

Discussion about VAT reports

Would you like to verify if your VAT reports are prepared in compliance with the law?

Discuss the correctness of your VAT reports with our experts.

Frequent legislative changes and unclear interpretation in the VAT area can mean that your internal tax team might not be aware of changes and does not reflect them in VAT reports. Is your tax team big enough to identify problematic areas?

We offer you the opportunity to meet with our VAT experts and discuss VAT areas that are unclear. You can also discuss the correctness of your preparation and reporting of transactions in Slovak VAT reports. You need only prepare a list of questions and a sample of prepared VAT reports.

Arrange a meeting with our VAT experts (manager or senior manager) with many years of experience in different industries who can answer your questions.
