Digital Products

Digital product management involves overseeing the development and lifecycle of digital offerings such as apps, software, or online services. For graduates entering this field, it includes market research, product design, and user experience optimisation. Digital product managers play a critical role in ensuring products meet market demands and deliver value to users. This career demands strong analytical skills, creativity, and a deep understanding of technology and user behaviour.

Work with and learn from industry experts

SAP

We combine our expertise in business processes and industry knowledge with SAP's cutting-edge cloud solutions to power sustainable growth for our clients spanning across their finance, procurement, tax, supply chain, and HR transformation.

Oracle

Addressing specific business needs, we leverage cutting-edge Oracle solutions and deliver impactful digital transformation for firms in finance transformation, digital operations, managed services, HR transformation and virtual delivery.

Salesforce

Help clients develop a world-class customer experience and unlock the full potential of customer value through state-of-the-art Salesforce implementation technology.

Regional Digital Ventures (RDV)

Work across our Asia Pacific team to build digital alliances with our technology partners and develop Digital Products and tools for our clients

At PwC, you can expect:
