on a quarterly basis (10 March, 10 June, 10 September, and 10 December) normally commencing the first quarter date after an assessment has been issued.

Late payment penalties

A late payment penalty is assessed on the tax due at the rate of 1% to a maximum of 12%. In addition, the remaining quarterly payments are due immediately for failing to make an instalment on time.

The law also imposes the following penalties:

- A fine of not less than three times the amount of unpaid tax due shall be applied to any person who fails to pay tax by the due date.
- Without prejudice to any harsher penalty, a fine of not less than four times the amount of tax due and unpaid will be applied to any person who, with intent to evade all or part of the tax, commits any of the following acts or abets, agrees, or aids a person who commits such an act:
  - The making of false statements in declarations submitted under this law.
  - The preparation of false accounts, books and records, reports, or budgets.
  - The use of fraudulent means to conceal or attempt to conceal taxable amounts due under this law.

Tax audit process

Tax audits typically occur every three or four years.

Statute of limitations

The statute of limitations for CIT purposes is seven years.

Topics of focus for tax authorities

The tax authorities' focus during audits continues to be on confirming revenue, ensuring major services providers contracts are tax registered, and seeking additional undeclared salaries and benefits.

Other issues

Statutory Books

Business entities operating in Libya are required by Libyan Law to maintain a General Ledger and a General Journal (i.e. the Statutory Books).

Before use, these must be stamped as registered with the Revenue Authorities and the Commercial Court. It should be noted that a Ledger or Journal will not be registered if it already contains accounting entries (i.e. one cannot register existing books of account).

Similarly, transactions pre-dating the date the books are registered will be disallowed. In theory, transactions should be entered daily, but in practice, most companies write up their statutory records on the basis of monthly transactions summaries.

The Tax Inspector will always request production of the Statutory Books at the commencement of a tax audit. If these are not available, a perfunctory audit of the English (or other language) books of account will be made, and it is likely that there will be a punitive increase in taxable income as a consequence.

The Commercial Code allows approved computer-based ledgers to be used instead of the traditional manual ledgers.

Significant developments

Recent developments with regard to tax treaties

- A double taxation treaty (DTT) with Monaco has been signed and entered into force on 1 January 2018.

Taxes on corporate income

In principle, all corporations, foundations, and establishments are subject to a profit tax at a flat rate of 12.5%. Resident companies are subject to unlimited tax liability on worldwide income. Non-resident companies are subject to limited tax liability on income from properties or branches within Liechtenstein.

Minimum tax

All legal entities are subject to an annual corporate minimum tax of 1,800 Swiss francs (CHF) for tax years starting 1 January 2017. This tax can be fully credited to the profit tax.

The full tax amount is due even if the corporation is not resident in Liechtenstein for the whole tax period.

Under a lone exception, minimum tax is not due if the total assets of an operating entity did not exceed CHF 500,000 during the last three years.

Corporate residence

A company is considered to be resident in Liechtenstein if its registered seat (incorporation) or place of effective management is within Liechtenstein.

Companies that have neither a domicile nor effective place of management in Liechtenstein, as well as special asset dedications without legal personality (e.g. trusts), are subject to limited tax liability for the following income:

- Corporate income from the cultivation of domestic real estate used for agriculture and forestry.
- Rental and lease income from real estate situated within Liechtenstein.
- Taxable net corporate income of permanent establishments (PEs) situated in Liechtenstein.

Permanent establishment (PE)

Please note that Liechtenstein has only a limited number of DTTs (*see the Withholding taxes section*). However, Liechtenstein is in the process of negotiating various new DTTs and has generally included PE definitions according to the Organisation for Economic Co-operation and Development (OECD) model treaty.

Other taxes

Value-added tax (VAT)

Liechtenstein has adopted the VAT law of Switzerland, while having its own VAT administration.

The general VAT rate is 7.7%. A reduced rate of 2.5% is applicable to deliveries of food, drugs, newspapers, magazines, and books. Furthermore, lodging/accommodation is taxed at a reduced rate of 3.7%. Note that various services are VAT-exempt (e.g. health, social security, education, banking, insurance).

Any person who, irrespective of legal form, carries on a business is liable for VAT. Any person liable for VAT that is involved in domestic entrepreneurial activity with a taxable turnover that is less than CHF 100,000 within a financial year can be exempted from taxation. Special regulations apply for non-profit institutions as well as for non-profit sport or cultural clubs. Reverse charge is applicable for services and certain deliveries from an entity domiciled abroad.

Customs duties/import tariffs

Based on the customs union treaty of 1923 between Liechtenstein and Switzerland, Switzerland customs duties and import tariffs are applicable for Liechtenstein as well. The tariffs and duties depend on various specific attributes of the products and are listed on comprehensive tariffs and duties lists; consequently, the specific tariffs and duties must be checked for every case individually.

Excise taxes

Several excise taxes apply in Liechtenstein (e.g. petroleum tax, tobacco tax, car tax, performance-related heavy vehicle fee, beer tax, taxation of distilled spirits).

Property taxes

No property taxes are applicable in Liechtenstein.

Stamp duty

Based on the customs union treaty of 1923 between Switzerland and Liechtenstein, the Swiss stamp duty tax law of 27 June 1927 is applicable in Liechtenstein. The stamp duty law, *inter alia*, includes the issuance stamp tax and the security transfer tax.

Issuance stamp tax

Upon the formation of legal entities whose capital is divided into shares (e.g. company limited by shares, limited liability company, establishment with capital divided into shares), the stamp duty amounts to 1% of the nominal value or the higher amount effectively paid (above par). The first CHF 1 million is tax exempt.

The same duty also becomes due when the capital is increased or when the shareholders make contributions without increasing the capital. There is no stamp duty tax on bonds and money market certificates.

Various exemptions should also be considered.

Security transfer tax

Security transfer tax is due on all transactions of qualifying securities if a security dealer is involved. The tax amounts to 0.15% for domestic securities (Switzerland and Liechtenstein) and 0.3% for foreign securities.

In particular, banks and financial intermediaries qualify as security dealers and are liable for the payment of the security transfer tax. Furthermore, legal entities with qualifying securities with a book value of more than CHF 10 million also qualify as security dealers and are also liable for the payment of the security transfer tax.

Formation tax (Gründungsabgabe)

Unless Swiss stamp duty law applies, a formation tax in the amount of 1% of the statutory nominal capital is levied upon the formation or relocation of legal companies in Liechtenstein (e.g. foundation, establishment) as well as for capital increases.

The general tax rate of 1% is reduced to 0.5% for amounts greater than CHF 5 million and to 0.3% for amounts greater than CHF 10 million. The first CHF 1 million is tax exempt.

Foundations are subject to the formation tax at a tax rate of 0.2%, but at least CHF 200.

Real estate profit tax

Capital gains from the sale of real estate, or equivalent actions with the same result, are subject to a separately assessed real estate profit tax. The taxable gain is generally the difference between proceeds of the sale and the original purchase price of the property plus any capital expenditure incurred. The basic tax rate can be up to 24%, depending on the amount of taxable real estate gain. The transfer of the economic ownership of real estate (e.g. via the sale of the majority of the shares in a real estate company) may trigger real estate tax as well.

Tax on insurance premiums

Liechtenstein levies a tax on certain insurance premiums. The tax rate amounts to 5% of the cash premium (2.5% for life insurance). Cash premiums in foreign currency have to be converted to Swiss francs at the time the tax claims arise.

Various exemptions should also be considered.

Social security contributions

Employers, in general, are required to account for social security contributions on the salaries of their employees. If the employee is subject to the Liechtenstein social security system, the following compulsory social security contributions are concerned:

- Old age, survivors', and disability insurance (9.3%, the employer's share is 4.75% and the employee's share is 4.55%).
- Family compensation fund (1.9%, fully employer financed).

- Unemployment insurance/supplementary unemployment insurance (1%, the employer's share is one half).
- Occupational accident insurance (approximately 0.1%, fully employer financed).
- Occupational pension scheme (2nd pillar) (contributions depend on pension plan, the employer's share is usually one half).

Branch income

The principles applicable to corporations also apply for branch income, provided that transactions with the head office or other branches are at arm's length. Liechtenstein taxation is imposed on the profit attributable to the branch. The annual corporate minimum tax of CHF 1,800 is also applicable.

There is no withholding tax (WHT) on profit transfer to the head office.

Income determination

The corporate profit tax is determined according to the taxable corporate net income, which is based on the financial statements under consideration of the following provisions.

Inventory valuation

Inventories must be stated at the lower of cost or market. Cost is generally determined by the first in first out (FIFO) or by the average cost method. The tax authorities permit a general reserve against stock contingencies of up to one-third of the inventory cost or market value at the balance sheet date without inquiry into its justification, provided a detailed record of inventory is available for review by the tax authorities. The need for a reserve in excess of this amount (e.g. for obsolescence, slow-moving-stocks) must be substantiated to the satisfaction of the tax authorities.

Capital gains

Capital gains derived from the sale of shares are tax-exempt. Capital gains from the sale of real estate are subject to a separately assessed real estate profit tax (*see the Other taxes section for more information*).

Dividend income

Liquidation proceeds are tax-exempt. Dividend income is tax-exempt for corporate investors (shareholders or beneficiaries), provided that the payment from 25% (or greater) participations is not tax deductible in the source country.

Interest income

Interest income is taxable and must be at arm's length if it is in respect to related parties (*for safe harbour rates, see Interest expenses in the Deductions section*).

Royalty income

Royalty income is subject to ordinary income taxation. Prior to 1 January 2017, a deduction of 80% was allowed on the net income from intellectual property (IP) rights (e.g. royalty income). With the tax law amendments that entered into force on 1 January 2017, the Liechtenstein IP box regime was abolished, with a phase-out period for existing IP boxes until 2020.

Income from investment funds

For corporate investors, income from investment funds is subject to corporate profit tax at a rate of 12.5%. Since units in investment funds do not constitute participations in legal persons, to the extent that investment funds in turn invest in participations in legal persons, dividends and capital gains (including non-realised capital gains) from such investments are tax-exempt. Since investment funds are subject to proper accounting rules, the net income shown in the financial statements provides for the taxable basis. If in practice, however, based on proper accounting, it is not possible to differentiate between income from dividends, capital gains, or interests, a simplified approach can be used to calculate the taxable basis for the fiscal year 2014 going forward. The simplified approach will be guided by the equity exposure of investment funds. Accordingly, the higher the investments in participations in legal persons are, the higher the lump sum tax exemption for dividends and capital gains will be.

Foreign income

Resident corporations operating locally are generally taxed on their worldwide income. However, income from foreign real estate and PEs situated abroad is exempt from taxation in Liechtenstein.

Deductions

Depreciation and amortisation

Depreciation of tangible fixed assets and amortisation of intangible assets is allowed if it is 'commercially justified'. For tax purposes, either the straight-line (depreciation based on the acquisition value) or the declining-balance method (depreciation based on the book value) may be used. Depreciation and amortisation not recorded in statutory accounts are not deductible for tax purposes.

A special (higher) rate of depreciation may be allowed for assets used only for short periods or for assets for which a rapid decrease in value can be proved.

The depreciation/amortisation rate *per annum* of various property types are provided below. Note that these depreciation rates relate to write-downs on the book value. If the write-down is performed on the acquisition value, then the rates enumerated below should be reduced by half.

Property type	Rate per annum (%)
Immovable assets:	
Real estate (dwelling houses, offices, shops, restaurant and hotel buildings, industrial buildings, factories, warehouses, and parking spaces)	5
Movable assets:	
Mobile structures, technical installations (air conditioning plant, gas and electricity mains for industrial purposes), elevators, investments in foreign real estate, high rack warehouses, and airplanes	15
Office furniture and machines, workshop, and storeroom equipment	20
Furniture used for the hotel and restaurant trade	25
Machines and accessories for production purposes, vending machines, telephone installations, and operating applications	30
Machinery used in more than one shift or used under heavy conditions, motor vehicles	35

Property type	Rate per annum (%)
Information technology (hardware and software), office furniture and machines, workshop and storeroom equipment, hotel and restaurant cookery, cutlery, and linen	50
Officially approved installations and equipment against water pollution, energy-saving equipment, and installations using solar energy	50
Intangible assets:	
Goodwill, patent, licence, and other rights of use	40

Start-up expenses

In general, the expenses for a start-up are tax deductible as long as they are economically justified.

Please see Formation tax (Gründungsabgabe) in the Other taxes section.

Interest expenses

Interest paid by a corporation to a third party is a deductible business expense. Interest paid to related parties (affiliates or shareholder) has to reflect the fair market rate and has to be at arm's length.

With respect to related parties, the tax administration of Liechtenstein annually issues safe harbour interest rates to be used on loans denominated in Swiss francs on the one hand and in foreign currencies on the other hand. The corporation may deviate from these safe harbour rates as long as it can prove that the rates are at arm's length and more appropriate in the present case.

Safe harbour rates 2018

Loans in Swiss francs	Minimum interest rate (%)
For loans made to related parties:	
Financed from equity and no interest-bearing debt capital	1.5
Financed from debt capital:	
Cost price	+ 0.5
At least	1.5

	Maximum interest rate (%)
For loans received from related parties	1.5

For loans in the following currencies, the same mechanism applies:

Currency	2018 (%)	2017 (%)	Currency	2018 (%)	2017 (%)
EUR	1.75	2.00	USD	3.75	3.75
GBP	2.75	2.75	JPY	1.50	1.75
SEK	1.75	1.50	NOK	2.75	2.75
CZK	2.75	2.00	PLN	3.75	3.50
AUD	4.00	3.50	HKD	3.25	2.75
CAD	3.75	2.50	ZAR	8.50	9.00

Furthermore, the tax authorities ask for an economic justification if loans are not in the currency of the statutory accounts.

Notional interest deduction (NID) on equity

The NID on equity is a standardised deduction for interest on equity based on the multiplication of the 'modified' equity by the interest rate (according to the annual finance law). For 2017 and 2018, the equity interest rate is 4%. Losses due to the NID are not accepted; consequently, a negative result due to this deduction does not generate loss carryforward.

To determine the modified equity, the following terms have to be considered:

- Paid-in capital and open reserves plus taxed hidden reserves, such as:
  - Deduction of own shares.
  - Deduction of participations/shares.
  - Deduction of non-operating related assets.
  - Deduction of 6% of total assets (except the above mentioned assets).
- Equity increases and decreases, based on the capital at the beginning of the business year.

	Example 1	Example 2	Example 3	Example 4	Example 5	Example 6
Modified equity	1,000,000	500,000	500,000	1,000,000	1,000,000	1,000,000
Loans	0	500,000	500,000	0	0	0
Profit	100,000	100,000	200,000	1,000,000,000	30,000	60,000
Interest on loans (4%)	0	(20,000)	(20,000)	0	0	0
Profit	100,000	80,000	180,000	1,000,000,000	30,000	60,000
Interest on equity (4%)	(40,000)	(20,000)	(20,000)	(40,000)	(40,000)	(40,000)
Taxable profit	60,000	60,000	160,000	999,960,000	0	20,000
Profit tax rate	12.50%	12.50%	12.50%	12.50%	12.50%	12.50%
Tax burden	7,500	7,500	20,000	124,995,000	0	2,500
Effective tax rate	**7.50%**	**9.38%**	**11.11%**	**12.50%**	**0.00%**	**4.17%**

According to the Liechtenstein Tax Act, modified equity is defined as the equity amount minus own shares, participations in corporations, and assets not operationally necessary.

In addition, modified equity must be further reduced by 6% of all assets qualifying for the NID. This means that, after deducting non-qualifying assets (own shares, participations, non-operating assets), an additional deduction of 6% on the remaining assets has to be made.

Furthermore, if a related-party loan has an interest rate below the level of the NID of 4%, the difference in the amount has to be deducted from the modified equity. However, no deduction has to be made if the loan arises from the operating business of the company.

Provisions

Bad debt provision

It is admissible to set up an accounting provision for specific impaired debt; additionally, it is possible to account for a general bad debt provision of up to 10% on receivables from Liechtenstein and Switzerland and up to 15% on receivables from any other country if no specific provision has been accounted for the corresponding debt. These provisions are not accepted regarding receivables to corporations and institutions under public law, banks, or for inter-company receivables.

Inventory provision

See Inventory valuation in the Income determination section for a description of the inventory provision regime.

Provisions on financial investments

Provisions on financial investments are possible but must be proved by an established corporate evaluation method or other suitable documents.

Other provisions

Provisions at the expense of the profit and loss statement are admissible for obligations during the business year whose amount is not yet determined or for other immediately imminent losses during the business year.

Charitable contributions

Charitable contributions to legal persons and special asset dedications with domicile in Liechtenstein, in another country member of the European Economic Area (EEA), or in Switzerland, which are exempt from tax liability in light of exclusively and irrevocably common-benefit purposes, are deductible, up to the amount of 10% of the taxable corporate net income.

Deduction for income from intellectual property (IP)

With the tax law amendments that entered into force on 1 January 2017, the Liechtenstein IP box regime was abolished with a phase-out period for existing IP boxes until 2020.

Prior to 1 January 2017, a deduction of 80% was allowed on the net income from IP rights that was created or acquired after 1 January 2011. IP rights, in the sense of the tax law, consisted of patents, supplementary protection certificates, utility models, trademarks, and designs, which must be protected by registration in a national, foreign, or international Register, as well as software and technical/scientific databases.

The Liechtenstein IP box was approved by the European Free Trade Association (EFTA) Surveillance Authority (ESA).

Fines and penalties

Fines and penalties are not tax deductible, provided the penal nature predominates.

Taxes

Taxes are not deductible in Liechtenstein.

Net operating losses

A loss can be carried forward and offset against the profits for future years. There is no time limitation of loss carryforwards as well as loss offsetting. Losses cannot be carried back.

The loss carryforward is limited to 70%. The other 30% can still be carried forward indefinitely. As a consequence, 30% of the taxable profit is subject to annual taxation even if corresponding losses from previous years exist.

Losses from foreign PEs and group loss offsetting

Losses from a foreign PE can be offset with taxable net corporate income to the extent these losses were not already taken into account in the country where the PE is situated or in another country. If that PE records profits in the following years, these profits need to be added to taxable net corporate income again. The period a loss can be carried forward is limited up to five years. Afterwards, the losses will be added if not yet added to the taxable profit due to foreign loss offsetting. The same limitation of loss carryforward applies to group taxation as well.

Payments to foreign affiliates

Interest, royalties and licences, and other fees to foreign affiliates are allowed as deductions to the extent that they meet the arm's-length test (i.e. equivalent to charges that would be made by an unrelated third party).

For interest payments between affiliated companies or between shareholders and companies, Liechtenstein tax authorities publish safe harbour rules annually (i.e. generally accepted interest).

Group taxation

Resident and non-resident corporations have the possibility to opt for group taxation (i.e. tax group) if they meet the legal requirements (e.g. more than 50% of capital and 50% of voting rights). The ultimate group leader must either be a corporation domiciled in Liechtenstein or with the effective place of management in Liechtenstein.

In order to form multi-level group structures, sub-groups may also be built. The same rules are applicable for the group leader of the sub-group as for the primary group leader.

A written application for forming a tax group must designate the group leader and group members to be filed with the tax authorities. It is not necessary that all associated companies have to become group members. The group leader can decide, for each company that fulfils the conditions, which company will be included in the group or not. The group leader and the group members need to have uniform business years.

Losses of group members can be offset against profits of the (sub) group leader within the same year. The offsetting is only possible under the following conditions:

- Only losses incurred after the option for group taxation can be considered.
- Losses need to be calculated according to Liechtenstein profit calculation rules.

The losses are allocated to the (sub) group leader according to the direct participation quota of the (sub) group leader to the group member whose losses should be offset. If the losses cannot be used at the level of the (sub) group leader, they can be allocated to other group members. However, the minimum tax is applicable for each group member.

Losses that have been attributed to the (sub) group leader must be adjusted in the following cases:

- Losses can be offset against profits on the level of the group member.
- Exit of group member from the group.
- Reduction of participation quota of a group member.
- Depreciation is made on a participation due to losses.

The (sub) group leader must provide evidence annually that no adjustment needs to be made. Even if the conditions for adjustment are not fulfilled, losses that have been attributed to the (sub) group leader must be adjusted five years after attribution.

Transfer pricing

Until 1 January 2017, Liechtenstein did not have specific transfer pricing rules apart from the rule that intra-group transactions are carried out at arm's-length terms. However, since the tax law amendments entered into force on 1 January 2017, all companies will be obligated to provide, upon request by the tax authorities (i.e. no periodical filing), documentation regarding the adequacy of transfer prices of transactions with related companies or PEs. Large companies have to prepare the transfer pricing documentation based on an internationally accepted standard. If a company exceeds at least two of the following three criteria, it qualifies as a large company (based on Liechtenstein company law):

- Total assets of CHF 25.9 million.
- Net revenue of CHF 51.8 million.
- Annual average of 250 full time employees.

Small companies (i.e. not exceeding two of the above criteria) are not required to prepare transfer pricing documentation in accordance with an international accepted standard.

Country-by-country (CbC) reporting

The CbC reporting law entered into force on 1 January 2017. CbC reporting is applicable for Liechtenstein group holding companies with a consolidated turnover of at least CHF 900 million. The legal basis of the CbC reporting law is the Convention on Mutual Administrative Assistance in Tax Matters (MAC). The MAC entered into force on 1 December 2016 and is applicable for tax years starting 1 January 2017.

Thin capitalisation

Liechtenstein does not have thin capitalisation rules.

Controlled foreign companies (CFCs)

Liechtenstein does not have specific CFC rules. However, legal or actual structures that appear inappropriate to the economic circumstances and whose sole economic purpose consists in attaining tax advantages are considered abusive if:

- the granting of this tax advantage would violate the object and purpose of the tax law, and
- the taxpayer is unable to present any economic or other substantial reasons for the choice of this structure and if the structure does not yield any independent economic consequences.

Tax credits and incentives

The following tax incentives are currently applicable:

- Profit tax exemption for corporations that have an irrevocable charitable, cultural, or ideal purpose without commercial activity.
- Profit tax exemption of dividend income and capital gains on shares/participations (especially interesting for holding companies).
- NID on equity (*see the Deductions section*).
- Private asset structure (PAS).

Private asset structure (Privatvermögensstrukturen or PAS)

Liechtenstein offers tax privileges for PASs. A PAS must not conduct any economic activity. The purpose of a PAS is limited to acquiring, holding, administrating, and selling financial instruments according to the Liechtenstein assets management law as well as cash and bank accounts. Participations may only be held if it can be proved that the shareholders or beneficiaries have no influence on the administration of this company.

The articles of the PAS must contain a clause that the regulations for PASs are applicable. Exemptions of this rule are applicable for legal entities that existed before the introduction of the tax law as of 1 January 2011.

The investors of a PAS must be individuals who administrate their own assets or structures acting in the interest of individuals.

The company or the audit company needs to confirm, upon formation or after major changes, that the conditions for the PAS structure are fulfilled. This is supervised by the tax authorities or a neutral certified accountant.

A PAS only pays the minimum tax of CHF 1,800 annually.

This tax scheme was qualified as in conformity with the provisions on state aid set out in Article 61 of the Agreement on the European Economic Area by the ESA.

Avoidance of double taxation

Foreign taxes shall be allowable against domestic taxes (credit method) under circumstances where (i) the income is derived or wealth is owned in a country that has concluded an agreement for the avoidance of double taxation with Liechtenstein and such agreement provides for a tax credit or (ii) reciprocity is granted. Income or wealth shall be exempted from taxation in Liechtenstein (exemption method) if the agreement for the avoidance of double taxation provides tax exemption or if reciprocity is granted.

Withholding taxes

Liechtenstein does not levy any WHTs.

Tax treaties

Currently, a comprehensive DTT on income is in effect with Andorra, Austria, Czech Republic, Georgia, Germany, Guernsey, Hong Kong, Hungary, Iceland, Luxembourg, Malta, Monaco, San Marino, Singapore, Switzerland, the United Arab Emirates, the United Kingdom (UK), and Uruguay.

Liechtenstein has concluded tax information exchange agreements (TIEAs) with the following governments: Andorra, Antigua and Barbuda, Australia, Belgium, Canada, China, Denmark, Faeroe Islands, Finland, France, Germany, Greenland, Iceland, India, Ireland, Italy, Japan, Mexico, Monaco, Netherlands, Norway, St. Kitts and Nevis, St. Vincent and the Grenadines, South Africa, Sweden, the United Kingdom, and the United States.

Tax administration

Taxable period

The tax year corresponds with the business year. Consequently, the applicable accounting period, which may end at any date within the calendar year, is the basis for corporate taxation.

Tax returns

Corporations resident in Liechtenstein or with PEs in Liechtenstein must file a tax return by 1 July of the calendar year following the fiscal year-end.

Due to a substantiated written request, the tax authorities may extend the submission deadline by six months. A deadline extension requires the payment of the provisional invoice. In especially justified cases, the submission deadline may be extended once again. Such a request must be made before expiry of the first deadline extension.

The tax assessment issued by the tax administration is based on the company's tax return, including the attachments and the financial statements filed.

Payment of tax

Companies must pay tax within 30 days of receipt of the assessment. The defaults charge rate is 4%.

Tax audit process

Generally, the Liechtenstein tax system is based on self-assessment. In the past, the Liechtenstein tax authorities assessed an entity based on the documents and information provided by the entity itself and additional documents or explanations requested by the tax authorities. Currently, however, the Liechtenstein tax authorities aims to carry out external tax audits in-house. However, due to limited resources, profit tax audits happen rarely.

Statute of limitations

The limitation of the right to assess a tax is five years, starting after the end of the tax year in terms of periodic tax and after the end of the year in which the taxable incidence had taken place in terms of non-periodic tax. The tax claims, in any case, are prescribed ten years after the end of the year in which the taxes have been assessed on a final basis.

Topics of focus for tax authorities

The tax authorities especially focuses on payments between affiliated companies (e.g. inter-company loans). Furthermore, all provisions and depreciations will be checked under the premise of economic necessity.

Other issues

Restructurings

Restructurings (e.g. change of corporate form, merger, spin-off) can be carried out tax neutrally, provided certain conditions are met.

All restructurings have in common that they can only be carried out tax neutrally if they are performed at tax book value and if the assets remain taxable within Liechtenstein. Furthermore, specific/additional conditions must be met for each kind of restructuring.

Foreign Account Tax Compliance Act (FATCA)

A Model 1 intergovernmental agreement (IGA) for the implementation of FATCA was signed between the governments of Liechtenstein and the United States on 16 May 2014.

Under the Model 1 IGA, Liechtenstein financial institutions will be required to report to local tax authorities on the accounts of US citizens. The Liechtenstein tax authorities will then send the tax information to the US Internal Revenue Service (IRS).

Automatic information exchange

Liechtenstein, *inter alia*, has committed to implement the Common Reporting Standard (CRS) for automatic exchange of tax information, which the G20 Finance Ministers endorsed on 23 February 2014. Accordingly, Liechtenstein belongs to the group of early adopters leading to the first automatic information exchanges in 2017 for the year 2016. The Liechtenstein Parliament passed the law on the automatic exchange of information (AIA law), with various amendments to the Liechtenstein Tax Act, on 6 November 2015. The AIA law corresponds mainly with the OECD CRS and shall introduce a uniform standard for exchanging tax information with tax authorities of other countries. The AIA law entered into force on 1 January 2016.

Significant developments

The following changes to the Law on Corporate Income Tax (CIT) entered into force as of 1 January 2018:

- Collective investment undertakings are recognised as taxable units for CIT purposes, and all of their income can be non-taxable if certain conditions are met.
- Capital gains derived from the transfer of shares in collective investment undertakings are treated as non-taxable income, provided that those collective investment undertakings are not registered or otherwise organised in blacklisted territories and/or are not residents of such territories.
- For the first year of operations, 0% CIT rate is applied for the small entities employing fewer than ten employees and with annual turnover not exceeding 300,000 euros (EUR) per tax period (in subsequent periods, 5% CIT rate is applied for such entities).
- Companies implementing investment projects are entitled to fully reduce their taxable profit by actually incurred acquisition costs of long-term assets meeting certain requirements (previously, the profits might have been reduced by up to 50% of such costs).
- A new incentive for companies investing into research and development (R&D) was presented. Such companies now have the possibility to not only deduct the expenses incurred for R&D works from the taxable income three times, but they are also entitled to apply the reduced 5% CIT rate on the profit deriving from the commercial exploitation of patented inventions.
- The deduction of only 50% of representation expenses is allowed (previously, 75% of representation expenses were attributable to deductible expenses for CIT purposes). Moreover, deductible representation expenses shall not exceed 2% of the company's income during the tax period.
- Proceeds from the sale of shares are tax exempt if more than 10% of the voting shares were held for not less than two years (previously, the required percentage of voting shares to be held was 25%).

On 7 June 2017, Lithuania signed the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting (BEPS) Multilateral Instrument (MLI); however, it has not been ratified yet. Lithuania has decided to apply Article 7(4) and option B under Article 13(1) of the MLI. It is planned to ratify the MLI and modify the Double Tax Treaties (DTTs) in 2018.

Please note this information is current as of 1 June 2018. Typically, pending legislation is announced in June or July. Please visit the Worldwide Tax Summaries website at *www.pwc.com/taxsummaries* to see any significant corporate tax developments that occurred after 1 June 2018.

Taxes on corporate income

The standard CIT rate is 15%. However, small companies and agricultural companies can apply a reduced CIT rate of 0% or 5% if certain conditions are met.

Generally, CIT is applied on taxable income received by a Lithuanian tax resident from its local and worldwide activities. Taxable income is calculated by reducing general income of a certain tax period with deductible expenses and non-taxable income.

Income of a tax resident company is not subject to taxation in Lithuania if it was received from activities through a permanent establishment (PE) in a foreign country that is in the European Economic Area (EEA) or that has a DTT with Lithuania and if the income was subject to taxation there.

Furthermore, CIT may be reduced or even not applied if foreign-sourced income received not through a PE is taxed with a withholding tax (WHT) in a foreign country and this country has a DTT with Lithuania.

Non-resident companies are generally taxed on Lithuania-sourced income received through a local PE and reduced by deductible expenses or on income subject to WHT in Lithuania.

Reduced CIT rate for small companies

Entities with fewer than ten employees and less than EUR 300,000 in gross annual revenues can benefit from a reduced CIT rate of 5%. From 1 January 2018, the CIT rate is reduced to 0% for the first year of operations if certain conditions are met.

CIT regime for certain maritime activities

The rate of CIT on certain maritime activities is 15%, with the base set by reference to the functional capacity of the ship. This fixed CIT may be applied to maritime entities that fulfil certain conditions indicated in the law. An election must be made to the tax authorities to apply this regime.

Local income taxes

There is no local or municipal CIT in Lithuania.

Corporate residence

A company is resident in Lithuania if it is incorporated there or its activities create a PE for tax purposes.

Permanent establishment (PE)

According to local legislation, a foreign company is deemed to have a PE in Lithuania when:

- it permanently carries out commercial activities in Lithuania in whole or in part
- it carries out its activities through a dependent representative (agent)
- it uses a building site or construction, assembly, or equipment objects, or
- it uses equipment, including drilling installations and ships, for exploration or extraction of natural resources.

DTTs may establish different rules of PE recognition. According to domestic law, where there is a DTT, the provisions of the treaty take precedence.

A PE must be registered as a taxpayer with the tax authorities in the territory where its activities are carried out. Its profits are subject to CIT at the rate of 15%.

Other taxes

Value-added tax (VAT)

Supply of goods and services for consideration within the territory of Lithuania, performed by a taxable person engaged in economic activity, is subject to VAT in Lithuania.

The standard VAT rate is 21%.

The reduced rate of 9% applies to:

- Books and publications.
- Public transport services.
- Supply of heating to residential premises and supply of hot water.
- Accommodation services (applicable until 31 December 2022).

The reduced rate of 5% applies to:

- Technical aid devices and their repair services for the disabled.
- Pharmaceuticals and medical aid devices compensated by the state (under certain conditions).
- Not compensated prescription drugs.

Supply of goods exported outside of the European Union (EU) as well as supply of goods to VAT payers registered in another EU member state is subject to VAT at the rate of 0% (exempt with credit). There are other supplies of goods and services that are exempt with credit (e.g. goods and services for vessels and aircraft, transportation and linked services related to export or import of goods).

In order to apply zero-rated VAT on goods carried out from Lithuania, VAT payers must hold supporting documents as evidence that these goods were actually exported from the European Union or carried out from Lithuania to another EU member state.

Goods and services that are exempt without credit include, but are not limited to, the following:

- Supply of goods/services related to health care.
- Social services supplied by non-profit entities.
- Education and training services.
- Cultural and sports services rendered by non-profit entities.
- Services provided by political parties, trade unions, and other non-profit membership based legal entities to their members, meeting certain requirements.
- Services provided by religious communities, other communities, and centres to their members, meeting certain requirements.
- Postal services.
- Radio and TV broadcasting services provided by non-profit legal entities.

- All types of insurance and re-insurance services.
- Financial services meeting certain requirements (option to tax may be exercised for some financial services).
- Lotteries and gambling.
- Rent or sale of immovable property (option to tax may be exercised, certain conditions apply).
- Supply of goods where the VAT payer has not deducted any proportion of the VAT on purchases and/or importation thereof (certain conditions apply).

Sale and contribution in kind of a business or part of a business is treated as being out of scope of VAT (under certain conditions).

Customs duties

EU customs law is applicable in full.

EU customs law, also known as the Union Customs Code, compiles the rules, arrangements, and procedures applicable to goods traded between the European Community and non-member countries. The Union Customs Code indicates an obligation on a person to pay the amount of the import or export duties that apply to specific goods under the Community provisions in force. The application of the EU customs law means that:

- trade between Lithuania and other EU countries is customs-free
- imports from non-EU countries are subject to EU customs tariffs, and
- numerous free trade agreements concluded between EU and non-EU countries apply to Lithuania.

Excise taxes

Excise duty is imposed on the following goods produced in or imported into Lithuania: ethyl alcohol and alcoholic drinks, including beer and wine; processed tobacco, including cigarettes, cigars, cigarillos, and smoking tobacco; energy-related products, including petrol, kerosene, gasoline, fuel oil, lubricating oils, natural gas, and their substitutes and additives; coal, coke, and lignite; and electricity. The tax rate depends on the type and quantity of goods.

Land tax

Lithuanian and foreign entities are subject to land tax collected by the municipalities for the land they own in Lithuania. Roads for general use and forestland are exempt. The assessment and payment terms are set forth by the municipalities, which are also entitled to grant land tax incentives.

The annual land tax rate ranges from 0.01% to 4%, depending on local municipalities. Please see the table below describing the main features of the land tax:

Tax rate	0.01% to 4%, defined by municipality.
Taxable value	The average market value determined in the map of values established according to the mass valuation.
	The mass valuation is performed not rarer than every five years.
	A possibility to apply the value determined during the individual valuation if it differs from the market value by more than 20% (principles are similar to real estate tax).

Declaration	Template of a tax return is completed and sent by the tax authorities until 1 November.
Payments	One annual payment due 15 November.

Land lease tax

State-owned land that is leased for Lithuanian and foreign companies is subject to land lease tax at a rate established by the municipalities. The minimum tax rate set by the government is 0.1%, and the maximum rate is 4% of the value of the land.

Real estate tax

The real estate tax rate ranges from 0.3% to 3%. Tax is levied on the value of real estate owned by individuals and used for commercial purposes or owned by legal entities (with certain exemptions). Municipal councils establish a specific tax rate for real estate situated in their territories annually.

State duties (stamp taxes)

There are no stamp duties applied in Lithuania; however, minor fees for the services of state institutions, such as the issuance of documents having legal force and other deeds, may apply (e.g. notary fees apply on share purchase agreements [SPAs] meeting certain criteria).

Payroll taxes

Employers should withhold personal income tax (PIT) at the flat rate of 15% from the employee's salary.

There are no additional payroll taxes applicable to an employer other than the employee's and employer's social security contributions and the employer's contributions to the Guarantee Fund and to the Long-term Employment Fund (*see below*).

Social security contributions

The standard rate of social security contributions ranges from 30.48% to 32.1% for employers and is 9% for employees. At present, there are no upper limits set for social security contributions on employment-related income. However, social security contributions must be paid on the official minimum monthly salary amount in force regardless of the fact that an employee receives lower salary (not applicable when an individual is employed in another company, receives an old age pension benefit, or is not older than 24 years).

Contributions to the Guarantee Fund and Long-term Employment Fund

Contributions to the Lithuanian Guarantee Fund are calculated by employers at a rate of 0.2% on the gross salary payable to employees. The Guarantee Fund provides support to employees in case of employer's bankruptcy.

Employers also pay an additional contribution to the Long-term Employment Fund amounting to 0.5% on employee remuneration in order to entitle the individuals to receive payment from this fund if their employment agreement is terminated upon employer's initiative without employee's fault (special conditions apply).

Environmental tax

Environmental tax is imposed on pollutants discharged into the environment, dumped waste, a few specified products (e.g. tyres, batteries), and certain types of packaging.

Tax on natural resources

A tax on natural resources is payable on the value of extracted natural resources.

Branch income

A branch of a foreign company is defined as a structural subunit of a foreign company that has an establishment in Lithuania and is entitled to engage in commercial activities in Lithuania as well as conclude contracts and undertake obligations according to the power of attorney issued to the branch by its founder. A branch does not have the status of a legal person. It is taxed in the same manner as a PE (*see the Taxes on corporate income section*).

Income determination

Inventory valuation

Under domestic accounting legislation, stock used in the production and included in the cost of produced goods is valued in the financial statements by the first in first out (FIFO) method. The last in first out (LIFO), weighted-average, progressive-average, actual-price, or another method that corresponds to the stocks' movement can also be used. However, the method used must be disclosed in the notes to the annual accounts, and, among other things, the note must report the profit that would have been calculated if the FIFO method of valuation had been used. For CIT purposes, usage of another method than FIFO should be approved by the tax authorities.

Capital gains

Capital gains are taxed as part of the corporate profit of the enterprise.

Capital gains are treated as non-taxable income when they are derived from the transfer of shares in a company incorporated in the European Economic Area or in a country with which Lithuania has a valid DTT and that pays CIT or an equivalent tax. This holds true if the Lithuanian holding company holds more than 10% (before 1 January 2018, more than 25%) of voting shares for a continuous period of (i) at least two years or (ii) at least three years when the shares were transferred in one of the established forms of reorganisation. Certain restrictions apply.

As of 1 January 2018, capital gains derived from the transfer of shares/units in collective investment undertakings are treated as non-taxable income, provided that those collective investment undertakings are not registered or otherwise organised in blacklisted territories and/or are not residents of such territories.

Dividend income

The receiving company does not include the dividends received from other entities in its taxable income.

Interest income

Interest income is treated as general taxable income and is subject to 15% CIT.

Royalty income

Royalty income is treated as general taxable income and is subject to 15% CIT.

Exemptions from taxable income

The following additional types of income are exempt from CIT:

- Insurance indemnity not in excess of the value of lost property or other losses or damages, the refunded part of insurance premiums in excess of the premiums deducted from income in accordance with the procedure established, and the part of insurance indemnity in excess of the premiums deducted from income in accordance with the procedure established.
- Proceeds of a bankrupt company received from sale of its property.
- The balance of the formation fund of an insurance company as prescribed by the law on insurance.
- Income of collective investment undertakings and venture capital and private entity funds, except from the income received from the companies registered or otherwise organised in blacklisted territories or residents of such territories.
- Income derived by health care institutions for their services that are financed from the funds of the Compulsory Health Insurance fund.
- Income derived from revaluation of fixed assets and liabilities as established by laws and regulations, except for income derived from the revaluation of derivative financial instruments acquired for hedging purposes.
- Default interest, except for that received from foreign companies registered or otherwise organised in blacklisted territories or residents of such territories (*see Blacklisted territories in the Deductions section*).
- All or part of the profit gained from legal entities of unlimited civil liability that are payers of CIT and with income that is subject to CIT under the law or to a similar tax under respective statutes of foreign countries, with certain exceptions.
- Fees collected by seaports and airports, charges for air traffic navigation services, and funds collected from the lease of seaport-owned land.
- Results arising from adjustments made for the previous tax periods as prescribed by the law on accounting.
- Indemnification for damages received by the company, with certain exceptions.
- Compensation received according to the Lithuanian programmes of the EU financial support relating to taking fishing ships for scrap.
- Life insurance payments received by insurance companies, provided the term of the life insurance policy is valid for not less than ten years or at the date of the receipt of the insurance benefit the recipient has reached the pension age in accordance with the additional law on pensions. Additionally, life insurance investment income of insurance companies, except for dividends and other distributable profit, is exempt along with investment insurance income of insurance companies received according to the contracts of life insurance occupational pensions concluded in accordance with the law on accumulation of occupational pensions.
- Direct and other compensational allowances that are received by units performing agricultural activities to maintain their level of income, which meet the requirements established in the laws and other legal acts of Lithuania.

Foreign income

Income is not subject to taxation in Lithuania if it was received from activities through a PE in a foreign country that is in the European Economic Area or that has a DTT with Lithuania and if the income was subject to taxation there. Since such income is not subject to taxation in Lithuania, costs related to the income cannot be deducted from income that is subject to taxation in Lithuania.

Deductions

Allowable deductions include all the usual costs that an entity actually incurs for the purpose of earning income or receiving economic benefit unless the law on CIT provides otherwise.

Depreciation

Tangible and intangible assets may be depreciated using a directly proportional (straight-line) depreciation method, a production depreciation method, or a double-declining-balance depreciation method. Depreciation may not exceed maximum rates established by the law. For certain typical assets, depreciation rates relevant for tax purposes are shown in the chart below:

Asset	Depreciation period (years)	Annual depreciation rate (%)
New buildings used for business activities	8	12.5
Residential buildings	20	5
Plant and machinery	5	20
Trucks (not older than 5 years)	4	25
Computer and communications equipment	3	33.3
Software	3	33.3

Goodwill

Goodwill can be amortised for tax purposes using a straight-line method over 15 years after a merger of a purchasing company and an acquired company, provided that certain conditions are met.

Start-up expenses

Generally, startup expenses are deductible for tax purposes.

Interest expenses

Interest expenses are generally deductible for tax purposes. Interest expenses should be generally recognised as non-deductible for tax purposes if, after acquisition, a purchasing company and an acquired company are merged and debt used for acquisition of shares is pushed down to the acquired company (possibility to deduct interest after merger remains only if certain conditions are met, e.g. economic benefit for surviving entity from such exercise is substantiated).

Interest paid to related parties may be non-deductible for tax purposes if thin capitalisation rules are infringed and the interest rate on a debt from the related party does not correspond to a fair market interest rate (*see Transfer pricing and Thin capitalisation in the Group taxation section*).

Bad debts

Bad debts are deductible only if proved that they cannot be recovered and specific criteria are met. Provisions are non-deductible.

Charitable contributions

Generally, double the amount of donation/sponsorship can be deducted for tax purposes (i.e. 200% deduction is available) but only if donation/sponsorship was provided to registered recipients and only up to a limit of 40% of taxable result before deduction of donation/sponsorship and utilisation of tax losses carried forward.

Fines and penalties

Fines and penalties are generally non-deductible for tax purposes.

Taxes

All taxes, fees, and other compulsory payments to the state budget are deductible for CIT purposes, except VAT and CIT paid to the budget. Note that VAT can be treated as deductible for CIT purposes if it is treated as fully or partly non-deductible for VAT purposes and this input/import VAT relates to deductible expenses.

Other significant items

Limited deductible expenses also include the following:

- Maintenance, repair, and reconstruction expenses of tangible fixed assets: If the repair or reconstruction increase the service period and improve the qualities (useful characteristics of the fixed assets), the value of repair or reconstruction shall be added to the acquisition value of the tangible fixed assets.
- Business travel expenses: Deductible with restrictions.
- Advertising and representation expenses: As of 1 January 2018, 50% of representation expenses not exceeding 2% of the company's income for the tax period are deductible (previously, a 75% limit was applied).
- Natural losses: Deduction limited to not more than 1% (3% for fresh fruits, vegetables, and some other cases) of turnover.
- Contributions and expenses for the benefit of employees: Deductible with restrictions.
- Special provisions of credit institutions and insurance companies: Calculated according to the methods established by the Bank of Lithuania and the Commission of Insurance Supervision.
- Membership fees, contributions, and premiums: Deductible with restrictions.

Non-deductible expenses also include the following:

- Default interest (forfeit), fines, and late interest paid to the state budget as well as other sanctions imposed for violations of laws and regulations of Lithuania.
- Interest or any other indemnity paid due to non-performance of contractual obligations by related parties.
- Amount of the limited deductible expenses in excess of the established limits.
- Expenses attributed to allowable deductions more than 18 months past, although the payments for goods or services supplied by the entities registered or otherwise organised in blacklisted territories (*see below*) have not been made.
- Sponsorship and gifts that do not correspond to the requirements of CIT law.
- Payments to blacklisted territories (*see below*) if they are not verified and payments are not subject to WHT.
- Indemnification for damages inflicted by the entity.
- Dividends or otherwise distributed profits.

- Other expenses not related to the deriving of income and not attributed to operating activities of the entity, as well as the expenses that are not considered allowable deductions under the law.
- Amounts resulting from adjustments and corrections of errors of previous tax periods.
- Expenses related to revaluation of fixed assets and securities, except for financial instruments acquired for hedging purposes.
- Expenses incurred while earning non-taxable income.
- Expenses related to income from certain international maritime activities if a maritime entity chose to apply a fixed CIT.

Net operating losses

Operating losses may be carried forward for an indefinite period, provided that certain requirements are met.

Current year operating losses can be transferred to another legal entity of the group if certain conditions are met.

Losses incurred due to the transfer of securities and/or derivative financial instruments may be carried forward for five years (indefinitely for financial institutions).

Reduction of taxable profit by accumulated tax losses is limited to 70% of the taxable profit for the current year (except for entities that are subject to the reduced CIT rate of 5%). The rest of the accumulated tax losses can be carried forward for an unlimited period of time.

No carryback of losses is available in Lithuania.

Payments to foreign affiliates

Payments to foreign affiliates (e.g. interest, royalties, management fees, fees for other services) are deductible for tax purposes if the payment serves a business purpose, provides a benefit to the payer, is at arm's length, and is substantiated by sufficient documentation. Payments to foreign affiliates may also be subject to various WHTs. Certain payments to affiliates located in tax haven (blacklisted) countries are subject to a 15% WHT rate.

Blacklisted territories

A blacklisted territory is a foreign country or territory that is included on a list of offshore territories established by the Minister of Finance that meets at least two of the following criteria:

- Similar tax rate in such territory is below 75% of that set in the Lithuanian CIT law.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the parent company (controlling entity) is registered or otherwise organised.
- In such territory, different rules for levying a similar tax are applied, depending on the country where the business is conducted.
- The company (the controlled taxable entity) has entered into agreement with the tax administrator of that territory with regard to the application of a tax rate or tax base.
- There is no effective exchange of information in such territory.

- There is no financial and administrative transparency in such territory, the tax administration rules are not quite clear, and the application thereof is not communicated to tax administrators of other countries.

A list of 58 offshore territories has been published. With certain exceptions specified in the law, all payments to offshore companies or their branches for any work or services, commodities, interest on funding, insurance premiums, guarantees, etc. are non-deductible for CIT purposes unless the Lithuanian entity provides evidence to the state tax authorities that:

- the payments are related to usual activities of the paying and the receiving business entities
- the receiving foreign business entity manages the property necessary to carry out such usual activities, and
- there is a connection between the payment and the economically grounded business operation.

Group taxation

Group taxation legislation and regimes are not available in Lithuania. Each Lithuanian entity is regarded as a separate taxpayer and may not deduct tax losses accumulated from previous tax periods at the level of any other group entity.

Transfer of current year operating tax losses incurred to an entity of the same group of companies is allowed if certain requirements are met.

Transfer pricing

All transactions between associated parties must be performed at arm's length. The tax authorities have a right to adjust transaction prices if they do not conform to market prices.

The Lithuanian rules refer to the Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations established by the Organisation for Economic Co-operation and Development (OECD) to the extent that they do not contradict with the domestic rules.

According to the Lithuanian transfer pricing regulations, companies may apply the following methods, although traditional methods should be given preference:

- Comparable uncontrolled price method.
- Resale price method.
- 'Cost plus' method.
- Profit split method.
- Transactional net margin method.

All entities with an annual revenue exceeding EUR 2.9 million, as well as all banks, insurance companies, and credit institutions, are required to prepare transfer pricing documentation in a specifically prescribed form. The documentation may be in a foreign language, but has to be translated to Lithuanian upon request.

Penalties, amounting from EUR 1,400 to EUR 4,300, for non-compliance with the transfer pricing documentation procedures for transactions between associated persons can be imposed. For a repeated breach, penalties can amount from EUR 2,900 to EUR 5,800.

Advance pricing agreements (APAs) and binding rulings are available in Lithuania. Taxpayers can apply for an APA or a binding ruling from the Lithuanian tax authority in respect of future transactions.

Decisions in the form of a binding ruling or APA will be issued by the Lithuanian tax authority regarding the application of tax legislation provisions and pricing principles. The above-mentioned decisions will be particularly relevant to companies planning to undertake new transactions where the taxation principles of such transactions are not clearly defined in the tax legislation and to international companies planning to perform significant transactions with associated parties.

Country-by-country (CbC) reporting

In 2017, the Lithuanian tax authorities approved rules that apply the CbC reporting obligation to multinational enterprises with consolidated revenue of over EUR 750 million. According to the approved rules, the CbC report must be submitted within 12 months after the last day of the taxpayer's financial year. The first CbC report must be submitted no later than the end of the first quarter of 2018.

The CbC report can be submitted in parts, and it will be considered to be submitted when the last part of the CbC report is submitted. The reports will be submitted electronically through the systems developed by the Lithuanian tax authorities.

The Lithuanian rules on the preparation and submission of the CbC report also provide that the CbC reporting notification (i.e. information for the Lithuanian tax authorities about the legal entity filing the CbC report on behalf of the multinational group of companies) is to be submitted in a free form by the end of the Lithuanian company's financial year. Lithuanian tax authorities confirmed that the notification for the years 2016 and 2017 should be submitted by 31 December 2017 (if the financial year matches calendar year).

Thin capitalisation

The Lithuanian thin capitalisation rules apply in respect to borrowings from related parties as well as borrowings from third parties guaranteed by related parties. The controlled debt-to-fixed-equity ratio is 4:1. The above provisions do not apply if a Lithuanian company can prove that the same loan under the same conditions would have been granted by a non-related entity.

Controlled foreign companies (CFCs)

Positive income of a CFC, i.e. income not derived from operating activity (including interest, royalties, leasing, dividend income, etc.), shall be included in the taxable income of a controlling Lithuanian company if a CFC is established or organised in a country that is:

- a blacklisted territory (*see Blacklisted territories in the Deductions section)*
- on the 'white' list of countries as defined by the Ministry of Finance but is eligible for special CIT or an equivalent tax relief in a country of establishment, or
- neither on the 'white' list nor on the 'black' list of countries and is subject to a CIT or an equivalent tax lower than 11.25% in a country of establishment.

Certain other conditions apply.

A Lithuanian company may reduce tax payable in Lithuania by the tax paid in a foreign country on the positive income of CFC included in the tax base of that Lithuanian company.

Tax credits and incentives

Foreign tax credit

A company may reduce tax payable on certain foreign-sourced income in Lithuania by taxes paid on that income in a foreign country if that Lithuanian company has received appropriate notice from that foreign country. The tax credit may not exceed the CIT rate payable in Lithuania.

Investment project incentive

As of 1 January 2018, entities involved in an investment project are able to reduce their taxable profits by up to 100% of the actually incurred acquisition costs of long-term assets meeting certain requirements (previously, a 50% limit was applied). Please note that depreciation (amortisation) expenses of such assets shall be deducted in a common manner.

Taxable profits can be reduced by such costs incurred from 2009 to 2023.

This relief is applied to the following categories of fixed assets:

- Machinery and equipment.
- Computer and communication equipment.
- Software and acquired intellectual property (IP) rights.
- Lorries, trailers, and semi-trailers.

The costs exceeding the above-mentioned 100% limit can be carried forward for four years.

There are certain criteria defining what could be considered an investment project. The project should be precisely described to meet the criteria allowing a company to use the tax relief.

Tax relief for research and development (R&D)

Expenses, except for fixed assets' depreciation (amortisation) expenses, incurred for R&D purposes can be deducted three times in the tax period when they are incurred, provided that R&D works performed are related to ordinary business activities.

A company applying tax relief for R&D has to prepare R&D documentation. This documentation has to cover the performed project, substantiate conformity with certain tax requirements, and specify the amount of expenses for R&D activities.

As of 1 January 2018, a new tax incentive for companies investing into R&D was introduced. Such companies have the possibility to not only deduct the expenses incurred for R&D works from the taxable income three times, but they are also entitled to apply the reduced 5% CIT rate on the profit deriving from the commercial exploitation of patented inventions.

Funds granted for producing a film or a part of a film

Funds granted for producing a film or a part of a film can be deducted from taxable income and from CIT payable due during the period of 2014 to 2018 if the following conditions are met:

- The film meets the criteria of cultural substance and evaluation of the production.
- Not less than 80% of the film production expenses are incurred in Lithuania, and the amount exceeds EUR 43,000.
- Total amount of funds granted by all companies may not exceed 20% of total expenses of the film production.

Certain restrictions for reduction of taxable income and tax due apply.

Free economic zones (FEZs)

Entities that invest in Lithuanian FEZs are entitled to partial or complete CIT relief (depending on the investment amount), relief of tax on real estate, and 50% relief of land lease tax. In 1996, two FEZs were established for a period of 49 years: one in Kaunas and the other one in Klaipėda. As of 1 January 2012, five more FEZs were established in Akmenė, Kėdainiai, Marijampolė, Panevėžys, and Šiauliai.

An association uniting FEZs operating in Lithuania was established at the end of 2015. Its goal is to create 2,000 new jobs and attract investments of more than EUR 400 million.

Withholding taxes

Domestic legislation

Generally, income of a foreign entity in Lithuania not derived through a PE is deemed to be Lithuanian-source income and is subject to WHT at the following rates:

- Interest on any type of debt obligations, including securities: 10%.
- Proceeds from the sale, transfer (with title), or lease of immovable property located in Lithuania: 15%.
- Income derived from sports activities or performers' activities: 15%.
- Income from distributed profits: 15%.
- Royalties: 10%.
- Annual payments (*tantiems*) to the members of the board or supervisory board: 15%.
- Indemnities received for the infringement of copyrights or neighbouring rights: 10%.

0% WHT is applied on royalties paid to related parties meeting requirements of the European Commission (EC) Interest and Royalty Directive.

Lithuanian WHT on interest paid to EU entities or DTT tax residents is 0%.

WHT is not applied on government securities issued on international financial markets, interest accumulated and paid on deposits, and interest on subordinated loans that meet the criteria established by legal acts adopted by the Bank of Lithuania.

Dividends distributed by a resident company to another resident company are subject to a 15% CIT, which is withheld by a distributing company.

The dividends distributed by a resident company are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (*see Blacklisted territories in the Deductions section*), as specified by the Ministry of Finance. Please note that the requirement of the 12-month holding period does not necessarily have to be fulfilled on the day of dividend distribution.

Dividends paid out to foreign companies or received from foreign companies are not subject to tax exemption in cases where tax benefit is the main or one of the main objectives of a particular structure of companies. Dividends received from foreign companies are also not subject for tax exemption if they were deducted from taxable profit at the distributing company level.

The receiving company may reduce its CIT payable for that period when dividends were received by the amount of CIT withheld from the received dividends. Any excess credit may be offset with other taxes payable.

Dividends distributed by a foreign entity are generally subject to a 15% CIT that is to be paid by the receiving Lithuanian entity.

Dividends distributed by a foreign company to a Lithuanian company are exempt from CIT if the distributing foreign entity is established in the European Economic Area and related profit is properly taxed in the domiciled country.

The dividends are also exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period and the profit of a distributing entity is subject to CIT or similar tax. This participation exemption satisfies the requirements of the EC Parent-Subsidiary Directive. The exemption also applies to dividends paid by non-EU foreign companies, except those registered or organised in blacklisted territories.

According to the changed provisions of the CIT Law, the payments received by a foreign entity for the activities of the members of the supervisory board in Lithuania are recognised as income of the foreign company in Lithuania, regardless of the frequency of such payments and whether they are paid as *tantiemes* or as other types of payments. These payments are subject to 15% WHT, which should be withheld by the paying company in Lithuania. The tax is applicable only if the member of the supervisory board is a foreign company (not an individual).

Tax treaties

Where a treaty for the avoidance of double taxation and prevention of fiscal infringement with the country in question contradicts the local regulations, the treaty provisions prevail. Lithuania now has 55 DTTs in force with foreign countries.

The following WHT rates apply to dividends, interest, and royalties paid to a recipient or beneficial owner resident in a tax treaty country. The lower of the domestic or the treaty rate is given.

Lithuania

	WHT (%)		
Recipient	**Dividends (1)**	**Interest (2)**	**Royalties (3)**

Uzbekistan	0/10	0/10	10

Notes

1. Dividends are exempt from WHT if the recipient company has held not less than 10% of the voting shares in the distributing company for at least a 12-month period. However, this relief is not applied if the foreign entity (recipient) is registered or otherwise organised in blacklisted territories (*see Blacklisted territories in the Deductions section*), as specified by the Ministry of Finance. If participation exemption criteria are not met, the standard WHT rate of 15% should be applied. However, some of the DTTs allow applying WHT at a reduced rate of 5% or 10%.
2. Under the domestic law, the rate is nil if interest is paid to a company established in a country that has a DTT with Lithuania or is a member of a European Economic Area. In other cases, except for Cyprus, Latvia, and the United Arab Emirates where 0% WHT is established in the DTT, a 10% WHT rate should be applied.
3. Under the domestic law, 0% WHT is applied on royalties paid to related parties meeting requirements of the EC Interest and Royalty Directive.
4. Royalties for the use of industrial, commercial, or scientific equipment: 5%; other royalties: 10%.

Reduction of, or exemption from, WHT under a DTT may be obtained if a special residence certificate (Form DAS-1) is completed and approved by the tax authorities before a taxable payment is transferred. If a payment that would have been subject to a tax treaty has already been made and WHT at the local rate was withheld, it is possible to obtain an appropriate refund (reduction) by completing a special claim for a refund of the Lithuanian tax withheld at source (Form DAS-2) and obtaining the approval of the tax authorities.

In addition, the tax authorities may require completion of a special certificate giving information about income received and taxes paid in Lithuania (Form DAS-3).

Tax administration

Taxable period

The Lithuanian tax year runs from 1 January to 31 December. However, a corporation may apply to adopt a substitute year of reporting (e.g. 1 July to 30 June).

Tax returns

According to Lithuanian legislation, all the tax returns (except annual PIT returns) are submitted electronically, excluding cases when it is not possible to submit tax returns by electronic means due to objective reasons or the submission of a return by electronic means would cause disproportionate administrative burden.

CIT

CIT returns must be submitted by the 15th day of the sixth month of the following tax period (15 June for companies using the calendar year).

Advance CIT due based on activity results for the previous year should be calculated and declared as follows:

- The advance CIT due for the first six months of the tax period should be calculated based on results of the tax period before the last tax period (e.g. the advance CIT for the first six months of 2018 would be calculated based on the appropriate portion of the actual amount of CIT for 2016).
- The advance CIT return for the first six months of the tax period should be submitted by the 15th day of the third month of the tax period (usually 15 March).
- The advance CIT due for the remaining six months of the tax period should be calculated based on results of the last tax period (e.g. the advance CIT for the last six months of 2018 would be based on the appropriate portion of the actual amount of CIT for 2017).
- The advance CIT return for the remaining six months should be submitted by the 15th day of the ninth month (usually 15 September) of the tax period.

Previously, if advance CIT due was calculated based on activity results for the previous year, the advance CIT return for the first nine months of the tax period was to be submitted by the last day of the first month (usually January) of the tax period. The return for the remaining months of the tax period was to be submitted by the last day of the tenth month (usually October) of the tax period.

The taxpayer may choose to pay the advance amount based on the projected amount of CIT calculated for the current year. The advance amount of CIT calculated on the basis of the projected amount of CIT for the tax period shall account for not less than 80% of the actual amount of the annual CIT; otherwise, late payment interest shall be calculated in respect of each amount of advance CIT that was not paid for the quarter.

If the taxpayer had chosen to pay the advance amount based on the projected amount of CIT for the current year, the return must have been submitted not later than the last day of the first month of the tax period.

WHT on dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the dividends paid and tax withheld within ten calendar days after the end of the month of the dividend payment.

WHT on payments other than dividends

A tax-withholding entity must submit to the tax authorities a special form of a return reporting the amounts of payments paid and taxes withheld during the calendar month no later than 15 days after the end of the month in which the amounts were paid.

Payment of tax

CIT

The final payment deadline for CIT is aligned with the annual CIT return submission deadline (i.e. from 2017, the 15th day of the sixth month of the following tax period).

The advance CIT must be paid no later than the 15th day of the last month of the respective quarter.

If the amount of tax indicated in the annual CIT return exceeds the amount actually paid during the tax period (i.e. the advance CIT), the taxpayer is obligated to transfer the additional amount no later than the annual CIT return submission deadline (i.e. by the 15th day of the sixth month of the following tax period). Overpaid tax can be offset with other tax dues or refunded in accordance with the law on tax administration.

WHT on dividends

WHT on dividends is to be calculated, withheld, and remitted by a Lithuanian company that pays dividends within 15 calendar days after the end of the month of the payment.

WHT on payments other than dividends

WHT on payments other than dividends is to be calculated, withheld, and remitted by a Lithuanian company or a PE of a foreign company no later than the return submission deadline.

Tax audit process

The Lithuanian tax system for companies is based on self-assessment; however, the tax authorities undertake ongoing compliance activity to ensure corporations are meeting their tax obligations. The tax authorities take a risk-based and materiality approach to compliance and audit activities, with efforts generally focused on taxpayers with a higher likelihood of non-compliance and/or material consequences of non-compliance. Compliance activities take various forms, including general risk reviews, questionnaires, reviews of specific issues, and tax audits.

Files and data reported to the tax authorities

Accounting data reporting: Standard Audit File for Taxes (SAF-T)

Full accounting data reporting in xml format (SAF-T) was implemented in Lithuania as of 1 January 2017.

Entities are obligated to be ready to submit accounting data upon request of the tax authorities as follows:

- If net sales revenue for the 2015 financial year exceeded EUR 8 million, then an entity has to be ready to submit the file for periods starting from 1 January 2017.
- If net sales revenue for the 2016 financial year exceeded EUR 700,000, then an entity has to be ready to submit the file for periods starting from 1 January 2018.
- If net sales revenue for the 2017 financial year exceeded EUR 300,000, then an entity has to be ready to submit the file for periods starting from 1 January 2019.

The requirement to be ready to submit the file does not apply to certain entities (e.g. foreign entities registered for VAT purposes in Lithuania, branches, representative offices, PEs).

Invoice data reporting (i.SAF)

All VAT-registered taxable persons are required to report monthly data on invoices issued and received to the tax authorities' i.SAF subsystem.

Transport data reporting (i.VAZ)

The transport document data for the dispatch of goods to other entities within the territory of Lithuania (local dispatches) has to be reported to the tax authorities' i.VAZ subsystem (certain exceptions apply) before the dispatch occurs.

Statute of limitations

Generally, the tax authorities may investigate current and five previous tax periods. However, the limit of ten previous tax periods applies where the tax authorities are of the opinion there has been fraud or tax evasion.

Topics of focus for tax authorities

The Lithuanian tax authorities are focusing on the following areas of corporate taxpayers' compliance:

- Topics driven by OECD movement on BEPS (e.g. economic substance of companies, business reasons of transactions).
- Obligation to register PE in Lithuania (investigations of foreign companies that perform activities in Lithuania without registering as local taxpayers).
- Compliance with transfer pricing rules and thin capitalisation rules.
- Applications of tax reliefs (e.g. investment project incentive, relief for R&D).
- Proper recognition of costs for non-business related assets and expenses.
- Social security contributions' optimisation schemes.

Other issues

Foreign Account Tax Compliance Act (FATCA) agreement with the United States (US)

Lithuania signed an intergovernmental agreement (IGA) with the United States under the framework of FATCA. Lithuania and the United States will exchange information about the accounts of foreign (US or Lithuania, respectively) residents held in local financial institutions or local branches of foreign financial institutions.

Implementation of base erosion and profit shifting (BEPS) provisions

The OECD has announced a package of BEPS recommendations aiming to increase transparency of international taxation and prevent tax evasion and aggressive tax planning. Many OECD countries, as well as Lithuania (not an OECD member yet), have already started shifting certain provisions related to implementation of the BEPS recommendation package into their tax legislation. On 30 May 2018, an agreement on Lithuania's accession to the OECD was signed, meaning that Lithuania will officially become the 36th member of the organisation.

Common Reporting Standard (CRS)

Information disclosure requirements related to international transparency movements (i.e. Common Reporting Standard) that has been adopted into national law state that if certain conditions are met, financial market participants are required to provide the tax authorities with information on their clients' accounts (both individual and legal entities), such as account turnover and year-end balances, interest due and debt obligations, trade in securities, insurance premiums, pension insurance premiums, and other details. Moreover, legal entities in Lithuania are required to submit information on services acquired from foreign companies (which partially or entirely are provided in Lithuania), where the value of the transaction or several transactions made with the same foreign entity within a year is EUR 15,000 or higher.

Significant developments

New tax law for 2018

Reduction of the corporate income tax (CIT) rate

The CIT rate for companies having a net taxable base of more than 30,000 euros (EUR) is reduced to 18% for 2018, leading to an overall tax rate of 26.01% in Luxembourg City for fiscal year (FY) 2018 (taking into account the solidarity surtax of 7% on the CIT rate, and including the 6.75% municipal business tax rate applicable).

Also, the CIT rate for small and start-up companies (i.e. companies having taxable income below EUR 25,000) has been reduced to 15%, leading to an overall tax rate of 22.08% in Luxembourg City (taking into account the solidarity surtax of 7% on the CIT rate, and including the 6.75% municipal business tax rate applicable). For companies with a tax base of between EUR 25,000 and EUR 30,001, the CIT would be EUR 3,750 plus 33% of the tax base above EUR 25,000.

New intellectual property (IP) regime

The new measures related to a new IP regime proposed in Bill No. 7163 in August 2017 have been approved by the Luxembourg Parliament on 22 March 2018. This new IP regime, applicable since 1 January 2018, provides for an 80% tax exemption on eligible net income for qualifying IP rights. The new regime is fully consistent with all recommendations made by the Organisation for Economic Co-operation and Development's (OECD's) Forum on Harmful Tax Practices, including those set out in the OECD/G20 Base Erosion and Profit Shifting (BEPS) Project Action 5 Final Report published in October 2015. The new regime thus adopts the 'nexus approach', to ensure that only activities with enough substance can qualify for beneficial treatment. This approach is also in line with positions taken by the European Union's (EU's) Code of Conduct Group on business taxation, which monitors IP regimes operating in EU member states.

The new regime also seeks to promote research and development (R&D) activity in Luxembourg.

Tax credit for investments

The scope of the regime offering tax credits for investment is extended to include the acquisition of software, provided that this software has not been acquired from any associated entity (as defined under article 56 of Luxembourg Income Tax Law [LITL]).

The above measure only relates to the acquisition of software and does not include software created by the taxpayer itself. The revenues from such software can instead potentially benefit from partial tax exemption under Luxembourg's new IP regime, applicable since 1 January 2018. Conversely, a taxpayer claiming tax credits for investment for the acquisition of software cannot also benefit from the 2018 IP regime on any revenue derived from such software (so as to prevent any double tax advantage arising).

Under this new measure, a separate tax credit is given for investment in software, although the amount that can be claimed partly mirrors the rules for calculating the existing wider overall tax credit for investment; the tax credit for software is set as 8% of the cost of investment up to EUR 150,000 in a tax period and 2% for any investment exceeding EUR 150,000. However, one further restriction applies; the credit may not exceed 10% of the tax due for the tax year during which the acquisition of software occurs. There are no measures that allow any credits that are not available because of this restriction to be deferred to a subsequent period; such potential credits are permanently lost.

In addition, in order to offer a further incentive for sustainable mobility, some specific types of cars will become eligible assets for all components of the tax credits for the investment regime. To be eligible, the vehicles must be:

- passenger cars
- ‘zero emissions’, running exclusively on electricity or hydrogen cells
- classified as M1, having a passenger compartment designed exclusively for the carriage of passengers and having not more than nine seats (including the driver’s seat), and
- first registered after 31 December 2017.

Taxes on corporate income

Luxembourg taxes its corporate residents on their worldwide income and non-residents only on Luxembourg-source income.

Businesses with taxable income lower than EUR 25,000 are subject to CIT at a rate of 15%. Businesses with taxable income between EUR 25,000 and EUR 30,001 are subject to CIT computed as follows: EUR 3,750 plus 33% of the tax base above EUR 25,000 (for FY 2018). The CIT rate is 18% for companies with taxable income in excess of EUR 30,000.

The CIT does not apply to tax-transparent entities (e.g. general or limited partnerships or European Economic Interest Groupings).

Although there used to be a minimum CIT for Luxembourg resident companies, no such minimum CIT is applicable as of 2016. It has been replaced by a minimum net wealth tax (*see Net wealth tax [NWT] in the Other taxes section*).

Solidarity surtax

A 7% solidarity surtax is imposed on the CIT amount.

Taking into account the solidarity surtax, the aggregate CIT rate is 19.26% for companies with taxable income in excess of EUR 30,000.

Municipal business tax on income

Municipal business tax is levied by the communes and varies from municipality to municipality. The municipal business tax for Luxembourg City is 6.75%.

The effective combined CIT rate (i.e. CIT, solidarity surtax, and municipal business tax) for Luxembourg City is 26.01%.

Corporate residence

Based on domestic law, a company is considered to be resident in Luxembourg if either its registered office or place of central administration is located in Luxembourg. The registered office is designated as such in the company's articles of incorporation.

The place of central administration is generally understood to mean the place where the company is managed and controlled. While this term is not legally defined, the location of the company's major establishment is determined by facts and circumstances, including the following:

- The place where meetings of the board of directors are held.
- The place where shareholders meetings are held.
- The place where the company's officers make their decisions.
- The place where the company's books and records are kept.
- The place where other, similar factors evidencing management control occur.

Permanent establishment (PE)

The provisions on PEs included in the tax treaties concluded by Luxembourg generally follow the wording of the OECD model.

Under Luxembourg domestic tax law, a similar PE concept exists but is defined in a broader way and is to be understood as every fixed piece of equipment or place that serves for the operation of an established business.

Other taxes

Value-added tax (VAT)

Supplies of goods and services, which are deemed to take place in Luxembourg, are subject to VAT at the standard rate of 17% (lowest standard VAT rate in the European Union) or, on certain transactions, at 14% (e.g. certain wines, advertising pamphlets, management and safekeeping of securities), 8% (e.g. supply of gas or electricity), or 3% (e.g. food [except most alcohol beverages]; pharmaceutical products; books [except e-books]; radio and television broadcasting services [except adult entertainment]; shoes, accessories, and clothes designed for children under the age of 14). Some transactions, such as export and related transport, are zero-rated.

Taxpayers whose activities are subject to VAT are entitled to offset against their VAT payable the amount of such tax charged to them by their suppliers or reverse charged (i.e. self-accounted) by them on import or acquisitions of goods or services from abroad.

Banking, financial, insurance, and reinsurance transactions are generally exempt activities. The VAT paid on costs that have a direct and immediate link with these transactions cannot be recovered except when related to services performed for persons established outside the European Union. VAT on expenses made in the context of 'passive' holding activities, which are considered as outside the scope of VAT, are not recoverable.

A Circular letter released by the Luxembourg VAT authorities has confirmed that the activity performed by independent directors is an economic activity that makes them VATable persons (irrespective of whether the director is a company or a private individual). This activity is, as a rule, subject to VAT at the standard rate of 17% (there are some exceptions to the principle of taxation). VAT returns must be filed on a monthly basis (as well as a recapitulative annual return). Derogations may be obtained, to file quarterly or only annual VAT returns, subject to certain conditions (level of turnover or incoming transactions subject to VAT and level of purchases of goods and services on which Luxembourg VAT must be self-accounted for).

A Standard Audit File for Tax (SAF-T), containing reliable accounting data, has been implemented by the VAT authorities. This specific .xml file is used by taxable persons to make information available to Luxembourg VAT authorities during a VAT audit. Only specific taxable persons (subject to the Luxembourg Standard Chart of Accounts) having a certain minimum number of transactions (+/- 500) and registered under a 'normal filing regime' with a turnover exceeding EUR 112,000 are currently concerned. On the other hand, some entities (i.e. banks and insurance companies) are not yet subject to these SAF-T obligations, although they may be required to provide all VAT-relevant data to the authorities in a structured electronic file.

Managing directors, managers of companies (established and/or VAT registered in Luxembourg), as well as '*de jure*' and '*de facto*' managers in charge of the daily management of such companies, can be held jointly and personally liable in the event of breach of VAT compliance obligations and/or non-payment of the VAT due by the taxpayer they manage.

Furthermore, aggravated tax fraud (*fraude fiscale aggravée*) and tax swindle (*escroquerie fiscale*) can be punished with imprisonment.

The implementation of a VAT grouping regime is foreseen for the summer 2018. Such regime would allow any Luxembourg entities having financial, economic, and organisational links to be seen as a single VAT person if they choose to. Any transactions between group members would be disregarded for VAT purposes, and only one VAT return would have to be submitted by the group for all its members.

The implementation of Article 80 of the VAT Directive in the Luxembourg VAT legislation is also expected for summer 2018. Article 80 is a 'may' provision aiming at avoiding VAT loss for member states in specific situations where the selling or purchasing price of a supply has been overestimated or underestimated between related parties. This provision allows member states to disregard considerations agreed between related parties to retain the consideration that would be agreed upon in an arm's-length transaction between knowledgeable, willing parties who are under no compulsion to act.

Customs duties/import tariffs

Based on a European Regulation, goods entering within the territory of the European Union may be subject to customs duties/import tariffs. Applicable rates are based on the nature and on the quantity of the products.

Excise duties

In addition to VAT, some products are subject to specific excise duties. In Luxembourg, these products are electricity, mineral oils, manufactured tobacco, and alcohol.

Excise duties are not based on the sale price of the products but on the quantity. Excise duty becomes chargeable at the time, and in the EU member state, of release for consumption. Release for consumption occurs in any of the following instances:

- The departure of excise goods from a duty suspension arrangement.
- The holding of excise goods outside a duty suspension arrangement where excise duty has not been levied, pursuant to the applicable provisions of Community law and national legislation.
- The production of excise goods outside a duty suspension arrangement.
- The importation of excise goods, including irregular importation, unless the excise goods are placed, immediately upon importation, under a duty suspension arrangement.

Stamp taxes

There is no stamp duty in Luxembourg.

Net wealth tax (NWT)

NWT regime

Both Luxembourg resident companies and Luxembourg branches of non-resident companies are subject to NWT on their net wealth, based on prescribed valuation methods. The following scale of rates applies for NWT:

- On a taxable base of up to EUR 500 million: 0.5%.
- On the taxable base exceeding EUR 500 million: NWT of EUR 2.5 million, plus 0.05% on the component of the NWT base above EUR 500 million. No cap is set.

In general, assets are to be taken into account at market value (except for real estate, which is subject to a special regime). Shareholdings qualifying for the participation exemption (*see Dividend income in the Income determination section*) generally are exempt from NWT.

Minimum NWT

A minimum NWT charge applies for all corporate entities having their statutory seat or central administration in Luxembourg.

Entities with aggregated fixed financial assets, transferable securities, inter-company receivables, and cash in excess of both 90% of their total gross assets and EUR 350,000 will be subject to a minimum NWT charge of EUR 4,815.

All other corporations with a statutory seat or central administration in Luxembourg (including securitisation vehicles, *Société d'Investissement en Capital à Risque* [SICARs], *Société d'Epargne-Pension à Capital Variable* [SEPCAVs], and *Association d'Epargne-Pension* [ASSEPs]) will be subject to a minimum NWT charge ranging from EUR 535 to EUR 32,100, depending on company's total gross assets, as follows:

Total gross assets (EUR)	Minimum NWT charge (EUR)
Up to 350,000	535
350,001 to 2,000,0000	1,605
2,000,001 to 10,000,000	5,350
10,000,001 to 15,000,000	10,700
15,000,001 to 20,000,000	16,050

Total gross assets (EUR)	Minimum NWT charge (EUR)
20,000,001 to 30,000,000	21,400
30,000,001 and above	32,100

The minimum NWT charge due by a tax unity (*see the Group taxation section*) is capped at EUR 32,100.

The legislation makes it clear that the balance sheet to be used for these purposes is the closing balance sheet for the tax year concerned that is in conformity with all CIT provisions (n.b. rather than the NWT provisions for computing the normal NWT basis). Consequently, all figures to be used are those as shown in the commercial balance sheet, subject only to any specific revaluations necessary to apply CIT provisions.

In particular, shareholdings that qualify for the participation exemption and Luxembourg-situs real estate must both be included in gross assets for these purposes. Conversely, foreign-situs real estate and other assets, such as those of a foreign branch, the income from which is excluded from the Luxembourg tax base under the provisions of a double tax treaty (DTT), are not to be included in gross assets.

NWT reduction

The CIT due in a given year N-1 (e.g. 2017) represents the limit for the NWT reduction for the following year N (e.g. 2018). The CIT to be taken into consideration for the limit of NWT reduction is the amount due, including the employment fund contribution, before any tax credits. As a second limit, the NWT reduction is limited by the minimum NWT as of 2016 (and to the minimum CIT until 2015). In other words, NWT cannot be reduced down to 0 by constituting a NWT special reserve. The minimum NWT remains due.

The NWT reduction for year N (e.g. 2018) has to be requested in the corporate tax returns of year N-1 (e.g. 2017). The NWT special reserve of year N (e.g. 2018) (for the NWT reduction of year N, i.e. 2018) should be kept during the five-year period following the NWT reduction request (i.e. years N, N+1, N+2, N+3, and N+4). After the five-year period (i.e. as from year N+5), the NWT reserve of year N is released and can be either distributed to the shareholders or used to constitute a new NWT reserve.

Subscription tax

Investment funds are subject to subscription tax (at various rates) on their total net assets valued at the last day of each quarter. Institutional funds and monetary funds are subject to an annual rate of 0.01% and the other funds to an annual rate of 0.05%. Funds of institutional funds and monetary institutional funds are exempt from subscription tax.

Exemptions from subscription tax are available for exchange traded funds, and an extension of exemption is available for funds dedicated to multi-employer pension vehicles or to several employers providing pension benefits to their employees.

Where a foreign Undertakings for Collective Investment (UCI) is managed by a Luxembourg-based management company (or where the foreign UCI's place of effective management is located in Luxembourg), the UCI will not be deemed to be domiciled in Luxembourg and therefore not be subject to subscription tax in Luxembourg.

General registration taxes

A fixed registration duty of EUR 75 is levied on certain transactions involving Luxembourg legal entities (i.e. incorporation, amendment to the articles of association, and transfer of seat to Luxembourg).

Real estate transactions

The sale or transfer of immovable property located in Luxembourg is subject to a proportional registration duty (inclusive of the transcription tax) of 7% (plus a city surtax of 3% if the building is located in Luxembourg City).

Contributions of immovable property located in Luxembourg in exchange for securities are subject to a proportional registration duty (inclusive of the transcription tax) of 1.1% (plus a city surtax of 0.3% if the building is located in Luxembourg City).

Contributions of immovable property located in Luxembourg in exchange for other than by shares are subject to a proportional registration duty (inclusive of the transcription tax) of 7% (plus a city surtax of 3% if the building is located in Luxembourg City).

The contribution of immovable property in the context of restructuring transactions are not subject to proportional registration duty if some conditions are met.

Rental agreements are not subject to any registration obligation, with the exception of long-term leasing agreements. Parties still have the possibility to register lease agreements voluntarily, notably to determine the date of an agreement for civil law purpose, or make them enforceable against third parties. If the rental agreement is voluntarily registered, registration duty at 0.6% would remain due, unless a valid VAT option has been duly approved by the Luxembourg VAT authorities. In that case, only the fixed registration of EUR 75 duty will apply.

Commune (municipalities) real estate tax

Communes (municipalities) levy an annual real estate tax, the basis of which is the unitary value of real estate, which represents its estimated value in 1941. The basic rate varies from 0.7% to 1% of the unitary value, according to the category of property, and is multiplied by a coefficient, which varies with communes and different types of property. For commercial property, the coefficient in Luxembourg City is 750%, which should be applied to 1% of the unitary value. The real estate tax is deductible for CIT purposes.

Payroll taxes

Payroll taxes have to be withheld by the employer. The top payroll tax withholding rate is 42%. A solidarity tax of a maximum of 9% of tax must also be applied.

Social security contributions

Compulsory social security contributions for employees are listed below:

- For sickness: 3.05% of gross periodic remuneration, which is limited to a monthly ceiling of EUR 9,992.93 (annual ceiling estimated at EUR 119,915.16 for 2018).
- For pension: 8% of gross remuneration, which is limited to a monthly ceiling of EUR 9,992.93 (annual ceiling estimated at EUR 119,915.16 for 2018).
- For dependency contributions: 1.4% of gross remuneration (reduced by EUR 499.65 per month [i.e. estimated at EUR 5,995.80 for 2018]) with no cap.

The social security contributions have to be withheld by the employer from the employee's gross salary.

Branch income

Income of a Luxembourg-based branch of a non-resident company is generally taxed at normal CIT rates. The municipal business tax generally only applies if the branch is carrying on commercial activity within Luxembourg.

Income determination

Inventory valuation

Inventories generally are valued at the lower of actual cost or market cost. There is no statutory specified method. In general, the first in first out (FIFO), the last in first out (LIFO), and the weighted-average costs methods of inventory valuation are acceptable for income tax purposes, provided the method is in accordance with the facts.

Dividend income

Dividends received by a Luxembourg resident company (or by a domestic PE of a non-resident company in certain cases) should, in principle, be subject to CIT.

Participation exemption regime

Dividends received may be tax exempt in Luxembourg, according to the so-called 'participation exemption' regime, if the conditions described below are satisfied:

- The distributing company is:
  - a collective entity falling within the scope of the EU Council 'Parent Subsidiary Directive'
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL, or
  - a non-resident joint-stock company that is fully liable (in its state of residence) to a tax corresponding to the Luxembourg CIT (i.e. as a general rule, it is required that the foreign tax is compulsorily levied at a rate of at least 9%, on a basis similar to the Luxembourg one).
- The beneficiary company is:
  - a Luxembourg resident collective entity, which is fully taxable and takes one of the forms listed in the LITL
  - a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
  - a domestic PE of a collective entity falling within the scope of the Parent Subsidiary Directive
  - a domestic PE of a joint-stock company that is resident in a country with which Luxembourg has concluded a DTT, or
  - a domestic PE of a joint-stock company or of a cooperative company, which is a resident of a European Economic Area (EEA) member state (other than an EU member state).
- At the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly (or through a tax transparent entity, *see Transparent entities below*), for an uninterrupted period of at least 12 months, a participation in

the share capital of the subsidiary of at least 10% or with an acquisition price of at least EUR 1.2 million.

Nevertheless, consistent with the general principle under the LITL, which denies the deductibility of expenses connected to exempt income, any expenses incurred during the year in which a dividend is received, and which have a direct economic connection to the exempt participation, may only be deducted insofar as they exceed the exempt dividend for the year in question.

General anti-avoidance regime (GAAR)

The Luxembourg participation exemption regime has been amended in order to introduce anti 'hybrid instruments' and GAAR rules derived from the amended EU Parent/Subsidiary Directive. These provisions apply to income distributed or received after 31 December 2015.

The GAAR rule precludes Directive-based benefits whenever there are any arrangements that, having been put into place with a main purpose of obtaining a tax advantage that defeats the object or purpose of the Directive, are 'not genuine'. A 'not genuine' determination should be based on all relevant facts and circumstances. For the GAAR rule, an arrangement should be considered 'not genuine' insofar as it was not structured for 'valid commercial reasons that reflect economic reality'.

The Luxembourg tax authorities have not provided any substantive guidance or interpretation of these EU-driven measures.

However, if the GAAR rule is determined to apply, the exemption from Luxembourg withholding tax (WHT) obligations provided by Article 147 2. (a) (or (d)) LITL will not apply to a distribution made to a corporate entity in another EU member state, even if the participation would otherwise be considered a qualifying participation to which this specific exemption should apply. Exemption under other sub-parts of article 147 2. remains available, notably for distributions to a corporate entity that is fully liable for a tax similar to the Luxembourg CIT and which resides in any country (including one within the European Union) that maintains a tax treaty with Luxembourg.

Dividends received from a corporate entity in another EU member state that normally would qualify for the participation exemption of article 166 LITL will be denied this exemption if the GAAR rule applies. However, if the corporate entity paying the dividend also is fully subject to a tax similar to the Luxembourg CIT, the participation exemption will remain available, since this alternative provision granting the exemption is not subject to the new anti-avoidance rule.

The Article 166 LITL exemption will not be available if the income flow creates a corresponding tax-deductible expense (i.e. a hybrid mismatch) at its source when the source is a corporate entity in another EU member state.

These measures do not affect capital gains or NWT components for Luxembourg corporate entities.

Capital gains

Capital gains (and losses) generally are taxed as ordinary income (or losses). It is possible to defer the taxation of gains on certain fixed assets where the proceeds are used to acquire replacement items. Under certain conditions, capital gains and hidden reserves may be deferred or exempted and remain untaxed in a merger or another form of reorganisation of resident companies or other EU companies.

In general, capital gains on the disposal of qualifying shareholdings held by entities eligible to the participation exemption regime are tax exempt, provided (i) the shareholding constitutes at least 10% of total ownership in the share capital or an acquisition price of at least EUR 6 million and (ii) the disposing company has held or intends to hold a qualifying shareholding for at least 12 months.

A recapture system exists wherein the capital gain realised will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of realisation of the exempt capital gain and in previous years.

The purpose of the system is to avoid a taxation vacuum, which would be the result if the deductibility of expenses and write-downs connected to the participation was allowed, while the income arising from the participation is tax exempt. This system should, in principle, remain tax neutral, as the company should have available carryforward losses for an equivalent amount resulting from the aforementioned deductions (unless previously used to offset other taxable income).

Taxation of non-resident corporate investors on gains upon disposal of shares

In case a non-resident corporate investor (non-treaty protected) derives income from the disposal of an important participation (i.e. representing at least 10% of the share capital) in a Luxembourg company within six months of its acquisition, said capital gain will be subject to CIT in Luxembourg unless a tax treaty provides otherwise.

Non-resident investors are not subject to the aforementioned capital gains tax upon disposal of shares in a Luxembourg *Société d'Investissement à Capital Variable* (SICAV), *Société d'Investissement en Capital à Risque* (SICAR), and *Société de gestion de Patrimoine Familial* (SPF).

Interest income

Under Luxembourg accounting and tax principles, interest income is recognised on an accrual basis and is fully subject to CIT and municipal business tax.

Royalty income

As a matter of principle, royalty income and expenses derived from intellectual property (IP) assets acquired or developed after 30 June 2016 are subject to the standard tax regime (i.e. CIT and municipal business tax) and rates. *For additional details in this respect, see Intellectual property (IP) regime in the Tax credits and incentives section*.

Transparent entities

From a Luxembourg tax perspective, a transparent entity is seen as having no legal personality distinct from that of its partners (those transparent entities are commonly referred to as 'partnerships') for CIT and NWT purposes, although it may be regarded as a separate legal entity from a civil/corporate law point of view. Provided that the partnership carries out a commercial activity, however, it may be liable to municipal business tax on its own.

Foreign income

A Luxembourg tax resident company is liable for CIT on its worldwide income. Foreign-source income is therefore taxable in Luxembourg, unless a DTT provides for an exemption.

Dividends from foreign subsidiaries are taxed when received, except where exempt as mentioned above (under conditions, the exemption method applies in many DTTs of Luxembourg). Profits of a foreign branch that are not exempt by means of a DTT may benefit from a foreign tax credit. Any foreign taxes paid in excess of the tax credit are deductible as expenses. Luxembourg is using the exemption method in most of its DTTs.

Deductions

Depreciation

Depreciation rates must be consistent with economic reality. The depreciation must be calculated on the total acquisition cost, bearing in mind the normal life of the asset and the estimated residual value. As generally provided by the Luxembourg tax law, the accounting depreciation should be followed for tax purposes.

Depreciation normally is calculated using the straight-line method. However, the declining-balance method is permitted for fixed assets, other than buildings and intangible assets. The depreciation rate may not, however, exceed three times the rate applicable according to the straight-line method, or 30% (four times the applicable rate in the case of assets used exclusively for scientific and technical research, or 40%).

It is permissible to change from the declining-balance method to the straight-line method, but the opposite is not allowed.

In the event of a sale of a depreciated asset, the net book value at the moment of the disposal must be compared with the sales price of that asset. If this comparison indicates a profit, corresponding income tax may be due unless the sales price is reinvested in eligible assets. Capital losses are deductible.

Under certain conditions, fixed assets with a value of less than EUR 870 or an economic life that is not in excess of one year can be expensed fully in the year of acquisition. Special accelerated depreciation on 80% of the cost of fixed assets is available for assets that protect the national environment, save energy in Luxembourg, or permit the development of workplaces for handicapped workers, under certain conditions.

Deferred depreciation

The rules governing depreciation of fixed assets for tax purposes have been amended as of 2017 in order to offer the possibility for taxpayers to defer deductions related to depreciation for any given tax year. For this purpose, a specific request needs to be made when filing the tax return for the year concerned.

The deduction can be deferred until, at the latest, the end of the depreciation life of the asset (i.e. any depreciation amounts deferred from previous years have to be deducted at the latest for the last year for which depreciation is allowed).

The application of this measure could potentially result in a timing difference that would increase the CIT and municipal business tax to be paid by a taxpayer for any given year. However, this might allow the taxpayer to reduce its NWT base, assuming certain conditions apply and that the taxpayer decides to book a special NWT reserve to reduce its NWT liability for the year concerned. This measure might also allow taxpayers to use investment and other tax credits during a tax year, whereas the company might otherwise have been unable to do this because it was in a tax loss position.

Goodwill

Goodwill is generally amortised over its useful life. In cases where its lifespan cannot be reliably estimated, goodwill cannot be amortised for a period longer than ten years. The Luxembourg tax treatment will follow the applicable accounting treatment.

Start-up expenses

Formation expenses can either be directly charged to the profit and loss account of the year in which they are incurred or depreciated on a straight-line basis over a five-year maximum period. The accounting treatment is followed for Luxembourg tax purposes.

Interest payments

Interest payments are, in principle, deductible to the extent they comply with the arm's-length principle (*see Transfer pricing in the Group taxation section*).

Non-deductibility of the interest payments may arise in case they depend on the profits realised by the company or are derived from loans structured in the form of bonds or similar securities. Also, the deductibility will be limited in cases where the company is considered as being thinly capitalised (*see Thin capitalisation in the Group taxation section*).

Bad debt

Provisions for bad debts are generally tax deductible.

Charitable contributions

Gifts for scientific, charitable, or public purposes to institutions of general interest are deductible, subject to a maximum of 20% of the net income or up to an amount of EUR 1 million (the minimum being EUR 120), with a possibility to spread the deduction over two years in case of excess.

Shareholdings

Expenses connected to the business activity of a taxpayer are, in principle, tax deductible. However, expenses linked to a shareholding qualifying for the participation exemption, including write-downs in the value of the shareholding booked as a consequence of a dividend distribution, are not deductible, up to the amount of the exempt dividend.

In the event of disposal of a shareholding financed by debt, recapture rules may apply. Basically, the effect of this rule is that the proceeds will become taxable up to the amount of the aggregate expenses and write-downs in relation to the participation deducted during the year of disposal and the previous years.

Luxembourg resident companies are subject to the NWT based on their net wealth.

Severance payouts or 'golden handshakes'

Severance payouts or 'golden handshakes' are deductible for CIT and municipal business tax purposes, up to EUR 300,000.

Fines and penalties

Fines and penalties suffered by the taxpayer are not considered as operating expenses and are therefore not tax deductible.

Taxes

Several taxes are deductible in determining income subject to CIT, including the registration duties and real estate tax. Also, certain taxes are credited against the computed amount of income tax owed, including taxes withheld from Luxembourg dividend income received, tax withheld abroad from dividend and interest income received by a Luxembourg corporation (subject to limitations), and investment tax credits (*see the Tax credits and incentives section*). Foreign taxes are also deductible as expenses if not otherwise credited.

The main non-deductible taxes are CIT, municipal business tax, and NWT, as well as interest and penalties for late payment of said taxes.

Net operating losses

Losses generated as of 1 January 2017 will only be able to be carried forward for a maximum period of 17 years. Losses that arose before 1 January 2017 are not affected by this limitation. Losses cannot be carried back.

Payments to foreign affiliates

Royalties, management service fees, and interest charges paid to foreign affiliates by a Luxembourg company are deductible items, provided they are equal to what the company would pay an unrelated entity for comparable services (application of the arm's-length principle).

Group taxation

Luxembourg permits tax unity. Generally, the conditions to qualify for tax unity include that:

- each company that is part of the tax unity is a fully taxable company that is resident in Luxembourg (the top entity may be a Luxembourg PE of a fully taxable non-resident company)
- at least 95% of each subsidiary's capital is directly or indirectly held by the head of the fiscal unity
- each company's fiscal year starts and ends on the same date, and
- tax unity is requested jointly by the top company and each subsidiary that becomes a member of the group.

Tax unity lasts for a five-year period (minimum), and the taxable income/loss of the tax unity is computed as the sum of the taxable income/loss of each integrated entity. Tax losses incurred before the consolidation period may be offset only against tax profits of the company that incurred the loss. Tax losses that are sustained by a group member during the consolidation period are offset against the tax profits of the other group members. Tax losses arising during the consolidation period that remain after the consolidation remain attributed to the parent company.

The tax unity regime in Luxembourg has been extended since 1 January 2016 in accordance with case law from the European Court of Justice in particular to allow horizontal integration. Qualifying companies that are held by a common parent company established in any EEA country, the latter being subject to a tax comparable to Luxembourg's CIT in its country of residence, may now form a tax unity.

A tax unity also may include a Luxembourg PE of a company established in any country that is subject to a tax comparable to Luxembourg's CIT. The PE would be considered as the 'integrated' entity.

Transfer pricing

At arm's-length principle

Luxembourg transfer pricing legislation provides that transactions between related parties (cross border as well as domestic) have to be governed by the arm's-length principle endorsed by the OECD (restated Article 56 LITL as of 1 January 2015). In essence, this means when the two enterprises are, within their commercial or financial relations, subject to conditions made or imposed that differ from those that would be made between independent enterprises, the profits of these enterprises are to be determined under conditions prevailing between independent enterprises.

Luxembourg also introduced Article 56bis LITL, which explicitly brings into the law some of the key principles and methodologies set out in the OECD Guidelines. It implements the requirement for making an accurate delineation of controlled transactions and the OECD concept of comparability analysis. Article 56bis LITL further contains a GAAR measure that may disregard a transaction that has been made without any valid commercial rationality.

Luxembourg Transfer Pricing Guidelines

For intra-group financing on-lending transactions, specific guidelines are provided for in Circular LITL No. 56/1 - 56bis/1 (TP Circular). According to the TP Circular, the OECD arm's-length principle should be applied to determine the compensation of Luxembourg companies engaged in financial on-lending transactions. The remuneration of the Luxembourg companies should be determined based on a return-on-equity approach.

A written clearance (i.e. unilateral advance pricing agreement [APA]) from the Luxembourg tax authorities on the set of criteria for the determination of the transfer pricing for the financial on-lending transactions can be obtained, provided that the Luxembourg company meets certain substance and equity-at-risk requirements.

In respect of the equity-at-risk requirement, the former requirement that a Luxembourg company must be at risk for an amount equal to, at least, the lower of (i) 1% of the nominal value of the loan intermediated or (ii) EUR 2 million is no longer applicable.

Absence of meeting the substance and equity risk requirements may result in an exchange of information. In addition, the arm's-length remuneration has to be documented by way of a transfer pricing analysis.

For all other intra-group transactions, Luxembourg generally applies the OECD guidelines.

Documentation

As far as transfer pricing documentation is concerned, new Section 3 of Paragraph 171 of the General Tax Law of 22 May 1931 (*Abgabenordnung*) clarifies that taxpayers are required to:

- disclose their transactions with related parties and
- document their compliance with the arm's-length principle.

No specific guidelines are provided on the nature and extent of the documentation required, which should depend on the circumstances of the case under consideration. In practice, the OECD transfer pricing guidelines should be applied.

Further to the documentation obligation, new disclosure requirements have been introduced, with the purpose to enhance transparency of taxpayers towards the tax authorities.

In detail, starting from the 2017 tax return, taxpayers shall disclose whether during the year concerned they have been engaged in transactions with related parties and/or if they have opted for the simplification measure stated in Section 4 of the TP Circular (i.e. measure allowing taxpayers, pursuing a purely intermediation activity in the context of financing transactions, to opt for a fixed 'safe-harbour' compensation).

In addition to the above, in the context of anti-BEPS measures, the Luxembourg tax authorities issued a Circular on 7 May 2018 that requires taxpayers to indicate in their tax return whether they have performed any transaction with related parties located in the non-cooperative jurisdictions listed in the EU list. This new disclosure requirement will apply from the 2018 tax return.

Country-by-country (CbC) reporting

On 13 December 2016, the Luxembourg Parliament passed legislation implementing CbC reporting requirements for Luxembourg entities that are part of a multinational enterprise (MNE) group. The new CbC reporting legislation transposes into Luxembourg law part of the three-tiered standardised approach to transfer pricing documentation introduced in Action 13 of the OECD/G20 BEPS Project.

Under the Luxembourg CbC legislation, a Luxembourg tax resident entity that is the ultimate parent entity of an MNE group with consolidated group revenue of EUR 750 million or more in the preceding fiscal year and that prepares consolidated financial statements (or would be required to do so if its equity interests were traded on a public security exchange) is required to file a CbC report with the Luxembourg tax authorities. Other Luxembourg companies that are members of MNE groups may also have obligations to file CbC reports in Luxembourg under the so-called 'surrogate parent entity' regime or the 'secondary' mechanism. The filing is due 12 months after the last day of each fiscal year of an MNE group.

A Luxembourg resident entity affected by this legislation needs to notify the Luxembourg tax authorities of whether it is going to file a CbC report as the ultimate parent, under the secondary mechanism, or as a surrogate filer. Alternatively, if a Luxembourg entity is a constituent entity (this being defined as a Luxembourg tax resident entity forming part of an MNE group in scope of CbC reporting), each such entity must notify the Luxembourg tax authorities of which other entity in the MNE group is filing the CbC report and its residency. This notification is due by the last day of the fiscal year of the MNE group.

The Luxembourg tax authorities will exchange annually on an automatic basis the CbC report received from any Luxembourg reporting entity in an MNE group with all the authorities of other jurisdictions where that MNE group has activities. However, a CbC report can only be exchanged in cases where both tax authorities have agreed to automatic exchange, any mechanism for this is effective, and their respective jurisdictions have in place legislation that requires the filing of CbC reports with respect to that fiscal year to which the CbC report relates. A grand-ducal regulation (Mémorial A N° 136) lists the jurisdictions regarded by Luxembourg as satisfying the above requirements. As a consequence, in case the ultimate parent is resident in a jurisdiction that is not listed in the regulation, a CbC report will have to be filed either by a 'surrogate entity' resident in a jurisdiction listed in the grand-ducal regulation or by an affiliate in Luxembourg.

Luxembourg tax authorities may impose a penalty of up to EUR 250,000 in case of no filing, late filing, or incorrect filing of either the CbC report or notification(s).

Burden of proof, statute of limitation, and penalties

In terms of the burden of proof, taxpayers are required to provide the Luxembourg tax authorities with the documentation to demonstrate the application of the arm's-length principle. In the absence of such documentation, the Luxembourg tax authorities can challenge the correct application of the arm's-length principle and, without giving precise explanations, presume a reduction of the taxable income and apply corrections. In effect, this would result in an ultimate reversal of the burden of proof towards the taxpayer.

The statute of limitations is generally five years from the end of the year in which the tax liability arises. This period may be extended if a deferred payment is granted. In case of tax evasion or fraud, as well as in case of incomplete tax returns, the statute of limitations can be extended up to ten years.

There are no specific penalties in relation to transfer pricing in Luxembourg, but the penalty regime under the CIT will be applicable.

Advance pricing agreement (APA)

Taxpayers can file unilateral and bi- or multi-lateral APAs with the Luxembourg tax authorities. An administrative fee in the amount of EUR 10,000 is due to the Luxembourg tax authorities for the filing of the APAs under the new Paragraph 29a of the above-mentioned General Tax Law of 22 May 1931.

The TP Circular provides that any individual decision relating to the arm's-length principle that the Luxembourg tax authorities have made on the basis of the rules applicable before Article 56bis LITL entered into force is no longer binding. The TP Circular further details the requirements applicable to new APAs.

Thin capitalisation

No thin capitalisation ratio is specifically provided by the Luxembourg tax law.

In practice, the tax authorities apply an 85:15 debt-to-equity ratio for the intra-group financing of participations. Should the 85:15 ratio not be complied with by the taxpayer, the surplus of interest can be re-qualified by the tax authorities as a hidden distribution of profits that would be non-deductible and potentially subject to a 15% WHT.

Controlled foreign companies (CFCs)

Luxembourg tax law does not provide for CFC rules.

Tax credits and incentives

Foreign tax credit

See Foreign income in the Income determination section for a description of the foreign tax credit regime.

Inbound and capital investment incentives

Luxembourg tax law provides for various incentives, with specific requirements, in the areas of risk capital, audio-visual activities, environmental protection, R&D, professional training, and recruitment of unemployed persons.

The most commonly used incentives are the investment tax credits. Luxembourg tax law provides for two types of investment tax credits.

First, a tax credit is available that amounts to 13% of the increase in investments in tangible depreciable assets made during the tax year. The increase in investment over a given tax year is computed as the difference between the current value of all qualifying assets and the reference value allocated to the same type of assets.

Independently, the company may benefit from a 8% tax credit on the first EUR 150,000 of qualifying new investments and a 2% tax credit on the amount of new investments exceeding EUR 150,000 in tangible depreciable assets as well as investments in sanitary and central heating installation in hotel buildings and investments in buildings used for social activities. The above 8% and 2% rates are increased to 9% and 4% for investments eligible for special depreciation (i.e. investments favouring the protection of the environment, the realisation of energy savings, or the creation of employment for handicapped workers). However, certain investments are excluded from the credit calculation, including investments in real property, intangible assets, and vehicles (unless specifically allowed by the law).

Domestic law requires that investments be physically operated in Luxembourg or in the European Economic Area in order to be eligible for the incentive, unless the investment consists of shipping vessels operating in international waters. In addition, the tax benefit of the tax credit is limited to investments that are made within a Luxembourg business establishment and that are intended to be used permanently in Luxembourg.

Further to the Court of Justice of the European Union (CJEU) decision dated 22 December 2010 (Tankredeerei, C-287/10), the Luxembourg tax authorities issued a Circular letter confirming that the investment tax credit must be granted to any investment used within the EU and EEA member states.

Intellectual property (IP) regime

The law enacting the new IP regime was approved by the Luxembourg Parliament on 22 March 2018. The new IP measures entered into force as of 1 January 2018.

Under the new regime, eligible net income from qualifying IP assets benefits from an 80% exemption from income taxes. Consequently, a corporate taxpayer based in Luxembourg City with eligible net income will be taxed on such income at an overall (i.e. corporate income taxes plus municipal business tax) effective tax rate of 5.202% in the 2018 tax year. IP assets qualifying for the new regime also benefit from a full exemption from Luxembourg's NWT.

The levels of these exemptions are consistent with those given under the previous regime. However, the scope of the new regime, and the way in which income that is to benefit from the exemption is to be computed, are both markedly different. The 'nexus approach' focuses on establishing a direct connection between expenditures, the IP assets, and the income that can benefit from the beneficial regime.

In applying the new regime, each IP asset must be looked at separately, and income and expenditure linked to each asset thus needs to be identified. The only exception to this approach is when a closely linked family of products or services are involved, and it would be so complex as to make it impossible to adopt an asset-by-asset approach.

Two main groups of IP assets are eligible to benefit from the new regime:

- Inventions protected under patents, utility models, and other IP rights that are functionally equivalent to patents. More specifically, these comprise supplementary protection certificates for patents on pharmaceutical or phyto-pharmaceutical products, extensions to supplementary protection certificates to paediatric medicines, plant variety certificates, and orphan drug designations.
- Software protected by copyright under national or international norms.

Market-related IP, such as a trademark, is not eligible.

The prior Luxembourg IP regime (Article 50 *bis* of the LITL) allowed a tax exemption on 80% of the net income and capital gains derived or deemed to be derived from a wide variety of IP. The regime began to phase out on 1 July 2016, in line with the recommendations of the EU's Code of Conduct for Business Taxation Group and the OECD/G20 BEPS Project Final Report on Countering Harmful Tax Practices.

The prior IP regime was repealed effective 1 July 2016 for CIT and municipal business tax purposes and 1 January 2017 for NWT purposes.

Taxpayers owning IP assets that currently benefit from the prior IP regime will continue benefitting during the transitional period through 30 June 2021.

IP assets acquired after 1 January 2016 also may benefit from the prior IP regime through 30 June 2021, provided that:

- they were developed or acquired from unrelated parties before 1 July 2016, or
- they were acquired from a related party before 1 July 2016 (including through a tax-neutral transaction) and were already eligible for the prior IP regime or benefited from a foreign country's IP regime that was similar to the prior IP regime in Luxembourg before the acquisition.

IP assets acquired from any related party between 31 December 2015 and 30 June 2016 that did not benefit from an IP regime before being acquired will only be eligible for the prior IP regime through 31 December 2016.

IP assets acquired or developed after 30 June 2016 cannot benefit from the prior IP regime. Those assets and related income and expenses will be subject to the standard tax regime and rates or may benefit from a future IP regime that could be based on the 'nexus approach' prescribed by the EU Code of Conduct Group and the OECD to counter harmful tax practices.

R&D incentives

Luxembourg entities involved in innovative and R&D activities can benefit from financial support in addition to the specific IP tax regime and general tax incentives.

Innovation loans may be granted by the *Société Nationale de Crédit et d'Investissement* and may carry a fixed interest rate lower than the market rate. Financial support may also be granted in the form of cash grants or interest subsidies.

R&D projects or programmes receive financial support up to a maximum eligibility (percentage of costs eligible for the incentives) depending on the size of the beneficiary (private research companies or organisations) as follows:

- Large (25% to 100% depending on the investment).
- Mid-size (35% to 100%).
- Small (45% to 100%).

These incentives are available for:

- experimental development
- experimental development and cooperation
- industrial research
- industrial research and cooperation, or
- fundamental research.

Innovation in process and organisation and investment in innovation pools can benefit from financial support of between 15% and 35% (50% for public research companies).

Promotion and development of innovation pools can benefit from financial support of up to 50% for private organisations or 75% for public research companies.

Research regarding technical feasibility can benefit from financial support of up to 40% or 50% if prior to experimental development and up to 65% or 75% if prior to experimental research.

Other incentives by entity

Investment funds

Investment funds resident in Luxembourg generally are exempt from CIT, municipal business tax, and WHT on dividends. These investment funds are subject to the subscription tax and to the general registration duty regime.

Financial participation company (Soparfi)

A Soparfi (*Société de Participation Financière*) is neither a specific type of company nor a special tax regime. It is, rather, a name used to refer to resident companies that hold and manage the shareholdings of subsidiaries. As any Luxembourg resident company, a Soparfi is subject to CIT, municipal business tax, and NWT; it benefits from Luxembourg's DTTs, EU Directives (e.g. Parent Subsidiary Directive), the domestic participation exemption on dividends received, and capital gains on qualifying participations.

Private wealth management company (Société de gestion du Patrimoine Familial or SPF)

The SPF has been tailored to enter the private sphere of individuals for the purpose of wealth management. Its corporate objective is restricted to the acquisition, holding, management, and disposal of financial assets, to the exclusion of any commercial activity. As a general rule, an SPF is exempt from Luxembourg taxation on income and NWT in Luxembourg. A yearly subscription tax of 0.25% is due on the basis of paid-up capital, share premium, and excessive debts. Subscription tax, however, is capped at EUR 125,000. No WHT applies on dividends distributed by an SPF. Non-resident investors are not taxed in Luxembourg on dividends paid by an SPF or on capital gains realised on shares in an SPF.

Securitisation companies (SCs)

An SC is a company that carries out securitisation activities or participates in securitisation transactions. SCs are subject to normal corporate taxation based on their net accounting profit (i.e. gross accounting profits minus expenses). However, the commitment to remunerate the holders of securities (both capital and debt) issued by the SC qualifies as interest on debt even if paid as return on equity. SCs are not subject to NWT in Luxembourg.

Venture capital vehicle (Société d'Investissement en Capital à Risques or SICAR)

The SICAR is an entity mainly used for private equity investments. Incorporated under a corporate form, the SICAR is subject to income tax at the normal rate with the benefit of an exemption on income and gains (e.g. dividends, capital gains, liquidation proceeds, interest) from transferable securities qualifying as investments in risk capital, as well as income arising from investments in liquid assets pending their investment in risk capital for a maximum of 12 months. In addition, it can benefit from the European directives and DTTs. SICARs are exempt from NWT. Under the form of a limited partnership, the SICAR is treated as a tax transparent entity, and investors are taxed according to the rules of their country of residence. SICARs treated as tax transparent entities do not benefit from the European directives and DTTs. The SICAR mainly targets qualified or informed investors (i.e. 'professional' investors).

Financial services companies

Banks, securities depositaries, insurance and reinsurance companies, as well as other financial service companies, may benefit from specific regulations when establishing their taxable basis for CIT (e.g. provision for the neutralisation of unrealised exchange gains, general banking risk provision, provision for guarantee of deposits, mathematical reserves, and/or catastrophe reserves).

Shipping companies

Luxembourg-resident shipping companies are not subject to municipal business tax and can benefit from investment tax credits and accelerated depreciation (even for used assets).

Farming businesses

Farming businesses may deduct 30% of the amount of any new investment of up to a total of EUR 250,000 made in the business. Investment above this amount is eligible for a deduction of 20% of the difference between the investment amount and the aforementioned EUR 250,000 limit.

Withholding taxes

Dividends paid by a Luxembourg fully taxable company to its 'corporate' shareholders resident in a treaty country, which hold or commit themselves to hold a participation of at least 10% in the Luxembourg company (or shares with an acquisition price of at least EUR 1.2 million) for an uninterrupted period of at least 12 months, may be exempt from WHT (*see Note 1 below for more details*).

The following taxes are withheld on payments made. The WHT due on dividends paid to residents of a treaty country cannot exceed the non-treaty rate.

Notes

These notes are not extensive. The full text of the DTT should be checked for a comprehensive view on the conditions of application of reduced rates.

1. Under Luxembourg domestic law, no WHT is levied on dividends paid by a Luxembourg qualifying subsidiary to an entity that is:
   a. a collective entity falling within the scope of the Parent Subsidiary Directive
   b. a Luxembourg resident joint-stock company, which is fully taxable and does not take one of the forms listed in the LITL
   c. a PE of a collective entity falling under the previous categories
   d. a collective entity that is resident in a country with which Luxembourg has concluded a DTT and is fully liable to a tax corresponding to the Luxembourg CIT, or a domestic PE of such an entity
   e. a Swiss resident joint-stock company that is subject to Swiss CIT without benefiting from any exemption
   f. a joint-stock company or a cooperative company that is resident in an EEA member state (other than an EU member state) and is fully liable to a tax corresponding to the Luxembourg CIT, or
   g. a PE of a joint-stock company or of a cooperative company that is resident in an EEA member state (other than an EU member state), and
   h. at the date on which the income is made available, the beneficiary has been holding or undertakes to hold, directly, for an uninterrupted period of at least 12 months, a participation of at least 10%, or with an acquisition price of at least EUR 1.2 million in the share capital of the income debtor.

   Qualifying shareholders under (b) to (g) above need to be fully taxable collective entities subject in their country of residence to a tax similar to that imposed by Luxembourg. As a general rule, this requirement is met if the foreign tax is compulsorily levied at an effective rate of at least 9%, on a basis similar to the Luxembourg one.
2. Interest paid to non-residents generally is not subject to WHT in Luxembourg. However, interest that represents a right to profit participation on a bond may be assimilated to a dividend and subject to WHT. Further analysis should be made to determine the applicable reduced rate on the basis of the treaty (i.e. pursuant to dividend or interest clause).
3. Royalties paid to non-residents are not subject to WHT in Luxembourg, whether the companies are associated or not.
4. A WHT of 20% is withheld on defined interest income paid by a Luxembourg paying agent to resident individuals. Interest indirectly cashed through investment funds are out of the scope of this WHT.
5. DTTs have been concluded with Albania, Botswana, Cyprus, Kuwait, Kyrgyzstan, Oman, and Senegal, but are not yet in force. A new DTT with Hungary was signed, but domestic transposition procedures are still pending.
6. The recipient company (other than a partnership, as the case may be) holds (beneficially; for the DTT with Mauritius, directly) at least 10% of the Luxembourg company's capital (or at least 10% of the voting power in the Luxembourg company, as the case may be).

7. The recipient company (other than a partnership, as the case may be) holds (beneficially; for the DTT with Finland and the United Kingdom, directly or indirectly) at least 25% of the Luxembourg company's capital (or at least 25% of the voting power in the Luxembourg company, as the case may be).
8. The recipient company holds (beneficially), directly or indirectly, at least 30% of the Luxembourg company's capital and with an investment equivalent to at least 300,000 United States dollars (USD).
9. The recipient company (other than a partnership, as the case may be) directly holds (beneficially) at least 10% of the Luxembourg company's capital for an uninterrupted period of at least 12 months prior to the decision to distribute the dividends.
10. The recipient is a company (with the exception of general partnerships, limited partnerships, and cooperative societies) whose direct participation, held since the beginning of its financial year, in the capital of the company (with the exception of general partnerships, limited partnerships, and cooperative societies) paying the dividends is at least 25% or has an acquisition price of at least 250 million francs. The provisions of paragraph 1 (a) shall also apply where the dividends are paid to two or more companies (with the exception of general partnerships, limited partnerships, and co-operative societies) the sum of whose participations, held since the beginning of their respective financial years, in the capital of the company (with the exception of general partnerships, limited partnerships, and co-operative societies) paying the dividends is at least 25% or has an acquisition price of at least 250 million francs and where one of the recipient companies owns more than 50% of the registered capital of each of the other recipient companies.
11. The recipient company (other than a partnership, as the case may be) has held (beneficially) a participation of at least 10% in the distributing company's capital for an uninterrupted period of at least 12 months.
12. The rate of WHT is 5% if the beneficial owner is a company that directly or indirectly owns at least 10% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 100,000, or the equivalent in Georgian currency. No WHT is levied when the beneficiary company directly or indirectly owns at least 50% of the capital of the company paying the dividends and made an investment in the capital of the paying company of more than EUR 2 million, or the equivalent in Georgian currency.
13. No WHT is levied if the recipient company (other than a partnership) holds (beneficially) at least 10% of the Luxembourg company's capital or a participation with an acquisition price of at least EUR 1.2 million.
14. The recipient company holds at least 25% of the Luxembourg company's voting shares during the period of six months immediately before the end of the accounting period in which the distribution of profits takes place.
15. The beneficial owner is a company (other than a partnership) that holds at least 15% of the Luxembourg company's capital.
16. No WHT is levied when the beneficiary of the dividend is a company (other than a partnership) that has directly held a participation of at least 10% (or with an acquisition price of at least EUR 1.2 million) of the distributing company's share capital for an uninterrupted period of at least 12 months. The rate of 5% of WHT applies if said participation has been held for less than 12 months.
17. The beneficial owner is a company (other than a partnership) that holds at least 20% of the Luxembourg company's capital.
18. The beneficial owner of the dividends is a company (other than a partnership) that has directly held a participation of at least 10% of the distributing company's capital for an uninterrupted period of at least 24 months preceding the payment date of the dividend.
19. The recipient company holds at least 10% of the Luxembourg company's capital and made an investment in the capital of the paying company of more than EUR 80,000, or the equivalent in roubles.
20. The recipient company (other than a partnership) holds at least 25% of the Luxembourg company's capital for an uninterrupted period of at least one year preceding the payment date of the dividend.
21. The 5% WHT applies if the beneficial owner is a company (other than a partnership) that directly holds at least 10% of the Luxembourg company's capital. No WHT is levied if the beneficial owner is a company that is a resident of the other contracting state and that directly holds, for an uninterrupted period of two years, at least 10% of the capital of the company paying the dividends, or if the beneficial owner is a pension fund.
22. A 5% WHT is levied on dividend distributions where the beneficial owner is a company that holds at least 10% of the voting power of the paying company. No WHT is levied when the US company has directly held, during an uninterrupted period of two years preceding the payment date of the dividend, at least 25% of the voting rights of the paying company and certain conditions regarding the nature of activities performed by the distributing company are met.
23. The rate of 5% of WHT applies where the recipient company directly or indirectly owns at least 50% of the share capital of the paying company or has contributed more than USD 10 million, or the equivalent in Luxembourg or in Vietnamese currency, in the capital of the company paying the dividends. The rate of 10% of WHT applies where the beneficial owner is a company that directly or indirectly holds at least 25% but less than 50% of the capital of the company paying the dividends and has contributed not more than USD 10 million, or the equivalent in Luxembourg or Vietnamese currency, in the capital of the company paying the dividends.
24. The 15% WHT applies if the beneficial owner is a collective investment vehicle treated as a body corporate in Taiwan. The 10% WHT applies in all other cases.
25. The 5% WHT applies if the beneficial owner is an individual who directly holds at least 10% of the Luxembourg company's capital and who has been resident in Qatar for a period of 48 months immediately preceding the year within which the dividends are paid. The 0% WHT applies if the beneficial owner is a company that directly holds at least 10% of the Luxembourg company's capital.

26. The DTT is applicable as of 1 January 2018.
27. The DTT will enter into force as of 1 January 2019, provided the exchange of the instruments of ratification between Luxembourg and Cyprus takes place during 2018.
28. On 20 March 2018, the Luxembourg and French governments signed a new DTT with France, together with an accompanying Protocol. Assuming that both the Luxembourg and French governments now complete, without any major delay, the necessary processes for ratification of the new DTT, the provisions of the new DTT could be applicable in many situations from as soon as 1 January 2019. The WHT on dividend distributions made by a company resident in a contracting state should be 0%, provided that the effective beneficiary of the dividends is a company resident in the other contracting state that holds at least 5% of the share capital in the distributing company for at least 365 days. The WHT rate on dividend distributions should be 15% in any other cases.

Tax administration

Taxable period

The taxable period for Luxembourg fully taxable resident entities follows the financial year (i.e. accounting year) of the company.

Companies generally use the calendar year for accounting purposes but may apply a different accounting year. The taxable period would, in such cases, correspond to this different accounting year. The tax year is the year in which the accounting year ends.

Tax returns

Companies must file their tax returns by 31 May of each year following the calendar year during which the income was earned. As of FY 2017, tax returns for companies liable to CIT have to be mandatorily filed electronically.

Assessments are issued after the end of the tax year and normally can be finalised within five years, although the delay may extend to ten years if the declaration is found to be incomplete or inexact, with or without the intention of fraud. Once issued, the tax assessment notice is, in principle, final (unless new facts come to light).

Tax assessments are issued by the tax authorities immediately upon receipt of the tax return, based on the taxable profit reported by the company. The tax authorities may then reassess or request more information on the return within the period of five years that follows the receipt of the tax return.

Luxembourg companies are free to choose the currency in which they wish to prepare their commercial accounts to the extent that it is freely tradable currency. Luxembourg companies that expect to conduct most of their business in a currency other than euros will therefore generally opt to use that 'foreign' functional currency to draw up their financial statements. In particular, this will save such companies from having to recognise, for accounting purposes, foreign exchange gains and losses that do not reflect the economic reality of their business.

Nevertheless, as a general rule, Luxembourg taxpayers in such a situation have until now been required to file their tax returns in euros, basing these returns on euro-denominated tax balance sheets. Luxembourg taxpayers are allowed, upon request, to determine their taxable basis solely in a 'foreign' functional currency, and then only having to convert the final basis figure into euros. This has averted the need to establish a euro-denominated tax balance sheet simply for tax filing purposes.

Circular L.G.-A n°60, issued by the Luxembourg tax authorities on 21 June 2016, formalises this well-established practice and provides a clear framework.

Payment of tax

Quarterly tax advances must be paid. These payments are fixed by the tax administration on the basis of the tax assessed for the preceding year or on the basis of the estimate for the first year. This estimate is given by the company pursuant to the request of the Luxembourg tax authorities.

Final payment of CIT must be paid by the end of the month that follows the month of reception by the company of its tax assessment.

Topics of focus for tax authorities

Further to the introduction of a comprehensive legal framework in this respect, Luxembourg tax authorities focus increasingly on transfer pricing matters, and the methods used to determine the arm's-length remuneration of Luxembourg-based companies are being closely assessed by the Luxembourg tax authorities.

Other issues

Implementation of the Foreign Account Tax Compliance Act (FATCA)

FATCA is a set of information reporting rules designed to prevent and detect tax evasion by United States (US) persons. It reflects and promotes a global trend towards greater tax transparency and increased worldwide efforts to combat tax fraud in many sectors of the financial world. It also builds the basis for other international developments in this respect, such as the Common Reporting Standard (CRS) initiated by the OECD.

Even though FATCA originated in the United States, it also affects non-US entities.

Luxembourg signed an Intergovernmental Agreement (IGA) Model 1 with the United States on 28 March 2014 under the terms of which FATCA will be applied in Luxembourg. The IGA was ratified on 24 July 2015 by the Luxembourg Parliament.

Based on the IGA, Luxembourg financial institutions (i.e. depositary and custodial institutions, certain insurance companies, and investment entities that do not benefit from an exemption) have to comply with some due diligence and registration duties. In addition, they have to report on FATCA to the Luxembourg tax authorities by 30 June each year (with respect to financial accounts existing in the previous year) even though they do not have any US reportable accounts (in this case, a nil report is required). The Luxembourg tax authorities will then automatically exchange this information with the US Internal Revenue Service (IRS) by 30 September.

Apart from Luxembourg banks, insurance companies, funds, or other entities that fall within the definition of investment entities (certain holding companies, securitisation vehicles, etc.) might be subject to full FATCA obligations despite the fact that they have neither US investments nor US investors. If the entity being an in-scope financial institution does not comply with its FATCA obligations as implemented under Luxembourg law, it risks being subject to local penalties (up to EUR 250,000 and 0.5% of the amount incorrectly reported) in addition to a 30% WHT in certain limited cases.

It is worth noting that the IGA provides in its Annex II some deemed-compliant categories (e.g. Collective Investment Vehicle, Sponsored Investment Entity, Luxembourg Investment Advisors and Investment Managers) under which Luxembourg financial institutions, should they qualify for one of these categories, would be subject to lighter FATCA obligations as Non-Reporting Foreign Financial Institutions.

In order to comply with their FATCA obligations, financial institutions need to know the FATCA status of their account holders, investors, policy holders, etc. Therefore, even entities that do not qualify as financial institutions should analyse their FATCA status, as they need to certify it to their financial counterparts.

Implementation of the Common Reporting Standard (CRS)

On 21 July 2014, the OECD released the Standard for Automatic Exchange of Financial Account Information in Tax Matters, including the Commentary on the CRS. CRS seeks to establish the automatic exchange of tax information as the new global standard. The automatic exchange of information involves the systematic and periodic transmission of extensive taxpayer information from the country in which a taxpayer’s financial accounts are located to that taxpayer’s country of residence.

Similar to the provisions of FATCA and the various IGAs between the US government and partner governments around the world, CRS imposes obligations on financial institutions, including some holdings companies, across the financial services market to review and collect information in an effort to identify an account holder’s country of residence and then, in turn, to provide certain specified account information to that home country’s tax administration.

The CRS has been incorporated in the amended Directive on Administrative Cooperation (DAC 2) officially adopted by the European Council on 9 December 2014. On 24 December 2015, the Luxembourg CRS law of 18 December 2015 was published, enacting the CRS into Luxembourg law with an entry into force as of 1 January 2016. Therefore, Luxembourg financial institutions had, as of this date, to on-board new clients/investors according to specific procedures and review high value individual clients/investors no later than 31 December 2016. The CRS due diligence of their other pre-existing clients/investors (including all entities) had to be finalised no later than 31 December 2017.

Based on the result of those on-boarding and due diligence procedures, the Luxembourg financial institutions have to file CRS reports to the Luxembourg tax authorities by 30 June each year (with respect to financial accounts maintained in the previous year). The Luxembourg tax authorities will then automatically exchange this information with the relevant other jurisdictions by 30 September.

The CRS report will have to comply with the specific format defined by the Luxembourg tax authorities’ Circular ECHA 4. The jurisdictions for which data must be exchanged are listed in a Grand-Ducal Decree, which is updated generally once a year.

FATCA and CRS common data protection treatment

According to the Luxembourg FATCA and CRS Law, as well as Luxembourg data protection rules, each individual concerned (including controlling persons of certain entities) shall be informed on the processing of one’s personal data before a Luxembourg financial institution processes the data for FATCA and CRS purposes. Furthermore, each individual concerned must be informed about the jurisdiction with which the data is exchanged.

Each individual subject to the FATCA and CRS reporting (including controlling persons of certain entities) will have a right to access and rectify one's personal data but is also required to respond to the financial institution's request for relevant information.

EU state aid

As at 1 January 2018, the EC has opened four formal state aid investigations involving Luxembourg companies to examine whether there was any breach of the EU rules on state aid.

Amongst these cases, the EC published two opening decisions, and two final decisions, which Luxembourg has appealed before the General Court of the European Union. These formal investigations relate in particular to tax rulings (including APAs) granted by Luxembourg.

Upon the publication by the EC of each of the opening/final decision(s), the Luxembourg government consistently stated that Luxembourg is confident that the allegations of state aid are unsubstantiated and that it will be able to convince the EC that no particular tax treatment or selective advantage was granted.

Significant developments

Tax incentives for the tax year 2018

On 13 December 2017, the Legislative Assembly approved certain tax incentives proposed by the Chief Executive of Macau in the Budget for the financial year 2018. The key tax incentives include the following:

- The tax-free income threshold for complementary (corporate) tax has been increased from 32,000 Macanese patacas (MOP) to MOP 600,000 for income derived in the tax year 2017. Taxable income over MOP 600,000 is taxed at 12%.
- The standard MOP 3,500 reduction in property tax liabilities will continue to be available in the tax year 2018 for both self-use and rental properties. This incentive does not apply to corporate and Macau non-residents.
- Restaurants will continue to be exempt from tourism tax in the tax year 2018.
- Insurance policies written or renewed in the tax year 2018 and banking transactions in the tax year 2018 will continue to be exempt from stamp duty.
- Admission tickets for performances, exhibitions, and entertainment programs will continue to be exempt from stamp duty in the tax year 2018.
- Commercial and industrial operations will continue to be exempt from the annual industrial tax in the tax year 2018.

Taxes on corporate income

Complementary tax is imposed on the worldwide income earned by Macau-registered entities, irrespective of where their residence or headquarters are situated and irrespective of the nature of the income. The exception to the foregoing is rental income from leasing of immovable properties located in Macau, which is taxed separately under the property tax regime.

Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

According to the Macau Complementary Tax Law, complementary tax is imposed on a progressive rate scale ranging from 3% to 9% for taxable profits below or equal to MOP 300,000 and 12% for taxable profits over MOP 300,000. Taxable profits below MOP 32,000 are exempt from tax.

According to the Budget for the financial year 2018 approved by the Legislative Assembly (2018 Budget), the tax-free income threshold for complementary tax has been increased from MOP 32,000 to MOP 600,000 for income derived in the tax year 2017 (taxable income in excess of MOP 600,000 is taxed at 12%). The changes in the tax-free income threshold and the tax brackets are subject to approval by the Legislative Assembly on an annual basis unless such amendments are written into the relevant tax laws.

Types of taxpayers and associated tax bases

Group A taxpayers

Taxpayer entities whose registered capital reached MOP 1 million, or whose average taxable profits reached MOP 500,000 per year in three consecutive years, will automatically become Group A taxpayers in the tax year following the year in which the relevant notification is issued by the Macau Finance Bureau (MFB). A taxpayer entity can also elect to become a Group A taxpayer by filing a Group A declaration form. Profits of Group A taxpayers are assessed based on the actual accounting income after making necessary tax adjustments.

Group B taxpayers

Group B taxpayers refer to any individual or any other form of companies not mentioned above and those taxpayers that do not keep detailed accounting records. Profits of Group B taxpayers are assessed on a deemed basis if the reported income is below the internal parameters set by the MFB for taxpayers in similar industries.

Corporate residence

Corporate residence is generally determined by reference to the place of establishment.

Permanent establishment (PE)

There is no specific definition of PE in the Macau Complementary Tax Law. Technically speaking, there are two major criteria for determining whether a foreign entity should be subject to complementary tax, and the key phrases are ‘engaging in commercial/industrial activities’ and/or ‘rendering services in Macau’. These phrases are also not defined. Generally, if a foreign entity is engaged in commercial/industrial activities and/or rendering services in Macau, the resultant gain from such commercial/industrial activities and/or services rendered will be subject to complementary tax.

Other taxes

Value-added tax (VAT)

There is no VAT regime in Macau.

Customs duties/import tariffs

Apart from consumption tax imposed on tobacco and spirits entering into Macau, there are no customs duties/import tariffs in Macau.

Consumption tax (excise duty)

Consumption tax is imposed only on tobacco and spirits entering into Macau.

There are two methods for determining the amount of consumption tax payable, by quantity or by value. The former method of assessment is based on the weight or volume of goods and the latter is based on the price of the goods imported into Macau.

The rate of consumption tax varies depending on the classification of the imported goods.

Property tax

Property tax is imposed annually on the owner of buildings situated in Macau. This is first payable after acquiring a property or upon the expiry of the property tax exemption period, if applicable. Different exemption periods are granted, depending on the location of the property. Additional exemption periods may apply in special cases.

For leased properties, property tax is charged at 10% on the actual rental income, and, by application, a maximum deduction based on 10% of the rental income derived to cover repair and maintenance expenses incurred will be granted if approved by the MFB.

For self-use properties, property tax is charged at 6% on the official ratable value as established by the appointed committee of the MFB. A deduction of 10% of the official ratable value to cover repair and maintenance expenses will be automatically granted for self-use property. If the property is not occupied, the owner can apply for an exemption from property tax, the approval of which is entirely at the discretion of the MFB.

According to the 2018 Budget, there is a standard MOP 3,500 reduction in the property tax liabilities assessed in the tax year 2018 for both self-used and rental properties. This incentive does not apply to corporate and Macau non-residents.

Stamp duty

Stamp duty is payable on certain types of documents and stampable transactions at a small fixed amount or at rates ranging from 0.1% to 10% on the value represented by the documents and transactions.

The charge to stamp duty has been extended to property transfers and the irrevocable transfer of certain assets. Stamp duty at progressive rates ranging from 1% to 3% is payable on transfer of immovable property with a surcharge of 5% on the duty payable, resulting in effective stamp duty rates of 1.05% to 3.15%. The irrevocable transfer of certain assets without consideration is subject to a 5% stamp duty.

Insurance policies, written or renewed, and banking transactions have been exempt from stamp duty since 2005. This exemption has been approved by the Legislative Assembly and will continue to be available in the tax year 2018.

Admission tickets for performances, exhibitions, and any kind of entertainment programmes are exempt from stamp tax for the tax year 2018, as approved by the Legislative Assembly. This exemption, if extended, will be published by the Macau government on an annual basis.

Additional stamp duty for acquisition of second residential property and beyond

A transferee acquiring residential property will be subject to additional stamp duty if the transferee owns other residential property at the time of acquisition. Such additional stamp duty is applicable to individual, corporate, as well as a transferee acquiring more than 80% of a company that owns Macau residential property. The applicable rate is 5% on the transfer consideration for acquisition of the second residential property and 10% on the transfer consideration for acquisition of the third residential property and onward. A transferee holding only one residential property but wishing to dispose it and acquire another residential property as replacement can apply for refund of the additional stamp duty paid if the disposal takes place within one year from the date of acquisition.

Special Stamp Duty (SSD)

The transferor of a residential property, commercial property, office, car-parking space, or property under construction is subject to SSD at 20% on the value of the property if the property is resold within a year of its purchase. The SSD rate is reduced to 10% if the resale takes place between one and two years after the purchase. The SSD is also applicable to transfers of an 80% or more shareholding interest in a Macau company that has properties.

Buyer Stamp Duty (BSD)

A company, an entrepreneur, or a non-Macau resident acquiring a residential property in Macau is subject to BSD at a flat rate of 10%, on top of the existing Stamp Duty and SSD, if applicable.

Professional (Salaries) Tax

Professional Tax is payable by anyone receiving income from employment services performed in Macau or from a Macau employment. In Macau, the Professional Tax reporting, withholding, and remittance obligations rest with the employer.

Payroll taxes

There is a pay-as-you-earn (PAYE) system, similar to those used in other countries, which is applicable to salaried individuals only. The employing entity is obligated to report and collect the amount of professional tax payable from its employees each month and remit such payments to the MFB before the 15th day of the month following the quarter-end for local resident employees and foreign employees with valid work visas.

Social security fund contribution

Social security fund contribution in the total amount of MOP 90 per month is payable for resident employees. The employer contributes two-thirds of the amount (i.e. MOP 60) and the employee contributes one-third of the amount (i.e. MOP 30).

Annual industrial tax

The annual industrial tax has been exempted for the tax year 2018 and has been exempted on an annual basis by the Macau government since 2002.

Under the Industrial Tax Code, all commercial or industrial operations carried out in Macau are subject to industrial tax at the beginning of each year. The amount of the tax is dependent upon the nature of the business. The table below is an illustration of the tax amounts applicable to certain types of businesses in Macau.

Type of business	Tax (MOP)
Commercial banks	80,000
Construction companies	500
Hotels	500

Type of business	Tax (MOP)
Insurance companies	500
Textile companies	500

Special gaming tax

Special gaming tax is levied at 35% on the gross gaming revenue derived by gaming concessionaires authorised to carry on the operation of games of chance in Macau under Law 16/2001.

Tourism tax

Tourism tax is imposed at the rate of 5% on bills of services, excluding telecommunication and laundry services, and service charges of up to 10% rendered in Macau by establishments such as hotels, guest houses, dancing halls, night clubs, massage/sauna parlours, gymnasiums, karaoke, and the like. Such tax is generally borne by consumers.

Restaurants are exempt from tourism tax in the tax year 2018 and have been exempt, via an exemption published on an annual basis by the Macau government, since 2002.

Motor vehicle tax

Motor vehicle tax is imposed on the sale of new motor vehicles to consumers and the importation of new motor vehicles for self-use. Exemptions are available to certain persons and organisations and for certain specific usages. Generally, motor vehicle tax is levied based on the listed selling prices as registered with the MFB. The rate of motor vehicle tax varies depending on the type of motor vehicle and its value.

Land rent

Land rent is payable by lessees of leasehold land in Macau on an annual basis according to the amount specified in the relevant lease contract.

According to the 2018 Budget, land rent below MOP 100 shall not be collected by the MFB in the tax year 2018. However, any such amount already collected shall not be refunded.

Branch income

Branch income is subject to tax at the same rate as that for corporations. The taxable income is ascertained based on branch accounts.

Income determination

The paragraphs below describe the tax acceptable treatments under the prevailing Complementary Tax Law and are for reference only.

Inventory valuation

Inventory should be stated at actual cost, and conformity between book and tax reporting is required. Market selling price or replacement cost is allowed only in special circumstances, and prior approval of the Director of the MFB is required for adoption of such inventory valuation methods. The write-down of inventory values is not permitted.

Capital gains

Gains or losses from the realisation of capital assets of a corporate taxpayer are treated as current revenue or expense items for complementary tax purposes.

Dividend income

Dividends from all sources are subject to complementary tax in the hands of a recipient incorporated in Macau unless the dividends were paid out of profits that have been taxed at the corporate level in Macau. Where dividends to shareholders are paid out of profits of a Macau entity that have not been taxed in Macau, complementary tax will technically be charged on the dividend distribution to the shareholders.

Interest income

Interest income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax.

Royalty income

Royalty income received by or accrued to a corporate taxpayer in Macau is subject to complementary tax. There is currently no withholding tax (WHT) imposed on royalties paid or accrued to a non-resident provided that such non-resident has not carried on commercial/industrial activities in Macau.

Foreign income

Companies incorporated in Macau are subject to complementary tax on worldwide income, wherever received or credited. There are no provisions in the Macau Complementary Tax Law that allow foreign income to be deferred for tax purposes. Currently, double taxation relief is available under the respective double taxation agreements (DTAs) that Macau has with Cabo Verde, the People's Republic of China, Mozambique, and Portugal.

Deductions

Please note that the assessor is empowered to disallow any business expenses (e.g. entertainment, travelling) where the amount incurred is considered to be excessive.

Depreciation

An initial allowance of 20% is granted on buildings. The rates of tax depreciation are detailed in Decree-Law No.4/90/M, dated 5 March 1990. The Decree-Law prescribes the maximum annual tax depreciation rates and the number of years of asset life for different asset classes under the straight-line method. For illustration, the maximum depreciation rates and the maximum useful life currently applicable to the general types of assets are set out below:

Assets	Maximum annual percentage rate (%)	Maximum number of years
Industrial buildings	4	50
Office and residential buildings	2	100

Assets	Maximum annual percentage rate (%)	Maximum number of years
Machinery and installations, air conditioning, elevators, equipment	10 to 20	20 to 10
Tools	20 to 33.3	10 to 6
Laboratory, telex and interior telephone equipment, furniture, filing systems, typewriters, and accounting machines	16.66 to 25	12 to 8
Computer hardware	25	8
Office installations	14.29	14
Trucks	14.29	14
Automobiles	20	10
Intangible assets, pre-operating expenses incurred prior to commencement of business	33.33	6
Deferred expenses arising in connection with increases in share capital, changes in form of business enterprises, issuance of debentures, marketing and other studies, and financial expenses incurred for the acquisition or own production of fixed assets prior to completion	33.33	6
Patents	10	20
Manufacturing licences, concessionary agreements, and similar rights	*	*
Trademark	*	*

** At the discretion of the authorities.*

In the case of commercial and industrial buildings, depreciation is not allowed for the value attributable to the cost of the freehold land. Where the value of the freehold land cannot be determined from the total cost of land and buildings, a portion equal to 20% is deemed to be attributable to the land value for the purpose of determining the value of buildings to be depreciated.
